PROSPECTUS SUPPLEMENT

(To Prospectus dated October 15, 2013)

Up to 50,000,000 Shares

Common Stock

Prospect Capital Corporation is a financial services company that primarily lends to and invests in middle market, privately-held companies. We are organized as an externally-managed, non-diversified closed-end management investment company that has elected to be treated as a business development company under the Investment Company Act of 1940. Prospect Capital Management LLC manages our investments and Prospect Administration LLC provides the administrative services necessary for us to operate.

We have entered into equity distribution agreements, dated August 29, 2014, with KeyBanc Capital Markets Inc., or "KeyBanc," BB&T Capital Markets, a division of BB&T Securities, LLC or "BB&T Capital Markets," Goldman, Sachs & Co., and RBC Capital Markets, LLC, or "RBC Capital Markets," relating to shares of common stock offered by this prospectus supplement and the accompanying prospectus. We sometimes refer to KeyBanc, BB&T Capital Markets, Goldman, Sachs & Co., and RBC Capital Markets individually as a "Sales Manager" and together as the "Sales Managers."

The equity distribution agreements provide that we may offer and sell up to 50,000,000 shares of our common stock from time to time through the Sales Managers, as our agents for the offer and sale of such common stock. Sales of our common stock, if any, under this prospectus supplement and the accompanying prospectus may be made by means of ordinary brokers' transactions on the NASDAQ Global Select Market or that otherwise qualify for delivery of a prospectus to the NASDAQ Global Select Market in accordance with Rule 153 under the Securities Act of 1933, as amended, or the "1933 Act," at market prices prevailing at the time of sale, at prices related to prevailing market prices or negotiated transactions or as otherwise agreed with the applicable Sales Manager.

The Sales Managers will receive from us a commission to be negotiated from time to time but in no event in excess of 2.0% of the gross sales price of all shares of common stock sold through them as Sales Managers under the equity distribution agreements. The Sales Managers are not required to sell any specific number or dollar amount of common stock, but each will use its commercially reasonable efforts to sell the common stock offered by this prospectus supplement and the accompanying prospectus. See "Plan of Distribution" on page S-66 of this prospectus supplement. These shares of common stock may be offered at a discount from our most recently determined net asset value, or "NAV," per share pursuant to authority granted by our stockholders at the 2013 annual meeting of stockholders held on December 6, 2013. Sales of common stock at prices below NAV per share dilute the interests of existing stockholders, have the effect of reducing our NAV per share and may reduce our market price per share. See "Risk Factors" beginning on page S-8 and "Recent Sales of Common Stock Below Net Asset Value" beginning on page S-56 of this prospectus supplement and "Sales of Common Stock Below Net Asset Value" beginning on page 116 of the accompanying prospectus.

Our common stock is listed on The Nasdaq Global Select Market under the symbol "PSEC." The last reported sale price of our common stock on August 28, 2014 was \$10.26 per share. Our most recently estimated NAV per share is \$10.56 on an as adjusted basis solely to give effect to our issuance of common stock since June 30, 2014 in connection with our dividend reinvestment plan, the same as the \$10.56 determined by us as of June 30, 2014.

This prospectus supplement and the accompanying prospectus contain important information you should know before investing in our securities. Please read it before you invest and keep it for future reference. We file annual, quarterly and current reports, proxy statements and other information about us with the Securities and Exchange Commission, or the "SEC." This information is available free of charge by contacting us at 10 East 40th Street, 42nd Floor, New York, NY 10016 or by telephone at (212) 448-0702. ## FORWARD-LOOKING STATEMENTS

This prospectus supplement and the accompanying prospectus may contain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, or the "Exchange Act," which involve substantial risks and uncertainties. Forward-looking statements predict or describe our future operations, business plans, business and investment strategies and portfolio management and the performance of our investments and our investment management business. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates and projections about our industry, our beliefs, and our assumptions. Words such as "intends," "intend," "intended," "goal," "estimate," "estimates," "expects," "expect," "expected," "project," "projected," "projections," "plans," "seeks," "anticipates," "anticipated," "should," "could," "may," "will," "designed to," "foreseeable future," "believe," "believes" and "scheduled" and variations of these words and similar expressions are intended to identify forward-looking statements. Our actual results or outcomes may differ materially from those anticipated. Readers are cautioned not to place undue reliance on these forward looking statements, which speak only as of the date the statement was made. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. These statements are not guarantees of future performance and are subject to risks, uncertainties, and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements, including without limitation:

- our future operating results,
- our business prospects and the prospects of our portfolio companies,
- the impact of investments that we expect to make,
- our contractual arrangements and relationships with third parties,
- the dependence of our future success on the general economy and its impact on the industries in which we invest,
- the ability of our portfolio companies to achieve their objectives,
- difficulty in obtaining financing or raising capital, especially in the current credit and equity environment,
- the level and volatility of prevailing interest rates and credit spreads, magnified by the current turmoil in the credit markets,
- adverse developments in the availability of desirable loan and investment opportunities whether they are due to competition, regulation or otherwise,
- a compression of the yield on our investments and the cost of our liabilities, as well as the level of leverage available to us,
- our regulatory structure and tax treatment, including our ability to operate as a business development company and a regulated investment company,
- the adequacy of our cash resources and working capital,
- the timing of cash flows, if any, from the operations of our portfolio companies,
- the ability of our investment adviser to locate suitable investments for us and to monitor and administer our investments,
- authoritative generally accepted accounting principles or policy changes from such standard-setting bodies as the Financial Accounting Standards Board, the SEC, Internal Revenue Service, the NASDAQ Global Select Market, and other authorities that we are subject to, as well as their counterparts in any foreign jurisdictions where we might do business, and
- the risks, uncertainties and other factors we identify in "Risk Factors" and elsewhere in this prospectus supplement and the accompanying prospectus and in our filings with the SEC.

Although we believe that the assumptions on which these forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and as a result, the forward-looking statements based on those assumptions also could be inaccurate. Important assumptions include our ability to originate new loans and investments, ability to obtain certain margins and levels of profitability and the availability of additional capital. In light of these and other uncertainties, the inclusion of a projection or forward-looking statement in this prospectus supplement and the accompanying prospectus, respectively, should not be regarded as a representation by us that our plans and objectives will be achieved. These risks and uncertainties include those described or identified in "Risk

Factors" and elsewhere in this prospectus supplement and the accompanying prospectus, respectively. You should not place undue reliance on these forward-looking statements, which apply

i

only as of the date of this prospectus supplement or the accompanying prospectus, as applicable. These forward-looking statements do not meet the safe harbor for forward-looking statements pursuant to Section 27A of the Securities Act of 1933, as amended, or the "Securities Act."

You should rely only on the information contained in this prospectus supplement and the accompanying prospectus. We have not, and the Sales Managers have not, authorized any other person to provide you with information that is different from that contained in this prospectus supplement or the accompanying prospectus. If anyone provides you with different or inconsistent information, you should not rely on it. We are not, and the Sales Managers are not, making an offer of these securities in any jurisdiction where the offer is not permitted. You should assume that the information appearing in this prospectus supplement and the accompanying prospectus is accurate only as of their respective dates and we assume no obligation to update any such information. Our business, financial condition and results of operations may have changed since those dates. Although we undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, you are advised to consult any additional disclosures that we may make directly to you or through reports that we have filed with the SEC, including annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K. This prospectus supplement supersedes the accompanying prospectus to the extent it contains information that is different from or in addition to the information in that prospectus.

## PROSPECTUS SUMMARY

This summary highlights some of the information contained elsewhere in this prospectus supplement and the accompanying prospectus. It is not complete and may not contain all of the information that you may want to consider. You should read carefully the more detailed information set forth under "Risk Factors" in this prospectus supplement and in the accompanying prospectus and the other information included in this prospectus supplement and the accompanying prospectus.

The terms "we," "us," "our" and "Company" refer to Prospect Capital Corporation; "Prospect Capital Management," "Investment Adviser" and "PCM" refer to Prospect Capital Management LLC; and "Prospect Administration" and the "Administrator" refer to Prospect Administration LLC.

### The Company

We are a financial services company that primarily lends to and invests in middle market privately-held companies. We are a closed-end investment company incorporated in Maryland. We have elected to be regulated as a business development company ("BDC") under the Investment Company Act of 1940 (the "1940 Act"). As a BDC, we have elected to be treated as a regulated investment company ("RIC") under Subchapter M of the Internal Revenue Code of 1986 (the "Internal Revenue Code" or the "Code"). We invest primarily in senior and subordinated debt and equity of companies in need of capital for acquisitions, divestitures, growth, development, recapitalizations and other purposes. We work with the management teams or financial sponsors to seek investments with historical cash flows, asset collateral or contracted pro-forma cash flows.

We currently have nine origination strategies in which we make investments: (1) lending in private equity sponsored transactions, (2) lending directly to companies not owned by private equity firms, (3) control investments in corporate operating companies, (4) control investments in financial companies, (5) investments in structured credit, (6) real estate investments, (7) investments in syndicated debt, (8) aircraft leasing and (9) online lending. We continue to evaluate other origination strategies in the ordinary course of business with no specific tops-down allocation to any single origination strategy.

**Lending in Private Equity Sponsored Transactions** – We make loans to companies which are controlled by leading private equity firms. This debt can take the form of first lien, second lien, unitranche or unsecured loans. In making these investments, we look for a diversified customer base, recurring demand for the product or service, barriers to entry, strong historical cash flow and experienced management teams. These loans typically have significant equity subordinate to our loan position. Historically, this strategy has comprised approximately 50%-60% of our business, but more recently it is less than 50% of our business.

**Lending Directly to Companies** – We provide debt financing to companies owned by non-private equity firms, the company founder, a management team or a family. Here, in addition to the strengths we look for in a sponsored transaction, we also look for the alignment with the management team with significant invested capital. This strategy often has less competition than the private equity sponsor strategy because such company financing needs are not easily addressed by banks and often require more diligence preparation. Direct lending can result in higher returns and lower leverage than sponsor transactions and may include warrants or equity to us. Historically, this strategy has comprised approximately 5%-15% of our business, but more recently it is less than 5% of our business.

**Control Investments in Corporate Operating Companies** – This strategy involves acquiring controlling stakes in non-financial operating companies. Our investments in these companies are generally structured as a combination of yield-producing debt and equity. We provide certainty of closure to our counterparties, give the seller personal liquidity and generally look for management to continue on in their current roles. This strategy has comprised approximately 10%-15% of our business.

**Control Investments in Financial Companies** – This strategy involves acquiring controlling stakes in financial companies, including consumer direct lending, sub-prime auto lending and other strategies. Our investments in these companies are generally structured as a combination of yield-producing debt and equity. These investments are often structured in a tax-efficient RIC-compliant partnership, enhancing returns. This strategy has comprised approximately 5%-15% of our business.

**Investments in Structured Credit** – We make investments in collateralized loan obligations ("CLOs"), generally taking a significant position in the subordinated interests (equity) of the CLOs. The CLOs include a diversified portfolio of

broadly syndicated loans and do not have direct exposure to real estate, mortgages, sub-prime debt, or consumer based debt. The CLOs in which we invest are managed by top-tier collateral managers that have been thoroughly diligenced prior to investment. This strategy has comprised approximately 10%-20% of our business.

Real Estate Investments – We make investments in real estate through our three wholly-owned tax-efficient real estate investment trusts ("REITs"), American Property REIT Corp., National Property REIT Corp. and United Property REIT Corp. (collectively, "our REITs"). Our real estate investments are in various classes of fully developed and occupied real estate

S-1

---

properties that generate current yields. We seek to identify properties that have historically high occupancy and steady cash flow generation. Our REITs partner with established property managers with experience in managing the property type to manage such properties after acquisition. This is a more recent investment strategy that has comprised approximately 5%-10% of our business.

**Investments in Syndicated Debt** – On an opportunistic basis, we make investments in loans and high yield bonds that have been sold to a syndicate of buyers. Here we look for investments with attractive risk-adjusted returns after we have completed a fundamental credit analysis. These investments are purchased with a long term, buy-and-hold outlook and we look to provide significant structuring input by providing anchoring orders. This strategy has comprised approximately 5%-10% of our business.

**Aircraft Leasing** – We invest debt as well as equity in aircraft assets subject to commercial leases to credit-worthy airlines across the globe. These investments present attractive return opportunities due to cash flow consistency from long-lived assets coupled with hard asset collateral. We seek to deliver risk-adjusted returns with strong downside protection by analyzing relative value characteristics across the spectrum of aircraft types of all vintages. Our target portfolio includes both in-production and out-of-production jet and turboprop aircraft and engines, operated by airlines across the globe. This strategy comprised approximately 1.5% of our business in the fiscal year ended June 30, 2014.

**Online Lending** – We make investments in loans originated by certain consumer loan and small and medium sized business (“SME”) originators. We purchase each loan in its entirety (i.e., a “whole loan”). The borrowers are consumers and SMEs. The loans are typically serviced by the originators of the loans. This strategy comprised approximately 1% of our business in the fiscal year ended June 30, 2014.

Typically, we concentrate on making investments in companies with annual revenues of less than \$750 million and enterprise values of less than \$1 billion. Our typical investment involves a secured loan of less than \$250 million. We also acquire controlling interests in companies in conjunction with making secured debt investments in such companies. In most cases, companies in which we invest are privately held at the time we invest in them. We refer to these companies as “target” or “middle market” companies and these investments as “middle market investments.” We seek to maximize total returns to our investors, including both current yield and equity upside, by applying rigorous credit analysis and asset-based and cash-flow based lending techniques to make and monitor our investments. We are constantly pursuing multiple investment opportunities, including purchases of portfolios from private and public companies, as well as originations and secondary purchases of particular securities. We also regularly evaluate control investment opportunities in a range of industries, and some of these investments could be material to us. There can be no assurance that we will successfully consummate any investment opportunity we are currently pursuing. If any of these opportunities are consummated, there can be no assurance that investors will share our view of valuation or that any assets acquired will not be subject to future write downs, each of which could have an adverse effect on our stock price.

As of June 30, 2014, we held investments in 143 portfolio companies. The aggregate fair value as of June 30, 2014 of investments in these portfolio companies held on that date is approximately \$6.2 billion. Our portfolio across all our performing interest-bearing investments had an annualized current yield of 12.1% as of June 30, 2014.

#### Recent Developments

##### Recent Investment Activity

On July 22, 2014, Injured Workers Pharmacy, LLC repaid the \$22.7 million loan receivable to us.

On July 23, 2014, Correctional Healthcare Holding Company, Inc. repaid the \$27.1 million loan receivable to us.

On July 28, 2014, Tectum Holdings, Inc. repaid the \$10.0 million loan receivable to us.

On August 1, 2014, we sold our investments in AMU Holdings, Inc. and Airmall, Inc. for net proceeds of \$51.4 million. In addition, there is \$6.0 million being held in escrow, of which 98% is due to Prospect, which will be recognized if and when received.

On August 5, 2014, we made an investment of \$39.1 million to purchase 70.94% of the subordinated notes in CIFIC Funding 2014-IV, Ltd.

On August 13, 2014, we provided \$210.0 million of senior secured financing, of which \$200.0 million was funded at closing, to support the recapitalization of Trinity Services Group, Inc., a leading food services company in the H.I.G. Capital portfolio.

S-2

---

On August 21, 2014, we issued 129,435 shares of our common stock in connection with the dividend reinvestment plan.

On August 22, 2014, Byrider Systems Acquisition Corp. repaid the \$11.2 million loan receivable to us.

On August 22, 2014, TriMark USA, LLC repaid the \$10.0 million loan receivable to us.

On August 29, 2014, we made a follow-on secured debt investment of \$15.0 million to support the recapitalization of BNN Holdings Corp. (f/k/a Biotronic NeuroNetwork), a provider of intra-operative neurophysiological monitoring services.

#### Credit Facility

On July 11, 2014, we increased total commitments to our Revolving Credit Facility by \$10.0 million to \$867.5 million in the aggregate.

On July 23, 2014, we increased total commitments to our Revolving Credit Facility by \$10.0 million to \$877.5 million in the aggregate.

On August 29, 2014, we completed a first closing on an expanded five-and-one-half year \$1.5 billion revolving credit facility (the "Facility") for Prospect Capital Funding LLC with reduced pricing. The new Facility, for which twenty lenders have closed on \$800 million to date, includes an accordion feature that allows the Facility, at our discretion, to accept up to a total of \$1.5 billion of commitments, an objective we target reaching with additional lenders. The Facility matures in March 2020 and is substantially similar to the terms of the prior revolving credit facility. It includes a revolving period that extends through March 2019, followed by an additional one-year amortization period, with distributions allowed to us after the completion of the revolving period. Pricing for the Facility is one-month Libor plus 2.25%, achieving 50 basis point reduction in pricing from the previous five-year facility pricing of Libor plus 2.75%. The new Facility has an investment grade Moody's rating of Aa3.

#### Debt

On August 14, 2014, we announced the then current conversion rate our \$200.0 million of 5.75% Convertible Senior Notes due 2018, or the "2018 Notes", as 83.6661 shares of common stock per \$1 principal amount of the 2018 Notes converted, which is equivalent to a conversion price of approximately \$11.95.

On July 24, 2014, we issued 98,503 shares of our common stock in connection with the dividend reinvestment plan.

On August 21, 2014, we issued 129,435 shares of our common stock in connection with the dividend reinvestment plan.

The Offering Common stock offered by us	Up to 50,000,000 shares.
Common stock outstanding as of the date of this prospectus supplement	342,854,575 shares.
Use of proceeds	We expect to use the net proceeds from this offering initially to maintain balance sheet liquidity, involving repayment of debt under our credit facility, if any, investments in high quality short-term debt instruments or a combination thereof, and thereafter to make long-term investments in accordance with our investment objective. See "Use of Proceeds" in this prospectus supplement.
The NASDAQ Global Select Market symbol	PSEC
Risk factors	See "Risk Factors" in this prospectus supplement and the accompanying prospectus and other information in this prospectus supplement and the accompanying prospectus for a discussion of factors you should carefully consider before you decide whether to make an investment in shares of our common stock.
Current Distribution Rate	<p>On February 3, 2014, we announced the declaration of monthly dividends in the following amounts and with the following dates:</p> <ul style="list-style-type: none"><li>• \$0.110500 per share for August 2014 to holders of record on August 29, 2014 with a payment date of September 18, 2014; and</li><li>• \$0.110525 per share for September 2014 to holders of record on September 30, 2014 with a payment date of October 22, 2014.</li></ul> <p>On May 6, 2014, we announced the declaration of monthly dividends in the following amounts and with the following dates:</p> <ul style="list-style-type: none"><li>• \$0.110550 per share for October 2014 to holders of record on October 31, 2014 with a payment date of November 20, 2014;</li><li>• \$0.110575 per share for November 2014 to holders of record on November 28, 2014 with a payment date of December 18, 2014; and</li><li>• \$0.110600 per share for December 2014 to holders of record on December 31, 2014 with a payment date of January 22, 2015.</li></ul> <p>Based on the August 2014 distribution of \$0.110500, this represents an annualized yield of approximately 12.9% based on our August 28, 2014 closing stock price of \$10.26 per share. Such distributions are expected to be payable out of earnings. Our</p>

distribution levels are subject to change or discontinuance at any time in the discretion of our Board of Directors. Our future earnings and operating cash flow may not be sufficient to support a dividend.

## Fees and Expenses

The following tables are intended to assist you in understanding the costs and expenses that an investor in this offering will bear directly or indirectly. We caution you that some of the percentages indicated in the table below are estimates and may vary. In these tables, we assume that we have borrowed \$800.0 million under our credit facility, which is the maximum amount available under the credit facility, in addition to our other indebtedness of \$2.7 billion and a maximum sales load pursuant to the equity distribution agreements. We do not intend to issue preferred stock during the year. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by "you" or "us" or that "we" will pay fees or expenses, the Company will pay such fees and expenses out of our net assets and, consequently, you will indirectly bear such fees or expenses as an investor in the Company. However, you will not be required to deliver any money or otherwise bear personal liability or responsibility for such fees or expenses.

## Stockholder transaction expenses:

Sales load (as a percentage of offering price)(1)	2.00	%
Offering expenses borne by the Company (as a percentage of offering price)(2)	0.07	%
Dividend reinvestment plan expenses(3)	None	
Total stockholder transaction expenses (as a percentage of offering price)	2.07	%
Annual expenses (as a percentage of net assets attributable to common stock)(4):		
Management fees(5)	4.02	%
Incentive fees payable under Investment Advisory Agreement (20% of realized capital gains and 20% of pre-incentive fee net investment income)(6)	2.47	%
Total advisory fees	6.49	%
Total interest expense(7)	4.59	%
Acquired Fund Fees and Expenses(8)	0.01	%
Other expenses(9)	1.05	%
Total annual expenses(6)(9)	12.14	%

## Example

The following table demonstrates the projected dollar amount of cumulative expenses we would pay out of net assets and that you would indirectly bear over various periods with respect to a hypothetical investment in our common stock. In calculating the following expense amounts, we have assumed we have borrowed all \$800.0 million available under our line of credit, in addition to our other indebtedness of \$2.7 billion and that our annual operating expenses would remain at the levels set forth in the table above and that we would pay the costs shown in the table above.

	1 Year	3 Years	5 Years	10 Years	
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return*	\$ 115.42	\$ 291.81	488.84	\$ 452.10	\$ 791.70
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return**	\$ 125.21	386.12	\$ 319.54	\$ 495.72	\$ 867.03

\* Assumes that we will not realize any capital gains computed net of all realized capital losses and unrealized capital depreciation.

\*\* Assumes no unrealized capital depreciation or realized capital losses and 5% annual return resulting entirely from net realized capital gains (and therefore subject to the capital gains incentive fee).

While the example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. The income incentive fee under our Investment Advisory Agreement with Prospect Capital Management is unlikely to be material assuming a 5% annual return and is not included in the example. If we achieve sufficient returns on our investments, including through the realization of capital gains, to trigger an incentive fee of a material amount, our distributions to our common stockholders and our expenses would likely be higher. In addition, while the example assumes reinvestment of all dividends and other distributions at NAV, participants in our dividend reinvestment plan will receive a number of shares of our common stock determined by dividing the total

dollar amount of the distribution payable to a participant by the market price per share of our common stock at the close of trading on the valuation date for the distribution. See "Dividend Reinvestment Plan" for additional information regarding our dividend reinvestment plan.

This example and the expenses in the table above should not be considered a representation of our future expenses. Actual expenses (including the cost of debt, if any, and other expenses) may be greater or less than those shown.

- 
- Represents the estimated commission with respect to the shares of common stock being sold in this offering. The Sales Managers will be entitled to compensation up to 2.00% of the gross proceeds of the sale of any shares of our
- (1) common stock under the equity distribution agreements, with the exact amount of such compensation to be mutually agreed upon by the Company and the Sales Managers from time to time. There is no guarantee that there will be any sales of our common stock pursuant to this prospectus supplement and the accompanying prospectus.
  - (2) The offering expenses of this offering are estimated to be approximately \$350,000.
  - (3) The expenses of the dividend reinvestment plan are included in "other expenses." See "Capitalization" in this prospectus supplement.
  - (4) Net assets attributable to our common stock equal net assets (i.e., total assets less liabilities other than liabilities for money borrowed for investment purposes) at June 30, 2014.  
Our base management fee is 2% of our gross assets (which include any amount borrowed, i.e., total assets without deduction for any liabilities, including any borrowed amounts for non-investment purposes, for which purpose we have not and have no intention of borrowing). Although we have no intent to borrow the entire amount available under our line of credit, assuming that we had total borrowings of \$3.5 billion, the 2% management fee of gross assets would equal approximately 4.02% of net assets. Based on our borrowings as of August 28, 2014 of \$2.7 billion, the 2% management fee of gross assets would equal approximately 3.59% of net assets. See "Business—Management Services—Investment Advisory Agreement" and footnote 5 below.  
Based on the incentive fee paid during our most recently completed quarter ended June 30, 2014, all of which consisted of an income incentive fee. The capital gain incentive fee is paid without regard to pre-incentive fee income. For a more detailed discussion of the calculation of the two-part incentive fee, see "Management Services—Investment Advisory Agreement" in the accompanying prospectus.
  - (5) As of August 28, 2014, Prospect has \$2.7 billion outstanding of its Senior Notes (as defined below) in various maturities, ranging from December 15, 2015 to October 15, 2043, and interest rates, ranging from 3.23% to 7.0%, some of which are convertible into shares of Prospect common stock at various conversion rates. Please see "Business of Prospect—General" and "Risks Related to Prospect—Risks Relating to Prospect's Business" below for more detail on the Senior Notes.
  - (6) The Company's stockholders indirectly bear the expenses of underlying investment companies in which the Company invests. This amount includes the fees and expenses of investment companies in which the Company is invested in as of June 30, 2014. When applicable, fees and expenses are based on historic fees and expenses for the investment companies, and for those investment companies with little or no operating history fees and expenses are based on expected fees and expenses stated in the investment companies' prospectus or other similar communication without giving effect to any performance. Future fees and expenses for certain investment companies may be substantially higher or lower because certain fees and expenses are based on the performance of the investment companies, which may fluctuate over time. The amount of the Company's average net assets used in calculating this percentage was based on net assets of approximately \$3.6 billion as of June 30, 2014.
  - (7) "Other expenses" are based on estimated amounts for the current fiscal year. The amount shown above represents the expenses during the year ended June 30, 2014 representing all of our recurring operating expenses (except fees and expenses reported in other items of this table) that are deducted from our operating income and reflected as expenses in our Statement of Operations. The estimate of our overhead expenses, including payments under an administration agreement with Prospect Administration, or the Administration Agreement is based on our projected allocable portion of overhead and other expenses incurred by Prospect Administration in performing its obligations under the Administration Agreement. "Other expenses" does not include non-recurring expenses. See "Business—Management Services—Administration Agreement" in the accompanying prospectus.

## RISK FACTORS

Investing in our common stock involves a high degree of risk. You should carefully consider the risks described below and in the accompanying prospectus on page 10, together with all of the other information included in this prospectus supplement and in the accompanying prospectus, before you decide whether to make an investment in our common stock. The risks set forth below and in the accompanying prospectus are not the only risks we face. If any of the adverse events or conditions described below or in the accompanying prospectus occur, our business, financial condition and results of operations could be materially adversely affected. In such case, our NAV and the trading price of our common stock could decline, we could reduce or eliminate our dividend and you could lose all or part of your investment.

Our most recent NAV was calculated on June 30, 2014 and our NAV when calculated effective September 30, 2014 may be higher or lower.

Our most recently estimated NAV per share is \$10.56 on an as adjusted basis solely to give effect to our issuance of common stock since June 30, 2014 in connection with our dividend reinvestment plan, the same as the \$10.56 determined by us as of June 30, 2014. NAV per share as of September 30, 2014, may be higher or lower than \$10.56 based on potential changes in valuations, issuances of securities, dividends paid and earnings for the quarter then ended. Our Board of Directors has not yet determined the fair value of portfolio investments at any date subsequent to June 30, 2014. Our Board of Directors determines the fair value of our portfolio investments on a quarterly basis in connection with the preparation of quarterly financial statements and based on input from independent valuation firms, our Investment Adviser, our Administrator and the Audit Committee of our Board of Directors.

If we sell shares of our common stock at a discount to our net asset value per share, stockholders who do not participate in such sale will experience immediate dilution in an amount that may be material.

At our 2013 annual meeting of stockholders held on December 6, 2013, our stockholders approved our ability, subject to the condition that the maximum number of shares salable below net asset value pursuant to this authority in any particular offering that could result in such dilution is limited to 25% of our then outstanding common stock immediately prior to each such offering, to sell shares of our common stock at any level of discount from net asset value per share during the 12 month period following December 6, 2013. It should be noted that, theoretically, we may offer up to 25% of our then outstanding common stock each day. The issuance or sale by us of shares of our common stock at a discount to net asset value poses a risk of dilution to our stockholders. In particular, stockholders who do not purchase additional shares of common stock at or below the discounted price in proportion to their current ownership will experience an immediate decrease in net asset value per share (as well as in the aggregate net asset value of their shares of common stock if they do not participate at all). These stockholders will also experience a disproportionately greater decrease in their participation in our earnings and assets and their voting power than the increase we experience in our assets, potential earning power and voting interests from such issuance or sale. In addition, such sales may adversely affect the price at which our common stock trades. We have sold shares of our common stock at prices below net asset value per share in the past and may do so to the future. We have not sold any shares of our common stock at prices below net asset value per share since July 18, 2011. For additional information about recent sales below NAV per share, see "Recent Sales of Common Stock Below Net Asset Value" in this prospectus supplement and for additional information and hypothetical examples of these risks, see "Sales of Common Stock Below Net Asset Value" in this prospectus supplement and in the accompanying prospectus.

Capital markets could experience a period of disruption and instability. Such market conditions have historically and could again have a material and adverse effect on debt and equity capital markets in the United States and abroad, which could have a materially negative impact on our business and operations.

Global capital markets have periodically experienced periods of instability as evidenced by the extended disruptions from 2007 to 2010 in liquidity in the debt capital markets, significant losses in the principal value of investments, the re-pricing of credit risk in the markets and the failure of certain major financial institutions. Such conditions may occur for a prolonged period of time. These market conditions have historically and could again have a material adverse effect on debt and equity capital markets in the United States and Europe, which could have a materially negative impact on our business, financial condition and results of operations. We and other companies in the financial services sector may have to access, if available, alternative markets for debt and equity capital. In such

circumstances, equity capital may be difficult to raise because subject to some limited exceptions, as a BDC, we are generally not able to issue additional shares of our common stock at a price less than net asset value without general approval by our stockholders, which we currently have, and approval of the specific issuance by our Board of Directors. In addition, our ability to incur indebtedness or issue preferred stock is limited by applicable regulations such that our asset coverage, as defined in the 1940 Act, must equal at least 200% immediately after each time we incur indebtedness or issue preferred stock. The debt capital that may be available, if at all, may be at a higher cost and on less

favorable terms and conditions in the future. Any inability to raise capital could have a negative effect on our business, financial condition and results of operations.

Market conditions may in the future make it difficult to extend the maturity of or refinance our existing indebtedness, including the final maturity of our credit facility in March 2015, and any failure to do so could have a material adverse effect on our business. The illiquidity of our investments may make it difficult for us to sell such investments if required. As a result, we may realize significantly less than the value at which we have recorded our investments.

Given the extreme volatility and dislocation that the capital markets have historically experienced, many BDCs have faced, and may in the future face, a challenging environment in which to raise capital. We may in the future have difficulty accessing debt and equity capital, and a severe disruption in the global financial markets or deterioration in credit and financing conditions could have a material adverse effect on our business, financial condition and results of operations. In addition, significant changes in the capital markets, including the extreme volatility and disruption, have had, and may in the future have, a negative effect on the valuations of our investments and on the potential for liquidity events involving our investments. An inability to raise capital, and any required sale of our investments for liquidity purposes, could have a material adverse impact on our business, financial condition or results of operations. The Investment Adviser does not know how long the financial markets will continue to be affected by these events and cannot predict the effects of these or similar events in the future on the United States economy and securities markets or on our investments. The Investment Adviser monitors developments and seeks to manage our investments in a manner consistent with achieving our investment objective, but there can be no assurance that it will be successful in doing so; and the Investment Adviser may not timely anticipate or manage existing, new or additional risks, contingencies or developments, including regulatory developments in the current or future market environment.

We are required to record certain of our assets at fair value, as determined in good faith by our Board of Directors in accordance with our valuation policy. As a result, volatility in the capital markets may have a material adverse effect on our investment valuations and our net asset value, even if we plan to hold investments to maturity.

Uncertainty about the financial stability of the United States and of several countries in the European Union (EU) could have a significant adverse effect on our business, financial condition and results of operations.

Due to federal budget deficit concerns, S&P downgraded the federal government's credit rating from AAA to AA+ for the first time in history on August 5, 2011. Further, Moody's and Fitch have warned that they may downgrade the federal government's credit rating. Further downgrades or warnings by S&P or other rating agencies, and the United States government's credit and deficit concerns in general, including issues around the federal debt ceiling, could cause interest rates and borrowing costs to rise, which may negatively impact both the perception of credit risk associated with our debt portfolio and our ability to access the debt markets on favorable terms. In addition, a decreased credit rating could create broader financial turmoil and uncertainty, which may weigh heavily on our financial performance and the value of our common stock.

In 2010, a financial crisis emerged in Europe, triggered by high budget deficits and rising direct and contingent sovereign debt in Greece, Ireland, Italy, Portugal and Spain, which created concerns about the debt crisis in Europe or any similar crisis could have a detrimental impact on the global economic recovery, sovereign and non-sovereign debt in these countries and the financial condition of European financial institutions. Market and economic disruptions have affected, and may in the future affect, consumer confidence levels and spending, personal bankruptcy rates, levels of incurrence and default on consumer debt and home prices, among other factors. We cannot assure you that market disruptions in Europe, including the increased cost of funding for certain governments and financial institutions, will not impact the global economy, and we cannot assure you that assistance packages will be available, or if available, be sufficient to stabilize countries and markets in Europe or elsewhere affected by a financial crisis. To the extent uncertainty regarding any economic recovery in Europe negatively impacts consumer confidence and consumer credit factors, our business, financial condition and results of operations could be significantly and adversely affected.

On December 18, 2013, the Federal Reserve announced that it would scale back its bond-buying program, or quantitative easing, which was designed to stimulate the economy and expand the Federal Reserve's holdings of long-term securities until key economic indicators, such as the unemployment rate, show signs of improvement. The Federal Reserve signaled it would reduce its purchases of long-term Treasury bonds and would scale back on its

purchases of mortgage-backed securities. It is unclear what effect, if any, the incremental reduction in the rate of the Federal Reserve's monthly purchases will have on the value of our investments. However, it is possible that absent continued quantitative easing by the Federal Reserve, these developments, along with the United States government's federal debt ceiling issues and the European sovereign debt crisis, could cause interest rates and borrowing costs to rise, which may negatively impact our ability to access the debt markets on favorable terms.

Our investments in prospective portfolio companies may be risky and we could lose all or part of our investment. Some of our portfolio companies have relatively short or no operating histories. These companies are and will be subject to all of the business risk and uncertainties associated with any new business enterprise, including the risk that these companies may not reach their investment objective and the value of our investment in them may decline substantially or fall to zero. In addition, investment in the middle market companies that we are targeting involves a number of other significant risks, including:

These companies may have limited financial resources and may be unable to meet their obligations under their securities that we hold, which may be accompanied by a deterioration in the value of their securities or of any collateral with respect to any securities and a reduction in the likelihood of our realizing on any guarantees we may have obtained in connection with our investment.

They may have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns.

Because many of these companies are privately held companies, public information is generally not available about these companies. As a result, we will depend on the ability of the Investment Adviser to obtain adequate information to evaluate these companies in making investment decisions. If the Investment Adviser is unable to uncover all material information about these companies, it may not make a fully informed investment decision, and we may lose money on our investments.

They are more likely to depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a materially adverse impact on our portfolio company and, in turn, on us.

They may have less predictable operating results, may from time to time be parties to litigation, may be engaged in changing businesses with products subject to a risk of obsolescence and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position.

They may have difficulty accessing the capital markets to meet future capital needs.

Changes in laws and regulations, as well as their interpretations, may adversely affect their business, financial structure or prospects.

Increased taxes, regulatory expense or the costs of changes to the way they conduct business due to the effects of climate change may adversely affect their business, financial structure or prospects.

We acquire majority interests in operating companies engaged in a variety of industries. When we acquire these companies we generally seek to apply financial leverage to them in the form of debt. In most cases all or a portion of this debt is held by us, with the obligor being either the operating company itself, a holding company through which we own our majority interest or both. The level of debt leverage utilized by these companies makes them susceptible to the risks identified above.

In addition, our executive officers, directors and the Investment Adviser could, in the ordinary course of business, be named as defendants in litigation arising from proposed investments or from our investments in the portfolio companies.

The Volcker Rule may impact how we operate our business.

Section 13 of the Bank Holding Company Act of 1956, as amended, often referred to as the "Volcker Rule," is expected to impose significant restrictions on banking entities' ability to sponsor or invest in hedge funds, private equity funds or commodity pools, collectively referred to as covered funds. Certain CLOs will be considered covered funds under the Volcker Rule and banking entities' investments in such CLOs may be considered ownership interests that are prohibited. The rules are highly complex, and many aspects of the implementation of the Volcker Rule remain unclear. We are in the process of assessing the impact of the Volcker Rule on our investments, CLOs and on our industry. The Volcker Rule may have a material adverse effect on our ability to invest in bank-sponsored CLOs in the future and therefore may adversely affect our share price.

Risks affecting investments in real estate.

We make investments in commercial and multi-family residential real estate through our three wholly-owned real estate investment trusts ("REITs"), American Property REIT Corp., National Property REIT Corp. and United Property REIT Corp. (collectively, "our REITs"). A number of factors may prevent each of our REIT's properties and assets from generating sufficient net cash flow or may adversely affect their value, or both, resulting in less cash available for distribution, or a loss, to us. These factors include:

national economic conditions;

- regional and local economic conditions (which may be adversely impacted by plant closings, business layoffs, industry slow-downs, weather conditions, natural disasters, and other factors);

local real estate conditions (such as over-supply of or insufficient demand for office space);

changing demographics;

perceptions by prospective tenants of the convenience, services, safety, and attractiveness of a property;

the ability of property managers to provide capable management and adequate maintenance;

the quality of a property's construction and design;

increases in costs of maintenance, insurance, and operations (including energy costs and real estate taxes);

changes in applicable laws or regulations (including tax laws, zoning laws, or building codes);

potential environmental and other legal liabilities;

the level of financing used by our REITs in respect of their properties, increases in interest rate levels on such

financings and the risk that one of our REITs will default on such financings, each of which increases the risk of loss to us;

the availability and cost of refinancing;

the ability to find suitable tenants for a property and to replace any departing tenants with new tenants;

potential instability, default or bankruptcy of tenants in the properties owned by our REITs;

potential limited number of prospective buyers interested in purchasing a property that one of our REITs wishes to sell; and

the relative illiquidity of real estate investments in general, which may make it difficult to sell a property at an attractive price or within a reasonable time frame.

Our ability to enter into transactions with our affiliates is restricted.

We are prohibited under the 1940 Act from knowingly participating in certain transactions with our affiliates without the prior approval of our independent directors. Any person that owns, directly or indirectly, 5% or more of our outstanding voting securities is our affiliate for purposes of the 1940 Act and we are generally prohibited from buying or selling any security or other property from or to such affiliate, absent the prior approval of our independent directors. The 1940 Act also prohibits "joint" transactions with an affiliate, which could include investments in the same portfolio company (whether at the same or different times), without prior approval of our independent directors. Subject to certain limited exceptions, we are prohibited from buying or selling any security or other property from or to the Investment Adviser and its affiliates and persons with whom we are in a control relationship, or entering into joint transactions with any such person, absent the prior approval of the SEC.

On February 10, 2014, we received an exemptive order from the SEC (the "Order") that gave us the ability to negotiate terms other than price and quantity of co-investment transactions with other funds managed by the Investment Adviser or certain affiliates, including Priority Senior Secured Income Fund, Inc. and Pathway Energy Infrastructure Fund, Inc., subject to the conditions included therein. In certain situations where co-investment with one or more funds managed by the Investment Adviser or its affiliates is not covered by the Order, such as when there is an opportunity to invest in different securities of the same issuer, the personnel of the Investment Adviser or its affiliates will need to decide which fund will proceed with the

investment. Such personnel will make these determinations based on policies and procedures, which are designed to reasonably ensure that investment opportunities are allocated fairly and equitably among affiliated funds over time and in a manner that is consistent with applicable laws, rules and regulations. Moreover, except in certain circumstances, when relying on the Order, we will be unable to invest in any issuer in which one or more funds managed by the Investment Adviser or its affiliates has previously invested.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(All figures in this item are in thousands except share, per share and other data)

References herein to "we," "us" or "our" refer to Prospect Capital Corporation and its subsidiary unless the context specifically requires otherwise.

The following discussion should be read in conjunction with the consolidated financial statements and notes thereto appearing elsewhere in this prospectus supplement and accompanying prospectus. Historical results set forth are not necessarily indicative of our future financial position and results of operations.

### Overview

We are a financial services company that primarily lends to and invests in middle market privately-held companies. We are a closed-end investment company incorporated in Maryland. We have elected to be regulated as a business development company ("BDC") under the Investment Company Act of 1940 (the "1940 Act"). As a BDC, we have elected to be treated as a regulated investment company ("RIC"), under Subchapter M of the Internal Revenue Code of 1986 (the "Internal Revenue Code" or the "Code"). We invest primarily in senior and subordinated debt and equity of companies in need of capital for acquisitions, divestitures, growth, development, recapitalizations and other purposes. We work with the management teams or financial sponsors to seek investments with historical cash flows, asset collateral or contracted pro-forma cash flows.

We currently have nine origination strategies in which we make investments: (1) lending in private equity sponsored transactions, (2) lending directly to companies not owned by private equity firms, (3) control investments in corporate operating companies, (4) control investments in financial companies, (5) investments in structured credit, (6) real estate investments, (7) investments in syndicated debt, (8) aircraft leasing and (9) online lending. We continue to evaluate other origination strategies in the ordinary course of business with no specific tops-down allocation to any single origination strategy.

**Lending in Private Equity Sponsored Transactions** – We make loans to companies which are controlled by leading private equity firms. This debt can take the form of first lien, second lien, unitranche or unsecured loans. In making these investments, we look for a diversified customer base, recurring demand for the product or service, barriers to entry, strong historical cash flow and experienced management teams. These loans typically have significant equity subordinate to our loan position. Historically, this strategy has comprised approximately 50%-60% of our business, but more recently it is less than 50% of our business.

**Lending Directly to Companies** – We provide debt financing to companies owned by non-private equity firms, the company founder, a management team or a family. Here, in addition to the strengths we look for in a sponsored transaction, we also look for the alignment with the management team with significant invested capital. This strategy often has less competition than the private equity sponsor strategy because such company financing needs are not easily addressed by banks and often require more diligence preparation. Direct lending can result in higher returns and lower leverage than sponsor transactions and may include warrants or equity to us. Historically, this strategy has comprised approximately 5%-15% of our business, but more recently it is less than 5% of our business.

**Control Investments in Corporate Operating Companies** – This strategy involves acquiring controlling stakes in non-financial operating companies. Our investments in these companies are generally structured as a combination of yield-producing debt and equity. We provide certainty of closure to our counterparties, give the seller personal liquidity and generally look for management to continue on in their current roles. This strategy has comprised approximately 10%-15% of our business.

**Control Investments in Financial Companies** – This strategy involves acquiring controlling stakes in financial companies, including consumer direct lending, sub-prime auto lending and other strategies. Our investments in these companies are generally structured as a combination of yield-producing debt and equity. These investments are often structured in a tax-efficient RIC-compliant partnership, enhancing returns. This strategy has comprised approximately 5%-15% of our business.

**Investments in Structured Credit** – We make investments in collateralized loan obligations ("CLOs"), generally taking a significant position in the subordinated interests (equity) of the CLOs. The CLOs include a diversified portfolio of broadly syndicated loans and do not have direct exposure to real estate, mortgages, sub-prime debt, or consumer based

debt. The CLOs in which we invest are managed by top-tier collateral managers that have been thoroughly diligenced prior to investment. This strategy has comprised approximately 10%-20% of our business.

S-13

---

**Real Estate Investments** – We make investments in real estate through our three wholly-owned tax-efficient real estate investment trusts ("REITs"), American Property REIT Corp., National Property REIT Corp. and United Property REIT Corp. (collectively, "our REITs"). Our real estate investments are in various classes of fully developed and occupied real estate properties that generate current yields. We seek to identify properties that have historically high occupancy and steady cash flow generation. Our REITs partner with established property managers with experience in managing the property type to manage such properties after acquisition. This is a more recent investment strategy that has comprised approximately 5%-10% of our business.

**Investments in Syndicated Debt** – On an opportunistic basis, we make investments in loans and high yield bonds that have been sold to a syndicate of buyers. Here we look for investments with attractive risk-adjusted returns after we have completed a fundamental credit analysis. These investments are purchased with a long term, buy-and-hold outlook and we look to provide significant structuring input by providing anchoring orders. This strategy has comprised approximately 5%-10% of our business.

**Aircraft Leasing** – We invest debt as well as equity in aircraft assets subject to commercial leases to credit-worthy airlines across the globe. These investments present attractive return opportunities due to cash flow consistency from long-lived assets coupled with hard asset collateral. We seek to deliver risk-adjusted returns with strong downside protection by analyzing relative value characteristics across the spectrum of aircraft types of all vintages. Our target portfolio includes both in-production and out-of-production jet and turboprop aircraft and engines, operated by airlines across the globe. This strategy comprised approximately 1.5% of our business in the fiscal year ended June 30, 2014.

**Online Lending** – We make investments in loans originated by certain consumer loan and small and medium sized business ("SME") originators. We purchase each loan in its entirety (i.e., a "whole loan"). The borrowers are consumers and SMEs. The loans are typically serviced by the originators of the loans. This strategy comprised approximately 1% of our business in the fiscal year ended June 30, 2014.

We invest primarily in first and second lien secured loans and unsecured debt, which in some cases includes an equity component. First and second lien secured loans generally are senior debt instruments that rank ahead of unsecured debt of a given portfolio company. These loans also have the benefit of security interests on the assets of the portfolio company, which may rank ahead of or be junior to other security interests. Our investments in CLOs are subordinated to senior loans and are generally unsecured. We invest in debt and equity positions of CLOs which are a form of securitization in which the cash flows of a portfolio of loans are pooled and passed on to different classes of owners in various tranches. Our CLO investments are derived from portfolios of corporate debt securities which are generally risk rated from BB to B.

We hold many of our control investments in a two-tier structure consisting of a holding company and one or more related operating companies. These holding companies serve various business purposes including concentration of management teams, optimization of third party borrowing costs, improvement of supplier, customer, and insurance terms, and enhancement of co-investments by the management teams. In these cases, our investment in the holding company, generally as equity, its equity investment in the operating company and along with any debt from us directly to the operating company structure represents our total exposure for the investment. As of June 30, 2014, as shown in our Consolidated Schedule of Investments, the cost basis and fair value of our investment in controlled companies is \$1,719,242 and \$1,640,454, respectively. This structure gives rise to several of the risks described in our public documents and highlighted above in Part I, Item 1A of this report. Effective for periods commencing on and after July 1, 2014, we will consolidate all wholly-owned and substantially wholly-owned holding companies formed by us for the purpose of holding our controlled investments in operating companies. We do not anticipate any significant effects of consolidating these holding companies as they hold minimal assets other than their investments in the controlled operating companies. Investment company accounting prohibits the consolidation of any operating companies.

We seek to be a long-term investor with our portfolio companies. The aggregate fair value of our portfolio investments was \$6,253,739 and \$4,172,852 as of June 30, 2014 and 2013, respectively. During the year ended June 30, 2014, our net cost of investments increased by \$2,115,744, or 49.7%, as a result of forty-seven new investments, four revolver advances and several follow-on investments of \$2,937,311, payment-in-kind interest of \$15,145, structuring fees of \$45,087 and net amortization of discounts and premiums of \$46,297, while we received full repayments on twenty-one investments, sold eight investments, and received several partial prepayments and

amortization payments totaling \$787,069.

Compared to the end of last fiscal year (ended June 30, 2013), net assets increased by \$961,688, or 36.2%, during the year ended June 30, 2014, from \$2,656,494 to \$3,618,182. This increase resulted from the issuance of new shares of our common stock (less offering costs) in the amount of \$1,030,282, dividend reinvestments of \$15,574, and \$319,020 from operations. These increases, in turn, were offset by \$403,188 in dividend distributions to our stockholders. The \$319,020 from operations is net of the following: net investment income of \$357,223, net realized loss on investments of \$3,346, and net change in unrealized depreciation on investments of \$34,857.

## Fourth Quarter Highlights

### Investment Transactions

During the three months ended June 30, 2014, we acquired \$386,642 of new investments, completed follow-on investments in existing portfolio companies totaling approximately \$55,360, and recorded PIK interest of \$2,102, resulting in gross investment originations of \$444,104. During the three months ended June 30, 2014, we received full repayments on five investments, and received several partial prepayments and amortization payments totaling \$169,617. The more significant of these transactions are discussed in "Portfolio Investment Activity."

### SEC Matter

On May 6, 2014, we announced in our filing on Form 10-Q for the quarter ended March 31, 2014 that the SEC Staff had asserted certain of our wholly-owned holding companies were investment companies, such companies were required to be consolidated in our historical financial results and financial position, and restatement of such financial statements was needed. At that time, we disclosed that we disagreed with the views of the SEC Staff and wished to appeal the conclusion through the Office of the Chief Accountant. On June 10, 2014, based on those discussions with the Office of the Chief Accountant, we concluded the following:

- Our historical non-consolidation of wholly-owned and substantially wholly-owned holding companies did not require restatement of our prior period financial statements.

Upon our adoption of ASU 2013-08 for the fiscal year ended June 30, 2015, we will begin consolidating on a prospective basis certain of our wholly-owned and substantially wholly-owned holding companies formed by us in order to facilitate our investment strategy.

While we were in discussions with the SEC, we elected to suspend our debt and equity raising activities for the remainder of the quarter and continuing through the filing of this Form 10-K. This curtailment of capital raising activities suppressed our levels of origination and growth in the fourth quarter of the fiscal year ended June 30, 2014. This reduction in originations suppressed our level of structuring fees recognized and reduced our earnings for the quarter. Originations were \$1,343,356 in the quarter ended March 31, 2014 versus \$444,104 in the quarter ended June 30, 2014. As a result, structuring fees fell from \$24,659 in the quarter ended March 31, 2014 to \$5,026 in the quarter ended June 30, 2014.

### Equity Issuance

During the three months ended June 30, 2014, we sold 7,711,389 shares of our common stock at an average price of \$10.91 per share, and raised \$84,145 of gross proceeds, under our at-the-market offering program (the "ATM Program"). Net proceeds were \$83,308 after commissions to the broker-dealer on shares sold and offering costs.

On April 17, 2014, May 22, 2014 and June 19, 2014, we issued 86,333, 114,111 and 112,630 shares of our common stock in connection with the dividend reinvestment plan, respectively.

### Dividend

On May 6, 2014, we announced the declaration of monthly dividends in the following amounts and with the following dates:

- \$0.110550 per share for October 2014 to holders of record on October 31, 2014 with a payment date of November 20, 2014;

- \$0.110575 per share for November 2014 to holders of record on November 28, 2014 with a payment date of December 18, 2014; and

- \$0.110600 per share for December 2014 to holders of record on December 31, 2014 with a payment date of January 22, 2015.

### Revolving Credit Facility

On May 9, 2014 and May 29, 2014, we increased total commitments to our Revolving Credit Facility by \$45,000 and \$20,000, respectively. The lenders have extended total commitments of \$857,500 as of June 30, 2014, which was increased to \$877,500 in July 2014 (see "Recent Developments").

### Debt Issuance

On April 7, 2014, we issued \$300,000 aggregate principal amount of senior unsecured notes that mature on July 15, 2019 (the "5.00% 2019 Notes"). Included in the issuance is \$45,000 of Prospect Capital InterNotes® that were exchanged for the 5.00% 2019 Notes. The 5.00% 2019 Notes bear interest at a rate of 5.00% per year, payable semi-annually on January 15 and July 15 of each year, beginning July 15, 2014. Total proceeds from the issuance of the 5.00% 2019 Notes, net of underwriting discounts and offering costs, were \$250,775.

On April 11, 2014, we issued \$400,000 aggregate principal amount of senior convertible notes that mature on April 15, 2020 (the "2020 Notes"), unless previously converted or repurchased in accordance with their terms. The 2020 Notes bear interest at a rate of 4.75% per year, payable semi-annually on April 15 and October 15 each year, beginning October 15, 2014. Total proceeds from the issuance of the 2020 Notes, net of underwriting discounts and offering costs, were \$387,500.

During the three months ended June 30, 2014, we issued \$66,554 aggregate principal amount of our Prospect Capital InterNotes® for net proceeds of \$65,251. These notes were issued with stated interest rates ranging from 3.75% to 6.25% with a weighted average interest rate of 5.03%. These notes mature between April 15, 2018 and May 15, 2039.

### Investment Holdings

As of June 30, 2014, we continue to pursue our investment strategy. At June 30, 2014, approximately \$6,253,739, or 172.8%, of our net assets are invested in 143 long-term portfolio investments and CLOs.

During the year ended June 30, 2014, we originated \$2,952,456 of new investments, primarily composed of \$1,585,869 of debt and equity financing to non-controlled investments, \$913,094 of debt and equity financing to controlled investments, and \$453,493 of subordinated notes in CLOs. Our origination efforts are focused primarily on debt and equity financing to controlled investments and secured lending to non-control investments, to reduce the risk in the portfolio, investing primarily in first lien loans, and subordinated notes in CLOs, though we also continue to close select junior debt and equity investments. Our annualized current yield was 13.6% and 12.1% as of June 30, 2013 and June 30, 2014, respectively, across all performing interest bearing investments. The decrease in our current yield is primarily the result of originations at lower rates than our average existing portfolio yield. Monetization of equity positions that we hold and loans on non-accrual status are not included in this yield calculation. In many of our portfolio companies we hold equity positions, ranging from minority interests to majority stakes, which we expect over time to contribute to our investment returns. Some of these equity positions include features such as contractual minimum internal rates of returns, preferred distributions, flip structures and other features expected to generate additional investment returns, as well as contractual protections and preferences over junior equity, in addition to the yield and security offered by our cash flow and collateral debt protections.

We are a non-diversified company within the meaning of the 1940 Act. As required by the 1940 Act, we classify our investments by level of control. As defined in the 1940 Act, "Control Investments" are those where there is the ability or power to exercise a controlling influence over the management or policies of a company. Control is generally deemed to exist when a company or individual possesses or has the right to acquire within 60 days or less, a beneficial ownership of 25% or more of the voting securities of an investee company. Under the 1940 Act, "Affiliate Investments" are defined by a lesser degree of influence and are deemed to exist through the possession outright or via the right to acquire within 60 days or less, beneficial ownership of 5% or more of the outstanding voting securities of another person. "Non-Control/Non-Affiliate Investments" are those that are neither Control Investments nor Affiliate

Investments.

#### Investment Valuation

In determining the fair value of our portfolio investments at June 30, 2014, the Audit Committee considered valuations from the independent valuation firms and from management having an aggregate range of \$6,041,155 to \$6,421,204, excluding money market investments.

In determining the range of value for debt instruments except CLOs, management and the independent valuation firm generally estimate corporate and security credit ratings and identify corresponding yields to maturity for each loan from relevant market data. A discounted cash flow analysis was then prepared using the appropriate yield to maturity as the discount rate, to determine range of value. For non-traded equity investments, the enterprise value was determined by applying EBITDA multiples for similar guideline public companies and/or similar recent investment transactions. For stressed equity investments, a liquidation analysis was prepared.

In determining the range of value for our investments in CLOs, management and the independent valuation firm used a discounted cash flow model. The valuations were accomplished through the analysis of the CLO deal structures to identify the risk exposures from the modeling point of view. For each CLO security, the most appropriate valuation approach was chosen from alternative approaches to ensure the most accurate valuation for such security. A waterfall engine is used to store the collateral data, generate collateral cash flows from the assets based on various assumptions for the risk factors, and distribute the cash flows to the liability structure based on the payment priorities, and discount them back using proper discount rates.

The Board of Directors looked at several factors in determining where within the range to value the asset including: recent operating and financial trends for the asset, independent ratings obtained from third parties, comparable multiples for recent sales of companies within the industry and discounted cash flow models for our investments in CLOs. The composite of all these analyses, applied to each investment, was a total valuation of \$6,253,739, excluding money market investments.

Our portfolio companies are generally lower middle market companies, outside of the financial sector, with less than \$150,000 of annual EBITDA. We believe our market has experienced less volatility than others because we believe there are more buy and hold investors who own these less liquid investments.

Control investments offer increased risk and reward over straight debt investments. Operating results and changes in market multiples can result in dramatic changes in values from quarter to quarter. Significant downturns in operations can further result in our looking to recoveries on sales of assets rather than the enterprise value of the investment.

Transactions between our controlled investments and us have been detailed in Note 14 to the accompanying consolidated financial statements. Several control investments in our portfolio are under enhanced scrutiny by our senior management and our Board of Directors and are discussed below.

#### AMU Holdings Inc.

AIRMALL is a leading developer and manager of airport retail operations. AIRMALL has developed and presently manages all or substantially all of the retail operations and food and beverage concessions at Baltimore/Washington International Thurgood Marshall Airport (BWI), Boston Logan International Airport (BOS), Cleveland Hopkins International Airport (CLE) and Pittsburgh International Airport (PIT). AIRMALL does so pursuant to long-term, infrastructure-like contracts with the respective municipal agencies that own and operate the airports.

On July 30, 2010, we invested \$52,420 of combined debt and equity as follows: \$30,000 senior term loan, \$12,500 senior subordinated note and \$9,920 preferred equity. During the six months ended December 31, 2013, we provided an additional \$7,600 of subordinated secured financing to AIRMALL. On December 4, 2013, we sold a \$972 participation in our term loans in AIRMALL, equal to 2% of the outstanding principal amount of loans on that date. As of June 30, 2014, we own 98% of AIRMALL's equity securities. AIRMALL's financial performance has been consistent since the acquisition and we continue to monitor the medium to long-term growth prospects for the company.

During the three months ended June 30, 2014, \$19,993 of debt that was previously held at AMU Holdings Inc. was assumed by Airmall Inc.

During the year ended June 30, 2014, we received distributions of \$12,000 from AIRMALL which were recorded as dividend income. No dividends were received from AIRMALL during the year ended June 30, 2013. Primarily as a result of

S-29

the distribution of earnings during the year ended June 30, 2014, the Board of Directors decreased the fair value of our investment in AIRMALL to \$45,284 as of June 30, 2014, a discount of \$12,216 from its amortized cost, compared to the \$3,478 unrealized appreciation recorded at June 30, 2013.

#### APH Property Holdings, LLC

APH is a holding company that owns 100% of the common stock of American Property REIT Corp. ("APRC"). APRC is a Maryland corporation and a qualified REIT for federal income tax purposes. APRC was formed to acquire, operate, finance, lease, manage and sell a portfolio of real estate assets. As of June 30, 2014, we own 100% of the fully-diluted common equity of APH.

During the year ended June 30, 2013, we provided \$125,892 and \$26,648 of debt and equity financing, respectively, to APH for the acquisition of various real estate properties. During the year ended June 30, 2014, we provided \$135,350 and \$28,397 of debt and equity financing, respectively, to APH for the acquisition of certain properties. In December 2013, APRC, a wholly-owned subsidiary of APH, distributed its investments in fourteen properties: eight to National Property REIT Corp. ("NPRC"); and six to United Property REIT Corp. ("UPRC"), two newly formed REIT holding companies which are discussed below. The investments transferred consisted of \$98,164 and \$20,022 of debt and equity financing, respectively. The eight investments transferred to NPRC from APRC consisted of \$79,309 and \$16,315 of debt and equity financing, respectively. The six investments transferred to UPRC from APRC consisted of \$18,855 and \$3,707 of debt and equity financing, respectively. There was no gain or loss realized on these transactions.

As of June 30, 2014, APRC's real estate portfolio was comprised of fourteen multi-family properties and one commercial property. The following table shows the location, acquisition date, purchase price, and mortgage outstanding due to other parties for each of the properties:

During the three months ended June 30, 2014, \$167,162 of debt that was previously held at APH Property Holdings, LLC was assumed by American Property REIT Corp.

The Board of Directors set the fair value of our investment in APH at \$206,159 as of June 30, 2014, a premium of \$3,392 from its amortized cost, compared to being valued at cost at June 30, 2013.

#### ARRM Holdings Inc.

Ajax Rolled Ring & Machine, Inc. ("Ajax") forges large seamless steel rings on two forging mills in Ajax's York, South Carolina facility. The rings are used in a range of industrial applications, including in construction equipment and power turbines. Ajax also provides machining and other ancillary services.

On April 4, 2008, we acquired a controlling equity interest in ARRM Holdings Inc. ("ARRM"), which owns 100% of Ajax, the operating company. We funded \$22,000 of senior secured term debt, \$11,500 of subordinated term debt and

\$6,300

of equity as of that closing. During the fiscal year ended June 30, 2010, we funded an additional \$3,530 of secured subordinated debt to refinance a third-party revolver provider and provide working capital. Ajax repaid \$3,461 of this secured subordinated debt during the quarter ended September 30, 2010. During the quarter ended December 31, 2012, we funded an additional \$3,600 of unsecured debt to refinance first lien debt held by Wells Fargo.

On April 1, 2013, we refinanced our existing \$38,472 senior loans to Ajax, increasing the size of our debt investment to \$38,537. Concurrent with the refinancing, we received repayment of the \$18,635 loans that were previously outstanding. On October 11, 2013, we provided \$25,000 in preferred equity for the recapitalization of Ajax. After the financing, we received repayment of the \$20,008 subordinated unsecured loan previously outstanding. As of June 30, 2014, we control 79.53% of the fully-diluted common and preferred equity.

Due to soft operating results, the Board of Directors decreased the fair value of our investment in ARRM to \$25,536 as of June 30, 2014, a discount of \$21,014 from its amortized cost, compared to the \$6,057 unrealized depreciation recorded at June 30, 2013.

Energy Solutions Holdings Inc. (f/k/a Gas Solutions Holdings, Inc.)

Energy Solutions owns interests in companies operating in the energy sector. These include a company operating offshore supply vessels and ownership of a non-operating biomass plant and several coal mines. Energy Solutions subsidiaries formerly owned interests in a gas gathering and processing system in east Texas.

In December 2011, we completed a reorganization of Gas Solutions Holdings, Inc. renaming the company Energy Solutions and transferring ownership of other operating companies owned by us and operating within the energy industry with the intent of strategically expanding Energy Solutions operations across energy sectors. As part of the reorganization, we transferred our equity interests in Change Clean Energy Holdings, Inc. ("CCEHI"), Change Clean Energy, Inc. ("CCEI"), Freedom Marine and Yatesville Coal Holdings, Inc. ("Yatesville") to Energy Solutions. On December 28, 2011, we made a follow-on investment of \$4,750 to support the acquisition of a new vessel by Vessel Holdings LLC, a subsidiary of Freedom Marine.

On January 4, 2012, Energy Solutions sold its gas gathering and processing assets ("Gas Solutions") for a sale price of \$199,805, adjusted for the final working capital settlement, including a potential earnout of \$28,000 that may be paid based on the future performance of Gas Solutions. Through June 30, 2014, we have not accrued income for any portion of the \$28,000 potential payment. After expenses, including structuring fees of \$9,966 paid to us, Energy Solutions received \$158,687 in cash. The sale of Gas Solutions by Energy Solutions resulted in significant earnings and profits, as defined by the Internal Revenue Code, at Energy Solutions for calendar year 2012. As a result, distributions from Energy Solutions to us were required to be recognized as dividend income, in accordance with ASC 946, as cash distributions were received from Energy Solutions, to the extent there are current year earnings and profits sufficient to support such recognition. During the year ended June 30, 2013, we received distributions of \$53,820 from Energy Solutions which were recorded as dividend income. No such dividends were received during the year ended June 30, 2014.

During the year ended June 30, 2014, Energy Solutions repaid the remaining \$8,500 of our subordinated secured debt to the company. In addition to the repayment of principal, we received \$4,812 of make-whole fees for early repayment of the outstanding loan receivables, which was recorded as additional interest income during the year ended June 30, 2014.

On November 25, 2013, we provided \$13,000 in senior secured debt financing for the recapitalization of our investment in Freedom Marine. The subordinated secured loan to Jettco was replaced with a senior secured note to Vessel Holdings II, LLC ("Vessel Holdings II"), a new subsidiary of Freedom Marine. On December 3, 2013, we made a \$16,000 senior secured investment in Vessel Holdings III, LLC, another new subsidiary of Freedom Marine, to support the acquisition of two new vessels. We received \$2,480 of structuring fees from Energy Solutions related to the transaction which was recognized as other income during the year ended June 30, 2014. As of June 30, 2014, our loan to Vessel Holdings II, previously on non-accrual status, was accruing income due to improved operating results. In determining the value of Energy Solutions, we have utilized two valuation techniques to determine the value of the investment: a current value method for the cash balances of Energy Solutions and a liquidation analysis for our interests in CCEHI, CCEI, Freedom Marine and Yatesville. The Board of Directors set the fair value of our investment in Energy Solutions, including the underlying portfolio companies affected by the reorganization, at

\$32,004 as of June 30, 2014, a discount of \$9,742 from its amortized cost, compared to the \$7,574 unrealized depreciation recorded at June 30, 2013.

Based on our share price of \$11.06 at the time of issuance, we acquired our 80.1% interest in First Tower for approximately \$270,771. As consideration for our investment, First Tower Delaware, which is 100% owned by us, recorded a secured revolving credit facility to us of \$244,760 and equity of \$43,193. First Tower Delaware owns 80.1% of First Tower Holdings LLC, the holding company of First Tower. The assets of First Tower acquired include, among other things, the subsidiaries owned by First Tower, which hold finance receivables, leaseholds, and tangible property associated with First Tower's businesses. As part of the transaction, we received \$4,038 and \$4,038 in structuring fee income from First Tower and First Tower Delaware, respectively. On October 18, 2012, we funded an additional \$20,000 of senior secured debt to support seasonally high demand during the holiday season. On December 30, 2013, we funded an additional \$10,000 to again support seasonal demand and received \$8,000 of structuring fees related to the renegotiation and expansion of First Tower's revolver with a third party which was recognized as other income. As of June 30, 2014, First Tower had total assets of approximately \$597,995 including \$385,875 of finance receivables net of unearned charges. As of June 30, 2014, First Tower's total debt outstanding to parties senior to us was \$250,965.

During the three months ended June 30, 2014, \$251,246 of debt that was previously held at First Tower Holdings of Delaware LLC was assumed by First Tower, LLC and the remaining \$23,712 of holding company debt was converted into additional equity investment.

Due to improved operating results, the Board of Directors increased the fair value of our investment in First Tower to \$326,785 as of June 30, 2014, a premium of \$7,134 from its amortized cost, compared to the \$9,869 unrealized depreciation recorded at June 30, 2013.

### NPH Property Holdings, LLC

NPH is a holding company that owns 100% of the common stock of National Property REIT Corp. ("NPRC") and 100% of the membership units of NPH Property Holdings II, LLC ("NPH II"). NPRC is a Maryland corporation and a qualified REIT for federal income tax purposes. NPRC was formed to acquire, operate, finance, lease, manage and sell a portfolio of real estate assets. NPH II is a Delaware single member limited liability company structured to enable NPRC to invest in peer-to-peer consumer loans. As of June 30, 2014, we own 100% of the fully-diluted common equity of NPH.

The eight investments transferred to NPRC from APRC consisted of \$79,309 and \$16,315 of debt and equity financing, respectively. There was no gain or loss realized on these transactions. During the year ended June 30, 2014, we provided \$24,700 and \$4,725 of debt and equity financing, respectively, to NPH for the acquisition of certain properties and to invest in peer-to-peer consumer loans.

As of June 30, 2014, NPRC's real estate portfolio was comprised of nine multi-family properties and one commercial property. The following table shows the location, acquisition date, purchase price, and mortgage outstanding due to other parties for each of the properties:

No.	Property Name	City	Acquisition Date	Purchase Price	Mortgage Outstanding

The Board of Directors set the fair value of our investment in NPH at \$124,511 as of June 30, 2014, a discount of \$2,088 from its amortized cost.

#### UPH Property Holdings, LLC

UPH is a holding company that owns 100% of the common stock of United Property REIT Corp. (“UPRC”). UPRC is a Delaware limited liability company and a qualified REIT for federal income tax purposes. UPRC was formed to acquire, operate, finance, lease, manage and sell a portfolio of real estate assets. As of June 30, 2014, we own 100% of the fully-diluted common equity of UPH.

The six investments transferred to UPRC from APRC consisted of \$18,855 and \$3,707 of debt and equity financing, respectively. There was no gain or loss realized on these transactions. During the year ended June 30, 2014, we provided \$1,405 of equity financing to UPH for the acquisition of certain properties.

As of June 30, 2014, UPRC’s real estate portfolio was comprised of six multi-family properties and one commercial property. The following table shows the location, acquisition date, purchase price, and mortgage outstanding due to other parties for each of the properties:

No.	Property Name	City	Acquisition Date	Purchase Price	Mortgage Outstanding
1	Eastwood Village	Stockbridge, GA	12/12/2013	\$25,957	\$19,785

During the three months ended June 30, 2014, \$19,027 of debt that was previously held at UPH Property Holdings, LLC was assumed by United Property REIT Corp.

The Board of Directors set the fair value of our investment in UPH at \$24,566 as of June 30, 2014, a premium of \$426 from its amortized cost.

#### Valley Electric Holdings I, Inc.

Valley Electric is a leading provider of specialty electrical services in the state of Washington and is among the top 50 electrical contractors in the U.S. The company, with its headquarters in Everett, Washington, offers a comprehensive array of contracting services, primarily for commercial, industrial, and transportation infrastructure applications, including new installation, engineering and design, design-build, traffic lighting and signalization, low to medium voltage power distribution, construction management, energy management and control systems, 24-hour electrical maintenance and testing, as well as special projects and tenant improvement services. Valley Electric was founded in 1982 by the Ward family, who held the company until the end of 2012.

On December 31, 2012, Valley Electric Holdings II, Inc., a wholly-owned subsidiary of Valley Electric Holdings I, Inc., and management acquired 100% of the outstanding shares of Valley Electric Company of Mount Vernon, Inc. We funded the recapitalization of Valley Electric with \$42,572 of debt and \$9,526 of equity financing. Through the recapitalization, we acquired a controlling interest in Valley Electric for \$7,449 in cash and 4,141,547 unregistered shares of our common stock. As of June 30, 2014, we control 96.3% of the common equity.

During the three months ended June 30, 2014, \$20,471 of debt that was previously held at Valley Electric Holdings I, Inc. was assumed by Valley Electric Company, Inc. and the remaining \$16,754 of holding company debt was converted into additional equity investment.

Due to soft operating results, the Board of Directors decreased the fair value of our investment in Valley Electric to \$33,556 as of June 30, 2014, a discount of \$23,304 from its amortized cost, compared to being valued at cost at June 30, 2013.

### Wolf Energy Holdings Inc.

Wolf is a holding company formed to hold 100% of the outstanding membership interests of each of Coalbed and AEH. The membership interests of Coalbed and AEH, which were previously owned by Manx, were assigned to Wolf Energy Holdings effective June 30, 2012. The purpose of assignment was to remove those activities from Manx deemed non-core by the Manx convertible debt investors who were not interested in funding those operations. In addition, effective June 29, 2012 C&J Cladding Holding Company, Inc. ("C&J Holdings") merged with and into Wolf Energy Holdings, with Wolf Energy Holdings as the surviving entity. At the time of the merger, C&J Holdings held the remaining undistributed proceeds from the sale of its membership interests in C&J Cladding, LLC. The merger was effectuated in connection with the broader simplification of our energy investment holdings.

On April 15, 2013, assets previously held by H&M Oil & Gas, LLC ("H&M") were assigned to Wolf Energy, LLC ("Wolf Energy") in exchange for a \$66,000 term loan secured by the assets. Our cost basis in this loan of \$44,632 was determined in accordance with ASC 310-40, Troubled Debt Restructurings by Creditors, and is equal to the fair value of assets at the time of transfer and we recorded a realized loss of \$19,647 in connection with the foreclosure on the assets. On May 17, 2013, Wolf Energy sold certain of the assets that had been previously held by H&M that were located in Martin County to Hibernia for \$66,000. Proceeds from the sale were primarily used to repay the loan and net profits interest receivable due to us and we recognized as a realized gain of \$11,826 partially offsetting the previously recorded loss. We received \$3,960 of structuring and advisory fees from Wolf Energy during the year ended June 30, 2013 related to the sale and \$991 under the net profits interest agreement which was recognized as other income during the fiscal year ended June 30, 2013.

The Board of Directors set the fair value of our investment in Wolf Energy Holdings at \$3,599 as of June 30, 2014, a discount of \$4,442 from its amortized cost, compared to the \$3,091 unrealized depreciation recorded at June 30, 2013. Equity positions in the portfolio are susceptible to potentially significant changes in value, both increases as well as decreases, due to changes in operating results. Seven of our controlled companies, AIRMALL, Ajax, CP Energy, First Tower, Gulf Coast, Harbortouch and Valley Electric, experienced such volatility and experienced fluctuations in valuations during the year ended June 30, 2014. See above for discussion regarding the fluctuations in AIRMALL, Ajax, First Tower, and Valley Electric. The value of Gulf Coast decreased to \$14,459 as of June 30, 2014, a discount of \$28,991 to its amortized cost, compared to the \$9,241 unrealized depreciation recorded at June 30, 2013 due to a decline in operating results. The value of Harbortouch increased to \$291,314 as of June 30, 2014, a premium of \$12,620 to its amortized cost. The value of CP Energy increased to \$130,119 as of June 30, 2014, a premium of \$16,618 to its amortized cost. Eight of the other controlled investments have been valued at discounts to the original investment. Nine of the other control investments are valued at the original investment amounts or higher. Overall, at June 30, 2014, control investments are valued at \$78,788 below their amortized cost.

We hold one affiliate investment at June 30, 2014. Our affiliate portfolio company did not experience a significant change in valuation during the year ended June 30, 2014.

With the non-control/non-affiliate investments, generally, there is less volatility related to our total investments because our equity positions tend to be smaller than with our control/affiliate investments, and debt investments are generally not as susceptible to large swings in value as equity investments. For debt investments, the fair value is generally limited on the high side to each loan's par value, plus any prepayment premia that could be imposed. Many of the debt investments in this category have not experienced a significant change in value, as they were previously valued at or near par value. Non-control/non-affiliate investments did not experience significant changes in valuation and are generally performing as expected or better than expected. Two of our Non-control/non-affiliate investments, Stryker Energy, LLC ("Stryker") and Wind River Resources Corporation ("Wind River"), are valued at a discount to amortized cost due to a decline in the operating results of the operating companies from those originally underwritten. In June 2014, New Century Transportation, Inc. ("NCT") filed for bankruptcy. As we hold a second lien position and do not expect liquidation proceeds to exceed the first lien liability, we decreased the fair value of our debt investment to zero. Overall, at June 30, 2014, other non-control/non-affiliate investments are valued at \$52,073 above their amortized cost, excluding our investments in NCT, Stryker and Wind River, as the remaining companies are generally performing as or better than expected.

### Capitalization

Our investment activities are capital intensive and the availability and cost of capital is a critical component of our business. We capitalize our business with a combination of debt and equity. Our debt as of June 30, 2014 consists of: a Revolving Credit Facility availing us of the ability to borrow debt subject to borrowing base determinations; Senior Convertible Notes which we issued in December 2010, February 2011, April 2012, August 2012, December 2012 and April 2014; Senior Unsecured Notes which we issued in May 2012, March 2013 and April 2014; and Prospect Capital InterNotes® which we may issue from time to time. Our equity capital is comprised entirely of common equity. The following table shows the Revolving Credit Facility, Senior

We have and expect to continue to fund a portion of our cash needs through borrowings from banks, issuances of senior securities, including secured, unsecured and convertible debt securities, or issuances of common equity. For flexibility, we maintain a universal shelf registration statement that allows for the public offering and sale of our debt securities, common stock, preferred stock, subscription rights, and warrants and units to purchase such securities in an amount up to \$5,000,000 less issuances to date. As of June 30, 2014, we can issue up to \$3,691,792 of additional debt and equity securities in the public market under this shelf registration. We may from time to time issue securities pursuant to the shelf registration statement or otherwise pursuant to private offerings. The issuance of debt or equity securities will depend on future market conditions, funding needs and other factors and there can be no assurance that any such issuance will occur or be successful.

#### Revolving Credit Facility

On March 27, 2012, we closed on an expanded five-year \$650,000 revolving credit facility with a syndicate of lenders through PCF (the “2012 Facility”). The lenders have extended commitments of \$857,500 under the 2012 Facility as of June 30, 2014, which was increased to \$877,500 in July 2014 (see “Recent Developments”). The 2012 Facility includes an accordion feature which allows commitments to be increased up to \$1,000,000 in the aggregate. The revolving period of the 2012 Facility extends through March 2015, with an additional two year amortization period (with distributions allowed) after the completion of the revolving period. During such two year amortization period, all principal payments on the pledged assets will be applied to reduce the balance. At the end of the two year amortization period, the remaining balance will become due, if required by the lenders.

The 2012 Facility contains restrictions pertaining to the geographic and industry concentrations of funded loans, maximum size of funded loans, interest rate payment frequency of funded loans, maturity dates of funded loans and minimum equity requirements. The 2012 Facility also contains certain requirements relating to portfolio performance, including required minimum

S-35

---

portfolio yield and limitations on delinquencies and charge-offs, violation of which could result in the early termination of the 2012 Facility. The 2012 Facility also requires the maintenance of a minimum liquidity requirement. As of June 30, 2014, we were in compliance with the applicable covenants.

Interest on borrowings under the 2012 Facility is one-month Libor plus 275 basis points with no minimum Libor floor. Additionally, the lenders charge a fee on the unused portion of the 2012 Facility equal to either 50 basis points, if at least half of the credit facility is drawn, or 100 basis points otherwise. The 2012 Facility requires us to pledge assets as collateral in order to borrow under the credit facility. As of June 30, 2014 and June 30, 2013, we had \$780,620 and \$473,508, respectively, available to us for borrowing under the 2012 Facility, of which the amount outstanding was \$92,000 and \$124,000, respectively. As additional eligible investments are transferred to PCF and pledged under the 2012 Facility, PCF will generate additional availability up to the current commitment amount of \$877,500. At June 30, 2014, the investments used as collateral for the 2012 Facility had an aggregate fair value of \$1,535,476, which represents 24.1% of our total investments and money market funds. These assets are held and owned by PCF, a bankruptcy remote special purpose entity, and as such, these investments are not available to our general creditors. The release of any assets from PCF requires the approval of the facility agent.

In connection with the origination and amendments of the 2012 Facility, we incurred \$14,154 of fees, including \$1,319 of fees carried over from the previous facility, which are being amortized over the term of the facility in accordance with ASC 470-50, Debt Modifications and Extinguishments, of which \$4,883 remains to be amortized and is included within deferred financing costs on the Consolidated Statements of Assets and Liabilities as of June 30, 2014.

During the years ended June 30, 2014, 2013 and 2012, we recorded \$12,216, \$9,082 and \$14,883, respectively, of interest costs, unused fees and amortization of financing costs on the 2012 Facility as interest expense.

#### Senior Convertible Notes

On December 21, 2010, we issued \$150,000 aggregate principal amount of senior convertible notes that mature on December 15, 2015 (the "2015 Notes"), unless previously converted or repurchased in accordance with their terms. The 2015 Notes bear interest at a rate of 6.25% per year, payable semi-annually on June 15 and December 15 of each year, beginning June 15, 2011. Total proceeds from the issuance of the 2015 Notes, net of underwriting discounts and offering costs, were \$145,200.

On February 18, 2011, we issued \$172,500 aggregate principal amount of senior convertible notes that mature on August 15, 2016 (the "2016 Notes"), unless previously converted or repurchased in accordance with their terms. The 2016 Notes bear interest at a rate of 5.50% per year, payable semi-annually on February 15 and August 15 of each year, beginning August 15, 2011. Total proceeds from the issuance of the 2016 Notes, net of underwriting discounts and offering costs, were \$167,325. Between January 30, 2012 and February 2, 2012, we repurchased \$5,000 of the 2016 Notes at a price of 97.5, including commissions. The transactions resulted in our recognizing \$10 of loss in the year ended June 30, 2012.

On April 16, 2012, we issued \$130,000 aggregate principal amount of senior convertible notes that mature on October 15, 2017 (the "2017 Notes"), unless previously converted or repurchased in accordance with their terms. The 2017 Notes bear interest at a rate of 5.375% per year, payable semi-annually on April 15 and October 15 of each year, beginning October 15, 2012. Total proceeds from the issuance of the 2017 Notes, net of underwriting discounts and offering costs, were \$126,035.

On August 14, 2012, we issued \$200,000 aggregate principal amount of senior convertible notes that mature on March 15, 2018 (the "2018 Notes"), unless previously converted or repurchased in accordance with their terms. The 2018 Notes bear interest at a rate of 5.75% per year, payable semi-annually on March 15 and September 15 of each year, beginning March 15, 2013. Total proceeds from the issuance of the 2018 Notes, net of underwriting discounts and offering costs, were \$193,600.

On December 21, 2012, we issued \$200,000 aggregate principal amount of senior convertible notes that mature on January 15, 2019 (the "2019 Notes"), unless previously converted or repurchased in accordance with their terms. The 2019 Notes bear interest at a rate of 5.875% per year, payable semi-annually on January 15 and July 15 of each year, beginning July 15, 2013. Total proceeds from the issuance of the 2019 Notes, net of underwriting discounts and offering costs, were \$193,600.

On April 11, 2014, we issued \$400,000 aggregate principal amount of senior convertible notes that mature on April 15, 2020 (the “2020 Notes”), unless previously converted or repurchased in accordance with their terms. The 2020 Notes bear interest at a rate of 4.75% per year, payable semi-annually on April 15 and October 15 each year, beginning October 15, 2014. Total proceeds from the issuance of the 2020 Notes, net of underwriting discounts and offering costs, were \$387,500.

The conversion price in effect at June 30, 2014 was calculated on the last anniversary of the issuance and will be (3) adjusted again on the next anniversary, unless the exercise price shall have changed by more than 1% before the anniversary.

(4) The conversion rate is increased if monthly cash dividends paid to common shares exceed the monthly dividend threshold amount, subject to adjustment.

In no event will the total number of shares of common stock issuable upon conversion exceed 96.8992 per \$1 principal amount of the 2015 Notes (the “conversion rate cap”), except that, to the extent we receive written guidance or a no-action letter from the staff of the Securities and Exchange Commission (the “Guidance”) permitting us to adjust the conversion rate in certain instances without regard to the conversion rate cap and to make the 2015 Notes convertible into certain reference property in accordance with certain reclassifications, business combinations, asset sales and corporate events by us without regard to the conversion rate cap, we will make such adjustments without regard to the conversion rate cap and will also, to the extent that we make any such adjustment without regard to the conversion rate cap pursuant to the Guidance, adjust the conversion rate cap accordingly. We will use our commercially reasonable efforts to obtain such Guidance as promptly as practicable.

Prior to obtaining the Guidance, we will not engage in certain transactions that would result in an adjustment to the conversion rate increasing the conversion rate beyond what it would have been in the absence of such transaction unless we have engaged in a reverse stock split or share combination transaction such that in our reasonable best estimation, the conversion rate following the adjustment for such transaction will not be any closer to the conversion rate cap than it would have been in the absence of such transaction.

Upon conversion, unless a holder converts after a record date for an interest payment but prior to the corresponding interest payment date, the holder will receive a separate cash payment with respect to the notes surrendered for conversion representing accrued and unpaid interest to, but not including, the conversion date. Any such payment will be made on the settlement date applicable to the relevant conversion on the Senior Convertible Notes.

No holder of Senior Convertible Notes will be entitled to receive shares of our common stock upon conversion to the extent (but only to the extent) that such receipt would cause such converting holder to become, directly or indirectly, a beneficial owner (within the meaning of Section 13(d) of the Securities Exchange Act of 1934 and the rules and regulations promulgated thereunder) of more than 5.0% of the shares of our common stock outstanding at such time. The 5.0% limitation shall no longer apply following the effective date of any fundamental change. We will not issue any shares in connection with the conversion or redemption of the Senior Convertible Notes which would equal or exceed 20% of the shares outstanding at the time of the transaction in accordance with NASDAQ rules.

Subject to certain exceptions, holders may require us to repurchase, for cash, all or part of their Senior Convertible Notes upon a fundamental change at a price equal to 100% of the principal amount of the Senior Convertible Notes being repurchased plus any accrued and unpaid interest up to, but excluding, the fundamental change repurchase date.

In addition, upon a fundamental change that constitutes a non-stock change of control we will also pay holders an amount in cash equal to the present value of all remaining interest payments (without duplication of the foregoing amounts) on such Senior Convertible Notes through and including the maturity date.

In connection with the issuance of the Senior Convertible Notes, we incurred \$39,558 of fees which are being amortized over the terms of the notes, of which \$27,824 remains to be amortized and is included within deferred financing costs on the Consolidated Statements of Assets and Liabilities as of June 30, 2014.

---

During the years ended June 30, 2014, 2013 and 2012, we recorded \$58,042, \$45,880 and \$22,197, respectively, of interest costs and amortization of financing costs on the Senior Convertible Notes as interest expense.

#### Senior Unsecured Notes

On May 1, 2012, we issued \$100,000 aggregate principal amount of senior unsecured notes that mature on November 15, 2022 (the “2022 Notes”). The 2022 Notes bear interest at a rate of 6.95% per year, payable quarterly on February 15, May 15, August 15 and November 15 of each year, beginning August 15, 2012. Total proceeds from the issuance of the 2022 Notes, net of underwriting discounts and offering costs, were \$97,000.

On March 15, 2013, we issued \$250,000 aggregate principal amount of senior unsecured notes that mature on March 15, 2023 (the “2023 Notes”). The 2023 Notes bear interest at a rate of 5.875% per year, payable semi-annually on March 15 and September 15 of each year, beginning September 15, 2013. Total proceeds from the issuance of the 2023 Notes, net of underwriting discounts and offering costs, were \$245,885.

On April 7, 2014, we issued \$300,000 aggregate principal amount of senior unsecured notes that mature on July 15, 2019 (the “5.00% 2019 Notes”). Included in the issuance is \$45,000 of Prospect Capital InterNotes® that were exchanged for the 5.00% 2019 Notes. The 5.00% 2019 Notes bear interest at a rate of 5.00% per year, payable semi-annually on January 15 and July 15 of each year, beginning July 15, 2014. Total proceeds from the issuance of the 5.00% 2019 Notes, net of underwriting discounts and offering costs, were \$250,775.

The 2022 Notes, the 2023 Notes and the 5.00% 2019 Notes (collectively, the “Senior Unsecured Notes”) are direct unsecured obligations and rank equally with all of our unsecured senior indebtedness from time to time outstanding. In connection with the issuance of the Senior Unsecured Notes, we incurred \$11,358 of fees which are being amortized over the term of the notes, of which \$10,297 remains to be amortized and is included within deferred financing costs on the Consolidated Statements of Assets and Liabilities as of June 30, 2014.

During the years ended June 30, 2014, 2013 and 2012, we recorded \$25,988, \$11,672 and \$1,178, respectively, of interest costs and amortization of financing costs on the Senior Unsecured Notes as interest expense.

#### Prospect Capital InterNotes®

On February 16, 2012, we entered into a Selling Agent Agreement (the “Selling Agent Agreement”) with Incapital LLC, as purchasing agent for our issuance and sale from time to time of up to \$500,000 of Prospect Capital InterNotes® (the “InterNotes® Offering”), which was increased to \$1,500,000 in May 2014. Additional agents may be appointed by us from time to time in connection with the InterNotes® Offering and become parties to the Selling Agent Agreement.

These notes are direct unsecured senior obligations and rank equally with all of our unsecured senior indebtedness outstanding. Each series of notes will be issued by a separate trust. These notes bear interest at fixed interest rates and offer a variety of maturities no less than twelve months from the original date of issuance.

During the year ended June 30, 2014, we issued \$473,762 aggregate principal amount of our Prospect Capital InterNotes® for net proceeds of \$465,314. These notes were issued with stated interest rates ranging from 3.75% to 6.75% with a weighted average interest rate of 5.12%. These notes mature between October 15, 2016 and October 15, 2043. In connection with the issuance of the Prospect Capital InterNotes®, we incurred \$20,235 of fees which are being amortized over the term of the notes, of which \$18,889 remains to be amortized and is included within deferred financing costs on the Consolidated Statements of Assets and Liabilities as of June 30, 2014.

During the years ended June 30, 2014, 2013 and 2012, we recorded \$33,857, \$9,707 and \$276, respectively, of interest costs and amortization of financing costs on the Prospect Capital InterNotes® as interest expense.

#### Net Asset Value

During the year ended June 30, 2014, we issued \$1,045,856 of additional equity, net of underwriting and offering costs, by issuing 94,789,672 shares of our common stock. The following table shows the calculation of net asset value per share as of June 30, 2014 and June 30, 2013:

	June 30, 2014	June 30, 2013
Net assets	\$3,618,182	\$2,656,494
Shares of common stock issued and outstanding	342,626,637	247,836,965
Net asset value per share	\$10.56	\$10.72

## Results of Operations

Net increase in net assets resulting from operations for the years ended June 30, 2014, 2013 and 2012 was \$319,020, \$220,856 and \$190,904, respectively, representing \$1.06, \$1.07 and \$1.67 per weighted average share, respectively. During the year ended June 30, 2014, the decrease is primarily due to a \$32,300, or \$0.38 per weighted average share, decline in net investment income primarily due to a decrease in dividend income from our investment in Energy Solutions, a decrease in the average rate of interest earned on investments, a decline in structuring fee income (during the quarter ended June 30, 2014) and an increase in interest expense due to additional debt financing. (See "Investment Income" for further discussion of dividend and structuring fee income.) The decline in net investment income is partially offset by a \$65,865, or \$0.37 per weighted average share, favorable decrease in our net realized losses and net change in unrealized depreciation on investments. (See "Net Realized Losses and Net Decrease in Net Assets from Changes in Unrealized Depreciation" for further discussion.)

While we seek to maximize gains and minimize losses, our investments in portfolio companies can expose our capital to risks greater than those we may anticipate. These companies are typically not issuing securities rated investment grade, have limited resources, have limited operating history, have concentrated product lines or customers, are generally private companies with limited operating information available and are likely to depend on a small core of management talents. Changes in any of these factors can have a significant impact on the value of the portfolio company.

## Investment Income

We generate revenue in the form of interest income on the debt securities that we own, dividend income on any common or preferred stock that we own, and fees generated from the structuring of new deals. Our investments, if in the form of debt securities, will typically have a term of one to ten years and bear interest at a fixed or floating rate. To the extent achievable, we will seek to collateralize our investments by obtaining security interests in our portfolio companies' assets. We also may acquire minority or majority equity interests in our portfolio companies, which may pay cash or in-kind dividends on a recurring or otherwise negotiated basis. In addition, we may generate revenue in other forms including prepayment penalties and possibly consulting fees. Any such fees generated in connection with our investments are recognized as earned.

Investment income, which consists of interest income, including accretion of loan origination fees and prepayment penalty fees, dividend income and other income, including settlement of net profits interests, overriding royalty interests and structuring fees, was \$712,291, \$576,336 and \$320,910 for the years ended June 30, 2014, 2013 and 2012, respectively. During the year ended June 30, 2014, the increase in investment income is primarily the result of a larger income producing portfolio. During the year ended June 30, 2013, the increase in investment income is primarily the result of a larger income producing portfolio, increased structuring, advisory and amendment fees from the deployment of additional capital in revenue-producing assets, make-whole fees from Energy Solutions for early repayment of our outstanding loan, and increased dividends received from Energy Solutions and R-V.

The following table describes the various components of investment income and the related levels of debt investments:

	Year Ended June 30,			
	2014	2013	2012	
Interest income	\$613,741	\$435,455	\$219,536	
Dividend income	26,837	82,705	64,881	
Other income	71,713	58,176	36,493	
Total investment income	\$712,291	\$576,336	\$320,910	
Average debt principal of performing investments	\$4,886,846	\$2,878,421	\$1,466,703	
Weighted average interest rate earned on performing assets	12.56	% 15.13	% 14.97	%

Average interest income producing assets have increased from \$1,466,703 for the year ended June 30, 2012 to \$2,878,421 for the year ended June 30, 2013 to \$4,886,846 for the year ended June 30, 2014. The average yield on interest bearing performing assets decreased from 15.1% for the year ended June 30, 2013 to 12.6% for the year ended June 30, 2014. The decrease in annual returns during the comparable period is primarily due to a decline in

prepayment penalty income driven by a \$14,731 decrease in the make-whole fees we received from Energy Solutions. The decrease in our current yield is primarily due to originations at lower rates than our average existing portfolio yield. Excluding the adjustment for make-whole fees our annual return would have been 14.1% for the year ended June 30, 2013.

Investment income is also generated from dividends and other income. Dividend income decreased from \$82,705 for the year ended June 30, 2013 to \$26,837 for the year ended June 30, 2014. The decrease in dividend income is primarily attributed to a \$53,820 decrease in the level of dividends received from our investment in Energy Solutions. The sale of Gas Solutions by Energy Solutions resulted in significant earnings and profits, as defined by the Internal Revenue Code, at Energy Solutions for calendar year 2012. As a result, distributions from Energy Solutions to us were recognized as dividend income, in accordance with ASC 946, Financial Services—Investment Companies, as cash distributions are received from Energy Solutions to the extent there are earnings and profits sufficient to support such recognition. As a result, we received dividends from Energy Solutions of \$53,820 during the year ended June 30, 2013. No such dividends were received during the year ended June 30, 2014 related to our investment in Energy Solutions. The decrease in dividend income is also attributed to a \$23,361 decrease in the level of dividends received from our investment in R-V. We received dividends from R-V of \$1,100 and \$24,462 during the years ended June 30, 2014 and 2013, respectively. The \$24,462 of dividends received from R-V during the year ended June 30, 2013 include a \$11,073 distribution as part of R-V's recapitalization in November 2012 for which we provided an additional \$9,500 of senior secured financing. The decrease in dividend income is further attributed to a \$2,945 decrease in dividends received from our investment in American Gilsonite Company ("AGC"). We received dividends of \$2,945 from AGC during the year ended June 30, 2013. No such dividends were received during the year ended June 30, 2014 related to our investment in AGC. The decrease in dividend income was partially offset by dividends of \$12,000, \$4,841 and \$5,000 received from our investments in AIRMALL, Credit Central and Nationwide, respectively, during the year ended June 30, 2014. The dividends received from Credit Central and Nationwide include distributions as part of follow-on financings in March 2014 for which we provided an additional \$6,500 of financing, as discussed above. No dividends were received from AIRMALL, Credit Central or Nationwide during the year ended June 30, 2013.

Dividend income increased from \$64,881 for the year ended June 30, 2012 to \$82,705 for the year ended June 30, 2013. This \$17,824 increase in dividend income is primarily attributed to an increase in the level of dividends received from our investments in Energy Solutions and R-V due to increased profits generated by the portfolio companies. We received dividends from Energy Solutions of \$53,820 and \$47,850 during the years ended June 30, 2013 and June 30, 2012, respectively. The sale of Gas Solutions by Energy Solutions has resulted in significant earnings and profits, as defined by the Internal Revenue Code, at Energy Solutions for calendar year 2012. We received dividends from R-V of \$24,462 and \$283 during the years ended June 30, 2013 and June 30, 2012, respectively. The \$24,462 of dividends received from R-V during the year ended June 30, 2013 include a \$11,073 distribution as part of R-V's recapitalization in November 2012 for which we provided an additional \$9,500 of senior secured financing. The increases in dividend income from our investments in Energy Solutions and R-V were offset by a reduction in dividends received from NRG. We received dividends from NRG of \$15,011 during the year ended June 30, 2012. There were no dividends from NRG received during the year ended June 30, 2013 as NRG has been sold.

Other income has come primarily from structuring fees, overriding royalty interests, and settlement of net profits interests. Income from other sources increased from \$58,176 for the year ended June 30, 2013 to \$71,713 for the year ended June 30, 2014. The increase is primarily due to a \$4,998 increase in structuring fees, \$5,825 of legal cost reimbursement from a litigation settlement which had been expensed in prior years, and a \$1,771 increase in royalty interests from our controlled investments, particularly APH, Credit Central, First Tower, Nationwide, NPH and UPH. During the years ended June 30, 2014 and 2013, we recognized structuring fees of \$57,697 and \$52,699, respectively, from new originations, restructurings and follow-on investments. Included within the \$57,697 of structuring fees recognized during the year ended June 30, 2014 is an \$8,000 fee from First Tower Delaware related to the renegotiation and expansion of First Tower's third party revolver for which a fee was received in December 2013. The remaining \$49,697 of structuring fees recognized during the year ended June 30, 2014 resulted from follow-on investments and new originations, primarily from our investments in Echelon, Harbortouch, IWCO and Matrixx. Income from other sources increased from \$36,493 for the year ended June 30, 2012 to \$58,176 for the year ended June 30, 2013. The increase is primarily due to \$52,699 of structuring fees recognized during the year ended June 30, 2013 primarily from our investments in APH, Arctic Glacier, Broder, InterDent, Progrexion, Ryan, TransPlace, USC

and Wolf, in comparison to \$26,443 of structuring fees recognized during the year ended June 30, 2012. The increase in structuring fees is partially offset by a decrease in advisory fees recognized during the year ended June 30, 2013 from our investments in Energy Solutions and NRG. We received \$8,783 of advisory fees from Energy Solutions and NRG during the year ended June 30, 2012. No such fee was received during the year ended June 30, 2013. The remaining increase is primarily due to \$4,122 of royalty income recognized during the year ended June 30, 2013 primarily from First Tower and Wolf, in comparison to \$224 of royalty income recognized during the year ended June 30, 2012.

While we were in discussions with the SEC regarding consolidation, we elected to suspend our debt and equity raising activities for the remainder of the quarter and continuing through the filing of this Form 10-K. This curtailment of capital raising activities suppressed our levels of origination and growth in the fourth quarter of the fiscal year ended June 30, 2014. While structuring fees increased from the fiscal year ended June 30, 2013 to the fiscal year ended June 30, 2014, the reduction in originations in the quarter ended June 30, 2014 suppressed our level of structuring fees recognized and reduced our earnings for the quarter. Originations were \$1,343,356 in the quarter ended March 31, 2014 versus \$444,104 in the quarter ended June 30, 2014. As a result, structuring fees fell from \$24,659 in the quarter ended March 31, 2014 to \$5,026 in the quarter ended June 30, 2014.

#### Operating Expenses

Our primary operating expenses consist of investment advisory fees (base management and income incentive fees), borrowing costs, legal and professional fees and other operating and overhead-related expenses. These expenses include our allocable portion of overhead under the Administration Agreement with Prospect Administration under which Prospect Administration provides administrative services and facilities for us. Our investment advisory fees compensate Prospect Capital Management (the "Investment Adviser") for its work in identifying, evaluating, negotiating, closing and monitoring our investments. We bear all other costs and expenses of our operations and transactions. Operating expenses were \$355,068, \$251,412 and \$134,226 for the years ended June 30, 2014, 2013 and 2012, respectively.

The base management fee was \$108,990, \$69,800 and \$35,836 for the years ended June 30, 2014, 2013 and 2012, respectively. The increases are directly related to our growth in total assets. For the years ended June 30, 2014, 2013 and 2012, we incurred \$89,306, \$81,231 and \$46,671 of income incentive fees, respectively. These increases are driven by corresponding increases in pre-incentive fee net investment income from \$233,355 for the year ended June 30, 2012 to \$406,155 for the year ended June 30, 2013 to \$446,529 for the year ended June 30, 2014, primarily due to an increase in interest income from a larger asset base. No capital gains incentive fee has yet been incurred pursuant to the Investment Advisory Agreement.

During the years ended June 30, 2014, 2013 and 2012, we incurred \$130,103, \$76,341 and \$38,534, respectively, of expenses related to our Revolving Credit Facility, Senior Convertible Notes, Senior Unsecured Notes and Prospect Capital InterNotes® (collectively, our "Senior Notes"). These expenses are related directly to the leveraging capacity put into place for each of those periods and the levels of indebtedness actually undertaken in those periods. The table below describes the various expenses of our Senior Notes and the related indicators of leveraging capacity and indebtedness during these periods.

	Year Ended June 30,		
	2014	2013	2012
Interest on borrowings	\$ 111,900	\$ 62,657	\$ 27,346

Accretion of discount on Senior Unsecured Notes	156	50	—
Facility commitment fees	6,556	5,402	2,677
Total interest and credit facility expenses	\$ 130,103	\$ 76,341	\$ 38,534
Average principal debt outstanding	\$ 1,982,054	\$ 1,066,368	\$ 502,038
Weighted average stated interest rate on borrowings(1)	5.65	% 5.88	% 5.45
Weighted average interest rate on borrowings(2)	6.23	% 6.65	% 7.14
Revolving Credit Facility amount at beginning of year	\$ 552,500	\$ 492,500	\$ 325,000

(1) Includes only the stated interest expense.

(2) Includes the stated interest expense, amortization of deferred financing costs, accretion of discount on Senior Unsecured Notes and commitment fees on the undrawn portion of our Revolving Credit Facility.

The increase in interest expense for the year ended June 30, 2014 is primarily due to the issuance of additional Prospect Capital InterNotes®, the 2019 Notes, the 5.00% 2019 Notes, the 2020 Notes, and the 2023 Notes for which we incurred an incremental \$49,101 of collective interest expense, respectively. The weighted average interest rate on borrowings (excluding amortization, accretion and undrawn facility fees) decreased from 5.88% for the year ended

June 30, 2013 to 5.65% for the year ended June 30, 2014. This decrease is primarily due to issuances of debt at lower coupon rates. For example, the weighted average interest rate on our Prospect Capital InterNotes® decreased from 5.65% as of June 30, 2013 to 5.38% as of June 30, 2014.

The allocation of overhead expense from Prospect Administration was \$14,373, \$8,737 and \$6,848 for the years ended June 30, 2014, 2013 and 2012, respectively. As our portfolio continues to grow, we expect Prospect Administration to continue to increase the size of its administrative and financial staff. During the years ended June 30, 2014, 2013 and 2012, Prospect Administration received payments of \$7,582, \$1,394, and \$1,092 directly from our controlled portfolio companies for legal, tax and portfolio level accounting services. We were given a credit for these payments as a reduction of the administrative services cost payable by us to Prospect Administration. Had Prospect Administration not received these payments, Prospect Administration's charges for its administrative services would have increased by these amounts.

Excise tax decreased from an expense of \$6,500 for the year ended June 30, 2013 to a benefit of \$4,200 for the year ended June 30, 2014. As of June 30, 2013, we accrued \$5,000 as an estimate of the excise tax due for continuing to retain a portion of our annual taxable income for the calendar year ended December 31, 2013. We previously paid \$4,500 for the undistributed ordinary income r
