CSN´s consolidated result

- In the 2Q18, **net revenue** totaled R\$5,687 million, an increase of **12%** and **32%** compared to the 1Q18 and 2Q17, respectively. The improvement in performance compared to the 1Q18 was due to the increase in steel product prices, increase in volumes and prices in the mining segment and expansion of the railway logistics, cement and energy segments.
- In the 2Q18, **cost of sales** totaled R\$4.124 million, an increase of **12%** compared to the 1Q18, due to the larger volume of sales in the period and increase in raw material prices (coal and coke) as a result of the US dollar appreciation against Brazilian real, as well as increase in general manufacturing costs.
- In the second quarter of 2018, **gross profit** totaled R\$1,563 million, a significant increase of **59%** compared to the 2Q17, and increase in gross margin by 4.7 p.p. against the same comparison basis, from 22.8% to 27.5%, due to the recovery of the steel and mining margin.
- In the 2Q18, **general and administrative expenses** totaled R\$113 million, a decrease from **2.5% (2Q17) to 2.0% (2Q18)** of net revenue. **Selling expenses** totaled R\$470 million, or 8.3% of net revenue, a reduction of **2.8 p.p.** compared to the 2Q17 (11.1% of net revenue).

- In the 2Q18, **other net income** totaled R\$542 million arising mainly from the gain on the sale of CSN LLC (R\$1,150 million), partially compensated for the depreciation of Usiminas' shares in the period, representing a loss of R\$516 million at fair value through profit or loss.

- In the 2Q18, **net financial result**, totaled R\$989 million. **Financial expenses (ex-exchange variation)** continue to decrease, by virtue of the decrease in Selic rate, generating a **reduction of R\$195MM** compared to the 2Q17. Monetary and exchange variations were strongly impacted by exchange variation in the period, generating a negative amount of R\$ 1,905 million, with the increase in *hedge accounting* positions softening the final result.

Adjusted EBITDA margin is calculated based on Adjusted EBITDA divided by Adjusted net revenue, which includes 100% stake in CSN Mining, 37.27% in MRS and 50% in CBSI, beginning December/15.

Free Cash Flow

In **2Q18**, generation of operating cash, measured by Free Cash Flow, was R\$ 1,598 million, influenced by the sale of LLC. Considering only the recurring operation, R\$ 73MM was generated in the period, due to the negative variation of working capital, impacted by higher inventories. In the last 12 months, recurring Free Cash Flow reached R\$ 1,395 million.

Debt

Quarterly Financial Information – June 30, 2018 – CIA SIDERURGICA NACIONAL

**Version:

In June 30, 2018, adjusted net debt totaled R\$27,125 million, while net debt/EBITDA ratio, calculated based on the adjusted EBITDA for the last twelve months, reached 5.34x. In the quarter, the deleveraging effects from the increased EBITDA LTM, in addition to the sale of LLC, reduced the net debt/EBITDA ratio by 0.8x. However, these effects were partially offset by the exchange rate changes on the debt, representing a final reduction of 0.48x.

Foreign exchange exposure

The net foreign exchange exposure of the consolidated balance sheet was US\$1,035 million as at June 30, 2018, as shown in the table below. It should be noted that within the net foreign exchange exposure, a liability of US\$1.0 billion is included in line item “Borrowings and financing” related to the perpetual bond, which, due to its nature, will not require disbursement for settlement of the principal amount in the foreseeable future.

The hedge accounting adopted by CSN correlates the projected export inflow in US dollars with part of the scheduled debt payments in the same currency. As a result, the exchange rate changes in the US dollar-denominated debt is temporarily recorded in equity and subsequently recorded in profit or loss when revenues in US dollars from exports occur. In this quarter, the increased number of US debt instruments designated as hedge accounting, increased with additional export volumes, mitigated further volatility.

Working capital

To calculate working capital, CSN adjusts its assets and liabilities as demonstrated below:

- Trade receivables: excludes dividends receivable, advances to employees and other receivables;
- Inventories: excludes warehouse, which is not part of the cash conversion cycle, and will be subsequently recorded in property, plant and equipment when consumed;
- Advanced taxes: solely composed of income tax and social contribution included in line item "Recoverable taxes";
- Taxes payable: composed of line item "Taxes payable", in current liabilities, plus taxes in installments;
- Advances from customers: recognized in line item "Other payables", in current liabilities;

Accordingly, working capital invested in the Company's business **totaled R\$2,959 million in the 2Q18, increasing the financial cycle in 5 days**, compared to the 1Q18, mainly due to the trucker strike and high raw material prices, which impacted the increase in inventories by R\$394 million compared to the prior quarter.

CSN's Mining Results

In the **2Q18**, the steel production in China was 238 Mt, reaching a record quarterly production and representing an increase of 13% compared to 1Q18. However, the cut in production of sintering and trade tensions have negatively impacted prices. In this regard, **iron ore price ratio in the 2Q18 reached US\$65.35/dmt (Platts, Fe62%, N. China), on average, a decrease of 12% compared to the 1Q18.** The US dollar variation between the periods was 11.1%, which offset, in domestic currency, the decrease in iron ore prices.

The drop in the overall supply of **high silica ore** resulted in a **strong reduction of 50% in the market discount of this impurity in 2Q18**, compared to the 1Q18.

(Expressed in thousands of reais – R\$, unless otherwise stated)

1. DESCRIPTION OF BUSINESS

Companhia Siderúrgica Nacional “CSN”, also referred to as “the Company” or “Parent Company”, is a publicly-held company incorporated on April 9, 1941, under the laws of the Federative Republic of Brazil (Companhia Siderúrgica Nacional, its subsidiaries, associates and joint ventures are collectively referred to herein as the "Group"). The Company’s registered office is located in São Paulo, SP, Brazil.

CSN is listed on the São Paulo Stock Exchange (B3 S.A.- Brasil, Bolsa, Balcão) and on the New York Stock Exchange (NYSE). Accordingly, the Company reports its information to the Brazilian Securities and Exchange Commission (CVM) and the U.S. Securities and Exchange Commission (SEC).

The Group's main operating activities are divided into five (5) segments as follows:

- **Steel:**

The Company’s main industrial facility is the Presidente Vargas steelworks (“UPV”), located in the city of Volta Redonda, State of Rio de Janeiro. This segment consolidates all operations related to the production, distribution and sale of flat steel, long steel, metallic containers and galvanized steel. In addition to the facilities in Brazil, CSN has operations in the United States, Portugal and Germany aimed at gaining markets and providing excellent services to end consumers. Its steel is used in home appliances, civil construction and automobile industries.

- **Mining:**

The production of iron ore is developed in the city of Congonhas, State of Minas Gerais.

Iron ore is sold basically in the international market, especially in Europe and Asia. The prices charged in these markets are historically cyclical and subject to significant fluctuations over short periods of time, driven by several factors related to global demand, strategies adopted by the major steel producers, and the foreign exchange rate. All these factors are beyond the Company's control. The ore transportation is carried out through Terminal de Carvão e Minérios do Porto de Itaguaí – (“TECAR”), a solid bulk terminal, one of the four terminals that comprise the Itaguaí Port, in State of Rio de Janeiro. Imports of coal and coke are also carried out through this terminal by providing services to CSN's steel segment.

The Company's mining activities also comprise exploitation of tin in the State of Rondônia, to supply the needs of the UPV. The surplus of these raw materials is sold to subsidiaries and third parties.

- **Cement:**

CSN entered the cement market boosted by the synergy between this activity and its existing businesses. Next to the Presidente Vargas Steelworks (UPV) in Volta Redonda (RJ), the Company installed a new business unit that produces CP-III type cement using slag produced by the UPV's blast furnaces. It also exploits limestone and dolomite at the Arcos unit in the State of Minas Gerais, to meet the needs of the UPV and of the cement plant.

In the fourth quarter of 2016, the Company started the operation of its second clinker production line in Arcos/MG. As a result, the Company is self-sufficient in the production of cement, with an installed capacity of 4.7 million tons per year.

- **Logistics**

Railroads:

CSN has interests in three railroad companies: MRS Logística S.A., which manages the Southeast Railway System of the former Rede Ferroviária Federal S.A. (“RFFSA”), Transnordestina Logística S.A. (“TLSA”) and FTL - Ferrovia Transnordestina Logística S.A. (“FTL”), which has the concession to operate the former Northeast Railway System of RFFSA, in the States of Maranhão, Piauí, Ceará, Rio Grande do Norte, Paraíba, Pernambuco and Alagoas, with TLSA being responsible for the rail links of Missão Velha-Salgueiro, Salgueiro-Trindade, Trindade-Eliseu Martins, Salgueiro-Porto de Suape and Missão Velha-Porto de Pecém (Railway System II), still under construction and FTL being responsible for the rail links of São Luiz-Mucuripe, Arrojado-Recife, Itabaiana-Cabedelo, Paula Cavalcante-Macau and Propriá-Jorge Lins (Railway System I).

Ports:

The Company operates in the State of Rio de Janeiro, through its subsidiary Sepetiba Tecon S.A., the Container Terminal (“TECON”) and through its subsidiary CSN Mineração S.A – (“CSN Mineração”)., TECAR, both at the Itaguaí Port. Located in the Bay of Sepetiba, they have privileged highway, railroad and maritime access.

At TECON, shipment of CSN's steel products, movement of containers, storage, consolidation and deconsolidation of cargo are carried out and, at TECAR, the shipment of iron ore to overseas market and the unloading of coal and other products, such as petroleum coke, sulfur and zinc concentrate for our own use and for several customers.

- **Energy:**

As energy is fundamental to its production process, the Company has electric energy generation assets to guarantee its self-sufficiency.

3. ADOPTION OF NEW ACCOUNTING PRACTICES

The Company applied as of January 1, 2018, the IFRS 09 Financial Instruments (corresponding to CPC 48) and IFRS 15 Revenues from Contracts with Customers (corresponding to CPC 47), both of which were approved by CVM in November 2016 as well as interpretation IFRIC 22, corresponding to ICPC 21, approved in July 2017. IFRS 09 and 15 replaced IAS 39 Financial Instruments: Recognition and Measurement and IAS 18 Revenue and related interpretations, respectively.

The Company decided to adopt the modified transition method for the implementation of the new standards, where any transitory adjustment is recognized in retained earnings on January 1, 2018, without comparative adjustment and whose impacts are being detailed below:

- **IFRS 9 / CPC 48 Financial instruments**

The new pronouncement includes new rules on the classification and measurement of financial assets, as well as impairment of assets and new practices for hedge accounting, which are simplified below:

Classification and measurement - IFRS 9 establishes that financial assets should be classified and measured in one of three categories: amortized cost, fair value through other comprehensive income (VJORA) and fair value through profit or loss (VJR). The categories of held-to-maturity, loans and receivables and available for sale that were part of the scope of IAS 39, were removed.

Impairment of assets- the "incurred losses" model is replaced by an "estimated credit loss" model, where it is no longer necessary for a loss event to occur before recognition of the impairment loss. The model uses a two-pronged approach, in which the provision will be measured for expected credit losses for 12 months or for the entire life of the asset. These changes did not bring impacts to the Company.

Hedge Accounting - a new general hedge accounting model was included, which does not change, but fundamentally the types of hedge relationship or requirements for measurement and recognition of ineffectiveness. These changes did not bring impacts to the Company.

The main effect of the adoption of IFRS 09 is presented in note 14.II, referring to the classification from January 1, 2018 and measurement of the investment in Usinas Siderúrgicas de Minas Gerais S.A. - Usiminas and Panatlântica S.A. at fair value through profit or loss (VJR) and obtained a gain of R\$ 1.4 billion (gross) as of June 30, 2018 recorded in other operating income and expenses (Note 24).

• **IFRS 15 / CPC 47 Revenue from contract with customer**

Revenue from contracts with customers - IFRS 15 establishes a new concept for revenue recognition, replacing IAS 18 Revenue, IAS 11 - Construction Contracts and related interpretations. The Company adopted IFRS 15 using the modified retrospective method, which does not require the restatement of comparative information

The new pronouncement establishes a five-step model for determining the recognition of revenue from customer contracts, as follows:

- **Identification of the contract:** identify when there is an agreement and the parties involved.

CONVENIENCE TRANSLATION INTO ENGLISH FROM THE ORIGINAL PREVIOUSLY ISSUED IN PORTUGUESE

Quarterly Financial Information – June 30, 2018 – CIA SIDERURGICA NACIONAL

**Version:
1**

- **Identify the performance obligations:** from the definitive agreement, analyze the contractual promises, in order to identify which promised items can be considered as performance obligations.

- **Determine the price of the obligation:** The transaction price is the value of the consideration that the entity expects to receive by transferring the control of the promised goods and services, the value of the transaction can include fixed values, variable values or both.

- **Transaction Price Allocation:** At the time of signing the contract, the transaction price must be allocated to each performance obligation.

- **Recognize Revenue:** Revenue recognition occurs at the time (or to the extent that) meets a performance obligation by transferring control of a good or service to a customer.

Analyzing the topic "identification of performance obligations", the Company identified in its operations the following performance obligations

- **Sale of finished products:** the transfer of risks and benefits coincides with the transfer of control of the products, thus, the moment of recognition of revenue from product sales was not impacted by the adoption of this new standard.

- **Provision of service:** in the main services provided by the Company, the revenue recognition coincides with the conclusion of the service, therefore without impacts by the adoption of this standard.

- **Freight / insurance liability in CFR / CIF incoterms:** the freight service in the CFR and CIF modalities will be considered a separate service and therefore a separate performance obligation, with allocation of part of the price of the transaction recognized in profit or loss, according to the effective provision of the service over time.

The effect of the difference in the recognition of the portion of revenue allocated to freight does not significantly affect the Company's income. Therefore, such revenue will not be presented separately in the Company's financial statements.

In the other topics of the new standard, the Company did not identify material measurement impacts in the application of this standard

• **IFRIC 22 / ICPC 21 Foreign currency transaction and down payment**

Required to apply in January 2018, IFRIC 22, which corresponds to ICPC 21, is to regulate the concepts established in CPC 02 - Effects of Changes in Foreign Exchange Rates and Conversion of Financial Statements, on how to determine the transaction date with the purpose of determining the exchange rate to be used in the initial recognition of an asset, expense or revenue (or part thereof) in the derecognition of non-monetary assets or non-monetary liabilities arising from the payment or early receipt in foreign currency.

Generally speaking, the interpretation deals with transactions in foreign currency in which the Company recognizes a non-monetary asset or non-monetary liability resulting from early payment or receipt, even before the company recognizes the related asset, expense or revenue.

The consensus of this interpretation clarifies that the transaction date for determining the exchange rate to be used in the case of advances is defined as the date that the entity initially recognizes the non-monetary asset or non-monetary liability arising from the early payment or receipt. In the case of multiple payments or receipts in advance, the company shall determine the transaction date, each payment or advanced receipt.

As the Company already adopts the practices established by CPC 02, establishing the historical rate at the time of recognition of non-monetary assets and liabilities related to the anticipation, there is no impact resulting from the application of this technical interpretation.

- TRANSNORDESTINA LOGÍSTICA S.A. (“TLSA”)

It is in pre-operational phase and will continue as such until the completion of Railway System II. The approved schedule, which estimated the completion of the work by January 2017, is currently under review and discussion with the responsible agencies; however, Management believes that new deadlines for project completion will not have material adverse effects on the expected return on the investment. After analyzing this matter, Management considered as appropriate the use of the accounting basis of operational continuity (going concern) of the project in the preparation of its financial statements.

The assumptions used to evaluate the impairment test in December 2017 remain valid and there is no trigger to justify records of *impairment* in the first quarter.

I - Identification and measurement of financial instruments

The Company enters into transactions involving various financial instruments, mainly cash and cash equivalents, including short-term investments, marketable securities, trade receivables, trade payables, and borrowings and financing. The Company also enters into derivative transactions, especially interest rate and foreign exchange rate *swaps*.

Considering the nature of the instruments, the fair value is basically determined by the use of quotations in the open capital market of Brazil and the Commodities and Futures Exchange. The amounts recorded in current assets and liabilities have immediate liquidity or maturity, mostly in terms of less than three months. Considering the term and the characteristics of these instruments, the book values approximate the fair values.

- **Classification of financial instruments**

With the implementation of pronouncements CPC 48/ IFRS9, the classification of financial instruments: held to maturity, loans and receivables and available for sale were replaced by three categories of classification and measurement of financial instruments: amortized cost, fair value through other comprehensive income (VJORA) and fair value through profit or loss (VJR).

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Includes observable inputs in market such as interest rates, exchange etc., but not prices traded in active markets.

There are no assets and liabilities classified as level 3.

II – Investments in securities measured at fair value through profit or loss

During the application of IAS 39/CPC 38 until December 2017, the Company has investments in equity instruments, measured at fair value through other comprehensive income, because the nature of the investment is not included in any other categories of financial instruments (loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss).

Gains and losses arising from the variation of the share price, were recorded directly in shareholders' equity under the account "Other comprehensive income" and for each significant decrease in market value an impairment loss was recognized in income.

With the implementation of the pronouncements IFRS 9 / CPC 48 as from January 1, 2018, the equity instruments classified as held-to-maturity should be classified as fair value through profit or loss (VJR). In this way, the Company reclassified the investments in common (USIM3) and preferred (USIM5) shares of Usiminas ("Usiminas Shares"), from fair value through other comprehensive income (VJORA) to fair value through profit or loss. In relation to Panatlântica shares (PATI3), currently classified as (VJORA), the Company based on its current business model, whose objective is to maintain this financial asset to obtain contractual cash flows, but adopts the option to reclassify it to VJR, recognizing changes in fair value in profit or loss.

Accordingly, the credit balance accumulated in December 2017 in other comprehensive income of R\$1,559,682 was reclassified to the statement of income from the effective date of the new standard. With the new classification, changes in fair value are recorded in the statement of income, whose movement occurred in the first half of 2018 generated an loss of R\$ 142,139 and an accumulated gain of R\$ 1,417,544. (See opening below and note 24).

- Cash flow hedge accounting**

Beginning November 1, 2014, the Company formally designated cash flow hedging relationships to hedge highly probable future cash flows against US dollar fluctuations.

In order to better reflect the accounting impacts of this foreign exchange hedging strategy on the Company's results, CSN designated part of its US dollar-denominated liabilities as a hedging instrument of its future exports. As a result, foreign exchange differences arising from designated liabilities will be temporarily recognized in shareholders' equity and recognized in profit or loss when such exports are carried out, allowing the concurrent recognition of the dollar impact on liabilities and on exports. The adoption of this hedge accounting does not entail entering into any financial instrument. As of June 30, 2018, US\$2.5 billion in exports to be carried out from July 2018 until February 2023 are designated.

In order to support the aforementioned designations, the Company prepared formal documentation indicating how the hedge designation is aligned with CSN's objective and risk management strategy, identifying the hedging instruments used, the hedge object, the nature of the risk to be hedged and demonstrating the expectation of high effectiveness of the designated relations. Debt instruments have been designated in amounts equivalent to the portion of future exports. Therefore, the exchange variation of the instrument and the object are similar. According to the Company's accounting policy, continuous evaluations of prospective and retrospective effectiveness should be carried out, comparing the amounts designated with the amounts expected and approved in the Management's budgets, as well as the amounts actually exported.

Through hedge accounting, the exchange gains and losses on debt instruments will not immediately affect the Company's profit or loss except to the extent that exports are carried out.

The table below shows a summary of the hedging relationships as of June 30, 2018:

- ***Hedge of net investment in foreign operation***

CSN has a natural currency exposure in Euros substantially arising from a borrowing taken by a foreign subsidiary with functional currency in Reais, for the acquisition of investments abroad where the functional currency is Euro. Such exposure arises from translating the balance sheets of these subsidiaries for consolidation into CSN, where the exchange difference on the borrowings affected the statement of income, in the finance income and costs line item, and the exchange difference on the net assets of the foreign operation directly affected the shareholder's equity, in other comprehensive income.

As from September 1, 2015, CSN began to adopt the net investment hedge to eliminate such exposure and cover future fluctuations of the Euro on such borrowings. Non-derivative financial liabilities were designated, represented by borrowing agreements with financial institutions in the amount of € 120 million. The account balances as of June 30, 2018 are as follows:

Designation Date	Hedging Instrument	Hedged item	Type of hedged risk	Exchange rate on designation	Designated amounts (EUR'000)	Amortized part (USD'000)	06/31/2018 Impact on shareholders' equity
