FORM 10-Q

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2009

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 0-1684

Gyrodyne Company of America, Inc.
(Exact name of registrant as specified in its charter)

New York 11-1688021
(State or other (I.R.S.
jurisdiction of Employer
incorporation Identification
or No.)
organization)

1 Flowerfield, Suite 24, St. James, NY 11780
(Address and Zip Code of principal executive offices)

(631) 584-5400
(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check One):

Large accelerated filer
Non-accelerated filer

Accelerated filer
Smaller reporting company

Edgar Filing: GYRODYNE CO OF AMERICA INC - Form 10-Q

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes
 No

On May 1, 2009, 1,289,878 shares of the Registrant's common stock, par value \$1.00 per share, were outstanding.

FOOTNOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Quarterly Presentations:

The accompanying quarterly financial statements have been prepared in conformity with accounting principles generally accepted in the United States ("GAAP"). The financial statements of the Registrant included herein have been prepared by the Registrant pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) and, in the opinion of management, reflect all adjustments which are necessary to present fairly the results for the three-month periods ended March 31, 2009 and 2008.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations; however, management believes that the disclosures are adequate to make the information presented not misleading.

This report should be read in conjunction with the audited financial statements and footnotes therein included in the Annual Report on Form 10-K for the year ended December 31, 2008.

The results of operations for the three-month period ended March 31, 2009 are not necessarily indicative of the results to be expected for the full year.

2. Principle of Consolidation:

The accompanying consolidated financial statements include the accounts of Gyrodyne Company of America, Inc. ("Company") and its wholly-owned subsidiaries. All intercompany balances and transactions have been eliminated.

3. Investment in Marketable Securities:

The Company's marketable securities consist of debt securities classified as available-for-sale and are reported at fair value, with the unrealized gains and losses excluded from operating results and reported as a separate component of stockholders' equity net of the related tax effect. These debt securities consist of hybrid mortgage-backed securities fully guaranteed by agencies of the U.S. Government and are managed by and held in an account with a major financial institution.

4. Earnings per Share:

Basic earnings per common share are computed by dividing net income by the weighted average number of shares of common stock outstanding during the period. Dilutive earnings per share give effect to stock options and warrants which are considered to be dilutive common stock equivalents. Basic income (loss) per common share was computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding. Treasury shares have been excluded from the weighted average number of shares. As of March 20, 2007, all outstanding stock options were either exercised or expired.

5. Income Taxes:

Deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse.

6. Mortgages Payable:

In March 2009, in connection with the purchase of the Fairfax Medical Center in Fairfax, Virginia, by Virginia Healthcare Center, LLC (“VHC”) a wholly-owned subsidiary of the Company, VHC borrowed \$8,000,000 from Virginia Commerce Bank (the “Fairfax Mortgage”). The Fairfax Mortgage bears interest at 5.875% through April 10, 2014 and adjusts to the higher of 5.50% or 300 basis points over the weekly average yield on five-year United States Treasury securities (the “Index Figure”), rounded upwards to the nearest 1/8 of 1%, as made available by the Federal Reserve Board and published in Federal Reserve Statistical Release H.15 (519), “Treasury Yields on Actively Traded Issues Adjusted to Constant Maturities,” or any successor publication. The Fairfax Mortgage is payable in monthly installments of principal and interest totaling \$51,354 through April 10, 2014, at which point the monthly installments through April 10, 2019 will vary as described above. On April 10, 2019 (the “Maturity Date”) a balloon payment is due of approximately \$6,152,000. The Fairfax Mortgage is collateralized by a Deed of Trust and Security Agreement establishing a first trust lien upon the land, buildings and improvements as well as a Collateral Assignment of Leases and Rents. The payment of the indebtedness evidenced by the Fairfax Mortgage and the performance by VHC of its obligations thereunder have been guaranteed by the Company.

Seq. Page 6

7. Retirement Plans:

The Company records net periodic pension benefit cost pro rata throughout the year. The following table provides the components of net periodic pension benefit cost for the plan for the three months ended March 31, 2009 and 2008:

	Three Months Ended March 31,	
	2009	2008
Pension Benefits		
Service Cost	\$ 34,284	\$ 23,314
Interest Cost	37,218	33,493
Expected Return on Plan Assets	(29,304)	(55,560)
Amortization of Actuarial Loss	29,348	1,782
Net Periodic Benefit Cost After Curtailments and Settlements	\$ 71,546	\$ 3,029

During the three months ended March 31, 2009, the Company made a \$100,000 contribution to the plan. The minimum required contribution for the December 31, 2009 plan year is \$254,780 plus additional interest depending on the actual date of deposit. During the three months ended March 31, 2008, the Company did not make a contribution to the plan.

8. Commitments and Contingencies:

Lease revenue commitments - The approximate future minimum revenues from rental property under the terms of all noncancellable tenant leases, assuming no new or renegotiated leases are executed for such premises, are as follows:

Twelve Months Ending March 31,	Amount
2010	\$ 4,008,000
2011	2,695,000
2012	1,596,000
2013	982,000
2014	724,000
Thereafter	1,759,000
	\$ 11,764,000

Employment agreements – The Company has employment agreements with two officers that provide for annual salaries aggregating approximately \$397,000 and a severance payment equivalent to three years salary and other benefits in the event of a change in control, termination by the Company without cause or termination by the officer for good reason.

Land consulting agreement – The Company retained DPMG, Inc. d/b/a Landmark National, commencing on March 1, 2007 for general consulting, review of pertinent documents, consultations regarding land planning and economic feasibility studies and coordination with project engineers associated with the Company's claim for additional compensation in its condemnation litigation (See Part II Item 1: Legal Proceedings). The agreement provides for equal monthly payments of \$27,778 terminating on February 1, 2010. Part of the monthly payments are in recognition of services rendered between 2004 and 2006.

9. Revolving Credit Note:

The Company's line of credit has a borrowing limit of \$1,750,000, bears interest at the lending institution's prime-lending rate (3.25% at March 31, 2009) plus 1%, and is subject to certain financial covenants. The line is secured by certain real estate and expires on June 1, 2009. As of March 31, 2009 and December 31, 2008, \$1,750,000 was available under this agreement and the Company was in compliance with the financial covenants.

Seq. Page 7

10. Fair Value of Financial Instruments:

Effective January 1, 2008, the Company adopted Statement No. 157, "Fair Value Measurements" ("FAS No. 157"), which establishes a framework for measuring fair value by creating a three-level fair value hierarchy that ranks the quality and reliability of information used to determine fair value, and requires new disclosures of assets and liabilities measured at fair value based on their level in the hierarchy. FAS No. 157 also defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. FAS No. 157 applies to reported balances that are required or permitted to be measured at fair-value under existing accounting pronouncements; accordingly, the standard does not require any new fair-value measurements of reported balances. The application of FAS No. 157, however, may change current practice within an organization. FAS No. 157 was effective January 1, 2008, applied prospectively. In February 2008, the FASB issued FAS Staff Position No.157-2, "Effective Date of FASB Statement No. 157", which provided a one-year deferral for the implementation of FAS No. 157 for certain non-financial assets and liabilities measured on a nonrecurring basis. The provisions of FAS No. 157 relating to certain non-financial assets and liabilities will be effective January 1, 2009. The adoption of FAS No. 157 with respect to financial and non-financial assets and liabilities did not have a material financial impact on the Company's consolidated results of operations or financial condition.

FAS No. 157 establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the financial instrument developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's estimates about what assumptions market participants would use in pricing the financial instrument developed based on the best information available in the circumstances. The fair value hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1: Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment.

Financial instruments utilizing Level 1 inputs generally include exchange-traded equity securities listed in active markets and most U.S. Government securities.

Level 2: Valuations based on quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Financial instruments utilizing Level 2 inputs generally include certain mortgage-backed securities, or MBS, and corporate debt securities and certain financial instruments classified as derivatives, including interest rate swap contracts and credit default swaps, where fair value is based on observable market inputs.

Level 3: Inputs are unobservable inputs for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

11. Acquisition of Properties:

On March 31, 2009, the Company, through its subsidiary Virginia Healthcare Center, LLC, acquired the Fairfax Medical Center in Fairfax, Virginia, (the "Property") from Fairfax Medical Center, LLC (the "Seller"). The Property consists of two office buildings which are situated on 3.5 acres with approximately 58,000 square feet of rentable space and an occupancy rate of 84% when acquired. The purchase price was \$12,891,000 or approximately \$222 per square foot. The current aggregate monthly rent flow from the Property is approximately \$96,000. There is no material relationship between the Company and the Seller. Of the \$12,891,000 purchase price for the Property, the Company paid \$4,891,000 in cash and received financing in the amount of \$8,000,000 from Virginia Commerce Bank. In addition, \$131,966 of costs associated with the acquisition was capitalized. The total capitalized costs were allocated as follows:

Land	\$	2,661,000
Buildings	\$	10,361,966
Mortgage payable	\$	(8,000,000)
Cash	\$	5,022,966

Seq. Page 8

Edgar Filing: GYRODYNE CO OF AMERICA INC - Form 10-Q

On a pro forma basis, the comparison of revenues, loss before benefit for income taxes, benefit for income taxes, net income (loss) and net income (loss) per share for the three months ended March 31, 2009 and 2008, as if the Company owned the Fairfax Medical Center at the beginning of both periods, are as follows:

	March 31, 2009	March 31, 2008
Revenues	\$ 1,159,604	\$ 975,537
Loss Before Benefit for Income Taxes	\$ 361,665	\$ 113,858
Benefit for Income Taxes	\$ (4,127,000)	\$ -
Net Income (Loss)	\$ 3,765,335	\$ (113,858)
Net Income (Loss) Per Share	\$ 2.92	\$ (0.09)

The transaction qualifies for the deferral treatment under Section 1033 of the Internal Revenue Code and completes the reinvestment program of the \$26.3 million Advance Payment received in connection with the condemnation of the 245 acres of the Flowerfield property and is also a qualified REIT Investment.

12. Reclassifications:

Certain reclassifications have been made to the consolidated financial statements for the three months ended March 31, 2008 to conform to the classification used in the current fiscal year. These changes have no effect on previously reported net income.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The statements made in this Form 10-Q that are not historical facts contain "forward-looking information" within the meaning of the Private Securities Litigation Reform Act of 1995, and Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, both as amended, which can be identified by the use of forward-looking terminology such as "may," "will," "anticipates," "expects," "projects," "estimates," "believes," "seeks," "could," "should," or "continue," the negative thereof, other variations or comparable terminology. Important factors, including certain risks and uncertainties, with respect to such forward-looking statements that could cause actual results to differ materially from those reflected in such forward-looking statements include, but are not limited to, the effect of economic and business conditions, including risks inherent in the real estate markets of Suffolk and Westchester Counties in New York, Palm Beach County in Florida and Fairfax County in Virginia, the ability to obtain additional capital in order to develop the existing real estate, uncertainties associated with the Company's litigation against the State of New York for just compensation for the Flowerfield property taken by eminent domain, and other risks detailed from time to time in the Company's SEC reports. These and other matters the Company discusses in this Report, or in the documents it incorporates by reference into this Report, may cause actual results to differ from those the Company describes. The Company assumes no obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise.

Critical Accounting Policies

The consolidated financial statements of the Company include accounts of the Company and all majority-owned and controlled subsidiaries. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions in certain circumstances that affect amounts reported in the Company's consolidated financial statements and related notes. In preparing these financial statements, management has utilized information available including its past history, industry standards and the current economic environment, among other factors, in forming its estimates and judgments of certain amounts included in the consolidated financial statements, giving due consideration to materiality. It is possible that the ultimate outcome as anticipated by management in formulating its estimates inherent in these financial statements might not materialize. However, application of the critical accounting

policies below involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. In addition, other companies may utilize different estimates, which may impact comparability of the Company's results of operations to those of companies in similar businesses.

Revenue Recognition

Rental revenue is recognized on a straight-line basis, which averages minimum rents over the terms of the leases. The excess of rents recognized over amounts contractually due, if any, is included in deferred rents receivable on the Company's balance sheets. Certain leases also provide for tenant reimbursements of common area maintenance and other operating expenses and real estate taxes. Ancillary and other property related income is recognized in the period earned.

Seq. Page 9

Real Estate

Rental real estate assets, including land, buildings and improvements, furniture, fixtures and equipment are recorded at cost. Tenant improvements, which are included in buildings and improvements, are also stated at cost. Expenditures for ordinary maintenance and repairs are expensed to operations as they are incurred. Renovations and/or replacements, which improve or extend the life of the asset, are capitalized and depreciated over their estimated useful lives.

Depreciation is computed utilizing the straight-line method over the estimated useful life of ten to thirty nine years for buildings and improvements and three to twenty years for machinery and equipment.

The Company is required to make subjective assessments as to the useful life of its properties for purposes of determining the amount of depreciation to reflect on an annual basis with respect to those properties. These assessments have a direct impact on the Company's net income. Should the Company lengthen the expected useful life of a particular asset, it would be depreciated over more years, and result in less depreciation expense and higher annual net income.

Real estate held for development is stated at the lower of cost or net realizable value. In addition to land, land development and construction costs, real estate held for development includes interest, real estate taxes and related development and construction overhead costs which are capitalized during the development and construction period. Net realizable value represents estimates, based on management's present plans and intentions, of sale price less development and disposition cost, assuming that disposition occurs in the normal course of business.

Long Lived Assets

On a periodic basis, management assesses whether there are any indicators that the value of the real estate properties may be impaired. A property's value is considered to be impaired if management's estimate of the aggregate future cash flows (undiscounted and without interest charges) to be generated by the property is less than the carrying value of the property. Such future cash flow estimates consider factors such as expected future operating income, trends and prospects, as well as the effects of demand, competition and other factors. To the extent impairment occurs, the loss will be measured as the excess of the carrying amount of the property over the fair value of the property.

The Company is required to make subjective assessments as to whether there are impairments in the value of its real estate properties and other investments. These assessments have a direct impact on the Company's net income, since an impairment charge results in an immediate negative adjustment to net income. In determining impairment, if any, the Company has adopted Financial Accounting Standards Board ("FASB") Statement No. 144, "Accounting for the Impairment or Disposal of Long Lived Assets."

Assets and Liabilities Measured at Fair-Value

On January 1, 2008, the Company adopted SFAS No. 157, Fair Value Measurements ("SFAS No. 157"), which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair-value measurements. SFAS No. 157 applies to reported balances that are required or permitted to be measured at fair value under existing accounting pronouncements; accordingly, the standard does not require any new fair value measurements of reported balances.

On January 1, 2008, the Company adopted SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, which permits companies to choose to measure certain financial instruments and other items at fair value in order to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently. However, the Company has not elected to measure any additional financial instruments and other items at fair value (other than those previously required under other GAAP rules or standards) under the provisions of this standard.

SFAS No. 157 emphasizes that fair value is a market-based measurement, not an entity-specific measurement. Therefore, a fair-value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability. As a basis for considering market participant assumptions in fair-value measurements, SFAS No. 157 establishes a fair-value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Levels 1 and 2 of the hierarchy) and the reporting entity's own assumptions about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy).

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access. Level 2 inputs are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs may include quoted prices for similar assets and liabilities in active markets, as well as inputs that are observable for the asset or liability (other than quoted prices), such as interest rates, foreign exchange rates, and yield curves that are observable at commonly quoted intervals. Level 3 inputs are unobservable inputs for the asset or liability, which is typically based on an entity's own assumptions, as there is little, if any, related market activity. In instances where the determination of the fair-value measurement is based on inputs from different levels of the fair-value hierarchy, the level in the fair-value hierarchy within which the entire fair-value measurement falls is based on the lowest level input that is significant to the fair-value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair-value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

Seq. Page 10

Currently, the Company has investments in hybrid mortgage-backed securities, with a AAA rating fully guaranteed by U.S. government agencies (the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation). The fair values of mortgage-backed securities originated by U.S. government agencies are based on a pricing model that incorporates prepayment speeds and spreads to determine appropriate average life of mortgage-backed securities. The spreads are sourced from broker/dealer's trade prices and the new issue market. As the significant inputs used to price the mortgage-backed securities are observable market inputs, the fair values of these securities are included in the Level 2 fair value hierarchy.

RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED MARCH 31, 2009
AS COMPARED TO THE THREE MONTHS ENDED MARCH 31, 2008

The Company is reporting net income of \$3,741,588 for the three month period ended March 31, 2009 compared to a net loss of \$127,647 for the same period of the prior year. Basic and diluted income (loss) per share amounted to \$2.90 and \$(0.10) for the quarter ended March 31, 2009 and 2008, respectively. The current reporting period reflects a benefit for income taxes totaling \$4,127,000 resulting from the reinvestment of condemnation proceeds pursuant to Section 1033 of the Internal Revenue Code.

Revenues from rental income totaled \$858,710 for the current quarter, an increase of \$197,843 over the prior year quarterly results of \$660,867. For the most part, the increase is the result of the 2008 acquisition of the Cortlandt Medical Center which accounted for \$249,117 in rental income during the first quarter of 2009 while the Flowerfield and the Port Jefferson Professional Park facilities both experienced decreases totaling \$35,356 and \$19,277, respectively. In both cases, the temporary decline in revenues has effectively been addressed with the execution of new leases.

Total expenses amounted to \$1,301,088 for the current reporting period, an increase of \$422,881 over the prior year total of \$878,207. Rental expenses accounted for \$81,825 of the increase, amounting to \$335,866. Here again, the Cortlandt Medical Center acquisition was the major contributing factor, accounting for \$79,780 of the increase.

General and administrative expenses, which totaled \$851,322 accounted for \$289,529 of the increased expenses for the quarter. The major contributing factor to this increase was condemnation litigation expenses which totaled \$222,909, an increase of \$135,843 over the prior year. This increase is directly attributable to the submission of appraisal reports to the Court of Claims and preparation for a trial date in August 2009. Additionally, pension plan expenses increased by \$68,517 over the prior year, amounting to \$71,546; legal and consulting fees increased by \$60,475, totaling \$85,927; Directors fees and expenses increased by \$18,655, amounting to \$66,149; and salaries and benefits increased by \$16,326, amounting to \$190,989.

Depreciation expenses totaled \$113,900 for the current quarter, a \$51,527 increase over the prior year. Cortlandt Medical Center accounted for \$43,286 with the balance accounted for by the Company's other properties.

Interest income amounted to \$94,893 and reflects a decrease of \$65,896 when compared to the prior year. This reduction is primarily due to reduced investments in REIT qualified securities between the two reporting periods where funds were reallocated to fund real estate acquisitions. The Company realized a gain of \$123,442 primarily on the sale of the aforementioned securities during the current quarter and \$7,901 as a result of prepayments in REIT qualified securities during the same period last year, an increase of \$115,541.

Interest expense totaled \$161,369 for the three months ended March 31, 2009, compared to \$78,998 during the prior year. The increase of \$82,371 is primarily attributable to the 2008 acquisition of the Cortlandt Medical Center which accounted for \$70,574 of the total increase.

As a result, the Company is reporting a loss before benefit for income taxes of \$385,412 compared to a loss of \$127,647 for the same period last year.

As mentioned earlier in this report, a benefit for income taxes totaling \$4,127,000 resulted in the Company recording net income totaling \$3,741,588 for the three months ended March 31, 2009 compared to a net loss of \$127,647 for the same period last year.

Seq. Page 11

LIQUIDITY AND CAPITAL RESOURCES

Net cash used in operating activities was \$198,764 and \$533,728 during the three months ended March 31, 2009 and 2008, respectively. The cash used in operating activities in the current period was primarily related to a pension plan contribution of \$100,000, increased land development costs of \$54,109 and the prepayment of expenses and other assets of \$32,598. The cash used in operating activities in the prior period was primarily related to increased payments to vendors of \$399,522, the prepayment of expenses and other assets of \$56,742 and increased land development costs of \$33,683.

Net cash (used in) provided by investing activities were \$(6,809,398) and \$708,446 during the three months ended March 31, 2009 and 2008, respectively. Cash used in investing activities in the current period primarily consisted of the purchase of the Fairfax Medical Center, including deferred acquisition costs, of \$13,022,966 partially offset by the sale of marketable securities of \$6,805,800. The cash provided by investing activities in the prior period was essentially in connection with principal repayments of marketable securities of \$864,618.

Net cash provided by (used in) financing activities was \$7,795,800 and \$(21,318) during the three months ended March 31, 2009 and 2008, respectively. The net cash provided by financing activities in the current period was primarily in connection with obtaining a mortgage of \$8,000,000 for the purchase of the Fairfax Medical Center. The net cash used during the prior period was the result of principal repayments on mortgages of \$21,318.

The Company has a \$1,750,000 revolving credit line with a bank, bearing interest at a rate of prime (3.25% at March 31, 2009) plus 1%. At statement date, the full amount of the credit facility is available.

As of March 31, 2009, the Company had cash, cash equivalents and marketable securities totaling \$3,593,062 and anticipates having the capacity to fund normal operating, general and administrative expenses, and its regular debt service requirements.

Beginning in the second half of 2007, the residential mortgage and capital markets began showing signs of stress, primarily in the form of escalating default rates on sub-prime mortgages, declining residential home values and increasing inventory nationwide. This "credit crisis" spread to the broader commercial credit markets and has reduced the availability of financing and widened spreads. These factors, coupled with a slowing economy, have reduced the volume of real estate transactions and increased capitalization rates. Despite the fact that the Company has invested in medical office buildings, an asset class that has been less vulnerable, if these conditions continue, our portfolio may experience lower occupancy and effective rents, which would result in a corresponding decrease in net income, funds from operations, and cash flows.

LIMITED PARTNERSHIP INVESTMENT

The Company owns a 10.93% limited partnership interest in Callery Judge Grove, L. P. (the "Grove") which owns a 3,700+ acre citrus grove in Palm Beach County, Florida. The Company is accounting for the investment under the equity method. As of March 31, 2009, the carrying value of the Company's investment was \$0. The Grove had reported to its limited partners that in November 2008 it received an independent appraisal report of the citrus grove property which reflects the recent approval to develop 2,996 residential units and 235,000 square feet of commercial and retail space. Based upon the appraised value of the citrus grove property, at March 31, 2009, strictly on a pro-rata basis, the estimated fair value of the Company's interest in the Grove property would be approximately \$21,700,000, without adjustment for minority interest and lack of marketability discount. The Company cannot predict what, if any, value it will ultimately realize from this investment.

In February 2009, the Grove made an offering to its partners to invest additional funds in the partnership. The offering, or capital call, has a minimum and maximum aggregate offering amount of \$4 million and \$6 million,

respectively. In March 2009, the Company's management, following a determination by our Board of Directors, informed the Grove that it would not participate in the offering.

OFF-BALANCE SHEET ARRANGEMENTS

The Company has no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on its financial conditions, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Not required for smaller reporting companies.

Seq. Page 12

Item 4. Controls and Procedures.

The Company's management, including the Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of March 31, 2009. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective, in all material respects, to provide reasonable assurance that information required to be disclosed in the reports the Company files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission and that information is accumulated and communicated to the Company's management, including the CEO and CFO, to allow timely decisions regarding required disclosure. It should be noted that design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions regardless of how remote.

There have been no changes in the Company's internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rule 13a-15 that occurred during the Company's last fiscal quarter that has materially affected, or that is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

Gyrodyne Company of America, Inc. v. The State University of New York at Stony Brook

On May 1, 2006 the Company commenced litigation in the Court of Claims of the State of New York seeking just compensation for the 245.5 acres in St. James and Stony Brook, New York (the "Property") that were appropriated by the State on November 2, 2005 under the power of eminent domain. On November 10, 2008, Gyrodyne and the State of New York filed with the Court of Claims their respective appraisals regarding the value of the Property. As of the November 2005 appropriation date, Gyrodyne's appraiser has valued the Property at \$125,000,000, based in part upon a separate zoning analysis report that Gyrodyne also filed with the Court which concluded that there was a high probability the Property would have been rezoned from light industrial use to a Planned Development District. The State's appraiser appraised the Property using the current light industrial zoning at a fair market value of \$22,450,000.

As the State's appraisal is \$3,865,000 less than the \$26,315,000 Advance Payment already made to Gyrodyne, if the Court of Claims were to adopt the State of New York's November 10, 2008 appraisal, the State could recoup the \$3,865,000 difference between the Advance Payment and the State of New York's November 10, 2008 appraisal, including interest already paid on the Advance Payment.

The Company believes the State's appraisal is fundamentally flawed in that it misapplied the eminent domain law's requirement that just compensation be determined based upon the highest and best use and the probability that such use could have been achieved.

The Court of Claims has by Order dated February 25, 2009 scheduled the trial in this case to commence on August 3, 2009.

Faith Enterprises v. Gyrodyne, Supreme Court, Suffolk County, Index # 3511/2007.

Faith Enterprises ("Faith") a prior tenant at 7 Flowerfield, failed to fulfill its rental payment obligation. In February 2007, the Company served Faith with a notice of default. Faith sued the Company in Suffolk Supreme Court, seeking

to stop the eviction and seeking damages. In November 2007, the Company commenced a third-party action against the guarantors of Faith's lease. In late 2008 and early 2009, asset searches were conducted and it was determined that Faith and the guarantors do not have assets that could be used to satisfy any judgment that Gyrodyne may ultimately get in this case. As a result, the Company and Faith agreed to enter into a stipulation of discontinuance, which would discontinue Faith's litigation against the Company and the Company's litigation against Faith and its guarantors. The stipulation has been finalized and is in the process of being signed by the parties.

In addition, in the normal course of business, the Company is a party to various legal proceedings. After reviewing all actions and proceedings pending against or involving the Company, management considers the aggregate loss, if any, will not be material.

Items 2 through 5 are not applicable to the three months ended March 31, 2009.
