## Message from Management

We recorded an operating margin of 6.1% in 1Q15, with operating income (EBIT) of R\$153.8 million, an increase of 6.5% year-over-year. Net revenue was R\$2.5 billion, up 0.5% over the same period. Accumulated over the last 12 months, total net revenue registered a new historic high of R\$10.1 billion.

The first months of this year were marked by the economic slowdown and a challenging competitive scenario. Even in this environment, we maintained the level of total revenue compared to 1Q14, through the diversification of revenue lines and continuous improvement of our operations and our products. The significant 32.8% increase in ancillary and cargo revenue in the quarter mitigated the decrease in ticket prices. Yield decreased by 8.6% and the PRASK fell by 6.3%, offset by an increase in load factor.

Regarding the industry, capacity for the quarter increased 6.4%, while demand grew 7.9%, both compared to 1Q14. We increased capacity by 4.0% and demand by 6.6%, which represented an expansion in load factor of 2.0 percentage points versus the same period in 2014. Although we have increased supply in the quarter, it is worth noting the zero growth forecast for the supply in 2015 will be maintained.

During this quarter, we broke two records in the national aviation segment, being: (i) the number of passengers transported in a single day by a single airline: 157,000 people on January 15, 2015, and (ii) we served more than 4 million customers in a month, in January of this year. We also led in on-time performance in the first quarter of this year, with 94.13% of flights on-time, according to data from Infraero for the domestic market. During the month of March, the index reached 96.72%, with over 23,000 domestic flights in the period.

We recorded as well the leadership in number of tickets issued for the corporate segment, in line with our focus to expand our portfolio of Corporate Customers. In addition, we had the largest growth in the sector, 14.2%, compared to the same period last year and reached 31.3% of share for this segment, according to Abracorp – Brazilian Association of Corporate Travel Agencies.

We inaugurated the new Gollog terminal at Congonhas Airport, which further strengthen ancillary revenues. With 2.1 thousand square meters, the space stands out for its easily accessible location in downtown Sao Paulo and for the operation itself. This inauguration is part of the strategy to modernize the infrastructure of our cargo transportation, improve service processes and increase efficiency in deliveries. We also signed cargo interline agreement with Air France and KLM. The partnership allows the sale of the service in all departure points offered by GOL to the destinations offered by both companies. It enables both companies to enter new markets.

We expanded sale points utilizing GDS (Global Distribution System), allowing us to increase sales in 15 new countries, in line with our strategy to increase international revenues for the company.

Although we have many achievements to celebrate, the current scenario of high exchange rate volatility and low economic activity causes us to continually manage our costs and to search for new sources of revenue. In this quarter the exchange rate at the end of March was 41.8% higher than the same period in 2014. GOL posted a net exchange variation of R\$774.1 million negative (with no immediate cash effect), which explains the net loss of R\$672.7 million in the quarter. Disconsidering the exchange rate impact, the result would be a net gain of R\$100.0 million in the period. We are attentive to opportunities of accessing the capital markets already considering the new corporate structure recently implemented with a view towards an eventual capitalization.

We reinforce the belief that the successful passage of this turbulent period, will be given by the discipline of execution our strategic plan and strengthening, even more, our pillars positioning; the obsessive search for the highest standard security; the lowest cost obtained through the gain of efficiency and; focus on intelligence, based on technology and in the relentless pursuit of efficiency to provide even better services to our customers.

I would like to take this opportunity to thank our clients, the trust of our investors and our Team of Eagles that, during this period, have realized that the plan has not changed and the tailwind will soon be in our favor again.

### Airline Market – Industry

In 1Q15, with reduced predictability in the economy and exchange rate, airlines have concentrated efforts to maintain the level of activity and deal with the rapidly changing demand profile. With this, the **seat supply (ASK)**, increased by 6.4% and **demand (RPK)**, in turn, increased by 7.9%. The **load factor** grew 1.2p.p., reaching 80.7%.

The number of **passengers transported** in the **domestic market** increased by 3.9% to 24.5 million. In the **international market**, more than 1.8 million passengers were transported, 18.8% higher than in the same period last year.

### Domestic Market – GOL

**Domestic supply** increased by **2.1%** over 1Q14, reflecting GOL's substantial capacity management flexibility, allowing it to take advantage of seasonal market opportunities. It is worth noting that the forecast for zero growth in 2015 is maintained, so that domestic supply will adjust throughout the year.

**Domestic demand had another quarter of evolution**, with an increase of **4.9%** compared to 2014, leading the **domestic load factor** to **78.9%**, up **2.1p.p.**

During the quarter, **GOL** transported **9.5 million passengers in the domestic market**, **2.4%** above the number of passengers in 2014.

Even with reduced economic activity in the country, GOL, once again, was **the leader in tickets sold to corporate passengers**, with a share of 31.3%, according to the Brazilian Association of Corporate Travel Agencies (Abracorp).

### International Market – GOL

**International supply** increased by **18.7%** in the year. The Company announced several new flights during the year, including to Tobago, in the Caribbean, from Guarulhos airport in São Paulo, beginning in January 2015, and to Mendoza, Argentina, beginning in July 2015.

**International demand** followed the pace of expansion higher than supply and raised **20.7%** in the quarter, bringing the load factor to **72.6%**, an increase of **1.2p.p.**

**GOL** transported **579.3 thousand passengers in the international market** in the quarter, **12.8% more** than in 2014. The Company maintained its focus on gradually increasing its frequencies and destinations in other countries, expanding the share of foreign-currency revenue.

#### **PRASK and Yield**

As a result of the lower economic activity registered in the country and the exchange rate with high volatility, which ended the quarter 41.8% higher than the same period in 2014, the yield fell by 8.6% and PRASK partially benefited due to increased load factor by 2 p.p. and fell by 6.3% in the annual comparison.

At the end of 1Q15, out of a total of **140** Boeing 737-NG aircraft, GOL was operating **136 aircraft** on its routes. Of the **4 remaining aircraft**, **3** were in the process of being **returned to their lessors** and **1** was sent via **sub-leasing** to an European airline.

GOL has 95 **aircraft under operating leases** and 45 under financial leases, **40 of which with a purchase option** when their leasing contracts expire. In 1Q15, GOL received 1 aircraft B737 NG under operating lease and **returned 2 B737 NGs**.

The average age of the fleet was 7.5 years at the end of 1Q15. In order to maintain this indicator at low levels, the Company has 129 **firm aircraft acquisition orders** with Boeing for fleet renewal by 2026.

## Capex

GOL posted a net investment of **R\$169.5 million** in 1Q15, considering the return of the pre-delivery deposits returns when the aircraft is delivered. For more details on changes in property, plant and equipment, see Note 16 to the financial statements.

To

The Shareholders, Board of Directors and Officers

Gol Linhas Aéreas Inteligentes S.A.

São Paulo - SP

#### **Introduction**

We have reviewed the accompanying individual and consolidated interim financial information of Gol Linhas Aéreas Inteligentes S.A.. ("Company"), identified as Company and Consolidated, respectively, contained in the Quarterly Information (ITR) for the quarter ended March 31, 2015, which comprises the balance sheet as at March 31, 2015 and the related statement of operations, statement of comprehensive loss for the quarter, the statement of changes in equity and statement of cash flows for the three-month period then ended, and a summary of significant accounting practices and other explanatory notes.

Company management is responsible for the preparation of interim individual financial information in accordance with the Technical Pronouncement of the Accounting

Pronouncements Committee (CPC) 21 (R1) – Interim Financial Reporting and the consolidated interim financial information in accordance with CPC 21 (R1) and IAS 34 – Interim Financial Reporting, issued by the International Accounting Standards Board (IASB), as well as for the presentation of these information in compliance with the rules issued by the Brazilian Securities Commission ("CVM"), applicable to the preparation of Quarterly Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

## Scope of review

We conducted our review according to the Brazilian and international review standards of interim financial information (NBC TR 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity, and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of inquiries, mainly of the people responsible for the financial and accounting matters, and the application of analytical and other review procedures. The scope of a review is significantly narrower than that of an audit conducted in accordance with audit standards and, accordingly, it did not permit us to obtain assurance that we took notice of all significant matters that could have been raised in an audit. Therefore, we did not

express an audit opinion.

### **Conclusion on the interim individual and consolidated financial information**

Based on our review, we are not aware of any fact that makes us believe that the interim individual and consolidated financial information included in the Quarterly Information referred above was not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34 applicable to the preparation of Quarterly Information (ITR), and presented in compliance with the rules issued by the CVM.

### **Other matters**

#### **Statements of value added**

We have also reviewed the individual and consolidated statement of value added (SVA) for the three-month period ended March 31, 2015, prepared under the responsibility of the Company's management, the presentation of which in the interim financial information is required by the rules of the CVM applicable to Quarterly Information (ITR), and as supplementary information under IFRS, whereby no statement of value added presentation is required. These statements have been subject to the same review procedures previously described and, based on our review, we are not aware of any fact that makes us believe that they were not prepared, in all material respects, according to the interim individual and consolidated financial information taken as a whole.

#### **Audit and review of the amounts corresponding to prior period**

The amounts correspondent to the statements of operations, of comprehensive loss, of changes in shareholders' equity, of cash flows and of value added for the three-months period ended March 31, 2014 presented for comparison purposes, were previously reviewed by other independent accountants, who issued a review report of quarterly information dated May 14, 2014.

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

### **2.2. New standards, amendments and interpretations**

a) New standards and interpretations issued by IASB but not applicable until March 31, 2015 with no early adoption by the Company:

- IFRS 9 Financial instruments: On July, 2014, IASB issued the final version of IFRS 9 - Financial Instruments, which reflects all phases of the financial instruments project, and replaces the IAS 39 - Financial Instruments: Recognition and Measurement and all IFRS 9's previous versions. The standard introduces new requirements on classification and measurement, loss on impairment and hedge accounting. IFRS 9 is effective for annual periods beginning on January 01, 2018 or thereafter, and the early application is not allowed. Retrospective application is required, but it is not mandatory, however, the presentation of comparative information. Early adoption of earlier versions of IFRS 9 (2009, 2010 and 2013) is allowed if the initial application date is earlier than February 01, 2015. The adoption of IFRS 9 will have an effect on the classification and measurement of the Company's financial assets, not causing, however, any impact on the classification and measurement of the financial liabilities of the Company.
- IFRS 15 Revenue contract with customers: Establish a model of five steps that apply to income received from a customer contract, regardless of the type of revenue or industry transaction. Applies to all revenue contracts and provides a model for the recognition and measurement of gains or losses on the sale of certain non-financial assets that are not related to the regular activities of the entity (i.e. real estate sales,

installations and equipment or intangibles). Extensive disclosures are also required by this standard. This Statement shall be applied for annual periods beginning on or after January 01, 2017, with earlier application allowed.

In addition the following new standards, amendments and interpretations were issued by IASB, but the Company's Management does not expect impacts on the individual and consolidated interim financial information on the initial adoption:

- IFRS 14 - Deferred Regulatory Accounts - Applicable for annual periods beginning on January 01, 2016 or thereafter;
- Amendments to IFRS 11 Joint Arrangements: Acquisitions accounting for corporate parties - Applicable for annual periods beginning on January 01, 2016 and thereafter, and the early application is not allowed in Brazil.
- Amendments to IAS 16 and IAS 38 – Explanation of acceptable methods of depreciation amortization - The amendments are applicable prospectively for annual periods beginning on January 01, 2016 or thereafter.

**GOL Linhas Aéreas Inteligentes S.A.**

Notes to the interim financial information - ITR

March 31, 2015

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

The Company intends to adopt those Standards when these become effective and disclose and recognize the impacts in the interim financial information that may occur on application of those standards.

Considering the current of the Company and its subsidiaries, management does not expect this change to have a material effect on the interim financial information - ITR from its adoption.

There are no other standards and interpretations issued but not yet adopted that, in Management's opinion, have a significant impact on net income or equity issued by the Company.

**3. Seasonality**

The Company expects that revenues and profits from its flights reach the highest levels during the summer and winter vacation periods, in January and July, respectively, and during the last two weeks of December, during the season holidays. Given the high portion of fixed costs, this seasonality tends to result in fluctuations in our operational quarter-on-quarter income.

### Repatriation of the generated cash in Venezuela

On January 23, 2014, the Venezuela government announced that the airline companies could request the repatriation of their resources generated by sales in Venezuela through CADIVI ("Comisión de Administración de Divisas") by the official rate of BS 6.30/US\$1.00. This rate experienced a level increase and the rate as of March 31, 2015 was BS 12.00/US\$1.00. The exchange variation control in Venezuela is determined on a weekly basis by its Federal Reserve (SICAD).

Given this increase, the Company recorded an exchange rate depreciation justified by the intention to repatriate values related to the operations performed in Venezuela as of January, 2014.

The total amount of the cash in Venezuela registered under "Cash and bank deposits" as of March 31, 2015 was BS 885,925. The cash related to 2013 sales is started at the official exchange rate of 6.3 bolivars per U.S. Dollar. Cash related to 2014 sales and repatriation requests are started using SICAD 1 at the exchange rate of 12.0 bolivars per U.S. Dollar. The portion accrued as an impairment from the Venezuelan Bolívar related to U.S. Dollar as of March 31, 2015 was R\$75,237 (R\$72,972 as of December 31, 2014). The net recoverable balance of R\$377,027 is recorded as "Cash and bank deposits". While the cash is available for use in Venezuela with no restriction, the Company ability to repatriate these funds has been limited due to Venezuelan government controls.

The register is subject to future changes due to the doubtful economic scenario in Venezuela, with the possibility of new limitations in the cash flows by CADIVI or sanctions by the government that may difficult the cash repatriation of the amounts.

Government bonds are represented primarily by government bonds LTN, NTN and LFT paid at a weighted average of 100% of CDI rate.

Investment funds are represented primarily by private and government bonds paid at a weighted average of 101% of the CDI rate.

As of March 31, 2015, the tax credits from tax loss carryforwards and negative social contribution basis were valued based on the reasonably expected generation of future taxable income of the parent Company and its subsidiaries, subject to legal limitations. The forecast of future taxable income on tax losses and negative tax base of social contribution were prepared based on the business plan and approved by the Board of Directors on December 19, 2014.

The Company and its subsidiaries hold the total amount of R\$1,282,765, of which R\$62,277 is related to its parent Company GLAI and R\$1,220,488 is related to its subsidiaries VRG and Webjet.

The forecast of the parent Company presents sufficient taxable profits to be realized over future periods. For the indirect subsidiary Webjet, the forecast did not present sufficient taxable profits to be realized over future periods, and as a result, a provision was recorded for unrealizable loss tax credits of R\$282,491. For the subsidiary VRG, such forecasts indicate sufficient taxable profits for such to be realized in the next 10 years. However, due to tax losses presented during the recent years, the Administration conducted a sensitivity analysis on the forecast results, and considering significant changes in the macroeconomic scenario due to changes on the dolar currency, registered the deferred tax assets on tax losses based on the lowest value obtained in this analysis. As a result, the Company and its subsidiaries did not recognized of R\$566,933 in its subsidiary VRG.

The Company's Management considers that the deferred assets recognized as of March 31, 2015 arising from temporary differences will be realized when the provisions are settled and the related future events are resolved.

**15. Losses per share**

Although there are differences between common and preferred shares in terms of voting rights and priority in case of liquidation, the Company's preferred shares are not entitled to receive any fixed dividends. The preferred stockholders are entitled to receive dividends per share 35 (thirty five) times of the dividends per share paid to common stockholders. Therefore, the Company understands that the economic capacity of the preferred shares is higher than the common shares.

Consequently, result per share is calculated by dividing the net income or loss by the weighted average number of all classes of shares outstanding during the period. Diluted earnings or loss per share are computed including stock options granted to key management and employees using the treasury shares method when the effect is dilutive. The antidilutive effect of all potential shares is disregarded in calculating diluted earnings or loss per share.

Diluted loss per share (b)	<b>(0.062)</b>	<b>(2.379)</b>	(0.014)	(0.475)

(a) Smiles holds a Stock Options Plan for its employees. These equity instruments have a dilutive effect on earnings per share of this subsidiary, impacting, therefore, the loss considered on the basis calculation of Company's diluted result per share, in accordance with CPC 41.

(b) The weighted average considers the split of common shares approved at the Extraordinary General Meeting held on March 23, 2015, in accordance with CPC 41 (IAS 33). Earnings per share presented reflects of the economic strenght of each class of shares.

Diluted result per share is calculated by the weighted average number of outstanding shares, in order to assume the conversion of all potential dilutive shares. Diluted result per share is calculated based on considering the instruments that may have a potential dilutive effect in the future, such as share-based payment transactions, described in Note 13. However, due to the losses reported for the period ended on March 31, 2015, these instruments issued have anti-dilutive effect and, therefore, are not considered in the total number of outstanding shares.

**29. Operating segment**

Operating segments are defined as business activities from which it may earn revenues and incur expenses, which operating results are regularly reviewed by the relevant decision makers to evaluate performance and allocate resources to the segments. The Company holds two operating segments: the airline industry and the loyalty program.

The accounting policies of the operating segments are the same as those applied to the consolidated Interim Financial Information. Additionally, the Company has distinct natures between the two reportable segments, which prevent any form of cost allocation, so there are no common costs and revenues between operating segments.

The Company is the majority shareholder of the subsidiary Smiles, being the non-controlling portion on its capital of 45.8% and 45.5% as of March 31, 2015 and December, 31 2014, respectively.

The information below presents the summarized financial position related to reportable segments for the period ended March 31, 2015 and December 31, 2014:

In the individual Interim Financial Information of the subsidiary Smiles, which represents the segment Smiles Loyalty Program and in the information provided to the relevant decision makers, the revenue recognition occurs upon redemption of the miles by the participants. Under this perspective, this measurement is appropriate given that this is when the revenue recognition cycle is complete. At this point, Smiles has transferred to its suppliers the obligation to provide services or deliver products to its customers.

However, from a consolidated perspective, the revenue recognition cycle related to miles exchanged for flight tickets is only complete when the passengers are effectively transported. Therefore, for purposes of reconciliation with the consolidated assets, liabilities and results, as well as for purposes of equity method of accounting and for consolidation purposes, the Company performed, besides eliminations entries, consolidating adjustments to adjust the accounting practices related to Smiles' revenues. In this case, under the perspective of the consolidated Interim Financial Information, the miles that were used to redeem airline tickets are only recognized as revenue when passengers are transported, in accordance with accounting practices and policies adopted by the Company.

The Company performs payments related to aircraft acquisition through its own funds, short and long-term debt, cash provided by operating activities, short and medium-term line of credit and supplier financing.

The Company leases its entire aircraft fleet through a combination of operational and financial leases. As of March 31, 2015, the total fleet leased was comprised of 140 aircraft, of which 95 were under operating leases and 45 were recorded as financial leases. b) Sale-leaseback transactions

The Company, during the years 2006 to 2009, recorded gains and losses from sale-leaseback transactions of aircraft 737-800 Next Generation. These gains and losses were deferred, and are being amortized proportionally to the payments of the operational lease agreements over the contract term of 120 months. (\*\*) Related to 11 aircraft from transactions from 2006 to 2009.

Additionally, during the period ended on March 31, 2015, the Company recorded a net gain of R\$8,009 resulting from 1 aircraft received during the period (R\$48,801 related to 6 aircraft received during the period ended March 31, 2014) that were used as sale-leaseback transactions and resulted in operating leases. Given that the gains and losses from sale-leaseback transactions will not be offset against future lease payments and were negotiated at fair value, such gain was recognized directly in profit or loss.

### **31. Financial instruments and risks management**

The Company and its subsidiaries have financial asset and financial liability transactions, which consist in part of derivative financial instruments.

The financial derivative instruments are used to hedge against the inherent risks related to the Company operations. The Company and its subsidiaries consider as most relevant risks: fuel price, exchange rate and interest rate. These risks can be mitigated by using exchange swap derivatives, futures and options contracts based on oil, U.S. Dollar and interest markets. The contracts may be held by means of exclusive investment funds, as described in the Risk Management Policy of the Company.

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

The Management follows a documented guideline when managing its financial instruments, set out in its Risk Management Policy, which is periodically revised by the Risk Committee (CPR), and approved by the Board of Directors. The Committee sets the guidelines and limits, monitors controls, including the mathematical models adopted for a continuous monitoring of exposures and possible financial effects and also prevents the execution of speculative financial instruments transactions.

The gains or losses on these transactions and the application of risk management controls are part of the Committee's monitoring and have been satisfactory when considering the objectives proposed.

The fair values of financial assets and liabilities of the Company and its subsidiaries are established through information available in the market and according to valuation methodologies.

Most of the derivative financial instruments are engaged with the purpose of hedging against fuel and exchange rates risks based on scenarios with low probability of occurrence, and thus have lower costs compared to other instruments with higher probability of occurrence. Consequently, despite the high correlation between the hedged item and the derivative financial instruments contracted, can presents ineffective positions for hedge accounting purposes upon settlement, which are presented in the tables below.

The description of the consolidated account balances and the categories of financial instruments included in the statements of financial position as of March 31, 2015 and December 31, 2014 is as follows:

Risks

The operating activities expose the Company and its subsidiaries to the following financial risks: market (especially currency risk, interest rate risk, and fuel price risk), credit and liquidity risks. These risks are originated by, essentially, leasing agreements of aircraft purchase.

The Company's risk management policy aims at mitigating potential adverse effects from transactions that could affect its financial performance.

The Company's and its subsidiaries' decisions on the exposure portion to be hedged against financial risk, both for fuel consumption and currency and interest rate exposures, consider the risks and hedge costs.

The Company and its subsidiaries do not usually contract hedging instruments for its total exposure, and thus they are subject to the portion of risks resulting from market fluctuations. The portion of exposure to be hedged is determined and reviewed at least yearly in compliance with the strategies determined in the Risk Policies Committees. The relevant information on the main risks affecting the Company's and its subsidiaries' operation is as follows:

a) *Fuel price risk*

As of March 31, 2015, fuel expenses accounted for 33.6% of the costs and operating expenses of the Company. The aircraft fuel price fluctuates both in the short and in the long term, in line with crude oil and oil byproduct price fluctuations.

To mitigate the risk of fuel price, the Company holds derivative financial instruments referenced mainly to crude oil and, eventually, to their derivatives, also contracted, directly with the local supplier, are future fuel deliveries to aircraft at predetermined prices.

As of March 31, 2015, there are no open transactions of derivatives instruments of fuel price variation hedge.

b) *Exchange rate risk*

The exchange rate risk derives from the possibility of unfavorable fluctuation of foreign currencies to which the Company's liabilities or cash flows are exposed. The exposure of the Company's and its subsidiaries' assets and liabilities to the foreign currency risk mainly derives from foreign currency-denominated trade accounts payable, leasing provision and leases and financing.

The Company's revenues are mainly denominated in Brazilian Reais, except for a small portion in U.S. Dollar, Argentinean pesos, Bolivian bolivianos, Chilean peso, Colombian peso, Paraguay Guarani, Uruguayan peso, Venezuela bolivar etc.

To mitigate the risk of exchange rate, the Company holds derivative financial instruments that are referenced to the U.S. Dollar.

c) *Interest rate risk*

The Company and its subsidiaries are exposed to fluctuations in domestic and foreign interest rates, substantially the CDI and Libor, respectively. The highest exposure is related to lease transactions, of which the installments to be paid are indexed to the Libor after date that the aircraft are delivered. Another relevant exposure is the local investments and debts indexed to the CDI rate.

To mitigate the interest rate risk the Company holds swap derivatives.

d) *Credit risk*

The credit risk is inherent in the Company's operating and financing activities, mainly represented by trade receivables, cash and cash equivalents, and short-term investments.

**GOL Linhas Aéreas Inteligentes S.A.**

Notes to the interim financial information - ITR

March 31, 2015

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

The trade receivable credit risk consists of amounts falling due from the largest credit card companies, with credit risk better than or equal to those of the Company and its subsidiaries, and receivables from travel agencies, installment sales, and government sales, with a small portion exposed to risks from individuals or other entities.

As defined in the Risk Management Policy, the Company is required to evaluate the counterparty risks in financial instruments and diversify the exposure. Financial instruments are contracted with counterparties rated at least as investment grade by S&P and Moody's. The financial instruments are mostly contracted on commodities and futures exchanges (BM&FBOVESPA and NYMEX), which substantially mitigate the credit risks, derivative transactions contracted on the OTC market (OTC) have counterparts with a minimum rating of "investment grade". The Company's Risk Management Policy establishes a maximum limit of 20% per counterparty for short-term investments.

e) *Liquidity risk*

Liquidity risk takes on two distinct forms: market and cash flow liquidity risk. The first is related to current market prices and varies in accordance with the types of assets and the markets where they are traded. Cash flow liquidity risk, however, is related to difficulties in meeting the contracted operating obligations at the agreed dates.

As a way of managing the liquidity risk, the Company invests its funds in liquid assets (governmental bonds, CDBs, and investment funds with daily liquidity), and the Cash Management Policy establishes that the Company's and its subsidiaries' weighted average debt maturity should be higher than the weighted average maturity of the investment portfolio. As of March 31, 2015, the weighted average maturity of the Company's financial assets was 58 days and of financial debt, excluding perpetual bonds, was 4 years.

Notes to the interim financial information - ITR

March 31, 2015

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

The Company adopts the hedge accounting. The derivatives contracted to hedge interest rate risk and fuel price risk are classified as "cash flow hedge", according to the parameters described in CPC 38.

Classification of derivatives financial instruments

i) *Cash flow hedges*

The Company and its subsidiaries use cash flow hedges to hedge against future revenue or expense fluctuations resulting from changes in the exchange rates, interest rates or fuel price, and accounts for actual fluctuations of the fair value of derivative financial instruments in stockholders' equity until the hedged revenue or expense is recognized.

The Company estimates the effectiveness based on statistical correlation methods and the ratio between gains and losses on the financial instruments used as hedge, and the cost and expense fluctuation of the hedged items.

The instruments are considered as effective when the fluctuation in the value of derivatives offsets between 80% and 125% the impact of the price fluctuation on the cost or expense of the hedged item.

The balance of the actual fluctuations in the fair values of the derivatives designated as cash flow hedges is transferred from stockholders' equity to profit or loss for the period in which the hedged costs or expenses impacts profit or loss. Gains or losses on effective cash flow hedges are recorded in balancing accounts of the hedged expenses, by reducing or increasing the operating cost, and the ineffective gains or losses are recognized as financial income or financial expenses for the period.

ii) *Derivative financial instruments not designated as hedge*

The Company holds derivative financial instruments that are not formally designated for hedge accounting. This occurs when transactions are in the short term and the control and disclosure complexity.

Hedge activities

a) *Fuel hedge*

Due to the low liquidity of jet fuel derivatives traded in commodities exchanges, the Company and its subsidiaries contracts crude oil derivatives (WTI, Brent) and its byproducts (Heating Oil) to hedge against fluctuations in jet fuel prices. Historically, oil prices are highly correlated with aircraft fuel prices.

As of March 31, 2015, the Company and its subsidiaries do not hold fuel contracts designated as cash flow hedge accounting.

Sensitivity analysis of derivative financial instruments

The sensitivity analysis of financial instruments was prepared according to CVM Instruction 475/08, in order to estimate the impact on the fair value of financial instruments operated by the Company, considering three scenarios considered in the risk variable: most likely scenario, the assessment of the Company; deterioration of 25% (possible adverse scenario) in the risk variable, deterioration 50% (remote adverse scenario).

The estimates presented, since they are based on simple statistics, do not necessarily reflect the amounts to be reported in the next Interim Financial Information. The use of different methodologies and/ or assumptions may have a material effect on the estimates presented.

The tables below show the sensitivity analysis for market risks and financial instruments considered relevant by management, open position as of March 31, 2015 and based on the scenarios described above.

The probable scenario of the Company is the maintaining of the market rates.

In the tables, positive values are displayed as asset exposures (assets higher than liabilities) and negative values are exposed liabilities (liabilities higher than assets).

Measurement of the fair value of financial instruments

In order to comply with the disclosure requirements for financial instruments measured at fair value, the Company and its subsidiaries must classify its instruments in Levels 1 to 3, based on observable fair value levels:

- a) Level 1: Fair value measurements are calculated based on quoted prices (without adjustment) in active market or identical liabilities;
  
- b) Level 2: Fair value measurements are calculated based on other variables besides quoted prices included in Level 1, that are observable for the asset or liability directly (such as prices) or indirectly (derived from prices); and
  
- c) Level 3: Fair value measurements are calculated based on valuation methods that include the asset or liability but that are not based on observable market variables (unobservable inputs).

The following table shows a summary of the Company's and its subsidiaries' financial instruments measured at fair value, including their related classifications of the valuation method, as of March 31, 2015 and December 31, 2014:
