The proposed merger of BFC and BBX is anticipated to simplify our corporate structure and intended to consolidate and streamline the combined companies. Bluegreen Corporation

Bluegreen is a sales, marketing, and management company focused on the vacation ownership industry. Bluegreen markets, sells and manages vacation ownership interests (VOIs) in resorts, which are generally located in popular, high-volume, drive-to vacation destinations. The resorts in which Bluegreen markets, sells or manages VOIs were either developed or acquired by Bluegreen, or were developed and are owned by third parties. Bluegreen earns fees for providing sales and marketing services to these third party developers. Bluegreen also earns fees by providing management services to the Bluegreen Vacation Club and property owners associations (POAs), mortgage servicing, VOI title services, reservation services, and construction design and development services. In addition, Bluegreen provides financing to individual purchasers of VOIs.

During the three month period ended June 30, 2016, Bluegreen paid cash dividends of \$15.0 million to Woodbridge, Bluegreen's parent company, and Woodbridge in turn paid \$7.6 million of cash dividends to BFC and \$6.5 million of cash dividends to BBX Capital. - (1) Bluegreen's sales of VOIs under its capital-light business strategy include sales of VOIs under fee-based sales and marketing arrangements, just-in-time inventory acquisition arrangements, and secondary market arrangements. Under just-in-time arrangements, Bluegreen enters into agreements with third party

developers that allow Bluegreen to buy VOI inventory from time to time in close proximity to the timing of when Bluegreen intends to sell such VOIs. Bluegreen also acquires VOI inventory from resorts POA and other third parties close to the time Bluegreen intends to sell such VOIs. Such VOIs are typically obtained by the POAs through foreclosure in connection with maintenance fee defaults, and are generally acquired by Bluegreen at a significant discount. Bluegreen refers to sales of inventory acquired through these arrangements as Secondary Market Sales.

- (2) Equity trade allowances are amounts granted to customers upon trading in their existing VOIs in connection with the purchase of additional VOIs.
- (3) See the supplemental tables included in this release for a reconciliation of EBITDA to net income.

Bluegreen Summary for the Three and Six Months Ended June 30, 2016

System-wide sales of VOIs were \$159.7 million and \$286.7 million during the three and six months ended June 30, 2016, respectively, and \$139.9 million and \$249.1 million during the three and six months ended June 30, 2015, respectively. The growth in system-wide sales during the three and six months ended June 30, 2016 is primarily attributable to an increase of 19% and 21%, respectively, in the number of total prospect tours, which included an increase of 27% and 29%, respectively, in the number of new prospect tours, and an increase of 8% and 7%, respectively, in the average sales price per transaction. These increases were partially offset by a decrease of 11% and 10%, respectively, in the sale to tour conversion ratio for total prospects and a decrease of 11% and 9%, respectively, in the sale to tour conversion ratio for new prospects.

Fee-based sales commission revenue was \$54.2 million and \$48.0 million during the three months ended June 30, 2016 and 2015, respectively, and \$94.3 million and \$80.6 million during the six months ended June 30, 2016 and 2015, respectively. The increase in the sales of third-party developer inventory during the 2016 periods were due primarily to the factors described above related to the increase in system-wide sales of VOIs. In addition, Bluegreen earned an average sales and marketing commission of 70% and 69% during the three and six months ended June 30, 2016, respectively, as compared to 68% and 67% during the three and six months ended June 30, 2015, respectively. The increase in the second quarter of 2016 included an incentive commission of \$1.7 million earned as a result of the achievement of certain sales thresholds pursuant to the terms and conditions of the applicable contractual arrangement.

Other fee-based services revenue increased 4% to \$26.1 million for the three months ended June 30, 2016 and 6% to \$51.6 million for the six months ended June 30, 2016. Fee-based management services revenues increased during the 2016 periods compared to the 2015 periods primarily as a result of cumulative increases in the number of owners in the Bluegreen Vacation Club.

Net interest spread was \$13.9 million and \$12.6 million during the three months ended June 30, 2016 and 2015, respectively, and \$28.2 million and \$22.0 million during the six months ended June 30, 2016 and 2015, respectively. The increase in net interest spread during the three and six months ended June 30, 2016 is primarily due to additional interest income of \$0.4 million and \$2.4 million recognized by Bluegreen during the three and six months ended June 30, 2016, respectively, related to an \$80.0 million loan made to BFC during April 2015.

Bluegreen generated free cash flow (cash flow from operating activities less capital expenditures) of \$60.0 million during the six months ended June 30, 2016 compared to \$30.1 million during the six months ended June 30, 2015. The increase for the 2016 period is primarily due to decreased spending on the acquisition and development of inventory. During the first six months of 2016, Bluegreen paid \$5.2 million for development expenditures primarily related to the Bluegreen/Big Cedar Vacations Joint Venture, as compared to \$19.7 million in the 2015 period. Additionally, Bluegreen paid \$2.7 million for Just-in-Time inventory purchases during the first six months of 2016 as compared to \$9.9 million during the same 2015 period. This increase was partially offset by the impact of a decrease in cash realized within 30 days of sale to 41% during the six months ended June 30, 2016 from 47% during the six months ended June 30, 2015.

The following tables present Bluegreen's EBITDA, defined below, for the three and six months ended June 30, 2016 and 2015, as well as a reconciliation of EBITDA to net income (in thousands):

	For the Three Months		For the Six Months

Provision for Income and Franchise Taxes	7,056	9,949	16,953	18,607
Depreciation and Amortization	2,374	2,263	4,725	4,491
EBITDA	\$ 25,070	32,228	55,474	63,019

EBITDA is defined as earnings, or net income, before taking into account interest income (excluding interest earned on VOI notes receivable), interest expense (excluding interest expense incurred on financings related to Bluegreen's receivable-backed notes payable), provision for income taxes and franchise taxes, depreciation and amortization. For purposes of the EBITDA calculation, no adjustments were made for interest income earned on Bluegreen's VOI notes receivable or the interest expense incurred on debt that is secured by such notes receivable because they are both considered to be part of the operations of Bluegreen's business.

The Company considers Bluegreen's EBITDA to be an indicator of Bluegreen's operating performance, and it is used to measure Bluegreen's ability to service debt, fund capital expenditures and expand its business. EBITDA is also used by companies, lenders, investors and others because it excludes certain items that can vary widely across different industries or among companies within the same industry. For example, interest expense can be dependent on a company's capital structure, debt levels and credit ratings. Accordingly, the impact of interest expense on earnings can vary significantly among companies. The tax positions of companies can also vary because of their differing abilities to take advantage of tax benefits and because of the tax policies of the jurisdictions in which they operate. As a result, effective tax rates and provision for income taxes can vary considerably among companies. EBITDA also excludes depreciation and amortization because companies utilize productive assets of different ages and use different methods of both acquiring and depreciating productive assets. These differences can result in considerable variability in the relative costs of productive assets and the depreciation and amortization expense among companies.
