# (A DEVELOPMENT STAGE COMPANY) NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

### Principles of Consolidation

The financial statements reflect the consolidated results of OptimizeRx Corporation (a Nevada corporation) and its wholly owned subsidiary OptimizeRx Corporation (a Michigan corporation). All material inter-company transactions have been eliminated in the consolidation.

# Cash and Cash Equivalents

For purposes of the accompanying financial statements, the Company considers all highly liquid instruments with an initial maturity of three months or less to be cash equivalents.

#### Fair Value of Financial Instruments

The fair value of cash, accounts receivable and accounts payable approximates the carrying amount of these financial instruments due to their short-term nature.

#### Property and Equipment

The capital assets are being depreciated over their estimated useful lives using the straight-line method of depreciation for book purposes. As of October 18, 2007, the Company acquired the majority of its capital assets at the lower market cost from the Optimizer Systems, LLC.

# Research and Development

The Company's key members are part of a continual research development team and monitor new technologies, trends, services and partnerships that can provide the Company with additional services, value to healthcare and pharmaceutical industries and to the patients it serves.

# (A DEVELOPMENT STAGE COMPANY) NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

### Research and Development (Continued)

The Company seeks to educate team members through understanding of all market dynamics that have the potential to affect the business both short term and longer term. The primary goal is to help patients better afford and access the medicines their doctor prescribes, as well as other healthcare products and services they need. Based on this, the Company continually seeks better ways to meet this mission through technology, better user experiences and new ways to engage industries to provide new support for patients needing their products. The Company is always seeking new services and solutions to offer. At this time, the three current platforms provide robust opportunities and growth during the next five years.

# Revenue Recognition

Substantially all revenue is recognized when it is earned. All revenues are generated through the Company's website activities. The Company's processes are monitored by third parties who collect revenues from clients on a per activity basis and report and forward the revenue to the Company's account.

#### **Management Estimates**

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates and assumptions have been made in determining the depreciable lives of such assets and the allowance for doubtful accounts receivable. Actual results could differ from these estimates.

# Recently Issued Accounting Guidance

The Company does not expect the adoption of recently issued accounting pronouncements to have a significant impact on the Company's results of operations, financial position or cash flow.

# Concentration of Credit Risks

The Company maintains its cash and cash equivalents in bank deposit accounts, which, at times, may exceed federally insured limits. The Company has not experienced any losses in such accounts; however, amounts in excess of the federally insured limit may be at risk if the bank experiences financial difficulties.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

### Earnings Per Common and Common Equivalent Share

The computation of basic earnings per common share is computed using the weighted average number of common shares outstanding during the year. The computation of diluted earnings per common share is based on the weighted average number of shares outstanding during the year plus common stock equivalents which would arise from the exercise of warrants outstanding using the treasury stock method and the average market price per share during the year. Options warrants and convertible preferred stock which are common stock equivalents are not included in the diluted earnings per share calculation for June 30, 2009 and June 30, 2008, respectively, since their effect is anti-dilutive.

#### **Basis of Presentation**

The accompanying unaudited interim financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules of the Securities and Exchange Commission ("SEC"), and should be read in conjunction with the audited financial statements and notes thereto contained in the Company's Form 10-K filed with the SEC as of and for the period ended December 31, 2008. In the opinion of management, all adjustments necessary for the financial statements to be not misleading for the interim periods presented have been reflected herein. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year.

These forward-looking statements generally are identified by the words "believes," "project," "expects," "anticipates," "estimates," "intends," "strategy," "plan," "may," "will," "would," "will be," "will continue," "will likely result," and similar expressions. such forward-looking statements to be covered by the safe-harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and are including this statement for purposes of complying with those safe-harbor provisions. Forward-looking statements are based on current expectations and assumptions that are subject to risks and uncertainties which may cause actual results to differ materially from the forward-looking statements. Our ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse affect on our operations and future prospects on a consolidated basis include, but are not limited to: changes in economic conditions, legislative/regulatory changes, availability of capital, interest rates, competition, and generally accepted accounting principles. These risks and uncertainties should also be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. #### Company Overview

We conduct all of our operations through our wholly-owned subsidiary, OptimizeRx Michigan. We are a development-stage company that has developed a website, www.optimizerx.com (our "Site"), to help medical patients better afford and manage their rising healthcare costs. In addition, we provide unique advertising programs to the pharmaceutical and healthcare industries.

We recognize that patients have increasing influence in their healthcare decisions, particularly in their medications: what to buy, where to buy, and how to buy. However, there is very little information available to consumers regarding how to access available savings and support programs. We developed our Site to enable consumers to meet their prescribed pharmacological therapies in the most cost-effective manner possible. Our Site is a portal that identifies programs and savings that are available to consumers, based upon their needs. By creating a portal by which consumers access savings on their pharmaceutical needs, we have also created a Site where pharmaceutical companies can reach consumers with their advertising and other programs.

### **Table of Contents**

Since our formation, we have concentrated on developing our business strategy and obtaining financing. We plan to expand awareness, traffic and database to our Site, as well as the launch of our offer development systems OFFERx<sup>TM</sup> and ADHERxE. We expect that the primary components of our business will be:

### § The Site and our network affiliates

§ OFFERx to develop, promote and fulfill new offers from pharmaceutical and healthcare manufactures § ADHERxE to allow manufacturers to re-engage their customers through the activation of new savings each month

We plan to generate revenues through: (i) advertising sales from our Site and affiliate network; (ii) its database; (iii) direct marketing and sponsorships and (iv) our platforms to create, promote and manage new savings offers for additional clients.

We have acquired over a million members to date. Upon this, management has been preparing and addressing all key issues to successfully serve and monetize the membership database, including: content, procurement of advertising sponsorships, technology and distribution. We originally planned to extend our reach and visibility through increased online, print and broadcast marketing to increase traffic and our database of qualified health care consumers. However, with our current membership base, along with the short period of time since acquiring the majority of our members and the sales cycle of attaining sponsorship and industry advertising programs to this new asset, we have not engaged in marketing to our database.

Management continues to believe the OPTIMIZERx database will be a very significant, on-going revenue stream over time. Currently we have over 10 advertising proposals pending to major pharmaceutical companies and agencies, including Lilly, AstraZeneca, Publicis and Novartis.

The company has aggressive plans to initiate advertising programs to its members in the second half of the year. This includes leveraging our formalized partnership with Cegedim Dendrite (www.cegedimdendrite.com), ValueClick Media (www.valueclick.com) and Sudler & Hennessey (http://sudler.com/), a division of WPP.

# Item 3. Quantitative and Qualitative Disclosures About Market Risk

A smaller reporting company is not required to provide the information required by this Item.

#### Item 4T. Controls and Procedures

We carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of June 30, 2009. This evaluation was carried out under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, Mr. David Lester. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of June 30, 2009, our disclosure controls and procedures are effective. There have been no significant changes in our internal controls over financial reporting during the quarter ended June 30, 2009 that have materially affected or are reasonably likely to materially affect such controls.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act are recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

#### Limitations on the Effectiveness of Internal Controls

Our management does not expect that our disclosure controls and procedures or our internal control over financial reporting will necessarily prevent all fraud and material error. An internal control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the internal control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate.
