SECURITIES AND EXCHANGE COMMISSION
Washington D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2019

OR
TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to .

Commission File Number: 001-33554

PROS HOLDINGS, INC.
(Exact name of registrant as specified in its charter)

Delaware 76-0168604
(State of Incorporation) (I.R.S. Employer Identification No.)

3100 Main Street, Suite 900 77002
Houston TX
(Address of Principal Executive Offices) (Zip Code)
(713) 335-5151
(Registrant's telephone number, including area code)

(Former Name, Former Address and Former Fiscal Year, if changed Since Last Report)

Indicate by check mark whether registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer Accelerated Filer

Edgar Filing: PROS Holdings, Inc. - Form 10-Q

Non-Accelerated Filer (do not check if a smaller reporting company) Smaller Reporting Company
Emerging Growth Company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of the registrant's Common Stock, \$0.001 par value, was 37,872,836 as of April 22, 2019.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended ("Exchange Act"). Forward-looking statements relate to future events or our future financial performance. These forward-looking statements regarding future events and our future results are based on current expectations, estimates, forecasts and projections, and the beliefs and assumptions of our management including, without limitation, our expectations regarding the following: our ability to execute on our revenue strategy shift to cloud-first, the license and subscription revenues generated by our software products and services; the impact of our revenue recognition policies; our belief that our current assets, including cash, cash equivalents, short-term investments, and expected cash flows from operating activities, will be sufficient to fund our operations; our belief that we will successfully integrate our acquisitions; our anticipated additions to property, plant and equipment; our belief that our facilities are suitable and adequate to meet our current operating needs; and our belief that we do not have any material exposure to changes in the fair value of our investment portfolio as a result of changes in foreign currency exchange rates or interest rates. Words such as, but not limited to, "we expect," "anticipate," "target," "project," "believe," "goals," "estimate," "potential," "predict," "may," "might," "could," "would," "intend," and various types of words and similar expressions are intended to identify these forward-looking statements.

Table of Contents

PROS Holdings, Inc.
Notes to Condensed Consolidated Financial Statements
(Unaudited)

1. Organization and Nature of Operations

PROS Holdings, Inc., a Delaware corporation, through its operating subsidiaries (collectively, the "Company"), provides artificial intelligence ("AI") solutions that power commerce in the digital economy by providing fast, frictionless and personalized buying experiences. PROS solutions enable dynamic buying experiences for both business-to-business ("B2B") and business-to-consumer ("B2C") companies across industry verticals. Companies can use the Company's dynamic pricing optimization, sales effectiveness, revenue management and commerce solutions to assess their market environments in real time to deliver customized prices and offers. The Company's solutions enable buyers to move fluidly across its customers' direct sales, online, mobile and partner channels with personalized experiences regardless of which channel those customers choose. The Company's decades of data science and AI expertise are infused into its solutions and are designed to reduce time and complexity through actionable intelligence. The Company provides standard configurations of its software based on the industries it serves and offers professional services to configure these solutions to meet the specific needs of each customer.

2. Summary of Significant Accounting Policies

The accompanying unaudited condensed consolidated financial statements reflect the application of significant accounting policies as described below and elsewhere in these notes to the unaudited condensed consolidated financial statements.

Basis of presentation

The accompanying unaudited condensed consolidated financial statements of the Company have been prepared in accordance with generally accepted accounting principles in the United States ("GAAP") for interim financial reporting and applicable quarterly reporting regulations of the Securities and Exchange Commission ("SEC"). In management's opinion, the accompanying interim unaudited condensed consolidated financial statements include all adjustments necessary for a fair statement of the financial position of the Company as of March 31, 2019, the results of operations for the three months ended March 31, 2019 and 2018, cash flows for the three months ended March 31, 2019 and 2018, and stockholders' equity for the three months ended March 31, 2019 and 2018.

Certain information and disclosures normally included in the notes to the annual financial statements prepared in accordance with GAAP have been omitted from these interim unaudited condensed consolidated financial statements pursuant to the rules and regulations of the SEC. Accordingly, these unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2018 ("Annual Report") filed with the SEC. The unaudited condensed consolidated balance sheet as of December 31, 2018 was derived from the Company's audited consolidated financial statements but does not include all disclosures required under GAAP.

Changes in accounting policies

The Company has consistently applied these accounting policies to all periods presented in these consolidated financial statements, except for the Company's adoption of certain accounting standards described in more detail under "Recently adopted accounting pronouncements" in this Note 2 below.

Basis of consolidation

The unaudited condensed consolidated financial statements include the accounts of the Company, its wholly owned subsidiaries and a subsidiary where the Company exercises control. All intercompany transactions and balances have been eliminated in consolidation. The functional currency of PROS France SAS ("PROS France") is the euro. The financial statements of this subsidiary are translated into U.S. dollars using period-end rates of exchange for assets and liabilities, historical rates of exchange for equity, and average rates of exchange for the period for revenue and expenses. Translation gains (losses) are recorded in accumulated other comprehensive loss as a component of stockholders' equity.

Dollar amounts

The dollar amounts presented in the tabular data within these footnote disclosures are stated in thousands of dollars, except per share amounts, or as noted within the context of each footnote disclosure.

Table of Contents

Use of estimates

The Company makes estimates and assumptions in the preparation of its unaudited condensed consolidated financial statements, and its estimates and assumptions may affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the unaudited condensed consolidated financial statements, and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from those estimates. The complexity and judgment required in the Company's estimation process, as well as issues related to the assumptions, risks and uncertainties inherent in determining the nature and timing of satisfaction of performance obligations and determining the standalone selling price of performance obligations, affect the amounts of revenue, expenses, unbilled receivables and deferred revenue. Estimates are also used for, but not limited to, receivables, allowance for doubtful accounts, operating lease right-of-use assets and operating lease liabilities, useful lives of assets, depreciation and amortization, income taxes and deferred tax asset valuation, valuation of stock options, other current liabilities and accrued liabilities. Numerous internal and external factors can affect estimates. The critical accounting policies related to estimates and judgments are discussed in the Annual Report under management's discussion and analysis of financial condition and results of operations and are also discussed under Item 2 "Management's discussion and analysis of financial condition and results of operations".

Revenue recognition

The Company derives its revenues primarily from subscription services, professional services, perpetual licensing of its software products and associated software maintenance and support services.

The Company determines revenue recognition through the following steps:

- 1. Identification of the contract, or contracts, with a customer;
- 2. Identification of the performance obligations in the customer contract(s);
- 3. Determination of the transaction price;
- 4. Allocation of the transaction price to each performance obligation in the customer contract(s); and
- 5. Recognition of revenue when, or as, the Company satisfies a performance obligation.

Subscription services revenue

Subscription services primarily include customer access to one or more of the Company's cloud applications and associated customer support. Subscription services revenue is generally recognized ratably over the contractual subscription term, beginning on the date that the Company's subscription service is made available to the customer. The Company's subscription contracts do not provide customers with the right to take possession of the software supporting the service and, as a result, are accounted for as service contracts. The Company's subscription contracts are generally two to five years in length, billed annually in advance, and non-cancelable.

Maintenance and support revenue

Maintenance and support revenue includes post-implementation customer support for on-premise licenses and the right to unspecified software updates and enhancements. The Company recognizes revenue from maintenance and support arrangements ratably over the period in which the services are provided. The Company's maintenance and support contracts are generally one to three years in length, billed annually in advance, and non-cancelable.

License revenue

Licenses to on-premise software provide the customer with a right to use, in the customer's environment, the Company's software as it exists when made available to the customer. License revenue from customer contracts with distinct on-premises licenses is recognized at the point in time when the software is made available to the customer. For customer contracts that contain license and professional services that are not considered distinct, both the license and professional services are determined to be a single performance obligation and the revenue is recognized over time based upon the Company's efforts to satisfy the performance obligation.

Table of Contents

Professional services revenue

Professional services revenue primarily consists of fees for deployment and configuration services, as well as training services. Professional services revenues are generally recognized as the services are rendered for time and material contracts, or on a proportional performance basis for fixed fee contracts. The majority of the Company's professional services contracts are on a fixed fee basis. Training revenues are recognized as the services are rendered.

Significant judgment is required in determining whether professional services contained in a customer subscription services contract are capable of being distinct and are separately identifiable in the customer contract. Professional services determined to be distinct are accounted for as a separate performance obligation and revenue is recognized as the services are performed. If the professional services are not determined to be distinct, the professional services and the subscription services are accounted for as a single performance obligation and revenue is recognized over the contractual term of the subscription beginning on the date that subscription services are made available to the customer.

Customer contracts with multiple performance obligations

A portion of the Company's customer contracts contain multiple performance obligations. Significant judgment is required in determining whether multiple performance obligations contained in a single customer contract are capable of being distinct and are separately identifiable. An obligation determined to be distinct is accounted for as a separate performance obligation and revenue for that separate performance obligation is recognized when, or as, the Company satisfies the performance obligation. If obligations are not determined to be distinct, those obligations are accounted for as a single, combined performance obligation. The transaction price is allocated to each performance obligation on a relative standalone selling price basis.

Leases

The Company determines if an arrangement is a lease at inception. Operating leases are included in operating lease right-of-use ("ROU") assets, current operating lease liabilities and noncurrent operating lease liabilities in the Company's unaudited condensed consolidated balance sheet.

ROU assets represent the Company's right to use an underlying asset over the lease term and lease liabilities represent the Company's obligation to make lease payments arising from the lease. ROU assets and lease liabilities are recognized at the lease commencement date based on the estimated present value of lease payments over the lease term. The Company includes any anticipated lease incentives in the determination of lease liability.

The Company uses its estimated incremental borrowing rate, which is derived from information available at the lease commencement date, in determining the present value of lease payments. The Company gives consideration to its recent debt issuances as well as publicly available data for instruments with similar characteristics when determining its incremental borrowing rates.

The Company's lease terms will include options to extend the lease when it is reasonably certain that the Company will exercise that option. Leases with a term of 12 months or less are not recorded on the Company's unaudited condensed consolidated balance sheet. The Company's lease agreements do not contain any residual value guarantees.

Internal-use software

Costs incurred to develop internal-use software during the development stage are capitalized, stated at cost, and amortized using the straight-line method over the estimated useful lives of the assets. Development stage costs

generally include salaries and personnel costs and third-party contractor expenses associated with internal-use software configuration, coding, installation and testing. For the three months ended March 31, 2019 and 2018, the Company capitalized \$0.8 million and \$1.4 million, respectively, of internal-use software development costs related to cloud-based offerings. Capitalized internal-use software development costs related to cloud-based offerings are amortized using the straight-line method over the useful life of the asset. For the three months ended March 31, 2019 and 2018, the Company amortized \$0.5 million and \$0.2 million, respectively, of capitalized internal-use software development costs. Capitalized software for internal use is included in property and equipment, net in the unaudited condensed consolidated balance sheets. Amortization of capitalized internal-use software development costs, once it commences, is included in cost of subscription and cost of services revenues in the accompanying unaudited condensed consolidated statements of comprehensive income (loss).

Table of Contents

Impairment of long-lived assets

Long-lived assets are reviewed for impairment whenever an event or change in circumstances indicates that the carrying amount of an asset or group of assets may not be recoverable. The impairment review includes comparison of future cash flows expected to be generated by the asset or group of assets with the associated assets' carrying value. If the carrying value of the asset or group of assets exceeds its expected future cash flows (undiscounted and without interest charges), an impairment loss is recognized to the extent that the carrying amount of the asset exceeds its fair value. The Company recorded no impairment charges during the three months ended March 31, 2019 and 2018.

Noncash share-based compensation

The Company measures all share-based payments to its employees based on the grant date fair value of the awards and recognizes expenses in the Company's unaudited consolidated statement of comprehensive income (loss) on a straight-line basis over the periods during which the recipient is required to perform services (generally over the vesting period of the awards). To date, the Company has granted stock options, Restricted Stock Units ("RSUs"), stock settled Stock Appreciation Rights ("SARs") and Market Stock Units ("MSUs"). RSUs include (i) time-based awards, (ii) performance-based awards in which the number of shares that vest are based upon achievement of certain internal performance metrics set by the Company, and (iii) market-based awards in which the number of shares that vest are based upon attainment of target average per share closing price over a requisite trading period. MSUs are performance-based awards in which the number of shares that vest are based upon the Company's relative stockholder return.

The following table presents the number of shares or units outstanding for each award type as of March 31, 2019 and December 31, 2018, respectively, (in thousands):

Award type	March 31, December 31,	
	2019	2018
Restricted stock units (time-based)	1,892	1,969
Restricted stock units (performance-based)	114	—
Restricted stock units (market-based)	215	215
Stock appreciation rights	287	287
Market stock units	267	419

Stock options, time-based RSUs and SARs vest ratably between one and four years. Performance-based RSUs vest on the third anniversary of the grant and the maximum number of shares issuable upon vesting is 200% of the initially granted shares based upon achievement of certain internal performance metrics set by the Company, as defined by each award's plan documents or individual award agreements. Market-based RSUs vest if the average trailing closing price of the Company's common stock meets certain minimum performance hurdles for at least 105 calendar days prior to September 9, 2020, with 25% vesting at \$27, an additional 25% vesting at \$33, and the remaining 50% vesting at \$41. The actual number of MSUs that will be eligible to vest is based on the total stockholder return of the Company relative to the total stockholder return of the Russell 2000 Index ("Index") over their respective performance periods, as defined by each award's plan documents. The Company did not grant any stock options, SARs or MSUs during the three months ended March 31, 2019 or 2018.

The fair value of the time-based and performance-based RSUs is based on the closing price of the Company's stock on the date of grant.

The Company estimates the fair value and the derived service period of the market-based RSUs on the date of grant using a 'Monte Carlo' simulation model. The model requires the use of a number of assumptions including the expected volatility of the Company's stock, its risk-free interest rate and expected dividends. The Company's expected

volatility at the date of grant was based on the historical volatility of the Company over the performance period.

The fair value of the market-based RSUs is expensed over the derived service period for each separate vesting tranche. The derived service period for the vesting tranches of the market-based RSUs ranges between 1.01 and 1.98 years.

The Company estimates the fair value of MSUs on the date of grant using a 'Monte Carlo' simulation model. The determination of fair value of the MSUs is affected by the Company's stock price and a number of assumptions including the expected volatilities of the Company's stock and the Index, its risk-free interest rate and expected dividends. The Company's expected volatility at the date of grant was based on the historical volatilities of the Company and the Index over the performance period.

Table of Contents

Earnings per share

The Company computes basic earnings (loss) per share by dividing net income (loss) attributable to common stockholders by the weighted average number of common shares outstanding. Diluted earnings (loss) per share is computed by dividing net income (loss) attributable to common stockholders by the weighted average number of common shares and dilutive potential common shares then outstanding. Diluted earnings per share reflect the assumed conversion of all dilutive securities, using the treasury stock method. Dilutive potential common shares consist of shares issuable upon the exercise of stock options, shares of unvested restricted stock units, and settlement of stock appreciation rights. When the Company incurs a net loss, the effect of the Company's outstanding stock options, stock appreciation rights and restricted stock units are not included in the calculation of diluted earnings (loss) per share as the effect would be anti-dilutive. Accordingly, basic and diluted net loss per share are identical.

Equity investment

Investments in equity securities of privately held companies without readily determinable fair value, where the Company does not exercise significant influence over the investee, are recorded at cost, less impairment and adjusted for subsequent observable price changes obtained from orderly transactions for identical or similar investments issued by the same investee. Adjustments resulting from impairment, fair value, or observable price changes are accounted for in the unaudited condensed consolidated statements of comprehensive income (loss).

At both March 31, 2019 and December 31, 2018, the Company held \$2.0 million of equity securities in a privately held company. This investment is accounted for at cost, less impairment and adjusted for subsequent observable price changes obtained from orderly transactions for identical or similar investments issued by the same investee. The Company estimates fair value of its equity investment considering available information such as pricing in recent rounds of financing, current cash positions, earnings and cash flow forecasts, recent operational performance and any other readily available market data, which represents level 3 in the fair value hierarchy as defined by Accounting Standard Codification ("ASC") 820, "Fair Value Measurement and Disclosure" ("ASC 820"). As of March 31, 2019 and December 31, 2018, the Company determined there were no other-than-temporary impairments on its equity investment.

Fair value measurement

The Company's financial assets that are included in cash and cash equivalents and that are measured at fair value on a recurring basis consisted of \$248.7 million and \$268.6 million at March 31, 2019 and December 31, 2018, respectively, and were invested in treasury money market funds. The fair value of the treasury money market funds is determined based on quoted market prices, which represents level 1 in the fair value hierarchy as defined by ASC 820.

Trade and other receivables

Trade and other receivables are primarily comprised of trade receivables, net of allowance for doubtful accounts, contract assets and unbilled receivables. The Company records trade accounts receivable for its unconditional rights to consideration arising from the Company's performance under contracts with customers. The Company's standard billing terms are that payment is due upon receipt of invoice, payable generally within thirty to sixty days. The carrying value of such receivables, net of the allowance for doubtful accounts, represents their estimated net realizable value. The Company estimates its allowance for doubtful accounts for specific trade receivable balances based on historical collection trends, the age of outstanding trade receivables, existing economic conditions, and any financial security associated with the receivables.

Contract assets represent conditional rights to consideration that have been recognized as revenue in advance of billing the customer. Unbilled receivables represent unconditional rights to consideration arising from contingent

revenue that have been recognized as revenue in advance of billing the customer.

Deferred costs

Sales commissions earned by the Company's sales representatives are considered incremental and recoverable costs of obtaining a customer contract. Sales commissions are deferred and amortized on a straight-line basis over the period of benefit, which the Company has determined to be five to eight years. The Company determined the period of benefit by taking into consideration its customer contracts, expected renewals of those customer contracts (as the Company currently does not pay an incremental sales commission), the Company's technology and other factors. The Company also defers amounts earned by employees other than sales representatives who earn incentive payments under compensation plans that are also tied to the value

Table of Contents

of customer contracts acquired. Deferred costs were \$18.4 million and \$17.5 million as of March 31, 2019 and December 31, 2018, respectively. Amortization expense for the deferred costs was \$1.1 million and \$0.7 million for the three months ended March 31, 2019 and 2018, respectively.

Deferred implementation costs

The Company capitalizes certain contract fulfillment costs, including personnel and other costs (such as hosting, employee salaries, benefits and payroll taxes), that are associated with arrangements where professional services are not distinct from other undelivered obligations in its customer contracts. The Company analyzes implementation costs and capitalizes those costs that are directly related to customer contracts, that are expected to be recoverable, and that enhance the resources which will be used to satisfy the undelivered performance obligations in those contracts. Deferred implementation costs are amortized ratably over the remaining contract term once the revenue recognition criteria for the respective performance obligation has been met and revenue recognition commences. Deferred implementation costs were \$4.3 million and \$3.9 million as of March 31, 2019 and December 31, 2018, respectively. Amortization expense for the deferred implementation costs was \$0.2 million and \$0.1 million for the three months ended March 31, 2019 and 2018, respectively. Deferred implementation costs are included in prepaid and other current assets and other assets, noncurrent in the unaudited condensed consolidated balance sheets. Amortization of deferred implementation costs is included in cost of subscription and cost of services revenues in the accompanying unaudited condensed consolidated statements of comprehensive income (loss).

Deferred revenue

Deferred revenue primarily consists of customer invoicing in advance of revenues being recognized. The Company generally invoices its customers annually in advance for subscription services and maintenance and support services. Deferred revenue that is anticipated to be recognized during the next twelve-month period is recorded as current deferred revenue and the remaining portion is recorded as long-term.

Credit facility

As of March 31, 2019, the Company had no outstanding borrowings under its \$50.0 million secured Credit Agreement ("Revolver") with the lenders party thereto and Wells Fargo Bank, National Association as agent for the lenders party thereto. The Company included \$0.1 million of unamortized debt issuance costs related to the Revolver in prepaid and other current assets and other assets, noncurrent in the unaudited condensed consolidated balance sheets. For the three months ended March 31, 2019 and 2018, the Company recorded an immaterial amount of amortization of debt issuance cost which is included in other income (expense), net in the unaudited condensed consolidated statements of comprehensive income (loss).

Income taxes

The Company recorded an income tax provision of \$0.2 million and \$0.1 million for the three months ended March 31, 2019 and 2018, respectively, primarily related to foreign income taxes and withholding taxes. The effective tax rate was (1.3)% and (0.7)% for the three months ended March 31, 2019 and 2018, respectively. The income tax rates vary from the federal and state statutory rates primarily due to the valuation allowances on the Company's deferred tax assets and foreign and state taxes not based on income. The Company estimates its annual effective tax rate at the end of each quarterly period. Jurisdictions with a projected loss for the year where no tax benefit can be recognized due to the valuation allowances on the Company's deferred tax assets are excluded from the estimated annual effective tax rate. The impact of such an exclusion could result in a higher or lower effective tax rate during a particular quarter depending on the mix and timing of actual earnings versus annual projections.

Recently adopted accounting pronouncements

In February 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)" ("Topic 842"), which requires the lessee to recognize most leases on the balance sheet thereby resulting in the recognition of right-of-use ("ROU") assets and lease liabilities for those leases currently classified as operating leases. Lessor accounting remains largely unchanged from current guidance, however, Topic 842 provides improvements that are intended to align lessor accounting with the lessee model and with updated revenue recognition guidance. This standard took effect in the first quarter of 2019, including interim periods within that reporting period. The Company adopted Topic 842 as of January 1, 2019 using the modified retrospective method by recognizing the cumulative effect of initially applying the new standard as an adjustment to the opening balances of operating ROU assets and lease liabilities, while prior period amounts are not adjusted and continue to be reported in accordance with the Company's historic accounting under the prior lease accounting rules in ASC 840, "Leases".

Table of Contents

The Company elected the package of practical expedients permitted under the transition guidance within the new Topic 842 standard for all asset classes, which among other things, allowed the Company to carryforward the historical lease classification. The Company also elected the hindsight practical expedient to determine the reasonably certain lease term for existing leases. The Company made an accounting policy election to not recognize leases with an initial term of 12 months or less on the balance sheet and instead would recognize those lease payments on a straight-line basis over the lease term in the unaudited condensed consolidated statement of comprehensive income (loss).

The adoption of the standard had a material impact on the Company's unaudited condensed consolidated balance sheet as a result of the increase of \$26.9 million in assets and liabilities from recognition of ROU assets and lease liabilities. The standard did not have a material impact on the Company's unaudited condensed consolidated statement of comprehensive income (loss).

Recently issued accounting pronouncements not yet adopted

In August 2018, the FASB issued ASU 2018-15, "Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40): Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That is a Service Contract" ("Subtopic 350-40"). The amendment aligns the requirements for capitalizing implementation costs in a cloud computing arrangement service contract with the requirements for capitalizing implementation costs incurred to develop or obtain an internal-use software. The standard is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2019; early adoption is permitted. The Company is currently assessing the impact of Subtopic 350-40 on its unaudited condensed consolidated financial statements.

In January 2017, the FASB issued ASU 2017-04, "Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment" ("Topic 350"), which eliminates step two from the goodwill impairment test. Under the amendments in this standard, an entity should recognize an impairment charge for the amount by which the carrying amount of a reporting unit exceeds its fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. The standard is effective for interim and annual reporting periods beginning after December 15, 2019; earlier adoption is permitted for goodwill impairment tests performed after January 1, 2017. The Company is currently assessing the impact of Topic 350 on its unaudited condensed consolidated financial statements.

With the exception of the new standards discussed above, there have been no other recent accounting pronouncements or changes in accounting pronouncements during the three months ended March 31, 2019, as compared to the recent accounting pronouncements described in the Company's Annual Report, that are of significance or potential significance to the Company.

3. Deferred Revenue and Performance Obligations

Deferred Revenue

For the three months ended March 31, 2019 and 2018, the Company recognized approximately \$38.3 million and \$30.2 million, respectively, in each case of revenue that was included in the deferred revenue balances at the beginning of the respective periods and primarily related to subscription services, maintenance and services.

Performance Obligations

As of March 31, 2019, the Company expects to recognize approximately \$381.2 million of revenue from remaining performance obligations. The Company expects to recognize revenue on approximately \$183.5 million of these

performance obligations over the next 12 months, with the balance recognized thereafter.

4. Disaggregation of Revenue

Revenue by Geography

The geographic information in the table below is presented for the three months ended March 31, 2019 and 2018. The Company categorizes geographic revenues based on the location of the customer's headquarters. Because the Company's contracts are predominately denominated in U.S. dollars, it has limited exposure to foreign currency exchange risk as discussed under "Foreign Currency Exchange Risk" of Part I, Item 3 below.

Table of Contents

	Three Months Ended March 31,					
	2019			2018		
	Revenue	Percent		Revenue	Percent	
United States of America	\$19,780	35 %		\$17,362	36 %	
Europe	17,287	31 %		15,283	32 %	
The rest of the world	19,064	34 %		15,265	32 %	
Total revenue	\$56,131	100 %		\$47,910	100 %	

5. Leases

The Company has operating leases for data centers, computer infrastructure, corporate offices and certain equipment. These leases have remaining lease terms ranging from 1 year to 14 years. Some of these leases include options to extend for up to 15 years, and some include options to terminate within 1 year.

As of March 31, 2019, the Company did not have any finance leases.

The components of operating lease expense were as follows (in thousands):

	Three Months Ended March 31, 2019
Operating lease cost	\$2,249
Variable lease cost	303
Sublease income	(17)
Total lease cost	\$2,535

Supplemental information related to leases was as follows (in thousands):

	Three Months Ended March 31, 2019
Cash paid for amounts included in the measurement of lease liability:	
Operating cash flows from operating leases	\$1,016
Weighted average remaining lease term:	
Operating leases	7.9 years
Weighted average discount rate:	
Operating leases	7.58 %

As of March 31, 2019, maturities of lease liabilities were as follows (in thousands):

Year Ending December 31,	Amount
Remaining 2019	\$5,027
2020	5,166
2021	6,018

2022	4,575
2023	4,590
2024 and thereafter	38,696
Total operating lease payments	64,072
Less: Imputed interest	(23,831)
Less: Anticipated lease incentive	(14,207)
Total operating lease liabilities	\$26,034

Table of Contents

As of March 31, 2019, the Company has additional operating leases of approximately \$1.5 million that have not yet commenced, as the lessor has not made the underlying assets available for use by the Company. These operating leases will commence in fiscal year 2019 with lease terms of 5 years to 14 years.

As of December 31, 2018, the future minimum lease commitments related to lease agreements under Topic 840, the predecessor of Topic 842, were as follows:

Year Ending December 31,	Amount
2019	\$4,164
2020	1,649
2021	5,115
2022	6,181
2023	5,679
2024 and thereafter	57,365
Total minimum lease payments	\$80,153

6. Earnings per Share

The following table sets forth the computation of basic and diluted earnings per share for the three months ended March 31, 2019 and 2018:

(in thousands, except per share data)	Three Months Ended	
	March 31,	
	2019	2018
Numerator:		
Net loss	\$(16,917)	\$(18,856)
Denominator:		
Weighted average shares (basic)	37,623	32,378
Dilutive effect of potential common shares	—	—
Weighted average shares (diluted)	37,623	32,378
Basic loss per share	\$(0.45)	\$(0.58)
Diluted loss per share	\$(0.45)	\$(0.58)

Dilutive potential common shares consist of shares issuable upon the exercise of stock options, settlement of SARs, and the vesting of RSUs and MSUs. Potential common shares determined to be antidilutive and excluded from diluted weighted average shares outstanding were approximately 2.0 million and 2.1 million for the three months ended March 31, 2019 and 2018, respectively.

Since the Company has the intention and ability to settle the principal amount of its Notes (as defined in Note 8 below) in cash, the treasury stock method is expected to be used for calculating any potential dilutive effect of the conversion spread on diluted net income per share, if applicable. The conversion spread will have a dilutive impact on diluted net income per share of common stock when the average market price of common stock for a given period exceeds the conversion price of \$33.79 and \$48.63 per share, for the 2019 Notes (as defined in Note 8 below) and 2047 Notes (as defined in Note 8 below), respectively.

7. Noncash Share-based Compensation

During the three months ended March 31, 2019, the Company granted 735,816 RSUs (time-based) with a weighted average grant-date fair value of \$33.13 per share. The Company also granted 113,919 performance-based RSUs

("PRsUs") with a weighted average grant-date fair value of \$33.05 to certain executive employees during the three months ended March 31, 2019. These PRsUs vest on January 15, 2022 and the actual number of PRsUs that will be eligible to vest is based upon achievement of certain internal performance metrics, as defined by each award's plan documents or individual award agreements. The maximum number of shares issuable upon vesting is 200% of the PRsUs initially granted. The Company did not grant any stock options, SARs or MSUs during the three months ended March 31, 2019.

Table of Contents

Share-based compensation expense is allocated to expense categories on the unaudited condensed consolidated statements of comprehensive income (loss). The following table summarizes share-based compensation expense included in the Company's unaudited condensed consolidated statements of comprehensive income (loss) for the three months ended March 31, 2019 and 2018:

	Three Months Ended March 31,	
	2019	2018
Share-based compensation:		
Cost of revenue	\$538	\$482
Operating expenses:		
Selling and marketing	1,400	1,284
General and administrative	2,812	2,879
Research and development	1,296	1,291
Total included in operating expenses	5,508	5,454
Total share-based compensation expense	\$6,046	\$5,936

The Company's 2017 Equity Incentive Plan ("2017 Stock Plan") was approved by stockholders in May 2017 and reserved an aggregate amount of 2,500,000 shares for issuance. As of March 31, 2019, 466,600 shares remain available for issuance under the 2017 Stock Plan.

At March 31, 2019, the Company had an estimated \$57.6 million of total unrecognized compensation costs related to share-based compensation arrangements. These costs will be recognized over a weighted average period of 2.8 years.

The Company's Employee Stock Purchase Plan ("ESPP") provides for eligible employees to purchase shares on an after-tax basis in an amount between 1% and 10% of their annual pay: (i) on June 30 of each year at a 15% discount of the fair market value of the Company's common stock on January 1 or June 30, whichever is lower, and (ii) on December 31 of each year at a 15% discount of the fair market value of the Company's common stock on July 1 or December 31, whichever is lower. An employee may not purchase more than \$5,000 in either of the six-month measurement periods described above or more than \$10,000 annually. During the three months ended March 31, 2019, the Company issued 35,340 shares, respectively, under the ESPP. As of March 31, 2019, 180,215 shares remain authorized and available for issuance under the ESPP. As of March 31, 2019, the Company held approximately \$0.6 million on behalf of employees for future purchases under the ESPP, and this amount was recorded in accrued payroll and other employee benefits in the Company's unaudited condensed consolidated balance sheet.

8. Convertible Senior Notes

The following is a summary of our convertible senior notes as of March 31, 2019 (in thousands):

	Date of Issuance	Unpaid Principal Balance	Net Carrying Amount		Contractual Interest Rates
			Current	Noncurrent	
2% Convertible Senior Note due in 2019 ("2019 Notes")	December 2014	\$143,750	\$138,442	—	2%
2% Convertible Senior Notes due in 2047 ("2047 Notes")	June 2017	\$106,250	—	\$89,854	2%

The 2019 Notes and 2047 Notes (collectively, the "Notes") are general unsecured obligations and rank senior in right of payment to all of the Company's indebtedness that is expressly subordinated in right of payment to the Notes, rank equally in right of payment with all of the Company's existing and future liabilities that are not so subordinated, are

effectively junior to any of the Company's secured indebtedness to the extent of the value of the assets securing such indebtedness and are structurally subordinated to all indebtedness and other liabilities (including trade payables but excluding intercompany obligations owed to the Company or its subsidiaries). As of March 31, 2019, the Notes are not yet convertible.

As of March 31, 2019, the remaining life of the 2019 Notes and the 2047 Notes is approximately 8 months and 38 months, respectively.

As of March 31, 2019 and December 31, 2018, the fair value of the principal amount of the Notes was \$298.2 million and \$251.5 million, respectively. The estimated fair value was determined based on inputs that are observable in the market or

Table of Contents

that could be derived from, or corroborated with, observable market data, including the Company's stock price and interest rates, which represents level 2 in the fair value hierarchy.

In accounting for the transaction costs for each of the Notes issuance, the Company allocated the costs incurred to the liability and equity components in proportion to the allocation of the proceeds from issuance to the liability and equity components. Issuance costs attributable to the liability component, totaling \$4.3 million for the 2019 Notes and \$2.7 million for the 2047 Notes, are being amortized to expense over the expected life of each notes using the effective interest method. Issuance costs attributable to the equity component related to the conversion option, totaling \$1.2 million for the 2019 Notes and \$0.3 million for the 2047 Notes, were netted with the equity component in stockholders' equity.

The Notes consist of the following (in thousands):

	March 31, 2019	December 31, 2018
Liability component:		
Principal	\$250,000	\$250,000
Less: debt discount and issuance cost, net of amortization	(21,704)	(24,810)
Net carrying amount	\$228,296	\$225,190
Equity component ⁽¹⁾	\$37,560	\$37,560

Recorded within additional paid-in capital in the consolidated balance sheet. As of March 31, 2019, it included (1) \$28.7 million and \$8.8 million related to the 2019 Notes and the 2047 Notes, respectively, net of \$1.2 million and \$0.3 million issuance cost in equity, respectively.

The following table sets forth total interest expense recognized related to the Notes (in thousands):

	Three Months Ended March 31,	
	2019	2018
2.0% coupon	\$1,250	\$1,250
Amortization of debt issuance costs	365	349
Amortization of debt discount	2,741	2,580
Total	\$4,356	\$4,179

Note Hedge and Warrant Transactions

Concurrently with the offering of the 2019 Notes, the Company entered into separate convertible note hedge (the "Note Hedge") and warrant (the "Warrant") transactions. Taken together, the purchase of the Note Hedge and the sale of the Warrant are intended to offset any actual dilution from the conversion of the 2019 Notes and to effectively increase the overall conversion price of the 2019 Notes from \$33.79 to \$45.48 per share. The total cost of the Note Hedge transaction was \$29.4 million. The Company received \$17.1 million in cash proceeds from the sale of the Warrant.

Pursuant to the Warrant, if the average market value per share of the Company's common stock for the reporting period, as measured under the Warrant, exceeds the strike price of the Warrant, the Warrant will have a dilutive effect on the Company's earnings per share. Holders of the 2019 Notes and Note Hedge will not have any rights with respect to the Warrant, as the Note Hedge is not part of the 2019 Notes or the Warrant. The Warrant is not part of the 2019 Notes or Note Hedge. Both the Note Hedge and Warrant have been accounted for as part of additional paid-in capital.

9. Commitments and Contingencies

Litigation

In the ordinary course of business, the Company regularly becomes involved in contract and other negotiations and, in more limited circumstances, becomes involved in legal proceedings, claims and litigation. The outcomes of these matters are inherently unpredictable. The Company is not currently involved in any outstanding litigation that it believes, individually or in the aggregate, will have a material adverse effect on its business, financial condition, results of operations or cash flows.

Purchase commitments

In the ordinary course of business, the Company enters in various purchase commitments for goods and services.

18

Table of Contents

In March 2019, the Company entered in a noncancelable agreement with a computing infrastructure vendor that amended the existing agreement dated June 2017. The amended agreement expires in March 2022. The purchase commitment as of March 31, 2019 was \$70 million for the remaining period through the expiration of the agreement.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The terms “we,” “us,” “PROS” and “our” refer to PROS Holdings, Inc. and all of its subsidiaries that are consolidated in conformity with generally accepted accounting principles in the United States.

This management's discussion and analysis of financial condition and results of operations should be read along with the unaudited condensed consolidated financial statements and unaudited notes to unaudited condensed consolidated financial statements included in Part I, Item 1 ("Interim Condensed Consolidated Financial Statements (Unaudited)"), as well as the audited consolidated financial statements and notes to consolidated financial statements and management's discussion and analysis of financial condition and results of operations set forth in our Annual Report.

Overview

PROS provides artificial intelligence ("AI") solutions that power commerce in the digital economy by providing fast, frictionless and personalized buying experiences. PROS solutions enable dynamic buying experiences for both B2B and B2C companies across industry verticals. Companies can use our dynamic pricing optimization, sales effectiveness, revenue management and commerce solutions to assess their market environments in real time to deliver customized prices and offers. Our solutions enable buyers to move fluidly across our customers' direct sales, online, mobile and partner channels with personalized experiences regardless of which channel those customers choose. Our decades of data science and AI expertise are infused into our solutions and are designed to reduce time and complexity through actionable intelligence. We provide standard configurations of our software based on the industries we serve and offer professional services to configure these solutions to meet the specific needs of each customer.

Q1 2019 Financial Overview

In the first quarter of 2019, subscription revenue increased 45% for the three months ended March 31, 2019, as compared to the same period in 2018. Our continuing shift to a subscription-based revenue model also led to a growth of recurring revenue (which consists of subscription revenue and maintenance and support revenue) of 22% as compared to the first three months of 2018, and accounted for 81% of total revenue for the three months ended March 31, 2019.

Cash used in operating activities was \$8.1 million for the three months ended March 31, 2019, as compared to \$4.7 million for the three months ended March 31, 2018. The increase in net cash used in operating activities was primarily attributable to changes in working capital partially offset by an improvement in our operating results.

Free cash flow is another key metric to assess the strength of our business. We define free cash flow, a non-GAAP financial measure, as net cash provided by (used in) operating activities minus capital expenditures (excluding expenditures for our new headquarters), purchases of other (non-acquisition-related) intangible assets and capitalized internal-use software development costs. We believe free cash flow may be useful to investors and other users of our financial information in evaluating the amount of cash generated by our business operations. Free cash flow used during the three months ended March 31, 2019 increased to \$9.6 million, compared to \$6.8 million for the three months ended March 31, 2018. The increase was primarily attributable to a \$3.4 million increase in net cash used in operating activities primarily due to the net impact of working capital changes partially offset by improvement in our operating results. The following is a reconciliation of free cash flow to the most comparable GAAP measure, net cash used in operating activities (in thousands):

Three Months
Ended March 31,

Edgar Filing: PROS Holdings, Inc. - Form 10-Q

	2019	2018
Net cash used in operating activities	\$(8,095)	\$(4,732)
Purchase of property and equipment	(611)	(778)
Purchase of intangible assets	(50)	—
Capitalized internal-use software development costs	(868)	(1,316)
Free Cash Flow	\$(9,624)	\$(6,826)

Total deferred revenue was \$128.8 million as of March 31, 2019, as compared to \$117.2 million as of December 31, 2018, an increase of \$11.6 million, or 10%, primarily due to an increase in subscription deferred revenue.

Table of Contents

Factors Affecting Our Performance

Key factors and trends that have affected and we believe will continue to affect our operating results include:

Buying Preferences Driving Technology Adoption. Buyers are increasingly demanding the same type of digital buying experience that they enjoy as consumers. For example, buyers increasingly prefer to buy online when they have already decided what to buy, and often prefer not to interact with a sales representative as their primary source of research. In response, we believe that businesses are increasingly looking to modernize their sales process to compete in digital commerce by adopting technologies which provide fast, frictionless, and personalized buying experiences across sales channels. We believe we are uniquely positioned to help power these buying experiences with our AI-powered solutions that enable buyers to move fluidly across our customers' direct sales, online, mobile and partner channels and have personalized experiences however they choose to buy.

Continued Investments. We are focused on creating awareness for our solutions, expanding our customer base and growing our recurring revenues. While we incurred losses in the first quarter of 2019, we believe our market is large and underpenetrated and therefore we intend to continue investing to expand our ability to sell and renew our subscription offerings globally through investments in sales, marketing, customer success, cloud support, security, privacy, infrastructure and other long-term initiatives. We also plan to continue to invest in product development to enhance our existing technologies and develop new applications and technologies.

Cloud Migrations. We expect that over time, additional sales of our cloud-based solutions will result in a decrease in our maintenance and support revenue, particularly as existing customers continue to migrate from our licensed solutions to our cloud solutions.

Sales Mix Impacts Subscription Revenue Recognition Timing. The mix of subscription services and professional services can create revenue variability in given periods based on the nature and scope of services sold together. Professional services that are deemed to be distinct from the subscription services are accounted for as a separate performance obligation and revenue is recognized as the services are performed. If determined that the professional services are not considered distinct, the professional services and the subscription services are determined to be a single performance obligation and all revenue is recognized over the contractual term of the subscription beginning on the date that subscription services are made available to the customer, resulting in a deferral of revenue and revenue recognized over a shorter period of time, which would have a negative near-term financial impact.

Table of Contents

Results of Operations

The following table sets forth certain items in our unaudited condensed consolidated statements of comprehensive income (loss) as a percentage of total revenues for the three months ended March 31, 2019 and 2018:

	Three Months Ended March 31,			
	2019	2018		
Revenue:				
Subscription	54 %	44 %		
Maintenance and support	27	35		
Total subscription, maintenance and support	81	78		
License	1	2		
Services	18	19		
Total revenue	100	100		
Cost of revenue:				
Subscription	17	18		
Maintenance and support	5	6		
Total cost of subscription, maintenance and support	22	24		
License	—	—		
Services	15	16		
Total cost of revenue	37	41		
Gross profit	63	59		
Operating Expenses:				
Selling and marketing	38	37		
General and administrative	21	22		
Research and development	28	31		
Acquisition-related	—	—		
Total operating expenses	87	90		
Convertible debt interest and amortization	(8)	(9)		
Other income net	2	—		
Loss before income tax provision	(30)	(39)		
Income tax provision	—	—		
Net loss	(30)%	(39)%		

Revenue:

	Three Months Ended March 31,		Variance	
(Dollars in thousands)	2019	2018	\$	%
Subscription	\$30,415	\$20,950	\$9,465	45 %
Maintenance and support	15,327	16,574	(1,247)	(8)%
Total subscription, maintenance and support	45,742	37,524	8,218	22 %
License	506	1,066	(560)	(53)%
Services	9,883	9,320	563	6 %
Total revenue	\$56,131	\$47,910	\$8,221	17 %

Subscription revenue. Subscription revenue increased primarily due to an increase in the number of customer subscriptions as compared to the prior year. We continued to invest in customer programs and initiatives which helped keep our customer attrition rate fairly consistent as compared to the prior year. Our ability to maintain consistent

customer attrition rates will play a role in our ability to continue to grow our subscription revenue.

Table of Contents

Maintenance and support revenue. The decrease in maintenance and support revenue was principally a result of customer maintenance churn and migrating existing maintenance contracts to the cloud during the three months ended March 31, 2019. We expect maintenance revenue to continue to decline over time as we sell fewer licenses and related maintenance and support, sell more subscription services and migrate existing maintenance customers to our cloud solutions.

License revenue. License revenue decreased primarily due to a smaller number of customers licensing our software as a result of our strategy to sell fewer licenses and more subscription services and due to the completion of several perpetual license projects which were recognized over time based upon our efforts to satisfy the performance obligation.

Services revenue. Services revenue increased primarily as a result of add-on professional services revenue from existing customers during the three months ended March 31, 2019, as compared to the same period in 2018. Services revenue varies from period to period depending on different factors, including the level of professional services required to implement our solutions, the timing of services revenue recognition on certain subscription contracts and any additional professional services requested by our customers during a particular period.

Cost of revenue and gross profit:

(Dollars in thousands)	Three Months Ended March 31,		Variance	
	2019	2018	\$	%
Cost of subscription	\$9,725	\$8,764	\$961	11 %
Cost of maintenance and support	2,802	2,957	(155)	(5)%
Total cost of subscription, maintenance and support	12,527	11,721	806	7 %
Cost of license	61	73	(12)	(16)%
Cost of services	8,202	7,727	475	6 %
Total cost of revenue	20,790	19,521	1,269	7 %
Gross profit	\$35,341	\$28,389	\$6,952	24 %

Cost of subscription. The increase was primarily attributable to an increase in infrastructure costs to support our current and anticipated subscription customer base. Our subscription gross profit percentage was 68% and 58%, respectively, for the three months ended March 31, 2019 and 2018.

Cost of maintenance and support. The decrease was primarily attributable to a decrease in personnel costs.

Maintenance and support gross profit percentage for both the three months ended March 31, 2019 and 2018 was 82%.

Cost of license. Cost of license consists of third-party fees for licensed software and remained relatively consistent year-over-year. License gross profit percentages for the three months ended March 31, 2019 and 2018, were 88% and 93%, respectively.

Cost of services. The increase was primarily attributable to an increase in travel expenses related to our customer implementations and other facility and overhead expenses. Services gross profit percentage for both the three months ended March 31, 2019 and 2018, was 17%. Services gross profit percentages vary period to period depending on different factors, including the level of professional services required to implement our solutions, our effective man-day rates and the utilization of our professional services personnel. We plan to continue to add additional employees in our professional services organization to support our anticipated growth in the number of customers purchasing our subscription services.

Gross profit. The increase in overall gross profit for the three months ended March 31, 2019 was primarily attributable to an increase in total revenue of 17% as compared to the same period in 2018 mainly due to increase in our

subscription revenue.

23

Table of Contents

Operating expenses:

(Dollars in thousands)	Three Months Ended March 31,		Variance	
	2019	2018	\$	%
Selling and marketing	\$21,485	\$17,568	\$3,917	22 %
General and administrative	11,667	10,689	978	9 %
Research and development	15,799	14,784	1,015	7 %
Acquisition-related	—	95	(95)	(100)%
Total operating expenses	\$48,951	\$43,136	\$5,815	13 %

Selling and marketing expenses. The increase was primarily attributable to a \$2.9 million increase in personnel cost primarily due to higher headcount as we continue to focus on adding new customers and increasing penetration within our existing customer base. In addition, there was an increase of \$1.0 million in non-personnel cost, which included \$0.5 million for sales and marketing events and an increase of \$0.5 million in travel expenses.

General and administrative expenses. The increase was primarily attributable to an increase in non-personnel cost mainly related to professional fees and facility expenses.

Research and development expenses. The increase was primarily attributable to an increase of \$0.6 million in non-personnel cost mainly related to facility and other overhead expenses. In addition, there was an increase in personnel cost of \$0.4 million primarily due to an increase in contract labor.

Acquisition-related expenses. Acquisition-related expenses were zero and \$0.1 million for the three months ended March 31, 2019 and 2018, respectively. Acquisition-related expenses consisted primarily of integration costs, retention bonuses and professional fees related to our acquisition of PROS Travel Commerce, Inc. (formerly Vayant Travel Technologies, Inc.).

Other income, net:

(Dollars in thousands)	Three Months Ended March 31,		Variance	
	2019	2018	\$	%
Convertible debt interest and amortization	\$(4,356)	\$(4,179)	\$(177)	4 %
Other income, net	\$1,271	\$202	\$1,069	529%

Convertible debt interest and amortization. The convertible debt expense for the three months ended March 31, 2019 and 2018 related to coupon interest and amortization of debt discount and issuance costs attributable to our Notes.

Other income, net. Other income, net increased by \$1.1 million for the three months ended March 31, 2019, primarily due to an increase in interest income.

Income tax provision:

(Dollars in thousands)	Three Months Ended March 31,		Variance	
	2019	2018	\$	%
Effective tax rate	(1.3)%	(0.7)%	n/a	n/a
Income tax provision	\$222	\$132	\$90	68 %

Income tax provision. The tax provision for the three months ended March 31, 2019 included both foreign income and withholding taxes. No tax benefit was recognized on jurisdictions with a projected loss for the year due to the

valuation allowances on our deferred tax assets.

Our effective tax rate was (1.3)% and (0.7)% for the three months ended March 31, 2019 and 2018, respectively. The income tax rate varies from the 21% federal statutory rate primarily due to the valuation allowances on our deferred tax assets and foreign and state taxes not based on income. While our expected tax rate would be 0% due to the full valuation on the deferred tax assets, the (1.3)% and (0.7)% tax rate for the three months ended March 31, 2019 and 2018, respectively, is due to foreign and state taxes not based on pre-tax income.

Table of Contents

Jurisdictions with a projected loss for the year where no tax benefit can be recognized due to the valuation allowances on our deferred tax assets are excluded from the estimated annual federal effective tax rate. The impact of such an exclusion could result in a higher or lower effective tax rate during a particular quarter depending on the mix and timing of actual earnings versus annual projections.

Liquidity and Capital Resources

At March 31, 2019, we had \$272.6 million of cash and cash equivalents and \$41.9 million of working capital as compared to \$295.5 million of cash and cash equivalents and \$71.4 million of working capital at December 31, 2018.

Our principal sources of liquidity are our cash and cash equivalents, cash flows generated from operations and potential borrowings under our Revolver. We issued the 2019 Notes in December 2014, the 2047 Notes in June 2017 and the Secondary Offering in August 2018 to supplement our overall liquidity position. Our material drivers or variants of operating cash flow are net income (loss), noncash expenses (principally share-based compensation, intangible amortization and amortization of debt discount and issuance costs) and the timing of periodic invoicing and cash collections related to licenses, subscriptions and support for our software and related services. Our operating cash flows are also impacted by the timing of payments to our vendors and the payments of our other liabilities. We generally pay our vendors in accordance with the invoice terms and conditions.

We believe our existing cash, cash equivalents, including funds available under our Revolver and our current estimates of future operating cash flows, will provide adequate liquidity and capital resources to meet our operational requirements, anticipated capital expenditures and coupon payments for our Notes for the next twelve months. Our future working capital requirements will depend on many factors, including the operations of our existing business, potential growth of our subscription services, future acquisitions we might undertake, and expansion into complementary businesses. If such need arises, we may raise additional funds through equity or debt financings.

The following table presents key components of our unaudited condensed consolidated statements of cash flows for the three months ended March 31, 2019 and 2018:

(Dollars in thousands)	Three Months Ended	
	March 31,	
	2019	2018
Net cash used in operating activities	\$(8,095)	\$(4,732)
Net cash used in investing activities	(1,529)	(2,094)
Net cash used in financing activities	(13,296)	(5,604)
Cash and cash equivalents (beginning of period)	295,476	160,505
Cash and cash equivalents (end of period)	\$272,636	\$148,146

Operating Activities

Net cash used in operating activities for the three months ended March 31, 2019 was \$8.1 million. The \$3.4 million increase as compared to 2018 was primarily attributable to changes in working capital partially offset by an improvement in our operating results. The working capital change was primarily attributable to an increase in trade and other receivables from increased billings from sales of our subscription services, accrued payroll and other employee benefits due to higher annual incentive payment as compared to prior year partially offset by higher recurring deferred revenue resulting from sales of subscription services.

Investing Activities

Net cash used in investing activities for the three months ended March 31, 2019 was \$1.5 million, which was primarily related to cash outflow of \$0.9 million related to capitalized internal-use software development costs on our subscription service solutions, capital expenditures of \$0.6 million and \$0.1 million for an intangible (non-acquisition) asset.

Financing Activities

Net cash used in financing activities for the three months ended March 31, 2019 was \$13.3 million, which was attributable to \$14.2 million paid for tax withholdings on vesting of employee share-based awards partially offset by proceeds from employee stock plans of \$0.9 million.

Table of Contents

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material. We do not have any relationships with unconsolidated entities or financial partnerships, such as variable interest entities, that would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Contractual Obligations and Commitments

Other than changes described in Note 9 above, there have been no material changes to our contractual obligations and commitments disclosed in our Annual Report.

Credit facility

There were no outstanding borrowings under the Revolver as of March 31, 2019. As of March 31, 2019, we had \$0.1 million of unamortized debt issuance costs related to the Revolver included in prepaids and other current assets and other long-term assets in the unaudited condensed consolidated balance sheets. For the three months ended March 31, 2019 and 2018, we recorded an immaterial amount of amortization of debt issuance cost which is included in other expense, net in the unaudited condensed consolidated statements of comprehensive income (loss).

Recent Accounting Pronouncements

See "Recently adopted accounting pronouncements" in Note 2 above for discussion of recent accounting pronouncements including the respective expected dates of adoption.

Critical accounting policies and estimates

Our consolidated financial statements are prepared in accordance with GAAP. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, costs and expenses, and related disclosures. Actual results could differ from those estimates. The complexity and judgment required in our estimation process, as well as issues related to the assumptions, risks and uncertainties inherent in determining the nature and timing of satisfaction of performance obligations and determining the standalone selling price of performance obligations, affect the amounts of revenue, expenses, unbilled receivables and deferred revenue. Estimates are also used for, but not limited to, receivables, allowance for doubtful accounts, operating lease right-of-use assets and operating lease liabilities, useful lives of assets, depreciation, income taxes and deferred tax asset valuation, valuation of stock options, other current liabilities and accrued liabilities. Numerous internal and external factors can affect estimates. Our critical accounting policies related to the estimates and judgments are discussed in our Annual Report under management's discussion and analysis of financial condition and results of operations, except for the leases policy which has been updated in result of the adoption of the new lease standard under Topic 842 and is included herein.

Leases

We determine if an arrangement is a lease at inception. Operating leases are included in operating lease right-of-use ("ROU") assets, current operating lease liabilities and noncurrent operating lease liabilities in the unaudited condensed consolidated balance sheet.

ROU assets represent our right to use an underlying asset over the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. ROU assets and lease liabilities are recognized at the lease commencement date based on the estimated present value of lease payments over the lease term. We include any anticipated lease incentives in the determination of lease liability.

We use our estimated incremental borrowing rate, which is derived from information available at the lease commencement date, in determining the present value of lease payments. We give consideration to our recent debt issuances as well as publicly available data for instruments with similar characteristics when calculating our incremental borrowing rates.

Table of Contents

Our lease terms include options to extend the lease when it is reasonably certain that we will exercise that option. Leases with a term of 12 months or less are not recorded on the unaudited condensed consolidated balance sheet. Our lease agreements do not contain any residual value guarantees.

27

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency Exchange Risk

Although our contracts are predominately denominated in U.S. dollars, we are exposed to foreign currency exchange risk because we also have some contracts denominated in foreign currencies. The effect of a hypothetical 10% adverse change in exchange rates on our foreign denominated receivables as of March 31, 2019 would result in a loss of approximately \$0.2 million. We are also exposed to foreign currency risk due to our operating subsidiaries in France, United Kingdom, Canada, Germany, Ireland, Australia, Bulgaria and United Arab Emirates. A hypothetical 10% adverse change in the value of the U.S. dollar in relation to the euro, which is our single most significant foreign currency exposure, would have decreased revenue for the three months ended March 31, 2019 by approximately \$0.2 million. However, due to the relatively low volume of payments made and received through our foreign subsidiaries, we do not believe that we have significant exposure to foreign currency exchange risks. Fluctuations in foreign currency exchange rates could harm our financial results in the future.

We currently do not use derivative financial instruments to mitigate foreign currency exchange risks. We continue to review this matter and may consider hedging certain foreign exchange risks through the use of currency futures or options in future years.

Interest Rate Risk

We are exposed to market risk for changes in interest rates related to the variable interest rate on borrowings under the Revolver. As of March 31, 2019, we had no borrowings under the Revolver.

As of March 31, 2019, we had outstanding principal amounts of \$143.8 million and \$106.3 million, respectively, of 2019 Notes and 2047 Notes, which are fixed rate instruments. Therefore, our results of operations are not subject to fluctuations in interest rates. The fair value of the Notes may change when the market price of our stock fluctuates.

We believe that we do not have any material exposure to changes in the fair value as a result of changes in interest rates due to the short term nature of our cash equivalents.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) under the Exchange Act) as of March 31, 2019. Based on our evaluation of our disclosure controls and procedures as of March 31, 2019, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting during the three months ended March 31, 2019 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. We implemented internal controls to ensure we adequately evaluated our lease contracts and properly

assessed the impact of our adoption of Topic 842 on January 1, 2019. There were no significant changes to our internal control over financial reporting due to the adoption of Topic 842.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, we are a party to legal proceedings and claims arising in the ordinary course of business. We are not currently aware of any such proceedings or claims that we believe will have, individually or in the aggregate, a material adverse effect on our business, financial condition, results of operations or cash flows.

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors as presented in our Annual Report.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

We have an ongoing authorization from our board of directors to repurchase up to \$15.0 million in shares of our common stock in the open market or through privately negotiated transactions. As of March 31, 2019, \$10.0 million remained available for repurchase under the existing repurchase authorization. We did not make any purchases of our common stock under this program for the three months ended March 31, 2019.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURE

None.

ITEM 5. OTHER INFORMATION
