PROSPECTUS SUMMARY

The following summary highlights selected information contained elsewhere in this prospectus and does not contain all of the information you should consider before investing in our securities. Our Company

We are a clinical stage biopharmaceutical company engaged in drug research and development to create new therapies for fibrotic disease and cancer. Our drug candidates are based on our method of targeting galectin proteins, which are key mediators of biologic and pathologic functions. We use naturally occurring, readily-available plant materials as starting material in manufacturing processes to create proprietary complex carbohydrates with specific molecular weights and other pharmaceutical properties. These complex carbohydrate molecules are appropriately formulated into acceptable pharmaceutical formulations. Using these unique carbohydrate-based candidate compounds that largely bind and inhibit galectin proteins, particularly galectin-3, we are undertaking the focused pursuit of therapies for indications where galectins have a demonstrated role in the pathogenesis of a given disease. We focus on diseases with serious, life-threatening consequences to patients and those where current treatment options are limited. Our strategy is to establish and implement clinical development programs that add value to our business in the shortest period of time possible and to seek strategic partners when a program becomes advanced and requires additional resources.

We endeavor to leverage our scientific and product development expertise as well as established relationships with outside sources to achieve cost-effective and efficient development. These outside sources, amongst others, provide us with expertise in preclinical models, pharmaceutical development, toxicology, clinical development, pharmaceutical manufacturing, sophisticated physical and chemical characterization, and commercial development. We also have established several collaborative scientific discovery programs with leading experts in carbohydrate chemistry and characterization. These discovery programs are generally aimed at the targeted development of new carbohydrate molecules which bind galectin proteins and offer alternative options to larger market segments in our primary disease indications, such as subcutaneous or oral administration. We also have established a discovery program aimed at the targeted development of small molecules (non-carbohydrate) which bind galectin proteins and may afford options for alternative means of drug delivery (e.g., oral) and as a result expand the potential uses of our compounds. We are pursuing a development pathway to clinical enhancement and commercialization for our lead compounds in immune enhancement for cancer therapy as well as in both liver fibrosis and fatty liver disease and potentially psoriasis. All of our proposed products are presently in development, including pre-clinical and clinical trials.

We were founded in July 2000 as Pro-Pharmaceuticals, Inc., a Massachusetts corporation. On April 25, 2001, DTR-Med Pharma Corp., or DTR, which was incorporated in Nevada on January 26, 2001, entered into a stock exchange agreement with Pro-Pharmaceuticals, Inc., whereby DTR acquired all of the outstanding shares of common stock of Pro-Pharmaceuticals, Inc. On May 10, 2001, DTR changed its name to Pro-Pharmaceuticals, Inc. and on June 7, 2001, the Massachusetts corporation was merged into the Nevada corporation. On May 26, 2011, Pro-Pharmaceuticals, Inc. changed its name to Galectin Therapeutics Inc. In October, 2012, we moved our headquarters to a suburb of Atlanta, GA to be closer to a center of discovery collaboration while maintaining a contract laboratory operation in the Boston area.

The primary focus of our Company is to use galectin inhibitors to block galectin-3 and treat organ scarring or fibrosis in the liver. In particular, we are focused on the treatment of advanced fibrosis and cirrhosis, which we estimate to

have up to 6 million and 2 million patients, respectively, in the United States.

Description of Recent Developments

We commenced our Phase 2 program with GR-MD-02 for the treatment of nonalcoholic steatohepatitis, or NASH, with advanced fibrosis and cirrhosis in the second quarter of 2015. Our Phase 2 program consists of studies in two different NASH fibrosis indications, the NASH-CX trial in patients with NASH cirrhosis and the NASH-FX trial in NASH patients with advanced fibrosis, but not cirrhosis. Our Phase 2 program is supported by data generated with GR-MD-02 in our Phase 1b study along with preclinical work.

In our NASH-CX trial, a total of up to 156 patients at approximately 50 sites in the United States will be randomized to receive either 2 mg/kg of GR-MD-02, 8 mg/kg of GR-MD-02 or placebo, with 52 patients in each group. The primary endpoint is a reduction in change in hepatic venous pressure gradient (HVPG). Patients will receive an infusion every other week for one year, total of 26 infusions, and will be evaluated to determine the change in HVPG as compared with placebo. HVPG will be correlated with secondary endpoints of fibrosis on liver biopsy as well as with measurement of liver stiffness (FibroScan^(R)) and assessment of liver metabolism (¹³C-methacetin breath test, Exalenz), which are non-invasive measures of the liver that may be used in future studies. Patient recruitment for this study is now complete, and top-line data readout is expected at the end of 2017.

Table of Contents

The NASH-FX study is a shorter, four-month trial in 30 NASH patients with advanced fibrosis, but not cirrhosis, randomized 1:1 to either 9 bi-weekly doses of 8 mg/kg of GR-MD-02 or placebo. This study is entitled Phase 2 Study to Evaluate Non-Invasive Imaging Methods in Efficacy Assessment of GR-MD-02 for the Treatment of Liver Fibrosis in Patients With NASH With Advanced Fibrosis. The non-invasive assessments included in this trial include LiverMultiScan (a multi-parametric nuclear magnetic resonance imaging method developed by Perspectum Diagnostics) as the primary endpoint compared with magnetic resonance elastography and FibroScan as secondary endpoints. This study was initiated in September 2015 and is being performed at Brooke Army Medical Center in Fort Sam Houston in Texas. This trial is fully enrolled. Top-line data is expected to be available in September 2016.

In addition to the NASH fibrosis program, we are conducting an exploratory, open-label Phase 2a trial in patients with moderate-to-severe plaque psoriasis. This is based on the known increase in galectin-3 in the skin of psoriatic patients and a patient in the Phase 1 trial with psoriasis who had an apparent remission of psoriasis while receiving GR-MD-02. Determination of future development in this indication will depend on results of this exploratory study. In this open-label, unblinded trial (no placebo, all patients knowingly receive active drug), 10 patients with moderate to severe plaque psoriasis are administered GR-MD-02 every two weeks for 12 weeks. Enrollment of patients in this trial began in January 2016 and interim positive results were announced in May, 2016 when we reported positive results on the first four patients after 12 weeks of therapy. Based on these results, we modified the trial to include 24 weeks of therapy. We anticipate top line data for at least 5 patients who have received 24 weeks of therapy in this trial by the end of the third quarter of 2016.

We are also supporting independent research with GR-MD-02 in combination with two commercial melanoma drugs, as preclinical research has shown our compound enhances the efficacy of these therapies with this mechanism of action. A Phase 1b study with GR-MD-02 in combination with YERVOY® is ongoing, with successful completion of three patients in the first dosing group, and two patients enrolled in the second dosing group. Another, a Phase 1b study in combination with KEYTRUDA® has enrolled 3 patients of which 2 have completed treatment and additional patients are being enrolled. Preclinical work in mouse cancer models with GR-MD-02 added to checkpoint inhibitors shows a boost in anti-tumor immunity, a reduction in tumor size and increased survival, and we look forward to receiving human clinical data.

The lack of a drug interaction in this study will allow us to expand the number of patients eligible for its Phase 2 clinical trial. In addition, should GR-MD-02 be approved for marketing, the success of this study supports a broader patient population for the drug label.

The open-label Phase 1 study in normal healthy volunteer subjects tested a single dose of IV midazolam in the absence of GR-MD-02, following a single IV dose of GR-MD-02 and following three weekly IV doses of GR-MD-02. The four dosing periods were spaced one week apart, with midazolam PK determined in dosing periods one, two and four. A total of 17 subjects completed the study and met the primary endpoint of midazolam clearance when administered alone, compared with when administered with single and multiple doses of GR-MD-02. With completion of this study, the company does not anticipate further drug-drug interaction studies will be required in the development of GR-MD-02.

USE OF PROCEEDS

We will not receive any of the proceeds from a sale of any Common Stock offered pursuant to this prospectus.

DESCRIPTION OF SERIES B PREFERRED STOCK ISSUANCE

On February 12, 2009, we entered into definitive agreements with one investor, the 10X Fund, L.P., a Delaware limited partnership, or the 10X Fund, related to the issuance and sale of the following securities, the initial tranche of which was purchased on that date, which is referred to in this prospectus as the 10X Fund sale date:

900,000 shares of our Series B-1 convertible redeemable preferred stock, or Series B-1 Preferred Stock, each of which is convertible into two-thirds of a share of our common stock for a total of 600,000 shares of common stock;

2,100,000 shares of our Series B-2 convertible redeemable preferred stock, or Series B-2 Preferred Stock, and together with the Series B-1 preferred stock, the Series B Preferred Stock, each of which is convertible into two-thirds of a share of our common stock for a total of 1,400,000 shares of common stock;

Class A-1 warrants exercisable to purchase 1,000,000 shares of our common stock;

Class A-2 warrants exercisable to purchase 1,000,000 shares of our common stock; and

Class B warrants exercisable to purchase 4,000,000 shares of our common stock, which are referred to in this prospectus, together with the Class A-1 and Class A-2 warrants, as the 2009 warrants.

We sold the Series B-1 Preferred Stock and Series B-2 Preferred Stock for \$2.00 per share, each of which is convertible on a two for three ratio to shares of common stock at an effective price of \$3.00 per share. The conversion price, and number of shares issuable upon conversion, are subject to adjustment in the event of stock splits, recapitalizations and the like, but are not adjustable based on a discount or other floating rate relative to the future trading price of the common stock at the time of conversion(s). Absent such an adjustment event, the maximum number of common shares issuable upon conversion of the Series B Preferred Stock is 2,000,000.

The 2009 warrants are exercisable for five years at \$3.00 per share of common stock. The Class A-1, and Class A-2, are exercisable solely for cash and all of the Class B warrants, as amended, may be exercised cashlessly. In the second and third quarters of 2011, the 10X Fund exercised all of the Class A-1 warrants for aggregate proceeds to us of \$3,000,000 and was issued 1,000,000 shares of our common stock. In 2013 and early 2014, the 10X Fund exercised

all of the Class A-2 warrants for aggregate proceeds to us of \$3,000,000 and was issued 1,000,000 shares of our common stock. The exercise price of the 2009 warrants, and number of shares issuable upon exercise, are subject to adjustment in the event of stock splits, recapitalizations and the like, but not anti-dilution protection that is triggered by future offers or sales of common stock, or securities convertible or exercisable for common stock, at a price below the initial exercise price of warrants. Absent such an adjustment event, the maximum number of shares issuable upon exercise of the remaining 2009 warrants is 4,000,000. If all the remaining unexercised 2009 warrants were to be exercised for cash, we would receive additional gross proceeds of \$12,000,000.

By agreement in January 2011 with the holder of all shares of Series B Preferred Stock, we amended the terms of the Series B Preferred Stock to, among other things, (i) remove our right to compel conversion of the Series B Preferred Stock to shares of our common stock, (ii) extend the redemption dates to be the earlier of February 12, 2019, or the date of a promissory note issued to David Platt, Ph.D. pursuant to a separation agreement between him and the Company, (iii) provide that dividends are payable in cash or shares of our common stock valued at 100% of the volume weighted average price of the common stock for the 20 consecutive trading days prior to the dividend payment date on and after September 30, 2011, and (iv) require that any request for transfer of shares of Series B Preferred Stock to another holder shall result in an automatic conversion to shares of our common stock.

The 10X Fund acquired the Series B Preferred Stock and 2009 warrants in a series of tranches beginning on the 10X Fund sale date for gross proceeds to the Company of \$6,000,000 and net proceeds of \$5,532,955. The trading price of our common stock on the 10X Fund sale date was at or less than \$1.20. Accordingly, as of that date, the market value of the 2,000,000 shares of common stock underlying Series B Preferred Stock was approximately \$2,400,000, an amount substantially less than the gross or net proceeds received in this transaction. Similarly, the \$3.00 exercise price of the 2009 warrants was approximately 250% of the trading price of our common stock on the 10X Fund sale date.

Table of Contents

We previously registered 773,111 shares that we have issued to the 10X Fund as dividend shares on our Series B Preferred Stock through September 30, 2012.

We may issue shares of Series B-3 convertible redeemable preferred stock, or Series B-3 Preferred Stock, which series of Series B Preferred Stock would be created in connection with such issuance. In the event we do amend the Certificate of Designation of Preferences, Rights and Limitations Company for Series B Preferred Stock to create Series B-3 Preferred Stock, we expect that shares of Series B-3 Preferred Stock will have substantially the same rights and preferences as the existing shares of Series B Preferred Stock, including the right to receive dividends payable in shares of common stock of the Company.

DIVIDEND POLICY

We have never declared or paid cash dividends on our Common Stock. We currently intend to retain any future earnings and do not expect to declare or pay any cash dividends in the foreseeable future. Any future determination to pay dividends will be at the discretion of our board of directors, subject to applicable laws, and will depend on our financial condition, results of operations, capital requirements, general business conditions and other factors that our board of directors considers relevant.

Anti-Takeover Effects of Certain Provisions of Nevada Law

Effect of Nevada Anti-takeover Statute. We are subject to Section 78.438 of the Nevada Revised Statutes, an anti-takeover law. In general, Section 78.438 prohibits a Nevada corporation from engaging in any business combination with any interested stockholder for a period of three years following the date that the stockholder became an interested stockholder, unless prior to that date, the board of directors of the corporation approved either the business combination or the transaction that resulted in the stockholder becoming an interested stockholder. Section 78.439 provides that business combinations after the three year period following the date that the stockholder becomes an interested stockholder may also be prohibited unless approved by the corporation's directors or other stockholders or unless the price and terms of the transaction meet the criteria set forth in the statute.

Section 78.416 defines "business combination" to include the following:

any merger or consolidation involving the corporation and the interested stockholder or any other corporation which is an affiliate or associate of the interested stockholder;

any sale, transfer, pledge or other disposition of the assets of the corporation involving the interested stockholder or any affiliate or associate of the interested stockholder if the assets transferred have a market value equal to 5% or more of all of the assets of the corporation or 5% or more of the value of the outstanding shares of the corporation or represent 10% or more of the earning power of the corporation;

subject to certain exceptions, any transaction that results in the issuance or transfer by the corporation of any stock of the corporation with a market value of 5% or more of the value of the outstanding shares of the corporation;

the adoption of a plan of liquidation proposed by or under any arrangement with the interested stockholder or any affiliate or associate of the interested stockholder;

any transaction involving the corporation that has the effect of increasing the proportionate share of the stock of any class or series of the corporation beneficially owned by the interested stockholder or any affiliate or associate of the interested stockholder; or

the receipt by the interested stockholder or any affiliate or associate of the interested stockholder of the benefit of any loans, advances, guarantees, pledges or other financial benefits provided by or through the corporation.

In general, Section 78.423 defines an interested stockholder as any entity or person beneficially owning, directly or indirectly, 10% or more of the outstanding voting stock of the corporation and any entity or person affiliated with or controlling or controlled by any of these entities or persons.

Control Share Acquisitions. Sections 78.378 through 78.3793 of the Nevada Revised Statutes limit the voting rights of certain acquired shares in a corporation. The provisions apply to any acquisition of outstanding voting securities of a

Nevada corporation that has 200 or more stockholders, at least 100 of which are Nevada residents, and conducts business in Nevada (an issuing corporation) resulting in ownership of one of the following categories of an issuing corporation s then outstanding voting securities: (i) twenty percent or more but less than thirty-three percent; (ii) thirty-three percent or more but less than fifty percent; or (iii) fifty percent or more. The securities acquired in such acquisition are denied voting rights unless a majority of the security holders approve the granting of such voting rights. Unless an issuing corporation s articles of incorporation or bylaws then in effect provide otherwise: (i) voting securities acquired are also redeemable in part or in whole by an issuing corporation at the average price paid for the securities within 30 days if the acquiring person has not given a timely information statement to an issuing corporation or if the stockholders vote not to grant voting rights to the acquiring person s securities, and (ii) if outstanding securities and the security holders grant voting rights to such acquiring person, then any security holder who voted against granting voting rights to the acquiring person may demand the purchase from an issuing corporation, for fair value, all or any portion of his securities. These provisions do not apply to acquisitions made pursuant to the laws of descent and distribution, the enforcement of a judgment, or the satisfaction of a security interest, or made in connection with certain mergers or reorganizations.

The shares of Series A Preferred Stock accrue interest at 12% per annum payable at our option in cash or shares of common stock valued per share at the higher of \$6.00 or 100% of the value weighted average price of our shares of common stock for the 20 consecutive trading days prior to the applicable dividend payment date. Holders are entitled to vote as a class with the common stock and each share of Series A Preferred Stock is convertible at any time to one-sixth share of common stock, subject to adjustment in the event of a stock dividend, stock split or combination, reclassification or similar event. Series B Preferred Stock

Dividends. Holders of the Series B Preferred Stock are entitled to receive cumulative dividends at the rate of 12% per share per annum (compounding monthly) payable quarterly which may, at our option, be paid in cash or common stock. Pursuant to an agreement with the holder of all shares of Series B, on January 26, 2011, we amended and restated the Certificate of Designation of Preferences, Rights and Limitations for the Series B Preferred Stock, to provide that dividends are payable in cash or shares of Common Stock valued at 100% of the volume weighted average price of the Common Stock for the 20 consecutive trading days prior to the dividend payment date on and after September 30, 2011. If we do not pay any dividend on the Series B Preferred Stock, dividends will accrue at the rate of 15% per annum (compounding monthly).

Conversion Rights. Each share of Series B Preferred Stock is convertible into shares of Common Stock. Each share of Series B-1 and Series B-2 Preferred Stock is convertible into two-thirds (approximately 0.667) shares of Common Stock at the conversion price of \$3.00 per share at the option of the holder, at any time.

Redemption Rights. Pursuant to an agreement with the holder of all shares of Series B Preferred Stock, on January 26, 2011, we amended and restated the Certificate of Designation of Preferences, Rights and Limitations for the Series B Preferred Stock, to provide that, upon notice of not less than 30 trading days, a holder of Series B Preferred Stock may require us to redeem, in whole or in part at any time on or after the earlier of (a) February 12, 2019 or (b) the date of issuance of a promissory note to David Platt in connection with the achievement of certain milestones under his separation agreement.

The redemption price will be equal to the sum of the stated value of the Series B Preferred Stock, plus all accrued but unpaid dividends thereon, as of the redemption date. If we fail to pay the redemption price in cash on the redemption date, then the holders of the Series B requesting redemption may, at their sole option, automatically convert their shares of Series B Preferred Stock into a promissory note bearing interest at the rate of 15% per year and secured by a lien on all of our assets. So long as any shares of the Series B Preferred Stock remain outstanding, we are also subject to restrictions limiting, among other things, amendments to our organizational documents; the purchase or redemption of our capital stock; mergers, consolidations, liquidations and dissolutions; sales of assets; dividends and other restricted payments; investments and acquisitions; joint ventures, licensing agreements, exclusive marketing and other

distribution agreements; issuances of securities; incurrence of indebtedness; incurrence of liens and other encumbrances and issuances of any common stock equivalents.

Voting Rights. Except as noted below, the holder of each share of Series B Preferred Stock shall be entitled to the number of votes equal to the number of shares of Common Stock into which such share of Series B Preferred Stock would be convertible, and shall otherwise have voting rights and powers equal to the voting rights and powers of the Common Stock. With respect to the election of directors, the holders of the Series B Preferred Stock shall vote together as a separate class to elect two (2) members of the Board of Directors (the Series B Directors), and we shall take all reasonably necessary or desirable actions within its control (including, without limitation, calling special meetings of the Board of Directors, nominating such persons designated by the holders of the Series B Preferred Stock as directors on the applicable proxy statements and recommending their election) to permit the holders of the Series B Preferred Stock to nominate three additional (3) members of the Board of Directors (the Series B Nominees), who shall be subject to election by all shares our voting stock voting together as a single group. The holders of Series B Preferred Stock shall vote together with the holders of Common Stock and other voting capital stock to elect all other members of the Board of Directors.

Series C Super Dividend Preferred Stock

Conversion Rights. Each holder of Series C may convert all, but not less than all, of his Series C shares plus accrued and unpaid dividends into Common Stock at the price of \$6.00 per share of Common Stock (Conversion Price), such that approximately 1,667 shares of Common Stock will be issued per each converted share of Series C (accrued and unpaid dividends will be issued as additional shares). At September 30, 2015, the 176 outstanding shares of Series C were convertible into a total of approximately 293,392 shares of Common Stock.

Subject to the continuing obligation to pay post conversion dividends, we may convert all, but not less than all, of the Series C (plus all accrued and unpaid dividends) into Common Stock, at the Conversion Price, upon such time that the closing price of the Common Stock is no less than \$18.00 per share for 15 consecutive trading days.

Dividends. Holders of Series C shall be entitled to receive cumulative non-compounding dividends at the rate per share of Series C equal to the greater of (i) 6% per annum of the Stated Value (also defined as the Floor) or (ii) 2.5% of net sales until the total dividends paid is equal to the initial investment and 1.25% of net sales thereafter. The maximum amount each Series C shareholder will receive in dividend payments is equal to \$100,000 (the Maximum Payout). For purposes of this dividend calculation, net sales shall mean gross revenues actually received by us, from the sale or licensing of the product DAVANAT® (GM-CT-01), less chargebacks, returns, expenses attributable to product recalls, duties, customs, sales tax, freight, insurance, shipping expenses, allowances and other customary deductions.

The dividend shall be payable in arrears semiannually on March 31 and September 30, beginning with the first such date after the original issue date; provided, however, that all dividends and all other distributions shall cease, and no further dividends or other distributions shall be paid, in respect of each share of Series C from and after such time that the Maximum Payout has been paid in respect of such share of Series C. Such dividends shall be payable at the

Company's option either in cash or in duly authorized, fully paid and non-assessable shares of Common Stock valued at the higher of (i) \$3.00 per share or (ii) the average of the Common Stock trading price for the ten (10) consecutive trading days ending on the trading day that is immediately prior to the dividend payment date.

Series C Post Conversion Dividend Right. In the event that any share of Series C is converted into Common Stock before the Maximum Payout is paid in respect of such converted share of Series C, then the holder shall have the right to continue to receive dividends in respect of such converted share of Series C equal to the remaining payout (the Series C Preferred Stock Post Conversion Dividend Right) which shall be equal to the Maximum Payout less the cumulative dividends received through the conversion date. One share of Series C Preferred Stock Post Conversion Dividend Right shall be issued for each such converted share of Series C. The holder of each Series C Preferred Stock Post Conversion Dividend Right shall receive the remaining payout on an equal basis and in conjunction with the then outstanding shares of Series C and all the other then outstanding Series C Post Conversion Dividend Rights, in the same manner and subject to the same terms and conditions as applicable to the payment of dividends on each share of Series C, except that for purposes of calculating the dividend the Floor shall not apply. The Series C Preferred Stock Post Conversion Dividend Right shall have no stated value, liquidation preference or right to any dividends or distributions other than the remaining payout. The Series C Preferred Stock Post Conversion Right is subject to redemption in the same manner as outstanding Series C shares.

Liquidation Rights. In the event of any liquidation, dissolution or winding up of the Company, either voluntarily or involuntarily, the holders of Series C will receive \$10,000 per share plus accrued and unpaid dividends, payable prior and in preference to any distributions to the holders of Common Stock but after and subordinate to the Series A 12% Convertible Preferred Stock (Series A), Series B Preferred Stock, subject to the Maximum Payout.

Redemption. Upon a sale of the Company, we shall redeem all of the then outstanding shares of Series C and Series C Preferred Stock Post Conversion Rights within thirty (30) days after the transaction constituting the sale of the Company is closed and such closing is fully funded. The price to redeem a share of Series C and each redeemed Series C Preferred Stock Post Conversion Redemption Right shall be equal to (i) (A) the applicable return on investment (ROI) percentage, multiplied by (B) \$10,000, minus (ii) the cumulative dividends received through the redemption date. The redemption price shall be payable at our option either in cash or in shares of common stock valued at the higher of (i) \$3.00 per share or (ii) the average market price for the ten consecutive trading days ending immediately prior to the date of redemption. The ROI Percentage shall mean the percentage that applies as of the redemption date, as follows:
