

services (in addition to 2G) in a similar service quality provided in the urban areas. The daily lives of the 250 thousand people in these villages have been improved thanks to enhanced mobile communication and high-speed mobile internet services. ULAK'ın 4.5G radio equipment was used markedly, corresponding to about half of total deployments.

We commercially launched 3G simultaneously in 81 provinces and major cities in Turkey in July 2009. As a result of the amendment to the Law for Metropolitan Municipalities, the number of metropolitan municipalities increased and the borders of some municipalities were extended. After this amendment, the ICTA increased our coverage obligations, defined in our concession agreement by its decision, based on this amendment. We filed a lawsuit for a stay of execution and the cancellation of this aforementioned decision. The Council of State granted a motion for the stay of execution of ICTA'ın aforementioned decision. The ICTA objected to this decision. The objection was also rejected in favor of Turkcell. The hearing was held on November 27, 2018 and it is expected that the court will grant a decision in 2019.

Table of Contents

Benefiting from higher-quality communications provided by the widest spectrum in 3G, Turkcell will continue to offer seamless communications services to its customers with what we believe to be the most extensive coverage amongst its competitors.

In 2018, we have continued to develop and improve the coverage and capacity of our network. In urban areas, we increased both coverage and capacity by placing network infrastructure in commercial sites such as shopping malls, business complexes and entertainment centers. We have been using 3G and 4.5G Small Cells (such as Femto, pico and micro) to enhance our coverage and capacity where necessary. Additionally, 3G and 4.5G repeaters have been used to extend the network coverage without adding new sites.

At the IMT-Advanced (4.5G) tender held on August 26, 2015, Turkcell acquired large amounts of FDD spectrum: 2x10 MHz from the 800 MHz, an additional 2x1.4 MHz from the 900 MHz, 2x29.8 MHz from the 1800 MHz, additional 2x10 MHz from the 2100 MHz and 2x25 MHz from the 2600 MHz frequency bands. And for TDD frequencies, 1x10 MHz from the 2100 MHz and 1x10 MHz from the 2600 MHz bands were also acquired. All frequency bands are technology-neutral and can be used for any technology, providing efficiency and flexibility for spectrum usage in the network. We currently use the 900 MHz band for 2G and 3G, the 2100 MHz band for 3G and 4.5G, and the 800 MHz, 1800 MHz and 2600 MHz bands for 4.5G.

Our fixed communications network is designed to provide high capacity and high-quality service to consumer and corporate customers. Moreover, we believe that it is very well designed and implemented to provide capacity to our mobile network. Our fixed network has capabilities to carry large volumes of data and internet traffic in the country and is also connected to national and international telecom operators.

As of December 31, 2018 our own fiber network reached 43,300 kilometers and connects 79 of 81 cities in Turkey. In 21 cities we have fiber to the home (FTTH) network and homepass, which means the number of premises that are connected to our fiber network has reached nearly 3.4 million. Through partnership engagements in 2018, we have become capable of delivering our fiber internet service to 6.44 million households in 28 cities. We also provide enterprise Wi-Fi services.

In the fixed access network we have two main network structures called fiber to the building (FTTB) and FTTH. In FTTB network, we are installing switches to access our subscribers. In FTTH networks, we are installing Gigabit Passive Optical Network (GPON) and 10-Gigabit-capable symmetric passive optical network (XGS-PON) equipment which is the latest access network technology for residential and business subscribers. These network structures enable Turkcell to offer triple play services (High speed internet, TV, Voice over IP). The fixed access network also provides bandwidth requirement for mobile sites with Metro Ethernet services.

b. Quality of Service

The ICTA published a Regulation on Quality of Service in the Electronic Communications Sector on September 12, 2010, effective as of December 31, 2011 (see Item 4.B. Business Overview Regulation of the Turkish Telecommunications Industry for further details). The Turkcell network is currently above the standards set by the statement by ICTA. Typically, Call Drop was one of the major Quality of Service figures that we focused on during 2018.

Dropped calls are calls that are terminated involuntarily and are measured by using the ratio of total dropped calls during all day. Using such industry standard for dropped calls, our dropped call rate for our 2G&3G network has further decreased below 0.29% in 2018.

The rate of service quality is being enhanced continuously due to extensive network optimization and investments in our 2G and 3G network to improve the quality and capacity of the network. According to statistics gathered from the vendors, Turkcell has one of the best 2G and 3G dropped call rates compared to other networks around the world. As Turkcell has built one of the most robust LTE networks globally, in terms of VoLTE performance, Turkcell has already obtained a low drop rate in VoLTE, which is below 0.26%.

We have been offloading voice and data traffic by utilizing small cells in the network for an improved customer experience. For this purpose, we are using a variety of solutions such as the Special Distributed Antenna Solutions (especially for major stadiums) indoor active systems that simplify deployment and streamline capacity/coverage expansions, and outdoor products to optimize the coverage and capacity of our Radio Access Network. Together with Turkcell Superonline, we have also implemented Wi-Fi offload integrated with the Turkcell 3G and 4.5G networks to further enhance the customer experience.

Table of Contents

Turkcell received the first ISO 9001 certificate in 1999. Since then, independent firms have been auditing Turkcell's management system annually and have been novating the certificate every three years within the scope of International Mobile Communications Design, Installation, Operation, Sales and After Sales Services. The recent certificate was received on November 4, 2016 and revised based on ISO 9001:2015 Quality Management Standards on September 14, 2018. This certificate will be valid until November 29, 2019. In addition, Turkcell received the ISO/IEC 20000-1:2005 IT Service Management System Certificate in January 2011. As the first telecommunications company to receive the ISO 20000-1:2005 certificate in Turkey, Turkcell has promoted the adoption of an integrated process approach to effectively deliver managed services to meet business requirements.

On the fixed network side, we monitor traffic utilization in our access network continuously to prevent any saturation and upgrade the capacity as soon as possible. Turkcell modifies and redesigns the network topology to meet the future requirements which allows us to improve our quality of service performance.

The optical transmission network relying on Dense Wavelength Division Multiplexing (DWDM) systems with Automatically Switching Optical Network (ASON), Optical Transport Network (OTN) and traditional Synchronous Digital Hierarchy (SDH) using protection mechanisms benefit alternative fiber routes wherever available. This increases the capabilities of re-routing in the event of service interruption. Thus, the delivered point to point services provides an experience up to 99.999% availability figures; a level of quality defining the transmission network as upper level carrier-class network.

c. Network Evolution

(i) Radio Network

We launched the LTE Advanced network (also known as 4.5G in Turkey) on April 1, 2016. We deployed 4.5G in all 81 provinces, including all counties. We also upgraded our in-building systems (such as those in venues and shopping malls) so as to enhance the 4.5G user experience of our customers indoors.

With the 172.4 MHz spectrum acquired in the 2015 auction, Turkcell spectrum holdings reached 234.4 MHz, corresponding to 43% of total spectrum assets acquired by the mobile operators in Turkey. Leveraging the advantage of our large spectrum assets and significant network infrastructure investments, our 4.5G network evolved from peak speeds of 375 Mbps to 1.2 Gbps. Currently, Turkcell's 4.5G network supports LTE Advanced Pro technology, providing high-end features like 4x4 MIMO, 256QAM, 3-4-5 Carrier Aggregation, Narrow Band IoT (NB-IoT), eMTC and LAA. In the future, as technology and its ecosystem evolve to new heights, we expect to introduce new capabilities to keep our technology leadership, enhance customer experience and enable new services.

We upgraded our network in 32 provinces by modernizing our 2G and 3G network, attaining higher capacity, better customer experience and up to 35% energy efficiency. This modernization has also enabled us to utilize our spectrum assets more efficiently and helped speed up our spectrum refarming efforts in 900 MHz and 2100 MHz bands. By on-airing more UMTS 900 carriers, we have enhanced our 3G coverage further to provide deep indoor and better rural coverage.

For voice services, Voice over LTE (VoLTE) has been supported from day one to provide voice services over our 4.5G network. We activated EVS (Enhanced Voice Services) on our VoLTE voice service to further enhance the voice quality and thus became one of the few mobile operators in the world supporting this high-end feature. The applicable regulations mandate that our 2G network remains active until 2023; however most of our voice traffic is already carried by our 3G network, which has enabled us to gradually make our 2G network leaner without affecting our customers. With a larger terminal support base, we expect that voice services will be migrated to the 4.5G network

from legacy 3G/2G networks.

In order to provide a solution for VPN over the wireless technologies like 4.5G, we have announced the Mobile VPN offer to our corporate customers. With this solution, corporates are able to connect to the internet cloud over a wireless interface using 4.5G technology, without sacrificing their service quality requirements. This is a fast and flexible solution for connections between their branch offices and headquarters.

We provide a Wireless to the Home service called SUPERBOX, which offers wireless high-speed internet access for customers without fiber connectivity. The required equipment is included in the subscription plan and uses LTE Advanced network as a backhaul to provide internet connectivity in customers premises. As part of 5G preparations, we have demonstrated 5G FWA (Fixed Wireless Access) capability in millimeter wave band, which was the first 5G live network test in Turkey.

Through our ongoing investment in LTE Advanced infrastructure, we became the first operator in Turkey to support NB-IoT, which is required for new generation innovative applications on LTE Advanced networks. Use of this

Table of Contents

technology is now available on request across our whole LTE footprint and enables machines to communicate faster and more effectively. Furthermore, through our Cat-M network support which enables fleet management, asset tracking and smart metering, and which is presently supported by few operators in the world, we are able to provide higher data transfer throughput and have more mobility for machine to machine communications. With regard to international recognition in 2018, we won two technology awards for our accomplishments in RAN technology, namely for our Connected Parking project from IoT World Europe (Best End to End IoT Solution Award) and Smart Irrigation project from Telecoms World Middle East (Innovation Award).

For real-life scenarios in which the terrestrial network may be down or unable to provide the required coverage, we have developed a technology called Dronecell which provides 4.5G coverage from the air with the help of a micro base station installed on a drone. This solution can be useful when communications in the areas are affected by natural disasters, or when temporary coverage in some other areas are necessary.

Offering a unique experience to our customers with our strong 4.5G infrastructure, we continue our efforts to prepare our network for 5G. We have tested thoroughly the Massive MIMO technology (both for frequency division duplex (FDD) and time division duplex (TDD)), which can be deployed to meet capacity demand in dense areas. These collective activities help to maximize spectral efficiency, further enhancing network capacity and improving overall user experience. We believe that Turkcell has a significant competitive advantage with its Massive MIMO, in addition to having the widest spectrum in Turkey.

While we have been investing into new technologies, we also have been upgrading our 3G/2G networks to improve the user experience of our customers who continue to be served by the legacy networks. By conducting modernization projects, we have achieved an energy efficiency improvement up to 35% on our 3G/2G networks. The modernization also enables us to use multiple technologies (LTE, UMTS and GSM) in a mixed mode configuration in the same hardware units located at the sites, providing smaller footprints and cost reduction as we repurpose existing spectrum for newer technologies along with other benefits. It is also important to note that since the traffic volumes on the 3G network are still on the rise, we have been using newly acquired 2x10 MHz spectrum on 2100 MHz band as 5th and 6th carriers for additional capacity.

Regarding our 3G and 2G networks, we have supported up to 63.3 Mbps speeds using 3C-HSDPA (3 Carrier High Speed Downlink Packet Access) technology for downloads and 11.5 Mbps using DC-HSUPA (Dual Carrier High Speed Uplink Packet Access) technology for uploads in our 3G network since early 2015. These technologies globally had their first commercial network activations by Turkcell. For GSM, although shrinking in traffic load and capacity, up to 300 Kbps download speeds are supported with EDGE technology for users having legacy terminals or in rural areas where GSM-only coverage exists.

Although the 900 MHz band is still being primarily used for GSM900, we have been rolling out UMTS900 to provide much stronger 3G coverage layer for voice calls redirected from the 4.5G network via the technique called CS Fallback (CSFB), deep indoor and improved rural coverage. This has been possible by some previous projects such as Thin Layer Project for GSM 900, by which we have extracted enough spectral capacity to partially re-farm the 900 MHz band for UMTS. As the next step, we have started deploying second UMTS900 carrier, which leads to a more efficient utilization of 900 MHz band and generate additional capacity. As we migrate 3G traffic to 900 MHz, we obtain a capacity boost in the 2100 MHz band, which allows us to repurpose it gradually for LTE. In this regard, we have started deploying LTE in the 2100 MHz band, previously used by 3G only, to use it more efficiently with LTE2100, enlarge our 4.5G footprint in a cost-efficient manner and improve user experience.

Furthermore, we have been closely cooperating with our network vendors for long term prospects through projects that enable Turkcell to deploy the latest technologies even before their availability on the market. This puts Turkcell at

the forefront of the technology race and allows for the evaluating of the new technology benefits in the development phase, and then their timely deployment following their commercial availability.

Turkcell continues to provide extensive support to the projects involving domestic products, mainly for fulfilling the obligations related to the usage of domestically produced network equipment as per the 4.5G licence. We cooperate with domestic companies regarding base stations, antennas, transports and infrastructure solutions. ULAK Project initially started as an initiative taken by Undersecretariat for Defense Industries (UDI), aiming to design and develop national software and hardware components for an LTE-Advanced communication system and enhance Turkey's self-sufficiency in this area. ULAK has become a network vendor, producing 4.5G base stations. The first deployments of ULAK base stations in the network have been realized in a city in the north-eastern part of Turkey.

As a new technology, use of Massive MIMO in LTE can be a proper solution to increase radio network capacity. TDD Massive MIMO enhances spectrum efficiency by means of beamforming and multi-user MIMO techniques but it may also cause user throughput degradation due to the limited bandwidth of Band 38 we have and due to its support of at most 1-2 MIMO layers per user. To mitigate these issues, an innovative algorithm has been developed by Turkcell on the Self-Organized Network (SON) Platform to optimize Massive MIMO's benefits on system capacity, taking user experience into account as well.

Table of Contents

In the scope of the next generation technology, known as 5G, Turkcell has been participating in international organizations such as 3GPP, ITU-T, NGMN, 5G-PPP and GSMA by joining meetings, work groups, projects and programs to follow the latest developments and shape its strategies for the future accordingly. In this context, Turkcell has started to lead NGMN's 5G Pre-Commercial Networks Trials project, aiming to test the 5G prototypes in the field. Turkcell has also signed agreements with vendors (Ericsson, Huawei, Samsung, ZTE, Aselsan) to collaborate in the research & development and work on various use case options. In addition to technology organizations and vendors, Turkcell has been doing some research activities with universities and research centers. An MoU for 5G Research and Development has been signed with some major universities in Turkey within the scope of The 5G Valley initiative led by the ICTA. As Turkcell's first 5G-PPP (The 5G Infrastructure Public Private Partnership) project, we have joined in 5G-MOBIX project to develop cooperative, connected and automated mobility for vehicles. In the context of this project, we will be developing Platooning use case for 5G on the Turkish-Greek border together with other local and international partners.

With the leading global vendors including Ericsson, Huawei and Samsung, we have been demonstrating and trialing 5G since 2017. In the scope of first 5G use cases, we tested FWA and AR/VR to take additional steps into the 5G era.

(ii) Transmission Network

Turkcell is the first operator in Turkey to start deploying All-IP NodeBs throughout its network. We are not only expanding our 3G network but also migrating legacy TDM-GSM sites to IP through the deployment of Abis over IP technologies. Thus, we currently have an All-IP mobile backhaul of more than 57,000 BTSs, Node-Bs and eNodeBs that provides resiliency, ease of operation and operational expense advantages. In addition, we have also invested in topology redundancy projects due to our IP/MPLS backhaul for better service availability. Backhaul bandwidth capacities were increased for wide coverage up to 450 Mbps 4.5G applications and the Microwave Radio Link network was modernized for Native Ethernet and Adaptive Modulation support to increase availability and reduce outages due to severe rain conditions. Usage of fiber connectivity is moving further from High-RAN aggregation points towards Low-RAN aggregation points. Furthermore, fiber to mobile site applications have been started for 4.5G readiness of sites with very high traffic. Due to higher bandwidth requirements of the 4.5G users, we are migrating from SDH based leased lines to DWDM or dark fiber multi-Gigabit Ethernet links on the high traffic aggregation points.

(iii) Core Network

The whole Turkcell Core Network is currently composed of IP based layered structure Next Generation Network (NGN) nodes, supporting all mobile standards, including 2G/3G/4.5G. By using a Geographical Redundant Pool (GRP) structure, we get (i) full redundant MSC-Ss, (ii) redundant physical interfaces to MGWs, (iii) CAPEX efficiency, and (iv) improvements in radio network KPIs. By implementing IMS (IP Multimedia Subsystem) based VoLTE (Voice Over LTE) and SRVCC (VoLTE Voice Continuity to 2G/3G), all subscribers can use seamless HDVOICE technology.

We have deployed and continue to develop our all IP Mobile Broadband GPRS network to provide the high speed and reliability to meet the demand of our businesses and consumers. 2G/3G/4.5G data services are given from our converged core network, which is designed to support all mobile broadband.

(iv) Fixed Network

Our fiber optic network provides up to 1000 Mbps high speed internet service in 21 cities across Turkey. We also provide superior triple play service experience to our subscribers. We are installing and investing in EDGE technology

access equipment in our network. We believe that with this strategy Turkcell will be ready to offer future customer experiences. In February 2018, we began to offer 10 Gbps high speed internet as an on-demand service.

We are providing end-to-end Wi-Fi services for our Enterprise customers, which enables their guests to access WiFi. The Enterprise Wi-Fi service includes installation with authentication services, and further provides the necessary interface.

We announced smart Wi-Fi services for Soho Customer, which provides login and Wi-Fi connectivity to customers. The service provides plug and play for easy installations.

We also have started to use Turksat cable network for Fixed Virtual Network Operator (FVNO) services, with the goal of reaching more homes our services.

Table of Contents

Turkcell is the first company in the world that has realized a commercial application of colorless and directionless ASON on a live traffic carrying network. Turkcell also introduced coherent 100G technology in the backbone along with optical ASON in the early stages at the end of 2012 and early 2013. In 2016, Turkcell also tested for 1 Tbps per wavelength using super channels on existing DWDM networks successfully.

Fixed networks provide backhaul that not only connects the signal towers to the telecom network, but also allows for enough bandwidth to support operations in 4.5G. This is creating an environment in which optical cabling and fiber to Ethernet media converters are among the most important parts of a mobile network. As a result, fiber will remain an integral part of telecom networks.

(v) Services and Platforms

We have an intelligent network and other service platforms enabling our services and we also provide secure and controlled access to the network for the content and service providers to provide messaging and data services. This infrastructure is being improved to open up more capabilities on the network for the application and content providers. New infrastructure also contains a portal where subscribers buy services, receive promotions and enroll for campaigns easily.

d. Network Operations

We have primarily employed experienced internal personnel for network engineering and other design activities while employing suppliers for our network infrastructure and as our partners in product/service development. Our suppliers install the base station cell site equipment and switches on a turn-key basis, while subcontractors employed by our suppliers perform the actual site preparation.

e. Network Maintenance

We have entered into several system service agreements. Under these agreements, our mobile and fixed communications network, including hardware repair and replacement, software and system support services, consultation services and emergency services are serviced by local providers. Our subcontractors perform corrective and preventative maintenance on our mobile and fixed communications network in the field, although providers repair all the network equipment. We have regional operation units with qualified Turkcell staff that operate and maintain our network in Turkey.

In addition, the Turkcell Network Operation Center located in Istanbul monitors our entire network 24 hours a day, 365 days a year, and ensures that necessary maintenance is performed in response to any problem.

f. Site Leasing

If a new coverage area is identified, our technical staff determines the optimal base station location and the required coverage characteristics. The area is then surveyed to identify BTS sites. In urban areas, typical sites are building faces and rooftops. In rural areas, masts and towers are usually constructed. Our technical staff also identifies the best means of connecting the base station to the network. Once a preferred site is identified and the exact equipment configuration for that site is determined, we start the process of site leasing and obtaining necessary regulatory permits. Site leasing processes and construction of the masts or towers are performed by our wholly owned subsidiary, Global Tower. We lease the land and provide site management services (yearly rental payments, contract renewals, rework permits) through Global Tower. If we decide to buy the land, another wholly owned subsidiary, Turkcell Gayrimenkul Hizmetleri A.S., will handle the necessary procedures. We manage all these processes for technical

demands also for Turkcell Superonline and Global Tower.

g. Business Continuity Management (BCM)

Turkcell Business Continuity Management identifies potential threats, their impact and provides a framework for building resilience with the ability to create an effective response that safeguards the interests of our key stakeholders, their reputation, brand and value-creating activities. We established the Business Continuity Management System (BCMS) to implement, operate, monitor, review, maintain and improve the business continuity.

Turkcell BCMS is assisted by business continuity coordinators at technical and non-technical groups. Regular BCM training and awareness programs are carried out throughout the organization. The effectiveness of BCMS is monitored every year through internal/external audits, and integrated exercises, the results of which are reviewed in management review meetings. In 2018, we exercised and tested our business continuity plans, communication and warning procedures to ensure that they are consistent with the business continuity objectives.

Table of Contents

Turkcell's BCM will be able to cover the majority of Turkcell's operations through potential environmental events and natural disasters. Our purpose is to ensure the continuity of the voice call, messaging, data/internet and societal security services for Turkcell, availability of fixed voice call services, data/internet, hosting services, data centers and societal security services for Turkcell Superonline, provision of site acquisition and contract management services for infrastructure requirements of mobile operators, TV/Radio broadcasters and technical infrastructure suppliers and installation, testing, commissioning, operation and maintenance of tower, in building, roof top infrastructure/Sites for Global Tower at acceptable predefined levels following disruptive incidents. Business continuity plans are prepared by taking into consideration the customer's expectations, company policies and legal obligations. They are regularly exercised to guarantee the operation of time-sensitive business activities in case of business disruptions. We are continuously improving our business continuity capacity in accordance with the ISO 22301 Societal Security, Business Continuity Management System international while preserving our image as a reputable and solid integrated service provider.

h. Enterprise Risk Management (ERM)

Turkcell's Enterprise Risk Management team is responsible for coordinating the process of identifying, assessing and overseeing actions by management and the company's business units to manage the risks that may affect the business objectives of the company. ERM supplies an information platform to management regarding the risks which may have an effect on the decision making process. Turkcell ERM aims to develop an approach of integrating risk management with the core management processes as well as enterprise risk culture. While doing this, Turkcell uses an ERM framework which is compatible with the COSO ERM framework and the ISO 31000 Standard. Based on the ERM procedures, risks are identified and evaluated in terms of impact and likelihood. Risk responses controls, issues and actions are developed and the whole process is monitored.

Turkcell's ERM team is the owner of an enterprise risk database. A range of management tools are used for risk identification and evaluation such as workshops, brainstorming sessions, risk reporting from divisions' directors and risk contacts, in-depth interviews with the management team and research reports while coordinating the process of identifying and assessing risks. The risk database, monitored by the ERM team and new risks and opportunities, updates on on-going risks, financial risks, cyber risks and risk and trend research from the world are reported to the Early Detection of Risk Committee bi-monthly.

VIII. Sales and Marketing

We design our sales and marketing strategy around subscriber needs and expectations. We try to ensure the loyalty of our subscribers by providing offers, campaigns and our advanced service delivery platforms.

a. Sales Channel

We support our sales efforts through one of the largest retail telecommunications distribution networks in Turkey, with 1,467 branded stores, many with prime locations, as well as more than 4,600 semi-branded dealers as of December 31, 2018. Our two exclusive distributors provide our products and services as well as consumer technologies (such as handsets, tablets, notebooks, IoT devices and accessories) and aftersales services for this wide network of dealers, while seven exclusive Turkcell Distribution Centers (TDCs) focus solely on semi-branded dealers. We also have a door-to-door sales force and home technology management team, which realizes approximately 115,000 connected home technology transaction per month. This provides us an important channel on which to distribute our integrated solutions directly into the homes of Turkish consumers. We also operate a dedicated corporate direct sales team of more than 450 personnel who can offer tailored solutions to their respective segments.

Our nationwide distribution channel is an important asset that helps us differentiate ourselves from our competitors and achieve our sales targets. Our strong and extensive distribution network consists of distributors, TDCs, Corporate Solution Centers, semi-branded dealers and Turkcell Branded Stores (Turkcell Plus & Turkcell) as well as points of sale for scratch cards and prepaid airtime, including digital channels, ATMs and Points of Sale (POSs). We sell postpaid and prepaid services, fixed and mobile solutions and digital services to subscribers through our distribution network. The number of branded and semi-branded dealers totaled over 6,000 sales points as of December 31, 2018.

Digital transformation has continued at full speed in our retail channel. At the beginning of 2018, we completed the physical transformation of Turkcell stores and have been offering the latest technologies and digital services to customers since then. In addition, sophisticated store concepts reflecting customer trends were put into place at selected locations. As the most important step in digital transformation, strategic infrastructure investments were realized at the stores where physical transformation was completed. The first major change occurred in the supply chain model. As of 2018, the product catalog presented to our customers was centralized in all Turkcell stores. Thus, more advantageous purchasing options and high-quality standard products were in place in stores. Turkcell retail partners began to supply commercial products through digital catalogs. The performance indicators in the procurement processes of the products started to be monitored in a transparent manner and efficiency was ensured.

Table of Contents

With the experience gained from the transformation in exclusive Turkcell stores, the non-branded sales channel structure has been completely renewed. Following the optimization of the distribution structure, Turkcell Sales Points started to operate under the name of Digital Points of Sales (DPoS). DPoS started to be available on tablets and with the help of digital signature technology, all printed documents were removed from the process and customer data started to be transported through Turkcell 's 4.5G network. DPoS have been differentiated from Turkcell Stores by focusing on the renewed interface and widespread availability of basic products and services.

As the final step in digital transformation, the Turkcell GO project was launched, which digitized the sales dialogue between our employees and our customers. Thanks to GO, sales screens are now simple, easy to understand and transparent. Store employees can look at the sales screens with our customers, understand our customer 's needs with data and product information and easily offer the products according to these needs. GO, with its simple structure, has shortened the time for new store employees to specialize and learn new products.

Turkcell stores product portfolio has been enriched with new products such as SUPERBOX, subscription to Digiturk and Paycell. In addition, more than 150 institutions bills have become payable in Turkcell stores.

The scope and prevalence of the retail employee certificate program, launched in 2017, were expanded. The advanced certification program was launched for experienced employees and approximately 300 passed face-to-face training in cooperation with Marmara University.

Our non-branded dealer network provides us with a high penetration of Turkcell products and services in Turkey. Our 7 TDC 's are aimed at enhancing our distribution effectiveness in the non-branded channel and ensure the timely and efficient distribution of Turkcell products and merchandising materials. They also facilitate the Turkcell brand and offer awareness in this competitive channel.

Alternative sales channels are re-designed under four main branches: Call center, Online Channel, which includes the company 's web site and the My Account app, Non-Telco Sales and Turkcell Flagship Store.

We offer our customers fast and safe access to our products and services 24/7 via Call Center, our web site (www.turkcell.com.tr) and the My Account app. Our web site has been serving as a sales channel since 2012. Besides Turkcell 's digitalized products and services, we provide services for many categories, including smartphones, tablets, computers, mobile accessories and home technologies. Another channel is our non-telco channel (which consists of ATMs, Call Centers, internet branches of banks and chain stores) where we provide our customers with the opportunity to access Turkcell 's products easily and quickly. We also proactively reach our customers and satisfy their needs easily and safely when they need our products and services through our Telesales channel. Further, we also serve through our flagship store in Istanbul.

All dealers are compensated based on the number of new subscribers they sign up and the level of such subscribers usage, as well as additional incentives based on their performance.

Sales Management develops strong relationships with and promotes brand loyalty among dealers through a variety of support and incentive programs. Training programs aim to educate dealers ' personnel on the technical aspects of our products and services, as well as sales techniques to increase sales and enhance customer relations. Our specialized sales employees, who are obliged to obtain a certificate to be eligible to work in the stores, serve around 200 million visitors annually. The certification program for our employees is quite extensive and involves different stages. The program began in April 2016 and has been widened with the inclusion of online assessments. The program has been created with a view to improving employee experience and making Turkcell an attractive work place. The technological development projects, coupled with merchandising services, point-of-purchase (POP) materials and

channel specific campaigns, helps to support the sales efforts across all of our sales channels.

Corporate clients are managed in four different segments: Public Accounts, Strategic Accounts, Major Accounts, Small and Medium Sized Businesses Accounts. The first three segments' customers are directly contacted by Turkcell's Account Managers, while dealers and telesales teams manage the Small and Medium Sized Business segment.

The corporate segment services consist of four basic categories including mobile telecom, fixed telecom, data center and cloud and information technologies.

Within Turkcell's sales teams, along with Telecom Services, Mobile Product and Solution Specialists, Fixed Product and Solution Specialists, Corporate Data Network, DC Cloud, Cyber Security Specialists and Professional

Table of Contents

Services teams specialized in IT solutions cater to the corporate clients. In 2017, vertical solution teams were formed to develop such solutions for eleven sectors including banking, retail, manufacturing, energy, local government, tourism, healthcare, education, IT/media, defense and logistics. These teams aim to create cross industry solutions to serve the digital transformation of Turkcell's corporate clients.

Turkcell also provides turnkey mobile and digital transformation and IT outsourcing projects for large corporations with the contribution of solution partners in Turkcell Satis ve Dijital Is Servisleri A.S.

b. Advertising

Turkcell has been on an exciting transformational journey towards becoming one of the world's leading digital operators since 2015. We have worked tirelessly to evolve into a digital services-focused experience provider and enrich our customers' lives with our digital services. Leveraging our network capabilities and the power of our 4.5G network, our services combine the best of the OTT world with the strongest capabilities of a converged telecom services operator, thus reaching what we believe to be higher standards of quality and customer experience.

Following the launch of 4.5G in Turkey in 2016, users began to increasingly rely on the Internet to meet their communication needs. This and our vision to add value to customers' daily life with our digital services through the 1,440 minutes in a day, we created our digital brand Lifecell which includes the tariffs that provide all communication and digital needs entirely through mobile data and digital services.

We base our communication efforts on three pillars that underlie our digital operator strategy. The first pillar comprises our four key assets that we believe ensure our position as the market leader: our integrated mobile and fixed communication technologies, the social responsibility projects that we undertake throughout the year, our brand perception; and the firsts we have marked in the Turkish market. The second pillar involves customer conversations which spring from various products and services that target diverse needs of specifically identified customer segments. The third pillar includes our digital services that connect our customers with what the digital world has to offer.

c. Customer and Experience Management

The key part of our customer and experience management strategy is to provide basic and premium services through several channels by thinking and acting in a customer-focused manner in line with market trends and Turkcell's mobile and fixed solutions. Our goal is to maintain a continuous relationship with our customers through fostering a high level of customer satisfaction. We continuously ask our customers how satisfied they are with the service they receive and for any suggestions through near real-time mobile surveys. We aim to achieve operational excellence throughout all customer touch points for every customer segment by continuously improving and simplifying processes and services. Customer feedback is the major input for Turkcell's continuous process and journey improvement efforts.

With respect to provision of customer services we mainly work with our subsidiary Global Bilgi Pazarlama Danismanlık ve Cagri Servisi Hizmetleri A.S. (Turkcell Global Bilgi). Turkcell Global Bilgi offers 24/7 contact center services at several sites. In 2018, Turkcell Global Bilgi managed approximately 130 million calls received through its interactive voice response system. Turkcell's customer service strategies for contact centers are implemented by Turkcell Global Bilgi. We audit their operations along with monitoring whether customer services and customer satisfaction programs are executed in line with Turkcell's customer strategies. Turkcell Global Bilgi's success has been affirmed by a number of domestic and international awards in 2018. Turkcell Global Bilgi also offers telesales and Information and Communication Technology (ICT) helpdesk services.

We have prioritized the digitalization of our customers. Accordingly, we have invested in our online self-service channels and aim for the migration of our customers on those channel. The primary online channel is our mobile application My Account which was downloaded 37.3 million times and had 19.2 million 3-month active users as of fourth quarter 2018. The app enables our customers to track their bills, usage and settings, change tariffs and make top-ups to their plans and pay bills. Within the scope of convergence, both mobile and fixed customers can use My Account . In 2018, we have also enhanced our Omni channel activities like scheduling appointments for Turkcell stores, tracking requests and viewing SMS that are sent to/received from Turkcell. Additionally, our customers can contact us via online chat available on our main website or through My Account. We also use online chat applications to reach our customers proactively when they are stuck on our website or need assistance while buying a product. We have launched an AI-based chatbot called Turkcell Assistant instead of live chat agent. 75% of all chats regarding billing have been resolved by Turkcell Assistant without any agent involvement.

For corporate customers, account managers are assigned for an exclusive service. An account manager serves as the single point of contact and provides solutions in response to customer needs. While we serve our corporate customers by categorizing them under four segments, we also support them through e-mails, calls and dedicated back offices under

Table of Contents

the umbrella of our contact center. We have corporate customer representatives to support direct requests from our public accounts, strategic and major enterprises, medium businesses and/or to support indirect requests received through our account managers. In addition, for small businesses, we aim to meet faster and higher quality service standards by providing online solutions to support our sales teams with our Field Support Desk. Moreover, we have enriched our corporate application called My Company with the addition of new tariff and bill features. In 2018, 140 thousand companies have experienced the convenience and speed of doing self-service transactions for their corporate lines by using My Company for a total of 80 million transactions.

Turkcell has been awarded the ISO 10002 certificate since 2011 and continuously renews its ISO 10002 certification every year in the scope of design, installation, operation, sales, and after-sales services of global mobile communications within Turkcell functions. The latest certification ISO 10002: 2004 Quality Management-Customer Satisfaction-Complaints Handling Certificate was awarded in 2018.

IX. International and Domestic Subsidiaries

A component of our strategy is to grow or improve our business in our home market and in the international markets where we are already present. Continued strong operations in the countries in which we are currently present is important for us. We believe these operations offer growth opportunities and will provide additional value to us in the future.

While continued improvement of our current operations is a key priority, we will seek and evaluate the opportunities of being a digital operator by offering our portfolio of digital and financial services, both in Turkey and in international markets, and increasing their number of users.

Ukraine - lifecell

We acquired our interest in our subsidiary lifecell LLC (lifecell, formerly known as LLC Astelit or Astelit) on April 2, 2004, by purchasing the entire share capital of Astelit's parent, CJSC Digital Cellular Communications (DCC), from its shareholders.

On July 10, 2015, we completed the acquisition of SCM's 44.96% stake in our Netherlands-based subsidiary Euroasia Telecommunications Holding B.V, which owns 100% of LLC Astelit and which merged with Lifecell Ventures Cooperatief U.A. in December 2016. The terms of the acquisition required a payment of \$100 million as consideration for the acquisition, the payment of Astelit's debts obtained through and with guarantee of SCM Group, the termination of all guarantee agreements to which SCM Group is party and the release of SCM Group in this regard. In accordance with IFRS 10 Consolidated Financial Statements, the acquisition of the remaining 44.96% in Astelit for a total consideration of \$100 million was considered an equity transaction and the deficit representing the difference between the non-controlling interests was derecognized and the consideration paid for the acquisition of shares amounting to TRY 929 million was deducted from retained earnings in July 2015.

Following this transaction, Astelit's borrowings obtained from and with the guarantee of SCM Group was repaid in July 2015. The Group converted a material portion of Astelit's borrowings to equity and restructured Astelit's remaining borrowings in order to mitigate the foreign exchange risks associated with borrowings denominated in foreign currency. Astelit's capital was increased by \$686 million (equivalent to TRY 1,995 million as of December 31, 2015) and Astelit obtained \$66 million (equivalent to TRY 192 million as of December 31, 2015) subordinated loan directly from the Company in the third quarter of 2015. As of 31 December, 2018, the company utilized loans fully denominated in local currency of UAH 4.9 billion (equivalent to TRY 925 million as of December 31, 2018) under the guarantee of Turkcell.

After ten years of successful history in the industry, on January 15, 2016 Astelit announced a new stage of its development which started with large-scale rebranding into lifecell , and in connection therewith changed its legal name to lifecell LLC on February 2, 2016. Under the new brand identity and with ongoing investments in 3G+ and 4G infrastructure and services, lifecell will continue its presence in the market, seeking to become Ukraine s top data operator and usher in new possibilities in the country s telecommunications landscape.

As of December 31, 2018, lifecell had 9.9 million registered subscribers. The majority of such subscribers were prepaid subscribers. lifecell s three-month active subscribers reached 7.3 million as of December 31, 2018.

The company has been known in the market as one of the most dynamic and innovative ever since lifecell was the first to introduce a number of new technologies and products that had previously been unavailable to Ukrainian subscribers. The company is highly motivated to keep its innovation leadership in marketing and sales. There are 233 lifecell branded shops in 107 cities of Ukraine as of December 31, 2018. There are 105 facelifted and 128 rebranded shops as of December 31, 2018. In addition, customers can order lifecell services in 1,964 branded sales points and 24,978 other GSM and non-GSM sales points throughout Ukraine. As of December 31, 2018, lifecell provided roaming services in 198 countries via 301 roaming partners.

Table of Contents

As of December 31, 2018, lifecell provided services in all cities in Ukraine (excluding Crimea and Sevastopol city) with a population of more than 2,000 inhabitants and in total more than 1,988 settlements nationally, and all principal intercity highways and roads. This corresponds to a coverage of approximately 92.19% of the population of Ukraine or 94.62% geographical coverage with 6,970 base stations. lifecell stopped recording revenues from Crimea and Sevastopol city starting from the end of September 2014 and impaired its assets in that region. Furthermore, in 2016 the operator has also ceased services and lost its revenue stream on the uncontrolled territories of Luhansk region and since February 2017 lifecell is unable to provide mobile services and stopped recording revenue on the disputed part of the Donetsk region. The company impaired its assets in the disputed part of Donetsk and Luhansk region in the fourth quarter of 2017. Cumulative capital expenditure for the development of lifecell's coverage amounted to \$2.2 billion as of December 31, 2018.

The Ukrainian telecommunications market is regulated by the Cabinet of Ministers of Ukraine (main state policy), the State Service of Special Communication Administration (SSSC) (technical policy aspects) and by the National Commission for the State Regulation of Communications and Informatization (NCCIR) controlled by the President of Ukraine and which carries out general telecommunication market regulation and inspection.

lifecell is dedicated to further development of innovations in the market. NCCIR held the 3G license tender on February 23, 2015. lifecell submitted a bid of UAH 3,355 million (equivalent to TRY 376 million as of March 19, 2015) and was awarded the first lot, which is the 1920-1935 / 2110-2125 MHz frequency band. In May 2015 lifecell made payments of UAH 350 million (equivalent to TRY 46 million as of May 8, 2015) and UAH 7 million (equivalent to TRY 1 million as of May 12, 2015) for the first installment of conversion of spectrum from military use. In April 2017, lifecell had made payment of UAH 299 million (equivalent to TRY 40 million as of April 28, 2017) for the second installment of conversion. In October 2018 lifecell had made a payment of UAH 230 million (equivalent to TRY 45 million as of October 31, 2018) for the third installment of the conversion.

After winning the tender, lifecell launched 3G services on June 4, 2015, becoming the first operator to offer a 3G+ network in Ukraine and as of December 31, 2018 3G+ from lifecell is available in more than 7,789 towns and settlements in Ukraine and in more than 1,213 Ukrainian towns and settlements lifecell is the only operator providing the third generation network services. As of December 2018, lifecell has the widest 3G geographical coverage over the country based on its own calculations by using operators' relevant disclosures. In February 2017, the company became the 3G speed leader according to the OOKLA speed test. 3G+ services on the lifecell network can be used by 3.4 million Ukrainians as of December 31, 2018. As of December 2018, lifecell is a leader of smartphone penetration with 75% on its high-speed 3G+ network in the Ukrainian telecommunication market.

NCCIR held the 4G license tenders for the 2600 MHz band on January 23, 2018 and for the 1800 MHz band on February 26, 2018. Lifecell was awarded 4G licenses for 15 years, at a cost of UAH 909 million (equivalent to TRY 173 million as of December 31, 2018), and UAH 795 million (equivalent to TRY 151 million as of December 31, 2018) for the 15 MHz in each frequency band, the latter of which was paid in April 2018. In February 2018 lifecell made payments of UAH 187 million (equivalent to TRY 36 million as of December 31, 2018) to PrJSC VF Ukraine, and in May 2018, UAH 19 million (equivalent to TRY 4 million as of December 31, 2018) to JSC Kyivstar for the installment of conversion of spectrum from operators use.

After winning the tenders, lifecell launched 4G services in the 2600 MHz band on March 30, 2018 and in the 1,800 MHz band on July 1, 2018, becoming the first operator to offer 4.5G services in Ukraine nationwide. As of December 31, 2018 4.5G from lifecell is available in more than 2,014 towns and settlements in Ukraine and in more than 609 Ukrainian towns and settlements lifecell is the only operator providing fourth generation network services.

In line with the Turkcell Group's digital services strategy, in 2017 the company launched a number of unique digital services. lifecell was the first mobile operator to launch the cloud application lifebox, the Ukrainian radio application fizy, the Ukrainian online magazines application lifecell Magazines, the sports dedicated application LifeSport offering no data consuming packages for video, social networks and digital communication. All these digital services are also available for the users of other telecom operators. In response to the need of the Ukrainian market for cardless and cashless payment services, lifecell introduced its online money transfer tool available online.

lifecell is continuously focused on company security (tools, processes, people) and investment in security infrastructure. In January 2017, lifecell's Corporate Security Department developed Emergency Notification System (ENS). ENS is a cloud-based solution serving as a tool for instant emergency alerts and mass notification of a certain target audiences via voice messages, SMS and e-mail. The solution was applied by lifecell during the massive global cyber-attack on the June 27, 2017. The so-called Petya malware affected major companies and critical infrastructure in the country. However, it did not have a major impact on lifecell's business continuity due to immediate reaction of the

Table of Contents

company's security team and real-time alerts sent to the lifecell employees. In September 2017, the company signed a Memorandum for cooperating with the Department of Cyber police of the National Police of Ukraine and granted the cyber-police with the license for ENS, which helps the Ukrainian government in creating an environment that is resistant to IT security attacks and coordinate the actions of people in case of emergency.

In 2018 NCCIR approved an MTR decrease from UAH 0.15 to UAH 0.12 per minute starting from January 1, 2019. Lifecell would benefit from a further decrease of MTR rates along with the introduction of asymmetry to reflect operator cost if the regulator decides to do so in the coming years. Such a change would likely stimulate competition in the Ukrainian market, reducing the competitive barrier.

The MNP Procedure and Technical Requirements have been drafted with the involvement of operators and adopted by state authorities back in 2015. Tender for an MNP solution provider occurred on January 25, 2016. MNP was not launched in 2016 because the Antimonopoly Committee of Ukraine (AMCU) annulled the result of the initial MNP tender. There had been several claims to the court which were successfully resolved in spring 2018. In 2017 the NCCIR adopted a new Registration Procedure which allows remote ways of identification and will facilitate donor-led approach, where the registration is provided by donor within the MNP Procedure. New Registration Procedure came into force on December 13, 2018. The MNP introduction, which is expected to create a more competitive and transparent telecommunication market in Ukraine, is officially announced by NCCIR to begin on May 1, 2019.

In April 2016, lifecell LLC sold 811 towers to a subsidiary of Turkcell in Ukraine, Ukrtower LLC, and signed a tower lease agreement which allows lifecell to leaseback these assets.

As of August 2017, Paycell LLC has been incorporated as a subsidiary of lifecell LLC in order to operate as a financial institution and perform loan granting, leasing, money transfer and e-money services. Licenses for leasing and loan granting has been obtained as of October 2017, and licences for e-money and local currency transfers have been obtained in September and October 2018, respectively.

Belarusian Telecom

On July 29, 2008, Beltel Telekomunikasyon Hizmetleri A.S. (Beltel) signed a share purchase agreement to acquire an 80% stake in CJSC Belarusian Telecommunication Network (Belarusian Telecom), which provides services using GSM and UMTS technologies, for a consideration of \$500 million. On August 26, 2008, control of Belarusian Telecom was acquired from Belarus State Committee on Property and \$300 million of the total consideration was paid. An additional \$100 million was paid in December 2009 and another \$100 million was paid in December 2010. An additional payment of \$100 million will be made to the seller when Belarusian Telecom records a full-year positive net income for the first time. For more information, see Note 27 (Other non-current liabilities) to our Consolidated Financial Statements.

At December 31, 2018, Belarusian Telecom had 1.5 million registered subscribers, the majority of which were prepaid, Belarusian Telecom's three-month active subscribers reached 1.2 million as of December 31, 2018. Belarusian Telecom had 150 exclusive and more than 300 non-exclusive sales points and the sales from online store continuously increases with the growing customer demand through online channels.

At December 31, 2018, Belarusian Telecom operated 2G and 3G services in all cities with a population of more than 10,000, and provided 2G services on all principal intercity highways and roads of Republic of Belarus, which corresponds to coverage of approximately 99.9% of the entire population of Belarus, or 97.7% geographical coverage. Belarus Telecom has also launched 4G service in August 2016 on LTE infrastructure established by JLLC Belarusian Cloud Technologies (beCloud) and provides 4G services throughout the country in 182 cities, towns or settlements as

of December 31, 2018. In Belarus, the only LTE license is owned by beCloud at current and beCloud is the only infrastructure provider for LTE services. Availability of 4G services to our customers has improved the quality of data services and customer experience in using data services. Belarusian Telecom's data subscribers reached 700 thousand as of December 31, 2018.

In line with our strategic priority of improving our balance sheet structure, we have restructured debt of Belarusian Telecom in 2015. As part of the restructuring, Belarusian Telecom's total existing intra-group loans were converted into a subordinated loan, provided directly by Turkcell. Following the restructuring, Belarusian Telecom's debt is EUR 612 million subordinated loan (equivalent to TRY 3.7 billion as of December 31, 2018) owed to Turkcell as of December 31, 2018.

As of February 1, 2012, Mobile Number Portability was launched with a donor-initiated mechanism where subscribers who want to port their numbers had to apply to their existing operator, which was in favor of the dominant market players. In April 2014, the mobile number portability procedure was revised to a recipient-initiated mechanism. Popularity of the mobile number portability service has increased with the revision of the procedure. Belarusian Telecom is the leader of Mobile Number Portability in Belarus in terms of number of port-in subscribers' count.

Table of Contents

In Belarus, the lack of pricing regulations in the wholesale and retail mobile markets to prevent dominant operators abusive pricing practices continued to have an adverse impact on our business.

Belarus Lifetech LLC

Lifetech LLC, which is a subsidiary of Turkcell Group, was established in 2012. It is 99.9% owned by Belarusian Telecom and has more than 200 professionals located in Belarus. Lifetech LLC provides a full cycle of software development services and develops custom and platform-based solutions to its clients located in Belarus, Turkey, the Netherlands, the Russian Federation and the Turkish Republic of Northern Cyprus.

Kuzey Kibris Turkcell

Kibris Mobile Telekomunikasyon Limited (Kuzey Kibris Turkcell), a 100% owned subsidiary of Turkcell, was established in 1999 in the Turkish Republic of Northern Cyprus. As of December 31, 2018, Kuzey Kibris Turkcell had 0.5 million registered subscribers.

On April 27, 2007, Kuzey Kibris Turkcell signed a license agreement for the installation and operation of a digital, cellular and mobile telecommunication system with the Ministry of Communications and Public Works of the Turkish Republic of Northern Cyprus. The license agreement became effective on August 1, 2007 and replaced the previous GSM-Mobile Telephony System Agreement dated March 25, 1999, which was based on revenue-sharing terms. The new license agreement granted a GSM 900, GSM 1800 and IMT 2000/UMTS license, for GSM 900 and GSM 1800 frequencies, while the usage of IMT 2000/UMTS frequency bands was subject to the fulfillment of certain conditions. The license agreement is valid for 18 years from the date of signing. The license fee was \$30 million including VAT and financed by Kuzey Kibris Turkcell through internal and external funds.

On March 14, 2008, Kuzey Kibris Turkcell was awarded a 3G infrastructure license at a cost of \$10 million including VAT, which was paid at the end of March 2008.

In the third quarter of 2010, Kuzey Kibris Turkcell completed and began operating the radio transmission (airlink) project providing direct international voice and data connection to the mainland.

In 2012, Kuzey Kibris Turkcell acquired Internet Service Provider and Infrastructure establishment and operation licenses. Kuzey Kibris Turkcell applied for a right of way to major municipalities and the Ministry of Transportation in order to establish a national fiber optic infrastructure. On January 24, 2014, a protocol between Kuzey Kibris Turkcell and the Ministry of Transportation was signed for the right of way for highway sides. In the fourth quarter of 2017, Lifecell Digital Ltd. has been incorporated in order to operate as an Internet Service Provider company and offer converged telecom services. Lifecell Digital Ltd. also acquired an infrastructure license in December 2018. Total fiber optic infrastructure implementation is at 69 kilometers by the end of 2018.

The National Regulatory Authority started to decrease mobile termination rates gradually in July 2014 over a year; with around 71% decline in total, from TRY 0.10 to TRY 0.03.

The Ministry of Transportation reduced the call charges 41% for off-net calls as of January 1, 2015. These price regulations had a substantial adverse effect on our business. According to the requirements of Electronic Communications Law, prepaid lines were registered. In addition, technical infrastructure was completed for IMEI registrations. The registration of IMEI numbers continue since early 2016.

At the end of 2016, for the first time in the communication industry, Turkcell launched its digital brand Lifecell in the Turkish Republic of Northern Cyprus, providing all its services through internet based digital services. As of December 31, 2018 lifecell subscribers have 80% more ARPU when compared to other subscribers.

As of January 22, 2018 mobile number portability (MNP) has come into effect in Turkish Republic of Northern Cyprus.

Turkcell Europe

Turkcell Europe GmbH (Turkcell Europe) was founded by Turkcell in 2010 as an MVNO providing service over the T-Mobile (Deutsche Telekom AG) network. Headquartered in Cologne, Germany, Turkcell Europe commenced activity in March 2011.

Table of Contents

Until the end of 2014, Turkcell Europe continued its operation as a MVNO and offered Turkcell's service quality across both Germany and Turkey. In order to increase the efficiency of our operations in Germany, we made changes to the business model in 2014 from a wholesale traffic purchase agreement to a marketing partnership. The Marketing Partnership agreement between Turkcell Europe and a subsidiary of Deutsche Telekom was signed on August 27, 2014 which involved the transfer of Turkcell Europe subscribers and operations to a Deutsche Telekom subsidiary as of January 15, 2015. The contract has been renewed on December 12, 2017 and remains in effect. Turkcell and Deutsche Telekom have agreed to rebrand Turkcell Europe into the lifecell brand. Going forward Turkcell aims to offer its digital services also in the German market. As of December 31, 2018, Turkcell Europe had 190,751 registered subscribers.

Financell B.V.

Financell B.V. was incorporated under the laws of the Netherlands in 2007 and had its registered address in the Netherlands. Financell borrowed funds from third party lenders with or without a Turkcell guarantee to fund other Turkcell subsidiaries. Due to other available options for funding the subsidiaries, the Board of Directors of Turkcell resolved to liquidate Financell B.V. on December 21, 2016 and liquidation was completed as of August 14, 2018.

Turkcell Global Bilgi

On October 1, 1999, Global Bilgi Pazarlama Danismanlik ve Cagri Servisi Hizmetleri A.S. (formerly known as Global Bilgi Pazarlama Danisma ve Cagri Servisi Hizmetleri A.S.) (Turkcell Global Bilgi) was established in order to provide telemarketing, telesales, and call center services, particularly for Turkcell Group. In 2005, Turkcell Global Bilgi completed its transition from call center to contact center as Turkcell Global Bilgi started to manage customer contacts at every channel. Since then, in addition to providing services to Turkcell, Turkcell Global Bilgi started offering customer care services to companies in finance, retail, energy, public sector and the airline industry. In 2016, Turkcell Global Bilgi announced its presence as a Customer Experience Solution Center. By completing its business model transition from Customer Care to Customer Experience, Turkcell Global Bilgi started to analyze customer experiences deeper and gained a vast experience. As of August 4, 2017 Turkcell Global Bilgi has obtained an R&D center certificate from the Ministry of Science, Technology and Industry. As of December 31, 2018, Turkcell Global Bilgi employed 12,034 employees, of whom approximately 64% provide Turkcell with customer care and retention services, around 27% serve customers of other clients and while the remainder works as administrative personnel. Turkcell owns approximately 100% of Turkcell Global Bilgi.

Turkcell Global Bilgi owns a 100% share of Global Bilgi LLC since 2008, which operates in Ukraine and provides telesales and call center services.

Inteltek

Inteltek Internet Teknoloji Yatirim ve Danismanlik Ticaret A.S. (Inteltek) offers information and entertainment services. Turkcell holds 55% of Inteltek through its wholly owned subsidiary Turktell Bilisim Servisleri A.S. (Turktell), while Intralot S.A. Integrated Lottery System and Services, a Greek company, holds 20% and Intralot Iberia Holdings S.A., a Spanish company, holds 25%.

Inteltek has entered into a contract on August 29, 2008 with Spor Toto Teskilat Baskanligi (Spor Toto Directorate) in order to run a sports betting business for ten years. In addition to the foregoing, Inteltek signed a mobile betting dealer agreement with Spor Toto on January 12, 2010, which gives it the right to operate 1,000 mobile terminals. On August 29, 2018, on the day its licence ended, Inteltek signed a new agreement with Spor Toto Directorate up to one year or up until a new license is tendered out. This contract, based on a specific Turkish legislation relating to gaming

enacted in 2008, was entered into following numerous legal challenges to prior contracts.

On November 15, 2018, Inteltek agreed to sell its 51% owned subsidiary Azerinteltek QSC (Azerinteltek) to Baltech Investment LLC, shareholder of Azerinteltek with a 24.5% shareholding. The transaction was completed on January 11, 2019 for a total consideration of EUR 19.5 million.

On November 27, 2018, Spor Toto Directorate held the Tender For Procurement Of Fixed Odds And Pari-Mutuel Betting Based On Sports Competitions By Procurement Of The Same By Legal Persons Of Private Law (the Tender). Shortly after, Spor Toto announced the cancellation of the Tender where Inteltek was the only bidder. On February 13, 2019, Spor Toto held the Tender once again and Inteltek has been notified that the tender was awarded to the other bidder. Following a transition period of up to six months, Inteltek s operations in sports betting will cease. Inteltek may consider exercising its rights stemming from the law within the respective time frame with respect to the tender process. Unless our legal challenge proves successful or there is a new tender, we expect that Inteltek will cease its activities in August 2019.

Table of Contents

The respective revenues comprised approximately 1% of our 2018 consolidated revenues while 2019 contribution is anticipated to be lower considering our ongoing contract and the transfer process.

In 2017, Inteltek entered the digital gaming sector by developing a gaming platform for Turkcell's BiP application. Inteltek has launched the kids-oriented gaming platform Playcell and the first board game app Backgammon Go to the Turkish market in 2018. In 2018, over 18 million users visited Playcell; the BiP gaming platform had 4.8 million unique visitors and more than 240 thousand users downloaded Backgammon Go. Inteltek will focus on growing its presence in the attractive gaming market.

Turkcell Superonline

Superonline Iletisim Hizmetleri A.S. (Turkcell Superonline) has a fixed telephony services authorization, which allows the company to provide call origination and termination for consumers and corporations, as well as wholesale voice carrying services. It also has authorization to provide satellite communication services, infrastructure operating services, internet services and wired broadcasting services, and mobile virtual network operating services. Currently, the company carries the majority of Turkcell's traffic, previously carried by Turk Telekom (the incumbent operator). Turkcell Superonline was founded in 2009 through the merger of our subsidiary Tellcom with the Superonline business acquired from the Cukurova Group.

Established to be an innovative telecom service operator and with its extensive international connectivity, Turkcell Superonline offers its international and national clients wholesale voice termination, international leased data lines, internet access, telehouse and infrastructure services. Furthermore, Turkcell Superonline is in the retail broadband market, bringing fiber optics to residences. Turkcell Superonline provides fast communication technology with its own fiber optic infrastructure in Turkey and provides telecommunication solutions to individuals and corporations in the areas of voice, data and TV.

Turkcell Superonline is a telecom operator providing fixed network communication solutions to telecom operators, corporations and households in the areas of data, voice and video. Bringing one of the world's fastest internet services to Turkey through cooperation with major international operators, we carry on investing in order to transform the Silk Road into a Fiber Road by expanding our own infrastructure across Turkey with a fiber network stretching to every corner of the country. We believe that the group synergy arising from being a 100% subsidiary of Turkcell Group, along with our top quality services and our stated goals above sets Turkcell Superonline as a worthy candidate to become the most preferred service provider of choice .

We believe that Turkcell Superonline differentiates itself through its commitment to the quality of after-sale services. Turkcell Superonline supplies corporations with industry-leading service-level agreements utilizing its professional technical support personnel and highly qualified team of consultants. Turkcell Superonline has been awarded the ISO 9001:2015 Quality Management System Certificate from Bureau Veritas. Turkcell Superonline aims to become one of the leading innovative telecommunications operators in Turkey and it intends to continue to seize opportunities in the internet and telecommunications markets.

Turkcell Superonline won the tenders of BOTAS, Turkey's state-owned pipeline company, and TEIAS, Turkey's state-owned electric power transmission company, for the indefeasible right to use the capacity of the fiber optic cables already installed by BOTAS for 15 years in 2009 and TEIAS for 15 years in 2017 including the right to install additional fiber optic cables and the right to use the capacity of these fiber optic cables during the same period. These transactions have been both considered as a finance lease as the lease term is for the major part of the remaining useful life of the fiber optic cables already installed by BOTAS and Turkcell Superonline made a significant investment during the initial period of the lease agreement which is an indicator that the transaction is a finance lease. The

recognized cost of the indefeasible right of use as of December 31, 2018 is TRY 118.0 million (December 31, 2017: TRY 113 million).

Turkcell Superonline began to provide 1000 Mbps service to homes in May 2011 for the first time in Turkey in line with the Turkcell Group's strategy to provide state-of-the-art technology for its customers with top-quality service. Turkcell Superonline has rendered Turkey as one of the first five countries in the world where a 1000 Mbps connection is provided to homes thanks to this service option. As of February 2018, Turkcell Superonline started to offer 10 Gbps connections on demand basis.

On March 7, 2013, Turkcell Superonline signed a share purchase agreement to acquire a 100% stake in Deksarnet Telekomunikasyon A.S. (Deksarnet) which is an affiliate of Vestel Elektronik San. ve Tic. A.S. Group. In July 2013, the control over Deksarnet was acquired from Vestel Elektronik San. ve Tic. A.S. Group for a consideration of TRY 3.4 million. Turkcell Superonline and Deksarnet merged on December 3, 2013.

On January 31, 2014, Turkcell Superonline signed a share purchase agreement to acquire a 100% stake in Metronet Iletisim Teknoloji A.S. (Metronet). In April 2014, the control over Metronet was acquired from Es Mali Yatirim ve Danismanlik A.S. for a consideration of TRY 27 million. Turkcell Superonline and Metronet merged on July 4, 2014. With this acquisition, Turkcell Superonline's fiber in-city coverage increased to 14 cities, up from 12 at the time.

Table of Contents

Turkcell Superonline merged with Turkcell Interaktif Dijital Platform Icerik Hizmetleri A.S. on December 28, 2016 (Turkcell Interaktif). Following the merger, Turkcell Interaktif was deregistered from Istanbul Trade Registry.

As of December 31, 2018, Turkcell Superonline has 43.3 thousand km of fiber backbone covering 79 major cities in Turkey and has 8 border crossings. Turkcell Superonline has fiber in-city coverage in 21 cities and increased its homepasses to around 3.4 million as of December 31, 2018 from around 3.1 million a year ago. Including partnership engagements, we are capable of covering 6.44 million households in 28 cities. We have five border crossings to Europe, offering various diversity options to important European cities through protected and completely diverse routes. With our stable fiber infrastructure and six border crossings to the East, we offer capacity services through Middle-East, CIS and Asia. Our next generation network designed over this strong infrastructure enables us to deliver high quality solutions to telecom operators, multinational and national private corporations and the governmental institutions.

Turkcell Superonline is building and putting into motion its domestic wholesale business strategy as well providing wholesale products such as bit stream access via its FTTx fiber coverage, infrastructure services, backbone transmission, Ethernet, IP transit capacities, cyber security and VPN services to operators, service providers and datacenter companies in the Turkish domestic market.

Turkcell Superonline is leading the localization strategy for Turkey's data and internet traffic by developing partnerships with internet exchange platforms, Tier-1 operators, global/local content and cloud service providers to enable direct access to all networks and also commercializing the internet traffic. Turkcell Superonline aims to continue to invest in and expand its own fiber optic network and further utilize the group synergy created with Turkcell.

On December 18, 2017, the Turkcell Board of Directors approved the issuance of management agreement based lease certificates (wakala sukuk) in accordance with capital markets legislation by Turkcell Superonline through an asset leasing company in the domestic market, for an amount of up to TRY 300 million, up to 12-month tenor, on various dates and at various amounts without public offering, as private placement and/or to be sold to institutional investors. On January 19, 2018, application for the approval of the issue programme for lease certificates was made to the Capital Markets Board and the approval was obtained on March 1, 2018. The first issue of TRY 125 million with a 6-month tenor was made in March 22, 2018 and matured on September 13, 2018. It was followed by the second issue of TRY 75 million on December 13, 2018 with 103-day tenor and the third issue of TRY 100 million on February 13, 2019 with 121-day tenor, which concluded the issue programme under the CMB approval. On February 1, 2019, the Turkcell Board of Directors approved a new resolution to allow Turkcell Superonline to issue lease certificates for an amount of up to TRY 500 million under the same above conditions. Turkcell Superonline may continue to raise local currency funding through the issuance of lease certificates in the domestic market.

JCR Eurasia Rating has evaluated Turkcell Superonline in an investment-level category on the national and international scales and assigned the ratings on the Long Term National Scale as AA (Trk) and the Short Term National Scale as A-1+ (Trk) with Stable outlooks on May 29, 2018.

Global Tower

Kule Hizmet ve Isletmecilik A.S., (Global Tower) was established in 2006 as a 100% subsidiary of Turkcell and commenced its operations in 2007 to provide infrastructure management by leasing places on towers to private and public entities and institutions. It is the first and only tower company in Turkey and fifth largest tower company in Europe. In addition to Turkey, it has operations in Ukraine, Belarus and the Turkish Republic of Northern Cyprus. Today, it serves not only Mobile Network Operators (MNO) but also broadcasting, ISPs, energy, public institutions

and other related industries. Its 100% owned subsidiary in Ukraine, UkrTower LLC, was founded in 2009 and its 100% owned subsidiary in Belarus, Beltower LLC, was founded in 2016. Beltower has a right of use agreement signed with Belarusian Telecom.

Global Tower operates a unique portfolio of 10,581 towers, 8,501 of which are located in Turkey. Global Tower owns 1,132 towers in Ukraine and operates 833 towers in Belarus, as well as 115 towers in Turkish Republic of Northern Cyprus with right of use, through agreements with the tower owners to sublease them to third parties through revenue share agreements. An assessment process for a potential sale and lease-back arrangement relating to the remaining towers in Belarus is currently ongoing. Global Tower also provides service over 100 mobile towers. Global Tower provides fast and high-quality service to its customers in collaboration with its business partners.

Table of Contents

In Turkey, Global Tower manages the processes of renting, maintaining and installing towers in 11 structured regions with its 5 solution partnerships. With this structure, the distance between any two service points in Turkey is less than 90 km.

Global Tower helps customers expand their network, peer-to-peer telecommunications and it provides broadcasting field infrastructure solutions, turnkey setup services and professional operation-maintenance services. With its project management, field rental, construction works, telecommunications equipment setup and ready-for use field delivery solutions, it helps private and public institutions reach more customers.

Global Tower's wide service range consists of:

Shared infrastructure services in tower/rooftop/in house fields

TV-Radio infrastructure solutions

E2E and wind power infrastructure solutions

M2M / Scada / Telemetry Infrastructure Solutions

GSM-R Solutions

Mini Data Centre Infrastructure Solutions

Mobile Tower Solutions

Acclimatized System Room Solutions

Energy infrastructure solutions

Hybrid Systems Solutions (Solar / Wind)

Infrastructure Maintenance and Operation Services

Field Acquisition and Contract Management Services

Satellite telecommunication solutions and services

The Turkcell Board of Directors decided to initiate an initial public offering (IPO) of Global Tower 's shares in June 2016. However, due to adverse macroeconomic conditions in the markets, the IPO has been postponed. We are evaluating the IPO option for the coming periods if and when the financial market conditions become favorable.

Turkcell Teknoloji

Turkcell Teknoloji Arastirma ve Gelistirme A.S (Turkcell Teknoloji), a wholly owned subsidiary of Turkcell, commenced operations in 2007 in the TUBITAK Marmara Research Center Technological Free Zone in Kocaeli, Turkey. In 2015, Turkcell Teknoloji consolidated its operations in Kucukyali Technology Plaza, Maltepe, Istanbul, Turkey. Turkcell Teknoloji 's R&D center employs more than 800 researchers who have been accredited by the Ministry of Science, Technology and Industry. Turkcell Teknoloji 's established team of experts develops a wide range of convenient and reliable solutions with innovative roadmaps. Through integrated intelligence and high-performance core capabilities, (Data Analytics and artificial intelligence, Blockchain, Network Technologies, IoT, VR/AR), Turkcell Teknoloji 's comprehensive portfolio addresses the following domains: digital services, location-based services and platforms security, roaming solutions, blockchain software life cycle, artificial intelligence and big data processing, business intelligence applications, CRM solutions, network technologies, financial solutions, cloud solutions, mobile marketing, internet of things (IOT), revenue management solutions and campaign management solutions, music and entertainment services, Over-The Top (OTT) solutions and IP TV services.

Turkcell Teknoloji has continued to export technology and software to CIS, Europe, Middle East and Africa. The Turkcell Teknoloji Campaign Management System is deployed and used in ten countries Azerbaijan, Belarus, Ukraine, Turkish Republic of Northern Cyprus, Germany, Uzbekistan, Georgia, Moldova, Libya and Kazakhstan. In 2018, Turkcell continued to expand its customer base with digital services in Moldova, and looked for the new opportunities to implement its product catalogue with newly added products.

With the goal of being Turkey 's leading R&D and innovation base, Turkcell Teknoloji demonstrates the value it attaches to innovation with its increasing number of patents each year. In 2018, the Turkcell Teknoloji R&D Center submitted over 453 new national and 20 international patent applications. As of December 31, 2018, Turkcell Teknoloji has 1,605 national and 128 international patents applications and 369 granted patents.

Table of Contents

Turkcell Teknoloji cooperates with a wide network of national and international R&D companies, universities and research centers and plays an active role in international R&D programs. Hence, Turkcell Technology is an active participant in European collaborative research programs.

As a member of the boards of ITEA and CELTIC clusters of the Eureka program, which is a leading open platform for international cooperation in innovation involving over 40 countries, Turkcell Technology supports the establishment of the European research agenda. ITEA is a transnational and industry-driven Research, Development and Innovation programme in the domain of software innovation in ICT domain. CELTIC strengthens the competitiveness of the European industry by fostering European R&D cooperation in telecommunications and the well-being of society by stimulating innovative information and telecommunication services. Turkcell Technology also has a long history of developing research projects associated with Eureka programs, where we participated as a project leader, national leader or project partner. Turkcell Technology works closely with its national and global partners to initiate new projects in Eureka clusters and Horizon 2020 (Horizon 2020 is the biggest EU Research and Innovation programme to promote discoveries and world-firsts by taking great ideas from the lab to the market) calls which are publicly funded by the Scientific and Technological Research Council of Turkey (TUBITAK) and the European Commission.

Turkcell Finansman A.S.

Turkcell Finansman A.S. (Financell , Turkcell Finansman), a wholly owned subsidiary of Turkcell, was established on October 22, 2015 with the approval of the Banking Regulation and Supervision Agency (BRSA , the financial institutions regulator in Turkey) in order to provide financing solutions to Turkcell customers in the form of consumer loans. The company commenced operations in February 2016 after receiving the BRSA s operational permission and was re-branded as Financell in 2017.

Financell was launched nationwide in March 2016 in order to provide financing solutions to existing or new Turkcell customers for their handset, tablet or accessory purchases. With a prudent risk management approach, Financell mainly supports smartphone sales of Turkcell and thus cooperates with a wide network of Turkcell point-of-sales across Turkey.

Financell is funded by equity and borrowings from different sources. Even though the major funding source is bilateral loans from domestic and international lenders, Financell may also tap into the local debt capital markets for bond issues. In order to diversify its borrowing base, Financell also resorts to other funding alternatives such as asset backed securities (ABS). From April 2017 to December 31, 2018, Financell executed four ABS issuances via Aktif Yatirim Bankasi A.S. (a domestic investment bank) at an amount totalling TRY 360 million. The very first ABS issuance of TRY 100 million fully matured on December 21, 2018. Fitch Ratings assigned Financell BB Foreign and Local Currency Long-Term Issuer Default Ratings (IDRs) and AA-(tur) National Long-Term Rating.

Financell had 4.4 million loans outstanding and TRY 4.2 billion of consumer loans had been granted as of year-end 2018. Cost of risk has improved to 1.97% in December 2018 from 2.26% in December 2017. Coverage ratio as of December 2018 was 77.6%.

In September 2017, Financell established a branch in Turkish Republic of Northern Cyprus started handset financing operations The business grew throughout 2018 by offering financing options for smart devices.

Financell expanded its services in 2017 into insurance and bundled insurance products with consumer loans through a revenue sharing agreement with BNP Paribas Cardiff. In June 2018, Turkcell Sigorta Aracilik Hizmetleri A.S. (Guvencell , Turkcell Sigorta) insurance agency has been incorporated as a subsidiary of Financell in order to offer various insurance products. In December 2018, Guvencell launched its first product which is for women health

insurance.

Turkcell Ozel Finansman A.S.

Turkcell Ozel Finansman A.S. (TOFAS), a wholly owned subsidiary of Turkcell, was incorporated on February 12, 2018 with the approval of the BRSA in order to provide financing solutions in accordance with Islamic financing principles for purchases of goods and services. The company is currently waiting for the BRSA licensing process.

Turkcell Odeme ve Elektronik Para Hizmetleri A.S.

Turkcell Odeme ve Elektronik Para Hizmetleri A.S. (Paycell or Turkcell Odeme) became operational as of March 2015 to create a convenient payment solution for users and to offer them a streamlined shopping experience under Paycell brand.

Table of Contents

In August 2016 Paycell has acquired a Payment Service Provider License from the BRSA and became the first MNO subsidiary having this license in Turkey. With its brand Paycell , Turkcell has expanded its merchant network and reached over 2,000 merchants by implementing easy and secure payment methods to new areas such as mobile app stores, restaurant chains, parking lots, transportation services, physical goods and airport fast track services.

After it was awarded an electronic money payments licence in July 2017, Paycell has launched digital money, prepaid card and utility bill payments through Paycell application and various Turkcell shops. In December 2017 VISA has confirmed Paycell's membership. As of December 31, 2018, 2.7 million credit and debit cards are registered at Paycell. Throughout 2018, the business grew at an accelerating rate and added on other features of peer to peer money transfer, expanded merchant integrations and increasing penetration of Paycell prepaid cards.

Paycell took its first step toward globalization in October 2017 by launching direct carrier billing services in Turkish Republic of Northern Cyprus. The business grew throughout 2018 with addition of other Paycell products. In 2018, Paycell launched e-money and local currency transfer services in Ukraine, allowing Ukrainian customers to make digital payments. Paycell plans to grow into other international markets offering Turkcell's digital solutions worldwide.

As of December 31, 2018, Paycell had 5.2 million three-month active users (including direct billing service users) and the Paycell app was downloaded 2.6 million times. In 2018, including Financell, Paycell generated TRY 5.8 billion transaction volume.

Lifecell Ventures

Lifecell Ventures Cooperatief U.A. (formerly named Beltur Cooperatief U.A., Lifecell Ventures , Lifecell Digital) is a 100% subsidiary of Turkcell and it is incorporated in the Netherlands.

In line with Turkcell Group's strategic priority being a digital operator and spreading OTT products and services both in international and domestic markets, Lifecell Ventures is responsible for delivering our OTT services to the global markets and expanding Turkcell Group's footprint by launching new offerings, accelerating the company's owned OTT activities, growing current services and making strategic alliances. Lifecell Ventures uses technology to provide a digital experience to consumers worldwide and enable telecom operators to compete effectively by offering digital communications, entertainment, music, TV, transactional and e-commerce applications as well as cloud solutions on either a licence or a white-label basis. Lifecell Ventures' business model is based on charging consultancy, brand and license fees in return for provision of digital service infrastructure and know-how to other operators. Lifecell Ventures has the ambition to contribute in taking telecoms to the next level , which is a more digital service focus rather than being an infrastructure company.

Lifecell Ventures signed cooperation agreements with ALBtelecom SH.a. (ALBtelecom) of Albania, CG Corp Global of Nepal and Digicel Group of Caribbean following its already-signed agreement with Moldcell of Moldova within the scope of our international digital business which will allow the use of our digital services in total 39 countries. ALB Telecom, which operates in Albania with a population of 3 million, will initially start to offer BiP and lifebox services to its customers, and then will expand its offerings to include fizy, Yaani, Dergilik and Kopilot in accordance with the cooperation. Digicel Group operating in 31 countries in the Caribbean, Central America and the Pacific will integrate these services into the infrastructure of operators in its countries of operations. With the agreement signed, CG Corp Global, part of the CG Group, will launch Nepal's first digital operator that will offer our digital services BiP, lifebox, fizy, TV+, Dergilik and Fast Login to a population of around 30 million.

Lifecell Digital s business model is based on charging consultancy, brand and license fees in return for provision of digital service infrastructure and know-how to respective operators.

Turkcell Satis ve Dijital Is Servisleri A.S.

Turkcell Satis ve Dijital Is Servisleri A.S. (formerly known as Turkcell Satis ve Dagitim Hizmetleri A.S.) (Turkcell Satis) sells telecommunication and IT products through our flagship store and provides a wide variety of products via our website www.turkcell.com.tr. In 2016, Turkcell Satis started to sell equipment to other entities as corporate sales. In addition, since Turkcell Satis is experienced in the sector, it also acts as an intermediary between producer and distributors to support the determination of products, pricing, amount to be sold, sales support components and management of their inventory.

In January 2019, the company s legal name was changed to Turkcell Satis ve Dijital Is Servisleri A.S., and its area of operations have been expanded to cover end to end IT and technology related solutions and services for enterprises, including data center, cloud, security, digital transformation, system integration and IT managed services.

Table of Contents

Turkcell Enerji

Turkcell Enerji Cozumleri ve Elektrik Satis Ticaret A.S. (Turkcell Enerji), a 100% owned subsidiary of Turkcell, was established on February 20, 2017 with the vision of being a leader for the transformation of energy markets in Turkey through digitalized, decentralized and decarbonized solutions. Turkcell Enerji supplies electricity to eligible residential, commercial and industrial customers in Turkey.

Turkcell Enerji owns an electricity supply licence, issued by the Energy Market Regulatory Board (EMRA), on May 11, 2017, for a period of 20 years. This enables the company to trade electricity and/or electrical capacity.

Sofra Kurumsal

Sofra Kurumsal ve Odullendirme Hizmetleri A.S. (Sofra Kurumsal), in which Turkcell indirectly holds a 33.3% stake, was incorporated on July 24, 2018. Belbim Elektronik Para ve Odeme Hizmetleri A.S., a subsidiary of the Municipality of Istanbul, and Posta ve Telgraf Teskilati A.S., the Turkish postal services company, act as shareholders together with our subsidiary Turkcell Odeme. Sofra Kurumsal will provide services via various means such as service coupons, meal coupons, meal cards, electronic coupons and/or smart cards, in vehicle payments as well as smart keys.

Turkcell Foundation

Turkcell Foundation (Turkcell Vakfi , Foundation) was founded by our Company on October 11, 2018. The Foundation is a non-for-profit foundation aiming to develop and implement charity and donation programs with respect to, including but not limited to, technology and education.

Assets Held for Sale

Fintur

Turkcell holds a 41.45% stake in Fintur Holdings B.V (Fintur), which holds interests in the mobile operation in Moldova as of March 7, 2019.

Telia Company A.B. (Telia Company), which is one of our major shareholders and also our partner in Fintur through a 58.55% stake held by Sonera Holding B.V. (Sonera), announced on September 17, 2015 that it had initiated a process in relation to its Eurasian assets with the ultimate aim of a complete exit. In line with the growth strategy in the region at the time, and as the minority shareholder in Fintur (which included assets in Kazakhstan, Azerbaijan, Georgia and Moldova at that time), on February 26, 2016, Turkcell submitted a binding offer for the remaining 58.55% stake of Sonera in Fintur that Turkcell did not own and Telia Company 's 24% direct stake in J.S.C. Kcell (Kcell) operating in Kazakhstan. However, the negotiations were inconclusive and we decided to sell our Fintur stake. Fintur was classified as held for sale and reported as discontinued operations since October 2016.

As part of this process, on January 26, 2018, Fintur, through its 99.99% subsidiary Gurtel Telekomunikasyon Yatirim ve Dis Ticaret A.S. (Gurtel), signed a binding agreement with Silknet JSC (Silknet), a joint stock company organized under the laws of Georgia, to transfer its 100% total shareholding in Geocell LLC, a limited liability company organized under the laws of Georgia for USD 153 million. The transaction was closed on March 20, 2018 following the receipt of regulatory approvals. On March 5, 2018, Fintur transferred its 51.3% total shareholding in Azertel Telekomunikasyon Yatirim Dis Ticaret A.S (Azertel) to Azerbaijan International Telecom LLC (Azintelecom), a company fully owned by the Republic of Azerbaijan, for EUR 221.7 million. The signing of the definitive agreement, the transfer of shares to Azintelecom and the transfer of proceeds to Fintur were completed simultaneously. On

December 12, 2018, Fintur signed a binding agreement with JSC Kazakhtelecom to transfer its 51% total shareholding in Kcell for USD 302.6 million. The transaction was closed on December 21, 2018. These transactions have no impact on the Company's financial statements since Fintur is classified as assets held for sale. Simultaneously with the signing of the Kcell share sale agreement, Turkcell also signed a binding agreement with Sonera Holding to transfer its 41.45% shareholding in Fintur for EUR 350 million, subject to closing adjustments. The transaction is expected to be completed following the receipt of regulatory approvals from the Moldovan authorities, although we can provide no assurance that such approvals will be obtained.

X. Potential Investments

Our efforts to selectively seek and evaluate new investment opportunities continue. Our strategy for growth involves selectively seeking and evaluating new investment opportunities and participating in those meeting our criteria. We may pursue inorganic growth opportunities both in Turkey and in countries where we are already present with a controlling stake in order to be able to leverage our experience and technological base. We may also pursue opportunities which include alliances, such as MVNOs, management service agreements and marketing partnerships, and may be in the area of mobile or fixed telecommunications and services.

Table of Contents

We will evaluate the opportunities of being a digital operator by enriching the portfolio of digital products and financial services in certain international markets and increasing the users for our digital services and products.

On November 2, 2017, Turkcell signed the Joint Initiative Group Cooperation protocol and on May 31, 2018 Shareholders Agreement was signed by Turkcell with the intention to participate as a potential contributor in Turkey's Automobile Project. Under this protocol, the signing parties has agreed to determine the framework of the activities to meet requirements of the project for designing, developing, manufacturing an electric car and establishing sales and distribution network, and to establish a local company that will own the intellectual and industrial property rights of this car. Accordingly, on June 25, 2018, Türkiye'nin Otomobili Girişim Grubu Sanayi ve Ticaret A.S. (Türkiye'nin Otomobili , TOGG , Turkey's Car) was incorporated, in which Turkcell has participated as a founding partner with 19% stake and provided TRY 3.8 million as initial capital. AG Anadolu Grubu Holding A.S., BMC Otomotiv Sanayi ve Ticaret A.S., Kok Ulaşım Tasımacılık A.S. and Turkcell have equal partnerships in TOGG each with a 19% shareholding; whereas Türkiye Odalar ve Borsalar Birliği holds a 5%. The CEO of TOGG was appointed on September 1, 2018. The capital of the company was increased to TRY 50 million as of October 17, 2018.

TOGG has been established primarily to produce the electric car referred to above and to carry out supporting activities within the framework of Turkey's Automobile Project. Turkcell continues its efforts towards developing smart transportation systems, leveraging on its high quality communication network and strong engineering and software capabilities embedded within its organization. We believe that we will make an important contribution to Turkey's Automobile Project as a technology partner with our knowhow and competencies.

XI. Disclosure Pursuant to Section 219 of the Iran Threat Reduction and Syria Human Rights Act of 2012 (ITRA)

Based on our information and the information provided to us by our affiliates, as of the date of this annual report, we believe that certain of our business activities in Iran in 2018 and in 2019, and the business activities of certain of our affiliates, are subject to disclosure pursuant to ITRA Section 219.

During the year ended December 31, 2018, Turkcell and lifecell had international roaming relationships with the following companies in Iran and Syria: Telecom Infrastructure Company of Iran (TIC), MTN Irancell, Taliya Iran, Telecommunication Kish Co., KIFZO and Rightel and Syriatel and MTN Syria. During the year ended December 31, 2018, Turkcell and lifecell had gross revenues of approximately TRY 5.5 million and cost of approximately TRY 2.2 million attributable to these agreements. Turkcell has developed an OTT product called BiP which is available for download online for free. The Company believes that there have been downloads from within Iran, which have generated no revenue or profits. For details regarding the risks we face with regard to our business in Iran, please refer to Item 3.D Risk Factors Any instability in the political environment and/or downturn in the economy, as well as volatile international markets and events and the threat of terrorism, in Turkey and/or internationally may have an adverse effect on our business and financial condition.

Turkcell has voice interconnection agreements with Tadbir Ertebatat-E-Sigma (Sigma LLC). During the year ended December 31, 2018, gross revenues attributable to these agreements were TRY 41 million, and net losses of approximately TRY 16 million.

Turkcell Superonline provided transit IP and leased line services through network interface agreements with TIC. During the year ended December 31, 2018, total revenues attributable to these agreements were TRY 10.7 million. Furthermore, Turkcell Superonline has a business relationship with Teleka Maedeh Co. (Telecom Idea) based in Iran. For the years 2017 and 2018 the services provided to this company generated no revenues, and the services received from this company amounted to approximately TRY 1.8 million. Payments for these costs were done to QBIC

Electronics Trading LLC (a UAE company) which is authorized by Telecom Idea for receiving payments.

We have made enquiries of our major shareholders regarding activities in Iran and Syria.

Telia Carrier AB of Sweden is interconnected with the Telecommunications Infrastructure Company of Iran via an interconnection point outside of Iran, but did not exchange any international telephony traffic with TIC of Iran in the year ended December 31, 2018. Telia Carrier AB of Sweden receives international telephony traffic from the Syrian Telecommunications Establishment via an interconnection point outside of Syria. Telia Carrier AB does not send traffic to the Syrian Telecommunications Establishment via this interconnection point, as this agreement has been terminated. During the year ended December 31, 2018, gross revenues and net profits attributable to this business relationship were EUR 29 thousand and EUR 27 thousand, respectively.

Table of Contents

Furthermore, we have been informed that Telia Finland, Telia Norge AS, Telia Denmark, Moldcell and Telia Lithuania had roaming agreements with Mobile Company of Iran (MCI), MTN Irancell, MTN Syria, Syriatel. For the year ended December 30, 2018, total costs associated with these agreements amounted to EUR 11 thousand.

Although it is difficult to do with a reasonable degree of certainty, we have concluded that our Iranian business partners described in this section may be owned or controlled indirectly by the Government of Iran. However, to our knowledge, none of the services provided by Turkcell and our affiliates in Iran described in this section have been used by the Government of Iran to commit serious human rights abuses against the people of Iran. Furthermore, we understand that the U.S. Department of the Treasury's Office of Foreign Assets Control has issued a general license authorizing U.S. persons to engage in certain of the activities described in this section. With the exception of the roaming agreement between Telia Denmark and Syriatel which has been terminated in 2018, we and our affiliates intend to continue the activities described in this section in 2019.

XII. Regulation of the Turkish Telecommunications Industry

a. Overview

All telecommunications activity in Turkey is regulated by the ICTA. The Electronic Communications Law No. 5809 (the Electronic Communications Law), which came into force on November 10, 2008, is the principal law governing telecommunications activity in Turkey. The Electronic Communications Law was published to correspond to the rapidly-evolving Turkish telecommunications industry, and all secondary regulations have been updated to be in accordance with this law. The duties of the ICTA, which may be exercised in a manner that is adverse to our operations and our financial results, include those described below.

b. ICTA

The ICTA has the authority to grant licenses and set fees in the electronic telecommunications industry.

According to Article 8 of the Electronic Communications Law, electronic communications services are rendered and/or established (as in the case of an electronic communications network or infrastructure) and operated following the authorization made by the ICTA. Authorization is granted either through notification made in accordance with the principles and procedures determined by the ICTA, in cases where scarce resource allocation is not necessary, or by the granting of usage rights, in cases where scarce resource allocation is necessary (allocation of frequency, satellite position, etc.). Under the Electronic Communications Law, usage rights may be granted for up to 25 years; however, there is no clause relating to the term of notification. According to the Electronic Communications Law, the principles and procedures relating to the notification and granting of usage rights is determined by the ICTA through secondary regulations.

According to the Electronic Communications Law, usage rights can only be restricted where the resources are required to be operated by a limited number of operators and for the purpose of ensuring the effective and efficient use of the scarce resources. In cases where the quantity of rights of use is limited, Article 9-6(a) of the Electronic Communications Law allows the Turkish Ministry to determine the criteria, such as (i) the authorization policy regarding electronic communications services which cover the assignment of satellite position and frequency band on a national scale and which need to be operated by a limited number of operators, (ii) the starting date of the service, (iii) the duration of the authorization and the number of operators to serve. While the criteria are determined by the Turkish Ministry, the authorization is still granted by the ICTA.

Under Article 51 of the Electronic Communications Law, the ICTA was authorized to determine the principles and procedures related to the process of personal data and protection of privacy and has published Regulations on the Protection of Privacy and Processing of Personal Data . With its decision rendered on April 9, 2014 and published in the Official Gazette on July 26, 2014, the Turkish Constitutional Court decided that Article 51 of the Electronic Communications Law is a violation of Article 20(3) of the Constitution, which stipulates data protection as a constitutional measure and that the measures should be regulated by the laws and therefore annulled the aforementioned provision (Article 51). The Article 51 of the Electronic Communications Law, which was repealed by Turkish Constitutional Court, was amended and came into force on April 15, 2015. In the amended Article 51, the main principles of recording and sharing subscribers personal data are defined in general. In addition, ICTA is also authorized to determine the procedures and principles related to the process of personal data and protection of privacy. A public consultation regarding the draft regulation has been collected by the ICTA, however the new regulation has not yet been adopted.

The Electronic Communications Law establishes legal principles and broad policy lines that the ICTA must follow, some of which are stated below:

Creation and protection of a free and efficient competitive environment.

Table of Contents

Protection of consumer rights and interests.

Protection of the objectives of development plans and Government programs as well as the strategies and policies set by the Turkish Ministry.

Promotion of implementations that ensure that everyone can benefit from electronic communications networks and services.

Ensuring non-discrimination among subscribers, users and operators under fair conditions.

Ensuring the conformity of electronic communications systems to international norms.

Protection of information safety and communication confidentiality.

The Electronic Communications Law also specifies general rules and principles relating to interconnection between operators. Agreements for interconnection are publicly available, but precautions are taken by the ICTA to protect commercial secrets of the parties.

The law entitled Universal Services and Amending Some Laws, Law No. 5369, determines the procedures and principles governing the provision and execution of universal service and the procedures and the rules relating to the fulfillment of universal services in the electronic communications sector, a universal public service that is financially difficult for operators to provide (and performance of a universal service obligation in the electronic communications sector). In accordance with Law No. 5369, the scope of universal services is determined periodically by the President of Republic of Turkey, which will not exceed three years.

The legislation designates the following as universal services: fixed-line telephony services, public pay telephones, telephone directory services to be provided in printed or electronic environments, emergency call services, basic internet services, passenger services to residential areas where access is solely provided by sea and sea communication and sailing safety communication services.

This law mandates that designated operators must provide universal services and the General Directorate of Communication can demand that operators provide universal services on a national and/or geographical basis. Turk Telekomunikasyon A.S. and the GSM operators are currently designated as universal services providers.

The Council of Ministers Decision No. 2011/1880, which was published in the Official Gazette numbered 27984 and dated July 4, 2011 allowed the use of the universal service fund to extend the mobile GSM network coverage listed in the annex of the decision to uncovered areas with a population of 500 or less. On February 13, 2013, we were appointed as universal service provider after a tender process and the related contract was signed on February 20, 2013. Under the aforementioned contract, Turkcell duly carried out its undertakings for installing sufficient infrastructure to cover 1,799 rural locations and the investment and operating expenses are compensated by the universal service fund of the Turkish Ministry. This contract was renewed until December 31, 2018 to add mobile broadband services to the existing infrastructure providing GSM services under Universal Service Law and to operate the new and existing networks together. Recently the contract has been extended with the same conditions as defined in the contract clause until December 31, 2019. The Electronic Communications Law also specifies general rules and

principles relating to tariffs. Pursuant to the Electronic Communications Law, operators may freely determine the tariffs they apply in compliance with the relevant legislation and the ICTA arrangements. In the event of determination of the significant market power of the operator, the ICTA may determine the method of the approval, tracking and auditing of the tariffs. It may also determine the lower and upper limit of the tariffs and principles and procedures of the application of the same.

The Electronic Communications Law provides basic guidelines for the tariffs and pricing and thus leaves the detailed rules and enforcement to the ICTA. According to the law:

(1) The tariff may be determined as one or more subscription fees, fixed fees, call charges, line rentals, and similar fee items.

(2) Tariffs to be imposed in return for providing any kind of electronic communications services shall be subject to the following provisions:

(a) Operators shall freely determine the tariffs under their possession, provided that they comply with the regulations of the ICTA and the relevant legislation.

(b) If an operator is designated as having significant market power in the relevant market, the ICTA shall be entitled to determine the procedures regarding the approval, monitoring and supervision of tariffs as well as the highest and lowest limits of the tariffs and the procedures and principles for the implementation thereof.

Table of Contents

(c) If an operator is designated as having significant market power in the relevant market, the ICTA shall be entitled to make the necessary arrangements to prevent anti-competitive tariffs such as price squeezing and predatory pricing and to supervise the implementation thereof.

(3) Procedures and principles pertaining to the implementation of Article 13 of the Electronic Communications Law, submission of tariffs to the ICTA and publishing and announcing them to the public shall be determined by the ICTA.

According to this regulation, the ICTA may intervene in the structure of our tariffs or may impose certain criteria relating to the revision of our tariffs. Pursuant to its decision in 2005, the ICTA designated Turkcell as having Significant Market Power (SMP) in the Mobile Access Call Origination Market while all three operators were designated as having Significant Market Power in Mobile Call Termination Market .

As a result of the significant market power designation in the Mobile Access and Call Origination Market, our Company was obliged to provide access and call origination services to other operators such as MVNOs and Directory Services Operators on a cost-based basis, while competitors can set their prices freely on commercial basis.

Upon the renewal of related market analysis; following an ICTA Decision dated April 12, 2017 and numbered 2017/DK-SRD/124, it has been decided that an *ex ante* regulation is no longer needed for Mobile Access Call Origination Market and that Turkcell's SMP designation will be removed as of April 12, 2018 unless otherwise stated. However, the Mobile Access and Call Origination Market deregulation transition period is extended until April 12, 2019. Within this period, Turkcell will retain its SMP designation and obligations under the Mobile Access Call Origination Market regulation will continue.

Upon the renewal of Mobile Call Termination Market analysis, by ICTA Decision dated April 19, 2017 and numbered 2017/DK-SRD/131, it has been decided that SMS and MMS termination services will no longer be regulated as of April 19, 2018 unless otherwise stated. However, an ICTA decision on April 12, 2018 stated that deregulation of SMS/MMS termination services is cancelled and SMS/MMS termination services will be regulated on the Mobile Termination Market.

In addition to the duties and authorities stated above, the Law Regarding the Establishment of ICTA No. 2813 has been amended and ICTA has been given the authority to apply a conciliation procedure for the receivables including administrative sanctions (except for the receivables that are intermediated for collection and the penalty requirement for the treasury share) and the debts of ICTA. According to this provision, it is possible to settle on a part of the disputed amount and to waive the primary or secondary claims and the settled matters cannot be made the subject of a lawsuit or a complaint.

Telegraph and Telephone Law numbered 406 has also been amended and it has been regulated that in the event that the treasury share is not paid in full in the given period, ICTA has the right to impose a penalty in the amount of one full amount of the incomplete or unpaid treasury share.

c. Regulation on Quality of Service in the Electronic Communications Sector

The Regulation on Quality of Service in the Electronic Communications Sector, effective since December 31, 2011 is applicable to all operators that provide service to end users and sets out the procedures and principles to control the conformity of the services of operators. Mobile telephone operators are required to meet new service quality requirements and submit a report based on these requirements every three months to the ICTA. Additional requirements for service quality must be fulfilled. If the operators fail to reach these requirements more than once, this may result in the imposition of penalties. The results of quality measurements can also be made publicly available on

the website of the ICTA for a period of one month, stating that the operator has failed to comply with the service quality requirements.

d. Regulation on Administrative Fines, Sanctions and Precautions in the Electronic Communications Sector

According to the Regulation on Administrative Fines, Sanctions and Precautions to be imposed on operators, effective as of February 15, 2014, the ICTA retains the right to impose fines in the event an operator submits incorrect or misleading documents or fails to submit documents as requested by the ICTA; does not submit such documents in a timely manner; does not permit inspection or audits to be made by the ICTA; uses unpermitted equipment or equipment not complying with standards or alters technical features of equipment; or does not pay fees arising from its use of licenses and frequencies; does not meet the regulations regarding numbering, number portability, calling line identification (CLI), access and interconnection, end-user tariffs, consumer rights, value added services (VAS), data protection, national security and public order, service quality and such or does not comply with the provisions of license agreements, telecommunications licenses and general authorizations or the legislation. The ICTA is authorized to impose sanctions and precautions as well as administrative fines.

Table of Contents

In 2018, there has been another amendment to the aforementioned regulation which introduces a new provision addressing natural persons and private legal entities which are not operators under the Electronic Communications Law. According to the new provision, entities (including natural persons and private legal entities which are not operators) who fail to comply with the obligations determined by ICTA regarding national cyber-security activities and protective measures against cyber-attacks, or fail to implement the measures taken by ICTA, will be subject to administrative fines.

e. Regulation on Authorization regarding the Electronic Communications Sector

In 2009, the ICTA published the Regulation on Authorization regarding the Electronic Communications Sector (Authorization Regulation), which determines the principles and procedures for the authorization of the companies that seek to provide electronic communication services and/or to install or operate electronic communications networks or infrastructure. In 2016, there had been major amendments to the aforementioned Regulation. According to the amendments:

(1) Operators authorized with the limited usage right authorization may sell devices, make installations, carry out maintenance or give consultations if it is related to or necessary for its field of activity. As a result of this amendment, Turkcell is able to sell devices in relation with electronic communication services.

(2) Companies which apply to the ICTA to be authorized should have paid the minimum amount of paid capital set by ICTA. The operators authorized before the amendment of the Regulation are also liable to meet this condition. According to the ICTA decision dated March 31, 2016 and numbered 2016/DK-YED/195, the operators authorized to provide Public Access Mobile Radio Service should have minimum paid capital amounting to TRY 250,000 and the operators granted with other authorization types should have minimum paid capital amounting to TRY 1,000,000.

(3) All operators should obtain the consent of the ICTA prior to the transfer, acquisition or any other transaction regarding 10% or more of their shares. The operators authorized with limited usage right should also notify the ICTA within two months at the latest in case of a transfer, acquisition or any other transaction of their shares up to 10%.

(4) Operators should provide free call center services, which was not an obligation in the former Regulation.

(5) Operators should keep the traffic data of their customers for two years, which was set at one year in the former Regulation.

(6) Operators are liable to notify the ICTA of any amendments to the documents regarding the employees of the operators (including employee lists) which have been previously submitted to the ICTA.

(7) The ICTA is entitled to decline authorization applications and proceed with operator inspections to confirm the accuracy of the information and documents submitted during the authorization application.

In addition to the amendments of the abovementioned Regulation, the ICTA decision on Procedures and Principles Regarding the Usage of Caller Line Identification (CLI) was published; the liabilities of the operators are increased.

f. Regulation on Mobile Number Portability (MNP)

Pursuant to Article 32 of the Electronic Communications Law, operators are required to supply operator number portability.

MNP allows subscribers to keep their existing telephone number when changing their telephone operator, their physical location or current service plan. These regulations became operational in the fourth quarter of 2008. Since we believe the MNP regulations conflict with our rights under our license agreement, without due compensation, we filed a lawsuit in 2007 for the cancellation of the MNP regulation. While we do not object to the substance of mobile number portability, we do, however, believe that our rights under our license agreement should remain protected or, if they are violated, we should be justly compensated. The Court rejected the case in June 2009 and we appealed the decision. The Plenary Session of the Chambers for Administrative Cases approved the court decision. We applied for the correction of the decision. The Court rejected the Company's request of the correction of the decision. The Company made an individual application before the Constitutional Court, against the respective decision. In 2009, the ICTA issued a new Regulation on MNP, abolishing the 2007 regulation and amended some Articles of this Regulation in November 2015. For new subscriptions, subscribers of mobile operators cannot port out to another operator in the first three months if the line has not been transferred to another subscriber.

Table of Contents***g. Regulation on Security of Network and Information in Electronic Communications Sector***

In 2008, the ICTA published the Regulation on Security of Electronic Communication, which determines the principles and procedures for precautions to be taken by the operators for eliminating or derogating the risks caused by threads or weaknesses of (i) the physical area of the operators, data, hardware/software security and reliability, and (ii) sustaining the reliability of human resources. In accordance with the regulation, our Company is required to comply with TS ISO/IEC 27001 or ISO/IEC 27001 standards. Turkcell was the first mobile operator in Turkey to receive the ISO/IEC 27001:2005 certification for its Network Operations function in 2008 covering all operations throughout Turkey. In 2011, Turkcell's IT function was also certified for ISO/IEC 27001:2005 and Turkcell's ISO/IEC 27001:2005 scope became one of the largest among telecommunication operators in Europe. In 2015, the Information and Communications Technology and Network departments successfully passed ISO 27001:2013 audits and were deemed to be in compliance with ISO 27001:2013 version. By having an ISO/IEC 27001:2013 certificate covering telecom infrastructure operations, Turkcell fulfills its regulatory obligations and offers its customers the benefits of an internationally-recognized secure management of operations and services. In July 2014, the ICTA repealed the above regulation and published the Regulation on Security of Network and Information in Electronic Communication Sector which requires the Company to set up and maintain a specialized team to detect, prevent and report all cyber events and work in coordination with the National Computer Emergency Response Center, in addition to the abovementioned obligations.

h. Turkish Competition Law and the Competition Authority

In 1997, the Competition Law (No. 4054) established a Competition Board. The Competition Board consists of seven members who are appointed for a term of six years and one-third of the Board members are renewed every two years. It is an autonomous authority with administrative and financial independence established to ensure effective competition in markets for goods and services.

The Competition Board can carry out investigations, evaluate requests for exemptions, monitor the market, assess mergers and acquisitions, submit views to the Ministry of Industry and Technology (formerly known as Ministry of Industry and Trade) and perform other tasks stipulated by the Competition Law. The ICTA can apply to the Competition Board if it determines that agreements regarding access, network interconnection and roaming violate the Competition Law.

Any person or legal entity may file a complaint with the Competition Board. The Competition Board can take necessary measures to prevent violations and may impose fines on those who are liable for such prohibited practices. The Competition Board may impose fines of up to 10% of the annual gross income of the operators, which is constituted by the end of the previous financial year and determined by the Competition Board. The ICTA and the Competition Board entered into a Protocol on Cooperation in 2002, followed by new Protocols in 2011 and 2015. The original Protocol established a framework whereby the ICTA and the Competition Board can cooperate on legal actions and policies regarding measures, regulations and inspections that affect competition conditions and competition in the telecommunications sector. The new Protocols regulate the mechanisms to improve cooperation between the ICTA and the Competition Board.

i. The Principles on the Applications Regarding the Anticompetitive Acts In Electronic Communications Sector

One of the principles that the ICTA must follow is the creation and protection of a free and efficient competitive environment. The Electronic Communications Law specifies that the ICTA is authorized to set rules (that do not contradict the Turkish Competition Law) to prevent anticompetitive acts, to investigate the operators as officio or upon a claim and to take necessary measures against the anticompetitive actions. Considering that the applications

regarding the anticompetitive acts are made by different methods and are based upon a variety of documents, the ICTA published the Principles on the Applications Regarding the Anticompetitive Acts in Electronic Communications Sector on December 20, 2017 in order to clarify these points.

j. Regulation on the Establishment of Metropolitan Municipalities in Fourteen Provinces and of Twenty-Seven Districts and Amending Certain Laws and Decree Laws

The Law No. 6360 on the Establishment of Metropolitan Municipalities in Fourteen Provinces and of Twenty-Seven Districts and Amending Certain Laws and Decree Laws was published in the Official Gazette on December 6, 2012 and enacted on March 30, 2014 through municipal elections. The Law, increasing the number of metropolitan cities from 16 to 30, dissolves the legal entity of villages and special provincial administrations in cities where there are metropolitan municipalities. By the amendment of the Law for Metropolitan Municipalities, the number of metropolitan municipalities increased and the borders of some metropolitan municipalities were extended. After this amendment, the ICTA increased our coverage obligations, defined in our concession agreement, by its decision, based on this law amendment which requires us to make material capital expenditures. We filed a lawsuit for the stay of execution and

Table of Contents

cancellation of the ICTA's aforementioned decision. The Council of State granted a motion for the stay of execution of ICTA's aforementioned decision. The ICTA objected to this decision. The objection was also rejected in favor of Turkcell. The hearing was held on November 27, 2018 and it is expected that the court will grant a decision in 2019. Since then the ICTA has been working on a new regulation aligned with the law no. 6360.

k. Regulation on Base Station Implementation in Electronic Communication Sector

In 2012, according to Law no 6360 and Municipality Law No 5393, the Metropolitan Municipalities were authorized to give site selection certificate to the BTS considering the requirements of city and building aesthetics and electronic communication services. The Site Selection Certificate Regulation was published in the Official Gazette dated January 27, 2018, numbered 30314, and entered into force on the date of its publication. According to this regulation, the Site Selection Certificate and the TRY 2,970 per station fee for the year 2019 will only apply to the BTSs established after December 6, 2012.

l. Zoning Law and Construction Certificate Requirement of Base Stations

The Supreme Court of Appeals rescinded the regulation regarding the base stations exemption from obtaining construction permits on October 1, 2009. The existing zoning law in Turkey requires mobile operators to obtain construction certificates for all existing and new base stations, resulting in the shutdown of some stations for which certification cannot be obtained. In Turkey, nearly half of the premises were built illegally without any permission. As a result, some municipalities started taking legal action such as affixing seals to suspend the construction or demolition orders against base stations, negatively affecting our coverage, quality of service and customer experience. We have also taken legal action requesting nullity of those acts. In addition, studies for altering zoning laws regarding procedures for building certifications are being prioritized.

The Planned Areas Zoning Regulation was published in the Official Gazette dated July 3, 2017 and became effective as of October 1, 2017. The necessity of obtaining a building permission certificate and a construction permit, which is not possible in practice, has thereby been abolished. This regulation authorizes the establishment of a BTS without a construction license process, provided that necessary precautions and approval of ICTA are taken, and provides a special BTS installation procedure. The following requirements must be met for BTS to be established on private land and in buildings:

The Site Selection Certificate should be received prior to the establishment of the BTS.

Operators must undertake the technical responsibility the installation.

The consent of flat owners should be obtained prior to the establishment of a BTS.

A static report for the BTS installation should be obtained by operators.

The appearance of the BTS should not negatively affect the aesthetics, appearance and silhouette of the buildings.

The size of the antenna should not exceed 1.55 meters on roof-top sites.

m. *Regulation on Waste Electrical and Electronic Equipment*

In May 2012, the Regulation related to Waste Electrical and Electronic Equipment was published in the Official Gazette and became effective. Waste Electrical and Electronic Equipment regulations may impose some obligations on our Company and increase our operational costs.

n. *Regulation on the Internet*

Law no. 5651 for the Regulation of Web Content has been revised by Law no. 6518, which became effective on February 19, 2014. The new law required that all internet access providers, which include all mobile and fixed network operators as well as all internet service providers, would form a Union of Internet Access Providers (UAP) within three months, which was established. After the establishment of the UAP, if any internet service provider or any operator giving internet services fails to become a member of the UAP, it shall also be fined with an amount equal to one percent of the previous year s revenues.

In addition, the new law raises the existing fines for not removing content as requested by the court. The law also introduces URL-based blocking of websites which requires new capital as well as operating expenditures for all internet access providers.

Table of Contents***o. GSM Licensing in Turkey***

The terms of license agreements are governed by the Authorization Regulation, and it provides that the ICTA approve the transfer of licenses to third parties, ensure continuation of services in the event of cancellation of a license and approve the investment plans submitted by licensees.

A GSM license is subject to the ICTA's right to suspend or terminate operations under the license on the grounds of security, public benefit, and national defense or to comply with the law. However, suspension or takeover of facilities under these circumstances is subject to the payment of compensation to the operator. The ICTA can also inspect such licensee and nullify its license if the licensee has materially failed to comply with the terms of its license. The ICTA may also terminate licenses in cases of gross negligence or non-payment of the authorization fee.

The licensee is responsible for installing telecommunications equipment in conformance with international signalization systems and numbering plans. Furthermore, the licensee is obligated to make the necessary investments to offer the licensed service, including the design of the service, the making of financial investments and the installation and operation of the facility required for the service. Licensees are allowed to determine the prices for services, subject to the regulations of the ICTA. Upon the expiry of a license, including termination, the facilities and immovables of the licensee, in operating condition, will be transferred by the licensee in accordance with the license agreement.

p. Our GSM License Agreement***General***

Since April 1998, we have operated under a 25-year GSM license for which we paid an upfront license fee of \$500 million. In 2002, we signed a renewed license agreement for our GSM license which provides that a monthly payment of 15% over our gross revenue paid to the Turkish Treasury shall be subject to the legal interest rate. If such payments are not duly paid twice in any given year, a penalty in an amount equal to triple the last monthly payment shall be payable to the Turkish Treasury. However, as a result of the aforementioned amendments made to the Telegraph and Telephone Law, it has been provided that in the event that the treasury share is not paid in full in the given period, the ICTA has the right to impose a penalty in the amount of one full amount of the incomplete or unpaid treasury share. The process of the amendment of the licence agreement in accordance with said Law is ongoing and the licence agreement is expected to be amended by the ICTA. In addition, we must pay annual contributions in an amount equal to 0.35% of our gross revenue to the ICTA's expenses. After the tender relating to the allocation of additional GSM 900 frequency bands, made by the ICTA in June 2008, the license agreement was amended to include the additional frequency band and was signed by Turkcell and the ICTA in February 2009, which made small additional changes in the articles of the license agreement entitled performance bond and allocated frequency bands and then it was signed again in February 2016 with small amendments.

Terms and Conditions

Under the license agreement, we hold a licensed concession to provide telecommunications services in accordance with GSM-PAN European Mobile Telephone System standards in the 900 MHz frequency band. Our license covers 55 channels and allocates telephone numbers between the 530 and 539 area codes in the national numbering plan. Our license also permits us to establish customer service centers, sign contracts with subscribers and market our services to subscribers. Our license was issued with an effective date of April 27, 1998, for an initial term of 25 years. At the end of the initial term, we can renew our license, subject to the approval of the ICTA, provided that we apply between 24 months and 6 months before the end of our license. Our license is not exclusive and is not transferable without the

approval of the ICTA.

We paid a license fee of \$500 million to the Turkish Treasury upon effectiveness of our license. On an ongoing basis, we must pay 15% of our gross revenue, defined as of March 2006 to exclude interest charges for late collections from subscribers and indirect taxes such as 18% VAT, as well as other expenses and the accrued amounts that are recorded for reporting purposes to the Turkish Treasury. We are required to pay 10% of our existing monthly treasury share to the Turkish Ministry as a universal service fund contribution. Since 2005, we are required to pay 90% of the treasury share to the Turkish Treasury and 10% to the Turkish Ministry as a universal service fund contribution. As of January 1, 2018, all of our treasury share is paid to the ICTA, which then transfers it to the Turkish Treasury and the Turkish Ministry as detailed above. The calculation method for the treasury share has also been revised and the following will consequently not be considered in calculation of the treasury share: overdue interests which are accrued to the subscribers for any unpaid balance, accrual amounts for the purpose of reporting, amounts for the purpose of correction accounting records which occur in the same year due to errors (such as customer information, type of business, amount, price).

Furthermore, under the Authorization Regulation, all kinds of share transfers, acquisitions and actions of the operators which are authorized by a Concession Agreement must be communicated to the ICTA, and such share

Table of Contents

transfers, acquisitions and actions shall be made with the written approval of the ICTA if they result in a change of control component of such operators. The control component is defined as the rights that allow for applying a decisive effect on an enterprise, either separately or jointly, de facto or legally .

Our license subjects us to a number of conditions. It may be revoked in the event that we fail to meet any of these conditions.

Coverage

Our license requires that we meet coverage and technical criteria. We must attain geographical coverage of 50% of the population of Turkey (living in cities or towns of 10,000 or more inhabitants) within three years of our license s effective date and at least 90% of the population of Turkey (living in cities or towns of 10,000 or more inhabitants) within five years of the effective date of our license. This coverage requirement excludes coverage met through national roaming and installation sharing arrangements with other GSM systems and operators. Upon the request of the ICTA, we may also be required, throughout the term of our license, to cover at most two additional areas each year. Except in the event of force majeure, we must pay a late performance penalty of 0.2% of the investment in the related coverage area per day for any delay of more than six months in fulfilling a coverage area obligation. As at the end of 2018, we have met and surpassed all coverage obligations.

Service Offerings

Our license requires that we provide services that, in addition to general GSM phone services, include free emergency calls and technical assistance for customers, free call forwarding to police and other public emergency services, receiver-optional short messages, video text access, fax capability, calling and connected number identification and restrictions, call forwarding, call waiting, call hold, multi-party and three-party conference calls, billing information, and the barring of a range of outgoing and incoming calls.

Service Quality

Generally, we must meet all the technical standards of the GSM Association as determined and updated by the European Telecommunications Standards Institute and Secretariat of the GSM Association. Moreover, we must meet the standards that the ICTA imposes under Regulation on Quality of Service in the Electronic Communications Sector .

Tariffs

The license agreement regulates our ability to determine our tariff for GSM services. The license agreement provides that, after consultation with us and consideration of tariffs applied abroad for similar services, the ICTA sets the initial maximum tariffs in Turkish Lira and U.S. Dollars. Thereafter, our license provides that the maximum tariffs shall be adjusted at least every six months. The license agreement provides a formula for adjusting the existing maximum tariffs. For the adjustment of the maximum tariffs established in Turkish Lira, the formula is: the Turkish Consumer Price Index announced by the Ministry of Industry and Technology for Turkey minus 3% of the Turkish Consumer Price Index announced by the Ministry of Industry and Technology. For the maximum tariffs established in U.S. Dollars, the same method is applied to the USA Consumer Price All Item Index Numbers.

Although we believe the tariff structure in our license will, in most instances, permit adjustments designed to offset devaluations of the Turkish Lira against the U.S. Dollar, any such devaluation that we are unable to offset will require us to use a larger portion of our revenue to service our non-Turkish Lira foreign currency obligations. Additionally, in

the event that the ICTA were to establish maximum tariffs at levels below those that would enable us to adjust our rates to offset devaluations, this could have a material adverse effect on our business, consolidated financial condition, results of operations and/or liquidity. The maximum tariffs set by the ICTA may constitute the highest rates we may charge for the services included in these customized service packages. Generally, the maximum tariffs set by the ICTA for particular services are set higher than the standard tariffs determined by the ICTA for those services. Such caps were in force at the beginning of 2016, until a decision rendered in March 10, 2016 by the ICTA annulled the maximum tariffs set by the ICTA in 2015. On September 20, 2018, the ICTA set the maximum tariffs at 0.5670 TRY/min for voice and TRY 0.4075 for SMS with regard to Turkcell and Vodafone on the basis of the obligations in their licence agreements. Since Avea does not have such an obligation in its licence, a policy decision was taken by the Ministry of Transportation and Infrastructure for Avea to comply with maximum tariffs.

With respect to our retail tariffs, following a board resolution dated March 25, 2009, the ICTA set a lower limit solely for Turkcell's on-net retail tariffs. In the following years our minimum on-net price level was changed several times by the ICTA, and was set at TRY 0.0073 for SMS and TRY 0.0428 for voice for the first two quarters of 2016. However, pursuant to a decision rendered on August 16, 2016, the ICTA removed the regulation on lower limit on on-net

Table of Contents

retail prices and campaigns. These pricing regulations were valid on each and every single voice tariff and campaign, whereas we were obliged to maintain our minimum on-net SMS rate on network base. The table below shows the on-net prices and MTR rates until August 16, 2016:

TRY	July 1, 2013		Change %
	Before July 1, 2013	August 16, 2016	
Minimum on-net voice price	0.0313	0.0428	37%
Minimum on-net SMS price		0.0073	
Voice MTR	0.0313	0.0250	(20%)
SMS MTR	0.0170	0.0043	(75%)

The ICTA has in the past intervened and may again intervene with the charging period, impacting the prices we charge for our tariffs.

Relationship with the ICTA

The license agreement creates a mechanism for an ongoing relationship between us and the ICTA. The ICTA and Turkcell coordinate their activities through a License Coordination Committee (the Committee), which is responsible for ensuring the proper and coordinated operation of the GSM network, assisting in the resolution of disputes under the license agreement and facilitating the exchange of information between the parties.

License Suspension and Termination

The ICTA may suspend our operations for a limited or an unlimited period if necessary for the purpose of public security or national defense, including war and general mobilization. During suspension, the ICTA may operate our business, but we are entitled to any revenues collected during such suspension, and our license term will be extended by the period of any suspension.

Our license may be terminated under our license agreement upon a bankruptcy ruling that is not reversed or dismissed within 90 days, upon our failure to perform our obligations under the license agreement if such failure is not cured within 90 days, if we operate outside the allocated frequency ranges and fail to terminate such operations within 90 days or if we fail to pay our treasury fee.

In the event of termination, we must deliver the entire GSM system to the ICTA.

If our license is terminated for our failure to perform our obligations under our license, the performance guarantee given by us in an amount equal to 1% of the license fee may be called. The license agreement makes no provision for the payment of consideration to us for delivery of the system on such termination.

In the event of a termination of our license, our right to use allocated frequencies and to operate the GSM system ceases. Upon the expiration of the license agreement, initially scheduled to occur in 2023, without renewal, we must transfer to the ICTA, or an institution designated by the ICTA, without consideration, the network management center, the gateway exchanges, and the central subscription system, which are the central management units of the GSM network. We may apply to the ICTA between 24 and six months before the end of the 25-year license term for the renewal of the license. The ICTA may renew the license, taking into account the legislation then currently in effect.

Applicable Law and Dispute Resolution

Under our license agreement, any dispute arising from scope, implementation and termination of the agreement shall be brought before the Committee. If the dispute is not settled within 30 days before the Committee, it shall be referred to the parties. If the dispute is not resolved by the parties within 15 days, then it shall be settled by an arbitral tribunal in accordance with ICC Rules. The governing law of any arbitration is Turkish law and any such arbitration shall be conducted in English. Disputes relating to national security or public policy shall not be subject to arbitration proceedings.

Additionally, the Law No. 7061 dated November 28, 2017 has introduced the settlement mechanism set forth in a provision of the Tax Procedural Law No. 213 for the disputes in relation to the payment of the treasury share.

q. Authorization of 3G License

In 2008, the ICTA conducted a tender process to grant four separate licenses to provide IMT 2000/UMTS services and infrastructure. We were granted the A-type license, which provides the widest frequency band, at a consideration of EUR 358 million (excluding VAT). We signed the license agreement relating to 3G authorization on April 30, 2009 and then the agreement was renewed and resigned in February 2016 with small amendments which do not change the core of the service. The license agreement has a term of 20 years.

Table of Contents

The 3G License Agreement has provisions that are generally similar to those contained in our license agreement relating to 2G. However, with respect to dispute resolution, while our 2G license provides for arbitration for the settlement of disputes, under the 3G License Agreement, disputes arising between the parties shall ultimately be settled by the Council of State of the Republic of Turkey.

With the 3G License Agreement, we are obliged to meet certain coverage obligations. We are required to cover the population within the borders of all metropolitan municipalities within three years and all cities and municipalities within six years. We are also obliged to cover every region with a population over 5,000 within eight years and population larger than 1,000 within 10 years. Following the amendment of the Law for Metropolitan Municipalities, the number of metropolitan municipalities increased and the borders of some metropolitan municipalities were extended. After this amendment, the ICTA increased our coverage obligations, defined in our concession agreement, by its decision, based on this law amendment. We filed a lawsuit for the stay of execution and the cancellation of this decision. The Council of State accepted our stay of execution request. ICTA objected to this decision. Objection was also rejected in favor of Turkcell. The hearing was held on November 27, 2018 and it is expected that the court will grant a decision.

With the 3G License Agreement, as opposed to the 2G License Agreement, the Company assumed an obligation related to its electronic communications network investments, such as the obligation to provide at least 40% of its electronic communications investments from suppliers that have a Research and Development Center in Turkey and the obligation to provide at least 10% of its electronic communications investments from suppliers that are small and medium size enterprises (SMEs) established in Turkey.

According to the Authorization Regulation, breaches by operators resulting in the termination of the GSM concession agreement for any reason shall also result in the termination of the operator s concession agreement signed for IMT-2000/UMTS service. Also, if the GSM concession agreement is not renewed at the end of its natural expiration, the ICTA may continue to allow the utilization of the needed infrastructure by IMT-2000/UMTS services on terms and conditions to be set by the ICTA itself.

The statutes, rules and regulations applicable to our activities and our 2G and 3G licenses are generally new, subject to change, in some cases, incomplete, and have been subject to limited governmental interpretation. Precedents for and experience with business and telecommunications regulations in Turkey are generally limited. In addition, there have been several changes to the relevant legal regime in recent years. There can be no assurance that the law or legal system will not change further or be interpreted in a manner that could materially and adversely affect our operations.

r. Authorization of 4.5G License

In the IMT- Advanced (4.5G) tender held on August 26, 2015 to grant spectrum usage for 800 MHz, 900 MHz, 1800 MHz, 2100 MHz (FDD,TDD) and 2600 MHz (FDD, TDD), the Company purchased a total of 172.4 MHz, the broadest 4.5G (IMT) spectrum allocation of any operator in Turkey (including widest frequency bands on 1800 MHz, 2100 MHz and 2600 MHz) for EUR 1,623.5 million (excluding VAT and interest payable on the installments).

The tender gave equal opportunity to the operators in the low frequency bands utilized for coverage while enabled competition in higher frequency bands mainly used for capacity. The Company has reached a total frequency bandwidth of 234.4 MHz and our ownership in total bandwidth in the market increased to 43% (234.4 MHz / 549.2 MHz) with the new frequencies acquired. The operators will be able to utilize the new spectrum in a technology neutral way.

The ICTA granted Turkcell's 4.5G License on October 27, 2015. The 4.5G License is effective for 13 years until April 30, 2029. According to the License, Turkcell started to provide 4.5G services from April 1, 2016.

The 4.5G License Agreement has provisions that are generally similar to those contained in our license agreement relating to 2G and 3G. According to the IMT License Commitments Document, the Company;

(a) must achieve population coverage of 95% of the population of Turkey and coverage of 90% of the population within the borders of all cities and all city districts within eight years,

(b) must cover 99% of highways, high speed railroads and tunnels with lengths more than one kilometers within eight years, 95% of double roads within six years and 90% of conventional railroads within ten years, and

(c) is obliged to share actively with other mobile operators, any new 3G or 4.5G site which it will decide to build within settlement areas with population of less than 10,000 and highways, double roads, tunnels, high speed railroads and conventional railroads, from the effective date of the License granted to the Company.

Table of Contents

While building its infrastructure for 4.5G networks, Turkcell is required to purchase up to 45% of its network related hardware (i.e. base stations, switches, routers and as such) and software from local suppliers, and purchase 10% of the network equipment and software from local SMEs engaged in production in Turkey. The local network related hardware purchase requirement is defined in three periods: 30% for first year, 40% for second year and 45% for the third and following years. Reporting on these requirements should be made to the ICTA on a yearly basis. In case of a projection of a failure to meet the requirement for locally produced hardware and software due to the lack of sufficient local supply and other relevant conditions, the Company shall file an application to the ICTA 6 months before the due date, and request an easing or removal of the obligation. Based on the law, we have applied for the removal of the obligation for the first three 2015-2016, 2016-2017 and 2017-2018 periods.

Breaches regarding the abovementioned obligations and the breaches resulting in the termination of the GSM and IMT-2000/UMTS concession agreements for any reason shall also result in the termination of the Operator's 4.5G authorization. The Company may apply to the ICTA between 18 and 12 months before the natural end of authorization (April 30, 2029) for the renewal of the authorization. The ICTA may renew the authorization, taking into account the current legislation.

s. Licenses and Authorizations of our Subsidiaries

In addition to the foregoing, our majority owned subsidiary, Belarusian Telecom, and wholly owned subsidiaries lifecell and Kuzey Kibris Turkcell hold GSM licenses in Belarus, Ukraine and the Turkish Republic of Northern Cyprus, respectively, and all of them have obtained 3G licenses. If lifecell, Belarusian Telecom and Kuzey Kibris Turkcell fail to comply with the terms and conditions of their license agreements, they may incur significant penalties, which could have a material adverse effect on our strategy for international expansion and our business and results of operations. In addition, our subsidiaries Global Tower, Turkcell Superonline, Inteltek, Turkcell Enerji, Paycell and Financell have licenses to perform their business. Failure to comply with the terms of such licenses may lead to significant penalties and adversely affect them, as well as our, results of operations.

Ukraine License Agreement

As of December 31, 2018 lifecell owns eleven activity licenses, for GSM 900, a technology neutral license, issued for 3G, one license for international and long-distance calls and eight PSTN licenses for eight regions in Ukraine. As of December 31, 2018, lifecell owned 29 frequency use licenses for IMT (LTE-2600, LTE-1800), IMT-2000 (UMTS), GSM-900, GSM-1800, CDMA-800 and microwave Radiorelay and Broadband Radio Access, which are regional and national. Licenses for IMT (LTE-2600, LTE-1800) and GSM-1800 were issued on 4G tenders, held in the first quarter of 2018. Additionally, lifecell holds a specific number range – three NDC codes for mobile networks, twenty one permission on a number resource for short numbers, eleven permissions on a number resource for SS-7 codes (7 regional and 4 international), one permission on a number resource for Mobile Network Code, nine permissions on a number resource for local ranges for PSTN licenses, two permissions on a service codes for alternative routing selection for international and long-distance fixed telephony and one permission on a code for global telecommunication service 800 .

According to the licenses, lifecell must adhere to state sanitary regulations to ensure that the equipment used does not injure the population by means of harmful electromagnetic emissions. Licenses require lifecell to inform authorities of the start/end of operations within four months and changes in the incorporation address within 30 days. Also, lifecell must present all the required documents for inspection by the NCCIR by their request. The NCCIR may suspend the operations of lifecell for a limited or an unlimited period if necessary due to the expiration of the licenses, upon mutual consent, or in the case of a violation of the terms regarding the use of radio frequencies. If such a violation is determined, the Ukrainian Telecommunications Authority will notify lifecell of the violations and will set a deadline

for recovery. If the deadline is not met, the licenses may be terminated.

Belarus License Agreement

Belarusian Telecom owns a license, issued on August 28, 2008, for a period of 10 years, which was valid till August 28, 2018. However, in accordance with the Edict of the President of the Republic of Belarus dated November 26, 2015, numbered 475, the license is issued without limitation of the period of validity. Starting from March 1, 2016 the license is valid from the date of the licensing authority's decision on its issue and for an unlimited period. Under the terms of its license, Belarusian Telecom had been provided with additional time by the license authority to fulfill all 2G signal coverage requirements regarding the settlements until the end of 2018. We are in close communication with the regulatory body regarding 2G license requirements and we have applied for certain license requirement adjustments. We expect that another period extension will be provided imminently to Belarusian Telecom. As of December 2018, the number of uncovered settlements is 646 out of a total of 22,552 settlements.

Table of Contents

Turkcell Superonline Authorizations

Turkcell Superonline was authorized as a Fixed Telephony Service Provider as of November 19, 2004, Infrastructure Provider as of March 6, 2006, Internet Service Provider as of February 15, 2005, Satellite Communication Service Provider as of March 24, 2009, Cable Broadcast Service Provider as of November 23, 2009, Mobile Virtual Network Operator as of July 14, 2015.

The Authorization By-Law for Telecommunication Services and Infrastructure published in the Official Gazette on August 26, 2004 was abrogated with the By-Law on Authorization for Electronic Communications Sector dated May 28, 2009. According to this abrogation, Turkcell Superonline's Authorization on Infrastructure Operating Service, Internet Service Provision and Satellite Communication Service have been changed to Authority on Infrastructure Operating Service, Internet Service Provision, Satellite Communication Service and Cable Broadcast Service. Turkcell Superonline's License on Long Distance Telephony Services License has been changed to Authorizations relevant to the Fixed Telephony Services. Aforementioned Public Access Mobile Radio Service Provider Authorization of Turkcell Superonline was annulled as of December 31, 2015.

In accordance with the legislation issued by the ICTA in 2011, the term of the infrastructure operator authorization of Turkcell Superonline has become indefinite.

Turkcell Superonline was authorized as a Platform Operator and Infrastructure Operator, according to the Radio and Television Supreme Council's decision numbered 24, dated March 26, 2014. Such authorizations have been provided by the Radio and Television Supreme Council, according to the rules of the Media Law and also the Radio and Television Supreme Council By-Law on Broadcasting via Cable Networks. In accordance with the Media Law and its regulations, the Platform Operator Authorization and Infrastructure Operator Authorization are provided annually. Within the scope of the Platform Operator Authorization and Infrastructure Operator Authorization, Turkcell Superonline has the right to operate the platform and infrastructure of TV services.

t. Access and Interconnection Regulation

The Access and Interconnection Regulation (the Regulation) became effective when it was issued by the ICTA on September 8, 2009 and abolished the Access and Interconnection Regulation which was published on May 23, 2003. The Regulation sets forth the rights and obligations of the operators relating to access and interconnection and establishes rules and procedures pertaining to their performance of such obligations. The Regulation primarily sets forth applicable principles, details of access and interconnection obligations, financial provisions, and policies and procedures regarding negotiations and contracts for access and interconnection.

The Regulation is driven largely by the goal of improving the competitive environment and ensuring that users benefit from electronic communications services and infrastructure at a reasonable cost. Under the Electronic Communications Law, the ICTA may compel a telecommunications operator to accept another operator's request for access to and use of its network. All telecommunications operators in Turkey may be required to provide access to other operators. The operators who are compelled to provide access to other operators may be obliged to provide service and information on the same terms and qualifications provided to their shareholders, subsidiaries, and affiliates by the ICTA.

In accordance with Article 7 of the aforementioned Electronic Communications Law, the ICTA may determine the operators that have significant market power in the relevant market as a result of market analysis. After determination of the operators who have significant market power, the ICTA may impose additional liabilities for such operators in order to protect the competitive environment. On December 15, 2005, the ICTA designated Turkcell, Vodafone, and

Avea as operators holding significant market power in the GSM Mobile Call Termination Services Market and designated Turkcell individually as an operator holding significant market power in the Access to GSM Mobile Networks and Call Originating Markets . According to the new Regulation published in the Official Gazette dated September 1, 2009, numbered 27336, unless otherwise agreed, any decisions taken by the ICTA in the years 2005 and 2006 relating to market analysis were valid and effective until the end of calendar year 2009. Pursuant to its decision dated December 8, 2009, the ICTA designated Turkcell individually as an operator holding significant market power in the Access to Mobile Networks and Call Originating Markets and designated Turkcell, Vodafone and Avea as operators holding significant market power in the Mobile Call Termination Market . Based on the market analysis of the ICTA for the 2012-2015 term, all three operators were declared as operators holding significant market power in the Mobile Call Termination Market and Turkcell is once again recognized as the only operator holding significant power in Access to GSM Mobile Networks and Call Originating Markets . As explained above, renewal of market analysis for both markets was expected to be finalized in 2016. However, public consultation documents were released at the end of 2016; and mobile market analyses were finalized in April 2017.

As a result of the significant market power designation in the GSM Mobile Call Termination Services Market , our company, as well as Avea and Vodafone, is required to provide interconnection services on a cost basis.

Table of Contents

Consequently, according to the Electronic Telecommunications Law, the ICTA may oblige such operators to provide access and to submit their reference offers for access and interconnection to the ICTA for review, and may require amendments to the offers. Operators are obliged to make the amendments requested by the ICTA in a prescribed manner and within a prescribed period. In addition, the operators are obliged to publish their reference offers for access and interconnection, which have been approved by the ICTA, and to provide access under the conditions specified in their reference offers and interconnection, which have been approved by the ICTA. Please refer to the Interconnection table under the caption *Interconnection Rates Turkcell, Vodafone, Avea and Turk Telekom* below for the approved interconnection rates as at March 7, 2019.

u. Regulation on Co-Location and Facility Sharing

The ICTA has required operators to share certain facilities with other operators under certain conditions specified in the Electronic Communications Law and to provide co-location on their premises for the equipment of other operators at a reasonable price.

Under the Regulation, operators holding significant market power are required to provide access and services to all operators on equal terms. Operators with significant market power are also required to perform unbundling of their services, which means that they have to provide separate service of, and access to, transmission, switching, and operation interfaces. Furthermore, the ICTA may establish rules applicable to the division of the costs of facilities among parties.

The ICTA published a Communiqué concerning *Co-Location and Facility Sharing* on December 2, 2010 (which abolished the Regulation published on December 31, 2003). According to the Communiqué, the ICTA should determine operators to be co-location incumbent if operators do not enable co-location or there is a dispute against competition or end-users. Similarly, the ICTA could set tariffs if the tariffs for co-layout are not determined on a cost basis.

The Communiqué defines the criteria for operators who are incumbents for facility sharing and also states the items which must be considered for determining the Facility Sharing prices.

Subsequently, the provisions that regulate the ICTA approval of the examination fee determined by the Co-Location and Facility Sharing incumbent have been removed, opening up the Co-Location and Facility Sharing process to negotiation. In addition, the Facility Sharing incumbent's right to allocate a facility for its own network and investment plans has been reduced to 25% of the facility.

The ICTA published a regulation concerning *Cellular System Antenna Facility Design, Set Up and Sharing* on March 18, 2011 (which abolished the Regulation published on April 16, 2008). The regulation frames antenna facilities design, set up and sharing to enable base station facility usage by multiple operators. The emission points will not be determined by operators, therefore operators will have to work cellular planning together. Operators must share every base station facility regardless of tower or building-top distinction. Antenna facilities must be set up in certain capacity that at least one more operator can benefit. Some incentives, such as exemptions on some certification fees, will be given if sharing occurs on existing or new sites. Finally, when antenna facility set up and sharing requests are evaluated, if the owner of the facility refuses the request, the requesting operator will be informed of the reason for the refusal. This way, negotiation between parties is supported and ICTA involvement is kept at a minimum level. On December 6, 2016, the ICTA repealed the above regulation and replaced it with *The Regulation on the Procedures and Principles of Sharing of Cellular System Antenna Installations and Radio Access Networks*. According to this Regulation:

The number of sharing types has increased. The terms and conditions of sharing at highways, railways and within tunnels is now a separate section.

In regions where the population is lower than 10,000, if an operator is unable to use the antenna installations built by another operator before the IMT licensing, the operator must notify the ICTA about the situation and the ICTA may let the operator build a new antenna installation. This operator is obliged to make an installation facilitating the sharing by all types with at least two other operators. The operator cannot turn down any sharing requests involving installations set up after IMT licensing in motorways, high speed and very high speed railways, dual carriage highways, tunnels and conventional railways, except for indoor installations.

In regions where the population is higher than 10,000 at the time of application to the Authority to build a new installation, provided that operator(s) are present and offer the new comer at least three of the possible share types, no wireless usage fee will be charged for the following year. If the antenna installation concerns towers exclusively, type 2 sharings (e.g. tower and direct sharings) will suffice. This rule will apply until December 31, 2023.

In regions where the population is lower than 10,000, except indoor installations, new antenna installations which were established between the date of the IMT authorization and the issue date of this Regulation, all settlements and motorways, high speed and very high speed railways, dual carriage highways, tunnels and conventional railways must be brought in line with the conditions set by this Regulation.

Table of Contents

In the 4.5G Authorization Document, in provinces with a population of less than ten thousand and at sites to cover highways, double roads and railroads, any new 3G or 4.5G site to be built must be shared actively by all operators within this region. In the 4.5G Authorization Document, usage of locally-produced equipment in network was obliged, with rates up to 45%. Yet if the lack of such equipment or absence in the demand for production of such equipment is proved by mobile operators, and appealed before the end of reporting period, the ICTA may ease the conditions of the obligation or completely remove the obligation specifically for the related period. We informed the ICTA that we support any local R&D and P&D, as long as it complies with international technical and financial standards and can be sustainable. However, the 4.5G Authorization Document does not provide details on the compliance with international standards. The ICTA may oblige operators to buy and use the locally produced products, independent of the quality standards, if a local vendor produces sufficient equipment to support the mobile operators' demands. This may cause technical problems in our network. Should such technical problems occur, it could negatively affect our quality of service, leading to increased costs for the 4.5G infrastructure roll-out and could negatively affect our customer experience.

v. Regulation on Consumer Rights in the Electronic Communications Sector

The ICTA published a Regulation on Consumer Rights in the Electronic Communications Sector on July 28, 2010 (which abolished the Regulation published on December 22, 2004) and made some changes to such regulation on June 20, 2013. This regulation introduced some radical changes to the electronic communications sector. With this regulation, the ICTA determined new procedures/changes regarding: the process and timing of churn steps, the obligation of operators to keep subscribers informed of services, including, but not limited to, informing customers about amendments of the campaigns and tariffs, the consumer complaints solution mechanism, billing processes and safe internet. The Regulation on Consumer Rights in the Electronic Communications Sector, which came into force in April 2018, repealed and replaced the previous regulation. Although the new version mainly preserves the provisions of the former regulation, one of the main differences is that the first service on/off operation in a calendar year may no longer be charged in case the services were suspended/disconnected due to non-payment within due date.

In addition, the ICTA may restrict the conditions under which certain mobile internet and services are provided by third parties. Moreover, the ICTA published a board decision regarding Safe Internet on August 22, 2011, and the service is now offered to subscribers free of charge. Operators must provide Safe Internet Service to subscribers, who request this service, as two separate profiles, the child profile and the family profile, each of which can restrict subscribers from accessing certain internet addresses and content. The subscribers can easily change their profiles or opt-out from the Safe Internet Service.

The ICTA set forth the reimbursement process arising from its decisions by publishing the procedures and principles to be applied to the reimbursement of the subscribers which came into force in 2018. In addition, the Procedures and Principles Regarding the Services with Limited Amount of Use and the Applications of Upper Limits of Receipts that was published on August 19, 2016 has been in force since December 1, 2017. The notifications regarding the services with limited amount of use and the applications of upper limits of receipts used to be regulated by separate documents. But with the aforementioned Procedures and Principles, the means, the timing and the content of the notifications regarding the services with limited amount of use and the upper limits of receipts has been consolidated under a regulation. The ICTA's regulation of these activities could have an adverse effect on our mobile telecommunications business and we may be fined if we do not comply. Furthermore, our compliance with the ICTA's regulations may increase the costs of doing business and could negatively impact our financial results.

An ICTA decision dated June 21, 2018 favoring subscribers with special needs, veterans, and widows/widowers and orphans of martyrs was published and came to effect on January 1, 2019. The decision requires operators that have more than 200 thousand subscribers to offer their services to these groups that are in need of social support with a

25% discount. The discount is to be offered upon proof of identity and the subscriber's special need.

w. Regulation on Data Privacy in Electronic Communications Sector

Under Article 51 of the Electronic Communications Law, the ICTA is authorized to determine the principles and procedures related to the process of personal data and protection of privacy. In this manner, ICTA had published Regulations on the Protection of Privacy and Processing of Personal Data . With its decision rendered on April 9, 2014 and published in the Official Gazette on July 26, 2014, the Turkish Constitutional Court decided that Article 51 of the Electronic Communications Law is a violation of Article 20(3) of the Constitution, which stipulates data protection as a constitutional measure and that the measures should be regulated by the laws and therefore annulled the aforementioned provision (Article 51). The Article 51 of the Electronic Communications Law, which was repealed by Turkish Constitutional Court, was amended and came into force on April 15, 2015. In the amended Article 51, the main principles of recording and sharing subscribers' personal data are defined in general. In addition to that, ICTA is also authorized

Table of Contents

again to determine the procedures and principles related to the process of personal data and protection of privacy. A public consultation regarding the draft regulation has been collected by the ICTA, however the new regulation has not been adopted so far.

Compliance with this regulation will involve operational expenses and may require further due diligence to process the customer data and provide segmented offers to our customers. Furthermore, non-compliance with this Regulation may result in the imposition of monetary fines, which could have a negative impact on our financial condition and reputation.

x. Law on the Protection of Personal Data

Turkey, as a part of its legislative reforms to align with the EU legislations, has adopted an extensive data protection regime. The Law on the Protection of Personal Data (the Law), which came into force on April 7, 2016, regulates personal data of real persons and its protection, process and transfers.

The Law introduced several obligations for processing and transferring the personal data including fair and lawful processing, protection of personal data, consent requirement, providing notice of processing, registration with the Data Protection Authority (the DPA) and notification of DPA in case of data breach. According to the Law, the DPA is authorized to impose sanctions and precautions as well as administrative fines which are determined in the Law.

The Law also determines the rights of the person whose data is processed, such as the right to apply to the Data Controller to learn whether the personal data has been processed, to learn if it is being used properly according to the purpose of the processing, to know the third parties to which the personal data is transferred in the country or abroad, to request the personal data to be erased or destroyed and the third parties to be notified of that.

As per Article 16 of the Law, the Regulation on the Registry of Data Controllers specifying procedures and principles regarding the Registry of Data was published on December 30, 2017 and came into force on January 1, 2018. Pursuant to this regulation, data controllers are obliged to register with the registry prior to processing personal data and the exemptions from the registration requirement is to be determined by the Board of Protection of Personal Data. The Company is subject to the obligation regarding the register with the registry until September 30, 2019; the data controllers that are not established in Turkey have the responsibility to register with the registry via their representative that they will assign and data controllers are obliged to prepare a personal data processing inventory that includes the purposes for processing personal data, data categories, subject groups of the data, the maximum retention period of the data and measures taken regarding the data security.

In addition to the aforementioned regulation, on October 28, 2017 the Regulation Regarding the Deletion, Destruction and the Anonymization was published and came into force on January 1, 2018. The objective of the Regulation is to set forth procedures and principles regarding the deletion, destruction or anonymization of personal data processed wholly or partly by automatic means and otherwise by automatic means which form part of a data recording system. The Regulation applies only to data controllers. Furthermore, the Communiqué on the Obligation to Provide Information and the Communiqué on Principles and Procedures for Application to Data Controller was published and came into force on March 10, 2018 regulating principles and procedures in relation to information obligation and rules and processes for data subjects to exercise their rights regarding personal data. With respect to international data transfers, the DPA has not published the list of countries, which have adequate level of protection as of the date hereof.

Failure to comply with the Law on the Protection of Personal Data may result in imposition of certain civil, criminal and administrative sanctions. As of the date of this annual report, the Company is carrying out a compliance program

with regard to compliance matters arising from the Law on the Protection of Personal Data and secondary legislation.

y. Regulation on Electronic Commerce

Law No. 6563 on the Regulation of Electronic Commerce published in the Official Gazette on November 5, 2014, amended Article 50 of the Electronic Communications Law, providing that without the prior consent of the subscribers, unsolicited electronic communications for the purposes of direct marketing or messages with adult content is prohibited. An opt-in mechanism has been adopted for electronic messages; however, this provision does not apply retroactively to the databases which were established by taking the data subjects consent before the Law No. 6563 on Regulation of Electronic Commerce entered into force on May 1, 2015.

The Electronic Commerce Law and Commercial Communications And Commercial Electronic Messages Regulation published in accordance with this law exclude the messages that are sent to subscribers and users of the operators about their own products and services and these messages are regulated in The Principles And The Procedures Regarding The Communication With The Purposes Of Advertising And Marketing which was published by the ICTA on July 9, 2015. According to this legislation, these messages are also subject to the prior consent of the subscribers and users. Violation of this legislation may result in an administrative fine.

Table of Contents

z. Registered Email Service Regulation

Registered Electronic Mail Service was started in July 2012. Mobile operators cannot provide registered electronic mail service; however, the service may create a new mobile business area with new bundled mobile products, which are able to service our subscribers.

aa. Turk Telekom, Vodafone and Avea Interconnection Agreements

(i) General

We have interconnection agreements with Turk Telekom, Vodafone, Avea and Fixed Telephony Service Operators whereby they allow us to connect our networks with theirs to enable the transmission of calls to and from our mobile communications system.

The interconnection agreements establish understandings between the parties relating to various key operational areas, including call traffic management, and the agreements contemplate that we and the other parties will agree on the contents of various manuals setting forth additional specifications concerning matters that are not specifically covered in the interconnection agreement, such as quality and performance standards and other technical, operational and procedural aspects of interconnection.

The interconnection agreements specify that the parties shall comply with relevant international standards, including standards adopted by the GSM Memorandum of Understanding, the Telecommunications Standards Bureau of the International Telecommunications Union, and the European Telecommunications Standards Institute. In the absence of applicable international standards, the interconnection agreements provide that the parties will establish written standards to govern their relationship.

The interconnection agreements outline the applicable interconnection principles and provide the technical basis and rationale for technical specifications and manuals to be agreed to by the parties.

In addition, the parties agree to provide the other party with information that is necessary to enable the performance of their interconnection obligations, the provision of services, or the utilization of equipment and/or buildings as contemplated in the interconnection agreement.

(ii) Interconnection Rates Turkcell, Vodafone, Avea and Turk Telekom

In accordance with the relevant articles of the Electronic Communications Law and subsequent Access and Interconnection Ordinance, the ICTA regulates both fixed and mobile interconnection rates. In previous years, the interconnection rates have substantially decreased with the interventions of the ICTA.

Mobile interconnection rates are based on the ICTA's decision on the Interconnection Tariffs issued in June 2013. Last decision about interconnection rates was published in October 2014 and remain in force with no change in the existing rates. The MMS interconnection rates were also introduced in 2014. The evolution of interconnection rates for voice calls between Turkcell, Vodafone, Avea, Turk Telekom and Alternative Fixed Line Operators is summarized in the table below.

VOICE (TRY Kurus)

	TURK TELEKOM			Alternative Fixed Line			Operators
	TURKCELL	VODAFONE	AVEA	Local	Single	Double	
01/10/2004	15.60	15.60	15.60		4.10	5.90	
01/01/2005	14.80	14.80	14.80		3.40	5.10	
01/10/2005	14.00	14.00	14.00		2.00	3.70	
01/01/2007	14.00	15.20	17.50		2.00	3.70	
01/03/2007	13.60	14.50	16.70		1.89	3.00	
01/04/2008	9.10	9.50	11.20		1.71	2.70	
01/05/2009	6.55	6.75	7.75	1.39	1.71	2.70	
01/04/2010	3.13	3.23	3.70	1.39	1.71	2.24	3.2
01/07/2013	2.50	2.58	2.96	1.39	1.71	2.24	3.2
31/10/2014	2.50	2.58	2.96	1.39	1.71	2.24	3.2

Table of Contents

Effective from July 2013, Turkcell is paid TRY 0.0043 per SMS for SMS termination in its network. Respective rates for Vodafone are TRY 0.0043 per SMS and for Avea TRY 0.0047.

	SMS (TRY Kurus)			TURK
	TURKCELL	VODAFONE	AVEA	TELEKOM
01/04/2010	1.70	1.73	1.87	1.70
01/07/2013	0.43	0.43	0.47	1.70
31/10/2014	0.43	0.43	0.47	1.70

Effective from October 2014, Turkcell is paid TRY 0.0086 per MMS for MMS termination on its network. Respective rates for Vodafone are TRY 0.0086 per SMS and for Avea TRY 0.0094.

	MMS (TRY Kurus)		
	TURKCELL	VODAFONE	AVEA
31/10/2014	0.86	0.86	0.94

bb. Agreements Concluded with the Fixed Telecommunication Services Operators**(i) Interconnection/Call Termination Agreements**

Turkcell, as an operator holding significant market power, entered into interconnection/call termination agreements with fixed telecommunication service operators that applied to Turkcell for an agreement. Interconnection rates are regulated by the ICTA. Turkcell pays fixed-line operators TRY 0.0320 per minute and fixed-line operators pay Turkcell TRY 0.0250 per minute for national voice call traffic.

(ii) International Transit Traffic Services Agreements

Turkcell entered into International Traffic Carrying Services Agreements with operators who applied to Turkcell for an agreement. Under these Agreements, we may carry calls to these operators' switches for onward transmission to their destinations and these operators should provide the termination of these calls on the relevant network. These operators charge us at various prices identified within the scope of the agreement for the calls directed to numerous networks around the globe. The operators may modify their rates upon a fifteen day advanced written notice and such rates will become applicable upon our approval.

(iii) SMS Termination Agreements

During 2011, Turkcell entered into SMS Termination Agreements with alternative operators who applied to Turkcell for an agreement. In accordance with the ICTA regulations on SMS Termination Rates in Turkcell's network, Fixed Telephony Service Operators pay Turkcell TRY 0.0043 per SMS.

cc. MVNO Services

The ICTA designated Turkcell as the operator having significant market power in the mobile access and call origination markets, which had implications such as mandatory MVNO access and cost-oriented call origination and termination rates.

ICTA's decision dated April 12, 2017, stating that an ex-ante regulation was no longer needed for Mobile Access Call Origination Market and that Turkcell's SMP designation was to be lifted after a period of one year, has been cancelled following ICTA's new decision dated April 4, 2018.

Highly competitive market conditions and heavy tax burdens have discouraged potential MVNOs from entering the market for years. Nevertheless, commercial negotiations with certain MVNO candidates are in progress and the ICTA gave signals of its intention to promote the development of MVNOs in the Turkish market by extending Turkcell's SMP designation on call origination and access market for one additional year.

dd. Agreements Concluded with Directory Service Providers

Turkcell entered into agreements relating to the provision of directory services with 11 Directory Service Providers, which are licensed to provide directory services by the ICTA. These agreements determine the principles and procedures related to the access of companies to the Turkcell database, the provision of directory services to the

Table of Contents

subscribers and the clearing procedure of the parties. Such agreements are valid and binding for a term of one year. However, if neither party notifies the other party one month before the expiration of the agreement of its request to terminate, the agreement will automatically be renewed for another one-year term.

ee. Agreements Concluded with Operators Licensed to Provide Satellite Services

We have executed agreements with Globalstar Avrasya Uydu Ses ve Data Iletisim A.S. and Teknomobil Uydu Haberlesme A.S., operators licensed to provide satellite services. The scope of such agreements is the interconnection between the networks of the parties and the determination of the principles and procedures of the methods of network operation and clearance.

ff. Recent Amendments to the Turkish Insolvency and Restructuring Regime

The Enforcement and Bankruptcy Law No. 2004 prevents a contractual arrangement by which a contractual event of default clause is stipulated to be triggered in case of any application is made by a Turkish company for debt restructuring upon settlement within the scope of Turkish Enforcement and Bankruptcy Law No. 2004. In addition to this, on March 15, 2018, changes were introduced to the Turkish Enforcement and Bankruptcy Law No. 2004. Among other changes, one of them states that the contractual termination, default and acceleration clauses of an agreement cannot be triggered in case the debtor makes a concordat application and such application not to constitute a breach of such agreement.

4.C Organizational Structure

The following chart lists each of our key subsidiaries (including our ownership interest in Fintur) and our proportionate direct and indirect ownership interest as of March 7, 2019:

- (1) On February 16, 2018, the incorporation of Turkcell Ozel Finansman A.S. under the laws of Republic of Turkey was announced in Trade Registry Gazette of Turkey.
- (2) On April, 9, 2018, the legal title of Global Bilgi Pazarlama Danisma ve Cagri Servisi Hizmetleri A.S. was changed to Global Bilgi Pazarlama Danismanlik ve Cagri Servisi Hizmetleri A.S.
- (3) On June 25, 2018, the incorporation of Turkcell Sigorta Aracilik Hizmetleri A.S. under the laws of Republic of Turkey was announced in Trade Registry Gazette of Turkey.
- (4) On June 28, 2018, the incorporation of Turkiye nin Otomobili Girisim Grubu Sanayi ve Ticaret A.S. under the laws of Republic of Turkey was announced in Trade Registry Gazette of Turkey.
- (5) On July 30, 2018, the incorporation of Sofra Kurumsal ve Odullendirme Hizmetleri A.S. under the laws of Republic of Turkey was announced in Trade Registry Gazette of Turkey.
- (6) On August 14, 2018, the liquidation of Financell B.V was completed.
- (7) On January 9, 2019 the legal title of the company Turkcell Satis ve Dagitim Hizmetleri A.S. was changed to Turkcell Satis ve Dijital Is Servisleri A.S.
- (8) On January 11, 2019 sale of Azerinteltek QSC shares was completed.

Table of Contents

(9) Fintur was classified as asset held for sale and reported as discontinued operations as of October 2016. As disclosed under the Fintur section, Fintur transferred its 100% share in Geocell to Silknet and 51.3% total shareholding in Azertel to Azintelecom in the first quarter of 2018. On December 21, 2018, Fintur's 51% of the shares in Kcell JSC was transferred to Kazakhtelecom JSC.

For information on the country of incorporation of our key subsidiaries, see Item 4.B. Business Overview .

4.D Property, Plant and Equipment

As of December 31, 2018, we operated 77 facilities including network data centers, of which 55 were located in Turkey, the rest in Turkish Republic of Northern Cyprus, Belarus and Ukraine.

We have our own and leased buildings in Istanbul, including our headquarters, mobile switching centers, network data centers, customer service offices and warehouses. Our buildings in Turkey and outside of Turkey are used for the purposes of administration, sales and other service centers as well marketing and operation of mobile switching centers and network data centers.

As of December 31, 2018 we also had 156 owned and 1,361 leased vehicles, used for operational purposes and provided as benefits to some of our employees.

a. Core Network Infrastructure

Our core network consists of three site Geographically Redundant Next Generation Home Location Register Home Subscriber Server (NG HLR / HSS), a combined Number Portability Switch Relay Function (SRF) and Number Portability Database and Signal Transfer Point (STP), Diameter Routing Agent (DRA). The Core Network is common for 2G, 3G, 4.5G radio networks and carries voice over IP, with combined Mobile Switch Centers/Visitor Location Registers (MSC/VLR), Media Gateways (MGW), Charging Control Node (CCN) and Virtual Private Network (VPN).

We have an IMS based VoLTE (Voice over LTE) network. We are planning to converge Core Voice and IMS Networks. With convergence of the networks, the telco based fixed and mobile services and (OTT based) application services will be given easier and faster.

Our core packet switching network combined of SGSNs/MME s (Serving GPRS Support Node, Mobility Management Entity) and GGSNs/SGW/PGWs (Gateway GPRS Support Node, Serving and PDN Gateway) providing GPRS/EDGE, and HSPA/HSPA+ (High Speed Packet Access) capability for mobile packet traffic and also Policy and Charging Rules Function (PCRF) for subscriber policies. In addition, we already deployed Data Optimization equipment for customer experience.

We have switches in Istanbul, Ankara, Izmir, Adana, Bursa, Diyarbakir, Erzurum, Gaziantep, Hatay, Kayseri, Kocaeli, Malatya, Mersin, Mugla, Samsun, Trabzon, and Van.

In addition, we own switch buildings in different cities in Turkey, such as Istanbul (Mahmutbey, Kartal, Maltepe), Mugla, Izmit, Diyarbakir, and Erzurum. Switch buildings are where the network switching equipment, such as MSC, MGW, BSC and RNC, is located.

b. Access Network Infrastructure

Our Access Network consists of Base Station Controllers (BSC) and Radio Network Controllers (RNC) at Network Data Centers (NDC) and BTS, Node-Bs and eNode-Bs located on rooftops or towers. Since 2014, we have been calling our OMCs (Operation Maintenance Centers) as NDCs (Network Data Centers). BTSs are the fixed transmitter and receiver equipment in a cell, or coverage area of a cluster of antennas, for a 2G mobile network that communicates by radio signal with mobile devices. Similarly, Node-Bs are the corresponding equipment for 3G, connected to and controlled by RNC in order to realize 3G and HSPA+ coverage for 3G /HSPA-equipped mobile phones and eNode-Bs are the equipment that carry out equivalent functionalities for 4.5G with the important difference that they are directly connected to 4.5G Core Network. In addition to macro sites that serve large areas, there are sites using small base stations called small cells that serve some specific and limited areas. We have been adding small cells to densify our network and meet certain performance objectives (enhanced user experience, higher speeds, higher capacity, improved coverage etc.). Depending on the suitability and cost-effectiveness of the candidate solution, we are using small cell systems, repeaters or relay systems to augment our service quality.

Table of Contents

In 2009, the ICTA resolved that operators may transfer the right of use of their towers to third parties. In accordance with this resolution, we transferred the rights of some towers to Global Tower.

c. Transmission Network Infrastructure

Turkcell's mobile backhaul utilizes various transport technologies to provide for an efficient, resilient and cost effective transmission network. Connectivity between sites is provided using Microwave Radio Links and leased lines carried over Synchronous Digital Hierarchy (SDH) and Ethernet over DWDM where appropriate. Cell sites with site connectivity are mostly served by point-to-point microwave radio links owned and managed by Turkcell, make up more than 90% of our network. Interconnections with other Public Land Mobile Networks (PLMN), Public Switched Telephone Networks (PSTN), Long Distance Telephony Services (LDTS) and small operator companies are realized through leased line connections. More than 90% of our leased line network connectivity is currently provided by our subsidiary, Turkcell Superonline. The rest of the leased lines are provided by the incumbent, Turk Telekom. As a result the overall infrastructure capacity usage is fully optimized and a high grade of availability is achieved through topology resiliency and packet base IP mobile backhaul network infrastructure.

ITEM 4A. UNRESOLVED STAFF COMMENTS

None.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following discussion and analysis of our management with regard to our financial condition and the results of our operations should be read together with the Consolidated Financial Statements included in this annual report. In addition to historical information, the following discussion contains forward-looking statements based on current expectations that involve risks and uncertainties. Actual results and the timing of certain events may differ significantly from those projected in such forward-looking statements due to a number of factors, including those set forth in Item 3.D. Risk Factors and elsewhere in this annual report.

I. Overview of the Turkish and International Economy

We witnessed a diversification in global economic growth in 2018. The US economy grew by 2.2% in the first quarter, 4.1% in the second quarter and 3.4% in the third quarter and 2.6% in the fourth quarter of 2018 as a result of fiscal stimulus, tax reforms and strong consumer consumption. Global trade has been threatened by bilateral import tariffs between US and China following previously imposed US tariffs on steel and aluminum as well as tight global financial conditions. Consequently, investors' risk appetite have decreased and the most recent indicators indicate Eurozone, China and other emerging markets either slowing significantly from previously high levels or remaining sluggish in 2018. Following long standing quantitative easing programs, central banks around the world have been reversing their monetary policy, ending or curtailing these programs. Due to rising inflation, strengthening economic activity and historically low level of unemployment rate, the US Federal Reserve (Fed) raised interest rates four times in 2018 and reduced its balance sheet. Furthermore, at the end of 2018, the European Central Bank (ECB) ended its purchases of government and private debt. The Bank of England increased its policy rate from 0.50% to 0.75% despite weak growth. The potential for an additional interest rate increase by the Fed, the strengthening of the US dollar, the tightening global liquidity conditions and trade war tensions became catalysts that drew attention in particular to current account deficit countries, resulting in a sell-off period emerging markets beginning at the end of April 2018.

Turkey's GDP growth remained solid at 7.2% in the first quarter of 2018 and 5.3% in the second quarter of 2018 on the back of robust domestic consumption and investment expenditure. In June 2018, President Recep Tayyip Erdogan became an Executive President for the next five years following the first dual parliamentary and presidential elections in Turkey. The Government's Party coalition (AKP and MHP) obtained the majority in the Turkish Assembly. Following the election, the Turkish Government terminated the state of emergency in July 2018 which had been declared as a result of the failed coup attempt in 2016. Turkey's credit rating was downgraded by Moody's, S&P and Fitch in March, May and June, respectively. Turkey currently stands two notches below investment grade with regard to Fitch, three notches below with regard to Moody's, and four notches below with regard to S&P. Along with the emerging markets equity and currency sell-off, Turkey-U.S political tensions related to the American pastor Andrew Brunson impacted Turkey's financial markets and the Turkish Lira significantly depreciated against the USD as of August. Headline inflation increased to 25.24% in October 2018 due to higher energy prices, exceptional food inflation and TRY depreciation. Even though the year-end inflation was 20.3%, up until the first half of 2019, inflation is expected to be higher due to basis effect. High public spending to avoid a slowdown in the economy, pre-election transfers and extra defense spending have contributed to a deterioration of the fiscal balance to 2% of GDP.

The Central Bank of the Republic of Turkey (CBRT) and the Turkish Banking Regulation and Supervision Agency (BRSA) enacted a series of measures and rules to ensure financial stability and support the Turkish Lira amid the high volatility. In 2018, the CBRT hiked its policy rate by 625 bps and provided TRY and FX liquidity to the banking

Table of Contents

system. Additionally, in 2018, the average cost of funding increased by 1,125 bps. To prevent a sudden halt in economic activity, tax cuts were announced in several sectors. The Turkish economy started to rebalance in the second half of the year on the back of strong CBRT action and the currency shock. Loan growth entered into negative territory, with strength in exports coupled with a sharp decrease in import demand 12-month rolling current account deficit rapidly improved and reached USD 27.6 billion at the end of the year from USD 58 million in May. GDP growth slowed to 1.6% in the third quarter of 2018 and contracted 3.0% in the fourth quarter of 2018, following the decline in investor and consumer confidence, the surge in financial market volatility and increase in bank loan rates.

Ongoing military operations in Syria, anticipated Turkish military operations where militant organizations such as the PKK, YPG or PYD dominate in North Syria and the upcoming local elections in March 2019 are key sources of uncertainty and could increase the volatility in FX and interest rate markets. Furthermore, the announced departure of U.S. troops from Syria may cause uncertainty for the region's future and this situation may result in higher risks related to budget deficit if the Syria operation lasts longer than anticipated.

II. Taxation Issues in the Telecommunications Sector

Under current Turkish tax laws, there are several taxes imposed on the services provided by telecommunications operators in Turkey. These taxes are charged to subscribers by mobile operators and remitted to the relevant tax authorities. They may be charged upon subscription, on an annual basis or on an *ad valorem* basis on the service fees charged to subscribers.

The following are the most significant taxes imposed on our telecommunications services:

a. Special Communications Tax

The Turkish government imposed a special 25% communications tax on mobile telephone services as part of a series of new taxes levied to finance public works required to respond to the earthquakes that struck Turkey's Marmara region in 1999. As of August 2004 other telecom services (i.e., fixed lines and TV/radio transmission) are also included within the scope of the special communication tax (SCT).

As of March 1, 2009, SCT rate for wireless and mobile internet service providers was set to 5% (previously such tax was 25% on mobile, 15% on fixed lines). Other than mobile internet services, all mobile telecommunication services were subject to 25% and other telecommunication services (i.e., fixed lines and TV/radio transmission) were subject to a 15% SCT since December 31, 2017. As of January 1, 2018, the SCT rate for all services within the scope of the tax has been set to 7.5%.

The tax collected from subscribers in one calendar month is remitted to the tax authorities within the first 15 days of the following month.

The SCT on new mobile subscriptions was TRY 53, TRY 47 and TRY 46 in 2018, 2017 and 2016, respectively. As of January 1, 2019, the SCT on new subscriptions levied is TRY 65. The tax has had a correlative negative impact on mobile usage. As of January 1, 2018, only the mark-up amount on subscribers' invoices for roaming services is subject to SCT.

Under Law No. 6322, effective July 1, 2012, new mobile subscriptions for Machine to Machine (M2M) simcards are not subject to the SCT levied upon new subscriptions.

As of January 1, 2018, the SCT is calculated for TRY and bundle package sales and also calling cards sales by including the margin of the distributor or/and retailer and these amounts. Mobile electronic telecommunication operators and authorized fixed telecommunication operators are responsible for the calculation and self-reporting to the tax authorities of the SCT amount on these pre-paid sales.

b. Value Added Tax (VAT)

Like all services in Turkey, services provided by GSM operators are subject to VAT. The general VAT rate for telecom services is 18% and 1% for digital services (digital publishing rate was set at 18% for 2019 and subsequent years). We declare VAT to the Ministry of Treasury and Finance within 24 days and remit VAT paid by our subscribers within the first 26 days of the month following when the tax was incurred, after the offset of input VAT incurred by us.

VAT for roaming services was, until November 3, 2009, calculated solely on the mark-up amount on subscribers invoices for roaming services. Following the Ministry of Treasury and Finance's declaration of a change in its position regarding roaming charges, we began imposing VAT and the special communications tax on the entire amount of roaming charges, starting from November 3, 2009, to comply with this change in position. As of January 1, 2018, the VAT mechanism on roaming charges prior to November 3, 2009 was restored and since then only the mark-up amount on subscribers' invoices for roaming services has been subjected to VAT.

Table of Contents

As of January 1, 2018 reverse charge VAT exemption will be applied on the invoices, which are related to roaming services issued by foreign GSM operators.

Also new VAT requirements have been published in Official Gazette on January 31, 2018. Due to new legislation, as of January 1, 2018, if a nonresident e-service provider performs e-services from abroad to real persons who are located in Turkey, service providers must be VAT tax payer in Turkey. E-service providers have to declare VAT over sales amount of e-services, with VAT Return (Serial No.3) within 24 days and paid within the first 26 days of the month following. Also service providers can consider as deductible VAT which they have paid as VAT amount to the Turkish entities related to these e-services.

As of January 1, 2018 VAT is calculated for TL and bundle package sales and also calling cards sales by including the margin of the distributor or/and retailer and these amounts. Mobile electronic telecommunication operators and authorized fixed telecommunication operators are responsible for the calculation and self-reporting to the tax authorities of the VAT amount on these pre-paid sales.

c. License and Annual Utilization Fees

According to Article number 46 of the Electronic Communications Law, subscribers registered in the system are subject to both license and annual utilization fees. As of January 1, 2018, subscriptions for machine to machine (M2M) simcards are no longer subject to license and annual utilization fees.

GSM operators are charged with the duty of collecting these fees.

The license fee is paid once on the subscription per subscriber. The license fee was TRY 22.52, TRY 19.68 and TRY 18.95 in 2018, 2017 and 2016, respectively. As of January 1, 2019, the license fee is TRY 27.86.

The payment of the annual utilization fee to the government depends on whether a subscriber is postpaid or prepaid. For postpaid subscribers, the monthly utilization fee was TRY 1.88, TRY 1.64 and TRY 1.58 in 2018, 2017 and 2016, respectively, and is charged to subscribers monthly. For prepaid subscribers, the annual utilization fee is calculated by multiplying the number of registered prepaid subscribers at the previous year end by the annual utilization fee and the calculated bulk annual utilization fee is paid by mobile operators the following year on the last business day in February. As of January 1, 2019, the monthly utilization fee is TRY 2.32. We decided to collect utilization fees from most of our prepaid subscribers starting from June 2011 and we are collecting since then.

Other than subscribers license and annual utilization fees, operators must pay license and annual utilization fees for the wireless equipment to ICTA. Before January 1, 2018, the fee amount to be paid was calculated with respect to the amount per unit of wireless equipment (TRx); however, following a legislation shift, as of January 1, 2018 the fee is being calculated as 5% of monthly net sales amount and will be paid within the last working day of the following month.

d. Special Consumption Tax

The Special Consumption Tax is a tax on prescribed goods, which includes mobile phones. The Special Consumption Tax is charged on mobile phones either when they are imported or when they are sold by Turkish manufacturers. The Special Consumption Tax rate on mobile phones (mobile phones are legally defined as transmitter/receiver cellular phones) was set at 20% prior to October 13, 2011, and the Special Consumption Tax calculated in accordance with the 20% rate must not fall below TRY 40 per cellular phone device (Temporary Article 6 of Special Consumption Tax Code).

The Special Consumption Tax rates were raised on some motor vehicles, mobile phones, alcoholic beverages and tobacco products by a decision of the Board of Ministers, which was published in the Official Gazette on October 13, 2011. The Special Consumption Tax rate over cellular phones was increased from 20% to 25% and the minimum Special Consumption Tax amount to be calculated was increased to TRY 100 (previously the minimum Special Consumption Tax amount was TRY 40) effective from October 13, 2011.

The Special Consumption Tax rates on some motor vehicles, mobile phones and alcoholic beverages were raised by a decision of the Board of Ministers, which was published in the Official Gazette on January 1, 2014. The minimum Special Consumption Tax amount to be calculated over cellular phones was increased to TRY 120 effective from January 1, 2014. By a decision of the Board of Ministers, which was published in the Official Gazette on January 1, 2016, the minimum Special Consumption Tax amount to be calculated over cellular phones was increased to TRY 160 effective from January 1, 2016. The said decision of the Board of Ministers has been cancelled in 2016 by the Supreme Court. Finally, a new article has been added to the Special Communication Tax Law (Temporary Article 6) on September 9, 2016 and the minimum Special Consumption Tax amount to be calculated over cellular phones was set at TRY 160 effective from September 9, 2016. There is a possibility that such tax may increase in the near future.

Table of Contents***e. Turkish Radio and Television (TRT) Association Banderol Fee***

According to Article number 4 of Law on TRT Revenues, mobile phones are subject to TRT banderol fee over (i) VAT base (excluded special consumption tax) related to sales amount for produced products (ii) VAT base (excluded special consumption tax) of Customs Declaration amount for import products. Before June 2016, mobile phones which can receive radio or television broadcasts via integrated tuner, were subjected to TRT banderol fee at the rate of 6%. As of June 2016, the following rates were applied: (i) 7% for mobile phones which can receive radio or television broadcasts via integrated tuner, and (ii) 6% for mobile phones which can receive radio or television broadcasts via internet connection. As of July 2017, all mobile phones which have 8517.12.00.00.11 customs tariff statistics position, subject to TRT banderol fee at the rate of 10%.

f. Treasury Share, Universal Service Fund Contribution

Due to our licenses (2G and 3G) and Authorization Certificate (4.5G), we are required to pay a treasury share equal to 15% of our gross revenue including some exemptions. 10% of the treasury share is paid as a universal service fund contribution. In addition, we must pay annual contributions in an amount equal to 0.35% of our net revenue to the ICTA's expenses.

Since 2005, we are required to pay 90% of the treasury share to the Turkish Treasury and 10% to the Turkish Ministry as a universal service fund contribution. As of January 1, 2018, all of our treasury share will be paid to the ICTA, which will then transfer it to the Turkish Treasury and the Turkish Ministry as detailed above. The calculation method for the Treasury Share has also been revised and the following will consequently not be considered in calculation of the Treasury Share: overdue interests which are accrued to the subscribers for any unpaid balance, accrual amounts for the purpose of reporting, reflecting the installation and maintenance costs of the mobile radio stations to other mobile operators and finally, amounts for the purpose of correction accounting records which occur in the same year due to errors (such as customer information, type of business, amount, price).

Also, we are required to pay a Universal Service Fund Contribution equal to 1% of net sales revenue for Superonline, Global Tower and Rehberlik. These amounts are paid annually, within June of each following year.

In addition, we must pay annual contributions in an amount equal to 0.35% of our net revenue to the ICTA's expenses for all companies.

g. Tax disputes

Changes in the Ministry of Treasury and Finance's interpretation of the taxation codes, especially changes regarding consumption taxes (Value Added Tax and Special Communication Tax), may adversely affect consumer prices. In addition to the prospective financial impact of such changes, unanticipated tax liabilities and fines may also be levied against our financial results in prior years since a Turkish company's operations in the previous five years may be subject to financial investigation. Regulations that became effective from July 1, 2010, however, have strengthened our rights with regards to this risk, particularly with regards to the following:

Tax inspectors shall not issue tax audit reports that contradict Decrees, Public Acts, Statutory Rules, General Communiqués and Circulars promulgated;

In the event that the tax authority differentiates previous interpretations of taxation codes via promulgated General Communiqués and Circulars, the new interpretation shall not be applied to previous transactions; and

Transactions that are compliant with rulings taken from the Tax Office shall be relieved from both tax penalty and overdue interest. Such shelter is valid only for a taxpayer that has applied for the ruling.

For a description of various tax related disputes to which we are party, see Item 8.A. Consolidated Statements and Other Financial Information Legal Proceedings .

III. Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our Consolidated Financial Statements, which have been prepared in accordance with IFRS as issued by the IASB. The preparation of these financial statements requires us to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities at the date of the

Table of Contents

financial statements and for the period then ended. On an ongoing basis, we evaluate the estimates used. We base our estimates on historical experience, actuarial estimates, current conditions and various other assumptions that we believe to be reasonable under the circumstances. These estimates form the basis for making judgments about the carrying values of assets and liabilities and are not readily apparent from other sources. Actual results may differ from these estimates. Our critical accounting policies are disclosed in Note 2 (Basis of preparation and summary of significant accounting policies) to our Consolidated Financial Statements in this annual report on Form 20-F.

IV. Reportable Segments and Reporting Currency

Our operations are aggregated under two main reportable segments, Turkcell Turkey and Turkcell International:

The Turkcell Turkey segment comprises mainly our telecommunication and technology services activities in Turkey and includes the operations of Turkcell, Turkcell Superonline, Turkcell Satis, group call center operations of Turkcell Global Bilgi, Turktell, Turkcell Teknoloji, Global Tower, Rehberlik, Turkcell Odeme and Turkcell Gayrimenkul.

The Turkcell International segment comprises mainly our telecommunication and technology services activities outside of Turkey and includes the operations of lifecell, Belarusian Telecom, Kibris Telekom, Eastasia, Lifecell Ventures, Beltel, UkrTower, Global LLC, Turkcell Europe, Lifetech LLC, Beltower, Lifecell Digital Limited and Fintur.

Our Other reportable segment is comprised mainly of information and entertainment services in Turkey and Azerbaijan, non-group call center operations of Turkcell Global Bilgi, consumer financing service operations of Financell, Paycell LLC and TOFAS (interest free), electricity energy trade operations of Turkcell Enerji, insurance agency activities of Turkcell Sigorta as well as the development and production of electric passenger cars and the carrying out of trading activities of Turkiye nin Otomobili and Sofra Kurumsal. The accounting policies of our reportable segments are the same as those described in the summary of significant accounting policies.

The Group has transferred its total shareholding in Azerinteltek, controlled by Inteltek, to another shareholder of Azerinteltek, Baltech Investment LLC (Baltech). The share purchase agreement was signed on November 15, 2018 and the transfer of proceeds to Inteltek was completed on December 27, 2018. Group has lost the control over the subsidiary unconditionally on December 27, 2018 following the transfer of money. The transfer of shares to Baltech was completed subsequently on January 11, 2019. See Note 39 to our audited Consolidated Financial Statements included in Item 18. Financial Statements of this annual report on Form 20-F for additional details.

Starting from October 1, 2016, Fintur was classified as held for sale and discontinued operations, the Group has signed the definitive agreement on December 12, 2018 to transfer its total shareholding in Fintur to another shareholder of Fintur, Sonera Holding B.V. (Sonera Holding). The transfer to Sonera Holding will be completed subsequently to the obtainment of regulatory approvals, and the value of the transaction will be finalized on the closing date of the transaction, which is expected to take place in 2019. See Note 16 to our audited Consolidated Financial Statements included in Item 18. Financial Statements of this annual report on Form 20-F.

Our financial statements are presented in TRY only, the currency in which we recognize the majority of our revenues and expenses.

5.A Operating Results

Our audited Consolidated Financial Statements as at December 31, 2018 and December 31, 2017 and for each of the years in the three-year period ended December 31, 2018 included in this annual report have been prepared in accordance with IFRS as issued by the IASB.

I. Overview of Business

Turkcell, a joint stock company organized and existing under the laws of the Republic of Turkey, was formed in 1993 and commenced operations in 1994. We operate under a 25-year GSM license (the 2G License) and a 20-year GSM license (the 3G License). We were granted the 2G License in April 1998 upon payment of an upfront license fee of \$500 million. On April 30, 2009, we signed a license agreement with the ICTA, which provides authorization for providing IMT 2000/UMTS services and infrastructure. We acquired the A-type license providing the widest frequency band for a consideration of EUR 358 million (excluding VAT). The 3G License is effective for 20 years starting from April 30, 2009. Pursuant to the agreement, we started to provide IMT 2000/UMTS services as of July 30, 2009.

In accordance with our 3G license agreement, we are required to cover the population within the borders of all metropolitan municipalities and within the borders of all cities and municipalities in three and six years, respectively. Moreover, we are required to cover the population in all settlement areas with a population higher than 5,000 and 1,000 in eight and ten years, respectively, following the date of the agreement.

Table of Contents

In 2013, we won an auction held by the Turkish Ministry related to universal service, which requires installing sufficient infrastructure to uncovered areas with a population of less than 500, as well as the operation of the service for three years. Since its signature in 2013, its scope was increased in 2017 to encompass mobile broadband services on top of existing 2G services under the Universal Service Law, and recently it was granted an extension until December 31, 2019 to operate both networks as per the same conditions defined under the contract.

In the 4.5G auction held on August 26, 2015, we agreed to purchase the use of 172.4 MHz, the largest amount of spectrum of any operator, for EUR 1,623.5 million (excluding VAT and interest payable on the installments). The license fee is being paid in four equal semi-annual installments. We agreed to purchase the use of widest frequency bands on 1800 MHz and 2600 MHz. We believe that these will allow us to offer high quality 4.5G services. We commenced offering 4.5G services from April 1, 2016. The 4.5G License is effective for 13 years until April 30, 2029.

Other than our 2G, 3G and 4.5G licenses, we also operate under interconnection agreements with other operators that allow us to connect our networks with those operators to enable the transmission of calls to and from our mobile communications system and fixed line networks through existing digital fixed telephone switches. For example, we have an interconnection agreement with Turk Telekom that provides for the interconnection of our network with Turk Telekom's fixed-line network. Under our agreement with Turk Telekom, as amended, we pay Turk Telekom an interconnection fee per call based on the type and length of the call for calls originating on our network and terminating on Turk Telekom's fixed-line network, as well as fees for other services. We also collect an interconnection fee from Turk Telekom for calls originating on their fixed-line network and terminating on ours. We also have interconnection agreements with Vodafone and Avea pursuant to which we have agreed, among other things, to pay interconnection fees to them for calls originating on our network and terminating on theirs, and they have agreed to pay interconnection fees for calls originating on their networks and terminating on our networks.

In 2015, Turkcell positioned itself as a converged player in the total telecommunication market by leveraging its brand, extensive customer base, technological capabilities and strong distribution channel. We shifted our organizational structure with the aim of increasing efficiency and simplification in our business processes.

Our services portfolio includes high-quality mobile and fixed voice, data, TV and digital services over our network. We continue to focus on our customer-oriented approach and our ability to provide quick and differentiated solutions to meet customers' needs through lifestyle segments and usage habits.

In 2016, we invested in the broadest 4.5G spectrum in Turkey and established what we believe to be the most advanced mobile and fiber network in Turkey. Post 4.5G launch, we realigned our strategy to focus on providing innovative and pioneering digital services, aiming to become more present and relevant in our customers' daily lives. Turkcell develops and manages digital services and solutions to address the diverse needs of both consumers and corporate customers, thereby enriching their lives. Thus, Turkcell defines itself as a digital operator.

Due to our digital services strategy, one of our main targets is to increase digital services penetration, therefore increasing mobile and fixed multi-play customers, which in our experience generates higher ARPU and greater customer loyalty. For instance, in 2018, a mobile triple play customer generated 3 times the ARPU of a single play customer and had 30% less churn on average.

Our subscriber base has grown substantially since we began operations in 1994. At year-end 1994, we had 63,500 subscribers, and by year-end 2018, that number for the Group had grown to 48.9 million including subscribers of subsidiaries.

In the mobile segment, we increased our postpaid subscriber base from 54% in 2017 to 56% in 2018 due to our focus on value. As of December 31, 2018, we had approximately 14.9 million prepaid subscribers and 18.8 million postpaid subscribers, compared to approximately 15.6 million prepaid subscribers and 18.5 million postpaid subscribers as of December 31, 2017.

Our average minutes of usage (MoU) in Turkey increased 4% to 359.5 minutes in 2018 from 347.1 minutes in 2017, as a result of high bundle packages utilization. Our mobile ARPU in Turkey increased to TRY 33.9 in 2018 compared to TRY 29.8 in 2017 mainly driven by our upsell strategy, favorable change in customer mix, focus on high value customer groups, and data and digital service growth.

Our revenues are generated in large part from interconnection fees and retail tariffs. Regulatory decisions have had and may continue to have the effect of decreasing interconnection rates and imposing minimum and maximum prices on our retail tariffs. For a more detailed discussion of these factors, please see [Item 4.B. Business Overview Regulation of the Turkish Telecommunications Industry](#) and [Item 5.D. Trend Information](#) .

Table of Contents

Churn rate is the percentage calculated by dividing the total number of subscriber disconnections during a period by the average number of subscribers for the same period. For these purposes, we define average number of subscribers as the number of subscribers at the beginning of the period plus one half of the total number of gross subscribers acquired during the period. Churn refers to subscribers that are both voluntarily and involuntarily disconnected from our network.

In the fixed segment, we increased our subscriber base from 2.1 million for the year ended December 31, 2017, to 2.3 million for the year ended December 31, 2018. 60% of the subscriber base are fiber customers (1.4 million subscribers).

We provided an impairment provision for contract assets, other assets and receivables from financial services in our Consolidated Financial Statements amounted to TRY 938.5 million and TRY 778.4 million as of December 31, 2018 and 2017 respectively, which we believe is adequate. The main reason for the change in impairment losses is collections made in 2018 amounting to TRY 262.9 million and a write-off of overdue receivables amounting to TRY 118.6 million which was netted of with an impairment loss recognized amounting to TRY 609.3 million. Moreover, the Company signed a transfer of claim agreement with a debt management company to transfer some of its doubtful receivables amounting to TRY 73.0 million stemming from the years between 1998 and 2016, excluding the amount from financial services which amounted to TRY 19.9 million stemming from the year 2017. Transferred doubtful receivables comprise of balances that the Company started legal proceedings.

II. International and Other Domestic Operations

In addition to our businesses in Turkey, we have telecommunications operations in Ukraine, the Turkish Republic of Northern Cyprus, Belarus and Germany. For a description of, and additional information regarding, our international and other domestic operations, see Item 4.B. Business Overview .

III. Revenues

Revenues include telecommunication services which is comprised of voice, data, messaging, services and solutions, interconnect, roaming, wholesale and other revenues. Other revenues mainly consist of revenues from our retail business, call center business, information and entertainment services, tower business and financial services.

IV. Operating Costs**a. Cost of Revenues**

Cost of revenues includes treasury shares, universal service fund, transmission fees, radio expenses, billing costs, cost of goods sold, depreciation and amortization charges, funding costs for financial services, roaming charges paid to foreign mobile communications operators for calls made by our subscribers while outside Turkey, interconnection fees mainly paid to Turk Telekom and Vodafone and wages and salaries and expenses for technical personnel.

b. Administrative Expenses

Administrative expenses consist of fixed costs, including company cars, office maintenance, travel, consulting, collection charges, wages, salaries and personnel expenses for non-technical, non-marketing, and non-sales employees, and other overhead charges.

c. Selling and Marketing

Selling and marketing expenses consist of dealer and distributor commissions, advertising, wages, salaries and personnel expenses of sales and marketing related employees, and other expenses, including travel expenses, office expenses, insurance, company car expenses, and training and communication expenses.

d. Net impairment losses on financial and contract assets

Net impairment losses on financial and contract assets consist of impairment losses incurred through assessment of the Group at the end of each reporting period to consider whether there is objective evidence that a financial asset or group of financial assets was impaired. A financial asset or a group of financial assets was impaired and impairment losses were incurred only if there was objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a loss event) and that loss event had an impact on the estimated future cash flows of the financial asset or group of financial assets that could be reliably estimated. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost was considered an indicator that the assets were impaired.

V. Segment Overview

Our operations are aggregated under two main reportable segments, Turkcell Turkey and Turkcell International:

The Turkcell Turkey segment comprises mainly our telecommunication and technology services activities in Turkey and includes the operations of Turkcell, Turkcell Superonline, Turkcell Satis, group call center operations of Turkcell Global Bilgi, Turktell, Turkcell Teknoloji, Global Tower, Rehberlik, Turkcell Odeme and Turkcell Gayrimenkul.

The Turkcell International segment comprises mainly our telecommunication and technology services activities outside of Turkey and includes the operations of lifecell, Belarusian Telecom, Kibris Telekom, Eastasia, Lifecell Ventures, Beltel, UkrTower, Global LLC, Turkcell Europe, Lifetech LLC, Beltower, Lifecell Digital Limited and Fintur.

Our Other reportable segment is comprised mainly information and entertainment services in Turkey and Azerbaijan, non-group call center operations of Turkcell Global Bilgi, consumer financing service operations of Financell, Paycell LLC, TOFAS (interest free), electricity energy trade operations of Turkcell Enerji, insurance agency activities of Turkcell Sigorta, as well as the development and production of electric passenger cars and to the carrying out of trading activities of Turkiye nin Otomobili and Sofra Kurumsal. The accounting policies of our reportable segments are the same as those described in the summary of significant accounting policies.

The Group has transferred its total shareholding in Azerinteltek, controlled by Inteltek, to another shareholder of Azerinteltek, Baltech Investment LLC (Baltech). The share purchase agreement was signed on November 15, 2018 and the transfer of proceeds to Inteltek was completed on December 27, 2018. The Group has lost the control over the subsidiary unconditionally on December 27, 2018 with transfer of money. The transfer of shares to Baltech was completed subsequently on January 11, 2019. See Note 39 to our audited Consolidated Financial Statements included in Item 18. Financial Statements of this annual report on Form 20-F for additional information.

Starting from 1 October 2016, Fintur was classified as held for sale and discontinued operations. The Group has signed the definitive agreement on December 12, 2018 to transfer its total shareholding in Fintur to the other shareholder of Fintur, Sonera Holding B.V. (Sonera Holding). The transfer to Sonera Holding will be completed subsequently to the obtainment of regulatory approvals and the value of transaction will be finalized on closing date of the transaction, which is expected to take place in 2019. See Note 16 to our audited Consolidated Financial Statements included in Item 18. Financial Statements of this annual report on Form 20-F.

Turkcell Turkey

a. 2018 compared to 2017

Total revenues generated by Turkcell Turkey increased 18.2% to TRY 18,265.8 million in 2018 from TRY 15,450.1 million in 2017, mainly due to a 16.4% growth in data and digital services revenues driven by the increase in mobile data and fixed data revenues impacted by higher number of data users, increased data consumption per user and higher penetration of digital services, a larger postpaid subscriber base as well as our ability to upsell to higher tariffs in mobile business coupled with a larger subscriber base in fixed business and higher ratio of multiplay

subscribers with TV. In 2018, postpaid ARPU excluding M2M subscribers was TRY 54.9 whereas prepaid average revenue per user was TRY 16.9, approximately 3.2 times higher. Additionally, voice and SMS revenues grew by 10.4%. For a more detailed discussion of the factors affecting our revenues, please see Item 4.B. Business Overview Regulation of the Turkish Telecommunications Industry and Item 5.D. Trend Information .

Turkcell Turkey's Adjusted EBITDA increased 34.7% to TRY 7,534.3 million in 2018 from TRY 5,593.8 million in 2017, mainly due to an increase in revenues and selling and marketing expenses which was partially offset by an increase in cost of revenues, administrative expenses and net impairment losses. The increase in the cost of revenues mainly resulted from an increase in treasury share expenses, interconnection cost, radio cost, wages, salaries and personnel, cost of goods sold, transmission cost and network related expenses. Decrease in selling and marketing expenses is mainly due to IFRS standards effect, which includes the capitalization of subscriber acquisition costs according to IFRS15, the capitalization of lease expenses according to IFRS16 and reclassification of frequency usage fees related to prepaid subscribers under net impairment losses on financial and contract assets according to IFRS 9 standard.

Table of Contents***b. 2017 compared to 2016***

Total revenues generated by Turkcell Turkey increased 20.8% to TRY 15,450.1 million in 2017 from TRY 12,787.6 million in 2016, mainly due to a 51.2% growth in data and digital services revenues driven by the increase in mobile data and fixed data revenues impacted by increased smartphone penetration, higher subscriber numbers, a rise in data consumption, price adjustments and higher digital services subscribers. This was partially offset by a 36.5% decrease in voice and SMS revenues. For a more detailed discussion of the factors affecting our revenues, please see Item 4.B. Business Overview Regulation of the Turkish Telecommunications Industry and Item 5.D. Trend Information .

Turkcell Turkey's Adjusted EBITDA increased 34.4% to TRY 5,593.8 million in 2017 from TRY 4,160.9 million in 2016, mainly due to an increase in revenues and decrease in administrative expenses which was partially offset by an increase in cost of revenues. The increase in the cost of revenues mainly resulted from an increase in treasury share expenses, interconnection cost, wages, salaries and personnel, cost of goods sold and network related expenses. The decrease in administrative expenses mainly resulted from a decrease in bad debt expenses as opposed to increase in consultancy expenses and wages, salaries and personnel expenses.

Turkcell International***a. 2018 compared to 2017***

Total revenues generated by Turkcell International increased by 36.5%, to TRY 1,457.0 million in 2018 from TRY 1,067.1 million in 2017 mainly due to currency appreciation in Ukraine and Belarus against the Turkish Lira in 2018. The annual growth rates, in terms of local currency, of our major subsidiaries, lifecell and Belarusian Telecom were 8.1% and 11.7% respectively. The revenue growth in lifecell, which operates in Ukraine, was mainly driven by 20.1% higher blended ARPU (three-month active) due to higher mobile broadband usage which was partially offset by the increase in the three-month active subscriber base to 8.0 million from 7.3 million. The revenue growth in Belarusian Telecom in Belarus was mainly due higher data revenues on the back of a rise in 4G users coupled with a higher data consumption . The penetration of its digital services in Belarusian Telecom continued to increase in accordance with Turkcell's digital services strategy.

Turkcell International's Adjusted EBITDA increased by 132.1% to TRY 612.7 million in 2018 from TRY 264.0 million in 2017 mainly due to the positive impact of new IFRS standards which included capitalization of lease expenses under IFRS16 and capitalization of subscriber acquisition costs according to IFRS15 as well as the currency appreciation in Ukraine and Belarus against the Turkish Lira. The increase in Turkcell International's Adjusted EBITDA was mainly due to increase in lifecell's Adjusted EBITDA by 170.9% in terms of Turkish Lira. lifecell's Adjusted EBITDA increased by 108.2% in terms of local currency mainly due to the effective cost control measures as well as the positive impact of the capitalization of its radio frequency usage costs starting in the fourth quarter of 2018 in accordance with IFRS16.

b. 2017 compared to 2016

Total revenues generated by Turkcell International increased by 22.0%, to TRY 1,067.1 million in 2017 from TRY 874.7 million in 2016 mainly due to currency appreciation in Ukraine and Belarus against the Turkish Lira in 2017. The annual growth rates, in terms of local currency, of our major subsidiaries, lifecell and Belarusian Telecom were 0.8% and 13.4%, respectively. The revenue growth in lifecell, which operates in Ukraine, was mainly driven by 17% higher blended ARPU (three-month active) due to higher mobile broadband usage which was partially offset by the decrease in the three-month active subscriber base to 8.0 million from 9.2 million. The revenue growth in Belarusian

Telecom, which operates in Belarus, was mainly due to increased number of 4G users, and higher data consumption led to increased data revenues. Meanwhile, BeST continued to increase the penetration of its digital services within its customer base in accordance with Turkcell's digital services strategy.

Turkcell International's Adjusted EBITDA increased by 12.2% to TRY 264.0 million in 2017 from TRY 235.3 million in 2016 due to the positive impact of currency appreciation in Ukraine and Belarus against the Turkish Lira. The increase in Turkcell International's Adjusted EBITDA was mainly due to increase in lifecell's Adjusted EBITDA by 13.0% in terms of TRY, which was decreased by 2.2% in terms of local currency mainly due to higher network related costs resulting from the 3G+ roll-out.

Table of Contents**VI. Year Ended December 31, 2018 Compared to the Year Ended December 31, 2017**

We had 33.7 million mobile subscribers in Turkey, including 14.9 million mobile prepaid subscribers, as of December 31, 2018, compared to 34.1 million mobile subscribers in Turkey, with 15.6 million mobile prepaid subscribers, as of December 31, 2017. During 2018, we recorded a decrease of 0.4 million Turkish mobile subscribers.

In the fixed segment, we increased our subscriber base from 2.1 million, of which 1.2 million were fiber customers, for the year ended December 31, 2017, to 2.3 million, of which 1.4 million were fiber customers, for the year ended December 31, 2018.

In Ukraine, we had 9.9 million and 11.1 million registered subscribers as of December 31, 2018 and 2017, respectively. During 2018, we lost approximately 1.2 million Ukrainian registered subscribers, similarly 3 months active subscribers decreased from 8.0 million to 7.3 million. This was primarily due to decreasing multiple SIM card usage.

a. Revenues

Total revenues for the year ended December 31, 2018 increased 20.8% to TRY 21,292.5 million in 2018 from TRY 17,632.1 million in 2017.

Total revenues generated by Turkcell Turkey increased 18.2%, to TRY 18,265.8 million in 2018 from TRY 15,450.1 million in 2017, mainly due to a 16.4% growth in data and digital services revenues and 10.4% growth in voice & SMS revenues driven by higher number of data users, increased data consumption per user and higher penetration of digital services as well as our ability to upsell in mobile business coupled with a larger subscriber base in fixed business and higher ratio of multiplay subscribers with TV.

Postpaid subscriber usage is generally higher than prepaid subscriber. In Turkey, during 2018, we maintained our focus on the postpaid segment, with newly launched campaigns, offers and promotions to switch customers from the prepaid to the postpaid segment. We focus on postpaid subscribers because there is, in general, higher average revenue per postpaid subscriber and a lower churn rate. In 2018, postpaid ARPU excluding M2M subscribers was TRY 54.9 whereas prepaid average revenue per user was TRY 16.9. These figures indicate that postpaid average revenue per user is approximately 3.2 times the prepaid average revenue per user. Therefore, the increase in the number of postpaid subscribers has a positive effect on blended average revenue per user.

Total revenues generated by Turkcell International increased by 36.5%, to TRY 1,457.0 million in 2018 from TRY 1,067.1 million in 2017 mainly due to growth in Ukraine and Belarus business in addition to the appreciation of UAH and BYN against TRY during the period. The annual growth rates of lifecell and Belarusian Telecom, in terms of local currency were 8.1% and 11.7%, respectively.

Other subsidiaries revenues, mainly comprised of our revenues from information and entertainment services, call center services and financial services, grew by 62.8% to TRY 1,933.8 million in 2018 from TRY 1,187.5 million in 2017. The increase in revenue is mainly attributable to Financell, our consumer finance business despite the negative impact of the introduction of a regulatory limitation on the number of installments for consumer loans for smartphones in August 2018.

b. Cost of revenues

Cost of revenues, including depreciation and amortization, increased by 24.6% to TRY 14,146.0 million in 2018 from TRY 11,350.2 million in 2017, due to an increase in depreciation and amortization charges, treasury shares and universal funds paid, network related expenses, wages, salaries and personnel expenses, funding costs for financial services and other items and the impact of new IFRS standards which includes amortization charge of subscriber acquisition cost according to IFRS15 and capitalization of lease expenses, depreciation and amortization charges of right of use assets according to IFRS16. TRY depreciation and rising inflation resulted in an increase in the overall cost of revenues.

Depreciation and amortization charges (including impairment charges) increased by 65.1%, to TRY 4,288.0 million in 2018 from TRY 2,597.0 million in 2017. The effect of current year addition of IFRS standards is TRY 1,173.4. The amortization expense for our GSM license and other telecommunication operating licenses was TRY 533.3 million in 2018 mainly attributable to our 4.5G license and TRY 537.2 million in 2017.

Treasury shares and universal service funds on our mobile revenues paid to the Turkish Ministry increased 13.2%, to TRY 2,141.0 million in 2018 from TRY 1,891.2 million in 2017 which was mainly due to the increase in mobile revenues.

Table of Contents

Interconnection and termination costs increased 9.7% to TRY 1,763.4 million in 2018 from TRY 1,607.1 million in 2017 mainly due to the increase in off-net interconnection traffic.

Wages, salaries and personnel expenses for technical personnel increased 14.9% to TRY 1,202.5 million in 2018 from TRY 1,046.5 million in 2017, mainly due to the periodic increase in wages and salaries and the increase in number of personnel which was partially offset by the decreasing impact of new IFRS standards which were capitalization of subscriber acquisition costs according to IFRS15 and capitalization of lease expenses according to IFRS16.

Radio cost decreased by 39.8% to TRY 508.9 million in 2018 from TRY 844.9 million in 2017 mainly due to impact of new IFRS16 standard.

Frequency expense increased by 123.3% to 622.4 million in 2018 from TRY 278.7 million 2017 due to a change in calculation method. Before January 1, 2018, the fee amount to be paid was calculated with respect to the amount per unit of wireless equipment (TRX); however, following a legislation shift, as of January 1, 2018 the fee is being calculated as 5% of monthly net sales amount.

Transmission costs increased by 49.4% to TRY 326.1 million in 2018 from TRY 218.2 million in 2017 mainly due to increases in roll out, capacity and effect of depreciation in TL.

Roaming expenses increased 28.0%, to TRY 226.8 million in 2018 from TRY 177.3 million in 2017, mainly due to depreciation of the TRY against the EUR and overall mobile network traffic increase.

Billing and archiving costs decreased 7.7% to TRY 50.9 million in 2018 from TRY 55.2 million in 2017, mainly due to the increase in the usage of the electronic and SMS invoices for billing.

Cost of revenue from financial services increased 28.9% to TRY 348.5 million in 2018 from TRY 270.4 million in 2017, due to the increased activities of Turkcell Finansman, which received official authorization in January 2016. Other costs in cost of revenues increased 12.9% to TRY 2,667.5 million in 2018 from TRY 2,363.6 million in 2017 due to increased contribution of our subsidiaries to our revenues, particularly in the fixed broadband and retail businesses, and universal service project.

As a percentage of revenues, cost of revenues increased 2.0 percentage points to 66.4% in 2018 from 64.4% in 2017, mainly as a result of increases in depreciation and amortization expenses of 5.4 percentage points, frequency expense of 1.3 percentage points and transmission cost of 0.3 percentage points as opposed to decreases in interconnection costs of 0.8 percentage points, treasury share and universal fund 0.6 percentage points and radio cost 2.4 percentage points.

Gross profit margin decreased 2.0 percentage points from 35.6% in 2017 to 33.6% in 2018.

c. Administrative expenses

Administrative expenses increased 4.4%, to TRY 673.4 million in 2018 from TRY 645.2 million in 2017, mainly due to a decrease in consultancy expenses, the impact of new IFRS standards and showing impairment losses incurred in 2018 under net impairment losses on financial and contract asset partially offset by an increase in wages, salaries and personnel expenses, collection expense and travel and entertainment expenses. As a percentage of revenues, general and administrative expenses decreased to 3.2% for the year ended December 31, 2018, from 3.7% for the year ended December 31, 2017.

Wages, salaries and personnel expenses for non-technical and non-marketing employees increased 23.0%, to TRY 425.7 million in 2018 from TRY 346.2 million in 2017, primarily due to periodic increases in wages and salaries and the increase in number of personnel and the impact of new IFRS standards.

Other administrative expenses, including collection and consulting expenses, decreased 5.7% to TRY 247.7 million in 2018 from TRY 262.8 million in 2017 with the impact of the capitalization of lease expenses according to IFRS 16.

Starting from the fourth quarter of 2018, bad debt expenses for the full year were reclassified as impairment losses under the new item called net impairment losses on financial and contract assets according to IFRS 9.

d. *Selling and marketing expenses*

Selling and marketing expenses decreased 18.9%, to TRY 1,626.7 million in 2018 from TRY 2,005.4 million in 2017, mainly due to the decrease in selling expenses and the effect of showing prepaid subscribers uncharged frequency

Table of Contents

usage fees under net impairment losses on financial and contract asset, which was partially offset by the increase in wages, salaries, personnel and marketing expenses. As a percentage of revenues, selling and marketing expenses decreased from 11.4% for the year ended December 31, 2017 to 7.6% for the year ended December 31, 2018.

Selling expenses, which consist of distributor and dealer commissions and other selling expenses decreased 38.2%, to TRY 555.2 million in 2018 from TRY 898.9 million in 2017, mainly due to the TRY 664.7 million impact of the new IFRS standards which included capitalization of subscriber acquisition costs according to IFRS15 and the effect of reclassifying prepaid subscribers uncharged frequency usage fees under net impairment losses on financial and contract assets according to IFRS 9.

Marketing expenses, which consist of advertising, market research and sponsorships expenses, increased 3.4%, to TRY 551.1 million in 2018 from TRY 533.0 million in 2017 mainly due higher advertising expenses partially offset by the capitalization of lease expenses according to IFRS16.

Wages, salaries and personnel expenses for selling and marketing employees increased 11.8%, to TRY 441.0 million in 2018 from TRY 394.4 million in 2017, primarily due to periodic increase in wages and salaries.

Prepaid subscribers uncharged frequency usage fee expenses amounting to TRY 141.5 million reclassified from Selling and Marketing expenses to net impairment losses on financial and contract assets.

e. Net impairment losses on financial and contract assets

According to IFRS 9, Net impairment expense recognized on receivables, previously presented in administrative expenses, are now to be shown under Net impairment losses on financial and contract assets and impairment losses incurred in 2018 amounted to TRY 346.4 million. Additionally, Prepaid subscribers uncharged frequency usage fees amounting to TRY 141.5 million are reclassified from Selling and Marketing expenses.

We provided an impairment provision of TRY 938.5 million and TRY 778.4 million for contract assets, other assets and receivable from financial services for the years ended December 31, 2018 and 2017, respectively, depending on the evidence of impairment as a result of one or more events that occurred following the initial recognition of the asset and that loss event had an impact on the estimated future cash flows of the asset.

f. Other operating income/ (expense)

Other net operating expenses decreased to TRY 140.1 million in 2018 from TRY 698.9 million in 2017, mainly due to donations and litigation expenses as explained in Note 37 (Commitments and Contingencies) to our Consolidated Financial Statements in this annual report on Form 20-F, partially offset by Azerinteltek share sales income.

g. Operating Profit

Operating profit increased by 48.7% to TRY 4,359.9 million in 2018 from TRY 2,932.4 million in 2017. As a percentage of revenues, operating profit also increased from 16.6% in 2017 to 20.5% in 2018 mainly due to a decrease in administrative expenses and selling and marketing expenses as a percentage of revenues.

h. Net finance income/cost

Net finance cost increased to a TRY 1,687.0 million net expense in 2018 from a TRY 322.9 million net expense in 2017, due to an increase in finance cost to TRY 3,619.1 million in 2018 from TRY 1,413.3 million in 2017, which

was partially offset by the increase in finance income to TRY 1,932.1 million in 2018 from TRY 818.4 million in 2017.

Finance income increased by 136.1% to TRY 1,932.1 million in 2018 from TRY 818.4 million in 2017, mainly due to an increase in gain from changes in the fair value of derivative instruments, cash flow hedges reclassified to profit or loss, interest income on bank deposits and cash flow hedges reclassified to profit or loss.

Finance cost increased by 217.1% to TRY 3,619.1 million in 2018 from TRY 1,141.3 million in 2017, mainly due to the increase net foreign exchange losses and interest expenses for financial liabilities measured at amortized cost, Net foreign exchange losses increased from TRY 718.5 million in 2017 to TRY 2,695.0 million in 2018.

Table of Contents***i. Income tax expense***

Income tax expense decreased 13.3% to TRY 495.5 million in 2018 from TRY 571.8 million in 2017 mainly due to the tax exemption effect of Fintur.

The effective tax rate was 18.5% and 21.9% for the years ended December 31, 2018 and 2017, respectively.

Our domestic tax rate is 20%. On December 5, 2017, Turkey's Law No. 7061 on the Amendment of Some Tax Laws and Some Other Laws, which was adopted on November 28, 2017, was published in the Official Gazette. The Law increases the corporate tax rate under the Corporate Tax Law, No. 5520, from the current 20% rate to 22% for tax years 2018, 2019, and 2020; the change took effect on the Law's date of publication. It is expected to be set at 20% afterwards.

Differences between the effective tax rate and our domestic tax rate include, but are not limited to, the effect of allowance for deferred tax assets, tax rates in foreign jurisdictions, tax-exempt income and non-deductible expenses. The main driver of the decline in effective tax rate in 2018 is the tax exemption effect of Fintur. The high effective tax rate in 2017 is mainly due to the fact that since it is not probable that taxable profit will be available against which the unused tax losses or unused tax credits of lifecell and Belarusian Telecom can be utilized, no deferred tax asset is recognized on any loss incurred in lifecell and Belarusian Telecom.

j. Profit/ (loss) from discontinued operations

Starting from 1 October 2016, Fintur has been classified as held for sale and reported as a discontinued operation (Note 16). Fintur is therefore disclosed separately as discontinued operations in our Consolidated Financial Statements in this annual report on Form 20-F. Comparative periods in the Consolidated Financial Statements are restated to reflect the classification of Fintur as discontinued operations.

Loss from discontinued operations was TRY 42.2 million in 2016 while there is no loss recorded for the years 2017 and 2018.

k. Non-controlling interests

Non-controlling interests in the net profit of our consolidated subsidiaries is classified separately in the consolidated financial statements of operations under non-controlling interests. Profit allocated to non-controlling interests amounted to TRY 58.6 million for the year ended December 31, 2017, compared to a TRY 156.3 million for 2018.

Profit allocated to non-controlling interests from net profit generated by Inteltek for the years ended December 31, 2018 and 2017 amounted to TRY 105.1 million and TRY 35.9 million respectively.

l. Profit for the year attributable to equity holders of the Company

Profit for the year attributable to equity holders of the Company increased to TRY 2,021.1 million in 2018 from TRY 1,979.1 million in 2017, mostly due to increase in results from operating activities, increase in interest income earned on time deposits, and increase in fair value gains on derivative financial instruments which was partially netted off with decrease in interest income on financial assets measured at amortized cost and increase in interest expenses for derivative financial instruments.

VII. Year Ended December 31, 2017 Compared to the Year Ended December 31, 2016

We had 34.1 million mobile subscribers in Turkey, including 15.6 million mobile prepaid subscribers, as of December 31, 2017, compared to 33.0 million mobile subscribers in Turkey, with 15.7 million mobile prepaid subscribers, as of December 31, 2016. During 2017, we recorded an increase of 1.1 million Turkish mobile subscribers.

In the fixed segment, we increased our subscriber base from 1.9 million, of which 1.0 million were fiber customers, for the year ended December 31, 2016, to 2.1 million, of which 1.2 million were fiber customers, for the year ended December 31, 2017.

In Ukraine, we had 11.1 million and 12.4 million registered subscribers as of December 31, 2017 and 2016, respectively. During 2017, we lost approximately 1.3 million Ukrainian registered subscribers, similarly 3 months active subscribers decreased from 9.2 million to 8.0 million. This was primarily due to decreasing multiple SIM card usage.

Table of Contents

a. Revenues

Total revenues for the year ended December 31, 2017 increased 23.4% to TRY 17,632.1 million in 2017 from TRY 14,285.6 million in 2016.

Total revenues generated by Turkcell Turkey increased 20.8%, to TRY 15,450.1 million in 2017 from TRY 12,787.6 million in 2016, mainly due to a 51.2% growth in data and digital services revenues driven by the increase in mobile data and fixed data revenues impacted by increased smartphone penetration, higher subscriber numbers and a rise in data consumption; which was partially offset by a 36.5% decrease in voice and SMS revenues.

Postpaid subscriber usage is generally higher than prepaid subscriber. In Turkey, during 2017, we maintained our focus on the postpaid segment, with newly launched campaigns, offers and promotions to switch customers from the prepaid to the postpaid segment. We focus on postpaid subscribers because there is, in general, higher average revenue per postpaid subscriber and a lower churn rate. In 2017, postpaid ARPU excluding M2M subscribers was TRY 48.5 whereas prepaid average revenue per user was TRY 14.9. These figures indicate that postpaid average revenue per user is approximately 3.3 times the prepaid average revenue per user. Therefore, the increase in the number of postpaid subscribers has a positive effect on blended average revenue per user.

Total revenues generated by Turkcell International increased by 22.0%, to TRY 1,067.1 million in 2017 from TRY 874.7 million in 2016 mainly due to growth in Ukraine and Belarus business. The annual growth rates, in terms of local currency, lifecell and Belarusian Telecom were 0.8% and 13.4% respectively.

Other subsidiaries revenues, mainly comprised of our revenues from information and entertainment services, call center services and financial services, grew by 79.4% to TRY 1,187.5 million in 2017 from TRY 661.9 million in 2016. The increase in revenue is mainly attributable to Financell which was commenced in February 2016.

b. Cost of revenues

Cost of revenues, including depreciation and amortization, increased by 22.9% to TRY 11,350.2 million in 2017 from TRY 9,236.6 million in 2016, due to an increase in depreciation and amortization charges, treasury shares and universal funds paid, network related expenses, wages, salaries and personnel expenses, funding costs for financial services and other items.

Depreciation and amortization charges (including impairment charges) increased by 17.9%, to TRY 2,597.0 million in 2017 from TRY 2,203.3 million in 2016. The amortization expense for our GSM license and other telecommunication operating licenses was TRY 537.2 million in 2017 mainly attributable to our 4.5G license and TRY 445.1 million in 2016.

Treasury shares and universal service funds paid to the Turkish Ministry increased 12.3%, to TRY 1,891.2 million in 2017 from TRY 1,683.5 million in 2016 which was mainly due to the increase in mobile revenues.

Interconnection and termination costs increased 13.2% to TRY 1,607.1 million in 2017 from TRY 1,420.2 million in 2016 mainly due to the increase in off-net interconnection traffic.

Transmission costs increased by 56.8% to TRY 218.2 million in 2017 from TRY 139.2 million in 2016. Furthermore, radio costs increased by 6.2%, to TRY 1,123.7 million in 2017 from TRY 1,057.6 million in 2016 mainly due to the cumulative investment impact and increased costs such as rent and energy.

Wages, salaries and personnel expenses for technical personnel increased 21.8% to TRY 1,046.5 million in 2017 from TRY 859.1 million in 2016, mainly due to the periodic increase in wages and salaries and the increase in number of personnel.

Roaming expenses increased 38.1%, to TRY 177.3 million in 2017 from TRY 128.4 million in 2016, mainly due to depreciation of the TRY against the EUR and overall traffic increase.

Billing and archiving costs decreased 10.5% to TRY 55.2 million in 2017 from TRY 61.6 million in 2016, mainly due to the increase in the usage of the electronic and SMS invoices for billing.

Cost of revenue from financial services increased 294.7% to TRY 270.4 million in 2017 from TRY 68.5 million in 2016, due to the increased activities of Turkcell Finansman, which received official authorization in January 2016. Other costs in cost of revenues increased 46.4% to TRY 2,363.6 million in 2017 from TRY 1,614.9 million in 2016 due to increased contribution of our subsidiaries to our revenues, particularly in the fixed broadband and retail businesses, and universal service project.

Table of Contents

As a percentage of revenues, cost of revenues decreased 0.3 pp to 64.4% in 2017 from 64.7% in 2016, mainly as a result of increases in cost of revenue from financial services of 1.1 pp, retail sales related to device costs of 1.1 pp and other costs in cost of revenues of 1.0 pp as opposed to decreases in interconnect costs of 0.8 pp, treasury share 1.1 pp, radio cost 1.0 pp and depreciation and amortization expenses of 0.7 pp.

Gross profit margin increased 0.3 percentage points from 35.3% in 2016 to 35.6% in 2017.

c. Administrative expenses

Administrative expenses decreased 10.6%, to TRY 645.2 million in 2017 from TRY 721.8 million in 2016, mainly due to an increase in wages, salaries and personnel expenses, rent expense, travel and entertainment expenses as opposed to the decrease in consultancy expenses and bad debt expenses. As a percentage of revenues, general and administrative expenses decreased to 3.7% for the year ended December 31, 2017, from 5.1% for the year ended December 31, 2016.

Wages, salaries and personnel expenses for non-technical and non-marketing employees increased 24.8%, to TRY 346.2 million in 2017 from TRY 277.4 million in 2016, primarily due to periodic increases in wages and salaries and the increase in number of personnel.

Bad debt expenses decreased 82.8%, to TRY 36.3 million in 2017 from TRY 211.4 million in 2016, due to recovery in collection performance.

We provided an allowance of TRY 778.4 million and TRY 974.5 million for doubtful receivables for the years ended December 31, 2017 and 2016, respectively, depending on the likelihood of recoverability of trade and other receivables based on the aging of the balances, historical collection trends and general economic conditions.

Other administrative expenses, including collection and consulting expenses, increased 12.8% to TRY 262.8 million in 2017 from TRY 233.0 million in 2016.

d. Selling and marketing expenses

Selling and marketing expenses increased 4.9%, to TRY 2,005.4 million in 2017 from TRY 1,910.9 million in 2016, primarily due to an increase in selling expenses, wages, salaries, personnel and marketing expenses, which were partially offset by a decrease in prepaid subscribers uncharged frequency usage fee expenses. As a percentage of revenues, selling and marketing expenses decreased from 13.4% for the year ended December 31, 2016 to 11.4 % for the year ended December 31, 2017.

Selling expenses, which consist of distributor and dealer commissions and other selling expenses increased 18.6%, to TRY 898.9 million in 2017 from TRY 757.9 million in 2016, mainly due to our value focused customer acquisition strategy.

Marketing expenses, which consist of advertising, market research and sponsorships expenses, increased 2.8%, to TRY 533.0 million in 2017 from TRY 518.4 million in 2016.

Wages, salaries and personnel expenses for selling and marketing employees increased 11.3%, to TRY 394.4 million in 2017 from TRY 354.4 million in 2016, primarily due to periodic increase in wages and salaries.

Prepaid subscribers uncharged frequency usage fee expenses decreased 55.5%, to TRY 83.0 million in 2017 from TRY 186.5 million in 2016 due to increase in collection from customers.

e. Other operating income/ (expense)

Other net operating expenses increased to TRY 698.9 million in 2017 from TRY 234.2 million in 2016, mainly due to fixed asset sales gain, reversal of legal provisions, donations and litigation expenses as explained in Note 37 (Commitments and Contingencies) to our Consolidated Financial Statements in this annual report on Form 20-F.

Table of Contents***f. Operating Profit***

Operating profit increased by 34.4% to TRY 2,932.4 million in 2017 from TRY 2,181.9 million in 2016. As a percentage of revenues, operating profit also increased from 15.3% in 2016 to 16.6% in 2017 mainly due to a decrease in administrative expenses and selling and marketing expenses as a percentage of revenues.

g. Net finance income/cost

Net finance cost increased to a TRY 322.9 million net expense in 2017 from a TRY 172.8 million net expense in 2016, due to an increase in finance cost to TRY 1,141.3 million in 2017 from TRY 1,134.4 million in 2016, which was partially offset by the increase in finance income to TRY 818.4 million in 2017 from TRY 961.6 million in 2016.

Finance income decreased by 14.9% to TRY 818.4 million in 2017 from TRY 961.6 million in 2016, mainly due to an increase in gain from changes in the fair value of derivative instruments, interest income on bank deposits partially netted off with the decrease in interest income on financial assets measured at amortized cost.

Finance cost increased by 0.6% to TRY 1,141.3 million in 2017 from TRY 1,134.4 million in 2016, mainly due to the increase interest expenses for derivative financial instruments and interest expenses for financial liabilities measured at amortized cost, and partially netted off with decrease in net foreign exchange losses. Net foreign exchange losses decreased from TRY 782.5 million in 2016 to TRY 718.5 million in 2017.

h. Income tax expense

Income tax expense increased 35% to TRY 571.8 million in 2017 from TRY 423.2 million in 2016.

The effective tax rate was 21.9% and 21.5% for the years ended December 31, 2017 and 2016, respectively.

Our domestic tax rate is 20%. Differences between the effective tax rate and our domestic tax rate include, but are not limited to, the effect of allowance for deferred tax assets, tax rates in foreign jurisdictions, dividend income from investment in associates subject to certain tax exemptions (including Fintur), tax-exempt income and non-deductible expenses. The high effective tax rate in 2017 and 2016 is mainly due to the fact that since it is not probable that taxable profit will be available against which the unused tax losses or unused tax credits of lifecell and Belarusian Telecom can be utilized, no deferred tax asset is recognized on any loss incurred in lifecell and Belarusian Telecom.

i. Profit/ (loss) from discontinued operations

Starting from 1 October 2016, Fintur has been classified as held for sale and reported as a discontinued operation (Note 16). Fintur is now therefore disclosed separately on a single line as discontinued operations in our Consolidated Financial Statements in this annual report on Form 20-F. Comparative periods in the Consolidated Financial Statements are restated to reflect the classification of Fintur as discontinued operations.

Loss from discontinued operations is TRY 42.2 million in 2016.

j. Non-controlling interests

Non-controlling interests in the net profit of our consolidated subsidiaries is classified separately in the consolidated financial statements of operations under non-controlling interests. Profit allocated to non-controlling interests amounted to TRY 51.7 million for the year ended December 31, 2016, compared to a TRY 58.6 million for 2017.

Profit allocated to non-controlling interests from net profit generated by Inteltek for the years ended December 31, 2017 and 2016 amounted to TRY 35.9 million and TRY 39.3 million respectively.

k. Profit for the year attributable to equity holders of the Company

Profit for the year attributable to equity holders of the Company increased to TRY 1,979.1 million in 2017 from TRY 1,492.1 million in 2016, mostly due to increase in results from operating activities, increase in interest income earned on time deposits, and increase in fair value gains on derivative financial instruments which was partially netted off with decrease in interest income on financial assets measured at amortized cost and increase in interest expenses for derivative financial instruments.

Table of Contents**VIII. Effects of Inflation**

According to the Turkish Statistical Institute (TUIK), mainly due to the strong TRY depreciation and higher food price the annual inflation in Turkey reached 20.3% in December 2018, which is considerably higher than the 2017 year-end figure, which was 11.92%. The TRY depreciated 42% against the USD in August and along with the FX pass-through, headline inflation reached 24.52% and 25.24% in September and October, respectively. The current inflation expectation of the CBRT in its 2019 Inflation Report is 15.2% for 2019. The latest CBRT expectations survey, as of February 2019, indicated that inflation is expected to be at 16.0% at the end of 2019, which is above the CBRT's target. For additional information, see Item 3.D. Risk Factors. Inflation accelerated relatively in 2018 in Belarus. Headline inflation increased to 5.6% in 2018 from 4.6% in 2017, according to the data provided by National Statistical Committee of the Republic of Belarus. The National Bank of the Republic of Belarus has been on an easing trajectory since the beginning of 2017, bringing the refinancing rate down to 10% from 17% with gradual rate cuts. Economic activity continues to recover even though the momentum of the growth diminished slightly at the end of the year. Macroeconomic stability is still fragile due to the country's reliance on the Russian economy. On the external side, key risks include disruptions in energy price arrangements with Russia.

In Ukraine, inflation followed a downward path in 2018, due to weakening of food prices amid more ample supply, economic activity slightly picked up driven by agriculture and domestic demand. Annual inflation declined to 9.8% in 2018 from 13.7% at the end of 2017 according to the National Bank of Ukraine. Current tight monetary stance supports the deceleration in inflation towards the National Bank's year-end inflation target. The National Bank of Ukraine hiked its policy rate from 16% to 18% through 2018 and to 18% in January 2019 in an effort to curb inflation. 2018 brought forward favorable outcomes as growth continued to recover, risk of volatile markets and geopolitical risks remain in place as country head into presidential elections followed by parliamentary elections in 2019. Furthermore, if global liquidity conditions become tighter, the UAH will most likely come under increased pressure.

IX. Foreign Currency Fluctuations

We conduct our business in several currencies other than functional currencies of each of our locations. As a result of our exposure to foreign currency, exchange rate fluctuations have a significant impact, in the form of both translation and transaction risks, on our Consolidated Financial Statements.

Exchange rate movements impact our assets and liabilities denominated in currencies other than TRY, Ukrainian Hryvnia, Belarusian Rubles and Euro for our operations in Turkey, Ukraine, Belarus, and Germany, respectively. We hold some of our cash portfolio in foreign currency to manage our non-TRY denominated liabilities in Turkey. Additionally, derivative financial instruments such as forward contracts, swap contracts and options are used.

The foreign exchange risks in Turkey as the result of purchases and borrowings in U.S. Dollars and Euros have been manageable, as there is a developed market enabling the hedging of such risk; however, in Belarus and Ukraine, there are no tools to hedge foreign exchange rate risks effectively due to restricted, thin and underdeveloped financial markets. In Belarus, no international bank offers hedging instruments and local banks are too undercapitalized to be able to enter into transactions.

In Ukraine, the only hedging tool seemed to be non-deliverable forwards (NDF) which are cash settled product in U.S. Dollars, a short term forward contract on a non-convertible foreign currency which could not be delivered offshore. However, with the National Bank of Ukraine forbidding any NDF settlement, the already liquidity-thin market has become virtually non-existent. As of 1 March 2019, 30% mandatory sale of incoming payments in foreign currency is in effect replacing the former 50% mandatory FX sale. Additionally, UAH freeze rule in FX purchasing has been abolished by the National Bank of Ukraine (NBU). NBU is expected to relax some of the FX restrictions in 2019. As

of December 31, 2018, with improving outlook for the economy on back of real growth returning to positive territory, IMF financial aid package tranches, fiscal and macro reforms being implemented, downtrend in inflation and build up in FX reserves Ukrainian Hryvnia appreciated against the U.S. Dollar by 1.4% in 2018 compared to 3.2% depreciation in 2017.

In the current economic environment and considering the aforementioned fragile economic conditions, there is a possibility of further devaluations in Ukraine and Belarus.

Our foreign currency risk management policy is focused on hedging foreign currency exposure arising from non-TRY denominated liabilities and purchase commitments. See Item 11. Quantitative and Qualitative Disclosures about Market Risk .

Table of Contents**X. Interest Rate Hedging**

Monitoring and examining financing opportunities to improve our financial flexibility and performance has been a continuous process for us. Depending on the availability in both domestic and international debt/capital markets, we continuously monitor new financing alternatives for contingency purposes as well as to fund potential new investments or acquisitions. We are exposed to interest rate risk as part of our total debt portfolio's dependency on floating rates. We also closely monitor various hedging alternatives to hedge our interest rate risk with interest rate derivatives with a minimum cost. In 2017 and in 2018, a significant portion of our floating FX debt portfolio was hedged and converted to fixed TRY liability through interest rate derivatives.

a. New Accounting Standards Issued

See Note 2 (Basis of preparation and summary of significant accounting policies) of our Consolidated Financial Statements in this annual report on Form 20-F.

5.B Liquidity and Capital Resources**a. Liquidity**

We require significant liquidity to finance capital expenditures for the expansion and improvement of our mobile communications network, for operational capital expenditures, for working capital, and to service our debt obligations. A summary of our consolidated cash flows for the years ended December 31, 2018, 2017 and 2016 is as follows:

	2018	2017	2016
	TRY million		
Net cash generated by operating activities	5,829.9	3,101.3	607.1
Net cash used in investing activities	(4,535.6)	(3,304.6)	(2,976.7)
Net cash generated by/(used in) financing activities	(534.4)	(1,566.7)	4,839.0
Net cash increase/ (decrease) in cash and cash equivalents	759.9	(1,770.1)	2,469.5
Effects of foreign exchange rate fluctuations on cash and cash equivalents	1,947.0	430.1	664.1

Net cash provided by our operating activities was TRY 5,829.9 million in 2018 and TRY 3,101.3 million in 2017.

The increase in profit amounting to TRY 140 million compared to 2017 has a positive impact on net cash generated by operating activities. We consider the subtotal after the adjustments for profit for the period in order to analyze the increase in cash from operating activities. Since these lines are adjusting in nature, they are to be excluded from net cash from operating activities, as they either do not have any effect on net cash from operating activities or they have an offsetting effect on the changes in working capital. As a result, the trend in cash from operating activities should be correlated with the trend in results from operating activities and income tax paid. The corresponding subtotal, after adjustments, increased to TRY 9,876.3 million in 2018 from TRY 6,853 million in 2017. Furthermore, the increase in interest paid to TRY 1,658.3 million in 2018 from TRY 909.9 million in 2017, the increase in changes in receivables from financial operations, the increase in change in trade and other payables, partially netted off with the decrease in changes in trade receivables and income tax paid to TRY 657.7 million in 2018 from TRY 492.5 million in 2017 resulted in a 88.0% increase in net cash provided by our operating activities.

Net cash used by investing activities increased to TRY 4,535.6 million in 2018 from TRY 3,304.6 million in 2017. The change in net cash used by investing activities is mainly due to the increase in acquisition of property, plant and equipment and acquisition of intangible assets. For the year ended December 31, 2018, we spent TRY 2,960.6 million on acquisition of property, plant and equipment compared to TRY 2,937.2 million in 2017 while we spent TRY 2,264.9 million on acquisition of intangible asset compared to TRY 1,172.8 million in 2017.

Net cash used for our financing activities for the year 2018 amounting to TRY 534.4 million, whereas net cash used was TRY 1,566.7 million for 2017. The change is mainly attributable to the proceeds from new loan agreements and issuance of bonds which partially netted off with dividends paid and repayment of borrowings. In 2018, dividend paid amounted to TRY 1,949.4 million, compared to dividend paid in 2017 amounting to TRY 3,050.9 million, with respect to the years ended December 31, 2010, 2011, 2012, 2013, 2014, 2015 and 2016. In addition, we repaid TRY 43,987.1 million of our loans and borrowings in 2018, compared to TRY 22,265.1 million in 2017. The cash generation from the issuance of bonds increased to TRY 2,188.3 million in 2018 from TRY 209.8 million in 2017. The cash generation from issuance of loans and borrowings increased to TRY 44,341.1 million in 2018 compared to TRY 24,102.6 million in 2017.

Net cash provided by our operating activities was TRY 3,101.3 million in 2017 and TRY 607.1 million in 2016.

Table of Contents

The increase in profit amounting to TRY 494 million compared to 2016 has a positive impact on net cash generated by operating activities. We consider the subtotal after the adjustments for profit for the period in order to analyze the increase in cash from operating activities. Since these lines are adjusting in nature, they are to be excluded from net cash from operating activities, as they either do not have any effect on net cash from operating activities or they have an offsetting effect on the changes in working capital. As a result, the trend in cash from operating activities should be correlated with the trend in results from operating activities and income tax paid. The corresponding subtotal, after adjustments, increased to TRY 6,853 million in 2017 from TRY 4,409 million in 2016. Furthermore, the increase in interest paid to TRY 909.9 million in 2017 from TRY 434.5 million in 2016, the increase in changes in receivables from financial operations, the increase in change in trade and other payables, partially netted off with the decrease in changes in trade receivables and income tax paid to TRY 492.5 million in 2017 from TRY 135.9 million in 2016 resulted in a 410.8% increase in net cash provided by our operating activities.

Net cash used by investing activities increased to TRY 3,304.6 million in 2017 from TRY 2,976.7 million in 2016. The change in net cash used by investing activities is mainly due to the increase in capital expenditures. For the year ended December 31, 2017, we spent TRY 2,937.2 million on acquisition of property, plant and equipment compared to TRY 2,572.4 million in 2016 while we spent TRY 1,172.8 million on acquisition of intangible asset compared to TRY 855.1 million in 2016.

Net cash used for our financing activities for the year 2017 amounting to TRY 1,566.7 million, whereas net cash provided was TRY 4,839.0 million for 2016. The change is mainly attributable to the proceeds from new loan agreements and issuance of bonds which partially netted off with dividends paid and repayment of borrowings. In 2017, dividend paid amount was TRY 3,050.9 million, compared to dividend paid in 2016 amounting to TRY 51.4 million, with respect to the years ended December 31, 2010, 2011, 2012, 2013, 2014, 2015 and 2016. In addition, we repaid TRY 22,265.1 million of our loans and borrowings in 2017, compared to TRY 4,932.8 million in 2016. The cash generation from the issuance of bonds increased to TRY 209.8 million in 2017 from TRY 167.5 million in 2016. The cash generation from issuance of loans and borrowings increased to TRY 24,102.6 million in 2017 compared to TRY 9,381.3 million in 2016.

b. Sources of Liquidity

Turkcell had applied to the Capital Markets Board and, on September 15, 2015, obtained its approval of an issuance certificate to issue bonds, commercial paper or any other debentures with an amount of up to \$1 billion (or its equivalent in another currency) to real and legal persons domiciled outside of Turkey through private placement and/or sales to qualified investors without a public offering. In October 2015, Turkcell issued a Eurobond with an aggregate principal amount of \$500 million, 10-year maturity, a redemption date of October 15, 2025 and coupon rate of 5.75% (based on a 5.95% reoffer yield to investors). The bond issuance was completed and the proceeds of the issue were transferred to the Company's account on October 15, 2015 and the notes have since been listed on the official list of the Irish Stock Exchange.

On September 16, 2015, Turkcell signed a club loan facility with a group of international banks with a U.S. Dollar tranche of \$500 million and a Euro tranche of EUR445 million. The facility has a maturity of five years, with semi-annual principal amortization during the last three years of the loan. Interest on the loan is payable quarterly. The facility is unsecured and has an interest rate of 3-month LIBOR/EURIBOR +2.0% per annum. The company fully utilized both tranches in June 2016 and repayments commenced as of June 2018.

On October 23, 2015 we signed two loan agreements with China Development Bank (CDB) for an amount of up to EUR500 million (available for two years), to refinance certain of the Group's existing loans, and for an amount of up to EUR750 million (available for three years), to finance certain of our procurement requirements from Chinese

suppliers in relation to our infrastructure investments. Both loan facilities have a final maturity of 10 years, with semi-annual equal amortization during the last seven years of the loan. The annual interest rate of the loan is EURIBOR +2.20%. As of December 31, 2018 an amount of EUR 500 million (in October 2015) has been utilized whereas an amount of EUR318 million has been utilized out of the EUR 750 million facility. The remaining unutilized portion (of EUR 432million) of the latter facility is available for drawdown until April 22, 2019. On March 5, the scope of the EUR750 million loan facility (of its EUR690 million unutilized portion by then) was expanded. In this respect, in addition to Turkcell Iletisim Hizmetleri A.S., our subsidiaries Superonline Iletisim Hizmetleri A.S., Financell and lifecell LLC will also be able to make drawdowns under the facility. In addition, the amendment authorized the abovementioned borrowers to make drawdowns in US Dollars and Renminbi (CNY) besides the original loan currency of EUR. The respective interest rates for USD and CNY loans were set at LIBOR + 2.22% and 5.51% whilst interest rates for EUR loans remained the same (EURIBOR +2.20%). There have been no changes to maturity and the repayment schedule of the loan.

On March 22, 2018, the Capital Markets Board approved our application with respect to issuing debt instruments with an amount up to US\$750 million or its equivalent in another currency, to be sold in international markets, through private placement and/or sales to qualified investors domiciled outside of Turkey. Following this approval, on April 11, 2018 we issued a Eurobond with an aggregate principal amount of \$500 million with fixed coupon rate of 5.80% per annum (based on a 6.10% reoffer yield) and 10 years maturity.

Table of Contents

Financell has a significant portion in Turkcell group debt balance due to the growing funding requirement of the company that comes from consumer loan growth. Financell mainly relies on bilateral loans from local and international banks. The bank borrowings are in either TRY or hard currencies, which are immediately swapped into TRY liabilities in order not to carry any FX risk. Whenever Financell borrows in USD or EUR, it executes cross currency swap transactions that match the full cashflow of the subject loan during its maturity. One of the major funding sources of Financell is a committed loan agreement entered into with the Bank of China in March 2018 for an amount of EUR 100 million having 3.5 year maturity where semi-annual equal amortizations start at the 18th month and with an interest rate of EURIBOR +1.25%. As of 31 December 2018, EUR40 million of this facility is available for drawdown until April 19, 2019. As of December 31, 2018, Financell's total loan portfolio was TRY 4,096 million, and more than half of this portfolio consists of foreign currency loans (TRY 3,243 million).

In order to diversify its borrowing resources, Financell also resorted to other funding alternatives; as such it applied to the Capital Markets Board of Turkey (CMB) for the issuance of ABS. Following the respective approvals of the CMB, Financell mandated Aktif Yatirim Bankasi A.S. which issued four ABS at a total nominal size of TRY 360 million between April 2017 and December 2018 to qualified investors without public offering where Financell was the originator and the user of funds. TRY 160 million of these issuances were made in 2018 in two transactions.

On December 18, 2017, the Turkcell Board of Directors approved the issuance of management agreement based lease certificates (wakala sukuk) in accordance with capital markets legislation by Turkcell Superonline through an asset leasing company in the domestic market for an amount of up to TRY 300 million and up to 12-month tenor. On January 19, 2018, application for the approval of the issue programme for lease certificates was made to the CMB and the approval was obtained on March 1, 2018. The first issue of TRY 125 million with a 6-month tenor was made on March 22, 2018 and fully matured on September 13, 2018. The second issue of TRY 75 million came on December 13, 2018 with 103-day tenor and the third issue of TRY 100 million followed on February 13, 2019 with 121-day tenor. The issues were conducted to meet the short term funding needs of Superonline and were purchased by domestic institutional investors.

Our borrowings consist of bilateral and club loans from local and international financial institutions, 144A/RegS Eurobonds sold to qualified investors in the international markets and finance lease obligations with either fixed or floating interest rates. A significant portion of our borrowings is utilized to finance our consolidated subsidiaries financing needs and acquisition of GSM licenses. Our loans are denominated in several currencies including U.S. Dollar, BYN, CNY, EUR, UAH or TRY. The floating interest rates vary from LIBOR + 1.25% and LIBOR + 2.22% for the loans denominated in U.S. Dollars. The fixed interest rates vary from 5.75% to 5.80% for the loans denominated in U.S. Dollars, from 0.82% to 3.35% for the loans denominated in EUR, from 12.60% to 27.50% for the loans denominated in TRY, from 21.50% to 22.50% for the loans denominated in UAH, from 12.00% to 16.00% for the loans denominated in BYN, are 5.51% for the loans denominated in CNY. The floating interest rates vary from from LIBOR + 1.00% to LIBOR + 2.22% for the loans denominated in U.S. Dollars, and from EURIBOR + 1.20% and EURIBOR 2.20% for the loans denominated in EUR. Our borrowings are payable over the period from 2019 to 2031.

We also have what we believe to be a strong liquidity position with USD 1.4 billion equivalent of cash in hard currency, which approximately equals our debt repayments (including interest) due in the next two years, amounting to USD 874 million in 2019 and USD 550 million in 2020. Beyond that, we currently have debt repayments (including interest) amounting to USD 203 million for 2021, USD 200 million for 2022 and USD 1,706 million in total between 2023 and 2031.

The ratio of our debt to equity is 126% as of December 31, 2018, compared to 83% as of December 31, 2017. We have been able to maintain our leverage at a satisfactory level and in line with our targets. For more information, see

Note 28 to our Consolidated Financial Statements.

We are continuing our efforts to selectively seek out and evaluate new investment opportunities. These opportunities could include the purchase of licenses and acquisitions in markets inside and outside of Turkey.

Under the current assumptions and circumstances, we expect to generate adequate levels of cash to maintain a positive cash position in the future and to have positive cash flow related to our communications and technology activities in Turkey. According to our current business plan for the operations in Turkey, we believe that we will be able to finance our current operations, capital expenditures, and financing costs and maintain and enhance our network through our operating cash flow existing credit facilities and other available credit lines. However, we continue to experience difficult pricing and competitive conditions in our markets, which we expect will continue. In addition, our working capital requirements may increase should the BRSA increases the maximum number of instalments on mobile phone related loans or due to our entry to the leasing business. The working capital requirements related to terminal financing and bad debt expenses are planned to be managed by our consumer finance company, which commenced operations in 2016. We are also facing increased capital needs to finance our technological and geographic expansion, which may increase our net cash used for investing activities. These pressures have reduced, and may continue to reduce, our liquidity and may lead to an increase in borrowing needs and net cash used by financing activities.

Table of Contents

Our cash outflows through 2019 include potential dividend payments depending on the result of our general assembly meeting, quarterly corporate tax payments, capital expenditures, debt service and working capital needs.

We expect that our total operational capital expenditures as a percentage of revenues in 2019 will be around 16%-18%.

The forward-looking statements made here regarding our liquidity and any other financial results are not a guarantee of performance. They are subject to risks and uncertainties that could cause future activities and results of operations to be different from those set forth in this annual report.

Important factors that may adversely affect our projections include general economic conditions, changes in the competitive environment, legal risks, developments in the domestic and international capital markets, increased investments, changes in telecommunications regulations and mismatches between the currencies in which we generate revenue and hold liquid assets and the currencies in which we incur liquid obligations and debt. See Item 3.D. Risk Factors for a discussion of these and other factors that may affect our projections.

c. Capital Transactions

In 2018, we have entered into buyback transactions on our own shares; please refer to Item 10.B. Share Buy-Backs, as well as Item 16.E.

d. General Economic Conditions

Turkey's economic growth slowed to 2.6% in 2018 from 7.4% in 2017 and it is expected to slow to 2.0% in 2019 mainly due to the tightened financial conditions.

e. Dividend Payments

On March 23, 2016, the Board of Directors proposed a dividend distribution for the year ended December 31, 2015 amounting to TRY 1,200.0 million (equivalent to \$228.1 million as of December 31, 2018), which represented approximately 58% of net distributable income for the relevant year. This dividend proposal was discussed and rejected at the Ordinary General Assembly of Shareholders held on March 29, 2016.

On May 25, 2017, the Company's General Assembly approved the payment of a dividend amounting to TRY 3,000.0 million (equivalent to USD 841.6 million as of May 25, 2017, the date of the Ordinary General Assembly Meeting) out of profits for the period from January 1, 2010 to December 31, 2016. This represents a gross cash dividend of full TRY 1.3636364 (equivalent to full USD 0.3825604 as of May 25, 2017, the date of the Ordinary General Assembly Meeting) per share. The Company paid TRY 3,000.0 million in total including withholding taxes in three installments on 15 June, 15 September and 15 December 2017 to the shareholders.

On March 29, 2018, the Company's General Assembly approved the payment of a dividend amounting to TRY 1,900.0 million (equivalent to USD 475.8 million as of March 29, 2018, the date of the Ordinary General Assembly Meeting) from the net distributable profit for the year ended December 31, 2017. This represents a gross cash dividend of full TRY 0.8636364 (equivalent to full USD 0.2162822 as of March 29, 2018, the date of the Ordinary General Assembly Meeting) per share. The distribution to shareholders was performed in three equal installments that took place on June 18, September 17 and December 17, 2018, respectively.

For additional details regarding our dividend policy, see Item 8.A. Consolidated Statements and Other Financial Information Dividend Policy .

5.C Research and Development, Patents and Licenses, etc.

We own a number of patents, utility models, trademarks and industrial designs.

The activities of our technology center, which houses all of our R&D operations in a single location, include the following:

Partnership software development, customization and/or integration of software products of suppliers through the service and product development processes;

Developing network infrastructure strategies in a fast evolving information-communication technologies world; and

Table of Contents

Designing short and long-term technology road maps for our operations.

5.D Trend Information**a. Changing Subscriber Base and Usage Patterns**

The proportion of postpaid subscribers in our subscriber base in Turkey was 56%, 54% and 53% in 2018, 2017 and 2016, respectively, due to our value focus.

As our market and business strategy evolve, we expect that the percentage of our revenues from mobile data and fixed data will continue to increase with increased smartphone penetration, a larger postpaid subscriber base and a rise in data consumption. For these reasons and with our increased emphasis on OTT services, we also expect that the percentage of our revenues from digital services will also increase. On the other hand, revenues from voice and SMS traffic are expected to continue to decrease as a percentage of our revenues.

b. Regulations affecting our prices

The ICTA has on several occasions intervened to place caps on the tariffs that we charge in the Turkish market. In the past, the ICTA's intervention in our retail voice and SMS prices negatively affected our ability to design and launch campaigns and offers and, consequently, had a negative impact on our business. ICTA removed the regulation on lower limit on on-net retail prices and campaigns. These pricing regulations were valid on all single voice tariffs and campaigns, whereas we were obliged to maintain our minimum on-net SMS rate on network base.

The ICTA has in the past intervened to decrease interconnection rates. With respect to the interconnection rates that we charge, following the ICTA's board resolution dated June 17, 2013, our mobile termination rates were set at TRY 0.0250. In addition, the ICTA with a board resolution dated April 12, 2013, lowered SMS termination rates for Turkcell from TRY 0.0170 to TRY 0.0043. With its latest decision dated October 22, 2014, the ICTA also set the tariff for MMS termination rates for Turkcell at TRY 0.0086.

The table below shows the on-net prices and MTR rates:

TRY	Before July 1, 2013	July 1, 2013 August 16, 2016	As at March 7, 2019
Minimum on-net voice price	0.0313	0.0428	
Minimum on-net SMS price		0.0073	
Voice MTR	0.0313	0.0250	0.0250
SMS MTR	0.0170	0.0250	0.0250

The maximum tariffs set by the ICTA may constitute the highest rates we may charge for the services included in our service packages. Generally, the maximum tariffs set by the ICTA for particular services are set higher than the standard tariffs determined by the ICTA for those services. Such caps were in force until a decision rendered in March 2016 annulled the maximum tariffs. The ICTA took a decision on September 20, 2018, to set the maximum tariffs at 0.5670 TRY/min for voice and 0.4075 TRY for SMS for Turkcell and Vodafone.

The ICTA has in the past intervened and may again intervene, impacting the prices we charge for our tariffs.

Further cuts in interconnection rates may make us redesign our tariffs and may impact our operational results.

The mobile market analysis of ICTA has been finalized. By its Board decision dated April 12, 2017, numbered 2017/DK-SRD/124; ICTA decided to deregulate mobile access and call origination market and to lift Turkcell's Significant Market Power (SMP) status within a transition period of one year. Accordingly, our Company's liabilities such as providing access and interconnection in the call origination market, non-discrimination, transparency, preparation and issuance of reference access tariffs, being subject to tariff control, account separation and cost accounting, and co-location obligations were to be abolished as of April 12, 2018. However, the Mobile Access and Call Origination Market deregulation transition period has been extended until April 12, 2019.

By its Board decision dated April 19, 2017, numbered 2017/DK-SRD/131; the ICTA finalized its Mobile Call Termination market analysis and decided to deregulate SMS and MMS termination services within a transition period of one year, as of April 19, 2018. On the other hand, the Significant Market Power status would continue in the call termination market for mobile operators, operators that offer satellite communications services, and Mobile Virtual Network Operators (MVNO), which could offer call termination services for the incoming calls of their subscribers. Nevertheless, with its decision dated April 12, 2018, the ICTA later cancelled the deregulation of the SMS/MMS Termination Market. As a result, the SMS/MMS termination service will continue within the scope of obligations under the Mobile Call Termination Market Analysis.

Table of Contents***c. Liquidity***

Our activities have traditionally generated a strong positive cash flow. According to our current business plan for the operations in Turkey, we believe that we will be able to finance our current operations, capital expenditures, and debt service and maintain and enhance our network through our operating cash flow, existing committed credit facilities and other available credit lines. However, we continue to experience difficult pricing and competitive conditions in our operating markets, which we expect will continue. In addition, the increase in the volume of assigned contracted receivables may continue to result in higher working capital requirements. The working capital requirements related to terminal financing and bad debt expenses are managed by our consumer finance company, Financell. Following the BRSA's limitation on the number of instalments with regard to consumer loans for handsets and smart devices, we expect that the decrease in demand will continue, and that consequently there will not be any additional working capital need for Financell. Indeed, we expect Financell's indebtedness to continue to decrease throughout 2019, as has been the case since September 2018. We are also facing increased capital needs to finance our technological and geographic expansion, which may increase our net cash used for investing activities. These pressures have reduced, and may continue to reduce, our liquidity and may lead to an increase in borrowing needs and net cash used by financing activities.

We expect that our total operational capital expenditures as a percentage of revenues in 2019 will be around 16%-18%.

The forward-looking statements made here regarding our liquidity and any other financial results are not a guarantee of performance. They are subject to risks and uncertainties that could cause future activities and results of operations to be different from those set forth in this annual report.

Important factors that may adversely affect our projections include general economic conditions, changes in the competitive environment, legal risks, developments in the domestic and international capital markets, increased investments, changes in telecommunications regulations and mismatches between the currencies in which we generate revenue and hold liquid assets and the currencies in which we incur liquid obligations and debt. See Item 3.D. Risk Factors for a discussion of these and other factors that may affect our projections.

d. Currency devaluation and impairments

Our results of operations and the value of certain of our assets have been adversely affected by devaluations in the currencies of certain countries, in particular Ukraine, Belarus, and Turkey in the last few years. The value of the Turkish Lira against USD decreased significantly in 2018, depreciating by 39.5% in 2018 compared to 7.2% in 2017. Ukraine Hryvnia appreciation against USD was 1.4% compared to 3.2% depreciation in 2017. In Belarus, the Belarusian Ruble depreciated 9.5% compared to 0.7% in 2017. Further currency devaluation remains a risk and may continue to have an adverse effect in the future. Furthermore, operational and technological changes, general macroeconomic conditions, legal, regulatory or political obstacles in Ukraine and Belarus may lead to further impairments in the values of certain of our assets in the future.

5.E Off-Balance Sheet Arrangements

Off-balance sheet arrangements refer to any transaction, agreement, or other contractual arrangement involving an unconsolidated entity (other than contingent liabilities arising from litigation, arbitration or regulatory actions) under which a company has:

provided guarantee contracts;

retained or contingent interests in transferred assets;

any obligation under derivative instruments classified as equity; or

any obligation arising out of material variable interests in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to the company, or that engages in leasing, hedging, or research and development arrangements with the company.

Table of Contents**a. Contingent Liabilities**

The following table illustrates our major contingent liabilities as of December 31, 2018.

	Amount of contingent liability expiration per period						
	Total amount committed	Remaining commitment					
		At December 31, 2018	Indefinite*	Less than one year	1-3 years	3-5 years	Over 5 years
TRY million							
Bank Letters of Guarantee	1,541.8	1,541.8	986.5	256.4	117.8	19.6	161.5

* Bank letters of guarantee are not given for a specific period. Most of the guarantees will remain as long as the business relationship with the counterparty continues.

As of December 31, 2018, we are contingently liable in respect of bank letters of guarantee obtained from banks and given to custom authorities, private companies and other public organizations amounting to TRY 1,541.8 million. We also provided guarantees to private companies amounting to TRY 266.4 million.

See Item 5.B. Liquidity and Capital Resources Sources of Liquidity .

5.F Tabular Disclosure of Contractual Obligations

The following tables illustrate our major contractual and commercial obligations and commitments as of December 31, 2018.

Contractual Obligations	Total	Payments due by period			
		Less than 1 year	1-3 years	3-5 years	After 5 years
		(TRY million)			
Loans and borrowings(*)	22,092.6	6,800.8	5,121.1	2,168.6	8,002.1
Lease obligations	2,497.4	646.0	696.5	381.0	773.9
Payable in relation to the acquisition of Belarusian Telecom	526.1			526.1	
Trade and other payables	2,440.3	2,440.3			
Due to related parties	45.3	45.3			
Total Contractual Cash Obligations	27,601.7	9,932.4	5,817.6	3,075.7	8,776.0

* Includes undiscounted interest and bonds issued and excludes finance lease obligations.

Other Commercial Commitments	Total	Amount of Commitment			
		Less than 1 year	1-3 years	3-5 years	After 5 years

(TRY million)

Purchase obligations	1,353.8	1,117.0	115.0	121.8
----------------------	---------	---------	-------	-------

As at December 31, 2018, outstanding purchase commitments with respect to the acquisition of property, plant and equipment, inventory and purchase of sponsorship and advertisement services amounted to TRY1,353.8 million.

To avoid foreign exchange risk, the Company used currency swaps, participating cross currency swap contracts, currency forward contracts and commitments related to those derivative financial liabilities amounted to TRY 165.3 million (Note 34).

Table of Contents**ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES****6.A Directors and Senior Management****I. Board Members**

Under the Turkish Commercial Code and our Articles of Association, the Board of Directors is responsible for our management. Our Articles of Association mandates a Board of Directors containing seven members.

Members of our Board of Directors are generally appointed for a term of three years. However, as the General Assembly could not convene due to the lack of a quorum for meetings, in a series of resolutions in 2013, the CMB appointed new members to our Board, who shall remain members until new members are elected by the General Assembly or until the CMB announces a new resolution. The CMB stepped in based on its statutory authority to take actions *ex officio* where publicly held companies whose shares are traded on the exchange fail to comply with corporate governance principles partially or completely. The CMB with its resolution dated March 11, 2013, announced the replacement of Mehmet Bulent Ergin, Tero Erkki Kivisaari and Oleg Adolfovich Malis on our Board of Directors with three new members, Atilla Koc, Mehmet Hilmi Guler and Ahmet Akca, who serve as independent board members according to article 17/2 of the Capital Markets Law No. 6362. The CMB with its resolutions dated August 15, 2013 and September 13, 2013 announced the appointment of Mehmet Bostan, Bekir Pakdemirli, Jan Erik Rudberg and Erik Jean Christian Antoine Belfrage, as board members who satisfy the independence criteria. The latter two members were chosen from the independent nominees list submitted by Telia Company. They were appointed by the CMB pursuant to sub-paragraph (k) of the first paragraph of article 128 of Capital Markets Law No. 6362, in place of members of our Board of Directors who were elected at the general assembly meeting on April 29, 2010 for a duty period of three years and whose duty periods have expired and whose successors could not be elected at the general assembly meetings. Mr. Ahmet Akca, Mr. Atilla Koc and Mr. Mehmet Hilmi Guler will continue to serve as independent Board Members as per the letter of Capital Markets Board dated March 8, 2019.

At the ordinary general assembly meeting held on March 29, 2018, Mustafa Kiral, Hasan Tuvan Yalim and Ingrid Maria Stenmark were elected as board members in lieu of Jan Erik Rudberg, Erik Jean Christian Antoine Belfrage and Mehmet Bostan respectively for a duty period of three years. After Bekir Pakdemirli resigned from his office as of July 11, 2018 due to his appointment as Minister of Agriculture and Forestry, the Board of Directors functioned with six members until March 7, 2019. On March 7, 2019, with Board of Director's decision, Mr. Bulent Aksu is appointed as a Board Member to the vacant seat, pursuant to Article 363 of the Turkish Commercial Code. On March 8, 2019 Mr. Hasan Tuvan Yalim resigned from his duties and our Company's Board of Directors decided on the same day to appoint Mr. Huseyin Aydin to the seat which became vacant following Mr. Yalim's resignation, pursuant to Article 363 of the Turkish Commercial Code. At the time of this annual report on Form 20-F, Mr. Guler is running for municipal elections which are scheduled to take place on March 31, 2019.

As of March 8, 2019, our Board of Directors had the following members:

Name	Date appointed to the Board of Directors
Ahmet Akca (Chairman)	March 11, 2013
Atilla Koc	March 11, 2013
Mehmet Hilmi Guler	March 11, 2013
Ingrid Maria Stenmark	March 29, 2018
Mustafa Kiral	March 29, 2018
Bulent Aksu	March 7, 2019

Huseyin Aydin

March 8, 2019

II. Executive Officers

We are managed on a day-to-day basis by the Corporate Executive Team with the guidance of the Board of Directors. Officers do not have fixed terms of office. On October 25, 2018, Mr. Osman Yılmaz has been appointed as Chief Financial Officer, and in December 2018, Omer Barbaros Yis was appointed as acting Executive Vice President of Marketing. The following table sets forth the name and office of each member of our Corporate Executive Team as of March 7, 2019.

Name	Office
M u h t e r e m K a a n Terzioglu ⁽¹⁾	Chief Executive Officer
Izzet Serhat Demir	Executive Vice President Legal and Regulation
Osman Yilmaz	Executive Vice President Finance
Murat Erkan ⁽²⁾	Executive Vice President Sales
Seyfettin Saglam	Executive Vice President Human Resources

⁽¹⁾ Muhterem Kaan Terzioglu resigned from his position as Chief Executive Officer effective March 15, 2019.

⁽²⁾ Murat Erkan is the acting Chief Executive Officer effective March 15, 2019. Kadri Ozdal is the acting Executive Vice President of Sales effective March 15, 2019.

Table of Contents

Name	Office
Ilter Terzioglu	Executive Vice President Strategy
Omer Barbaros Yis	Executive Vice President Marketing (Acting)
Serkan Ozturk	Executive Vice President Customer Experience & Information Technologies
Aziz Gediz Sezgin	Executive Vice President Network Technologies
Ali Turk	Executive Vice President Supply Chain Management
Aysem Ertopuz Deobler	Executive Vice President Digital Services & Solutions

III. Biographies**a. Current Board Members**

Ahmet Akca, born in 1956, was appointed to the Board of Directors by Capital Markets Board decision. He also acts as the president of Turkcell's Audit Committee. Since August 2013, he has been serving as the Chairman of the Turkcell Board of Directors. From 1981 to 1988, Mr. Akca served as a Foreign Trade Manager in two reputable companies in glass and food industry. In 1988, he became the CEO of an international trade company, a position he held until 1992. He later started his own business, Akca Lojistik Hizmetleri ve Tic. A.S and Tedarik Lojistik Hizmetleri A.S. which he still runs as the Chairman. Mr. Akca also serves as an independent member at the Board of Directors at BIM A.S. since May 2018. Mr. Akca studied Mathematics at Middle East Technical University and Sociology at Istanbul University for a certain period, and graduated from the Department of Economics at Bursa Economics and Commercial Sciences Academy.

Atilla Koc, born in 1946, was appointed to the Board of Directors by Capital Markets Board decision. He also serves as a member of the Audit Committee of Turkcell's Board of Directors. Having worked as an Undersecretary at the Ministry of Interior, and as Chief of Police in Konya, he served as the District Governor of the Ulubey, Nusaybin and Bayindir districts, and as the Governor of Siirt and Giresun provinces. He has also been the Prime Minister's Undersecretary, the General Secretary of Ankara Metropolitan Municipality, and the Central Governor. Then, Mr. Koc served as AKP Aydin Deputy in the 22nd and 23rd period of the Grand National Assembly of Turkey and as Minister of Culture and Tourism in the 59th Government. Atilla Koc graduated from Ankara University's Faculty of Political Science.

Mehmet Hilmi Guler, born in 1949, was appointed to the Board of Directors by Capital Markets Board decision. He formerly worked as a Project Engineer and Group Chairman at TUSAS Aerospace Industries. Mr. Guler also served as Vice President and Board Member of the Scientific and Technological Research Council of Turkey (TUBITAK), as Chairman and General Manager of the Machines and Chemical Industries Board (MKEK), as the General Manager and Chairman of Etibank, as the Chief Undersecretary to the Prime Minister, and as Board Member and Executive Director at ERDEMIR and IGDAS. Mr. Guler also served as Minister of Energy and Natural Resources in the 58th, 59th and 60th Governments. Mehmet Hilmi Guler graduated from Middle East Technical University's Department of Metallurgical and Materials Engineering where he obtained his Master's and Doctorate degrees.

Ingrid Maria Stenmark, born in 1966, was appointed to the Turkcell Board of Directors by the General Assembly decision in 2018. Ms. Stenmark is responsible for Group Strategy, Enterprise Risk Management, Ethics and Compliance and overseeing Internal Audit at Telia Company. In addition, she has the responsibility for the associate operations in Turkcell and Latvia. Since joining Telia Company in 1994, Ms. Stenmark has held a number of senior positions in the Group, including Head of Group Regulatory affairs, acting General Counsel, and responsible for the associates Turkcell and MegaFon. Ms. Stenmark served as a board member of Kcell and MegaFon. Ms. Stenmark

holds a Master of law from the University of Stockholm.

Mustafa Kiral, born in 1978, was appointed to the Turkcell Board of Directors by the General Assembly decision in 2018. During his career, he served in Altimo, responsible for overseeing mergers and acquisitions. He has advised on some of the company's key deals in recent years. He also served in various offices of McKinsey & Company. Prior to McKinsey, Mr. Kiral was a market maker in the Pacific Stock Exchange in San Francisco, trading technology options. He is currently a Senior Partner at LetterOne Technology in London, UK. Mustafa Kiral received a BS in Mechanical Engineering from the University of Texas at Austin and an MS in Biomedical Engineering from University of California at Berkeley.

Bulent Aksu, born in 1974, was appointed to the Turkcell Board of Directors by the Board of Directors decision in March 2019. Bulent Aksu has 22 years of managerial experience in finance, accounting, tax and management fields in various sectors including telecommunications, energy, petrochemicals, textiles and audit. He began his professional career at Kuveyt Turk's Inspection Board as Auditor, and then he executed at Finance Manager and Group Finance Director positions at Calik Holding in 2003, respectively. He worked as CFO and Board Member at Akfel Group between years 2008-2012. He worked as CFO for Azerbaijani National Oil and Gas Company's (SOCAR) subsidiaries

Table of Contents

Petkim Petrokimya Holding A.S. and STAR Rafineri A.S. respectively between 2012 and 2016. Bulent Aksu served as CFO of Turkcell between July 20, 2016 and July 17, 2018 and was voted among the top 50 most influential CFOs in Turkey by the magazine Fortune Turkey in years 2016 and 2018. Bulent Aksu has taken office as Deputy Minister for the Ministry of Treasury and Finance as of August 3, 2018. He served as Board Member at Turk Telekom between November 2018 – March 2019. Mr. Aksu graduated from Business Administration (English) Department of Istanbul University in 1996.

Huseyin Aydin, born in 1959, was appointed to the Turkcell Board of Directors by the Board of Directors decision in March 2019. Mr. Aydin graduated from the Ankara Academy of Economics and Commercial Sciences (Faculty of Economics) in 1981. He began his career as an Assistant Inspector at Ziraat Bank and served as a Director in various departments at Ziraat Bank until 27 March 2003. After working as an Executive Board member at Halkbank, as a Board member at Pamukbank and as Deputy Chairman at Ziraat Bank, Mr. Aydin worked as the General Manager and Board Member at Halkbank between May 31, 2005 and July 14, 2011. Having joined Ziraat Bank as the CEO on July 15, 2011, Mr. Aydin also serves as the Chairman of the Banks Association of Turkey and Board Member of Turkiye Wealth Fund Management Co.

b. Executive Officers

Muhterem Kaan Terzioglu, born in 1968, was Turkcell's Chief Executive Officer from April 2015 until March 15, 2019, when he resigned from his position. Mr. Terzioglu serves as board member of several international institutions and organizations. He is on the GMSA board, the leading international mobile communication organization, and on advisory board of the World Economic Forum Center for Fourth Industrial Revolution. Mr. Terzioglu also serves as a board member for Turkey's Car Initiative and he assumes the presidency of the Mobile Telecommunications Operators Association (m-TOD). Terzioglu is also on the board of Turkcell Foundation and as well as on the board of the GSMA Foundation focusing on Mobile Communications for Development. Kaan Terzioglu began his professional life in 1990 at Arthur Andersen Turkey. From 1990 to 1998, he undertook several roles on information technologies at Arthur Andersen in the USA, Belgium and Turkey. From 1999 to 2012, he held global managerial roles at the Cisco Systems Brussels office. From 2012 to 2015, Kaan Terzioglu served as member of board of directors at Akbank, Aksigorta A.S., Teknosa Ic ve Dis Ticaret A.S. and Carrefoursa A.S. Kaan Terzioglu graduated from the Department of Business Administration at Bogazici University.

In 2007, he worked at BNP/TEB Treasury Department. From 2008 to 2016, he served as Senior Fund Manager in Structured Products and Group Head of Fixed Income and Multi Asset Funds at HSBC Global Asset Management. In August 2016, he joined Turkcell as Director of Treasury, Risk and Collection Management. Mr. Yilmaz holds a dual BSc degree in Economics and Management from London School of Economics and Istanbul Bilgi University, MSc in Financial Engineering from Bogazici University and a PhD in Finance from Ozyegin University.

Izzet Serhat Demir, born in 1974, joined Turkcell as the Executive Vice President of Legal and Regulation Function in May 2015. Mr. Demir started his professional career in 1997 at Dun & Bradstreet's Turkey office. From 2003 to 2007, he worked at the Legal Department of Yildiz Holding and in 2007 he served as the Legal Counsel at Calik Holding A.S. Between 2009 and 2015, Mr. Demir undertook the role of Legal Affairs Director at Calik Holding, and in the meantime he also served as member of the Board of Directors at holding level and at group companies that operated in telecom and finance fields. Serhat Demir graduated from the Faculty of Law at Istanbul University.

Murat Erkan, born in 1969, joined Turkcell Group in June 2008 as the General Manager of Turkcell Superonline and in December 2015 he was appointed as the Executive Vice President of Sales. Mr. Erkan is the acting Chief Executive

Officer effective March 15, 2019. Mr. Erkan, who started his professional life at Toshiba, worked as an Application Engineer at Biltam Muhendislik and then served as the first System Engineer of Turkey at Cisco Turkey. He served as Chief Officer at Cisco Systems in charge of Technology, Sales, Business Development and Channel Management. As from 2006, Mr. Erkan served as the Business Unit Manager at Aneltech responsible for solutions related to telecommunications, mobile, ICT, defense industry and industrial products sectors. Murat Erkan graduated from the Yildiz Technical University Electronics and Telecommunication Engineering Department. He completed the Strategic Marketing Program at Harvard Business School in 2010.

Kadri Özdal, born in 1974, was appointed as Acting Vice President of Sales on March 15, 2019. He started his professional career at Vodafone in 1999 where he worked in various sales, marketing and commercial operations departments. He later joined Turk Telekom where he worked in sales development, channel optimization and management, and then acted as its Chief Sales Officer from 2011 to 2012. Kadri Özdal also took part in the founding and management of n11.com, one of the largest e-commerce platforms in Turkey, and has also acted as its Chief Sales Officer. In February 2016, he undertook the role of Turkcell's Alternative Sales Channels Director, and subsequently served as Non-Exclusive and Digital Sales Channels Director, and then acted as its Retail Channels Sales Director. He holds a PhD from the Faculty of Economics and Administrative Sciences, Department of Public Administration at Dokuz Eylul University.

Seyfettin Saglam, born in 1971, joined Turkcell in July 2014 and undertook the Chief Officer roles in charge of Procurement, Real Estate and Construction and Human Resources. Mr. Saglam currently serves as the Executive Vice President responsible for Turkcell Group Human Resources. He is also a member of the Board of Directors of PERYON. He started his professional career at MSC Consulting. He held managerial roles at various levels in charge of Human Resources at Tekstilbank, Yildiz Holding, T.C. Ziraat Bankasi, Rixos Hotels & Sembol Insaat A.S. and Borsa Istanbul. Seyfettin Saglam graduated from the Department of Sociology at Middle East Technical University and he received his master's degree from the Marmara University in International Quality Management. He completed the HR Management & Leadership Program at INSEAD and Executive Education Program at Harvard Business School.

Table of Contents

Iter Terzioglu, born in 1966, joined Turkcell in 2003 as Business Strategies, Regulation and Risk Consolidation Division Head. In October 2015, he was appointed as the Executive Vice President of Strategy. Prior to this appointment, he served as Senior Vice President of International Business under the Strategy Function. Previously at Turkcell, he undertook the roles of acting Chief of International Business, Chief Strategic Projects Officer and Chief Network Operations Officer. He also had worked as Assistant General Manager at Turkcell Group companies, including Show TV and Superonline. He had worked for Ericsson Turkey as the Assistant General Manager responsible for Turkcell between 1994 and 2002. He graduated from Istanbul University Department of Econometrics.

Omer Barbaros Yis, born in 1980, joined Turkcell in 2017. Mr. Yis continues to serve as Consumer Marketing Director after holding Strategic and Focused Marketing Director role. Omer Barbaros Yis was appointed as acting Executive Vice President of Marketing on December 18, 2018, in addition to his existing role in Turkcell. Having started his career in 2006 as Corporate and Consumer Pricing Specialist in Turkcell, he held various Senior Product Manager roles in the marketing department. From 2010 to 2013, he continued his career as the Global Telecom Industry Director in Peppers & Rogers Group. In 2013, he served as Existing Customer Management Director, Premium Segment Customer Management Director and Fixed Products Revenue Management Director at Turk Telekom. Omer Barbaros Yis graduated from Koc University with a double major in Business Administration and Economics and received his master's degree in Economics from Universitat Autònoma de Barcelona.

Serkan Ozturk, born in 1976, joined Turkcell in 2000 as a Project Supervisor. In August 2017, he was appointed as the Executive Vice President of Customer Experience and Information Technologies. Previously, he worked as project supervisor and manager at Turkcell Project Management office between 2000 and 2009. He served as Chief Information Technologies Officer in life-Ukraine between 2009 and 2010 and in Turkcell Superonline between 2010 and 2011. From 2011 to 2015 he served as Turkcell Customer Relations Management and Business Intelligence Solutions (CRM & BIS) Director. Prior his to his last appointment, he was Executive Vice President of Information and Communication Technologies. Serkan Ozturk graduated from Middle East Technical University Electrical and Electronics Engineering department. He received his MBA degree from Istanbul University.

Aziz Gediz Sezgin, born in 1966, joined Turkcell as Network Engineer in 1995. In October 2015, he was appointed as the Executive Vice President of Network Technologies. Previously, he served as Senior Vice President of Information and Communication Technologies, Chief Information and Communication Technologies Officer, Director of Application Operations, Director of Service Network under the ICT Function and held various executive positions in the Technology Function. Mr. Sezgin started his career at Alcatel Teletas in 1991. He graduated from Istanbul Technical University Electronics and Communication Engineering Department and received his Master's degree from the same university.

Ali Turk, born in 1977, joined Turkcell as the Senior Vice President of Supply Chain Management in May 2016. He was appointed as the Executive Vice President of Supply Chain Management in March 2017. Mr. Turk started his career at Basak Hayat Sigorta in 1999. From 2002 to 2007, he held various managerial positions responsible for logistics planning, warehouse and supply chain management processes at Ulker Group. From 2007 to 2011, he worked at Ceva Lojistik as Warehouse and Value Added Operations Group Manager. Mr. Turk joined Turkish Airlines in 2011 as Cargo Operations Vice President. He was appointed as Turkish Airlines Cargo Operations President in 2012. Ali Turk graduated from Istanbul Technical University Industrial Engineering Department and completed Executive MBA program of Istanbul Technical University.

Aysem Ertopuz Deobler, born in 1970, joined Turkcell in January 2016 as Strategic Planning Director. In November 2016, she was appointed as the Executive Vice President of Digital Services and Solutions. She started her career in 1993 at Arcelik A.S. as Quality System Engineer. She served as Strategic Consultancy Services Manager at Arthur Andersen in 1997. Joining Cisco's EMEA Region Organization in 2001 in Belgium, Aysem Ertopuz took managerial

roles in several functions including Strategic Planning, Business Intelligence, Operations and Global Customer Management. She served as the manager of Business Intelligence Group within Cisco's New York based Global Sales Strategy and Planning organization between 2006 and 2015, focusing on the fields of service providers sector, market and competition dynamics, business strategy and performance, utilization of digital services in new business models. Aysem Ertopuz graduated from Middle East Technical University Industrial Engineering Department and received her MBA degree from New York University, Stern School of Business.

6.B Compensation

The compensation paid to members of the Board of Directors for their service on the Board is approved by the shareholders at the ordinary general assembly each year. In accordance with the Company's corporate governance practices, the Board, although it has no final authority on remuneration, upon the recommendation of the Compensation Committee may decide on a proposal to the General Assembly as to whether Board members will be remunerated, and if

Table of Contents

such is the case, the form and amount of compensation to be paid to the Board members. At our Annual General Assembly held on April 29, 2010, it was decided that our Chairman would receive a net sum of EUR250,000 per year and each Board member would receive a net sum of EUR100,000 per year for the period of their service, effective February 25, 2010.

For the year ended December 31, 2018, we provided, paid and accrued an aggregate of TRY 93.2 million to our key management personnel including: indemnities, salaries, bonuses and other benefits. There was no deferred or contingent compensation accrued for the year payable to executive officers and members of the Board of Directors other than that already included in the TRY 93.2 million. A cash-settled long-term incentive plan offered to the management of Turkcell and group companies was introduced January 2016 and as of December 31, 2018, the Group recognized expenses of TRY 26.2 million regarding this plan compared to TRY 29.4 million in 2017. We have Directors and Officers Liability Insurance that covers our directors and officers from liabilities that arise in connection with performing their duties and our liabilities in connection with our directors and officers performance of their duties. The coverage amount is \$315 million, and there are a number of insurers, each covering a different layer of the policy. Directors and Officers Liability insurance is provided by Ak Sigorta A.S., an insurance company in Turkey, whereas reinsurance protection is provided by London-based markets. The policy expired on September 2, 2018, and we renewed its insurance limit based on the terms and conditions offered until October 1, 2019.

6.C Board Practices

Under Turkish Commercial Code and our Articles of Association, our Board of Directors is responsible for our management. The Articles of Association provide for a Board of Directors consisting of seven members; however within his term of duty one of the members appointed by CMB, Mr. Bekir Pakdemirli, resigned on July 11, 2018; therefore our board of directors served with six members until the appointment of Mr. Bulent Aksu as a Board Member to the seat which had become vacant following Mr. Bekir Pakdemirli's resignation, by the Board of Directors pursuant to Article 363 of the Turkish Commercial Code. On March 8, 2019 Mr. Hasan Tuvan Yalim resigned from his duties and our Company's Board of Directors decided on the same day to appoint Mr. Huseyin Aydin to the seat which became vacant following Mr. Yalim's resignation, pursuant to Article 363 of the Turkish Commercial Code. Members of our Board of Directors are generally appointed for a term of three years. However, in a series of resolutions in 2013, the CMB appointed new members to our Board, who shall remain members until new members are elected or until the CMB announces a new resolution. Mr. Ahmet Akca, Mr. Atilla Koc and Mr. Mehmet Hilmi Guler will continue to serve as independent Board Members as per the letter of Capital Markets Board dated March 8, 2019.

For more information on our directors and the period during which each director has served on the board, see Item 6.A. Directors and Senior Management .

Committees of the Board of Directors**a. The Audit Committee**

We are required under Turkish laws and regulations, U.S. securities laws and regulations and the rules of the New York Stock Exchange (NYSE) to have an Audit Committee of the Board of Directors appointed from among the independent members of the Board of Directors. Our Audit Committee currently has three members: Mr. Ahmet Akca, Mr. Mehmet Hilmi Guler and Mr. Atilla Koc. Mr. Akca is the Chairman of the Audit Committee. All of the members are considered independent under the U.S. Sarbanes-Oxley Act of 2002, the rules promulgated thereunder by the U.S. Securities and Exchange Commission, the applicable rules of the NYSE and the CMB Corporate Governance Principles. Mr. Ahmet Akca, Mr. Mehmet Hilmi Guler and Mr. Atilla Koc are relying on Rule 10A-3(b)(1)(iv)(B).

Similar to the Swiss Code, board committees in Turkish law merely have a decision-shaping , rather than decision-taking role. Additionally, as per a decision of the Board of Directors, the responsibility of the Audit Committee members is also considered as a joint responsibility of all Board members.

The principal duties of the Audit Committee include the following:

assisting the board s oversight of the quality and integrity of our financial statements and related disclosure;

overseeing the implementation and efficiency of our accounting system;

pre-approving the appointment of and services to be provided by our independent auditors;

preparing and monitoring the agreement between us and the independent auditor and overseeing the performance and efficiency of our independent audit system and internal audit mechanisms; and

Table of Contents

establishing procedures for the receipt, retention and treatment of complaints regarding accounting, internal accounting control systems or auditing matters and establishing procedures for the confidential, anonymous submission by our employees of concerns regarding questionable accounting or auditing matters.

b. The Corporate Governance Committee

The Corporate Governance Committee, based on the CMB's corporate governance principles, mainly assists the Board of Directors with the development and implementation of our corporate governance principles and presents if needed to the Board of Directors remedial proposals to that end. Duties and working principles of the Corporate Governance Committee are determined within the framework of the regulations, provisions and principles in the Turkish Commercial Code, Capital Market Law, Articles of Association of the Company and Capital Market Board's Corporate Governance Principles. In the relations between the Company and our shareholders, the Committee assists the Board. To that end, it oversees the investor relations activities.

The current members are Mr. Mehmet Hilmi Guler, Ms. Ingrid Maria Stenmark and Mr. Zeynel Korhan Bilek, Treasury and Capital Markets Management Director, and Mr. Emre Alpman, Corporate Governance & Anti-corruption Program Officer. Mr. Guler is the Chairman of the Corporate Governance Committee. Mr. Zeynel Korhan Bilek and Mr. Emre Alpman were appointed members of the Corporate Governance Committee by a CMB communiqué requirement and they were appointed on November 2, 2016 and January 23, 2017 respectively.

c. The Candidate Nomination Committee

On April 27, 2012, the Candidate Nomination Committee was established in accordance with the CMB corporate governance principles to perform independent board member candidate nomination and performance assessment processes. The current members are Mr. Ahmet Akca, Mr. Mehmet Hilmi Guler and Mr. Atilla Koc. Mr. Akca is the Chairman of the Candidate Nomination Committee.

d. The Compensation Committee

On December 19, 2012, in conformity with the CMB corporate governance principles, our Board established a Compensation Committee to operate under our Board of Directors. The current members are Mr. Atilla Koc, Mr. Mehmet Hilmi Guler and Mr. Mustafa Kiral. Mr. Koc is the Chairman of the Compensation Committee. The Board also adopted the Compensation Committee's Charter and approved that the Compensation Committee shall execute the duties relating to compensation issues which were earlier granted to the Corporate Governance Committee by the Corporate Governance Committee Charter and the Compensation Committee shall be authorized in lieu of the Corporate Governance Committee in Total Remuneration Policy for the Board of Directors and Top Executives adopted by our Board. The Committee determines the remuneration principles that apply to the Board members and senior management taking into account the long-term strategic goals of the Company. It sets out the remuneration criteria for the Board members and senior management's performance and makes compensation recommendations to the Board.

e. The Early Detection of Risks Committee

The Early Detection of Risks Committee has been established in conformity both with the new Turkish Commercial Code and CMB corporate governance principles to assist the Board in early detection of risks that may jeopardize the Company's existence, development and continuation, and to assist the Board in taking the necessary measures and remedial actions to manage such risks. Following the resignation of Mr. Hasan Tuvan Yalim on March 8, 2019, Mr. Mehmet Hilmi Guler is the only member and the Chairman of the Early Detection of Risks Committee.

On January 28, 2016 the Board has adopted new charters relating to all of the above mentioned committees.

6.D Employees

From our formation in 1993, we have grown from approximately 90 employees to 20,120 employees as of December 31, 2018. Due to our customer growth and the increasing need for competent employees, we focus on the quality of our recruitment. The following table sets forth the number of employees by activity employed by us at December 31, 2018, 2017 and 2016.

Table of Contents

- (1) As of September 2017, Customer Experience and Information & Communication Technologies consolidated as Customer Experience & Information Technologies
- (2) As of February 2017, Business Support function is reorganized as Human Resources and Supply Chain Management
- (3) As of March 2017, Technology Group function is reorganized as Network Technologies and Information and Communication Technologies
- (4) Others include the following subsidiaries: Inteltek, Global Tower, Uktower, Turkcell Satis, Turkcell Odeme, Turkcell Enerji and Lifetech LLC.

We remain confident that high levels of subscriber satisfaction will be possible with continued investment in our people. To that end we continue to strive to attract the best talent in the market.

We are able to recruit highly qualified employees due to our leader position in the Turkish mobile communication market and our strong corporate identity. Stringent hiring and training standards have resulted in a professional

organization with high-caliber employees within a challenging workplace.

With regard to employee compensation and benefits, the major principles of our policy are to preserve internal equity and external competitiveness and reflect individual performance in compensation packages.

Significant factors involved in the process of determining compensation and benefits for our employees are our grading structure (based on the Hay Grading system), market movement data and individual performance.

Starting as of the fourth quarter in 2018, we make salary adjustments quarterly, reflecting the period inflation. Principal factors in salary adjustments are market movements and economic indicators (e.g., the rate of inflation). We pay performance bonuses quarterly to sales employees and annually to all other employees in accordance with individual and company performance results. Our performance evaluation system evaluates the whole year performance of our employees through target setting-based on strategic objectives and 360-degree evaluation. Benefits packages are designed in line with the local market practice and linked to grade bands/levels where the benefits package improves as the grade band/level increases. We run a flexible benefits plan that allows our employees to select from a pool of choices

Table of Contents

that suit them such as several shopping and travel vouchers, allowance for children and payment to the Defined Contribution Plan (the DCP). The DCP is a voluntary pension system in which we and the employee make equal contributions. After a vesting period of three years, the employee gets ownership of the contribution we made. The DCP covers all employees who have been working with us for a minimum of six months.

Starting from January 2016, we have launched a long-term incentive plan offered to the management of Turkcell and group companies. This plan aims to build a common interest with shareholders, support sustainable success, and ensure loyalty of key employees. The long-term incentive plan is subject to company performance measures and linked to our share price performance. The key performance indicators of the plan are; the total shareholder return in excess of weighted average cost of capital (WACC), and ranking of total shareholder return in comparison with the BIST 30 and peer group. The bonus amount is determined according to these evaluations, and it is distributed over a three-year payment plan. Accordingly, for 2017, the senior management and those employees who are covered as part of this plan were paid the cash equivalent of 2,065,490 shares in total in March 2018 as the first installment. The second installment was paid the cash equivalent of 1,836,740 shares in total in February 2019. The remaining third installment will be paid in 2020, respectively, again in cash equivalents of the same number of shares subject to accomplishment of certain conditions.

Each of our employees undergoes an orientation program incorporating classroom training and e-learning training. The training provides employees with information concerning corporate culture and ethics, an introduction to our services, basic mobile communications knowledge and functions of departments. Each employee has the opportunity to participate in the individual, organizational, functional and managerial development programs after regular analyses of his or her training needs. In addition, each employee receives specific training for his or her particular job.

Our employees are not members of any union, and there is no collective bargaining agreement with our employees. We have not experienced any work stoppages.

6.E Share Ownership

Based on reporting made to us on March 15, 2019, we believe that the aggregate amount of shares owned by our Board members and senior officers at such time was 72,540 ordinary shares. No individual Board member or senior officer owned 1% or more of our outstanding shares.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS**7.A Major Shareholders**

The following table sets forth our major shareholders' ordinary share ownership representing 51.05% of our company's capital. This information is current as of March 7, 2019, based on the information provided by Central Securities Depository of Turkey and company share register. Our shareholders do not have different voting rights.

Name and Address of Owner	Nominal TRY Value of Shares Owned	Percent of Class
Turkcell Holding A.S. ⁽¹⁾ Buyukdere Cad. Yapi Kredi Plaza	1,122,000,000.238	51.00%

A Blok Kat: 15 34330, Levent, Istanbul, Turkey		
Cukurova Holding A.S.	995,509.429	0.05%
Buyukdere Cad. Yapi Kredi Plaza A Blok Kat: 15 34330, Levent, Istanbul, Turkey		
Shares Publicly Held⁽²⁾	1,077,004,490.333	48.95%
Total	2,200,000,000	100%

- (1) 52.91% of Turkcell Holding A.S. shares are owned by Cukurova Telecom Holdings Limited, and the remaining shares are owned by TeliaSonera Finland Oyj. 51% of Cukurova Telecom Holdings Limited's shares are owned by Cukurova Finance International Limited and 49% are owned by Alfa Telecom Turkey Limited. For more information, see Item 3.D Risk Factors Turkcell's complex ownership structure and ongoing disagreements among our main shareholders have adversely impacted and may continue to impact decision-making on important matters. These ongoing disputes may lead to further regulatory or legal actions, and affect the ownership and control of our company .

Table of Contents

(2) We calculate shares publicly held by deducting from total shares outstanding those shareholders named above. However, a different level of shares publicly held is arrived at when calculating according to Turkish regulations, see Free Float Definition Rules in Item 10.B. Memorandum and Articles of Association Capital Structure Free Float Definition Rules . According to an announcement made by Silchester International Investors LLP on Borsa Istanbul s Public Disclosure Platform on October 6, 2017, it held 5.03% of our publicly held shares. As of March 7, 2019, we do not have further information about the shareholding status of Silchester International Investors LLP.

As of March 7, 2019, Turkcell had 71,618,752 ADRs outstanding held by 57 registered ADR holders. To the best of our knowledge, as of December 31, 2018, in accordance with the loan agreements signed between our shareholders and various banks, 0.05% of shares having a nominal value of TRY 999,509 have been pledged by our shareholders as security in favor of such banks.

On December 6 and 7, 2016, Sonera Holding B.V. registered 287,632,179.557 shares through the Central Securities Depository of Turkey. These shares are classified as publicly held shares of the Company. On May 10, 2017 and September 21, 2017, Sonera Holding B.V. disclosed that transaction of selling these shares had been performed and their shares under the free float remained at a nominal value of TRY 1.604. Sonera Holding B.V. is no longer listed as an ordinary shareholder.

7.B Related Party Transactions

We have entered into agreements with our executive officers and with several of our current and former shareholders or affiliates of shareholders. We believe that all of such agreements are on terms that are comparable to those that would be available in transactions with unrelated parties. Our policy is to seek price quotes for services and goods we purchase and select the most favorable price. Additionally, our Board has adopted the Rules to be Applied to Related Parties in Purchasing/Selling Assets and Services along with Transfers of Liabilities to be applied by the relevant employees within the company and its group companies on November 24, 2014. For a discussion of our Related Party Transactions for fiscal year 2018, see Note 38 to our Consolidated Financial Statements.

7.C Interests of Experts and Counsel

Not Applicable.

ITEM 8. FINANCIAL INFORMATION

8.A Consolidated Statements and Other Financial Information

Audited Consolidated Financial Statements as of December 31, 2018, 2017 and 2016, and for each of the years in the three-year period ended December 31, 2018, are included in Item 18. Financial Statements .

Our Company s Board of Directors decided to appoint PwC Bagimsiz Denetim ve Serbest Muhasebeci Mali Musavirlik A.S. (PwC Turkey) as the independent audit firm to audit our consolidated financial statements for the year 2018. The decision was approved by our shareholders at the Annual General Assembly Meeting of our Company on March 29, 2018.

I. Legal Proceedings

For a discussion of the various claims and legal actions in which we are involved, see Note 37 (Commitments and Contingencies) to our Consolidated Financial Statements in this annual report on Form 20-F. This includes disputes with the Turkish Treasury, the Ministry of Transport and Infrastructure (formerly known as the Ministry of Transport, Maritime Affairs and Communications) and the ICTA on Treasury Share amounts payable by us; a dispute with the Turkish tax authorities regarding Special Communication Tax, an ICTA investigation on subscription numbers as they relate to the calculation of radio utilization and usage fees, a Competition Board investigation alleging abuse of market position; as well as various other matters.

II. Dividend Policy

The 2016 General Assembly Meeting was held on May 25, 2017 and during the meeting, a dividend distribution for the year 2010-2016 was proposed by Turkcell Holding A.S., amounting to TRY 3,000.0 million, which represented approximately 52.6% of distributable net income for the relevant years. This distribution approved to be conducted in three equal installments on June 15, 2017, September 15, 2017 and December 15, 2017 and all installments were paid as of December 2017.

Table of Contents

On March 29, 2018, the Company's General Assembly approved the payment of a dividend amounting to TRY 1,900.0 million (equivalent to USD 475.8 million as of March 29, 2018, the date of the Ordinary General Assembly Meeting) from the net distributable profit for the year ended December 31, 2017. This represents a gross cash dividend of full TRY 0.8636364 (equivalent to full USD 0.2162822 as of March 29, 2018, the date of the Ordinary General Assembly Meeting) per share. The distribution to shareholders was performed in three equal installments that took place on June 18, September 17 and December 17, 2018, respectively.

We have adopted a dividend policy, which is included in our Corporate Governance Guidelines. As adopted, our general dividend policy is to pay dividends to shareholders with due regard to trends in our operating performance, financial condition and other factors. Since 2004, the Board of Directors has endeavored to distribute cash dividends of at least 50% of our distributable net profits per fiscal year, although the payment of dividends remains subject to our cash flow requirements, applicable Turkish laws and the approval of, or amendment by, the Board of Directors and the General Assembly of Shareholders.

In order to comply with the CMB's Communiqué on Dividends II-19.1 dated January 23, 2014, the Turkcell Board of Directors amended its dividend distribution policy proposal in February 2014, as stated below, which was approved by the Ordinary General Assembly held on March 26, 2015:

The Company shall target a dividend payout of at least 50% of its distributable net income as cash. This policy will be subject to the Company's cash projections, business outlook, investment plans and capital market conditions. The actual dividend decision will be made for each fiscal year separately with the approval of the General Assembly of Shareholders. Dividend distribution shall be started on a date to be determined by the General Assembly of Shareholders which shall not be later than the end of the year in which the General Assembly convenes. The Company, in accordance with laws and regulations, may consider distributing advance dividends or making the dividend payment in equal or unequal installments.

Additionally, in order to create added value for its shareholders, the Company may also consider share repurchase programs depending on the conditions set forth above and applicable regulation.

In accordance with Turkish law, the distribution of profits and the payment of an annual dividend with respect to the preceding financial year are subject to a recommendation which may be made by the Board of Directors each year for approval by the shareholders at the annual general assembly. The Board may decide whether or not to recommend a distribution of profits together with the amount of dividends, and the shareholders, through the general assembly, may accept, amend or reject such proposal, if any. Dividends are payable on a date proposed by the Board of Directors and determined at the general assembly of shareholders, which date, under the CMB requirements, must be earlier than the end of the financial year in which the general assembly decides on dividend distribution. However, the CMB is authorized to designate another deadline for distribution of dividends in any given year.

Annual profits are calculated and distributed in accordance with our Articles of Association after deduction from our annual revenues of all expenses, depreciation, taxes, required reserves and any losses from the previous years.

Pursuant to CMB regulations, dividend distributions of publicly held companies are regulated as follows.

From the distributable net dividend calculated as per the CMB's regulations, the entire amount calculated according to the CMB regulations regarding the requirement of minimum dividend distribution shall be distributed in the event such amount can be covered by the distributable net dividend in the statutory records. In the event the entire amount cannot be covered by the distributable net dividend in the statutory records, the total distributable net dividend in the statutory records shall be distributed. In the event there is net loss in the financial statements prepared as per the CMB

regulations or statutory records, there shall be no dividend distribution.

The new Capital Markets Law, which came into force on December 30, 2012, stipulates that public companies shall distribute dividends in line with their dividend policy determined by their general assembly and in conformity with the relevant legislation. However, the new law entitles the Board to regulate dividends. The CMB also published a Communiqué on Dividends (II-19.1) on January 23, 2014 which entered into force on February 1, 2014. Within the scope of the Communiqué, companies shall distribute dividends through a general assembly resolution in accordance with current legislation and the policies of the company. As per the Communiqué, dividends may be distributed in installments in case a general assembly resolution is adopted in this regard. The Communiqué also sets out the principles and procedures for the distribution of dividends. This new Communiqué revoked the Communiqué on the Principles Regarding the Distribution of Dividends and Interim Dividends to be Followed by Publicly Held Joint Stock Companies subject to the Capital Markets Law Serial: IV No: 27, dated November 13, 2001.

Table of Contents

To the extent we declare dividends in the future, we will pay those dividends in Turkish Lira. In the case of ordinary shares held in the form of ADSs, dividends will be converted into U.S. Dollars by the depositary for the ADSs, to the extent it can do so on a reasonable basis, and will be distributed to the holders of the ADSs. Because exchange rates between the Turkish Lira and the U.S. Dollar fluctuate continuously, a holder of ADSs will be subject to currency fluctuation generally, but particularly between the date on which dividends are declared and the date dividends are paid. Under current Turkish regulations, dividends or other distributions paid in respect of the ordinary shares or ADSs generally will be subject to withholding taxes. See Item 10E. Taxation .

8.B Significant Changes

Not applicable.

ITEM 9. THE OFFER AND LISTING

9.A Offer and Listing Details

Our capital consists of ordinary shares. Pursuant to an amendment in Turkish Capital Markets Law and a communiqué issued by the CMB, our shares traded on the Borsa Istanbul were dematerialized as of November 2005. For detailed information on the dematerialization of our shares, see Item 10.B. Memorandum and Articles of Association Transfer of Shares .

Our ordinary shares are traded on the Borsa Istanbul under the symbol TCELL and our ADSs are traded on the NYSE under the symbol TKC . Currently two ADSs represent five of our ordinary shares. Our ADSs are evidenced by American Depositary Receipts (ADRs). On July 6, 2011, we signed an amended and restated Deposit Agreement (the Deposit Agreement) with Citibank N.A. (Citibank), as depositary (the Depositary), Turkcell and holders of ADRs which transferred our ADR program from JPMorgan Chase Bank to Citibank.

Since January 1, 2006, capital gains realized without meeting a one-year holding period are subject to a withholding tax in Turkey. On July 7, 2006, a provision was added to article 1/a of Code 5527 stating that foreign-based taxpayers, natural persons and corporations are subject to 0% tax. See Item 10E. Taxation .

9.B Plan of Distribution

Not applicable.

9.C Markets

Our ADSs are traded on the NYSE under the symbol TKC and our ordinary shares are traded on the Borsa Istanbul under the symbol TCELL .

ITEM 10. ADDITIONAL INFORMATION

10.A Share Capital

Not applicable.

Table of Contents

10.B Memorandum and Articles of Association

I. General

We are registered in the Istanbul Trade Registry under number 304844. Pursuant to Article 3 of our Articles of Association, as amended on January 30, 2009, at the Extraordinary General Assembly, we are incorporated primarily for the provision of any telephone, telecommunication and similar services in compliance with the Telegraph and Telephone Law numbered 406 and services stated in the GSM Pan Europe Mobile Telephone System bid that was signed with the Turkish Ministry and to operate within the authorization regarding the IMT-2000/UMTS services and the infrastructure.

II. Board Members

a. General

According to our Articles of Association, the Board of Directors is comprised of seven members elected by the general assembly. An increase in the number of members of the Board of Directors must be approved by the general assembly. However, in a series of resolutions in 2013, the CMB appointed new members to our Board, who shall remain members until new members are elected or until the CMB announces a new resolution. With the new Turkish Commercial Code Act number 6102 (TCC), which came into force on July 1, 2012, the requirement of having a share of company in order to become a member of Board of Directors has been abolished. The individuals who do not have any shares in the company have been provided an opportunity to be elected as members of the Board of Directors and carry out such duty. Additionally, the TCC mandated that the Board members who have been elected as a representative of a legal entity be required to resign and that the new Board members (as individuals or representatives of the legal entity) be required to be appointed in their place until October 1, 2012 at the latest.

The TCC does not require a Board member to be a Turkish citizen. There is no minimum age for the directors, provided that a Board member has reached the age of majority, which is 18, and there is no mandatory retirement age under applicable law. The conditions to be a Board member are regulated by the new TCC and the conditions to be an independent board member are regulated by the related CMB legislation.

b. Board Members Interest

The TCC forbids a Board member to enter into a transaction with us in any area relating to business, either on the Board member's own behalf or on behalf of someone else, thus preventing the abuse of duty by Board members and protecting our interests (TCC Article 395) without the authorization of the general assembly. Our general assembly may authorize our Board members to enter into these types of transactions through a specific provision in our Articles of Association, or our general assembly may grant such a right on a yearly basis.

Interested Board members cannot participate in and sign such resolutions. If we suffer any loss because of a Board member's failure to raise such an issue, the Board member shall be held liable to compensate us for the loss incurred due to such matters related to relatives.

Under TCC Article 396, without the authorization of the general assembly, the Board members are barred from participating in similar commercial activities outside our Company. Board members cannot become shareholders with unlimited liability or become Board members of companies active in similar types of business. A specific provision in our Articles of Association or our general assembly may grant such a right on a yearly basis.

Furthermore, based on the Corporate Governance Communiqué numbered II-17.1, which was published in the Official Gazette dated January 3, 2014, replacing the previous regulatory framework, in cases where shareholders having a management control, members of the board of directors, managers with administrative liability and their spouses, or relatives by blood or marriage up to second degree, conduct a significant transaction with the company or its subsidiaries which may cause a conflict of interest, and/or conduct a transaction on behalf of themselves or a third party, which is in the field of activity of the company or its subsidiaries, or become an unlimited shareholder to a corporation which operates in the same field of activity as the company or its subsidiaries, such transactions need to be included in the general assembly agenda as a separate item for providing detailed information at the general assembly meeting on the matter and need to be recorded in the minutes of the meeting.

c. Compensation

Any remuneration payable to Board members in relation to their Turkcell board membership shall be determined by our general assembly. The Board of Directors has no authority to determine such remuneration. At our Annual General Assembly held on April 29, 2010, it was decided that our Chairman would receive a net sum of EUR250,000 per year and each Board member would receive a net sum of EUR100,000 per year for the period of their service, effective February 25, 2010.

Table of Contents

According to a CMB Communiqué Serial: IV, No: 56 Concerning the Establishment and Implementation of the Corporate Governance Principles, which was published in the Official Gazette dated December 30, 2011, a written Remuneration Policy for Board members and senior management was prepared. This Policy was posted on the company's website and submitted at the Annual General Assembly as a separate agenda item for information. The Corporate Governance Communiqué numbered II-17.1, which was published in the Official Gazette dated January 3, 2014 and replaced the Communiqué Serial: IV, No: 56, kept this requirement as a mandatory corporate governance principle dealing with Financial Rights of Board Members and Executives Having Administrative Responsibility. The Annual General Assembly meeting of our Company pertaining to the years 2010, 2011, 2012, 2013 and 2014 has been convened on March 26, 2015, for the year 2015 has been convened on March 29, 2016, for the year 2016 has been convened on May 25, 2017 and for the year 2017 has been convened on March 29, 2018. The same item was on the agenda for the Annual General Assembly meeting held in 2018 and shareholders have been informed; however there was no proposal on the remuneration and therefore no voting took place. Payment plans such as stock options or those based on company performance are not used in the remuneration of independent Board members. Remuneration of independent board members must safeguard the independency level.

d. Borrowing Power

To the extent the relevant provisions of Turkish law allow, the Board of Directors of our Company is the body entitled to, directly or through representatives authorized by the Board of Directors, resolve to exercise our powers to borrow money or give any form of guarantee or surety relating to our or any third party's obligations. The CMB adopted a rule on September 9, 2009, which was announced in its weekly bulletin in connection with credit extensions, that public companies can provide guarantees or pledges, including mortgages, to third parties, provided such third party (i) is fully consolidated in the company's financial statements or (ii) the ordinary business operations of the company directly requires providing guarantees, pledges or mortgages. At the Ordinary General Assembly held on April 29, 2010, Article 3 entitled Purpose and Subject Matter of Turkcell's Articles of Association was amended in line with CMB's rule dated September 9, 2009. Under our Articles of Association, our Board of Directors is authorized to issue debentures and other securities subject to the TCC, Turkish Capital Markets Law and other relevant legislation. Under Turkish Capital Markets Law, the total value of capital market instruments shall not exceed the amount specified by the CMB, for each type of instrument. However, as a general rule, the total value of debentures and other debt instruments that a publicly held company may issue as capital market instruments may not exceed the balance remaining after deducting the losses, if any, from the total sum of the outstanding and paid-up capital as shown on the latest independently audited financial statements submitted to the CMB, plus reserves and the revaluation fund stated in the latest financial statement approved by the general assembly. Pursuant to Article 3 of our Articles of Association, as amended on October 2, 2009 at the Extraordinary General Assembly, and as effective on October 7, 2009, we can extend credits to companies in which we have direct or indirect shareholding interest, both in Turkey and overseas, as well as to our main company and group companies, in Turkish Lira or other foreign currencies, on the condition that such extensions do not conflict with applicable laws and regulations. In addition, the TCC similarly allows group companies to extend credits and guarantees to each other without abusing their authority. The Corporate Governance Communiqué numbered II-17.1, which was published in the Official Gazette dated January 3, 2014, incorporated the rule which was announced in its weekly bulletin on September 9, 2009 in its Article 12. Furthermore, as per Article 12, board resolutions with regard to providing guarantees or pledges including mortgages within the framework of ordinary business operations of the company should be signed by the majority of independent board members. In case the majority of independent board members do not approve the resolution, dissenting opinions should be announced to the public. In such resolutions, related board members, if any, could not participate to the relevant board meeting. The CMB further took a decision which is published in its weekly bulletin on January 27, 2016 according to which it is concluded that providing by non-public affiliates to public parent companies of any guarantees, pledges including mortgages is not conflicting with Article 12.

e. CMB Rules Regarding Transactions with Related Parties

Initially, based on the CMB Communiqué Serial IV, No. 56, dated December 30, 2011, the approval of the majority of the independent members was necessary for any and all kinds of related party transactions of the company (related parties referred in the Communiqué will be determined in accordance with the Turkish Accounting Principles No. 24, equivalent of IAS 24), as well as for the resolutions of the board of directors with respect to giving guarantees, pledges and mortgages in favor of third parties. The CMB in a further announcement clarified that listed companies could adopt one board/general assembly resolution for the execution of transactions of a continuous and extensive nature with related parties unless the terms of those transactions had changed. In the event such changes occur, new board/general assembly resolutions will be needed. The new Capital Markets Law dated December 30, 2012 empowered the CMB to determine the nature of such transactions. Accordingly, the CMB with its Communiqué Serial IV, No. 63 dated February 22, 2013 restricted the scope and set out that only material related party transactions, as opposed to all kinds of transactions, shall be submitted to the approval of independent members. In cases where the majority of the independent

Table of Contents

members do not approve such material transaction, the case shall be disclosed to the public in a manner covering sufficient information with respect to the transaction within the scope of public disclosure arrangements, and the transaction shall be submitted to the general assembly for approval. During such general assembly meetings, a resolution shall be adopted by vote in which the parties to the transaction as well as the individuals related thereto are not entitled to vote. Meeting quorum shall not be necessary for the general assembly meetings to be held for those cases. Such resolutions shall be adopted by simple majority of the attendees having the right to vote. The Company shall incorporate related mandatory provisions of the said Communiqué in its Articles of Association (along with other mandatory provisions relating to corporate governance, see Item 16.G. Corporate Governance). The Corporate Governance Communiqué numbered II-17.1, which was published in the Official Gazette dated January 3, 2014, defined the materiality as set out by the Communiqué Serial IV, No. 63. Accordingly, a 10% threshold will be applied in comparison with the relevant criteria such as total annual assets, annual revenues or market value of the company. When a transaction's amount is above this 10% threshold, the majority vote of independent board members will be sought. Additionally, in order to ensure internal compliance with the CMB's related party transactions, our Board has adopted the Rules to be Applied to Related Parties in Purchasing/Selling Assets and Services along with Transfers of Liabilities to be applied by the relevant employees within the company and its group companies on November 22, 2014.

III. Capital Structure**a. General**

Our Board of Directors has adopted the authorized share capital system which, under Turkish law, allows us to increase our issued share capital up to the authorized share capital amount upon resolution by our Board and without need for further shareholder approval. On January 23, 2008, the CMB amended its Communiqué on principles regarding the registered capital system. According to this amendment, the registered capital ceiling authorization given by the CMB shall be valid for five years, including the year in which the authorization is granted. As this five-year term ended in January 23, 2013, as in 2014, the Company applied for the CMB's authorization in order to determine its capital ceiling for a five-year term between 2018 and 2022, however the amendment of Articles of Association reflecting the capital ceiling was not approved in the General Assembly Meeting held on March 29, 2018. In an effort to harmonize new legislation with the Capital Markets Law numbered 6362, which entered into force on December 30, 2012, the CMB released the Communiqué on the Registered Capital System II-18.1 which became effective on December 25, 2013. The new Communiqué mostly includes regulations in line with the former Communiqué (Serial: VI, No: 38) and de facto practice of the CMB. As for the determination of the ceiling, the new Communiqué contemplates a limitation for the ceiling and states that the registered capital ceiling shall not be more than five times the issued capital or the equity, whichever is higher. The new Communiqué also sets out that the registered capital ceiling may be exceeded once within the scope of each ceiling (i) through conversion of all kinds of internal resources and dividends into the share capital; and (ii) as a result of transactions requiring general assembly resolutions such as mergers and spin-offs. However, both the former legislation and the new Communiqué provide that the registered capital ceiling may not be exceeded with capital increases through cash. As in the former regime, the registered capital ceiling approved by the CMB is valid for five years including the year in which the approval is granted. Upon the expiry of the term, even if the registered capital ceiling has not been reached, in order for the board of directors to adopt a capital increase resolution, the board of directors must obtain authorization for a new period at the first general assembly upon the approval of the CMB for the same ceiling or a new ceiling. The term of this authorization may be extended for five year periods through a general assembly resolution. In the event such authorization is not obtained, the new Communiqué emphasizes that companies may not realize a capital increase through a board of directors' resolution, whereas under the former Communiqué, companies were deemed to be excluded from the registered capital system. The increase of the registered capital ceiling, extension of the permission period, capital increase and relevant resolutions of the board of directors shall be disclosed to the public within the

framework of the CMB disclosure rules.

b. *Preemption Rights*

We may increase our capital only through the issuance of new shares, and such issuances may come in the form of a rights offering or a bonus issue. Under Turkish law, existing shareholders are entitled to subscribe for new shares, also known as preemption rights, in proportion to their respective shareholdings each time we undertake a capital increase. Our Board of Directors will generally recommend that new shares be issued at prices equal to their nominal value, which entitles the existing shareholders to subscribe for shares at a significant discount from their current market price. The exercise of preemption rights by shareholders must be made within a subscription period which we announce, which may not be less than 15 days nor more than 60 days after the issuance of the preemption rights circular. Shareholders who do not wish to subscribe for new shares may sell their rights on the Borsa Istanbul (BIST). Any shares not subscribed for by the existing shareholders or purchasers of the rights coupons are sold on the BIST at the current market price. Any differences between the rights issue price and the price realized for the shares on the BIST would accrue to our surplus account. Preemption rights of shareholders related to a rights offering may be restricted wholly or in part either by an affirmative vote of the holders of a majority of the outstanding shares at an ordinary or extraordinary general assembly or a resolution adopted by the Board of Directors to such effect, provided that such authority is conferred upon the Board of Directors. CMB rules stipulate that such authority may be conferred upon the Board of Directors of companies that have

Table of Contents

received permission from the CMB to adopt the authorized capital system. As per the new Communiqué on the Registered Capital System II-18.1, the General Assembly shall approve the amendments to the articles of association with respect to granting authorization to the board of directors to restrict the pre-emptive rights of the shareholders to acquire new shares. Contrary to the former Communiqué, the new Communiqué has not foreseen a meeting quorum. With regard to the decision quorum, the former Communiqué differentiated between companies making an initial public offering and public companies, whereas the new Communiqué has not stipulated any such distinction. Accordingly, the new Communiqué regulates that shareholders holding 2/3 of the shares having voting rights shall provide affirmative votes. In addition, the new Communiqué has prescribed that if at least shareholders holding half of the voting shares are present at the meeting, the decision quorum shall be the majority of the shares participating in the meeting.

By the amendment to the Articles of Association, we have conferred such authority on our Board of Directors. The CMB further requires that the right of the Board of Directors to restrict the preemption rights of shareholders applies equally with respect to all shareholders. Under Turkish law, bonus issues may be undertaken in order to convert all or a portion of the revaluation fund and reserves of a company into share capital.

c. Dividend Distribution and Allocation of Profits

Our Board of Directors recommends annual dividends, which then must be approved by our shareholders at their annual general assembly. Dividends are payable on a date determined at the annual general meeting. Under current rules, the Board of Directors may decide whether or not to recommend a distribution of dividends, and our shareholders at our annual general meeting may decide whether or not to distribute dividends in any year. According to new Capital Markets law, we may freely determine the amount of dividends to be distributed based on the Dividend Policy, pursuant to applicable Turkish laws and upon the approval of, or amendment by, the Board of Directors and the General Assembly of Shareholders. The Board decides whether or not to recommend an allocation of profits, as well as the amount of dividends, and the shareholders, through the general assembly, may accept, amend or reject such proposal, if any.

The new dividend distribution regime is governed by a CMB Communiqué on Dividends II-19.1 which was published in the Official Gazette dated January 23, 2014, numbered 28891, which entered into force on February 1, 2014. Within the scope of the Communiqué, companies shall distribute dividends through a general assembly resolution in accordance with current legislation and the policies of the company. As per the Communiqué, dividends may be distributed in installments in case a general assembly resolution is adopted in this regard. The Communiqué has also determined the principles and procedures for the distribution of dividends. The CMB allows public companies the possibility of choosing the timing and payment method of the dividend distribution on the condition that the company's own dividend policy should regulate this. In any case, according to the new Communiqué, distribution should commence until the end of the financial year in which the general assembly decided on distributing a dividend.

In order to comply with this Capital Markets Board's Communiqué, the Turkcell Board of Directors amended its dividend distribution policy proposal in February 2014, as stated below, and approved by the Ordinary General Assembly held on March 26, 2015:

The Company shall target a dividend payout of at least 50% of its distributable net income as cash. This policy will be subject to the Company's cash projections, business outlook, investment plans and capital market conditions. The actual dividend decision will be made for each fiscal year separately with the approval of the General Assembly of Shareholders. Dividend distribution shall be started on a date to be determined by the General Assembly of Shareholders which shall not be later than the end of the year in which the General Assembly convenes. The Company, in accordance with laws and regulations, may consider distributing advance dividends or making the

dividend payment in equal or unequal installments.

Additionally, in order to create added value for its shareholders, the Company may also consider share repurchase programs depending on the conditions set forth above and applicable regulation.

In parallel with the new Capital Markets Law, the new Communiqué on Dividends sets ground rules for donations: articles of association of public companies should contemplate it and an annual limit should be determined by the general assembly. On February 24, 2015, within the framework of the CMB regulations, our Board has resolved that, by means of determining the upper limit for the total amount of donations to be made by the Company within the year 2015 as up to 0.2% of our Company's revenue included in the annual consolidated financial tables relating previous fiscal year announced to the public pursuant to CMB regulations, this abovementioned upper limit is approved by General Assembly of our Company. On January 30, 2017, our Board of Directors has resolved to determine the upper limit for the total amount of donations to be made by our Company within the year 2017 as up to 1% of our Company's revenue as set forth in the annual consolidated financial statements for the previous fiscal year as announced to the public pursuant to Capital Markets Board regulations. This limit is approved at the General Assembly of our Company held on May 25, 2017.

Table of Contents

Dividends are payable by transfer to the account of the shareholders with a bank in Turkey corresponding to the relevant portion of their shares. Shareholders' entitlement to cash dividends remains in effect for a period of five years following the date of the general assembly approving such distribution, after which time they are transferred to the Turkish government.

Part of our remaining net profit may be distributed to our shareholders as a second dividend or retained by us as retained earnings, all at the discretion of our general assembly.

For additional details regarding our dividend policy see Item 8.A. Consolidated Statements and Other Financial Information Dividend Policy .

d. Voting Rights

Shareholders are entitled to one vote per share on all matters submitted to a vote of our shareholders.

CMB Communiqué Serial IV, No. 56 dated December 30, 2011 (see Item 16.G. Corporate Governance for further information), initially stated that transactions considered as material (transfer, acquisition or lease of all or significant portion of company assets or constitution of limited property right there on; providing concession or changing content or subject of existing concessions and being delisted) under certain conditions those material transactions will need to be approved by the general assembly. In the event that parties to such transactions are related parties, such related parties shall not vote at the general assembly. The new Capital Markets law dated December 30, 2012 further expanded the scope of material transactions , which were exhaustively enumerated by the aforementioned Communiqué by adding the term like at the beginning of the enumeration. However, the topic has once again been regulated by another CMB Communiqué Serial IV, No. 63 dated February 22, 2013, and the term of material transactions with regard to the implementation of Corporate Governance Rules is again exhaustively defined in parallel with the Communiqué dated 2011.

The CMB issued the Communiqué No. II-23.1 on Common Principles Regarding Material Transactions and the Right of Separation (published in the Official Gazette dated December 24, 2013, No. 28861). Material transactions of public companies are exhaustively enumerated. Some of the issues covered by the Communiqué are listed below:

procedures and principles applicable to the material transactions of publicly held companies;

exercise of the right of separation in relation to the material transactions and the cases where the right of separation is not applicable;

pricing of the right of separation in non-listed companies;

mandatory tender offer in connection with the material transactions; and

mandatory meeting and decision quorums applicable to general assembly meetings with regard to material transactions.

The CMB Communiqué No. II-23.1 which has been amended and published in the Official Gazette No.30395 dated April 18, 2018, added another item to the list where no right of separation shall arise: in case any asset transfer is not made to the related parties and the minimum 90% of the fund to be acquired as a result of such transfer is used for the payment of debt of the publicly-held company, arising from cash loans from banks or in connection with any debt instrument issued by such publicly held companies, within one month as of the receipt of the fund no right of separation shall arise. It has been also stipulated that in the case the fund collected is used for repayment of the whole of the cash bank credits and/or debt originate from the debt instruments the percentage requirement shall not be applied.

e. Transfer of Shares

Subject to the limitations described below, shares may be sold and transferred by endorsement and delivery.

In practice, shares in registered form traded on the BIST are represented by the share certificates endorsed in blank, enabling such shares to be transferred as if they were in bearer form. As per the amendment in the then in force Capital Markets Law and a communiqué issued by the CMB in this respect, our Company's shares traded at the Borsa Istanbul were dematerialized as of November 2005.

Legal and actual dematerialization of the share certificates commenced on November 28, 2005. Beginning from November 28, 2005, it is prohibited for companies registered on the BIST to issue new share certificates, in consideration of rights issues or bonus issues. The new shares arising out of capital increases shall be transferred to the accounts of the rightful owners by registration.

Table of Contents

A seven-year term given for the dematerialization of physical shares ended on December 31, 2012 and physical shares which were not delivered for dematerialization were supposed to become the property of the Company. However, according to the new Capital Markets Law which came into force on December 30, 2012, such undelivered physical shares are now transferred to the Investor Compensation Center and sold three months following the transfer on the Investor Compensation Center's accounts. However, the Turkish Constitutional Court in its decision published in the Official Gazette on November 12, 2015, nullified the provisions of the Capital Markets Law regarding the ownership transfer of such undelivered physical shares to the Investor Compensation Center on the ground that such language contradicted with Art. 13 (Restriction of fundamental rights and freedoms) and Art. 35 (Right to property) of the Constitution. As a result of this decision, the CMB regulated the process of payment to the investors whose share ownership has been transferred to the ICC. This regulation has been published in the Official Gazette dated September 7, 2016 numbered 29824.

Concerning registration of share transfers, the Company will take into account the Central Securities Depository of Turkey's data without requiring any application from the interested parties. Provisions regarding the nominal values of the share certificates of the Company are regulated in the temporary article of the Company's Articles of Association and such article was approved at the Ordinary General Assembly Meeting on April 29, 2005. The temporary article reads as follows:

Decree 32 on the Protection of the Value of the Turkish Currency issued in August 1989, as amended from time to time, provides that persons not resident in Turkey may purchase and sell our shares, provided that such purchase is effected through a bank or broker authorized pursuant to applicable Turkish capital markets legislation. Turkish capital markets legislation requires that shares of a company quoted on a Turkish securities exchange be traded exclusively on such exchange. The CMB has indicated that this requirement applies only to intermediary institutions licensed for trading on the stock exchange and to trade orders placed with them by investors. Accordingly, our shareholders that are not resident in Turkey may transfer such shares only on the ISE. This requirement does not apply to transfers of ADSs.

Under Turkish law, in the event that one of our shareholders transfers shares to any other shareholder or to any other third party investor, either foreign or local, the Foreign Investment General Directorate (FIGD) must be notified within one month of the transfer of shares.

Under Article 8 of the Electronic Communications Law, electronic communications services is rendered and/or electronic communications network or infrastructure is established and operated following the authorization made by the ICTA. Authorization is granted through the notification made in accordance with the principles and procedures determined by the ICTA, in case the resource allocation is not necessary, or given of usage right, in case the resource allocation, which means allocation of frequency, satellite position etc., is necessary. Furthermore, under the Authorization Regulation Regarding Telecommunication Services and Infrastructure Regulation, the ICTA must be notified in case of any share transfers within one month of the transfer of shares at the latest and in the event that the share transfer results in a change in control, such transfer of our shares by any of our shareholders should be realized with the written permission of the ICTA.

Under our Articles of Association, the Board of Directors is entitled to restrict the transfer of shares to foreigners in order to comply with Turkish shareholding requirements under Turkish law.

f. Disclosure of Beneficial Interests in the Shares

The Turkish Regulation on public disclosure of listed companies is regulated by the CMB Communiqué on Public Disclosure of Material Events (II-15.1) . Insider information, which means any non-public information that may

possibly affect the value of capital market instruments and investors' decisions, is required to be disclosed immediately by listed companies. Shareholders' disclosure requirement would arise if they fall below or exceed the shareholding ratios established in the Communiqué II-15.1 (5%, 10%, 15%, 20%, 25%, 33%, 50%, 67% and 95%). Following subsequent changes made to the Communiqué II.15.1 (which was published in the Official Gazette dated November 17, 2018 and No.30598) in cases where the relevant shareholders' share ratio reaches, exceeds or falls below the aforementioned thresholds only the Central Securities Depository of Turkey (MKK) will make the relevant disclosure. However, this will not be applicable for persons reaching, exceeding or falling below such thresholds (i) by acting in concert, (ii) indirectly, or (iii) with voting rights (through voting agreements etc.). Therefore, in these cases, rather than the MKK the relevant shareholder or the persons acting in concert with such shareholder will need to disclose the change in their shareholding. Disclosure of insider information may be delayed to protect the legitimate interests of the company without causing market manipulation. For those that have administrative responsibilities in Turkcell (including Board members and high-ranked executives), or are closely related persons and partners (whether natural or legal persons) of issuers that purchase and sell Turkcell's capital market instruments (including, but not limited to, Turkcell shares), such transactions will need to be declared to the Borsa Istanbul; however, according to the Communiqué II-15.1, if the cumulative amount of the above-mentioned Turkcell transactions in a calendar year does not exceed TRY 286,000 (TRY 353,868 for 2019), such declaration will not be needed. This upper limit represents the total amount of all transactions.

Table of Contents

made by both Board members/high-ranked executives and their closely related persons of the company and that of its subsidiaries which represent more than 10% of the total assets according to the latest annual financial statements of the company. Closely related persons means: wives/husbands, children and individuals sharing the same residence at the time of transaction and corporations; legal entities run by, directly/indirectly controlled by or whose economic interests are similar with that of Board members; and high-ranked executives of the Company. The CMB by its decision dated June 27, 2014 issued new guidelines that is also amended on February 10, 2017 for the announcement of material events for public companies based on Article 27 of the Communiqué II-15.1, thus repealing the old guidance which was prepared in conformity with the Communiqué Serial VIII, No:54. The Company's internal public disclosure rules and procedures has also been adopted by the Board in accordance with the Communiqué II-15.1 as amended on February 10, 2017.

In addition, the CMB adopted a short-swing-profit rule for company executives. The CMB has published the Communiqué No. VI-103.1 Regarding Managers' Payment of Net Purchase and Sale Gains to the Issuers (published in the Official Gazette dated December 12, 2013, No. 28849). The Communiqué VI 103.1 relies on the Capital Markets Law Article 103/4 and indicates that (i) the board members and the committee members of an issuer, (ii) the persons with administrative responsibilities at the issuer and (iii) the persons that have the power to determine and control the issuer's financial and operational policies, decisions or targets directly or indirectly, shall pay the net gains they have obtained through the purchases and sales within the same six-month period. It is indicated in the Communiqué VI 103.1 that the purpose of this regulation is to remove the inequality of opportunity between the persons who receive insider information about the issuers easier and faster due to their positions and the investors that reach the insider information after public disclosure.

The Communiqué on Tender Offer (II-26.1) which repeals the Communiqué Serial: IV No: 44 was published by the Capital Markets Board in the Official Gazette dated January 23, 2014, numbered 28891, which entered into force on the date of its publication. Through the Communiqué, the procedures and principles regarding mandatory and voluntary tender offers as a result of a change in management control have been regulated in compliance with the new Capital Markets Law No. 6362. Moreover, the definition of management control has been regulated as the direct or indirect acquisition of more than 50% of the share capital or the voting rights individually or collectively. Holding more than fifty percent of the voting rights of a corporation directly or indirectly, alone or jointly with persons acting in concert, or regardless of such percentage, holding privileged shares enabling their holder to elect a simple majority of the total number of the members of the board of directors or to nominate for the said number of directors in the general assembly meeting, is considered and treated as an acquisition of control.

The Communiqué on Tender Offer (II-26.1) was modified on February 27, 2015 and the following situation has been added amid cases where a mandatory tender offer will not be triggered. Following the purchase by a third party of a portion of the shares of a controlling shareholder, on the condition that this third party has 50% or less of voting rights of the company, should such third party share equally or less than the management control of the company with this controlling shareholder by virtue of a written agreement, this situation is not considered a trigger for a mandatory tender offer for this third party.

The said Communiqué was again amended and the amendment entered into force immediately upon its publication in the Official Gazette dated January 2, 2019 No.30643. As per the amendment, the relevant shareholder can be exempted from the requirement to launch a mandatory tender offer if the change of management control occurs as a result of the existing shareholders acquiring shares through a capital increase where the pre-emptive rights have not been restricted. However, as this is a ground for exemption and not an exception even if the said circumstances exist applicability of the exemption will be subject to the CMB's approval.

In parallel, the Capital Markets Law No. 6362 introduces a squeeze-out right: in the event the shareholding of a shareholder reaches a threshold, which shall be determined by secondary legislation of the CMB, such shareholder shall have the right to purchase the shares of the minority shareholders and the minority shall have the right to sell their shares. The CMB released the Communiqué on Squeeze-Out Rights and Statutory Put Option Rights (II-27.1) on January 2, 2014 in the Official Gazette numbered 28870, which became effective as of July 1, 2014. This Communiqué was replaced with the Communiqué II-27.2 which entered into force upon its publication in the Official Gazette dated November 12, 2014 and numbered 29173 (the new Communiqué). According to the Communiqué II-27.1, if the controlling shareholder, directly or indirectly, holds at least 95% of the voting rights in a public company as a result of a mandatory tender offer or by any other means, the controlling shareholder has the right to squeeze out all other shareholders regardless of whether they hold privileged shares. As per the new Communiqué, in the event that a shareholder holds at least 98% of the voting rights in a public company either as a result of a mandatory tender offer or by any other means, or if the controlling shareholder already satisfying this threshold acquires an additional share, the controlling shareholder will be entitled to the right to squeeze-out all other shareholders. Once the squeeze-out right arises, the remaining minority shareholders will be entitled to the right to sell-out their shares. The new Communiqué also stipulates a transition period. Accordingly, the threshold of 95% shall continue to apply to squeeze-out rights that arose before December 31, 2014 and a new threshold of 97% shall apply to squeeze-out rights that will arise thereafter

Table of Contents

until December 31, 2017. The new Communiqué regulates the squeeze-out and the put option rights under the same provision. Accordingly, the controlling shareholder is obliged to make a public disclosure, if and when the controlling shareholders' shareholding ratio reaches at least 98% of the voting rights or acquires additional shares to enhance its status. The remaining minority shareholders are entitled to exercise their sell-out rights within three months following the public disclosure. The three-month period is statutory and the sell-out rights of the minority shareholders shall expire at the end of such period. The minority shareholder willing to exercise its sell-out right shall notify the public company in writing of its request. The board of directors shall procure the preparation of a valuation report in order to determine the purchase price for the minority shares within one month upon the sell-out request. Upon application of the controlling shareholder for exercising the squeeze-out right, and approval of the board of directors about the fulfillment of the conditions for exercising the squeeze-out right, the company shall apply to the CMB for issuance of new shares to replace the cancelled ones. A delisting application to the relevant stock exchange is also required. All payment and settlement transactions shall be conducted via the Central Registration Agency. The controlling shareholder shall deposit the share purchase amount to the company's account, within three business days following the notification made by the company at the latest, and the company shall transfer such amount to the relevant minority shareholders' account on the second succeeding business day to complete the share transfer transactions. As for the calculation of the purchase price, the purchase price during exercising of the squeeze-out right shall be equivalent to the average of the weighted daily stock market price within the 30-day period prior to the disclosure stating that the controlling shareholder has reached at least 98% of the voting rights or acquired additional shares for traded shares. The Communiqué refers to a fair price for the exercise of the sell-out right. Accordingly, (i) the price determined for the squeeze-out right; (ii) the price determined per each share group through a valuation report; (iii) the price of a mandatory tender offer within the year preceding the public disclosure of control, if any; and (iv) the average of the weighted average prices on the exchange pertaining to the previous six months, previous year and previous five years shall be compared. The highest value shall be determined as the purchase price when the sell-out right is exercised. The controlling shareholder is required to make a public disclosure if and when (i) the voting rights held by it exceed or fall below 98% of the total voting rights in the company; or (ii) it acquires additional shares when it already holds 98% or more of the voting rights. Additionally, the controlling shareholder is also obliged to make a public disclosure, if and when it decides to exercise the squeeze-out right. The company as well is obliged to disclose the (i) squeeze-out right requests, the procedure of squeeze-out and the results of the squeeze-out; (ii) application of a sell-out right including the total number of shareholders making an application for exercising their sell-out rights, the percentages of their voting rights, and the total price to be paid for the exercised sell-out rights; (iii) the results of valuation reports for determining the share price and (iv) the results of exercising the sell-out right including information on the number of shareholders who have used such right and their voting right percentages and the voting right percentage of the controlling shareholder.

Capital Markets Law No. 6362 is amended on December 5, 2017 with the Omnibus Bill No. 7061 published on the Official Gazette and introduces a legal grounding for crowdfunding. The CMB was authorized therein to enact secondary legislation. As a consequence of this, the CMB has issued a draft Communiqué on Equity Crowdfunding and presented it to public's opinion on January 3, 2019. In the draft, it is clearly pointed out that the Communiqué will only be applied to crowdfunding and the activities of fund raising from public via crowdfunding platforms in return of awards or donations shall not be governed by this regulation. The draft sets forth the procedures and principles regarding (i) equity crowdfunding; (ii) authorization of crowdfunding platforms by the CMB; (iii) activities of such platforms; (iv) fund raising from public via equity crowdfunding; and (v) control and supervision of the usage of such funds. CMB is expected to enact the secondary legislation accordingly.

g. Free Float Definition Rules

While 48.95% of our shares are listed on the stock exchange, the number of our Company's free floating shares as of March 7, 2019 was 1,074,496,616 according to the Report on Free Float Ratios released by the Central Securities

Depository of Turkey in accordance with the Capital Markets Board's decision 21/655 of July 23, 2010, as amended by its decision 24/729 of August 18, 2010, and its free float ratio was 48.84%. The difference between these rates results from the exclusion of shares which are: i. held by a public entity, ii. held by the company's incorporators and its affiliates (companies subject to consolidation), iii. held by shareholders who may be a natural person or a corporate body and control at least 10% of the Company's capital (following the amendment by the CMB's decision 31/1059 of October 30th, 2014), iv. held by a) the members of the Company's Board of Directors and the Board of Auditors, b) General Manager or executives who are equal to or superior to a general manager in terms of their powers and functions, c) senior executives who report to General Manager or executives who are equal to or superior to a general manager in terms of their powers and functions, v. owned by the savings funds or foundations of companies, vi. provided as equity capital pursuant to regulations applicable to the capital markets legislation or as a collateral in respect of a margin trading or as a collateral except the ones which are given as a collateral only for Central Depository Bank markets, vii. which are legally restricted and cannot be subject to purchase and sale, viii. prohibited, ix. seized in the definition of free float ratio. The difference may result from one or more situations described in the decision and it is not possible for our Company to know it.

Table of Contents**h. Trading Rules**

According to the CMB's latest decision numbered 1/6 dated January 8, 2018 and according with Communiqué II-17.1 on Corporate Governance, public companies whose shares are traded on the BIST Stars Market, BIST Main Market and Collective and Structured Products Market shall be divided into three groups in accordance with their systemic significance considering their market values and the market values of the shares in active circulation. The average of the closing prices in the second session of the last trading days of March, June, September and December and the rates of the shares in active circulation is the basis of the calculation of the market price and the price of the shares in active circulation. In cases where different share groups of the same company are traded on the exchange, all of such groups shall be taken into consideration. This calculation shall be made by the CMB each year in January to determine the groups in which the corporations are included and the list shall be published by the Board Bulletin. In this regard, the numerical thresholds to be used for grouping are set forth below:

(a) First group: Companies whose average market value is above TRY 3 billion and average market value in actual circulation is above TRY 750 million;

(b) Second group: Companies among those excluded from the first group, the average market value of which is above TRY 1 billion and average market value in actual circulation is above TRY 250 million.

(c) Third group: Companies among those excluded from the first and second groups, the shares of which are traded on National Market, Second National Market and Collective Products Market.

Accordingly, the CMB by its decision numbered 31/1080 and dated October 30, 2014 determined the following thresholds and measures, which are effective as of January 2, 2015:

Group	Value of the Shares in active circulation (TRY)	Market Maker or Liquidity Builder	Trading Method	Current or Additional Measures		
				Margin Trading or Short Selling	Equity Ratio of Short Settlement	Gross Settlement Method
A	30 Million and above		Continuous Auction	YES	General Provisions	NO
B	10 - 30 Million		Continuous Auction	YES	100%	NO
C	Below 10 Million	YES	Continuous Auction			
		NO	Uniform Price	NO	100%	NO

According to the latest CMB decision, Turkcell is listed under Group A companies.

i. Protection of Minority Shareholders

Under Turkish securities law, minority shareholders, defined as those who hold 5% or more of our share capital, have the right, among other things, to request our Board of Directors to:

invite the shareholders to an extraordinary general assembly;

request that a matter be included on the agenda at both ordinary and extraordinary general assembly;

request the appointment of special auditors; if the general assembly rejects this request, minority shareholders may apply to the court for the appointment of a special auditor;

take action against Board members who have violated the Turkish Commercial Code or the articles of association of a company or who have otherwise failed to perform their duties;

pursuant to the TCC, provided there is a good reason, minority shareholders may claim from the competent court to rule in favor of dissolution of the Company; and

if provided by the Articles of Association of the Company, certain minority groups may be represented at the Board of Directors.

According to the new Capital Markets Law, in the event a shareholder votes against a material transaction in a general assembly meeting, as briefly described above, such shareholder obtains a right to exit from the company by selling his/her shares. If the shareholder uses that right, the company is required to purchase the shareholder's shares.

Table of Contents

j. Liquidation

In the event of liquidation, our shareholders are entitled to participate in any surplus in proportion to their shareholdings.

k. Changes in Capital Structure

Any increase in our Company's registered capital ceiling requires an amendment to our Articles of Association and therefore shareholder approval through a general assembly. Such amendment is subject to the prior approval of the Ministry of Customs and Trade and the CMB. Our Board of Directors may also restrict the rights of existing shareholders and offer new shares to third parties. Changes in the voting and dividend rights of our shareholders require an amendment to our Articles of Association and approval by the general assembly. Such amendment is also subject to the prior approval of the Ministry of Customs and Trade and the CMB. Furthermore, under the Turkish Commercial Code, during the general assembly meetings held to amend the articles of association of a joint stock company, each share shall be entitled to only one vote, even if otherwise is provided under its articles of association.

Any decrease in our share capital requires an amendment to our Articles of Association. If we undertake to cancel our shares, we must notify any existing creditors, and within two months of notification, they may request payment or, if their receivables are not due and payable, we must create a security interest in their favor. Capital reduction is rarely applied in Turkey.

l. Share Buy-Backs

The new TCC contains several rules enabling Turkish companies to repurchase their own shares if they satisfy certain conditions. Accordingly, shares representing up to 10% of the total share capital of the company may be acquired by the company itself. We believe that this would allow both direct and indirect acquisitions. Before the entry into force of the new TCC, the CMB had taken an anticipatory step by enabling listed companies to buy back their own shares. The CMB announced this on August 11, 2011, in its Weekly Bulletin numbered 2011/32, and this announcement describes in detail the procedures and principles which apply to such buy-back transactions.

In accordance with the new Capital Markets Law dated December 30, 2012, the Communiqué on Share Buyback numbered II-22.1 was published in the Official Gazette on January 3, 2014. The Communiqué regulates the principles and procedures of share buybacks or the establishment of pledges over their own shares by public companies. Essentially, the Communiqué governs the principles regarding the (i) share buybacks of public companies or accepting their own shares as pledges; (ii) sell-out of repurchased shares or their amortization; (iii) public disclosure of such transactions; and (iv) safe harbor provisions where share buybacks will not be deemed insider trading or manipulation of the market.

On February 18, 2016 a buyback plan of up to TRY 200 million was announced to be submitted for the approval of the shareholders at the Ordinary General Assembly for 2015; however the proposal made during the General Assembly held on March 29, 2016 was rejected.

Following the coup attempt, on July 21, 2016, the CMB under its Communiqué on Share Buy-backs decided to temporarily remove the limits that are applicable to public companies' acquisition of their own shares (especially the limit restricting buy-backs up to 10% of the share capital) and authorized Turkish public companies to initiate stock repurchases, even in the absence of shareholder approval.

Our Company's Board of Directors has authorized the management to execute share buy-back transactions, within the scope of the announcements dated July 21, 2016 and July 25, 2016 made by the CMB. We believe that this authorization could be extended to cover indirect share buybacks.

m. *General Assemblies*

Right holders, who have a right to attend the general assembly meetings, can attend such meetings by electronic means pursuant to article 1527 of the new TCC. Pursuant to the Communiqué on Electronic General Assembly Meetings held in Joint Stock Companies, the Company shall invite the right holders to attend, to deliver an opinion and to vote by electronic means, either setting up the electronic general assembly system; or purchase related services from the system providers that are specifically found for such purposes.

According to the new TCC, the general assembly meeting procedures should be regulated under the Internal Guidelines to be approved by the general assembly and registered at the Trade Registry. Accordingly, general assembly meeting procedures shall be executed with the related provisions of the Turkish Commercial Code, Articles of Association and the Internal Guidelines.

Table of Contents

The following matters are among the ones required by the TCC and our Articles of Association to be included on the agenda of ordinary general assembly meeting:

review of the annual reports of our Board of Directors and the auditors;

the approval, amendment or rejection of the statement of financial position and statement of profit and loss prepared for the preceding financial year, the release of our Board of Directors from liability in respect of actions taken by them in the preceding financial year, and the proposals of our Board of Directors for the allocation and distribution of any of our net profits;

the approval of the remuneration of the Board members; and

the re-election or replacement of directors and/or auditors whose terms of office have expired.

Shareholders representing at least 5% of our share capital may, by written notice, require any additional matters to be included on the agenda for discussion at any of our general assemblies.

Notices covering general assemblies (including postponements and rescheduling), which include the agenda of any such general assembly, must be published in the Trade Registry Gazette and Turkish local newspaper published where the headquarter of our Company is located, determined by us, at least two weeks before the date fixed for the meeting in accordance with the TCC and three weeks before the date fixed for the meeting in accordance with CMB regulation. The TCC requires us to send notice of any general assembly by registered mail to each person registered in our books as a holder of shares and to those shareholders who have deposited at least one share certificate representing shares with us and have indicated a notice address. Under the Capital Markets Law, such notice requirement does not apply to holders of registered shares, which are also traded in the stock market.

Any shareholder holding any of our shares (excluding ADRs) and wishing to attend general assembly meetings to vote must present his/her identification document to our Head Office before the start of the meeting in order to obtain an entry permit for that meeting. Holders of the non-public registered shares in our share book of registered shares need not comply with such requirement to attend a general assembly. Any shareholder not wishing to attend any such general assembly in person may appoint another person as a proxy. Shareholders attending the general assembly meeting by electronic means should follow the procedures established by the related legislation.

Except as set out by the provisions of the TCC and our Articles of Association, the required quorum at any general assembly is shareholders representing at least one-quarter of the share capital. If such quorum is not present when a general assembly is convened, the meeting shall be adjourned, in which event the meeting is reconvened within a month, with shareholders or their proxies present at such meeting. Resolutions of general assembly meetings must be passed by a majority of the shareholders or their proxies present at such meetings.

As per the new Capital Markets Law, unless a higher quorum is accepted in the articles of association of public companies, affirmative votes of two-thirds of shareholders representing the share capital present at the general assembly (and this, without requiring a quorum) is needed for the following decisions: restricting preemptive rights of shareholders, authorizing the Board to restrict such preemptive rights in a registered capital system and reduction of the share capital and material transactions of the company as defined by the law. Nevertheless, if shareholders

representing at least half of the company share capital are present at the meeting, simple majority decides unless a higher quorum is accepted by the articles of association.

In addition, the new Capital Markets Law stipulates that the CMB may require including some topics in the general assembly agenda to be discussed by the general assembly or to inform the shareholders at the general assembly.

According to our Articles of Association, the meeting quorum requirement at general assemblies is 51% of our share capital. Resolutions of our general assemblies must be passed by the shareholders (or their proxies) representing the majority of the votes of the shareholders present at that meeting.

The quorum requirement at general assemblies convened to increase our share capital ceiling is 51% of our share capital. Resolutions of general assemblies relating to capital increases must be passed by a majority of our shareholders or their proxies present at such meeting.

The meeting quorum requirement at general assemblies convened to amend our Articles of Association (excluding capital ceiling increase) is two-thirds of our share capital. Resolutions of our general assemblies to amend our Articles of Association (excluding capital ceiling increase) shall be passed by the shareholders (or their proxies) representing at least 2/3 of the votes of the shareholders present at that meeting.

Changing our jurisdiction or increasing the obligations of the shareholders requires unanimous shareholder approval.

Table of Contents

10.C Material Contracts

We are not a party to any material contracts other than those entered into in the ordinary course of business, except with regard to the settlement of certain legal disputes. For information regarding these settlements, see Item 8.A. Consolidated Statements and Other Financial Information Note 36 (Guarantees and purchase obligations) to our Consolidated Financial Statements in this annual report on Form 20-F.

10.D Exchange Controls

Banks in Turkey set their own foreign exchange rates independently of those announced by the CBRT. Pursuant to Decree 32 on the Protection of the Value of the Turkish Currency (Decree No.32), most recently amended in 2018, the government eased and ultimately abolished restrictions on the convertibility of the Turkish Lira for current account and nonresident capital account transactions by facilitating exchange of the proceeds of transactions in Turkish securities by foreign investors, which enabled Turkish citizens to purchase securities on foreign exchanges. These changes also permitted residents and nonresidents to buy foreign exchange without limitation and to transfer such foreign exchange abroad without ministerial approval.

Turkish citizens are permitted to buy unlimited amounts of foreign currency from banks and to hold foreign exchange in commercial banks. Banks are obliged to inform authorities to be determined by the Ministry about Turkish Lira transfers abroad, excluding payments for exports, imports and invisible transactions that are above the equivalent of USD 50,000, within a 30 day period starting from the date of transfer. Any amendment to recent exchange controls provisions may affect our results of operations.

Capital Movements Circular and the Decree No.32 have recently been amended and have taken effect since May 2, 2018, introducing new restrictions on Turkish corporates to utilize foreign currency loans from Turkey and outside of Turkey. While the new regime continues to maintain existing prohibition on Turkish individuals to utilise foreign exchange loans and foreign exchange indexed loans, it introduces a strict prohibition on Turkish non-bank corporates (Corporate Borrower) to utilise foreign currency indexed loans and also brings in new restrictions on corporate borrowers to utilise foreign currency loans (F/X Loan Restriction).

Accordingly, a corporate borrower shall be permitted to utilize foreign currency loans if (i) it generates foreign currency-denominated revenue, which is defined as *the revenue derived from export, transit trade, sales and deliveries considered as export and foreign currency generating activities* (F/X Revenue Exemption) in the new legislation; (ii) the purpose of the loan is to finance an activity that is exempt from the F/X Loan Restriction (Activity Exemption); (iii) if as of May 2, 2018, the unpaid outstanding balance of its total foreign currency loans and/or foreign currency indexed loans (Loan Balance) is more than USD 15 million or (iv) if the F/X loan to be utilized by a corporate borrower falls within the scope of the exemptions determined by the Ministry of Treasury and Finance.

As far as the F/X Revenue Exemption is concerned, (i) if the loan balance of a corporate borrower is below USD 15 million, the sum of (i) the foreign currency loan to be utilised; and, (ii) the existing loan balance must not be more than the combined value of its foreign currency revenues as stated in its last three years financials. Otherwise, the exceeding portion of the foreign currency loan must either be cancelled or converted into Turkish Lira.

With regard to the Activity Exemption, a legal entity must qualify as a public institution, banks and factoring, financial leasing and financing companies resident in Turkey in order to utilise foreign currency loans. In the case of corporate borrowers, the Activity Exemption must relate to an activity in the context of (i) a domestic tender with an international element awarded to such corporate borrower; (ii) defence industry projects approved by the Undersecretariat of Defence Industry; (iii) public private partnership projects; (iv) an export, transit trade, sales and

related deliveries subject to the relevant corporate borrower certifying the scope of its relevant activity and its potential sources of foreign currency revenues and (iv) investment incentive certificate. Note that in order for a corporate borrower to benefit from the Activity Exemption summarised in item (iv), it must not have any foreign currency revenue within the last three financial years (which otherwise, would be subject to the F/X Revenue Exemption) and the maximum amount of foreign currency loan such Corporate Borrower can utilize is limited to the amount stated in its certified sources of foreign revenue.

As of December 31, 2018, exchange restrictions and state controls exist in some jurisdictions in which Turkcell operates. The local currencies of Turkcell's subsidiaries in both Ukraine and Belarus are not convertible outside of their respective countries. The foreign exchange regime of the Ukrainian Hryvnia is floating but there is no offshore forward market for the currency; only onshore non-deliverable forwards are available. For Belarusian Ruble, the regime is managed floating with no access to forward markets or NDFs. Future movements of exchange rates will affect the carrying values of Turkcell's assets and liabilities. The translation of underlying local currency amounts into TRY in Turkcell's Consolidated Financial Statements should not be construed as a representation that such local currency amounts have been, could be or will in future be converted into TRY at the exchange rates shown or at any other exchange rate.

Table of Contents

As of December 31, 2018, significant exchange restrictions and state controls exist in some jurisdictions in which Fintur operates. The local currency of Fintur subsidiary in Moldova is not convertible outside of Moldova. The exchange rate regime for the Moldovan Leu is floating which means central banks can intervene in the foreign exchange market but does not make any explicit or implicit commitment with respect to an exchange rate target or path. The translation of underlying local currency amounts into USD in Fintur's consolidated financial statements should not be construed as a representation that such local currency amounts have been, could be or will in future be converted into USD at the exchange rates shown or at any other exchange rate.

10.E Taxation

The following discussion is a summary of the material Turkish and United States federal income tax considerations relating to the ownership and disposition of our shares or ADSs. The discussion is based on current law and is for general information only. The discussion does not address all possible tax consequences relating to the ownership and disposition of shares, or ADSs, and holders are urged to consult their tax advisors regarding the applicable tax consequences of holding and disposing of the shares or ADSs based on their particular circumstances.

The discussion is based upon laws and relevant interpretations thereof in effect as of the date of this annual report, all of which are subject to change, possibly with retroactive effect. This summary is also based in part on representations of the Depositary and assumes that each obligation provided for in, or otherwise contemplated by, the Deposit Agreement or any related document will be performed in accordance with the terms of such agreement.

I. Republic of Turkey Taxation

The following summary of Turkish tax law as in force on the date of this annual report describes the principal tax consequences for Turkish residents and U.S. holders (as defined below in "Taxation United States Federal Income Taxation") of the ownership and disposition of shares and ADSs. It is not a complete description of all the possible tax consequences of such ownership and disposition. Shareholders should consult their own tax advisors concerning the Turkish and other tax consequences applicable in their particular situations.

a. Corporate Taxation

A corporation that has its legal and/or business center in Turkey (a "Resident Corporation") is subject to a corporate tax, which is levied at 20% on such corporation's taxable income. Resident Corporations are required to pay an advance corporation tax, also at 20%, on a quarterly basis. This rate will be applied at 22% for the years 2019 and 2020.

b. Taxation of Dividends

In the event that a Resident Corporation distributes dividends to individual shareholders (resident or non-resident), or to non-resident corporations that do not have a permanent establishment (fixed place of business or permanent representative) in Turkey (and are not subject to rate-reducing provisions in applicable bilateral tax treaties), a 15% withholding tax is payable by the Resident Corporation on behalf of its shareholders. In the event that Resident Corporations distribute dividends to resident legal entities or to non-resident legal entities that have a permanent establishment in Turkey, such distributions are not subject to withholding tax.

Cash dividends received by Resident Corporations from other Resident Corporations are not subject to corporate tax. Dividends in cash received by resident individuals from Resident Corporations are subject to a withholding tax at the rate of 15% (as discussed above) and must file an annual income tax declaration. The withholding tax amount shall be deducted from the annual income tax. 50% of the dividend income received by resident individuals from Resident

Corporations is exempt from the annual income declaration. The remaining 50% must be declared if it exceeded TRY 40,000 in 2019, TRY 34,000 in 2018 and TRY 30,000 in 2017 and 2016.

Under the Income Tax Treaty between the United States of America and the Republic of Turkey, signed March 28, 1996 (the Treaty), the withholding tax rate is limited to 20% (including the surcharges on dividends paid by a Turkish Resident Corporation) of the gross amount of the dividends unless the beneficial owner of shares is a company which owns at least 10% of the voting stock of the company paying the dividends (in which case the rate would be limited to 15%). Because the current withholding tax rate applicable to publicly-traded corporations, such as Turkcell, is only 15%, the Treaty does not affect the current rate of Turkish withholding tax for U.S. holders. Cash dividends paid on ordinary shares or ADSs to a U.S. holder that does not have a permanent representative or place of business in Turkey will not be subject to taxation in Turkey, except in respect of the 15% income withholding tax discussed in the previous section. The distribution of dividends in kind (*i.e.*, bonus shares) is not subject to a withholding tax, and such dividends in kind are not subject to an income declaration.

Table of Contents

c. Taxation of Capital Gains

(i) Gains realized by Residents

For shares acquired on or after January 1, 2006:

Gains realized by resident individuals on the sale of shares traded on the Borsa Istanbul (such as Turkcell shares) or ADSs that represent shares traded on the Borsa Istanbul (such as Turkcell ADSs) to residents or non-residents are exempt from income tax, provided that the holding period of such shares or ADSs exceeds one year. Where this holding period has not been met, there is a withholding tax from the gains derived from capital. The current rate for such withholding tax is 0%.

Gains realized by Resident Corporations on the sale of shares traded on the Borsa Istanbul (such as Turkcell shares) or ADSs that represent shares traded on the Borsa Istanbul (such as Turkcell ADSs) to residents or non-residents shall benefit from the withholding exemption, if a one-year holding period is met. However, where this holding period has not been met, there is a withholding tax from the gains derived from capital gains. The current rate for such withholding tax is 0%.

Gains realized by Resident Corporations on the sale of shares or to residents or non-residents must be included in corporate income and are subject to the applicable corporate tax. Upon fulfillment of the stated conditions in Article 5 of the Corporate Tax Law, 75% of capital gains derived from the sale of the shares will be exempt from corporate income tax.

For shares acquired before January 1, 2006:

Capital gains derived from shares held by an investor (both individuals and corporations) for over three months are not subject to any withholding tax.

Gains realized by Resident Corporations on the sale of shares are subject to the applicable corporate tax. Upon fulfillment of the stated conditions in Article 5 of the Corporate Tax Law, 75% of capital gains deriving from the sale of the shares will be exempt from corporate income tax.

(ii) Gains realized by U.S. holders

U.S. holders that do not have a permanent establishment in Turkey are exempt from Turkish tax on capital gains generated from the sale of shares quoted on an exchange, such as Turkcell shares, under Article 13 of the Treaty. U.S. resident legal entities having a permanent establishment (fixed place of business or permanent representative) in Turkey generally are subject to tax in Turkey on capital gains arising from the sale of such shares and should consult their own Turkish tax advisors as to the rules applicable to them. As of July 7, 2006, the withholding tax rate applicable to non-resident holders of shares has been reduced to 0%.

U.S. holders who invest via ADSs will not have to comply with any procedures to avoid withholding tax, since gains derived from Turkcell ADSs are not generated in Turkey. However, U.S. holders who hold their shares directly in Turkey must comply with certain procedures to establish their exemption from Turkish capital gains withholding tax and are urged to consult their own tax advisors in this regard.

In addition, certain rules and procedures may need to be complied with in order to avoid Turkish withholding tax upon the conversion of ADSs to shares and from shares to ADSs in Turkey. U.S. holders are urged to consult their own tax

advisors in this regard.

Pursuant to a Turkish Constitutional Court decision, which annulled the income tax provision regulating the 0% withholding application on capital gains for non-resident individuals and corporations, the withholding tax regime has once again become subject to regulation pursuant to a law numbered 6009, which came into force on August 1, 2010. Pursuant to this new regulation, a 10% withholding on capital gains is applied to individual investors and a 0% withholding is applied to corporate investors, irrespective of the residency status. Non-resident corporate deposit receipt holders (depositories of our ADR facility) are included within the scope of corporate investors. Non-resident investors of Turkcell ADRs will be subject to 0% withholding, provided that the depository of our ADR facility is a corporate body. The Turkish Council of Ministers has the authority to raise the withholding levels to 5 percentage points.

Table of Contents

d. Taxation of Investment and Mutual Funds

(i) Taxation on the Fund Level:

The gains realized from portfolio investment activities by resident Investment and Mutual Funds are exempt from corporate tax but are subject to withholding tax for the gains of stocks held and bonds/bills issued before January 1, 2006. Withholding tax rates are as follows:

if the institutions maintain a minimum of 25% of their portfolios invested in Turkish equity shares on a monthly weighted average basis, the applicable rate of withholding tax is 0%; and

if the percentage of Turkish equity shares in the portfolios of such institutions is below 25% during any month during the year, the applicable rate of withholding tax is 10%.

Gains from stocks purchased after January 1, 2006 and/or bonds and bills issued after January 1, 2006 are subject to withholding of 0%.

A non-resident Investment or Mutual Fund may also qualify for this taxation regime if it appoints a permanent representative in Turkey, registers with the Turkish tax office, maintains legal books and meets the other tax requirements in Turkey.

(ii) Taxation on the Investor Level:

The gains realized by investors for participating within FUND are subject to taxation depending on the date of purchase of the FUND by the individual investors.

For FUND shares purchased before January 1, 2006, gains are not subject to income tax withholding. Capital gains received by individuals are computed by deducting the original cost of the shares after the application of a cost adjustment (which uses the Producer Price Index determined by the Turkish Statistical Institute to eliminate gains arising solely from inflation), from the amount received upon the sale or disposition of the shares. Total capital gains are subject to declaration on income tax returns if they exceeded TRY 34,000 in 2019, TRY 27,000 in 2018, TRY 24,000 in 2017 and 2016 and TRY 23,000 in 2015, and are required to be declared in compliance with the Turkish Tax Regime.

For FUND shares purchased after January 1, 2006:

1. If the FUND maintains at least 51% of the portfolio invested in the Borsa Istanbul Market and is held for more than a one-year period, gains shall not be subjected to withholding. Such gains shall be declared in compliance with the Turkish Tax Regime.
- 2.

If the FUND does not meet the conditions above, gains shall be subject to withholding at 10% for resident investors. In cases where non-resident investors can certify their own residency status, 0% withholding shall be applied.

3. Pursuant to a Turkish Constitutional Court decision, which annulled the income tax provision regulating the 0% withholding application on capital gains for non-resident individuals and corporations, the withholding tax regime has once again become subject to regulation pursuant to a law numbered 6009, which came into force on August 1, 2010. Pursuant to this new regulation, a 10% withholding on capital gains is applied to individual investors and a 0% withholding is applied to corporate investors, irrespective of the residency status. Non-resident corporate deposit receipt holders (depositories of our ADR facility) are included within the scope of corporate investors. Non-resident investors of Turkcell ADRs will be subject to 0% withholding, provided that the depository of our ADR facility is a corporate body.

e. Stamp Taxes

According to the Turkish Stamp Tax Law (Law No. 488), all agreements and documents specified in the law with a monetary value indicated thereon are subject to a stamp tax with rates from 0.189% to 0.948%, which is calculated on the aggregate amount of such agreement or document.

II. United States Federal Income Taxation

The following discussion is a summary of the material U.S. federal income tax considerations applicable to the ownership and disposition of shares or ADSs by you, if you are a U.S. holder. In general you will be a U.S. holder if:

you are the beneficial owner of our shares or ADSs;

Table of Contents

you are either (i) an individual resident or citizen of the United States, (ii) a corporation (or other entity taxable as a corporation for U.S. federal income tax purposes) created in or organized under the laws of the United States, any state thereof or the District of Columbia, (iii) an estate whose income is subject to U.S. federal income taxation regardless of its source, or (iv) a trust if a U.S. court can exercise primary supervision over the administration of the trust and one or more U.S. persons are authorized to control all substantial decisions of the trust;

you own our shares or ADSs as capital assets (which generally means for investment purposes);

you own directly, indirectly or by attribution less than 10% (by vote or value) of our outstanding share capital or voting stock;

you are fully eligible for benefits under the Limitation on Benefits article of the Treaty; and

you are not also a resident of Turkey for Turkish tax purposes.

The Treaty benefits discussed generally are not available to holders who hold shares or ADSs in connection with the conduct of business through a permanent establishment, or the performance of personal services through a fixed base, in Turkey.

If a partnership (including for this purpose any entity or arrangement treated as a partnership for U.S. federal income tax purposes) holds shares or ADSs, the tax treatment of a partner generally will depend upon the status of the partner and the activities of the partnership. A partner in a partnership that holds shares or ADSs is urged to consult its own tax advisor regarding the specific tax consequences of owning and disposing of its shares or ADSs.

The summary does not purport to be a comprehensive description of all of the tax considerations that may be relevant to any particular holder, including tax considerations that arise from rules of general application or that are generally assumed to be known by U.S. holders. This summary is based on provisions of the Internal Revenue Code of 1986, as amended (the Code), existing and proposed U.S. Treasury Regulations, rulings, administrative pronouncements, judicial decisions and the Treaty, all as of the date of this annual report. All of these authorities are subject to change, possibly with retroactive effect, and to differing interpretations. In addition, this summary does not discuss all aspects of U.S. federal income taxation that may be applicable to investors in light of their particular circumstances or to U.S. holders who are subject to special treatment under U.S. federal income tax law, including insurance companies, U.S. expatriates, dealers in stocks or securities, banks or financial institutions, tax-exempt organizations, regulated investment companies, retirement plans, traders in securities who elect to apply a mark-to-market method of accounting, persons who acquired their shares pursuant to the exercise of employee stock options or otherwise as compensation, persons holding shares as part of a straddle, hedging or conversion transaction, persons subject to the alternative minimum tax, and persons having a functional currency other than the U.S. Dollar.

U.S. holders are urged to consult with their own tax advisors regarding the tax consequences of the ownership or disposition of shares or ADSs, including the effects of federal, state, local, foreign and other tax laws with respect to their particular circumstances.

a. Dividends

If we make distributions to you, you generally will be required to include in gross income as dividend income the amount of the distributions paid on the shares (including the amount of any Turkish taxes withheld in respect of such dividend as described above in *Taxation Republic of Turkey Taxation*). Dividends paid by us will not be eligible for the dividends-received deduction applicable in some cases to U.S. corporations.

Any dividend paid in Turkish Lira, including the amount of any Turkish taxes withheld therefrom, will be includible in your gross income in an amount equal to the U.S. Dollar value of the Turkish Lira calculated by reference to the spot rate of exchange in effect on the date the dividend is received by you, in the case of shares, or by the Depositary, in the case of ADSs, regardless of whether the Turkish Lira are converted into U.S. Dollars. Any gain or loss resulting from currency exchange fluctuations during the period from the date the dividend is includible in your gross income to the date such payment is converted into U.S. Dollars generally will be treated as U.S.-source ordinary income or loss. Special rules govern, and elections are available to, accrual method taxpayers to determine the U.S. Dollar amount includible in income in the case of taxes withheld in a foreign currency. Accrual basis taxpayers are urged to consult their own tax advisors regarding the requirements and elections applicable in this regard.

Any dividends paid by us to you with respect to shares or ADSs will be treated as foreign-source income and generally will be categorized as *passive category income* or, in the case of certain U.S. holders, *general category income* for foreign tax credit purposes.

Table of Contents

Subject to limitations, you may elect to claim a foreign tax credit against your U.S. federal income tax liability for Turkish income tax withheld from dividends received in respect of shares or ADSs. The rules relating to the determination of the foreign tax credit are complex. Accordingly, you should consult your own tax advisor to determine whether and to what extent you would be entitled to the credit. If you do not elect to claim a foreign tax credit, you may instead claim a deduction for Turkish income tax withheld, but only for a year in which you elect to do so with respect to all foreign income taxes. A deduction does not reduce tax on a dollar-for-dollar basis like a credit, but the deduction for foreign taxes is not subject to the same limitations applicable to foreign tax credits.

Certain non-corporate U.S. holders (including individuals) are eligible for reduced rates of U.S. federal income tax in respect of qualified dividend income received. For this purpose, qualified dividend income generally includes dividends paid by a non-U.S. corporation if, amongst other things, the U.S. holder meets certain minimum holding periods and the non-U.S. corporation satisfies certain requirements, including that either (i) the shares (or ADSs) with respect to which the dividend income has been paid are readily tradable on an established securities market in the United States or (ii) the non-U.S. corporation is eligible for the benefits of a comprehensive U.S. income tax treaty (such as the Treaty) which provides for the exchange of information. We currently believe that dividends paid with respect to our shares and ADSs should constitute qualified dividend income for U.S. federal income tax purposes, and we anticipate that our dividends will be reported as qualified dividends on Forms 1099-DIV delivered to U.S. holders. In computing foreign tax credit limitations, non-corporate U.S. holders may take into account only a portion of a qualified dividend to reflect the reduced U.S. tax rate applicable to such dividend. Each U.S. holder of shares or ADSs is urged to consult its own tax advisor regarding the availability to it of the reduced dividend tax rate in light of its own particular situation and regarding the computations of its foreign tax credit limitation with respect to any qualified dividend income paid by us, as applicable.

The U.S. Treasury has expressed concerns that parties to whom ADSs are released may be taking actions that are inconsistent with the claiming of foreign tax credits or reduced tax rates in respect of qualified dividends by U.S. holders of ADSs. Accordingly, the discussion above regarding the creditability of Turkish withholding tax on dividends or the availability of qualified dividend treatment could be affected by future actions that may be taken by the U.S. Treasury with respect to ADSs.

b. Sale, Exchange or other Disposition of Shares or ADSs

Upon the sale, exchange or other disposition of shares or ADSs, you generally will recognize capital gain or loss equal to the difference between the amount realized on the disposition and your adjusted tax basis in your shares or ADSs (as determined in U.S. Dollars). Gain or loss upon the disposition of shares or ADSs generally will be U.S.-source gain or loss, and will be treated as long-term capital gain or loss if, at the time of the disposition, your holding period for the shares or ADSs exceeds one year. If you are an individual, capital gains generally will be subject to U.S. federal income tax at preferential rates if specified minimum holding periods are met. The deductibility of capital losses is subject to significant limitations.

The surrender of ADSs in exchange for shares pursuant to the Deposit Agreement governing the ADSs will not be a taxable event for U.S. federal income tax purposes. Accordingly, you will not recognize any gain or loss upon such surrender.

c. Net Investment Income Tax

Certain U.S. holders that are individuals, estates or trusts and whose income exceeds certain thresholds generally will be subject to a 3.8% tax on net investment income, including, among other things, dividends on, and gains from the sale or other taxable disposition of, our shares or ADSs, subject to certain limitations and exceptions. You should

consult your own tax advisor regarding the effect, if any, of such tax on your ownership and disposition of our shares or ADSs.

d. *Passive Foreign Investment Company Status*

We currently believe that we were not a passive foreign investment company (a PFIC) for U.S. federal income tax purposes for the taxable year ending December 31, 2018. However, this conclusion is a factual determination that must be made annually and thus may be subject to change. Therefore, it is possible that we could be classified as a PFIC in the future due to changes in our operations, the composition of our assets or income, as well as changes in market capitalization. In general, a non-U.S. corporation will be classified as a PFIC for any taxable year if at least 75% of its gross income consists of passive income (such as dividends, interest, rents, royalties or gains on the disposition of certain minority interests), or at least 50% of the average value of its assets consists of assets that produce, or are held for the production of, passive income. If we were characterized as a PFIC for any taxable year, you would suffer adverse tax consequences. These consequences may include having gains realized on the disposition of shares or ADSs treated as

Table of Contents

ordinary income rather than capital gains, and being subject to punitive interest charges on certain dividends and on the proceeds of the sale or other disposition of the shares or ADSs. Furthermore, dividends paid by a PFIC would not be qualified dividend income (as discussed above) and would be taxed at the higher rates applicable to other items of ordinary income. You should consult your own tax advisor regarding the potential application of the PFIC rules to us and to your ownership of our shares or ADSs.

e. U.S. Information Reporting and Backup Withholding

Dividend payments with respect to shares or ADSs and proceeds from the sale, exchange, redemption or other taxable disposition of shares or ADSs may be subject to information reporting to the Internal Revenue Service (the IRS) and possible U.S. backup withholding at a current rate of 24%. Certain exempt recipients (such as corporations) are not subject to these information reporting requirements. Backup withholding will not apply, however, to a holder who furnishes a correct taxpayer identification number or certificate of foreign status and makes any other required certification or who is otherwise exempt from backup withholding. U.S. persons who are required to establish their exempt status generally must provide IRS Form W-9 (Request for Taxpayer Identification Number and Certification). Non-U.S. holders generally will not be subject to U.S. information reporting or backup withholding. However, such holders may be required to provide certification of non-U.S. status (generally on IRS Form W-8BEN or W-8BEN-E, as applicable) in connection with payments received in the United States or through certain U.S.-related financial intermediaries.

Backup withholding is not an additional tax. Amounts withheld as backup withholding may be credited against a holder's U.S. federal income tax liability, and a holder may obtain a refund of any excess amounts withheld by filing the appropriate claim for refund with the IRS and furnishing any required information.

In addition, U.S. holders should be aware of annual reporting requirements with respect to the holding of certain foreign financial assets, including our shares and ADSs that are not held in an account maintained by certain types of financial institutions, if the aggregate value of all of such assets exceeds \$50,000 (or \$100,000 for married couples filing a joint return). You should consult your own tax advisor regarding the application of the information reporting and backup withholding rules to our shares and ADSs and the application of the annual reporting requirements to your particular situation.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

I. Overview

We are exposed to foreign exchange rate risks because our income, expenses, assets and liabilities are denominated in a number of different currencies, primarily Turkish Lira, U.S. Dollars, Euros, Chinese Yuan, Ukrainian Hryvnia, Azerbaijani Manat and Belarusian Rubles. In particular, a substantial majority of our debt obligations and equipment expenses are currently, and are expected to continue to be, denominated in U.S. Dollars and Euros, while the revenues generated by the corresponding activities are denominated in other currencies, in particular the Turkish Lira, Ukrainian Hryvnia and Belarusian Rubles. Similarly, we are subject to market risk deriving from changes in interest rates that may affect the cost of our financing and also liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. We provide a detailed analysis of our foreign exchange interest rate and liquidity risks in Note 35.

Table of Contents***a. Foreign Exchange Risk Management***

Our functional currency is the TRY for operations conducted in Turkey, but certain revenues, purchases, operating costs and expenses and resulting receivables and payables are denominated in a number of different currencies. In particular, a substantial majority of our debt obligations and equipment expenses are currently, and are expected to continue to be, denominated in U.S. Dollars, and Euros, while the revenues generated by the corresponding activities are denominated in other currencies, in particular the Turkish Lira, Ukrainian Hryvnia and Belarusian Rubles. Transactions denominated in foreign currencies are recorded at the exchange rates prevailing at the dates of the transactions. Assets and liabilities denominated in foreign currencies are converted into functional currency at the exchange rates prevailing at the reporting date, with the resulting exchange differences recognized in the determination of net income. In 2015, net foreign exchange losses were mainly attributable to the foreign exchange losses in Belarusian Telecom operating in Belarus and in lifecell operating in Ukraine and amounted to TRY 1,197.7 million, resulting from transactions related to foreign exchange effects. Foreign exchange losses from Belarusian Telecom and lifecell exclude foreign exchange losses arising in the foreign operations individual financial statements which have been recognized directly in equity in the foreign currency translation differences in the consolidated financial statements in accordance with accounting policy for net investment in foreign operations.

Market risk-sensitive instruments consist of loans and borrowings mainly denominated in foreign currencies (substantially in U.S. Dollars and Euros) totaling TRY 20,156 million, which represents the majority of total indebtedness as of December 31, 2018.

To manage and hedge our foreign exchange risk more effectively, we used cross currency swaps contracts, participating cross currency swap contracts, currency forward contracts and we may enter into forward transactions and currency swap contracts and participating cross currency swap contracts in the future as well. In addition, in order to take advantage of market volatility in the foreign exchange markets and increase the yield on our free cash, we may enter into option transactions to buy or sell certain currencies, allowing us to mitigate our exposure to negative foreign exchange rate swings. See Note 35 (Financial Instruments) to our audited Consolidated Financial Statements included in Item 18. Financial Statements of this annual report on Form 20-F for additional details.

All hedging transactions have been authorized and executed pursuant to clearly defined policies and procedures, which provide that the transaction is entered into to protect us from fluctuations in currency values. Analytical techniques are used to manage and monitor foreign exchange risk, which includes market valuation and sensitivity analysis. In addition, we keep a significant proportion of our monetary assets in U.S. Dollars/Euros to reduce our currency exposure.

b. Interest Rate Risk Management

We are exposed to variations in interest rates, primarily in Euros, U.S. Dollars and TRY and UAH denominated debt and investments, which may affect the amounts of future interest income or expenses (reinvestment risk or cash flow risk) and also cause changes in the values of our interest-bearing assets, which have already been added to the statement of financial position. We manage interest rate risk by financing non-current assets with long-term debt with variable interest rates and equity. To hedge our interest rate risk, we utilize interest rate derivative structures considering the market levels. Turkcell started actively hedging its long term foreign exchange liabilities in 2016. Before hedging transactions, 84% of our debt was foreign currency denominated. Following the hedging, this ratio decreased to 42% and 85% of our financial debt had fixed interest rate. Also, we hold 100% of our TRY 7.419 billion cash & cash equivalents in hard currency.

Table of Contents

The following table sets forth the carrying amount and fair value of loans, maturities and average effective interest rates for bank loans.

	Effective interest rate	Total carrying amount	December 31, 2018				Fair Value	Effective interest rate	Total carrying amount	December 31, 2017			
			2019	2020	2021	2022 thereafter				2018	2019	2020	2021 thereafter
le													
ments													
red													
ans													
loating													
ns	4.3%	4,589.2	2,058.6	1,816.3	186.0	528.3	4,589.2	3.2%	2,880.6	779.0	981.6	1,120.0	2
loating													
ns	2.1%	6,975.9	2,466.1	1,557.4	654.5	2,297.9	6,975.5	2.1%	5,511.6	1,278.2	1,476.3	1,004.3	1,752.8

Table of Contents

For contractual cash flows and nominal interest of bank loans, see Note 28 and Note 35 to our audited Consolidated Financial Statements included in Item 18. Financial Statements of this annual report on Form 20-F.

We use sensitivity analysis techniques to measure and assess our interest rate risk. The basis for the sensitivity analysis is an aggregate corporate-level interest rate exposure composed of interest-bearing investments and interest-bearing debts. When we assume a 1 percentage point increase in interest rates for all maturities from their levels as of December 31, 2018, with all other variables held constant, our profit before income tax decreases by TRY 234.2 million.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

The Depositary may collect from (i) each person to whom ADSs are issued, including, without limitation, issuances against deposits of Shares, issuances in respect of Share Distributions, Rights and Other Distributions (as such terms are defined in the form of ADR certificate), issuances pursuant to a stock dividend or stock split declared by the Company, or issuances pursuant to a merger, exchange of securities or any other transaction or event affecting the ADSs or the Deposited Securities and (ii) each person surrendering ADSs for withdrawal of Deposited Securities or whose ADSs are cancelled or reduced for any other reason, U.S. \$5.00 for each 100 ADSs (or portion thereof) issued, delivered, reduced, cancelled or surrendered (as the case may be). The Depositary may sell (by public or private sale) sufficient securities and property received in respect of Share Distributions, Rights and Other Distributions prior to such deposit to pay such charge. These terms are set forth in Paragraph 7 of the Form of ADR certificate.

On July 6, 2011, we signed an amended and restated Deposit Agreement (the *Deposit Agreement*) with Citibank N.A. (*Citibank*), as depositary (the *Depositary*), Turkcell and holders of American Depositary Receipts, which transferred our ADR program from JPMorgan Chase Bank (*JPMorgan*) to Citibank. On July 1, 2016 the term was extended by another 5 years, until July 6, 2021.

As provided for in the American Depositary Receipt included as Exhibit A to the Deposit Agreement, holders of American Depositary Shares may be charged, directly or indirectly, the following amounts in relation to the ownership of depositary receipts held in the Company's ADR Program, which are payable to the Depositary:

Service	Rate	By Whom Paid
(1) Issuance of ADSs upon deposit of Shares (excluding issuances as a result of distributions described in paragraph (4) below).	Up to U.S. \$5.00 per 100 ADSs (or fraction thereof) issued.	Person depositing Shares or person receiving ADSs.
(2) Delivery of Deposited Securities against surrender of ADSs.	Up to U.S. \$5.00 per 100 ADSs (or fraction thereof) surrendered.	Person surrendering ADSs for the purpose of withdrawal of Deposited Securities or person to whom Deposited Securities are delivered.
(3) Distribution of cash dividends or other cash distributions (<i>i.e.</i> , sale of rights and other entitlements).	Up to U.S. \$5.00 per 100 ADSs (or fraction thereof) held.	Person to whom distribution is made.

(4) Distribution of ADSs pursuant to (i) stock dividends or other free stock distributions, or (ii) exercise of rights to purchase additional ADSs.	Up to U.S. \$5.00 per 100 ADSs (or fraction thereof) held.	Person to whom distribution is made.
(5) Distribution of securities other than ADSs or rights to purchase additional ADSs (<i>i.e.</i> , spin-off shares).	Up to U.S. \$5.00 per 100 ADSs (or fraction thereof) held.	Person to whom distribution is made.
(6) Depositary Services.	Up to U.S. \$5.00 per 100 ADSs (or fraction thereof) held on the applicable record date(s) established by the Depositary.	Person holding ADSs on the applicable record date(s) established by the Depositary.

I. Direct Payments made by Citibank to Turkcell

Citibank, as depositary, has agreed to reimburse certain reasonable expenses related to our ADR program and incurred by us in connection with such program. In 2018, the Depositary, as part of its agreement, reimbursed Turkcell \$ 3,485,637 on an accrual basis. The amounts the Depositary has reimbursed and will reimburse are not necessarily related to the fees collected by the depositary from ADR holders. The table below sets forth the type of expenses that Citibank has reimbursed.

Table of Contents

Category of Expenses	Amount Reimbursed in 2017
Investor Relations ⁽¹⁾	\$ 3,485,637

(1) This type of expense includes activities tailored to increase the company's ADR program, including, but not limited to, roadshows and training in the U.S., legal costs connected with 20-F filing and ongoing SEC compliance and legal requirements and listing fees.

II. Indirect Payments made by Citibank to Turkcell

As part of its service to Turkcell, Citibank has agreed to waive fees for the standard costs associated with the administration of our ADR program and associated operating expenses estimated to total \$65,554. The table below sets forth the fees that Citibank has agreed to waive and/or expenses that Citibank has agreed to pay in the year ended December 31, 2018.

Category of Expenses	Amount Waived or Paid by Citibank for the period January 1, 2018 through December 31, 2018	
Third-party expenses paid directly	\$	62,229
Fees waived	\$	3,325

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

Not applicable.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

Not applicable.

ITEM 15. CONTROLS AND PROCEDURES

(a) *Disclosure Controls and Procedures.* The Chief Executive Officer and the Chief Financial Officer, after evaluating the effectiveness of the Company's disclosure controls and procedures (as defined in U.S. Exchange Act Rule 13a-15(e)) as of the end of the period covered by this annual report on Form 20-F, have concluded that, as of such date, the Company's disclosure controls and procedures were effective at a reasonable assurance level.

(b) *Management's Annual Report on Internal Control over Financial Reporting.* The management of Turkcell is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934), and for performing an assessment of the effectiveness of internal control over financial reporting as of December 31, 2018. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with applicable generally

accepted accounting principles. The Company's internal control over financial reporting includes those policies and procedures that:

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with applicable generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Internal control over financial reporting has inherent limitations. It is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. In addition, it can be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements will not be prevented or detected on a timely basis by internal controls over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design safeguards to reduce, though not eliminate, this risk.

Table of Contents

Management assessed the effectiveness of the internal control over financial reporting as of December 31, 2018 based on criteria established in the Internal Control-Integrated Framework (2013), issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on its assessment and those criteria, management has concluded that the Company s internal control over financial reporting was effective at the reasonable assurance level as of December 31, 2018.

The effectiveness of our internal control over financial reporting as of December 31, 2018 has been audited by PwC Bagimsiz Denetim ve Serbest Muhasebeci Mali Musavirlik A.S. (PwC), our independent registered public accounting firm in Turkey, as stated in their attestation report, which appears below under Item 15(c), Report of the Independent Registered Audit Company.

(c) Attestation Report of the Independent Audit Company.

PwC Bagimsiz Denetim ve Serbest Muhasebeci Mali Musavirlik A.S., the independent public accounting firm that audited the consolidated financial statements included in this annual report, has audited the effectiveness of internal control over financial reporting as of December 31, 2018. Their attestation report on internal control over financial reporting is included at page F-1 herein.

(d) Changes in Internal Control over Financial Reporting. There were no changes in connection with the evaluation required by Rule 13a-15(d) and Rule 15d-15 in the Company s internal control over financial reporting that occurred during the year ended December 31, 2018, that have materially affected, or are reasonably likely to materially affect, the Company s internal control over financial reporting. This conclusion has been made at a reasonable assurance level.

ITEM 16.

16.A Audit Committee Financial Expert

Currently no independent Audit Committee member is an audit committee financial expert , as that term is defined by the SEC in its final rules implementing Section 407 of the Sarbanes-Oxley Act of 2002, because, after self-evaluation, our Audit Committee members did not consider themselves, individually, as an audit committee financial expert . However, our Audit Committee members and our Board of Directors believe that our Audit Committee members are nonetheless qualified to carry out their duties on the Audit Committee given their experience and other qualifications in financial matters.

16.B Code of Ethics

We have adopted a code of ethics that applies to our Chief Executive Officer, Chief Financial Officer, and other executive officers and financial officers. An outlook of our code of ethics is posted on our website, www.turkcell.com.tr.

16.C Principal Accountant Fees and Services

PwC served as our independent registered public accountant for financial years ended December 31, 2018, 2017 and 2016. Our audited financial statements for the three year period ended December 31, 2018 appear in this annual report on Form 20-F. At our general meeting of shareholders which occurred on March 29, 2016, May 25, 2017 and March 29, 2018, PwC was appointed as our independent auditors for our 2016, 2017 and 2018 fiscal years

respectively.

The following table presents the aggregate fees for professional services and other services rendered by our auditors to us in 2018, 2017, and 2016.

	2018	2017	2016
	(Million TRY)		
Audit Fees ⁽¹⁾	4.6	4.3	3.7
Audit-Related Fees ⁽²⁾	1.2		1.0
Tax Fees			
All Other Fees ⁽³⁾			
Total	5.8	4.3	4.7

- (1) Audit Fees consist of fees billed for professional services pertaining to the audit of the Company's annual financial statements or services that are normally provided by the principal accountant in connection with statutory or regulatory filings or engagements.

Table of Contents

- (2) Audit-Related Fees consist of mainly new IFRs standard, treasury operations, Superonline IPO and hedge accounting audit procedures in 2018 and Global Tower IPO audit procedures in 2016 and comfort letter related costs for our bond issuance that are reasonably related to the performance of the audit or review of the Company's financial statements for previous periods.
- (3) All Other Fees consist of fees billed for products and services other than services provided under Audit and Tax Fees and Audit-Related Fees.

a. Audit Committee Pre-approval Policies and Procedures

Our Audit Committee has pre-approved all work performed by our external auditors for the year 2018 and it has not adopted blanket pre-approval policies and procedures.

16.D Exemptions from the Listing Standards for Audit Committees

Not applicable.

16.E Purchases of Equity Securities by the Issuer and Affiliated Purchasers

Period	Total Number of Shares Purchased	Average Price Paid per Share (in TRY)	Total Number of Shares Purchased as Part of Publicly Announced Plan		TRY Value of Shares that May Be Purchased Under the Plan or Program ⁽¹⁾
			Total Number of Shares Purchased	Percentage of Total Number of Shares Purchased	
12-24 July 2018	2,560,479	11.14	2,560,479	100%	205,865,434
15-16 August 2018	2,381,400	10.50	4,941,879	207%	180,870,548
5 October 2018	924,000	10.82	5,865,879	254%	170,872,123
14-27 December 2018	2,568,325	12.11	8,434,204	328%	139,778,316

- (1) This calculation does not include Eurobond buy-back transactions. Between May 4, 2018 and August 7, 2018 our Company purchased Eurobonds (XS1298711729) with a total nominal value of USD 15.5 million (amounting to approximately TRY 81.5 million as of December 31, 2018) therefore the TRY Value of Shares that May Be Purchased Under the Plan or Program should be reduced by purchased Eurobonds amount. These amounts also do not include the Board's buyback decision on January 30, 2016.

Between August 24, 2016 and December 30, 2016, our company bought back its 6,815,563 shares in total.

On January 30, 2017, the Company's Board of Directors has decided to increase the above mentioned fund amount to TRY 300 million in order to be utilized for share buy-backs, including American Depositary Receipts (ADRs) being traded at the New York Stock Exchange (NYSE). In 2017, there were no buy-backs and we did not utilize this fund.

In 2018, share buy-backs amounted to TRY 94,620 thousand, and our ratio of shares in company capital has reached 0.693%.

16.F Change in Registrant's Certifying Accountant

Incorporated by reference to our annual report on Form 20-F filed on March 18, 2016.

16.G Corporate Governance

I. Significant Differences in Corporate Governance Practices

Matters related to corporate governance in Turkey are regulated by the new Turkish Commercial Code (TCC), which came into force on July 1, 2012 and the new law and regulations and communiqués of the CMB, the regulatory and supervisory authority, all of which are binding upon publicly held companies.

Table of Contents

In addition, corporate governance practices in Turkey are also guided by the Corporate Governance Principles of the CMB (the CMB Principles), which took effect on a comply or explain basis on January 1, 2004. Since 2005, the CMB requires listed companies to incorporate in their annual reports a Corporate Governance Compliance Report which compares the CMB Principles to the Corporate Governance principles under which the Company operates. This report is posted on our website, www.turkcell.com.tr. On January 10, 2019 the CMB introduced a new reporting format in compliance with corporate governance principles for publicly listed companies. As of this date, the reporting format previously announced by the CMB by the Communiqué on Corporate Governance Principles II-17.1 was abolished. Accordingly, we have proceeded with the new reporting format and made the respective reporting by means of the Corporate Governance Compliance Report (CRF) which is used for the purpose of reporting the status of compliance with voluntary principles and the Corporate Governance Information Form (CGIF) which is prepared for the purposes of providing information on existing corporate governance practices. The reports are included in our annual report as well.

It is decided by the CMB that the companies must publish the same reports annually through the Public Disclosure Platform (PDP) within the financial statements announcement period and, in any case, at least three weeks prior to the date of the general assembly meeting. In the event of change with respect to the companies compliance with voluntary principles and any change in material information regarding the CGIF, the respective changes should be disclosed by revision of the templates under the PDP and these changes should also be included in the interim activity reports.

Effective in 2011, by way of various communiqués, the CMB revised its corporate governance principles with a view to strengthening the governance practices of listed companies. As a result, the CMB left the comply or explain approach to a limited extent and required listed companies to comply with certain corporate governance principles on a compulsory basis by June 30, 2012. In a further Communiqué dated September 13, 2012, the CMB empowered itself, effective until December 31, 2012, to take legal action before the relevant first instance court with a view to assure compliance with its corporate governance rules. No legal action has been taken there against our Company to the best of our knowledge. The new Capital Markets Law came into force on December 30, 2012. The Capital Markets Board is entitled by Article 17/2 to make decisions and perform actions accordingly on its own initiative in case time-bound compliance requirements relating to its corporate governance principles are not met in due time.

In a further Communiqué dated April 6, 2013, the CMB amended the corporate governance principles. The following rules have been added to the Communiqué:

If some or all of the Board members terms have ended and thereby compliance with the mandatory CMB Corporate Governance Rules cannot be established, the CMB will require the Board to call a general assembly meeting which must be held within 30 days. If a general assembly meeting cannot be called or a positive result cannot be reached at the general assembly meeting, the CMB, as per the new Capital Markets Law, will have the right to directly appoint the minimum number of Board members that meet independence criteria to achieve the necessary meeting and decision quorums. Those members terms of office will last until new appointments are made in accordance with the legislation. The new Board members will then make the necessary amendments to the Articles of Association to be in line with the mandatory CMB Corporate Governance Rules upon the approval of the CMB, which will be registered at the Trade registry.

If there are enough Board members to achieve such compliance, but there is not a positive result (at the Board or the general assembly meeting), then the CMB allows companies 30 days to take the

necessary action. If the necessary action to ensure compliance cannot be realized within the given period, the CMB will have the right to directly appoint the minimum number of Board members that meet independence criteria to achieve the necessary meeting and decision quorums. The new Board will then make the necessary amendments to the Articles of Association to be in line with the mandatory CMB Corporate Governance Rules upon the approval of CMB, which will be registered at the Trade Registry.

The Corporate Governance Communiqué numbered II-17.1, which was published in the Official Gazette dated January 3, 2014 kept the above-mentioned second rule and removed the first one.

The following summarizes new mandatory CMB requirements that would apply to our Company.

The main mandatory rules relating to board membership and board structure include:

The number of independent members in the Board shall not be less than one third of the total number of the members of the Board of Directors. In calculating the number of independent board members, a fraction would be rounded up to the nearest integer. In any case the number of the independent board members shall not be less than two. The term of office of independent members of the board of directors is up to three years. Such members are eligible to be nominated again and re-elected.

Table of Contents

Companies in the first group are required to notify the CMB of the independent member candidates at least 60 days prior to the planned General Assembly meeting at which the members will be elected. The CMB, having evaluated the independence of the candidates, is required to disclose its approval/disapproval within the next 30 days. Companies classified in the other two groups are not required to seek CMB approval. In view of the current relations between our controlling shareholders, our nomination process is currently handled directly by the CMB.

The CMB has updated its independence criteria for independent board members.

The following Board committees shall be established by listed companies:

Audit Committee (already existing at Turkcell Board level);

Corporate Governance Committee (already existing at Turkcell Board level);

Candidate Nomination Committee (already existing at Turkcell Board level);

Early Detection of Risks Committee (already existing at Turkcell Board level); and

Remuneration Committee (already existing at Turkcell Board level).

Committees should consist of two members at least. It is mandatory that both (in case of two-member committees) or the majority of the members of the committees be non-executive board members. Expert people who are not board members may be elected as committee members except for the Audit Committee. All of the members of the Audit Committee and the chairmen of the other committees shall be elected among the independent board members. The chief executive officer/general manager should not hold a position at the committees. Terms of reference, working principles and members of the committees shall be determined and disclosed to the public by the board of directors.

Mandatory rules relating to enhanced shareholder information:

General Assembly call content has been enhanced.

A written remuneration policy for board members and senior management must be prepared. This policy must be posted on the company's website and submitted at the ordinary General Assembly as a separate agenda item for information. Payment plans, such as stock options or those based on company performance, are not used in the remuneration of independent board members. Remuneration of independent board members must safeguard their level of independence.

There are mandatory rules relating to material transactions and related party transactions/guarantees to third parties.

Internal Corporate Governance Mechanisms Revamped:

On January 28, 2016, our board has adopted new charters for the audit, corporate governance, candidate nomination, compensation and early detection of risks committees along with Turkcell Group Anti-Bribery and Anti-Corruption Policy. The same day, our board has also adopted Turkcell's Internal Directive on the Operations of the Board of Directors.

Below is a summary of the significant differences between our corporate governance practices and those that would apply to U.S. companies under the NYSE corporate governance rules as of March 10, 2016:

NYSE Corporate Governance Rule for U.S. Issuers

Listed companies must have a majority of independent directors.

Our Practice as a Foreign Private Issuer

Our Board currently has three members who are deemed to meet the independence standards of both the SEC and CMB Principles. Under the CMB Principles, it is required to have a board comprised of at least one-third independent members (or, in any event, two members).

See Item 6. Directors, Senior Officers and Employees Directors and Senior Management Board Members .

Ahmet Akca, Atilla Koc and Mehmet Hilmi Guler have been appointed by the CMB as independent board members. As per the letter of Capital Markets Board dated March 8, 2019, Mr. Ahmet Akca, Mr. Atilla Koc and Mr. Mehmet Hilmi Guler will continue to serve as independent Board Members.

Table of Contents

NYSE Corporate Governance Rule for U.S. Issuers

The non-management directors of each company must meet at regularly scheduled executive sessions without management.

Listed companies must have a nominating/corporate governance committee composed entirely of independent directors, with a written charter that provides for (i) minimum duties, which are to identify individuals qualified to become board members, consistent with criteria approved by the board, and to select, or to recommend that the board select, the director nominees for the next annual meeting of shareholders; develop and recommend to the board a set of corporate governance guidelines applicable to the corporation; and oversee the evaluation of the board and management; and (ii) an annual performance evaluation of the committee.

Listed companies must have a compensation committee composed entirely of independent directors, with a written charter that covers certain minimum specified duties.

Listed companies must have an audit committee that satisfies requirements set forth in Exchange Act Rule 10A-3 and additional requirements, including: (i) a minimum of three members; (ii) independence as defined in NYSE Rule 303A.02; and (iii) a written charter that addresses minimum duties in addition to those required by Exchange Act Rule 10A-3.

Our Practice as a Foreign Private Issuer

Turkish law does not make any distinction between management and non-management directors. However there is a distinction between executive/nonexecutive board members. Our board members are all non-executive members. Members of the board who are not also members of management do not meet in regularly scheduled executive sessions.

On June 23, 2004, our Board of Directors established a Corporate Governance Committee. Both Corporate Governance and Candidate Nomination Committees have their written charters which were renewed by the Board of Directors on January 28, 2016, specifying their duties. According to the CMB Principles, only committee chairs are required to be independent as defined by the Principles themselves.

The charter substantially satisfies the minimum requirements of the NYSE corporate governance rules.

On December 19, 2012, in conformity with the Capital Markets Board's Communiqué then in force, our Board decided to establish a Compensation Committee to operate under our Board of Directors. The Board also adopted the Compensation Committee's Charter which was renewed by the Board on January 28, 2016. The Board approved that the Compensation Committee shall execute the duties relating to compensation issues which were earlier granted to the Corporate Governance Committee by the Corporate Governance Committee Charter and the Compensation Committee shall be authorized in lieu of the Corporate Governance Committee in Total Remuneration Policy of the Board of Directors and Top Executives adopted by our Board.

Our Audit Committee currently has three members: Mr. Ahmet Akca, Mr. Mehmet Hilmi Guler and Mr. Atilla Koc. All of the members are considered independent under the U.S. Sarbanes Oxley Act of 2002, the rules promulgated thereunder by the U.S. Securities and Exchange Commission, the applicable rules of the NYSE and the updated CMB Corporate Governance Principles.

The Audit Committee members are independent Board members as required by the relevant CMB Communiqué which is binding upon public companies in Turkey. Effective June 30, 2012, all

listed companies in Turkey must have audit committees composed of independent board members. We are currently in compliance. Under Turkish law, our entire Board of Directors is responsible for all decisions; as a result, the Audit Committee's duties are advisory. Pursuant to Turkish law, our external auditor is nominated by the Board of Directors upon advice of the Audit Committee and approved by our general assembly of shareholders.

Table of Contents

NYSE Corporate Governance Rule for U.S. Issuers

Our Practice as a Foreign Private Issuer

The Audit Committee revised its charter, effective June 20, 2005 and reviewed both Turkcell Common Values and Business Ethics Document and Implementation of Turkcell Common Values and Business Ethics Rules in order to comply with the requirements of applicable CMB legislation and Exchange Act Rule 10A-3 and NYSE 303A.06. There was a second revision, effective July 21, 2006, to reconsider membership criteria. The third revision occurred on January 28, 2016. Our Audit Committee charter satisfies the requirements of the CMB. The charter does not provide for: an audit committee report to be included in Turkcell's annual proxy statement as it is not subject to the SEC proxy requirements; a review with the independent auditor of problems or difficulties and management's responses thereto, although such review is not prohibited by the charter; the discussion of policies with respect to risk assessment and risk management, although such discussion is not prohibited by the charter; the review by the committee of Turkcell's earnings releases or financial information or earnings guidance provided to analysts and ratings agencies; or the setting of clear hiring policies for employees or former employees of the independent auditors, although it does provide that the Audit Committee shall ensure that the independent auditors remain independent and avoid any conflicts of interest while performing their duties.

Listed companies must adopt and disclose corporate governance guidelines that cover certain minimum specified subjects.

We are not required specifically by the CMB Principles to adopt corporate governance guidelines. However, our Board of Directors has adopted Corporate Governance Guidelines and posted a summary on its official website www.turkcell.com.tr. Our corporate governance guidelines largely cover the subjects requested by the NYSE corporate governance standards except director qualification standards and director compensation.

We have further adopted an internal directive on the operations of the board of directors in order to regulate the operations of the board and principles on the exercise of its duties and authorities, and to increase cooperation with management in order to fulfill the Company's duties as stipulated by the legislation faster, efficiently and easily, and to ensure exercise of authorities granted and eliminate reservations while exercising authority. The new Internal directive mainly

covers subjects related to board and management structure, relationships between them, working principles of the board, duties and responsibilities and other related subjects.

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

1. Reporting entity

Turkcell Iletisim Hizmetleri Anonim Sirketi (the Company) was incorporated in Turkey on 5 October 1993 and commenced its operations in 1994. The address of the Company's registered office is Maltepe Aydinevler Mahallesi Inonu Caddesi No: 20, Kucukyali Ofispark/Istanbul. It is engaged in establishing and operating a Global System for Mobile Communications (GSM) network in Turkey and regional states.

In April 1998, the Company signed a license agreement (the 2G License) with the Ministry of Transport and Infrastructure of Turkey (the Turkish Ministry), under which it was granted a 25 year GSM license in exchange for a license fee of \$500,000. The License permits the Company to operate as a stand-alone GSM operator and releases it from some of the operating constraints in the Revenue Sharing Agreement, which was in effect prior to the 2G License. Under 2G licence, the Company pays in cash the Undersecretariat of the Treasury (the Turkish Treasury) a monthly tax levy namely treasury share equal to 15% of the Company's gross revenue from Turkish GSM operations. The Company continues to build and operate its GSM network and is authorized to, among other things, set its own tariffs within certain limits, charge peak and off-peak rates, offer a variety of service and pricing packages, issue invoices directly to subscribers, collect payments and deal directly with subscribers. Following the 3G tender held by the Information Technologies and Communications Authority (ICTA) regarding the authorization for providing IMT-2000/UMTS services and infrastructure, the Company has been granted the A-Type license (the 3G License) providing the widest frequency band, at a consideration of EUR 358,000 (excluding Value Added Tax (VAT)). Payment of the 3G license was made in cash, following the necessary approvals, on 30 April 2009.

On 26 August 2015, Authorization Tender on IMT Services and Infrastructure publicly known as 4.5G license tender, was held by the ICTA and the Company was awarded with a total frequency band of 172.4 MHz for 13 years. The tender price is EUR 1,623,460 (excluding VAT of 18%). IMT authorization period expires on 30 April 2029 and operators were able to commence service delivery for 4.5G starting from 1 April 2016. 2x1.4 MHz frequency band in 900MHz spectrum and 2 units of 2x5 MHz frequency bands in 2100 MHz spectrum were commenced on 1 December 2015, while remaining packages were commenced on 1 April 2016. For details please refer to Note 12.

The Company is obliged to pay the ICTA a monthly treasury share equal to 90% of 15% of gross revenue and 10% is paid for a universal service fund. In addition, the Company pays annual contributions in an amount equal to 0.35% of net revenue to the ICTA's expenses and 5% of net revenue to ICTA as a frequency fee (TRx).

The Company's parent is Turkcell Holding A.S., which holds 51% of the Company's shares as of 31 December 2018. The main shareholders of Turkcell Holding A.S. are TeliaSonera Finland Oyj (Sonera), Cukurova Group and Alfa

Telecom Turkey Limited (Alfa) according to the information obtained from public sources.

After failure to comply with corporate governance principles for election of independent board members, the CMB appointed 3 independent board members and 4 members, of which 2 members were chosen from the independent nominees list submitted by Sonera, as board members who satisfy the independence criteria in 2013. On 29 March 2018, in accordance with the shareholder proposal at the Ordinary General Assembly, 3 new members were elected to serve for 3 years instead of 3 members who are appointed by the CMB and meet the independence criteria. Since a member of board of directors resigned from his assignment as of 11 July 2018, Turkcell 's Board of Directors consists of a total of 6 non-executive members including 3 independent members as of 31 December 2018.

TURKCELL İLETİSİM HİZMETLERİ AŞ

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

1. Reporting entity (continued)

The consolidated financial statements of the Company as at and for the year ended 31 December 2018 comprise the Company and its subsidiaries (together referred to as the Group) and the Group's interest in associates and a joint venture. Subsidiaries of the Company, their locations and their nature of operations are disclosed in Note 39. The Company's and each of its subsidiaries' and associate's financial statements are prepared as at and for the year ended 31 December 2018.

2. Basis of preparation and summary of significant accounting policies

This note provides a list of the significant accounting policies adopted in the preparation of these consolidated financial statements to the extent they have not already been disclosed in the other notes below. These policies have been consistently applied to all the years presented, unless otherwise stated. The consolidated financial statements are for the Group consisting of Turkcell İletişim Hizmetleri A.Ş. and its subsidiaries and the Group's interest in associates and a joint venture.

(a) Compliance with IFRS

The consolidated financial statements of the Group have been prepared in accordance with International Financial Reporting Standards (IFRS) and interpretations issued by the IFRS Interpretations Committee (IFRS IC) applicable to companies reporting under IFRS. The financial statements comply with IFRS as issued by the International Accounting Standards Board (IASB).

The accounting policies, presentation and methods of computation are consistent with those of the previous financial year and corresponding reporting period, unless otherwise stated.

The Group adopted IFRS 9, Financial Instruments and IFRS 15, Revenue from Contracts with Customers for the first time for the year commencing 1 January 2018. The Group also elected to early adopt IFRS 16, Leases for the first time for the year commencing 1 January 2018.

The impacts of adoption of IFRS 9, IFRS 15 and IFRS 16 on the consolidated financial statements are explained in Note 2.ae.i.

The General Assembly has the power to amend and reissue the financial statements. The consolidated financial statements as at and for the year ended 31 December 2017 were authorized for issue by the Board of Directors on 15 February 2018.

The consolidated financial statements as at and for the year ended 31 December 2018 were authorized for issue by the Board of Directors on 20 February 2019 and updated to reflect subsequent events after the original date of authorisation for inclusion in its annual report on Form 20-F.

(b) Historical cost convention

The accompanying consolidated financial statements are based on the statutory records, with adjustments and reclassifications for the purpose of fair presentation in accordance with IFRS as issued by the IASB. The financial statements have been prepared on a historical cost basis, except for the following measured at fair value:

Derivative financial instruments

Consideration payable in relation to the acquisition of Belarusian Telecom

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(c) Functional and presentation currency

(i) Transactions and balances

Transactions denominated in foreign currencies are translated into the functional currency using the exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated into the functional currency using the exchange rates at that date.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities such as equities held at fair value through profit or loss are recognised in profit or loss as part of the fair value gain or loss and translation differences on non-monetary assets such as equities classified as at fair value through other comprehensive income are recognised in other comprehensive income.

Foreign exchange gains and losses are recognized in profit or loss, except:

For capitalized foreign exchange differences relating to borrowings to the extent that they are regarded as an adjustment to interest costs eligible for capitalization.

Foreign exchange differences are deferred in equity if they relate to qualifying cash flow hedges and qualifying net investment hedges or are attributable to part of the net investment in a foreign operation. Foreign exchange gains and losses are presented in the statement of profit or loss on a net basis within finance income or finance costs.

(ii) Foreign operations

The results and financial position of foreign operations (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet

income and expenses for each statement of profit or loss and statement of comprehensive income are translated at average monthly exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions), and

all resulting exchange differences are recognized in other comprehensive income and accumulated in the foreign currency translation reserve, in equity.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities, and of borrowings and other financial instruments designated as hedges of such investments, are recognized in other comprehensive income. When a foreign operation is sold or any borrowings forming part of the net investment are repaid, the associated exchange differences are reclassified to profit or loss, as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(d) Use of estimates and judgments

The preparation of the consolidated financial statements requires the use of accounting estimates. Management also needs to exercise judgement in applying the Group's accounting policies. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements are described below:

Allowance for doubtful receivables

The Group maintains an allowance for doubtful receivables for estimated losses resulting from the inability of the Group's subscribers and customers to make required payments. The Group bases the allowance on the likelihood of recoverability of trade receivables, receivables from financial services and other receivables; when there was objective evidence of impairment as a result of one or more events that occurred after the initial recognition of asset a loss event and that loss event had an impact on the estimated future cash flows of the financial asset or group of financial assets that could be reliably estimated. The allowance is periodically reviewed. The allowance charged to expenses is determined in respect of receivable balances, calculated as a specified percentage of the outstanding balance in each aging group, with the percentage of the allowance increasing as the aging of the receivable becomes older.

Capitalization and useful lives of assets

The useful lives and residual values of the Group's assets are estimated by management at the time the asset is acquired and regularly reviewed for appropriateness. The Group defines useful life of its assets in terms of the assets expected utility to the Group. This judgment is based on the experience of the Group with similar assets. In determining the useful life of an asset, the Group also follows technical and/or commercial obsolescence arising on changes or improvements from a change in the market. The useful lives of the telecommunication licenses are based on the duration of the license agreements.

Belarusian Telecom has 10 years of special GSM and UMTS services licenses acquired on 26 August 2008. In addition, the license period has been committed and signed for an additional 10 years for an insignificant fee. The amortization on the consolidated financial statements has been recognized on the assumption that the duration of the license would be extended. Starting from 1 March 2016, the license is valid from the date of the licensing authority's decision on its issue and for an unlimited period.

Gross versus net presentation of revenue

When the Group acts as principal in sale of goods or rendering of services, revenue from customers and costs with suppliers are reported on a gross basis. When the Group acts as agent in sale of goods or rendering of services, revenue from customer and costs with suppliers are reported on a net basis, representing the net margin earned. Whether the Group is acting as principal or agent depends on management's analysis of both legal form and substance of the agreement between the Group and its business partners; such judgements impact the amount of reported revenue and costs but do not impact reported assets, liabilities or cash flows.

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(d) Use of estimates and judgments (continued)

Contracted handset sales

The Company, the distributors and dealers offer joint campaigns to the subscribers which may include the sale of device by the dealer and/or distributor and a communication service to be provided by the Company. The Company does not recognize any revenue for the device in these transactions by considering the below factors:

the Company is not primary obligor for the sale of handset,

the Company does not have control over the sale prices of handsets,

the Company has no inventory risk,

the Company has no responsibility on technical compability of equipment delivered to customers

the responsibility after sale belongs to the distributor and

the Company does not make any modification on the equipment.

Multiple performance obligations and price allocation

In arrangements which include multiple elements where the Group acts as principal, the Group considers these bundled elements involve consideration in the form of a fixed fee or a fixed fee coupled with a continuing payment stream. A good or service is distinct if both of the following criteria are met:

the good or service is capable of being distinct

the promise to transfer the good or service is distinct within the context of the contract.

The arrangement consideration is allocated to each performance obligation identified in the contract on a relative stand-alone selling prices. If an element of a transaction is not a distinct, then it is accounted for as an integral part of the remaining elements of the transaction.

Income taxes

The calculation of income taxes involves a degree of estimation and judgment in respect of certain items whose tax treatment cannot be finally determined until resolution has been reached with the relevant tax authority or, as appropriate, through formal legal process.

As part of the process of preparing the consolidated financial statements, the Group is required to estimate the income taxes in each of the jurisdictions and countries in which they operate. This process involves estimating the actual current tax exposure together with assessing temporary differences resulting from differing treatment of items, such as deferred revenue and reserves for tax and accounting purposes. The Group management assesses the likelihood that the deferred tax assets will be recovered from future taxable income and to the extent the recovery is not considered probable the deferred asset is adjusted accordingly.

The recognition of deferred tax assets is based upon whether it is probable that future taxable profits will be available, against which the temporary differences can be utilized. Recognition, therefore, involves judgment regarding the future financial performance of the particular legal entity in which the deferred tax asset has been recognized.

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(d) Use of estimates and judgments (continued)

Provisions, contingent liabilities and contingent assets

As detailed and disclosed in Note 37, the Group is involved in a number of investigations and legal proceedings (both as a plaintiff and as a defendant) during the year arising in the ordinary course of business. All of these investigations and litigations are evaluated by the Group Management in accordance with IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* and disclosed or accounted in the consolidated financial statements. Future results or outcome of these investigations and litigations might differ from Group Management's expectations. As at the reporting date, the Group Management believes that appropriate recognition criteria and measurement basis are applied to provisions, contingent liabilities and contingent assets and that sufficient information is disclosed in the notes to enable users to understand their nature, timing and amount by considering current conditions and circumstances.

Annual impairment review

The Company tests annually whether goodwill and intangible asset not yet available for use have suffered any impairment in accordance with IAS 36 *Impairment of Assets*. Additionally, the carrying amounts of Company's nonfinancial assets are reviewed at each reporting date to determine whether there is an indication of impairment. If any indication exists the assets recoverable amount is estimated based on fair value less cost of disposal calculations. These calculations require the use of estimates as discussed in Note 13.

As at 31 December 2014, the Company has impaired its assets in Crimea region amounting to TL 19,897. As at 31 December 2018, there is no impairment on assets in Luhansk and Donetsk regions (31 December 2017: TL 10,872).

Current and potential future political and economic changes in Belarus and Ukraine could have an adverse effect on the subsidiaries operating in these countries. The economic stability of Belarus and Ukraine depends on the economic measures that will be taken by the governments and the outcomes of the legal, administrative and political processes in these countries. These processes are beyond the control of the subsidiaries established in these countries.

Consequently, the subsidiaries operating within Belarus and Ukraine may subject to foreign currency and interest rate risks related to borrowings, the subscriber's purchasing power, liquidity and increase in corporate and personal insolvencies, that may not necessarily be observable in other markets. The accompanying consolidated financial statements contain the Company management's estimations on the economic and financial positions of its subsidiaries operating in Belarus and Ukraine. The future economic situation of Belarus and Ukraine might differ from the Company's expectations. As at 31 December 2018, the Group's management believes that their approach is appropriate in taking all the necessary measures to support the sustainability of these subsidiaries' businesses in the current circumstances and the achievability of the financials projections used in the impairment assessments.

Fair value measurements and valuation processes

Some of the Company's assets and liabilities are measured at fair value for financial reporting purposes. In estimating the fair value of an asset or a liability, the Company uses market-observable data to the extent it is available. Where Level 1 and 2 inputs are not available, the Company can engage third party qualified experts to perform the valuation, if necessary. The management works closely with the qualified external experts to establish the appropriate valuation techniques and inputs to the model. Information about the valuation techniques and inputs used in determining the fair value of various assets and liabilities are disclosed in Note 35.

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(e) Changes in accounting policies

Other than the adoption of the new and revised standards as explained in Note 2(ae), the Group did not make any significant changes to its accounting policies during the current year.

As at 31 December 2018, interest expense/income and fair value of derivative financial instruments are shown netted off on consolidated statement of profit or loss (Note 8). The Company has presented financials of 31 December 2017 and 2016 accordingly. This classification has no impact on operating profit, profit for the year and cash flow statement.

Interest expense and income for derivative financial instruments and option premium charges are shown net of under finance income (Note 8).

(f) Changes in accounting estimates

If the application of changes in the accounting estimates affects the financial results of a specific period, the changes in the accounting estimates are applied in that specific period, if they affect the financial results of current and following periods; the accounting estimate is applied prospectively in the period in which such change is made. A change in the measurement basis applied is a change in an accounting policy, and is not a change in an accounting estimate.

The Company does not have significant changes in accounting estimates during the year.

(g) Comparative information and revision of prior period financial statements

The consolidated financial statements of the Group have been prepared consistent with prior periods.

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(h) Principles of consolidation and equity accounting

(i) Business combinations

Business combinations are accounted for using the acquisition method. The consideration transferred in a business combination comprises:

the fair value of the assets transferred

liabilities incurred to the former owners of the acquired business

equity interests issued by the Group

the fair value of any asset or liability resulting from a contingent consideration arrangement, and

the fair value of any pre-existing equity interest in the subsidiary.

Acquisition-related costs are expensed as incurred.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date.

Goodwill is measured as the excess of the consideration transferred, amount of any non-controlling interest in the acquired entity, and acquisition-date fair value of any previously held equity interest in the acquired entity over the fair value of the net identifiable assets acquired. If those amounts are less than the fair value of the net identifiable assets of the business acquired, the difference is recognized directly in profit or loss as a bargain purchase. The Group recognizes any non-controlling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value

or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets.

Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value with changes in fair value recognized in profit or loss. Contingent consideration classified as equity is not subject to remeasurement. Instead, any gain or loss at settlement is recorded as an adjustment to equity through other comprehensive income.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognized in profit or loss.

2. Basis of preparation and summary of significant accounting policies (continued)

(h) Principles of consolidation and equity accounting (continued)

(ii) Subsidiaries

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

Intercompany transactions, balances and unrealized gains on transactions between group companies are eliminated. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset.

Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of profit or loss, statement of comprehensive income, statement of changes in equity and statement of financial position respectively.

Non -controlling interest has not been attributed to Belarus Telekom on the grounds that net assets of Belarus Telekom is negative, Belarus Telekom is financed solely by the Company and management's assessment of relevant articles of the share purchase agreement with the non-controlling shareholder.

Turkcell Finansman A.Ş. (Turkcell Finansman) sold financial loans amounting to TL 87,589 to Aktif Yatırım Bankası A.Ş. Turkcell Varlık Finansmanı Fund (Fund) founded by Aktif Yatırım Bankası A.Ş. on 14 April 2017 in order to create funds for issuance of Asset Backed Securities (ABS) which will be issued by the Fund in a structure where Turkcell Finansman will act as the source organization. Turkcell Finansman similarly sold second financial loans amounting to TL 89,607 to Aktif Yatırım Bankası A.Ş. Turkcell Varlık Finansmanı Fund (Fund) founded by Aktif Yatırım Bankası A.Ş.

22 August 2017, third financial loans amounting to TL 90,272 on 16 February 2018 and fourth financial loans amounting to TL 56,716 on 20 December 2018. Turkcell Finansman transferred its contractual rights to receive cash flows from the financial loans that have been sold to the Fund resulting in de-recognition of the related assets from its consolidated financial statements. Moreover, the Company did not consolidate the Fund since the activities of the Fund are not controlled by the Company and the Fund has been defined as a structured entity.

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(h) Principles of consolidation and equity accounting (continued)

(iii) Changes in ownership interests

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to the non-controlling and any consideration paid or received is recognized in a separate reserve within equity attributable to owners of the Company.

When the Group ceases to consolidate or equity account for an investment because of a loss of control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value with the change in carrying amount recognized in profit or loss. This fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognized in other comprehensive income are reclassified to profit or loss.

If the ownership interest in a joint venture or an associate is reduced but joint control or significant influence is retained, only a proportionate share of the amounts previously recognized in other comprehensive income are reclassified to profit or loss where appropriate.

(iv) Business combinations under common control

Business combinations between entities or businesses under common control are excluded from the scope of IFRS 3. In a business combination under common control, assets and liabilities of the acquired entity are stated at predecessor carrying values. Any difference between the consideration given and the aggregate book value of the assets and liabilities of the acquired entity at the date of the transaction is recognized in equity. The acquired entity's results and financial position are incorporated as if both entities (acquirer and acquiree) had always been combined, or using the results from the date when either entity joined the Group, where such a date is later.

(v) Put option over shares relating to non-controlling interests

Where a put option is written by the Group on shares in an existing subsidiary held by non-controlling interests, the Group recognizes a financial liability at the present value of the redemption amount to reflect the put option. If the ownership risks and rewards of the shares relating to the put option is attributable to Group, the non-controlling interest is derecognized. The difference between the put option liability and the non-controlling interests derecognized is recognized in equity. For business combinations after 1 January 2009, subsequent changes in the fair value of the put option liability are recognized in profit or loss.

Reserve for put option over shares relating to non-controlling interests included in equity arises from the difference between the fair value of the put option written by Fintur Holdings B.V. (Fintur) on non-controlling shares in one of its subsidiaries and the derecognized non-controlling interests relating to that put option.

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(h) Principles of consolidation and equity accounting (continued)

(vi) Investments in associates and joint ventures

An associate is an entity over which the Group has significant influence, but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting after initially being recognized at cost.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. The results and assets and liabilities of joint ventures are incorporated in these consolidated financial statements using the equity method of accounting.

Under the equity method of accounting, an investment in an associate is initially recognized at cost and adjusted thereafter to recognize the Group's share of the post-acquisition profits or losses of the investee in profit or loss, and the Group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates are recognized as a reduction in the carrying amount of the investment.

When the Group's share of losses in an equity-accounted investment equals or exceeds its interest in that entity, including any other unsecured long-term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealized gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in these entities. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity accounted investees have been changed where necessary to ensure consistency with the policies adopted by the Group.

On acquisition of an associate, any excess of the cost of the investment over the Group's share of the net fair values of the associate's identifiable assets and liabilities is recognized as goodwill, which is included in the carrying amount of the investment. Any excess of the Group's share of the net fair value of the associate's identifiable assets and liabilities over the cost of the investment is included as part of the Group's share of the associate profit or loss in the period in which the investment is acquired.

The carrying amount of equity-accounted investments is tested for impairment in accordance with the policy described in (Note 16). The Group measures an associate that is classified as held for sale at the lower of its carrying amount at the date of classification as held for sale and fair value less costs of disposal. Equity accounting ceases once an associate is classified as held for sale.

(i) Financial instruments

(i) Classification

From 1 January 2018, the Group classifies its financial assets in the following measurement categories:

those to be measured subsequently at fair value (either through OCI or through profit or loss), and

those to be measured at amortised cost.

The classification depends on the Group's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

The Group reclassifies debt investments when and only when its business model for managing those assets changes.

Table of Contents

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(i) Financial instruments (continued)

(ii) Recognition and derecognition

Regular way purchases and sales of financial assets are recognized on trade date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

(iii) Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Debt instruments

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group classifies its debt instruments:

Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss.

FVOCI: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss. Interest income from these financial assets is included in finance income using the effective interest rate method.

FVPL: Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt instruments that is subsequently measured at FVPL is recognised in profit or loss in the period in which it arises.

Equity instruments

The Group subsequently measures all equity investments at fair value. Where the Group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the Group's right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in the statement of profit or loss as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(i) Financial instruments (continued)

(iv) Impairment

From 1 January 2018, the Group assesses on a forward looking basis the expected credit losses associated with its debt instruments carried at amortised cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

Loss allowances are measured on either the following bases.

12 month expected credit losses (ECLs): these are ECLs that result from possible default events within the 12 months after the reporting date; and

lifetime ECLs: these are ECLs that result from all possible default events over the expected life of a financial instrument.

The Group applies lifetime ECL measurement for all group companies except Turkcell Finansman A.S. which applies both 12 month and lifetime ECL (general approach).

(v) Derivatives and hedging activities

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period.

Forward foreign exchange, interest rate and foreign exchange swaps (IRS, Cross Currency Swaps etc.) and option transaction fair values are calculated with market levels of interest rates and Central Bank of Republic of Turkey (CBRT) exchange rates via Bloomberg financial terminal. If market levels are not available for valuation date, fair value for forward contracts will be value of discounted future value of difference between contract price level and forward value of CBRT exchange rate with risk fee rates for the period. Interest rate and currency swaps will be

valued with the difference of discounted cash flows of each leg of the swaps using risk free rates and CBRT exchange rates. Option transactions will be valued with option pricing models using risk free rates and CBRT exchange rates.

The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. The group designates certain derivatives as hedges of a particular risk associated with the cash flows of recognised assets and liabilities and highly probable forecast transactions (cash flow hedges).

At inception of the hedge relationship, the Group documents the economic relationship between hedging instruments and hedged items including whether changes in the cash flows of the hedging instruments are expected to offset changes in the cash flows of hedged items. The Group documents its risk management objective and strategy for undertaking its hedge transactions.

Cash flow hedges that qualify for hedge accounting

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in the cash flow hedge reserve within equity. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss.

Gains or losses relating to the effective portion of the change in intrinsic value of the options are recognised in the cash flow hedge reserve within equity. The changes in the time value of the options that relate to the hedged item (aligned time value) are recognised within OCI in the costs of hedging reserve within equity.

Amounts accumulated in equity are reclassified in the periods when the hedged item affects profit or loss, as follows:

Table of Contents

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(i) Financial instruments (continued)

(v) Derivatives and hedging activities (continued)

Cash flow hedges that qualify for hedge accounting (continued)

Where the hedged item subsequently results in the recognition of a non-financial asset, both the deferred hedging gains and losses and the deferred time value of the option contracts or deferred forward points, if any, are included within the initial cost of the asset. The deferred amounts are ultimately recognised in profit or loss as the hedged item affects profit or loss.

The gain or loss relating to the effective portion of the interest rate swaps hedging variable rate borrowings is recognised in profit or loss within finance cost at the same time as the interest expense on the hedged borrowings.

When a hedging instrument expires, or is sold or terminated, or when a hedge no longer meets the criteria for hedge accounting, any cumulative deferred gain or loss and deferred costs of hedging in equity at that time remains in equity until the forecast transaction occurs, resulting in the recognition of a non-financial asset. When the forecast transaction is no longer expected to occur, the cumulative gain or loss and deferred costs of hedging that were reported in equity are immediately reclassified to profit or loss.

Certain derivative instruments do not qualify for hedge accounting. Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognised immediately in profit or loss.

(viii) Offsetting financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount presented in the statement of financial position where the Group has a legally enforceable right to offset the recognized amounts, and there is an intention to settle on a net basis or to realize the asset and settle the liability simultaneously.

Financial instruments Accounting policies applied until 31 December 2017

The Group has applied IFRS 9 retrospectively, but has elected not to restate comparative information for prior periods. As a result, the comparative information provided continues to be accounted for in accordance with the Group's previous accounting policy. Accounting policies that changed on adoption of IFRS 9 are as follows. The Group's new accounting policies are explained above.

i) Classification

Until 31 December 2017, the Group classified its financial assets in the following categories:

financial assets at fair value through profit or loss,

loans and receivables,

held-to-maturity investments, and

available-for-sale financial assets.

The classification depended on the purpose for which the investments were acquired. Management determined the classification of its investments at initial recognition and, in the case of assets classified as held-to-maturity, re-evaluated this designation at the end of each reporting period.

2. Basis of preparation and summary of significant accounting policies (continued)

(i) Financial instruments (continued)

Financial instruments Accounting policies applied until 31 December 2017 (continued)

(ii) Reclassification

The Group could choose to reclassify a non-derivative trading financial asset out of the held for trading category if the financial asset was no longer held for the purpose of selling it in the near term. Financial assets other than loans and receivables were permitted to be reclassified out of the held for trading category only in rare circumstances arising from a single event that was unusual and highly unlikely to recur in the near term. In addition, the Group could choose to reclassify financial assets that would meet the definition of loans and receivables out of the held for trading or available-for-sale categories if the Group had the intention and ability to hold these financial assets for the foreseeable future or until maturity at the date of reclassification.

Reclassifications were made at fair value as of the reclassification date. Fair value became the new cost or amortized cost as applicable, and no reversals of fair value gains or losses recorded before reclassification date were subsequently made. Effective interest rates for financial assets reclassified to loans and receivables and held-to-maturity categories were determined at the reclassification date. Further increases in estimates of cash flows adjusted effective interest rates prospectively.

(iii) Subsequent measurement

The measurement at initial recognition did not change on adoption of IFRS 9.

Subsequent to initial recognition, loans and receivables and held-to-maturity investments were carried at amortized cost using the effective interest method.

Available-for-sale financial assets and financial assets at fair value through profit or loss were subsequently carried at fair value. Gains or losses arising from changes in the fair value were recognized as follows:

for financial assets at fair value through profit or loss in profit or loss

for available-for-sale financial assets that are monetary securities denominated in a foreign currency translation differences related to changes in the amortized cost of the security were recognized in profit or loss and other changes in the carrying amount were recognized in other comprehensive income

for other monetary and non-monetary securities classified as available-for-sale in other comprehensive income

Details on how the fair value of financial instruments is determined are disclosed in Note 35.

(iv) Impairment

The Group assessed at the end of each reporting period whether there was objective evidence that a financial asset or group of financial assets was impaired. A financial asset or a group of financial assets was impaired and impairment losses were incurred only if there was objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a loss event) and that loss event had an impact on the estimated future cash flows of the financial asset or group of financial assets that could be reliably estimated. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost was considered an indicator that the assets were impaired.

Table of Contents

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(i) Financial instruments (continued)

Financial instruments - Accounting policies applied until 31 December 2017 (continued)

(iv) Impairment (continued)

For loans and receivables, the amount of the loss was measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset was reduced and the amount of the loss was recognised in profit or loss. If a loan or held-to-maturity investment had a variable interest rate, the discount rate for measuring any impairment loss was the current effective interest rate determined under the contract. As a practical expedient, the Group could measure impairment on the basis of an instrument's fair value using an observable market price.

If, in a subsequent period, the amount of the impairment loss decreased and the decrease could be related objectively to an event occurring after the impairment was recognized (such as an improvement in the debtor's credit rating), the reversal of the previously recognized impairment loss was recognized in profit or loss.

Impairment testing of trade receivables is described in Note 35.

If there was objective evidence of impairment for available-for-sale financial assets, the cumulative loss—measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in profit or loss—was removed from equity and recognized in profit or loss.

Impairment losses on equity instruments that were recognised in profit or loss were not reversed through profit or loss in a subsequent period.

If the fair value of a debt instrument classified as available-for-sale increased in a subsequent period and the increase could be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the

impairment loss was reversed through profit or loss.

(j) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(k) Trade receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. If collection of the amounts is expected in one year or less they are classified as current assets. If not, they are presented as non-current assets.

Trade receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment. See Note 35 for a description of the Group's impairment policies.

Table of Contents

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(1) Property, plant and equipment

(i) Recognition and measurement

Items of property, plant and equipment are stated at historical cost less depreciation and impairment losses. Property, plant and equipment related to the Company and its subsidiaries operating in Turkey are adjusted for the effects of inflation during the hyperinflationary period ended on 31 December 2005. Since the inflation accounting commenced on 1 January 2011, property, plant and equipment related to the subsidiaries operating in Belarus are adjusted for the effects of inflation. However, decrease in inflation rate in subsequent years led the three-year cumulative rate as of the end of 2014 to decrease to 65%. Accordingly, the economy of Belarus was considered to transit out of hyperinflationary status and 2015 is determined to be appropriate to cease applying IAS 29. Therefore, subsidiaries operating in Belarus ceased applying IAS 29 in 2015.

Historical cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes cost of materials and direct labor, any other costs directly attributable to bringing the asset to a working condition for its intended use and the costs of dismantling and removing the items and restoring the site on which they are located, if any.

Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment. When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. There are recognized included in profit or loss.

Changes in the obligation to dismantle, remove assets on sites and to restore sites on which they are located, other than changes deriving from the passing of time, are added or deducted from the cost of the assets in the period in which they occur. The amount deducted from the cost of the asset shall not exceed the balance of the carrying amount on the date of change, and any excess balance is recognized immediately in profit or loss.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

(ii) Subsequent costs

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Table of Contents**TURKCELL ILETISIM HIZMETLERI AS****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****As at and for the year ended 31 December 2018**

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)**(I) Property, plant and equipment (continued)***(iii) Depreciation*

Depreciation is calculated using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives. The property, plant and equipment acquired under finance leases is depreciated over the asset's useful life or over the shorter of the asset's useful life and the lease term if there is no reasonable certainty that the group will obtain ownership at the end of the lease term.

Land is not depreciated.

The estimated useful lives are as follows:

Buildings	21	25 years
Mobile network infrastructure	4	20 years
Fixed network infrastructure	3	25 years
Call center equipment	4	8 years
Equipment, fixtures and fittings	2	10 years
Motor vehicles	4	6 years
Central betting terminals	5	10 years
Leasehold improvements	3	5 years

Depreciation methods, useful lives and residual values are reviewed, and adjusted if appropriate, at the end of each reporting period.

(iv) Borrowing costs

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their

intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Other borrowing costs are expensed in the period in which they are incurred.

(m) Intangible assets

(i) Telecommunication licenses

Separately acquired telecommunication licenses are stated at historical cost adjusted for the effects of inflation during the hyperinflationary period, where applicable, less amortization and impairment losses.

Amortization

Amortization is recognized in the statement of profit or loss on a straight-line basis by reference to the license period. The useful lives for telecommunication licenses are as follows:

Telecommunications licenses	3 25 years
-----------------------------	------------

Table of Contents

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(m) Intangible assets (continued)

(ii) Computer software

Acquired computer software licenses are capitalized on the basis of the costs incurred to acquire and bring to use the specific software.

Costs associated with maintaining computer software programmes are recognized as an expense as incurred.

Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the group are recognised as intangible assets when the following criteria are met:

it is technically feasible to complete the software so that it will be available for use

management intends to complete the software and use or sell it

there is an ability to use or sell the software

it can be demonstrated how the software will generate probable future economic benefits

adequate technical, financial and other resources to complete the development and to use or sell the software are available, and

the expenditure attributable to the software during its development can be reliably measured.

Directly attributable costs that are capitalized as part of the software include employee costs and an appropriate portion of relevant overheads.

Research expenditure and development expenditure that do not meet the criteria above are recognized as an expense as incurred. Development costs previously recognized as an expense are not recognized as an asset in a subsequent period.

Capitalized development costs are recorded as intangible assets and amortized from the point at which the asset is ready for use.

Amortization

Amortization is recognized in the statement of profit or loss on a straight-line basis over the estimated useful lives. The useful lives for computer software are as follows:

Computer software	3 - 8 years
-------------------	-------------

(iii) Other intangible assets

Other intangible assets that are acquired by the Group which have finite useful lives are stated at historical cost adjusted for the effects of inflation during the hyperinflationary period, where applicable, less amortization and impairment losses. Indefeasible Rights of Use (IRU) are rights to use a portion of an asset 's capacity granted for a fixed period of time. IRUs are recognized as intangible asset when the Group has specific indefeasible rights to use an identified portion of an underlying asset and the duration of the right is for the major part of the underlying asset 's useful economic life. IRUs are amortized over the shorter of the underlying asset 's useful economic life and the contract term.

Table of Contents**TURKCELL ILETISIM HIZMETLERI AS****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****As at and for the year ended 31 December 2018**

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)**(m) Intangible assets (continued)***(iii) Other intangible assets (continued)**Amortization*

The Group amortizes intangible assets with a limited useful life using the straight-line method over the following periods:

Transmission line software	5	10 years
Central betting system operating right	7	10 years
Customer base	2	15 years
Brand name	9	10 years
Indefeasible right of use		15 years

Amortization methods, useful lives and residual values are reviewed, and adjusted if appropriate, at the end of each reporting period.

Goodwill

Goodwill on acquisitions of subsidiaries is included in intangible assets. Goodwill is not amortized but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes, being the operating segments.

(n) Investment properties

Recognition and measurement

Investment properties are properties held for rental yields and/or for capital appreciation (including property under construction for such purposes). Investment properties are stated at historical cost less depreciation and impairment losses.

An investment property is derecognized upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognized.

Table of Contents**TURKCELL ILETISIM HIZMETLERI AS****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****As at and for the year ended 31 December 2018**

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)**(n) Investment properties (continued)***Depreciation*

Depreciation is calculated using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives. The estimated useful lives are as follows:

Investment Property	25 -45 years
---------------------	--------------

Depreciation methods, useful lives and residual values are reviewed, and adjusted if appropriate, at the end of each reporting period.

(o) Inventories

Inventories are stated at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs necessary to make the sale. Cost of inventory is determined using the weighted average method and comprises all costs of purchase and other costs incurred in bringing the inventories to their present location and condition. Costs of purchased inventory are determined after deducting rebates and discounts. At 31 December 2018 and 2017, inventories mainly consisted of mobile phones, sim-cards, and other devices.

(p) Impairment of assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less

costs of disposal. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

(r) Employee benefits

(i) Short-term obligations

Liabilities for salaries including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as trade and other payables in the statement of financial position.

(ii) Termination benefits

In accordance with the labor law in Turkey, the Company and its subsidiaries in Turkey are required to make lump-sum payments to employees who have completed one year of service and whose employment is terminated without cause or who retire, are called up for military service or die. Such payments are calculated on the basis of 30 days pay up to a of maximum full TL 5,434 as at 31 December 2018 (31 December 2017: TL 4,732), per year of employment at the rate of pay applicable at the date of retirement or termination. Termination benefits paid to key executive officers are presented as other expenses. Reserve for employee termination benefits is computed and reflected in the consolidated financial statements on a current basis. Discount rate used for calculating employee termination benefit as of 31 December 2018 is 4.41%(31 December 2017: 3.33%). The reserve is calculated by estimating the present value of future probable obligation of the Company and its subsidiaries in Turkey arising from retirement of employees. Reserve for employee termination benefits is calculated annually by independent actuaries using the projected unit credit method.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(r) Employee benefits (continued)

(iii) Defined contribution plans

For defined contribution plans, the Group pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Group has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expense when they are due. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available.

(iv) Share-based payments

The Group provides a cash-settled share-based payment plan for selected employees in return for their services. For cash-settled share-based payment transactions, the Group measures services acquired and the liability incurred at the fair value of the liability. Liabilities for cash-settled share-based payment plan are recognized as employee benefit expense over the relevant service period. The fair value of the liability is re-measured at each reporting date and at the settlement date. Any changes in fair value are recognized in profit or loss for the period.

(v) Personnel bonus

Provision for bonus is provided when the bonus is a legal obligation, or past practice would make the bonus a constructive obligation and the Group is able to make a reliable estimate of the obligation.

(s) Provisions

A provision is recognized if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of resources will be required to settle the obligation.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

Onerous contracts

Present obligation arising under an onerous contract is recognized and measured as a provision. An onerous contract is considered to exist where the Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.

Dismantling, removal and restoring sites obligation

The Group is required to incur certain costs in respect of a liability to dismantle and remove assets and to restore sites on which the assets were located. The dismantling costs are calculated according to best estimate of future expected payments discounted at a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the liability.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(t) Revenue

Revenue is recognized at the amount of the transaction price that is allocated to the performance obligation. The transaction price is the amount of consideration to which an entity expects to be entitled in exchange for transferring promised goods or services to a customer. Revenue is recognized when control is transferred to the customer.

Revenue from telecommunication services includes postpaid and prepaid revenue from voice, data, messaging and value added services, interconnect revenue, monthly fixed fees, SIM card sales and roaming revenue. An entity transfers control of a service over time and, therefore, satisfies a performance obligation and recognizes revenue from telecommunication services over time.

With respect to prepaid revenue, the Group generally collects cash in advance by selling prepaid top up to distributors. In such cases, the Group does not recognize revenue until subscribers use the telecommunication services.

Services may be bundled with other products and services and these bundled elements involve consideration in the form of a fixed fee or a fixed fee coupled with a continuing payment stream. A good or service is distinct if both of the following criteria are met:

the good or service is capable of being distinct

the promise to transfer the good or service is distinct within the context of the contract.

The arrangement consideration is allocated to each performance obligation identified in the contract on a relative stand-alone selling prices. If an element of a transaction is not a distinct, then it is accounted for as an integral part of the remaining elements of the transaction.

Revenue from device sales is recognized when control of the device has transferred, being when delivered to the end customer. For device sales made to intermediaries, revenue is recognized when control of the device has transferred, being when the products are delivered to the intermediary and the intermediary has no general right to return the device to receive a refund. If control is not transferred, revenue is deferred until sale of the device to an end customer by the intermediary or expiry of any right of return.

The Company, the distributors and dealers offer joint campaigns to the subscribers which may include the sale of device by the dealer and/or the distributor and the sale of communication service by the Company. In certain campaigns, dealers make the handset sale to the subscribers instalments of which will be collected by the Company based on the letters of undertaking signed by the subscribers. With the letter of undertaking, the dealer assigns its receivables from handset sale to the distributor and the distributor assigns its receivables to the Company.

The Company pays the distributor net present value of the instalments to be collected from the subscribers and recognizes contracted receivables in its statement of financial position. The undue portion of assigned receivables from the distributors which were paid upfront by the Company is classified as undue assigned contracted receivables in trade receivables (Note 19). When monthly installment is invoiced to the subscriber, related portion is presented as receivables from subscribers . The Company collects the contracted receivables in installments during the contract period and does not recognize any revenue for the handset in these transactions as the Company does not act as principal for the sale of handset.

Starting from 2014, the subscribers has an option to buy handsets using bank loans instalments of which are collected by the Company on behalf of the bank. The Company does not bear any credit risk in these transactions. Since the Company collects receivables during the contract period and acts as agent for the sale of handset, the Company does not recognize any revenue for the handset in these transactions.

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(t) Revenue (continued)

Starting from 2016 the Company and distributors started to offer the option to buy a device through Turkcell Financing loan, which will be collected by the Company. The Group carries a risk of collection in these transactions. Turkcell Finansman collects the purchased credit from the subscriber during the contract period, and does not record revenue related to the device since it is not the main contractor in the device sale. Revenue from financial services comprise of interest income generated from consumer financing activities. Interest income is recognized as it accrues, using the effective interest method.

Monthly fixed fees represent a fixed amount charged to postpaid subscribers on a monthly basis without regard to the level of usage. Fixed fees are recognized on a monthly basis when billed. Monthly fixed fees are included telecommunication services revenues.

Revenues from betting business mainly comprise of net takings earned to a maximum of 1.4% of gross takings as the head agent of fixed odds betting games and mobile agent revenues of 7.25% of mobile agency turnover after deducting VAT and gaming tax as the head agent. Revenues from betting business are recognized at the time all services related to the games are fully rendered. Under the agreement signed with Spor Toto Teşkilat Müdürlüğü A.Ş. (Spor Toto), Inteltek Internet Teknoloji Yatırım ve Danışmanlık A.Ş. (Inteltek) is obliged to undertake any excess payo which is presented on a net basis.

Azerinteltek received authorization from Azeridmanservis Limited Liability Company set under the Ministry of Youth and Sport of the Republic of Azerbaijan to organize, operate, manage and develop the fixed odds and paramutual sports betting business. Since Azerinteltek acts as principal, total consideration received from the player less payout (distribution to players) and amounts collected from players on behalf of Ministry of Sports is recognized at the time all services related to the games are fully rendered.

Azerinteltek has been authorized for the Lottery games by Azerlotereya. Azerinteltek has been generating commission revenue over Lottery games turnover through its own agencies by applying 15% commission rate according to agreement between Azerinteltek and Azerlotereya. Commission revenues are recognized at the time all services related to the games are fully rendered.

Call center revenues are recognized at the time services are rendered during the contractual period.

When the Group sells goods or services as a principal, revenue and operating costs are recorded on a gross basis. When the Group sells goods or services as an agent, revenue and operating costs are recorded on a net basis, representing the net margin earned. Whether the Group is considered to be acting as principal or agent in the transaction depends on management's analysis described below such judgements impact the amount of reported revenue and operating costs but do not impact reported assets, liabilities or cash flows:

Indicators that an entity is a principal:

the entity is primarily responsible for fulfilling the promise to provide the specified good or service.

the entity has inventory risk before the specified good or service has been transferred to a customer or after transfer of control to the customer

the entity has discretion in establishing the price for the specified good or service.

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(t) Revenue (continued)

The Company and the Ministry of Transport and Infrastructure of Turkey, Directorate General of Communications signed a contract to continue the contract to establish and operate mobile communication infrastructure and operation in uncovered areas, until 31 December 2019 and to add mobile broadband services to the existing infrastructure providing GSM services under Universal Service Law and to operate the new and existing networks together. As of 31 December 2018, the Company has recognized TL 376,765 (31 December 2017: TL 257,866) revenue from its operations related to this contract. Since the Company acts as principal, revenue and operating costs are reported on a gross basis in these consolidated financial statements.

The revenue recognition policy for other revenues is to recognize revenue as services are provided.

Contract costs eligible for capitalization as incremental costs of obtaining a contract comprise commission on sale relating to postpaid contracts with acquired or retained subscribers. Contract costs are capitalized in the month of service activation if the Group expects to recover those costs. Contract costs comprise sales commissions to dealers and to own salesforce which can be directly attributed to an acquired or retained contract. Contract costs are classified as intangible assets in the consolidated financial statements. The asset is amortised on a straight line basis over the customer life time it relates to consistent with the pattern of recognition of the associated revenue.

Revenue - Accounting policies applied until 31 December 2017

The Group adopted the new standard on the required effective date using the modified retrospective method which requires the recognition of the cumulative effect of initially applying IFRS 15, as at 1 January, 2018, to retained earnings and not restate prior years. As a result, the comparative information provided continues to be accounted for in accordance with the Group's previous accounting policy. Accounting policies that changed on adoption of IFRS 15 are as follows. The Group's new accounting policies are explained above.

Contract cost

Contract costs were capitalized under prepaid expenses and amortised on a straight line basis over the contact term.

(u) Trade and other payables

These amounts represent liabilities for goods and services provided to the Group prior to the end of financial year which are unpaid. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognized initially at their fair value and subsequently measured at amortized cost using the effective interest method.

(v) Borrowings

Borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

Borrowings are removed from the statement of financial position when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(w) Income taxes

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Income tax expense is recognized in the statement of profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the Company's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities. Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled. Deferred tax assets are recognized only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax liabilities and assets are not recognized for temporary differences between the carrying amount and tax bases of investments in foreign operations where the company is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Companies within the Group may be entitled to claim special tax deductions for investments in qualifying assets or in relation to qualifying expenditure (e.g., the Research and Development Tax Incentive regime in Turkey or other investment allowances). The Group accounts for such allowances as tax credits, which means that the allowance reduces income tax payable and current tax expense. A deferred tax asset is recognized for unclaimed tax credits that are carried forward as deferred tax assets.

(x) Earnings per share

The Group does not have any potential ordinary shares in issue, therefore basic and diluted earnings per share (EPS) are equal. Since basic and diluted EPS are equal, the Group presents both basic and diluted EPS on one line described as Basic and diluted EPS .

Basic EPS is calculated by dividing the profit attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the financial year, excluding treasury shares. In Turkey, entities can increase their share capital by distributing Bonus share to shareholders from retained earnings. In computing earnings per share, such Bonus share distributions are treated as issued shares. Accordingly, the retrospective effect for such share distributions is taken into consideration when determining the weighted-average number of shares outstanding.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(y) Government grants

Grants from the government are recognized at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions.

Government grants relating to costs are deferred and recognized in profit or loss over the period necessary to match them with the costs that they are intended to compensate.

Government grants relating to property, plant and equipment are included in non-current liabilities as deferred government grants and are credited to profit or loss on a straight-line basis over the expected useful lives of the related assets.

(z) Non-current asset held for sale and discontinued operations

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less costs of disposal.

An impairment loss is recognized for any initial or subsequent write-down of the asset to fair value less costs of disposal. A gain is recognized for any subsequent increases in fair value less costs of disposal of an asset, but not in excess of any cumulative impairment loss previously recognized. A gain or loss not previously recognized by the date of the sale of the non-current asset is recognized at the date of derecognition.

An associate must meet the conditions to be classified as held for sale. It is first measured in accordance with applicable standards. Such standard is IAS 28, and so the share of profits and remeasurement of carrying amounts are done in accordance with normal associate rules up to the point of classification as held for sale.

The associate or joint venture is then measured in accordance with IFRS 5. It is measured at the lower of carrying amount and fair value less costs of disposal. Equity accounting is ceased from the date the held for sale criteria are met.

Non-current assets classified as held for sale are presented separately from the other assets in the statement of financial position.

A discontinued operation is a component of the entity that has been disposed of or is classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single co-ordinated plan to dispose of such a line of business or area of operations, or is a subsidiary acquired exclusively with a view to resale. The results of discontinued operations are presented separately in the statement of profit or loss.

(aa) Equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

Where any Group company purchases the Company's equity instruments, for example as the result of a share buy-back plan, the consideration paid, including any directly attributable incremental costs (net of income taxes) is deducted from equity attributable to the owners of the Company as treasury shares until the shares are cancelled or reissued. Where such ordinary shares are subsequently reissued, any consideration received, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity attributable to the owners of the Company.

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(ab) Dividends

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the Company, on or before the end of the reporting period but not distributed at the end of the reporting period.

(ac) Subsequent events

Events after the reporting date; Includes all events between the reporting date and the date on which the financial statements are authorized for issue, even if any announcement of profit or other selected financial information has been made publicly disclosed.

In case of events requiring correction after the reporting date, corrects this new situation accordingly. Events that are not required to be adjusted subsequent to the reporting date are disclosed in the notes to the financial statements in the consolidated financial statements.

(ad) Leases

At inception of a contract, the Group assesses whether a contract is, or contains a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, The Group assess whether:

the contract involved the use of an identified asset this may be specified explicitly or implicitly

the asset should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, the asset is not identified;

the Group has the right to obtain substantially all of the economic benefits from the use of an asset throughout the period of use; and

the Group has the right to direct use of the asset. The Group has the right when it has the decision-making rights that are most relevant to changing the how and for what purpose the asset is used is predetermined, the Group has the right the use of asset if either:

the Group has the right to operate the asset or;

the Group designed the asset in a way that predetermines how and for what purpose it is used.

At inception or on reassessment of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices.

Right of use asset

The Group recognizes a right-of use asset and a lease liability at the lease commencement date.

The right of use asset is initially recognized at cost comprising of:

amount of the initial measurement of the lease liability;

any lease payments made at or before the commencement date, less any lease incentives received;

any initial direct costs incurred by the Group; and

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end date of the useful life of the right-of-use asset or the end date of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability (Note 28).

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(ad) Leases

Lease Liability

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Group uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

fixed payments, including in-substance fixed payments;

variable lease payments that depend on an index or a rate, initially measured using the index or rate as the commencement date;

amounts expected to be payable under a residual value guarantee; and

the exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewable period if the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Group is reasonably certain to terminate early.

After initial recognition, the lease liability is measured (a) increasing the carrying amount to reflect interest on lease liability; (b) reducing the carrying amount to reflect the lease payments made; and (c) remeasuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments.

Where, (a) there is a change in the lease term as a result of reassessment of certainty to exercise an exercise option, or not to exercise a termination option as discussed above; or (b) there is a change in the assessment of an option to purchase the underlying asset, assessed considering the events and circumstances in the context of a purchase option, the Group remeasures the lease liabilities to reflect changes to lease payments by discounting the revised lease

payments using a revised discount rate. The Group determines the revised discount rate as the interest rate implicit in the lease for the remainder of the lease term, if that rate can be readily determined, or the its incremental borrowing rate at the date of reassessment, if the interest rate implicit in the lease cannot be readily determined.

Where, (a) there is a change in the amounts expected to be payable under a residual value guarantee; or (b) there is a change in the future lease payments resulting from a change in an index or a rate used to determine those payments, including change to reflect changes in market rental rates following a market rent review, the Group remeasures the lease liabilities by discounting the revised lease payments using an unchanged discount rate, unless the change in lease payments results from a change in floating interest rates. In such case, the Group use revised discount rate that reflects changes in the interest rate.

The Group recognises the amount of the remeasurement of lease liability as an adjustment to the right of use asset. Where the carrying amount of the right of use asset is reduced zero and there is further reduction in the measurement of the lease liability, the Group recognises any remaining amount of the remeasurement in profit or loss.

The Group accounts for a lease modification as a separate lease if both:

the modification increases the scope of the lease by adding the right to use one or more underlying assets;
and

the consideration for the lease increases by an amount commensurate with the stand-alone price for the increase in scope and any appropriate adjustments to that stand-alone price to reflect the circumstances of the particular contract.

Table of Contents

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(ad) Leases (continued)

The Group as a Lessor

When the Group acts an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use-asset arising from the head lease, not with reference to the underlying asset.

If an arrangement contains lease and non-lease components, the Group applies IFRS 15 to allocate the consideration in the contract.

Leases - Accounting policies applied until 31 December 2017

The Group adopted IFRS 16 using modified retrospective approach option 2 application under which the cumulative effect of initially applying the Standard recognised at the date of initial application at 1 January 2018. As a result, the comparative information provided continues to be accounted for in accordance with the Group's previous accounting policy. Accounting policies that changed on adoption of IFRS 16 are as follows. The Group's new accounting policies are explained above.

Leases of property, plant and equipment where the group, as lessee, had substantially all the risks and rewards of ownership were classified as finance leases. Finance leases were capitalised at the lease's inception at the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, were included in other short-term and long-term payables. Each lease payment was allocated between the liability and finance cost. The finance cost was charged to the profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property and equipment acquired under finance leases was depreciated over the asset's useful life or over the shorter of the asset's useful life and the lease term if there was no reasonable certainty that the Group will obtain ownership at the end of the lease term.

Leases in which a significant portion of the risks and rewards of ownership were not transferred to the Group as lessee were classified as operating leases. Payments made under operating leases (net of any incentives received from the

lessor) were charged to profit or loss on a straight-line basis over the period of the lease.

(ae) New standards and interpretations

i) Amendments to IFRSs affecting amounts reported and/or disclosures in the consolidated financial statements

This note explains the impact of the adoption of IFRS 9 Financial Instruments, IFRS 15 Revenue from Contracts with Customers and IFRS 16 Leases on the Group's consolidated financial statements.

The impacts of adoption of IFRS 9, IFRS 15 and IFRS 16 on the consolidated financial statements as at 31 December 2018 are stated as below. The adoptions of these standards do not have a significant impact on the consolidated other comprehensive income (OCI) and consolidated statement of cash flows.

The following tables show the adjustments recognised for each individual line item. Line items that were not affected by the changes have not been included. As a result, the sub-totals and totals disclosed cannot be recalculated from the numbers provided. The adjustments are explained in more detail by standard below.

2. Basis of preparation and summary of significant accounting policies (continued)**(ae) New standards and interpretations (continued)****i) Amendments to IFRSs affecting amounts reported and/or disclosures in the consolidated financial statements (continued)****IFRS 9 Financial Instruments Impact of adoption**

IFRS 9 replaces the provisions of IAS 39 that relate to the recognition, classification and measurement of financial assets and financial liabilities, derecognition of financial instruments, impairment of financial assets and hedge accounting.

The Group has taken advantage of the exemption allowing it not to restate comparative information for prior periods with respect to classification and measurement (including impairment) changes. Differences in the carrying amounts of financial assets and financial liabilities resulting from the adoption of IFRS 9 are recognized in retained earnings and reserves as at 1 January 2018.

The adoption of IFRS 9 Financial Instruments from 1 January 2018 resulted in changes in accounting policies and adjustments to the amounts recognised in the consolidated financial statements as stated below:

The total impact on the Group's retained earnings as at 1 January 2018 is as follows:

	1 January 2018
Retained Earnings Opening 31 December 2017	11,312,276
Increase in provision for receivables from financial services	(52,951)
Decrease in provision for other financial assets	38,384
Deferred tax effect	3,419

Total impact of adoption in accordance with IFRS 9	(11,148)
--	-----------------

Retained Earnings Opening 1 January 2018 (Including IFRS 9- excluding IFRS 15)	11,301,128
---	-------------------

On the date of initial application, 1 January 2018, the financial instruments of the Company were as follows, with any reclassifications noted;

Non-current financial assets	Original (IAS 39)	New (IFRS 9)	Original	New	Difference
Trade receivables	Amortized cost	Amortized cost	155,634	154,392	(1,242)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(ae) New standards and interpretations (continued)

i) Amendments to IFRSs affecting amounts reported and/or disclosures in the consolidated financial statements (continued)

IFRS 9 Financial Instruments Impact of adoption (continued)

Impairment of financial assets

The group recognizes impairment charges for financial assets that are subject to the expected credit loss model in accordance with IFRS 9 as below:

Trade receivables resulting from operations

Financial services receivables

Cash and cash equivalents

Financial investments

Other receivables

Other assets

Financial services receivables

On 1 January 2018, credit risks were assessed for these loans in accordance with the impairment methodology and TL (52,951) has been recognized under retained earnings.

The reconciliation of impairment provision and opening balances for financial services receivables as of 1 January 2018 is stated as below:

	1 January 2018
At 1 January 2018 (calculated under IAS 39)	72,992
Amounts restated through opening retained earnings	52,951
At 1 January 2018 (calculated under IFRS 9)	125,943
Current year provision at profit or loss statement IFRS 9	190,509
Current year provision at profit or loss statement if IAS 39 was applied	202,998

Other financial assets

The group applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for its financial assets comprising of trade receivables and contract assets.

The reconciliation of impairment provision and opening balances for other financial assets as of 1 January 2018 is stated as below:

	1 January 2018
At 1 January 2018 (calculated under IAS 39)	705,440
Amounts restated through opening retained earnings	(38,384)
At 1 January 2018 (calculated under IFRS 9)	667,056
Current year provision at profit or loss statement-IFRS 9	418,799
Current year provision at profit or loss statement if IAS 39 was applied	427,211

2. Basis of preparation and summary of significant accounting policies (continued)**(ae) New standards and interpretations (continued)****i) Amendments to IFRSs affecting amounts reported and/or disclosures in the consolidated financial statements (continued)****IFRS 15 Revenue from Contracts with Customers Impact of adoption**

The Group adopted the new standard on the required effective date using the modified retrospective method which requires the recognition of the cumulative effect of initially applying IFRS 15 as at 1 January 2018 to retained earnings and not restate prior years.

The impact of adoption of IFRS 15, Revenue from contracts with customers on retained earnings as of 1 January 2018 is stated as below:

	1 January 2018
Retained earnings 1 January 2018 - (including IFRS 9 effects-excluding IFRS 15 effects)	11,301,128
Recognition of asset for subscriber acquisition cost	830,011
Decrease in current assets and non-current assets	(132,920)
Deferred tax effect	(144,632)
Other	(22,437)
Adjustment to retained earnings from adoption of IFRS 15	530,022
Opening retained earnings 1 January 2018 - (including IFRS 9 and IFRS 15 effects)	11,831,150

Contract costs capitalized prior to IFRS 15 have been classified under prepaid expenses. As of 1 January 2018, contract costs excluding the new incremental costs amounting to 156,879 TL has been classified from prepaid expenses to intangible assets.

Details of contract costs and related accumulated depreciation for the period 1 January - 31 December 2018 has been disclosed under Note 12.

IFRS 16 Leases - Impact of adoption

Details of adoption on IFRS16 for the period 1 January - 31 December 2018 has been disclosed under Note 15.

The Group early adopted IFRS 16 with a date of initial application of 1 January 2018.

The Group adopted IFRS 16 using modified retrospective approach - option 2 application under which the cumulative effect of initially applying the Standard recognised at the date of initial application at 1 January 2018.

The amount of TL 542,179 of the right to use of the asset is attributable to the classification of the prepaid lease expenses accounted for under prepaid expenses before the application of IFRS 16.

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(ae) New standards and interpretations (continued)

i) Amendments to IFRSs affecting amounts reported and/or disclosures in the consolidated financial statements (continued)

IFRS 16 Leases Impact of adoption (continued)

On transition to IFRS 16, the Group elected to apply practical expedient to grandfather the assessment of which transitions are leases. It applied IFRS 16 only to contracts that were previously identified as leases. Contracts that were not identified as leases under IAS 17 and IFRIC 4 were not reassessed for whether there is a lease. Therefore, the definition of a lease under IFRS 16 was applied only to contracts entered into or changed on or after 1 January 2018.

On transition the Group did not elect to apply recognition exemption for short-term leases by class of underlying assets and leases for low-value items which shall be applied lease-by-lease basis on both transition and subsequently.

As a lessee, the Group previously classified leases as operating and finance leases based on its assessment of whether the lease transferred significantly all of the risks and rewards incidental to ownership of the underlying asset to the Group. At transition lease liabilities were measured at the present value of the remaining lease payments, discounted at the Group's incremental borrowing rate at 1 January 2018. The Group measured right-of-use assets at an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments under IFRS 16 modified retrospective approach option 2 application and used the following practical expedients;

Group applied a single discount rate to a portfolio of leases with similar characteristics

Adjusted the right-of-use assets by the amount of IAS 37 onerous contract provision immediately before the date of initial application

Excluded initial direct costs from measuring the right-of-use asset at the date of initial application
Used hindsight when determining the lease term when the contract contains options to renew or terminate the lease.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(ae) New standards and interpretations (continued)

ii) Standards, amendments and interpretations applicable as at 31 December 2018

Amendments to IFRS 4, Insurance contracts regarding the implementation of IFRS 9, Financial Instruments ; effective from annual periods beginning on or after 1 January 2018. These amendments introduce two approaches: an overlay approach and a deferral approach. The amended standard will:

give all companies that issue insurance contracts the option to recognise in other comprehensive income, rather than profit or loss, the volatility that could arise when IFRS 9 is applied before the new insurance contracts standard is issued; and

give companies whose activities are predominantly connected with insurance an optional temporary exemption from applying IFRS 9 until 2021. The entities that defer the application of IFRS 9 will continue to apply the existing financial instruments standard IAS 39.

Amendment to IAS 40, Investment property relating to transfers of investment property; effective from annual periods beginning on or after 1 January 2018. These amendments clarify that to transfer to, or from, investment properties there must be a change in use. To conclude if a property has changed use there should be an assessment of whether the property meets the definition. This change must be supported by evidence.

Amendments to IFRS 2, Share based payments on clarifying how to account for certain types of share-based payment transactions; effective from annual periods beginning on or after 1 January 2018. This amendment clarifies the measurement basis for cash-settled, share-based payments and the accounting for modifications that change an award from cash-settled to equity-settled. It also introduces an exception to the principles in IFRS 2 that will require an award to be treated as if it was wholly equity-settled, where an

employer is obliged to withhold an amount for the employee's tax obligation associated with a share-based payment and pay that amount to the tax authority.

Annual improvements 2014-2016; effective from annual periods beginning on or after 1 January 2018. These amendments impact 2 standards:

IFRS 1, First time adoption of IFRS, regarding the deletion of short-term exemptions for first-time adopters regarding IFRS 7, IAS 19 and IFRS 10,

IAS 28, Investments in associates and joint venture regarding measuring an associate or joint venture at fair value.

IFRIC 22, Foreign currency transactions and advance consideration; effective from annual periods beginning on or after 1 January 2018. This IFRIC addresses foreign currency transactions or parts of transactions where there is consideration that is denominated or priced in a foreign currency. The interpretation provides guidance for when a single payment/receipt is made as well as for situations where multiple payments/receipts are made. The guidance aims to reduce diversity in practice.

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(ae) New standards and interpretations (continued)

iii) Standards, amendments and interpretations that are issued but not effective as at 31 December 2018

Amendment to IFRS 9, Financial instruments ; effective from annual periods beginning on or after 1 January 2019. This amendment confirm that when a financial liability measured at amortised cost is modified without this resulting in de-recognition, a gain or loss should be recognised immediately in profit or loss. The gain or loss is calculated as the difference between the original contractual cash flows and the modified cash flows discounted at the original effective interest rate. This means that the difference cannot be spread over the remaining life of the instrument which may be a change in practice from IAS 39.

Amendment to IAS 28, Investments in associates and joint venture ; effective from annual periods beginning on or after 1 January 2019. These amendments clarify that companies account for long-term interests in associate or joint venture to which the equity method is not applied using IFRS 9.

IFRIC 23, Uncertainty over income tax treatments ; effective from annual periods beginning on or after 1 January 2019. This IFRIC clarifies how the recognition and measurement requirements of IAS 12 *Income taxes* , are applied where there is uncertainty over income tax treatments. The IFRS IC had clarified previously that IAS 12, not IAS 37 *Provisions, contingent liabilities and contingent assets* , applies to accounting for uncertain income tax treatments. IFRIC 23 explains how to recognise and measure deferred and current income tax assets and liabilities where there is uncertainty over a tax treatment. An uncertain tax treatment is any tax treatment applied by an entity where there is uncertainty over whether that treatment will be accepted by the tax authority. For example, a decision to claim a deduction for a specific expense or not to include a specific item of income in a tax return is an uncertain tax treatment if its acceptability is uncertain under tax law. IFRIC 23 applies to all aspects of income tax accounting where there is an uncertainty regarding the treatment of an item, including taxable profit or loss, the tax bases of assets and liabilities, tax losses and credits and tax rates.

IFRS 17, Insurance contracts ; effective from annual periods beginning on or after 1 January 2021. This standard replaces IFRS 4, which currently permits a wide variety of practices in accounting for insurance contracts. IFRS 17 will fundamentally change the accounting by all entities that issue insurance contracts and investment contracts with discretionary participation features.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

2. Basis of preparation and summary of significant accounting policies (continued)

(ae) New standards and interpretations (continued)

(iii) Standards, amendments and interpretations that are issued but not effective as at 31 December 2018 (continued)

Annual improvements 2015-2017; effective from annual periods beginning on or after 1 January 2019. These amendments include minor changes to:

IFRS 3, Business combinations , a company remeasures its previously held interest in a joint operation when it obtains control of the business.

IFRS 11, Joint arrangements , a company does not remeasure its previously held interest in a joint operation when it obtains joint control of the business.

IAS 12, Income taxes a company accounts for all income tax consequences of dividend payments in the same way.

IAS 23, Borrowing costs a company treats as part of general borrowings any borrowing originally made to develop an asset when the asset is ready for its intended use or sale.

Amendments to IAS 19, Employee benefits on plan amendment, curtailment or settlement ; effective from annual periods beginning on or after 1 January 2019. These amendments require an entity to:

use updated assumptions to determine current service cost and net interest for the remainder of the period after a plan amendment, curtailment or settlement; and

recognise in profit or loss as part of past service cost, or a gain or loss on settlement, any reduction in a surplus, even if that surplus was not previously recognised because of the impact of the asset ceiling.

Amendments to IAS 1 and IAS 8 on the definition of material; effective from Annual periods beginning on or after 1 January 2020. These amendments to IAS 1, Presentation of financial statements , and IAS 8, Accounting policies, changes in accounting estimates and errors , and consequential amendments to other IFRSs:

i) use a consistent definition of materiality throughout IFRSs and the Conceptual Framework for Financial Reporting;

ii) clarify the explanation of the definition of material; and

iii) incorporate some of the guidance in IAS 1 about immaterial information.

Amendments to IFRS 3 - definition of a business; effective from Annual periods beginning on or after 1 January 2020. This amendment revises the definition of a business. According to feedback received by the IASB, application of the current guidance is commonly thought to be too complex, and it results in too many transactions qualifying as business combinations.

The Company does not expected material impact of new standards and interpretations on Company s accounting policies.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

3. Financial risk management

This note explains the Group's exposure to financial risks and how these risks could affect the Group's future financial performance. Current year profit and loss information has been included where relevant to add further context.

The Group's risk management is carried out by a central treasury department (Group Treasury) under policies approved by the Audit Committee. Group Treasury identifies, evaluates and manages financial risks in close co-operation with the Group's operating units. The Audit Committee provides written principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity. In addition, Risk Early Detection Committee was established in accordance with the New Turkish Commercial Code effective from 1 July 2012.

Credit risk

At the reporting date, there were no significant concentrations of credit risk. The maximum exposure to credit risk is represented by the carrying amount of cash and cash equivalents, financial asset at fair value through profit or loss , derivative financial instruments, trade receivables, receivables from financial services, due from related parties and other assets (Note 35).

Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. The Group may require collateral in respect of financial assets. Also, the Group may demand letters of guarantee from third parties related to certain projects or contracts. The Group may also demand certain pledges from counterparties if necessary in return for the credit support it gives related to certain financings (Note 19).

In monitoring customer credit risk, customers are grouped according to whether they are subscribers, financial services customers, other corporate customers, aging profile, maturity and existence of previous financial difficulties. Trade receivables and accrued income are mainly related to the Group's subscribers. The Group's exposure to credit risk on trade receivables is influenced mainly by the individual payment characteristics of postpaid subscribers. The Group establishes an allowance for impairment that represents its estimate of incurred losses in respect of trade and other receivables.

This allowance comprise of the general provision which is determined based on a loss event. Investments are preferred to be in liquid securities. The counterparty limits are set monthly depending on their ratings from the most credible rating agencies and the amount of their paid-in capital and/or shareholders equity. Policies are in place to review the paid-in capital and rating of counterparties periodically to ensure credit worthiness.

Transactions involving derivatives are executed with local and international counterparties with whom the Group has signed international agreements and which have sound credit ratings.

The Group's policy is to provide financial guarantees only to subsidiaries and distributors. At 31 December 2018, guarantees of TL 4,988,580 were outstanding (31 December 2017: TL 3,720,954).

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

3. Financial risk management (continued)

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. At the end of the reporting period the Group held deposits at call of TL 587,007 (2017: TL 603,553) that are expected to readily generate cash inflows for managing liquidity risk. Due to the dynamic nature of the underlying businesses, Group Treasury maintains flexibility in funding by maintaining availability under committed credit lines.

Management monitors rolling forecasts of the Group's liquidity reserve (Note 35) and cash and cash equivalents (Note 24) on the basis of expected cash flows. In addition, the Group's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return on risk.

The Group uses derivatives in order to manage market risks. All such transactions are carried at within the guidelines set by the Group Treasury.

(i) Foreign exchange risk

The Group operates internationally and is exposed to foreign exchange risk arising from foreign currency transactions, primarily with respect to the USD, EUR and RMB. Foreign exchange risk arises from recognized assets and liabilities denominated in a currency that is not the functional currency of the relevant Group entity. The Group holds a significant portion of its cash and cash equivalent in foreign currency in order to manage foreign exchange risk. In addition, derivative financial instruments are used to manage exposure to fluctuations in foreign exchange rates and as of 1 July 2018 the Company applies hedge accounting.

Foreign exchange risk arising from the net assets of the subsidiary Fintur is not managed by the Group.

Details of Company s foreign exchange risk is disclosed in Note 35.

(ii) Interest rate risk

The Group s exposure to interest rate risk is related to its financial assets and liabilities. The Group manage its financial liabilities by providing an appropriate distribution between fixed and floating rate loans. Floating rate exposures can be changed to fixed rate exposures based on short term and long term market expectations via financial derivatives. The use of financial derivatives is governed by the Group Treasury s policies approved by the Audit Committee, which provide written principles on the use of derivatives.

The Group s borrowings and receivables are carried at amortized cost. The borrowings are periodically contractually repriced (Note 35) and to that extent are also exposed to the risk of future changes in market interest rates.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

4. Segment information

The Group has two reportable segments in accordance with its integrated communication and technology services strategy Turkcell Turkey and Turkcell International. While some of these strategic segments offer the same types of services, they are managed separately because they operate in different geographical locations and are affected by different economic conditions.

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker function is carried out by the Board of Directors, however Board of Directors may transfer the authorities, other than recognized by the law, to the General Manager and other directors.

Turkcell Turkey reportable segment includes the operations of Turkcell, Turkcell Superonline Iletisim Hizmetleri A.S. (Turkcell Superonline), Turkcell Satis ve Dijital Is Servisleri Hizmetleri A.S. (Turkcell Satis), group call center operations of Global Bilgi Pazarlama Danismanlik ve Cagri Servisi Hizmetleri A.S. (Turkcell Global Bilgi), Turktell Bilisim Servisleri A.S. (Turktell), Turkcell Teknoloji Arastirma ve Gelistirme A.S. (Turkcell Teknoloji), Kule Hizmet ve Isletmecilik A.S. (Global Tower), Rehberlik Hizmetleri Servisi A.S. (Rehberlik), Turkcell Odeme Hizmetleri A.S. (Turkcell Odeme) and Turkcell Gayrimenkul Hizmetleri A.S. (Turkcell Gayrimenkul). Turkcell International reportable segment includes the operations of Kibris Mobile Telekomunikasyon Limited Sirketi (Kibris Telekom), East Asian Consortium B.V. (Eastasia), Lifecell LLC (lifecell), Lifecell Ventures Coöperatief U.A (Lifecell Ventures), Beltel Telekomunikasyon Hizmetleri A.S. (Beltel), CJSC Belarusian Telecommunications Network (Belarusian Telecom), LLC UkrTower (UkrTower), LLC Global Bilgi (Global LLC), Turkcell Europe GmbH (Turkcell Europe), Lifetech LLC (Lifetech), Beltower LLC (Beltower) and Lifecell Digital Limited (Lificell Digital). The operations of these legal entities aggregated into one reportable segment as the nature of services are similar and most of them share similar economic characteristics. Other reportable segment mainly comprises the information and entertainment services in Turkey and Azerbaijan, non-group call center operations of Turkcell Global Bilgi, Turkcell Finansman A.Ş. (Turkcell Finansman), Turkcell Özel Finansman A.Ş. (TÖFAŞ), Turkcell Enerji Cozumleri ve Elektrik Satis Ticaret A.S (Turkcell Enerji) Paycell LLC (Paycell), Turkcell Sigorta Aracılık Hizmetleri A.Ş (Turkcell Sigorta), Türkiye nin Otomobili Girişim Grubu Sanayi ve Ticaret A.Ş. (Türkiye nin Otomobili) and Sofra Kurumsal ve Ödüllendirme Hizmetleri A.Ş. (Sofra).

The Board primarily uses adjusted EBITDA to assess the performance of the operating segments. Adjusted EBITDA definition includes revenue, cost of revenue excluding depreciation and amortization, selling and marketing expenses and administrative expenses.

Adjusted EBITDA is not a financial measure defined by IFRS as a measurement of financial performance and may not be comparable to other similarly-titled indicators used by other companies. Reconciliation of Adjusted EBITDA to the consolidated profit for the year is included in the accompanying notes.

Other	2,313	4,258	(1,966)
Total income tax expense	(495,481)	(571,758)	(423,160)

(*) Mainly comprises of research and development tax credit and the exemption effect of Fintur amounted to TL 76,164.

(**) The Group s transfer of its total shareholding in Azerinteltek controlled by Inteltek to one of other shareholder of Azerinteltek, Baltech Investment LLC (Not 39)

(***)Mainly comprises of tax losses for which no deferred tax asset has been recognized.

The Turkish entities within the Group are subject to corporate tax at the rate of 20%. Corporate tax is applied on taxable corporate income, which is calculated from the statutory accounting profit by adding back non-deductible expenses, and by deducting tax exempt income. On December 5, 2017, Turkey's Law No. 7061 on the Amendment of Some Tax Laws and Some Other Laws, which was adopted on November 28, 2017, was published in the Official Gazette. The Law increases the corporate tax rate under the Corporate Tax Law, No. 5520, from the current 20% rate to 22% for tax years 2018, 2019, and 2020; the change took effect on the Law's date of publication.

In Turkey, there is no procedure for a final and definitive agreement on tax assessments. Companies file their tax returns at the end of until the 25th day of the fourth month following the close of the accounting year to which they relate. Corporate tax payment is made until the end of the month in which the tax return is filed. Tax authorities may, however, examine such returns and the underlying accounting records and may revise assessments within five years. Advance tax returns are filed on a quarterly basis.

In Turkey, the transfer pricing provisions have been stated under the Article 13 of Corporate Tax Law with the heading of "disguised profit distribution via transfer pricing". The General Communiqué on disguised profit distribution via Transfer Pricing, dated 18 November 2007 sets details about implementation.

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

9. Income tax expense (continued)

If a taxpayer enters into transactions regarding sale or purchase of goods and services with related parties, where the prices are not set in accordance with arm's length principle, then related profits are considered to be distributed in a disguised manner through transfer pricing. Such disguised profit distributions through transfer pricing are not accepted as tax deductible for corporate income tax purposes.

The deduction of 100% of the research and development expenses is allowed when the taxpayers are made these expenditures exclusively for new technology and information researches.

Dividend payments of Turkish resident corporations to Turkish real persons, foreign corporations and foreign real persons are subject to 15% withholding tax. It is possible to apply reduced withholding tax rate for dividend payments made to abroad, under the scope of provisions of an applicable double taxation treaty. On the other hand, dividend payments made to Turkish resident companies are not subject to withholding tax.

Dividend income of Turkish taxpayers received from other Turkish taxpayers is exempted from corporate tax. However, dividends received from participation shares and stocks of fund and investment partnerships cannot utilize from this exemption.

75% of the profits arising from sale of affiliate shares, founders' shares, redeemed shares and preemptive rights that are held by the corporations for at least two years are exempted from corporate tax. However, as of 5 December 2017, the date of the publication of the Law No. 7061, 50% part of the profits arising from the sale of the immovable properties that are included in assets of the corporations for two years are exempted from corporate tax. The exemption rate is 75% before this date. In order to benefit from these exemptions, profits must be recorded under a passive fund account in balance sheet and not withdrawn for 5 years. Also, the sale amounts must be received until the end of the second calendar year following the sale.

Pursuant to Article 10/13-h of Law No.7143 which was published in the Official Gazette dated 18 May 2018 and numbered 30425;

for the resident real persons and institutions,

Income from the sale of non-resident subsidiary shares,

Participation income from non-resident subsidiaries,

Commercial income through permanent establishment and permanent representatives abroad, including those obtained until the date 31 October 2018, are exempted from income tax or corporation tax under condition that incomes are transferred from the effective date of Article until 31 December 2018. In accordance with the President Decision dated 29 August 2018 and numbered 48, the terms of the Article has been extended for 6 months. In this way, including those obtained until the date 30 April 2019, income from the sale of non-resident subsidiary s shares are exempted from corporation tax under condition that incomes are transferred until 30 June 2019.

for the resident real persons and institutions, income from the liquidation of non-resident institutions are exempt from income tax or corporation tax under condition that incomes are transferred to Turkey until the date 31 December 2018. In accordance with the President Decision dated 29 August 2018 and numbered 48, the terms of the Article has been extended for 6 months. In this way, income from the liquidation of non-resident institutions are exempted from corporation tax under condition that incomes are transferred until 30 June 2019.

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

12. Intangible assets

Turkcell - 2G License

On 27 April 1998, the Company was granted a 25-year GSM license (the 2G License) for a consideration of USD 500,000, the carrying amount of the 2G license is TL 195,425 at 31 December 2018 (31 December 2017: TL 241,407) and it is amortized over 25 years.

Turkcell - 3G License

On 30 April 2009, the Company signed a license agreement (the 3G License) with the ICTA which provides authorization for providing IMT 2000/UMTS services and infrastructure. The Company acquired the A-type license providing the widest frequency band for a consideration of EUR 358,000 (excluding VAT). The license is effective for 20 years starting from 30 April 2009. The carrying amount of the 3G License is TL 397,543 at 31 December 2018 (31 December 2017: TL 436,014) and it is amortized over 25 years.

Turkcell - 4.5G License

On 26 August 2015, Authorization Tender on IMT Services and Infrastructure publicly known as 4.5G license tender, was held by the Information Technologies and Communication Authority and the Company was granted a total frequency band of 172.4M Hz for 13 years for a consideration of EUR 1,623,460 (excluding VAT).

IMT authorization period expires on 30 April 2029 and operators commenced service delivery for 4.5G from 1 April 2016. 2x1.4 MHz frequency band in 900MHz spectrum and 2 units of 2x5 MHz frequency band in 2100 MHz spectrum were commenced on 1 December 2015, while remaining packages were commenced on 1 April 2016.

The carrying amount of the 4.5G License is TL 4,125,743 at 31 December 2018 (31 December 2017: TL 4,528,254).

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

13. Impairment of assets

The Group's cash-generating units (CGUs) are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the recoverable amount of the CGU is estimated. The recoverable amount of the CGU is its fair value less cost of disposal. Ukraine and Belarus CGUs were tested for impairment at 31 December 2018. None of these CGUs contains goodwill or an intangible asset with an indefinite useful life.

lifecell

At 31 December 2018, impairment of Ukraine CGU was tested using the assumption that lifecell was the CGU.

The recoverable amount of lifecell is determined based on fair value less cost of disposal calculations which require the use of assumptions. The calculations use cash flow projections based on financial budgets approved by management covering a six-year period. Cash flows beyond the six-year period are extrapolated using the estimated growth rate.

Sensitivity analysis was performed on the change in WACC by +0.5%/-0.5% (31 December 2017: +0.5%/-0.5%).

The assumptions used in recoverable amount calculations of lifecell for the year 2018 and 2017 were respectively:

A post-tax WACC rate of 27.0% for the period from 2019 to 2024, a post-tax WACC rate of 26.3% for the period after 2024 and a terminal growth rate of 5.3% were used to extrapolate cash flows beyond the 6-year forecasts period based on the business plans.

A post-tax WACC rate of 26.5% for the period from 2018 to 2022, a post-tax WACC rate of 25.9% for the period after 2022 and a terminal growth rate of 6.0% were used to extrapolate cash flows beyond the 6-year forecasts period based on the business plans.

As the recoverable amount of lifecell was higher than its carrying amount, no impairment charge was recognized.

Belarusian Telecom

The aggregate carrying amount of goodwill arising from the acquisition of Belarusian Telecom was impaired at 31 December 2011. The cumulative impairment loss recognized in the statement of profit or loss is TL 228,774.

At 31 December 2018, impairment of Belarus CGU was tested using the assumption that Belarusian Telecom was the CGU.

The recoverable amount of Belarusian Telecom is determined based on fair value less cost of disposal calculations which require the use of assumptions. The calculations use cash flow projections based on financial budgets approved by management covering a five-year period. Cash flows beyond the five-year period are extrapolated using the estimated growth rate.

Sensitivity analysis was performed on the change in WACC by +0.5%/-0.5% (31 December 2017: +0.5%/-0.5%).

Table of Contents**TURKCELL ILETISIM HIZMETLERI AS****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****As at and for the year ended 31 December 2018**

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

13. Impairment of assets (continued)

The assumptions used in recoverable amount calculations of Belarusian Telecom for the year 2018 and 2017 were respectively:

A post-tax WACC rate of 22.8% for the period from 2019 to 2024, a post-tax WACC rate of 22.4% for the period after 2024, and a terminal growth rate of 5.0% were used to extrapolate cash flows beyond the 6-year forecast period based on the business plan.

A post-tax WACC rate of 25.4% for the period from 2018 to 2022, a post-tax WACC rate of 24.9% for the period after 2022, and a terminal growth rate of 8.0% were used to extrapolate cash flows beyond the 5-year forecast period based on the business plan.

As the recoverable amount of Belarusian Telecom was higher than its carrying amount, no impairment charge was recognized.

Turkcell Superonline

As at 31 December 2018, the aggregate carrying amount of goodwill allocated to Turkcell Superonline is TL 32,834 (31 December 2017: TL 32,834). No impairment test was performed for goodwill allocated to Turkcell Superonline on the grounds of materiality.

14. Investment properties

(*) During the year ended 31 December 2017, the Group transferred its building located in Istanbul, Tepebası from investment properties to property, plant and equipment due to the change in purpose of use.

Determination of the fair values of the Group's investment properties

The Group engages qualified external experts, authorized by the Capital Markets Board of Turkey, to perform the valuation of investment properties. Management works closely with the qualified external experts to establish the appropriate valuation techniques and inputs to the model. The fair values of these investment properties were determined using a variety of valuation methods: *direct capitalization approach* and *income capitalization approach*, *replacement cost approach* and *market approach*. In estimating the fair values of the properties, the highest and best use of the property is its current use.

Table of Contents**TURKCELL ILETISIM HIZMETLERI AS****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****As at and for the year ended 31 December 2018**

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

14. Investment properties (continued)

Rent income from investment properties during the year ended 31 December 2018 is TL 3,092 (31 December 2017: TL 2,821 and 31 December 2016: TL 2,317). There is no direct operating expense for investment properties during the year ended 31 December 2018 (31 December 2017: TL 22 and 31 December 2016: TL 22).

The Group's investment properties and their fair values at 31 December 2018 and 2017 are as follows:

31 December 2018	Level 1	Level 2	Level 3	Valuation Method
Investment properties in Gebze			17,960	Income capitalization approach
Investment properties in Ankara			15,915	Market approach
Investment properties in Istanbul			13,800	Market approach
Investment properties in Aydın			2,110	Market approach
			49,785	

31 December 2017	Level 1	Level 2	Level 3	Valuation Method
Investment properties in Izmir			52,110	Replacement cost approach
Investment properties in Gebze			16,690	Income capitalization approach
Investment properties in Ankara			15,160	Market approach
Investment properties in Istanbul			13,000	Market approach
Investment properties in Adana			3,150	Replacement cost approach
Investment properties in Balıkesir			3,112	Replacement cost approach

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

14. Investment properties (continued)

Significant unobservable inputs and sensitivity of fair values of respective investment properties are as follows:

Fair values of the investment properties determined based on the direct capitalization approach will increase/(decrease) significantly, when there is a significant decrease/ (increase) in capitalization rate and a significant increase/(decrease) in current market rentals. Capitalization rate is calculated by dividing comparable properties annual net operating income by the selling price of the respective properties.

In the income capitalization approach, a significant increase/(decrease) in rentals will cause a significant increase/(decrease) in the fair value. In addition, a slight decrease/(increase) in risk premium and discount rate which are calculated by considering the current market conditions will cause a significant increase/(decrease) in the fair value.

In the replacement cost approach, a significant increase/(decrease) of construction costs and miscellaneous costs of any similar properties in the market will cause a significant increase/(decrease) in the fair value.

In the market approach, a significant increase/(decrease) in the market value of any properties which are located in the similar areas with similar conditions will cause a significant increase/(decrease) in the fair value.

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

15. Right of use assets

As of 1 January 2018, The Company provided a right of use asset equal to the lease liability adjusted for prepaid or accrued rent payments. In accordance with this methodology, application of IFRS 16 does not have an impact on the Group's retained earnings as of 1 January 2018.

Closing balances of right of use assets as of 1 January and 31 December 2018 and depreciation and amortization expenses for the years ended 31 December 2018 is stated as below:

	Site Rent	Building	Tangible Network equipment	Other	Total	Right of way	Intangible License	Total	Total
Balance at 1 January	1,077,517	146,826	226,243	115,652	1,566,238	12,321		12,321	1,578,559

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

16. Asset held for sale and discontinued operations

Disposal of Fintur

In 2016, the Group has committed to plan to exit from Fintur operations in relevant jurisdictions and initiated an active program to locate a buyer for its associate. In this regard, Fintur has been classified as held for sale and reported as discontinued operation starting from 1 October 2016.

Equity accounting for Fintur ceased starting from 1 October 2016, and in accordance with IFRS 5, Fintur has been measured at the lower of carrying amount and fair value less costs to sell.

The delay during 2018 in the sales process was caused by events and circumstances beyond the Company's control.

Fintur, has transferred its total shareholding in Azertel Telekomunikasyon Yatırım Dış Ticaret A.Ş (Azertel) to Azerbaijan International Telecom LLC (Azintelecom) at the price of EUR 221,687 on 5 March 2018. The signing of definitive agreement, the transfer of shares to Azintelecom and the transfer of proceeds to Fintur were completed simultaneously. The transaction has no impact on consolidated financial statements since Fintur is classified as assets held for sale in the statement of financial position.

Fintur has completed the transfer of all its shares in Geocell LLC to Silknet JSC on 20 March 2018, a joint stock company organized under the laws of Georgia, for a total consideration of USD 153,000 upon receiving the necessary regulatory approvals. The transaction has no impact on consolidated financial statements since Fintur is classified as assets held for sale in the statement of financial position.

Fintur, has transferred its total shareholding in Kcell JSC to Kazakhtelecom JSC (Kazakhtelecom), established in Kazakhstan, a fixed line operator controlled by the government of the Republic of Kazakhstan through sovereign wealth fund Samruk-Kazyna for a total consideration of USD 302,571. The definitive agreement has been signed on 12 December 2018. The transfer of shares to Kazakhtelecom and the transfer of proceeds to Fintur were completed simultaneously on 21 December 2018.

The transaction has no impact on consolidated financial statements since Fintur is classified as assets held for sale in the statement of financial position.

The Company has signed the definitive agreement on 12 December 2018 to transfer its total shareholding in Fintur to other shareholder of Fintur, Sonera Holding B.V. (Sonera Holding). Transfer to Sonera Holding will be completed subsequent to obtainment of regulatory approvals, the value of transaction will be finalized on closing date of the

transaction. Closing is expected in 2019.

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

18. Deferred tax assets and liabilities (continued)

The Group did not recognise deferred income tax assets of TL 5,310,000 in respect of tax losses amounting to TL 972,730 that can be carried forward against future taxable income. The unused tax losses were mainly incurred by lifecell and Belarusian Telecom that are not likely to generate taxable income in the foreseeable future.

Unused tax losses will expire at the following dates:

Expiration Date	Amount
2019	808
2020	581
2021	646
2022	368,109
2023	172,264
2024	303,045
2025	1,023,650
2026	47,466
2027	488,572
2028	308,541
Indefinite	2,596,318
Total	5,310,000

19. Trade receivables and accrued revenue

	31 December 2018	31 December 2017
Receivables from subscribers	1,634,427	1,369,948
Accounts and notes receivable	560,665	498,397

Undue assigned contracted receivables	271,306	347,596
Accrued revenue		632,631
Other	39,592	
	2,505,990	2,848,572

Trade receivables are shown net of provision for impairment amounting to TL 738,181, at 31 December 2018 (31 December 2017: TL 705,213). Movements in provision for impairment of trade receivables and due from related parties are disclosed in Note 35. The accounts and notes receivable represent receivables from distributors and roaming receivables. The Group's exposure to currency risk and credit risk arising from trade receivables are disclosed in Note 35.

Letters of guarantee received with respect to the accounts and notes receivable amounted to TL 174,975 and TL 339,543 at 31 December 2018 and 2017, respectively.

The undue assigned contracted receivables are the remaining portion of the assigned receivables from the distributors related to the handset campaigns which will be collected from subscribers in instalments by the Company. When monthly instalment is billed to the subscriber, that portion is transferred to Receivables from subscribers. The Company measures the undue assigned contracted receivables at amortized cost, bears the credit risk and recognizes interest income throughout the contract period.

The accrued revenue represents accrued revenue from subscribers. Due to the high volume of subscribers, there are different billing cycles. Accordingly, an accrual is made at the end of each reporting period to accrue revenue for services rendered but not billed. The undue assigned contracted receivables related to handset campaigns, which will be billed after one year is presented under non-current trade receivable amounting to TL 115,001.

Table of Contents**TURKCELL ILETISIM HIZMETLERI AS****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****As at and for the year ended 31 December 2018**

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

20. Receivables from financial services

	31 December 2018	31 December 2017
Current receivables from financial services	3,286,243	2,950,523
Non-current receivables from financial services	884,686	1,297,597
	4,170,929	4,248,120

Movements in provision for impairment of receivables from financial services are disclosed in Note 35.

Starting from 2016 the Group and its distributors have offered handset campaigns where subscribers can buy handsets using loans placed by Turkcell Finansman. The Group assumes credit risk in these transactions. Turkcell Finansman collects the loan from the subscriber during the contract period and does not recognize handset revenue since it is not acting as principal in the handset sale.

21. Contract assets*Current contract assets:*

	31 December 2018	31 December 2017
Contract assets	711,928	
	711,928	

Non-current contract assets:

	31 December 2018	31 December 2017
Contract assets	3,513	
	3,513	

The contract assets represents contract assets from subscribers. Due to the high volume of subscribers, there are different billing cycles. Accordingly, an accrual is made at the end of each reporting period to accrue revenue for services rendered but not billed. Contracted receivables related to handset campaigns, which will be billed after one year is presented under long term contract assets.

22. Inventory

As of 31 December 2018 inventories amounting to TL 180,434 which consist of mainly mobile phone, modem, tablet, sim card and tower construction materials (31 December 2017: TL 104,102).

F-77

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

25. Equity***Share capital***

As at 31 December 2018, share capital represents 2,200,000,000 (31 December 2017: 2,200,000,000) authorized, issued and fully paid shares with a par value of TL 1 each. In this respect, share capital presented in the consolidated financial statements refers to nominal amount of registered share capital.

Every holder of shares are entitled to receive dividends as declared and is entitled to one vote at a meeting in person or by proxy.

Companies with their shareholding percentage are as follows:

	31 December 2018		31 December 2017	
	(%)	TL	(%)	TL
Turkcell Holding A.Ş. (Turkcell Holding)	51.00	1,122,000	51.00	1,122,000
Public Share	48.95	1,077,004	48.95	1,077,004
Other	0.05	996	0.05	996
Total	100.00	2,200,000	100.00	2,200,000
Inflation adjustment to share capital		(52,352)		(52,352)
Inflation adjusted capital		2,147,648		2,147,648

As at 31 December 2018, total number of shares pledged as security is 995,509 (2017: 995,509).

Legal reserves

The legal reserves consist of first and second reserves, appropriated in accordance with the Turkish Commercial Code (TCC). The TCC stipulates that the first legal reserve is appropriated out of statutory profits at the rate of 5% per annum, until the total reserve reaches 20% of a company s paid-in share capital. The second legal reserve is appropriated at the rate of 10% per annum of all cash dividends in excess of 5% of the paid-in share capital. Under the TCC, the legal reserves can only be used to offset losses and are not available for any other usage unless they exceed 50% of paid-in share capital.

Treasury shares

During 2018, the Company purchased 8,434,204 of its shares on-market with prices ranging from full TL 10.01 to full TL 12.33. The buy-back was approved by the Board of Directors on 27 July 2016 and 30 January 2017. Total cost of TL 94,620 was deducted from equity (2017: None).

Dividends

Turkcell:

On 25 May 2017, the Company's General Assembly has approved payment of a dividend amounting to TL 3,000,000 (equivalent to USD 841,633 as of 25 May 2017, the date of the Ordinary General Assembly Meeting) out of profits for the period from 1 January 2010 to 31 December 2016. This represents a gross cash dividend of full TL 1.3636364 (equivalent to full USD 0.3825604 as of 25 May 2017, the date of the Ordinary General Assembly Meeting) per share. The Company paid TL 3,000,000 in total including withholding taxes in three instalments on 15 June, 15 September and 15 December 2017 to the shareholders.

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the year ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

28. Loans and borrowings (continued)

The scope of the EUR 690,000 unutilized portion of the EUR 750,000 loan agreement signed with China Development Bank (CDB) has been expanded. In this respect, in addition to Turkcell, the Company's subsidiaries Turkcell Superonline, Turkcell Finansman and lifecell LLC will also be able to utilize the corresponding loan. Furthermore, in addition to the right to utilize in EUR terms, relevant loan may also be utilized in USD and Renminbi (RMB) with respective annual interest rates of LIBOR + 2.2% and 5.5%. There have been no changes to maturity and the repayment schedule of the loan. As at 31 December 2018, the Company has utilized RMB 251,089 (equivalent to TL 191,337 as at 31 December 2018), USD 140,000 (equivalent to TL 736,526 as at 31 December 2018) and EUR 100,000 (equivalent to TL 602,800 as at 31 December 2018) comparatively, under this agreement.

One of the main reason of increase in borrowings arises from funds received by Turkcell Finansman in order to provide loans to its customers and bond issuance.

Within the scope of buy-back decisions on 27 July 2016 and 30 January 2017, the Company purchased their debt securities issued with a total nominal value of USD 15,500 as at 31 December 2018.

In the year 2018, the Company has approved issuance of management agreement based lease certificates in accordance with capital markets legislation through KT Sukuk Varlık Kiralama A.S. in the domestic market, in Turkish Lira terms, at an amount of up to TL 300,000, on various dates and at various amounts without public offering, as private placement and/or to be sold to institutional investors. As at 31 March 2018, the Company has issued management agreement based lease certificates amounting to TL 125,000 (not discounted), as at 30 September 2018, issued management agreement based lease certificates was redeemed. As at 31 December 2018, the Company has issued management agreement based lease certificates through KT Sukuk Varlık Kiralama A.S amounting to TL 75,000 (not discounted).

In the year 2019, the Company has approved issuance of management agreement based lease certificates in accordance with capital markets legislation in the domestic market, in Turkish Lira terms, at an amount of up to TL 500,000, on various dates and at various amounts without public offering, as private placement and/or to be sold to institutional investors.

(*) Turkcell Finansman'ın liabilities originated from banks abroad are subject to certain reserve requirements as obliged by Central Bank of the Republic of Turkey (CBRT). As at 31 December 2018, blocked deposit in connection with the foreign currency loans utilized by Turkcell Finansman from banks outside of Turkey amounting to TL TL 204,077 is accounted in other current assets.

(**) Belarusian Telecom pledged its certain property, plant and equipment to secure these bank loans. Also, these bank loans are secured by the Government of the Republic of Belarus. (Note 36)

Table of Contents**TURKCELL ILETISIM HIZMETLERI AS****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****As at and for the years ended 31 December 2018**

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

28. Loans and borrowings (continued)

For the majority of the borrowings, the fair values are not materially different to their carrying amounts, since the interest payable on those borrowings is either close to current market rates or the borrowings are of a short-term nature.

Details of the Group's exposure to risks arising from current and non-current borrowings are set out in Note 35.

29. Employee benefits

	31 December 2018	31 December 2017
Retirement pay liability provision	160,613	149,449
Unused vacation provision	64,134	48,217
	224,747	197,666

Provision for annual leave

As 31 December 2018 and 2017, provision for annual leave amounted to TL 64,134 and TL 48,217, respectively.

Provision for employee termination benefits

Movements in provision for employee termination benefits are as follows:

	2018	2017
1 January	149,449	120,755
Service cost	26,971	32,696
Remeasurements	(12,699)	3,738

Edgar Filing: TURKCELL ILETISIM HIZMETLERI A S - Form 20-F

Interest expense	16,957	13,877
Benefit payments	(20,065)	(21,617)
31 December	160,613	149,449

The sensitivity of provision for employee termination benefits to changes in the significant actuarial assumptions is:

31 December 2018	Discount Rate		Inflation Rate	
	1% increase	1% decrease	1% increase	1% decrease
Sensitivity Level				
Change in assumption	(13.0%)	15.7%	16.5%	(13.7%)
Impact on provision for employee termination benefits	(20,880)	25,216	26,501	(22,004)

F-85

Table of Contents**TURKCELL ILETISIM HIZMETLERI AS****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****As at and for the years ended 31 December 2018**

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

29. Employee benefits (continued)

31 December 2017 Sensitivity Level	Discount Rate		Inflation Rate	
	1% increase	1% decrease	1% increase	1% decrease
Change in assumption	(14.6%)	18.1%	18.3%	(14.3%)
Impact on provision for employee termination benefits	(21,820)	27,050	27,349	(21,371)

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated.

Defined contribution plans

Obligations for contribution to defined contribution plans are recognized as an expense in the consolidated statement of profit or loss as incurred. The Group incurred TL 9,361, TL 8,107 and TL 7,722 in relation to defined contribution retirement plan for the years ended 31 December 2018, 2017 and 2016, respectively.

Share based payments

The Group has a share performance based payment plan (cash settled incentive plan) in order to build a common interest with its shareholders, support sustainable success, and ensure loyalty of key employees. The KPIs of the plan are; the total shareholder return in excess of weighted average cost of capital (WACC), and ranking of total shareholder return in comparison with BIST-30 and peer group. Bonus amount is determined according to these evaluations, and it is distributed over a three-year payment plan.

As of 31 December 2018, the Group recognized expenses of TL 26,224 regarding this plan (31 December 2017: TL 29,413).

30. Deferred revenue

Deferred revenue primarily consists of loan application fee and it is classified as current at 31 December 2018 and 2017. The amount of deferred revenue is TL 8,948 and TL 193,381 as at 31 December 2018 and 2017, respectively.

31. Contract liabilities*Current contract liabilities:*

	31 December 2018	31 December 2017
Contract liabilities	255,756	
	255,756	

Non-current contract liabilities:

	31 December 2018	31 December 2017
Contract liabilities	131,598	
	131,598

Table of Contents**TURKCELL ILETISIM HIZMETLERI AS****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****As at and for the years ended 31 December 2018**

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

32. Provisions (continued)

The Group is required to incur certain costs in respect of a liability to dismantle and remove assets and to restore sites on which the assets were located. The dismantling costs are calculated according to best estimate of future expected payments discounted at a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the liability.

It is expected that the obligations for dismantling, removing and site restoration will be realized in accordance with the useful life of GSM services materials.

Additions to obligations for dismantling, removing and site restoration during the period are non-cash transactions and are recorded against property, plant and equipment.

Obligations for dismantling, removing and site restoration are discounted using a discount rate of 5.1% at 31 December 2018 (31 December 2017: 5.6%).

Current provisions:

34. Derivative financial instruments (continued)**Fair value of derivative instruments and risk management**

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are recognized and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its financial instruments into the three levels prescribed under the accounting standards. An explanation of each level is as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

Level 3 inputs are unobservable inputs for the asset or liability.

	31 December 2018	31 December 2017	Fair values Fair Value hierarchy	Valuation Techniques
a) Participating cross currency swap contracts (*)				Pricing models based on discounted cash Present value of the estimated future cash flows based on unobservable yield curves and end period FX rates
-Held for trading	653,142	950,862	Level 3	
-Derivatives used for hedging	(24,199)	950,862		
b) FX swap contracts	677,341			
	656,302	(4,675)	Level 2	Present value of the estimated future cash flows based on

				observable yield curves and end period FX rates
<i>-Held for trading</i>	602,719	(4,675)		
<i>-Derivatives used for hedging</i>	53,583			
c)Currency forward contracts		(2,246)	Level 2	Forward exchange rates at the balance sheet date
<i>-Held for trading</i>		(2,246)		

(*) TL 118,647 accrual of net interest expense has been reflected to consolidated financial statements as at 31 December 2018 (31 December 2017: TL 72,653). Since bid-ask spread is unobservable input; in valuation of participating cross currency swap contracts, prices in bid- ask price range which were considered the most appropriate were used instead of mid prices. If mid prices were used in the valuation the fair value of participating cross currency swap contracts would have been TL 123,995 lower as at 31 December 2018 (31 December 2017: TL 129,870).

There were no transfers between fair value hierarchy levels during the year.

34. Derivative financial instruments (continued)**Fair value of derivative instruments and risk management (continued)**

EUR 500,000 participating cross currency swap contracts includes TL 690,146 guarantees after CSA agreement.

Movements in the participating cross currency swap contracts for the years ended 31 December 2018 and 31 December 2017 are stated below:

	31 December 2018	31 December 2017
Opening balance	950,862	382,054
Cash flow effect	(612,466)	
<i>Total gain/loss:</i>		
Gains recognized in profit or loss	314,746	568,808
Closing balance	653,142	950,862

Net off / Offset

The Company signed a Credit Support Annex (CSA) against default risk of the parties in respect of a EUR 500,000 participating cross currency swap transaction executed on 15 July 2016 and restructured respectively on 26 May 2017 and 9 August 2018. As per the CSA, the swap's current (mark-to-market) value will be determined on the 10th and 24th calendar day of each calendar month and if the mark-to-market value is positive and exceeds a certain threshold, the bank will be posting cash collateral to the Company which will be equal to an amount exceeding the threshold (i.e. if the mark-to-market value is negative, the Company would be required to post collateral to the bank by an amount exceeding the threshold).

With respect to the valuations on a bi-weekly basis, a transfer will take place between the parties only if the mark-to-market value changes by at least EUR 1,000. Following the execution of CSA, the bank transferred EUR 153,540 as collateral to the Company (31 December 2018: TL 925,539) which was the amount exceeding the

threshold (EUR 10,000) and the Company transferred EUR 39,050 as collateral to the bank (31 December 2018: TL 235,393) which was the amount exceeding the threshold (EUR 10,000). The Company clarified this with the derivative assets included in the statement of financial position because it has the legal right to offset the collateral amount TL 690,146 that it recognizes under the borrowings and intends to pay according to the net fair value. This amount was netted from the borrowings and deducted from the derivative instruments in the balance sheet. As of 31 December 2018, If this transaction was not conducted, derivative financial instruments assets would have been TL 2,046,208 and current borrowings would have been TL 7,726,055.

Market risk

The Group uses various types of derivatives to manage market risks. All such transactions are carried out within the guidelines set by the treasury and risk management department. Generally, the Group seeks to apply hedge accounting to manage volatility in profit or loss.

TURKCELL ILETISIM HIZMETLERI AS

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at and for the years ended 31 December 2018

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

34. Derivative financial instruments (continued)

Fair value of derivative instruments and risk management (continued)

Currency risk

The Group's risk management policy is to hedge its estimated foreign currency exposure in respect of borrowing payments with various maturities at any point in time. The Group uses participating cross currency contracts to hedge its currency risk, most with a maturity of more than one year from the reporting date. These contracts are generally designated as cash flow hedges.

The Group designates the hedge ratio, between the amount of hedged item and the hedging instrument is 1:1 to hedge its currency risk.

The time value of options in participating cross currency swap contracts are included in the designation of the hedging instrument and are separately accounted for as a cost of hedging, which is recognised in equity in a cost of hedging reserve. The Group's policy is for the critical terms of the participating cross currency contracts to align with the hedged item.

The Group determines the existence of an economic relationship between the hedging instruments and hedged item based on the currency, amount and timing of their respective cash flows. The Group assesses whether the derivative designated in each hedging relationship is expected to be and has been effective in offsetting changes in cash flows of the hedged item using the hypothetical derivative method.

In these hedge relationships, the main sources of ineffectiveness are;

the effect of the counterparties' credit risk on the fair value of the swap contracts, which is not part of the hedged risk and associated credit risk considered to be very low at inception in the fair value of the hedged cash flows attributable to the change in exchange rates;

the entire fair value of the derivative contracts including currency basis was designated as the hedging instrument in cash flow hedge. The hypothetical derivative is modelled to exclude the impact of currency basis.

Interest rate risk

The Group adopts a policy of ensuring that its interest rate risk exposure is at a fixed rate. This is achieved partly by entering into fixed-rate instruments and partly by borrowing at a floating rate and using cross currency and interest rate swaps as hedges of the variability in cash flows attributable to movements in interest rates. The Group applies a hedge ratio of 1:1.

The Group determines the existence of an economic relationship between the hedging instrument and hedged item based on the reference interest rates, tenors, repricing dates and maturities and the notional or par amounts.

The Group assesses whether the derivative designated in each hedging relationship is expected to be effective in offsetting changes in cash flows of the hedged item using the hypothetical derivative method.

In these hedge relationships, the main sources of ineffectiveness are:

the effect of the counterparties' credit risk on the fair value of the swap contracts, which is not part of the hedged risk and associated credit risk considered to be very low at inception in the fair value of the hedged cash flows attributable to the change in interest rates;

Table of Contents**TURKCELL ILETISIM HIZMETLERI AS****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****As at and for the years ended 31 December 2018**

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

34. Derivative financial instruments (continued)**Fair value of derivative instruments and risk management (continued)****Cash flow sensitivity analysis for variable-rate instruments**

A reasonably possible change of 100 basis points in interest rates and 10 % change in foreign exchange currency at the reporting date would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, remain constant.

	Profit or Loss		Equity, net of tax	
	100 bp increase	100 bp decrease	100 bp increase	100 bp decrease
31 December 2018				
Participating cross currency swap contracts	937,845	9,455	(360,596)	(259,066)
Cross currency swap contracts	31,584	320	1,452	4,765
Cash Flow sensitivity (net)	969,429	9,775	(359,144)	(254,301)

Cash flow hedges

The following table provides a reconciliation by risk category of components of equity and analysis of OCI items, net of tax, resulting from cash flow hedge accounting.

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

35. Financial instruments (continued)**Impairment losses**

Individual receivables which are known to be uncollectible are written off by reducing the carrying amount directly. The other receivables are assessed collectively to determine whether there objective evidence that an impairment has been incurred but not yet is been identified. The Group considers that there is evidence of impairment if any of the following indicators are present:

significant financial difficulties of the customer

probability that the customer will enter bankruptcy or financial reorganisation, and

default or delinquency in payments

Receivables for which an impairment provision was recognized are written off against the provision when there is no expectation of recovering additional cash.

Impairment losses are recognized in profit or loss within net impairment losses on financial and contract assets (Note 10). Subsequent recoveries of amounts previously written off are credited against Net impairment losses on financial and contract assets (Note 10).

Movements in the provision for impairment of trade receivables and due from related parties are as follows:

	31 December 2018	31 December 2018
	Contract Asset	Other Asset**
Opening balance		705,440

35. Financial instruments (continued)**Exposure to currency risk (continued)****Sensitivity analysis**

The basis for the sensitivity analysis to measure foreign exchange risk is an aggregate corporate-level currency exposure. The aggregate foreign exchange exposure is composed of all assets and liabilities denominated in foreign currencies, the analysis excludes net foreign currency investments.

10% strengthening/weakening of the TL, UAH, BYN against the following currencies at 31 December 2018 and 31 December 2017 would have increased/ (decreased) profit or loss before by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant.

	Sensitivity analysis			
	31 December 2018		Equity	
	Profit/(Loss)			
	Appreciation of foreign currency	Depreciation of foreign currency	Appreciation of foreign currency	Depreciation of foreign currency
1- USD net asset/liability	(106,121)	106,121		
2- Hedged portion of USD risk (-)			(9,596)	9,596
3- USD net effect (1+2)	(106,121)	106,121	(9,596)	9,596
4- EUR net asset/liability	(37,775)	37,775		
5- Hedged portion of EUR risk (-)			(23,613)	23,613
6- EUR net effect (4+5)	(37,775)	37,775	(23,613)	23,613
	(9,275)	9,275		

7- Other foreign currency net asset/liability (RMB)				
8- Hedged portion of other foreign currency risk (-) (RMB)			364	(364)
9- Other foreign currency net effect (7+8)	(9,275)	9,275	364	(364)
Total (3+6+9)	(153,171)	153,171	(32,845)	32,845

Sensitivity analysis**31 December 2017**

	Profit/(Loss)		Equity	
	Appreciation of foreign currency	Depreciation of foreign currency	Appreciation of foreign currency	Depreciation of foreign currency
1- USD net asset/liability	23,400	(23,400)		
2- Hedged portion of USD risk (-)				
3- USD net effect (1+2)	23,400	(23,400)		
4- EUR net asset/liability	(87,838)	87,838		
5- Hedged portion of EUR risk (-)				
6- EUR net effect (4+5)	(87,838)	87,838		
7- Other foreign currency net asset/liability (RMB)				
8- Hedged portion of other foreign currency risk (-) (RMB)				
9- Other foreign currency net effect (7+8)				
Total (3+6+9)	(64,438)	64,438

Table of Contents**TURKCELL ILETISIM HIZMETLERI AS****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****As at and for the years ended 31 December 2018**

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

35. Financial instruments (continued)**Interest rate risk**

As at 31 December 2018 and 2017 the interest rate profile of the Group's variable rate interest-bearing financial instruments was:

		31 December 2018		31 December 2017	
	Note	Effective Interest Rate	Carrying Amount	Effective interest rate	Carrying Amount
Variable rate instruments	28				
USD floating rate loans		4.3%	(4,589,157)	3.2%	(2,880,615)
EUR floating rate loans		2.1%	(6,975,890)	2.1%	(5,511,579)

Sensitivity analysis**Cash flow sensitivity analysis for variable rate instruments:**

An increase/decrease of interest rates by 100 basis points would have (decreased)/increased equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign exchange rates, remain constant. The analysis is performed on the same basis at 31 December 2018 and 2017:

	Profit or loss		Equity	
	100 bps increase	100 bps decrease	100 bps increased	100 bps decrease
31 December 2018				
Variable rate instruments (financial liability)	(234,196)	234,196		
Cash flow sensitivity (net)	(234,196)	234,196		

31 December 2017

Variable rate instruments (financial liability)	(83,922)	83,922
Cash flow sensitivity (net)	(83,922)	83,922

Fair values

Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are recognized and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its financial instruments into the three levels prescribed under the accounting standards. An explanation of each level is as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

Level 3 inputs are unobservable inputs for the asset or liability.

Table of Contents**TURKCELL ILETISIM HIZMETLERI AS****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****As at and for the years ended 31 December 2018**

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

35. Financial instruments (continued)**Fair values (continued)****Valuation inputs and relationships to fair value**

The following table summarizes the quantitative information about the significant unobservable inputs used in level 3 fair value measurement of contingent consideration,

	Fair value at		Unobservable Inputs	Inputs		Relationship of unobservable inputs to fair value
	31 December 2018	31 December 2017		31 December 2018	31 December 2017	
Contingent consideration	358,304	323,691	Risk-adjusted discount rate	9,5%	4,8%	A change in the discount rate by 100 bps would increase/decrease FV by TL (13,582) and TL 14,250 respectively, If expected settlement date changes by 1 year FV would increase/decrease by TL (31,047) and TL 33,896 respectively,
			Expected settlement date	first quarter of 2023	first quarter of 2021	

Changes in the consideration payable in relation to acquisition of Belarusian Telecom for the years ended 31 December 2018 and 31 December 2017 are stated below:

	2018	2017
Opening balance	323,691	295,062
Gains recognized in profit or loss	34,613	28,629
Closing balance	358,304	323,691

Financial assets:

Carrying values of significant portion of financial assets do not differ significantly from their fair values due to their short-term nature.

Financial liabilities:

Fair values of financial liabilities are assumed to approximate their carrying values due to their short term nature and floating interest rates.

As at 31 December 2018, the fair value of debt securities issued by the Company in 2015 with a nominal value of USD 500,000 and fixed interest rate (Note 28), is TL 2,380,855 (31 December 2017:2,063,972).

As at 31 December 2018, the fair value of debt securities issued by the Company in 2018 with a nominal value of USD 500,000 and fixed interest rate (Note 28), is TL 2,329,011 (31 December 2017:None).

Fair value of cash and cash equivalents and debt securities issued are classified as level 1 and fair value of other financial assets and liabilities are classified as level 2.

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

36. Guarantees and purchase obligations

At 31 December 2018, outstanding purchase commitments with respect to property, plant and equipment, inventory, advertising and sponsorship amount to TL 1,353,789 (31 December 2017:TL 592,956). Payments for these commitments will be made within 5 years.

The Group is contingently liable in respect of letters of guarantee obtained from banks and given to public institutions and private entities, and financial guarantees provided to subsidiaries amounting to TL 6,530,374 at 31 December 2018 (31 December 2017: TL 4,926,916).

At 31 December 2018, there is no commitments regarding lifecell s 3G (31 December 2017:UAH 217,793).

37. Commitments and Contingencies

The following disclosures comprise of material legal lawsuits, investigations and in-depth investigations against the Company.

License Agreements

Turkcell:

On 27 April 1998, the Company signed the Agreement for grant of concession for the establishment and Operation of the Pan-European Mobile Telephone System, GSM (hereinafter referred to as the License Agreement) with the Turkish Ministry. In accordance with the License Agreement, the Company was granted a 25 year license for the provision of GSM services for a license fee of USD 500,000.

3G License

On 30 April 2009, the Company signed a separate License Agreement with ICTA which provides authorization for providing IMT 2000/UMTS services and establishment and operation of the required infrastructure. Turkcell acquired the A license providing the widest frequency band for a consideration of EUR 358,000 (excluding VAT). The license is effective for duration of 20 years starting from 30 April 2009, According to the agreement, Turkcell has provided IMT 2000/UMTS services starting from 30 July 2009.

4.5G License

The 4,5 licensing process is finalized by signing of IMT License Commitments Document by Turkcell and therefore, ICTA granted Turkcell 4,5G License on 27 October 2015. The 4.5G License is effective for 13 years until 30 April 2029, According to the License, Turkcell started to provide 4.5G services on 1 April 2016.

Belarusian Telecom:

Belarusian Telecom owns a license issued on 28 August 2008 for a period of 10 years and was valid till 28 August 2018. According to the Sale and Purchase Agreement signed, the State Property Committee of the Republic of Belarus committed to grant the license from the acquisition date of 26 August 2008 for a period of 10 years. In accordance with the Edict of the President of the Republic of Belarus dated 26 November 2015, numbered 475, the license is now issued without limitation of the period of validity. Starting from 1 March 2016, the license is valid from the date of the licensing authority's decision on its issue and for an unlimited period. Under the terms of its license, Belarusian Telecom is required to gradually increase its geographical coverage until the end of 2018. Belarusian Telecom has fulfilled all coverage requirements except covering all Belarusian settlements. The number of uncovered settlements is 646 out of a total of 22,552 settlements.

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

37. Commitments and Contingencies (continued)

License Agreements (continued)

lifecell:

lifecell owns eleven activity licenses, for GSM 900, a technology neutral license, issued for 3G, one license for international and long-distance calls and eight PSTN licenses for eight regions in Ukraine. As of December 31, 2018, lifecell owned 29 frequency use licenses for IMT (LTE-2600, LTE-1800, IMT-2000 (UMTS), GSM-900, GSM-1800, CDMA-800. Wi-fi and microwave Radiorelay and Broadband Radio Access, which are regional and national. Licenses for IMT (LTE-2600, LTE-1800) and GSM-1800 were issued on 4G tenders, held in Q1 2018. Additionally, lifecell holds a specific number range three NDC codes for mobile networks, twenty one permissions on a number resource for short numbers, eleven permissions on a number resource for SS-7 codes (7 regional and 4 international), one permission on a number resource for Mobile Network Code, nine permissions on a number resource for local ranges for PSTN licenses, two permissions on a service codes for alternative routing selection for international and long-distance fixed telephony and one permission on a code for global telecommunication service 800 .

Inteltek:

Our affiliate, Inteltek İnternet Teknoloji Yatırım ve Danışmanlık Ticaret A.Ş. (Inteltek), on which the Company holds 55% of its shares, has been incorporated in order to establish and operate central system for games of chance through multi-access electronic platforms. Until 1 March 2009, İnteltek operated games of chance basing on the agreement executed with Spor Toto Directorate (Spor Toto) dated 29 August 2008. Inteltek gave the best offer at the new tender which allowed private companies to organize games of chance and signed a new contract with Spor Toto, for a term of ten years. Under this agreement, the commission rate was 1.4% and the targeted payout was 50% of the turnover balance including VAT. As at 31 December 2018, Inteltek has a letter of guarantee of TL 159,572 (31 December 2017: TL 159,752) provided to Spor Toto.

As the term of the agreement executed between Spor Toto and İnteltek dated 29 August 2008 has been expired on 29 August 2018 and the new tender has not been concluded yet, an agreement of procurement through bargaining has been signed between İnteltek and Spor-Toto being effective from 29 August 2018 and for a term of up to 1 year as per to the article 26 of the Law on the Transfer of Rights to Organize Fixed Odds and Paramutual Betting Games Based

on Sports Competitions to Private Legal Entities numbered 5738. The agreement of procurement through bargaining is a follow-up of the agreement which currently exists and the terms and conditions of this agreement are generally same with the agreement which has been expired as of 29 August 2018.

Inteltek has a mobile agency agreement with Spor Toto, receiving the rights to assign mobile sub agencies to operate the fixed odds and paramutual betting games based on sports competitions. As at 31 December 2018, Inteltek has provided a letter of guarantee of TL 25,000 (31 December 2017: TL 25,000) provided to Spor Toto for mobile agency agreement.

Kibris Telekom:

On 27 April 2007, Kibris Telekom signed the License Agreement for Installation and Operation of a Digital, Cellular, Mobile Telecommunication System (Mobile Communication License Agreement) with the Ministry of Communications and Public Works of the Turkish Republic of Northern Cyprus which is effective from 1 August 2007, replacing the previous GSM-Mobile Telephony System Agreement dated 25 March 1999. In accordance with the Mobile Communication License Agreement, Kibris Telekom was granted an 18 year GSM 900, GSM 1800 and IMT 2000/UMTS license for GSM 900, GSM 1800 frequencies while the usage of IMT 2000/UMTS frequency bands is subject to the fulfillment of certain conditions.

37. Commitments and Contingencies (continued)

License Agreements (continued)

Kibris Telekom (continued):

On 14 March 2008, Kibris Telekom was awarded a 3G infrastructure license at a cost of \$10,000 including VAT, which was paid at the end of March 2008. Under the terms of the license, the system had to be operational by mid-October 2008. In 2010, Kibris Telekom has completed the radio transmission (air link) project providing direct international voice and data connection with mainland and started using it from the third quarter of 2010. The Project is the only direct connection in Turkish Republic of Northern Cyprus besides Telecommunication Authority.

37.1 Dispute on Treasury Share Amounts

The Undersecretariat of Treasury and ICTA alleged that Company made deficient treasury share and contribution to the authority expenses payments in the past, the Company objected to these claims.

The Company has resolved the following within the scope of Provisional Article 13 added to the Telegraph and Telephone Law No.406 dated 4 February 1924 of the Law on the Amendment of Certain Tax Laws and Other Laws No. 7061 published in the Official Gazette dated December 5th, 2017: to restructure relevant disputes and their interest fees and to choose the method of increasing for relevant years legal payment amounts from the options in order to restructure relevant disputes and their interest fees for the periods for which examination is ongoing or has not been yet initiated. The Company applied for restructure, and according to the Law the Company submitted waiver petition or accepted the cases related to the restructured amounts. In some of the cases, the Courts already granted decisions in line with the petitions submitted by the Company and in the other pending cases, it is expected that the Courts shall grant decisions in line with the statement of waiver/acceptance of the aforementioned cases.

Based on the Laws stated above, the total amount, including principal and interest, calculated is TL 206,365 and is TL 209,159, respectively. The total payment including interest on installments is TL 436,300 and the payments have been

made in 6 equal installments in 2018.

No liabilities remain in the consolidated financial statements as at and for the period ended 31 December 2018 (31 December 2017: TL 417,668).

37.2 Disputes on Special Communication Tax and Value Added Tax

a) Disputes on SCT for the year 2011

Large Tax Payers Office levied Special Communication Tax (SCT) and tax penalty on the Company as a result of the Tax Investigation for the year 2011. The Company filed lawsuits for the cancellation of the notification regarding the aforementioned SCT assessment. The court partially accepted and partially rejected the cases and the parties appealed the decisions regarding the parts against them. The Large Tax Payers Office has collected TL 80,355 calculated for the parts against the Company for the assessment of the SCT for the year 2011 by offsetting the receivables of the Company from Public Administrations.

As per the Law no. 6736, the Company filed applications for the restructuring of penalties and interest on the SCT regarding the dispute on the tax, while the cases are pending before the court of appeal. Tax Office rejected the application for the year 2011. The Company also filed a case for the cancellation of aforementioned rejection act of the Tax Office for the year 2011. The case is pending as well as the cases regarding the cancellation of the SCT assessment for the year 2011.

37. Commitments and Contingencies (continued)

37.2 Disputes on Special Communication Tax and Value Added Tax

b) Disputes on SCT for the years 2013 and 2014 and effects of Law No. 7143

Tax assessments for prepaid card sales for 2013 and 2014 have been completed. The Company has been notified of the tax audit reports prepared at the end of the said investigations. The Company management has decided to benefit from Law No. 7143, which provides advantageous payment and discount provisions, regarding the criticized issues in the tax audit reports and TL 39,362 has been paid (31 December 2017: TL 24,175).

c) Disputes on SCT and VAT for the years 2015 and 2016

Turkish telecom sector players including Turkcell has been subjected to a limited tax audit with respect from VAT and SCT for 2015 and 2016. At the end of the tax audit process for the Company no issues to be criticized were identified for 2015. However, some of bundle offers and some services offered by the Company are subjected to criticism by tax authority for 2016. As of 31 December 2018, respectively tax claims arising from SCT and VAT amounting to TL 134,537 and TL 113,367 including the principal and penalty amounts have been notified to the Company. Administrative process has been initiated in accordance with the relevant legislation while reserving right to take legal action.

Based on the management opinion, an outflow of resources embodying economic benefits is deemed to be less than probable, thus, no provision is recognized in the consolidated financial statements as at and for the period ended 31 December 2018 (31 December 2017: None).

37.3 Tax Base Increase due to Law Serial No. 7143

The Company Management decided to apply for VAT and corporate tax base increase mechanism for 2017 due to Law Serial No. 7143 and TL 35,443 payment has been made on 1 October 2018. No liabilities remain in the consolidated financial statements as at and for the period ended 31 December 2018 (31 December 2017: None).

37.4 Investigation initiated by ICTA on subscription numbers and radio utilization and usage fees

ICTA commenced in-depth investigations, against the GSM operators for the years, 2004-2009, 2010-2011, 2012, 2013 and 2014. As a result of the investigations, ICTA imposed administrative fines to the Company amounting TL 11,240 in total and decided to warn the Company. The administrative fines were paid within 1 month following the notification of the decision of ICTA, with 25% discount. The Company filed lawsuits for the cancellation of aforementioned administrative fines and ICTA's administrative acts. ICTA filed lawsuits against Company for the collection of the radio utilization and usage fee amount which was alleged that the Company paid deficiently.

The Company has resolved the following based on the Laws No. 7061 as explained in detailed note 37.1 to restructure radio fees which are in dispute and respective penalty, default interest regarding these disputes. The Company applied for restructure, and according to the Law the Company submitted waiver petition or accepted the cases related to the restructured amounts. The Courts granted decisions in line with the petitions submitted by the Company.

The total amount, including principal and interest, calculated within the scope of clause 2 is TL 158,340. The total payment including interest on instalments is TL 166,257 and the payments have been made in 6 equal instalments in 2018.

No liabilities have been remained in the consolidated financial statements as at and for the period ended 31 December 2018 (31 December 2017: TL 157,446).

(All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand currency units and are expressed in Turkish Liras unless otherwise stated.)

37. Commitments and Contingencies (continued)

37.5 Disputes regarding the Law on the Protection of Competition

On the grounds of the investigation initiated by the Competition Board on the grounds that the Company violated the competitive environment through abusing its dominant position in the Turkish mobile market and it was decided to apply administrative fine amounting to TL 91,942 on the Company. A lawsuit was filed by the Company. The Court rejected the case. The Company appealed the decision with the request of the stay of the execution.

Three private companies filed a lawsuits against the Company in relation with this case claiming in total of TL 112,084 together with up to 3 times of the loss amount to be determined by the court for its material damages by reserving its rights for surpluses allegedly. The cases are still pending.

As a result of the abovementioned investigation, Competition Board concluded that the Company did not determine retail prices and there was no need to impose an administrative fines on this issue. After the lawsuit filed by a third party, this part of Competition Board's judgement was reversed by the Council of State and Competition Board launched a new process. Consequently, the Board decided on January 2019 that the Company determined the retail prices of units and to apply administrative fine amounting to TL 91,942 on the Company. After the receiving of the reasoned decision, the Company will take legal action.

Based on the management opinion, the probability of an outflow of resources embodying economic benefits is uncertain, thus, no provision is recognized in the consolidated financial statements as at and for the period ended 31 December 2018 (31 December 2017: None).

37.6 Ministry of Trade Administrative Fine

Ministry of Trade prepared a report upon the investigation initiated against the Company on subscriber agreements, distance contracts, value added services and commitment campaigns including device procurement for the year 2015. The Company filed a lawsuit for the stay of execution and cancellation of the Notice of Administrative Fine imposed by Istanbul Governorship Directorate of Commerce based to the aforementioned report of the Ministry, amounting to TL 138,173 and the Decision of Administrative Fine of Istanbul Governorship Directorate of Commerce. Furthermore, the Company demanded the Court to recourse to the Constitutional Court for the cancellation of the related part of the 19th paragraph of the article 77 of the Law on the Protection of Consumers numbered 6502.

Based on the management opinion, the probability of an outflow of resources embodying economic benefits is uncertain, thus, no provision is recognized in the consolidated financial statements as at and for the period ended 31 December 2018 (31 December 2017: None).
