NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

June 30, 2011

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation: The interim unaudited consolidated financial statements contained herein should be read in conjunction with the audited consolidated financial statements and accompanying notes to the consolidated financial statements for the fiscal year ended December 31, 2010, including QCR Holdings, Inc.'s (the "Company") Form 10-K filed with the Securities and Exchange Commission on March 7, 2011. Accordingly, footnote disclosures, which would substantially duplicate the disclosures contained in the audited consolidated financial statements, have been omitted.

The financial information of the Company included herein has been prepared in accordance with U.S. generally accepted accounting principles for interim financial reporting and has been prepared pursuant to the rules and regulations for reporting on Form 10-Q and Rule 10-01 of Regulation S-X. Such information reflects all adjustments (consisting of normal recurring adjustments) that are, in the opinion of management, necessary for a fair presentation of the financial position and results of operations for the periods presented. Any differences appearing between the numbers presented in financial statements and management's discussion and analysis are due to rounding. The results of the interim period ended June 30, 2011, are not necessarily indicative of the results expected for the year ending December 31, 2011.

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries which include three state-chartered commercial banks: Quad City Bank & Trust Company ("QCBT"), Cedar Rapids Bank & Trust Company ("CRBT"), and Rockford Bank & Trust Company ("RB&T"). The Company also engages in direct financing lease contracts through its 80% equity investment by QCBT in m2 Lease Funds, LLC ("m2 Lease Funds"), and in real estate holdings through its 91% equity investment in Velie Plantation Holding Company, LLC ("VPHC"). All material intercompany transactions and balances have been eliminated in consolidation.

Reclassifications: Certain amounts in the prior year financial statements have been reclassified, with no effect on net income or stockholders' equity, to conform with current period presentation.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)-continued

Recent accounting developments: In April 2011, the Financial Accounting Standards Board (“FASB”) issued ASU 2011-2, A Creditor’s Determination of Whether a Restructuring Is a Troubled Debt Restructuring. ASU 2011-2 amends ASC Topic 310, Receivables, by clarifying guidance for creditors in determining whether a concession has been granted and whether a debtor is experiencing financial difficulties. The amendments are effective for the first interim or annual period beginning on or after June 15, 2011, and should be applied retrospectively to the beginning of the annual period of adoption. The Company has evaluated the effect of ASU 2011-2 and believes adoption will not have a material impact on the consolidated financial statements.

In April 2011, FASB issued ASU No. 2011-03, Transfers and Servicing (Topic 860) - Reconsideration of Effective Control for Repurchase Agreements. ASU 2011-03 is intended to improve financial reporting of repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. ASU 2011-03 removes from the assessment of effective control (i) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (ii) the collateral maintenance guidance related to that criterion. ASU 2011-03 will be effective for the Company on January 1, 2012 and is not expected to have a significant impact on the Company’s consolidated financial statements.

In May 2011, FASB issued ASU 2011-04, Fair Value Measurement (Topic 820) - Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRS. ASU 2011-04 amends Topic 820, Fair Value Measurements and Disclosures, to converge the fair value measurement guidance in U.S. generally accepted accounting principles and International Financial Reporting Standards. ASU 2011-04 clarifies the application of existing fair value measurement requirements, changes certain principles in Topic 820 and requires additional fair value disclosures. ASU 2011-04 is effective for annual periods beginning after December 15, 2011, and is not expected to have a significant impact on the Company’s consolidated financial statements.

In June 2011, FASB issued ASU 2011-05, Comprehensive Income (Topic 220) - Presentation of Comprehensive Income. ASU 2011-05 amends Topic 220, Comprehensive Income, to require that all nonowner changes in stockholders’ equity be presented in either a single continuous statement of comprehensive income or in two separate but consecutive statements. Additionally, ASU 2011-05 requires entities to present, on the face of the financial statements, reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement or statements where the components of net income and the components of other comprehensive income are presented. The option to present components of other comprehensive income as part of the statement of changes in stockholders’ equity was eliminated. ASU 2011-05 is effective for annual periods beginning after December 15, 2011, and is not expected to have a significant impact on the Company’s consolidated financial statements.

At June 30, 2011, the investment portfolio included 337 securities. Of this number, 84 securities had current unrealized losses with aggregate depreciation less than 1% from the amortized cost basis. Of these 84, two had unrealized losses for twelve months or more. All of the debt securities in unrealized loss positions are considered acceptable credit risks. Based upon an evaluation of the available evidence, including the recent changes in market rates, credit rating information and information obtained from regulatory filings, management believes the declines in fair value for these debt securities are temporary. In addition, the Company does not intend to sell these securities and it is not more-likely-than-not that the Company will be required to sell these debt securities before their anticipated recovery. At June 30, 2011 and December 31, 2010, equity securities represented less than 1% of the total portfolio.

The Company did not recognize other-than-temporary impairment on any debt securities for the three and six months ended June 30, 2011 and 2010.

During the second quarter of 2011, the Company's evaluation determined that two privately held equity securities experienced declines in fair value that were other-than-temporary. As a result, the Company wrote down the value of these securities and recognized losses in the amount of \$118,847. The Company did not recognize other-than-temporary impairment on any of its equity securities during the first quarter of 2011. Additionally, the

Company did not recognize other-than-temporary impairment on its equity securities for the three and six months ended June 30, 2010.

Part I
Item 1

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)-continued

All sales of securities, as applicable, for the three and six months ended June 30, 2011 and 2010, respectively, were from securities identified as available for sale. Information on proceeds received, as well as pre-tax gross gains from sales of those securities is as follows:

| | Three Months Ended | | Six Months Ended | |

| Pre-tax gross gains from sales of securities | 148,602 | - | 1,028,914 | - |

The amortized cost and fair value of securities as of June 30, 2011 by contractual maturity are shown below. A portion of the Company's U.S. government sponsored agency securities contain call options which allow the issuer, at its discretion, to call the security at predetermined dates prior to the contractual maturity date. Expected maturities of residential mortgage-backed securities may differ from contractual maturities because the residential mortgages underlying the residential mortgage-backed securities may be called or prepaid without any penalties. Therefore, these securities are not included in the maturity categories in the following table. Other securities are excluded from the maturity categories as there is no fixed maturity date.

**Includes residential real estate loans held for sale totaling \$2,251,437 and \$14,084,859 as of June 30, 2011 and December 31, 2010, respectively.

Management performs an evaluation of the estimated unguaranteed residual values of leased assets on an annual basis, at a minimum. The evaluation consists of discussions with reputable and current vendors and management's expertise and understanding of the current states of particular industries to determine informal valuations of the equipment. As necessary and where available, management will utilize valuations by independent appraisers. The large majority of leases with residual values contain a lease options rider which requires the lessee to pay the residual value directly, finance the payment of the residual value, or extend the lease term to pay the residual value. In these cases, the residual value is protected and the risk of loss is minimal.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)-continued

For commercial and industrial and commercial real estate loans, the Company's credit quality indicator is internally assigned risk ratings. Each commercial loan is assigned a risk rating upon origination. The risk rating is reviewed every 15 months, at a minimum, and on an as needed basis depending on the specific circumstances of the loan.

For direct financing leases, residential real estate loans, and installment and other consumer loans, the Company's credit quality indicator is performance determined by delinquency status. Delinquency status is updated daily by the Company's loan system.

NOTE 4 – FEDERAL HOME LOAN BANK ADVANCES

The subsidiary banks are members of the Federal Home Loan Bank ("FHLB") of Des Moines or Chicago. As of June 30, 2011 and December 31, 2010, the subsidiary banks held \$11,777,700 and \$12,980,200, respectively, of FHLB stock, which is included in restricted investment securities on the consolidated balance sheet.

During the first quarter of 2011, the Company's largest subsidiary bank, QCBT, prepaid \$15,000,000 of FHLB advances with a weighted average interest rate of 4.87% and a weighted average maturity of May 2012. In addition, QCBT modified \$20,350,000 of fixed rate FHLB advances with a weighted average interest rate of 4.33% and a weighted average maturity of October 2013 into new fixed rate FHLB advances with a weighted average interest rate of 3.35% and a weighted average maturity of February 2014.

Maturity and interest rate information on FHLB advances for the Company as of June 30, 2011 and December 31, 2010 is as follows:

NOTE 6 – BUSINESS SEGMENT INFORMATION

Selected financial and descriptive information is required to be disclosed for reportable operating segments, applying a “management perspective” as the basis for identifying reportable segments. The management perspective is determined by the view that management takes of the segments within the Company when making operating decisions, allocating resources, and measuring performance. The segments of the Company have been defined by the structure of the Company’s internal organization, focusing on the financial information that the Company’s operating decision-makers routinely use to make decisions about operating matters.

The Company’s primary segment, Commercial Banking, is geographically divided by markets into the secondary segments which are the three subsidiary banks wholly-owned by the Company: QCBT, CRBT, and RB&T. Each of these secondary segments offer similar products and services, but are managed separately due to different pricing, product demand, and consumer markets. Each offers commercial, consumer, and mortgage loans and deposit services.

The Company’s Wealth Management segment represents the trust and asset management and investment management and advisory services offered at the Company’s three subsidiary banks in aggregate. This segment generates income primarily from fees charged based on assets under administration for corporate and personal trusts, custodial services, and investments managed. No assets of the subsidiary banks have been allocated to the Wealth Management segment.

The Company’s All Other segment includes the operations of all other consolidated subsidiaries and/or defined operating segments that fall below the segment reporting thresholds. This segment includes the corporate operations of the parent company and the 91% owned real estate holding operations of VPHC.

NOTE 7 – FAIR VALUE

The measurement of fair value under U.S. GAAP uses a hierarchy intended to maximize the use of observable inputs and minimize the use of unobservable inputs. This hierarchy includes three levels and is based upon the valuation techniques used to measure assets and liabilities. The three levels are as follows:

1. Level 1 – Inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in markets;
2. Level 2 – Inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument; and
3. Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

A small portion of the securities available for sale portfolio consists of common stock issued by various unrelated bank holding companies. The fair values used by the Company are obtained from an independent pricing service and represent quoted market prices for the identical securities (Level 1 inputs).

The large majority of the securities available for sale portfolio consists of U.S. government sponsored agency securities for which the Company obtains fair values from an independent pricing service. The fair values are determined by pricing models that consider observable market data, such as interest rate volatilities, LIBOR yield curve, credit spreads and prices from market makers and live trading systems (Level 2 inputs).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)-continued

Certain financial assets are measured at fair value on a non-recurring basis; that is, the assets are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

Assets measured at fair value on a non-recurring basis comprise the following at June 30, 2011 and December 31, 2010:

| | Fair Value | Fair Value Measurements at Reporting Date Using | | |
|-------------------------|---------------|--|---|---|
| | | Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) |
| June 30, 2011: | | | | |
| Impaired loans/leases | \$ 12,425,608 | \$- | \$- | \$ 12,425,608 |
| Other real estate owned | 11,264,532 | - | - | 11,264,532 |
| | \$ 23,690,140 | \$- | \$- | \$ 23,690,140 |
| December 31, 2010: | | | | |
| Impaired loans/leases | \$ 21,501,447 | \$- | \$- | \$ 21,501,447 |
| Other real estate owned | 9,217,488 | - | - | 9,217,488 |
| | \$ 30,718,935 | \$- | \$- | \$ 30,718,935 |

Impaired loans/leases are evaluated and valued at the time the loan/lease is identified as impaired, at the lower of cost or fair value and are classified as a Level 3 in the fair value hierarchy. Fair value is measured based on the value of the collateral securing these loans/leases. Collateral may be real estate and/or business assets, including equipment, inventory and/or accounts receivable, and is determined based on appraisals by qualified licensed appraisers hired by the Company. Appraised and reported values may be discounted based on management's historical knowledge, changes in market conditions from the time of valuation, and/or management's expertise and knowledge of the client and client's business. Other real estate owned in the table above consists of property acquired through foreclosures and settlements of loans. Property acquired is carried at the lower of the principal amount of loans outstanding, or the estimated fair value of the property, less disposal costs, and is classified as a Level 3 in the fair value hierarchy.

For the impaired loans/leases and other real estate owned, the Company records carrying value at fair value less disposal or selling costs. The amounts reported in the tables above are fair values before the adjustment for disposal or selling costs.

There have been no changes in valuation techniques used for any assets measured at fair value during the six months ended June 30, 2011 or 2010.

| Accrued interest payable | 1,696,887 | 1,696,887 | 2,167,648 | 2,167,648 |

The methodologies for estimating the fair value of financial assets and liabilities that are measured at fair value on a recurring or non-recurring basis are discussed above. For certain financial assets and liabilities, carrying value approximates fair value due to the nature of the financial instrument. These instruments include: cash and due from banks, federal funds sold, interest-bearing deposits at financial institutions, accrued interest receivable and payable, demand and other non-maturity deposits, and short-term borrowings. The Company used the following methods and assumptions in estimating the fair value of the following instruments:

Loans/leases receivable: The fair values for variable rate loans equal their carrying values. The fair values for all other types of loans/leases are estimated using discounted cash flow analyses, using interest rates currently being offered for loans/leases with similar terms to borrowers with similar credit quality. The fair value of loans held for sale is based on quoted market prices of similar loans sold on the secondary market.

Deposits: The fair values disclosed for demand and other non-maturity deposits equal their carrying amounts, which represent the amount payable on demand. Fair values for time deposits are estimated using a discounted cash flow calculation that applies interest rates currently being offered on time deposits to a schedule of aggregate expected monthly maturities on time deposits.

Federal Home Loan Bank advances: The fair value of these instruments is estimated using discounted cash flow analyses, based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

Part I
Item 1

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)-continued

Other borrowings: The fair value for the wholesale repurchase agreements and fixed rate other borrowings is estimated using rates currently available for debt with similar terms and remaining maturities. The fair value for variable rate other borrowings is equal to its carrying value.

Junior subordinated debentures: It is not practicable to estimate the fair value of the Company's junior subordinated debentures as instruments with similar terms are not readily available in the market place.

Commitments to extend credit: The fair value of these instruments is not material.

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - continued
NET INTEREST INCOME

Net interest income, on a tax equivalent basis, increased \$1.4 million, or 11%, to \$14.1 million for the quarter ended June 30, 2011, from \$12.6 million for the second quarter of 2010. For the second quarter of 2011, average earning assets increased slightly while average interest-bearing liabilities declined \$73.0 million, or 5%, when compared with average balances for the second quarter of 2010. Offsetting this decline, average noninterest-bearing deposits grew \$86.6 million, or 40%, from the second quarter 2010 to the same period of 2011. A comparison of yields, spread and margin from the second quarter of 2011 to the second quarter of 2010 is as follows (on a tax equivalent basis):

- The average yield on interest-earning assets decreased 13 basis points.
- The average cost of interest-bearing liabilities decreased 43 basis points.
- The net interest spread improved 30 basis points from 2.60% to 2.90%.
- The net interest margin improved 31 basis points from 2.90% to 3.21%.

Net interest income, on a tax equivalent basis, increased \$839 thousand, or 3%, to \$26.4 million for the six months ended June 30, 2011, from \$25.6 million for the first six months of 2010. For the first half of 2011, average earning assets increased \$51.0 million, or 3%, while average interest-bearing liabilities declined \$37.6 million, or 3%, when compared with average balances for the first half of 2010. Offsetting this decline and primarily funding the growth in average earning assets, average noninterest-bearing deposits grew \$86.8 million, or 41%, from the first half of 2010 to the same period of 2011. A comparison of yields, spread and margin from the first half of 2011 to the first half of 2010 is as follows (on a tax equivalent basis):

- The average yield on interest-earning assets decreased 40 basis points.
- The average cost of interest-bearing liabilities decreased 38 basis points.
- The net interest spread declined 2 basis points from 2.68% to 2.66%.
- The net interest margin improved 1 basis point from 2.98% to 2.99%.

The Company's management closely monitors and manages net interest margin. From a profitability standpoint, an important challenge for the Company's subsidiary banks and majority-owned leasing company is the improvement of their net interest margins. Management continually addresses this issue with pricing and other balance sheet management strategies, including, but not limited to, the use of alternative funding sources.

Item 2

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - continued

For example, the Company's largest subsidiary bank, QCBT, executed a balance sheet restructuring during the first quarter of 2011. Specifically, the bank utilized excess liquidity and prepaid \$15.0 million of FHLB advances with a weighted average interest rate of 4.87% and a weighted average maturity of May 2012. The fees for prepayment totaled \$832 thousand. The Company sold \$37.4 million of government sponsored agency securities and recognized pre-tax gains of \$880 thousand which more than offset the prepayment fees. The proceeds from the sales of the government sponsored agency securities were reinvested into government guaranteed residential mortgage-backed securities with reduced risk-weighting for regulatory capital purposes and yields that were comparable to the sold securities. The resulting impacts were significant and include:

- Significantly reduced interest expense and improved net interest margin in subsequent quarters
 - Stronger regulatory capital
 - Reduced reliance on wholesale funding

Separately, during the first quarter of 2011, QCBT modified \$20.4 million of fixed rate FHLB advances with a weighted average interest rate of 4.33% and a weighted average maturity of October 2013 into new fixed rate advances with a weighted average interest rate of 3.35% and a weighted average maturity of February 2014. The modification reduces interest expense and improves net interest margin, and minimizes the exposure to rising rates through duration extension of fixed rate liabilities.

The Company's average balances, interest income/expense, and rates earned/paid on major balance sheet categories, as well as the components of change in net interest income, are presented in the following tables:

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - continued

CRITICAL ACCOUNTING POLICIES

The Company's financial statements are prepared in accordance with accounting principles generally accepted in the United States of America. The financial information contained within these statements is, to a significant extent, financial information that is based on approximate measures of the financial effects of transactions and events that have already occurred.

Based on its consideration of accounting policies that involve the most complex and subjective decisions and assessments, management has identified its most critical accounting policy to be that related to the allowance for estimated losses on loans/leases. The Company's allowance for estimated losses on loans/leases methodology incorporates a variety of risk considerations, both quantitative and qualitative, in establishing an allowance for estimated losses on loans/leases that management believes is appropriate at each reporting date. Quantitative factors include the Company's historical loss experience, delinquency and charge-off trends, collateral values, changes in nonperforming loans/leases, and other factors. Quantitative factors also incorporate known information about individual loans/leases, including borrowers' sensitivity to interest rate movements. Qualitative factors include the general economic environment in the Company's markets, including economic conditions throughout the Midwest, and in particular, the state of certain industries. Size and complexity of individual credits in relation to loan/lease structure, existing loan/lease policies and pace of portfolio growth are other qualitative factors that are considered in the methodology. Management may report a materially different amount for the provision for loan/lease losses in the statement of operations to change the allowance for estimated losses on loans/leases if its assessment of the above factors were different. This discussion and analysis should be read in conjunction with the Company's financial statements and the accompanying notes presented elsewhere herein, as well as the portion in the section entitled "Financial Condition" of this Management's Discussion and Analysis that discusses the allowance for estimated losses on loans/leases. Although management believes the level of the allowance as of June 30, 2011 is adequate to absorb losses inherent in the loan/lease portfolio, a decline in local economic conditions, or other factors, could result in increasing losses that cannot be reasonably predicted at this time.

The Company's assessment of other-than-temporary impairment of its available-for-sale securities portfolio is another critical accounting policy as a result of the level of judgment required by management. Available-for-sale securities are evaluated to determine whether declines in fair value below their cost are other-than-temporary. In estimating other-than-temporary impairment losses management considers a number of factors including, but not limited to, (1) the length of time and extent to which the fair value has been less than amortized cost, (2) the financial condition and near-term prospects of the issuer, (3) the current market conditions, and (4) the intent of the Company to not sell the security prior to recovery and whether it is not more-likely-than-not that the Company will be required to sell the security prior to recovery. The discussion regarding the Company's assessment of other-than-temporary impairment should be read in conjunction with the Company's financial statements and the accompanying notes presented elsewhere herein.

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - continued

RESULTS OF OPERATIONS

INTEREST INCOME

Interest income experienced a decline of \$497 thousand, or 2%, from \$20.4 million for the second quarter of 2010 to \$19.9 million for the second quarter of 2011. The Company's average interest-earning assets increased slightly from the second quarter of 2010 to the second quarter of 2011. Most notably, the Company grew its securities portfolio as the average balance investment securities increased \$107.9 million, or 27%. Mostly offsetting this growth, the average balance of the loan/lease portfolio declined \$54.8 million, or 4%, and the average balance of federal funds sold decreased a combined \$43.2 million, or 54%. This continued shift in interest-earning asset mix is the result of weak loan/lease demand and the Company's recent strategy to invest some of its excess liquidity in government sponsored agency securities and government guaranteed residential mortgage-backed securities.

As a result of continued weak loan/lease demand and an extended historical low interest rate environment, interest income has steadily declined since the third quarter of 2009. This trend was reversed in the second quarter of 2011 as interest income grew \$1.2 million, or 6%, when comparing the second quarter of 2011 to the first quarter of 2011. This quarter-over-quarter growth is attributable to net growth in loans/leases and the full impact of investing some of the Company's excess liquidity in the securities portfolio.

For the six months ended June 30, 2011, the Company recognized \$38.5 million of interest income compared to \$40.8 million of interest income for the same period in 2010. As mentioned above, the Company experienced significant growth in the average balance of its securities portfolio and a decline in the average balance of its loans/leases.

INTEREST EXPENSE

Interest expense declined \$1.9 million, or 24%, from \$7.8 million for the second quarter of 2010 to \$5.9 million for the second quarter of 2011. The Company's average balance of interest-bearing liabilities declined \$73.0 million, or 5%, from the second quarter of 2010 to the same quarter of 2011. Also contributing to the decline in interest expense, the Company has been successful in shifting the mix of funding from wholesale borrowings and brokered time deposits to core deposits. The aforementioned balance sheet restructuring at QCBT is a major contributor to the shift in mix and the decline in interest expense. Lastly, management continues to focus on driving down deposit pricing.

For the six months ended June 30, 2011, the Company reported interest expense of \$12.4 million which is a reduction of \$3.1 million, or 20%, from \$15.5 million for the same period in 2010. As mentioned above, the continued shift in mix and the sustained focus on managing down deposit pricing has led to this significant decline in interest expense.

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - continued

PROVISION FOR LOAN/LEASE LOSSES

The provision for loan/lease losses is established based on a number of factors, including the Company's historical loss experience, delinquencies and charge-off trends, the local and national economy and risk associated with the loans/leases in the portfolio as described in more detail in the "Critical Accounting Policies" section.

The Company's provision for loan/lease losses totaled \$1.7 million for the second quarter of 2011, an increase of \$604 thousand over the prior quarter, and an increase of \$296 thousand from the second quarter of 2010. The increases were primarily the result of additional specific reserves for recent developments on existing nonperforming loans as well as the net growth of loans/leases in the current quarter.

For the six months ended June 30, 2011, provision for loan/lease losses totaled \$2.7 million which is a decrease of \$239 thousand, or 8%, from \$3.0 million for the same period in 2010. This decrease is attributable to the continued improvement in nonperforming loans/leases and the net decline in the Company's loan/lease portfolio.

As net charge-offs outpaced the provision for loan/lease losses, the Company's allowance for estimated losses on loans/leases to gross loans/leases declined to 1.67% at June 30, 2011 from 1.79% at March 31, 2011, and from 1.74% at December 31, 2010.

| | \$9,230,505 | \$6,369,707 | \$2,860,798 | 44.9 | % |

Trust department fees continue to be a significant contributor to noninterest income. This fee income increased \$165 thousand, or 23%, from the second quarter of 2010 to the second quarter of 2011, and increased \$210 thousand, or 13%, from the first half of 2010 to the same period in 2011. The majority of the trust department fees are determined based on the value of the investments within the managed trusts. As the national economy continues to recover from the recession, market values in many of these investments have experienced some recovery over this comparative period.

Over the past year, the Company has placed a stronger emphasis on growing its investment advisory and management services. Fee income for investment advisory and management services increased \$78 thousand, or 17%, for the

second quarter of 2011 compared to the same quarter of 2010, and increased \$175 thousand, or 19%, for the first half of 2011 compared to the same period in 2010. Similar to trust department fees, these fees are partially determined based on the value of the investments managed. With the early stages of economic recovery, market values of many of these investments have experienced increases over the past year.

Part I
Item 2

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - continued

Although deposit service fees were flat comparing the second quarter of 2011 to the same quarter of 2010, the Company grew deposit fees \$46 thousand, or 3%, from the first half of 2010 to the first half of 2011. In general, deposit services fees have increased steadily over the past several years. The Company continues to place an emphasis on shifting the mix of deposits from brokered and retail time deposits to non-maturity demand deposits. With this shift in mix, the Company has increased the number of demand deposit accounts which tend to be lower in interest cost and higher in service fees.

Gains on sales of loans, net, grew \$202 thousand, or 37%, from the second quarter of 2010 to the second quarter of 2011, and gains on sales of loans, net more than doubled from the first half of 2010 to the first half of 2011. This consists of sales of residential mortgages and the government guaranteed portions of small business loans. Regarding sales of residential mortgages, the Company experienced a decline in sales activity quarter-over-quarter and year-over-year. This is consistent across the industry as the fluctuation in interest rates have slowed residential mortgage refinancing transactions and a sluggish housing market continues to keep new loan origination and sales activity at low levels. The Company continues to focus on small business lending by taking advantage of programs offered by the Small Business Administration (SBA) and United States Department of Agriculture (USDA). Management believes a strong market for purchasing the government guaranteed portions of these loans existed in the first half of 2011. In some cases, it is more beneficial for the Company to sell the government guaranteed portion at a premium. The Company recognized gains on sales of the government guaranteed portions of SBA and USDA loans totaling \$1.2 million for the first half of 2011 compared to \$296 thousand of gains recognized for the first half of 2010. Part of the year-over-year increase is a result of the timing on implementing this strategy. The Company introduced selling of government guaranteed loans in the first half of 2010 and, at that time, SBA and USDA required execution with a 90-day recourse period which prompted required accounting treatment of deferring any gains until expiration of the recourse period. Effective in the second quarter of 2011, SBA and USDA removed the recourse provisions for future sales which allows for sale accounting treatment at the time of sale. As a result, the Company was able to recognize gains at the time of sale for all of the sales in the second quarter of 2011.

During the second quarter of 2011, as a result of favorable market conditions, RB&T sold \$8.3 million of government agency securities for a pre-tax gain totaling \$149 thousand. Additionally, the sales proceeds were utilized to diversify RB&T's securities portfolio and fund loan growth. Separately, during the first quarter of 2011, in an effort to offset the \$832 thousand of fees for prepaying \$15.0 million of FHLB advances, QCBT sold \$37.4 million of government agency securities for a pre-tax gain totaling \$880 thousand. See detailed discussion of this restructuring transaction in the Net Interest Income section earlier in Management's Discussion and Analysis.

The Company purchased \$7.0 million of additional bank-owned life insurance during the second quarter of 2011. As a result, earnings on bank-owned life insurance grew 25% from the second quarter of 2010 to the second quarter of 2011, and grew 13% when comparing the first half of 2010 to the first half of 2011.

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - continued

Salaries and employee benefits, which is the largest component of noninterest expense, increased \$287 thousand, or 4%, from the second quarter of 2010 to the same quarter of 2011, and increased \$870 thousand, or 6%, from the first half of 2010 to the first half of 2011. These increases are largely the result of:

- Customary annual salary and benefits increases for the majority of the Company's employee base in 2011. For 2010, the Company did not generally increase salaries across the employee base.
- Continued increase in health insurance-related employee benefits for the majority of the Company's employee base.
 - Higher accrued incentive compensation based on improved performance through the first half of 2011.
- Slight increase in the Company's employee base as full-time equivalents increased from 348 at June 30, 2010 to 352 at June 30, 2011.

FDIC and other insurance expense decreased 22% from the second quarter of 2010 to the second quarter of 2011, and decreased 7% from the first half of 2010 to the first half of 2011. FDIC insurance premiums are calculated using a variety of factors, including, but not limited to, balance sheet levels, funding mix, and regulatory compliance. The subsidiary banks have been successful in managing these factors and driving down FDIC insurance cost. In addition, the FDIC modified the calculation for premiums effective during the second quarter of 2011. The modification was favorable for the Company's subsidiary banks.

Loan/lease expense increased \$245 thousand, or 60%, from the second quarter of 2010 to the second quarter of 2011; however, loan/lease expense decreased \$48 thousand, or 5%, from the first half of 2010 to the same period in 2011. Generally, loan/lease expense has a direct relationship with the level of nonperforming loans/leases; however, it may deviate as it depends upon the individual nonperforming loans/leases, as is the case for the second quarter of 2011. Over the past few years, the Company has experienced elevated levels of loan/lease expense. In general, the recent declining trend in nonperforming assets has translated over to the levels of loan/lease expense.

The Company incurred additional expenses for advertising and marketing over the first half of 2011. Specifically, the subsidiary banks and the leasing company are pursuing opportunities to reach new customers in their respective markets as a result of the continued uncertainty with some of their competition.

Bank service charges have increased over the first half of 2011. This is due, in large part, to the success QCBT has had in growing its correspondent banking customer portfolio over the past year.

During the second quarter of 2011, the Company's evaluation of its securities portfolio for other-than-temporary impairment determined that two privately held equity securities experienced declines in fair value that were other-than-temporary. As a result, the Company wrote down the value of these securities and recognized losses in the amount of \$119 thousand.

Item 2

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - continued

In an effort to utilize some of its excess liquidity and improve net interest margin by eliminating some of its higher cost wholesale funding, QCBT prepaid \$15.0 million of FHLB advances during the first quarter of 2011. As a result, QCBT incurred a prepayment fee totaling \$832 thousand. To offset these fees, QCBT sold \$37.4 million of government sponsored agency securities for a pre-tax gain totaling \$880 thousand. See detailed discussion of this restructuring transaction in the Net Interest Income section earlier in Management's Discussion and Analysis.

During the first quarter of 2010, the Company recognized losses in residual values for two direct financing equipment leases. The sharp declines in value were isolated and attributable to changes in unique market conditions during the quarter related to the specific equipment. Specifically, one of the affected leases related to auto-industry equipment. During the first quarter of 2010, several like equipment dealers declared bankruptcy which led to disruption in the specific market. As a result, pricing for new like equipment declined sharply. Similarly, for the other affected lease, the underlying equipment was a commercial printer. The commercial printing industry has experienced some challenges and pricing for this particular equipment experienced sharp declines during the first quarter of 2010. In both cases, management determined the amount of the loss by comparing the recorded estimated residual value of the affected leases to the estimated value at the end of the lease term, as adjusted for the declined pricing for new like equipment. And, in both cases, the equipment was sold in the second quarter of 2010 without any further losses realized. For the three and six months ended June 30, 2011, there were no losses on residual values. Management continues to perform periodic and specific reviews of its residual values, and has identified modest residual risk remaining in the lease portfolio.

INCOME TAXES

The provision for income taxes totaled \$1.1 million, or an effective tax rate of 29%, for the second quarter of 2011 compared to \$679 thousand, or an effective tax rate of 27%, for the same quarter in 2010. The provision for income taxes totaled \$2.1 million, or an effective tax rate of 29%, for the first half of 2011 compared to \$1.1 million, or an effective tax rate of 26%, for the same period in 2010. These increases in effective tax rate are the result of an increase in the proportionate share of taxable income to total income.

FINANCIAL CONDITION

During the first half of 2011, the Company's total assets increased 2% from \$1.84 billion at December 31, 2010 to \$1.88 billion at June 30, 2011. The Company grew its securities portfolio \$89.0 million, or 21%, over the first half of 2011. Additionally, the Company experienced net growth of loan/leases in the amount of \$11.3 million, or 1%, over the first six months of 2011. The growth was partially offset by a decline in federal funds sold and interest-bearing deposits at financial institutions as the Company invested some of its excess liquidity. The net increase in assets during the first half of 2011 was funded by strong and continued growth of the Company's deposit portfolio as balances grew \$99.5 million, or 9%. Partially offsetting the deposit growth, the Company reduced its reliance on borrowings by \$61.9 million, or 12%, over the first half of 2011.

Part I
Item 2MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - continued

The composition of the Company's securities portfolio is managed to meet liquidity needs while prioritizing the impact on asset-liability position and maximizing return. With the strong growth in deposits and the continued weak loan demand, the Company has carried excess liquidity on the balance sheet over the past year. During the first half of 2011, the Company invested a portion of its excess liquidity in government guaranteed residential mortgage-backed securities and additional government sponsored agency securities. The former is a shift in mix for the Company's securities portfolio in an effort to diversify and adapt to the changing balance sheet. As a result, the Company grew its securities portfolio \$89.0 million, or 21%, during the first half of 2011. The Company has not invested in commercial mortgage-backed securities or pooled trust preferred securities.

The following tables summarize the amortized cost and fair value of investment securities as of June 30, 2011 and December 31, 2010.

Part I
Item 2MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - continued

Gross loans/leases receivable experienced net growth of \$11.3 million, or 1%, during the first half of 2011. Additionally, for the second quarter of 2011, the Company grew gross loans/leases \$28.1 million, or 2%, over the first quarter of 2011. This marks the first quarter-over-quarter increase in gross loans/leases since the fourth quarter of 2009. Specifically, the Company originated \$217.2 million of new loans/leases to new and existing customers during the first half of 2011, including \$129.6 million for the second quarter of 2011. The latter is a significant increase over recent quarters.

Consistent with the intention of the Treasury Capital Purchase Program ("TCPP"), the Company is committed to providing transparency surrounding its utilization of the proceeds from participation in the TCPP, including its lending activities and support of the existing communities served. The mix of the loan/lease types within the Company's loan/lease portfolio is presented in the table along with a rollforward of activity for the six months ended June 30, 2011.

Item 2MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - continued

As commercial real estate loans are the largest loan type, management places a strong emphasis on monitoring the composition of the Company's commercial real estate loan portfolio. Management tracks the level of owner-occupied commercial real estate loans versus non owner-occupied loans. Owner-occupied loans are generally considered to have less risk. As of June 30, 2011 and December 31, 2010, approximately 29% and 26% of the commercial real estate loan portfolio was owner-occupied.

Following is a listing of significant industries within the Company's commercial real estate loan portfolio as of June 30, 2011 and December 31, 2010:

* "Other" consists of all other industries. None of these had concentrations greater than \$15 million, or 2.7% of total commercial real estate loans.

During the first half of 2011, the Company originated and held a limited amount of 15-year fixed rate residential real estate loans that met certain credit guidelines. The remaining residential real estate loans originated by the Company were sold on the secondary market to avoid the interest rate risk associated with longer term fixed rate loans. Loans originated for this purpose were classified as held for sale and are included in the residential real estate loans above. In addition, the Company has not originated any subprime, Alt-A, no documentation, or stated income residential real estate loans throughout its history.

See Note 3 for additional information regarding the Company's loan/lease portfolio.

Item 2MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - continued

Changes in the allowance for estimated losses on loans/leases for the three and six months ended June 30, 2011 and 2010 are presented as follows:

| | Three Months Ended | | Six Months Ended | |
|---|--------------------|------------------|------------------|------------------|
| | June 30, 2011 | June 30, 2010 | June 30, 2011 | June 30, 2010 |
| Balance, beginning | \$20,730,016 | \$22,885,490 | \$20,364,656 | \$22,504,734 |
| Provisions charged to expense | 1,672,221 | 1,376,189 | 2,739,885 | 2,979,418 |
| Loans/leases charged off | (2,691,705) | (2,890,613) | (3,572,632) | (4,263,614) |
| Recoveries on loans/leases previously charged off | 92,100 | 189,897 | 270,723 | 340,425 |
| Balance, ending | \$19,802,632 | \$21,560,963 | \$19,802,632 | \$21,560,963 |

The allowance for estimated losses on loans/leases was \$19.8 million at June 30, 2011 compared to \$20.4 million at December 31, 2010 and \$21.6 million at June 30, 2010. The allowance for estimated losses on loans/leases was determined based on factors that included the overall composition of the loan/lease portfolio, types of loans/leases, past loss experience, loan/lease delinquencies, potential substandard and doubtful credits, economic conditions, collateral positions, governmental guarantees and other factors that, in management's judgment, deserved evaluation. To ensure that an adequate allowance was maintained, provisions were made based on a number of factors, including the increase/decrease in loans/leases and a detailed analysis of the loan/lease portfolio. The loan/lease portfolio was reviewed and analyzed monthly with specific detailed reviews completed on all loans risk-rated worse than "fair quality" and carrying aggregate exposure in excess of \$100 thousand. The adequacy of the allowance for estimated losses on loans/leases was monitored by the loan review staff and reported to management and the board of directors. The Company's allowance for estimated losses on loans/leases to gross loans/leases was 1.67% at June 30, 2011 which is a decrease from 1.74% at December 31, 2010, and from 1.78% at June 30, 2010. The Company's nonperforming loans/leases have declined steadily over the past six months. This decline has outpaced the decrease in the allowance for loan/lease losses over the first half of 2011 and strengthened the Company's allowance to nonperforming loans/leases from 49% at December 31, 2010 to 73% at June 30, 2011.

Although management believes that the allowance for estimated losses on loans/leases at June 30, 2011 was at a level adequate to absorb losses on existing loans/leases, there can be no assurance that such losses will not exceed the estimated amounts or that the Company will not be required to make additional provisions for loan/lease losses in the future. Unpredictable future events could adversely affect cash flows for both commercial and individual borrowers, which could cause the Company to experience increases in problem assets, delinquencies and losses on loans/leases, and require further increases in the provision. Asset quality is a priority for the Company and its subsidiaries. The ability to grow profitably is in part dependent upon the ability to maintain that quality. The Company continually focuses efforts at its subsidiary banks and leasing company with the intention to improve the overall quality of the Company's loan/lease portfolio.

See Note 3 for additional information regarding the Company's allowance for estimated losses on loans/leases.

(2) Includes troubled debt restructures of \$11.0 million at June 30, 2011, \$8.4 million at March 31, 2011, \$12.6 million at December 31, 2010, and \$3.2 million at June 30, 2010

(3) Texas Ratio = Nonperforming Assets (excluding Other Repossessed Assets) / Tangible Equity plus Allowance for Estimated Losses on Loans/Leases. Texas Ratio is a non-GAAP financial measure. Management included this ratio as this is considered to be a critical metric with which to analyze and evaluate asset quality. Other companies may calculate this ratio differently.

The large majority of the nonperforming assets consist of nonaccrual loans/leases and other real estate owned. For nonaccrual loans/leases, management has thoroughly reviewed these loans/leases and has provided specific allowances as appropriate. Other real estate owned is carried at the fair value less costs to sell.

Nonperforming assets at June 30, 2011 were \$37.9 million, down \$6.4 million, or 14%, from \$44.2 million at March 31, 2011, and down \$12.2 million, or 24%, from December 31, 2010. Further, nonperforming assets have declined \$21.5 million, or 36%, from its peak position of \$59.4 million at September 30, 2010. A combination of improved performance (\$8.6 million) and charge-offs (\$3.6 million) contributed to the decrease in the first half of 2011.

Bank-owned life insurance increased \$7.7 million, or 23%, during the first half of 2011 as the Company purchased additional insurance. The Company has earned approximate yields (unadjusted for tax effect) on bank-owned life insurance of 3.75% and 3.97% for the six months ended June 30, 2011 and 2010, respectively.

The Company has been successful in shifting the deposit mix over the past year with increases in non-interest bearing deposits and a decline in brokered and retail time deposits. Specifically, QCBT continues to have success growing its correspondent banking business as noninterest bearing correspondent deposits grew \$49.7 million, or 62%, to \$130.5 million during the first half of 2011. These increases and the Company's overall strong liquidity position have allowed the Company to reduce the level of brokered and other time deposits which has helped drive down the Company's average cost of deposits.

Short-term borrowings decreased \$18.8 million, or 13%, during the first half of 2011. The subsidiary banks offer short-term repurchase agreements to some of their significant customers. Also, the subsidiary banks purchase federal funds for short-term funding needs from the Federal Reserve Bank or from their correspondent banks. The table below presents the composition of the Company's short-term borrowings.

FHLB advances decreased by \$34.0 million, or 14%, during the first half of 2011. The decline was the combination of prepayment (\$15.0 million) and maturities (\$19.0 million). As a result of their memberships in either the FHLB of Des Moines or Chicago, the subsidiary banks have the ability to borrow funds for short or long-term purposes under a variety of programs. FHLB advances are utilized for loan matching as a hedge against the possibility of rising interest rates, and when these advances provide a less costly or more readily available source of funds than customer deposits. See Note 4 for additional information on FHLB advances.

Other borrowings decreased \$9.2 million, or 6%, from \$150.1 million at December 31, 2010 to \$140.9 million at June 30, 2011. Other borrowings consist largely of structured wholesale repurchase agreements which are utilized as an alternative funding source to FHLB advances and customer deposits. The table below presents the composition of the Company's other borrowings.

| | As of June 30, 2011 | As of December 31, 2010 |

| Other | - | 10 |
| | \$ 140,916 | \$ 150,070 |

As of December 31, 2010, secured borrowings for loan participations sold largely represented sales of the government guaranteed portion of certain SBA and USDA loans. At that time, the sales required execution with a 90-day recourse period which prompted required accounting treatment as secured borrowings and deferral of any gains until expiration of the recourse period. During the second quarter of 2011, SBA and USDA removed the recourse provisions for future sales which allows for sale accounting treatment at the time of sale. As a result, secured borrowings for loan participations sold as of June 30, 2011, consists entirely of loan participations sold on a last-in-first-out basis. In accordance with ASC 860, effective January 1, 2010, the Company is required to account for loan participations sold on a last-in-first-out basis as secured borrowings.

The table below presents the composition of the Company's stockholders' equity, including the common and preferred equity components.

| | As of June 30, 2011 | As of December 31, 2010 |
|--|------------------------|-------------------------------|
| | (dollars in thousands) | |
| Common stock | \$ 4,856 | \$ 4,732 |
| Additional paid in capital - common | 24,910 | 24,328 |
| Retained earnings | 43,097 | 40,551 |
| Accumulated other comprehensive income | 1,768 | 704 |
| Noncontrolling interests | 1,849 | 1,648 |
| Less: Treasury stock | (1,606) | (1,606) |
| Total common stockholders' equity | 74,874 | 70,357 |
| Preferred stock | 63 | 63 |
| Additional paid in capital - preferred | 62,388 | 62,151 |
| Total preferred stockholders' equity | 62,451 | 62,214 |
| Total stockholders' equity | \$ 137,325 | \$ 132,571 |

Stockholders' equity increased \$4.8 million, or 4%, during the first half of 2011. Net income of \$5.0 million for the first half of 2011 increased retained earnings; however, this was partially offset by declaration and accrual of preferred stock dividends and discount accretion totaling \$2.1 million, and declaration of common stock dividends of \$186 thousand. Specifically regarding the preferred stock dividends, the following details the dividend activity for the first half of 2011:

- \$1.2 million for the two quarterly dividends on the outstanding shares of Series D Cumulative Perpetual Preferred Stock at a stated rate of 5.00%, including the related discount accretion, and
- \$875 thousand for the two quarterly dividends on the outstanding shares of Series E Non-Cumulative Perpetual Preferred Stock at a stated dividend rate of 7.00%.

It is the Company's intention to consider the payment of common stock dividends on a semi-annual basis.

Lastly, the available for sale portion of the securities portfolio experienced an increase in fair value of \$1.1 million, net of tax, for the first half of 2011 as a result of fluctuation in certain market interest rates.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity measures the ability of the Company to meet maturing obligations and its existing commitments, to withstand fluctuations in deposit levels, to fund its operations, and to provide for customers' credit needs. The Company monitors liquidity risk through contingency planning stress testing on a regular basis. The Company seeks to avoid over concentration of funding sources and to establish and maintain contingent funding facilities that can be drawn upon if normal funding sources become unavailable. One source of liquidity is cash and short-term assets, such as interest-bearing deposits in other banks and federal funds sold, which totaled \$80.4 million at June 30, 2011 and \$143.7 million at December 31, 2010.

The Company has a variety of sources of short-term liquidity available, including federal funds purchased from correspondent banks, FHLB advances, structured wholesale repurchase agreements, brokered certificates of deposit, lines of credit, borrowing at the Federal Reserve Discount Window, sales of securities available for sale, and loan/lease participations or sales. At June 30, 2011, the subsidiary banks had 19 lines of credit totaling \$186.2 million, of which \$61.7 million was secured and \$124.5 million was unsecured. At June 30, 2011, all of the \$186.2 million was available. Additionally, the Company has a single \$20.0 million secured revolving line of credit with a maturity date of April 1, 2012. As of June 30, 2011, the Company had \$17.5 million available as the line of credit carried an outstanding balance of \$2.5 million.

Throughout its history, the Company has secured additional capital through various resources, including the issuance of trust preferred securities and the issuance of preferred stock. Trust preferred securities are reported on the Company's balance sheet as liabilities, but do qualify for treatment as regulatory capital.

The following table presents the details of the trust preferred securities issued and outstanding as of June 30, 2011.

The Company and the subsidiary banks are subject to various regulatory capital requirements administered by the federal banking agencies. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the subsidiary banks must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The most recent notification from the FDIC categorized the subsidiary banks as well capitalized under the regulatory framework for prompt corrective action. The Company and the subsidiary banks' actual capital amounts and ratios as of June 30, 2011 and December 31, 2010 are presented in the following tables (dollars in thousands):

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - continued

SPECIAL NOTE CONCERNING FORWARD-LOOKING STATEMENTS

Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995. This document (including information incorporated by reference) contains, and future oral and written statements of the Company and its management may contain, forward-looking statements, within the meaning of such term in the Private Securities Litigation Reform Act of 1995, with respect to the financial condition, results of operations, plans, objectives, future performance and business of the Company. Forward-looking statements, which may be based upon beliefs, expectations and assumptions of the Company's management and on information currently available to management, are generally identifiable by the use of words such as "believe," "expect," "anticipate," "bode," "predict," "suggest," "pr", "appear," "plan," "intend," "estimate," "may," "will," "would," "could," "should," "likely," or other similar expressions. All statements in this document, including forward-looking statements, speak only as of the date they are made, and the Company undertakes no obligation to update any statement in light of new information or future events.

The Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. The factors which could have a material adverse effect on the Company's operations and future prospects are detailed in the "Risk Factors" section included under Item 1.A. of Part I of the Company's Form 10-K. In addition to the risk factors described in that section, there are other factors that may impact any public company, including the Company, which could have a material adverse effect on the Company's operations and future prospects of the Company and its subsidiaries.

These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements.

Part I
Item 3

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company, like other financial institutions, is subject to direct and indirect market risk. Direct market risk exists from changes in interest rates. The Company's net income is dependent on its net interest income. Net interest income is susceptible to interest rate risk to the degree that interest-bearing liabilities mature or reprice on a different basis than interest-earning assets. When interest-bearing liabilities mature or reprice more quickly than interest-earning assets in a given period, a significant increase in market rates of interest could adversely affect net interest income. Similarly, when interest-earning assets mature or reprice more quickly than interest-bearing liabilities, falling interest rates could result in a decrease in net interest income.

In an attempt to manage the Company's exposure to changes in interest rates, management monitors the Company's interest rate risk. Each subsidiary bank has an asset/liability management committee of the board of directors that meets quarterly to review the bank's interest rate risk position and profitability, and to make or recommend adjustments for consideration by the full board of each bank. Internal asset/liability management teams consisting of members of the subsidiary banks' management meet weekly to manage the mix of assets and liabilities to maximize earnings and liquidity and minimize interest rate and other risks. Management also reviews the subsidiary banks' securities portfolios, formulates investment strategies, and oversees the timing and implementation of transactions to assure attainment of the board's objectives in the most effective manner. Notwithstanding the Company's interest rate risk management activities, the potential for changing interest rates is an uncertainty that can have an adverse effect on net income.

In adjusting the Company's asset/liability position, the board of directors and management attempt to manage the Company's interest rate risk while maintaining or enhancing net interest margins. At times, depending on the level of general interest rates, the relationship between long-term and short-term interest rates, market conditions and competitive factors, the board of directors and management may decide to increase the Company's interest rate risk position somewhat in order to increase its net interest margin. The Company's results of operations and net portfolio values remain vulnerable to increases in interest rates and to fluctuations in the difference between long-term and short-term interest rates.

Part I
Item 3

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK - continued

One method used to quantify interest rate risk is a short-term earnings at risk summary, which is a detailed and dynamic simulation model used to quantify the estimated exposure of net interest income to sustained interest rate changes. This simulation model captures the impact of changing interest rates on the interest income received and interest expense paid on all interest sensitive assets and liabilities reflected on the Company's consolidated balance sheet. This sensitivity analysis demonstrates net interest income exposure annually over a five-year horizon, assuming no balance sheet growth and various interest rate scenarios including no change in rates; 200, 300, 400, and 500 basis point upward shifts; and a 100 basis point downward shift in interest rates, where interest-bearing assets and liabilities reprice at their earliest possible repricing date. The model assumes parallel and pro rata shifts in interest rates over a twelve-month period for the 200 basis point upward shift and 100 basis point downward shift. For the 400 basis point upward shift, the model assumes a parallel and pro rata shift in interest rates over a twenty-four (24) month period. For the 500 basis point upward shift, the model assumes a flattening and pro rata shift in interest rates over a twelve-month period where the short-end of the yield curve shifts upward greater than the long-end of the yield curve. Effective with the modeling for the second quarter of 2010, the Company added an interest rate scenario where interest rates experience a parallel and instantaneous shift upward 300 basis points. The asset/liability management committee of the board of directors has established policy limits of a 10% decline in net interest income for the 200 and the newly added 300 basis point upward shifts and the 100 basis point downward shift.

Application of the simulation model analysis at the most recent quarter-end available is presented in the following table. Please note the simulation model analysis as of June 30, 2011 is not yet available.

NET INTEREST INCOME EXPOSURE in YEAR 1

| INTEREST RATE SCENARIO | As of March 31, 2011 | | As of December 31, 2010 | | As of September 30, 2010 | | As of June 30, 2010 | |
|-----------------------------------|-------------------------|---|----------------------------|---|--------------------------------|---|------------------------|---|
| 100 basis point downward shift | -1.8 | % | -1.9 | % | -1.0 | % | -1.2 | % |
| 200 basis point upward shift | -3.6 | % | -3.0 | % | -3.3 | % | -3.2 | % |
| 300 basis point upward shift | -4.1 | % | -1.6 | % | -2.5 | % | -2.3 | % |

The simulation is within the board-established policy limit of a 10% decline in value for all three scenarios.

Interest rate risk is considered to be one of the most significant market risks affecting the Company. For that reason, the Company engages the assistance of a national consulting firm and its risk management system to monitor and control the Company's interest rate risk exposure. Other types of market risk, such as foreign currency exchange rate risk and commodity price risk, do not arise in the normal course of the Company's business activities.

CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures. An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Exchange Act) as of June 30, 2011. Based on that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports filed and submitted under the Exchange Act was recorded, processed, summarized and reported as and when required.

Changes in Internal Control over Financial Reporting. There have been no significant changes to the Company's internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to affect, the Company's internal control over financial reporting.
