Notes to Consolidated Financial Statements (continued)

(Unaudited)

6. Covered Assets and Indemnification Asset

As discussed in Note 2 to the consolidated financial statements, the Bank assumed substantially all of the liabilities, including all of the deposits, and acquired substantially all of the assets of FNB in an FDIC-assisted transaction on September 13, 2013. Pursuant to the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets: (i) 80% of losses on the first \$240.4 million of losses incurred; (ii) 0% of losses in excess of \$240.4 million up to and including \$365.7 million of losses incurred; and (iii) 80% of losses in excess of \$365.7 million of losses incurred. The Bank has also agreed to reimburse the FDIC for any subsequent recoveries. The loss-share agreements for commercial and single family residential loans are in effect for 5 years and 10 years, respectively, from the Bank Closing Date, and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. The asset arising from the loss-share agreements, which we refer to as the FDIC Indemnification Asset, is measured separately from the covered loan portfolio because the agreements are not contractually embedded in the covered loans and are not transferable should the Bank choose to dispose of the covered loans.

In accordance with the loss-share agreements, the Bank may be required to make a true-up payment to the FDIC approximately ten years following the Bank Closing Date if the FDIC's initial estimate of losses on covered assets is greater than the actual realized losses. The true-up payment is calculated using a defined formula set forth in the P&A Agreement.

Covered Loans and Allowance for Covered Loan Losses

Loans acquired in a FDIC-assisted acquisition that are subject to a loss-share agreement are referred to as covered loans and reported separately in the consolidated balance sheets. Covered loans are reported exclusive of the cash flow reimbursements that may be received from the FDIC.

The Bank's portfolio of acquired covered loans had a fair value of \$1.1 billion as of the Bank Closing Date, with no carryover of any allowance for loan losses. Acquired covered loans were preliminarily segregated between those considered to be PCI loans and those without credit impairment at acquisition.

In connection with the FNB Transaction, the Bank acquired loans both with and without evidence of credit quality deterioration since origination. The Company's accounting policies for acquired covered loans, including covered PCI loans, are consistent with that of acquired non-covered loans, as described in Note 5 to the consolidated financial statements. The Company has established under its PCI accounting policy a framework to aggregate certain acquired covered loans into various loan pools based on a minimum of two layers of common risk characteristics for the purpose of determining their respective fair values as of their acquisition dates, and for applying the subsequent recognition and measurement provisions for income accretion and impairment testing.

Edgar Filing: Friedman Michael A - Form 4

The following table presents the carrying value of the covered loans summarized by portfolio segment (in thousands).

	March 31, 2014	December 31, 2013
Commercial and industrial	\$ 52,363	\$ 66,943

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

Average investment in covered PCI loans for the three months ended March 31, 2014 is summarized by class in the following table (in thousands).

Commercial and industrial:	
Secured	\$ 25,381
Unsecured	9,429
Real estate:	
Secured by commercial properties	352,334
Secured by residential properties	193,681
Construction and land development:	
Residential construction loans	3,534
Commercial construction loans and land development	106,183
Consumer	
	\$ 690,542

Covered non-accrual loans, excluding those classified as held for sale, are summarized by class in the following table (in thousands).

	March 31, 2014	December 31, 2013
Commercial and industrial:		
Secured	\$	\$ 91
Unsecured	882	882
Real estate:		
Secured by commercial properties	10,607	40
Secured by residential properties	670	209
Construction and land development:		
Residential construction loans	1,898	575
Commercial construction loans and land development	15	
Consumer		
	\$ 14,072	\$ 1,797

At March 31, 2014, covered non-accrual loans included covered PCI loans of \$11.4 million for which discount accretion has been suspended because the extent and timing of cash flows from these covered PCI loans can no longer be reasonably estimated.

Interest income recorded on accruing impaired loans and on non-accrual loans for the three months ended March 31, 2014 was nominal. Except as noted above, covered PCI loans are considered to be performing due to the application of the accretion method. Additionally, no acquired covered performing loans have been modified in a TDR.

The Bank's impairment methodology for the covered loans is consistent with that of non-covered loans as discussed in Note 5 to the consolidated financial statements. To the extent there is experienced or projected credit deterioration on the acquired covered loan pools subsequent to amounts estimated at the previous quarterly recast date and expected cash flows for a loan or pool decreases, an increase in the allowance for loan losses is made through a charge to the provision for loan losses. If expected cash flows for a loan or pool increase, any previously established allowance for loan losses is

Edgar Filing: Friedman Michael A - Form 4

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

reversed and any remaining difference increases the accretable yield which will be taken into income over the remaining life of the loan. Additionally, provision for credit losses will be recorded on advances on covered loans subsequent to the acquisition date in a manner consistent with the allowance for non-covered loan losses. These provisions will be partially offset by an increase to the FDIC Indemnification Asset in an amount equal to the FDIC's loss sharing percentage under the loss-share agreements, which is recognized in noninterest income within the consolidated statement of operations.

Changes in the allowance for covered loan losses for the three months ended March 31, 2014, distributed by portfolio segment, are shown below (in thousands).

Balance, beginning of period	\$	188,291
FDIC Indemnification Asset accretion (amortization)		1,357
Transfers to due from FDIC and other		(912)
Balance, end of period	\$	188,736

7. Mortgage Servicing Rights

The following table presents the change in fair value of the Company's MSR (dollars in thousands).

	Three Months Ended March 31,	
	2014	2013
Balance, beginning of period	\$ 20,149	\$ 2,080
Additions	7,432	2,125
Changes in fair value:		
Due to changes in model inputs or assumptions (1)	2,764	300
Due to customer payments	(406)	(75)

Explanation of Responses:

Edgar Filing: Friedman Michael A - Form 4

Balance, end of period	\$	29,939	\$	4,430
Mortgage loans serviced for others	\$	2,692,730	\$	602,771
MSR as a percentage of serviced mortgage loans		1.11%		0.73%

(1) Primarily represents changes in discount rates and prepayment speed assumptions, which are primarily affected by changes in interest rates and the refinement of other MSR model assumptions.

The key assumptions used in measuring the fair value of the Company's MSR were as follows.

	Three Months Ended March 31,	
	2014	2013
Weighted average constant prepayment rate	9.92%	12.53%
Weighted average discount rate	11.58%	20.27%
Weighted average life (in years)	7.4	6.6

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

A sensitivity analysis of the fair value of the Company's MSR to certain key assumptions is presented in the following table (in thousands).

	March 31, 2014	December 31, 2013
Constant prepayment rate:		
Impact of 10% adverse change	\$ (678)	\$ (601)
Impact of 20% adverse change	(1,313)	(1,170)
Discount rate:		
Impact of 100 basis point adverse change	(792)	(631)
Impact of 200 basis point adverse change	(1,520)	(1,236)

This sensitivity analysis presents the effect of hypothetical changes in key assumptions on the fair value of the MSR. The effect of such hypothetical change in assumptions generally cannot be extrapolated because the relationship of the change in one key assumption to the change in the fair value of the MSR is not linear. In addition, in the analysis, the impact of an adverse change in one key assumption is calculated independent of any impact on other assumptions. In reality, changes in one assumption may change another assumption.

During the three months ended March 31, 2014 and 2013, contractually specified servicing fees, late fees and ancillary fees earned of \$2.2 million and \$0.3 million, respectively, were included in other noninterest income within the consolidated statements of operations.

8. Deposits

Deposits are summarized as follows (in thousands).

9. Short-term Borrowings

Short-term borrowings are summarized as follows (in thousands).

	March 31, 2014	December 31, 2013
Federal funds purchased	\$ 193,275	\$ 137,225
Securities sold under agreements to repurchase	158,931	107,462
Federal Home Loan Bank notes		
Short-term bank loans	139,200	97,400
	\$ 491,406	\$ 342,087

Federal funds purchased and securities sold under agreements to repurchase generally mature daily, on demand, or on some other short-term basis. The Bank and FSC execute transactions to sell securities under agreements to repurchase with both customers and broker-dealers. Securities involved in these transactions are held by the Bank, FSC or the dealer.

Information concerning federal funds purchased and securities sold under agreements to repurchase is shown in the following tables (dollars in thousands).

	Three Months Ended March 31,	
	2014	2013
Average balance during the period	\$ 343,233	\$ 328,521
Average interest rate during the period	0.18%	0.21%

	March 31, 2014	December 31, 2013
Average interest rate at end of period	0.16%	0.16%
Securities underlying the agreements at end of period		
Carrying value	\$ 166,472	\$ 144,991
Estimated fair value	\$ 162,932	\$ 138,719

Federal Home Loan Bank (FHLB) notes mature over terms not exceeding 365 days and are collateralized by FHLB Dallas stock, nonspecified real estate loans and certain specific commercial real estate loans. Other information regarding FHLB notes is shown in the following tables (dollars in thousands).

Edgar Filing: Friedman Michael A - Form 4

	Three Months Ended March 31,	
	2014	2013
Average balance during the period	\$ 8	\$ 34,174
Average interest rate during the period	0.13%	0.09%

	March 31,	December 31,
Average interest rate at end of period		

FSC uses short-term bank loans periodically to finance securities owned, customers' margin accounts and underwriting activities. Interest on the borrowings varies with the federal funds rate. The weighted average interest rate on the borrowings at March 31, 2014 and December 31, 2013 was 1.13% and 1.15%, respectively.

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

10. Income Taxes

The Company applies an estimated annual effective rate to interim period pre-tax income to calculate the income tax provision for the quarter in accordance with the principal method prescribed by the accounting guidance established for computing income taxes in interim periods. The Company's effective rate was 36.2% and 36.5% for the three months ended March 31, 2014 and 2013, respectively.

GAAP requires the measurement of uncertain tax positions. Uncertain tax positions are the difference between a tax position taken, or expected to be taken in a tax return, and the benefit recognized for accounting purposes. There were no uncertain tax positions at March 31, 2014 and December 31, 2013.

The Company files income tax returns in U.S. federal and several U.S. state jurisdictions. The Company is subject to tax audits in numerous jurisdictions in the U.S. until the applicable statute of limitations expires. Excluding those entities acquired as a part of the PlainsCapital Merger, the Company has been examined by U.S. tax authorities for U.S. federal income tax years prior to 2010, and is under no federal or state tax audits at March 31, 2014. PlainsCapital has been examined by U.S. tax authorities for U.S. federal income tax years prior to 2011, and is under no federal or state tax audits at March 31, 2014.

For the majority of tax jurisdictions, the Company is no longer subject to federal, state or local income tax examinations by tax authorities for years prior to 2010.

11. Commitments and Contingencies

Legal Matters

The Company is subject to loss contingencies related to litigation, claims, investigations and legal and administrative cases and proceedings arising in the ordinary course of business. The Company evaluates these contingencies based on information currently available, including advice of counsel. The Company establishes accruals for those matters when a loss contingency is considered probable and the related amount is reasonably estimable. Any accruals are periodically reviewed and may be adjusted as circumstances change. Some of the Company's exposure with respect to loss contingencies may be offset by applicable insurance coverage. In determining the amounts of any accruals or estimates of possible loss contingencies however, the Company does not take into account the availability of insurance coverage. When it is practicable, the Company estimates loss contingencies for possible litigation and claims, whether or not there is an accrued probable loss. When the Company is

Edgar Filing: Friedman Michael A - Form 4

able to estimate such possible losses, and when it estimates that it is reasonably possible it could incur losses, in excess of amounts accrued, the Company is required to make a disclosure of the aggregate estimation. However, as available information changes, the matters for which the Company is able to estimate, as well as the estimates themselves will be adjusted, accordingly.

Assessments of litigation and claims exposures are difficult due to many factors that involve inherent unpredictability. Those factors include the following: the varying stages of the proceedings, particularly in the early stages; unspecified, unsupported, or uncertain damages; damages other than compensatory, such as punitive damages; a matter presenting meaningful legal uncertainties, including novel issues of law; multiple defendants and jurisdictions; whether discovery has begun or not or discovery is not complete; meaningful settlement discussions have not commenced; and whether the claim involves a class action and if so, how the class is defined. As a result of some of these factors, the Company may be unable to estimate reasonably possible losses with respect to some or all of the pending and threatened litigation and claims asserted against the Company. The aggregated estimated amount provided above therefore may not include an estimate for every such matter.

The Company is involved in information-gathering requests and investigations (both formal and informal), as well as reviews, examinations and proceedings (collectively, Inquiries) by various governmental regulatory agencies, law enforcement authorities and self-regulatory bodies regarding its business, business practices and policies, as well as the conduct of persons with whom it does business. Additional Inquiries will arise from time to time. In connection with those

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

Inquiries, the Company receives document requests, subpoenas and other requests for information. The Inquiries, including those described below, could develop into administrative, civil or criminal proceedings or enforcement actions that could result in consequences that have a material effect on the Company's consolidated financial position, results of operations or cash flows as a whole. Such consequences could include adverse judgments, findings, settlements, penalties, fines, orders, injunctions, restitution, or alterations in the Company's business practices, and could result in additional expenses and collateral costs, including reputational damage.

Hilltop, Peruna LLC (wholly owned subsidiary of Hilltop), SWS and the individual members of the board of directors of SWS, including Gerald J. Ford, have been named as defendants in two purported shareholder class action lawsuits arising out of the proposed acquisition of SWS by Hilltop, which acquisition was announced on April 1, 2014. Both lawsuits were filed in Delaware Chancery Court (Joseph Arceri v. SWS Group, Inc. et al and Chaile Steinberg v. SWS Group, Inc. et al filed April 8, 2014 and April 11, 2014, respectively). The lawsuits allege claims for breach of fiduciary duty by the individual directors of SWS, and claims against Hilltop for aiding and abetting that breach of fiduciary duty. Both actions seek to enjoin the proposed acquisition. Hilltop believes that the claims are without merit and intends to vigorously defend against these actions.

As a part of an industry-wide inquiry, PrimeLending has received a subpoena from the Office of Inspector General of the U.S. Department of Housing and Urban Development regarding mortgage-related practices, including those relating to origination practices for loans insured by the Federal Housing Administration. PrimeLending is cooperating with this Inquiry.

While the final outcome of litigation and claims exposures or of any Inquiries is inherently unpredictable, management is currently of the opinion that the outcome of pending and threatened litigation and Inquiries will not have a material effect on the Company's business, consolidated financial position, results of operations or cash flows as a whole. However, in the event of unexpected future developments, it is reasonably possible that an adverse outcome in any of the matters discussed above could be material to the Company's business, consolidated financial position, results of operations or cash flows for any particular reporting period of occurrence.

Other Contingencies

The mortgage origination segment may be responsible for errors or omissions relating to its representations and warranties that each loan sold meets certain requirements, including representations as to underwriting standards and the validity of certain borrower representations in connection with the loan. If determined to be at fault, the mortgage origination segment either repurchases the affected loan from the investor or reimburses the investor's losses. The mortgage origination segment has established an indemnification liability reserve for such probable losses.

Generally, the mortgage origination segment first becomes aware that an investor believes a loss has been incurred on a sold loan when it receives a written request from the investor to repurchase the loan or reimburse the investor's losses. Upon completing its review of the investor's

Edgar Filing: Friedman Michael A - Form 4

request, the mortgage origination segment establishes a specific claims reserve for the loan if it concludes its obligation to the investor is both probable and reasonably estimable.

An additional reserve has been established for probable investor losses that may have been incurred, but not yet reported to the mortgage origination segment based upon a reasonable estimate of such losses. Factors considered in the calculation of this reserve include, but are not limited to, the total volume of loans sold exclusive of specific investor requests, actual investor claim settlements and the severity of estimated losses resulting from future claims, and the mortgage origination segment's history of successfully curing defects identified in investor claim requests. While the mortgage origination segment's sales contracts typically include borrower early payment default repurchase provisions, these provisions have not been a primary driver of investor claims to date, and therefore, are not a primary factor considered in the calculation of this reserve.

At March 31, 2014 and December 31, 2013, the mortgage origination segment's indemnification liability reserve totaled \$21.0 million and \$21.1 million, respectively. The provision for indemnification losses was \$0.6 million and \$1.0 million during the three months ended March 31, 2014 and 2013, respectively.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

The following tables provide for a roll-forward of claims activity for loans put-back to the mortgage origination segment based upon an alleged breach of a representation or warranty with respect to a loan sold and related indemnification liability reserve activity (in thousands).

**Representation and Warranty Specific Claims
Activity - Origination Loan Balance
Three Months Ended March 31,**

	2014	2013
Balance, beginning of period	\$ 51,912	\$ 39,693
Claims made	10,044	11,620
Claims resolved with no payment	(4,458)	(7,820)
Repurchases	(4,878)	(1,651)
Indemnification payments	(691)	(612)
Balance, end of period	\$ 51,929	\$ 41,230

**Indemnification Liability Reserve Activity
Three Months Ended March 31,**

	2014	2013
Balance, beginning of period	\$ 21,121	\$ 18,964
Additions for new sales	560	956
Repurchases	(504)	(41)
Early payment defaults	(21)	(95)
Indemnification payments	(181)	(219)
Change in estimate		136
Balance, end of period	\$ 20,975	\$ 19,701

Reserve for Indemnification Liability:

Specific claims	\$ 12,482
Incurred but not reported claims	8,493
Total	\$ 20,975

Although management considers the total indemnification liability reserve to be appropriate, there may be changes in the reserve over time to address incurred losses, due to unanticipated adverse changes in the economy and historical loss patterns, discrete events adversely affecting specific borrowers or industries, and/or actions taken by institutions or investors. The impact of such matters is considered in the reserving process when probable and estimable.

In connection with the FNB Transaction, the Bank entered into two loss-share agreements with the FDIC that collectively cover \$1.2 billion of loans and OREO acquired in the FNB Transaction. Pursuant to the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets: (i) 80% of losses on the first \$240.4 million of losses incurred; (ii) 0% of losses in excess of \$240.4 million up to and including \$365.7 million of losses incurred; and (iii) 80% of losses in excess of \$365.7 million of losses incurred. The Bank has also agreed to reimburse the FDIC for any subsequent recoveries. The loss-share agreements for commercial and single family residential loans are in effect for 5 years and 10 years, respectively, from the Bank Closing Date and the loss recovery provisions to the FDIC

Edgar Filing: Friedman Michael A - Form 4

are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. In accordance with the loss-share agreements, the Bank may be required to make a true-up payment to the FDIC approximately ten years following the Bank Closing Date if the FDIC's initial estimate of losses on covered assets is greater than the actual realized losses. The true-up payment is calculated using a defined formula set forth in the P&A Agreement.

12. Financial Instruments with Off-Balance Sheet Risk

The Bank is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit that involve varying degrees of credit and interest rate risk in excess of the amount recognized in the consolidated financial statements. Such financial instruments are recorded in the consolidated financial statements when they are funded or related fees are incurred or received. The contract amounts of those instruments reflect the extent of involvement (and therefore the exposure to credit loss) the Bank has in particular classes of financial instruments.

Commitments to extend credit are agreements to lend to a customer provided that the terms established in the contract are met. Commitments generally have fixed expiration dates and may require payment of fees. Because some commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. These letters of credit are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan commitments to customers.

In the aggregate, the Bank had outstanding unused commitments to extend credit of \$1.2 billion at March 31, 2014 and outstanding financial and performance standby letters of credit of \$42.9 million at March 31, 2014.

The Bank uses the same credit policies in making commitments and standby letters of credit as it does for on-balance sheet instruments. The amount of collateral obtained, if deemed necessary, in these transactions is based on management's credit evaluation of the borrower. Collateral held varies but may include real estate, accounts receivable, marketable securities, interest-bearing deposit accounts, inventory, and property, plant and equipment.

In the normal course of business, FSC executes, settles, and finances various securities transactions that may expose FSC to off-balance sheet risk in the event that a customer or counterparty does not fulfill its contractual obligations. Examples of such transactions include the sale of securities not yet purchased by customers or for the account of FSC, clearing agreements between FSC and various clearinghouses and broker-dealers, secured financing arrangements that involve pledged securities, and when-issued underwriting and purchase commitments.

13. Stock-Based Compensation

Edgar Filing: Friedman Michael A - Form 4

Pursuant to the Hilltop Holdings 2012 Equity Incentive Plan (the 2012 Plan), the Company may grant nonqualified stock options, stock appreciation rights, restricted stock, restricted stock units, performance awards, dividend equivalent rights and other awards to employees of the Company, its subsidiaries and outside directors of the Company. Upon the approval by stockholders and effectiveness of the 2012 Plan in September 2012, no additional awards were permissible under the 2003 Equity Incentive Plan (the 2003 Plan). In the aggregate, 4,000,000 shares of common stock may be delivered pursuant to awards granted under the 2012 Plan. At March 31, 2014, 3,361,277 shares of common stock remain available for issuance pursuant to the 2012 Plan.

During January 2014 and February 2014, the Compensation Committee of the Board of Directors of the Company awarded certain executives and key employees an aggregate of 156,077 restricted stock units (RSUs) pursuant to the 2012 Plan. A total of 86,040 of these RSUs are subject to time-based vesting conditions and generally cliff vest on the third anniversary of the grant date, and the remaining RSUs vest based upon the achievement of certain performance goals over a three-year period. These RSUs are subject to service conditions set forth in the award agreements, with associated costs recognized on a straight-line basis over the respective vesting periods. The weighted average grant date fair value related to these RSUs was \$23.76 per share. At March 31, 2014, unrecognized compensation expense related to these RSUs was \$3.6 million, which will be amortized through February 2017. The RSUs are not transferable, and the shares of common stock issuable upon conversion of vested RSUs are generally subject to transfer restrictions for a period of one year following conversion, subject to certain exceptions. In addition, the applicable RSU award agreements provide for accelerated vesting under certain conditions.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

During 2013, the Compensation Committee of the Board of Directors of the Company awarded certain executives and key employees a total of 471,000 restricted shares of common stock (Restricted Stock Awards) pursuant to the 2012 Plan. These Restricted Stock Awards generally cliff vest on the third anniversary of the grant date and are subject to service conditions set forth in the award agreements, with associated costs recognized on a straight-line basis over the respective vesting periods. The weighted average grant date fair value related to these Restricted Stock Awards was \$13.32 per share. At March 31, 2014, unrecognized compensation expense related to these Restricted Stock Awards was \$4.3 million, which will be amortized through September 2016. The award agreements governing these Restricted Stock Awards provide for accelerated vesting under certain conditions.

During the three months ended March 31, 2014, Hilltop granted 2,303 shares of common stock to independent members of the Company's Board of Directors for service rendered to the Company during the respective periods. There were no shares of common stock granted to independent members of the Company's Board of Directors during the three months ended March 31, 2013.

Stock options granted on November 2, 2011 to two senior executives pursuant to the 2003 Plan to purchase an aggregate of 600,000 shares of the Company's common stock (the Stock Option Awards) at an exercise price of \$7.70 per share were outstanding at March 31, 2014. These Stock Option Awards vest in five equal installments beginning on the grant date, with the remainder vesting on each grant date anniversary through 2015. At March 31, 2014, unrecognized compensation expense related to these Stock Option Awards was \$0.1 million, which will be amortized on a straight-line basis through October 2015. Additionally, these Stock Option Awards expire on November 2, 2016.

Compensation expense related to the plans was \$0.7 million and \$0.1 million for the three months ended March 31, 2014 and 2013, respectively.

14. Regulatory Matters

Bank

The Bank and Hilltop are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct, material effect on the consolidated financial statements. The regulations require us to meet specific capital adequacy guidelines that involve quantitative measures of assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The capital classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Edgar Filing: Friedman Michael A - Form 4

Quantitative measures established by regulation to ensure capital adequacy require the companies to maintain minimum amounts and ratios (set forth in the following table) of Tier 1 capital (as defined in the regulations) to total average assets (as defined), and minimum ratios of Tier 1 and total capital (as defined) to risk-weighted assets (as defined).

Edgar Filing: Friedman Michael A - Form 4

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

The following table shows the Bank's and Hilltop's consolidated actual capital amounts and ratios compared to the regulatory minimum capital requirements and the Bank's regulatory minimum capital requirements needed to qualify as a well-capitalized institution (dollars in thousands), without giving effect to the final Basel III capital rules adopted by the Federal Reserve Board on July 2, 2013.

	Actual		Minimum Capital Requirements		To Be Well Capitalized Minimum Capital Requirements	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
March 31, 2014						
Tier 1 capital (to average assets):						
Bank	\$ 780,226	9.53%	\$ 327,545	4%	\$ 409,431	5%
Hilltop	1,137,727	13.12%	346,871	4%	N/A	N/A
Tier 1 capital (to risk-weighted assets):						
Bank	780,226	13.47%	231,644	4%	347,466	6%
Hilltop	1,137,727	18.66%	243,951	4%	N/A	N/A
Total capital (to risk-weighted assets):						
Bank	818,760	14.14%	463,288	8%	579,110	10%
Hilltop	1,178,253	19.32%	487,901	8%	N/A	N/A
December 31, 2013						
Tier 1 capital (to average assets):						
Bank	\$ 762,364	9.29%	\$ 328,275	4%	\$ 410,344	5%
Hilltop	1,112,424	12.81%	347,480	4%	N/A	N/A
Tier 1 capital (to risk-weighted assets):						
Bank	762,364	13.38%	227,984	4%	341,976	6%
Hilltop	1,112,424	18.53%	240,159	4%	N/A	N/A
Total capital (to risk-weighted assets):						
Bank	797,771	14.00%	455,968	8%	569,960	10%
Hilltop	1,148,736	19.13%	480,318	8%	N/A	N/A

To be considered adequately capitalized (as defined) under regulatory requirements, the Bank must maintain minimum Tier 1 capital to total average assets and Tier 1 capital to risk-weighted assets ratios of 4%, and a total capital to risk-weighted assets ratio of 8%. Based on the actual capital amounts and ratios shown in the previous table, the Bank's ratios place it in the well-capitalized (as defined) capital category under regulatory requirements.

Management continues to evaluate the final Basel III capital rules and their impact, which would apply to reporting periods beginning after January 1, 2015.

Financial Advisory

Pursuant to the net capital requirements of the Securities Exchange Act of 1934, as amended (the Exchange Act), FSC has elected to determine its net capital requirements using the alternative method. Accordingly, FSC is required to maintain minimum net capital, as defined in Rule 15c3-1 promulgated under the Exchange Act, equal to the greater of \$250,000 or 2% of aggregate debit balances, as defined in Rule 15c3-3 promulgated under the Exchange Act. At March 31, 2014, FSC had net capital of \$71.5 million (the minimum net capital requirement was \$4.8 million), net capital maintained by FSC was 29.8% of aggregate debits, and net capital in excess of the minimum requirement was \$66.7 million.

Under certain conditions, FSC may be required to segregate cash and securities in a special reserve account for the benefit of customers under Rule 15c3-3 promulgated under the Exchange Act. Assets segregated under the provisions of the Exchange Act are not available for general corporate purposes. At March 31, 2014 and December 31, 2013, FSC was not required to segregate cash and securities.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

FSC was not required to segregate cash or securities in a special reserve account for the benefit of proprietary accounts of introducing broker-dealers at March 31, 2014 and December 31, 2013.

Mortgage Origination

As a mortgage originator, PrimeLending is subject to minimum net worth requirements established by the United States Department of Housing and Urban Development (HUD) and the GNMA. On an annual basis, PrimeLending submits audited financial statements to HUD and GNMA documenting PrimeLending s compliance with its minimum net worth requirements. In addition, PrimeLending monitors compliance on an ongoing basis and, as of March 31, 2014, PrimeLending s net worth exceeded the amounts required by both HUD and GNMA.

Insurance

The statutory financial statements of the Company s insurance subsidiaries, which are domiciled in the State of Texas, are presented on the basis of accounting practices prescribed or permitted by the Texas Department of Insurance. Texas has adopted the National Association of Insurance Commissioners (NAIC) statutory accounting practices as the basis of its statutory accounting practices with certain differences that are not significant to the insurance company subsidiaries statutory equity.

A summary of statutory capital and surplus and statutory net income of each insurance subsidiary is as follows (in thousands).

	March 31, 2014	December 31, 2013
Capital and surplus:		
National Lloyds Insurance Company	\$ 104,599	\$ 98,602
American Summit Insurance Company	27,687	26,452

	Three Months Ended March 31, 2014		2013
Statutory net income:			
National Lloyds Insurance Company	\$	5,986	\$ 3,391
American Summit Insurance Company		1,131	251

Edgar Filing: Friedman Michael A - Form 4

Regulations of the Texas Department of Insurance require insurance companies to maintain minimum levels of statutory surplus to ensure their ability to meet their obligations to policyholders. At March 31, 2014, the Company's insurance subsidiaries had statutory surplus in excess of the minimum required.

The NAIC has adopted a risk based capital (RBC) formula for insurance companies that establishes minimum capital requirements indicating various levels of available regulatory action on an annual basis relating to insurance risk, asset credit risk, interest rate risk and business risk. The RBC formula is used by the NAIC and certain state insurance regulators as an early warning tool to identify companies that require additional scrutiny or regulatory action. At December 31, 2013, the most recent date for which the RBC calculation was performed, the Company's insurance subsidiaries' RBC ratio exceeded the level at which regulatory action would be required. As of March 31, 2014, management was not aware of any changes in financial condition or structure that would cause the Company's insurance subsidiaries to not be in compliance with the required RBC ratio.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

15. Derivative Financial Instruments

The Company uses various derivative financial instruments to mitigate interest rate risk. The Bank's interest rate risk management strategy involves effectively modifying the re-pricing characteristics of certain assets and liabilities so that changes in interest rates do not adversely affect the net interest margin. PrimeLending has interest rate risk relative to interest rate lock commitments (IRLCs) and its inventory of mortgage loans held for sale. PrimeLending is exposed to such rate risk from the time an IRLC is made to an applicant to the time the related mortgage loan is sold. To mitigate interest rate risk, PrimeLending executes forward commitments to sell mortgage-backed securities (MBSs). FSC uses forward commitments to both purchase and sell MBSs to facilitate customer transactions and as a means to hedge related exposure to interest rate risk in certain inventory positions.

Non-Hedging Derivative Instruments and the Fair Value Option

As discussed in Note 3 to the consolidated financial statements, the Company has elected to measure substantially all mortgage loans held for sale at fair value under the provisions of the Fair Value Option. The election provides the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without applying complex hedge accounting provisions. The fair values of PrimeLending's IRLCs and forward commitments are recorded in other assets or other liabilities, as appropriate, and changes in the fair values of these derivative instruments produced a net loss of \$1.6 million for the three months ended March 31, 2014 and a net gain of \$1.9 million for the three months ended March 31, 2013, which were recorded as a component of net gains from sale of loans and other mortgage production income. Changes in fair value are attributable to changes in the volume of IRLCs, mortgage loans held for sale, commitments to purchase and sell MBSs and changes in market interest rates. Changes in market interest rates also conversely affect the value of PrimeLending's mortgage loans held for sale, which are measured at fair value under the Fair Value Option. The effect of the change in market interest rates on PrimeLending's loans held for sale is discussed in Note 3 to the consolidated financial statements. The fair values of FSC's derivative instruments are recorded in other assets or other liabilities, as appropriate, and changes in the fair values of FSC's derivatives produced net gains of \$2.8 million and \$1.8 million for the three months ended March 31, 2014 and 2013, respectively, which were recorded as a component of other noninterest income.

Derivative positions are presented in the following table (in thousands).

	March 31, 2014		December 31, 2013	
	Notional Amount	Estimated Fair Value	Notional Amount	Estimated Fair Value
Derivative instruments:				
IRLCs	\$ 797,934	\$ 19,244	\$ 602,467	\$ 12,151
Commitments to purchase MBSs	258,015	1,768	236,305	(109)

16. Balance Sheet Offsetting

Certain financial instruments, including resale and repurchase agreements, securities lending arrangements and derivatives, may be eligible for offset in the consolidated balance sheets and/or subject to master netting arrangements or similar agreements. The following tables present the assets and liabilities subject to enforceable master netting arrangements, repurchase agreements, or similar agreements with offsetting rights (in thousands).

	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Balance Sheet	Net Amounts of Assets Presented in the Balance Sheet	Gross Amounts Not Offset in the Balance Sheet Financial Instruments	Cash Collateral Pledged	Net Amount
March 31, 2014						
Securities borrowed:

17. Broker-Dealer and Clearing Organization Receivables and Payables

Broker-dealer and clearing organization receivables and payables consisted of the following (in thousands).

	March 31, 2014		December 31, 2013
Receivables:			
Securities borrowed	\$ 144,936	\$	107,365
Securities failed to deliver	19,232		7,160
Clearing organizations	10,108		4,698
Due from dealers	166		94
	\$ 174,442	\$	119,317
Payables:			
Securities loaned	\$ 91,879	\$	74,913
Correspondents	50,268		44,852
Securities failed to receive	17,601		5,523
Clearing organizations	2,140		4,390
	\$ 161,888	\$	129,678

18. Reserves for Unpaid Losses and Loss Adjustment Expenses

Information regarding the reserve for unpaid losses and losses and loss adjustment expenses (LAE) are as follows (in thousands).

	Three Months Ended March 31,	
	2014	2013
Balance, beginning of period	\$ 27,468	\$ 34,012
Less reinsurance recoverables	(4,508)	(10,385)
Net balance, beginning of period	22,960	23,627
Incurred related to:		
Current period	16,087	21,531
Prior periods	2,250	(346)
Total incurred	18,337	21,185
Payments related to:		

Explanation of Responses:

Edgar Filing: Friedman Michael A - Form 4

Current period	(8,337)	(9,734)
Prior periods	(7,788)	(9,024)
Total payments	(16,125)	(18,758)
Net balance, end of period	25,172	26,054
Plus reinsurance recoverables	3,086	6,016
Balance, end of period	\$ 28,258	\$ 32,070

The decrease in the reserves at March 31, 2014 as compared to March 31, 2013 of \$3.8 million is primarily due to recovery of reinsurance recoverables outstanding at March 31, 2013. Prior period adverse development of \$2.3 million during the three months ended March 31, 2014 was primarily related to a series of hail storms within the 2012 accident year.

19. Reinsurance Activity

NLC limits the maximum net loss that can arise from large risks or risks in concentrated areas of exposure by reinsuring (ceding) certain levels of risk. Substantial amounts of business are ceded, and these reinsurance contracts do not relieve NLC from its obligations to policyholders. Such reinsurance includes quota share, excess of loss, catastrophe, and other forms of reinsurance on essentially all property and casualty lines of insurance. Net insurance premiums earned, losses and LAE and policy acquisition and other underwriting expenses are reported net of the amounts related to reinsurance ceded to other companies. Amounts recoverable from reinsurers related to the portions of the liability for losses and LAE and unearned insurance premiums ceded to them are reported as assets. Failure of reinsurers to honor their obligations could result in losses to NLC; consequently, allowances are established for amounts deemed uncollectible as NLC evaluates the financial condition of its reinsurers and monitors concentrations of credit risk arising from similar geographic regions, activities, or economic characteristics of the reinsurers to minimize its exposure to significant losses from reinsurer insolvencies. At March 31, 2014, reinsurance receivables have a carrying value of \$4.0 million, which is included in other assets within the consolidated balance sheet. There was no allowance for uncollectible accounts at March 31, 2014, based on NLC's quality requirements.

The effects of reinsurance on premiums written and earned are summarized as follows (in thousands).

	2014		Three Months Ended March 31,		2013	
	Written	Earned	Written	Earned	Written	Earned
Premiums from direct business	\$ 43,770	\$ 42,759	\$ 41,857	\$ 40,546		
Reinsurance assumed	2,233	2,020	1,754	1,630		
Reinsurance ceded	(4,186)	(4,460)	(4,555)	(4,703)		
Net premiums	\$ 41,817	\$ 40,319	\$ 39,056	\$ 37,473		

The effects of reinsurance on incurred losses are as follows (in thousands).

	Three Months Ended March 31,	
	2014	2013
Loss and LAE incurred	\$ 17,752	\$ 21,412
Reinsurance recoverables	585	(227)
Net loss and LAE incurred	\$ 18,337	\$ 21,185

Multi-line excess of loss coverage

Explanation of Responses:

In addition to the catastrophe reinsurance noted below, both NLIC and ASIC participate in an excess of loss program placed with various reinsurers. This program is limited to each risk with respect to property and liability in the amount of \$500,000 for each of NLIC and ASIC. Each of NLIC and ASIC retain \$500,000 in this program.

Catastrophic coverage

At March 31, 2014, NLC had catastrophic excess of loss reinsurance coverage of losses per event in excess of \$8 million retention by NLIC and \$1.5 million retention by ASIC. ASIC maintained an underlying layer of coverage, providing \$6.5 million in excess of its \$1.5 million retention to bridge to the primary program. The reinsurance in excess of \$8 million is comprised of four layers of protection: \$17 million in excess of \$8 million retention; \$25 million in excess of \$25 million loss; \$50 million in excess of \$50 million loss and \$40 million in excess of \$100 million loss. NLIC and ASIC retain no participation in any of the layers, beyond the first \$8 million and \$1.5 million, respectively. At March 31, 2014, total retention for any one catastrophe that affects both NLIC and ASIC was limited to \$8 million in the aggregate.

Additionally, NLC purchased an underlying excess of loss contract that provides \$10 million aggregate coverage for sub-catastrophic events. NLC retains a 34% participation in this coverage.

20. Segment and Related Information

The Company currently has four reportable business segments that are organized primarily by the core products offered to the segments respective customers. These segments reflect the manner in which operations are managed and the criteria used by the Company's chief operating decision maker function to evaluate segment performance, develop strategy and allocate resources. The chief operating decision maker function consists of the President and Chief Executive Officer of the Company and the Chief Executive Officer of PlainsCapital. During the fourth quarter of 2013, we began presenting certain amounts previously allocated to the four reportable business segments under the heading Corporate to better reflect our internal organizational structure. This change had no impact on the Company's consolidated results of operations. The Company's historical segment disclosures have been revised to conform to the current presentation.

The banking segment includes the operations of the Bank, which, since September 14, 2013, includes the operations acquired in the FNB Transaction. The mortgage origination segment is composed of PrimeLending. The insurance segment is composed of NLC. The financial advisory segment is composed of First Southwest.

Corporate includes certain activities not allocated to specific business segments. These activities include holding company financing and investing activities, and management and administrative services to support the overall operations of the Company including, but not limited to, certain executive management, corporate relations, legal, finance, and acquisition costs not allocated to business segments.

Balance sheet amounts for remaining subsidiaries not discussed previously and the elimination of intercompany transactions are included in All Other and Eliminations. The following tables present certain information about reportable segment revenues, operating results, goodwill and assets (in thousands).

Three Months Ended March 31, 2014	Banking	Mortgage Origination	Insurance	Financial Advisory	Corporate	All Other and Eliminations	Hilltop Consolidated

21. Earnings per Common Share

Nonvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are participating securities and are included in the computation of earnings per share pursuant to the two-class method prescribed by the Earnings Per Share Topic of the ASC. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security according to dividends declared (or accumulated) and participation rights in undistributed earnings. In May 2013, as discussed in Note 13 to the consolidated financial statements, Hilltop issued restricted stock awards which qualify as participating securities.

Net earnings, less any preferred dividends accumulated for the period (whether or not declared), is allocated between the common stock and participating securities pursuant to the two-class method. Basic earnings per common share is computed by dividing net earnings available to common stockholders by the weighted average number of common shares outstanding during the period, excluding participating nonvested restricted shares.

Diluted earnings per common share is computed in a similar manner, except that first the denominator is increased to include the number of additional common shares that would have been outstanding if potentially dilutive common shares, excluding the participating securities, were issued using the treasury stock method. For the three months ended March 31, 2014, stock options and RSUs are the only potentially dilutive non-participating instruments issued by Hilltop, while potentially dilutive non-participating instruments for the three months ended March 31, 2013 were limited to stock options and the 7.50% Senior Exchangeable Notes due 2025 (the Notes), which were called for redemption during the fourth quarter of 2013. Next, we determine and include in the diluted earnings per common share calculation the more dilutive effect of the participating securities using the treasury stock method or the two-class method. Undistributed losses are not allocated to the nonvested share-based payment awards (the participating securities) under the two-class method as the holders are not contractually obligated to share in the losses of the Company.

The following table presents the computation of basic and diluted earnings per common share (in thousands, except per share data).

	Three Months Ended March 31,	
	2014	2013
Basic earnings per share:		
Income applicable to Hilltop common stockholders	\$ 23,760	\$ 32,370
Less: income applicable to participating shares	(124)	
Net earnings available to Hilltop common stockholders	\$ 23,636	\$ 32,370
Weighted average shares outstanding - basic	89,707	83,487
Basic earnings per common share	\$ 0.26	\$ 0.39

Edgar Filing: Friedman Michael A - Form 4

Diluted earnings per share:			
Income applicable to Hilltop common stockholders	\$	23,760	\$ 32,370
Add: interest expense on senior exchangeable notes (net of tax)			
Net earnings available to Hilltop common stockholders	\$	23,760	\$ 32,370
Weighted average shares outstanding - basic		89,707	83,487
Effect of potentially dilutive securities		878	256
Weighted average shares outstanding - diluted		90,585	83,743
Diluted earnings per common share	\$	0.26	\$ 0.39

For the three months ended March 31, 2013, the computation of diluted net earnings per common share did not include 6,208,000 equivalent shares issuable upon conversion of the Notes as the equivalent exchange rate per share was in excess of the average stock price for the noted period.

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

22. Recently Issued Accounting Standards

In January 2014, the FASB issued ASU No. 2014-04 to clarify that an in substance repossession or foreclosure occurs upon either the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additionally, the amendments require interim and annual disclosure of both the amount of foreclosed residential real estate property held by the creditor and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The amendments are effective for annual periods, and interim reporting periods within those annual periods, beginning after December 15, 2014 and may be adopted using either a modified retrospective transition method or a prospective transition method. Early adoption is permitted. The Company is currently evaluating this guidance, but adoption of the amendments is not expected to have a significant effect on its future consolidated financial statements.

In July 2013, the FASB issued ASU No. 2013-11 to require an entity to present an unrecognized tax benefit, or portion thereof, in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. However, to the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position, or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The amendment became effective for the Company on January 1, 2014, and its adoption did not have any effect on the Company's consolidated financial statements as the amendment is to be applied prospectively to all unrecognized tax benefits that exist at the balance sheet date.

23. Subsequent Events

On April 1, 2014, the Company awarded certain executives and key employees a total of 190,641 RSUs pursuant to the 2012 Plan. These RSUs generally cliff vest on the third anniversary of the grant date and are subject to service conditions set forth in the award agreements, with associated costs recognized on a straight-line basis over the vesting period. The grant date fair value related to these RSUs was \$24.06 per share. Total compensation expense related to these RSUs was \$4.6 million, which will be amortized through March 2017. The RSUs are not transferable, and the shares of common stock issuable upon conversion of vested RSUs are subject to transfer restrictions for a period of one year following conversion, subject to certain exceptions. In addition, the applicable RSU award agreements provide for accelerated vesting under certain conditions.

On April 1, 2014, Hilltop filed Articles of Amendment to Hilltop's charter, as approved by the Board of Directors, increasing the number of authorized shares of common stock from 100,000,000 to 125,000,000.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion should be read in conjunction with the consolidated historical financial statements and notes appearing elsewhere in this Quarterly Report on Form 10-Q (this Quarterly Report) and the financial information set forth in the tables herein.

Unless the context otherwise indicates, all references in this Quarterly Report, references to the Company, we, us, our or ours or similar words are to Hilltop Holdings Inc. and its direct and indirect wholly owned subsidiaries, references to Hilltop refer solely to Hilltop Holdings Inc., references to PlainsCapital refer to PlainsCapital Corporation (a wholly owned subsidiary of Hilltop), references to the Bank refer to PlainsCapital Bank (a wholly owned subsidiary of PlainsCapital), references to FNB refer to First National Bank, references to First Southwest refer to First Southwest Holdings, LLC (a wholly owned subsidiary of the Bank) and its subsidiaries as a whole, references to FSC refer to First Southwest Company (a wholly owned subsidiary of First Southwest), references to PrimeLending refer to PrimeLending, a PlainsCapital Company (a wholly owned subsidiary of the Bank) and its subsidiaries as a whole and references to NLC refer to National Lloyds Corporation (a wholly owned subsidiary of Hilltop) and its subsidiaries as a whole.

FORWARD-LOOKING STATEMENTS

This Quarterly Report and the documents incorporated by reference into this report include forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, or the Exchange Act, as amended by the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included in this Quarterly Report that address results or developments that we expect or anticipate will or may occur in the future, and statements that are preceded by, followed by or include, words such as anticipates, believes, could, estimates, expects, forecasts, goal, intends, may, probable, projects, seeks, should, target, view or would or the negative of these words and phrases or similar words or phrases, including things as our business strategy, our financial condition, our litigation, our efforts to make strategic acquisitions, our pending acquisition of SWS Group, Inc. (SWS), our revenue, our liquidity and sources of funding, market trends, operations and business, expectations concerning mortgage loan origination volume, anticipated changes in our revenues or earnings, the effects of government regulation applicable to our operations, the appropriateness of our allowance for loan losses and provision for loan losses, and the collectability of loans are forward-looking statements.

These forward-looking statements are based on our beliefs, assumptions and expectations of our future performance taking into account all information currently available to us. These beliefs, assumptions and expectations are subject to risks and uncertainties and can change as a result of many possible events or factors, not all of which are known to us. If an event occurs, our business, business plan, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. Certain factors that could cause actual results to differ include, among others:

- risks related to our pending acquisition of SWS;
- risks associated with merger and acquisition integration;

Edgar Filing: Friedman Michael A - Form 4

- our ability to estimate loan losses;
- changes in the default rate of our loans;
- risks associated with concentration in real estate related loans;
- our ability to obtain reimbursements for losses on acquired loans under loss-share agreements with the Federal Deposit Insurance Corporation (the "FDIC");
- changes in general economic, market and business conditions in areas or markets where we compete;
- severe catastrophic events in our geographic area;
- changes in the interest rate environment;
- cost and availability of capital;

Table of Contents

- changes in state and federal laws, regulations or policies affecting one or more of our business segments, including changes in regulatory fees, deposit insurance premiums, capital requirements and the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act);
- our ability to use net operating loss carry forwards to reduce future tax payments;
- approval of new, or changes in, accounting policies and practices;
- changes in key management;
- competition in our banking, mortgage origination, financial advisory and insurance segments from other banks and financial institutions as well as insurance companies, mortgage bankers, investment banking and financial advisory firms, asset-based non-bank lenders and government agencies;
- failure of our insurance segment reinsurers to pay obligations under reinsurance contracts;
- our ability to use excess cash in an effective manner, including the execution of successful acquisitions; and
- our participation in governmental programs, including the Small Business Lending Fund (SBLF).

For a more detailed discussion of these and other factors that may affect our business and that could cause the actual results to differ materially from those anticipated in these forward-looking statements, please refer to Risk Factors in Part I, Item 1A of our Annual Report on Form 10-K, which was filed with the Securities and Exchange Commission (the SEC) on March 3, 2014, this Item 2, Management s Discussion and Analysis of Financial Condition and Results of Operations, Part II, Item 1A, Risk Factors herein and other filings we have made with the SEC. We caution that the foregoing list of factors is not exhaustive, and new factors may emerge, or changes to the foregoing factors may occur, that could impact our business. All subsequent written and oral forward-looking statements concerning our business attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements above. We do not undertake any obligation to update any forward-looking statement, whether written or oral, relating to the matters discussed in this Quarterly Report except to the extent required by federal securities laws.

OVERVIEW

Edgar Filing: Friedman Michael A - Form 4

We are a financial holding company registered under the Bank Holding Company Act of 1956, as amended by the Gramm-Leach-Bliley Act of 1999. Our primary line of business is to provide business and consumer banking services from offices located throughout Texas. We also provide an array of financial products and services such as mortgage origination, insurance and financial advisory services.

On September 13, 2013 (the Bank Closing Date), the Bank assumed substantially all of the liabilities, including all of the deposits, and acquired substantially all of the assets of Edinburg, Texas-based FNB from the Federal Deposit Insurance Corporation (the FDIC), as receiver, and reopened former branches of FNB acquired from the FDIC under the PlainsCapital Bank name (the FNB Transaction). Pursuant to the Purchase and Assumption Agreement by and among the FDIC as receiver for FNB, the FDIC and the Bank (the P&A Agreement), the Bank and the FDIC entered into loss-share agreements whereby the FDIC agreed to share in the losses of certain covered loans and covered other real estate owned (OREO) that the Bank acquired in the FNB Transaction. The fair value of the assets acquired was \$2.2 billion, including \$1.1 billion in covered loans, \$286.2 million in securities, \$135.2 million in covered OREO and \$42.9 million in non-covered loans. The Bank also assumed \$2.2 billion in liabilities, consisting primarily of deposits.

On March 31, 2014, we entered into a definitive merger agreement with SWS providing for the merger of SWS with and into a subsidiary of Hilltop formed for the purpose of facilitating this transaction. Under the terms of the merger agreement, SWS stockholders will receive per share consideration of 0.2496 shares of Hilltop common stock and \$1.94 of cash, equating to \$7.88 per share based on Hilltop's closing price on March 31, 2014. We intend to fund the cash portion of the consideration through available cash. The merger is subject to customary closing conditions, including regulatory approvals and approval of the stockholders of SWS, and is expected to be completed prior to the end of 2014.

At March 31, 2014, on a consolidated basis, we had total assets of \$9.0 billion, total deposits of \$6.7 billion, total loans, including loans held for sale, of \$5.4 billion and stockholders' equity of \$1.4 billion. Our banking operations include the operations acquired in the FNB Transaction since September 14, 2013.

Table of Contents

Segment Information

We have two primary operating business units, PlainsCapital (financial services and products) and NLC (insurance). Within the PlainsCapital unit are three primary wholly owned operating subsidiaries: the Bank, PrimeLending and First Southwest. Under accounting principles generally accepted in the United States (GAAP), our business units are comprised of four reportable business segments organized primarily by the core products offered to the segments' respective customers: banking, mortgage origination, insurance and financial advisory. During the fourth quarter of 2013, we began presenting certain amounts previously allocated to the four reportable business segments under the heading Corporate to better reflect our internal organizational structure. This change had no impact on our consolidated results of operations. Our historical segment disclosures and MD&A have been revised to conform to the current presentation. Consistent with the segment operating results during 2013, we anticipate that future revenues will be driven primarily from the banking and mortgage origination segments, with the remainder being generated by our insurance and financial advisory segments. Based on historical results of PlainsCapital Corporation, which we acquired on November 30, 2012, the relative share of total revenue provided by our banking and mortgage origination segments fluctuates depending on market conditions, and operating results for the mortgage origination segment tend to be more volatile than operating results for the banking segment.

The banking segment includes the operations of the Bank and, since September 14, 2013, the operations acquired in the FNB Transaction. The banking segment primarily provides business and consumer banking products and services from offices located throughout Texas and generates revenue from its portfolio of earning assets. The Bank's results of operations are primarily dependent on net interest income, while also deriving revenue from other sources, including service charges on customer deposit accounts and trust fees.

The mortgage origination segment includes the operations of PrimeLending, which offers a variety of loan products from offices in 42 states and generates revenue predominantly from fees charged on the origination of loans and from selling these loans in the secondary market.

The insurance segment includes the operations of NLC, which operates through its wholly owned subsidiaries, National Lloyds Insurance Company (NLIC) and American Summit Insurance Company (ASIC). Insurance segment income is primarily generated from revenue earned on net insurance premiums less loss and loss adjustment expenses (LAE) and policy acquisition and other underwriting expenses in Texas and other areas of the southern United States.

The financial advisory segment generates a majority of its revenues from fees and commissions earned from investment advisory and securities brokerage services at First Southwest. The principal subsidiaries of First Southwest are FSC, a broker-dealer registered with the SEC and Financial Industry Regulatory Authority, and First Southwest Asset Management, Inc., a registered investment advisor under the Investment Advisors Act of 1940. FSC holds trading securities to support sales, underwriting and other customer activities. These securities are marked to market through other noninterest income. FSC uses derivatives to support mortgage origination programs of certain non-profit housing organization clients. FSC hedges its related exposure to interest rate risk from these programs with U.S. Agency to-be-announced, or TBA, mortgage-backed securities. These derivatives are marked to market through other noninterest income.

Corporate includes certain activities not allocated to specific business segments. These activities include holding company financing and investing activities, and management and administrative services to support the overall operations of the Company including, but not limited to, certain executive management, corporate relations, legal, finance, and acquisition costs not allocated to business segments. Balance sheet amounts for remaining subsidiaries not discussed previously and the elimination of intercompany transactions are included in All Other and Eliminations.

Table of Contents

Additional information concerning our reportable segments is presented in Note 20, Segment and Related Information, in the notes to our consolidated financial statements. The following tables present certain information about the operating results of our reportable segments (in thousands).

Three Months Ended March 31, 2014	Banking	Mortgage Origination	Insurance	Financial Advisory	Corporate	All Other and Eliminations	Hilltop Consolidated

How We Generate Revenue

We generate revenue from net interest income and from noninterest income. Net interest income represents the difference between the income earned on our assets, including our loans and investment securities, and our cost of funds, including the interest paid on the deposits and borrowings that are used to support our assets. Net interest income is a significant contributor to our operating results. Fluctuations in interest rates, as well as the amounts and types of interest-earning assets and interest-bearing liabilities we hold, affect net interest income. We generated \$85.4 million in net interest income during the three months ended March 31, 2014, compared with net interest income of \$67.2 million during the same period in 2013. The year-over-year increase in net interest income was primarily due to the inclusion of those operations acquired as a part of the FNB Transaction within our banking segment.

The other component of our revenue is noninterest income, which is primarily comprised of the following:

(i) *Income from mortgage operations.* Through our wholly owned subsidiary, PrimeLending, we generate noninterest income by originating and selling mortgage loans. During the three months ended March 31, 2014 and 2013, we generated \$91.5 million and \$146.5 million, respectively, in net gains from the sale of loans, other mortgage production income (including income associated with retained mortgage servicing rights), and mortgage loan origination fees.

(ii) *Net insurance premiums earned.* Through our wholly owned insurance subsidiary, NLC, we provide fire and limited homeowners insurance for low value dwellings and manufactured homes. We generated \$40.3 million in net insurance premiums earned during the three months ended March 31, 2014, compared with \$37.5 million during the same period in the prior year.

(iii) *Investment advisory fees and commissions and securities brokerage fees and commissions.* Through our wholly owned subsidiary, First Southwest, we provide public finance advisory and various investment banking and brokerage services. We generated \$21.3 million and \$22.0 million in investment advisory fees and commissions and securities brokerage fees and commissions during the three months ended March 31, 2014 and 2013, respectively.

In the aggregate, we generated \$170.1 million and \$213.3 million in noninterest income during the three months ended March 31, 2014 and 2013, respectively. The significant year-over-year decrease in noninterest income was primarily due to the decrease in loan origination volume within our mortgage origination segment.

We also incur noninterest expenses in the operation of our businesses. Our businesses engage in labor intensive activities and, consequently, employees' compensation and benefits represent the majority of our noninterest expenses.

Table of Contents**Consolidated Operating Results**

Net income applicable to common stockholders for the three months ended March 31, 2014 was \$23.8 million, or \$0.26 per diluted share, compared to net income applicable to common stockholders of \$32.4 million, or \$0.39 per diluted share, for the three months ended March 31, 2013.

Certain items included in net income for 2013 and 2014 resulted from purchase accounting associated with the merger of PlainsCapital Corporation with and into a wholly owned subsidiary of Hilltop on November 30, 2012 (the PlainsCapital Merger) and the FNB Transaction. Income before taxes for the three months ended March 31, 2014 includes net accretion of \$10.0 million and \$9.5 million on earning assets and liabilities acquired in the PlainsCapital Merger and FNB Transaction, respectively, offset by amortization of identifiable intangibles of \$2.3 million and \$0.3 million, respectively. During the three months ended March 31, 2013, income before taxes includes net accretion of \$16.1 million on earning assets and liabilities acquired in the PlainsCapital Merger, offset by amortization of identifiable intangibles of \$2.5 million.

We consider the ratios shown in the table below to be key indicators of our performance.

	Three Months Ended March 31, 2014	2013	Year Ended December 31, 2013
Performance Ratios:			
Return on average stockholders' equity	7.65%	11.46%	10.48%
Return on average assets	1.14%	1.87%	1.66%
Net interest margin (taxable equivalent) (1)	4.62%	4.35%	4.47%

(1) Taxable equivalent net interest income divided by average interest-earning assets.

During the three months ended March 31, 2014, the consolidated taxable equivalent net interest margin of 4.62% was impacted by PlainsCapital Merger related accretion of discount on loans of \$10.8 million, amortization of premium on acquired securities of \$1.0 million and amortization of premium on acquired time deposits of \$0.2 million. Additionally, FNB Transaction related accretion of discount on loans of \$7.2 million and amortization of premium on acquired time deposits of \$2.3 million also impacted the consolidated taxable equivalent net interest margin during the three months ended March 31, 2014. These items increased the consolidated taxable equivalent net interest margin by 95 basis points for the three months ended March 31, 2014. The consolidated taxable equivalent net interest margin was 4.35% for the three months ended March 31, 2013. The taxable equivalent net interest margin for the first quarter of 2013 was impacted by PlainsCapital Merger related accretion of discount on loans of \$16.9 million, amortization of premium on acquired securities of \$1.9 million and amortization of premium on acquired time deposits of \$1.1 million. These items increased the consolidated taxable equivalent interest margin by 95 basis points for the three months ended March 31, 2013.

(1) Average balance includes non-accrual loans.

(2) Annualized taxable equivalent adjustments are based on a 35% tax rate. The adjustment to interest income was \$0.6 million and \$0.7 million for the three months ended March 31, 2014 and 2013, respectively.

Edgar Filing: Friedman Michael A - Form 4

On a consolidated basis, net interest income increased \$18.2 million during the three months ended March 31, 2014, compared with the same period in 2013. This increase was primarily due to the inclusion of those operations acquired as a part of the FNB Transaction within our banking segment.

The provision for loan losses is determined by management as the amount to be added to the allowance for loan losses after net charge-offs have been deducted to bring the allowance to a level which, in management's best estimate, is necessary to absorb probable losses within the existing loan portfolio. The consolidated provision for loan losses, primarily in the banking segment, was \$3.2 million and \$13.0 million during the three months ended March 31, 2014 and 2013, respectively. During the three months ended March 31, 2014 and 2013, the provision for loan losses was comprised of charges relating to newly originated loans and acquired loans without credit impairment at acquisition of \$1.3 million and \$12.6 million, respectively, and purchased credit impaired (PCI) loans of \$1.9 million and \$0.4 million, respectively.

Consolidated noninterest income decreased \$43.2 million during the three months ended March 31, 2014, compared with the same period in 2013. This decrease was primarily related to the reduction in net gains from sale of loans, other mortgage production income and mortgage loan origination fees within our mortgage origination segment of \$55.0 million, slightly offset by increases in noninterest income in our banking, insurance and financial advisory segments.

Table of Contents

Our consolidated noninterest expense during the three months ended March 31, 2014 decreased \$2.4 million, compared with the same period in 2013. This year-over-year decrease included a significant decrease in noninterest expenses within our mortgage origination segment of \$31.6 million primarily due to variable compensation tied to mortgage loan originations, which was offset by a significant increase in noninterest expenses within our banking segment of \$30.0 million primarily due to the inclusion of those operations acquired as part of the FNB Transaction. Changes between periods within the major components of noninterest expense included decreases of \$9.8 million in employees compensation and benefits and \$2.8 million in loss and loss adjustment expenses, significantly offset by increases of \$6.9 million in occupancy and equipment and \$2.4 million in other expenses.

Consolidated income tax expense during the three months ended March 31, 2014 and 2013 was \$14.4 million and \$19.2 million, respectively, reflecting effective rates of 36.2% and 36.5%, respectively. The year-over-year decrease in income tax expense was primarily due to the reduction in operating income generated by our mortgage origination segment.

Segment Results**Banking Segment**

Income before income taxes in our banking segment for the three months ended March 31, 2014 and 2013 was \$31.9 million and \$36.2 million, respectively, and was primarily driven by net interest income of \$79.6 million and \$67.6 million, respectively, offset by noninterest expenses of \$60.7 million and \$30.7 million, respectively.

At March 31, 2014, the Bank exceeded all regulatory capital requirements with a total capital to risk weighted assets ratio of 14.14%, Tier 1 capital to risk weighted assets ratio of 13.47% and a Tier 1 capital to average assets, or leverage, ratio of 9.53%. At March 31, 2014, the Bank was also considered to be well-capitalized under regulatory requirements without giving effect to the final Basel III capital rules adopted by the Federal Reserve Board on July 2, 2013.

We consider the ratios shown in the table below to be key indicators of the performance of our banking segment.

	Three Months Ended March 31,		Year Ended
	2014	2013	December 31, 2013
Performance Ratios:			
Efficiency ratio (1)	63.34%	38.41%	42.58%
Return on average assets	1.04%	1.60%	1.78%
Net interest margin (taxable equivalent) (2)	4.80%	5.30%	5.17%

(1) Noninterest expenses divided by the sum of total noninterest income and net interest income for the period.

(2) Taxable equivalent net interest income divided by average interest-earning assets.

During the three months ended March 31, 2014, the banking segment's taxable equivalent net interest margin of 4.80% was impacted by PlainsCapital Merger related accretion of discount on loans of \$10.8 million, amortization of premium on acquired securities of \$1.0 million and amortization of premium on acquired time deposits of \$0.2 million. Additionally, FNB Transaction related accretion of discount on loans of \$7.2 million and amortization of premium on acquired time deposits of \$2.3 million also impacted the banking segment's taxable equivalent net interest margin during the three months ended March 31, 2014. These items increased the banking segment's taxable equivalent net interest margin by 106 basis points for the three months ended March 31, 2014. The banking segment's taxable equivalent net interest margin for the three months ended March 31, 2013 of 5.30% was impacted by PlainsCapital Merger related accretion of discount on loans of \$16.9 million, amortization of premium on acquired securities of \$1.9 million and amortization of premium on acquired time deposits of \$1.1 million. These items increased the banking segment's taxable equivalent interest margin by 124 basis points for three months ended March 31, 2013.

Net interest margin (2)			4.80%			5.30%

(1) Average balance includes non-accrual loans.

(2) Annualized taxable equivalent adjustments are based on a 35% tax rate. The adjustment to interest income was \$0.5 million for each of the three months ended March 31, 2014 and 2013.

Edgar Filing: Friedman Michael A - Form 4

(3) Excludes the allocation of interest expense on PlainsCapital debt of \$0.3 million for each of the three months ended March 31, 2014 and 2013.

The banking segment's net interest margin shown above exceeds our consolidated net interest margin. Our consolidated net interest margin includes the yields and costs associated with certain items within interest-earning assets and interest-bearing liabilities in the financial advisory segment, as well as the borrowing costs of Hilltop and PlainsCapital, both of which reduce our consolidated net interest margin. In addition, the banking segment's interest earning assets include lines of credit extended to subsidiaries, the yields on which increase the banking segment's net interest margin. Such yields and costs are eliminated from the consolidated financial statements.

Table of Contents

The following table summarizes the changes in the banking segment's net interest income for the periods indicated below, including the component changes in the volume of average interest-earning assets and interest-bearing liabilities and changes in the rates earned or paid on those items (in thousands).

	Three Months Ended March 31, 2014 v. 2013		
	Change Due To (1)		Change
	Volume	Yield/Rate	
Interest income			
Loans, gross	\$ 24,982	\$ (8,070)	\$ 16,912
Subsidiary warehouse lines of credit	(4,879)	(2,076)	(6,955)
Investment securities - taxable	830	848	1,678
Investment securities - non-taxable (2)	(107)	174	67
Federal funds sold and securities purchased under agreements to resell	13		13
Interest-bearing deposits in other financial institutions	203	(2)	201
Other	74	161	235
Total interest income (2)	21,116	(8,965)	12,151
Interest expense			
Deposits	\$ 1,446	\$ (1,095)	\$ 351
Notes payable and other borrowings	(16)	(11)	(27)
Total interest expense	1,430	(1,106)	324
Net interest income (2)	\$ 19,686	\$ (7,859)	\$ 11,827

(1) Changes attributable to both volume and yield/rate are included in yield/rate column.

(2) Annualized taxable equivalent.

Taxable equivalent net interest income increased \$11.8 million during the three months ended March 31, 2014, compared with the same period in 2013. Increases in the volume of interest-earning assets, primarily loans acquired in the FNB Transaction, increased taxable equivalent net interest income by \$21.1 million, while increases in the volume of interest-bearing liabilities, primarily deposits assumed in the FNB Transaction, reduced taxable equivalent interest income by \$1.4 million. Changes in the yields earned on interest-earning assets decreased taxable equivalent net interest income by \$9.0 million, primarily due to lower yields on the loan portfolio and the subsidiary warehouse lines of credit. Changes in rates paid on interest-bearing liabilities increased taxable equivalent interest income by \$1.1 million, primarily due to the acquisition of savings deposits in the FNB Transaction that carry lower average rates than the average rate on the Bank's savings deposits prior to the FNB Transaction, and the amortization of premiums on time deposits acquired in the FNB Transaction.

The banking segment's noninterest income was \$16.2 million and \$12.3 million during the three months ended March 31, 2014 and 2013, respectively. This year-over-year increase in noninterest income was primarily due to the accretion on the amounts receivable under the loss-share agreements with the FDIC (FDIC Indemnification Asset) associated with the FNB Transaction. Noninterest income was also negatively affected by changes in intercompany financing charges associated with the lending commitment on the PrimeLending warehouse line of credit.

The banking segment's noninterest expenses were \$60.7 million and \$30.7 million during the three months ended March 31, 2014 and 2013, respectively, and were primarily comprised of employees' compensation and benefits, and occupancy expenses. The significant year-over-year increase in noninterest expenses was primarily due to the inclusion of the operations acquired in the FNB Transaction.

Table of Contents**Mortgage Origination Segment**

Loss before income taxes in our mortgage origination segment for the three months ended March 31, 2014 was \$3.0 million, compared with income before income taxes of \$12.3 million during the three months ended March 31, 2013. During the three months ended March 31, 2014 and 2013, operating results for the mortgage origination segment were primarily driven by noninterest income of \$91.8 million and \$146.5 million, respectively, offset by noninterest expense of \$90.6 million and \$122.3 million, respectively. Additionally, net interest expense of \$4.1 million and \$12.0 million during the three months ended March 31, 2014 and 2013, respectively, resulted from interest incurred on a warehouse line of credit held at the Bank as well as related intercompany financing costs, partially offset by interest income earned on loans held for sale.

The mortgage origination segment originates all of its mortgage loans through a retail channel. The following table provides certain details regarding our mortgage loan originations (dollars in thousands).

	Three Months Ended March 31, 2014	% of Total	Three Months Ended March 31, 2013	% of Total

	\$ 1,866,153	100.00%	\$ 3,046,263	100.00%

The mortgage lending business is subject to variables that can impact loan origination volume, including seasonal and interest rate fluctuations. Historically, we have typically experienced increased loan origination volume from purchases of homes during the spring and summer, when more people tend to move and buy or sell homes. An increase in mortgage interest rates tends to result in decreased loan origination volume from refinancings, while a decrease in mortgage interest rates tends to result in increased refinancings. Changes in interest rates have historically had a lesser impact on home purchases volume than on refinancing volume.

Beginning in May 2013 and continuing through the fourth quarter of 2013, mortgage interest rates increased at a pace that, along with other factors, resulted in a 38.7% decrease in the mortgage origination segment's total loan origination volume during the three months ended March 31, 2014 when compared to the same period in 2013. Home purchases volume during the three months ended March 31, 2014 and 2013 was \$1.5 billion and \$1.6 billion, respectively, an 8.8% decrease, while refinancing volume decreased from \$1.4 billion (47.2% of total loan origination volume) to \$397.4 million (21.3% of total loan origination volume) between the same periods. We anticipate that the decrease in refinancing volume as a percentage of total loan origination volume during the three months ended March 31, 2014 compared to the same period in 2013 will continue throughout 2014 and therefore anticipate our mortgage loan origination volumes in 2014 will more closely follow seasonal trends historically experienced by the mortgage origination segment.

Table of Contents

While the mortgage origination segment's total loan origination volume decreased 38.7% during the three months ended March 31, 2014, compared to the same period in 2013, income before income taxes decreased 124.5% between the same periods (\$3.0 million loss compared to \$12.3 million income). Income before income taxes decreased at a greater rate primarily because segment operating costs included in noninterest expenses, such as employee related (salaries and benefits), occupancy, and administrative expenses, decreased at a lesser rate, approximately 13%, than loan origination volume decreased between the two periods. To address negative trends in loan origination volume resulting from changes in interest rates that began in May 2013, the mortgage origination segment reduced its non-origination employee headcount approximately 22% during the third and fourth quarters of 2013. Salaries and benefits expenses decreased approximately 15% between the first quarters of 2014 and 2013, as the benefits of the headcount reductions in the third and fourth quarters of 2013 were realized. We also engaged in other initiatives to reduce segment operating costs during the third and fourth quarters of 2013 that were primarily responsible for the decrease of approximately 10% in non-employee related expenses between the first quarters of 2014 and 2013. The benefits of the employee reductions and other cost savings initiatives include a decrease in recurring quarterly operating costs of approximately \$8 million since the third quarter of 2013. Also impacting the trend in income before taxes, to a lesser extent, was a decrease in loan revenue margins resulting from increased pricing competition.

The mortgage origination segment sells substantially all mortgage loans it originates to various investors in the secondary market, the majority servicing released. During the first quarter of 2013, the mortgage origination segment retained servicing on approximately 8% of loans sold. This rate was increased to approximately 22% during the third and fourth quarters of 2013, and approximately 37% during the first quarter of 2014. The related mortgage servicing rights (MSR) asset was valued at \$29.9 million on \$2.7 billion of serviced loan volume at March 31, 2014, compared to a value of \$20.1 million on \$2.0 billion of serviced loan volume at December 31, 2013. All income related to retained servicing, including changes in the value of the MSR asset, is included in noninterest income. The mortgage origination segment's determination on whether to retain or release servicing on mortgage loans it sells is impacted by changes in mortgage interest rates, and refinancing and market activity. We may, from time to time, manage our MSR asset through different strategies, including varying the percentage of mortgage loans sold servicing released and opportunistically selling MSR assets.

Noninterest income of \$91.8 million and \$146.5 million for the three months ended March 31, 2014 and 2013, respectively, was comprised of net gains on the sale of loans and other mortgage production income, and mortgage origination fees. Noninterest income decreased 37.4% during the three months ended March 31, 2014 when compared to the same period in 2013, which approximated the 38.7% decrease in loan origination volume experienced during the same periods. Noninterest income included \$3.4 million of net gains and \$3.5 million of net losses during the three months ended March 31, 2014 and 2013, respectively, resulting from changes in the fair value of the mortgage origination segment's interest rate lock commitments (IRLCs) and loans held for sale, and the related activity associated with forward commitments used by the mortgage origination segment to mitigate interest rate risk associated with its IRLCs and mortgage loans held for sale. Since the total volume of IRLCs and mortgage loans held for sale was relatively unchanged between December 31, 2013 and March 31, 2014, the gain during the three months ended March 31, 2014 was primarily the result of an increase in the average value of individual IRLCs and mortgage loans held for sale since December 31, 2013.

Noninterest expenses were \$90.6 million and \$122.3 million for the three months ended March 31, 2014 and 2013, respectively. Employees compensation and benefits accounted for the majority of the noninterest expenses incurred. Compensation that varies with the volume of mortgage loan originations and overall segment profitability decreased \$16.2 million during the three months ended March 31, 2014, as compared to the same period in 2013, and comprised approximately 52% and 58% of the total employees' compensation and benefits expenses during the three months ended March 31, 2014 and 2013, respectively. In addition, employee salaries and benefits decreased \$5.1 million during the three months ended March 31, 2014, as compared to the same period in 2013, primarily as a result of headcount reductions in the third and fourth quarters of 2013. The mortgage origination segment records unreimbursed closing costs when it pays a customer's closing costs in return for the customer choosing to accept a higher interest rate on the customer's mortgage loan. Unreimbursed closing costs during the three months ended March 31, 2014 and 2013 were \$5.2 million and \$10.4 million, respectively.

Between January 1, 2005, and March 31, 2014, the mortgage origination segment sold mortgage loans totaling \$58.3 billion. These loans were sold under sales contracts that generally include provisions which hold the mortgage origination segment responsible for errors or omissions

Edgar Filing: Friedman Michael A - Form 4

relating to its representations and warranties that loans sold meet certain requirements, including representations as to underwriting standards and the validity of certain borrower representations in connection with the loan. In addition, the sales contracts typically require the refund of purchased servicing rights plus certain investor

Table of Contents

servicing costs if a loan experiences an early payment default. While the mortgage origination segment sold loans prior to 2005, it has not experienced, nor does it anticipate experiencing, significant losses on loans originated prior to 2005 as a result of investor claims under these provisions of its sales contracts.

When an investor claim for indemnification of a loan sold is made, we evaluate the claim and determine if the claim can be satisfied through additional documentation or other deliverables. If the claim cannot be satisfied in that matter, we negotiate with the investor to reach a settlement of the claim. Settlements typically result in either the repurchase of a loan or reimbursement to the investor for losses incurred on the loan. Following is a summary of the mortgage origination segment's claims resolution activity relating to loans sold between January 1, 2005, and March 31, 2014 (dollars in thousands).

	Original Loan Balance		Loss Recognized	
	Amount	% of Loans Sold	Amount	% of Loans Sold
Claims resolved with no payment	\$ 133,843	0.23%	\$ 0.00%	
Claims resolved as a result of a loan repurchase or payment to an investor for losses incurred (1)	178,137	0.31%	22,880	0.04%
	\$ 311,980	0.54%	\$ 22,880	0.04%

(1) Losses incurred include refunded purchased servicing rights.

At March 31, 2014 and December 31, 2013, the mortgage origination segment's indemnification liability reserve totaled \$21.0 million and \$21.1 million, respectively. The related provision for indemnification losses was \$0.6 million and \$1.0 million for the three months ended March 31, 2014 and 2013, respectively.

Insurance Segment

Income before income taxes in our insurance segment was \$11.4 million during the three months ended March 31, 2014, compared with income before income taxes of \$6.2 million during the three months ended March 31, 2013. The insurance segment is subject to claims arising out of severe weather, the incidence and severity of which are inherently unpredictable. Generally, the insurance segment's insured risks exhibit higher losses in the second and third calendar quarters due to a seasonal concentration of weather-related events in its primary geographic markets. Although weather-related losses (including hail, high winds, tornadoes and hurricanes) can occur in any calendar quarter, the second calendar quarter, historically, has experienced the highest frequency of losses associated with these events. Hurricanes, however, are more likely to occur in the third calendar quarter of the year.

The insurance segment's results during the three months ended March 31, 2014 and 2013 resulted in combined ratios of 77.5% and 88.7%, respectively. The year-over-year improvement in the combined ratio was primarily driven by the increase in earned premiums and improvement in our claims loss experience. The combined ratio is a measure of overall insurance underwriting profitability, and represents the sum of the loss and LAE ratio and the underwriting expense ratio, which are discussed in more detail below.

Noninterest income of \$42.8 million and \$39.4 million during the three months ended March 31, 2014 and 2013, respectively, included net insurance premiums earned of \$40.3 million and \$37.5 million, respectively. The increase in earned premiums is primarily attributable to volume and, to a lesser extent, rate increases in homeowners and mobile home products.

Edgar Filing: Friedman Michael A - Form 4

Table of Contents

Direct insurance premiums written by major product line are presented in the table below (in thousands).

	Three Months Ended March 31,		Variance	
	2014	2013	2014 vs 2013	
Direct Insurance Premiums Written:				
Homeowners	\$ 18,583	\$ 18,543	\$	40
Fire	13,835	13,052		783
Mobile Home	10,219	9,083		1,136
Commercial	1,087	1,135		(48)
Other	46	44		2
	\$ 43,770	\$ 41,857	\$	1,913

Total direct insurance premiums written for our three largest insurance product lines increased by \$2.0 million during the three months ended March 31, 2014, compared to the same period in 2013. These increases were due to growth in our core insurance products.

Net insurance premiums earned by major product line are presented in the table below (in thousands).

	Three Months Ended March 31,		Variance	
	2014	2013	2014 vs 2013	
Net Insurance Premiums Earned:				
Homeowners	\$ 17,118	\$ 16,601	\$	517
Fire	12,745	11,685		1,060
Mobile Home	9,413	8,132		1,281
Commercial	1,001	1,016		(15)
Other	42	39		3
	\$ 40,319	\$ 37,473	\$	2,846

Net insurance premiums earned during the three months ended March 31, 2014 increased compared to the same period in 2013, primarily due to the increases in direct insurance premiums written of \$1.9 million and premiums assumed of \$0.5 million, while also improving due to a decrease in ceded insurance premiums during the same periods.

Noninterest expenses of \$32.3 million and \$34.3 million during the three months ended March 31, 2014 and 2013, respectively, include both loss and LAE expenses and policy acquisition and other underwriting expenses, as well as other noninterest expenses. Loss and LAE are recognized based on formula and case basis estimates for losses reported with respect to direct business, estimates of unreported losses based on past experience and deduction of amounts for reinsurance placed with reinsurers. Loss and LAE during the three months ended March 31, 2014 was \$18.3 million, compared to \$21.2 million during the same period in 2013. As a result, the loss and LAE ratio during the three months ended March 31, 2014 and 2013 was 45.5% and 56.5%, respectively. The year-over-year ratio improvement was primarily a result of growth of earned premium and improved claims loss experience.

Policy acquisition and other underwriting expenses encompass all expenses incurred relative to NLC operations, and include elements of multiple categories of expense otherwise reported as noninterest expense in the consolidated statements of operations.

Explanation of Responses:

Edgar Filing: Friedman Michael A - Form 4

Policy acquisition and other underwriting expenses were as follows (dollars in thousands).

	Three Months Ended March 31,		Variance	
	2014	2013	2014 vs 2013	
Amortization of deferred policy acquisition costs	\$ 10,197	\$ 9,614	\$	583
Other underwriting expenses	3,380	3,025		355
Total	13,577	12,639		938
Agency expenses	(690)	(569)		(121)
Total less agency expenses	\$ 12,887	\$ 12,070	\$	817
Net insurance premiums earned	\$ 40,319	\$ 37,473	\$	2,846
Expense ratio	32.0%	32.2%		-0.2%

Table of Contents

During 2013, the insurance segment initiated a review of the pricing of its primary products in each state of operation utilizing a consulting actuarial firm to supplement normal review processes. Rate filings have been made for certain products in several states for increases effective in 2014, and the process will continue through the remainder of the insurance segment's products and states in which it operates. Concurrently, business concentrations were reviewed and actions initiated, including cancellation of agents, non-renewal of policies and cessation of new business writing on certain products in problematic geographic areas. We expect that these actions will reduce the rate of premium growth for 2014 when compared with the patterns exhibited in prior years. However, we expect the reduced exposure to volatile weather to improve our loss experience during 2014.

Financial Advisory Segment

Loss before income taxes in our financial advisory segment for the three months ended March 31, 2014 was \$0.2 million, compared with income before income taxes of \$0.3 million during the three months ended March 31, 2013. Higher interest rates along with increased volatility in fixed income markets have resulted in reduced sales of fixed income securities to institutional customers.

The financial advisory segment had net interest income of \$2.6 million and \$3.2 million during the three months ended March 31, 2014 and 2013, respectively, consisting of securities lending activity, customer margin loan balances and investment securities used to support sales, underwriting and other customer activities.

The majority of the financial advisory segment's noninterest income for the three months ended March 31, 2014 and 2013 of \$24.6 million and \$22.8 million, respectively, was generated from fees and commissions earned from investment advisory and securities brokerage activities of \$21.3 million and \$22.0 million, respectively. The financial advisory segment participates in programs in which it issues forward purchase commitments of mortgage-backed securities to certain clients and sells TBAs. Changes in the fair values of these derivative instruments during the three months ended March 31, 2014 and 2013 produced net gains of \$2.8 million and \$1.8 million, respectively. Changes in the fair value of the financial advisory segment's trading portfolio, which is used to support sales, underwriting and other customer activities, produced gains of \$0.4 million during the three months ended March 31, 2014 and losses of \$1.0 million during the three months ended March 31, 2013.

Noninterest expenses were \$27.4 million and \$25.7 million for the three months ended March 31, 2014 and 2013, respectively. Employees compensation and benefits accounted for the majority of the increase in noninterest expenses primarily due to increases in compensation costs that vary with noninterest income.

Corporate

Corporate includes certain activities not allocated to specific business segments. These activities include holding company financing and investing activities, and management and administrative services to support the overall operations of the Company including, but not limited to, certain executive management, corporate relations, legal, finance, and acquisition costs not allocated to business segments.

Edgar Filing: Friedman Michael A - Form 4

As a holding company, Hilltop's primary investment objectives are to preserve capital and have available cash resources to utilize in making acquisitions. Investment and interest income earned, primarily from available cash and available-for-sale securities, including our note receivable from SWS, was \$1.7 million and \$1.6 million during the three months ended March 31, 2014 and 2013, respectively.

Interest expense of \$1.7 million during the three months ended March 31, 2013 was due to interest costs associated with the 7.50% Senior Exchangeable Notes due 2025 of HTH Operating Partnership LP, a wholly owned subsidiary of Hilltop, which were called for redemption during the fourth quarter of 2013.

Noninterest expenses of \$2.2 million during each of the three months ended March 31, 2014 and 2013 primarily include compensation and benefits and professional fees.

Table of Contents**Financial Condition**

The following discussion contains a more detailed analysis of our financial condition at March 31, 2014 as compared to December 31, 2013.

Securities Portfolio

At March 31, 2014, investment securities consisted of securities of the U.S. Treasury, U.S. government and its agencies, obligations of municipalities and other political subdivisions, primarily in the State of Texas, mortgage-backed, corporate debt, and equity securities, a note receivable and a warrant. We have the ability to categorize investments as trading, available for sale, and held to maturity.

Our securities portfolio consists of two major components: trading securities and securities available for sale. Trading securities are bought and held principally for the purpose of selling them in the near term and are carried at fair value, marked to market through operations and held at the Bank and First Southwest. Securities that may be sold in response to changes in market interest rates, changes in securities prepayment risk, increases in loan demand, general liquidity needs and other similar factors are classified as available for sale and are carried at estimated fair value, with unrealized gains and losses recorded in accumulated other comprehensive income (loss). Securities are classified as held to maturity based on the intent and ability of our management, at the time of purchase, to hold such securities to maturity. These securities are carried at amortized cost.

The table below summarizes our securities portfolio (in thousands).

	March 31, 2014	December 31, 2013
Trading securities, at fair value	\$ 53,350	\$ 58,846
Securities available for sale, at fair value		
U.S. Treasury securities	63,670	43,528
U.S. government agencies:		
Bonds	667,128	662,732
Residential mortgage-backed securities	58,545	60,087
Collateralized mortgage obligations	113,832	120,461
Corporate debt securities	100,151	76,608
States and political subdivisions	152,585	156,835
Commercial mortgage-backed securities	687	760
Equity securities	24,663	22,079
Note receivable	48,582	47,909
Warrant	15,516	12,144
	1,245,359	1,203,143
Securities held to maturity, at amortized cost		
U.S. government agencies:		
Residential mortgage-backed securities	29,582	
States and political subdivisions	1,399	
	30,981	

Edgar Filing: Friedman Michael A - Form 4

Total securities portfolio	\$	1,329,690	\$	1,261,989
-----------------------------------	----	-----------	----	-----------

We had net unrealized losses of \$25.3 million and \$53.7 million related to the available for sale investment portfolio at March 31, 2014 and December 31, 2013, respectively. The significant decrease in the net unrealized loss position of our available for sale investment portfolio during the first quarter of 2014 was due to the effects of a decrease in market interest rates since December 31, 2013 that resulted in an increase in the fair value of our debt securities.

The market value of securities held to maturity at March 31, 2014 approximated book value.

Table of Contents

Banking Segment

The banking segment's securities portfolio plays a role in the management of our interest rate sensitivity and generates additional interest income. In addition, the securities portfolio is used to meet collateral requirements for public and trust deposits, securities sold under agreements to repurchase and other purposes. The available for sale securities portfolio serves as a source of liquidity. Historically, the Bank's policy has been to invest primarily in securities of the U.S. government and its agencies, obligations of municipalities in the State of Texas and other high grade fixed income securities to minimize credit risk. At March 31, 2014, the banking segment's securities portfolio of \$1.1 billion was comprised of trading securities of \$20.9 million, available for sale securities of \$1.1 billion and held to maturity securities of \$31.0 million.

Insurance Segment

Our insurance segment's primary investment objective is to preserve capital and manage for a total rate of return. NLC's strategy is to purchase securities in sectors that represent the most attractive relative value. Our insurance segment invests the premiums it receives from policyholders until they are needed to pay policyholder claims or other expenses. At March 31, 2014, the insurance segment's securities portfolio was comprised of \$151.8 million in available for sale securities and \$5.5 million of other investments included in other assets within the consolidated balance sheet.

Financial Advisory Segment

Our financial advisory segment holds securities to support sales, underwriting and other customer activities. Because FSC is a broker-dealer, it is required to carry its securities at fair value and record changes in the fair value of the portfolio in operations. Accordingly, FSC classifies its securities portfolio of \$32.4 million at March 31, 2014 as trading.

Corporate

Available for sale securities of Hilltop at March 31, 2014 include the note receivable from, and warrant to purchase shares of SWS, of \$64.1 million, and equity securities of \$11.0 million representing those shares of SWS common stock held by Hilltop.

Non-Covered Loan Portfolio

Consolidated non-covered loans held for investment are detailed in the table below, classified by portfolio segment and segregated between those considered to be PCI loans and all other originated or acquired loans (in thousands). PCI loans showed evidence of credit deterioration that makes it probable that all contractually required principal and interest payments will not be collected.

Edgar Filing: Friedman Michael A - Form 4

March 31, 2014	Loans, excluding PCI Loans	PCI Loans	Total Loans
Commercial and industrial	\$ 1,636,241	\$ 33,846	\$ 1,670,087
Real estate	1,503,160	32,201	1,535,361
Construction and land development	371,764	15,618	387,382
Consumer	50,385	3,731	54,116
Non-covered loans, gross	3,561,550	85,396	3,646,946
Allowance for loan losses	(31,293)	(3,352)	(34,645)
Non-covered loans, net of allowance	\$ 3,530,257	\$ 82,044	\$ 3,612,301

December 31, 2013	Loans, excluding PCI Loans	PCI Loans	Total Loans

Non-covered loans, net of allowance	\$ 3,384,150	\$ 97,255	\$ 3,481,405

Table of Contents*Banking Segment*

The loan portfolio constitutes the major earning asset of the banking segment and typically offers the best alternative for obtaining the maximum interest spread above the banking segment's cost of funds. The overall economic strength of the banking segment generally parallels the quality and yield of its loan portfolio. The banking segment's loan portfolio is presented below in two sections, Non-Covered Loan Portfolio and Covered Loan Portfolio. The Covered Loan Portfolio consists of loans acquired in the FNB Transaction that are subject to loss-share agreements with the FDIC and is discussed below. The Non-Covered Loan Portfolio includes all other loans held by the Bank, which we refer to as non-covered loans, and is discussed herein.

The banking segment's total non-covered loans, net of the allowance for non-covered loan losses, were \$4.1 billion and \$4.3 billion at March 31, 2014 and December 31, 2013, respectively. The banking segment's non-covered loan portfolio includes a \$1.3 billion warehouse line of credit extended to PrimeLending, of which \$0.8 billion and \$1.0 billion was drawn at March 31, 2014 and December 31, 2013, respectively, as well as term loans to First Southwest that had an outstanding balance of \$23.0 million at March 31, 2014 and December 31, 2013. Amounts advanced against the warehouse line of credit and the First Southwest term loans are eliminated from net loans on our consolidated balance sheets. The decrease in the non-covered loan portfolio is primarily due to the decrease in the amount drawn under PrimeLending's warehouse line of credit.

The banking segment does not generally participate in syndicated loan transactions and has no foreign loans in its portfolio. At March 31, 2014, the banking segment's only non-covered loan concentration (loans to borrowers engaged in similar activities) that exceeded 10% of its total non-covered loans was non-construction commercial real estate loans within the non-covered real estate portfolio. At March 31, 2014, non-construction commercial real estate loans were 28.75% of the banking segment's total non-covered loans. The banking segment's non-covered loan concentrations were within regulatory requirements at March 31, 2014.

Mortgage Origination Segment

The loan portfolio of the mortgage origination segment consists of loans held for sale, primarily single-family residential mortgages funded through PrimeLending, and pipeline loans, which are loans in various stages of the application process, but not yet closed and funded. Pipeline loans may not close if potential borrowers elect in their sole discretion not to proceed with the loan application. Total loans held for sale were \$0.9 billion and \$1.1 billion at March 31, 2014 and December 31, 2013, respectively.

The components of the mortgage origination segment's loans held for sale and pipeline loans are as follows (in thousands).

	March 31, 2014	December 31, 2013
Loans held for sale:		
Unpaid principal balance	\$ 860,527	\$ 1,066,850
Fair value adjustment	26,073	21,555
	\$ 886,600	\$ 1,088,405

Pipeline loans:

Explanation of Responses:

Edgar Filing: Friedman Michael A - Form 4

Unpaid principal balance	\$	797,934	\$	602,467
Fair value adjustment		19,244		12,151
	\$	817,178	\$	614,618

Financial Advisory Segment

The loan portfolio of the financial advisory segment consists primarily of margin loans to customers and correspondents. These loans are collateralized by the securities purchased or by other securities owned by the clients and, because of collateral coverage ratios, are believed to present minimal collectability exposure. Additionally, these loans are subject to a number of regulatory requirements as well as FSC's internal policies. The financial advisory segment's total non-covered loans, net of the allowance for non-covered loan losses, were \$315.0 million and \$281.6 million at March 31, 2014 and December 31, 2013, respectively. This increase was primarily attributable to increased borrowings in margin accounts held by FSC customers and correspondents.

Table of Contents**Covered Loan Portfolio***Banking Segment*

Loans acquired in the FNB Transaction that are subject to loss-share agreements with the FDIC are referred to as covered loans and reported separately in our consolidated balance sheets. Under the terms of the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets (including covered loans): (i) 80% of losses on the first \$240.4 million of losses incurred; (ii) 0% of losses in excess of \$240.4 million up to and including \$365.7 million of losses incurred; and (iii) 80% of losses in excess of \$365.7 million of losses incurred. The Bank has also agreed to reimburse the FDIC for any subsequent recoveries. The loss-share agreements for commercial and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. In accordance with the loss-share agreements, the Bank may be required to make a true-up payment to the FDIC approximately ten years following the Bank Closing Date if the FDIC's initial estimate of losses on covered assets is greater than the actual realized losses. The true-up payment is calculated using a defined formula set forth in the P&A Agreement.

In connection with the FNB Transaction, the Bank acquired loans both with and without evidence of credit quality deterioration since origination. The banking segment's portfolio of acquired covered loans had a fair value of \$1.1 billion as of the Bank Closing Date, with no carryover of any allowance for loan losses.

Covered loans held for investment are detailed in the table below and classified by portfolio segment (in thousands).

March 31, 2014	Loans, excluding PCI Loans		PCI Loans		Total Loans	
Commercial and industrial	\$	21,153	\$	31,210	\$	52,363
Real estate		219,102		527,352		746,454

At March 31, 2014, the banking segment had covered loan concentrations (loans to borrowers engaged in similar activities) that exceeded 10% of total covered loans in its real estate portfolio. The areas of concentration within our covered real estate portfolio were construction and land development loans, non-construction residential real estate loans, and non-construction commercial real estate loans. At March 31, 2014, construction and land development loans, non-construction residential real estate loans, and non-construction commercial real estate loans were 12.45%, 31.58% and 38.88%, respectively, of the banking segment's total covered loans. The banking segment's covered loan concentrations were within regulatory requirements at March 31, 2014.

Table of Contents

Allowance for Loan Losses

The allowance for loan losses is a reserve established through a provision for loan losses charged to expense, which represents management's best estimate of probable losses inherent in our existing non-covered and covered loan portfolios. Our management has responsibility for determining the level of the allowance for loan losses, subject to review by the Audit Committee of our Board of Directors and the Loan Review Committee of the Bank's board of directors.

It is our management's responsibility at the end of each quarter, or more frequently as deemed necessary, to analyze the level of the allowance for loan losses to ensure that it is appropriate for the estimated credit losses in the portfolio consistent with the Interagency Policy Statement on the Allowance for Loan and Lease Losses and the Receivables and Contingencies Topics of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC). Estimated credit losses are the probable current amount of loans that we will be unable to collect given facts and circumstances as of the evaluation date. When management determines that a loan, or portion thereof, is uncollectible, the loan, or portion thereof, is charged-off against the allowance for loan losses, or for acquired loans accounted for in pools, charged against the pool discount. Recoveries on charge-offs that occurred prior to the PlainsCapital Merger represent contractual cash flows not expected to be collected and are recorded as accretion income. Recoveries on loans charged-off subsequent to the PlainsCapital Merger are credited to the allowance for loan loss, except for recoveries on loans accounted for in pools, which are credited to the pool discount.

We have developed a methodology that seeks to determine an allowance within the scope of the Receivables and Contingencies Topics of the ASC. Each of the loans that has been determined to be impaired is within the scope of the Receivables Topic. Impaired loans that are equal to or greater than \$0.5 million are individually evaluated for impairment using one of three impairment measurement methods as of the evaluation date: (1) the present value of expected future discounted cash flows on the loan, (2) the loan's observable market price, or (3) the fair value of the collateral if the loan is collateral dependent. Specific reserves are provided in our estimate of the allowance based on the measurement of impairment under these three methods, except for collateral dependent loans, which require the fair value method. All non-impaired loans are within the scope of the Contingencies Topic. Estimates of loss for the Contingencies Topic are calculated based on historical loss experience by collateral type adjusted for changes in trends, conditions, and other relevant factors that affect repayment of loans as of the evaluation date. While historical loss experience provides a reasonable starting point for the analysis, historical losses, or recent trends in losses, are not the sole basis upon which to determine the appropriate level for the allowance for loan losses. Management considers recent qualitative or environmental factors that are likely to cause estimated credit losses associated with the existing portfolio to differ from historical loss experience, including but not limited to: changes in lending policies and procedures; changes in underwriting standards; changes in economic and business conditions and developments that affect the collectability of the portfolio; the condition of various market segments; changes in the nature and volume of the portfolio and in the terms of loans; changes in lending management and staff; changes in the volume and severity of past due loans, the volume of non-accrual loans, and the volume and severity of adversely classified or graded loans; changes in the loan review system; changes in the value of underlying collateral for collateral-dependent loans; and any concentrations of credit and changes in the level of such concentrations.

We design our loan review program to identify and monitor problem loans by maintaining a credit grading process, requiring that timely and appropriate changes are made to reviewed loans and coordinating the delivery of the information necessary to assess the appropriateness of the allowance for loan losses. Loans are evaluated for impaired status when: (i) payments on the loan are delayed, typically by 90 days or more (unless the loan is both well secured and in the process of collection), (ii) the loan becomes classified, (iii) the loan is being reviewed in the normal course of the loan review scope, or (iv) the loan is identified by the servicing officer as a problem. We review on an individual basis all loan relationships over \$0.5 million that exhibit probable or observed credit weaknesses, the top 25 loan relationships by dollar amount in each market we serve, and additional relationships necessary to achieve adequate coverage of our various lending markets.

Homogeneous loans, such as consumer installment loans, residential mortgage loans and home equity loans, are not individually reviewed and are generally risk graded at the same levels. The risk grade and reserves are established for each homogeneous pool of loans based on the

Edgar Filing: Friedman Michael A - Form 4

expected net charge-offs from current trends in delinquencies, losses or historical experience and general economic conditions. At March 31, 2014, we had no material delinquencies in these types of loans.

The allowance is subject to regulatory examination and determination as to adequacy, which may take into account such factors as the methodology used to calculate the allowance and the size of the allowance. While we believe we have an appropriate allowance for our existing non-covered and covered portfolios at March 31, 2014, additional provisions for

Table of Contents

losses on existing loans may be necessary in the future. Within our non-covered portfolio, we recorded net recoveries of \$16 thousand and \$0.2 million for the three months ended March 31, 2014 and 2013, respectively. Our allowance for non-covered loan losses totaled \$34.6 million and \$33.2 million at March 31, 2014 and December 31, 2013, respectively. The ratio of the allowance for non-covered loan losses to total non-covered loans held for investment at both March 31, 2014 and December 31, 2013 was 0.95%.

In connection with the PlainsCapital Merger and the FNB Transaction, we acquired loans both with and without evidence of credit quality deterioration since origination. PCI loans acquired in the PlainsCapital Merger are accounted for on an individual loan basis, while PCI loans acquired in the FNB Transaction are accounted for in pools as well as on an individual loan basis. We have established under our PCI accounting policy a framework to aggregate certain acquired loans into various loan pools based on a minimum of two layers of common risk characteristics for the purpose of determining their respective fair values as of their acquisition dates, and for applying the subsequent recognition and measurement provisions for income accretion and impairment testing. The common risk characteristics used for the pooling of the FNB PCI loans are risk grade and loan collateral type. The acquired loans were initially recorded at fair value with no carryover of any allowance for loan losses. Within our covered portfolio, we recorded net charge-offs of \$0.3 million for the three months ended March 31, 2014. Our allowance for covered loan losses totaled \$2.7 million and \$1.1 million at March 31, 2014 and December 31, 2013, respectively. The ratio of the allowance for covered loan losses to total covered loans held for investment at March 31, 2014 and December 31, 2013 was 0.29% and 0.11%, respectively.

Provisions for loan losses are charged to operations to record the total allowance for loan losses at a level deemed appropriate by the banking segment's management based on such factors as the volume and type of lending it conducted, the amount of non-performing loans and related collateral security, the present level of the allowance for loan losses, the results of recent regulatory examinations, generally accepted accounting principles, general economic conditions and other factors related to the ability to collect loans in its portfolio. The provision for loan losses, primarily in the banking segment, within our non-covered and covered portfolios was \$3.2 million and \$13.0 million for the three months ended March 31, 2014 and 2013, respectively.

The following tables present the activity in our allowance for loan losses within our non-covered and covered loan portfolios for the periods presented (in thousands). Substantially all of the activity shown below occurred within the banking segment.

Potential Problem Loans

Potential problem loans consist of loans that are performing in accordance with contractual terms but for which management has concerns about the ability of an obligor to continue to comply with repayment terms because of the obligor's potential operating or financial difficulties. Management monitors these loans and reviews their performance on a regular basis. Potential problem loans contain potential weaknesses that

Edgar Filing: Friedman Michael A - Form 4

could improve, persist or further deteriorate. If such potential weaknesses persist without improving, the loan is subject to downgrade, typically to substandard, in three to six months. Within our non-covered loan portfolio at March 31, 2014, we had 12 credit relationships totaling \$35.2 million of potential problem loans, which are assigned a grade of special mention within our risk grading matrix. At December 31, 2013, we had ten credit relationships totaling \$24.7 million of non-covered potential problem loans. Within our covered loan portfolio at March 31, 2014, we had one credit relationship totaling \$1.7 million of potential problem loans assigned a grade of special mention within our risk grading matrix, compared with two credit relationships totaling \$3.3 million at December 31, 2013.

Table of Contents*Non-Performing Assets*

The following table presents our components of non-covered non-performing assets (dollars in thousands).

	March 31, 2014	December 31, 2013
Non-covered loans accounted for on a non-accrual basis:		
Commercial and industrial	\$ 15,575	\$ 16,730
Real estate	7,213	6,511
Construction and land development	142	112
Consumer	\$ 22,930	\$ 23,353
Non-covered non-performing loans as a percentage of total non-covered loans	0.51%	0.51%
Non-covered other real estate owned	\$ 5,774	\$ 4,805
Other repossessed assets	\$ 250	\$ 13
Non-covered non-performing assets	\$ 28,954	\$ 28,171
Non-covered non-performing assets as a percentage of total assets	0.32%	0.32%
Non-covered loans past due 90 days or more and still accruing	\$ 2	\$ 534
Troubled debt restructurings included in accruing non-covered loans	\$ 776	\$ 1,055

At March 31, 2014, total non-covered non-performing assets increased \$0.8 million to \$29.0 million, compared with \$28.2 million at December 31, 2013, primarily due to an increase in non-covered OREO of \$1.0 million. Non-covered non-performing loans totaled \$22.9 million at March 31, 2014 and \$23.4 million at December 31, 2013. At March 31, 2014, non-covered non-accrual loans included four commercial and industrial relationships with loans totaling \$12.1 million secured by accounts receivable, inventory, oil and gas properties, aircraft and life insurance, and a total of \$1.3 million in lease financing receivables. Non-covered non-accrual loans at March 31, 2014 also included \$7.2 million characterized as real estate loans, including three commercial real estate loan relationships totaling \$3.0 million and loans secured by residential real estate totaling \$3.7 million, substantially all of which were classified as loans held for sale, as well as construction and land development loans of \$0.1 million. At December 31, 2013, non-covered non-accrual loans included five commercial and industrial relationships with loans totaling \$14.0 million secured by accounts receivable, inventory, aircraft and life insurance, and a total of \$1.0 million in lease financing receivables. Non-covered non-accrual loans at December 31, 2013 also included \$6.5 million characterized as real estate loans, including three commercial real estate loan relationships totaling \$2.5 million and loans secured by residential real estate totaling \$3.5 million, substantially all of which were classified as loans held for sale, as well as construction and land development loans of \$0.1 million.

Non-covered OREO increased \$1.0 million to \$5.8 million at March 31, 2014, compared with \$4.8 million at December 31, 2013. The increase was primarily due to the addition of two properties totaling \$2.0 million, partially offset by the disposal of three properties totaling \$0.7 million. At March 31, 2014, non-covered OREO included commercial properties of \$1.8 million, commercial real estate property consisting of parcels of unimproved land of \$2.1 million and residential lots under development of \$1.9 million. At December 31, 2013, non-covered OREO included commercial properties of \$4.2 million, commercial real estate property consisting of parcels of unimproved land of \$0.5 million and residential lots under development of \$0.1 million.

Edgar Filing: Friedman Michael A - Form 4

At March 31, 2014, troubled debt restructurings (TDRs) granted on non-covered loans totaled \$11.2 million, of which \$0.8 million relate to non-covered PCI loans that are considered to be performing due to the application of the accretion method and non-covered non-performing loans of \$10.4 million for which discount accretion has been suspended. At December 31, 2013, TDRs granted on non-covered loans totaled \$11.4 million. These TDRs were comprised of \$1.1 million of non-covered PCI loans that are considered to be performing due to the application of the accretion method and non-covered non-performing loans of \$10.3 million for which discount accretion has been suspended.

Table of Contents

Non-covered loans past due 90 days or more and still accruing totaled \$2 thousand at March 31, 2014 and included a secured commercial and industrial loan and consumer loans, compared to a total of \$0.5 million at December 31, 2013 that included secured commercial and industrial loans, and a real estate loan.

The following table presents components of our covered non-performing assets (dollars in thousands).

	March 31, 2014	December 31, 2013
Covered loans accounted for on a non-accrual basis:		
Commercial and industrial	\$ 882	\$ 973
Real estate	11,277	249
Construction and land development	1,913	575
Consumer		
	\$ 14,072	\$ 1,797
Covered non-performing loans as a percentage of total covered loans	1.54%	0.18%
Covered other real estate owned	\$ 152,310	\$ 142,833
Other repossessed assets	\$	\$
Covered non-performing assets	\$ 166,382	\$ 144,630
Covered non-performing assets as a percentage of total assets	1.84%	1.62%
Covered loans past due 90 days or more and still accruing	\$ 1,051	\$
Troubled debt restructurings included in accruing covered loans	\$	\$

At March 31, 2014, covered non-performing assets increased by \$21.8 million to \$166.4 million, compared with \$144.6 million at December 31, 2013, due to increases in covered non-accrual loans of \$12.3 million and covered OREO of \$9.5 million. Covered non-performing loans totaled \$14.1 million at March 31, 2014 and \$1.8 million at December 31, 2013. At March 31, 2014, covered non-performing loans included one commercial and industrial relationship with loans totaling \$0.9 million secured by accounts receivable and inventory, two commercial real estate loan relationships totaling \$11.3 million, as well as construction and land development loans of \$1.9 million. At December 31, 2013, covered non-performing loans of \$1.8 million included one commercial and industrial relationship with loans totaling \$1.0 million secured by accounts receivable, inventory and equipment. Covered non-accrual loans at December 31, 2013 also included one commercial real estate loan relationship totaling \$0.2 million, as well as construction and land development loans of \$0.6 million.

OREO acquired in the FNB Transaction that is subject to the FDIC loss-share agreements is referred to as covered OREO and reported separately in our consolidated balance sheets. Covered OREO increased \$9.5 million to \$152.3 million at March 31, 2014, compared with \$142.8 million at December 31, 2013. The increase was primarily due to the addition of 41 properties totaling \$23.2 million, partially offset by the disposal of 70 properties totaling \$13.4 million. At March 31, 2014, covered OREO included commercial properties of \$103.1 million, commercial real estate property consisting of parcels of unimproved land of \$24.5 million and residential lots under development of \$24.7 million. At December 31, 2013, covered OREO included commercial properties of \$90.5 million, commercial real estate property consisting of parcels of unimproved land of \$21.4 million and residential lots under development of \$30.9 million.

Edgar Filing: Friedman Michael A - Form 4

Covered loans past due 90 days or more and still accruing totaled \$1.1 million at March 31, 2014 and included secured commercial and industrial loans, a construction and land development loan, and commercial and residential real estate loans.

Table of Contents**Insurance Losses and Loss Adjustment Expenses**

At March 31, 2014 and December 31, 2013, our reserves for unpaid losses and LAE were \$28.3 million and \$27.5 million, respectively. The liability for insurance losses and LAE represents estimates of the ultimate unpaid cost of all losses incurred, including losses for claims that have not yet been reported. Separately for each of NLIC and ASIC and each line of business, our actuaries estimate the liability for unpaid losses and LAE by first estimating ultimate losses and LAE amounts for each year, prior to recognizing the impact of reinsurance.

Insured losses for a given accident year change in value over time as additional information on claims is received, as claim conditions change and as new claims are reported. This process is commonly referred to as loss development. To project ultimate losses and LAE, our actuaries examine the paid and reported losses and LAE for each accident year and multiply these values by a loss development factor. The selected loss development factors are based upon a review of the loss development patterns indicated in the companies' historical loss triangles and applicable insurance industry loss development factors.

The reserve analysis performed by our actuaries provides preliminary central estimates of the unpaid losses and LAE. At each quarter-end, the results of the reserve analysis are summarized and discussed with our senior management. The senior management group considers many factors in determining the amount of reserves to record for financial statement purposes. These factors include the extent and timing of any recent catastrophic events, historical pattern and volatility of the actuarial indications, the sensitivity of the actuarial indications to changes in paid and reported loss patterns, the consistency of claims handling processes, the consistency of case reserving practices, changes in our pricing and underwriting, and overall pricing and underwriting trends in the insurance market.

Deposits

The banking segment's major source of funds and liquidity is its deposit base. Deposits provide funding for its investment in loans and securities. Interest paid for deposits must be managed carefully to control the level of interest expense and overall net interest margin. The composition of the deposit base (time deposits versus interest-bearing demand deposits and savings) is constantly changing due to the banking segment's needs and market conditions. Overall, average deposits totaled \$6.7 billion for the three months ended March 31, 2014, an increase from average deposits of \$4.7 billion for the three months ended March 31, 2013. The significant year-over-year increase in average deposits was primarily due to those deposits assumed as a part of the FNB Transaction. The table below presents the average balance of deposits and the average rate paid on those deposits (dollars in thousands).

	Three Months Ended March 31,				Year Ended	
	2014		2013		December 31, 2013	
	Average Balance	Average Rate Paid	Average Balance	Average Rate Paid	Average Balance	Average Rate Paid
Noninterest-bearing demand deposits	\$ 1,721,403	0.00%	\$ 1,190,779	0.00%	\$ 1,370,029	0.00%
Interest-bearing demand deposits	2,355,333	0.22%	1,831,554	0.25%	1,930,622	0.24%
Savings deposits	312,675	0.25%	178,770	0.37%	247,789	0.32%
Certificates of deposit	2,281,205	0.40%	1,547,766	0.56%	1,745,483	0.54%
	\$ 6,670,616	0.23%	\$ 4,748,869	0.29%	\$ 5,293,923	0.28%

Borrowings

Our borrowings are shown in the table below (dollars in thousands).

	March 31, 2014		December 31, 2013	
	Balance	Average Rate Paid	Balance	Average Rate Paid
Short-term borrowings	\$ 491,406	0.36%	\$ 342,087	0.36%
Notes payable	55,465	4.68%	56,327	6.33%
Junior subordinated debentures	67,012	3.53%	67,012	3.59%
	\$ 613,883	1.16%	\$ 465,426	2.10%

Table of Contents

Short-term borrowings consist of federal funds purchased, securities sold under agreements to repurchase and short-term bank loans. The \$149.3 million increase in short-term borrowings at March 31, 2014 compared with December 31, 2013 included increases of \$56.1 million in federal funds purchased, \$51.5 million in securities sold under agreements to repurchase and \$41.8 million in short-term bank loans. These increases were primarily the result of increases in customer borrowings and the cyclical nature of certain other short-term borrowing components. Notes payable at March 31, 2014 of \$55.5 million is comprised of insurance segment term notes and nonrecourse notes owed by First Southwest.

Liquidity and Capital Resources

Hilltop is a financial holding company whose assets primarily consist of the stock of its subsidiaries and invested assets. Hilltop's primary investment objectives, as a holding company, are to preserve capital and have available cash resources to utilize in making acquisitions. At March 31, 2014, Hilltop had approximately \$157 million in freely available cash and cash equivalents. If necessary or appropriate, we may also finance acquisitions with the proceeds from equity or debt issuances. The current short-term liquidity needs of Hilltop include operating expenses and dividends on preferred stock.

Recent Event

On March 31, 2014, we entered into a definitive merger agreement with SWS providing for the merger of SWS with and into a subsidiary of Hilltop formed for the purpose of facilitating this transaction. Under the terms of the merger agreement, SWS stockholders will receive per share consideration of 0.2496 shares of Hilltop common stock and \$1.94 of cash, equating to \$7.88 per share based on Hilltop's closing price on March 31, 2014. We intend to fund the cash portion of the consideration, currently estimated at approximately \$78 million in the aggregate, through available cash. The merger is subject to customary closing conditions, including regulatory approvals and approval of the stockholders of SWS, and is expected to be completed prior to the end of 2014.

Series B Preferred Stock

As a result of the PlainsCapital Merger, the outstanding shares of PlainsCapital Corporation's Non-Cumulative Perpetual Preferred Stock, Series C, all of which were held by the U.S. Treasury, were converted on a one-for-one basis into shares of Hilltop Series B Preferred Stock. The terms of our Series B Preferred Stock provide for the payment of non-cumulative dividends on a quarterly basis. The dividend rate, as a percentage of the liquidation amount, fluctuated until December 31, 2013 based upon changes in the level of qualified small business lending (QSBL) by the Bank. The shares of Hilltop Series B Preferred Stock are senior to shares of our common stock with respect to dividends and liquidation preference, and qualify as Tier 1 Capital for regulatory purposes. At both March 31, 2014 and December 31, 2013, \$114.1 million of our Series B Preferred Stock was outstanding. During the three months ended March 31, 2014, we accrued dividends of \$1.4 million on the Hilltop Series B Preferred Stock.

The dividend rate on the Hilltop Series B Preferred Stock is fixed at 5.0% from January 1, 2014 until March 26, 2016, based upon our level of QSBL at September 30, 2013. Beginning March 27, 2016, the dividend rate on any outstanding shares of Hilltop Series B Preferred Stock will be fixed at nine percent (9%) per annum.

Loss-Share Agreements

In connection with the FNB Transaction, the Bank entered into two loss-share agreements with the FDIC that collectively cover \$1.2 billion of loans and OREO acquired in the FNB Transaction, which we refer to as covered assets. Pursuant to the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets: (i) 80% of losses on the first \$240.4 million of losses incurred; (ii) 0% of losses in excess of \$240.4 million up to and including \$365.7 million of losses incurred; and (iii) 80% of losses in excess of \$365.7 million of losses incurred. The Bank has also agreed to reimburse the FDIC for any subsequent recoveries. The loss-share agreements for commercial and single family residential loans are in effect for 5 years and 10 years, respectively, from the Bank Closing Date and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. In accordance with the loss-share agreements, the Bank may be required to make a true-up payment to the FDIC approximately ten years following the Bank Closing Date if the FDIC's initial estimate of losses on covered assets is greater than the actual realized losses. The true-up payment is calculated using a defined formula set forth in the P&A Agreement.

Table of Contents

Regulatory Capital

We are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements may prompt certain actions by regulators that, if undertaken, could have a direct material adverse effect on our financial condition and results of operations. Under capital adequacy and regulatory requirements, we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Our capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

At March 31, 2014, Hilltop exceeded all regulatory capital requirements with a total capital to risk weighted assets ratio of 19.32%, Tier 1 capital to risk weighted assets ratio of 18.66% and a Tier 1 capital to average assets, or leverage, ratio of 13.12%. At March 31, 2014, the Bank was also considered to be well-capitalized under regulatory requirements. We discuss regulatory capital requirements in more detail in Note 14 to our consolidated financial statements.

Cash Flow Activities

Cash and cash equivalents (consisting of cash and due from banks and federal funds sold), totaled \$917.4 million at March 31, 2014, an increase of \$171.4 million from \$746.0 million at December 31, 2013. Deposit flows, calls of investment securities and borrowed funds, and prepayments of loans and mortgage-backed securities are strongly influenced by interest rates, general and local economic conditions and competition in the marketplace. These factors reduce the predictability of the timing of these sources of funds.

Cash provided by operations during the three months ended March 31, 2014 was \$154.3 million, a decrease in cash flow of \$5.7 million compared with the same period in 2013. Cash provided by operations decreased primarily due to reductions in cash provided by our mortgage loan origination activities.

Cash used in our investment activities during the three months ended March 31, 2014 was \$39.4 million, primarily including net purchases of securities in our investment portfolio of \$45.2 million and net purchases of premises and equipment and other assets of \$8.7 million, partially offset by \$14.7 million from sales of premises and equipment and other real estate owned. Cash used in our investment activities during the three months ended March 31, 2013 of \$192.1 million primarily included net purchases of securities for investment of \$155.7 million, \$41.9 million for the origination of loans held for investment and net purchases of premises and equipment and other assets of \$5.0 million. The decrease in cash used in investing activities during the three months ended March 31, 2014, compared to the same period in 2013, was primarily due to reduced net purchases of securities driven by market conditions.

Cash used in financing activities during the three months ended March 31, 2014 was \$56.5 million, an increase in cash provided of \$141.6 million compared with the same period in 2013. The increase in cash provided was due primarily to an increase in short-term borrowings during the first quarter of 2014, partially offset by a decrease in deposits during the three months ended March 31, 2014 compared with a decrease in short-term borrowings partially offset by an increase in deposits during the same period in 2013.

Banking Segment

Within our banking segment, liquidity refers to the measure of our ability to meet our customers' short-term and long-term deposit withdrawals and anticipated and unanticipated increases in loan demand without penalizing earnings. Interest rate sensitivity involves the relationships between rate-sensitive assets and liabilities and is an indication of the probable effects of interest rate fluctuations on our net interest income.

Our asset and liability group is responsible for continuously monitoring our liquidity position to ensure that assets and liabilities are managed in a manner that will meet our short-term and long-term cash requirements. Funds invested in short-term marketable instruments, the continuous maturing of other interest-earning assets, cash flows from self-liquidating investments such as mortgage-backed securities and collateralized mortgage obligations, the possible sale of available for sale securities, and the ability to securitize certain types of loans provide sources of liquidity from an asset perspective. The liability base provides sources of liquidity through deposits and the maturity structure of short-term borrowed funds. For short-term liquidity needs, we utilize federal fund lines of credit with correspondent banks, securities sold under agreements to repurchase, borrowings from the Federal Reserve and borrowings under lines of credit with

Table of Contents

other financial institutions. For intermediate liquidity needs, we utilize advances from the FHLB. To supply liquidity over the longer term, we have access to brokered certificates of deposit, term loans at the FHLB and borrowings under lines of credit with other financial institutions.

We had deposits of \$6.7 billion at both March 31, 2014 and December 31, 2013. Deposit flows are affected by the level of market interest rates, the interest rates and products offered by competitors, the volatility of equity markets and other factors. At March 31, 2014, money market deposits, including brokered deposits, were \$1.2 billion; time deposits, including brokered deposits, were \$2.1 billion; and noninterest bearing demand deposits were \$1.7 billion. Money market deposits, including brokered deposits, increased by \$56.8 million from \$1.2 billion and time deposits, including brokered deposits, decreased \$176.1 million from \$2.3 billion at December 31, 2013.

The Bank's 15 largest depositors, excluding Hilltop and First Southwest, accounted for 17.48% of the Bank's total deposits, and the Bank's five largest depositors, excluding First Southwest, accounted for 10.89% of the Bank's total deposits at March 31, 2014. The loss of one or more of our largest Bank customers, or a significant decline in our deposit balances due to ordinary course fluctuations related to these customers' businesses, could adversely affect our liquidity and might require us to raise deposit rates to attract new deposits, purchase federal funds or borrow funds on a short-term basis to replace such deposits. We have not experienced any liquidity issues to date with respect to brokered deposits or our other large balance deposits, and we believe alternative sources of funding are available to more than compensate for the loss of one or more of these customers.

Mortgage Origination Segment

PrimeLending funds the mortgage loans it originates through a warehouse line of credit of up to \$1.3 billion maintained with the Bank. At March 31, 2014, PrimeLending had outstanding borrowings of \$0.8 billion against the warehouse line of credit. PrimeLending sells substantially all mortgage loans it originates to various investors in the secondary market, the majority with servicing released. As these mortgage loans are sold in the secondary market, PrimeLending pays down its warehouse line of credit with the Bank. In addition, PrimeLending has an available line of credit with JPMorgan Chase Bank, NA (JPMorgan Chase) of up to \$1.0 million. At March 31, 2014, PrimeLending had no borrowings under the JPMorgan Chase line of credit.

Insurance Segment

Our insurance operating subsidiary's primary investment objectives is to preserve capital and manage for a total rate of return. NLC's strategy is to purchase securities in sectors that represent the most attractive relative value. Bonds, cash and short-term investments of \$205.3 million, or 91.5%, equity investments of \$13.6 million and other investments of \$5.5 million comprised NLC's \$224.4 million in total cash and investments at March 31, 2014. NLC does not currently have any significant concentration in both direct and indirect guarantor exposure or any investments in subprime mortgages. NLC has custodial agreements with Wells Fargo and an investment management agreement with DTF Holdings, LLC.

Financial Advisory Segment

Edgar Filing: Friedman Michael A - Form 4

FSC relies on its equity capital, short-term bank borrowings, interest-bearing and non-interest-bearing client credit balances, correspondent deposits, securities lending arrangements, repurchase agreement financings and other payables to finance its assets and operations. FSC has credit arrangements with three unaffiliated banks of up to \$255.0 million, which are used to finance securities owned, securities held for correspondent accounts, receivables in customer margin accounts and underwriting activities. These credit arrangements are provided on an as offered basis and are not committed lines of credit. At March 31, 2014, FSC had borrowed \$139.2 million under these credit arrangements.

Impact of Inflation and Changing Prices

Our consolidated financial statements included herein have been prepared in accordance with GAAP, which presently require us to measure financial position and operating results primarily in terms of historic dollars. Changes in the relative value of money due to inflation or recession are generally not considered. The primary effect of inflation on our operations is reflected in increased operating costs. In management's opinion, changes in interest rates affect the financial condition of a financial institution to a far greater degree than changes in the inflation rate. While interest rates are greatly influenced by changes in the inflation rate, they do not necessarily change at the same rate or in the same magnitude as the

Table of Contents

inflation rate. Interest rates are highly sensitive to many factors that are beyond our control, including changes in the expected rate of inflation, the influence of general and local economic conditions and the monetary and fiscal policies of the U.S. government, its agencies and various other governmental regulatory authorities.

Off-Balance Sheet Arrangements; Commitments; Guarantees

In the normal course of business, we enter into various transactions, which, in accordance with GAAP, are not included in our consolidated balance sheets. We enter into these transactions to meet the financing needs of our customers. These transactions include commitments to extend credit and standby letters of credit, which involve, to varying degrees, elements of credit risk and interest rate risk in excess of the amounts recognized in our consolidated balance sheets.

We enter into contractual loan commitments to extend credit, normally with fixed expiration dates or termination clauses, at specified rates and for specific purposes. Substantially all of our commitments to extend credit are contingent upon customers maintaining specific credit standards until the time of loan funding. We minimize our exposure to loss under these commitments by subjecting them to credit approval and monitoring procedures. We assess the credit risk associated with certain commitments to extend credit and have recorded a liability related to such credit risk in our consolidated financial statements.

Standby letters of credit are written conditional commitments issued by us to guarantee the performance of a customer to a third party. In the event the customer does not perform in accordance with the terms of the agreement with the third party, we would be required to fund the commitment. The maximum potential amount of future payments we could be required to make is represented by the contractual amount of the commitment. If the commitment is funded, we would be entitled to seek recovery from the customer. Our policies generally require that standby letter of credit arrangements contain security and debt covenants similar to those contained in loan agreements.

In the aggregate, the Bank had outstanding unused commitments to extend credit of \$1.2 billion at March 31, 2014 and outstanding financial and performance standby letters of credit of \$42.9 million at March 31, 2014.

In the normal course of business, FSC executes, settles and finances various securities transactions that may expose FSC to off-balance sheet risk in the event that a customer or counterparty does not fulfill its contractual obligations. Examples of such transactions include the sale of securities not yet purchased by customers or for the account of FSC, clearing agreements between FSC and various clearinghouses and broker-dealers, secured financing arrangements that involve pledged securities, and when-issued underwriting and purchase commitments.

Critical Accounting Policies and Estimates

Our accounting policies are fundamental to understanding our management's discussion and analysis of our results of operations and financial condition. We have identified certain significant accounting policies which involve a higher degree of judgment and complexity in making certain estimates and assumptions that affect amounts reported in our consolidated financial statements. The significant accounting policies which we believe to be the most critical in preparing our consolidated financial statements relate to Allowance for Loan Losses, FDIC

Edgar Filing: Friedman Michael A - Form 4

Indemnification Asset, Reserve for Losses and Loss Adjustment Expenses, Goodwill and Identifiable Intangible Assets, Loan Indemnification Liability, Mortgage Servicing Rights and Acquisition Accounting. Since December 31, 2013, there have been no changes in critical accounting policies as further described under Critical Accounting Policies and Estimates and Note 1 to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2013.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Our assessment of market risk as of March 31, 2014 indicates there are no material changes in the quantitative and qualitative disclosures from those previously reported in our Annual Report on Form 10-K for the year ended December 31, 2013, except as discussed below.

The primary objective of the following information is to provide forward-looking quantitative and qualitative information about our potential exposure to market risks. Market risk represents the risk of loss that may result from changes in value of a financial instrument as a result of changes in interest rates, market prices and the credit perception of an issuer. The disclosure is not meant to be a precise indicator of expected future losses, but rather an indicator of reasonably possible losses, and therefore our actual results may differ from any of the following projections. This forward-looking information provides an indicator of how we view and manage our ongoing market risk exposures.

Banking Segment

The banking segment is engaged primarily in the business of investing funds obtained from deposits and borrowings in interest-earning loans and investments, and our primary component of market risk is sensitivity to changes in interest rates. Consequently, our earnings depend to a significant extent on our net interest income, which is the difference between interest income on loans and investments and our interest expense on deposits and borrowings. To the extent that our interest-bearing liabilities do not reprice or mature at the same time as our interest-bearing assets, we are subject to interest rate risk and corresponding fluctuations in net interest income.

There are several common sources of interest rate risk that must be effectively managed if there is to be minimal impact on our earnings and capital. Repricing risk arises largely from timing differences in the pricing of assets and liabilities. Reinvestment risk refers to the reinvestment of cash flows from interest payments and maturing assets at lower or higher rates. Basis risk exists when different yield curves or pricing indices do not change at precisely the same time or in the same magnitude such that assets and liabilities with the same maturity are not all affected equally. Yield curve risk refers to unequal movements in interest rates across a full range of maturities.

We have employed asset/liability management policies that attempt to manage our interest-earning assets and interest-bearing liabilities, thereby attempting to control the volatility of net interest income, without having to incur unacceptable levels of risk. We employ procedures which include interest rate shock analysis, repricing gap analysis and balance sheet decomposition techniques to help mitigate interest rate risk in the ordinary course of business. In addition, the asset/liability management policies permit the use of various derivative instruments to manage interest rate risk or hedge specified assets and liabilities.

An interest rate sensitive asset or liability is one that, within a defined time period, either matures or experiences an interest rate change in line with general market interest rates. The management of interest rate risk is performed by analyzing the maturity and repricing relationships between interest-earning assets and interest-bearing liabilities at specific points in time (*GAP*) and by analyzing the effects of interest rate changes on net interest income over specific periods of time by projecting the performance of the mix of assets and liabilities in varied interest rate environments. Interest rate sensitivity reflects the potential effect on net interest income resulting from a movement in interest rates. A company is considered to be asset sensitive, or have a positive *GAP*, when the amount of its interest-earning assets maturing or repricing within a given period exceeds the amount of its interest-bearing liabilities also maturing or repricing within that time period. Conversely, a company is considered to be liability sensitive, or have a negative *GAP*, when the amount of its interest-bearing liabilities maturing or repricing within a

Edgar Filing: Friedman Michael A - Form 4

given period exceeds the amount of its interest-earning assets also maturing or repricing within that time period. During a period of rising interest rates, a negative GAP would tend to affect net interest income adversely, while a positive GAP would tend to result in an increase in net interest income. During a period of falling interest rates, a negative GAP would tend to result in an increase in net interest income, while a positive GAP would tend to affect net interest income adversely. However, it is our intent to remain relatively balanced so that changes in rates do not have a significant impact on earnings.

Edgar Filing: Friedman Michael A - Form 4

Table of Contents

As illustrated in the table below, the banking segment is asset sensitive overall. Loans that adjust daily or monthly to the Wall Street Journal Prime rate comprise a large percentage of interest sensitive assets and are the primary cause of the banking segment's asset sensitivity. To help neutralize interest rate sensitivity, the banking segment has kept the terms of most of its borrowings under one year as shown in the following table (dollars in thousands).

	March 31, 2014					
	3 Months or Less	> 3 Months to 1 Year	> 1 Year to 3 Years	> 3 Years to 5 Years	> 5 Years	Total
<u>Interest sensitive assets:</u>						
Loans	\$ 2,814,586	\$ 619,010	\$ 689,354	\$ 286,085	\$ 663,953	\$ 5,072,988
Securities	200,426	386,373	220,841	70,862	191,774	1,070,276
Federal funds sold and securities purchased under agreements to resell	27,460					27,460
Other interest sensitive assets	551,496					551,496
Total interest sensitive assets	3,593,968	1,005,383	910,195	356,947	855,727	6,722,220
<u>Interest sensitive liabilities:</u>						
Interest bearing checking	\$ 2,480,977	\$	\$	\$	\$	\$ 2,480,977
Savings	298,082					298,082
Time deposits	627,598	1,074,976	257,901	140,942	27,788	2,129,205
Notes payable & other borrowings	345,380	494	1,405	754	5,352	353,385
Total interest sensitive liabilities	3,752,037	1,075,470	259,306	141,696	33,140	5,261,649
Interest sensitivity gap	\$ (158,069)	\$ (70,087)	\$ 650,889	\$ 215,251	\$ 822,587	\$ 1,460,571
Cumulative interest sensitivity gap	\$ (158,069)	\$ (228,156)	\$ 422,733	\$ 637,984	\$ 1,460,571	
Percentage of cumulative gap to total interest sensitive assets	-2.35%	-3.39%	6.29%	9.49%	21.73%	

The positive GAP in the interest rate analysis indicates that banking segment net interest income would generally rise if rates increase. Because of inherent limitations in interest rate GAP analysis, the banking segment uses multiple interest rate risk measurement techniques. Simulation analysis is used to subject the current repricing conditions to rising and falling interest rates in increments and decrements of 1%, 2% and 3% to determine the effect on net interest income changes for the next twelve months. The banking segment also measures the effects of changes in interest rates on market value of equity by discounting projected cash flows of deposits and loans. Market value changes in the investment portfolio are estimated by discounting future cash flows and using duration analysis. Investment security prepayments are estimated using current market information. We believe the simulation analysis presents a more accurate picture than the GAP analysis. Simulation analysis recognizes that deposit products may not react to changes in interest rates as quickly or with the same magnitude as earning assets contractually tied to a market rate index. The sensitivity to changes in market rates varies across deposit products. Also, unlike GAP analysis, simulation analysis takes into account the effect of embedded options in the securities and loan portfolios as well as any off-balance-sheet derivatives.

Edgar Filing: Friedman Michael A - Form 4

The table below shows the estimated impact of increases of 1%, 2% and 3% and a decrease of 0.5% in interest rates on net interest income and on economic value of equity for the banking segment at March 31, 2014 (dollars in thousands).

Change in Interest Rates (basis points)	Changes in Net Interest Income		Changes in Economic Value of Equity	
	Amount	Percent	Amount	Percent
+300	\$ 4,782	1.91%	\$ (76,551)	-6.35%
+200	\$ (4,798)	-1.92%	\$ (64,630)	-5.36%
+100	\$ (10,492)	-4.20%	\$ (40,132)	-3.33%
-50	\$ 2,543	1.02%	\$ 15,699	1.30%

The projected changes in net interest income and market value of equity to changes in interest rates at March 31, 2014 were in compliance with established internal policy guidelines. These projected changes are based on numerous assumptions of growth and changes in the mix of assets or liabilities.

The historically low level of interest rates, combined with the existence of rate floors that are in effect for a significant portion of the loan portfolio, are projected to cause yields on our earning assets to rise more slowly than increases in market

Table of Contents

interest rates. As a result, in a rising interest rate environment, our interest rate margins are projected to compress until the rise in market interest rates is sufficient to allow our loan portfolio to reprice above applicable rate floors.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the supervision and participation of our Principal Executive Officer and Principal Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report.

Based upon that evaluation, our Principal Executive Officer and Principal Financial Officer concluded that, as of the end of such period, our disclosure controls and procedures were effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by us in the reports that we file or submit under the Exchange Act and are effective in ensuring that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to the Company's management, including our Principal Executive Officer and Principal Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

For a description of material pending legal proceedings, see the discussion set forth under the heading "Legal Matters" in Note 11 to our Consolidated Financial Statements, which is incorporated by reference herein.

Item 1A. Risk Factors.

Explanation of Responses:

The pending merger with SWS Group, Inc. is subject to closing conditions, the failure of any of which could result in our inability to consummate the transaction.

On March 31, 2014, we entered into an Agreement and Plan of Merger with SWS. The closing of the transaction is subject to the satisfaction of certain conditions, including the receipt of all necessary or advisable regulatory approvals and the approval of SWS's stockholders. No assurance can be given as to when or whether these approvals will be received.

Furthermore, the merger agreement contains certain termination rights for Hilltop and SWS, as the case may be, applicable upon, among other events, (i) final, non-appealable denial of a required regulatory approval, (ii) the Closing having not been completed on or prior to the first anniversary of the date of the Merger Agreement, (iii) a material breach of the Merger Agreement by the other party that cannot be cured within 30 days' notice and would cause the closing conditions not to be satisfied, (iv) if SWS stockholders fail to approve the Merger, or (v) by Hilltop if the SWS board of directors withdraws its recommendation of the Merger to the SWS stockholders or if a governmental entity imposes a materially burdensome regulatory condition. The Merger Agreement further provides that, in connection with the termination of the Merger Agreement under specified circumstances, including if the SWS board of directors withdraws its recommendation in favor of the Merger, SWS will be required to pay Hilltop a termination fee of \$8,000,000.

Table of Contents

We may fail to realize all of the anticipated benefits of our pending acquisition of SWS.

The success of our pending acquisition of SWS will depend on, among other things, the ability to achieve certain operating results at SWS. If the financial condition or result of operations of SWS is materially different than those that we forecasted, the anticipated benefits of the acquisition may not be realized fully, or at all, or may take longer to realize than expected.

Hilltop and SWS have operated and, until the completion of the merger, will continue to operate, independently. The companies may have difficulty addressing possible differences in corporate cultures and management philosophies. It is also possible that clients, customers, depositors and counterparties of SWS could choose to discontinue their relationships with the company post-merger, which would adversely affect our future performance.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On January 17, 2014, we issued an aggregate of 2,303 shares of common stock under the Hilltop Holdings 2012 Equity Incentive Plan to certain non-employee directors as compensation for their service on our Board of Directors during the fourth quarter of 2013. The shares were issued pursuant to the exemption from registration under Section 4(2) of the Securities Act.

Item 6. Exhibits
