and Report on Review of
Quarterly Information

Report on Review of Quarterly Information

To the Board of Directors and Shareholders

Braskem S.A.

Introduction

We have reviewed the accompanying parent company and consolidated interim accounting information of Braskem S.A., included in the Quarterly Information (ITR) Form for the quarter ended March 31, 2011, comprising the balance sheet and the statements of income, comprehensive income, changes in equity and cash flows for the quarter then ended, and a summary of significant accounting policies and other explanatory information.

Management is responsible for the preparation of the parent company interim accounting information in accordance with the accounting standard CPC 21, Interim Financial Reporting, of the Brazilian Accounting Pronouncements Committee (CPC), and of the consolidated interim accounting information in accordance with accounting standard CPC 21 and International Accounting Standard (IAS) 34 - Interim Financial Reporting issued by the International Accounting Standards Board (IASB), as well as the presentation of this information in accordance with the standards issued by the Brazilian Securities Commission (CVM), applicable to the preparation of the Quarterly Information (ITR). Our responsibility is to express a conclusion on this interim accounting information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International Standards on Reviews of Interim Financial Information (NBC TR 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity and ISRE 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Braskem S.A.

**Conclusion on the parent
company interim information**

Based on our review, nothing has come to our attention that causes us to believe that the accompanying parent company interim accounting information included in the quarterly information referred to above has not been prepared, in all material respects, in accordance with CPC 21 applicable to the preparation of the Quarterly Information, and presented in accordance with the standards issued by the Brazilian Securities Commission (CVM).

**Conclusion on the consolidated
interim information**

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim accounting information included in the quarterly information referred to above has not been prepared, in all material respects, in accordance with CPC 21 and IAS 34 applicable to the preparation of the Quarterly Information, and presented in accordance with the standards issued by the Brazilian Securities Commission (CVM).

Other matters

Interim statements

of value added

We have also reviewed the parent company and consolidated interim statements of value added for the quarter ended March 31, 2011, which are required to be presented in accordance with standards issued by the Brazilian Securities Commission (CVM) applicable to the preparation of Quarterly Information (ITR) and are considered supplementary information under IFRS, which does not require the presentation of the statement of value added. These statements have been submitted to the same review procedures described above and, based on our review, nothing has come to our attention that causes us to believe that they have not been prepared, in all material respects, in relation to the parent company and consolidated interim accounting information taken as a whole.

Braskem S.A.

Notes to the Quarterly Information

of March 31, 2011

All amounts in R\$ thousands unless otherwise stated

1. Operations

(a) Braskem S.A. (“Braskem” or “the Company”) is a publicly-held corporation headquartered in Camaçari, State of Bahia (BA) and controlled by Odebrecht S.A. (“Odebrecht”), which indirectly holds 50.1% and 38.1% of its voting and total capital, respectively.

(b) Corporate restructuring

(b.1) On January 1, 2011, the executive board of Braskem America Inc. unanimously decided to merge into Braskem PP Americas, its wholly-owned subsidiary. With the merger, all common shares of Braskem America were replaced by common shares of Braskem PP Americas and the shares of Braskem America were cancelled. Braskem PP Americas inherited all assets and assumed all rights, liabilities and obligations of Braskem America. On the same date, the corporate name of Braskem PP Americas, Inc. was changed to Braskem America, Inc.

(b.2) On January 3, 2011, the Extraordinary General Meeting of IQ Soluções & Quimica S.A. (“IQ Soluções”) approved the merger of Unipar Comercial e Distribuidora S.A. (“Unipar Comercial”). The merger resulted in an increase in the capital of IQ Soluções by R\$ 38,709,996.56, from R\$ 61,141,160.45 to R\$ 99,851,157.01 without the issue of new shares. Said increase was based on the equity of Unipar Comercial on November 30, 2010 (base date of the operation), under the terms and conditions established in the “Protocol and Justification” dated December 27, 2010.

(c) On March 31, 2011, Braskem’s net working capital (parent company) was negative by R\$ 859,896 as compared with a positive consolidated net working capital of R\$ 1,078,334. Because the consolidated figures are used in the management of working capital, given that the Company uses mechanisms to transfer funds between the companies efficiently, without jeopardizing the fulfillment of the commitments of each of the entities forming the consolidated statements, any analysis of the parent company’s working capital will not reflect the actual liquidity

position of the consolidated group. In addition, the Company has a US\$350 million revolving credit line that may be used without restrictions for three years as of September, 2010, which allowed it to reduce the amount of cash held by Braskem.

In November 2009, the Company entered into an Agreement with the State of Bahia, which ensures the effective implementation of State Decree No. 11,807 of October 27, 2009, which (i) gradually reduced the effective ICMS rate on domestic naphtha acquired in that same state from 17% to 5.5% and, subsequently, to 0% from March 2011; (ii) and allowed for the use of ICMS credits from April 2011 to October 2015 in the amount of R\$ 9,100 until March 2014, with a reduction in the amount until the termination of the agreement.

Consequently, management reclassified the ICMS credits that will be used in 12 months in the amount of R\$ 109,200 from non-current assets to current assets.

Impairment test of goodwill based on future profitability

In December 2010, the Company tested goodwill for impairment using the value-in-use method and did not identify losses.

The projection of cash flows is for 5 years from December 2010. The assumptions used to determine the amount using the discounted cash flow method include: projections of cash flows based on estimates of business for future cash flows, discounted rates based on the Weighted Average Cost of Capital (WACC) and growth rates to determine the perpetuity based on annual inflation rate according to the Broad Consumer Price Index ("IPCA").

There were no significant events or circumstances in the quarter ended March 31, 2010 that indicate the need for an impairment test for the intangible assets.

(d) Capitalized financial charges

The Company and its subsidiaries capitalized financial charges in the period ended March 31, 2011 in the amount of R\$ 5,056, including foreign exchange and monetary variation. The average rate of these charges in the period was 7.28% per year.

(e) Covenants

Some of the financing agreements of the Company and its subsidiaries establish limits for certain indicators related to the capacity for indebtedness and payment of interest.

The first indicator establishes a limit for the indebtedness of the Company and its subsidiaries based on their EBITDA (earnings before interest, taxes, depreciation and amortization) generating capacity.

The second indicator found in the agreements of the Company and its subsidiaries is the division of consolidated EBITDA by net interest, which corresponds to the difference between interest paid and interest received.

On March 31, 2011, all commitments assumed were complied with.

The information related to borrowings was presented in the 2010 annual financial statements Company, in Note 17.

16. Financial instruments

16.1. Risk management

The Company is exposed to market risks arising from variations in commodity prices, foreign exchange and interest rates and to credit and liquidity risk arising from the possibility of default by its counterparties in financial investments, trade accounts receivable and derivatives.

The Company adopts procedures for managing market and credit risks that are in conformity with the new Financial Policy approved by the Board of Directors on August 9, 2010. The purpose of risk management is to protect the cash flows of the Company and reduce the threats to the financing of its operating working capital and investment programs.

The information on risk management was presented in the 2010 annual financial statements, in Note 19.

(a) Fair value hierarchy

We present below the classifications of fair value hierarchies:

Level 1 – Public sources, when the instrument is traded at a stock exchange;

Level 2 – Discounted cash flow models, when the instrument is a forward purchase or sale or a swap contract, or valuation models of option contracts, such as the Black-Scholes model, when the derivative has the characteristics of an option; and

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (that is, unobservable inputs).

(b) Credit risk

The maximum exposure to credit risks of non-derivative assets on the reporting date is their carrying amounts less any impairment loss. On March 31, 2011, the balance of trade accounts receivable is net of the allowance for doubtful accounts and amounts to R\$ 274,226 (December 2010 – R\$ 269,159).

(c) Liquidity risk

The analysis of the main financial liabilities of the Company by maturity is presented in Note 14 (c).

16.4. Credit quality of financial assets

(a) Trade accounts receivable

Only a few of the Company's customers have risk ratings assigned by credit rating agencies. For this reason, the Company developed its own credit rating system based on the distribution of the portfolio of accounts receivable from domestic customers on each base date. The Company does not apply this rating to all of its foreign customers because most accounts receivable from them are covered by an insurance policy or letters of credit issued by banks. As of March 31, 2011, the credit ratings are as follows:

	Percentage
1 Minimum risk	25,18
2 Low risk	29,66
3 Moderate risk	34,56
4 High risk	1,02
5 Very high risk (i)	9,58

(i) Most customers in this group are inactive and the respective accounts are in the process of collection actions. Customers in this group that are still active purchase and pay in advance.

16.5. Sensitivity analysis

The derivative financial instruments may be subject to changes in their fair value as a result of the variation in commodity prices, foreign exchange rates, interest rates, shares and share indexes, price indexes and other variables. The sensitivity of the derivative and non-derivative financial instruments to these variables are presented below:

(a) Selection of risks

The Company selected the three market risks that may most affect the value of the financial instruments it holds, namely: a) Brazilian real-U.S. dollar exchange rate; (b) Brazilian real-yen exchange rate; (c) Libor floating interest rate.

For the purposes of the risk sensitivity analysis, the Company presents the exposures to currencies as if they were independent, that is, without reflecting in the exposure to a foreign exchange rate the risks of the variation in other foreign exchange rates that could be directly influenced by it.

(b) Selection of scenarios

In accordance with CVM Instruction No. 475/08, the Company included three scenarios in the sensitivity analysis, one of which is probable and the other two represent adverse effects to the Company. In the preparation of the adverse scenarios, only the impact of the variables on the financial instruments, including derivatives, and on the items covered by hedge transactions, was considered. The overall impacts on the Company's operations, such as the one arising from the revaluation of inventories and revenue and future costs, was not considered. Since the Company manages its exposure to foreign exchange rate risk on a net basis, adverse effects from a depreciation of the Brazilian real in relation to the U.S. dollar can be offset by opposing effects on the Braskem's operating results.

The FOCUS survey published by the Central Bank of Brazil on March 25, 2011 was considered for the probable scenario. For the interest rate variables not considered in the FOCUS survey, the probable scenario considered was the Interbank Deposit Certificate (CDI) percentage variation. For the exchange rate variables not included in the FOCUS survey, the probable scenario considered was the U.S. dollar-real percentage variation.

For the Brazilian real-U.S. dollar exchange rate, an increase of 25% was considered for the possible adverse scenario and of 50% for the extreme scenario based on the closing exchange rate for the period ended March 31, 2011.

For the Brazilian real-yen exchange rate, an increase of 25% was considered for the possible adverse scenario and of 50% for the extreme scenario based on the closing exchange rate for the period ended March 31, 2011.

For the Libor interest rate, a decrease of 25% was considered for the possible adverse scenario and of 50% for the extreme scenario based on the Libor rate at the end of the period ended March 31, 2011.

The sensitivity amounts in the table below are the changes in the value of the financial instruments in each scenario, except for table (e), which shows the changes in future cash flows.

Braskem S.A.**Notes to the Quarterly Information****of March 31, 2011****All amounts in R\$ thousands unless otherwise stated****(c) Sensitivity to the Brazilian real-U.S. dollar exchange rate**

The sensitivity of each financial instrument, including derivatives and items covered by them, to the variation in the Brazilian real-US dollar exchange rate is presented in the table below:

22. Contingencies

The Company has contingent liabilities related to legal lawsuits and administrative proceedings arising in the ordinary course of its business. These contingencies are of labor and social security, tax, civil and corporate nature and involve risks of losses that are classified by the Company’s management as possible. A provision for the lawsuits for which the

risk of loss is classified as probable is recognized and it is presented in Note 19 of this Quarterly Information.

Based on the opinion of the internal legal advisors, there were no significant additions of lawsuits representing lawsuits that involve risk of losses classified as possible, nor significant changes in the progress of the existing lawsuits, except for the monetary adjustments to the amounts involved in the quarter ended March 31, 2011.

The description of the main contingent liabilities of the Company was presented in the 2010 annual financial statements, in Note 25.

25. Segment information

In February 2011, the Brazilian antitrust agency (“CADE”) approved the operation for the acquisition and integration of Quattor’s assets, which made possible the change in the Company’s organizational structure as from 2011. The change in relation to the previous structure, presented in the Company’s 2010 annual financial statements, in Note 28, is in the distribution of Quattor’s activities among the Basic Petrochemicals and Polyolefin units. The Company does not disclose assets per segment since this information is not presented to its chief operating decision maker.
