Forward Looking Statements

This report contains forward-looking statements. All forward-looking statements are inherently uncertain as they are based on current expectations and assumptions concerning future events or future performance of the registrant. Readers are cautioned not to place undue reliance on these forward-looking statements, which are only predictions and speak only as of the date hereof. Forward-looking statements usually contain the words “estimate,” “anticipate,” “believe,” “expect,” or similar expressions, and are subject to numerous known and unknown risks and uncertainties. In evaluating such statements, prospective investors should carefully review various risks and uncertainties identified in this report, including the matters set forth under the captions “Risk Factors” and in the registrant’s other SEC filings. These risks and uncertainties could cause the registrant’s actual results to differ materially from those indicated in the forward-looking statements. The registrant undertakes no obligation to update or publicly announce revisions to any forward-looking statements to reflect future events or developments.

Although forward-looking statements in this report reflect the good faith judgment of our management, such statements can only be based on facts and factors currently known by us. Consequently, forward-looking statements are inherently subject to risks and uncertainties, and actual results and outcomes may differ materially from the results and outcomes discussed in or anticipated by the forward-looking statements. Factors that could cause or contribute to such differences in results and outcomes include, without limitation, those specifically addressed under the heading “*Risks Relating to Our Business*” below, as well as those discussed elsewhere in this report. Readers are urged not to place undue reliance on these forward-looking statements, which speak only as of the date of this report. We file reports with the Securities and Exchange Commission (the “SEC”). You can read and copy any materials we file with the SEC at the SEC’s Public Reference Room located at 100 F. Street, NE, Washington, D.C. 20549, on official business days during the hours of 10 a.m. to 3 p.m. You can obtain additional information about the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an Internet site (www.sec.gov) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC, including the registrant.

We undertake no obligation to revise or update any forward-looking statements in order to reflect any event or circumstance that may arise after the date of this report. Readers are urged to carefully review and consider the various disclosures made throughout the entirety of this report, which attempt to advise interested parties of the risks and factors that may affect our business, financial condition, results of operations and prospects.

PART I

ITEM 1. BUSINESS.

Overview

We are a retailer and distributor of pharmaceutical and other healthcare products typically found in a retail pharmacy in the People's Republic of China ("PRC" or "China"). Prior to acquiring Zhejiang Jiuxin Medicine Co., Ltd. ("Jiuxin Medicine") in August 2011 (see "*Our Corporate History and Structure - HJ Group*" below), we were primarily a retail pharmacy operator. We currently have one hundred and twenty-two (122) store locations under the store brand "Jiuzhou Grand Pharmacy" in Hangzhou city and its adjacent town Lin'an. Additionally, we operate nine drugstores, controlled by Hangzhou Jiuzhou Grand Pharmacy.

We currently operate in four business segments in China: (1) retail drugstores, (2) online pharmacy, (3) wholesale business selling products similar to those we carry in our pharmacies, and (4) farming and selling herbs used for traditional Chinese medicine ("TCM").

Our stores provide customers with a wide variety of pharmaceutical products, including prescription and over-the-counter ("OTC") drugs, nutritional supplements, TCM, personal and family care products, and medical devices, as well as convenience products, including consumable, seasonal, and promotional items. Additionally, we have licensed doctors of both western medicine and TCM on site for consultation, examination and treatment of common ailments at scheduled hours. Three (3) stores have adjacent medical clinics offering urgent cares (to provide treatment for minor ailments such as sprains, minor lacerations, and dizziness that can be treated on an outpatient basis), TCM (including acupuncture, therapeutic massage, and cupping) and minor outpatient surgical treatments (such as suturing). Our stores vary in size, but presently close to average 200 square meters per store. We attempt to tailor each store's product offerings, physician access, and operating hours to suit the community where the store is located.

We operate our pharmacies (including the medical clinics) through the following companies in China that we control through contractual arrangements:

Hangzhou Jiuzhou Grand Pharmacy Chain Co., Ltd. ("Jiuzhou Pharmacy"), which we control contractually, operates our "Jiuzhou Grand Pharmacy" stores;

Hangzhou Jiuzhou Clinic of Integrated Traditional and Western Medicine (General Partnership) (“Jiuzhou Clinic”), which we control contractually, operates one (1) of our two (2) medical clinics; and

Hangzhou Jiuzhou Medical & Public Health Service Co., Ltd. (“Jiuzhou Service”), which we control contractually, operates our other medical clinics.

In addition, we operate pharmacies through “Lin’An Jiuzhou”, which are directly held by Jiuxin Investments Management Co. Ltd. We also operates nine stores, which are held by Jiuzhou Pharmacy.

We also retail OTC drugs and nutritional supplements through a website (www.dada360.com) operated by Jiuzhou Pharmacy. For the fiscal year ended March 31, 2018, retail revenue, including pharmacies, medical clinics accounted for approximately 64.5% of our total revenue, while online pharmacy revenue accounted for 12.6% of our total revenue.

Since August 2011, we have operated a wholesale business through Zhejiang Jiuxin Medicine Co., Ltd. (“Jiuxin Medicine”), distributing third-party pharmaceutical products (similar to those carried by our pharmacies) primarily to trading companies throughout China. Jiuxin Medicine is wholly owned by Jiuzhou Pharmacy. For the fiscal year March 31, 2018, wholesale revenue accounted for approximately 22.9% of our total revenue.

We also have an herb farming business cultivating and wholesaling herbs used for TCM. This business is conducted through Hangzhou Qianhong Agriculture Development Co., Ltd. (“Qianhong Agriculture”), a wholly-owned subsidiary. During the fiscal year ended March 31, 2018, we generated no revenue from our herb farming business.

Throughout this report, we will sometimes refer to Jiuzhou Pharmacy, Jiuzhou Clinic and Jiuzhou Service, Lin’An Jiuzhou, as well as the subsidiaries of Jiuzhou Pharmacy, collectively as “HJ Group.”

Our Corporate History and Structure

We were incorporated in Nevada on December 19, 2006, under the name “Kerrisdale Mining Corporation,” with a principal business objective to acquire and develop mineral properties. Although we had acquired certain mining claims, we were not operational.

On July 14, 2008, we amended our Articles of Incorporation to change our authorized capital stock from 75,000,000 shares of common stock, par value \$0.001 per share, to 500,000,000 shares of common stock, par value \$0.001 per share, and 10,000,000 shares of preferred stock, par value \$0.001 per share. The preferred stock is “blank check,” and our Board of Directors has the right to set its designations, preferences, limitations, privileges, qualifications, dividend, conversion, voting, and other special or relative rights.

On September 17, 2009, we acquired control of Renovation Investment (Hong Kong) Co., Ltd., a limited liability company incorporated in Hong Kong on September 2, 2008 (“Renovation”), pursuant to a share exchange agreement.

On September 24, 2009, we amended our Articles of Incorporation to change our name from “Kerrisdale Mining Corporation” to “China Jo-Jo Drugstores, Inc.”

On April 9, 2010, we implemented a 1-for-2 reverse stock split of our issued and outstanding shares of common stock and a proportional reduction of our authorized shares of common stock, by filing a Certificate of Change pursuant to Nevada Revised Statutes 78.209 with the Nevada Secretary of State on April 6, 2010. All share information in this report takes into account this reverse stock split.

On April 28, 2010, we completed a registered public offering of 3,500,000 shares of our common stock at a price of \$5.00 per share, resulting in gross proceeds to us, prior to deducting underwriting discounts, commissions and offering expenses, of approximately \$17,500,000.

On July 24, 2015, we closed a registered direct offering of 1.2 million shares of common stock at \$2.50 per share with gross proceeds of approximately \$3 million from our effective shelf registration statement on Form S-3.

On January 23, 2017, we completed a private offering of 4,840,000 shares of the common stock at a price of \$2.20 per share with gross proceeds of approximately \$10,648,000.

Renovation

Renovation was formed by the owners of HJ Group as a special purpose vehicle to raise capital overseas, in accordance with requirements of China’s State Administration of Foreign Exchange (“SAFE”). SAFE issued the *Notice*

on Relevant Issues Concerning Foreign Exchange Administration for Financing and Round-Trip Investment Undertaken by Domestic Residents Through Overseas Special-Purpose Vehicles (“Circular No. 75”) on October 21, 2005. To further clarify the implementation of Circular 75, on May 31, 2007, SAFE issued a supplementary official notice known as *Hui ZhongFa [2007] No. 106* (“Circular 106”). Circular 75 and Circular 106 require the owners of any Chinese company to obtain SAFE’s approval before establishing any offshore holding company structure for foreign financing as well as subsequent acquisition matters in China. Accordingly, the owners of HJ Group submitted their applications to SAFE on July 25, 2008. On August 16, 2008, SAFE approved the applications, permitting these Chinese nationals to establish Renovation as an offshore, special purpose vehicle which was permitted to have foreign ownership and participate in foreign capital raising activities. After SAFE’s approval, the owners of HJ Group became holders of one hundred percent (100%) of Renovation’s issued and outstanding capital stock on September 2, 2008. See “*Relevant PRC Regulations - SAFE Registration*” below.

Jiuxin Management

Zhejiang Jiuxin Investment Management Co., Ltd. (“Jiuxin Management”) was organized in the PRC on October 14, 2008. Since all of its issued and outstanding capital stock is held by Renovation, a Hong Kong company, Jiuxin Management is deemed a “wholly foreign owned enterprise” (“WFOE”) under applicable PRC laws.

Jiutong Medical

Hangzhou Jiutong Medical Technology Co., Ltd. (“Jiutong Medical”) was organized in the PRC on December 20, 2011. Like Jiuxin Management, Jiutong Medical is also deemed a WFOE because it is wholly owned by Renovation. In November 2013, Jiutong Medical acquired the right to use of a piece of land, on which we plan to establish a herb processing plant in the future. As of March 31, 2017, we have not started constructing the plant.

Shouantang Technology

Shouantang Technology was organized in the PRC on July 16, 2010. Like Jiuxin Management and Jiutong Medical, it is also deemed a WFOE because it is wholly owned by Renovation.

In November 2010, Shouantang Technology acquired one hundred percent (100%) of Quannuo Technology and its wholly-owned subsidiary, Hangzhou Quannuo Grand Pharmacy Co., Ltd. (“Hangzhou Quannuo”), pursuant to an equity ownership transfer agreement. Quannuo Technology was organized in the PRC on July 7, 2009, and Hangzhou Quannuo was established on July 8, 2010. Hangzhou Quannuo currently has no operations and has terminated its State Administration of Industry and Commerce (“SAIC”) license in April 2015.

In November 2015, we sold all of the equity interests of Quannou Technology to six individuals for approximately \$17,121 (RMB107,074). Quannou Technology used to perform technical supports to our online pharmacy and incurred accumulated loss over the last five years. After the sale, its technical support function has been transferred back to Jiuzhou Pharmacy, which hosts our online pharmacy.

Qianhong Agriculture

Qianhong Agriculture was organized in the PRC on August 10, 2010 for our herb farming business. As of March 31, 2017, we have not harvested or sold any herbs.

Shouantang Bio

On October 11, 2014, the Company, through Jiuzhou Pharmacy, formed Shouantang Bio-technology Co., Ltd. (“Shouantang Bio”) by contributing \$0.16 million (RMB1 million) as its register capital. Shouantang Bio is formed to sell nutritional supplements under its own brand name, Shouantang.

Jiuyi Technology

On September 10, 2015, Renovation set up an entity named Hangzhou JiuYi Medical Technology Co. Ltd, (“Jiuyi Technology”) with a registered capital of \$5 million, intended to provide additional technical support such as webpage development to our online pharmacy business. Later on, we decided to move online technical supports back to Jiuzhou Pharmacy, so Jiuyi Technology had no significant online technical operation. Jiuyi Technology is located in Hangzhou, China.

Lin’an Jiuzhou

On March 31, 2017, the Company, through Jiuxin Management, formed Lin’an Jiuzhou Grand Pharmacy Co. Ltd, (“Lin’an Jiuzhou”) with a registered capital of \$725,570 (RMB 5 million), to expand our retail pharmacies in Lin’an City.

HJ Group

Jiuzhou Pharmacy is a PRC limited liability company established on September 9, 2003 by Mr. Lei Liu (55%), Mr. Chong'an Jin (23%) and Ms. Li Qi (22%). Hangzhou Kuaileren Grand Pharmacy Co., Ltd. ("Kuaileren"), originally a subsidiary of Jiuzhou Pharmacy, was dissolved on April 9, 2011. Prior to its dissolution, Kuaileren operated a "Kuaileren Grand Pharmacy" store, which is now a "Jiuzhou Grand Pharmacy" store. On July 1, 2014, Mr. Chong'an Jin transferred all of his equity interests he held in Jiuzhou Pharmacy to Mr. Lei Liu and Ms. Li Qi. As a result, Mr. Lei Liu held 61% and Ms. Li Qi has held 39% equity interests of Jiuzhou Pharmacy. On August 21, 2017, after Mr. Lei Liu transferred additional shares to Ms. Li Qi, Mr. Lei Liu held 56.7% and Ms. Li Qi held 43.3%. On April 25, 2018, Mr. Wei Chen, who is associated with CareRetail Holdings Limited, agreed to invest 200,000 RMB and hold 1% of Jiuzhou Pharmacy. As a result, Mr. Lei Liu held 56.13% and Ms. Li Qi has held 42.87% equity interests of Jiuzhou Pharmacy. Mr. Lei Liu and Ms. Li Qi are from time to time referred to in this report as Key Personnel.

Jiuzhou Pharmacy currently has one subsidiary, Jiuxin Medicine, which was organized in the PRC on December 31, 2003. In April 2011, Jiuzhou Pharmacy entered into an equity ownership transfer agreement with the owners of Jiuxin Medicine, and its business license was transferred to Jiuzhou Pharmacy, although no consideration was paid. On August 25, 2011, the acquisition of Jiuxin Medicine was completed for \$4.7 million (RMB 30 million.)

Jiuzhou Clinic is a PRC general partnership established on October 10, 2003 by Mr. Liu (39%), Mr. Jin (31%) and Ms. Qi (30%). Jiuzhou Clinic is a medical practice currently operating adjacent to the "Jiuzhou Grand Pharmacy" store in Dagan, providing primary, urgent, minor surgical, and traditional medical care services. Additionally, Jiuzhou Clinic's physicians consult with and examine patients at other "Jiuzhou Grand Pharmacy" stores.

Jiuzhou Service is a PRC limited liability company established on November 2, 2005 by Mr. Liu (39%), Mr. Jin (31%) and Ms. Qi (30%). Jiuzhou Service is licensed as a healthcare management company and currently manages the medical clinic operating adjacent to the "Jiuzhou Grand Pharmacy" store in Wenhua, providing services similar to those at the Dagan clinic.

We control HJ Group through contractual arrangements. See "*Contractual Arrangements with HJ Group and the Key Personnel*" below.

Contractual Arrangements with HJ Group and the Key Personnel

Our relationships with HJ Group and the Key Personnel are governed by a series of contractual arrangements that they have entered into with Jiuxin Management.

PRC regulations on foreign investment currently permit foreign companies to establish or invest in WFOEs or joint ventures that engage in wholesale or retail sales of pharmaceuticals in China. For retail sales, however, these regulations restrict the number and size of pharmacies that a foreign investor may own. If a chain operates more than thirty (30) stores and sells branded pharmaceutical products from different suppliers, a foreign investor may own only up to forty nine percent (49%) of such chain. The contractual arrangements with Jiuzhou Pharmacy enable us to bypass such restrictions, since neither we nor our subsidiaries own equity interests in Jiuzhou Pharmacy, while at the same time we retain control of its drugstore chain by virtue of the contractual arrangements.

Similarly, PRC regulations place certain restrictions on foreign ownership of medical practice. Foreign investors can only acquire ownership interests through a Sino-foreign joint venture and not through a WFOE. Since we do not have actual equity interests in Jiuzhou Clinic or Jiuzhou Service, and instead control these entities through contractual arrangements, such regulations do not apply to us or our structure.

Under PRC laws, Jiuxin Management, Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic are each independent business entities not exposed or subject to the liabilities incurred by any of the other three (3) entities. The contractual arrangements constitute valid and binding obligations of the parties to such agreements. Each of the contractual arrangements, and the rights and obligations of the parties thereto, are enforceable and valid in accordance with the laws of the PRC. These contractual arrangements, as amended and in effect, include the following:

Consulting Services Agreement. Pursuant to certain exclusive consulting services agreements (the “Consulting Services Agreement”), Jiuxin Management has the exclusive right to provide Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic with general business operation services, including advice and strategic planning, as well as consulting services related to their current and future operations (the “Services”). Additionally, Jiuxin Management owns the intellectual property rights developed or discovered through research and development, in the course of providing the Services, or derived from the provision of the Services. Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic must each pay a quarterly consulting services fee in RMB to Jiuxin Management that is equal to its profits for such quarter. This agreement is in effect until and unless terminated by written notice of a party to the agreement in the event that: (a) a party becomes bankrupt, insolvent, is the subject of proceedings or arrangements for liquidation or dissolution, ceases to carry on business, or becomes unable to pay its debts as they become due; (b) Jiuxin Management terminates its operations; or (c) circumstances arise which would materially and adversely affect the performance or the objectives of the agreement. Jiuxin Management may also terminate the agreement with any of Jiuzhou Pharmacy, Jiuzhou Service or Jiuzhou Clinic if one of them breaches the terms of the agreement, or without cause.

Operating Agreement. Pursuant to the operating agreement, Jiuxin Management agrees to guarantee the contractual performance by Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic of their agreements with any third party. In return, the Key Personnel must appoint designees of Jiuxin Management to the boards of directors and senior management of Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic. In addition, each of Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic agrees to pledge its accounts receivable and all of its assets to Jiuxin Management. Moreover, without the prior consent of Jiuxin Management, Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic cannot engage in any transactions that could materially affect their respective assets, liabilities, rights or operations, including, without limitation, incurrence or assumption of any indebtedness, sale or purchase of any assets or rights, incurrence of any encumbrance on any of their assets or intellectual property rights in favor of a third party, or transfer of any agreements relating to their business operations to any third party. They must also abide by corporate policies set by Jiuxin Management with respect to their daily operations, financial management and employment issues. The term of this agreement is from August 1, 2009 until the maximum period of time permitted by law. Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic cannot terminate this agreement.

Equity Pledge Agreement. Pursuant to certain equity pledge agreements (the "Equity Pledge Agreement"), the Key Personnel have pledged all of their equity interests in Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic to Jiuxin Management in order to guarantee these companies' performance of their respective obligations under the Consulting Services Agreement. If these companies or the Key Personnel breach their respective contractual obligations, Jiuxin Management, as pledgee, will be entitled to certain rights, including the right to sell the pledged equity interests. The Key Personnel have also agreed that upon occurrence of any event of default, Jiuxin Management shall be granted an exclusive, irrevocable power of attorney to take actions in the place and stead of the Key Personnel to carry out the security provisions of this agreement, and to take any action and execute any instrument that Jiuxin Management may deem necessary or advisable to accomplish the purposes of this agreement. The Key Personnel agree not to dispose of the pledged equity interests or take any actions that would prejudice Jiuxin Management's interests. This agreement will expire two (2) years after the obligations of Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic under the Consulting Services Agreement have been fulfilled.

Option Agreement. Pursuant to the option agreement, the Key Personnel irrevocably grant Jiuxin Management or its designee an exclusive option to purchase, to the extent permitted under PRC law, all or part of their equity interests in Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic for the cost of the initial contributions to the registered capital or the minimum amount of consideration permitted by applicable PRC law. Jiuxin Management or its designee has sole discretion to decide when to exercise the option, whether in part or in full. The term of this agreement is from August 1, 2009 until the maximum period of time permitted by law.

Proxy Agreement. Pursuant to the proxy agreement, the Key Personnel irrevocably grant a designee of Jiuxin Management the right to exercise the voting and other ownership rights of the Key Personnel in Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic, including the rights to (i) attend any meeting of the Key Personnel (or participate by written consent in lieu of such meeting) in accordance with applicable laws and each company's incorporating documents, (ii) sell or transfer all or any of the equity interests of the Key Personnel in these companies, and (iii) appoint and vote for the companies' directors. The proxy agreement may be terminated by mutual consent of the parties or upon thirty (30) days' written notice from Jiuxin Management.

Other than as pursuant to the foregoing contractual arrangements, Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic cannot transfer any funds generated from their respective operations. The contractual arrangements were originally entered into on August 1, 2009, and amended on October 27, 2009.

Our Current Corporate Structure

The following diagram illustrates our current corporate structure as of March 31, 2018:

The table below summarizes the status of the registered capital of our PRC subsidiaries and controlled companies as of the date of this report:

Entity Name	Entity Type	Registered Capital	Registered Capital Paid	Due Date for Unpaid Registered Capital
Jiutong Medical	Subsidiary	USD 2,600,000	USD 2,600,000	N/A

Our Business

Pharmacies

We currently have one hundred and twenty-two (122) pharmacies throughout Hangzhou, the provincial capital of Zhejiang and neighborhood cities. Pharmacy sales accounted for approximately 83.6% of our retail revenue, and 64.5% of our total revenue, for the fiscal year ended March 31, 2018. We offer primarily third-party products at our pharmacies, including:

Approximately 1,335 prescription drugs (252 of which require a physician's prescription and the rest requires customer personal information registration only), sales of which accounted for approximately 33.2% of our retail

revenue for the fiscal year ended March 31, 2018;

Approximately 1,653 OTC drugs, sales of which accounted for approximately 45.8% of our retail revenue for the fiscal year ended March 31, 2018;

Approximately 734 nutritional supplements, including a variety of healthcare supplements, vitamin, mineral and dietary products, sales of which accounted for approximately 6.7% of our retail revenue for the fiscal year ended March 31, 2018;

TCM, including drinkable herbal remedies and pre-packaged herbal mixtures for making soup, sales of which accounted for approximately 2.7% of our retail revenue for the fiscal year ended March 31, 2018;

Sundry products (i.e., personal care products such as skin care, hair care and beauty products, convenience products such as soft drinks, packaged snacks, and other consumable, cleaning agents, stationeries, and seasonal and promotional items tailored to local consumer demand for convenience and quality), sales of which accounted for approximately 10.1% of our retail revenue for the fiscal year ended March 31, 2018; and

Medical devices (i.e., family planning and birth control products, early pregnancy test products, portable electronic diagnostic apparatus, rehabilitation equipment, and surgical tools such as hemostats, needle forceps and surgical scissors), sales of which accounted for approximately 1.6% of our retail revenue for the fiscal year ended March 31, 2018.

We favor retail locations in well-established residential communities with relatively concentrated consumer purchasing power or close to local hospitals, and evaluate potential store sites to assess consumer traffic, visibility and convenience. Depending on its size, each drugstore has between two (2) to eight (8) pharmacists on staff, all of whom are properly licensed. We accept prescriptions only from licensed health care providers, and verify the validity, accuracy, and completeness of all prescriptions. We also ask all prescription customers to disclose their drug allergies, current medical conditions, and current medications. Most pharmacies also maintain a TCM counter staffed by licensed herbalists.

After opening, a location without SHI coverage may take up to one year to achieve our projected revenue goals for that particular location. Various factors influence individual store revenue including, but not limited to: location, nearby competition, local population demographics, square footage, and government insurance coverage.

All of our one hundred and twenty-two (122) drugstores are located in Hangzhou city and its adjacent town Lin'an.

To enhance customer experience, we have licensed physicians available at several of "Jiuzhou Grand Pharmacy" locations for consultation, examination and treatment of common ailments at scheduled hours. In addition, our Dagan, Wenhua and Xiasha stores have adjoining medical clinics that provide urgent care (such as sprains, minor

lacerations, and dizziness), TCM treatments (including acupuncture, therapeutic massage, moxibustion, and cupping), and minor outpatient surgical treatments (such as suturing).

To ensure quality and personal attention for patients, we employ only licensed doctors and certified nurses and technicians, and patient treatments at our three (3) clinics follow nationally established clinical practice guidelines from China's Ministry of Health. We currently have sixty-three (63) physicians and thirty-three (33) clinic staff. In-store consultations and examinations by our physicians are provided free-of-charge to ensure that customers are being prescribed and taking the appropriate medicines for their ailments, and to afford customers convenience.

We view our medical services as more consumer-driven than other health care specialties, because consumers requiring the types of medical services that we provide often seek treatment on their own accord. We have developed our medical services to respond to the public need for convenient access to medical consultations and/or care and the significant savings that we can provide as compared to a more traditional medical setting such as a hospital. Many of our patients often need immediate access to medical services, do not have a regular physician, or may lack suitable alternatives. Patient flow is derived from the physical presence of our drugstores, not from pre-existing doctor-patient relationships or referrals from other healthcare providers.

We generate limited revenue directly from our clinics. However, our clinic brings in the patients flow into our stores, where they make medicine purchase.

Online Sales

Since May 2010, we have been retailing OTC drugs and nutritional supplements on the Internet at www.dada360.com. Before November 2015, our subsidiary Quannuo Technology operated and maintained the website pursuant to the Internet Pharmaceutical Transaction Service Qualification Certificate issued by the State Food and Drug Administration (the "SFDA") of Zhejiang Province, which allows us to engage in online retail pharmaceutical sales throughout China. As we sold all our equity interests in Quannuo Technology in November 2015, we have transferred our online pharmacy operation function to Jiuzhou Pharmacy. We have established payment methods with banks and online intermediaries such as Alipay, and are cooperating with business-to-consumer online vendors such as Taobao. By using Taobao's platform in addition to our own website as mentioned above, we can be exposed to a wider range of customers.

Online sales accounted for approximately 16.4% of our retail revenue, and 12.6% of our total revenue, for the fiscal year ended March 31, 2018. Online sales accounted for approximately 22.9% of our retail revenue, and 18.9% of our total revenue, for the fiscal year ended March 31, 2017.

Wholesale

Since acquiring Jiuxin Medicine in August 2011, we have been distributing third-party products primarily to drug distributors throughout China, including:

Approximately 343 prescription drugs, the sales of which accounted for approximately 56.0% of our wholesale revenue for the fiscal year ended March 31, 2018; Approximately 1,065 prescription drugs, the sales of which accounted for approximately 55.6% of our wholesale revenue for the fiscal year ended March 31, 2017;

Approximately 253 OTC drugs, the sales of which accounted for approximately 42.6% of our wholesale revenue for the fiscal year ended March 31, 2018; Approximately 1,284 OTC drugs, the sales of which accounted for approximately 42.5% of our wholesale revenue for the fiscal year ended March 31, 2017;

Approximately 31 nutritional supplements, the sales of which accounted for approximately 0.8% of our wholesale revenue for the fiscal year ended March 31, 2018; Approximately 208 nutritional supplements, the sales of which accounted for approximately 0.4% of our wholesale revenue for the fiscal year ended March 31, 2017;

TCM products, the sales of which accounted for approximately 0.3% of our wholesale revenue for the fiscal year ended March 31, 2018; TCM products, the sales of which accounted for approximately 1.5% of our wholesale revenue for the fiscal year ended March 31, 2017;

Sundry products, the sales of which accounted for approximately 0.2% of our wholesale revenue for the fiscal year ended March 31, 2018; Sundry products, the sales of which accounted for approximately 0.0% of our wholesale revenue for the fiscal year ended March 31, 2017; and

Medical devices, the sales of which accounted for approximately 0.0% of our wholesale revenue for the fiscal year ended March 31, 2018 and 2017.

Wholesale revenue increased primarily as a result of our ability to resell certain products, which our retail stores made large order on, to other vendors. As our retail drugstores achieved large quantity sales of certain brand name merchandises, we were able to bargain lower purchase prices than the market level on these merchandises. As a result, certain vendors who were unable to obtain a better price than ours, will turn to us for these merchandises, leading the wholesale volume to grow. On the other side, we have been trying to act as a local agent for well-know health products in Zhejiang Province. For example, we signed a strategic cooperation agreement with Dong'a Gelatin (DEEJ) and act as its local sale agent in Zhejiang Province. Until we can establish a new customer base and secure a status to serve as provincial or national exclusive sale agent for certain popular drugs, we do not expect our wholesale business to increase significantly in the immediate future.

Herb Farming

From 2010 to the third quarter of fiscal 2013, we had been cultivating and harvested ten (10) types of herbs, such as fructusrubi (used in TCM to promote blood circulation), white atractylodes rhizome (used in TCM to treat physical and mental fatigue), atractylodesmacrocephala (used in TCM to control sweating), ginkgo seeds (used in TCM to treat asthma), and maidenhair trees used for TCM on approximately forty eight (48) acres of leased land in Lin'an, approximately thirty (30) miles from Hangzhou.

We planted ginkgo and maidenhair trees during the year ended March 31, 2013. A ginkgo tree may have a growth period of up to twenty years before it is mature enough to harvest. Usually, the longer it grows, the more valuable it becomes. We plan to continue cultivating the trees in order to maximize their market value in the future. We anticipate that we will continue growing trees and cultivating other herbs in the future.

Herb farming revenue accounted for no revenue for the fiscal year ended March 31, 2018.

Our Customers

Retail Customers

For the fiscal year ended March 31, 2018, our pharmacies collectively served an average of approximately 13,481 customers per day. We periodically conduct qualitative customer surveys to help us build a stronger understanding of our market position and our customers' purchasing habits.

Pharmacy customers pay by cash, debit or credit card, mobile devices or medical insurance cards under Hangzhou and Zhejiang's medical insurance programs. During the fiscal year ended March 31, 2018, approximately 18% of our pharmacy revenue came from cash sales, 56% from Hangzhou's medical insurance cards (where most of our pharmacies are located), and 26% from debit and credit cards, Zhejiang's medical insurance cards and other charge cards.

We maintain strict cash control procedures at our pharmacies. Our integrated information management system records the details of each sale, which we control from our headquarters. Depending on each location's sales activities, cash may be deposited daily or several times per week in designated bank accounts.

For sales made to eligible participants in the national medical insurance program, we generally obtain payments from the relevant government social security bureaus on a monthly basis. See "*Relevant PRC Regulations - Reimbursement under the National Medical Insurance Program.*" According to relevant regulations, a drugstore must operate for at least one (1) year before it can apply to be licensed to accept Hangzhou's medical insurance cards. As of the date of this report, sixty-eight(68) of our one hundred and twenty-two (122) "Jiuzhou Grand Pharmacy" stores are licensed to accept medical insurance cards while nineteen(19) will apply for approval in the near future. Those of our stores that accept medical insurance cards are designated as such by clear signage on their storefront windows.

Online Sales Customers

Our online customers mainly consist of consumers between 25 and 40 years old. While our website is accessible throughout China, approximately forty-five percent (45%) of our online sales during the fiscal year ended March 31, 2018, were from Zhejiang and neighboring Jiangsu and Shanghai.

Wholesale Customers

Our wholesale customers are primarily third-party trading companies that purchase from us to resell to pharmacies throughout China. We also supply some hospitals and pharmacies, although they collectively make up less than 10.0% of our wholesale customers currently.

Herb Farming Customers

Our farming customers primarily include local herb vendors. For the fiscal year ended March, 31, 2018, we have not harvested or sold any herbs.

Marketing and Promotion

Our marketing and promotion efforts are focused on our retail segment, particularly our pharmacies, and our strategy is to build brand recognition, increase customer flow, build strong customer loyalty, maximize repetitive customer visits, and develop incremental revenue opportunities.

Our marketing department designs chain-wide marketing efforts while each store designs local promotions based on local demographics and market conditions. We also launch single store promotional campaigns and community activities in connection with the opening of new stores. Our store managers and staff are also encouraged to propose their own advertising and promotional plans, including holiday promotions, posters and billboards. In addition, we offer special discounts and gift promotions for selected merchandise periodically in conjunction with our suppliers' marketing programs. We also provide ancillary services such as providing free blood pressure readings in our stores.

Many of our promotional programs are designed to encourage manufacturers to invest resources to market their brands within our stores. We charge manufacturers promotional fees in exchange for the right to promote and display their products in our stores during promotional periods. We also allow manufacturers and distributors to station salespeople in our stores to promote their products, for which we receive a fee. Since manufacturers provide purchasing incentives and information to help customers to make informed purchase decisions, we believe that manufacturer-led promotions improve our customers' shopping experience. We work to maintain strong inventory positions for merchandise featured in our promotions, as we believe this increases the effectiveness of our spending on promotional activities.

We run advertisements periodically in selected newspapers to promote our brands and the products carried in our stores. Under our agreements with certain newspapers, we run one-page weekly or monthly advertisements, and the newspapers publish healthcare-related feature articles relating to our advertised products on or around the dates of our advertisements. We also promote our brands and products using billboards and radio and television commercials. Depending on our agreement with a particular manufacturer, advertising expenses are borne either by us, the manufacturer of the products being advertised, or are shared as a joint expense. Our advertisements are designed to promote our brands, our corporate image and the prices of products available for sale in our stores.

As part of our marketing campaign, we offer rewards cards to customers, which provide certain exclusive discounts. After a customer signs up for the rewards card, we communicate via the customer's preferred method: e-mail, traditional mail or text messages. For the fiscal year ended March 31, 2018, approximately 66.1% of our customers used their rewards card to make purchases. We intend to further extend this program to enhance the customer experience and for customer retention. For every 10 Yuan spent at stores, we reward 1 membership point. Every 20 points can be exchanged to 1 Yuan coupon, which can be used against merchandises purchased at our stores. The reward points never expired, however, the rewards cannot be used against products reimbursed by local SIC agent. As a result, we recorded unused membership points as accrued expense.

Our clinic staff also regularly offers free seminars and outreach programs covering various health issues that are topical to the communities where our stores are located. Such events are designed not only to raise public health awareness, but to reach potential customers for our drugstores.

To promote our online business, we are cooperating with Taobao, the largest online vendor in China, to help raise awareness among potential customers. Taobao lists our products on their platform, which then directs consumers back to our website to make their purchases.

Logistics

Before March 31, 2018, we used Jiuxin Medicine's resources to support our logistics needs in Hangzhou. Starting from March 31, 2018, we outsourced our logistics service to Astro Boy Cloud Pan (Hangzhou) Storage and Logistic Co. Ltd ("Astro Boy Logistic"). As a result, Jiuxin Medicine's warehouse lease has been terminated. Astro Boy Logistic provides us with approximately 14,000 square meters facility located approximately eighteen (18) miles from our headquarters, which served as our central distribution center. Astro Boy Logistics' staff and vehicles make regular deliveries to our pharmacies and wholesale customers. Jiuxin Medicine, however, continues to negotiate with various suppliers and make orders.

We employ third-party logistics companies for deliveries to wholesale customers outside Hangzhou. We believe that reliable logistics providers are readily available and can be replaced without any material interruptions to our business.

Suppliers

We currently source retail products from approximately 350 suppliers, including trading companies and direct manufacturers. We source wholesale products from approximately 150 suppliers, including many of those that provide our retail products. For the fiscal year ended March 31, 2018, one supplier, HuaDong Pharmaceutical Co., Ltd. accounted for more than twenty-nine percent (19.0%) and thirteen percent (13.1%) of our total purchases and total purchase deposits. The suppliers are neither related to nor affiliated with us. For the fiscal year ended March 31, 2017, two (2) suppliers, HuaDong Pharmaceutical Co., Ltd. and Zhejiang Yingte Pharmaceutical Co. Ltd. accounted for more than twenty-nine percent (29.3%) and thirteen percent (13.1%) of our total purchases and total purchase deposits. The suppliers are neither related to nor affiliated with us.

We believe that competitive sources are readily available for substantially all of the products we require for our retail and wholesale businesses. As such, we believe that we can change suppliers without any material interruption to our business. To date, we have not experienced any significant difficulty in sourcing our suppliers.

Quality Control

We place strong emphasis on quality control, which starts with procurement. In addition to their market acceptance and costs, we select products based on Good Manufacturing Practice and Good Supply Practice (“GSP”) compliance status of their suppliers. We also assess product quality based on the facilities and capabilities of its manufacturer, including technology, packaging and logistics. We conduct random quality inspections of each batch of products we procure, and replace any supplier who fails to pass such inspections.

We also enforce strict quality control measures at our distribution center. All products are screened upon their arrival, and those with evidence of defects or damages are immediately rejected. Products that pass the screening process are recorded and stored strictly according to each manufacturer’s temperature and other requirements. Products (for both our pharmacies and wholesale customers) are verified against the appropriate delivery orders prior to leaving the facility. We use vehicles with cold-temperature storage to make deliveries as necessary.

All of our pharmacy employees participate in a mandatory thirty-six (36) hour training program regarding quality control annually, and we regularly dispatch quality inspectors to our stores to monitor the service quality of our staff.

Competition

The drugstore industry in China is intensely competitive, rapidly evolving and highly fragmented. We compete on the basis of store location, merchandise selection, prices and brand recognition. Many of our competitors include large, national drugstore chains that may have more financial resources, stronger brand strength, and management expertise than us, including China Nepstar Chain Drugstore Ltd., LBX Pharmacy, and TianTianHao Grand Pharmacy. Other competitors include local and independent drugstores and government-operated pharmacies, as well as discount stores, convenience stores, and supermarkets with respect to sundry and other non-medicinal products that we carry.

The wholesale pharmaceutical distribution industry in China is likewise competitive and highly fragmented. We compete with regional distributors, such as Zhengchen Pharmaceutical Co., Ltd. and Hangzhou Xiaoran Pharmaceutical Co., Ltd., as well as national operators such as Fengwoda Pharmaceutical Co., Ltd. and Jiuzhoutong Pharmaceutical Co., Ltd. These competitors have substantially greater logistics capacities and more financial resources, as well as more industry-relevant experience, than us.

The online pharmacy is an emerging business in China. We are competing with other online vendors that may be supported by major drugstore chains or initiated by smaller local drugstore chains. In order to compete effectively, we are cooperating with Taobao, the largest online vendor in China. We also put in significant efforts selecting products we believe are most suitable for online sales, such as those we have the exclusive right to sell. We have spent considerable efforts identifying popular products that can drive sales, while maintaining our attention on cost. In fiscal 2018, we have kept working with large insurance companies in China such as the People's Insurance Company (Group) of China Limited, who sells online products to their customers that have purchased health insurance from them. Commercial health insurance has expanded quickly in recent years in China, especially after the government started to control its Social Health Insurance ("SHI") budget. We expect the close cooperation with commercial insurance companies and active strategy on e-commerce platforms will drive up our online sales.

China's herb market is highly specialized. We have not incurred any herb sales in fiscal 2018.

Intellectual Property

We currently have the following trademarks registered with the Trademark Office of the SAIC:

"JiuzhouTongxin" is a Classes 5 and 35 trademark (for pharmaceuticals and advertisement) issued on February 14, 2011 and March 7, 2013 respectively, registered under Jiuzhou Pharmacy, which we plan to use to brand certain products that we may sell in our stores;

"Jiuzhou" is a Classes 5, 35 and 44 trademark (for medical services) issued in April and May 2012, registered under Jiuzhou Pharmacy, which we plan to use to brand our medical services;

"Shouantang" a Classes 5, 10, 30, 35 and 44 trademark (for pharmaceuticals, construction, food, advertisement and medical services) issued on October 2011, and a Classes 3 42 6 19 20 24 31 26 32 and 29 (for oil, diary and others) trademark issued in August and October 2015, registered under Jiuzhou Pharmacy, which we are using to brand certain products that we sell in our stores; and

“Jinyuliangyan” is a Class 29 trademark (for food and oil) issued in June 2011, registered under Jiuzhou Pharmacy, which we are using to brand certain products that we sell in our stores; and

“Jiuying” is a Classes 5, 35 and 44 trademark (for healthcare and nutritional supplement) issued in December 2012 and February 2013, registered under Jiuzhou Service, which we are using to brand our service and products that we sell in our clinics.

We own and operate the following websites: www.dada360.com (for online sales), www.jiuzhou-drugstore.com (our corporate website used in China), and www.chinajojodrugstores.com (our English-language corporate website). We also own two (2) inactive domain names. We do not own any patents, nor do we have any pending patent applications, and we are not a beneficiary of any licenses, franchises, concessions or royalty agreements.

All of our employees are required to enter into written employment agreements with us, pursuant to which they are subject to confidentiality obligations.

Employees

As of March 31, 2018, we had 1,139 employees combined in our retail and wholesale operations, including 1,079 full-time and 60 part-time employees. The number of employees for each area of operations, and such employees as a percentage of our total workforce, are as follows:

	As of March 31, 2018		
	Employees	Percentage	
Non-pharmacist store staff	547	48.0	%
Pharmacists	326	28.6	%
Management - non-pharmacists	85	7.5	%
Physicians	63	5.5	%
Non-physician clinic staff	33	2.9	%
Wholesale - non-warehouse	40	3.5	%
Wholesale - warehouse	4	0.4	%
Online pharmacy - technicians	33	2.9	%
Online pharmacy - non-technicians	8	0.7	%
Total	1,139	100.00	%

We place strong emphasis on the quality of our employees at all levels, including in-store pharmacists and store staff who interact with our customers directly. We provide extensive training for newly recruited employees in the first three (3) months of their employment. The training is designed to encompass a number of areas, such as knowledge about our products and how best to interact with our customers. In addition, we regularly carry out training programs on medicinal information, nutritional information, and selling skills for our store staff and in-store pharmacists. We believe these programs have played an important role in strengthening the capabilities of our employees.

Various drug manufacturers also pay us to have their representatives in our drugstores, and accordingly, we train them under our store policies and procedures.

Relevant PRC Regulations

SAFE Registration

In October 2005, SAFE issued Circular 75. Circular 75 regulates foreign exchange matters in relation to the use of a special purpose vehicle by PRC residents to seek offshore equity financing and conduct “round trip investment” in China. The Key Personnel, who are PRC residents, are in compliance with Circular 75 and its implementing circulars.

Dividend Distribution

Under current applicable laws and regulations, each of our consolidated PRC entities, including WFOEs and domestic companies, may pay dividends only out of their accumulated profits, if any, determined in accordance with PRC accounting standards and regulations. In addition, each of our consolidated PRC entities is required to set aside at least ten percent (10%) of its after-tax profit based on PRC accounting standards each year to its statutory surplus reserve fund until the accumulative amount of such reserve reaches fifty percent (50%) of its registered capital. These reserves are not distributable as cash dividends. As of March 31, 2018, the accumulated balance of our statutory reserve funds reserves amounted to \$1.31 million, and the accumulated loss of our consolidated PRC entities amounted to \$0.75 million.

Taxation

The current PRC Enterprise Income Tax Law (the “EIT Law”), and the implementation regulations for the EIT Law issued by China’s State Council, became effective as of January 1, 2008. Under the EIT Law, enterprises are classified as either resident or non-resident enterprises. An enterprise established outside of China with its “de facto management bodies” located within China is considered a “resident enterprise,” meaning that it can be treated in a manner similar to a Chinese enterprise for enterprise income tax purposes. The implementing rules of the EIT Law defines a “de facto management body” as a managing body that in practice exercises “substantial and overall management and control over the production and operations, personnel, accounting, and properties” of the enterprise; however, it remains unclear whether the PRC tax authorities would deem our managing body as being located within China. Due to the relatively short history of the EIT Law and lack of applicable legal precedents, the PRC tax authorities determine the PRC tax resident treatment of entities organized under the laws of foreign jurisdictions on a case-by-case basis.

If the PRC tax authorities determine that we are a resident enterprise for PRC enterprise income tax purposes, a number of PRC tax consequences could follow. Firstly, we may be subject to enterprise income tax at a rate of twenty five percent (25%) on our respective worldwide taxable income, as well as PRC enterprise income tax reporting obligations. Secondly, although the EIT Law provides that “dividends, bonuses and other equity investment proceeds between qualified resident enterprises” is exempted income, and the implementing rules of the EIT Law refer to “dividends, bonuses and other equity investment proceeds between qualified resident enterprises” as the investment proceeds obtained by a resident enterprise from its direct investment in another resident enterprise, it is still unclear whether the dividends we receive from Jiuxin Management would be classified as “dividends between qualified resident enterprises” and therefore qualify for tax exemption.

If we are treated as a non-resident enterprise under the EIT Law, then any dividends that we may receive from Jiuxin Management (assuming such dividends were considered sourced within the PRC) (i) may be subject to a five percent (5%) PRC withholding tax, provided that we own more than twenty five percent (25%) of the registered capital of Jiuxin Management incessantly within twelve (12) months immediately prior to obtaining such dividends from Jiuxin Management, and if the *Arrangement between the Mainland of China and the Hong Kong Special Administrative Region for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income* (the “Arrangement”) is applicable, or (ii) if the Arrangement does not apply (i.e. the PRC tax authorities may deem us to be a conduit not entitled to treaty benefits), may be subject to a ten percent (10%) PRC withholding tax. Similarly, if we are treated as a non-resident enterprise, and Renovation is treated as a resident enterprise, then any dividends that we receive from Renovation (assuming such dividends were considered sourced within the PRC) may be subject to a ten percent (10%) PRC withholding tax. Any such taxes on dividends could materially reduce the amount of dividends, if any, that we could pay to our shareholders.

Finally, the new “resident enterprise” classification could result in a situation in which a ten percent (10%) PRC tax is imposed on dividends we pay to our investors that are non-resident enterprises so long as such non-resident enterprise investors do not have an establishment or place of business in China or, despite the existence of such establishment or place of business in China, the relevant income is not effectively connected with such establishment or place of business in China, to the extent that such dividends have their sources within the PRC. Similarly, any gain realized on the transfer of our shares by such investors is also subject to a ten percent (10%) PRC income tax if such gain is regarded as income derived from sources within China. In such event, we may be required to withhold a ten percent (10%) PRC tax on any dividends paid to our investors that are non-resident enterprises. Our investors that are non-resident enterprises also may be responsible for paying PRC tax at a rate of ten percent (10%) on any gain realized from the sale or transfer of our common shares in certain circumstances. We would not, however, have an obligation to withhold PRC tax with respect to such gain.

Moreover, the State Administration of Taxation issued the *Notice on Strengthening the Administration of Enterprise Income Tax on Share Transfer Income of Non-Resident Enterprises No. 698* (“Circular 698”) on December 10, 2009, which reinforces taxation on transfer of non-listed shares by non-resident enterprises through overseas holding vehicles. Circular 698 applies retroactively and was deemed to be effective as of January 2008. Pursuant to Circular 698, where (i) a foreign investor who indirectly holds equity interest in a PRC resident enterprise through an offshore holding company indirectly transfers equity interests in a PRC resident enterprise by selling the shares of the offshore holding company, and (ii) the offshore holding company is located in a jurisdiction where the effective tax rate is lower than twelve and a half percent (12.5%) or where the offshore income of its residents is not taxable, the foreign investor is required to provide the tax authority in charge of that PRC resident enterprise with certain relevant information within thirty (30) days of the transfer. The tax authorities in charge will evaluate the offshore transaction for tax purposes. In the event that the tax authorities determine that such transfer is abusing forms of business organization and there is no reasonable commercial purpose other than avoidance of PRC enterprise income tax, the tax authorities will have the power to conduct a substance-over-form re-assessment of the nature of the equity transfer. A reasonable commercial purpose may be established when the overall offshore structure is set up to comply with the requirements of supervising authorities of international capital markets. If the State Administration of Taxation’s challenge of a transfer is successful, they will deny the existence of the offshore holding company that is used for tax planning purposes. Since Circular 698 has a brief history, there is uncertainty as to its application.

General PRC Government Approval

As a wholesale distributor and retailer of pharmaceutical products, we are subject to regulation and oversight by different levels of the food and drug administration in China, in particular, the SFDA. The *Drug Administration Law of the PRC*, as amended, provides the basic legal framework for the administration of the production and sale of pharmaceutical products in China and governs the manufacturing, distributing, packaging, pricing, and advertising of pharmaceutical products in China. The corresponding implementation regulations set out detailed rules with respect to the administration of pharmaceuticals in China. We are also subject to other PRC laws and regulations that are applicable to business operators, retailers, and foreign-invested companies.

Distribution of Pharmaceutical Products

A distributor of pharmaceutical products must obtain a distribution permit from the relevant provincial or designated municipal- or county-level SFDA. The grant of such permit is subject to an inspection of the distributor's facilities, warehouses, hygienic environment, quality control systems, personnel, and equipment. The distribution permit is valid for five (5) years, and the holder must apply for renewal of the permit within six (6) months prior to its expiration. In addition, a pharmaceutical product distributor needs to obtain a business license from the relevant administration for industry and commerce prior to commencing its business. All of our consolidated entities that engage in the retail pharmaceutical business have obtained necessary pharmaceutical distribution permits, and we do not expect to face any difficulties in renewing these permits and/or certifications.

In addition, under the *Supervision and Administration Rules on Pharmaceutical Product Distribution*, promulgated by the SFDA on January 31, 2007, and effective May 1, 2007, a pharmaceutical product distributor is responsible for its procurement and sales activities and is liable for the actions of its employees or agents in connection with their conduct of distribution on behalf of the distributor. A retail distributor of pharmaceutical products is not allowed to sell prescription pharmaceutical products or Tier A OTC pharmaceutical products listed in the national or provincial medical insurance catalogs without the presence of a certified in-store pharmacist. See " *Reimbursement under the National Medical Insurance Program* ."

Restrictions on Foreign Ownership of Wholesale or Retail Pharmaceutical Business in China

PRC regulations on foreign investment currently permit foreign companies to establish or invest in WFOEs or joint ventures that engage in wholesale or retail sales of pharmaceuticals in China. For retail sales, these regulations restrict the number and size of pharmacies that a foreign investor may establish. If a foreign investor owns more than thirty (30) stores that sell a variety of branded pharmaceutical products sourced from different suppliers, the foreign investor's ownership interests in the stores are limited to forty nine percent (49%).

In lieu of equity ownership, our WFOE, Jiuxin Management, has entered into contractual arrangements with Jiuzhou Pharmacy and the Key Personnel.

Good Supply Practice Standards

GSP standards regulate wholesale and retail pharmaceutical product distributors to ensure the quality of distribution of pharmaceutical products in China. All wholesale and retail pharmaceutical product distributors are required to apply for GSP certification within thirty (30) days after obtaining the drug distribution permit. The current applicable GSP standards require pharmaceutical product distributors to implement strict controls on the distribution of medicine products, including standards regarding staff qualifications, distribution premises, warehouses, inspection equipment and facilities, management, and quality control. Specifically, the warehouse must be able to store the pharmaceutical products at various required temperatures and humidity, and handle transport, warehouse entries, delivery, and billing by computerized logistics management systems. The GSP certificate is usually valid for five (5) years. Currently, Jiuzhou Pharmacy, and Jiuxin Medicine are all GSP certified.

Prescription Administration

Under the *Rules on Administration of Prescriptions* promulgated by the SFDA, effective May 1, 2007, doctors are required to include the chemical ingredients of the medicine they prescribe in their prescription and are not allowed to include brand names in their prescription. This regulation is designed to provide consumers with choices among different pharmaceutical products that contain the same chemical ingredients.

Advertisement of Pharmaceutical Products

Under the *Advertising Law of PRC*, the contents of an advertisement must be true, lawful, without falsehood, and must neither deceive nor mislead consumers. Accordingly, advertisement must be examined by the competent authority prior to its publication or broadcast through any form of media. In addition, advertisement of pharmaceutical products may only be based on a drug's approved indication of use statement, and may not contain any assurance of a product's efficiency, treatment efficiency, curative rate, or any other information prohibited by law. Advertisement for certain drugs should include an admonishment to seek a doctor's advice before purchasing and application. Advertising is prohibited for certain drugs such as anesthetics and psychotropic drugs.

To further prevent misleading advertising of pharmaceutical products, the SAIC and the SFDA jointly promulgated the *Standards for Examination and Publication of Advertisements of Pharmaceutical Products* and *Measures for Examination of Advertisement of Pharmaceutical Products* in March 2007. Under these regulations, an approval must be obtained from the provincial level of food and drug administration before a pharmaceutical product may be advertised. In addition, once approved, an advertisement's content may not be altered without further approval. Such approval, once obtained, is valid for one (1) year.

Product Liability and Consumers Protection

Product liability claims may arise if the products sold have any harmful effect on the consumers. The injured party may make a claim for damages or compensation. The *General Principles of the Civil Law of the PRC*, which became effective in January 1987, state that manufacturers and sellers of defective products causing property damage or injury shall incur civil liabilities for such damage or injuries.

The *Product Quality Law of the PRC* was enacted in 1993 and amended in 2000 to strengthen the quality control of products and protect consumers' rights and interests. Under this law, manufacturers and distributors who produce or sell defective products may be subject to confiscation of earnings from such sales, revocation of business licenses, imposition of fines, and, in severe circumstances, may be subject to criminal liability.

The *Administrative Measures for Drug Recalls* was issued by the SFDA in December 2007, and covers two (2) types of drug recalls, namely voluntary recalls and compulsory recalls. Under such regulation, wholesalers are obliged to assist drug manufacturers with any drug recall. In addition, a wholesaler must immediately cease to sell any drug that the wholesaler learns has any safety issues, and must immediately notify the manufacturer or its supplier as well as report the matter to the SFDA.

The *Law of the PRC on the Protection of the Rights and Interests of Consumers* was promulgated on October 31, 1993 and became effective on January 1, 1994 to protect consumers' rights when they purchase or use goods or services. All business operators must comply with this law when they manufacture or sell goods and/or provide services to customers. In extreme situations, pharmaceutical product manufacturers and distributors may be subject to criminal liability if their goods or services lead to the death or injuries of customers or other third parties.

The *Tort Law of the PRC* was promulgated on December 26, 2009 and came into force on July 1, 2010. The Tort Law provides that manufacturers and distributors who produce or sell defective products shall be responsible for the damage caused by the defective products.

Reimbursement under the National Medical Insurance Program

Eligible participants in the national medical insurance program, mainly consisting of urban residents, are entitled to purchase medicine when presenting their medical insurance cards in an authorized pharmacy, provided that the medicine they purchase has been included in the national or provincial medical insurance catalogs. Depending on relevant local regulations, authorized pharmacies can either (i) sell medicine on credit and obtain reimbursement from relevant government social security bureaus on a monthly basis, or (ii) receive payments from the participants at the

time of their purchases, and the participants in turn obtain reimbursement from relevant government social security bureaus.

Medicine included in the national and provincial medical insurance catalogs is divided into two (2) tiers. Purchases of Tier A pharmaceutical products are generally fully reimbursable, except that certain Tier A pharmaceutical products are only reimbursable to the extent the medicine are used specifically for the stated purposes in the medical insurance catalogs. Purchasers of Tier B pharmaceutical products, which are generally more expensive than those in Tier A, are required to make a certain percentage of co-payments, with the remaining amount being reimbursable. The percentage of reimbursement for Tier B OTC products varies in different regions in the PRC. Factors that affect the inclusion of medicine in the medical insurance catalogs include whether the medicine is consumed in large volumes and commonly prescribed for clinical use in China and whether it is considered to be important in meeting the basic healthcare needs of the general public.

China's Ministry of Labor and Social Security, together with other government authorities, has the power to determine every two (2) years which medicine are included in the national medical insurance catalog, under which of the two (2) tiers the included medicine falls, and whether an included medicine should be removed from the catalog.

Sales of Nutritional Supplements and other Food Products

A distributor of nutritional supplements and other food products must obtain a food circulation permit from its local Administration of Industry and Commerce. The grant of such permit is subject to an inspection of the distributor's facilities, warehouses, hygienic environment, quality control systems, personnel, and equipment. The food circulation permit is valid for three (3) years, and the holder must apply for renewal of the certificate within thirty (30) days prior to its expiration. Currently, Jiuxin Medicine, Jiuzhou Pharmacy, and our drugstores all hold a valid Food Circulation Permit, except for our Lin'an store and Ren'airu store, which do not sell food products and therefore does not required to hold such a permit. We are in the process of renewing the permits for two (2) stores that has expired in April 2016, and believe that there is no difficulty in renewing such permits.

Medical Practice

Healthcare providers in China are required to comply with many laws and regulations at the national and local government levels. The laws and regulations applicable to our medical practice include the following:

We must register with and maintain an operating license from the local public health authority for each clinic that we operate, each of which is subject to annual review by the public health authority;

The *Licensed Physician Act* requires that we only hire PRC licensed physicians;

All waste material from our clinics must be properly collected, sterilized, deposited, transported and disposed of, and we are required to keep records of the origin, type and amount of all waste materials that we generate for at least three (3) years;

We must have at least three (3) physicians, five (5) nurses and one (1) technician on staff at each clinic;
and

We must establish and follow protocols to prevent medical malpractice, which require us to: (i) insure that patients are adequately informed before they consent to medical operations or procedures; (ii) maintain complete medical records which are available for review by the patient, physicians and the courts; (iii) voluntarily report any event of malpractice to a local government agency; and (iv) support and justify the medical services we provide in any administrative investigation or litigation. If we fail to comply with applicable laws and regulations, we could suffer penalties, including the loss of our license to operate.

Interim Regulations on Administration of Sino-Foreign Joint Venture and Cooperative Medical Institutions

As per China's commitments to the World Trade Organization, "Foreign service suppliers are permitted to establish joint venture hospitals or clinics with local Chinese partners with quantitative limitations in line with China's needs. Foreign majority ownership is permitted." In accordance with the *Interim Regulations on Administration of Sino-Foreign Joint Venture and Cooperative Medical Institutions* issued jointly by the Ministry of Health ("MOH") and the Ministry of Commerce ("MOFCOM") in 2000, the Chinese party of Sino-foreign joint ventures and cooperative medical institutions shall hold no less than thirty percent (30%) of shares and legal rights or interest, which also mean foreign investors are allowed to hold a maximum stake of seventy percent (70%). Such regulations also specify that the establishment of Sino-foreign joint venture and cooperative medical institutions should be approved respectively by MOH and MOFCOM. In other words, foreigners are allowed to run hospitals or clinics in the form of equity or co-operative joint ventures with an equity interest of up to seventy percent (70%) with duration for co-operation of up to twenty (20) years.

Internet Pharmaceutical Sales

China's central government regulates Internet access, the distribution of online information and the conduct of online commerce through strict business licensing requirements and other government regulations. Companies which sell pharmaceutical products to consumers through the Internet are required to obtain: (1) a drug distribution permit; (2) an Internet pharmaceutical information provider qualification certificate, renewable every five (5) years; (3) an Internet pharmaceutical transaction service qualification certificate, renewable every five (5) years; (4) a value-added telecommunication operation permit; and (5) registration with the Administration of Information Industry. Internet pharmacies are not allowed to distribute prescription drugs. The websites that sell pharmaceutical products must ensure transaction security and enable the consumers to consult with licensed pharmacists. Also, an Internet-based business in China is required to obtain and maintain certain assets relevant to its business, such as delivery and storage facilities. Jiuzhou Pharmacy obtained all above-mentioned certificates and registrations and launched www.dada360.com in May 2010 and renewed the certificates in 2015. Quannuo Technology has been operating the website and providing software and technical supports since November 2010. Since December 2015, such online pharmacy operation function has been transferred to Jiuzhou Pharmacy after the sale of Quannuo Technology in November 2015. During the year ended March 31, 2018, the Company also sold pharmaceutical and other products via certain third-party platforms such as Tmall and JD.com.

TCM Manufacturing

The SFDA has adopted a non-mandatory licensing process for TCM manufacturers according to Good Agricultural Practice ("GAP") for Chinese Crude Drugs. Manufacturers who meet the government-set requirements will be granted a GAP certificate. Since we do not process the herbs that we harvest and the GAP certification is not mandatory, we have not applied for such certification, and currently have no plan of doing so.

Environmental Matters

Our drugstore and wholesale operations do not involve any activities subject to specific PRC environmental regulations. Our medical clinics are in compliance with applicable regulations regarding the administration of medical wastes, including collections, temperate storage, and packaging and labeling of medical wastes. Pursuant to such regulations, we contract with DadiWeikang Medical Wastes Disposal Center to dispose of all medical wastes generated by our clinics.

Principal Executive Office

Our principal executive office is located at 6th Floor, Hai Wai Hai Tongxin Mansion, Gong Shu District, Hangzhou City, Zhejiang Province, China. Our main telephone number is +86-571-8807-7078, and fax number is +86-571-8807-7108.

ITEM 1A. RISK FACTORS.

You should carefully consider the risks described below together with all of the other information included in this report before making an investment decision with regard to our securities. The statements contained in or incorporated into this report that are not historic facts are forward-looking statements that are subject to risks and uncertainties that could cause actual results to differ materially from those set forth in or implied by forward-looking statements. If any of the following risks actually occurs, our business, financial condition or results of operations could be harmed. In that case, the trading price of our common stock could decline, and you may lose all or part of your investment.

Risks Relating to Our Business in General

Future acquisitions are expected to be a part of our growth strategy, and could expose us to significant business risks.

We have grown our business, in part, through acquisitions of stores over the years. One of our strategies going forward is to continue this growth through acquisitions of more drugstores. However, we cannot provide assurance that we will be able to identify and secure suitable acquisition opportunities. Our ability to consummate and integrate effectively any future acquisitions on terms that are favorable to us may be limited by the number of attractive acquisition targets, internal demands on our resources and, to the extent necessary, our ability to obtain any necessary financing for larger acquisitions on terms that are satisfactory to us. Moreover, if an acquisition target is identified, the third parties with whom we seek to cooperate may not select us as a potential partner or we may not be able to enter into arrangements on commercially reasonable terms. The negotiation and completion of potential acquisitions, whether or not ultimately consummated, could also require significant diversion of management's time and resources and may potentially disrupt our existing business. Furthermore, we cannot provide any assurances that the expected synergies from future acquisitions will actually materialize. In addition, future acquisitions could result in the incurrence of additional indebtedness, costs, and contingent liabilities, causing us to significantly increase our interest expense, leverage and debt service requirements if we incur additional debt to pay for an acquisition or investment, issue common stock that would dilute our current shareholders' percentage ownership, or incur write-offs and restructuring and other related expenses. Future acquisitions may also expose us to potential risks, including risks associated with:

- the integration of new operations, services and personnel;
- unforeseen or hidden liabilities;
- the diversion of financial or other resources from our existing businesses;
- difficulties in entering markets or lines of business in which we have no or limited direct prior experience;
- our inability to generate sufficient revenue to recover costs and expenses of the acquisitions; and
- potential loss of, or harm to, relationships with employees or customers.

Any of the above could significantly disrupt our ability to manage our business and materially and adversely affect our business, financial condition and results of operations.

We face significant competition, and if we do not compete successfully against existing and new competitors, our revenue and profitability could be materially and adversely affected.

Both the drugstore, online pharmacy and wholesale pharmaceutical distribution industries in China are highly competitive, and we expect competition to intensify in the future. Our primary drugstore competitors include other drugstore chains and independent drugstores. Increasingly, we also face competition from discount stores, convenience stores and supermarkets as we expand our offering of non-drug convenience products and services. We compete for customers and revenue primarily on the basis of store location, merchandise selection, price, services offered, and our brand name. Our online pharmacy competitors include other online pharmaceutical vendors. As more large traditional drugstore chain companies entered into the online sales, we face competition ranging from prices to service. Our primary wholesale competitors include regional and national players. In addition, we may be subject to additional competition from new entrants to both industries in China. We could also face increased competition from foreign companies if the Chinese government removes the restrictions on the entry of foreign companies into these industries.

Some of our larger competitors may enjoy competitive advantages, such as:

- greater financial and other resources;
- larger variety of products;
- more extensive and advanced supply chain management systems;
- greater pricing flexibility;
- larger economies of scale and purchasing power;
- more extensive advertising and marketing efforts;
- greater knowledge of local market conditions;
- stronger brand recognition; and
- larger sales and distribution networks.

As a result, we may be unable to offer products similar to, or more desirable than, those offered by our competitors, market our products as effectively as our competitors, or otherwise respond successfully to competitive pressures. As competition increases in the markets in which we operate, a significant increase in general pricing pressures could occur, which could require us to reevaluate our pricing structures to remain competitive. Our competitors may be able to offer larger discounts on competing products, and we may not be able to profitably match those discounts. Furthermore, our competitors may offer products that are more attractive to our customers or that render our products uncompetitive. In addition, the timing of the introduction of competing products into the market could affect the market acceptance and market share of our products. Our failure to compete successfully could materially and adversely affect our business, financial condition, results of operation, and prospects.

Changes in economic conditions and consumer confidence in China may influence the drugstore industry, consumer preferences and spending patterns.

Our business and revenue growth primarily depend on the size of the pharmaceutical market in China. As a result, our revenue and profitability may be negatively affected by changes in national, regional or local economic conditions and consumer confidence in China. In particular, as we focus on our expansion of pharmacies in metropolitan markets, where living standards and consumer purchasing power are relatively high, we are especially susceptible to changes in economic conditions, consumer confidence and customer preferences of the urban Chinese population. External factors beyond our control that affect consumer confidence include unemployment rates, levels of personal disposable income, national, regional or local economic conditions, and acts of war or terrorism. Changes in economic conditions and consumer confidence could adversely affect consumer preferences, purchasing power and spending patterns. A decrease in overall consumer spending as a result of changes in economic conditions could adversely affect our front-end and pharmacy sales and negatively impact our profitability. In addition, acts of war or terrorism may cause damage to our facilities, disrupt the supply of the products and services we offer in our stores, or adversely impact consumer demand. Any of these factors could have a material adverse effect on our business, financial condition and results of operations.

We may not be able to timely identify or otherwise effectively respond to changing customer preferences, and we may fail to optimize our product offering and inventory position.

The pharmaceutical industry in China is rapidly evolving and is subject to rapidly changing customer preferences that are difficult to predict. Our success depends on our ability to anticipate and identify customer preferences, and adapt our product selection to meet these preferences. In particular, we must optimize our product selection and inventory positions based on sales trends. We cannot provide assurance that our product selection, especially our selection of nutritional supplements and food products, will accurately reflect customer preferences at any given time. If we fail to accurately anticipate either the market for our products or customers' purchasing habits or fail to respond to customers' changing preferences promptly and effectively, we may not be able to adapt our product selection to customer preferences or make appropriate adjustments to our inventory positions, which could significantly reduce our revenue and have a material adverse effect on our business, financial condition and results of operations.

Our success depends on our ability to establish effective advertising, marketing and promotional programs.

Our success depends on our ability to establish effective advertising, marketing and promotional programs, including pricing strategies implemented in response to competitive pressures and/or to drive demand for our products. Our advertisements are designed to promote our brand, our corporate image and the prices of products available for sale in our stores. Our pricing strategies and value propositions must be appropriate for our target customers. If we are not able to maintain and increase the awareness of our pharmacy's brand and the products and services we provide, we may not be able to attract and retain customers and our reputation may also suffer. We expect to incur substantial expenses in our marketing and promotional efforts to both attract and retain customers. However, our marketing and promotional activities may be less successful than we anticipate, and may not be effective at building our brand awareness and customer base. In addition, the government may impose restrictions on how marketing and promotional activities can be conducted. We cannot provide assurance that our current and proposed budget for marketing activities will be adequate to support our future growth. Failure to successfully execute our advertising, marketing and promotional programs may result in material decreases in our revenue and profitability.

Our ability to grow our business may be constrained by our inability to find suitable new store locations at acceptable prices or by the expiration of our current leases.

Our ability to grow our business may be constrained if suitable new store locations cannot be identified with lease terms or purchase prices that are acceptable to us. We compete with other retailers and businesses for suitable locations for our stores. Local land use and other regulations applicable to the types of stores we desire to construct may impact our ability to find suitable locations and influence the cost of constructing our stores. The expiration of leases at existing store locations may adversely affect us if the renewal terms of those leases are unacceptable to us and we are forced to close or relocate stores. Furthermore, changing local demographics at existing store locations could materially and adversely affect revenue and profitability levels at those stores, and overall our business, financial condition, results of operation, and prospects.

We have significant cash deposits with our suppliers and landlords in order to obtain and maintain our inventory and maintain and establish store locations, which we may not be able to recover in the event of bankruptcy by our suppliers or landlords or other events beyond our control.

Our ability to obtain products and maintain inventory at, and to maintain and establish leases for, our pharmacies, is dependent upon our ability to post and maintain significant cash deposits with our suppliers and landlords. Many vendors in China are unwilling to extend credit terms and instead require cash deposits, and landlords may require twelve (12) months or longer of cash deposit as security. At March 31, 2018, we had approximately \$6.5 million in deposits with suppliers and approximately \$4.5 million in deposits with landlords for our pharmacies. If we are unable or unwilling to establish such advances and deposits, our ability to generate sales and expand our business could be adversely affected. In general, we expect the amounts required for advances and deposits to increase as we undertake our expansion plans, complete store openings and expand our business through acquisitions or otherwise. We do not generally receive interest on the deposits made to suppliers or landlords, and such deposits are subject to loss as a result of the creditworthiness or bankruptcy of the party who holds our funds, as well as the risk from any illegal acts associated with the third party, such as conversion, fraud, theft or dishonesty. If these circumstances were to arise, we could find it difficult or impossible, due to the unpredictability of legal proceedings in China, to recover all or a portion of the amount on deposit with our vendors or landlords.

If we are unable to optimize management of our procurement and distribution activities, we may be unable to meet customer demand while increasing the burden on managing our supply chain.

Since May 2011, we have been using Jiuxin Medicine's facility as our distribution center for both our retail and wholesale businesses. Starting from March 31, 2018, we outsourced our logistic service to Astro Boy Cloud Pan (Hangzhou) Storage and Logistic Co. Ltd ("Astro Boy Logistic"). As a result, Jiuxin Medicine's warehouse lease has been terminated. Astro Boy Logistic provides us with approximately 14,000 square meters facility located approximately eighteen (18) miles from our headquarters, which served as our central distribution center. Astro Boy Logistic's staff and vehicles make regular deliveries to our pharmacies and wholesale customers. Our ability to meet customer demand may be significantly limited if we do not successfully and efficiently conduct our distribution activities, or if Astro Boy Logistic's facility is destroyed or shut down for any reason, including as the result of a natural disaster. Any disruption in the operation of our distribution could result in higher costs or longer lead times associated with distributing our products. Since it is difficult to predict accurate sales volume in our industry, we may be unable to optimize our distribution activities, which may result in excess or insufficient inventory, warehousing, fulfillment or distribution capacity. Furthermore, failure to effectively control product damage during the distribution process could decrease our operating margins and reduce our profitability.

All product procurement is handled through our corporate headquarters. Such centralization is intended to reduce cost of goods sold as a result of volume purchase benefits. However, we may be less successful than anticipated in achieving these volume purchase benefits. In addition, such centralization is expected to increase the complexity of tracking inventory and could place additional burdens on the management of our supply chain. If we cannot successfully reduce our costs through centralizing procurement, our profitability and prospects could be materially and adversely affected.

Failure to maintain optimal inventory levels could increase our inventory holding costs or cause us to lose sales, either of which could have a material adverse effect on our business, financial condition and results of operations.

We need to maintain sufficient inventory levels to operate both of our retail and wholesale businesses successfully as well as meet customer expectations. However, we must also guard against the risk of accumulating excess inventory. We are exposed to inventory risks as a result of rapid changes in product life cycles, changing consumer preferences, uncertainty of the success of product launches, seasonality, and manufacturer backorders and other vendor-related problems. We cannot provide assurance that we can accurately predict these trends and events and avoid over-stocking or under-stocking products. In addition, demand for products could change significantly between the time product inventory is ordered and the time it is available for sale.

When we begin selling a new product, it is particularly difficult to forecast product demand accurately. The purchase of certain types of inventory may require significant lead-time. As we carry a broad selection of products and maintain significant inventory levels for a substantial portion of our merchandise, we may be unable to sell such inventory in sufficient quantities or during the relevant selling seasons. Carrying excess inventory could increase our inventory holding costs, and failure to have inventory in stock when a customer orders or purchases it could cause us to lose that order or that customer, either of which could have a material adverse effect on our business, financial condition and results of operations.

We rely on computer software and hardware systems in managing our operations, the capacity of which may restrict our growth and the failure of which could adversely affect our business, financial condition and results of operations.

We are dependent upon our integrated information management system to monitor daily operations of our retail and wholesale businesses, and to maintain accurate and up-to-date operating and financial data for the compilation of management information. In addition, we rely on our computer hardware and network for the storage, delivery and transmission of the data of our retail and wholesale systems. If the capacity of our computer software and hardware systems fails to meet the increasing needs of our expanding operations, our ability to grow may be constrained. Furthermore, any system failure which causes interruptions to the input, retrieval and transmission of data or increase in the service time could disrupt our normal operations. Although we believe that our computer software and hardware systems are current and that our disaster recovery plan is adequate in handling their failure, we cannot provide assurance that we can effectively carry out this disaster recovery plan and that we will be able to restore our operation within a sufficiently short time frame to avoid our business being disrupted. Furthermore, our systems are subject to damage or interruption from power outages, computer and telecommunications failures, computer viruses, security breaches, vandalism, natural disasters, catastrophic events and human error, and our disaster recovery planning cannot account for all eventualities. If any of our computer software and/or hardware systems are damaged, fail to function properly or otherwise become unavailable, we may incur substantial costs to repair or replace them, and may experience loss or corruption of critical data and interruptions or delays in our ability to perform critical functions. Due to the limited coverage of all business interruption insurance offered in China, we do not have any business interruption insurance and, as a result, any business disruption or natural disaster could severely disrupt our business and operations and, in turn, significantly decrease our revenue and profitability.

We depend substantially on the continuing efforts of the Key Personnel, and our business and prospects may be severely disrupted if we lose their services.

Our future success is dependent on the continued services of the Key Personnel but we do not maintain key-man insurance. If we lose the services of any one of the Key Personnel, we may not be able to locate suitable or qualified replacements, which could severely disrupt our business and prospects. Each of the Key Personnel has entered into a confidentiality and non-competition agreement with us. However, if any disputes arise between us and the Key Personnel, we cannot provide assurance, in light of uncertainties associated with the PRC legal system, that any of these agreements could be enforced in China, the jurisdiction in which the Key Personnel reside and hold some of their assets. See "Risks Related to Doing Business in China - You may experience difficulties in effecting service of legal process, enforcing foreign judgments or bringing original actions in China based on United States or other foreign laws against us or our management."

We depend on the continued service of, and on the ability to attract, motivate and retain a sufficient number of qualified and skilled personnel for our business.

The implementation of our business strategy and our future success also depend in large part on our continued ability to attract and retain highly qualified and skilled personnel. We cannot provide assurance that we will be able to attract, hire and retain sufficient numbers of skilled personnel necessary to continue to develop and grow our business. We face competition for personnel from both retail and wholesale pharmaceutical distribution operators. This competition could require us to offer higher compensation and other benefits in order to attract and retain qualified individuals, which could materially and adversely affect our financial condition and results of operations. On the other hand, we may be unable to attract or retain the personnel required to achieve our business objectives, and that failure could severely disrupt our business and prospects. The process of hiring suitably qualified personnel is often lengthy. If our recruitment and retention efforts are unsuccessful in the future, it may be more difficult for us to execute our business strategy.

Our retail and wholesale operations require a number of permits and licenses in order to carry on their business.

We are required to obtain certain permits and licenses from various PRC governmental authorities, including a Drug Distribution Permit and a GSP certification. We are also required to obtain food hygiene certificates for the distribution of nutritional supplements and food products. We cannot provide any assurance that we can maintain all required licenses, permits and certifications to carry on our business at all times, and from time to time we may have not been in the past, or may not be in the future, in compliance with all such required licenses, permits and certifications. Moreover, these licenses, permits and certifications are subject to periodic renewal and/or reassessment by the relevant PRC governmental authorities and the standards of such renewal or reassessment may change from time to time. We intend to apply for renewal of these licenses, permits and certifications when required by applicable

laws and regulations. Any failure by us to obtain and maintain all licenses, permits and certifications necessary to carry on our business at any time could have a material adverse effect on our business, financial condition and results of operations. In addition, any inability to renew any of these licenses, permits and certifications could severely disrupt our business, and prevent us from continuing to carry on our business. Any changes in the standards used by governmental authorities in considering whether to renew or reassess our business licenses, permits and certifications, as well as any enactment of new regulations that may restrict the conduct of our business, may also decrease our revenue and/or increase our costs, materially reducing our profitability and prospects. Furthermore, if the interpretation or implementation of existing laws and regulations changes or if new regulations come into effect requiring us to obtain any additional licenses, permits or certifications that were previously not required to operate our existing businesses, we cannot provide assurance that we can successfully obtain such licenses, permits or certifications.

We may need additional capital, and the sale of equity securities could result in dilution to our stockholders, while debts may require us to make covenants restricting how we operate.

We believe that the aggregate amount of our current cash, anticipated cash flow from operations, available borrowings under our existing bank facilities, and personal loans from our principal shareholders should be sufficient to meet our anticipated cash needs for the near future. We may, however, require additional cash resources due to changed business conditions or other future developments. If our resources are insufficient to satisfy our cash requirements, we may seek to sell additional equity or debt securities or obtain credit facilities. The sale of additional equity securities could result in a dilution to our stockholders. We cannot guarantee that we will be able to obtain any additional financing on terms that are acceptable to us, or at all. Even if we are able to obtain any requisite financing, the incurrence of additional indebtedness would result in increased debt service obligations, and could result in further operating and financing covenants that would restrict our freedom to operate our business, such as conditions that:

limit our ability to pay dividends or require us to seek consent for the payment of dividends;

increase our vulnerability to general adverse economic and industry conditions;

require us to dedicate a portion of our cash flow from operations to payments on our debt, thereby reducing the availability of our cash flow to fund capital expenditures, working capital and other general corporate purposes; and

limit our flexibility in planning for, or reacting to, changes in our business and our industry.

Risks Relating to Our Pharmacy Operations

Our brand names, trade secrets and other intellectual property are valuable assets. If we are unable to protect them from infringement, our business and prospects may be harmed.

We consider our pharmacy brand names to be valuable assets. We may be unable to prevent third parties from using such brand names without authorization, which may adversely affect our business and reputation, including the perceived quality and reliability of our products and services. We have five (5) registered trademarks. We also own three (3) domain names that we actively use in our business.

We rely on trade secrets to protect our know-how and other proprietary information, including pricing, purchasing, promotional strategies, customer lists and/or suppliers lists. As a result, as a condition of employment, our employees are required to sign employment agreements that contain confidentiality provisions. However, trade secrets are difficult to protect. While we believe we use reasonable efforts to protect our trade secrets, our employees, consultants, contractors or advisors may unintentionally or willfully disclose our information to competitors. In addition, confidentiality agreements executed by the foregoing persons may not be enforceable or provide meaningful protection for our trade secrets or other proprietary information in the event of unauthorized use or disclosure.

If we were to enforce a claim that a third party had illegally obtained and was using our trade secrets, such efforts could be expensive and time-consuming, and the outcome unpredictable. In addition, if our competitors independently develop information that is equivalent to our trade secrets or other proprietary information, we have little recourse to enforce our rights, and our business and prospects could be harmed.

Litigation may be necessary in the future to enforce our intellectual property rights or to determine the validity and scope of the intellectual property rights of others. However, since the validity, enforceability and scope of protection of intellectual property rights in the PRC are uncertain and still evolving, we may not be successful in prosecuting these cases. In addition, any litigation or proceeding or other efforts to protect our intellectual property rights could result in substantial costs and diversion of our resources, and could seriously harm our business and operating results. Furthermore, the degree of future protection of our proprietary rights is uncertain and may not adequately protect our rights or permit us to gain or keep our competitive advantage. If we are unable to protect our trade names, trade secrets and other proprietary information from infringement, our business, financial condition and results of operations may be materially and adversely affected.

We may be exposed to intellectual property infringement and other claims by third parties which, if successful, could disrupt our business and have a material adverse effect on our financial condition and results of operations.

Our success depends, in large part, on our ability to use our proprietary information and know-how without infringing third party intellectual property rights. As litigation becomes more common in China, we face a higher risk of being the subject of claims for intellectual property infringement, invalidity or indemnification relating to other parties' proprietary rights. Our current or potential competitors, many of whom have substantial resources, may have or may obtain intellectual property protection that will prevent, limit or interfere with our ability to conduct our business in China. Moreover, the defense of intellectual property suits, including trademark infringement suits and related legal and administrative proceedings, can be both costly and time consuming and may significantly divert the efforts and resources of our management personnel. Furthermore, an adverse determination in any such litigation or proceeding to which we may become a party could cause us to:

pay damage awards;

seek licenses from third parties;

pay ongoing royalties;

redesign our product offerings; or

be restricted by injunctions,

Each of which could effectively prevent us from pursuing some or all of our business and result in our customers or potential customers deferring or limiting their purchase from our stores, which could have a material adverse effect on our financial condition and results of operations.

The continued penetration of counterfeit products into the pharmaceutical market in China may damage our reputation and have a material adverse effect on our business, financial condition, results of operations and prospects.

There has been continued penetration of counterfeit products into the pharmaceutical market in China. Counterfeit products are generally sold at lower prices than their authentic counterparts due to their low production costs, and in some cases are very similar in appearance to their authentic counterparts. Counterfeit pharmaceuticals may or may not have the same chemical content as their authentic counterparts, and are typically manufactured without proper licenses or approvals as well as fraudulently mislabeled with respect to their content and/or manufacturer. Although China's central government has been increasingly active in combating counterfeit pharmaceutical and other products, China does not yet have effective regulation control or an enforcement system against counterfeit pharmaceutical products. Although we have implemented a series of quality control procedures in our procurement process, we cannot provide assurance that we may not be inadvertently selling counterfeit pharmaceutical products. Any unintentional sale of counterfeit products may subject us to negative publicity, fines and/or other administrative penalties, or may even result in litigation against us. Moreover, the increased distribution of counterfeit products and other products in recent years may reinforce the negative image of drug distributors among consumers in China. The continued proliferation of counterfeit products in China could have a material adverse effect on our business financial condition, and results of operation.

As a distributor of pharmaceutical and other healthcare products, we are exposed to inherent risks relating to product liability and personal injury claims.

Distributors of pharmaceutical and other healthcare products are exposed to risks inherent in the packaging and distribution of such products. Such risks include unintentional distribution of counterfeit, mislabeled or contaminated drugs, and, with respect to our pharmacies, improper filling of prescriptions, labeling of prescriptions and adequacy of warnings. Errors in the packaging or dispensing of pharmaceuticals could lead to serious injury or death. Furthermore, the applicable PRC laws, rules and regulations require our in-store pharmacists to offer counseling to our customers, without additional charge, about medication, dosage, delivery systems, common side effects, and other information the in-store pharmacists deem significant. Our in-store pharmacists sometimes also have a duty to warn customers regarding any potential negative effects of a prescription drug if the warning could reduce or negate these effects, and we may be liable for claims arising from any advice given by our in-store pharmacists. Product liability or personal injury claims may be asserted against us with respect to any of the products or pharmaceuticals we sell or services we provide, and we may be required to pay for substantial monetary damages for any successful product liability or personal injury claim against us. We may, however, in product liability claims, have the right under applicable PRC laws, rules and regulations to recover from the relevant manufacturer any compensation we paid to our customers in connection with such claim. Even if we successfully defend ourselves against this type of claim, we could be required to spend significant management, financial and other resources in the process, which could disrupt our business. Our reputation and our brand names may also suffer as a result of any product liability or personal injury claims against us. Like many other similar companies in China, we do not carry product liability insurance. A product recall or damage to our reputation in the event of a product liability or personal injury claim or judgment against us could have a material adverse effect on our business, financial condition and results of operations.

We may be subject to fines and penalties if we fail to comply with the applicable PRC laws and regulations governing sales of medicines under China's National Medical Insurance Program.

Eligible participants in China's national medical insurance program, mainly consisting of urban residents in China, are entitled to buy medicines using their medical insurance cards from an authorized pharmacy, provided that the medicines they purchase have been included in the national or provincial medical insurance catalogs. The pharmacy, in turn, obtains reimbursement from the relevant government social security bureaus. Moreover, the applicable PRC laws, rules and regulations prohibit pharmacies from selling goods other than pre-approved medicines when purchases are made with medical insurance cards. We have established procedures to prohibit our drugstores from selling unauthorized goods to customers who make purchases with medical insurance cards. However, we cannot provide assurance that those procedures will be strictly followed by all of our employees in all of our stores.

Risks Relating to Our Medical Services

If we do not attract and retain qualified physicians and other medical personnel, our ability to provide medical services would be adversely affected.

The success of our medical services will, in part, be dependent upon the number and quality of doctors, nurses and other medical support personnel that we employ and our ability to maintain good relations with them. Our medical staff may terminate their employment with us at any time. If we are unable to successfully maintain good relationships with them, our ability to provide medical services may be adversely affected.

The provision of medical services is heavily regulated in the PRC and failure to comply with those regulations could result in penalties, loss of licensure, additional compliance costs or other adverse consequences.

Healthcare providers in China, as in most other populous countries, are required to comply with many laws and regulations at the national and local government levels. These laws and regulations relate to: licensing; the conduct of operations; the ownership of facilities; the addition of facilities and services; advertising; confidentiality, maintenance and security issues associated with medical records; billing for services; and prices for services. If we fail to comply with applicable laws and regulations, we could suffer penalties, including the loss of our licenses to operate. In addition, further healthcare legislative reform is likely, and could materially adversely affect our business and results of operations in the event that we do not comply or if the cost of compliance is expensive. The above list of certain regulated areas is not exhaustive, and it is not possible to anticipate the exact nature of future healthcare legislative reform in China. Depending on the priorities determined by the Chinese Ministry of Health, the political climate at any given time, the continued development of the Chinese healthcare system and many other factors, future legislative reforms may be highly diverse, including stringent infection control policies, improved rural healthcare facilities, increased regulation of the distribution of pharmaceuticals, and numerous other policy matters. Consequently, the implications of these future reforms could result in penalties, loss of licensure, additional compliance costs or other adverse consequences we cannot foresee at the present time.

As a provider of medical services, we are exposed to inherent risks relating to malpractice claims.

As a provider of medical services, any misdiagnosis or improper treatment may result in negative publicity regarding us or our services, which would harm our reputation. If we are found liable for malpractice, we could be required to pay substantial monetary damages. Furthermore, even if we successfully defend ourselves against a malpractice claim, we could be required to spend significant management, financial and other resources in the process, which could disrupt our business, and our reputation and brand name may also suffer. Since malpractice claims are not common in China, we do not carry malpractice insurance. As a result, any imposition of malpractice liability could materially harm our business, financial condition and results of operations.

We face competition that could adversely affect our results of operations.

Our clinics compete with a large number and variety of healthcare facilities in their respective markets. There are numerous government-run and private hospitals and clinics available to the general populace. There can be no assurance that these or other clinics, hospitals or other facilities will not commence or expand such operations, which would increase their competitive position. Furthermore, there can be no assurance that a healthcare organization that having greater resources in the provision or management of healthcare services will not decide to engage in operations similar to those being conducted by us in Hangzhou.

Risks Related to Our Herb Farming

Our herb farming business is subject to the volatility of prices for raw TCM herbs.

We currently planted ginkgo trees in our leased farm land. However, in the future, we may continue to cultivate and sell certain herbs in bulk to a third-party vendor, based on local market prices primarily determined by TCM manufacturers and trading companies. Such market prices have increased significantly in recent years in response to changes in the supply of and demand for raw herbs, market uncertainty and a variety of additional factors that are beyond our control, including inflation, changes in weather, disease outbreaks, domestic government regulation, market speculation and overall economic conditions. There can be no assurance that market prices, which historically have fluctuated widely, will continue to increase or remain stable, and any future declines in prices may negatively impact the viability of our herb farming business.

Unforeseen and severe weather can reduce cultivation activities and lead to a decrease in anticipated harvest.

Seasonal climate change and weather variations such as levels of rainfall and temperature may, among other things, affect the quality, overall supply and availability of raw herbs. Sustained adverse weather conditions in Zhejiang Province in general and in Lin'an in particular where our herbs are planted, such as rain, extreme cold or snow, could disrupt or curtail cultivation activities. This in turn could reduce our anticipated harvest yields, delay the timing of our anticipated harvest and distribution, and negatively affect the quality of our harvest. In addition, natural disasters such as fires, earthquakes, snowstorms, floods or droughts, or natural conditions such as crop disease, pests or soil erosion, may also negatively impact our cultivation and harvest.

In addition, the actual climatic conditions of Zhejiang Province and of Lin'an in particular may not conform to historical patterns and may be affected by variations in weather patterns, including any potential impact of climate change. The effects of climate change may produce more unpredictable weather events that may adversely affect our ability to cultivate and harvest successfully.

The occurrence of any of these may materially harm our herb farming business.

We have limited control over the availability and the quality of the local farmers with whom we cooperate because we do not employ them directly.

We rely on local farmers to farm and harvest our herbs, but do not employ them directly. Instead, they are recruited and employed by the local villagers' committees with whom we negotiate. We have limited control over the availability and the quality of this labor force. A shortage of suitable laborers may adversely affect our harvest yields.

Risks Related to Our Online Sales

We rely on computer software and hardware systems in managing our online sales, the capacity of which may restrict our growth and the failure of which could adversely affect our business, financial condition and results of operations.

We are dependent upon our electronic commerce system to carry out our online sales. Any system failure which causes interruptions to the input, retrieval and transmission of data, or increases in service time could disrupt our normal operations. Although we believe we have a disaster recovery plan that can handle the failure of our computer software and hardware systems, we cannot provide assurance that we can effectively carry out this disaster recovery plan and that we will be able to restore our operation within a sufficiently short time frame to avoid disruption to our business. Any failure in our computer software and/or hardware systems could have a material adverse effect on our business, financial condition and results of operations. In addition, if the capacity of our computer software and hardware systems fails to meet the increasing needs of our operations, our ability to grow may be constrained.

Our online business decreased in the fiscal year ended March 31, 2018 and we cannot assure our efforts for alternative vendors will result in the increase in revenues from online pharmacy in the coming years.

Our online pharmacy sales decreased by approximately \$3,256,066, or 21.2% for the year ended March 31, 2018, as compared to the year ended March 31, 2017. The decrease was primarily caused by the decline in business via e-commerce platforms. In order to increase the popularity of our products, we have made considerable efforts to identify popular products that can drive sales, while keeping a close watch on cost. However, due to the suspension of OTC drug sales on e-commerce platforms such as Alibaba in the second quarter of fiscal year 2017 by the China Food and Drug Administration (“CFDA”), our sales via these e-commerce platforms have been curtailed. As a result, our sales via these e-commerce platforms decreased by 25.7% period over period. We are adding more non-medical health products such as nutritional supplements into our sales menu to counteract the decline in sale of OTC drug category. For instance, we are opening a dendrobium candidum flagship store at Tmall with a local popular brand. The brand has a large customer base in Hangzhou. However, there is no assurance our efforts will lead in the increase in our online sales.

If our online business fails to obtain and maintain the requisite assets, licenses, qualified personnel and approvals required under the complex regulatory environment for Internet-based businesses in China, the business prospects for such business may be materially and adversely affected.

Internet-based businesses in China are highly regulated by China’s central government, and numerous regulatory authorities are empowered to issue and implement regulations governing various aspects of these businesses. Our online business is operated by our PRC subsidiary, Jiuzhou Pharmacy, which is required to obtain and maintain certain assets relevant to its business, such as computers and other electrical equipment, as well as applicable licenses or approvals from different regulatory authorities. These assets and licenses are essential to the operation of an e-commerce business and are generally subject to annual review by the relevant governmental authorities. Furthermore, we may be required to obtain additional licenses. If we fail to obtain or maintain any of the required assets, licenses or approvals, our Internet business may be deemed illegal and it may be subject to various penalties, such as confiscation of illegal income, fines, and/or the discontinuation or restriction of its operations. Any such disruption may materially and adversely affect the prospects of our online business.

Risks Related to Our Corporate Structure

Chinese regulations limit foreign ownership of any pharmacy operator with thirty (30) or more stores, and limit foreign ownership of medical clinics to Sino-foreign joint venture. The entities that operate our pharmacies and clinics are controlled by us through contractual arrangements. The validity of such contractual arrangements is uncertain. If the Chinese government determines that these contractual arrangements do not comply with applicable regulations, we could be subject to severe penalties and our business could be adversely affected. In

addition, changes in the relevant Chinese laws and regulations may materially and adversely affect our business.

Current PRC regulations limit foreign ownership of a pharmacy operator to forty nine percent (49%) if such operator owns interests in thirty (30) or more drugstores in China that sell a variety of branded pharmaceutical products sourced from different suppliers. Since we do not own any equity interests in Jiuzhou Pharmacy (or its subsidiary Jiuxin Medicine), but control them through contractual arrangements, we do not believe that the regulations limiting foreign ownership apply to us even if Jiuzhou Pharmacy or Jiuxin Medicine expands beyond thirty (30) stores. In fact, Jiuzhou Pharmacy has expanded to one hundred and twenty-two (122) stores as of March 31, 2018.

Similarly, PRC regulations restrict foreign ownership of medical practice in China to Sino-foreign joint ventures. Since we do not have any actual equity interest in Jiuzhou Clinic or Jiuzhou Service, but control these entities through contractual arrangements, we do not believe that such PRC regulations are applicable to us or our structure.

There are, however, uncertainties regarding the interpretation and application of PRC laws, rules and regulations, including but not limited to the laws, rules and regulations governing the validity and enforcement of our contractual arrangements. Although the structures for operating our business in China (including our corporate structure and contractual arrangements with Jiuzhou Pharmacy, Jiuzhou Clinic, Jiuzhou Service and the Key Personnel) comply with all applicable PRC laws, rules and regulations, and do not violate, breach, contravene or otherwise conflict with any applicable PRC laws, rules or regulations, we cannot provide assurance that a regulatory authority will not determine that our corporate structure and contractual arrangements violate PRC laws, rules or regulations. If any such authority determines that our contractual arrangements are in violation of applicable PRC laws, rules or regulations, our contractual arrangements may become invalid or unenforceable, and we may not be able to consolidate the operations of HJ Group with our results of operations. In addition, new PRC laws, rules and regulations may be introduced from time to time to impose additional requirements that may be applicable to our contractual arrangements. For example, pursuant to the PRC Property Rights Law that became effective on October 1, 2007 (the "Property Law"), the pledge of any equity interests of a PRC private entity shall become effective once it is duly registered with the local branches of the SAIC. Following the promulgation of the Property Law, the SAIC further issued the *Administrative Measures for Registrations of Share Pledge* on September 1, 2008, which provided detailed procedural guidance for the local SAIC offices to handle the registrations of share pledge. The Equity Pledge Agreement that forms a part of the contractual arrangements creates a legally binding obligation on the parties upon the execution date; however, the pledge established under such agreement does not become effective until due registration with the local SAIC office. On May 18, 2010, registration of the pledged equity interests in Jiuzhou Pharmacy was completed.

The Chinese government has broad discretion in dealing with violations of laws and regulations, including levying fines, revoking business and other licenses, and requiring actions necessary for compliance. In particular, licenses and permits issued or granted to us by the relevant governmental bodies may be revoked at a later time by higher regulatory bodies. We cannot predict the effect of the interpretation of existing or new Chinese laws or regulations on our businesses. We cannot provide assurance that our current ownership and operating structure will not be found in violation of any current or future Chinese laws or regulations. As a result, we may be subject to sanctions, including fines, and could be required to restructure our operations or cease the provision of certain services. Any of these or similar actions could significantly disrupt our business operations or restrict us from conducting a substantial portion of our business operations, which could materially and adversely affect our business, financial condition and results of operations.

If we are determined to be in violation of any existing or future PRC laws, rules or regulations, or fail to obtain or maintain any of the required governmental permits or approvals, the relevant PRC regulatory authorities would have broad discretion in dealing with such violations, including:

revoking the business and operating licenses of the HJ Group entities;

discontinuing or restricting the operations of the HJ Group entities;

imposing conditions or requirements with which we or the HJ Group entities may not be able to comply;

requiring us or the HJ Group entities to restructure the relevant ownership structure or operations; and/or imposing fines.

The imposition of any of these penalties would severely disrupt our ability to conduct business and have a material adverse effect on our financial condition, results of operations and prospects.

We may be adversely affected by complexity, uncertainties and changes in Chinese regulation of drugstores and the practice of medicine.

The Chinese government regulates drugstores and the practice of medicine, including foreign ownership and requirements for licenses and permits. These laws and regulations are relatively new and evolving, and their interpretation and enforcement involve significant uncertainty. As a result, in certain circumstances it may be difficult to determine what actions or omissions may be deemed to be a violation of applicable laws and regulations.

The interpretation and application of existing Chinese laws, regulations and policies and possible new laws, regulations or policies have created substantial uncertainties regarding the legality of existing and future foreign investments in, and the businesses and activities of, pharmaceutical businesses in China, including our business. We currently only have contractual control over the HJ Group entities, and do not own them due to the restrictions on foreign ownership of such companies. However, changes to laws in the PRC may force us to restructure our ownership structure or our operations, which would severely disrupt our ability to conduct business and have a material adverse effect on our financial condition, results of operations and prospects.

Uncertainties relating to the regulation of drugstores and medical practice in China also extend to evolving licensing practices, which means that permits, licenses or operations at our company may be subject to challenge. This may disrupt our business or subject us to sanctions, requirements to increase capital, or other conditions or enforcement. In turn, this could compromise enforceability of related contractual arrangements, or have other harmful effects on us.

Our contractual arrangements with HJ Group and the Key Personnel may not be as effective in providing control over these entities as direct ownership.

We have no equity ownership interest in HJ Group, and rely on contractual arrangements to control and operate the HJ Group companies and their businesses. These contractual arrangements may not be as effective in providing control over these companies as direct ownership. For example, any one of them could fail to take actions required for our business despite its contractual obligation to do so. Under such circumstances, we may have to rely on legal remedies under Chinese law, which may not be effective in providing us any relief. In addition, we cannot provide assurance that the Key Personnel will act in our best interests.

Since we rely on contractual arrangements to control HJ Group and for substantially all of our revenue, the termination of such agreements will severely and detrimentally affect our continuing business viability under our current corporate structure.

Since we do not own equity interests of HJ Group, the termination of our contractual arrangements with them would sever our ability to continue receiving payments from them under our current holding company structure. We cannot provide assurance that there will not be any event or reason that may cause the contractual arrangements to terminate. In the event that the contractual arrangements terminate, we will lose our control over them and their business operations and, as a result, over our primary sources of revenue. This may have a severe and detrimental effect on our continuing business viability under our current corporate structure, which in turn may affect the value of your investment. Should this occur, we may seek to acquire control of HJ Group through other means, although we cannot guarantee that we will do so, nor can we guarantee that we will be successful if we do.

We rely principally on dividends paid by our consolidated operating entities to fund any cash and financing requirements we may have, and any limitation on the ability of our consolidated PRC entities to pay dividends to us could have a material adverse effect on our ability to conduct our business.

We are a holding company and rely principally on dividends paid by our consolidated PRC operating entities for cash requirements, including the funds required to service any debt we may incur, which are passed on to us through Jiuxin Management. If any of the consolidated operating entities incurs debt in its own name in the future, the instruments governing the debt may restrict dividends or other distributions on our equity interest to us. In addition, the PRC tax authorities may require us to adjust our taxable income under the contractual arrangements in a manner that would materially and adversely affect our ability to pay dividends and other distributions on our equity interest.

Furthermore, applicable PRC laws, rules and regulations permit payment of dividends by our consolidated PRC entities only out of their retained earnings, if any, determined in accordance with PRC accounting standards. Under PRC laws, rules and regulations, our consolidated PRC entities are required to set aside at least ten percent (10%) of their after-tax profit each year, based on PRC accounting standards, to their statutory surplus reserve fund until the accumulative amount of such reserves reaches fifty percent (50%) of their respective registered capital. As a result, our consolidated PRC entities are restricted in their ability to transfer a portion of their net income to us whether in the form of dividends, loans or advances. As of March 31, 2018, our restricted reserves totaled \$1,309,109 (RMB 9,460,695). Our restricted reserves are not distributable as cash dividends. Any limitation on the ability of our consolidated operating entities to pay dividends to us could materially and adversely limit our ability to grow, make investments or acquisitions that could be beneficial to our businesses, pay dividends, or otherwise fund and conduct our business.

Certain management members of HJ Group have potential conflicts of interest with us, which may adversely affect our business and your ability for recourse.

Mr. Lei Liu, our Chief Executive Officer and Chairman of our Board of Directors, is also the executive director of Jiuzhou Pharmacy, a general partner of Jiuzhou Clinic, and the supervising director of Jiuzhou Service. In addition, Mr. Liu has also personally lent us money to help facilitate our payments of expenses in the U.S., as well as to purchase a land use right. Ms. Li Qi, our Corporate Secretary and a member of our Board of Directors, is the general manager of each of Jiuzhou Pharmacy, Jiuzhou Clinic and Jiuzhou Service, and a general partner of Jiuzhou Clinic. Conflicts of interests between their respective duties to our company and HJ Group may arise. As our directors and executive officers, they have a duty of loyalty and care to us under U.S. and Hong Kong law when there are any potential conflicts of interests between our company and HJ Group. We cannot provide assurance, however, that when any conflicts of interest arise, both of them will act completely in our interests or that conflicts of interests will be resolved in our favor. For example, they may determine that it is in HJ Group's interests to sever the contractual arrangements with Jiuxin Management, irrespective of the effect such action may have on us. In addition, either one of them could violate his or her legal duties by diverting business opportunities from us to others, thereby affecting the amount of payment that HJ Group is obligated to remit to us under the Consulting Services Agreement.

In the event that you believe that your rights have been infringed under securities laws or otherwise as a result of any one of the circumstances described above, it may be difficult or impossible for you to bring an action against HJ Group, or our officers or directors who are members of the management, all of whom reside within China. Even if you are successful in bringing an action, the laws of China may render you unable to enforce a judgment against the assets of HJ Group and its management, all of which are located in China.

Risks Related to Doing Business in China

We rely on contractual arrangements with our VIE for our operations, which may not be as effective in providing control over these entities as direct ownership.

Our operations and financial results are dependent on our VIEs, Jiuzhou Pharmacy (including its subsidiaries and controlled entities), Jiuzhou Clinic and Jiuzhou Service, in which we have no equity ownership interest and must rely on contractual arrangements to control and operate the businesses of our VIEs. These contractual arrangements are not as effective in providing control over the VIEs as direct ownership. For example, the VIEs may be unwilling or unable to perform its contractual obligations under our commercial agreements. Consequently, we would not be able to conduct our operations in the manner currently planned. In addition, the VIEs may seek to renew its agreements on terms that are disadvantageous to us. Although we have entered into a series of agreements that provide us with substantial ability to control the VIEs, we may not succeed in enforcing our rights under them insofar as our contractual rights and legal remedies under PRC law are inadequate. In addition, if we are unable to renew these agreements on favorable terms when these agreements expire or enter into similar agreements with other parties, our business may not be able to operate or expand, and our operating expenses may significantly increase.

In January 2015, China's Ministry of Commerce unveiled a draft legislation that could change how the government is regulating corporate structures, especially for VIEs controlled by foreign investments. Instead of looking at "ownership", the draft law focused on the entities or individuals hold control of a VIE. If a VIE is deemed to be controlled by foreign investors, it may be barred from operating in restricted sectors or the prohibited sectors listed on a "negative list", where only companies controlled by Chinese nationals could operate, even if structured as VIEs. As of the report date, no formal legislation has been implemented.

In the event that the draft law is implemented in any form, and that the Company's business was characterized as one of the "restricted" or "prohibited" sectors, the VIEs the Company currently maintains contractual arrangements with may be barred from operation which will materially adversely affect our business.

Changes in the policies of the PRC government could have a significant impact upon the business we may be able to conduct in the PRC and the profitability of such business.

Policies of the PRC government can have significant effects on economic conditions in China. Our interests may be adversely affected by changes in policies by the PRC government, including:

changes in laws, regulations or their interpretation;

confiscatory taxation;

restrictions on currency conversion, imports or sources of supplies and export tariff; and

expropriation or nationalization of private enterprises.

Although the PRC government has been pursuing economic reform policies for more than two (2) decades, we cannot assure you that the government will continue to pursue such policies or that such policies may not be significantly altered, especially in the event of a change in leadership, social or political disruption, or other circumstances affecting the PRC's political, economic and social life.

Uncertainties with respect to the Chinese legal system could adversely affect us.

We conduct our business through our subsidiaries and controlled companies in the PRC. Our operations in China are governed by Chinese laws and regulations. We are generally subject to laws and regulations applicable to foreign investments in China and, in particular, laws applicable to WFOE. The Chinese legal system is based on written statutes. Prior court decisions may be cited for reference but have limited precedential value.

Since 1979, Chinese legislation and regulations have significantly enhanced the protections afforded to various forms of foreign investments in China. However, China has not developed a fully integrated legal system and recently enacted laws and regulations may not sufficiently cover all aspects of economic activities in China. In particular, because these laws and regulations are relatively new, and because of the limited volume of published decisions and their nonbinding nature, the interpretation and enforcement of these laws and regulations involve uncertainties. In addition, the Chinese legal system is based in part on government policies and internal rules (some of which are not published on a timely basis or at all) that may have a retroactive effect. As a result, we may not be aware of our violation of these policies and rules until some time after the violation. In addition, any litigation in China may be protracted and result in substantial costs and diversion of our resources and our management's attention.

You may experience difficulties in effecting service of legal process, enforcing foreign judgments or bringing original actions in China against us or our management based on United States or other foreign laws.

We are a holding company and conduct our business through our subsidiaries and controlled companies in the PRC. In addition, all of our operating assets are located in, and all of our other senior executive officers reside within, China. As a result, it may not be possible to effect service of process within the United States or elsewhere outside China upon those of our senior executive officers and directors that do not reside in the United States, including with respect to matters arising under U.S. federal securities laws or applicable state securities laws. Moreover, our Chinese counsel has advised us that China does not have treaties with the United States or many other countries providing for the reciprocal recognition and enforcement of judgment of courts. As a result, our public shareholders may face substantially more difficulty in protecting their interests through actions against our management or directors than would shareholders of a corporation with assets and management located in the United States.

We may need to obtain additional governmental approvals to open new drugstores. Our inability to obtain such approvals will have a material adverse effect on our business and growth.

According to the *Measures on the Administration of Foreign Investment in the Commercial Sector* (the “Measures”) promulgated by China’s Ministry of Commerce (the “MOC”), which became effective on June 1, 2004, a company that is directly owned by a foreign invested enterprise needs to obtain relevant governmental approvals before it opens new retail stores. However, there are no specific laws, rules or regulations with respect to whether such approvals are necessary for a company that is contractually controlled by a foreign invested enterprise. In addition, the Measures state that the MOC will promulgate a detailed implementation regulation to govern foreign invested enterprises engaging in drug sale. However, such implementation regulation has not yet been promulgated. Therefore, we cannot provide assurance that the MOC will not require such approvals to be obtained, or as to when any regulation of such requirements may be implemented. If additional governmental approval is deemed to be necessary and we are unable to obtain such approvals on a timely basis or at all, our business, financial condition, results of operations and prospects, as well as the trading price of our common stock, will be materially and adversely affected.

The advent of recent healthcare reform directives from China’s central government may increase both competition and our cost of doing business.

Under the auspices of the Healthy China 2020 program (the “Program”), published by China’s National Development and Reform Commission in October 2008, the central government has set in motion a series of policies in fairly rapid successions aimed to improve China’s healthcare system. Such policies include (1) discouraging hospitals from both prescribing and dispensing medication, (2) the unveiling in April 2009 of formal healthcare reform guidelines aimed at improving the availability of and subsidies for “essential” drugs, and (3) the announcement in August 2009 of China’s National Essential Drugs List (“NEDL”), initially listing approximately three hundred (300) medicines to be sold at

government-controlled prices. While an underlying goal of these policies is to make drugs more accessible to China's poorer population, these policies also serve to create opportunities that in turn will intensify business competition in the Chinese retail drugstore industry, as well as competition for skilled labor and retail spaces. Additionally, we expect the NEDL to result in a rise in the number of government-subsidized community healthcare service centers, which in turn may erode the convenience and price advantage that our drugstores traditionally enjoy against hospitals.

The PRC's labor law restricts our ability to reduce our workforce in the PRC in the event of an economic downturn and may increase our production costs.

In June 2007, the National People's Congress of the PRC enacted new labor law legislation called the Labor Contract Law, which became effective on January 1, 2008 (the "LC Law"). The LC Law formalized workers' rights concerning overtime hours, pensions, layoffs, employment contracts and the role of trade unions. Considered one of the strictest labor laws in the world, among other things, the LC Law provides for specific standards and procedures for the termination of an employment contract and places the burden of proof on the employer. In addition, the law requires the payment of a statutory severance pay upon the termination of an employment contract in most cases, including the case of the expiration of a fixed-term employment contract. Further, the LC Law requires an employer to conclude an "employment contract without a fixed-term" with any employee who either has worked for the same employer for ten (10) consecutive years or more or has had two (2) consecutive fixed-term contracts with the same employer. An "employment contract without a fixed term" can no longer be terminated on the ground of the expiration of the contract, although it can still be terminated pursuant to the standards and procedures set forth under the new law. Because of the lack of implementing rules for the LC Law and the precedents for the enforcement of such a law, the standards and procedures set forth under the LC Law in relation to the termination of an employment contract have raised concerns among foreign investment enterprises in the PRC that such "employment contract without a fixed term" might in fact become a "lifetime, permanent employment contract." Finally, under the LC Law, downsizing of either more than twenty (20) people or more than ten percent (10%) of the workforce may occur only under specified circumstances, such as a restructuring undertaken pursuant to the PRC's Enterprise Bankruptcy Law, or where a company suffers serious difficulties in production and/or business operations, or where there has been a material change in the objective economic circumstances relied upon by the parties at the time of the conclusion of the employment contract, thereby making the performance of such employment contract impossible. To date, there has been very little guidance and precedents as to how such specified circumstances for downsizing will be interpreted and enforced by the relevant PRC authorities. All of our employees working for us exclusively within the PRC are covered by the LC Law and thus, our ability to adjust the size of our operations when necessary in periods of recession or less severe economic downturns may be curtailed. Accordingly, if we face future periods of decline in business activity generally or adverse economic periods specific to our business, the LC Law can be expected to exacerbate the adverse effect of the economic environment on our results of operations and financial condition.

We cannot be certain that the Chinese regulatory authorities will not impose more stringent restrictions on the convertibility of the Renminbi, especially with respect to foreign exchange transactions.

Fluctuation in the value of the Renminbi may have a material and adverse effect on your investment. The change in value of the Renminbi against the U.S. dollar is affected by, among other things, changes in PRC's political and economic conditions. We receive substantially all of our revenues in RMB. Under our current structure, our income is primarily derived from payments from the three (3) HJ Group companies. Shortages in the availability of foreign currency may restrict the ability of our subsidiaries and our PRC affiliated entities to remit sufficient foreign currency to pay dividends or other payments to us, or otherwise satisfy their foreign currency denominated obligations. Under existing Chinese foreign exchange regulations, payments of current account items, including profit distributions, interest payments and expenditures from trade-related transactions, can be made in foreign currencies without prior approval from SAFE by complying with certain procedural requirements. However, approval from appropriate government authorities is required where RMB is to be converted into foreign currency and remitted out of China to pay capital expenses, such as the repayment of bank loans denominated in foreign currencies. The Chinese government may also, at its discretion, restrict access in the future to foreign currencies for current account transactions. If the foreign exchange control system prevents us from obtaining sufficient foreign currency to satisfy our currency demands, we may not be able to pay dividends in foreign currencies to our stockholders.

From 1995 until July 2005, the People's Bank of China intervened in the foreign exchange market to maintain an exchange rate of approximately Renminbi 8.3 per U.S. dollar. On July 21, 2005, the PRC government changed this policy and began allowing modest appreciation of the Renminbi versus the U.S. dollar. Under the new policy, the Renminbi was permitted to fluctuate within a narrow and managed band against a basket of certain foreign currencies. This change in policy caused the Renminbi to appreciate approximately 21.5% against the U.S. dollar over the following three years. As a consequence, the Renminbi has fluctuated sharply since July 2008 against other freely traded currencies, in tandem with the U.S. dollar. It is difficult to predict how long the current situation may last and when and how it may change again. There remains significant international pressure on the PRC government to adopt a substantial liberalization of its currency policy, which could result in a further and more significant appreciation in the value of the Renminbi against the U.S. dollar. Significant revaluation of the Renminbi may have a material and adverse effect on your investment. For example, to the extent that we need to convert U.S. dollars we receive from securities offering into Renminbi for our operations, appreciation of the Renminbi against the U.S. dollar would have an adverse effect on the Renminbi amount we would receive from the conversion. Conversely, if we decide to convert our Renminbi into U.S. dollars for the purpose of making payments for dividends on our common stock or for other business purposes, appreciation of the U.S. dollar against the Renminbi would have a negative effect on the U.S. dollar amount available to us. In August 2015, the PRC Government devalued its currency by approximately 3%, represented the largest yuan depreciation for 20 years. Concerns remain that China's slowing economy, and in particular its exports, will need a stimulus that can only come from further cuts in the exchange rate.

In addition, appreciation or depreciation in the value of the Renminbi relative to the U.S. dollar would affect our financial results reported in U.S. dollar terms without giving effect to any underlying change in our business or results of operations. The income statements of our operations are translated into U.S. dollars at the average exchange rates in each applicable period. To the extent the U.S. dollar strengthens against foreign currencies, the translation of these

foreign currencies denominated transactions results in reduced revenue, operating expenses and net income for our international operations. Similarly, to the extent the U.S. dollar weakens against foreign currencies, the translation of these foreign currency denominated transactions results in increased revenue, operating expenses and net income for our international operations. We are also exposed to foreign exchange rate fluctuations as we convert the financial statements of our foreign subsidiaries into U.S. dollars in consolidation. If there is a change in foreign currency exchange rates, the conversion of the foreign subsidiaries' financial statements into U.S. dollars will lead to a translation gain or loss, which is recorded as a component of other comprehensive income. Very limited hedging transactions are available in China to reduce our exposure to exchange rate fluctuations. To date, we have not entered into any hedging transactions. While we may enter into hedging transactions in the future, the availability and effectiveness of these transactions may be limited, and we may not be able to successfully hedge our exposure at all.

Fluctuation in the value of RMB may have a material adverse effect on your investment.

The value of RMB against the U.S. dollar and other currencies may fluctuate and is affected by, among other things, changes in political and economic conditions. Our revenues, costs, and financial assets are mostly denominated in RMB, while our reporting currency is the U.S. dollar. Accordingly, this may result in gains or losses from currency translation on our financial statements. We rely entirely on fees paid to us by our affiliated entities in China. Therefore, any significant fluctuation in the value of RMB may materially and adversely affect our cash flows, revenues, earnings, financial position, and the value of, and any dividends payable on, our stock in U.S. dollars. For example, an appreciation of RMB against the U.S. dollar would, to the extent that we need to convert U.S. dollars into RMB for such purposes, make any new RMB denominated investments or expenditures more costly to us. An appreciation of RMB against the U.S. dollar would result in foreign currency translation gains for financial reporting purposes when we translate our RMB denominated financial assets into U.S. dollars, as the U.S. dollar is our reporting currency.

Jiuzhou Pharmacy, Jiuzhou Clinic and Jiuzhou Service are subject to restrictions on making payments to us.

We rely substantially on our contractual arrangements with Jiuzhou Pharmacy, Jiuzhou Clinic and Jiuzhou Service for our revenue. The Chinese government also imposes controls on the conversion of RMB into foreign currencies and the remittance of currencies out of China. We may experience difficulties in completing the administrative procedures necessary to obtain and remit foreign currency. Furthermore, if these companies incur debt on their own in the future, the instruments governing the debt may restrict their ability to make payments. If we are unable to receive all of the revenues from our operations through these contractual arrangements, we may be unable to pay dividends on our common shares.

Dividends we receive from our subsidiaries located in the PRC may be subject to PRC withholding tax.

The EIT Law provides that a maximum income tax rate of twenty percent (20%) is applicable to dividends payable to non-PRC investors that are “non-resident enterprises,” to the extent such dividends are derived from sources within the PRC. However, the State Council has reduced such rate to ten percent (10%) through the implementation regulations. We are a Nevada holding company and substantially all of our income is derived from our subsidiaries and controlled companies located in the PRC. Therefore, dividends paid to us from China may be subject to the ten percent (10%) income tax if we are considered a “non-resident enterprise” under the EIT Law. If we are required under the EIT Law and its implementation regulations to pay income tax for any dividends we receive from our PRC subsidiaries, it may have a material and adverse effect on our net income and materially reduce the amount of dividends, if any, we may pay to our shareholders.

We face risks related to health epidemics and other outbreaks.

Our business could be adversely affected by the effects of an epidemic outbreak. Any prolonged recurrence of any adverse public health developments in China may have a material adverse effect on our business operations. For instance, health or other government regulations adopted in response may require temporary closure of our stores or offices. Such closures would severely disrupt our business operations and adversely affect our results of operations. We have not adopted any written preventive measures or contingency plans to combat any future epidemic outbreak.

Failure to comply with the U.S. Foreign Corrupt Practices Act could subject us to penalties and other adverse consequences.

We are required to comply with the United States Foreign Corrupt Practices Act, which generally prohibits United States companies from engaging in bribery or other prohibited payments to foreign officials for the purpose of obtaining or retaining business. Foreign companies, including some that may compete with us, are not subject to these prohibitions, and therefore may have a competitive advantage over us. Corruption, extortion, bribery, pay-offs, theft and other fraudulent practices may occur in the PRC. If our competitors engage in these practices, they may receive preferential treatment in the PRC, giving them an advantage in securing business, which would put us at a disadvantage. We cannot provide assurance that our employees or other agents will not engage in such conduct for which we might be held responsible. If our employees or other agents are found to have engaged in such practices, we could suffer severe penalties and other consequences that may have a material adverse effect on our business, financial condition and results of operations.

If relations between the United States and China worsen, investors may be unwilling to hold or buy our stock and our stock price may decrease.

At various times during recent years, the United States and China have had significant disagreements over political and economic issues. Controversies may arise in the future between these two countries. Any political or trade controversies between the United States and China, whether or not directly related to our business, could reduce the price of our common stock.

Our auditor, like other independent registered public accounting firms operating in China, is not permitted to be subject to inspection by Public Company Accounting Oversight Board, and consequently investors may be deprived of the benefits of such inspection.

Our auditor, the independent registered public accounting firm that issued the audit reports included elsewhere in this annual report, as an auditor of companies that are traded publicly in the United States and a firm registered with the Public Company Accounting Oversight Board (United States), or PCAOB, is required by the laws of the United States to undergo regular inspections by the PCAOB to assess its compliance with the laws of the United States and applicable professional standards. Our auditor is located in China and the PCAOB is currently unable to conduct inspections on auditors in China without the approval of the PRC authorities. Therefore, our auditor, like other independent registered public accounting firms operating in China, is currently not inspected by the PCAOB.

In May 2013, the PCAOB announced that it has entered into a Memorandum of Understanding (“MOU”) on Enforcement Cooperation with the China Securities Regulatory Commission (the “CSRC”) and the Ministry of Finance (the “MOF”). The MOU establishes a cooperative framework between the parties for the production and exchange of audit documents relevant to investigations in both countries’ respective jurisdictions. More specifically, it provides a mechanism for the parties to request and receive from each other assistance in obtaining documents and information in furtherance of their investigative duties. In addition to developing enforcement MOU, the PCAOB has been engaged in continuing discussions with the CSRC and MOF to permit joint inspections in China of audit firms that are registered with the PCAOB and audit Chinese companies that trade on U.S. exchanges.

Inspections of other firms that the PCAOB has conducted outside of China have identified deficiencies in those firms' audit procedures and quality control procedures, and such deficiencies may be addressed as part of the inspection process to improve future audit quality. The inability of the PCAOB to conduct inspections of independent registered public accounting firms operating in China makes it more difficult to evaluate the effectiveness of our auditor's audit procedures or quality control procedures, and to the extent that such inspections might have facilitated improvements in our auditor's audit procedures and quality control procedures, investors may be deprived of such benefits.

The slowing economic growth in China may assert a negative impact on our operation and financial results.

According to several articles published by the Wall Street Journal, CNN, and BBC News in January 2016, after experiencing rapid growth for more than a decade, China's economy has been hit by shrinking foreign and domestic demand, weak investment, factory overcapacity and oversupply in the property market, and has experienced a painful slowdown in the last two years. In 2016, China's economy grew by 6.7%, compared with 6.9% a year earlier, marking its slowest growth in a quarter of a century. As the government tried to shift the growth engine away from manufacturing and debt-fueled investment toward the services sector and consumer spending, the outlook of the Chinese economy is uncertain.

In the next two to three years, China's growth performance could deteriorate because of the overhang of its real estate bubble, massive manufacturing overcapacity, and the lack of new growth engines. The International Monetary Fund expected China's economy to grow by 6.4% in 2018-2020. If China's economy is further slowing down, it may negatively affect our business operation and financial results.

Risks Related to an Investment in Our Securities

To date, we have not paid any cash dividends and no cash dividends will be paid in the foreseeable future.

We do not anticipate paying cash dividends on our common stock in the foreseeable future and we may not have sufficient funds legally available to pay dividends. Even if the funds are legally available for distribution, we may nevertheless decide not to pay any dividends. We intend to retain all earnings for our operations.

NASDAQ may delist our common stock from trading on the NASDAQ Capital Market for failing to maintain a minimum bid price of \$1.00, which could limit investors' ability to effect transactions in our common stock and subject us to additional trading restrictions.

On May 9, 2013, we received a letter from The NASDAQ Stock Market LLC (“NASDAQ”), notifying us of our failure to maintain a minimum closing bid price of \$1.00 over the then preceding thirty (30) consecutive trading days for its common stock, as required by NASDAQ Listing Rule 5550(a)(2) (the “Bid Price Rule”). The letter stated that the company had until November 5, 2013, to demonstrate compliance by maintaining a minimum closing bid price of at least \$1.00 for a minimum of ten (10) consecutive trading days. In the meantime, we were included in a list of non-compliant companies posted on NASDAQ’s website commencing on May 16, 2013.

On November 6, 2013, NASDAQ granted us an additional 180-day period, or until May 5, 2014, to remain listed on the NASDAQ Capital Market and to regain compliance with the Bid Price Rule. Under NASDAQ Listing Rules, we were granted this extension because we met the continued listing requirement for market value of publicly held shares and all other applicable NASDAQ listing requirements, except the bid price requirement.

On January 16, 2014, we received a letter from NASDAQ notifying us that we had regained compliance with the Bid Price Rule, as the closing bid price of our common stock had been at or above \$1.00 per share for at least 10 consecutive trading days. However, we cannot provide assurance that we will remain compliant with the Bid Price Rule in the future. If NASDAQ delists our common stock from trading on its exchange, we could face significant material adverse consequences including:

- a limited availability of market quotations for our common stock;
- a limited amount of news and analyst coverage for our company; and
- a decreased ability to issue additional securities or obtain additional financing in the future.

Although publicly traded, the trading market in our common stock may be substantially less liquid than the average stock quoted on the NASDAQ Capital Market, and such low trading volume may adversely affect the price of our common stock.

Although our common stock has been listed on the NASDAQ Capital Market since April 22, 2010, the historical trading volume of our common stock has generally been low. Limited trading volume will subject our shares of common stock to greater price volatility and may make it difficult for you to sell your shares of common stock at a price that is attractive to you.

The market price for our stock may be volatile, and such volatility may subject us to securities litigation.

The market price for our stock may be volatile and, when compared to seasoned issuers, subject to wide fluctuations in response to various factors, many of which are beyond our control, including the following:

actual or anticipated fluctuations in our quarterly operating results;

changes in financial estimates by securities research analysts;

conditions in the retail pharmacy markets;

changes in the economic performance or market valuations of other retail pharmacy operators;

announcements by us or our competitors of new products, acquisitions, strategic partnerships, joint ventures or capital commitments;

addition or departure of key personnel;

fluctuations of exchange rates between RMB and the U.S. dollar;

intellectual property litigation; and

general economic or political conditions in China.

As an illustration of such volatility, the closing price of our common stock during the fifty two (52) weeks preceding the date of this report ranged from a low of \$1.24 to a high of \$1.83. In addition, the securities market has from time to time experienced significant price and volume fluctuations that are not related to the operating performance of particular companies. These market fluctuations may also materially and adversely affect the market price of our stock.

In the past, plaintiffs have often initiated securities class action litigation against a company following periods of volatility in the market price of its securities. We may, in the future, be the target of similar litigation. Securities litigation could result in substantial costs and liabilities and could divert management's attention and resources.

Techniques employed by manipulative short sellers in Chinese small-cap stocks may drive down the market price of our common stock.

Short selling is the practice of selling securities that the seller does not own but rather has borrowed from a third party with the intention of buying identical securities back at a later date to return to the lender. The short seller hopes to profit from the difference in the sale price of the borrowed securities and the purchase price of the replacement shares. As it is therefore in the short seller's best interests for the price of the stock to decline, there have been incidents of short sellers publishing, or arranging to publish negative opinions in order to create negative market momentum. While traditionally these disclosed shorts have been limited in their ability to access mainstream business media or to otherwise create negative market rumors, the rise of the Internet and technological advancements regarding document creation, videotaping and publication by weblog ("blogging") have allowed many disclosed shorts to publicly attack a company's credibility, strategy and veracity by means of so-called research reports that mimic the type of investment analysis performed by large Wall Street firms and independent research analysts. These short attacks have, in the past, resulted in the selling of shares in the market, on occasion on a large scale and broad base. Issuers with business operations based in the PRC, that have limited trading volumes and that are susceptible to higher volatility levels than U.S. domestic large-cap stocks can be particularly vulnerable to such short attacks.

These short seller publications are not regulated by any governmental, self-regulatory organization or other official authority in the U.S., are not subject to the certification requirements imposed by the SEC in Regulation Analyst Certification and, accordingly, the opinions they express may be based on distortion of the actual facts or, in some cases, fabrication of the facts. In light of the limited risks involved in publishing such information, and the enormous profit that can be made from running just one successful short attack, unless the short sellers become subject to significant penalties, it is more likely than not that disclosed shorts will continue to issue such reports.

While we intend to strongly defend our public filings against any such short seller attacks, oftentimes we are constrained, either by principles of freedom of speech, applicable state law (often called Anti-SLAPP statutes), or issues of commercial confidentiality, in the manner in which we can proceed against the relevant short seller. You should be aware that in light of the relative freedom to operate that such persons enjoy – oftentimes blogging from outside the U.S. with little or no assets or identity requirements – should we be targeted for such an attack and the rumors not dismissed by market participants, our stock will likely suffer from a temporary, or possibly long term, decline in market price.

Our officers and directors own a substantial portion of our outstanding common stock, which will enable them to influence many significant corporate actions and in certain circumstances may prevent a change in control that would otherwise be beneficial to our shareholders.

As of June 28, 2018, our directors and executive officers collectively controlled approximately 9,489,482 or 32.0% of our outstanding shares of stock entitled to vote on all corporate actions. These stockholders, acting together, could have a substantial impact on matters requiring the vote of the shareholders, including the election of our directors and most of our corporate actions. This control could delay, defer or prevent others from initiating a potential merger, takeover or other change in our control, even if these actions would benefit us and our shareholders. This control could adversely affect the voting and other rights of our other shareholders and could depress the market price of our common stock.

The elimination of monetary liability against our directors, officers and employees under Nevada law and the existence of indemnification rights for our directors, officers and employees may result in substantial expenditures by us and may discourage lawsuits against our directors, officers and employees.

Our bylaws contain specific provisions that eliminate the liability of our directors for monetary damages to our company and shareholders, and we are prepared to give such indemnification to our directors and officers to the extent provided by Nevada law. We may also have contractual indemnification obligations under our employment agreements with our officers. The foregoing indemnification obligations could result in our company incurring substantial expenditures to cover the cost of settlement or damage awards against directors and officers, which we may be unable to recoup. These provisions and any costs resulting therefrom may also discourage our company from bringing a lawsuit against directors and officers for breaches of their fiduciary duties, and may similarly discourage the filing of derivative litigation by our shareholders against our directors and officers even though such actions, if successful, might otherwise benefit our company and shareholders.

Legislative actions, potential new accounting pronouncements and higher insurance costs may impact our future financial position and results of operations.

Over the last decade or so, there have been many regulatory changes, including the Sarbanes-Oxley Act of 2002 (the “Sarbanes-Oxley Act”) and the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. There may potentially be new accounting pronouncements or regulatory rulings or changes that will have an impact on our future financial position and results of operations. In addition, insurers are likely to increase premiums as a result of high claims rates over the past several years, which we expect will increase our premiums for insurance policies. These and other potential changes could materially increase the expenses we report under generally accepted accounting principles, and adversely affect our operating results.

If we fail to maintain an effective system of internal controls, we may not be able to accurately report our financial results or prevent fraud.

We are subject to reporting obligations under U.S. securities laws. The SEC, as required by Section 404 of the Sarbanes-Oxley Act, as amended, adopted rules requiring every public company to include a management report on such company’s internal controls over financial reporting in its annual report, which contains management’s assessment of the effectiveness of our internal controls over financial reporting. We reported certain material weaknesses involving control activities, specifically internal control weaknesses relating to finance personnel, in light of the continuing lack of sufficient experience by our accounting staff in U.S. GAAP-based reporting and SEC rules and regulations. Such material weaknesses were noted for the past five (5) fiscal years, based on factors including: (i) the number of adjustments proposed by our independent auditors during our quarterly review and annual audit processes; (ii) the significance of the audit adjustments and their impact on the overall financial statements; (iii) how

appropriately we complied with U.S. GAAP on transactions; and (iv) how accurately we prepared supporting information to provide to our independent auditors on a quarterly and annual basis. As such, we did not maintain effective controls and did not implement adequate and proper supervisory review to ensure that significant internal control deficiencies could be detected and/or prevented.

Although we believe that we have made significant efforts to address the foregoing weaknesses, we believe that our efforts to date have not yet been sufficient to fully remediate such weaknesses. We will continue our efforts during the current fiscal year, although there can be no assurance that compliance will be achieved in this time frame.

Our reporting obligations as a public company will place a significant strain on our management, operational and financial resources and systems for the foreseeable future. Effective internal controls, particularly those related to revenue recognition, are necessary for us to produce reliable financial reports and are important to help prevent fraud. As a result, our failure to achieve and maintain effective internal controls over financial reporting could result in the loss of investor confidence in the reliability of our financial statements, which in turn could harm our business and negatively impact the trading price of our common stock. Furthermore, we anticipate that we will incur considerable costs and use significant management time and other resources in an effort to comply with Section 404 and other requirements of the Sarbanes-Oxley Act.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 2. PROPERTIES

We are headquartered in Hangzhou, China. We do not own any property; however, our current leased properties are as follows:

Description	Location	Size (square meters)	Lease expiration date
	Hai Wai Hai Tongxin Mansion Floor 5&6		
Principal executive office	Gong Shu District, Hangzhou City Zhejiang Province, China	4,000	December 27, 2021
Pharmacies (1)	Various locations in Hangzhou, Zhejiang Province, China	Range from 79 to 1,713	September 2018 to March 2027
Farmland for herb cultivation (2)	Qianhong Township, Hangzhou, Zhejiang Province, China	196,677	February 1, 2040
Land (2)	Qianhong Township, Hangzhou, Zhejiang Province, China	18,616	February 1, 2040

As of the date of this report, we have operating leases in connection with our 122 pharmacies. See Note 10, “Long Term Deposits,” and Note 22, “Commitments and Contingencies” to the Financial Statements. The leases do not contain any material escalating lease payments or contingent rental payment terms. We must negotiate with the landlords for an extension of the current leases or enter into new leases upon their termination, upon which our (1) landlords may request a rent increase. Under applicable PRC law, we have priority over other potential lessees with respect to the leased store space on the same terms. We also do not expect any significant difficulties in renewing, where desired, the existing leases upon their expiration. Our community stores are normally relatively small in size and the facilities inside the store are easily movable. As a result, we do not expect our drugstore operations to be materially and adversely affected by any failure to renew current leases or enter into new leases.

We lease the land from The People’s Government of Qianhong Village under a 30-year lease entered in February (2)2010. The rent for the land was prepaid in full in May 2010. See Note 11, “Other Noncurrent Assets,” and Note 12, “Intangible Assets,” to the Financial Statements.

ITEM 3. LEGAL PROCEEDINGS.

We know of no material, existing or pending legal proceedings against us, nor are we involved as a plaintiff in any material proceeding or pending litigation. There are no proceedings in which any of our directors, officers or affiliates, or any registered or beneficial stockholder holding more than five percent of our common stock, is an adverse party or has a material interest adverse to our company.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

PART II**ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.****Market Information**

Our common stock trades on the NASDAQ Capital Market under the symbol "CJJD". The following table sets forth the high and low sales prices for our common stock for each fiscal quarter during the last two (2) fiscal years. This information is based on reports from Yahoo Finance.

	Low	High
Fiscal Year 2018		
Quarter ended March 31, 2018	\$1.28	\$1.56
Quarter ended December 31, 2017	\$1.24	\$1.66
Quarter ended September 30, 2017	\$1.56	\$1.77
Quarter ended June 30, 2017	\$1.69	\$1.83
Fiscal Year 2017		
Quarter ended March 31, 2017	\$1.71	\$2.01
Quarter ended December 31, 2016	\$1.56	\$1.85
Quarter ended September 30, 2016	\$1.76	\$2.13
Quarter ended June 30, 2016	\$1.57	\$1.90

Based on the records of our transfer agent, we had 29,161,778 shares of common stock issued and outstanding as of June 21, 2018.

Holders

Based on the records of our transfer agent, there were 37 stockholders of record of our common stock as of June 21, 2018 (not including beneficial owners who hold shares at broker/dealers in "street name").

Transfer Agent

Our transfer agent is American Stock Transfer & Trust Company, LLC, whose address is 6201, 15th Avenue, Brooklyn, New York 11219, and whose telephone number is (718) 921-8206.

Dividends

While there are no restrictions that limit our ability to pay dividends, we have not paid, and do not currently intend to pay cash dividends on our common stock in the foreseeable future. Our policy is to retain all earnings, if any, to provide funds for the operation and expansion of our business. The declaration of dividends, if any, will be subject to the discretion of our Board of Directors, who may consider such factors as our results of operations, financial condition, capital needs and acquisition strategy, among others, in making its determination.

Securities Authorized for Issuance under Equity Compensation Plans

Please see the discussion in Item 12 titled “Equity Compensation Plan Information” below.

Recent Sales of Unregistered Securities

On January 23, 2017, we issued 4,840,000 shares of Common Stock to an institutional investor for a total proceeds of \$10,680,000. The shares are restrictive with a standard legend under the Securities Act of 1933, as amended (the “Securities Act”). No other sales of unregistered securities were made in fiscal 2017 and 2018.

ITEM 6. SELECTED FINANCIAL DATA.

Not applicable.

ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis of our results of operations and financial condition for the fiscal years ended March 31, 2018 and 2017 should be read in conjunction with our financial statements and the notes to those financial statements that are included elsewhere in this report. Our discussion includes forward-looking statements based upon current expectations that involve risks and uncertainties, such as our plans, objectives, expectations and intentions. Actual results and the timing of events could differ materially from those anticipated in these forward-looking statements as a result of a number of factors, including those set forth under the “Risk Factors,”

“Cautionary Notice Regarding Forward-Looking Statements” and “Description of Business” sections and elsewhere in this report. We use words such as “anticipate,” “estimate,” “plan,” “project,” “continuing,” “ongoing,” “expect,” “believe,” “intend,” “may,” “will,” “should,” “could,” “predict” and similar expressions to identify forward-looking statements. Although we believe the expectations expressed in these forward-looking statements are based on reasonable assumptions within the bound of our knowledge of our business, our actual results could differ materially from those discussed in these statements. Factors that could contribute to such differences include, but are not limited to, those discussed in the “Risk Factors” section of this report. We undertake no obligation to update publicly any forward-looking statements for any reason even if new information becomes available or other events occur in the future other than in compliance with the SEC rules and regulations.

Our financial statements are prepared in U.S. Dollars and in accordance with accounting principles generally accepted in the United States. See “Exchange Rates” at the end of this section for information concerning the exchanges rates at which Renminbi (“RMB”) were translated into U.S. Dollars (“USD” or “\$”) at various pertinent dates and for pertinent periods.

Overview

We currently operate in four business segments in China: (1) retail drugstores, (2) online pharmacy, (3) wholesale of products similar to those that we carry in our pharmacies, and (4) farming and selling herbs used for traditional Chinese medicine (“TCM”).

Our drugstores offer customers a wide variety of pharmaceutical products, including prescription and over-the-counter (“OTC”) drugs, nutritional supplements, TCM, personal and family care products, medical devices, and convenience products, including consumable, seasonal, and promotional items. Additionally, we have licensed doctors of both western medicine and TCM on site for consultation, examination and treatment of common ailments at scheduled hours. As of March 31, 2018, we had 122 pharmacies in Hangzhou city and its adjacent town Lin’an under the store brand of “Jiuzhou Grand Pharmacy.” During the year ended March 31, 2018, we had opened fifty-seven new pharmacies.

Since May 2010, we have also been selling certain OTC drugs, medical devices, nutritional supplements and other sundry products online. Our online pharmacy sells through several third-party platforms such as Alibaba’s Tmall, JD.com and Amazon.com, and the Company’s own platform all over China. In fiscal year 2018, in order to keep top rankings in certain third-party platforms such as Tmall, we have spent reasonable resources on marketing our products through these third-party platforms. Our sales through our own platform are primarily generated by customers who use their private commercial medical insurances package.

We operate a wholesale business through Jiuxin Medicine distributing third-party pharmaceutical products (similar to those carried by our pharmacies) primarily to trading companies throughout China. We also farm certain herbs used in TCM but have not incurred sales in the year ended March 31, 2018.

Critical Accounting Policies and Estimates

In preparing our audited consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, we are required to make judgments, estimates and assumptions that affect: (i) the reported amounts of our assets and liabilities; (ii) the disclosure of our contingent assets and liabilities at the end of each reporting period; and (iii) the reported amounts of revenue and expenses during each reporting period. We continually evaluate these estimates based on our own historical experience, knowledge and assessment of current business and other conditions, our expectations regarding the future based on available information and reasonable assumptions, which together form our basis for making judgments about matters that are not readily apparent from other sources. Since the use of estimates is an integral component of the financial reporting process, our actual results could differ materially from those estimates.

We believe that any reasonable deviation from those judgments and estimates would not have a material impact on our financial condition or results of operations. To the extent that the estimates used differ from actual results, however, adjustments to the statement of operations and corresponding balance sheet accounts would be necessary. These adjustments would be made in future financial statements.

When reading our financial statements, you should consider: (i) our critical accounting policies; (ii) the judgment and other uncertainties affecting the application of such policies; and (iii) the sensitivity of reported results to changes in conditions and assumptions. The critical accounting policies and related judgments and estimates used to prepare our financial statements are identified in Note 2 to our audited consolidated financial statements accompanying in this report.

In May 2014, the FASB issued ASU No. 2014-09, which creates Topic 606, Revenue from Contracts with Customers. The new guidance outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. Additionally, the guidance requires improved disclosure to help users of financial statements better understand the nature, amount, timing, and uncertainty of revenue that is recognized. The new guidance supersedes most current revenue recognition guidance, including industry-specific guidance. The standard is effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period, and permits early adoption on a limited basis. The update permits the use of either the retrospective or cumulative effect transition method. On April 1, 2018, we adopted the guidance in ASC 606 and all the related amendments and applied the new revenue standard to all contracts using the modified retrospective method. Based on the new standard our revenue recognition policies related to membership rewards programs will change. But the impact of the new revenue standard was not material and there was no adjustment required to the opening balance of retained earnings. We expect the impact of the adoption of the new revenue standard to be immaterial to our net income on an ongoing basis.

We currently recorded awarded membership points as accrued expense. The adoption of the policy will require us to deduct the membership rewards directly from our retail revenue. In other words, we will present such amounts in net sales as opposed to our current reduction of operation expense classification.

Results of Operations

Comparison of years ended March 31, 2018 and 2017

The following table summarizes our results of operations for the years ended March 31, 2018 and 2017:

	Years ended December 31, 2018		2017			
	Amount	Percentage of total revenue	Amount	Percentage of total revenue		
Revenue	\$96,112,706	100.0	% \$81,499,045	100.0	%	
Gross profit	\$20,125,169	20.9	% \$16,626,918	20.4	%	
Selling expenses	\$18,739,492	19.5	% \$12,923,192	15.9	%	
General and administrative expenses	\$17,823,661	18.5	% \$7,684,862	9.1	%	
Impairment of long-lived assets	\$1,583,186	1.6	% \$2,117,042	2.6	%	
Loss from operations	\$(18,021,170)	(18.8)% \$(3,981,136)	(4.9)%	
Interest income	\$478,976	0.5	% \$379,790	0.5	%	
Interest expenses	\$-	0.0	% \$(1,349)	0.0	%	
Other income (expense), net	\$201,096	0.2	% \$19,888	0.0	%	
Change in fair value of derivative liability	\$357,421	0.4	% \$140,032	0.2)%	
Income tax expense	\$76,256	0.1	% \$84,387	0.1	%	
Net loss	\$(17,059,933)	(17.7)% \$(5,644,204)	(6.9)%	

Revenue

Primarily due to the rise in our retail stores pharmacy business, revenue increased by \$14,613,661 or 17.9% for the year ended March 31, 2018, as compared to the year ended March 31, 2017, partially offset by the increase in our retail drugstore and wholesale business. The following table breaks down the revenue for our four business segments for the year ended March 31, 2018 and 2017:

Revenue by Segment

Edgar Filing: CHINA JO-JO DRUGSTORES, INC. - Form 10-K

The following table breaks down the revenue for our four business segments for the year ended March 31, 2018 and 2017:

	For the year ended March 31, 2018		2017		Variance by amount	% of change
	Amount	% of total revenue	Amount	% of total revenue		
Revenue from retail drugstores	\$61,977,582	64.5	% \$51,788,386	63.5	% \$10,189,196	19.7
Revenue from online sales	12,132,930	12.6	% 15,388,996	18.9	% (3,256,066)	(21.2)%
Revenue from wholesale business	22,002,194	22.9	% 14,321,663	17.6	% 7,680,531	53.6
Revenue from farming business	-	-	% -	-	% -	-
Total revenue	\$96,112,706	100.0	% \$81,499,045	100.0	% \$14,613,661	17.9

Retail drugstores sales, which accounted for approximately 64.5% of total revenue for the year ended March 31, 2018, increased by \$10,189,196, or 19.7% compared to the year ended March 31, 2017, to \$61,977,582. Same-store sales increased by approximately \$5,958,240, or 12.4%, while new stores contributed approximately \$4,675,626 in revenue in the year ended March 31, 2018. Excluding the RMB depreciation effect, the same store sales increased by approximately 10.6% period over period. In order to promote our old stores sales, we constantly monitor suitable merchandises for various stores. For example, we developed chronic disease monitoring program in certain big stores and therefore put more medicine and related nutritional supplements suitable for disease such as high blood pressure and Hyperlipidemia. For stores close to hospitals, we allocated more medicine which are not available at hospital but auxiliary to disease cure. Additionally, we have negotiated with major manufacturers and vendors of nutritional supplements in advance and ordered a large quantity at favorable prices. As a result, we are able to implement various marketing campaigns to promote sales. Furthermore, in the year ended March 31, 2018, we have accelerated our new stores expansion, which is expected to generate more retail drugstore revenue. We also opened 9 stores in Lin'an, a neighborhood town and hopefully to establish a store chain there. As a result, our store count increased to 122 as of March 31, 2018, compared to 67 stores as of March 31, 2017.

Our online pharmacy sales decreased by approximately \$3,256,066, or 21.2% for the year ended March 31, 2018, as compared to the year ended March 31, 2017. We carry our business either through certain e-commerce platforms such as Tmall and JD.com or via our own official online pharmacy website. Such arrangements with third-party platforms have exposed our online presence to a wider consumer base. Our official website sales increased by 221,227 or 12.0% year over year, primarily as we explored more Pharmacy Benefit Management ("PBM") providers, who draw insurants from private health insurance company to spend on health products at drugstores. In order to increase the popularity of our products, we have made considerable efforts to identify popular products that can drive sales, while keeping a close watch on cost. However, due to the suspension of OTC drug sales on e-commerce platforms such as Alibaba in the second quarter of fiscal year 2017 by the China Food and Drug Administration ("CFDA"), our sales via these e-commerce platforms have been curtailed. As a result, our sales via these e-commerce platforms decreased by 25.7% period over period. We are adding more non-medical health products such as nutritional supplements into our sales menu to counteract the decline in sale of OTC drug category. For instance, we are opening a *dendrobium candidum* flagship store at Tmall with a local popular brand. The brand has a large customer base in Hangzhou. We expect our e-commerce platform sales will pick up in the future.

Wholesale revenue increased by \$7,680,531 or 53.6%, primarily as a result of our ability to resell certain products, which our retail stores made large order on, to other vendors. As our retail drugstores achieved large quantity sales of certain brand name merchandises, we were able to bargain lower purchase prices than the market level on these merchandises. As a result, certain vendors who were unable to obtain a better price than ours, will turn to us for these merchandises, leading the wholesale volume to grow. However, hospitals still act as a major source of drug retailers in China. Local hospitals usually have stronger ties with their existing suppliers and we have not been able to make significant progress in becoming a major supplier to local hospitals. On the other side, we have been trying to act as a local agent for well-known health products in Zhejiang Province. For example, we signed a strategic cooperation agreement with Dong'a Gelatin (DEEJ) and act as its local sale agent in Zhejiang Province. Until we can establish a new customer base and secure a status to serve as provincial or national exclusive sale agent for certain popular drugs, we do not expect our wholesale business to increase significantly in the immediate future.

In the year ended March 31, 2018 and 2017, we have not harvested and generated revenue from our farming business. We planted ginkgo and maidenhair trees during the year ended March 31, 2013. A ginkgo tree may have a growth period of up to twenty years before it is mature enough for harvest. Usually, the longer it grows the more valuable it becomes. We plan to continue cultivating the trees in order to maximize their market value in the future. During the year ended March 31, 2018, we had cultivated white tea among the ginkgo trees. We anticipate that we will continue to grow ginkgo trees and start cultivating other herbs in the future.

Gross Profit

Gross profit increased by \$3,498,250 or 21.0% period over period primarily as a result of an increase in gross profit provided by retail stores sale, which increased significantly in the year ended March 31, 2018. At the same time, gross margin increased from 20.4% to 20.9% due to higher retail and wholesale profit margins. The average gross margins for each of our four business segments are as follows:

	Year ended	
	March 31,	
	2018	2017
Average gross margin for retail drugstores	25.9%	26.5%
Average gross margin for online sales	10.5%	10.1%
Average gross margin for wholesale business	12.7%	9.6%
Average gross margin for farming business	N/A	N/A

Retail gross margins decreased primarily due to lower prices in promotional campaigns and lower profit margin in newly opened stores. In order to boost our sales, we have implemented several marketing campaigns in our stores in the year ended December 31, 2017. As an effective method to promote sales, we have implemented promotional policies, such as coupon discounts on certain merchandise. As a result, our retail profit margins were diminished. Additionally, we have opened forty-six stores in the nine months ended December 31, 2018. In the stores' opening ceremonies, we usually provided deep-discounted products sales promotion in order to boost new store sales. The sales promotions in the stores' opening ceremonies contributed to the lower profit margin, however, as we have been focusing on product selection and continuous price negotiation with suppliers, as stated above, we expect to raise our sales profit margin in the future.

Gross margin of online pharmacy sales increased primarily because of the incline in our sales via our own official website, as well as due to our selection of popular products. We conduct our business either through certain e-commerce platforms such as Tmall and JD.com or via our own official online pharmacy website, www.dada360.com. The sales on our own official website usually have higher profit margins because customers referred by PBM providers and commercial insurance companies are premium customers who can afford premium products with higher profit margins. As our sales via our official website increased, our overall profit margin increased as well. In addition, to keep up with our net profit margin, we have been adjusting our marketing strategy to abandon sales of certain extremely low-profit margin. As a result, our gross profit margin increased slightly.

Wholesale gross margin increased primarily as a result of different products we carried and sold to certain pharmaceutical vendors. As we were able to carry sales of certain high margin products with suppliers rebate in this period, our sales profit margin increased.

Selling and Marketing Expenses

Sales and marketing expenses increased by \$5,816,300 or 45.0% period over period, primarily due to increase in labor and rent related to our store expansions and rising local living cost. In the year ended March 31, 2018, we opened 55 new stores. As a result, we experienced increase of \$1.4 million labor cost and \$1.4 million rental cost. In 2017, much of our wholesale business was referred by unaffiliated individuals medical products traders who earned commissions based on the brokered transaction amount. As a result, we incurred additional selling expenses of approximately \$1.0 million. Excluding the above factors, selling and marketing expenses increased by approximately \$1.9 million or 15%, which reflects increase in other operating cost.

General and Administrative Expenses

General and administrative expenses increased by \$10,138,799 or 131.9% period over period. Such expenses as a percentage of revenue increased to 18.5% from 9.4% for the same period a year ago. As an incentive to retain talent when quickly expanding our stores, the number of administrative staff increased and their compensation have risen by approximately \$1.55 million. The increase in absolute dollars also reflects an increase in accounts receivable and advance to vendor allowance of \$4.7 million in the year ended March 31, 2018, as compared to an increase of 0.7 million in allowance in the year ended March 31, 2017. The net effect is approximately \$4.0 million increase in general and administrative expense. Additionally, our stock compensation expense increased by approximately \$5.0 million primarily as a result of issuing shares to our key employees. Excluding such an effect, general and administrative expenses kept almost the same as fiscal year 2017.

Impairment of Long-lived Assets

We recorded an impairment of long-lived assets of \$1,583,186 and \$2,117,042 for the year ended March 31, 2018 and 2017. On March 31, 2018, Jiuxin Medicine started outsourcing its logistic service to Astro Boy Cloud Pan (Hangzhou) Storage and Logistic Co. Ltd, Jiuxin Medicine's warehouse lease has been terminated. As a result, approximately unamortized \$1,583,186 warehouse improvement is recognized as expense in the year ended March 31, 2018. Such impairment was made after we estimated that the implied fair value of long-lived assets was lower than the carrying value. Accordingly, we impaired prepayment of lease use right in the amount of \$1,217,081, impaired land and road improvement in the amount of \$106,257, and impaired farmland assets in the amount of \$743,261 in the year ended March 31, 2017.

Loss from Operations

As a result of the above, we had loss from operations of \$18,021,170, as compared to loss from operations of \$6,098,178 a year ago. Our operating margin for the year ended March 31, 2018 and 2017 was (18.8)% and (7.5)%, respectively.

Other Income (Expense), Net

In the year ended March 31, 2018, other income is \$201,096 as compared to other income of \$19,888 in the year ended March 31, 2017.

Income Taxes

Our income tax expense decreased by \$8,131 period over period due to decrease in overall profit.

Net Loss

As a result of the foregoing, net loss is \$17,059,933 in the year ended March 31, 2018 as compared to a net loss of \$5,644,204 in the year ended March 31, 2017.

Accounts receivable

Accounts receivable, which are unsecured, are stated at the amount we expect to collect. We continuously monitor collections and payments from our customers (our distributors) and maintain a provision for estimated credit losses. To prepare for potential loss in such accounts, we made corresponding reserves.

Our accounts receivable aging was as follows for the periods described below:

From date of invoice to customer	Retail drugstores	Online Pharmacy	Drug wholesale	Herb farming	Total amount
1- 3 months	\$6,364,889	\$7,614	\$1,097,238	\$ -	\$7,469,741
4- 6 months	66,942	15,249	300,764	-	382,955
7- 12 months	80,702	45,153	1,021,321	-	1,147,176
Over one year	1,754,192	139,050	1,990,593	-	3,883,835
Allowance for doubtful accounts	(1,978,233)	(157,949)	(2,425,132)	-	(4,561,314)
Total accounts receivable	\$6,288,493	\$49,116	\$1,984,784	\$ -	\$8,322,393

Accounts receivable from our retail business mainly consist of reimbursements from government health insurance bureaus and commercial health insurance programs. In the year ended March 31, 2018, we wrote off an approximately \$203,095 collectible from provincial and Hangzhou City government insurance, as such amount has been determined by the health insurance bureaus to be unqualified for reimbursement. In addition, as we gained experience in operating online pharmacy with good reputation, we have provided online operating and network technical support to an online business, which intends to run an online health products shop in Hong Kong in 2016. As a result, we recognized revenue and incurred accounts receivables. As the online business company was not able to make profit from its online shop, it has not paid off its account on time. As a result, we made additional reserve on these aged accounts.

Accounts receivable from our online pharmacy business mainly consist of collectibles from third-party platforms such as Tmall and JD.com where we sell products. Usually the third-party platforms will collect from customers ordering on their platforms and then reimburse us in times ranging from several days to a month after orders are placed.

Accounts receivable from our drug wholesale business and herb farming business consist of receivables from our customers such as pharmaceutical distributors and drugstores primarily in Zhejiang Province. Although we have transitioned away from focusing on sales volume, we had been trading with other pharmaceutical distributors to make profit until early 2017. For example, a pharmaceutical distributor, usually a natural person, may recommend Jiuxin Medicine to purchase and resell to other local consumers, as Jiuxin Medicine holds a GMP license with local good reputation and have local logistic capacity. Although distributors made recommendations, Jiuxin Medicine took all responsibility in merchandise selection and made payments on purchased merchandise. Also Jiuxin Medicine itself negotiated with local customers and takes all responsibility in selling products to customers. In Fiscal 2018, we have ceased most of these transactions and started another business model by reselling certain products, which our retail stores made large order on, to other vendors such as other local drugstores. After ceasing the type of transactions with distributors, we experienced slow collection of accounts from them. As a result, we made additional reserve on these aged accounts.

Subsequent to March 31, 2018 and through May 31, 2018, we collected approximately \$4.6 million in receivables relating to our drugstore business, approximately \$0.9 million in receivables relating to our online pharmacy business, approximately \$1.6 million relating to our wholesale business, and \$0 relating to our herb farming business.

Advances to suppliers

Advances to suppliers are mainly prepayments to secure certain products or services at favorable pricing. The aging of our advances to suppliers is as follows for the periods described below:

From date of cash prepayment to suppliers	Retail drugstores	Online Pharmacy	Drug wholesale	Herb farming	Total amount
1- 3 months	\$1,902,105	\$ -	\$597,887	\$ -	\$2,499,992
4- 6 months	224,833	-	248,310	-	473,143
7- 12 months	147,623	-	723,352	-	870,975
Over one year	186,097	-	2,475,338	-	2,661,434
Allowance for doubtful accounts	(275,019)	-	(2,783,073)	-	(3,058,092)
Total advances to suppliers	\$2,185,638	\$ -	\$1,261,814	\$ -	\$3,447,452

Since the acquisition of Jiuxin Medicine, we have gradually transferred almost all logistics services of our retail drugstores to Jiuxin Medicine. Jiuzhou Pharmacy only makes purchase on certain non-medical products such as sundry. As a result, our retail chain had little advances to suppliers as of March 31, 2018.

Advances to suppliers for our drug wholesale business consist of prepayments to our vendors such as pharmaceutical manufacturers and other distributors. We typically receive products from vendors within three to nine months after making prepayments. We continuously monitor delivery from and payments to our vendors while maintaining a provision for estimated credit losses based upon historical experience and any specific supplier issues such as discontinuing of inventory supply that have been identified. If we are having difficulty receiving products from a vendor, we take the following steps: cease purchasing products from the vendor, ask for return of our prepayment promptly, and if necessary, take legal actions. If all of these steps are unsuccessful, management then determines whether or not the prepayments should be reserved or written off. As mentioned in the above, we had been trading with other pharmaceutical distributors to make profit in 2016. In order to facilitate the transactions, we sometimes were required by distributors to prepay before merchandise delivery. After ceasing the type of transactions with distributors, some distributors have not returned the prepayment timely To accommodate potential loss in advances to suppliers, we made reserve for amounts considered to be uncollectible.

Liquidity and Capital Resources

Our cash flows for the periods indicated are as follows:

	For the year ended	
	March 31,	
	2018	2017
Net cash provided by/used in operating activities	\$(2,070,066)	\$ 1,559,502
Net cash provided by/used in investing activities	\$(2,977,502)	\$(46,546)
Net cash provided by/used in financing activities	\$(770,936)	\$ 10,644,839

For the year ended March 31, 2018, cash provided by operating activities amounted to \$(2,070,066), as compared to \$1,559,502 a year ago. The change is primarily attributable to a decrease in cash provided by impairment of prepayment of lease use right of \$1,246,788, a decrease in cash provided by accounts receivable of \$1,355,100, a decrease in cash provided by inventories and biological assets of \$2,602,773 offset by an increase of \$3,330,365 in bad debt direct write-off and provision, an increase in cash provided by stock compensation of \$5,076,663 and an increase in cash provided by advances to suppliers of \$4,141,162.

For the year ended March 31, 2018, net cash used in investing activities amounted to \$(2,977,502), as compared to \$(46,546) provided by investing activities a year ago. The change is attributable to increase intangible assets and increase in cash used in additions to leasehold improvements in the year ended March 31, 2018.

For the year ended March 31, 2017, net cash provided by financing activities amounted to \$(770,936), as compared to \$10,644,839 net cash used in financing activities a year ago. The financing proceeds were from the private placement described below.

As of March 31, 2018, we had cash of approximately \$15,132,640. Our total current assets as of March 31, 2018, were \$62,320,142 and total current liabilities were \$54,811,491, which resulted in a working capital of \$7,508,651.

On January 23, 2017, we completed a private placement with a single healthcare-focused institutional investor for the purchase of an aggregate of 4,840,000 of our common stock at a price of \$2.20 per share and gross proceeds of approximately \$10,648,000. As of March 31, 2018, we had approximately \$2.58 million in our credit line available for further borrowing. We believe that the foregoing sources will collectively provide sufficient liquidity for us to meet our liquidity and capital obligations for the next twelve months. However, if we are to acquire additional businesses or further expand our operations, we may need additional capital.

Contractual Obligations and Off-Balance Sheet Arrangements

Contractual Obligations

The following table summarizes our contractual obligations:

Edgar Filing: CHINA JO-JO DRUGSTORES, INC. - Form 10-K

Contractual obligations	Payments due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Long-Term Debt Obligations	\$-	-	-	-	-
Capital Lease Obligations	-	-	-	-	-
Operating Lease Obligations	17,481,229	4,357,870	6,753,937	3,974,340	2,395,082
Purchase Obligations	-	-	-	-	-
Other Long-Term Liabilities Reflected on the Registrant's Balance Sheet under GAAP*	138,796	-	138,796	-	-
Total	\$17,620,025	4,357,870	6,892,733	3,974,340	2,395,082

* It refers to warrants to purchase shares of common stock issued to an institutional investor and a placement agent (See Note 17).

Off-balance Sheet Arrangements

We do not have any outstanding financial guarantees or commitments to guarantee the payment obligations of any third parties. We have not entered into any derivative contracts that are indexed to our shares and classified as stockholder's equity or that are not reflected in our consolidated financial statements. Furthermore, we do not have any retained or contingent interest in assets transferred to an unconsolidated entity that serves as credit, liquidity or market risk support to such entity. We do not have any variable interest in any unconsolidated entity that provides financing, liquidity, market risk or credit support to us or engages in leasing, hedging or research and development services with us.

Exchange Rates

Our subsidiaries and affiliated companies in the PRC maintain their books and records in RMB, the lawful currency of the PRC. In general, for consolidation purposes, we translate their assets and liabilities into USD using the applicable exchange rates prevailing at the balance sheet date, and the statement of income is translated at average exchange rates during the reporting period. Adjustments resulting from the translation of their financial statements are recorded as accumulated other comprehensive income.

The exchange rates used to translate amounts in RMB into USD for the purposes of preparing the audited consolidated financial statements or otherwise disclosed in this report were as follows:

	March 31,	March 31,
	2018	2017
Balance sheet items, except for the registered and paid-up capital, as of end of period/year	USD1: RMB 0.1592	USD1: RMB 0.1451
Amounts included in the statement of Operations and statement of cash flows for the period/ year ended	USD1: RMB 0.1510	USD1: RMB 0.1487

Inflation

We believe that inflation has not had a material effect on our operations to date.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Not applicable.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

The Report of the Independent Registered Public Accounting Firm, and our Financial Statements and accompanying Notes to the Financial Statements that are filed as part of the report, are listed under “Item 15. Exhibits and Financial Statement Schedules” and are set forth beginning on page F-1 immediately following the signature pages to this report.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A. CONTROLS AND PROCEDURES.

Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the “Exchange Act”)), that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to our management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As of March 31, 2018, the end of the fiscal year covered by this report, our management, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, performed an evaluation of the effectiveness of our disclosure controls and procedures.

Based on the evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of March 31, 2018, our disclosure controls and procedures were ineffective. Such conclusion is due to the presence of material weaknesses in internal control over financial reporting as described below. Management anticipates that our disclosure controls and procedures will remain ineffective until such material weaknesses are remediated.

Management’s Report on Internal Control over Financial Reporting

We assessed the effectiveness of the Company’s internal control over financial reporting as of March 31, 2018. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (COSO) in the Internal Control-Integrated Framework. We are responsible for

establishing and maintaining adequate internal control over financial reporting. Based on our evaluation, management concluded that our internal control over financial reporting was ineffective as of March 31, 2018 due to the following material weaknesses:

Accounting and Finance Personnel Weaknesses - As noted in Item 9A of our annual reports on Form 10-K for the preceding fiscal years, management concluded that in light of the inexperience of our accounting staff with respect to the requirements of U.S. GAAP-based reporting and SEC rules and regulations, we did not maintain effective controls and did not implement adequate and proper supervisory review to ensure that significant internal control deficiencies can be detected or prevented.

Management's assessment of the control deficiency over accounting and finance personnel as of March 31, 2018 considered the same factors, including:

the number of adjustments proposed by our independent auditors during our quarterly review and annual audit processes;

how adequately we complied with U.S. GAAP on transactions; and

how accurately we prepared supporting information to provide to our independent auditors on a quarterly and annual basis.

Based on the above factors, management concluded that the control deficiency over accounting and finance personnel continues to be material weaknesses as of March 31, 2018, as our accounting staff continues to lack sufficient U.S. GAAP experience and requires further substantial training.

We have been continually making progress in improving internal controls. In 2017, we installed a leading ERP system, SAP from Germany. SAP is a well-known management system used by many fortune 500 companies. Per the contract with the local SAP system provider, the total fee for SAP customized installation and training adds up to more than one million USD in this year. By automatically connecting commodity flow data with accounting recording, the system minimizes the manual errors made by accounting staff. Additionally, the system provides a view of overall and instant cash information by electronically linking local banking systems with SAP. Additional benefits include automatically-generated customized monthly company performance reports, instant inventory monitoring and reporting, and punctual customer and suppliers accounts maintenance. In addition, we plan to introduce talented managers who are able to better utilize the system. We expect to continually improve our internal control system. As such, we will continue our efforts during the fiscal year ending March 31, 2019, although there can be no assurance that compliance will be achieved in this time frame.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal controls over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rule 13a-15 or Rule 15d-15 that occurred during the fourth quarter ended March 31, 2018, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitations on Controls

Management does not expect that our disclosure controls and procedures or internal control over financial reporting will prevent or detect all errors and fraud. Any control system, no matter how well designed and operated, is based upon certain assumptions and can provide only reasonable, not absolute, assurance that its objectives will be met. Further, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the Company have been detected.

ITEM 9B. OTHER INFORMATION.

None.

PART III**ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE.**

The following table identifies our current executive officers and directors as of the date of this report, their respective offices and positions, and their respective dates of election or appointment:

Name	Age(1)	Position	Date of Appointment
Lei Liu	53	Chief Executive Officer and Chairman of the Board of Directors	September 17, 2009
Ming Zhao	42	Chief Financial Officer	August 1, 2011
Li Qi	45	Secretary and Director	October 23, 2009
Caroline Wang (2) (3) (4)	31	Director	March 29, 2017
Taihong Guo (2) (3) (4)	67	Director	January 1, 2013
Genghua Gu (2) (3) (4)	67	Director	March 28, 2014

(1) As of the date of this report.

(2) Member of the Audit Committee.

(3) Member of the Compensation Committee.

(4) Member of the Nominating Committee.

Biographical Information of Our Current Directors and Executive Officers

Lei Liu has served as our Chief Executive Officer and Chairman of our Board of Directors since September 17, 2009. Mr. Liu is one of the three founders of Hangzhou Jiuzhou Grand Pharmacy Chain Co., Ltd. (“Jiuzhou Pharmacy”), Hangzhou Jiuzhou Clinic of Integrated Traditional and Western Medicine (General Partnership) (“Jiuzhou Clinic”) and Hangzhou Jiuzhou Service & Public Health Service Co., Ltd. (“Jiuzhou Service”) (Jiuzhou Pharmacy, Jiuzhou Clinic and Jiuzhou Service, as well as the subsidiaries of Jiuzhou Pharmacy, collectively as “HJ Group”), and has been the executive director of Jiuzhou Pharmacy since September 2003 and the supervising director of Jiuzhou Service since November 2005. From December 1997 to August 2003, Mr. Liu worked in Tai He Drugstore as a general manager. From September 1992 to November 1997, Mr. Liu was an administration official of Hangzhou Medical Junior College, his alma mater, where he was also a researcher and an anatomy instructor from September 1983 to July 1992. Mr. Liu has been a licensed researcher in the PRC since September 1988. As the founder and CEO responsible for our vision and direction, Mr. Liu is invaluable to us and our Board of Directors.

Ming Zhao has served as our Chief Financial Officer since August 2011. From September 2010 to July 2011, Mr. Zhao was a senior manager at CFO Oncall, Inc., a financial consulting firm providing CFO services to U.S.-listed, China-based publicly traded companies. From December 2006 through August 2010, Mr. Zhao was a senior auditor at Sherb & Co., LLP. From January through June 2003, Mr. Zhao worked as a financial analyst at Microsoft Corporation. Mr. Zhao is a licensed certified public accountant. He graduated with a bachelor's degree in accounting from Central University of Finance and Economic in Beijing in July 1999, and obtained a master's degree in professional accounting from the University of Washington in December 2002.

Li Qi is one of the three founders of HJ Group. Ms. Qi has served as our secretary since October 23, 2009, and is currently the general manager of both Jiuzhou Pharmacy and Jiuzhou Service. From January 2000 to June 2003, Ms. Qi worked in Zhejiang Yikang Drugstore as a general manager. From October 1991 to January 2000, Ms. Qi worked in the Branch Hospital of Hangzhou No. 1 People's Hospital as a nurse. Ms. Qi is a licensed TCM pharmacist in the PRC and is a 1991 graduate of Hangzhou Nurse School. As the founder and secretary overseeing our day-to-day corporate operations, Ms. Qi is highly qualified to serve on our Board of Directors.

Caroline Wang has been a member of our Board since March 29, 2017. Ms. Wang has been a project manager with JC Group, a comprehensive industrial financial group which serves the "city management", performing internal audit and projects management for a variety of financial products since October 2015. Prior to that, Ms. Wang served as a CFO assistant of Kandi Technologies Group, Inc. (NASDAQ:KNDI), a company engaged in the research, development, manufacturing, and sales of vehicle products. She was mainly responsible for consolidation of financial reports and internal control audit. From 2012 to 2015, Ms. Wang was an audit department assistant manager with KPMG Huazhen LLP Hangzhou Branch, conducting financial report audit and internal control audit for listing companies, also providing audit service to pre-IPO companies. None of these companies is related to or affiliated with the registrant. Ms. Wang holds a master's degree in public administration from London School of Economics and Political Science, and a bachelor's degree in finance from Beijing Language and Culture University. The Board has determined that Ms. Wang has the qualification to serve as a member of the Board given her extensive financial, accounting and auditing experience, as well as her English and Chinese bilingual capabilities to facilitate the Board's supervision of the management.

Taihong Guo has been the President of the Zhejiang Province Pharmaceutical Industry Association, which has over 300 local pharmaceutical enterprises as members, since December 2012, and serves as a bridge between its members and the Zhejiang Food and Drug Administration (“FDA”). He was previously the Chief of the Hangzhou FDA from January 2003 to September 2009, and an Inspector from September 2009 to June 2012. From February 2010 to January 2012, he also chaired the Board of Supervisors at three private companies in Hangzhou: Hangzhou Industrial Assets Management Co., Ltd., a state-owned asset management company, Hangzhou Qingchunbao Group Co., Ltd., a leading supplier of traditional Chinese medicine and nutritional supplements throughout China, and Hangzhou Information Technology Co., Ltd., a state-owned asset management company focusing on technology companies. None of these companies is related to or affiliated with the registrant. Mr. Guo holds a bachelor degree in automotive designs from Jiangsu University (formerly Zhengjiang Nongji Institute), an associate degree in law from the Open University of China, Zhejiang Campus, and a bachelor degree in business management from the Central Party School. The Board has determined that Mr. Guo should serve as a director given his experience and working knowledge of the Hangzhou FDA, as well as his considerable contacts within the pharmaceutical industry in Hangzhou.

Genghua Gu is a retired physician, professor and published scientific researcher in the field of stomatology. From 2003 to 2013, Dr. Gu was a member of the Standing Committee of Zhejiang Province Political Consultative Conference. From 2000 to 2009, Dr. Gu was the Vice President of the Women’s Hospital of Zhejiang University’s School of Medicine (the “School of Medicine”), where, in addition to being a chief physician, professor and researcher, he was also in charge of logistics and financial control as part of the hospital’s management. From 1998 to 2000, Dr. Gu was the Vice President of the Second Affiliate Hospital of the School of Medicine (the “Affiliate Hospital”), where, in addition to his medical, teaching and research duties, he was also in charge of the hospital’s logistics. From 1995 to 1998, Dr. Gu served as the Deputy Magistrate with the Shuichang County Government in Zhejiang Province, in charge of the county’s culture, education and hygiene programs. From 1988 to 1995, Dr. Gu was the Head of the Medical Department at the Affiliate Hospital and was involved in planning and management of the medical department. Dr. Gu served as an oral surgeon from 1977 to 1988 at the Affiliate Hospital. Dr. Gu graduated from Shanghai Jiaotong University’s School of Medicine, Department of Stomatology in 1977. The Board has determined that Dr. Gu should serve as a director given his extensive medical and scientific research experience, as well as his government and hospital management and logistics experience.

Family Relationships

There are no family relationships between or among any of the current directors, executive officers or persons nominated or charged to become directors or executive officers. There are no family relationships among our officers and directors and those of our subsidiaries and affiliated companies.

Involvement in Certain Legal Proceedings

To our knowledge, our directors and executive officers were not involved in any legal proceedings as described in Item 401(f) of Regulation S-K in the past ten (10) years.

Compliance with Section 16(a) of the Exchange Act

Section 16(a) of the Exchange Act requires our directors, executive officers and persons who own more than ten percent (10%) of a registered class of our equity securities (“Reporting Persons”), to file reports of ownership and changes in ownership on Forms 3, 4 and 5 with the SEC. The Reporting Persons are also required by SEC rules to furnish us with copies of Section 16(a) forms they file. Based upon a review of the filings made on their behalf during the fiscal year ended March 31, 2018, as well as an examination of the SEC’s EDGAR system Form 3, 4, and 5 filings (including amendments to such forms) and our records, we believe that, for the fiscal year ended March 31, 2018, our directors, executive officers and holders of ten percent (10%) or more of our common stock complied with Section 16(a) filing requirements applicable to them.

The Board of Directors and Committees

We seek directors with established strong professional reputations and experience in areas relevant to the strategy and operation of our businesses. We also seek directors who possess the qualities of integrity and candor, who have strong analytical skills, and who are willing to engage with the management and each other in a constructive and collaborative fashion. We also seek directors who have the ability and commitment to devote significant time and energy to service on the board and its committees. We believe that all of our directors meet the foregoing qualifications.

Based on the information submitted by Ms. Caroline Wang, Mr. Taihong Guo, and Dr. Genghua Gu, our Board of Directors has determined that each of them is independent under Rule 5605(a)(2) of The NASDAQ Listing Rules.

Our Board of Directors has three (3) committees. During the fiscal year ended March 31, 2018, our Board of Directors and its committees held the following number of meetings and took the following number of actions by unanimous written consent:

	Meetings	Unanimous written consents
Board of Directors	1	4
Audit Committee	1	1
Compensation Committee	1	2
Nominating Committee	1	1

Audit Committee

Our Audit Committee operates under a written charter, a copy of which is available on our website at <http://www.chinajodrugstores.com> under the tabs “Investor”–“Corporate Governance”–“Documents”, and is composed of our three (3) independent directors. Our Board of Directors has determined, based on information furnished by Ms. Caroline Wang and other available information, that she meets the requirements of an “audit committee financial expert” as that term is defined in the rules promulgated under the Securities Act and the Exchange Act, and has accordingly designated her as such. Our Board of Directors has also appointed her chairperson of the committee.

The responsibilities of our Audit Committee include:

meeting with our management periodically to consider the adequacy of our internal control over financial reporting and the objectivity of our financial reporting;

appointing the independent registered public accounting firm, determining the compensation of the independent registered public accounting firm, and pre-approving the engagement of the independent registered public accounting firm for audit and non-audit services;

overseeing the independent registered public accounting firm, including reviewing its independence and quality control procedures, as well as the experience and qualifications of the audit personnel that are providing audit services to us;

meeting with the independent registered public accounting firm and reviewing the scope and significant findings of the audits performed by them, and meeting with management and internal financial personnel regarding these matters; and

reviewing our financing plans, the adequacy and sufficiency of our financial and accounting controls, practices and procedures, the activities and recommendations of the auditors and our reporting policies and practices, and reporting recommendations to our full Board of Directors for approval.

Compensation Committee

Our Compensation Committee operates under a written charter, a copy of which is available on our website at <http://www.chinajodrugstores.com> under the tabs “Investor”–“Corporate Governance”–“Documents”, and is made up of our

three (3) independent directors. Taihong Guo is chairperson of the committee. Our Compensation Committee oversees and, as appropriate, makes recommendations to the Board of Directors regarding the annual salaries and other compensation of our executive officers and our employees, and other employee policies; it also provides assistance and recommendations with respect to our compensation policies and practices.

Nominating Committee

Our Nominating Committee operates under a written charter, a copy of which is available on our website at <http://www.chinajodrugstores.com> under the tabs “Investor”–“Corporate Governance”–“Documents”, and is made up of our three (3) independent directors. Genghua Gu is chairperson of the committee. Our Nominating Committee assists in the selection of director nominees, approves director nominations to be presented for stockholder approval at our annual general meeting, fills any vacancies on our Board of Directors, considers any nominations of director candidates validly made by stockholders, and reviews and considers developments in corporate governance practices.

Code of Ethics

The Company’s Code of Ethics, which applies to all officers, directors and employees, was adopted by the Board on March 15, 2010. The Code of Ethics was filed as Exhibit 14 to the Company’s Current Report on Form 8-K filed with the SEC on March 23, 2010, a copy of which is available on our website at <http://www.chinajodrugstores.com> under the tabs “Investor”–“Corporate Governance”–“Documents”.

ITEM 11. EXECUTIVE COMPENSATION.**Summary of Executive Compensation**

The following table sets forth information concerning all cash and non-cash compensation awarded to, earned by or paid to our principal executive officer and principal financial officer during the last two (2) fiscal years. No other executive officer received compensation in excess of \$100,000 during the fiscal year ended March 31, 2018.

Summary Compensation Table

Name and Principal Position	Fiscal Year ended	Salary (\$)	Bonus (\$)	Stock Awards	Option Awards	Non-Equity Incentive Plan Compensation	Nonqualified Deferred Compensation Earnings	All Other Compensation	Total (\$)
				(\$)(1)	(\$)	(\$)	(\$)	(\$)	
Lei Liu, CEO (2)(3)	2018	54,360	-0-	1,215,000	-0-	-0-	-0-	-0-	1,269,360
	2017	43,236	-0-	-0-	-0-	-0-	-0-	-0-	41,000
Ming Zhao, Current CFO (4)	2018	88,000	-0-	40,500	-0-	-0-	-0-	-0-	128,500
	2017	88,000	-0-	17,600	-0-	-0-	-0-	-0-	105,600

(1) Reflects the full fair value of stock issued during the applicable fiscal year for financial statement reporting purposes.

(2) Salary as reported is based on interbank exchange rate of RMB 6.8911 to \$1.00 on March 31, 2017 and RMB 6.6225 to \$1.00 on March 31, 2018.

(3) Mr. Liu's compensation under "Stock Awards" for the fiscal year ended March 31, 2018, comes from the restricted stock award granted to him on March 30, 2018 under the China Jo-Jo Drugstores, Inc. 2010 Equity Incentive Plan" (the "Plan"). There is no stock awards in the fiscal year ended March 31, 2017.

(4) Mr. Zhao's compensation under "Stock Awards" includes restricted shares issued granted to him on March 30, 2018 under the Plan. There is no stock awards in the fiscal year ended March 31, 2017.

Employment Agreements, Termination of Employment and Change-in-Control Arrangements

Except as described below, we currently have no employment agreements with any of our executive officers, nor any compensatory plans or arrangements resulting from the resignation, retirement or any other termination of any of our executive officers, from a change-in-control, or from a change in any executive officer's responsibilities following a change-in-control.

Agreements with Ming Zhao

We entered into an employment agreement with Mr. Zhao dated as of August 1, 2011, under which Mr. Zhao is serving as our Chief Financial Officer for a term of two years commencing August 1, 2011, for annual compensation of \$100,000, payable in monthly installments, as well as a one-time grant of 40,000 shares of our common stock (the "Shares") under our 2010 Equity Incentive Plan. The term of the employment was extended verbally for another two (2) years with an amended annual compensation of \$88,000 starting from October 2012. The term of the employment was extended verbally for another one (1) years automatically (unless providing prior notice otherwise) with an annual compensation of \$88,000 starting from October 2015. Mr. Zhao is also entitled to expense reimbursement and to be included as an insured under our directors and officers insurance policy with coverage of \$5,000,000. During his employment, Mr. Zhao is subject to certain restrictive covenants, including (i) prohibition against engaging in any work that competes with us and our business and soliciting our customers, potential customers and employees, and (ii) requirement to maintain our confidential information.

Mr. Zhao's employment agreement terminates upon his death or disability. If Mr. Zhao is unable to perform his duties for 60 days during any 12 month period, we may terminate the employment agreement upon 30-day written notice. We may also terminate the employment agreement for cause, upon notice if at any time Mr. Zhao commits (a) fraudulent, unlawful or grossly negligent conduct in connection with his employment duties; (b) willful misconduct; (c) willful and continued failure to perform his duties; (d) any felony or any crime involving moral turpitude; (e) any violation of any of our material policies; or (f) any material breach of any written agreement with us. Mr. Zhao may terminate his employment agreement immediately upon written notice if we breach our agreement with him.

TOTAL	967,000	2.50	4,520,000

Discussion of Summary Compensation and Grants of Plan-based Awards Tables

A summary of certain material terms of our existing compensation plans and arrangements is set forth below.

On September 21, 2010, our Board of Directors approved a stock incentive plan for officers, directors, employees, and consultants entitled “China Jo-Jo Drugstores, Inc. 2010 Equity Incentive Plan” (the “Plan”). The maximum number of shares that may be issued under the Plan is 2,025,000 shares of our common stock. The Plan was approved by our shareholders at our annual meeting held on November 2, 2010. On February 24, 2015, our Board of Directors adopted and approved Amendment No. 1 to the Plan to increase the number of shares of the Company’s common stock available for issuance thereunder from 2,025,000 share limit to 4,325,000 shares. The Amendment No. 1 was approved by the stockholders at the annual shareholders meeting on March 23, 2015. On January 27, 2016, our Board of Directors adopted and approved Amendment No. 2 to the Plan to increase the number of shares of the Company’s common stock available for issuance thereunder from 4,325,000 share limit to 7,175,000 shares. The Amendment No. 2 was approved by the stockholders at the annual shareholders meeting on March 23, 2016. Under the Plan, the Company may issue common stock and/or options to purchase common stock to our officers, directors, employees and consultants. The Plan is administered either by our Board of Directors or a committee that it designates comprising of at least two (2) “non-employee” directors. The board (or the committee, if one is designated) has full and complete authority, in its discretion, but subject to the express provisions of the Plan, to grant awards, to determine the number of awards to be granted and the time or times at which awards shall be granted; to establish the terms and conditions upon which awards may be exercised; to remove or adjust any restrictions and conditions upon awards; to specify, at the time of grant, provisions relating to exercisability of awards and to accelerate or otherwise modify the exercisability of any awards; and to adopt such rules and regulations and to make all other determinations deemed necessary or desirable for the administration of the Plan. On February 14, 2017, our Board of Directors adopted and approved Amendment No. 3 to the Plan to increase the number of shares of the Company’s common stock available for issuance thereunder from 7,175,000 share limit to 9,696,468 shares. The Amendment No. 3 was approved by the stockholders at the annual shareholders meeting on March 29, 2017. As of March 31, 2018, there were 3,985,836 shares of our common stock remaining available for future issuance under the Plan.

Director Compensation

The following table provides compensation information for our directors during the fiscal year ended March 31, 2018:

Director Compensation Table

Name	Fiscal Year ended March 31,	Fees Earned or Paid in Cash (\$)	Stock Awards (\$)(1)	Option Awards (\$)	Non-Equity Incentive Plan Compensation (\$)	Nonqualified Deferred Compensation Earnings (\$)	All Other Compensation (\$)	Total (\$)
Lei Liu (2)	2018	54,360	-1,215,000-	-0-	-0-	-0-	-0-	1,269,360
Li Qi (2)	2018	36,240	-0-	-0-	-0-	-0-	-0-	36,240
Caroline Wang	2018	12,080	-0-	-0-	-0-	-0-	-0-	12,080
Taihong Guo	2018	6,000	-0-	-0-	-0-	-0-	-0-	6,000
Genghua Gu	2018	6,000	-0-	-0-	-0-	-0-	-0-	6,000

(1) Reflects dollar amount expensed by the Company during the applicable fiscal year for financial statement reporting purposes.

(2) Compensation is reflected in the Summary Compensation Table on page 49 above.

We do not currently have an established policy to provide compensation to members of our Board of Directors for their services in that capacity, although we have entered into certain agreements with some of our directors as described below. We intend to develop such a policy in the near future.

Agreement with Taihong Guo

On January 1, 2013, we entered into an agreement with Mr. Guo in the form of a director offer letter, pursuant to which we have agreed to compensate him \$6,000 annually for his services, payable in monthly installments on the last day of each month. Additionally, he is entitled to be included as an insured under our directors and officers insurance policy.

Agreement with Genghua Gu

On December 9, 2013, we entered into an agreement with Dr. Gu in the form of a director offer letter, pursuant to which we have agreed to compensate him \$6,000 annually for his services, payable in monthly installments on the last day of each month. Additionally, he is entitled to be included as an insured under our directors and officers insurance policy.

Agreement with Caroline Wang

As of March 29, 2017, we entered into an agreement with Ms. Wang in the form of a director offer letter pursuant to which we agreed to compensate her \$12,080 (RMB80,000) annually for her services. Additionally, she is entitled to be included as an insured under our directors and officers insurance policy.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

Security Ownership of Certain Beneficial Owners and Management

The following table sets forth certain information regarding our common stock beneficially owned on June 21, 2018 or the latest applicable date prior to that date, for (i) each stockholder known to be the beneficial owner of five percent (5%) or more of our outstanding common stock, (ii) each executive officer and director, and (iii) all executive officers and directors as a group. To the best of our knowledge, subject to community and marital property laws, all persons named have sole voting and investment power with respect to such shares, except as otherwise noted.

Common Stock Beneficially Owned

	Number of Shares beneficially owned (2)	Percentage of class beneficially owned (3)	
Executive officers and directors: (1)			
Lei Liu, Chief Executive Officer and Chairman of the Board of Directors (4)	9,050,482	31.0	%
Ming Zhao, Chief Financial Officer	199,000	*	%
Li Qi, Secretary and Director (4)	6,409,000	22.0	%
Caroline Wang (5)	-	*	%
Taihong Guo (6)	20,000	*	%
Genghua Gu (7)	30,000	*	%
All directors and executive officers as a group (6 persons)	9,489,482	32.0	%
5% Shareholders: (1)			
1 Globe Capital LLC (8)	1,261,131	4.3	%
CareRetail Holdings Limited (9)	4,840,000	16.6	%
Super Marvel Limited (4)	6,030,000	20.7	%
Chong'an Jin (4)	6,049,000	20.7	%

* Less than 1%.

(1) Unless otherwise noted, the address for each of the named beneficial owners is: 6th Floor, Hai Wai Hai Tongxin Mansion, Gong Shu District, Hangzhou City, Zhejiang Province, China, 310008.

(2) Under Rule 13d-3, a beneficial owner of a security includes any person who, directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise has or shares: (i) voting power, which includes the power to vote, or to direct the voting of shares; and (ii) investment power, which includes the power to dispose or direct the disposition of shares. Certain shares may be deemed to be beneficially owned by more than one person (if, for example, persons share the power to vote or the power to dispose of the shares). In addition, shares are deemed to be beneficially owned by a person if the person has the right to acquire the shares (for example, upon exercise of an option) within 60 days of the date as of which the information is provided. In computing the percentage ownership of any person, the amount of shares outstanding is deemed to include the amount of shares

beneficially owned by such person (and only such person) by reason of these acquisition rights. As a result, the percentage of outstanding shares of any person as shown in this table does not necessarily reflect the person's actual ownership or voting power with respect to the number of shares of common stock actually outstanding.

- (3) Unless otherwise noted, the number and percentage of outstanding shares of common stock is based upon 29,161,778 shares outstanding as of June 21, 2018.
The address of Super Marvel Limited ("Super Marvel") is P.O. Box 957, Offshore Incorporations Centre, Road Town, Tortola, British Virgin Islands. The owners of Super Marvel are Lei Liu (39%), Li Qi (30%) and Chong'an Jin (31%). They are also its directors. As such, they are deemed to have or share investment control over Super Marvel's portfolio. According to Rule 13d-5, when two or more persons agree to act together for the purpose of
- (4) acquiring, holding, voting or disposing of equity securities of an issuer, the group formed thereby shall be deemed to have acquired beneficial ownership, for purposes of sections 13(d) and (g) of the Exchange Act, as of the date of such agreement, of all equity securities of that issuer beneficially owned by any such persons. As a result, 6,030,000 shares of common stock held by Super Marvel reported herein as beneficially owned by each of Mr. Liu, Ms. Qi and Mr. Jin, which they in turn own indirectly through their respective ownership of Super Marvel.
- (5) Ms. Wang's address is: 3601B The Center, Changle Road, Xuhui District, Shanghai, China.
- (6) Mr. Guo's address is: 7th Floor, Qingchunbao Group, No. 555 Xixi Road, Hangzhou, China.
- (7) Dr. Gu's address is: No.1, Xueshi Road, Hangzhou, China.
- (8) Based on Schedule 13G filed with the SEC on February 15, 2017.
Based on Form 3 filed with the SEC by Hillhouse Capital Management, Ltd. (Hillhouse Capital) on January 30, 2017, Mr. Lei Zhang, may be deemed to have controlling power over Hillhouse Capital, the sole beneficial owner of CareRetail Holdings Limited ("CareRetail"). Mr. Lei Zhang disclaims beneficial ownership of all of the shares held by CareRetail, except to the extent of his pecuniary interest therein.
- (9)

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS.

Our Officers and Directors' Relationship with Us, Our Subsidiaries and VIE

As described in " *Business - Our Corporate History and Structure* " above, we control HJ Group through contractual arrangements between Jiuxin Management, our wholly-owned subsidiary, and each of Jiuzhou Pharmacy, Jiuzhou Service and Jiuzhou Clinic. HJ Group is owned by Mr. Lei Liu, Mr. Li Qi and Mr. Chong'an Jin (the "Key Personnel"), two (2) of whom also hold positions as our executive officers and/or directors. Because the Key Personnel also collectively own a substantial amount of our issued and outstanding common stock, we believe that our interests are aligned with those of HJ Group and the Key Personnel. However, see " *Risk Factors - Risks Related to Our Corporate Structure - Our contractual arrangements with HJ Group and the Key Personnel may not be as effective in providing control over these entities as direct ownership,*" and " *Management members of HJ Group have potential conflicts of interest with us, which may adversely affect our business and your ability for recourse.*"

Other Related Party Transactions

	March 31, 2018	March 31, 2017
Due to a director and CEO (1):	850,342	927,052

(1) Due to foreign exchange restrictions, the Company's director and CEO, Mr. Lei Liu personally lent U.S. dollars to the Company to facilitate its payments of expenses in the United States.

On October 11, 2016, the Company issued a total of 949,000 shares of common stock to Lei Liu, at \$1.69 per share, the fair market value, or the closing stock price on Nasdaq on October 11, 2016, to offset the debts in the amount of \$1,603,810 owed to Mr. Liu.

The Company leases from Mr. Lei Liu a retail space. The lease will expire in September 2018. The rent for the year ended March 31, 2018 has not been paid to Mr. Liu as of March 31, 2018.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES.

Our current principal independent auditor is BDO China Shu Lun Pan Certified Public Accountants LLP (“BDO China”) whom we engaged on April 7, 2015. The following table shows the fees for audit and other services provided by BDO China in relation to our 2018 and 2017 fiscal years:

	For the Fiscal	
	Years ended	
	March 31,	
	2018	2017
Audit Fees (1)	\$225,000	\$220,000
Audit-Related Fees (2)	-	-
Tax Fees (3)	-	-
All Other Fees (4)	-	-
Total	\$225,000	\$220,000

Audit Fees: This category includes the audit of our annual financial statements, review of financial statements included in our Quarterly Reports on Form 10-Q, and services that are normally provided by independent auditors (1) in connection with statutory and regulatory filings or the engagement for fiscal years. This category also includes advice on audit and accounting matters that arose during, or as a result of, the audit or the review of interim financial statements.

Audit-Related Fees: This category consists of assurance and related services by our independent auditors that are (2) reasonably related to the performance of the audit or review of our financial statements and are not reported above under “Audit Fees.”

Tax Fees: This category consists of professional services rendered by our independent auditors for tax compliance (3) and tax advice. The services for the fees disclosed under this category include tax return preparation and technical tax advice.

(4) **All Other Fees:** This category consists of fees for other miscellaneous items.

Pre-Approval Policies and Procedures of the Audit Committee

The Audit Committee approves the engagement of our independent auditors and is also required to pre-approve all audit and non-audit expenses. Prior to engaging its accountants to perform particular services, the Audit Committee obtains an estimate for the service to be performed. All of the services described above were approved by the Audit Committee in accordance with its procedure.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES.

REPORT OF INDEPENDENT REGISTERED ACCOUNTING FIRM

Board of Directors

China Jo-Jo Drugstores, Inc.

Carson City, Nevada

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of China Jo-Jo Drugstores, Inc. (the “Company”) and subsidiaries as of March 31, 2018 and 2017, the related consolidated statements of income and comprehensive income, stockholders’ equity, and cash flows for each of the three years in the period ended March 31, 2018, and the related notes. In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company and subsidiaries at March 31, 2018 and 2017, and the results of their operations and their cash flows for each of the three years in the period ended March 31, 2018 and 2017, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the

consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ BDO China Shu Lun Pan Certified Accountants LLP

We have served as the Company's auditor since year 2015.

Shanghai, People's Republic of China

The accompanying notes are an integral part of these consolidated financial statements.

Note 1 – DESCRIPTION OF BUSINESS AND ORGANIZATION

China Jo-Jo Drugstores, Inc. (“Jo-Jo Drugstores” or the “Company”), was incorporated in Nevada on December 19, 2006, originally under the name “Kerrisdale Mining Corporation”. On September 24, 2009, the Company changed its name to “China Jo-Jo Drugstores, Inc.” in connection with a share exchange transaction as described below.

On September 17, 2009, the Company completed a share exchange transaction with Renovation Investment (Hong Kong) Co., Ltd. (“Renovation”), whereby 7,900,000 shares of common stock were issued to the stockholders of Renovation in exchange for 100% of the capital stock of Renovation. The completion of the share exchange transaction resulted in a change of control. The share exchange transaction was accounted for as a reverse acquisition and recapitalization and, as a result, the consolidated financial statements of the Company (the legal acquirer) are, in substance, those of Renovation (the accounting acquirer), with the assets and liabilities, and revenues and expenses, of the Company being included effective from the date of the share exchange transaction. Renovation has no substantive operations of its own except for its holdings of Zhejiang Jiuxin Investment Management Co., Ltd. (“Jiuxin Management”), Zhejiang Shouantang Medical Technology Co., Ltd. (“Shouantang Technology”) and Hangzhou Jiutong Medical Technology Co., Ltd (“Jiutong Medical”), Hangzhou Jiuyi Medical Technology Co. Ltd. (“Jiuyi Technology”), its wholly-owned subsidiaries.

The Company is an online and offline retailer and wholesale distributor of pharmaceutical and other healthcare products in the People’s Republic of China (“China” or the “PRC”). The Company’s offline retail business is comprised primarily of pharmacies, which are operated by Hangzhou Jiuzhou Grand Pharmacy Chain Co., Ltd. (“Jiuzhou Pharmacy”), a company that the Company controls through contractual arrangements. On March 31, 2017, Jiuxin Management established a subsidiary, Lin’ An Jiuzhou Pharmacy Co., Ltd (“Lin’ An Jiuzhou”) to operate drugstores in Lin’an City. During the year ending March 31, 2018, Jiuzhou Pharmacy established the following companies, each of which operates a drugstore in Hangzhou City:

Entity Name	Date Established
Hangzhou Jiuben Pharmacy Co., Ltd (“Jiuben Pharmacy”)	April 27, 2017
Hangzhou Jiuli Pharmacy Co., Ltd (“Jiuli Pharmacy”)	May 22, 2017
Hangzhou Jiuxiang Pharmacy Co., Ltd (“Jiuxiang Pharmacy”)	May 26, 2017
Hangzhou Jiuhe Pharmacy Co., Ltd (“Jiuhe Pharmacy”)	June 6, 2017
Hangzhou Jiujiu Pharmacy Co., Ltd (“Jiujiu Pharmacy”)	June 8, 2017
Hangzhou Jiuyi Pharmacy Co., Ltd (“Jiuyi Pharmacy”)	June 8, 2017

Hangzhou Jiuyuan Pharmacy Co., Ltd (“Jiuyuan Pharmacy”) July 13, 2017

Hangzhou Jiumu Pharmacy Co., Ltd (“Jiumu Pharmacy”) July 21, 2017

Hangzhou Jiurui Pharmacy Co., Ltd (“Jiurui Pharmacy”) August 4, 2017

The Company’s offline retail business also includes three medical clinics through Hangzhou Jiuzhou Clinic of Integrated Traditional and Western Medicine (“Jiuzhou Clinic”) and Hangzhou Jiuzhou Medical and Public Health Service Co., Ltd. (“Jiuzhou Service”), both of which are also controlled by the Company through contractual arrangements. On December 18, 2013, Jiuzhou Service established, and held 51% of, Hangzhou Shouantang Health Management Co., Ltd. (“Shouantang Health”), a PRC company licensed to sell health care products. Shouantang Health was closed in April 2015. In May 2016, Hangzhou Shouantang Bio-technology Co., Ltd. (“Shouantang Bio”) set up and held 49% of Hangzhou Kahamadi Bio-technology Co., Ltd. (“Kahamadi Bio”), a joint venture specialized in brand name development for nutritional supplements.

The Company currently conducts its online retail pharmacy business through Jiuzhou Pharmacy, which holds the Company’s online pharmacy license. Prior to November 2015, the Company primarily conducted its online retail pharmacy business through Zhejiang Quannuo Internet Technology Co., Ltd. In May 2015, the Company established Zhejiang Jianshun Network Technology Co. Ltd, a joint venture with Shanghai Jianbao Technology Co., Ltd. (“Jianshun Network”), in order to develop its online pharmaceutical sales from large commercial medical insurance companies. However, as the strategic cooperation with Yikatong ceased, Jianshun Network was dissolved. On September 10, 2015, Renovation set up a new entity Jiuyi Technology to provide additional technical support such as webpage development to our online pharmacy business. In November 2015, the Company sold all of the equity interests of Quannuo Technology to six individuals for approximately \$17,121 (RMB107,074). After the sale, its technical support function has been transferred back to Jiuzhou Pharmacy, which hosts our online pharmacy.

The Company’s wholesale business is primarily conducted through Zhejiang Jiuxin Medicine Co., Ltd. (“Jiuxin Medicine”), which is licensed to distribute prescription and non-prescription pharmaceutical products throughout China. Jiuzhou Pharmacy acquired Jiuxin Medicine on August 25, 2011.

The Company’s herb farming business is conducted by Hangzhou Qianhong Agriculture Development Co., Ltd. (“Qianhong Agriculture”), a wholly-owned subsidiary of Jiuxin Management, which operates a cultivation project of herbal plants used for traditional Chinese medicine (“TCM”).

The accompanying consolidated financial statements reflect the activities of the Company and each of the following entities:
