## Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

The Swiss Helvetia Fund, Inc. (the "Fund") is managed by Hottinger Capital Corp. ("HCC"), which belongs to the Hottinger Group.

The Hottinger Group dates back to Banque Hottinguer, which was formed in Paris in 1786 and is one of Europe's oldest private banking firms. The Hottinger Group has remained under the control of the Hottinger family through seven generations. It has offices in New York, Zurich, Luxembourg, Toronto, Geneva, Vienna, London, Sion, Lugano, and the Bahamas.

### The Fund

The Swiss Helvetia Fund, Inc. is a non-diversified, closed-end investment company whose objective is to seek long-term capital appreciation through investment in equity and equity-linked securities of Swiss companies. The Fund, listed on the New York Stock Exchange under the symbol "SWZ," is managed by Hottinger Capital Corp.

Net Asset Value is calculated daily by 6:15 P.M. (Eastern Time). The most recent calculation is available by calling 1-888-SWISS-00 or by accessing our Website. Net Asset Value is also published weekly in Barron's and the Monday edition of The Wall Street Journal.

### Letter to Stockholders

#### Swiss Market Review and Fund Performance

Equity markets across the world continued to perform strongly in the first quarter of this year. This was true in Switzerland where the industrial sector, in particular, showed strong performance due largely to the investment boom in the Chinese economy and in other emerging markets. It was also true in the United States to some extent and was beginning in Europe. Infrastructure spending also has been vibrant globally, especially in the energy sector and global trade has boosted the performance of the service companies in logistics and freight forwarding.

Investment banks and asset managers enjoyed strong financial markets across the board. On the other hand, performance of the food and pharmaceutical sectors, especially in the large cap arena, has lagged as their sales growth

## Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

and pricing power were not able to match the rest of the market.

Buyout activity in the private equity sector had a strong positive impact on the valuations of the small and mid cap sectors, as many small and mid cap targets companies were considered to be underleveraged (a consequence of the reaction to the 2000 to 2003 financial market turmoil). In addition, borrowing costs are at extremely low historic levels, in comparison to the cost of equity creating the opportunity for capital arbitrage. While the size of large companies has been a deterrent to buyouts thus far, private equity funds have been raising larger amounts of cash and, adding leverage into the mix, large cap companies could become attractive buyout targets. The mergers and acquisitions frenzy taking place in Europe has been, in fact, one of the main drivers for the markets despite the headwind represented by higher interest rates on both the short and the long end of the yield curve.

The Fund outperformed the Swiss market during the quarter with a total return of 7.96% in local currency and 8.87% in U.S. dollar. Exposure to mid-sized companies in financial services and capital goods was beneficial.

The Fund has earned the Lipper Inc. award for ranking number one among Western European close-end funds in one-year performance for the year 2005.\* As of March 31, 2006, the Fund also had a rating of three stars from Morningstar.\*\* Past performance is no guarantee of future results.

\*The Fund had previously achieved this ranking for one-year performance in 2000 and also had ranked number one among Western European closed-end funds in 10-year performance for the periods ended December 31, 2002, 2001, 2000, 1999 and 1998. Lipper Inc. is an independent fund performance monitor. As of December 31, 2005, there were 6 funds in the Lipper Western European closed-end funds category, which is comprised of funds that concentrate their investments in equity securities whose primary trading markets or operations are in the Western European region or a single country within this region.

\*\*Morningstar is an independent fund performance monitor. Its ratings reflect historic risk-adjusted performance and may change monthly. Its ratings of one (low) and five (high) stars are based on a fund's three- and five-year average annual total returns with fee adjustments, and a risk factor that reflects fund performance relative to three-month Treasury Bill monthly returns. Only 33% of the funds in an investment category may receive four or five stars. As of March 31, 2006, there were 9 funds in the Fund's asset category rated by Morningstar.

### Swiss Market Corporate News

Swiss asset managers had strong showings in the first quarter of 2006. The shares of UBS AG, Bank Sarasin & Cie AG and Julius Baer Holding AG, for example, far exceeded the performance of the Swiss Performance Index. The strength of this sector was due to higher than expected money inflows, very favorable capital markets and strong revenues from alternative products. High net worth individuals and institutional investors continue to allocate more money to this asset class. Benefiting from this momentum, Partners Group, a global alternative asset management firm, had a successful initial public

## Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

offering. At the end of the first day of trading on March 24th 2006, the company was valued at 2.1 billion Swiss francs, or about 18% of assets under management.

No appeals have been filed with the US District Court regarding the plan of reorganization of ABB Ltd.'s US subsidiary, Combustion Engineering (CE). This finally settles one of ABB's biggest asbestos liabilities.

Serono SA, the largest Swiss biotech company, has been at the center of take-over speculation. There have been reports that the majority shareholder hired Goldman Sachs to find an acquirer. The limited productivity of the company's pipeline has been a drag on the performance of its stock. However, the company still generates a sizeable cash flow from its strong market position and royalty streams which could attract buying interest.

The Wall Street Journal Europe has reported a potential merger being discussed between Zurich Financial and St. Paul Travelers. Whether or not such a report is founded, it highlights large valuation spread between the two companies, Zurich being substantially cheaper, based on several metrics such as gross premium size and price earnings multiples.

### Swiss Economic Notes

At its last monetary policy assessment, the Swiss National Bank ("SNB"), following the action of the European Central Bank ("ECB"), increased interest rates again in order for them to be "in line with the economic activity." The SNB lifted the target range for the three-month LIBOR by 0.25% to 0.75%-1.75% and stated its intention to hold the rate in the middle of the target range for the time being.

The Swiss economic upswing continued with an increase in real GDP of 2.1% for the fourth quarter of 2005, compared with the previous period. The annual growth was 1.9% for 2005 and the SNB anticipates a rise in real GDP of over 2% for 2006. The seasonally adjusted unemployment rate fell to 3.5% in comparison to 3.6% in December 2005.

The SNB forecasts inflation rates of 1% for 2006 and 1.1% and 2% for 2007 and 2008, respectively. An important positive point is the development in short-term real interest rates, which, after being in negative territory since 2002, reached 0.7% by the end of 2005.

After bottoming at the end of 2005 at 1.96% the 10-year confederation bond yield

THE SWISS HELVETIA FUND, INC.

---

Letter to Stockholders (continued)

finished the first quarter of 2006 at 2.48%. The differential between Euro and Swiss franc long term interest notes has been relatively stable during the quarter. Credit spreads in Switzerland have narrowed.

The KOF (Swiss Institute for Business Cycle Research) has forecast an increase in GDP of 2.1% in 2006 (in line with SNB forecast) and 1.9% in 2007 on the back of sustained private consumption, fueled by disposable income growth and investments in machinery and equipment. Government consumption is expected to contribute little to economic growth in 2006 but the KOF believes that an

## Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

increase in revenues and reduction in prior years' deficits could lead to higher expenditures in 2007. In the past quarter, economic indicators in Germany, one of Switzerland's main trading partners, have risen strongly. The IFO Index (Business climate) reached levels last seen in 2000 with an increase of nearly 14% from May 2005 to March 2006.

### Currencies

After an impressive run in 2005, the US dollar started the year under pressure. It decreased by 0.8% against the Swiss franc and by 2.27% against the euro in the first quarter. This might be explained by investor expectation of a decrease in the interest rate differential, due to a perception that the ECB and the SNB have more room to increase rates than does the Federal Reserve. More sustained economic activity should therefore create the conditions for a stronger Swiss currency against the U.S. dollar. It is likely that the U.S. currency will continue to depreciate overall, as its risk premium may not be large enough any more to satisfy investors and as global trade tensions seem to be on the rise.

/1 /Performance of funds is based on changes in the fund's NAV over a specified period. In each case total return is calculated assuming reinvestment of all distributions. Funds listed, other than Switzerland iShares, are not registered with the Securities and Exchange Commission. Performance and descriptive information about the funds are derived from their published

## Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

investor reports and websites, which are subject to change.

/2 /Shares of Switzerland iShares are traded on the New York Stock Exchange and invest in most of the same stocks listed in the Morgan Stanley Capital International (Switzerland) Index. These stocks represent Switzerland's largest and most established public companies, accounting for approximately 85% of the market capitalization of all of Switzerland's publicly traded stocks.

Performance of shares of Switzerland iShares is calculated based upon the closing prices of the period indicated using the Swiss franc/U.S. dollar exchange rate as of noon on each date, as reported by Bloomberg. Such exchange rates were as follows: 12/31/96 = 1.35, 12/31/97 = 1.46, 12/31/98 = 1.38, 12/31/99 = 1.60, 12/31/00 = 1.61, 12/31/01 = 1.67, 12/31/02 = 1.39, 12/31/03 = 1.24, 12/31/04 = 1.14, 12/31/05 = 1.3179, and 3/31/06 = 1.3088.

/3 /This fund gives investors access to the Swiss equity market. It has a broadly-diversified portfolio geared to long-term value growth, with a preference to large cap stocks. Stock selection is based on criteria such as company valuation, business climate, market positioning and management quality.

/4 /This fund invests primarily in major Swiss companies. Quality criteria used for determining relative weightings of companies include: strategic orientation, strength of market position, quality of management, soundness of earnings, growth potential and potential for improving shareholder value. The investment objective seeks to provide results that are aligned with the SPI performance.

/5/ This fund invests in shares of companies listed in Switzerland and included in the SPI, mainly in blue chip stocks.

/6/ This fund invests in shares of Swiss companies. It weights individual sectors relative to the SPI on the basis of their expected relative performance. It focuses on liquid blue-chip stocks.

/7/ These funds are not available for U.S. residents or citizens.

Past performance is no guarantee of future results.

Outlook / Strategy

Higher interest rates and expected inflation will provide strong challenges to the Swiss equity market going forward. An expected increase in currency and bond market volatility will reduce the capacity of investment banks and other intermediaries to take on risk in trading portfolios and could reduce liquidity in a sudden fashion.

On the other hand earnings growth for the small and mid cap sectors and high free cash flow yields in the large cap sector should provide downside protection. We believe short term oriented money will continue to be a big factor in the equity markets. It is creating sharp moves on the upside on short covering and on the downside risk with stop loss orders.

Overall, management believes that a stock picking strategy should continue to deliver competitive returns as banks are reducing their commitments to research, making some areas of the public market less efficient.

Stock Repurchase Program

Pursuant to authorization by the Board, the Fund began open market purchases of its common stock on the New York Stock Exchange in 1999 and has continued purchases in each subsequent year. The principal purpose of the stock repurchase program is to enhance stockholder value by increasing the Fund's net asset value per share without creating a meaningful adverse effect upon the Fund's expense ratio. The Board has authorized the Fund to repurchase up to 1,000,000 shares during 2006. During the quarter ended March 31, 2006, the Fund repurchased and retired 24,000 shares at an average price of \$15.61 per share (including brokerage commissions) and a weighted average discount of 13.89%. These repurchases, which had a total cost of \$375,526, resulted in an increase of \$60,554 to the Fund's net asset value.

Sincerely,

/s/ Samuel B. Witt III

#### Dividend Reinvestment Plan (Unaudited)

##### The Plan

The Fund's Dividend Reinvestment Plan (the "Plan") offers a convenient way for you to reinvest capital gains distributions and ordinary income dividends, payable in whole or in part in cash, in additional shares of the Fund.

Some of the Plan features are:

- . Once you enroll in the Plan, all of your future distributions and dividends payable in whole or in part in cash will be automatically reinvested in Fund shares in accordance with the terms of the Plan.
- . You will receive shares valued at the lower of the Fund's net asset value or the Fund's market price as described below. The entire amount of your distribution or dividend will be reinvested automatically in additional Fund shares. For any balance that is insufficient to purchase full shares of the Fund, your account will be credited with fractional shares.
- . Your shares will be held in an account with the Plan agent. You will be sent regular statements for your records.
- . You may terminate participation in the Plan at any time.

The following are answers to frequently asked questions about the Plan.

##### How do I enroll in the Plan?

If you are holding certificates for your shares, contact American Stock Transfer & Trust Company (AST) at the address shown below. If your shares are held in a brokerage account, contact your broker. Not all brokerage firms permit their clients to participate in dividend reinvestment plans such as the Plan and, even if your brokerage firm does permit participation, you may not be able to transfer your Plan shares to another broker who does not permit participation. Your brokerage firm will be able to advise you about its policies.

##### How does the Plan work?

The cash portion of any dividends or distributions you receive, payable in whole or in part in cash, will be reinvested in shares of the Fund. The number of shares credited to your Plan account as a result of the reinvestment will depend upon the relationship between the Fund's market price and its net asset value per share on the record date of the distribution or dividend, as described below:

## Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

- . If the net asset value is greater than the market price (the Fund is trading at a discount), AST, as Plan Agent, will buy Fund shares for your account on the open market on the New York Stock Exchange or elsewhere. Your dividends or distributions will be reinvested at the average price AST pays for those purchases.
- . If the net asset value is equal to the market price (the Fund is trading at parity), the Fund will issue for your account new shares at net asset value.
- . If the net asset value is less than but within 95% of the market price (the Fund is trading at a premium of less than 5%), the Fund will issue for your account new shares at net asset value.
- . If the net asset value is less than 95% of the market price (the Fund is trading at a premium of 5% or more), the Fund will issue for your account new shares at 95% of the market price.

If AST begins to buy Fund shares for your account at a discount to net asset value but, during the course of the purchases, the Fund's market price increases to a level above the net asset val-

---

Dividend Reinvestment Plan (Unaudited) (concluded)

ue, AST will complete its purchases, even though the result may be that the average price paid for the purchases exceeds net asset value.

Will the entire amount of my distribution or dividend be reinvested?  
The entire amount of your distribution or dividend, payable in cash, will be reinvested in additional Fund shares. If a balance remains after the purchase of whole shares, your account will be credited with any fractional shares (rounded to three decimal places) necessary to complete the reinvestment.

How can I sell my shares?

You can sell any or all of the shares in your Plan account by contacting AST. AST charges \$15 for the transaction plus \$.10 per share for this service. You can also withdraw your shares from your Plan account and sell them through your broker.

Does participation in the Plan change the tax status of my distributions or dividends?

No. The distributions and dividends are paid in cash and their taxability is the same as if you received the cash. It is only after the payment of distributions and dividends that AST reinvests the cash for your account.

Can I get certificates for the shares in the Plan?

AST will issue certificates for whole shares upon your request. Certificates for fractional shares will not be issued.

Is there any charge to participate in the Plan?

There is no charge to participate in the Plan. You will, however, pay a pro rata share of brokerage commissions incurred with respect to AST's open market purchases of shares for your Plan account.

How can I discontinue my participation in the Plan?

Contact your broker or AST in writing. If your shares are in a Plan account,

Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

AST will send you a certificate for your whole shares and a check for any fractional shares.

Where can I direct my questions and correspondence?  
Contact your broker, or contact AST as follows:

By mail:

American Stock Transfer & Trust Company  
PO Box 922  
Wall Street Station  
New York, NY 10269-0560

Through the Internet:

[www.amstock.com](http://www.amstock.com)

Through AST's automated voice response System:

1-888-556-0425

AST will furnish you with a copy of the Terms and Conditions of the Plan without charge.
