### Forward-Looking Statements

Certain information included in this report, other materials filed or to be filed by the Company with the Securities and Exchange Commission (“SEC”), as well as information included in oral statements or other written statements made or to be made by the Company contain or incorporate by reference certain statements (other than statements of historical or present fact) that constitute “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934.

All statements, other than statements of historical or present facts, that address activities, events, outcomes or developments that the Company plans, expects, believes, assumes, budgets, predicts, forecasts, estimates, projects, intends or anticipates (and other similar expressions) will or may occur in the future are forward-looking statements. These forward-looking statements are based on management’s current belief, based on currently available information, as to the outcome and timing of future events. When considering forward-looking statements, you should keep in mind the cautionary statements in this Form 10-Q and the Company’s Annual Report on Form 10-K/A for the year ended December 31, 2006. Such forward-looking statements appear in a number of places and include statements with respect to, among other things, such matters as: future capital, development and exploration expenditures (including the amount and nature thereof), drilling, deepening or refracing of wells, oil and natural gas reserve estimates (including estimates of future net revenues associated with such reserves and the present value of such future net revenues), estimates of future production of oil and natural gas, business strategies, expansion and growth of the Company’s operations, cash flow and anticipated liquidity, prospects and development and property acquisitions, obtaining financial or industry partners for prospect or program development, or marketing of oil and natural gas. We caution you that these forward-looking statements are subject to risks and uncertainties. These risks include but are not limited to: general economic conditions, the Company’s ability to finance acquisitions and drilling, the market price of oil and natural gas, the risks associated with exploration, the Company’s ability to find, acquire, market, develop and produce new properties, operating hazards attendant to the oil and natural gas business, uncertainties in the estimation of proved reserves and in the projection of future rates of production and timing of development expenditures, the strength and financial resources of the Company’s competitors, the Company’s ability to find and retain skilled personnel, climatic conditions, labor relations, availability and cost of material and equipment, environmental risks, the results of financing efforts, regulatory developments and the other risks described in the

Company's Annual Report on Form 10-K/A for the year ended December 31, 2006.

2

---

Reserve engineering is a subjective process of estimating underground accumulations of oil and natural gas that cannot be measured in an exact way. The accuracy of any reserve estimate depends on the quality of available data and the interpretation of that data by reserve engineers. In addition, the results of drilling, testing and production activities may justify revisions of estimates that were made previously. If significant, these revisions could change the schedule of any further production and/or development drilling. Accordingly, reserve estimates are generally different from the quantities of oil and natural gas that are ultimately recovered.

In addition, the Company is in a transition period, with the Company considering various “going forward” proposals that may materially alter the financing, structure, and core business of the Company, which may in turn, significantly affect current estimates or projections.

Should one or more of the risks or uncertainties described above or elsewhere in this Form 10-Q or presented in the Company’s Annual Report on Form 10-K/A for the year ended December 31, 2006 occur, or should underlying assumptions prove incorrect, actual results and plans could differ materially from those expressed in any forward-looking statements. We specifically disclaim all responsibility to publicly update any information contained in a forward-looking statement or any forward-looking statement in its entirety and therefore disclaim any resulting liability for potentially related damages.

All forward-looking statements attributable to us are expressly qualified in their entirety by this cautionary statement.

## **PART I. UNAUDITED FINANCIAL INFORMATION**

### **ITEM 1. UNAUDITED FINANCIAL STATEMENTS**

The financial statements included herein have been prepared in conformity with generally accepted accounting principles. The statements are unaudited but reflect all adjustments, which, in the opinion of management, are necessary to fairly present the Company’s financial position and results of operations. All such adjustments are of a normal recurring nature.

**CROFF ENTERPRISES, INC.**  
**NOTES TO UNAUDITED CONDENSED FINANCIAL STATEMENTS**

*Basis of Preparation*

The condensed financial statements for the three and six month periods ended June 30, 2006 and 2007 in this report have been prepared by the Company without audit pursuant to the rules and regulations of the Securities and Exchange Commission and reflect, in the opinion of the management, all adjustments necessary to present fairly the results of the operations of the interim periods presented herein. Certain information in footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted pursuant to such rules and regulations, although the Company believes the disclosures presented herein are adequate to make the information presented not misleading. It is suggested that these condensed financial statements be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K/A for the year ended December 31, 2006, which report has been filed with the Securities and Exchange Commission. The Annual Report is available from the Company's website at [www.croff.com](http://www.croff.com), and online at the Securities and Exchange Commission website at [www.sec.gov/edgar](http://www.sec.gov/edgar).

**ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS  
2. OF OPERATIONS**

*Overview*

Croff Enterprises, Inc. ("Croff" or the "Company") was incorporated in Utah in 1907. Croff is an independent energy company engaged in the business of oil and natural gas exploration and production, primarily through the acquisition of producing oil and natural gas leases as well as the ownership of perpetual mineral interests. Other companies operate almost all of the wells from which Croff receives revenues and Croff has no control over the factors which determine royalty or working interest revenues, such as markets, prices and rates of production. Today, Croff participates as a working interest owner in approximately 40 wells or units of several wells. Croff holds small royalty interests in approximately 212 wells.

*Summary of Current Events – Primarily Termination of the Tiayuan Rongan Business Trading Company Ltd. Acquisition Agreement*

Croff Enterprises, Inc. announced on December 14, 2006, a Stock Exchange Agreement (providing for shareholder approval) providing for the majority acquisition of the Tiayuan Rongan Business Trading Company Limited, hereafter "TRBT", a Chinese company, which operates shopping malls, located in the city of Taiyuan, Shanxi Province, in the Peoples Republic of China. The stock for stock equivalent Exchange Agreement (hereafter "exchange agreement") provided for a change in control of Croff, a change in the business of Croff, and new management team. As part of that agreement, Croff was to cancel its Preferred B stock by exchanging all Preferred B assets (oil and gas assets and cash) in exchange for all (67.2%) of the Preferred B shares of the principal shareholder. The 67.2% of the Preferred B shares held by C. S. Financial LLC and Jensen Development Company, which are owned by Croff's Chairman, Gerald L. Jensen, would be exchanged for 67.2% of the assets and the balance of the Preferred B assets purchased for \$600,000.

On June 1, 2007, Croff Enterprises, Inc. announced that it had terminated the exchange agreement with "TRBT". The agreement was cancelled due to the failure of TRBT to timely supply qualifying financial statements to complete the proxy process and to comply with reporting requirements of a public company. As part of the "TRBT" agreement, Croff had agreed to cancel all of its Preferred B shares and sell the remaining 32.8% of its oil and gas assets not held by the principal shareholders in return for receiving all of the principal shareholders Preferred B shares constituting 67.2% of all Preferred B shares and the sum of \$600,000.

Subsequent to the cancellation of the “TRBT” Exchange Agreement, the Board appointed an Independent Committee to determine whether to seek the continuation of the Preferred B sale and pursue other strategic alternatives. The Independent Committee was constituted on June 15, 2007. The Independent Committee is reviewing the strategic options available to the Company with the goals of simplifying the corporate structure, becoming a larger company and lowering the costs of compliance for a small public company.

#### *Critical Accounting Policies and Estimates*

The Company’s discussion and analysis of its financial condition and results of operation are based upon financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. The Company analyzes its estimates, including those related to oil and natural gas revenues, oil and natural gas properties, marketable securities, income taxes and contingencies.

The Company bases its estimates on historical experience and various other assumptions that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. The Company believes the following critical accounting policies affect its more significant judgments and estimates used in the preparation of its financial statements and the uncertainties that it could impact results of operations, financial conditions and cash flows. The Company accounts for its oil and natural gas properties under the successful efforts method of accounting. Depletion, depreciation and amortization of oil and natural gas properties and the periodic assessments for impairment are based on underlying oil and natural gas reserve estimates and future cash flows using then current oil and natural gas prices combined with operating and capital development costs. There are numerous uncertainties inherent in estimating quantities of proved oil and natural gas reserves and in projecting future rates of production and timing of development expenditures. Historically, oil and natural gas prices have experienced significant fluctuations and have been particularly volatile in recent years. Price fluctuations can result from variations in weather, levels of regional or national production and demand, availability of transportation capacity to other regions of the country and various other factors. Increases or decreases in oil and natural gas prices received could have a significant impact on future results.

#### *Liquidity and Capital Resources*

At June 30, 2007, the Company had assets of \$1,924,495 and current assets totaled \$1,170,118 compared to current liabilities of \$49,420. Working capital at June 30, 2007 totaled \$1,120,698 an increase of 13% compared to \$995,498 at December 31, 2006. The Company had a current ratio at June 30, 2007 of approximately 24:1. During the six month period ended June 30, 2007, net cash provided by operations totaled \$88,045, as compared to \$127,072 for the same period in 2006. This decrease was primarily due to reduction of current liabilities in 2007. The Company’s cash flow from operations is highly dependent on oil and natural gas prices. The Company had no short-term or long-term debt outstanding at June 30, 2007.

Capital expenditures in the second quarter included \$22,845 paid for completion of the Shriners II well which was started in 2006. This well is currently producing. The Company’s plans for ongoing development, acquisition and exploration expenditures, and possible equity repurchases over and beyond the Company’s operating cash flows will depend entirely on the Company’s ability to secure acceptable financing, and reasonably priced opportunities. Bank borrowings may be utilized to finance the Company’s 2007 capital budget. In addition, the Company will utilize its internal operating cash flows. Future cash flows are subject to a number of variables, including the level of production and oil and natural gas prices. There can be no assurance that operations and other capital resources will provide cash in sufficient amounts to maintain planned levels of capital expenditures or that increased capital expenditures will be undertaken.

The Company believes that borrowings from financial institutions, projected operating cash flows and the cash on hand will be sufficient to cover its working capital requirements for the next 12 months, if continuing its current oil and gas activities. In connection with consummating any significant acquisition or funding an exploratory or development drilling program, additional debt or equity financing will be required, which may or may not be available on terms that are acceptable to the Company.

9

---

While certain costs are affected by the general level of inflation, factors unique to the oil and natural gas industry result in independent price fluctuations. Over the past five years, significant fluctuations have occurred in oil and natural gas prices. Although it is particularly difficult to estimate future prices of oil and natural gas, price fluctuations have had, and will continue to have, a material effect on the Company. Overall, it is management's belief that inflation is generally favorable to the Company since it does not have significant operating expenses.

### *Results of Operations*

#### *Three months ended June 30, 2007 compared to three months ended June 30, 2006.*

The Company had a net income for the second quarter of 2007 which totaled \$65,946 compared to a net income of \$78,317 for the same period in 2006. This decrease in income from 2006 was due to lower prices for natural gas, higher lease operating expenses, and higher general and administrative expenses. The company expects lease operating expenses to remain relatively stable and general and administrative expenses to be higher due to strategic corporate changes.

Revenues for the second quarter of 2007 totaled \$225,831, a slight increase from the same period in 2006. Oil and natural gas sales for the second quarter of 2007 totaled \$211,792, a 1.3% increase from the same period in 2006. Increased oil prices were mostly offset with lower natural gas prices in the current quarter. The Company's average sales price of oil in the second quarter of 2007 was slightly higher than the same period in 2006. The Company's average sales price of natural gas in the second quarter of 2006 was approximately \$5.50 per Mcf (Mcf equates to one thousand cubic feet). The price in the second quarter of 2007 was approximately \$5.00 per Mcf.

For the second quarter of 2007, lease operating expenses, which include all production related taxes, totaled \$62,927 compared to \$57,469 incurred for the same period in 2006. This increase was primarily due to inflation in oil service pricing in 2007.

Estimated depreciation and depletion expense for the second quarter of 2007 totaled \$12,500 and for 2006, totaled \$12,500.

General and administrative expense, including overhead expense paid to a related party, for the second quarter of 2007, totaled \$52,844 compared to \$44,000 for the same period in 2006. This increase related primarily to the higher costs incurred in the TRBT acquisition and proxy. The Company has incurred additional costs during the second quarter in both 2006 and 2007, associated with compliance with the Sarbanes-Oxley Act of 2002.

Provision for income taxes for the second quarter of 2007 totaled \$30,000 compared to \$23,000 for the same period in 2006. This increase is primarily attributable to the expiration of offsetting tax loss carry forwards in 2007 and being in a higher tax bracket.

#### *Six Months ended June 30, 2007 compared to the six months ended June 30, 2006.*

Revenues for the six months ended June 30, 2007 totaled \$ 447,309 essentially equal with revenues of \$448,985 at June 30, 2006. Net income for the six months ended June 30, 2007 and 2006 totaled \$119,818 and \$136,123 respectively. This decrease in the net income was primarily due to a higher provision for income taxes.

Oil and gas sales for the six months ended June 30, 2007 totaled \$422,121 a 3% decrease from the \$435,106 for the same period in 2006. This slight decrease in oil and gas sales in 2007 compared to 2006 is primarily attributed to a decrease in natural gas prices.

Lease operation expense which includes all production related taxes for the six months ended June 30, 2007 totaled \$138,423 an 11% increase from \$123,158 in 2006. This increase was primarily due to higher oilfield service costs in 2007.

Depletion and depreciation expense for the six months ended June 30, 2007 totaled \$25,000 from the sum of \$24,500 incurred for the same period in 2006. This increase was due to the small increase in producing assets in 2007.

General and administrative expenses, including overhead expense paid to related party, for the six months ended June 30, 2007 totaled \$108,841 compared to \$123,270 for the same period in 2006. Overhead expense paid to related party for the six months ended June 30, 2007 totaled \$24,180 compared to \$24,444 incurred for the same period in 2006. The decrease in overhead expenses is primarily attributed to timing of professional fees in the cancelled TRBT acquisition. The Company has also incurred additional costs during both 2006 and 2007 with respect to strategic planning.[This should conform to the quarter above]

Provision for income taxes for the six months ending June 30, 2007 totaled \$52,000 compared to \$39,000 from the same period in 2006. This increase is primarily attributable to the expiration of offsetting tax loss carry forwards in 2007 and being in a higher tax bracket.

### **ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

The Company's major current market risk exposure is in crude oil and natural gas prices. Realized pricing is primarily driven by the prevailing domestic price for oil and natural gas. Historically, prices received for oil and natural gas production have been volatile and unpredictable. Pricing volatility is expected to continue. Natural gas price realizations for the Six months ended June 30, 2007, ranged from a monthly low of approximately \$3.50 per Mcf to a monthly high of approximately \$8 per Mcf. Oil prices ranged from a monthly low of approximately \$55 per barrel to a monthly high of approximately \$70 per barrel. A decline in prices of oil or natural gas could have a material adverse effect on the Company's financial condition and results of operations. For the six months ended June 30, 2007, a 10% reduction in oil and natural gas prices would have reduced revenues by approximately \$42,000.

### **ITEM 4. CONTROLS AND PROCEDURES**

As of June 30, 2007, our Chief Executive Officer and Chief Financial Officer (the "Certifying Officers") conducted evaluations of our disclosure controls and procedures. As defined under Sections 13a-15(e) and 15d-15(e) of the Exchange Act, the term "disclosure controls and procedures" means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including the Certifying Officers, to allow timely decisions regarding required disclosure. Based on this evaluation, the Certifying Officers have concluded that our disclosure controls and procedures were effective to ensure that material information is recorded, processed, summarized and reported by our management on a timely basis in order to comply with our disclosure obligations under the Exchange Act, and the rules and regulations promulgated thereunder.

**PART II. OTHER INFORMATION**

**ITEM 5. SUBSEQUENT EVENTS**

(a) On August 15, 2007, Jennifer Miller resigned as the chief accounting officer and secretary of the corporation. The Board expects to appoint a new officer at its next meeting.

(b) Within the next five days, the company intends to file an Amended 10-K to correct what the Company regards as certain technical accounting disclosure matters. In all events, the Company does not believe that the accounting changed any of the actual performance data, such as revenues, net earnings or balance sheet data, but were made primarily to conform the categorizations and descriptions of certain financial information as requested by the SEC. Further, the Company does not intend to, for the foregoing reasons, restate any of its prior financial statements or prior filings. Any person wishing to obtain a listing of and directory to the specific amendments in the financial data and narrative information within the 10-K/A may obtain a copy identifying those changed sections from the Company upon written request.
