Table of Contents**Earnings Release for the Three Months Ended June 30, 2008****<< 1. Operating Results >>****1. Business Overview**

Competition among the network operators in the mobile communications market in Japan, which already entered a phase of maturity given the high penetration rate, has been fueled by recent price competitions and market entry by new competitors such as MVNO*.

In such market environment, we started to offer free of charge calls for 24 hours among family members with FOMA subscription in the same Fami-wari MAX50 account. We decided to discount the basic monthly charge of a billing plan called Type SS Value . We also released FOMA 906i series handsets and launched a new service called Home U which enables subscribers to make/receive a call and transmit data via local broadband connection with a compatible FOMA handset. We strived for further penetration of our new discount programs and new handset sales methods, which we believe are appropriate for the current market conditions.

In April 2008, we announced the New DOCOMO Commitments, which sets forth the vision for reforming DOCOMO, and upgraded privilege for membership of DOCOMO premium club in order to further promote sustainable loyalty from our valued customers.

As a result, for the three months ended June 30, 2008, operating revenues were ¥1,170.2 billion, operating income was ¥296.5 billion, income before income taxes was ¥288.4 billion and net income was ¥173.5 billion.

* MVNO (Mobile Virtual Network Operator): a service provider who leases the physical wireless communication infrastructure from other network operators to provide wireless services.

2. Segment information**(1) Mobile phone business**

As of June 30, 2008, the number of cellular (FOMA+mova) services subscriptions was 53.63 million (an increase of 0.78 million compared to the number as of June 30, 2007), 84.3% of which was represented by FOMA services subscriptions of 45.20 million. The aggregate number of subscriptions to the new discount programs introduced in August 2007 such as Fami-wari MAX50 reached approximately 25.90 million while the number of subscriptions to the Value Plan surpassed approximately 8.90 million as of June 30, 2008, respectively. As a result, aggregate ARPU

of cellular (FOMA+mova) services decreased to ¥5,890 for the three months ended June 30, 2008 (down 10.2% compared to the same period of the prior year).

The number of handsets sold (FOMA+mova) decreased to 4.95 million units for the three months ended June 30, 2008 (a decrease of 1.29 million units compared to the same period of the prior year). Value Course, which was introduced in November 2007, was applied to more than 90% of the aggregate number of handsets sold through our new handset sales methods.

Our cellular churn rate for the three months ended June 30, 2008 improved significantly to 0.51% compared to 0.85% during the same period of the prior year.

For the three months ended June 30, 2008, operating revenues and operating income from mobile phone business were ¥1,154.8 billion and ¥301.0 billion, respectively.

(2) Cash flow conditions

Net cash provided by operating activities was ¥135.3 billion, reflecting the payment for income taxes of ¥203.6 billion and an increase in account receivables due to the effect of advance payment for handsets purchased in installments.

Net cash used in investing activities was ¥190.4 billion. Our expenditures for purchases of property, plant and equipment of ¥163.7 billion and purchases of intangible and other assets of ¥72.0 billion in total were partially offset by proceeds from redemption of long-term bailment for consumption to a related party of ¥50.0 billion.

Net cash used in financing activities was ¥102.7 billion. We spent ¥50.0 billion for acquisition of treasury stock, ¥27.8 billion for repayment for outstanding long-term debt and ¥102.3 billion for payment for cash dividends while financing ¥79.9 billion through issuance of corporate bonds.

The balance of cash and cash equivalents was ¥487.0 billion as of June 30, 2008.

<<3. Prospects for the Fiscal Year Ending March 31, 2009 >>

Competition in the Japanese mobile communications market has become fiercer due to recent price competitions, market entry by new competitors such as MVNO and other factors.

Under such market condition, we projected our operating revenues for the fiscal year ending March 31, 2009 to be ¥4,768.0 billion, in which a decrease in ARPU due to an adverse impact of revision of billing plans and discount programs would be offset by an increase in equipment sales due to further penetration of new handset sales methods. We will continue our cost saving efforts including efficient allocation of sales commission and reduction of network cost through improvement of administrative processes, which we expect will result in an increase in operating income by ¥21.7 billion to ¥830.0 billion from the prior fiscal year. As we are currently not aware of any factors which may have a material impact on our projected results of operations, we have not revised our projection which was announced on April 25, 2008.

* Explanation for forecasts of operation and other notes:

The mobile communications market in Japan is characterized by rapid changes in the market environment due to technical innovations, market entry by new competitors and other factors. To respond to such changes, our corporate group may introduce new billing plans or other measures that could potentially have a significant impact on our revenues and income. The timing of introduction of such measures will be decided after comprehensively taking into consideration our operational circumstances and the actions of our competitors, and therefore, is not necessarily decided beforehand. Such measures, depending on the timing of implementation, may significantly affect our results forecasts to be made at the time of our first-quarterly results announcement. Providing such prospects on a quarter-year basis, therefore, may not be adequate or useful as information to be disclosed to investors. Accordingly, we will provide prospects for the full year only, and report the progress vis-à-vis the projected full-year forecasts by disclosing actual results on a quarterly basis.

Fair Value Measurements

Effective April 1, 2008, DOCOMO adopted Statement of Financial Accounting Standards (SFAS) No. 157 Fair Value Measurements . SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. Although the definition of fair value retains the exchange price notion in earlier definitions of fair value, SFAS No. 157 clarifies that the exchange price is the price in an orderly transaction between market participants to sell the asset or transfer the liability in the market and emphasizes that fair value is a market-based measurement, rather than an entity-specific measurement. SFAS No. 157 also expands disclosures about the use of fair value to measure assets and liabilities subsequent to initial recognition through fair value hierarchy as a framework for measurement. The initial adoption of SFAS No. 157 did not have a material impact on DOCOMO s results of operations and financial position. The disclosure required by SFAS No. 157 was omitted in this earnings release.

Definition and Calculation Methods of ARPU and MOU

1. Definition of ARPU and MOU**i) ARPU (Average monthly Revenue Per Unit)¹ :**

Average monthly revenue per unit, or ARPU, is used to measure average monthly operating revenues attributable to designated services on a per subscription basis. ARPU is calculated by dividing various revenue items included in operating revenues from our wireless services, such as monthly charges, voice communication charges and packet communication charges, from designated services which are incurred consistently each month, by the number of active subscriptions to the relevant services. Accordingly, the calculation of ARPU excludes revenues that are not representative of monthly average usage such as activation fees. We believe that our ARPU figures provide useful information to analyze the average usage per subscription and the impacts of changes in our billing arrangements. The revenue items included in the numerators of our ARPU figures are based on our U.S. GAAP results of operations. This definition applies to all ARPU figures hereinafter.

ii) MOU (Minutes of Usage): Average monthly communication time per subscription.**2. ARPU Calculation Methods****i) ARPU (FOMA + mova)**

Aggregate ARPU (FOMA+mova) = Voice ARPU (FOMA+mova) + Packet ARPU (FOMA+mova)

Voice ARPU (FOMA+mova): Voice ARPU (FOMA+mova) Related Revenues (monthly charges, voice communication

charges) / No. of active cellular phone subscriptions (FOMA+mova)

Packet ARPU (FOMA+mova): {Packet ARPU (FOMA) Related Revenues (monthly charges, packet communication/ charges)+ i-mode ARPU (mova) Related Revenues (monthly charges, packet communication charges)}/ No. of active cellular phone subscriptions (FOMA+mova)

i-mode ARPU (FOMA+mova)² : i-mode ARPU (FOMA+mova) Related Revenues (monthly charges, packet communication charges) / No. of active cellular phone subscriptions (FOMA+mova)

ARPU generated purely from i-mode (FOMA+mova)³ : i-mode ARPU (FOMA+mova) Related Revenues (monthly charges, packet communication charges) / No. of active i-mode subscriptions (FOMA+mova)

ii) ARPU (FOMA)

Aggregate ARPU (FOMA) = Voice ARPU (FOMA) + Packet ARPU (FOMA)

Voice ARPU (FOMA): Voice ARPU (FOMA) Related Revenues (monthly charges, voice communication charges) / No. of active cellular phone subscriptions (FOMA)

Packet ARPU (FOMA): Packet ARPU (FOMA) Related Revenues (monthly charges, packet communication charges) / No. of active cellular phone subscriptions (FOMA)

i-mode ARPU² (FOMA): i-mode ARPU (FOMA) Related Revenues (monthly charges, packet communication charges) /

No. of active cellular phone subscriptions (FOMA)

ARPU generated purely from i-mode (FOMA)³ : i-mode ARPU (FOMA) Related Revenues (monthly charges, packet/

communication charges) / No. of active i-mode subscriptions (FOMA)

iii) ARPU (mova)

Aggregate ARPU (mova) = Voice ARPU (mova) + i-mode ARPU (mova)

Voice ARPU (mova): Voice ARPU (mova) Related Revenues (monthly charges, voice communication charges) / No. of active cellular phone subscriptions (mova)

i-mode ARPU² (mova)² : i-mode ARPU (mova) Related Revenues (monthly charges, packet communication charges) / No. of active cellular phone subscriptions (mova)

ARPU generated purely from i-mode (mova)³ : i-mode ARPU (mova) Related Revenues (monthly charges, / packet communication charges) / No. of active i-mode subscriptions (mova)

3. Active Subscriptions Calculation Methods

No. of active subscriptions used in ARPU/MOU/Churn Rate calculations is as follows:

No. of active subscriptions for each month:

(No. of subscriptions at the end of previous month + No. of subscriptions at the end of current month) / 2

No. of active subscriptions for full-year results/forecasts:

Sum of No. of active subscriptions for each month from April to March

- 1 Communication Module service subscriptions and the revenues thereof are not included in the ARPU and MOU calculations.
- 2 The denominator used in calculating i-mode ARPU (FOMA+mova, FOMA, mova) is the aggregate number of cellular subscriptions to each service (FOMA+mova, FOMA, mova, respectively), regardless of whether i-mode service is activated or not.
- 3 ARPU generated purely from i-mode (FOMA+mova, FOMA, mova) is calculated using only the

number of
active i-mode
subscriptions as
a denominator.

DOCOMO Earnings Release

Three Months Ended June 30, 2008

Special Note Regarding Forward-Looking Statements

This Earnings Release contains forward-looking statements such as forecasts of results of operations, management strategies, objectives and plans, forecasts of operational data such as expected number of subscribers, and expected dividend payments. All forward-looking statements that are not historical facts are based on management's current plans, expectations, assumptions and estimates based on the information currently available. Some of the projected numbers in this report were derived using certain assumptions that are indispensable for making such projections in addition to historical facts. These forward-looking statements are subject to various known and unknown risks, uncertainties and other factors that could cause our actual results to differ materially from those contained in or suggested by any forward-looking statement. Potential risks and uncertainties include, without limitation, the following:

1. As competition in the market becomes more fierce due to changes in the business environment caused by Mobile Number Portability, new market entrants, competition from other cellular service providers or other technologies, and other factors, could limit our acquisition of new subscribers, retention of existing subscribers, or may lead to diminishing ARPU or an increase in our costs and expenses.
2. Current and new services, usage patterns, and sales schemes introduced by our corporate group may not develop as planned, which could affect our financial condition and limit our growth.
3. The introduction or change of various laws or regulations or the application of such laws and regulations to our corporate group could restrict our business operations, which may adversely affect our financial condition and results of operations.
4. Limitations in the amount of frequency spectrum or facilities made available to us could negatively affect our ability to maintain and improve our service quality and level of customer satisfaction.
5. The W-CDMA technology that we use for our 3G system and/or mobile multimedia services may not be introduced by other overseas operators, which could limit our ability to offer international services to our subscribers.
6. Our domestic and international investments, alliances and collaborations may not produce the returns or provide the opportunities we expect.
7. As electronic payment capability and many other new features are built into our cellular phones, and services of parties other than those belonging to our corporate group are provided through our cellular handsets, potential problems resulting from malfunctions, defects or loss of handsets, or imperfection of services provided by such other parties may arise, which could have an adverse effect on our financial condition and results of operations.
8. Social problems that could be caused by misuse or misunderstanding of our products and services may adversely affect our credibility or corporate image.
9. Inadequate handling of confidential business information including personal information by our corporate group, contractors and other factors, may adversely affect our credibility or corporate image.
10. Owners of intellectual property rights that are essential for our business execution may not grant us the right to license or otherwise use such intellectual property rights on acceptable terms or at all, which may limit our ability to offer certain technologies, products and/or services, and we may also be held liable for damage compensation if we infringe the intellectual property rights of others.

11. Earthquakes, power shortages, malfunctioning of equipment, software bugs, computer viruses, cyber attacks, hacking, unauthorized access and other problems could cause systems failures in the networks required for the provision of service, disrupting our ability to offer services to our subscribers and may adversely affect our credibility or corporate image.
12. Concerns about wireless telecommunications health risks may adversely affect our financial condition and results of operations.
13. Our parent company, Nippon Telegraph and Telephone Corporation (NTT), could exercise influence that may not be in the interests of our other shareholders
