Media Release

Credit Suisse Group reports net income of CHF 0.6 billion in 3Q10; underlying net income of CHF 1 billion*; total net new assets of CHF 14.6 billion and tier 1 ratio of 16.7%

All divisions profitable in a difficult quarter characterized by low market volumes and subdued client activity. Continued disciplined investments position Credit Suisse well for market recovery

Private Banking: encouraging performance in an environment marked by very low client activity

- o Pre-tax income of CHF 836 million
- o Net new assets of CHF 12.6 billion in Private Banking
- o Wealth Management Clients with pre-tax income of CHF 612 million and gross margin at 118 basis points
- o Corporate & Institutional Clients with pre-tax income of CHF 224 million with continued strong pre-tax profit margin

Investment Banking: solid market share performance in a weak revenue environment

- o Pre-tax income of CHF 395 million
- o Solid revenues in fixed income sales and trading, and underwriting and advisory
- o Equities down vs. previous quarter due to lower industry-wide client volumes

Asset Management: continued progress in implementing strategy and building third-party capital and fee-based business model

- o Pre-tax income of CHF 135 million
- o Agreement to acquire noncontrolling stake in York Capital Management furthers strategy to build higher margin, capital-efficient business
- o Net new assets of CHF 3.6 billion continues trend with positive inflows for the fifth consecutive quarter

Results in 9M10 continue to underscore value of Credit Suisse's strategy, business model and sustainability of performance:

- o Net income of CHF 4.3 billion
- o Return on equity of 15.9%
- o Total net new assets of CHF 55.1 billion

Zurich, October 21, 2010 Credit Suisse Group reported net income of CHF 609 million in 3Q10 compared to CHF 1,593 million in 2Q10. Core net revenues were CHF 6,284 million in 3Q10 compared to CHF 8,420 million in 2Q10. Underlying net income was CHF 960 million. The return on equity was 7.0% in 3Q10 with the underlying return on equity at 11.2%. Diluted earnings per share were CHF 0.48. The tier 1 ratio was 16.7% as of the end of 3Q10.

Brady W. Dougan, Chief Executive Officer, said: “Delivering underlying net income of one billion Swiss francs was a solid result in a quarter characterized by challenging conditions with low market volumes and subdued client activity. We are continuing to make disciplined investments in client-focused, capital- efficient, high-return businesses. These investments have expanded our market share in the targeted businesses and are producing strong net new assets. Our strategy had already anticipated the impact of tighter regulation, both in Investment Banking, where we have exited less capital-efficient businesses, and in Private Banking, where we have continued to build our global on and off-shore presence. We have built a business model, global platform and a strong market position which will enable us to deliver high returns and generate strong cash flow as markets improve.”

He added: “We saw an encouraging performance in Private Banking, which continued to attract strong net new assets with a particularly strong performance from Asia Pacific, where we saw annualized growth of over 20%. This underscores the trust clients have in Credit Suisse. Revenues have remained relatively subdued and this business is near a cyclical low characterized by the low interest rate environment and further impacted by low levels of client activity. However, we believe the prospects for growth remain very attractive and our Private Bank is poised to capitalize as markets improve thanks to our disciplined investment in our global platform. In Switzerland, our Corporate & Institutional Clients business, which is an important provider of financing and services to the Swiss economy, achieved another strong result and maintained a strong pre-tax profit margin.”

With regard to Investment Banking, he said: “We are encouraged by our continued momentum in gaining market share. Fixed income and our underwriting and advisory businesses achieved a solid performance reflecting our improving competitive position. In equities the performance of our client-focused business was in line with industry volume. Equities has also shown lower overall revenue volatility year to date than the industry, underscoring our continued strong client-focused market positions.”

On the performance of Asset Management, he said “We are pleased with the strategic progress, the solid result and the strong net asset inflows. The announced acquisition of a noncontrolling interest in York Capital Management is an important next step in the continuing implementation of a strategy focused on high margin, capital-efficient businesses capable of leveraging our global platform.”

He concluded: “Our results for the first nine months, with a return on equity of 15.9%, underscore that our business model is able to produce strong returns over the cycle. We anticipated much of the regulatory change, both in terms of capital requirements and the new cross-border regime. This means that we are well placed to meet these new requirements and at the same time compete and deliver attractive returns to our shareholders.”

1) Core Results include the results of the three segments, the Corporate Center and discontinued operations, but do not include noncontrolling interests without significant economic interest.

Segment Results

Private Banking

Private Banking, which comprises the Wealth Management Clients and Corporate & Institutional Clients businesses, reported income before taxes of CHF 836 million in 3Q10. This included non-credit related provisions from auction rate securities (ARS) of CHF 44 million. While this was a solid result in view of the subdued 3Q10 market environment, characterized by a seasonal slowdown, it was 4% below the 2Q10 level. This reflected a 6% decline in net revenues to CHF 2,826 million, mainly due to lower brokerage fees, while total operating expenses decreased 5%.

The Wealth Management Clients business reported income before taxes of CHF 612 million in 3Q10, down 3% from 2Q10. Net revenues were 5% lower than in 2Q10. Recurring revenues were down 4% reflecting a decrease in net interest income and lower recurring commissions and fees. Transaction-based revenues declined 9%, mainly related to significantly lower brokerage fees and foreign exchange income from client transactions, reflecting the seasonal slowdown and particularly low client activity. The gross margin was 118 basis points, down 2 basis points from 2Q10, reflecting mainly the decrease in net revenues and the 3.4% lower average assets under management. Despite the non-credit related provisions from ARS, operating expenses decreased 5% from reductions across most expense categories, including IT costs and seasonally lower marketing and sales expenses as a major driver.

The Corporate & Institutional Clients business, which is an important provider of financing and services to the Swiss economy, reported income before taxes of CHF 224 million in 3Q10, down 7% from 2Q10. Net revenues declined 7% compared to 2Q10 reflecting a 5% decline in net interest income and 12% lower non-interest income. The decrease in net interest income mainly reflected lower loan margins on slightly lower average volumes and slightly lower deposit margins on stable average volumes. Non-interest income declined to CHF 153 million as fair value losses related to

Clock Finance, a synthetic collateralized loan portfolio, totaled CHF 21 million compared to losses of CHF 1 million in 2Q10. Excluding Clock Finance losses, underlying non-interest income remained stable. Despite the higher number of corporate insolvencies in Switzerland, further net releases of provision for credit losses of CHF 16 million were booked in 3Q10 after releases of CHF 13 million in 2Q10.

Investment Banking

Investment Banking reported income before taxes of CHF 395 million in 3Q10, down 50% compared to 2Q10, as the business was impacted by a decline in client volumes that was exacerbated by a seasonal slowdown. Net revenues of CHF 3,421 million were underpinned by solid fixed income sales and trading as well as underwriting and advisory business despite the challenging market conditions, with market share momentum maintained across most products. Compared to 2Q10, net revenues declined 17%, reflecting a particularly weak July, normal summer seasonality in August and some improvement in September. Investment Banking's results reflected net fair value losses on Credit Suisse debt of CHF 57 million in 3Q10, compared to CHF 62 million in 2Q10. The results were also impacted by debt valuation adjustment (DVA) losses of CHF 172 million in 3Q10 compared to DVA gains of CHF 121 million in 2Q10, relating to structured note liabilities. The pre-tax income margin was 11.5% compared to 19.1% in 2Q10. The pre-tax return on average utilized economic capital was 8.5% in 3Q10, compared to 15.8% in 2Q10.

Fixed income sales and trading results were higher than in the prior quarter, driven by strong revenues in US residential mortgage backed securities (RMBS) trading and credit businesses with solid results in global rates and emerging markets. Equity sales and trading results reflected our client-focused business model which saw continued momentum in market share and was impacted by lower client volume. Underwriting and advisory results were solid and in line with industry-wide capital issuance levels and M&A activity. Debt underwriting revenues were strong, driven by higher industry-wide issuance levels, particularly in high yield while revenues in the equity underwriting and advisory businesses reflected continued weakness in equity issuance levels and completed M&A volumes compared to historical levels.

Compensation and benefits of CHF 1,872 million in 3Q10 were lower than 2Q10, primarily reflecting the foreign exchange translation impact. In US dollars, compensation and benefits increased slightly compared to 2Q10, reflecting a small increase in performance-related compensation and benefits largely offset by a decrease in social security taxes on share award deliveries. Total other operating expenses decreased 9% from 2Q10, primarily reflecting the foreign currency translation impact, a slight decrease in commission expenses and a decrease in general and administrative expenses across most expense categories.

Risk-weighted assets of USD 151 billion as of the end of 3Q10 rose from USD 142 billion in 2Q10, primarily related to higher lending commitments in leveraged finance and corporate banking, the foreign exchange translation impact on the operational risk component and increase in other client-related risk-weighted asset usage. Average one-day, 99% Value at Risk was CHF 118 million in 3Q10, compared to CHF 117 million in 2Q10.

Asset Management

Asset Management reported income before taxes of CHF 135 million in 3Q10 compared to CHF 22 million in 2Q10, with net revenues of CHF 582 million compared to CHF 502 million in 2Q10, primarily reflecting higher investment-related gains and increased fee-based revenues partially offset by lower income from equity participations and 2Q10 gains of CHF 36 million from the sale of securities purchased from Credit Suisse money market funds. Net revenues before investment-related gains and securities purchased from Credit Suisse money market funds were up 2%. The increase in fee-based revenues was driven by higher performance fees and carried interest, partially offset by lower asset management and placement, transaction and other fees.

Income from equity participations declined, reflecting a loss from the reduction in our ownership interest in Aberdeen to 21.0% from 21.9% due to an issuance of shares by Aberdeen. Total operating expenses were down 7% reflecting a decrease in compensation and benefits and lower commission expenses.

In 3Q10, Asset Management agreed to acquire a significant noncontrolling interest in York Capital Management (York), a leading global event-driven hedge fund manager, with the transaction expected to close in the fourth quarter of 2010. In addition, Asset Management expects to enter into arrangements to provide distribution services to York funds on a non-exclusive basis. The acquisition was part of the implementation of Credit Suisse's strategy to focus on higher margin, capital-efficient businesses able to leverage our global platform.

Segment Results in CHF million

Net New Assets

Private Banking recorded strong net new assets of CHF 12.6 billion in 3Q10. Wealth Management Clients contributed net new assets of CHF 12.4 billion benefiting from substantial inflows in the international businesses, including strong contributions from emerging markets. The annualized quarterly growth rate in net new assets in Wealth Management Clients was 6.2% in 3Q10. Corporate & Institutional Clients acquired net new assets of CHF 0.2 billion.

Asset Management reported net new assets of CHF 3.6 billion including net inflows of CHF 5.2 billion in alternative investments, primarily in real estate & commodities, emerging markets, exchange traded funds (ETFs) and index strategies, and outflows of CHF 1.5 billion in traditional investments, as outflows in the Swiss advisory business and fixed income & equities were partially offset by inflows in multi-asset class solutions.

The Group's total assets under management were CHF 1,251.2 billion as of the end of 3Q10, up 0.7% from the end of 2Q10, primarily reflecting positive market performance and net new assets in Private Banking and Asset Management, partially offset by adverse foreign exchange-related movements.

Benefits of the integrated bank

Credit Suisse generated CHF 1.0 billion in collaboration revenues from the integrated bank in 3Q10 compared to CHF 1.2 billion in 2Q10, bringing the total in 9M10 to CHF 3.2 billion.

Capital position

Credit Suisse's capital position remains very strong. The tier 1 ratio was 16.7% as of the end of 3Q10, compared to 16.3% as of the end of 2Q10.

First nine months of 2010

Credit Suisse Group reported net income of CHF 4,257 million in 9M10, compared to CHF 5,931 million in the prior-year period. Core net revenues were CHF 23,665 million compared to CHF 27,084 million in the prior-year period. The return on equity was 15.9% and diluted earnings per share were CHF 3.29. Total net new assets were CHF 55.1 billion.

**Nine Months
in CHF billion**

		9M10	9M09	% change
Financial Highlights	Net income attributable to shareholders	4,257	5,931	(28)
	Diluted earnings per share (CHF)	3.29	4.59	(28)

Cautionary statement regarding forward-looking information and non-GAAP information

This press release contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
 - our future economic performance or prospects;
-

- the potential effect on our future performance of certain contingencies; and
 - assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
 - market and interest rate fluctuations;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of a continued US or global economic downturn in 2010 and beyond;
 - the direct and indirect impacts of continuing deterioration of subprime and other real estate markets;
- further adverse rating actions by credit rating agencies in respect of structured credit products or other credit-related exposures or of monoline insurers;
 - the ability of counterparties to meet their obligations to us;
 - the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
 - political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
 - operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
 - the effects of changes in laws, regulations or accounting policies or practices;
 - competition in geographic and business areas in which we conduct our operations;
 - the ability to retain and recruit qualified personnel;
 - the ability to maintain our reputation and promote our brand;
 - the ability to increase market share and control expenses;
 - technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
 - the adverse resolution of litigation and other contingencies;
 - the ability to achieve our cost efficiency goals and other cost targets; and
 - our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, as well as the information set forth in our Annual Report 2009 under IX – Additional information – Risk Factors.

This press release contains non-GAAP financial information. Information needed to reconcile such non-GAAP financial information to the most directly comparable measures under GAAP can be found in the Credit Suisse Financial Release 3Q10.

Cautionary statement regarding forward-looking and non-GAAP information

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve inherent risks and uncertainties, and we might not be able to achieve the predictions, forecasts, projections and other outcomes we describe or imply in forward-looking statements.

A number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions we express in these forward-looking statements, including those we identify in "Risk Factors" in our Annual Report on Form 20-F for the fiscal year ended December 31, 2009 filed with the US Securities and Exchange Commission, and in other public filings and press releases. We do not intend to update these forward-looking statements except as may be required by applicable laws.

This presentation contains non-GAAP financial information. Information needed to reconcile such non-GAAP financial information to the most directly comparable measures under GAAP can be found in Credit Suisse Group's third quarter report 2010.

strong results

Third Quarter 2010 Results

Slide 11

Investment Banking results impacted by weaker client trading volumes, exacerbated by seasonality

§ Results reflect a particularly weak July, normal summer seasonality in August and some improvement in September

§ Solid fixed income sales and trading results driven by strong results in US RMBS trading and Credit businesses; solid contribution from Rates and Emerging Markets

§ Equity sales and trading results impacted by lower industry-wide volumes in Cash Equities, seasonal decline in Prime Services and weaker client flows in Derivatives compared with a particularly strong 2Q10

§ Solid underwriting and advisory performance in light of muted activity levels; continued strong pipeline; capital markets trends showed improvement in September

Client-focused model evident from revenue mix and lower daily revenue volatility

§ Successful client-focused strategy resulting in 89% contribution from direct client revenues

§ Indirect client revenues and arbitrage trading constitute 9% and 2% of total Investment Banking net revenues, respectively

Contribution to Investment Banking net revenues (9M10)

1) Direct client revenues consist primarily of fees and commissions, gains and losses from matching of client trades and revenues from client financing activities

2) Indirect client revenues consist of gains, losses and financing on inventory positions held for market making activities

Credit Suisse 9M10 daily revenue distribution

§ As in previous quarters, 3Q10 daily revenue distribution was generally tightly concentrated

- No outsized daily gains or losses
- Only one loss day in 3Q10 and three loss days YTD, each smaller than CHF (25)m

derivatives to central counterparties clearing
Third Quarter 2010 Results
Slide 26
Background on CHF 50 to CHF 70 bn RWA mitigation impact

§ Starting point: CHF 27.5 bn core tier 1 capital (excl. hybrids)

Assumptions underlying the capital projections

1) Bloomberg consensus to 2012. Kept constant for 2013. Net income shown is not endorsed or verified and is used solely for illustrative purposes. Actual net income may differ significantly.

2) Primarily for residual deferred tax assets, pension plan adjustments, and participations in financial institutions

Common Equity Capital Ratio

§ Net income based on market expectations¹); assumes dividend payout ratio of 30%

§ Based on Basel 3 RWA of CHF 340 bn (net of mitigation)

§ 5% organic RWA growth p.a. to 2012 to CHF 375 bn; kept constant thereafter (i.e. in line with constant net income)

§ Net income kept constant from 2013 level¹); dividend payout ratio of 30%

§ Regulatory deductions to capital of approx. CHF 6 bn²) phased-in from 2014 to 2018 on a straight-line basis

§ Deferred tax assets on net operating losses to be utilized by 2014 (only 50% utilized in "stressed scenario")

§ Partial phase-out of "Claudius" notes by 2019

Basel 2 in 3Q10

Retained earnings

Would be still over 10% under a "stressed scenario" with 50% lower net income

Third Quarter 2010 Results

Slide 27

Capital simulation under Basel 3 (for illustrative purposes only)

Views on the viability of the contingent convertible market

Who

Why

- § Traditional holders of bank capital notes will seek to replace holdings as they are being called or mature
- § Sovereign Wealth Funds and other funds will seek opportunities to invest in new asset classes - especially as high-trigger CoCo mimics their deep-value investment thesis
- § Superior economic value, higher yield and 'out-of-the-money' conversion may be viewed as an attractive investment proposition also for more traditional investor groups
- § In a continued low interest rates environment, there is significant institutional and retail investor appetite for higher-yielding assets
 - § Substantial current inventory of bank capital notes that will be called or mature
 - Current Tier 1 and Tier 2 capital market outstanding estimated at EUR 450 bn
 - § CoCo structure arguably a superior value to investors compared to a traditional bankruptcy / liquidation scenario
- § Substantial 'out-of-the-money' conversion, especially on low-trigger CoCo, should allow for participation of traditional fixed income investor groups

Note: source Dealogic

Third Quarter 2010 Results

Slide 28

High trigger:

§ 3% of RWA requirement; 7% tier 1 trigger point

§ May replace existing hybrid capital

Note: Based on CHF 340 bn of Basel 3 risk-weighted assets 1) Inflated due to sizable issuance volumes in 2008; would be around 500 bps otherwise

500 bps

350 bps

Indicative spreads

to senior debt:

192

20

10

34

Senior long term debt:

§ Larger CoCo & equity balances imply a reduced requirement to fund via senior bond markets

§ Spreads on senior bonds may price tighter, as the risk-profile of the issuer improves and the theoretical liquidation value increases

3.3

11.5

2.0

130

128

Low trigger:

§ 6% of RWA requirement; 5% tier 1 trigger point

§ May replace existing Tier 2 capital

28

Third Quarter 2010 Results

Slide 29

11.0

100 bps

CoCo:

§ CoCo structures (and excess equity) to fully substitute current
subordinated capital bonds

§ While the total amount of regulatory capital will increase, the average
"unit price" may come down, depending on spread assumptions
Changes in the capital structure (for illustrative purposes only)

Slide 39

Commercial mortgage exposure reduction in Investment Banking

Developed market lending

§ Corporate loan portfolio 78% is investment grade, and is mostly (91%) accounted for on a fair value basis

§ Fair value is a forward looking view which balances accounting risks, matching treatment of loans and hedges

§ Loans are carried at an average mark of approx. 99% with average mark of 96% in non-investment grade portfolio

§ Continuing good performance of individual credits: limited specific provisions during the quarter

Unfunded
commitments

Loans

Hedges

CHF bn

Emerging market lending

§ Well-diversified by name and evenly spread between EMEA, Americas and Asia and approx. 30% accounted for on a fair value basis

§ Emerging market loans are carried at an average mark of approx. 97%

§ No significant provisions during the quarter

Note: Average mark data is net of fair value discounts and credit provisions

Third Quarter 2010 Results

Slide 41

Wealth Management Clients: CHF 132 bn

§ Portfolio remains geared towards mortgages (CHF 90 bn) and securities-backed lending (CHF 35 bn) with conservative lending standards

§ Residential real-estate: Prices for real-estate increase in most regions, especially in Zurich, lake Geneva region and major tourist spots, slightly declining in structurally weaker regions; outlook: flat with risk of some price falls only conceivable in the Lake Geneva region and certain tourist regions

Corporate & Institutional Clients: CHF 50 bn

§ Over 67% collateralized by mortgages and securities

§ Counterparties mainly Swiss corporates incl. real-estate industry

§ Sound credit quality with relatively low concentrations;

§ Stabilization of portfolio quality in line with continued recovery of Swiss economy

§ Ship finance portfolio (CHF 6 bn) remains under special focus due to increased risk level caused by overcapacity in the market

§ Commercial real-estate: Prices slightly increase for office space, prices for retail space move sideways; outlook negative for both office and retail space due to a slack/ decrease in demand coupled with still growing floorspace; central and prime locations less affected by this decline in prices
