Table of Contents**Capital adequacy requirement highlights**

The Basel Framework, based on the International Convergence of Capital Measurement and Capital Standards: A Revised Framework issued by the Basel Committee on Banking Supervision, requires the disclosure of capital adequacy information to ensure the enhanced effectiveness of market discipline. Our disclosure is made under the Matters Separately Prescribed by the Commissioner of the Financial Services Agency Regarding Capital Adequacy Conditions, etc. pursuant to Article 19-2, Paragraph 1, Item 5, Subitem (d), etc. of the Ordinance for Enforcement of the Banking Law (Ministry of Finance Ordinance No. 10 of 1982) (the FSA Notice No. 7 of 2014.).

With respect to the calculation of capital adequacy ratio, we have applied the international standard and adopted (a) the advanced internal ratings-based approach as a method to calculate the amount of credit risk weighted assets and (b) the advanced measurement approach as a method to calculate the amount equivalent to the operational risk.

Capital adequacy ratio**(1) Summary of capital adequacy ratio****Mizuho Financial Group (Consolidated)**

	As of September 30, 2015	(Billions of yen) As of September 30, 2016

Notes:

- Corporate does not include specialized lending exposure under supervisory slotting criteria.

2. Specialized lending is specialized lending exposure under supervisory slotting criteria.
<Analysis>

Risk weighted assets decreased mainly by Equities.

The decrease of Equities is mainly due to sale of some stocks and decline of stock prices in our portfolio.

Table of Contents

Status of Mizuho Financial Group's consolidated capital adequacy

Scope of consolidation

(1) Scope of consolidation for calculating consolidated capital adequacy ratio

(A) Difference from the companies included in the scope of consolidation based on consolidation rules for preparation of consolidated financial statements (the scope of accounting consolidation)

None as of September 30, 2015 and 2016.

(B) Number of consolidated subsidiaries

	As of September 30, 2015	As of September 30, 2016
Consolidated subsidiaries	147	142

Our major consolidated subsidiaries (and their main businesses) are Mizuho Bank, Ltd. (banking business), Mizuho Trust & Banking Co., Ltd. (trust business and banking business) and Mizuho Securities Co., Ltd. (securities business).

(C) Corporations providing financial services for which Article 9 of the FSA Notice No. 20 is applicable

None as of September 30, 2015 and 2016.

(D) Companies that are in the bank holding company's corporate group but not included in the scope of accounting consolidation and companies that are not in the bank holding company's corporate group but included in the scope of accounting consolidation

None as of September 30, 2015 and 2016.

(E) Restrictions on transfer of funds or capital within the bank holding company's corporate group

None as of September 30, 2015 and 2016.

(F) Names of any other financial institutions, etc., classified as subsidiaries or other members of the bank holding company that are deficient in regulatory capital

None as of September 30, 2015 and 2016.

Notes:

- The above figures are calculated based on International standard applied on a consolidated basis under the FSA Notice No. 20.
- In calculating the consolidated capital adequacy ratio, we underwent an examination following the procedures agreed with Ernst & Young ShinNihon LLC, on the basis of Treatment in implementing examination by agreed-upon procedures for calculating capital adequacy ratio (Industry Committee Practical Guideline No. 30 of the Japanese Institute of Certified Public Accountants). Note that this is not a part of the accounting audit performed on our consolidated financial statements. This consists of an examination under agreed-upon procedures performed by Ernst & Young ShinNihon LLC on a portion of the internal control structure concerning the calculation of the capital adequacy ratio and a report of the results to us. As such, they do not represent an opinion regarding the capital adequacy ratio itself nor the internal controls related to the calculation of the capital adequacy ratio.

Basic indicator approach	n.a.	41.6	n.a.	41.0
Total required capital (consolidated)	n.a.	4,984.7	n.a.	4,931.8

Notes:

1. EAD: Exposure at default.
2. PD: Probability of default.
3. LGD: Loss given default.
4. Required capital: For credit risk, the sum of (i) 8% of credit risk-weighted assets, (ii) expected losses and (iii) deductions from capital. For market risk, the market risk equivalent amount. For operational risk, the operational risk equivalent amount.
5. Total required capital (consolidated): 8% of the denominator of the capital adequacy ratio.
6. The major exposures included in each portfolio classification of internal ratings-based approach are as follows:

Corporate (except specialized lending)	Credits to corporations and sole proprietors (excluding credits to retail customers)
Corporate (specialized lending)	Credits which limit interest and principal repayment sources to cash flow derived from specific real estate, chattel, businesses, etc, including real estate non-recourse loan, ship finance and project finance, etc.
Sovereign	Credits to central governments, central banks and local governmental entities
Bank	Credits to banks and securities companies, etc.
Retail	Housing loans (residential mortgage), credit card loans (qualifying revolving retail loan) and other individual consumer loans and loans to business enterprises with total credit amount of less than ¥100 million, etc. (other retail).
Equities	Capital stock, preferred securities, perpetual subordinated debt, etc. (excluding trading assets)
	Either the PD/LGD approach or the market-based approach is applied to equities following the termination of the transitional measurement.
Regarded-method exposure	Investment trusts and funds, etc.
Purchase receivables	Receivables purchased from third parties excluding securities (excluding securitizations)
Securitizations	Transactions in the form of non-recourse and having a senior/subordinated structure, etc. (excluding specialized lending).

7. EAD calculated using the standardized approach for credit risk represents the amount before the deduction of specific reserve for possible losses on loans, reserve for possible losses on loans to restructuring countries and partial direct write-offs.
8. From the fiscal year ended March 31, 2016, we have been calculating EAD using the internal ratings-based approach for credit risk by taking into account the amount of collateral for derivatives transactions. EAD as of September 30, 2015 represents the amount adjusted to retroactively reflect this method.

Table of Contents**Credit risk****(4) Credit risk exposure, etc.**

We exclude regarded-method exposure and securitization exposure from the amount of credit risk exposure.

The outstanding balance is based on exposure at default.

No significant difference exists between period-end credit risk position and the average credit risk position during the twelve months ended September 30, 2015 and 2016.

Status of credit risk exposure**(A) Breakdown by geographical area**

Notes:

- Investment grade zone includes obligor ratings A1 through B2, non-investment grade zone includes C1 through E2 (excluding E2R), and default includes E2R through H1.
- Corporate does not include specialized lending exposure under supervisory slotting criteria.
- Each asset class includes purchased receivables.
- The commitments that can be terminated at any time without condition or terminated automatically are not included in the amount of undrawn commitments and weighted average of credit conversion factor.
- Regarding equity exposure under the PD/LGD approach, we recognized the risk-weighted assets by multiplying 1,250% by the expected loss (EL).

Table of Contents**(Reference) Obligor ratings****Obligor ratings**

(major category)	Definition of ratings	Classification
A1 A3	Obligors whose certainty of debt fulfillment is very high, hence their level of credit risk is excellent.	Investment grade zone
B1 B2	Obligors whose certainty of debt fulfillment poses no problems for the foreseeable future, hence their level of credit risk is sufficient.	
C1 C3	Obligors whose certainty of debt fulfillment and their level of credit risk pose no problems for the foreseeable future.	
D1 D3	Obligors whose current certainty of debt fulfillment poses no problems, however, their resistance to future changes in business environment is low.	Non-investment grade zone
E1 E2	Obligors who require close watching going forward because there are problems with their borrowing conditions, such as reduced or suspended interest payments, problems with fulfillment such as de facto postponements of principal or interest payments, or problems with their financial positions as a result of their poor or unstable business conditions.	
F1	Obligors who are not yet bankrupt but are in financial difficulties and are deemed to be very likely to go bankrupt in the future because they are finding it difficult to make progress in implementing their management improvement plans (including obligors who are receiving ongoing support from financial institutions).	Default
G1	Obligors who have not yet gone legally or formally bankrupt but who are substantially bankrupt because they are in serious financial difficulties and are not deemed to be capable of restructuring.	
H1	Obligors who have already gone bankrupt, from both a legal and/or formal perspective.	

* Obligors who have loans in need of monitoring (restructured loans and loans past due for three months or more) out of the obligors who require close watching going forward

Table of Contents**(O) Actual losses by asset class**

	(Billions of yen)	
	For the period from October 1, 2014 through September 30, 2015 Actual losses	For the period from October 1, 2015 through September 30, 2016 Actual losses
Corporate	180.1	11.7
Sovereign	0.0	0.0
Bank	(0.2)	(0.8)
Residential mortgage	(2.8)	(0.9)
Qualifying revolving loan (retail)	2.5	0.0
Other retail	5.5	(2.0)
Total	185.2	7.9

Note:

Actual losses are the sum of the net increase (decrease) in the amount of partial direct write-offs, specific reserve for possible losses on loans and general reserve for possible losses on loans (for claims against special attention obligors or below), etc., as well as tax-qualified direct write-offs, losses from sales of non-performing loans, losses from debt forgiveness and losses from debt-equity swaps during the relevant period. Equity exposure under the PD/LGD approach is not included in the amount of actual losses.

<Analysis>

Actual losses of ¥7.9 billion in the period from October 1, 2015 through September 30, 2016 decreased by ¥177.3 billion compared with the period from October 1, 2014 through September 30, 2015. This was due to significant decrease in losses from corporate exposure.

Notes:

1.

Edgar Filing: MIZUHO FINANCIAL GROUP INC - Form 6-K

Estimated losses after deduction of reserves are the amount after deductions of partial direct write-offs, specific reserves for possible losses on loans and general reserves for possible losses on loans (for claims against special attention obligors or below), etc., as of the beginning of each period. Equity exposure under the PD/LGD approach is not included in the amount of estimated losses.

2. Actual losses are the sum of the net increase (decrease) in the amount of partial direct write-offs, specific reserves for possible losses on loans and general reserves for possible losses on loans (for claims against special attention obligors or below), etc., as well as tax-qualified direct write-offs, losses from sales of non-performing loans, losses from debt forgiveness and losses from debt-equity swaps during the relevant period. Equity exposure under the PD/LGD approach is not included in the amount of actual losses.

Table of Contents**Methods for credit risk mitigation****(5) Credit risk mitigation by portfolio classification**

The amounts of exposure to which the method of credit risk mitigation through collateral and guarantees is applied are as follows:

Table of Contents

Notes:

1. Items that refer to during the six-month period show amounts accumulated during the six months ended September 30, 2015 and 2016.
2. Default exposure and Losses during the six-month period with respect to synthetic securitization transactions are based on the definition of default as set forth in the respective transactions.
3. Classification based on type of underlying assets is conducted according to the principal underlying asset type for each transaction.
4. Credit cards include shopping credit receivables, card loans, etc.
5. The effects of risk mitigation, in the context of calculating capital adequacy ratio, of transfers (hedges) of risk through synthetic securitization transactions are reflected in Required capital of (B) Information of securitization exposure retained or purchased.

Securitization exposure as sponsor of securitization programs (ABCP/ABL) (for calculation of credit risk-weighted assets)

(C) Information by type of underlying assets

	(Billions of yen)							
	As of, or for the six months ended, September 30, 2015							
	Credit cards	Residential mortgage loans	Auto loans	Lease payment receivables	Account and note receivables	Real estate	Others	Total
Amount of underlying assets	108.7		63.6	48.3	384.0		58.5	663.4
Default exposure					5.8			5.8
Estimated loss amount related to underlying assets during the six-month period	0.5		0.6	0.0	3.4		0.5	5.2
Amount of exposures securitized during the six-month period	747.6		307.7	259.7	1,653.2		544.4	3,512.8

	(Billions of yen)							
	As of, or for the six months ended, September 30, 2016							
	Credit cards	Residential mortgage loans	Auto loans	Lease payment receivables	Account and note receivables	Real estate	Others	Total
Amount of underlying assets	61.8		72.1	73.4	272.5		44.8	524.8
Default exposure					5.3			5.3
Estimated loss amount related to underlying assets during the six-month period	0.7		0.3	0.5	2.7		0.4	4.8
Amount of exposures securitized during the six-month period	253.5		485.4	485.3	1,292.7		276.8	2,793.9

Notes:

- Items that refer to during the six-month period show amounts accumulated during the six months ended September 30, 2015 and 2016.
- Securitization exposure that is acquired in securitization of customer's claims other than as sponsor (in the form of asset-backed securities, trust beneficiary rights and other transferable instruments) is categorized as securitization exposure as investor.
- The amount of default exposure is the amount of the underlying assets recognized as default in the calculation of capital adequacy ratio.
- Estimated loss amount related to underlying assets is based on the amount of the underlying assets as of the relevant date and the following parameters that are used in the calculation of capital adequacy ratio:

parameters used in the calculation of required capital for an underlying asset when applying the supervisory formula (e.g., PD); and

with respect to underlying assets classified as securitization exposure, the conservative application of risk weights used in the ratings-based approach.

- Classification based on type of underlying assets is conducted according to the principal underlying asset type for each transaction. Transactions that are difficult to classify are included under Others.
- Credit cards include shopping credit receivables, card loans, etc.

Table of Contents**Market risk****Trading activities**

The following table shows VaR (Value at Risk) figures of our trading activities:

	(Billions of yen)		
	For the six months ended	For the fiscal year ended	For the six months ended
	September 30, 2015	March 31, 2016	September 30, 2016
End of period	2.6	2.0	2.7
Maximum	4.4	4.4	4.8
Minimum	1.8	1.5	1.7
Average	2.5	2.4	2.5
The number of cases where assumptive losses exceeded VaR during the period	3	5	4

Notes:

1. Amount of market risk (VaR) is calculated based on the internal model.
2. The multiplication factor for the calculation of market risk equivalent is determined by the number of cases where assumptive losses exceeded VaR before 250 business days prior to the end of period.
3. Our group companies which conduct trading activities are Mizuho Bank, Mizuho Trust & Banking and Mizuho Securities, etc.

VaR method:

VaR	historical simulation method
Quantitative standard:	1. confidence interval: one-tailed 99.0%; 2. holding period: 1 day; and 3. historical observation period of 3 years (801 business days)

VaR (Value at Risk)

The VaR method measures the maximum possible loss that could be incurred due to market movements within a certain time period (or holding period) and degree of probability (or confidence interval).

Back testing

The Back testing is one of the methods to evaluate the effectiveness of market risk measurements calculated using the VaR method that compares VaR and amount of losses (we compare VaR with assumptive profits and losses). The number of cases where assumptive losses exceeded VaR is the number of times in which losses exceeded VaR during the corresponding period.

The following table shows stressed VaR figures of our trading activities:

	(Billions of yen)		
	For the six months ended	For the fiscal year ended	For the six months ended
	September 30, 2015	March 31, 2016	September 30, 2016
End of period	5.2	3.4	4.8
Maximum	12.5	12.5	7.2

Edgar Filing: MIZUHO FINANCIAL GROUP INC - Form 6-K

Minimum	3.4	3.3	2.8
Average	6.4	5.2	5.0

Stressed VaR method:

Stressed VaR

historical simulation method

Quantitative standard:

1. confidence interval: one-tailed 99.0%;

2. holding period: 1 day; and

3. historical observation period of 1 year of significant financial stress (265 business days)

Stressed VaR

The stressed VaR measurement is based on a continuous 12-month period of significant financial stress.

Table of Contents**Outlier criteria**

The following table shows results of calculations under the outlier framework:

	Amount of loss	Broadly-defined capital	(Billions of yen) Loss ratio to capital
As of September 30, 2015	542.3	9,596.1	5.6%
As of March 31, 2016	516.6	9,638.6	5.3%
As of September 30, 2016	436.1	9,767.8	4.4%
Effect of yen interest rate	61.3		
Effect of dollar interest rate	299.8		
Effect of euro interest rate	39.6		

Outlier criteria

As part of the capital adequacy requirements under Basel III, the losses arising from a banking book in hypothetical interest rate shock scenarios under certain stress conditions are calculated and compared with the sum of Tier 1 and Tier 2 capital. If the interest rate risk of the banking book leads to an economic value decline of more than 20% of the sum of Tier 1 and Tier 2 capital, we will be deemed an outlier and may be required to reduce the banking book risk or adopt other responses.

Interest rate shock scenario under stress conditions in outlier criteria

For the interest rate shock scenario used in connection with the calculations under the outlier framework, we generate annual rate fluctuation data for five years derived from daily raw historical interest rate data of the past six years and then apply the actual fluctuation data at a 99.0% confidence level to the shock scenario.

Table of Contents**Equity exposure in banking book****(8) Status of equity exposure in banking book****(A) Amounts stated in consolidated balance sheet**

Table of Contents**Liquidity Coverage Ratio**

Liquidity standards agreed upon by the Basel Committee on Banking Supervision require our liquidity coverage ratio to surpass the minimum standard starting March 31, 2015.

We calculate our consolidated liquidity coverage ratio (the Consolidated LCR) in accordance with the regulation The Evaluation Criterion on the Sound Management of Liquidity Risk Defined, Based on Banking Law Article 52-25, as One of Criteria for Bank Holding Companies to Evaluate the Soundness of Their Management and the Ones of Their Subsidiaries and Others, which is also One of Evaluation Criteria on the Soundness of the Banks Management (the FSA Notice No. 62 of 2015 (the Notice No. 62)).

The information disclosed herein is in accordance with Matters Separately Prescribed by the Commissioner of the Financial Services Agency Regarding Status of Sound Management of Liquidity Risk, etc. pursuant to Article 19-2, Paragraph 1, Item 5, Sub-item (e), etc. of the Ordinance for Enforcement of the Banking Law (Ministry of Finance Ordinance No. 7 of 2015) (the FSA Notice No. 7 of 2015).

The status of our sound management of liquidity risk is as follows:

Item	(In million yen, the number of data)

24	The number of data used to calculate the average value		3		3

Notes:

- Item from 1 to 23 are quarterly average using data points as shown in item 24.
- We do not apply the exception regarding qualifying operational deposits in Article 28 of the Notice No. 62 with respect to item 6.
- The numbers in item 11 include the amount of additional collateral required due to market valuation changes on derivatives transactions estimated by the historical look-back approach instead of scenario approach in Article 37 of the Notice No. 62.
- There are no material components that necessitate detailed explanation of cash outflows from other contracts in Article 59 of the Notice No. 62 within item 14, cash outflows from other contingent funding obligations in Article 52 of the Notice No. 62 within item 15, cash inflows from other contracts in Article 72 of the Notice No. 62 within item 19.

	2015				2016		2017	
	Apr-Jun	Jul-Sep	Oct-Dec	Jan-Mar	Apr-Jun	Jul-Sep	Oct-Dec	Jan-Mar
Consolidated LCR (quarterly average)	124.6%	128.4%	133.4%	128.2%	135.1%	137.4%		

Our Consolidated LCR does not lead to any issues since it surpasses not only the minimum standard required under the liquidity regulation, but also the final regulatory standard (100%), with no significant change.

LCR disclosed herein does not differ much from the level we expected beforehand, and we do not expect our Consolidated LCR in the future to deviate significantly from the current level.

There are no significant changes in the composition, such as currency composition or type composition, and geographic distribution of the HQLA allowed to be included in the calculation.

In addition, there is no significant currency mismatch which might affect our funding conditions between total amount of the HQLA allowed to be included in the calculation and net cash outflow regarding significant currencies.

Note:

1. All securities included in the table above have fair value.
2. Portion pledged as collateral mainly consists of securities and others collateralized for borrowed money, foreign and domestic exchange transactions or derivatives transactions, or substituted for margins for futures transactions.
3. Figures in the above table do not represent high quality liquid assets under the Basel III regulatory regime.
