Performance report

We announce GOL's result for the first quarter of 2016, reflecting the adoption of measures to enhance the Company's liquidity position and bring its capital structure in line with Brazil's macroeconomic environment, which has been negatively impacted by political instability and consequent economic volatility. Since 2015, the Company has been working on several initiatives to overcome the recessionary environment, with the support of all its stakeholders: shareholders, banks, unsecured bondholders and suppliers, among others.

In the first three months of the year, we recorded net revenue from operations 8.3% higher than in the same period in 2015, reaching R\$2,713.1 million. Our recurring operating income in the first quarter of 2016 was R\$224.6 million, representing an operational margin of 8.3%. Non-recurring on the anticipated return of aircraft under finance lease contracts and gains on sale-leaseback transactions was R\$212.6 million during the period.

Our cash position at March 31, 2016 was R\$1,815.1 million, a decrease of 21.1% from year-end 2015, and was equivalent to 18.2% of our last twelve months (LTM) net revenues. Cash available was R\$658.4 million (6.6% of LTM net revenue), excluding the amount held by Smiles and restricted cash.

Since the first quarter of 2015, we have been working on a number of initiatives to address issues relating to liquidity and capital structure. These include: (1) flexibility in our aircraft delivery schedule for 2016 and 2017, which decreased from 15 deliveries to 1 aircraft delivery - resulting up to R\$555 million in cash flow to help fund the exchange offer for our US Dollar-demonimated bonds; (2) the advance ticket sales of up to R\$1 billion to Smiles; (3) better supplier terms resulting in R\$300 million per year of annual cash savings and; (4) changes in our route network, including the suspension of flights to eight destinations with an expected decrease year-over-year in the number of take-offs between 15% and 18%.

Furthermore, we are working on the following additional initiatives: (1) the renegotiation of debentures issued in the domestic capital market with Brazilian banks, with a possible extension of payment terms and waiver of contractual covenants; (2) negotiations with aircraft lessors to reduce our fleet by 20 aircraft, with the support of SkyWorks Capital; and (3) the improvement of our capital structure with the assistance of PJT Partners, through a private exchange offer to exchange up to US\$781.4 million of our unsecured US Dollar-denominated bonds for new secured bonds.

We are confident that the completion of the ongoing restructuring plan will ensure that GOL emerges from the current political and economic crisis in the best competitive position.

We remain focused, in all aspects, on being the best Brazilian airline. A clear demonstration of this is our continuing leadership in on time performance in the domestic market in the first quarter of 2016, with a 95% rate. In March, we registered a rate of 97.6%.

Since January, we have performed significantly better with regard to damaged and misplaced luggage. In March, we achieved the lowest rate of occurrence per 1,000 boarded passengers

in the last 36 months: 1.87 - this was the best indicator of our historical series, and represents a decrease of 31% compared to March 2015.

The 2016 Summer Olympic Games will be hosted in the city of Rio de Janeiro (taking place between August 5 and 21) as well as the Summer Paralympic Games (taking place between September 7 and 18) - the first time that they have been held in South America. Our route network for the event will include extra flights and timetable changes to meet the demand concentrated in Rio de Janeiro. In addition to these adjustments, since 2013, in advance of the 2014 World Cup, we have invested in evolving technology platforms to improve passenger experience, especially given the larger number of international passengers. For example, our self-service kiosks feature in addition to Portuguese, provide menus and operations in English, Spanish and French.

We would like to thank all our employees, investors and stakeholders for their support and commitment during the implementation of GOL's restructuring plan. I feel confident that the Company will emerge strengthened from this restructuring phase.

Report on review of interim financial information

To

The Shareholders, Board of Directors and Officers

Gol Linhas Aéreas Inteligentes S.A.

São Paulo - SP

Introduction

We have reviewed the individual and consolidated interim financial information of Gol Linhas Aéreas Inteligentes S.A. (the “Company”), included in the Quarterly Information (ITR) for the three-month period ended March 31, 2016, which comprises the balance sheets as at March 31, 2016 and the related interim statements of operations, comprehensive income (loss), changes in equity and cash flows for the three-month period then ended, and explanatory notes.

Management is responsible for the preparation and presentation of these individual interim financial information in accordance with the Technical Pronouncement CPC 21 (R1) – Interim Financial Reporting (“CPC 21”) and the consolidated interim financial information in accordance with CPC 21 and International Financial Reporting Standard IAS 34 – Interim Financial Reporting, issued by the International Accounting Standards Board (IASB) (“IAS 34”), as well as for the presentation of these information in compliance with the rules issued by the Brazilian Securities Commission (“CVM”), applicable to the preparation of Quarterly Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International Standards on Review Engagements (NBC TR 2410 – Review of Interim Financial

Information Performed by the Independent Auditor of the Entity, and ISRE 2410 -

Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual and consolidated interim financial information included in the Quarterly Information referred above are not prepared, in all material respects, in accordance with CPC 21 and IAS 34 applicable to the preparation of Quarterly Information (ITR), and presented in compliance with the rules issued by the CVM.

Other matters

Statements of value added

We have also reviewed the individual and consolidated statements of value added for the three-month period ended March 31, 2016, prepared under the responsibility of the Company's management, the presentation of which in the interim financial information is required by the rules from CVM, applicable to preparation of Quarterly Information (ITR), and as supplementary information for IFRS, which do not require a statement of value added presentation. These statements have been subject to the same review procedures previously described above and, based on our review, nothing has come to our attention that causes us to believe that the statements of value added were not prepared, in all significant respects, in relation to the overall interim individual and consolidated financial information.

1. General information

Gol Linhas Aéreas Inteligentes S.A. ("Company" or "GLAI") is a publicly-listed company established on March 12, 2004, in accordance with the Brazilian Corporate Laws. The Company is engaged in controlling its subsidiaries: (i) VRG Linhas Aéreas S.A. ("VRG"), which essentially explores (a) the regular and non-regular flight transportation services of passengers, cargo and mailbags, domestically or internationally, according to the concessions granted by the competent authorities; and (b) complementary activities of flight transport services provided in its bylaws; and (ii) Smiles S.A., which mainly operates (a) the development and management of its own or third party's customer loyalty program, and (b) sale of redemption rights of awards related to the loyalty program.

Additionally, the Company is the direct parent Company of the wholly-owned subsidiaries GAC Inc. ("GAC"), Gol Finance ("Finance"), Gol LuxCo S.A. ("Gol LuxCo"), Gol Dominicana Lineas Aereas SAS ("Gol Dominicana") and indirect parent Company of Webjet Linhas Aéreas S.A. ("Webjet").

The Company's registered Office is at Praça Comandante Linneu Gomes, s/n, portaria 3, prédio 24, Jardim Aeroporto, São Paulo, Brazil.

The Company's shares are traded on BM&FBOVESPA and on the New York Stock Exchange ("NYSE"). The Company adopted Differentiated Corporate Governance Practices of Level 2 from BM&FBOVESPA and is included in the Special Corporate Governance Stock Index ("IGC") and the Special Tag Along Stock Index ("ITAG"), which were created to identify companies committed to the differentiated corporate governance practices.

1.1 Short-term business plan

VRG has been significantly affected by the devaluation of the Brazilian currency, as the Company's costs denominated in U.S. dollars totaled approximately 50% in 2015, and revenues totaled approximately 10%. Although the U.S. dollar depreciated against the Brazilian real in the three-month period ended March 31, 2016. In addition, factors such as the downturn in Brazilian GDP (economic downturn), excessive industry overcapacity in the

market and the worsening economic crisis that impacted the demand from corporate and government clients have been an adverse scenario to the Company's operations.

In this context, the Company reassessed its business plan and incorporated strategies that, once implemented, should be sufficient to ensure the continuity of the Company's operations. Among the short-term strategies, we highlight four pillars to recover operating margin for 2016 and 2017, as well as to maintain the solvency.

(a) Liquidity initiatives: negotiations with customers and strategic suppliers to maintain short term liquidity, including agreements to postpone aircraft delivery over the next years, the advance airline tickets purchase agreement with Smiles and the renegotiation of maturity with suppliers and anticipation of customers receivable.

(b) The Company changed its flight route network in order to focus on profitable routes in operation. The change on the flight route network, which has already been approved by the regulators, is effective since May 2016.

(c) As a result of the changes of flight route network, the Company is also working on readjusting and reducing the number of aircraft in operation, which will result in a reduction in available seats, and align the supply and demand in the domestic market. The Company's forecast is to return at least 20 aircraft. These measures will lead to a substantial decrease in maintenance costs for the current fleet. These measures aim to readjust the Company's structure to sustainable levels.

Notes to the interim financial information
March 31, 2016

(In millions of Brazilian Reais - R\$, except when indicated otherwise)

(d) Adjustment of indebtedness and leases with the purpose of reviewing the amounts related to lease agreements that are part of the Company's indebtedness. For the implementation of these initiatives, the Company hired Sky Works to review its lease agreements. Additionally, in the three-month period ended March 31, 2016, the Company early ended the financial lease agreements of 6 aircraft, converting in short- and medium term operating lease agreements, as described in Note 15.

It is highlight that, even with the business plan presenting actions that are likely to be implemented, the uncertain political and economic scenario in Brazil may impact the effectiveness of the expected return. Additionally, the high volatility of macroeconomic variables raises uncertainties that could compromise the generation of future results and the maintenance of the cash position.

The Company's Management believes that the business plan prepared, submitted and approved by the Board of Directors on February 18, 2016 shows strong elements of the Company's going concern. Management believes that its plans are feasible and that, once completed, should lead the Company to the level of strength required to respond more effectively the high volatility of the economic conditions and/or adverse events. Management believes that the non-implementation of these measures can compromise the profitability and solvency of the operation and thus reinforces its commitment to implement all the necessary measures to ensure the implementation of the plan and implement the necessary efforts to ensure the expected return.

2. Approval and summary of significant accounting policies applied in preparing the interim financial information

The interim financial information - ITR were authorized for issuance at the Board of Directors' meeting held on May 11, 2016.

2.1. Basis of consolidation

The individual and consolidated interim financial information – ITR was prepared for the three-month period ended on March 31, 2016 in accordance with International Accounting Standards (“IAS”) 34, and with corresponding Brazilian technical pronouncements, CPC (21).

The consolidated interim financial information – ITR was prepared based on historical cost, except for certain financial assets and liabilities measured at fair value and investments measure through the equity method.

The individual and consolidated interim financial information – ITR do not include all the information and disclosure items required in the consolidated annual financial statements and, therefore, it must be read along with the individual and consolidated financial statements from the year ended December 31, 2015 and approved on March 28, 2016, which were prepared in accordance with Brazilian accounting practices and IFRS. There were no changes in accounting policies adopted during the period from December 31, 2015 to March 31, 2016, except for the adoption of new standards, amendments and interpretations described in Note 2.2. The Company has not early adopted any standard, interpretation or amendment that has been issued but is not yet applicable.

The shareholder’s equity individual and consolidated interim financial information – ITR do not present differences on its composition, except in respect of the non-controlling interest in Smiles S.A., highlighted in the consolidated equity.

2.2. New accounting estimates, changes and assumptions

**Notes to the interim financial information
March 31, 2016**

(In millions of Brazilian Reais - R\$, except when indicated otherwise)

The following new standards, amendments and interpretations were issued by and can be applicable as of January 01, 2016, but had no material effect on the interim financial information from its adoption:

Amendments to IAS 16 and IAS 38 - Clarification of Acceptable Methods of Depreciation and Amortisation: The amendments are applicable prospectively for annual periods beginning on or after January 1, 2016;

Amendments to IAS 27 - Equity Method in Separate Financial Statements: The amendments are applicable prospectively for annual periods beginning on or after January 1, 2016;

Amendments to IFRS 10 and IAS 28 – Assets sales or contribution between an investor and an associate or joint venture: The amendments are applicable prospectively for annual periods beginning on January 01, 2016.

Annual improvements 2010-2014 cycle - Applicable for annual periods beginning on or after July 1, 2016:

IFRS 7 Financial Instruments - Disclosures: (i) clarifies that a servicing contract that includes a fee can constitute continuing involvement in a financial asset and (ii) the applicability of the amendments to IFRS 7 to condensed interim financial statements. This amendment must be applied retrospectively;

IAS 34 Interim Financial Reporting: This amendment must be applied retrospectively;

Amendments to IAS 1 - Disclosure Initiative: The amendments are applicable prospectively for annual periods beginning on or after January 1, 2016.

3. Seasonality

The Company expects that revenues and profits from its flights reach the highest levels during the summer and winter vacation periods, in January and July, respectively, and during the last two weeks of December, during the season holidays. Given the high portion of fixed costs, this seasonality tends to result in fluctuations in our operational quarter-on-quarter income.

4. Cash and cash equivalents

Noncurrent	25	24	413	676

(a) Denominated in U.S. dollars, remunerated by Libor rate (average remuneration of 0.5% p.a.).

(b) For the quarter ended March 31, 2016, the Company settled the loan with Banco Safra and, consequently, withdrew the amount of R\$116 related to the guarantee linked to such an operation. Additionally, the Company held the redemption of R\$41 related to the settlement of Finimp operations (See note 17). The remaining amount is related to labor/legal guarantees and FINIMP agreements (See note 17).

(c) The amount of R\$21 (individual and consolidated) related to a contractual guarantee for STJs related to PIS and Cofins on interest attributable to shareholders' equity paid to GLAI as described in Note 21b. The other amounts relate to guarantees of VRG letters of credit.

(d) Related to a letter of credit for aircraft operating leases from VRG.

(e) The amount held on December 31, 2015 is related to escrow deposits with Delta Air Lines Inc. ("Delta") related to the term loan guarantee, as described in Note 17. On March 31, 2016, the Company did not exceed the contractual limits that would require them obligation to make such deposit and therefore the balance was fully reclassified to cash equivalents item.

The Company's Management considers that the deferred assets recognized as of December 31, 2015 arising from temporary differences will be realized in connection with the deferred tax liabilities and future results.

The analysis of the realization of deferred taxes assets was prepared on a company basis as follows:

GLAI: the Company has tax credits of R\$64, of which R\$63 is related to net operating losses carryforward and R\$1 is related to temporary differences, with realization supported by the long term plan of the Company. However, the Company assessed the projections of results and did not recognize the amount of R\$56 related to credits from net operating losses carryforward.

VRG: VRG has tax credits on net operating losses carryforward of R\$1,094. However, in view of recent events on the political scenario in Brazil, instability of the economic environment, constant fluctuations in the U.S. dollar exchange rate and other variables that significantly affect the projections of future results, as well as, the history of losses in recent years, the Company has reassessed the recognition of tax credits on net operating losses carryforward. Additionally, the Company analyzed the realization of deferred tax assets on temporary differences and limited the recognition based on the expected realization of deferred tax liabilities on temporary differences. As a result, the Company did not recognize the net

amount of R\$672 of deferred tax assets on temporary differences.

Notes to the interim financial information
March 31, 2016

(In millions of Brazilian Reais - R\$, except when indicated otherwise)

The deferred tax credits recorded under "Other comprehensive income (loss)" that will affect taxable income only at the moment of its realization remain fully recorded in total equity.

Smiles: Smiles does not have net operating losses carryforward. The deferred tax credit is composed only by temporary differences which, according to the history and projections of taxable results, has an expectation of realization.

Webjet: the forecast did not present sufficient taxable income to be realized over future periods, and as a result, tax credits of R\$297 has not been recorded.

The reconciliation of income taxes expense for the quarter ended March 31, 2016 and 2015 is as follows:

(a) Judicial deposits

Judicial deposits and blocked escrows represent guarantees of lawsuits related to tax, civil and labor claims deposited in escrow until the resolution of the related claims. Part of the blocked amount in escrow is related to civil and labor claims arising on the succession orders on claims against Varig S.A. and proceedings filed by employees that are not related to the Company or any related party (third-party claims). As the Company is not correctly classified as the defendant of these lawsuits, whenever such blockages occur, the exclusion of such is requested in order to release the resources. As of March 31, 2016 the blocked amounts regarding the Varig' succession and the third-party lawsuits were R\$95 and R\$ R\$70, respectively (R\$92 and R\$75 as of December 31, 2015, respectively).

(b) Maintenance deposits

The Company and its subsidiaries VRG and Webjet made deposits in U.S. dollars for maintenance of aircraft and engines that will be used in future events as set forth in some lease contracts.

The maintenance deposits do not exempt the Company and its subsidiaries, as lessee, neither from the contractual obligations relating to the maintenance of the aircraft nor from the risk associated with maintenance activities. The Company and its subsidiaries hold the right to select any of the maintenance service providers or to perform such services internally.

(c) Deposits in guarantee for lease agreements

As required by some lease agreements, the Company and its subsidiaries hold guarantee deposits in U.S. Dollars on behalf of the leasing companies, whose full refund occurs upon the contract expiration date.

11. Transactions with related parties

11.1. Loan agreements - Noncurrent assets and liabilities

Individual

The Company maintains loan agreements, assets and liabilities, with its subsidiary VRG without interest, maturity or guarantees prescribed, as set forth below:

12. Share-based payments

The Company holds two share-based payment plans offered to its management personnel: the Stock Option Plan and the Restricted Shares Plan. Both plans stimulate and promote the alignment of the Company's goals, management and employees, mitigate the risks in value created for the Company resulting from the loss of their executives and strengthen the commitment and productivity of these executives to long-term results.

GLAI

a) Stock option plan

The beneficiaries of the Company's stock option plan are allowed to purchase the Company's shares after 3 years from the grant date, with an exercise period of up to 10 years and an acquisition condition that the beneficiary maintains its employment relationship up to the end of this period.

For plans granted beginning 2010, 20% of the options become vested as from the first year, an additional 30% as from the second, and the remaining 50% as from the third year. All stock options may also be exercised within 10 years after the grant date. On all the stock options granted, the expected volatility of the options is based on the historical volatility of 252 working days of the Company's shares traded on BM&FBOVESPA, and the fair value of the restricted shares granted was estimated on the grant date using the Black-Scholes pricing model, as follows:

13. Investments

The investments in foreign subsidiaries, GAC, Finance and Gol LuxCo were considered as an extension of the Company and are consolidated on a line by line basis on the individual company GLAI. Accordingly, only the subsidiaries Smiles, VRG and Gol Dominicana were considered as an investment.

The amount of consolidated investments is related to 21.2% of the working capital of Netpoints Fidelidade S.A., held by the subsidiary Smiles, and to SCP Trip investment, held by the subsidiary VRG, both registered as investments accounted under the equity method.

The change in investments during the quarter ended March 31, 2016 is as follows:

14. Results per share

Although there are differences between common and preferred shares in terms of voting rights and priority in case of liquidation, the Company's preferred shares are not entitled to receive any fixed dividends. The preferred stockholders are entitled to receive dividends per share in the same amount (35 times) of the dividends per share paid to common stockholders. Therefore, the Company understands that, substantially, there is no difference between the preferred shares and common shares, and accordingly, basic and diluted result per share is calculated using the same method for both shares.

Basic results per share is calculated by dividing the net profit attributable to controlling shareholders by the weighted average number of all classes of shares outstanding during the period.

Diluted result per share is calculated by the weighted average number of outstanding shares, in order to assume the conversion of all potential dilutive shares. Diluted result per share is calculated based on considering the instruments that may have a potential dilutive effect in the future, such as share-based payment instruments, described in Note 12. However, due to the options being below the market value (out of money) these instruments issued have an anti-dilutive effect and, therefore, are not considered in the weighted average number of outstanding shares for the computation of diluted result per share.

(a) The Company change the lessors to 6 contracts classified as finance leases in the quarter ended March 31, 2016. While the Company will continue to maintain these aircraft in the fleet, factors such as the change of lessors, the new established contractual terms and mainly the reduction of contractual terms characterize such contracts, according to IAS17 and CPC06, as new contracts. As a result, from February 11, 2016, these aircraft are now classified as operating leases and the related payments are now recorded under costs of "aircraft leasing".

Notes to the interim financial information
March 31, 2016

(In millions of Brazilian Reais - R\$, except when indicated otherwise)

During the quarter ended March 31, 2016, the Company reviewed the useful life of its assets and, as a result, made the following changes:

	From	To
Aircraft under finance leasing	4.0%	5.5%
Sets of replacement parts and spares engines	4.0%	5.5%
Aircraft reconfigurations/overhauling	30.0%	14.0%

Due to this change, the Company presented a decrease on depreciation expenses for the quarter ended March 31, 2016 of approximately R\$7. The Company also estimates a decrease of depreciation expenses for the next nine months of 2016 by approximately R\$17.

Such adjustments were made by technical analysis and are intended to reflect the Company's current perspective for the use of its assets.

(a) Provision for aircraft and engines return

The provision for aircraft and engine return considers the costs that meet the contractual conditions for the return of engines maintained under operating leases, as well as the costs to reconfigure the aircraft without purchase option, as described in the return conditions of the lease contracts, and which is capitalized in property, plant and equipment (aircraft reconfigurations/overhauling).

(b) Provision for legal proceedings

As of March 31, 2016 the Company and its subsidiaries are facing to 26,101 (8,656 labor and 17,445 civil) lawsuits and administrative proceedings. The lawsuits and administrative proceedings are classified into Operational (those arising from the Company's normal course of operations), and Succession (those arising from the succession of former Varig S.A. obligations).

Under this classification, the number of proceedings is as follows:

	Operational	Succession	Total
Civil lawsuits	15,622	226	15,848
Civil proceedings	1,596	1	1,597
Labor lawsuits	5,512	2,926	8,438
Labor proceedings	216	2	218
	22,946	3,155	26,101

The civil lawsuits are primarily related to compensation claims generally related to flight delays and cancellations, baggage loss and damage. The labor claims primarily consist of discussions related to overtime, hazard pay, and wage differences.

The provisions related to civil and labor suits, whose likelihood of loss is assessed as probable are as follows:

	03/31/2016	12/31/2015
Civil	74	70
Labor	81	74
	155	144

50

Notes to the interim financial information
March 31, 2016

(In millions of Brazilian Reais - R\$, except when indicated otherwise)

Provisions are reviewed based on the progress of the proceedings and history of losses based on the best current estimate for labor and civil lawsuits.

There are other civil and labor lawsuits assessed by management and its legal counsel as possible risk of loss, in the estimated amount as of March 31, 2016 of R\$30 for civil claims and R\$58 for labor claims (R\$22 and R\$54 as of December 31, 2015 respectively), for which no provisions are recognized.

The tax lawsuits below were evaluated by the Company's management and its legal counsels as being relevant and with possible risk of loss as of March 31, 2016:

- GLAI is discussing the non-incidence of taxation of PIS and COFINS on revenues generated by the interest attributable to shareholders' equity in the amount of R\$51 related to the years from 2006 to 2008, paid by its subsidiary GTA Transportes Aéreos S.A., succeeded by VRG on September 25, 2008. According to the opinion of the Company's legal counsel and based on the jurisprudence occurred in recent events, the Company classified this case as possible loss, without a provision registered for the related amount. Additionally, the Company maintains escrow deposits with Bic Banco with a partial guarantee on the lawsuit of R\$20 as disclosed in Note 6.
- Tax on Services (ISS), the amount of R\$18 (R\$17 as of December 31, 2015) arising from assessment notices issued by the Municipality of São Paulo against the Company, in the period from January 2007 to December 2010 regarding a possible ISS taxation on partnerships. The classification of the possible risk of loss is a result from the matters under discussion and are interpretative, and involves discussions of factual and evidential materials, and has no final positioning of the Superior Courts.
- Customs Penalty in the amount of R\$41 (R\$18 as of December 31, 2015) relating to assessment notices issued against the Company for alleged breach of customs rules regarding procedures for temporary import of aircraft. The classification of possible risk is a result of the absence of a final positioning of the Superior Courts.

- BSSF goodwill (BSSF Air Holdings), in the amount of R\$46 (R\$45 as of December 31, 2015) related to infraction notices due to the deductibility of the goodwill allocated to future profitability. The classification of possible risk is a result of the absence of a final positioning of the Superior Courts.
- VRG's goodwill in the amount of R\$67 (R\$66 as of December 31, 2015) resulted from assessment notice related to the deductibility of the goodwill classified as future profitability. The classification of possible risk of loss arises from the absence of a final opinion from the Superior Courts.
- ICMS in the amount of R\$20 (R\$20 as of December 31, 2015) from assessment notice issued for alleged understated (or incomplete declaration) amounts related to air transportation revenue to the tax authorities of the State of Ceará in from 2010 and 2011.

26. Operating segments

Operating segments are defined as business activities from which it may earn revenues and incur expenses, which operating results are regularly reviewed by the relevant decision makers to evaluate performance and allocate resources to the segments. The Company holds two operating segments: the flight transportation and the Smiles loyalty program.

Notes to the interim financial information
March 31, 2016

(In millions of Brazilian Reais - R\$, except when indicated otherwise)

The accounting policies of the operating segments are the same as those applied to the consolidated financial statements. Additionally, the Company has distinct natures between the two reportable segments, so there are no common costs and revenues between operating segments.

The Company is the controlling shareholder of Smiles, and the non-controlling interest of Smiles was 45.9% and 45.8% as of March 31, 2016 and 2015, respectively.

The information below presents the summarized financial position related to reportable segments as of March 31, 2016 and 2015:

Notes to the interim financial information

March 31, 2016

(In millions of Brazilian Reals - R\$, except when indicated otherwise)

In the individual financial statements of Smiles, which represents the segment Smiles Loyalty Program and in the information provided to the relevant decision makers, the revenue recognition occurs upon redemption of the miles by the participants. Under the perspective of Smiles, this measurement is appropriate given that this is when the revenue recognition cycle is complete. At this point, Smiles has transferred to its suppliers the obligation to provide services or deliver products to its customers.

However, from a consolidated perspective, the revenue recognition cycle related to miles exchanged for flight tickets is only complete when the passengers are effectively transported. Therefore, for purposes of reconciliation with the consolidated assets, liabilities and income and expenses, as well as for purposes of equity method of accounting and for consolidation purposes, the Company performed, in addition to eliminations entries, consolidating adjustments to adjust the accounting practices related to Smiles' revenues. In this case, under the perspective of the consolidated financial statements, the mileages that were used to redeem airline tickets are only recognized as revenue when passengers are transported, in accordance with accounting practices and policies adopted by the Company.

27. Commitments

As of March 31, 2016, the Company had 122 firm orders for aircraft acquisitions with Boeing. These aircraft acquisition commitments include estimates for contractual price increases during the construction phase. As of December 31, 2015, the approximate amount of firm orders, not including the contractual discounts, was R\$53,072 (US\$14,909) and are segregated according to the following periods:

Notes to the interim financial information

2020	4,884	5,357
Thereafter	42,441	46,554
	53,072	58,887

As of March 31, 2016, from the total orders mentioned above, the Company had the amount of R\$6,723 (US\$1,888) related to advances for aircraft acquisition, to be disbursed in accordance with the following schedule:

	03/31/2016	12/31/2015
2016	-	7
2017	313	344
2018	528	579
2019	720	790
2020	913	1,001
Thereafter	4,249	4,660
	6,723	7,381

The installment financed by long-term debt with aircraft guarantee through the U.S. Ex-Im Bank corresponds approximately to 85% of the aircraft total cost. Other establishments finance the acquisitions with equal or higher percentages, reaching up to 100%.

The Company performs payments related to aircraft acquisition through its own funds, short and long-term debt, cash provided by operating activities, short and medium-term line of credit and supplier financing.

The Company leases its entire aircraft fleet through a combination of operating and finance leases. As of March 31, 2016, the total fleet leased was comprised of 143 aircraft, of which 104 were under operating leases and 39 were recorded as finance leases. The Company holds 35 aircraft under finance leases with purchase option. During the quarter ended March 31, 2016, the Company received 2 aircraft and returned 3 aircraft under operating lease

contracts.

27.1. Operating leases

The future payments of non-cancelable operating lease contracts are denominated in U.S. dollars, and are as follows:

	03/31/2016	12/31/2015
2016	848	1,270
2017	1,107	1,128

Total minimum lease payments	7,394	7,750

Notes to the interim financial information
March 31, 2016

(In millions of Brazilian Reais - R\$, except when indicated otherwise)

27.2. Sale-leaseback transactions

The Company recorded a net gain of R\$213 due to 8 aircraft transactions, 7 sale-leaseback transactions where one aircraft was received during the quarter ended March 31, 2016 and 6 aircraft previously classified as fixed assets under finance leases, according to Note 15.a; and the sale of the right to receive 1 aircraft (net gain of R\$ 8 on the first aircraft in the quarter ended March 31, 2015). Given that the results will not be offset against future payments of leases and were negotiated in accordance with the fair value of the aircraft, such gains were recognized directly in the income statement.

28. Financial instruments and risks management

The Company and its subsidiaries have financial asset and financial liability transactions, which consist in part of derivative financial instruments. The financial derivative instruments are used to hedge against the inherent risks related to the Company's operations. The Company and its subsidiaries consider as most relevant risks: fuel price, foreign currency and interest rate. These risks can be mitigated by using exchange swap derivatives, futures and options contracts based on oil, U.S. dollar and interest markets. The contracts may be held by exclusive investment funds, as described in the Company's Risk Management Policy.

Management follows a documented guideline when managing its financial instruments, set out in its Risk Management Policy, which is periodically revised by the Risk Committee, and approved by the Board of Directors. The Risk Committee sets the guidelines and limits, monitors controls, including the mathematical models adopted for a continuous monitoring of exposures and possible financial effects and also prevents the execution of speculative financial instruments transactions.

The Company does not hedge its total risk exposure, and is, therefore, subject to market fluctuations for a significant portion of its exposed assets and liabilities. Decisions on the portion to be protected consider the financial risks and the costs for such protection and are determined and reviewed at least quarterly in line with the strategies of the Risk Committee. The results from operations and the application of controls for risk management are part of the monitoring process by the Risk Committee and have been satisfactory to the proposed

objectives.

The description of the consolidated account balances and the categories of financial instruments included in the statements of financial position as of March 31, 2016 and December 31, 2015 is as follows:

	Measured at fair value through profit or loss		Measured at amortized cost (c)

The Company adopts hedge accounting for derivatives contracted to hedge interest rate risk classified as cash flow hedge according to CPC38 - Financial Instruments - Recognition and Measurement. As of March 31, 2016, the Company records the interest rate hedge as a cash flow hedge and the other derivatives related to foreign exchange and fuel as economic hedge.

The Company has deposits in guarantee for derivative transactions as described in Note 6.

a) Market risks

i. Fuel price risk

The aircraft fuel price fluctuates both in the short and in the long-term, in line with crude oil and oil by product price fluctuations. To mitigate the risk of fuel price, the Company contracts derivative financial instruments referenced mainly to crude oil and, eventually, to their derivatives, also contracted, directly with the local supplier, for future fuel deliveries to aircraft at predetermined prices. During the quarter ended March 31, 2016, the Company has no outstanding fuel derivative contracts.

ii. Foreign currency risk

Foreign risk derives from the possibility of unfavorable fluctuation of foreign currencies to which the Company's liabilities or cash flows are exposed. To mitigate the foreign currency risk, the Company contracts derivative financial instruments that are referenced to the U.S. dollar. During the quarter ended March 31, 2016, the Company recognized a loss on foreign currency derivatives in the amount of R\$17 (gain of R\$73 during the quarter ended March 31, 2015).

The Company's foreign currency exposure is as follows:

Notes to the interim financial information
March 31, 2016

(In millions of Brazilian Reals - R\$, except when indicated otherwise)

iii. Interest rate risk

The Company is mainly exposed to lease transactions indexed to variations in the Libor rate until the aircraft is received. To mitigate such risks, the Company has derivative financial instruments of interest rate (Libor) swaps. During the quarter ended March 31, 2016, the Company recognized a total loss with interest hedging transactions in the amount of R\$33 (R\$8 during the quarter ended March 31, 2015).

As of March 31, 2016, the Company and its subsidiaries had interest rate swap derivatives recorded as hedge accounting.

b) Credit risk

The credit risk is inherent in the Company's operating and financing activities, mainly represented by trade receivables, cash and cash equivalents, and short-term investments. Trade receivables credit risk consists of amounts falling due from the largest credit card companies, with credit risk better than or equal to those of the Company and its subsidiaries, and receivables from travel agencies, installment sales, and government sales, with a small portion exposed to risks from individuals or other entities.

As defined in the Risk Management Policy, the Company is required to evaluate the counterparty risks in financial instruments and diversify the exposure. Financial instruments are contracted with counterparties rated at least as investment grade by S&P and Moody's. The financial instruments are mostly contracted on commodities and futures exchanges (BM&FBOVESPA and NYMEX), which substantially mitigate the credit risk, derivative transactions contracted on the OTC market (OTC) have counterparts with a minimum rating of "investment grade". The Company's Risk Management Policy establishes a maximum limit of 20% per counterparty for short-term investments.

c) Liquidity risk

Liquidity risk takes on two distinct forms: market and cash flow liquidity risk. The first is related to current market prices and varies in accordance with the types of assets and the markets where they are traded. Cash flow liquidity risk, however, is related to difficulties in meeting the contracted operating obligations at the maturity dates. That are uncertainty on the companies solvency and the business plan to mitigate those uncertainties is disclosed in Note 1.1. In order to mitigate the liquidity risk, the Company invests its funds according to the Cash Flow Policy, which states that the term of the debt must be higher than the investment portfolio term.

Notes to the interim financial information
March 31, 2016

(In millions of Brazilian Reais - R\$, except when indicated otherwise)

The schedule of financial liability hold by the Company as of March 31, 2016 is as follows:

	Current	Less than 6 months	6 to 12 months	1 to 5 years	More than 5 years	Total

As of March, 31 2016	761	1,118	1,122	4,642	3,139	10,782

d) Capital management

The Company seeks alternatives to capital in order to meet its operational needs, aiming a capital structure that takes into account suitable parameters for the financial costs, the maturities of funding and its guarantees. The Company monitors its financial leverage ratio, which corresponds to net debt, including short and long-term debt, divided by total equity (deficit).

The table below shows the Company's capital management:

	Consolidated	
	03/31/2016	12/31/2015
Short and long-term debt	7,868	9,305
(-) Cash and cash equivalents	(967)	(1,072)
(-) Short-term investments	(435)	(492)

Net debt	6,053	7,006
Total equity (deficit)	(3,572)	(4,323)
Total capital and net debt	2,481	2,683

The Company remains committed to maintaining high liquidity and an amortization profile without pressure on the short-term refinancing.

e) Sensitivity analysis of financial instruments

The sensitivity analysis of financial instruments was prepared according to CVM Instruction 475/08, in order to estimate the impact on the fair value of financial instruments held by the Company. The analysis considered three scenarios of different risk variables: most likely scenario, the assessment of the Company; deterioration of 25% (possible adverse scenario) in the risk variable, deterioration 50% (remote adverse scenario).

Notes to the interim financial information
March 31, 2016

(In millions of Brazilian Reais - R\$, except when indicated otherwise)

The estimates presented do not necessarily reflect the amounts to be reported in future interim financial information. The use of different methodologies and/ or assumptions may have a material effect on the estimates presented.

The tables below show the sensitivity analysis of foreign currency exposure, derivatives position and the interest rates on March 31, 2016 to market risks considered relevant by management. In the tables, positive values are displayed as asset exposures (assets higher than liabilities) and negative values are exposed liabilities (liabilities higher than assets).

i. Individual

Foreign currency risk

As of March 31, 2016, the Company has a currency exposure of R\$3,115. On this date, the exchange rate adopted was R\$3.5598/US\$, corresponding to the closing rate of the month published by Brazil's Federal Reserve as a likely scenario, and the impacts analyzed from the variation of 25% and 50% over the current rate are shown below:

Instrument	Risk	Exposed amount	Possible adverse scenario +25 %	Remote adverse scenario + 50%
Liabilities, net	Dollar appreciation	(3,115)	(3,894)*	(4,673)*
	Dollar		4.44863	5.33835

(*) Negative amounts correspond to net losses in case of exchange variation.

Consolidated

i) *Fuel risk*

As of March 31, 2016, the Company did not hold fuel derivative contracts.

ii) *Foreign currency risk*

As of March 31, 2016, the Company had U.S. dollar derivative contracts with notional value of US\$35,500, with maturities until June 2016, and a net exchange exposure liability of R\$6,482. At the same date, the Company adopted the closing exchange rate of R\$3.5589/US\$ corresponding to the closing rate of the month published by Brazil's Federal Reserve as a likely scenario, and the impact of the change of 25% and 50% over that rate, is as follows:

	Exposure amount	-50%	-25%	+25%	+50%

iii) *Interest risk factor*

As of March 31, 2016, the Company holds financial investments and financial liabilities indexed to several rates, and Libor interest. In the sensitivity analysis of non-derivative financial instruments it was considered the impacts on yearly interest of the exposed values as of March 31, 2016, arising from fluctuations in interest rates according to the scenarios presented below:

Instruments	Risk	Exposure amount	Possible adverse scenario	Adverse scenario remote
			25%	50%
Short and long-term debt, net of short-term investments (*)	Increase in the CDI rate	(26)	(14)	(29)
Derivatives	Decrease in the Libor rate	(152)	(172)	(199)

(*) Refers to the sum of the values invested and raised in the market and indexed to CDI, the negative amounts means more debt than investments.

Measurement of the fair value of financial instruments

In order to comply with the disclosure requirements for financial instruments measured at fair value, the Company and its subsidiaries must classify its instruments in Levels 1 to 3, based on observable fair value levels:

- Level 1: Fair value measurements are calculated based on quoted prices (without adjustment) in active market or identical liabilities;

- Level 2: Fair value measurements are calculated based on other variables besides quoted prices included in Level 1, that are observable for the asset or liability directly (such as prices) or indirectly (derived from prices); and
- Level 3: Fair value measurements are calculated based on valuation methods that include the asset or liability but that are not based on observable market variables (unobservable inputs).

The following table shows a summary of the Company's and its subsidiaries' financial instruments measured at fair value, including their related classifications of the valuation method, as of March 31, 2016 and December 31, 2015:

	31/03/2016		31/12/2015	
	Book value	Other significant observable factors (Level 2)	Book value	Other significant observable factors (Level 2)
Cash and cash equivalents	469	469	737	737
Short-term investments	189	189	228	228
Restricted cash	413	413	735	735
Derivative assets	-	-	2	2
Derivative liabilities	(160)	(160)	(141)	(141)
