Parsley Energy Announces Acquisitions and Updates Full-Year Guidance

AUSTIN, Texas, April 4, 2016 (BUSINESS WIRE) Parsley Energy, Inc. (NYSE: PE) (Parsley Energy or the Company) today announced that it has entered into agreements to acquire certain undeveloped acreage and producing oil and gas properties located adjacent to the Company s existing operating areas in the Southern Delaware and Midland Basins for an aggregate purchase price of \$359 million in cash (subject to customary purchase price adjustments).

Acquisition Highlights

22,908 net surface acres

Estimated current net production of approximately 2,300 Boe per day from nine producing horizontal wells and 97 vertical wells

Acquired assets include six horizontal wells in various stages of drilling and completion

Southern Delaware Basin

14,197 net acres in Reeves and Ward Counties, TX for approximately \$144 million

Estimated current net production of approximately 1,200 Boe per day from seven horizontal wells and 20 vertical wells

Adds approximately 700,000 drillable lateral feet based on projected horizontal drilling inventory in one Wolfcamp flow unit; incremental value from additional Wolfcamp flow units and multiple Bone Spring targets

Parsley to receive one drilled but uncompleted horizontal well at closing

Select offset wells demonstrated 24-hour initial production rates per thousand completed feet ranging from 180 Boe to 320 Boe in Reeves County and 152 Boe to 623 Boe in Ward County

Scheduled to close on or before May 3, 2016, subject to the satisfaction of customary closing conditions

Midland Basin

8,711 net acres in Midland, Upton, Reagan, and Glasscock Counties, TX for approximately \$215 million

Estimated current net production of approximately 1,100 Boe per day from two horizontal wells and 77 vertical wells

Adds 257 net horizontal drilling locations

Extends eight existing horizontal drilling locations by approximately 5,000 on average

Parsley to receive four drilled but uncompleted horizontal wells at closing, as well as one horizontal well to be completed by closing

Select offset wells demonstrated 24-hour initial production rates per thousand completed feet ranging from 236 Boe to 281 Boe in Glasscock County, 193 Boe to 195 Boe in Midland County, 254 Boe to 553 Boe in Upton County, and 176 to 270 Boe in Reagan County

Scheduled to close on or before May 16, 2016, subject to the satisfaction of customary closing conditions

We are excited to announce a set of bolt-on acquisitions that add to our premier asset bases in both the Midland and Southern Delaware Basins, stated Bryan Sheffield, CEO of Parsley Energy. These additions extend our running room in the Midland Basin and provide the critical mass necessary to make the Southern Delaware a core part of our ongoing development program. Together, the acquired properties increase our net acreage by 20%, and all have top-tier return potential.

Full-Year 2016 Guidance Update

Parsley Energy estimates that production from acquired producing wells and acquired wells to be completed will contribute approximately 1,500 Boe per day in 2016, and therefore raises full-year production guidance from 30.0-33.0 MBoe per day to 31.5-34.5 MBoe per day. In addition, to accommodate several incremental completions associated with acquired wells along with accompanying facilities and infrastructure spending to support these wells and ongoing development on acquired properties, the Company now expects capital expenditures of \$410-\$460 million in 2016, up from a previous range of \$380-\$430 million.
