Semiannual Report

Templeton Emerging Markets Income Fund

Dear Shareholder:

This semiannual report for Templeton Emerging Markets Income Fund covers the period ended June 30, 2018.

Your Fund's Goal and Main Investments

The Fund seeks high, current income, with a secondary goal of capital appreciation, by investing, under normal market conditions, at least 80% of its net assets in income-producing securities of sovereign or sovereign-related entities and private sector companies in emerging market countries.

Performance Overview

For the six months under review, the Fund had cumulative total returns of -4.05% based on market price and -7.75% based on net asset value. In comparison, U.S. dollar-denominated emerging market bonds, as measured by the J.P. Morgan (JPM) Emerging Markets Bond Index (EMBI) Global, had a -5.23% cumulative total return in U.S. dollar terms for the same period.¹ You can find the Fund's long-term performance data in the Performance Summary on page 6.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown.

Economic and Market Overview

The six-month period began with sharply rising yields in the US and Europe as reflation sentiments appeared to return to markets. Deregulation efforts and tax cuts were anticipated to add stimulus to an already strong US economy. The 10-year US Treasury yield rose 45 basis points (bps), finishing February at 2.86%. In Europe, the 10-year German bund yield rose 27 bps during January, reaching its peak yield for the period at 0.70% on February 2, its highest level since 2015. Markets appeared to initially anticipate upcoming rate adjustments from the European Central Bank (ECB) later in the year, but those

**Includes foreign treasury bills, foreign strips, money market funds and net other assets less liabilities (including derivatives).

expectations would diminish by the end of the period. Overall, the US dollar was broadly weaker against the euro and global currencies during the opening months of the period, but that trend would sharply reverse in April.

In February, Jerome Powell took over as US Federal Reserve (Fed) Chairman, replacing Janet Yellen. The Fed continued to unwind its balance sheet throughout the period, and raised the federal funds target rate 25 basis points twice; once in March and again in June. In Japan, Haruhiko Kuroda was reappointed to a second five-year term as Bank of Japan (BOJ) Governor, effectively extending the BOJ's current monetary accommodation indefinitely.

By March, the rising yield trends in the US and Europe stalled and moderately reversed. Protectionist trade activity from the US in the form of steel and aluminum tariffs, as well as sector-specific tariffs on China, appeared to amplify risk aversion across global financial markets. Credit spreads widened across investment-grade and high yield credit tiers in

the US and Europe during the month, ultimately widening even further by the end of June.

Geographic Composition*

Based on Total Net Assets as of 6/30/18

*Figures represent the net Fund exposure and include certain derivatives held in the portfolio (or their underlying reference assets) and may not total 100% or may be negative due to rounding, use of any derivatives or other factors.

In April, US Treasury yields rose sharply and the US dollar strengthened broadly as reflation sentiments appeared to again return to financial markets. The 10-year US Treasury yield rose above 3.00% for the first time in more than four years, ultimately reaching 3.11% on May 17, its highest level since 2011. However, risk aversion returned to global bond markets in the second half of May, as political issues in Italy raised concerns over the euro and Italian debt ratios. Consequently, yields in Italy, Spain, and much of peripheral Europe rose sharply, while yields in Germany, France, and the US declined as investors shifted to what they perceived as less risky investments. Several Latin American countries also saw rising yields and depreciations of their exchange rates during May, as upcoming elections in Mexico and Brazil, as well as policy concerns in Argentina appeared to increase regional volatility.

In the second half of June, a return of tariff threats from the US brought back risk aversion, driving the 10-year US Treasury yield back to where it began the month at 2.86%. Overall, the 10-year US Treasury yield finished the period 45 bps higher. In Europe, ECB president Mario Draghi provided updated guidance on the ECB's monetary policy timeline at its June 14 meeting: The net asset purchase program will be reduced to 15 billion per month for October, November and December, and conclude at the end 2018. Draghi also indicated that rates would likely remain unchanged until at least the summer of 2019. The 10-year German bund correspondingly finished June four bps lower for the month at 0.30%, finishing the six-month period 13 bps lower than where it started.

On the whole, duration exposures in the US and in several parts of the world faced headwinds from rising rates during the period, with the exception of core European countries, which began the period with rising yields, but finished with sharply declining yields. Additionally, the US dollar started the period weaker before significantly strengthening against global currencies over the final three months. Avoiding US Treasury duration proved important to performance during the period, as did long exposure to the US dollar.

Investment Strategy

We invest selectively in bonds from emerging markets around the world to generate income for the Fund, seeking opportunities while monitoring changes in interest rates, currency exchange rates and credit risk. We seek to manage the Fund's exposure to various currencies and may use currency forward contracts.

Manager's Discussion

On the whole, we continued to position our strategies for rising rates by maintaining low portfolio duration and aiming at a negative correlation with US Treasury returns. We also continued to actively seek select duration exposures that we believe can offer positive real yields without taking undue interest-rate risk, favoring countries that have solid underlying fundamentals and prudent fiscal and monetary policies. We continued to prefer local-currency positions in specific countries that we believed to have resilient economies and relatively higher, maintainable rate differentials. During the period, we held notable local-currency duration exposures in Brazil, Argentina, Colombia, Indonesia and India, and notable currency exposure to the Mexican peso. We also continued to hold net-negative positions in the euro and Japanese yen as hedges against a broadly strengthening US dollar and as directional views on the currencies. We also held net-negative positioning in the Australian dollar based on the Reserve Bank of Australia's continued rate accommodation, and as a partial hedge against potential economic risks in China as well as broad-based beta risks across emerging markets. In credit markets, we continued to see areas of value in specific sovereign credits, notably in Africa and Latin America. Overall, the strategy was positioned for depreciation of the euro and yen, rising US Treasury yields, currency appreciation in select emerging markets and risk-adjusted yields in local-currency and sovereign credit markets. During the period, we used currency forward contracts to actively manage currencies. We also used interest-rate swaps to tactically manage duration exposures.

TEMPLETON EMERGING MARKETS INCOME FUND**Top 10 Countries**

6/30/18

	% of Total Net Assets
Kenya	8.4%
Zambia	7.8%
Ukraine	7.5%
Brazil	7.4%
Indonesia	6.0%
Senegal	4.8%
Iraq	4.5%
Argentina	3.7%
Colombia	3.6%
Ghana	2.9%

What is duration?

Duration is a measure of a bond's price sensitivity to interest-rate changes. In general, a portfolio of securities with a lower duration can be expected to be less sensitive to interest-rate changes than a portfolio with a higher duration.

What is a currency forward contract?

A currency forward contract is an agreement between the Fund and a counterparty to buy or sell a foreign currency in exchange for another currency at a specific exchange rate on a future date. Currency forward contracts are privately traded in the interbank market, not on a centralized exchange.

What is an interest-rate swap?

An interest-rate swap is an agreement between two parties to exchange interest-rate payment obligations, generally one based on an interest rate fixed to maturity and the other based on an interest rate that changes in accordance with changes in a designated benchmark (for example, LIBOR, prime, commercial paper or other benchmarks).

During the period, the Fund's negative absolute performance was primarily due to overall credit exposures followed by currency positions. Interest-rate strategies had a largely neutral effect on absolute results. Credit exposures in Africa detracted from absolute results. Among currencies, positions in Latin America (the Argentine peso and the Brazilian real) detracted from absolute performance. The Fund's net-negative positions in the euro and the Japanese yen had largely neutral effects. The Fund maintained a defensive approach regarding interest rates in developed markets, while holding duration exposures in select emerging markets. Duration exposures provided a modest contribution during the period.

TEMPLETON EMERGING MARKETS INCOME FUND

The foregoing information reflects our analysis, opinions and portfolio holdings as of June 30, 2018, the end of the reporting period. The way we implement our main investment strategies and the resulting portfolio holdings may change depending on factors such as market and economic conditions. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. Although historical performance is no guarantee of future results, these insights may help you understand our investment management philosophy.

Michael Hasenstab, Ph.D., is executive vice president and chief investment officer for Templeton Global Macro, which conducts in-depth global macroeconomic analysis covering thematic topics, regional and country analysis, and interest rate, currency and sovereign credit market outlooks. Templeton Global Macro offers global, unconstrained investment strategies through a variety of investment vehicles ranging from retail mutual funds to unregistered, privately offered hedge funds. Dr. Hasenstab is economic advisor to the CEO of Franklin Resources, Inc., providing his perspective and insight through the lens of Templeton Global Macro. In addition, he is a member of Franklin Resources' executive committee, a small group of the company's top leaders responsible for shaping the firm's overall strategy. Dr. Hasenstab holds a Ph.D. in economics from the Asia Pacific School of Economics and Management at Australian National University, a master's degree in economics of development from the Australian National University, and a B.A. in international relations/political economy from Carleton College in the US.

Sonal Desai, Ph.D., is a senior vice president and director of research for Templeton Global Macro. Dr. Desai is a portfolio manager for a number of funds, including Templeton Global Bond Fund, Templeton Global Total Return Fund and Templeton Emerging Market Bond Fund. Dr. Desai is responsible for shaping the team's research agenda of in-depth global macroeconomic analysis covering thematic topics, regional and country analysis, and interest rate, currency and sovereign credit market outlooks. This includes facilitating broader research efforts leveraging Franklin Templeton's local fixed income investment professionals across global markets. Dr. Desai holds a Ph.D. in economics from Northwestern University and a B.A. in economics from Delhi University. She is part of the Templeton Global Bond Fund portfolio management team named Morningstar's Fixed Income Manager of the Year in Canada in 2013.

TEMPLETON EMERGING MARKETS INCOME FUND
Performance Summary as of June 30, 2018

Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not reflect any sales charges paid at inception or brokerage commissions paid on secondary market purchases. The performance table does not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale of Fund shares. Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities.

TEMPLETON EMERGING MARKETS INCOME FUND

PERFORMANCE SUMMARY

All investments involve risks, including possible loss of principal. Changes in interest rates will affect the value of the Fund's portfolio and its share price and yield. Bond prices generally move in the opposite direction of interest rates. Thus, as prices of bonds in the Fund adjust to a rise in interest rates, the Fund's share price may decline. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments of countries where the Fund invests. The Fund's investments in emerging market countries are subject to all of the risks of foreign investing generally, and have additional heightened risks due to these markets' smaller size and lesser liquidity and lack of established legal, political, business and social frameworks to support securities markets, including: delays in settling portfolio securities transactions; currency and capital controls; greater sensitivity to interest rate changes; pervasiveness of corruption and crime; currency exchange rate volatility; and inflation, deflation or currency devaluation. Sovereign debt securities are subject to various risks in addition to those relating to debt securities and foreign securities generally, including, but not limited to, the risk that a government entity may be unwilling or unable to pay interest and repay principal on its sovereign debt, or otherwise meet its obligations when due. The markets for particular securities or types of securities are or may become relatively illiquid. Reduced liquidity will have an adverse impact on the security's value and on the Fund's ability to sell such securities when necessary to meet the Fund's liquidity needs or in response to a specific market event. Derivatives, including currency management strategies, involve costs and can create economic leverage in the portfolio that may result in significant volatility and cause the Fund to participate in losses (as well as enable gains) on an amount that exceeds the Fund's initial investment. The Fund may not achieve the anticipated benefits and may realize losses when a counterparty fails to perform as promised. As a nondiversified investment company, the Fund may invest in a relatively small number of issuers and, as a result, be subject to a greater risk of loss with respect to its portfolio securities. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

The Fund may invest in China Interbank bonds traded on the China Interbank Bond Market (CIBM) through the China-Hong Kong Bond Connect program (Bond Connect). In China, the Hong Kong Monetary Authority Central Money Markets Unit holds Bond Connect securities on behalf of ultimate investors (such as the Fund) in accounts maintained with a China-based custodian (either the China Central Depository & Clearing Co. or the Shanghai Clearing House). This recordkeeping system subjects the Fund to various risks, including the risk that the Fund may have a limited ability to enforce rights as a bondholder and the risks of settlement delays and counterparty default of the Hong Kong sub-custodian. In addition, enforcing the ownership rights of a beneficial holder of Bond Connect securities is untested and courts in China have limited experience in applying the concept of beneficial ownership. Bond Connect uses the trading infrastructure of both Hong Kong and China and is not available on trading holidays in Hong Kong. As a result, prices of securities purchased through Bond Connect may fluctuate at times when a Fund is unable to add to or exit its position. Securities offered through Bond Connect may lose their eligibility for trading through the program at any time. If Bond Connect securities lose their eligibility for trading through the program, they may be sold but can no longer be purchased through Bond Connect.

Bond Connect is subject to regulation by both Hong Kong and China and there can be no assurance that further regulations will not affect the availability of securities in the program, the frequency of redemptions or other limitations. Bond Connect trades are settled in Chinese currency, the renminbi (RMB). It cannot be

guaranteed that investors will have timely access to a reliable supply of RMB in Hong Kong. Bond Connect is relatively new and its effects on the Chinese interbank bond market are uncertain. In addition, the trading, settlement and IT systems required for non-Chinese investors in Bond Connect are relatively new. In the event of systems malfunctions, trading via Bond Connect could be disrupted. In addition, the Bond Connect program may be subject to further interpretation and guidance. There can be no assurance as to the program's continued existence or whether future developments regarding the program may restrict or adversely affect the Fund's investments or returns. Finally, uncertainties in China tax rules governing taxation of income and gains from investments via Bond Connect could result in unexpected tax liabilities for a Fund.

The application and interpretation of the laws and regulations of Hong Kong and China, and the rules, policies or guidelines published or applied by relevant regulators and exchanges in respect of the Bond Connect program, are uncertain, and may have a detrimental effect on the Fund's investments and returns.

1. The Fund has a fee waiver associated with any investment it makes in a Franklin Templeton money fund and/or other Franklin Templeton fund, contractually guaranteed through 2/28/19. Fund investment results reflect the fee waiver; without this waiver, the results would have been lower.
2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
3. Assumes reinvestment of distributions based on net asset value.
4. Assumes reinvestment of distributions based on the dividend reinvestment and cash purchase plan.

TEMPLETON EMERGING MARKETS INCOME FUND

Important Notice to Shareholders

Share Repurchase Program

The Fund's Board previously authorized the Fund to repurchase up to 10% of the Fund's outstanding shares in open-market transactions, at the discretion of management. This authorization remains in effect.

In exercising its discretion consistent with its portfolio management responsibilities, the investment manager will take into account various other factors, including, but not limited to, the level of the discount, the Fund's performance, portfolio holdings, dividend history, market conditions, cash on hand, the availability of other attractive investments and whether the sale of certain portfolio securities would be undesirable because of liquidity concerns or because the sale might subject the Fund to adverse tax consequences. Any repurchases would be made on a national securities exchange at the prevailing market price, subject to exchange requirements, Federal securities laws and rules that restrict repurchases, and the terms of any outstanding leverage or borrowing of the Fund. If and when the Fund's 10% threshold is reached, no further repurchases could be completed until authorized by the Board. Until the 10% threshold is reached, Fund management will have the flexibility to commence share repurchases if and when it is determined to be appropriate in light of prevailing circumstances.

In the Notes to Financial Statements section, please see note 2 (Shares of Beneficial Interest) for additional information regarding shares repurchased.

Amended Distribution Frequency

The Fund's Board of Trustees approved a change to its distribution frequency from a quarterly variable distribution to a monthly variable distribution, effective June 30, 2018.

*The principal amount is stated in U.S. dollars unless otherwise indicated.

^aNon-income producing.

^bFair valued using significant unobservable inputs. See Note 11 regarding fair value measurements.

^cSee Note 9 regarding restricted securities.

^dSecurity was purchased pursuant to Rule 144A under the Securities Act of 1933 and may be sold in transactions exempt from registration only to qualified institutional buyers or in a public offering registered under the Securities Act of 1933. These securities have been deemed liquid under guidelines approved by the Fund's Board of Trustees. At June 30, 2018, the aggregate value of these securities was \$226,238,786, representing 41.7% of net assets.

^ePrincipal amount is stated in 1,000 Brazilian Real Units.

^fRedemption price at maturity and coupon payment are adjusted for inflation. See Note 1(f).

^gSecurity was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration. These securities have been deemed liquid under guidelines approved by the Fund's Board of Trustees. At June 30, 2018, the aggregate value of these securities was \$28,768,153, representing 5.3% of net assets.

^hPrincipal amount is stated in 100 Mexican Peso Units.

ⁱThe principal represents the notional amount. See Note 1(c) regarding value recovery instruments.

^jIncome may be received in additional securities and/or cash.

^kThe security was issued on a discount basis with no stated coupon rate.

^lSee Note 3(c) regarding investments in affiliated management investment companies.

^mThe rate shown is the annualized seven-day effective yield at period end.
