Franklin Templeton Investments

GAIN FROM OUR PERSPECTIVE(R)

Franklin Templeton's distinct multi-manager structure combines the specialized expertise of three world-class investment management groups--Franklin, Templeton and Mutual Series.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

SPECIALIZED EXPERTISE

Each of our portfolio management groups operates autonomously, relying on its own research and staying true to the unique investment disciplines that underlie its success.

FRANKLIN. Founded in 1947, Franklin is a recognized leader in fixed income investing and also brings expertise in growth- and value-style U.S. equity investing.

TEMPLETON. Founded in 1940, Templeton pioneered international investing and, in 1954, launched what has become the industry's oldest global fund. Today, with offices in over 25 countries, Templeton offers investors a truly global perspective.

MUTUAL SERIES. Founded in 1949, Mutual Series is dedicated to a unique style of value investing, searching aggressively for opportunity among what it believes are undervalued stocks, as well as arbitrage situations and distressed securities.

TRUE DIVERSIFICATION

Because our management groups work independently and adhere to different investment approaches, Franklin, Templeton and Mutual Series funds typically have distinct portfolios. That's why our funds can be used to build truly diversified allocation plans covering every major asset class.

RELIABILITY YOU CAN TRUST

At Franklin Templeton Investments, we seek to consistently provide investors with exceptional risk-adjusted returns over the long term, as well as the reliable, accurate and personal service that has helped us become one of the most trusted names in financial services.

A Message from Gregory E. Johnson,
President and Chief Executive Officer of Franklin Resources, Inc.

October 31, 2008

Dear Shareholder:

The enclosed semiannual report for Franklin Templeton Limited Duration Income Trust covers the six months ended September 30, 2008, but I would like to add some comments on market events that occurred in October. Recent market volatility has been jarring to everyone, including those of us who have worked in financial markets for many years. Bank lending around the world has seized up, and the fallout has impacted venerable firms alongside broader stock and bond indexes.

This environment is bound to provoke great concern, but it's equally important to put the latest market developments in perspective. That's why I'd like to offer a few thoughts on these events, our company's approach to investing and the strong health of our organization.

A key point to recognize is that global financial turmoil is being addressed by global action. Central banks around the world have coordinated their efforts to cut interest rates and supply liquidity to frozen funding markets. A number of governments have also intervened to rescue major financial institutions or find an orderly way for them to be acquired. Here in the U.S., the Federal Reserve and Treasury Department have moved rapidly to establish new programs for easing money market pressures and handling troubled financial assets. The outcome of all these efforts may take a while to be realized, but I believe the latest actions here and abroad mark a significant turning point for global capital markets.

Not part of the semiannual report | 1

It's also important to remember that as daunting as current market conditions may be, we have navigated through other periods of market volatility. U.S. stock markets recorded three bear markets during the 1960s as the nation grappled with the Vietnam War and a turbulent economy.(1) The quintupling of oil prices in 1973 led to a deep U.S. recession and a stock market plunge of 45.1% from January 1973 through December 1974.(1) And the "Black Monday" stock market crash of 1987 remains the largest single-day percentage decline in the history of the Dow Jones Industrial Average.(2)

Advice applicable throughout these upheavals remains true today. The late Sir John Templeton, writing 15 years ago, ended a list of his core investment principles with these thoughts: "Do not be fearful or negative too often. . . . For 100 years optimists have carried the day in U.S. stocks. Even in the dark '70s, many professional money managers -- and many individual investors too -- made money in stocks In this century or the next it's still 'Buy low, sell high.'"(3)

Sir John knew these simple concepts were difficult to execute in the face of pessimism. Nonetheless, that is precisely how our Franklin, Templeton and Mutual Series portfolio managers are contending with today's challenging environment. They are using their expertise to sort through investment opportunities, avoiding those firms that have become merely cheap and identifying those firms

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

best positioned to be eventual winners. This kind of rigorous, bottom-up, security-by-security analysis is the fundamental investment discipline practiced across our global platform.

These asset management strengths are also the core of our business. Unlike financial firms that have dominated recent headlines, Franklin Templeton derives its revenue primarily from investment management, not investment banking or securities brokerage. Additionally, our assets under management are diversified by investment objective, clientele and geographic region. Diversified positioning helps our firm maintain healthy operating margins even when volatile markets reduce assets under management. It is also important to note that maintaining a strong balance sheet has been a pillar of our management strategy. We have a substantial pool of cash and investments and low levels of debt, and we are in the enviable position of not having to depend on credit to meet our operating needs. In fact, our strong franchise, sound capitalization

2 | Not part of the semiannual report

and minimal leverage led Standard & Poor's to recently raise its credit ratings on Franklin Resources, Inc. (BEN) to the highest level currently applied to a publicly traded asset manager.(4)

Franklin Templeton's six-decade growth into a premier global asset manager has given us the conviction that although conditions remain challenging, there are ample reasons to be optimistic about eventual market stabilization and recovery. Being able to take advantage of markets shaken by maximum pessimism has helped our firm develop into an organization that stretches across 29 countries and manages assets for more than 20 million shareholder accounts.

In the enclosed semiannual report for Franklin Templeton Limited Duration Income Trust, the portfolio managers discuss market conditions, investment decisions and Fund performance during the six months ended September 30, 2008. The report contains additional performance data and financial information. Our website, FRANKLINTEMPLETON.COM, offers more timely discussions, daily prices, portfolio holdings and other information. We encourage you to discuss your concerns with your financial advisor, who can review your overall portfolio, reassess your goals and help you stay focused on the long term. As times like these illustrate, all securities markets fluctuate, as do fund share prices.

We are grateful for the trust you have placed in Franklin Templeton and remain focused on serving your investment needs.

Sincerely,

/s/ Gregory E. Johnson

Semiannual Report

Franklin Templeton
Limited Duration Income Trust

YOUR FUND'S GOALS AND MAIN INVESTMENTS: Franklin Templeton Limited Duration Income Trust seeks to provide high, current income, with a secondary objective of capital appreciation to the extent it is possible and consistent with the Fund's primary objective, through a portfolio consisting primarily of high yield corporate bonds, floating rate bank loans and mortgage- and other asset-backed securities.

Dear Shareholder:

This semiannual report for Franklin Templeton Limited Duration Income Trust covers the period ended September 30, 2008.

PERFORMANCE OVERVIEW

For the six months under review, Franklin Templeton Limited Duration Income Trust had cumulative total returns of -4.88% based on net asset value and -20.09% based on market price. Net asset value decreased from \$12.85 per share on March 31, 2008, to \$11.78 at period-end, and the market price fell from \$10.94 to \$8.36 over the same time. You can find the Fund's performance data in the Performance Summary on page 10.

ECONOMIC AND MARKET OVERVIEW

During the six months under review, financial market conditions deteriorated sharply, weighing heavily on the U.S. economy as the credit crisis that originated in the U.S. housing market worsened. Job losses mounted and the unemployment rate rose to 6.1% during the reporting period.⁽¹⁾ Home prices continued to fall and default rates rose as wages remained essentially flat. Waning consumer confidence led to a pullback in consumer spending as the impact of the government's tax rebates dissipated. These factors as well as upward inflationary pressures from a weak U.S. dollar and high food, energy and commodity

4 | Semiannual Report

prices burdened the overall economy. The economy grew at a 2.8% annualized rate in the second quarter of 2008 but contracted in the third quarter at a -0.3% estimated annualized rate.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

Oil prices soared to a record high in July, rising above \$145 per barrel, before dramatically retreating to \$101 by period-end. Many other commodities such as agricultural products and precious and base metals followed similar trends. September's inflation rate was an annual 4.9%, largely due to higher food and energy costs. Core inflation, which excludes such costs, rose at a more moderate 2.5% annual rate; however, this level was above the Federal Reserve Board's (Fed's) informal target range of 1.5%-2.0%.⁽¹⁾ The core personal consumption expenditures price index reported a 12-month increase of 2.4%.⁽²⁾

Amid a series of events that included massive government intervention and emergency funding, the Fed was focused primarily on restoring liquidity and confidence to unsettled financial markets. The Fed cut interest rates twice over the six-month period, bringing the federal funds target rate to 2.00%, and it implemented a series of unconventional measures aimed at easing strained credit conditions. The U.S. Treasury Department also agreed to temporarily guarantee money market funds against losses after the Reserve Primary Fund and two others "broke the buck," falling below one dollar in value. In the final days of the reporting period, U.S. Treasury Secretary Henry Paulson and Fed Chairman Ben Bernanke proposed a \$700 billion bailout plan intended to save the financial system.

Volatility remained high throughout the reporting period but intensified in September as stocks fluctuated wildly and Treasury prices soared. Panicked investors drove the yield on the three-month Treasury bill to a multi-decade low, and LIBOR rates, which banks charge each other for loans, jumped to record highs. Although fixed income spreads were generally wide relative to Treasury yields over the period due to heightened market turbulence, two-, five- and 10-year Treasury yields increased, with the two-year bill yielding 2.00% at the end of September, up from 1.62% six months earlier. Over the same period, the 10-year U.S. Treasury note yield rose from 3.45% to 3.85%. The yield curve steepened and the spread between the two-year Treasury yield and the 10-year Treasury yield increased to 185 basis points (100 basis points equal one percentage point) at the end of September from 38 basis points at the beginning of the reporting period as investors sought the relative safety of short-term U.S. Treasury securities.

PORTFOLIO BREAKDOWN

Based on Total Investments as of 9/30/08*

(BAR CHART)

Floating Rate Loans	36.2%
Mortgage-Backed Securities	27.1%
High Yield Corporate Bonds	25.1%
Other Asset-Backed Securities & Commercial Mortgage-Backed Securities	4.9%
Investment Grade Corporate Bonds	3.1%
Foreign Government & Agency Securities	2.6%
Short-Term Investments & Other Net Assets	1.0%

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

- * Total investments include long-term and short-term investments and other net assets excluding preferred stock issued by the Fund and other financial leverage.

INVESTMENT STRATEGY

We invest in a diversified mix of fixed income securities, primarily high yield corporate bonds, senior secured floating rate bank loans, and mortgage- and other asset-backed securities. Our top-down analysis of macroeconomic trends combined with a bottom-up fundamental analysis of market sectors, industries and issuers drives our investment process. We seek to maintain a limited duration, or interest rate sensitivity, to moderate the impact that fluctuating interest rates might have on the Fund's fixed income portfolio. Within the corporate bond and bank loan sectors, we seek securities trading at reasonable valuations from issuers with characteristics such as strong market positions, stable cash flows, reasonable capital structures, supportive asset values, strong sponsorship and improving credit fundamentals. In the mortgage- and other asset-backed securities sector, we look to capture an attractive income stream and total return through our analysis of security prepayment assumptions, pricing inefficiencies and underlying collateral characteristics.

MANAGER'S DISCUSSION

The semiannual period under review was characterized by the deepening financial crisis that began last year as losses worsened on subprime mortgage-backed securities (MBS). Credit tightened as even high-quality borrowers had difficulty accessing capital, and banks were reluctant to lend to one another. The entire American financial landscape changed during the review period, which began just after Bear Stearns was sold to JPMorgan Chase in a hastily arranged deal intended to avert the investment banker's impending bankruptcy. The period ended with a frenetic chain of events in September that included Lehman Brothers' failure and what was essentially the nationalization of mortgage giants Fannie Mae and Freddie Mac and the world's largest insurance company, American International Group. Given the severe capital market dislocations, virtually no asset class was immune from the turmoil. During the six months under review, the Standard & Poor's 500 Index (S&P 500) fell 10.87%, while the Barclay's Capital (BC; formerly Lehman Brothers) U.S. Aggregate Index, a broad measure of the bond market, declined 1.50%.⁽³⁾ Even Treasuries,

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The S&P 500 consists of 500 stocks chosen for market size, liquidity and industry group representation. Each stock's weight in the index is proportionate to its market value. The S&P 500 is one of the most widely used benchmarks of U.S. equity performance. The BC U.S. Aggregate Index represents securities that are SEC-registered, taxable and dollar denominated. The index covers the U.S. investment grade fixed-rate bond market, with index components for government and corporate securities, mortgage pass-through securities and asset-backed securities. All issues included must have at least one year to final maturity and must be rated investment grade (Baa3 or better) by Moody's Investors Service. They must also be dollar-denominated and non-convertible. Total return includes price appreciation/depreciation and income as a percentage of the original investment. The index is rebalanced monthly by market capitalization.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

which are generally considered a safe haven in turbulent markets, returned only 0.15% as a rise in yields resulted in price declines that largely offset the coupon income.(4) The increase in Treasury yields was driven by expectations of increased budget deficits due to the cost of government bailouts and potentially declining tax revenues. In this environment, the fundamental underpinnings of the high yield corporate bond and leveraged loan markets deteriorated significantly. Although default rates for these two asset classes were below average, many analysts expected defaults could increase over the coming year if the credit crunch exacerbates the economic slowdown. Largely as a result, high yield corporate bonds and leveraged loans had negative returns during the reporting period. After the government takeover of Fannie Mae and Freddie Mac, mortgage-backed securities (MBS) rallied and ended the period with modest gains. During the review period, we reduced our high yield exposure and invested part of the proceeds in investment-grade corporate bonds, particularly those of financial companies. We also slightly reduced our exposure to bank loans and increased our investments in MBS.

The fundamental outlook for high yield bonds deteriorated sharply during the reporting period as the economy slowed and fears increased that a recession may already be under way. As the credit crunch intensified, concerns grew that the crisis would move from the financial sector to the overall economy. Many believed the lack of liquidity could lead to higher default rates in the months ahead. Reflecting the troubled outlook, high yield spreads widened to over 1,000 basis points (10 percentage points) above Treasuries -- their highest level since 2002. We believed fundamentals could deteriorate further; therefore, we reduced our high yield exposure and purchased investment-grade debt, including that of major financial companies. However, given the financial market turmoil during the period, the investment-grade sector was the worst performing segment in the BC U.S. Aggregate Index. Fund holdings included the senior notes of Lehman Brothers, which filed for bankruptcy protection in September.

For the six-month period under review, the bank loan asset class was extremely volatile, with few pockets of strength in a generally weak overall market, and the Credit Suisse (CS) Leveraged Loan Index had a -1.93% total return.(5) Early in the review period, the loan market rallied as investors seemed to find the sector's valuations attractive, and loan prices rebounded to a period high in June. As secondary loan prices stabilized, underwriters began to syndicate new issues left over from 2007 deals. As the excess supply was reduced, underwriters began

Semiannual Report | 7

to add a few new deals in 2008, which were more attractively priced, better structured and less leveraged than prior loans. However, despite easing technical pressure and a better balance between supply and demand, corporate fundamentals began to deteriorate during the period along with the weakening economy. Largely as a result, amendment activity increased and loan default rates rose, moving closer to historical averages. The Fund, however, did not experience any bank loan defaults during the period.

Despite weakening corporate fundamentals and the uptick in loan defaults, the loan market was relatively stable in August and early September, and secondary loan prices were mostly range bound. However, in the final two weeks of September, following Lehman Brothers' bankruptcy filing, the credit markets experienced significant volatility. As a result, secondary loan prices plummeted to a new all-time low, which was below the previously established low in February of 2008. Secondary loan price activity is tracked by the Standard & Poor's Leveraged Commentary and Data (LCD) flow names composite, which comprises the 15 most active loans in the Standard & Poor's Loan Syndications and Trading Association (LSTA) Leveraged Loan Index (LLI).⁽⁶⁾

Although we expected volatility to remain high in this difficult market environment, we believed the volatility created many attractive long-term opportunities as we found valuations historically attractive, with discounted spreads at all-time highs and average bids at all-time lows.

During the review period, MBS generally outperformed the high yield corporate bond and bank loan sectors. Although not immune from volatility and tightening credit conditions, agency mortgages benefited somewhat from government intervention, while privately issued MBS and asset-backed securities (ABS) generally generated lower returns during the period. Agency MBS benefited from the takeovers of Fannie Mae and Freddie Mac as investor confidence was boosted by the government's actions. In addition, the economic rescue plan enacted by Congress in early October may help the MBS and ABS sectors.

During the period, we found opportunities in higher-coupon MBS as they became less susceptible to early prepayments. We also found an opportunity to invest in those sectors that experienced yield spread widening and were hampered by low liquidity. For example, we found what we believed were attractive opportunities in securitized sectors with strong credit fundamentals, specifically those related to commercial real estate. At period-end, these investments were

(6.) Source: Standard & Poor's. The Standard & Poor's/LSTA LLI covers more than 1,100 U.S. loan facilities and reflects the market-weighted performance of institutional leveraged loans based upon real-time market weightings, spreads and interest payments.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

rated AAA and were most senior in the capital structure. The Fund had little exposure to subprime mortgage loans, and during the period, the Fund did not experience principal losses on any of its subprime investments.

Thank you for your continued participation in Franklin Templeton Limited Duration Income Trust. We look forward to serving your future investment needs.

Performance Summary as of 9/30/08

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities. Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not reflect any sales charges paid at inception or brokerage commissions paid on secondary market purchases. The performance table does not reflect any taxes that a shareholder would pay on Fund dividends, capital gains distributions, if any, or any realized gains on the sale of Fund shares.

ENDNOTES

INTEREST RATE MOVEMENTS AND MORTGAGE PREPAYMENTS WILL AFFECT THE FUND'S SHARE PRICE AND YIELD. THE RISKS ASSOCIATED WITH HIGHER-YIELDING, LOWER-RATED SECURITIES INCLUDE HIGHER RISK OF DEFAULT AND LOSS OF PRINCIPAL.

(1.) Figures are for common shares. As of 9/30/08, the Trust had leverage in the amount of 36.91% of the Trust's total assets. The Trust employs leverage through the issuance of Auction Preferred Shares and purchase of Mortgage Dollar Rolls. The use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares). The cost of leverage rises and falls with changes in short-term interest rates. Such increases/decreases in the cost of the Trust's leverage may be offset by increased/decreased income from the Trust's floating rate investments.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

- (2.) Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Six-month return has not been annualized.
- (3.) Assumes reinvestment of distributions at net asset value.
- (4.) Assumes reinvestment of distributions based on the dividend reinvestment plan.
- (5.) Distribution rate is based on an annualization of the Fund's 7.6 cent per share September dividend and the AMEX closing price of \$8.36 on 9/30/08.

Dividend Reinvestment Plan

The Fund's Dividend Reinvestment Plan (Plan) offers you a prompt and simple way to reinvest dividends and capital gain distributions (Distributions) in shares of the Fund. PNC Global Investment Services (Agent), P.O. Box 6006, Carol

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

Stream, IL 60197-6006, will act as your Agent in administering the Plan. The Agent will open an account for you under the Plan in the same name as your outstanding shares are registered. The complete Terms and Conditions of the Dividend Reinvestment Plan are contained in the Fund's Dividend Reinvestment Plan Brochure. A copy of that Brochure may be obtained from the Fund at the address on the back cover of this report.

You are automatically enrolled in the Plan unless you elect to receive Distributions in cash. If you own shares in your own name, you should notify the Agent, in writing, if you wish to receive Distributions in cash.

If the Fund declares a Distribution, you, as a participant in the Plan, will automatically receive an equivalent amount of shares of the Fund purchased on your behalf by the Agent.

If on the payment date for a Distribution, the net asset value per share is equal to or less than the market price per share plus estimated brokerage commissions, the Agent shall receive newly issued shares, including fractions, from the Fund for your account. The number of additional shares to be credited shall be determined by dividing the dollar amount of the Distribution by the greater of the net asset value per share on the payment date, or 95% of the then current market price per share.

If the net asset value per share exceeds the market price plus estimated brokerage commissions on the payment date for a Distribution, the Agent (or a broker-dealer selected by the Agent) shall try, for a purchase period of 30 days, to apply the amount of such Distribution on your shares (less your pro rata share of brokerage commissions incurred) to purchase shares on the open market. The weighted average price (including brokerage commissions) of all shares it purchases shall be your allocated price per share. If, before the Agent has completed its purchases, the market price plus estimated brokerage commissions exceeds the net asset value of the shares as of the payment date, the purchase price the Agent paid may exceed the net asset value of the shares, resulting in the acquisition of fewer shares than if such Distribution had been paid in shares issued by the Fund. Participants should note that they will not be able to instruct the Agent to purchase shares at a specific time or at a specific price. The Agent may make open-market purchases on any securities exchange where shares are traded, in the over-the-counter market or in negotiated transactions, and may be on such terms as to price, delivery and otherwise as the Agent shall determine.

12 | Semiannual Report

The market price of shares on a particular date shall be the last sales price on the American Stock Exchange, or, if there is no sale on the exchange on that date, then the mean between the closing bid and asked quotations on the exchange on such date. The net asset value per share on a particular date shall be the amount most recently calculated by or on behalf of the Fund as required by law.

The Agent shall at all times act in good faith and agree to use its best efforts within reasonable limits to ensure the accuracy of all services performed under this agreement and to comply with applicable law, but assumes no responsibility and shall not be liable for loss or damage due to errors unless such error is caused by the Agent's negligence, bad faith, or willful misconduct or that of its employees. Your uninvested funds held by the Agent will not bear interest. The Agent shall have no responsibility for the value of shares acquired. For the purpose of cash investments, the Agent may commingle your funds with those of other participants in the same Fund.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

There is no direct charge to participants for reinvesting Distributions, since the Agent's fees are paid by the Fund. However, when shares are purchased in the open market, each participant will pay a pro rata portion of any brokerage commissions incurred. If you elect by notice to the Agent to have it sell part or all of your shares and remit the proceeds, the Agent will deduct brokerage commissions from the proceeds.

The automatic reinvestment of Distributions does not relieve you of any taxes that may be payable on Distributions. In connection with the reinvestment of Distributions, shareholders generally will be treated as having received a Distribution equal to the cash Distribution that would have been paid.

The Agent will forward to you any proxy solicitation material and will vote any shares so held for you first in accordance with the instructions set forth on proxies you return to the Fund, and then with respect to any proxies you do not return to the Fund in the same portion as the Agent votes proxies the participants return to the Fund.

As long as you participate in the Plan, the Agent will hold the shares it has acquired for you in safekeeping, in its name or in the name of its nominee. This convenience provides added protection against loss, theft or inadvertent destruction of certificates. However, you may request that a certificate representing your Plan shares be issued to you. Upon your written request, the Agent will deliver to you, without charge, a certificate or certificates for the full shares. The Agent will send you a confirmation of each acquisition made

Semiannual Report | 13

for your account as soon as practicable, but not later than 60 days after the acquisition date. Although from time to time you may have an undivided fractional interest in a share of the Fund, no certificates for a fractional share will be issued. Distributions on fractional shares will be credited to your account. If you terminate your account under the Plan, the Agent will adjust for any such undivided fractional interest in cash at the market value of shares at the time of termination.

You may withdraw from the Plan at any time, without penalty, by notifying the Agent in writing at the address above or by telephone at (800) 331-1710. Such termination will be effective with respect to a Distribution if the Agent receives your notice prior to the Distribution record date. The Agent or the Fund may terminate the Plan upon notice to you in writing mailed at least 30 days prior to any record date for the payment of any Distribution. Upon any termination, the Agent will issue, without charge, stock certificates for all full shares you own and will convert any fractional shares you hold at the time of termination to cash at current market price and send you a check for the proceeds.

The Fund or the Agent may amend the Plan. You will receive written notice at least 30 days before the effective date of any amendment.

Semiannual Report | 29

Franklin Templeton
Limited Duration Income Trust

NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

Franklin Templeton Limited Duration Income Trust (Fund) is registered under the Investment Company Act of 1940, as amended, (1940 Act) as a diversified, closed-end investment company.

The following summarizes the Fund's significant accounting policies.

A. SECURITY VALUATION

Securities listed on a securities exchange or on the NASDAQ National Market System are valued at the last quoted sale price or the official closing price of the day, respectively. Over-the-counter securities and listed securities for which there is no reported sale are valued within the range of the most recent quoted bid and ask prices. Securities that trade in multiple markets or on multiple exchanges are valued according to the broadest and most representative market. Investments in open-end mutual funds are valued at the closing net asset value.

Corporate debt securities, government securities, mortgage pass-through securities, other mortgage-backed securities, and asset-backed securities generally trade in the over-the-counter market rather than on a securities exchange. The Fund may utilize independent pricing services, quotations from bond dealers, and information with respect to bond and note transactions, to assist in determining a current market value for each security. The Fund's pricing services may use valuation models or matrix pricing which considers information with respect to comparable bond and note transactions, quotations from bond dealers, or by reference to other securities that are considered comparable in such characteristics as rating, interest rate and maturity date, option adjusted spread models, prepayment projections, interest rate spreads and yield curves, to determine current value.

Senior secured corporate loans with floating or variable interest rates generally trade in the over-the-counter market rather than on a securities exchange. The Fund may utilize independent pricing services, quotations from loan dealers and other financial institutions, and information with respect to bond and note transactions, to assist in determining a current market value for each security. The Fund's pricing services use independent market quotations from loan dealers or financial institutions and may incorporate valuation methodologies that consider multiple bond characteristics such as dealer quotes, issuer type, coupon, maturity, weighted average maturity, interest rate spreads and yield curves, cash flow and credit risk/quality analysis, to determine current value.

Foreign securities are valued as of the close of trading on the foreign stock exchange on which the security is primarily traded, or the NYSE, whichever is earlier. If no sale is reported at that time, the foreign security will be valued within the range of the most recent quoted bid and ask prices. The value is then converted into its U.S. dollar equivalent at the foreign exchange rate in effect at the close of the NYSE on the day that the value of the foreign security is determined.

Franklin Templeton
Limited Duration Income Trust

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

A. SECURITY VALUATION (CONTINUED)

The Fund has procedures to determine the fair value of individual securities and other assets for which market prices are not readily available or which may not be reliably priced. Methods for valuing these securities may include: fundamental analysis, matrix pricing, discounts from market prices of similar securities, or discounts applied due to the nature and duration of restrictions on the disposition of the securities. Due to the inherent uncertainty of valuations of such securities, the fair values may differ significantly from the values that would have been used had a ready market for such investments existed. Occasionally, events occur between the time at which trading in a security is completed and the close of the NYSE that might call into question the availability (including the reliability) of the value of a portfolio security held by the Fund. If such an event occurs, the securities may be valued using fair value procedures, which may include the use of independent pricing services. All security valuation procedures are approved by the Fund's Board of Trustees.

B. FOREIGN CURRENCY TRANSLATION

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Occasionally, events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Fund's Board of Trustees.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments on the Statement of Operations.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

Franklin Templeton
Limited Duration Income Trust

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

C. SECURITIES PURCHASED ON A WHEN-ISSUED, DELAYED DELIVERY AND TBA BASIS

The Fund may purchase securities on a when-issued, delayed delivery and to-be-announced (TBA) basis, with payment and delivery scheduled for a future date. These transactions are subject to market fluctuations and are subject to

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

the risk that the value at delivery may be more or less than the trade date purchase price. Although the Fund will generally purchase these securities with the intention of holding the securities, it may sell the securities before the settlement date. Sufficient assets have been segregated for these securities.

D. FOREIGN CURRENCY CONTRACTS

When the Fund purchases or sells foreign securities it may enter into foreign exchange contracts to minimize foreign exchange risk from the trade date to the settlement date of the transactions. A foreign exchange contract is an agreement between two parties to exchange different currencies at an agreed upon exchange rate at a future date. Realized and unrealized gains and losses on these contracts are included in the Statement of Operations.

The Fund may also enter into forward exchange contracts to hedge against fluctuations in foreign exchange rates or to gain exposure to certain foreign currencies. These contracts are valued daily by the Fund and the unrealized gains or losses on the contracts, as measured by the difference between the contractual forward foreign exchange rates and the forward rates at the reporting date, are included in the Statement of Assets and Liabilities. Realized and unrealized gains and losses on these contracts are included in the Statement of Operations.

The risks of these contracts include movement in the values of the foreign currencies relative to the U.S. dollar and the possible inability of the counterparties to fulfill their obligations under the contracts, which may be in excess of the amount reflected in the Statement of Assets and Liabilities.

E. MORTGAGE DOLLAR ROLLS

The Fund may enter into mortgage dollar rolls, typically on a TBA basis. Mortgage dollar rolls are agreements between the fund and a financial institution to simultaneously sell and repurchase mortgage-backed securities at a future date. Gains or losses are realized on the initial sale, and the difference between the repurchase price and the sale price is recorded as an unrealized gain or loss to the fund upon entering into the mortgage dollar roll. In addition, the Fund may earn interest on the cash proceeds that are received from the initial sale. During the period between the sale and repurchase, the Fund is not entitled to principal and interest paid on the mortgage backed securities. The risks of mortgage dollar roll transactions include the potential inability of the counterparty to fulfill its obligations.

32 | Semiannual Report

Franklin Templeton
Limited Duration Income Trust

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

E. MORTGAGE DOLLAR ROLLS (CONTINUED)

The Fund is investing in mortgage dollar rolls as an alternate form of leverage. As a result, the mortgage dollar rolls are considered indebtedness or a "senior security" for purposes of the asset coverage requirements under the 1940 Act.

F. SENIOR FLOATING RATE INTERESTS

Senior secured corporate loans pay interest at rates which are periodically

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

reset by reference to a base lending rate plus a spread. These base lending rates are generally the prime rate offered by a designated U.S. bank or the London InterBank Offered Rate (LIBOR). Senior secured corporate loans often require prepayment of principal from excess cash flows or at the discretion of the borrower. As a result, actual maturity may be substantially less than the stated maturity.

Senior secured corporate loans in which the Fund invests are generally readily marketable, but may be subject to some restrictions on resale.

G. INCOME TAXES

No provision has been made for U.S. income taxes because it is the Fund's policy to qualify as a regulated investment company under the Internal Revenue Code and to distribute to shareholders substantially all of its taxable income and net realized gains.

Foreign securities held by the Fund may be subject to foreign taxation on dividend and interest income received. Foreign taxes, if any, are recorded based on the tax regulations and rates that exist in the foreign markets in which the Fund invests.

The Fund has reviewed the tax positions, taken on federal income tax returns, for each of the three open tax years and as of September 30, 2008, and has determined that no provision for income tax is required in the Fund's financial statements.

H. SECURITY TRANSACTIONS, INVESTMENT INCOME, EXPENSES AND DISTRIBUTIONS

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Interest income and estimated expenses are accrued daily. Amortization of premium and accretion of discount on debt securities are included in interest income. Facility fees are recognized as income over the expected term of the loan. Dividend income is recorded on the ex-dividend date. Distributions to common shareholders are recorded on the ex-dividend date and are determined according to income tax regulations (tax basis). Distributable earnings determined on a tax basis may differ from earnings recorded

Franklin Templeton
Limited Duration Income Trust

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

H. SECURITY TRANSACTIONS, INVESTMENT INCOME, EXPENSES AND DISTRIBUTIONS (CONTINUED)

in accordance with accounting principles generally accepted in the United States of America. These differences may be permanent or temporary. Permanent differences are reclassified among capital accounts to reflect their tax character. These reclassifications have no impact on net assets or the results of operations. Temporary differences are not reclassified, as they may reverse in subsequent periods.

I. ACCOUNTING ESTIMATES

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

J. GUARANTEES AND INDEMNIFICATIONS

Under Franklin Templeton Limited Duration Income Trust's (Trust) organizational documents, its officers and trustees are indemnified by the Trust against certain liabilities arising out of the performance of their duties to the Trust. Additionally, in the normal course of business, the Trust enters into contracts with service providers that contain general indemnification clauses. The Trust's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Trust that have not yet occurred. Currently, the Trust expects the risk of loss to be remote.

2. SHARES OF BENEFICIAL INTEREST

At September 30, 2008, there were 28,290,000 common shares authorized (without par value). During the period ended September 30, 2008, there were no shares issued; all reinvested distributions were satisfied with previously issued shares purchased in the open market. During the year ended March 31, 2008, there were 34,261 shares issued for \$490,071 from reinvested distributions.

3. AUCTION RATE PREFERRED SHARES

On November 7, 2003 the Fund issued 2,534 Preferred Shares Series M, 2,533 Preferred Shares Series W and 2,533 Preferred Shares Series F, each with a \$25,000 liquidation preference per share totaling \$190,000,000. During the period ended September 30, 2008, there was a pro rata

34 | Semiannual Report

Franklin Templeton
Limited Duration Income Trust

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

3. AUCTION RATE PREFERRED SHARES (CONTINUED)

preferred redemption of each series totaling 4,000 shares and \$100,000,000 leaving 1,200 Preferred Shares Series M, 1,200 Preferred Shares Series W and 1,200 Preferred Shares Series F, each with a \$25,000 liquidation preference totaling \$90,000,000. Dividends to preferred shareholders are cumulative and are declared weekly, at rates established through an auction process. During the period ended September 30, 2008, the dividends on Preferred Shares ranged from 3.54% to 5.62%. The weekly auctions for Series M, W and F have failed since February 13, 2008; consequently, the dividend rate paid on the preferred shares has moved to the maximum rate as defined in the prospectus.

The Fund is required to maintain, on a weekly basis, a specified discounted value of its portfolio in compliance with guidelines established by Fitch Ratings and Moody's Investor Services Inc., and is required to maintain asset coverage for the Preferred Shares of at least 200%.

The Preferred Shares are redeemable by the Fund at any time and are subject to

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

mandatory redemption if the asset coverage or discounted value requirements are not met. During the period ended September 30, 2008, all requirements were met.

4. TRANSACTIONS WITH AFFILIATES

Franklin Resources, Inc. is the holding company for various subsidiaries that together are referred to as Franklin Templeton Investments. Certain officers and trustees of the Fund are also officers and/or directors of the following subsidiaries:

SUBSIDIARY -----	AFFILIATION -----
Franklin Advisers, Inc. (Advisers)	Investment manager
Franklin Templeton Services, LLC (FT Services)	Administrative manager

The Fund pays an investment management fee and administrative fee to Advisers and FT Services of 0.50% and 0.20%, respectively, per year of the average daily managed assets. Managed assets are defined as the Fund's gross asset value minus the sum of accrued liabilities, other than the liquidation value of the preferred shares and other financial leverage.

5. EXPENSE OFFSET ARRANGEMENT

The Fund has entered into an arrangement with its custodian whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the Fund's custodian expenses. During the period ended September 30, 2008, the custodian fees were reduced as noted in the Statement of Operations.

Semiannual Report | 35

Franklin Templeton
Limited Duration Income Trust

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

6. INCOME TAXES

For tax purposes, capital losses may be carried over to offset future capital gains, if any. At March 31, 2008, the capital loss carryforwards were as follows:

Capital loss carryforwards expiring in:

2014	\$ 601,752
2015	895,575
2016	726,440

	\$2,223,767
	=====

For tax purposes, realized capital losses occurring subsequent to October 31, may be deferred and treated as occurring on the first day of the following

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

fiscal year. At March 31, 2008, the Fund deferred realized capital losses of \$4,369,070.

At September 30, 2008, the cost of investments and net unrealized appreciation (depreciation) for income tax purposes were as follows:

Cost of investments	\$552,576,676
	=====
Unrealized appreciation	\$ 524,876
Unrealized depreciation	(57,372,285)

Net unrealized appreciation (depreciation)	\$(56,847,409)
	=====

Net investment income differs for financial statement and tax purposes primarily due to differing treatments of defaulted securities, foreign currency transactions, mortgage dollar rolls, paydown losses, payments-in-kind, and bond discounts and premiums.

Net realized gains (losses) differ for financial statement and tax purposes primarily due to differing treatments of wash sales, foreign currency transactions, mortgage dollar rolls, pay-down losses, and bond discounts and premiums.

7. INVESTMENT TRANSACTIONS

Purchases and sales of investments (excluding short term securities) for the period ended September 30, 2008, aggregated \$486,139,125 and \$487,270,752, respectively.

8. INVESTMENTS IN FRANKLIN INSTITUTIONAL FIDUCIARY TRUST MONEY MARKET PORTFOLIO

The Fund may invest in the Franklin Institutional Fiduciary Trust Money Market Portfolio (Sweep Money Fund), an open-end investment company managed by Advisers. Management fees paid by the Fund are reduced on assets invested in the Sweep Money Fund, in an amount not to exceed the management and administrative fees paid by the Sweep Money Fund.

Franklin Templeton
 Limited Duration Income Trust

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

10. CREDIT RISK AND DEFAULTED SECURITIES

The Fund has 61.69% of its portfolio invested in high yield, senior secured floating rate notes, or other securities rated below investment grade. These securities may be more sensitive to economic conditions causing greater price volatility and are potentially subject to a greater risk of loss due to default than higher rated securities.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

The Fund held defaulted securities and/or other securities for which the income has been deemed uncollectible. At September 30, 2008, the value of this security was \$390,000, representing 0.08% of the Fund's portfolio. The Fund discontinues accruing income on securities for which income has been deemed uncollectible and provides an estimate for losses on interest receivable. The securities have been identified on the accompanying Statement of Investments.

11. UNFUNDED LOAN COMMITMENTS

The Fund may enter into certain credit agreements, all or a portion of which may be unfunded. The Fund is obligated to fund these loan commitments at the borrowers' discretion. Funded portions of credit agreements are presented on the Statement of Investments.

At September 30, 2008, unfunded commitments were as follows:

BORROWER -----	UNFUNDED COMMITMENT -----
Bausch and Lomb Inc., Delayed Draw Term Loan	\$ 56,000
Community Health Systems Inc., Delayed Draw Term Loan	125,290
Manitowoc Company Inc., Term Loan B	2,800,000

	\$2,981,290
	=====

Unfunded loan commitments and funded portions of credit agreements are marked to market daily and any unrealized gain or loss is included in the Statement of Assets and Liabilities and Statement of Operations.

12. FAIR VALUE MEASUREMENTS

The Fund adopted Financial Accounting Standards Board (FASB) issued FASB Statement No. 157, "Fair Value Measurement" (SFAS 157), on April 1, 2008. SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The Fund has determined that the implementation of SFAS 157 did not have a material impact on the Fund's financial statements.

38 | Semiannual Report

Franklin Templeton
Limited Duration Income Trust

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

12. FAIR VALUE MEASUREMENTS (CONTINUED)

SFAS 157 establishes a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's investments and are summarized in the following fair value hierarchy:

- Level 1 - quoted prices in active markets for identical securities

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

- Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speed, credit risk, etc.)
- Level 3 - significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of September 30, 2008, in valuing the Fund's assets and liabilities carried at fair value:

	LEVEL 1 -----	LEVEL 2 -----	LEVEL 3 -----	TOTAL -----
ASSETS:				
Investments in Securities	\$953,183	\$494,776,084	\$--	\$495,729,267
Other Financial Instruments(a)	--	1,617,235	--	1,617,235
LIABILITIES:				
Other Financial Instruments(a)	--	274,600	--	274,600

- (a) Other financial instruments may include net unrealized appreciation (depreciation) of futures, forward exchange contracts, swaps, and unfunded loan commitments.

13. NEW ACCOUNTING PRONOUNCEMENTS

In March 2008, FASB issued FASB Statement No. 161, "Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133" (SFAS 161), which expands disclosures about derivative investments and hedging activities. SFAS 161 is effective for fiscal years and interim periods beginning after November 15, 2008. The Fund is currently evaluating the impact, if any, of applying the various provisions of SFAS 161.

The manager has delegated its administrative duties with respect to the voting of proxies to the Proxy Group within Franklin Templeton Companies, LLC (Proxy Group), an affiliate and wholly owned subsidiary of Franklin Resources, Inc. All proxies received by the Proxy Group will be voted based upon the manager's instructions and/or policies.

To assist it in analyzing proxies, the manager subscribes to RiskMetrics Group (RiskMetrics), an unaffiliated third party corporate governance research service that provides in-depth analyses of shareholder meeting agendas, vote recommendations, recordkeeping and vote disclosure services. In addition, the manager subscribes to Glass, Lewis & Co., LLC (Glass Lewis), an unaffiliated third party analytical research firm, to receive analyses and vote recommendations on the shareholder meetings of publicly held U.S. companies. Although RiskMetrics' and/or Glass Lewis' analyses are thoroughly reviewed and considered in making a final voting decision, the manager does not consider recommendations from RiskMetrics, Glass Lewis or any other third party to be determinative of the manager's ultimate decision. The manager votes proxies solely in the interests of the Fund and its shareholders. As a matter of policy, the officers, directors/trustees and employees of the Fund, the manager and the Proxy Group will not be influenced by outside sources whose interests conflict with the interests of the Fund and its shareholders. Efforts are made to resolve all conflicts in the interests of the manager's clients. Material conflicts of interest are identified by the Proxy Group based upon analyses of client, broker and vendor lists, information periodically gathered from directors and officers, and information derived from other sources, including public filings. In situations where a material conflict of interest is identified, the Proxy Group may defer to the voting recommendation of RiskMetrics, Glass Lewis or those of another independent third party provider of proxy services; or send the proxy directly to the Fund with a recommendation regarding the vote for approval. If the conflict is not resolved by the Fund, the Proxy Group may refer the matter, along with the recommended course of action by the manager to an interdepartmental Proxy Review Committee (which may include portfolio managers and/or research analysts employed by the manager), for evaluation and voting instructions. The Proxy Review Committee may defer to the voting recommendation of RiskMetrics, Glass Lewis or those of another independent third party provider of proxy services; or send the proxy directly to the Fund. Where the Proxy Group or the Proxy Review Committee refers a matter to the Fund, it may rely upon the instructions of a representative of the Fund, such as the board of trustees or a committee of the board.

Where a material conflict of interest has been identified, but the items on which the manager's vote recommendations differ from Glass Lewis, RiskMetrics, or another independent third party provider of proxy services relate

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

specifically to (1) shareholder proposals regarding social or environmental issues or political contributions, (2) "Other Business" without describing the matters that might be considered, or (3) items the manager wishes to vote in opposition to the recommendations of an issuer's management, the Proxy Group may defer to the vote recommendations of the manager rather than sending the proxy directly to the Fund for approval.

To avoid certain potential conflicts of interest, the manager will employ echo voting, if possible, in the following instances: (1) when the Fund invests in an underlying fund in reliance on Section 12(d)(1) of the 1940 Act, or pursuant to an SEC exemptive order; (2) when the Fund invests uninvested cash in affiliated money market funds pursuant to an SEC exemptive order ("cash sweep arrangement"); or (3) when required pursuant to the Fund's governing documents or applicable law. Echo voting means that the investment manager will vote the shares in the same proportion as the vote of all of the other holders of the Fund's shares.

The recommendation of management on any issue is a factor which the manager considers in determining how proxies should be voted, but is not determinative of the manager's ultimate decision. As a matter of practice, the votes with respect to most issues are cast in accordance with the position of the company's management. Each issue, however, is considered on its own merits, and the manager will not support the position of the company's management in any situation where it deems that the ratification of management's position would adversely affect the investment merits of owning that company's shares.

MANAGER'S PROXY VOTING POLICIES AND PRINCIPLES The manager has adopted general proxy voting guidelines, which are summarized below. These guidelines are not an exhaustive list of all the issues that may arise and the manager cannot anticipate all future situations. In all cases, each proxy will be considered based on the relevant facts and circumstances.

BOARD OF DIRECTORS. The manager supports an independent board of directors, and prefers that key committees such as audit, nominating, and compensation committees be comprised of independent directors. The manager will generally vote against management efforts to classify a board and will generally support proposals to declassify the board of directors. The manager may withhold votes from directors who have attended less than 75% of meetings without a valid reason. While generally in favor of separating Chairman and CEO positions, the manager will review this issue as well as proposals to restore or provide for cumulative voting on a case-by-case basis, taking into consideration factors such as the company's corporate governance guidelines or provisions and performance.

RATIFICATION OF AUDITORS OF PORTFOLIO COMPANIES. In light of several high profile accounting scandals, the manager will closely scrutinize the role and performance of auditors. On a case-by-case basis, the manager will examine proposals relating to non-audit relationships and non-audit fees. The manager will also consider, on a case-by-case basis, proposals to rotate auditors, and will vote against the ratification of auditors when there is clear and compelling evidence of accounting irregularities or negligence.

MANAGEMENT AND DIRECTOR COMPENSATION. A company's equity-based compensation plan should be in alignment with its shareholders' long-term interests. The manager believes that executive compensation should be directly linked to the performance of the company. The manager evaluates plans on a case-by-case basis by considering several factors to determine whether the plan is fair and reasonable, including the RiskMetrics quantitative model utilized to assess such plans and/or the Glass Lewis evaluation of the plans. The manager will generally oppose plans that have the potential to be excessively dilutive, and will almost always oppose plans that are structured to allow the repricing of underwater options, or plans that have an automatic share replenishment "evergreen"

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

feature. The manager will generally support employee stock option plans in which the purchase price is at least 85% of fair market value, and when potential dilution is 10% or less.

Severance compensation arrangements will be reviewed on a case-by-case basis, although the manager will generally oppose "golden parachutes" that are considered to be excessive. The manager will normally support proposals that require a percentage of directors' compensation to be in the form of common stock, as it aligns their interests with those of shareholders. The manager will review on a case-by-case basis any shareholder proposals to adopt policies on expensing stock option plans.

ANTI-TAKEOVER MECHANISMS AND RELATED ISSUES. The manager generally opposes anti-takeover measures since they tend to reduce shareholder rights. On occasion, the manager may vote with management when the research analyst has concluded that the proposal is not onerous and would not harm the Fund or its shareholders' interests. The manager generally supports proposals that require shareholder rights' plans ("poison pills") to be subject to a shareholder vote and will closely evaluate such plans on a case-by-case basis to determine whether or not they warrant support. The manager will generally vote against any proposal to issue stock that has unequal or subordinate voting rights. The manager generally opposes any supermajority voting requirements as well as the payment of "greenmail." The manager generally supports "fair price" provisions and confidential voting.

CHANGES TO CAPITAL STRUCTURE. The manager will review, on a case-by-case basis, proposals by companies to increase authorized shares and the purpose for the increase and proposals seeking preemptive rights. The manager will generally not vote in favor of dual-class capital structures to increase the number of authorized shares where that class of stock would have superior voting rights. The manager will generally vote in favor of the issuance of preferred stock in cases where the company specifies the voting, dividend, conversion and other rights of such stock and the terms of the preferred stock issuance are deemed reasonable.

MERGERS AND CORPORATE RESTRUCTURING. Mergers and acquisitions will be subject to careful review by the research analyst to determine whether each will be beneficial to shareholders. The manager will analyze various economic and strategic factors in making the final decision on a merger or acquisition. Corporate restructuring and reincorporation proposals are also subject to a thorough examination on a case-by-case basis.

SOCIAL AND CORPORATE POLICY ISSUES. The manager will generally give management discretion with regard to social, environmental and ethical issues, although the manager may vote in favor of those that are believed to have significant economic benefits or implications for the Fund and its shareholders.

GLOBAL CORPORATE GOVERNANCE. Many of the tenets discussed above are applied to proxy voting decisions for international companies. However, the manager must be more flexible in these instances and must be mindful of the varied market practices of each region.

The manager will attempt to process every proxy it receives for all domestic and foreign issuers. However, there may be situations in which the manager cannot process proxies, for example, where a meeting notice was received too late, or sell orders preclude the ability to vote. If a security is on loan, the manager may determine that it is not in the best interests of the Fund to recall the security for voting purposes. Also, the manager may abstain from voting under certain circumstances or vote against items such as "Other Business" when the manager is not given adequate information from the company.

Shareholders may view the complete Policies online at franklintempleton.com.

Alternatively, shareholders may request copies of the Policies free of charge by calling the Proxy Group collect at (954) 527-7678 or by sending a written request to: Franklin Templeton Companies, LLC, 500 East Broward Boulevard, Suite 1500, Fort Lauderdale, FL 33394, Attention: Proxy Group. Copies of the Fund's proxy voting records are available online at franklintempleton.com and posted on the SEC website at WWW.SEC.GOV. The proxy voting records are updated each year by August 31 to reflect the most recent 12-month period ended June 30.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

N/A

ITEM 9. PURCHASES OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS. N/A

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There have been no changes to the procedures by which shareholders may recommend nominees to the Registrant's Board of Trustees that would require disclosure herein.

ITEM 11. CONTROLS AND PROCEDURES.

(A) EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES. The Registrant maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Registrant's filings under the Securities Exchange Act of 1934 and the Investment Company Act of 1940 is recorded, processed, summarized and reported within the periods specified in the rules and forms of the Securities and Exchange Commission. Such information is accumulated and communicated to the Registrant's management, including its principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. The Registrant's management, including the principal executive officer and the principal financial officer, recognizes that any set of controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Within 90 days prior to the filing date of this Shareholder Report on Form N-CSR, the Registrant had carried out an evaluation, under the supervision and with the participation of the Registrant's management, including the Registrant's principal executive officer and the Registrant's principal financial officer, of the effectiveness of the design and operation of the Registrant's disclosure controls and procedures. Based on such evaluation, the Registrant's principal executive officer and principal financial officer concluded that the Registrant's disclosure controls and procedures are effective.

(B) CHANGES IN INTERNAL CONTROLS. There have been no significant changes in the Registrant's internal controls or in other factors that could significantly affect the internal controls subsequent to the date of their evaluation in connection with the preparation of this Shareholder Report on Form N-CSR.

ITEM 12. EXHIBITS.

(a) (1) Code of Ethics

(a) (2) Certifications pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 of Galen G. Vetter, Chief Executive Officer - Finance and Administration, and Laura F. Ferguson, Chief Financial Officer and Chief Accounting Officer

(b) Certifications pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 of Galen G. Vetter, Chief Executive Officer - Finance and Administration, and Laura
