UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d)
of the Securities Exchange Act of 1934

For the quarterly period ended March 31, 2015

Commission File No. 001-33794

HILLENBRAND, INC.
(Exact name of registrant as specified in its charter)

Indiana 26-1342272
(State of incorporation) (I.R.S. Employer Identification No.)

One Batesville Boulevard
Batesville, IN 47006
(Address of principal executive offices) (Zip Code)

(812) 934-7500
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell Company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: Hillenbrand, Inc. - Form 10-Q

The registrant had 62,929,118 shares of common stock, no par value per share, outstanding as of April 27, 2015.

Hillenbrand, Inc.

Condensed Notes to Consolidated Financial Statements (Unaudited)

(in millions, except share and per share data)

1. Background and Basis of Presentation

Hillenbrand, Inc. (“Hillenbrand”) is a global diversified industrial company that makes and sells premium business-to-business products and services for a wide variety of industries. We pursue profitable growth and meaningful dividends for our shareholders by leveraging our leading brands and robust cash generation capabilities, as well as our Hillenbrand Business System (HBS), which we utilize to drive results across the enterprise by deploying management practices including Lean, Talent Development, and Strategy Management. Hillenbrand is composed of two segments: the Process Equipment Group and Batesville®. The Process Equipment Group has multiple market-leading brands of process and material handling equipment and systems serving a wide variety of industries across the globe. Batesville is a recognized leader in the North American death care industry. “Hillenbrand,” “the Company,” “we,” “us,” “our,” and similar words refer to Hillenbrand and its subsidiaries.

The accompanying unaudited consolidated financial statements include the accounts of Hillenbrand and its subsidiaries. They also include a number of minor subsidiaries where the Company’s ownership percentage is less than 100%. The Company’s fiscal year ends on September 30. Unless otherwise stated, references to years relate to fiscal years.

These unaudited consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”) for interim financial statements and therefore do not include all information required in accordance with accounting principles generally accepted in the United States (“GAAP”). The unaudited consolidated financial statements have been prepared on the same basis as, and should be read in conjunction with, the audited consolidated financial statements and notes thereto included in our latest Annual Report on Form 10-K for the year ended September 30, 2014, as filed with the SEC. The September 30, 2014 Consolidated Balance Sheet included in this Form 10-Q was derived from audited consolidated financial statements, but does not include all disclosures required by GAAP for a year-end balance sheet included in Form 10-K. In the opinion of management, these financial statements reflect all adjustments necessary to present a fair statement of the Company’s consolidated financial position and the consolidated results of operations and cash flow as of the dates and for the periods presented.

The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of certain assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expense during the period. Actual results could differ from those estimates. Examples of such estimates include, but are not limited to, revenue recognition under the percentage-of-completion method and the establishment of reserves related to customer rebates, doubtful accounts, warranties, early-pay discounts, inventories, income taxes, litigation, self-insurance, and progress toward achievement of performance criteria under the incentive compensation programs.

2. Summary of Significant Accounting Policies

The significant accounting policies used in preparing these consolidated financial statements are consistent with the accounting policies described in our Annual Report on Form 10-K for 2014.

Recently Issued Accounting Standard

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers. ASU 2014-09 requires entities to recognize revenue in a way that depicts the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled to in exchange for those goods or services. ASU 2014-09 will be effective for our fiscal year beginning October 1, 2017, including interim periods within that reporting period, and allows for either full retrospective adoption or modified retrospective adoption, with early adoption not permitted. We are currently evaluating the impact that ASU 2014-09 will have on our consolidated financial statements.

In August 2014, the FASB issued ASU 2014-15, Presentation of Financial Statements - Going Concern. ASU 2014-15 provides guidance about management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern or to provide related footnote disclosures. ASU 2014-15 will be effective for our fiscal year beginning October 1, 2016, with early adoption permitted. We do not expect the adoption of ASU 2014-15 to have a material impact on our consolidated financial statements.

Table of Contents

In January 2015, the FASB issued ASU 2015-01, Income Statement—Extraordinary and Unusual Items. ASU 2015-01 eliminates from GAAP the concept of extraordinary items. ASU 2015-01 will be effective for our fiscal year beginning October 1, 2016, with early adoption permitted. We do not expect the adoption of ASU 2015-01 to have a material impact on our consolidated financial statements.

In April 2015, the FASB issued ASU 2015-03, Interest - Imputation of Interest. ASU 2015-03 simplifies the presentation of debt issuance costs. The amendments in this ASU require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. ASU 2015-03 will be effective for our fiscal year beginning October 1, 2016, with early adoption permitted. We do not expect the adoption of ASU 2015-03 to have a material impact on our consolidated financial statements.

In April 2015, the FASB issued ASU 2015-05, Intangibles-Goodwill and Other - Internal-Use Software. ASU 2015-05 will help entities evaluate the accounting for fees paid by a customer in a cloud computing arrangement by providing guidance as to whether an arrangement includes the sale or license of software. ASU 2015-05 will be effective for our fiscal year beginning October 1, 2016, with early adoption permitted. We are currently evaluating the impact that ASU 2015-05 will have on our consolidated financial statements.

3. Supplemental Balance Sheet Information

	March 31, 2015	September 30, 2014
Trade accounts receivable reserves	\$20.2	\$19.2
Accumulated depreciation on property, plant, and equipment	\$289.5	\$278.3
Accumulated amortization on intangible assets	\$140.4	\$127.4
Inventories:		
Raw materials and components	\$50.0	\$53.2
Work in process	70.2	73.3
Finished goods	54.7	42.0
Total inventories	\$174.9	\$168.5

4. Financing Agreements

	March 31, 2015	September 30, 2014
\$700 revolving credit facility, maturing December 19, 2019	\$146.3	\$229.6
\$200 term loan, final maturity December 19, 2019	175.5	180.0
\$150 senior unsecured notes, due July 15, 2020, net of discount	149.0	148.9
\$100 unsecured Series A Notes, due December 15, 2024	100.0	—
Total debt	570.8	558.5
Less: current portion	9.0	15.0
Total long-term debt	\$561.8	\$543.5

On February 18, 2015, we entered into an Amendment Agreement (the “Amendment Agreement”), amending and restating our €150.0 Syndicated Letter of Guarantee Facility (as amended, “LG Facility”), dated as of June 3, 2013, under which unsecured letters of credit, bank guarantees, or other surety bonds may be issued. The Amendment

Edgar Filing: Hillenbrand, Inc. - Form 10-Q

Agreement extends the maturity date of the LG Facility until at least December 19, 2019, and, among other things, amends a financial covenant contained in the LG Facility to provide the Company and its subsidiaries greater flexibility to consummate acquisitions. The financial covenant amendment allows for an increase in the Company's permitted maximum leverage ratio during the three quarters subsequent to an acquisition valued in excess of \$75.0. We are allowed this increase up to two times during the term of the LG Facility (each, a "Leverage Holiday").

On December 15, 2014, we issued \$100.0 in 4.60% Series A unsecured notes ("Series A Notes") pursuant to the Private Shelf Agreement, dated as of December 6, 2012 (as amended, the "Shelf Agreement"), among the Company, Prudential Investment

7

Table of Contents

Management, Inc. (“Prudential”) and each Prudential Affiliate (as defined therein) that becomes a purchaser thereunder. The Series A Notes are unsecured, mature on December 15, 2024, and bear interest at 4.60% payable semi-annually in arrears. The Company may at any time upon providing notice, prepay all or part of the Series A Notes at 100% of the principal amount prepaid plus a Make-Whole Amount (as defined therein). Consistent with our revolving credit facility, term loan, senior unsecured notes, and LG facility, the Series A Notes are fully and unconditionally guaranteed by certain of the Company’s domestic subsidiaries (the “Guarantors”). Deferred financing costs of \$0.5 related to the Series A Notes are being amortized to interest expense over the term of the Series A Notes.

On December 15, 2014, the Company and the Guarantors entered into an amendment (the “First Amendment”) to the Shelf Agreement and on December 19, 2014, entered into a separate amendment (the “Second Amendment” and, collectively with the First Amendment, the “Prudential Amendments”) to the Shelf Agreement. The Prudential Amendments, among other things, amend a financial covenant contained in the Shelf Agreement to provide for Leverage Holidays similar to those discussed above regarding the LG Facility. If a Leverage Holiday is elected, in addition to the interest accruing on the Series A Notes, the Company must pay to each holder of a Series A Note a fee equivalent to 0.75% per annum.

On December 19, 2014, the Company entered into a Second Amendment (the “JPM Amendment”) to the Amended and Restated Credit Agreement, dated as of November 19, 2012, which governs our revolving credit facility and term loan (the “Facility”), by and among the Company and certain of its affiliates, the lenders party thereto from time to time, and JPMorgan Chase Bank, N.A., as administrative agent. The JPM Amendment provides for revolving loans of up to \$700 and a term loan in the amount of \$180.0, extends the maturity date of the Facility to December 19, 2019, and, among other amendments, amends the Facility to provide for Leverage Holidays similar to those discussed above regarding the LG Facility. New deferred financing costs related to the JPM Amendment were \$1.7, which along with existing costs of \$1.8, are being amortized to interest expense over the term of the Facility.

With respect to the Facility, as of March 31, 2015, we had \$15.9 in outstanding letters of credit issued and \$537.8 of maximum borrowing capacity, of which \$402.9 of borrowing capacity is immediately available based on our leverage covenant at March 31, 2015, with additional amounts available in the event of a qualifying acquisition. The weighted-average interest rates on borrowings under the Facility were 1.30% and 1.29% for the three and six months ended March 31, 2015, and 1.37% and 1.36% for the same periods in the prior year. The Facility carries a leverage-based facility fee, assessed on the entire facility amount. The weighted average facility fee was 0.23% and 0.24% for the three months and six months ended March 31, 2015.

The weighted average interest rates on the term loan were 1.55% and 1.54% for the three and six months ended March 31, 2015, and 1.66% and 1.67% for the same periods in the prior year.

In the normal course of business, the Process Equipment Group provides customers with bank guarantees and other credit arrangements in support of performance, warranty, advance payment, and other contractual obligations. This form of trade finance is customary in the industry and, as a result, we maintain adequate capacity to provide the guarantees, under the LG Facility and other arrangements. As of March 31, 2015, we had guarantee arrangements with capacity totaling \$210.0 of which \$153.3 was utilized for this purpose.

The availability of borrowings under the Facility and the LG Facility is subject to our ability to meet certain conditions including compliance with covenants, absence of default, and continued accuracy of certain representations and warranties. Financial covenants include a maximum ratio of Indebtedness to EBITDA (as such terms defined in the relevant agreements) of 3.5 to 1.0 and a minimum ratio of EBITDA (as defined in the agreements) to interest expense of 3.5 to 1.0. As of March 31, 2015, we were in compliance with all covenants.

We had restricted cash of \$0.7 and \$0.4 at March 31, 2015 and September 30, 2014.

Table of Contents

5. Retirement Benefits

Defined Benefit Plans

	U.S. Pension Benefits		Non-U.S. Pension Benefits	
	Three Months Ended March 31,		Three Months Ended March 31,	
	2015	2014	2015	2014
Service costs	\$1.1	\$1.0	\$0.5	\$0.4
Interest costs	3.6	3.6	0.6	1.0
Expected return on plan assets	(3.7) (3.5) (0.2) (0.2
Amortization of unrecognized prior service costs, net	0.3	0.2	—	—
Amortization of net loss	1.4	1.0	—	—
Net pension costs	\$2.7	\$2.3	\$0.9	\$1.2

	U.S. Pension Benefits		Non-U.S. Pension Benefits	
	Six Months Ended March 31,		Six Months Ended March 31,	
	2015	2014	2015	2014
Service costs	\$2.2	\$2.0	\$0.9	\$0.8
Interest costs	7.2	7.3	1.4	2.1
Expected return on plan assets	(7.2) (7.0) (0.5) (0.5
Amortization of unrecognized prior service costs, net	0.5	0.4	—	—
Amortization of net loss	2.6	1.9	—	—
Net pension costs	\$5.3	\$4.6	\$1.8	\$2.4

Postretirement Healthcare Plans — Net postretirement healthcare costs were \$0.1 and \$0.1 for the three months ended March 31, 2015 and 2014, and \$0.2 and \$0.2 for the six months ended March 31, 2015 and 2014.

Defined Contribution Plans — Expenses related to our defined contribution plans were \$2.4 and \$2.2 for the three months ended March 31, 2015 and 2014, and \$4.5 and \$4.3 for the six months ended March 31, 2015 and 2014.

6. Income Taxes

The effective tax rates for the three months ended March 31, 2015 and 2014 were 31.4% and 29.1%. The effective tax rates for the six months ended March 31, 2015 and 2014 were 30.0% and 29.3%. The increase in the effective tax rate during the three months and six months ended March 31, 2015 was primarily due to the less favorable geographic mix of pre-tax income in 2015, net of a reduction in the reserve for uncertain tax positions in 2015.

7. Earnings Per Share

The dilutive effects of performance-based stock awards were included in the computation of diluted earnings per share at the level the related performance criteria were met through the respective balance sheet date. At March 31, 2015 and 2014, potential dilutive effects, representing approximately 1,400,000 and 1,800,000 shares were excluded from the computation of diluted earnings per share as the related performance criteria were not yet met, although we expect to meet various levels of criteria in the future.

Table of Contents

	Three Months Ended		Six Months Ended	
	March 31,		March 31,	
	2015	2014	2015	2014
Net income(1)	\$30.7	\$33.0	\$60.2	\$53.3

Shares with anti-dilutive effect excluded from the computation of diluted earnings per share (in millions)	0.7	0.4	0.7	0.4

(1) Net income attributable to Hillenbrand

8. Shareholders' Equity

During the six months ended March 31, 2015, we paid approximately \$25.2 of cash dividends. We also repurchased approximately 305,000 shares of our common stock during the six months ended March 31, 2015, for a total cost of approximately \$9.2. In connection with our share based compensation plans discussed further in Note 10, we also issued approximately 317,000 shares of common stock, of which approximately 245,000 shares were issued using treasury stock.

9. Other Comprehensive Income (Loss)

10. Share-Based Compensation

	Three Months Ended March 31,		Six Months Ended March 31,	
	2015	2014	2015	2014
Share-based compensation costs	\$4.1	\$3.4	\$6.3	\$5.1
Less impact of income tax benefit	1.5	1.3	2.3	1.9
Share-based compensation costs, net of tax	\$2.6	\$2.1	\$4.0	\$3.2

We have share-based compensation with long-term performance-based metrics that are contingent upon our relative total shareholder return and the creation of shareholder value as measured by the cumulative cash returns and final period net operating profit after tax compared to the performance-based targets for each grant over a three-year period. For the performance-based awards contingent upon the creation of shareholder value, compensation expense is adjusted each quarter based upon actual results to date and any changes to forecasted information on each of the separate grants.

During the six months ended March 31, 2015, we made the following grants:

	Number of Units
Stock options	360,903
Time-based stock awards	49,219
Performance-based stock awards (maximum that can be earned)	474,599

12

Table of Contents

Stock options granted during fiscal 2015 had a weighted-average exercise price of \$32.66 and a weighted-average grant date fair value of \$8.38. Our time-based stock awards and performance-based stock awards granted during fiscal 2015 had weighted-average grant date fair values of \$31.61 and \$33.44. Included in the performance-based stock awards granted during 2015 are 150,464 units whose payout level is based upon the Company's total shareholder return as it relates to the performance of companies in its compensation peer group over a three-year measurement period. These units will be expensed on a straight-line basis over the measurement period and are not subsequently adjusted after the grant date.

11. Other Income (Expense), Net

	Three Months Ended		Six Months Ended	
	March 31,		March 31,	
	2015	2014	2015	2014
Equity in net income (loss) of affiliates	\$(1.7) \$2.9	\$(1.4) \$2.7
Foreign currency exchange loss, net	(3.3) (0.4) (4.1) (0.7

Service agreement cancellation	—	2.5	—	2.5
Other, net	—	(0.5) 0.5	(0.1
Other income and (expense), net	\$(5.0) \$9.7	\$(5.0) \$9.6

Following our spin-off from our former parent, we held warrants to purchase the common stock of Forethought Financial Group, Inc. ("Forethought"). Forethought was acquired by a third-party during the second quarter of 2014. In connection with that acquisition, these warrants were exercised for \$6.2, resulting in a gain of \$5.2.

We recognized a \$2.5 gain related to the cancellation of a service agreement at Batesville during the second quarter of 2014.

12. Commitments and Contingencies

General — Like most companies, from time to time we are involved in claims, lawsuits, and government proceedings relating to our operations, including environmental, patent infringement, business practices, commercial transactions, product and general liability, workers' compensation, auto liability, employment, and other matters. The ultimate outcome of these matters cannot be predicted with certainty. An estimated loss from these contingencies is recognized when we believe it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated; however, it is difficult to measure the actual loss that might be incurred related to litigation. If a loss is not considered probable and/or cannot be reasonably estimated, we are required to make a disclosure if there is at least a reasonable possibility that a significant loss may be incurred. Legal fees associated with claims and lawsuits are generally expensed as incurred.

Claims other than employment and related matters have deductibles and self-insured retentions ranging from \$0.5 to \$1.0 per occurrence or per claim, depending upon the type of coverage and policy period. Outside insurance companies and third-party claims administrators assist in establishing individual claim reserves, and an independent outside actuary provides estimates of ultimate projected losses, including incurred but not reported claims, which are used to establish reserves for losses. Claim reserves for employment-related matters are established based upon advice from internal and external counsel and historical settlement information for claims and related fees when such amounts are considered probable of payment.

The recorded amounts represent our best estimate of the costs we will incur in relation to such exposures, but it is possible that actual costs will differ from those estimates.

13. Fair Value Measurements

Fair value is defined as the exit price, or the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The authoritative guidance establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are from sources independent of the Company. Unobservable inputs reflect the Company's assumptions about the factors market participants would use in valuing the asset or liability, developed based upon the best information available in the circumstances. The categorization of financial assets and liabilities within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The hierarchy is broken down into three levels:

13

Table of Contents

- Level 1: Inputs are quoted prices in active markets for identical assets or liabilities.
 Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs (other than quoted prices) that are observable for the asset or liability, either directly or indirectly.
- Level 2: Inputs are unobservable for the asset or liability.

	Carrying Value at March 31, 2015	Fair Value at March 31, 2015 Using Inputs Considered as:		
		Level 1	Level 2	Level 3
Assets:				
Cash and cash equivalents	\$43.0	\$43.0	\$—	\$—
Investments in rabbi trust	4.8	4.8	—	—
Derivative instruments	3.3	—	3.3	—
Liabilities:				
\$150 senior unsecured notes	149.0	159.9	—	—
Revolving credit facility	146.3	—	146.3	—
Term loan	175.5	—	175.5	—
\$100 Series A Notes	100.0	—	103.9	—
Derivative instruments	12.1	—	12.1	—

The fair values of the revolving credit facility and term loan approximated carrying value at March 31, 2015. The fair values of the revolving credit facility, term loan, and Series A Notes are estimated based on internally developed models, using current market interest rate data for similar issues as there is no active market for our revolving credit facility, term loan, or Series A Notes.

The fair values of the Company's derivative instruments are based upon pricing models using inputs derived from third-party pricing services or observable market data such as currency spot and forward rates. These values are periodically validated by comparing to third-party broker quotes. The aggregate notional value of these derivatives was \$118.9 at March 31, 2015. The derivatives are included in other current assets and other current liabilities on the balance sheet.

16. Restructuring

During the three months ended March 31, 2015, Hillenbrand incurred \$0.7 of restructuring costs (\$0.5 expense at the Process Equipment Group, with \$0.4 classified as operating expenses and \$0.1 classified as cost of goods sold, and \$0.2 expense at Corporate classified as operating expenses). During the six months ended March 31, 2015, Hillenbrand incurred \$2.6 of restructuring costs (\$0.8 expense at the Process Equipment Group, with \$0.7 classified as operating expenses and \$0.1 classified as cost of goods sold, \$1.2 expense at Batesville classified as cost of goods sold, and \$0.6 expense at Corporate classified as operating expenses). These costs related primarily to severance costs at the Process Equipment Group as we continue to integrate and streamline the business operations within the segment, disposal of equipment at Batesville, and corporate compensation costs related to changes in the Company's executive management team. At March 31, 2015, \$1.4 of restructuring costs were accrued and will be paid in 2015.

Item 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS AND FACTORS THAT MAY AFFECT FUTURE RESULTS

Throughout this Form 10-Q, we make a number of “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. As the words imply, these are statements about future plans, objectives, beliefs, and expectations that might or might not happen in the future, as contrasted with historical information. Forward-looking statements are based on assumptions that we believe are reasonable, but by their very nature are subject to a wide range of risks.

Accordingly, in this Form 10-Q, we may say something like,

“We expect that future revenue associated with the Process Equipment Group will be influenced by order backlog.”

That is a forward-looking statement, as indicated by the word “expect” and by the clear meaning of the sentence.

Other words that could indicate we are making forward-looking statements include:

intend	believe	plan	expect	may	goal	would
become	pursue	estimate	will	forecast	continue	could
targeted	encourage	promise	improve	progress	potential	should

This is not an exhaustive list, but is intended to give you an idea of how we try to identify forward-looking statements. The absence of any of these words, however, does not mean that the statement is not forward-looking.

Here is the key point: Forward-looking statements are not guarantees of future performance, and our actual results could differ materially from those set forth in any forward-looking statements.

Any number of factors, many of which are beyond our control, could cause our performance to differ significantly from what is described in the forward-looking statements. For a discussion of factors that could cause actual results to differ from those contained in forward-looking statements, see the discussions under the heading “Risk Factors” in Item 1A of Part II of this Form 10-Q. We assume no obligation to update or revise any forward-looking statements.

OPERATING PERFORMANCE MEASURES

The following discussion compares our results for the three and six months ended March 31, 2015, to the same period in fiscal year 2014. The Company’s fiscal year ends on September 30. Unless otherwise stated, references to years relate to fiscal years. We begin the discussion at a consolidated level and then provide separate detail about the Process Equipment Group, Batesville, and Corporate. These financial results are prepared in accordance with accounting principles generally accepted in the U.S. (“GAAP”).

We also provide certain non-GAAP operating performance measures. These non-GAAP measures are referred to as “adjusted” and exclude expenses associated with backlog intangible amortization, inventory step-up, business acquisition and integration, restructuring, and certain litigation costs. The related income tax for all of these items is also excluded. This non-GAAP information is provided as a supplement, not as a substitute for, or as superior to, measures of financial performance prepared in accordance with GAAP.

We use this non-GAAP information internally to make operating decisions and believe it is helpful to investors because it allows more meaningful period-to-period comparisons of our ongoing operating results. The information can also be used to perform trend analysis and to better identify operating trends that may otherwise be masked or distorted by these types of items. We believe this information provides a higher degree of transparency.

An important non-GAAP measure Hillenbrand uses is adjusted earnings before interest, income tax, depreciation, and amortization (“adjusted EBITDA”). As previously discussed, a part of Hillenbrand’s strategy is to selectively acquire companies that we believe can benefit from the Hillenbrand Business System (HBS) to spur faster and more profitable growth. Given that strategy, it is a natural consequence to incur related expenses, such as amortization from acquired intangible assets

Table of Contents

and additional interest expense from debt-funded acquisitions. Accordingly, we use adjusted EBITDA, among other measures, to monitor business performance.

Another important non-GAAP operational measure used is backlog. Backlog is not a term recognized under GAAP; however it is a common measurement used in the Process Equipment Group's industry. Order backlog represents the amount of consolidated revenue that we expect to realize on contracts awarded related to the Process Equipment Group. Backlog includes expected revenue from large systems, equipment, and to a lesser extent, replacement parts, components, and service. The length of time that projects remain in backlog can span from days for replacement parts and service to approximately 18 months or longer for larger system sales. Backlog includes expected revenue from the remaining portion of firm orders not yet completed, as well as revenue from change orders to the extent that it is reasonably expected to be realized. For purposes of calculating backlog, 100% of estimated revenue attributable to consolidated subsidiaries is included. A small number of these subsidiaries are not 100% owned by Hillenbrand, although the aggregate un-owned portion of these subsidiaries is immaterial to Hillenbrand as a whole.

Future revenue for the Process Equipment Group is influenced by backlog because of the lead time involved in fulfilling engineered-to-order equipment for customers. Although backlog can be an indicator of future revenue, it does not include projects and parts orders that are booked and shipped within the same quarter. The timing of order placement, size, extent of customization, and customer delivery dates can create fluctuations in backlog and revenue. Revenue attributable to backlog is also affected by foreign exchange fluctuations for orders denominated in currencies other than United States dollars.

We analyze net revenue, gross profit, and operating expenses on a constant currency basis, which is a non-GAAP measure, in order to better measure the comparability of results between periods. This information is provided because foreign currency exchange rates can distort the underlying change in sales, either positively or negatively.

See pages 28-29 for reconciliations of our non-GAAP measures to the most directly comparable GAAP measures. There is no GAAP financial measure comparable to backlog; therefore, a quantitative reconciliation of backlog is not provided.

CRITICAL ACCOUNTING ESTIMATES

For the three and six months ended March 31, 2015, there were no significant changes to our critical accounting estimates, as outlined in our Annual Report on Form 10-K for 2014.

EXECUTIVE OVERVIEW

(financial amounts in millions, except share and per share data, throughout Management's Discussion and Analysis)

Hillenbrand is a global diversified industrial company that makes and sells premium business-to-business products and services for a wide variety of industries. We pursue profitable growth and meaningful dividends for our shareholders by leveraging our leading brands and robust cash generation capabilities, as well as our Hillenbrand Business System (HBS), which we utilize to drive results across the enterprise by deploying management practices including Lean, Talent Development, and Strategy Management. Hillenbrand is composed of two segments: the Process Equipment Group and Batesville®.

The Process Equipment Group has multiple market-leading brands of process and material handling equipment and systems serving a wide variety of industries across the globe. The Process Equipment Group's businesses utilize HBS to grow and increase profitability for the company. They manufacture and sell highly engineered precise mission critical process and material handling equipment and systems for a wide variety of growth-oriented end markets.

Batesville is a recognized leader in the North American death care industry. Batesville performs several critical roles within the Company. It has a long history of providing strong annual operating cash flows. As a source of HBS practices, including Lean, Strategy Management, and Talent Development, it also provides talent to embed these management practices in acquired companies.

Batesville's performance has allowed management to invest in acquisitions like our Process Equipment Group businesses that provide diversification, with a focus on companies for which we perceive growth opportunities and an ability to benefit from HBS. We believe we can most effectively continue to increase shareholder value by leveraging our strong financial position and HBS to continue to build a global diversified industrial company with strong positions in multiple growth-oriented industries.

(1) Net income attributable to Hillenbrand.

Three Months Ended March 31, 2015 Compared to Three Months Ended March 31, 2014

Net revenue increased \$7.8 (2%) or \$36.1 (9%) on a constant currency basis.

•The Process Equipment Group's net revenue increased \$1.3 (1%) or \$28.3 (12%) on a constant currency basis, due to increased volume of equipment sales and an increase in average selling price for equipment and replacement parts and service. Order backlog decreased \$197.1 (27%) from \$717.1 on March 31, 2014, to \$520.0 on March 31, 2015. On a constant currency basis, backlog at March 31, 2015 would have been \$595.8, a decrease of \$121.3 (17%); the decrease in backlog is primarily attributable to lower order intake and the appreciation of the U.S. dollar compared to the Euro. The fluctuation in order intake is a consequence of the timing of large orders booked at Coperion.

•Batesville's net revenue increased \$6.5 (4%) or \$7.8 (5%) on a constant currency basis, primarily due to an increase in volume (\$12.9) offset by a decrease in the average selling price (\$5.1). Higher volume was driven primarily by an increase in North American deaths, partially offset by the increased rate at which families opted for cremation.

Gross profit increased \$5.8 (4%) or \$14.2 (10%) on a constant currency basis and consolidated gross profit margin increased 70 basis points to 36.7%.

•The Process Equipment Group's gross profit increased \$3.7 (5%) or \$11.9 (15%) on a constant currency basis, primarily driven by increased volume of equipment sales and an increase in average selling price for equipment and replacement parts and service. Gross profit margin increased 130 basis points to 34.3% in 2015, primarily due to an increase in average selling price for equipment, replacement parts, and service, much of which was due to stronger sales of equipment utilized in hydraulic fracture mining.

•Batesville's gross profit increased \$2.1 (3%) and gross profit margin decreased 40 basis points to 40.2%. The increased gross profit was primarily due to higher volume. The lower gross profit margin was primarily driven by decreased average selling prices.

Gross profit in 2015 included \$0.1 of restructuring charges and 2014 included a \$0.2 reduction to cost of goods sold related to restructuring. Excluding these items, adjusted gross profit increased \$6.1 (4%) and adjusted gross profit margin increased 90 basis points to 36.8%.

Operating expenses decreased \$8.2 (8%) or \$2.0 (2%) on a constant currency basis, primarily due to lower business acquisition and integration costs and restructuring charges and the impact of tighter cost controls at the Process Equipment Group in 2015 compared to 2014. The operating expenses to net revenue ratio decreased by 250 basis points to 22.7% in 2015. Operating expenses included the following items:

23

Table of Contents

	Three Months Ended March 31,	
	2015	2014
Business acquisition and integration costs	\$(0.1) \$1.1
Restructuring charges	0.6	1.2

On an adjusted basis, which excluded business acquisition and integration costs and restructuring charges, operating expenses decreased \$6.4 (7%) to \$91.2. This was primarily due to currency fluctuations and tighter cost controls at the Process Equipment Group. The adjusted operating expenses to net revenue ratio decreased 210 basis points in 2015 to 22.5%, largely due to increased operating leverage from increased volume at Batesville and in the Process Equipment Group and tighter cost control at the Process Equipment Group.

Interest expense increased \$0.8 primarily due to an increased proportion of fixed rate debt which has a higher rate of interest than the variable rate borrowings.

Other income (expense), net decreased \$14.7 to \$5.0 of other expense in 2015 compared to \$9.7 of other income in 2014. The decrease was driven primarily by a decline in income on limited partnership investments from a \$2.9 gain in 2014 to \$1.7 expense in 2015. The decrease was also driven by several one-time transactions that occurred in 2014, including a \$5.2 gain on the exercise of warrants to purchase common stock of Forethought Financial Group, Inc. (“Forethought”) and a \$2.5 gain related to the cancellation of a service agreement at Batesville. There was also a \$2.9 increase in foreign currency exchange loss in 2015, largely driven by the rapid appreciation of the Swiss Franc against other currencies when the Swiss National Bank suddenly removed currency support tied to the Euro in January 2015.

The effective tax rate was 31.4% in 2015 compared to 29.1% in 2014. The increase in the effective tax rate was primarily due to the less favorable geographic mix of pre-tax income, net of the effect of a reduction in the reserve for uncertain tax positions in 2015. Our adjusted effective income tax rate was 31.5% in 2015 compared to 29.3% in 2014 and excluded the tax impact of acquisition and integration costs and restructuring charges.

Six Months Ended March 31, 2015 Compared to Six Months Ended March 31, 2014

Net revenue increased \$24.4 (3%) or \$67.3 (9%) on a constant currency basis.

- The Process Equipment Group’s net revenue increased \$15.5 (3%) or \$56.2 (12%) on a constant currency basis, primarily due to increased volume of equipment sales and an increase in average selling price for equipment and replacement parts and service.
- Batesville’s net revenue increased \$8.9 (3%) or \$11.1 (4%) on a constant currency basis, primarily due to an increase in volume (\$18.2) offset by a decrease in the average selling price (\$7.1). Higher volume was driven by an increase in North American deaths, partially offset by the increased rate at which families opted for cremation.

Gross profit increased \$13.2 (5%) or \$25.8 (9%) on a constant currency basis and consolidated gross profit margin increased 60 basis points to 35.6%.

- The Process Equipment Group’s gross profit increased \$12.8 (8%) or \$25.1 (16%) on a constant currency basis, primarily driven by increased volume of equipment sales and an increase in average selling price for equipment and replacement parts and service. Gross profit margin increased 160 basis points to 33.6% in 2015 primarily due to an increase in average selling price for equipment and replacement parts and service.
- Batesville’s gross profit increased \$0.4 (0.3%) and gross profit margin decreased 110 basis points to 38.8%. The increased gross profit was primarily due to higher volume, offset by decreased average selling prices and restructuring

charges from the disposal of equipment. Gross profit margin decreased 110 basis points to 38.8% primarily due to decreased average selling prices and restructuring charges from the disposal of equipment.

Gross profit in 2015 included a \$1.2 increase to cost of goods sold related to restructuring charges related to the disposal of equipment at Batesville and other restructuring charges of \$0.1. Gross profit in 2014 included \$0.1 of restructuring charges. Excluding these items, adjusted gross profit increased \$14.6 (5%) and adjusted gross profit margin increased 80 basis points to 35.8%.

Table of Contents

Operating expenses decreased \$11.0 (6%) or \$1.9 (1%) on a constant currency basis, primarily due to lower business acquisition and integration costs and the impact of tighter cost controls at the Process Equipment Group in 2015 compared to 2014, partially offset by an increase in litigation expenses. The operating expenses to net revenue ratio decreased by 210 basis points to 22.7% in 2015. Operating expenses included the following items:

March 31,	Six Months Ended March 31,	
	2015	2014
Business acquisition and integration costs	\$0.2	\$3.0
Restructuring charges	1.3	1.4
Litigation expenses	0.5	—

On an adjusted basis, which excluded business acquisition and integration costs, restructuring charges, and litigation expenses, operating expenses decreased \$8.6 to \$180.9 primarily due to currency fluctuations and tighter cost controls at the Process Equipment Group. The adjusted operating expenses to net revenue ratio decreased 180 basis points in 2015 to 22.4%, largely due to increased operating leverage from increased volume at Batesville and in the Process Equipment Group and tighter cost controls at the Process Equipment Group.

Interest expense increased \$0.2 primarily due to an increased proportion of fixed rate debt which has a higher rate of interest than the variable rate borrowings. This increase was partially offset by lower variable interest rates and a reduction in our weighted-average outstanding borrowings.

Other income (expense), net decreased \$14.6 to \$5.0 of other expense in 2015 compared to \$9.6 of other income in 2014. The decrease was driven primarily by a decline in income on limited partnership investments from a \$2.7 gain in 2014 to \$1.4 expense in 2015. The decrease was also driven by several one-time transactions that occurred in 2014, including a \$5.2 gain on the exercise of warrants to purchase common stock of Forethought and a \$2.5 gain related to the cancellation of a service agreement at Batesville. There was also a \$3.4 increase in foreign currency exchange loss in 2015, largely driven by the rapid appreciation of the Swiss Franc against other currencies when the Swiss National Bank suddenly removed currency support tied to the Euro in January 2015.

The effective tax rate was 30.0% in 2015 compared to 29.3% in 2014. The increase in the effective tax rate was primarily due to a less favorable geographic mix of pre-tax income in 2015. Our adjusted effective income tax rate was 30.0% in 2015 compared to 29.3% in 2014 and excluded the tax impact of acquisition and integration costs, restructuring charges, and certain litigation costs.

OPERATIONS REVIEW — PROCESS EQUIPMENT GROUP

	Three Months Ended March 31,				Six Months Ended March 31,			
	2015		2014		2015		2014	
	Amount	% of Net Revenue	Amount	% of Net Revenue	Amount	% of Net Revenue	Amount	% of Net Revenue

Gross profit	82.7	34.3	79.0	33.0	167.0	33.6	154.2	32.0
Operating expenses	56.6	23.5	63.6	26.6	113.6	22.8	123.9	25.7
Operating profit	26.1	10.8	15.4	6.4	53.4	10.7	30.3	6.3

Three Months Ended March 31, 2015 Compared to Three Months Ended March 31, 2014

Edgar Filing: Hillenbrand, Inc. - Form 10-Q

Net revenue increased \$1.3 (1%) or \$28.3 (12%) on a constant currency basis, primarily due to increased volume of equipment sales and an increase in average selling price for equipment and replacement parts and service. Order backlog decreased \$197.1 (27%) from \$717.1 on March 31, 2014, to \$520.0 on March 31, 2015. On a constant currency basis, backlog at March 31, 2015 would have been \$595.8, a decrease of \$121.3 (17%); the decrease in backlog is primarily attributable to lower order intake and the appreciation of the U.S. dollar compared to the Euro. The fluctuation in order intake is a consequence of the timing of large orders booked at Coperion.

Table of Contents

Gross profit increased \$3.7 (5%) or \$11.9 (15%) on a constant currency basis, primarily driven by increased volume of equipment sales and an increase in average selling price for equipment and replacement parts and service. Gross profit margin increased 130 basis points to 34.3% in 2015, primarily driven by an increase in average selling price for equipment, replacement parts, and service, much of which was due to stronger sales of equipment utilized in hydraulic fracture mining.

Operating expenses decreased \$7.0 (11%) or \$1.0 (2%) on a constant currency basis and the operating expenses to net revenue ratio improved by 310 basis points to 23.5% in 2015. The decrease in operating expenses and the improved ratio are primarily due to increased operating leverage from increased volume and tighter cost controls.

Operating expenses in 2015 included restructuring costs of \$0.4. Operating expenses in 2014 included business acquisition and integration costs of \$0.3. Excluding these items, adjusted operating expenses decreased \$7.1 (11%) to \$56.2, primarily due to currency fluctuations and cost controls. The operating expenses to net revenue ratio improved 310 basis points to 23.3% in 2015 due to increased operating leverage from increased volume and cost controls.

Six Months Ended March 31, 2015 Compared to Six Months Ended March 31, 2014

Net revenue increased \$15.5 (3%) or \$56.2 (12%) on a constant currency basis, primarily due to increased volume of equipment sales and an increase in average selling price for equipment and replacement parts and service.

Gross profit increased \$12.8 (8%) or \$25.1 (16%) on a constant currency basis, primarily driven by increased volume of equipment sales and an increase in average selling price for equipment and replacement parts and service. Gross profit margin increased 160 basis points to 33.6% in 2015 primarily driven by an increase in average selling price for equipment and replacement parts and service.

Operating expenses decreased \$10.3 (8%) or \$1.3 (1%) on a constant currency basis and the operating expenses to net revenue ratio improved by 290 basis points to 22.8% in 2015. The decrease in operating expenses and the improved ratio are primarily due to increased operating leverage from increased volume and tighter cost controls.

Operating expenses in 2015 included business acquisition and integration costs (\$0.1) and restructuring costs (\$0.7). Operating expenses in 2014 included business acquisition and integration costs (\$1.0), and restructuring costs (\$0.2). Excluding these items, adjusted operating expenses decreased \$9.9 (8%) to \$112.8, primarily due to currency fluctuations and tighter cost control. The operating expenses to net revenue ratio improved 280 basis points to 22.7% in 2015 driven by increased operating leverage from increased volume and tighter cost controls.

Gross profit	65.9	40.2	63.8	40.6	120.0	38.8	119.6	39.9
Operating expenses	24.2	14.8	24.3	15.4	49.9	16.2	48.9	16.3
Operating profit	41.7	25.5	39.5	25.1	70.1	22.7	70.7	23.6

Three Months Ended March 31, 2015 Compared to Three Months Ended March 31, 2014

Edgar Filing: Hillenbrand, Inc. - Form 10-Q

Net revenue increased \$6.5 (4%) or \$7.8 (5%) on a constant currency basis, primarily due to an increase in volume (\$12.9) offset by a decrease in the average selling price (\$5.1). Higher volume was driven by an increase in North American deaths, partially offset by the increased rate at which families opted for cremation.

Gross profit increased \$2.1 (3%) and gross profit margin decreased 40 basis points to 40.2%. The increased gross profit was primarily due to higher volume. The lower gross profit margin was primarily driven by decreased average selling prices.

Table of Contents

Gross profit included a \$0.3 reduction to cost of goods sold in 2014 (\$0.5 gain from sale of real estate offset by \$0.2 of restructuring costs). Excluding restructuring charges, adjusted gross profit increased \$2.4 (4%) and adjusted gross profit margin decreased 20 basis points to 40.2%.

Operating expenses decreased \$0.1 to \$24.2. The operating expenses to net revenue ratio decreased 60 basis points to 14.8%.

Six Months Ended March 31, 2015 Compared to Six Months Ended March 31, 2014

Net revenue increased \$8.9 (3%) or \$11.1 (4%) on a constant currency basis, primarily due to an increase in volume (\$18.2) offset by a decrease in the average selling price (\$7.1). Higher volume was driven by an increase in North American deaths, partially offset by the increased rate at which families opted for cremation.

Gross profit increased \$0.4 (0.3%) to \$120.0 and gross profit margin decreased 110 basis points to 38.8%. The increased gross profit was primarily due to higher volume, offset by decreased average selling prices and restructuring charges from the disposal of equipment.

Gross profit included restructuring charges (\$1.2 of expense in 2015 and \$0.2 reduction to cost of goods sold in 2014). Excluding restructuring charges, adjusted gross profit increased \$1.8 (2%) and adjusted gross profit margin decreased 60 basis points to 39.2%.

Operating expenses increased \$1.0 to \$49.9, primarily due to increased selling expenses. The operating expenses to net revenue ratio decreased 10 basis points to 16.2%.

Operating expenses in 2015 included \$0.5 of certain litigation costs. Excluding these costs, adjusted operating expenses in 2015 were \$49.4, a \$0.5 increase from 2014, and the operating expenses to net revenue ratio decreased by 30 basis points to 16.0%.

REVIEW OF CORPORATE EXPENSES

	Three Months Ended March 31,				Six Months Ended March 31,			
	2015	% of	2014	% of	2015	% of	2014	% of
	Amount	Net Revenue	Amount	Net Revenue	Amount	Net Revenue	Amount	Net Revenue
Core operating expenses	\$10.8	2.7	\$10.0	2.5	\$18.7	2.3	\$17.9	2.3
Business acquisition and integration costs	(0.1)	—	0.8	0.2	0.1	—	2.0	0.3
Restructuring charges	0.2	—	1.2	0.3	0.6	0.1	1.2	0.1
Operating expenses	\$10.9	2.7	\$12.0	3.0	\$19.4	2.4	\$21.1	2.7

Core operating expenses represent operating expenses excluding restructuring costs and costs related to business acquisition and integration, which we incur as a result of our strategy to grow through selective acquisitions.

Three Months Ended March 31, 2015 Compared to Three Months Ended March 31, 2014

Core operating expenses increased \$0.8 (8%), primarily due to an increase in corporate project costs. These expenses as a percentage of revenue were 2.7%, an increase of 20 basis points from 2014.

Edgar Filing: Hillenbrand, Inc. - Form 10-Q

Six Months Ended March 31, 2015 Compared to Six Months Ended March 31, 2014

Core operating expenses increased \$0.8 (4%) primarily due to an increase in corporate project costs. These expenses as a percentage of revenue remained flat compared to 2014.

Table of Contents

	Three Months Ended March 31,		Six Months Ended March 31,	
	2015	2014	2015	2014
Consolidated net income	\$31.2	\$33.3	\$60.9	\$54.9
Interest income	(0.4)	(0.1)	(0.7)	(0.3)
Interest expense	6.4	5.6	12.1	11.9
Income tax expense	14.3	13.7	26.1	22.7
Depreciation and amortization	13.4	14.7	28.4	29.0
EBITDA	\$64.9	\$67.2	\$126.8	\$118.2
Business acquisition and integration	(0.1)	1.1	0.2	3.0
Restructuring	0.7	0.9	1.4	1.2
Litigation	—	—	0.5	—
Adjusted EBITDA	\$65.5	\$69.2	\$128.9	\$122.4

Consolidated adjusted EBITDA decreased \$3.7 (5%) for the three months ended March 31, 2015 compared to the same period in 2014. The decrease during the three months ended March 31, 2015 was driven primarily by a decline in income on limited partnership investments from a \$2.9 gain in 2014 to \$1.7 expense in 2015. There were also two one-time transactions that occurred in 2014, including a \$5.2 gain on the exercise of warrants to purchase common stock of Forethought Financial Group, Inc. (“Forethought”) and a \$2.5 gain related to the cancellation of a service agreement at Batesville. There was also a \$2.9 increase in foreign currency exchange loss in 2015 largely driven by the rapid appreciation of the Swiss Franc against other currencies when the Swiss National Bank suddenly removed currency support tied to the Euro in January 2015. These decreases were partially offset by increased volume of equipment sales and an increase in average selling price for equipment and replacement parts and service at the Process Equipment Group and higher volume at Batesville.

For the six months ended March 31, 2015, consolidated adjusted EBITDA increased \$6.5 (5%) compared to the same period in 2014. The increase was driven primarily by increased volume of equipment sales and an increase in average selling price for equipment and replacement parts and service at the Process Equipment Group and higher volume at Batesville. These increases were partially offset by a decline in income on limited partnership investments from a \$2.7 gain in 2014 to \$1.4 expense in 2015. There were also two one-time transactions that occurred in 2014, including a \$5.2 gain on the exercise of warrants to purchase common stock of Forethought Financial Group, Inc. (“Forethought”) and a \$2.5 gain related to the cancellation of a service agreement at Batesville. There was also a \$3.4 increase in foreign currency exchange loss in 2015.

LIQUIDITY AND CAPITAL RESOURCES

We believe our ability to generate cash from operating activities is one of our fundamental financial strengths. In this section, we discuss our ability to generate and access cash to meet business needs. We describe actual results in generating and utilizing cash by comparing the first six months of 2015 to the same period last year. We discuss how we see cash flow being affected for the next twelve months. While it is not a certainty, we explain where we think the cash will come from and how we intend to use it. Finally, we identify other significant matters that could affect liquidity on an ongoing basis.

We believe the 12-month outlook for our business remains strong. Although cash flow from operations in the Process Equipment Group naturally experiences substantial fluctuations driven by working capital requirements at Coperion (due to the type of product and geography of customer projects in process at any point in time), we believe we have significant flexibility to meet our financial commitments including working capital needs, capital expenditures, and financing obligations. Our debt financing includes long-term senior unsecured notes, including the Series A Notes, and our revolving credit facility and term loan (the “Facility”) as part of our overall financing strategy. We believe we continue to have ready access to capital markets, and we regularly review the optimal mix of fixed-rate and

variable-rate debt. In addition to cash balances and our ability to access additional long-term financing, we had \$537.8 of maximum borrowing capacity under the Facility as of March 31, 2015, of which \$402.9 of borrowing capacity is immediately available based on our leverage covenant at March 31, 2015, with additional amounts available in the event of a qualifying acquisition. The available borrowing capacity reflects a reduction of \$15.9 for outstanding letters of credit issued under the Facility. The Company may request an increase of up to \$300.0 to the total borrowing capacity under the Facility, subject to the approval of the lenders.

In the normal course of business, the Process Equipment Group provides customers with bank guarantees and other credit arrangements in support of performance, warranty, advance payment, and other contractual obligations. This form of trade finance is customary in the industry and, as a result, we are required to maintain adequate capacity to provide the guarantees. As of March 31, 2015, we had guarantee arrangements with capacity totaling \$210.0, under which \$153.3 was utilized for this

Table of Contents

purpose. These arrangements include a €150.0 Syndicated Letter of Guarantee Facility (as amended, “LG Facility”), under which unsecured letters of credit, bank guarantees, or other surety bonds may be issued. The Company may request an increase to the total capacity under the LG Facility by an additional €70.0 subject to approval of the lenders.

We have significant operations outside the U.S. The majority of foreign earnings is considered to be indefinitely reinvested in foreign jurisdictions where the Company has made, and intends to continue to make, substantial investments to support the ongoing development and growth of our international operations. Accordingly, no U.S. federal and state income taxes have been accrued on the portion of our foreign earnings that is considered to be indefinitely reinvested in foreign jurisdictions. The cash at our international subsidiaries totaled \$35.1 at March 31, 2015. We do not intend, nor do we foresee a need, to repatriate these funds; however, repatriation of these funds under current regulations and tax law for use in domestic operations would expose us to additional taxes.

Our anticipated contribution to our pension plans in 2015 is \$16.0, of which \$5.1 was made during the six months ended March 31, 2015. We will continue to monitor plan funding levels, performance of the assets within the plans, and overall economic activity, and will make additional discretionary funding decisions based on the net impact of these factors. On April 1, 2015 we announced an offer to provide former employees who are participants in the Company’s U.S. defined benefit pension plan (the “Plan”) the opportunity to elect a lump sum distribution of their earned Plan benefits. The Plan’s fiduciaries expect to make the lump sum payments to electing eligible participants in September, 2015, funded by the existing assets in the Plan. Based upon estimated participation rates, the Company expects to record a one-time, non-cash income statement settlement charge of approximately \$10.0-\$16.0 pre-tax in September, 2015. The actual amount of such charge will depend upon several factors, including the number of participants electing the lump sum option, trends in discount rates, and the actual return on Plan assets. The results of this offer will not impact the Company’s adjusted earnings, and the Company does not expect that the offer will have any material effect on its cash flow or balance sheet position.

We currently expect to pay quarterly cash dividends in the future comparable to those we paid in 2014, which will require approximately \$12.6 each quarter based on our outstanding common stock at March 31, 2015. We are currently authorized by our Board of Directors to purchase additional shares of our common stock, and may elect to do so, depending on market conditions and other needs for cash consistent with our growth strategy. We repurchased approximately 305,000 shares of our common stock for approximately \$9.2 as part of that plan during the six months ended March 31, 2015. Refer to Item 2 of Part II of this Form 10-Q for further discussion of the share repurchase plan authorized by our Board of Directors.

We believe existing cash, cash flows from operations, and the issuance of debt to continue to be sufficient to fund our operating activities and cash commitments for investing and financing activities. Based on these factors, we believe our current liquidity position is strong, and will continue to meet all of our financial commitments for the foreseeable future.

	Six Months Ended March 31,	
	2015	2014
Cash flows (used in) provided by:		
Operating activities	\$10.2	\$82.2
Investing activities	(12.5) (4.1
Financing activities	(12.3) (68.5
Effect of exchange rate changes on cash and cash equivalents	(0.4) (1.3
Net cash flows	\$(15.0) \$8.3

Operating Activities

Operating activities provided \$10.2 of cash during the first six months of fiscal year 2015, in contrast to providing \$82.2 of cash during the first six months of fiscal year 2014, a \$72.0 unfavorable swing. The first quarter of fiscal year 2015 consumed \$41.9 of operating cash flow, while the second quarter of fiscal year 2015 provided \$52.1 of operating cash flow. The consumption of cash in the first quarter was driven in part by a litigation settlement at Batesville and increased annual incentive compensation paid during the first quarter of the fiscal year, but it was primarily driven by a significant change in working capital balances at Coperion. During the second quarter, however, cash flow was much stronger as working capital positions began to rebound. We expect improvements to continue over the balance of the fiscal year.

During the first half of fiscal 2014 Coperion experienced a strong inflow of customer receipts on earlier stages of contracts in process. In contrast, during the first half of fiscal year 2015, continued progress on compounding and extrusion orders at Coperion required an increased outflow of supplier payments. In addition, advance payments on orders recently commencing

Table of Contents

manufacturing were lower on a period over period basis. Finally, payments on certain customer contracts were delayed due to the movement of delivery dates, causing our net working capital investment in those contracts to increase during the first quarter of fiscal year 2015. Our net working capital investment in those contracts decreased during the second quarter. We do anticipate delivery to occur and further payments to be received later this fiscal year.

Working capital requirements for Coperion may fluctuate this way due to the type of product and geography of customer projects in process at any point in time. Working capital needs are lower when advance payments from customers are more heavily weighted toward the beginning of the project. Conversely, working capital needs are higher when a larger portion of the cash is to be received in later stages of manufacturing.

Investing Activities

The increase in cash used in investing activities in the first six months of 2015 of \$8.4 was driven primarily by \$5.5 received in 2014 related to the exercise of warrants to purchase common stock of Forethought.

Financing Activities

Cash used in financing activities was largely impacted by net borrowing activity. Our general practice is to utilize our cash to pay down debt unless it is needed for an acquisition. Cash used in financing activities during the first six months of 2015 was \$12.3, including \$17.5 of proceeds, net of debt repayments and financing costs. This includes the issuance of \$100.0 in 4.60% Series A Notes.

Cash used in financing activities in the first six months of 2014 was \$68.5 primarily due to net debt repayments.

We returned \$25.2 to shareholders during the first six months of 2015 in the form of quarterly dividends. We increased our quarterly dividend in 2015 to \$0.2000 per common share from \$0.1975 per common share paid during 2014. In addition, we repurchased approximately 305,000 shares of our common stock in 2015, for a total cost of approximately \$9.2, as part of an approved and publicly announced program.

Off-Balance Sheet Arrangements

We have no significant off-balance sheet arrangements.

Recently Adopted and Issued Accounting Standards

For a summary of recently issued and adopted accounting standards applicable to us, see Item 1, Note 2 of Part I of this Form 10-Q.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS

A discussion of quantitative and qualitative disclosures about market risk may be found in Item 7A of our 2014 Form 10-K filed with the SEC on November 19, 2014. There have been no material changes in this information since the filing of our 2014 Form 10-K.

Item 4. CONTROLS AND PROCEDURES

Our management, with the participation of our President and Chief Executive Officer and our Senior Vice President and Chief Financial Officer (the "Certifying Officers"), evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of

Edgar Filing: Hillenbrand, Inc. - Form 10-Q

1934, as amended (the "Exchange Act")). Based upon that evaluation, the Certifying Officers concluded that our disclosure controls and procedures as of the end of the period covered by this report are effective.

There have been no changes in internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) for the period covered by this report that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

Table of Contents

PART II — OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

Information pertaining to legal proceedings can be found in Note 12 to the interim consolidated financial statements included in Part I, Item 1 of this Form 10-Q.

Item 1A. RISK FACTORS

In this section of the Form 10-Q, we describe the risks we believe are most important for you to think about when you consider investing in, selling, or owning our stock or debt. This information should be assessed along with the other information we provide you in this Form 10-Q. Like most companies, our business involves risks. The risks described below are not the only risks we face, but these are the ones we currently think have the potential to significantly affect stakeholders in our Company if they were to develop adversely (due to size, volatility, or both). We exclude risks that we believe are inherent in all businesses broadly as a function of simply being “in business.” Additional risks not currently known or considered immaterial by us at this time and thus not listed below could also result in adverse effects on our business. We have assigned the risks into categories to help you understand whether they emanate from the overall Company or a specific segment.

Risk Related to Hillenbrand

1. A key component of our growth strategy is making significant acquisitions, some of which may be outside the industries in which we currently operate. We may not be able to achieve some or all of the benefits that we expect to achieve from these acquisitions. If an acquisition were to perform unfavorably, it could have an adverse impact on our value.

All acquisitions involve inherent uncertainties, which may include, among other things, our ability to:

- successfully identify targets for acquisition;
- negotiate reasonable terms;
- properly perform due diligence and determine all the significant risks associated with a particular acquisition;
- successfully transition the acquired company into our business and achieve the desired performance; and
- where applicable, implement restructuring activities without an adverse impact to business operations.

We may acquire businesses with unknown liabilities, contingent liabilities, internal control deficiencies, or other risks. We have plans and procedures to review potential acquisition candidates for a variety of due diligence matters, including compliance with applicable regulations and laws prior to acquisition. Despite these efforts, realization of any of these liabilities or deficiencies may increase our expenses, adversely affect our financial position, or cause us to fail to meet our public financial reporting obligations.

We generally seek indemnification from sellers covering these matters; however, the liability of the sellers is often limited, and certain former owners may be unable to meet their indemnification responsibilities. We cannot assure you that these indemnification provisions will fully protect us, and as a result we may face unexpected liabilities that adversely affect our profitability and financial position.

We may not achieve the intended benefits of the acquisition and our business could be materially impacted. In addition, any benefits we anticipate from application of HBS may not be fully realized. Under such circumstances, management could be required to spend significant amounts of time and resources in the transition of the acquired business.

If we acquire a company that operates in an industry that is different from the ones in which we currently operate, our lack of experience with that company's industry could have a material adverse impact on our ability to manage that business and realize the benefits of that acquisition.

2. Global market and economic conditions, including those related to the financial markets, could have a material adverse effect on our operating results, financial condition, and liquidity.

Our business is sensitive to changes in general economic conditions, both inside and outside the U.S. Although we have seen stability or growth in some geographies since the global economic turmoil that began in 2008, we cannot assure you that these

Table of Contents

improvements will be sustainable or predict when the next recession will occur. In addition, continuing uncertainties in the euro zone may depress demand in the area and create additional risk to our financial results.

Instability in the global economy and financial markets can adversely affect our business in several ways, including limiting our customers' ability to obtain sufficient credit or pay for our products within the terms of sale. Competition could further intensify among the manufacturers and distributors with whom we compete for volume and market share, resulting in lower net revenue due to steeper discounts and product mix-down. In addition, if certain key or sole suppliers were to become capacity constrained or insolvent, it could result in a reduction or interruption in supplies or a significant increase in the price of supplies.

Substantial losses in the equity markets could have an adverse effect on the assets of the Company's pension plans. Volatility of interest rates and negative equity returns could require greater contributions to the defined benefit plans in the future.

3. International economic, political, legal, and business factors could negatively affect our operating results, cash flows, financial condition, and growth.

We derived approximately 44% and 46% of our revenue from our operations outside the U.S. for the six months ended March 31, 2015 and 2014. This revenue is primarily generated in Europe, the Middle East, Asia, South America, and Canada. In addition, we have manufacturing operations, suppliers, and employees located outside the U.S. Since our growth strategy depends in part on our ability to further penetrate markets outside the U.S., we expect to continue to increase our sales and presence outside the U.S., including in emerging markets.

Our international business is subject to risks that are often encountered in non-U.S. operations, including:

- interruption in the transportation of materials to us and finished goods to our customers;
- differences in terms of sale, including payment terms;
- local product preferences and product requirements;
- changes in a country's or region's political or economic condition, including with respect to safety and health issues;
- trade protection measures and import or export licensing requirements;
- unexpected changes in laws or regulatory requirements, including negative changes in tax laws;
- limitations on ownership and on repatriation of earnings and cash;
- difficulty in staffing and managing widespread operations;
- differing labor regulations;
- difficulties in enforcing contract and property rights under local law;
- difficulties in implementing restructuring actions on a timely or comprehensive basis; and
- differing protection of intellectual property.

Such risks may be more likely in emerging markets, where our operations may be subject to greater uncertainty due to increased volatility associated with the developing nature of their economic, legal, and governmental systems.

If we are unable to successfully manage the risks associated with expanding our global business, or to adequately manage operational fluctuations, it could adversely affect our business, financial condition, or results of operations.

4. We rely upon our employees, agents, and business partners to comply with laws in many different countries and jurisdictions. We establish policies and provide training to assist them in understanding our policies and the regulations most applicable to our business; however, our reputation, ability to do business, and financial results may be impaired by improper conduct by these individuals.

We cannot provide assurance that our internal controls and compliance systems will always protect us from acts committed by our employees, agents, or business partners that would violate U.S. and/or non-U.S. laws, including the laws governing payments to government officials, bribery, fraud, anti-kickback and false claims, competition, export and import compliance, money laundering, and data privacy. In particular, the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act, and similar anti-bribery laws in other jurisdictions generally prohibit companies and their intermediaries from making improper payments

Table of Contents

to government officials for the purpose of obtaining or retaining business, and we operate in many parts of the world that have experienced governmental corruption to some degree. Any such improper actions could subject us to civil or criminal investigations in the U.S. and in other jurisdictions; could lead to substantial civil and criminal, monetary and non-monetary penalties, and related shareholder lawsuits; could cause us to incur significant legal fees; and could damage our reputation.

5. We are subject to risks arising from currency exchange rate fluctuations, which may adversely affect our results of operations and financial condition.

We are subject to currency exchange rate risk to the extent that our costs are denominated in currencies other than those in which we earn revenues. In addition, since our financial statements are denominated in U.S. dollars, changes in currency exchange rates between the U.S. dollar and other currencies have had, and will continue to have, an impact on our results of operations. Although we address currency risk management through regular operating and financing activities, and through the use of derivative financial instruments, those actions may not prove to be fully effective.

6. Increased prices for, or unavailability of, raw materials used in our products could adversely affect profitability.

Our profitability is affected by the prices of the raw materials used in the manufacture of our products. These prices fluctuate based on a number of factors beyond our control, including changes in supply and demand, general economic conditions, labor costs, fuel-related delivery costs, competition, import duties, tariffs, currency exchange rates, and, in some cases, government regulation. Significant increases in the prices of raw materials that cannot be recovered through increases in the price of our products could adversely affect our results of operations and cash flows.

We cannot guarantee that the prices we are paying for commodities today will continue in the future or that the marketplace will continue to support current prices for our products or that such prices can be adjusted to fully offset commodity price increases in the future. Any increases in prices resulting from a tightening supply of these or other commodities could adversely affect our profitability. We do not engage in hedging transactions for raw material purchases, but we do enter into some fixed-price supply contracts.

Our dependency upon regular deliveries of supplies from particular suppliers means that interruptions or stoppages in such deliveries could adversely affect our operations until arrangements with alternate suppliers could be made. Several of the raw materials used in the manufacture of our products currently are procured from a single source. If any of these sole-source suppliers were unable to deliver these materials for an extended period of time as a result of financial difficulties, catastrophic events affecting their facilities, or other factors, or if we were unable to negotiate acceptable terms for the supply of materials with these sole-source suppliers, our business could be adversely affected. We may not be able to find acceptable alternatives, and any such alternatives could result in increased costs. Extended unavailability of a necessary raw material could cause us to cease manufacturing one or more products for a period of time.

7. The Company could face labor disruptions that would interfere with operations.

As of March 31, 2015, approximately 40% of Hillenbrand's employees work under collective bargaining agreements. Although we have not experienced any significant work stoppages in the past 20 years as a result of labor disagreements, we cannot ensure that such a stoppage will not occur in the future. Inability to negotiate satisfactory new agreements or a labor disturbance at one or more of our facilities could have a material adverse effect on our operations.

8. Volatility in our investment portfolio could adversely impact our operating results and financial condition.

Hillenbrand has certain investments that were transferred to us by our former parent company with an aggregate carrying value of \$9.0 as of March 31, 2015. Volatility in our investment portfolio impacts earnings. These investments could be adversely affected by general economic conditions, changes in interest rates, equity market volatility, and other factors, resulting in an adverse impact on our operating results and financial condition.

9. We are involved from time to time in claims, lawsuits, and governmental proceedings relating to our operations, including environmental, antitrust, patent infringement, business practices, commercial transactions, and other matters. The ultimate outcome of these claims, lawsuits, and governmental proceedings cannot be predicted with certainty, but could have a material adverse effect on our financial condition, results of operations, and cash flows.

We are also subject to other potential claims, including product and general liability, workers compensation, auto liability, and employment-related matters. While we maintain insurance for certain of these exposures, the policies in place are high-deductible policies.

Table of Contents

10. We have historically used debt to finance acquisitions. Increasing our debt could adversely affect the Company and limit our ability to respond to changes in our businesses. We expect to continue to make acquisitions as a key component of our growth strategy.

As of March 31, 2015, our outstanding debt was \$570.8. This level of debt and additional debt we may incur in the future could have important consequences to our businesses. For example:

We may be more vulnerable to general adverse economic and industry conditions because we have lower borrowing capacity.

We will be required to dedicate a larger portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow for other purposes, including business development efforts and acquisitions.

We will continue to be exposed to the risk of increased interest rates because a portion of our borrowings is at variable rates of interest.

We may be more limited in our flexibility in planning for, or reacting to, changes in our businesses and the industries in which they operate, thereby placing us at a competitive disadvantage compared to competitors that have less indebtedness.

We may be more vulnerable to credit rating downgrades, which could have an impact on our ability to secure future financing at attractive interest rates.

11. Provisions in our Articles of Incorporation and By-laws and facets of Indiana law may prevent or delay an acquisition of the Company, which could decrease the trading price of our common stock.

Our Articles of Incorporation and By-laws, as well as Indiana law, contain provisions that could delay or prevent changes in control if our Board of Directors determines that such changes in control are not in the best interests of our shareholders. While these provisions have the effect of encouraging persons seeking to acquire control of our Company to negotiate with our Board of Directors, they could enable our Board of Directors to hinder or frustrate a transaction that the Board of Directors believes is not in the best interests of shareholders, but which some, or a majority, of our shareholders might believe to be in their best interests.

These provisions include, among others:

- the division of our Board of Directors into three classes with staggered terms;
- the inability of our shareholders to act by less than unanimous written consent;
- rules regarding how shareholders may present proposals or nominate directors for election at shareholder meetings;
- the right of our Board of Directors to issue preferred stock without shareholder approval; and
- limitations on the right of shareholders to remove directors.

Indiana law also imposes some restrictions on mergers and other business combinations between us and any holder of 10% or more of our outstanding common stock.

We believe these provisions are important for a public company and protect our shareholders from coercive or otherwise potentially unfair takeover tactics by requiring potential acquirers to negotiate with our Board of Directors and by providing our Board of Directors with appropriate time to assess any acquisition proposal. These provisions are not intended to make our Company immune from takeovers; however, they may apply if the Board of Directors determines that a takeover offer is not in the best interests of our shareholders, even if some shareholders believe the offer to be beneficial.

Risk Related to the Process Equipment Group

1. A significant portion of our investments in the Process Equipment Group includes goodwill and intangible assets that are subject to periodic impairment evaluations. An impairment loss on these assets could have a material adverse impact on our financial condition and results of operations.

We acquired intangible assets with the acquisitions of Coperion, K-Tron, and Rotex, portions of which were identified as either goodwill or indefinite-lived assets. We periodically assess these assets to determine if they are impaired. Significant negative

35

Table of Contents

industry or economic trends, disruptions to our business, inability to effectively integrate acquired businesses, unexpected significant changes, or planned changes in use of the assets, divestitures, and market capitalization declines may impair these assets. Any charges relating to such impairments could adversely affect our results of operations in the periods recognized.

2. The Process Equipment Group operates in cyclical industries.

As an industrial capital goods supplier, the Process Equipment Group serves industries that are cyclical. During periods of economic expansion, when capital spending normally increases, the Process Equipment Group generally benefits from greater demand for its products. During periods of economic contraction, when capital spending normally decreases, the Process Equipment Group generally is adversely affected by declining demand for new equipment orders, and it may be subject to uncollectible receivables from customers who become insolvent. There can be no assurance that economic expansion or increased demand will be sustainable.

3. The Process Equipment Group derives significant revenues from the plastics industry. Any decrease in demand for plastics could have a material adverse effect on our business, financial condition, and results of operations.

The Process Equipment Group sells extruders and compounding systems to the plastics industry. Its sales are tied to the consumption of plastic products. The demand for plastics is dependent upon the consumer's choice. As a result, any downturn in or disruption to the plastics industry or decrease in the demand for plastics, could have a material adverse effect on our business, financial condition, and results of operations.

4. The Process Equipment Group derives significant revenues from the energy industry. Any decrease in demand for electricity, natural gas, or coal, or an increase in regulation of the energy industry could have a material adverse effect on our business, financial condition, and results of operations.

The Process Equipment Group sells dry material separation and size reduction equipment to the electric generating, natural gas, and coal mining industries. A significant portion of its sales are tied to the consumption of natural gas and coal as a means of generating electricity. The demand for natural gas and coal is dependent upon the availability and cost of alternative sources of energy, such as oil or nuclear power. Additionally, the cost of compliance with federal, state, and local laws and regulations on the energy industry may impact the demand for our products. As a result, any downturn in or disruption to the natural gas or coal industries or decrease in the demand for electricity could have a material adverse effect on our business, financial condition, and results of operations.

Risk Related to Batesville

1. Continued fluctuations in mortality rates and increased cremations may adversely affect, as they have in recent years, the sales volume of our burial caskets.

The life expectancy of U.S. citizens has increased steadily since the 1950s and is expected to continue to do so for the foreseeable future. However, we do anticipate a modest increase in deaths every year driven by the aging U.S. population.

Cremations as a percentage of total U.S. deaths have increased steadily since the 1960s and are expected to continue to increase for the foreseeable future. The increase in the number of cremations in the U.S. has resulted in a contraction in the demand for burial caskets. This has been a contributing factor to lower burial casket sales volumes for Batesville in each of the last five years. We expect these trends will continue in the foreseeable future and will likely continue to negatively impact burial casket volumes.

Finally, the number of deaths can vary over short periods of time and among different geographical areas, due to a variety of factors, including the timing and severity of seasonal outbreaks of illnesses such as pneumonia and influenza. Such variations could cause the sale of burial caskets to fluctuate from quarter to quarter and year to year.

2. Batesville's business is dependent on several major contracts with large national funeral providers. The relationships with these customers pose several risks.

Batesville has contracts with a number of national funeral home customers that constitute a sizeable portion of its overall sales volume. Any decision by national funeral home customers to discontinue purchases from Batesville could have a material adverse effect on our financial condition, results of operations, and cash flows. Also, while contracts with national funeral service providers give Batesville important access to purchasers of death care products, they may obligate Batesville to sell

Table of Contents

products at contracted prices for extended periods of time, therefore limiting Batesville's ability, in the short term, to raise prices in response to significant increases in raw material prices or other factors.

3. Batesville is facing competition from a number of non-traditional sources and from caskets manufactured abroad and imported into North America.

Non-traditional death care product providers, such as large discount retail stores, casket stores, and internet casket retailers could present more of a competitive threat to Batesville and its sales channel than is currently anticipated. In addition, a few foreign manufacturers, mostly from China, import caskets into the U.S. and Canada. For the past three years, sales from these non-traditional and Chinese providers have remained relatively stable and represent a small percentage of total casket sales in North America, collectively less than 5%. It is not possible to quantify the financial impact that these competitors will have on Batesville in the future. These competitors and any new entrants into the funeral products business may drive pricing and other competitive actions in an industry that already has nearly twice the necessary domestic production capacity. Such competitive developments could have a negative impact on our results of operations and cash flows.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table summarizes repurchases of common stock during the quarter ended March 31, 2015:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Dollar Amount that May Yet be Purchased Under Plans or Programs (1)
January	1,800	\$30.00	1,800	\$54.2
February	—	\$—	—	\$54.2
March	80,980	\$30.15	80,980	\$51.8
Total	82,780	\$30.15	82,780	\$51.8

(1) On July 24, 2008, our Board of Directors approved the repurchase of up to \$100.0 of common stock. As of March 31, 2015, we had repurchased approximately 2,000,000 shares for an aggregate price of \$48.2. The stock repurchase approval has no expiration date, and there was no termination of the stock repurchase plan during the quarter ended March 31, 2015.

Item 6. EXHIBITS

The exhibits filed with this report are listed on the Exhibit Index, which is incorporated herein by reference. In reviewing any agreements included as exhibits to this report, please remember that they are included to provide you with information regarding their terms and are not intended to provide any other factual or disclosure information about us or the other parties to the agreements. The agreements may contain representations and warranties by the parties to the agreements, including us. Except where explicitly stated otherwise, these representations and warranties have been made solely for the benefit of the other parties to the applicable agreement and:

- should not necessarily be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate;

- may have been qualified by disclosures that were made to the other party in connection with the negotiation of the applicable agreement, which disclosures are not necessarily reflected in the agreement;
- may apply standards of materiality in a way that is different from what may be viewed as material to you or other investors; and
- were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement and are subject to more recent developments.

Accordingly, these representations and warranties may not describe the actual state of affairs as of the date they were made or at any other time.
