**Item 7.01 Regulation FD Disclosure.**

Exide Technologies (the "Company") hosted a public earnings call on February 10, 2012 to discuss its fiscal 2012 third quarter results. During the question and answer session of that call, a question was asked about comparative unit volumes for the period ended December 31, 2011 versus the comparative prior fiscal year period. In answering the question, the Company stated its belief that the Company's Quarterly Report on Form 10-Q for the period ended December 31, 2011, filed on February 9, 2012 (the "10-Q"), contained a mistake. That answer was not correct and the Company affirms the following statement in the 10-Q:

"Industrial Energy Americas net sales, excluding the foreign currency translation impact, decreased 2.8% primarily due to 19.7% lower unit sales in the Motive Power market while unit sales in the Network Power market were flat."

Better customer mix and higher tubular unit sales in Motive Power mitigated, to a degree, the unit level decline, which was partially attributable to the timing of the buying patterns of a major customer.
