CBD Energy Signs Power Purchase Agreement for Taralga Wind Farm with Major Australian Energy Business

TRUenergy to Buy 100% Renewable Energy Generated

Diversified renewable energy company, CBD Energy Ltd. (ASX:CBD), who has previously announced a merger with Westinghouse Solar (NASDAQ: WEST), today advised that it has signed a power purchase agreement (PPA) with major Australian energy business TRUenergy for its proposed Taralga wind farm in New South Wales.

CBD Energy Managing Director Gerry McGowan said, “This agreement with TRUenergy is integral and underpins the financing of the Taralga wind farm. The agreement will deliver approximately \$300 million of off-take value to the project. Taralga is considered a superior location for its wind profile, and I believe this agreement validates both companies due diligence. Further, as CBD’s first utility scale wind-farm in the Australian market, this agreement is a vote of confidence in our company and a major milestone for the project.”

TRUenergy Group Executive Manager Energy Markets, Mark Collette said, “This agreement will significantly boost TRUenergy’s renewable energy portfolio and demonstrates our commitment to supporting cleaner energy sources. Additionally, this helps TRUenergy meet its goals under the Federal Government’s Renewable Energy Target (RET).

Taralga is a circa \$250 million project, with development approval for 51 turbines which would result in installed capacity of 108 MW. The project is planned to commence construction of stage 1 later this year, with completion in 2014. When completed in 2014, Taralga would generate 300 GW hours a year of renewable energy, which would be the equivalent of meeting the annual energy need of 40,000 homes.

TRUenergy has signed a power purchase agreement to buy 100% of the renewable energy generated, including the Large-scale Generation Certificates from Taralga wind farm, located in New South Wales. The arrangements were negotiated between TRUenergy and CBD Energy.
