Note Regarding Forward-Looking Statements

This report includes “forward-looking statements” within the meaning and protections of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. All statements other than statements of historical fact are statements that could be forward-looking statements. You can identify these forward-looking statements through our use of words such as “may,” “will,” “anticipate,” “assume,” “should,” “indicate,” “would,” “believe,” “contemplate,” “expect,” “estimate,” “continue,” “plan,” “intend,” “target” and other similar words and expressions of the future. These forward-looking statements include, but are not limited to:

- statements of our goals, intentions and expectations;
- statements regarding our business plans, prospects, growth and operating strategies;
- statements regarding the asset quality of our loan and investment portfolios; and
- estimates of our risks and future costs and benefits.

These forward-looking statements are based on current beliefs and expectations of the management of Eagle Bancorp Montana, Inc. (the “Company”) and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change.

The following factors, among others, could cause the Company’s actual results to differ materially from the anticipated results or other expectations expressed in the forward-looking statements:

- changes in laws or government regulations or policies affecting financial institutions, including changes in regulatory fees and capital requirements;
- general economic conditions, either nationally or in our market areas;
- competition among depository and other financial institutions;
- changes in the prices, values and sales volume of residential and commercial real estate in Montana;
- loss of customers checking and savings account deposits as customers pursue other higher-yielding investments, particularly in a rising rate environment;
- inflation and changes in the interest rate environment that reduce our margins or reduce the fair value of financial instruments;
- adverse changes or volatility in the securities markets;
- our ability to enter new markets successfully and capitalize on growth opportunities;
- our ability to successfully integrate acquired businesses;
- changes in consumer spending, borrowing and savings habits;
- the inability of our risk management controls to prevent or detect all errors or fraudulent acts;

our ability to continue to increase and manage our commercial and residential real estate, multi-family and commercial business loans;

possible impairments of securities held by us, including those issued by government entities and government sponsored enterprises;

changes in laws or government regulations or policies affecting financial institutions, including changes in regulatory fees and capital requirements;

the level of future deposit insurance premium assessments;

continued low interest rate environment or interest rate volatility;

the Company's ability to develop and maintain secure and reliable information technology systems, keep pace with technological changes, effectively defend itself against cyberattacks, or recover from breaches to its cybersecurity infrastructure;

the impact of the restructuring of the U.S. financial and regulatory system;

the failure of assumptions underlying the establishment of allowance for possible loan losses and other estimates;

changes in the financial performance, creditworthiness and/or condition of our borrowers and their ability to repay their loans when due; and

the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Securities and Exchange Commission, the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters.

Because of these and other uncertainties, our actual future results may be materially different from the results indicated by these forward-looking statements. For a further list and description of various risks, relevant factors and uncertainties that could cause future results or events to differ materially from those expressed or implied in our forward-looking statements, see the Item 1A, "Risk Factors" and Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections contained elsewhere in this report, as well as our Annual Report on Form 10-K for the year ended December 31, 2016, any subsequent Reports on Form 10-Q and Form 8-K, and other filings with the SEC. We do not undertake any obligation to publicly update or correct any forward-looking statements to reflect events or circumstances that subsequently occur, or of which we hereafter become aware.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for annual financial statements. However, such information reflects all adjustments (consisting of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of our financial position, results of operations, changes in comprehensive income and cash flows for the unaudited interim periods.

The results of operations for the six month period ended June 30, 2017 are not necessarily indicative of the results to be expected for the year ending December 31, 2017 or any other period. The unaudited consolidated financial statements and notes presented herein should be read in conjunction with the audited consolidated financial statements and related notes thereto included in Eagle Bancorp Montana, Inc.'s ("the Company" or "Eagle") Form 10-K for the year ended December 31, 2016.

The Company evaluated subsequent events for potential recognition and/or disclosure through August 8, 2017 the date the unaudited consolidated financial statements were issued.

NOTE 2. INVESTMENT SECURITIES

Investment securities are summarized as follows:

NOTE 2. INVESTMENT SECURITIES - continued

The amortized cost and fair value of securities by contractual maturity are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	June 30, 2017	
	Amortized Cost	Fair Value
	(In Thousands)	
Due in one year or less	\$2,663	\$2,660
Due from one to five years	7,183	7,256
Due from five to ten years	14,319	14,349
Due after ten years	54,980	55,511
	79,145	79,776
MBSs - government-backed	27,519	27,717
CMOs - government-backed	15,710	15,698
Total	\$122,374	\$123,191

Maturities of securities do not reflect repricing opportunities present in adjustable rate securities.

The Company's investment securities that have been in a continuous unrealized loss position for less than twelve months and those that have been in a continuous unrealized loss position for twelve or more months were as follows:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 2. INVESTMENT SECURITIES - continued

Management evaluates securities for other-than-temporary impairment at least quarterly, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. As of June 30, 2017 and December 31, 2016, there were, respectively, 65 and 97 securities in an unrealized loss position that were considered to be temporarily impaired and therefore an impairment charge has not been recorded.

As of June 30, 2017, 42 U.S. government and agency securities and municipal obligations had unrealized losses with aggregate depreciation of approximately 1.57% from the Company's amortized cost basis of these securities. At December 31, 2016, 70 U.S. government and agency securities and municipal obligations had unrealized losses with aggregate depreciation of approximately 3.19% from the Company's amortized cost basis of these securities. These unrealized losses are principally due to changes in interest rates and credit spreads. In analyzing an issuer's financial condition, management considers whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred and industry analysts' reports. As management has the ability to hold debt securities until maturity, or for the foreseeable future, no declines are deemed to be other than temporary.

As of June 30, 2017, 10 corporate obligations had unrealized losses of approximately 1.05% from the Company's amortized cost basis of these securities. At December 31, 2016, 13 corporate obligations had an unrealized loss with aggregate depreciation of approximately 1.92% from the Company's amortized cost basis of these securities. These unrealized losses are principally due to changes in interest rates. No credit issues have been identified that cause management to believe the declines in market value are other than temporary. In analyzing the issuer's financial condition, management considers industry analysts' reports, financial performance and projected target prices of investment analysts within a one-year time frame. As management has the ability to hold debt securities until maturity, or for the foreseeable future, no declines are deemed to be other than temporary.

As of June 30, 2017, 13 mortgage-backed securities ("MBSs") and collateralized mortgage obligations ("CMOs") had unrealized losses with aggregate depreciation of approximately 1.07% from the Company's amortized cost basis of these securities. At December 31, 2016, 14 MBSs and CMOs had unrealized losses with aggregate depreciation of

approximately 1.92% from the Company's amortized cost basis. We believe these unrealized losses are principally due to the credit market's concerns regarding the stability of the mortgage market, changes in interest rates and credit spreads and uncertainty of future prepayment speeds. Management considers available evidence to assess whether it is more likely-than-not that all amounts due would not be collected. In such assessment, management considers the severity and duration of the impairment, the credit ratings of the security, the overall deal and payment structure, including the Company's position within the structure, underlying obligor, financial condition and near term prospects of the issuer, delinquencies, defaults, loss severities, recoveries, prepayments, cumulative loss projections, discounted cash flows and fair value estimates. There has been no disruption of the scheduled cash flows on any of the securities. Management's analysis as of June 30, 2017 revealed no expected credit losses on the securities and therefore, declines are not deemed to be other than temporary.

--	------------	------------	-----------	-----------	-----------	-----------	------------

The Company utilizes an 8 point internal loan rating system, largely based on regulatory classifications, as follows:

Loans Rated Pass – these are loans in categories 1 – 5 that are considered to be protected by the current net worth and paying capacity of the obligor, or by the value of the asset or the underlying collateral.

Loans Rated Special Mention – these loans in category 6 have potential weaknesses and are watched closely by management. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset at some future date.

Loans Rated Substandard – these loans in category 7 are inadequately protected by the current net worth and paying capacity of the obligor or the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

Loans Rated Doubtful – these loans in category 8 have all the weaknesses inherent in those classified Substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable.

Loans Rated Loss – these loans are considered uncollectible and are not part of the 8 point rating system. They are of such small value that their continuance as assets without establishment of a specific reserve is not warranted. This classification does not mean that an asset has absolutely no recovery or salvage value, but, rather, that it is not practical or desirable to defer writing off a basically worthless asset even though practical recovery may be affected in the future.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 3. LOANS RECEIVABLE - continued

On an annual basis, or more often if needed, the Company formally reviews the ratings of all commercial real estate, construction, and commercial business loans that have a principal balance of \$750,000 or more. Quarterly, the Company reviews the rating of any consumer loan, broadly defined, that is delinquent 90 days or more. Likewise, quarterly, the Company reviews the rating of any commercial loan, broadly defined, that is delinquent 60 days or more. Annually, the Company engages an independent third-party to review a significant portion of loans within these segments. Management uses the results of these reviews as part of its annual review process.

Internal classification of the loan portfolio was as follows:

	June 30, 2017						
	Residential						
	Mortgage (1-4 Family)	Commercial Real Estate	Real Estate Construction	Home Equity	Consumer	Commercial	Total

NOTE 4. TROUBLED DEBT RESTRUCTURINGS

A troubled debt restructured (“TDR”) loan is a loan in which the Bank grants a concession to the borrower that it would not otherwise consider, for reasons related to a borrower's financial difficulties. The loan terms which have been modified or restructured due to a borrower's financial difficulty, include but are not limited to a reduction in the stated interest rate; an extension of the maturity at an interest rate below current market rates; a reduction in the face amount of the debt; a reduction in the accrued interest; or re-aging, extensions, deferrals, renewals and rewrites or a combination of these modification methods. A TDR loan would generally be considered impaired in the year of modification and will be assessed periodically for continued impairment.

The Company offers a variety of modifications to borrowers. The modification categories offered can generally be described in the following categories:

Rate Modification – A modification in which the interest rate is changed.

Term Modification – A modification in which the maturity date, timing of payments, or frequency of payments is changed.

Interest Only Modification – A modification in which the loan is converted to interest only payments for a period of time.

Payment Modification – A modification in which the dollar amount of the payment is changed, other than an interest only modification described above.

Combination Modification – Any other type of modification, including the use of multiple categories above.

The Company previously had one TDR loan at December 31, 2016 with a recorded investment of \$43,000 and a \$34,000 charge-off at time of restructure. The loan was a home equity loan and was on accrual status. The remaining recorded investment of \$42,000 was paid-off during the quarter ended June 30, 2017 and the \$34,000 charge-off was recovered.

The Bank's policy is that loans placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospect for future payment in accordance with the loan agreement appears relatively certain. The Bank's policy generally refers to six months of payment performance as sufficient to warrant a return to accrual status.

During the three and six months ended June 30, 2017 and 2016, there were no new restructured loans.

There were no loans modified as a troubled debt restructured loan within the previous six months for which there was a payment default during the six months ended June 30, 2017.

A default for purposes of this disclosure is a troubled debt restructured loan in which the borrower is 90 days past due or results in the foreclosure and repossession of the applicable collateral. As of June 30, 2017 and December 31, 2016, the Company had no commitments to lend additional funds to loan customers whose terms had been modified in trouble debt restructures.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 5. DEPOSITS

Deposits are summarized as follows:

	June 30, 2017 (In Thousands)	December 31, 2016
Noninterest checking	\$91,811	\$82,877
Interest bearing checking	95,272	93,163
Savings	88,735	82,266
Money market	89,220	89,211
Time certificates of deposit	149,227	165,278
Total	\$514,265	\$512,795

NOTE 6. OTHER LONG-TERM DEBT

Other long-term debt consisted of the following:

June 30, 2017	Unamortized Debt Issuance Costs	December 31, 2016	Unamortized Debt Issuance Costs
Principal Amount (In Thousands)		Principal Amount	
\$ 10,000	\$ (202)	\$ -	\$ -

Senior notes fixed at 5.75%, due 2022				
Subordinated debentures fixed at 6.75%, due 2025	10,000	(175)	10,000	(185)
Subordinated debentures variable at 3-Month Libor plus 1.42%, due 2035	5,155	-	5,155	-
Total other long-term debt	\$ 25,155	\$ (377)	\$ 15,155	\$ (185)

In February 2017, the Company completed the issuance, through a private placement, of \$10,000,000 aggregate principal amount of 5.75% fixed senior unsecured notes due in 2022. The interest will be paid semi-annually through maturity date. The notes are not subject to redemption at the option of the Company.

In June 2015, the Company completed the issuance of \$10,000,000 in aggregate principal amount of subordinated notes due in 2025 in a private placement transaction to an institutional accredited investor. The notes will bear interest at an annual fixed rate of 6.75% and interest will be paid quarterly through maturity date or earlier redemption.

In September 2005, the Company completed the private placement of \$5,155,000 in subordinated debentures to Eagle Bancorp Statutory Trust I (“the Trust”). The Trust funded the purchase of the subordinated debentures through the sale of trust preferred securities to First Tennessee Bank, N.A. with a liquidation value of \$5,155,000. Using interest payments made by the Company on the debentures, the Trust began paying quarterly dividends to preferred security holders in December 2005. The annual percentage rate of the interest payable on the subordinated debentures and distributions payable on the preferred securities was fixed at 6.02% until December 2010 then became variable at 3-Month LIBOR plus 1.42%, making the rate 2.719% and 2.418% as of June 30, 2017 and December 31, 2016, respectively. Dividends on the preferred securities are cumulative and the Trust may defer the payments for up to five years. The preferred securities mature in December 2035 unless the Company elects and obtains regulatory approval to accelerate the maturity date.

For the three months ended June 30, 2017 and 2016, interest expense on other long-term debt was \$347,000 and \$195,000, respectively. For the six months ended June 30, 2017 and 2016, interest expense on other long-term debt was \$619,000 and \$389,000, respectively.

NOTE 7. EARNINGS PER SHARE

Basic earnings per share for the three months ended June 30, 2017 was computed using 3,811,409 weighted average shares outstanding. Basic earnings per share for the three months ended June 30, 2016 was computed using 3,779,464 weighted average shares outstanding. Diluted earnings per share was computed using the treasury stock method by adjusting the number of shares outstanding by the shares purchased. The weighted average shares outstanding for the diluted earnings per share calculations was 3,869,885 for the three months ended June 30, 2017 and 3,873,171 for the three months ended June 30, 2016.

Basic earnings per share for the six months ended June 30, 2017 was computed using 3,811,409 weighted average shares outstanding. Basic earnings per share for the six months ended June 30, 2016 was computed using 3,779,464 weighted average shares outstanding. Diluted earnings per share was computed using the treasury stock method by adjusting the number of shares outstanding by the shares purchased. The weighted average shares outstanding for the diluted earnings per share calculations was 3,872,765 for the six months ended June 30, 2017 and 3,873,171 for the six months ended June 30, 2016.

NOTE 8. DIVIDENDS AND STOCK REPURCHASE PROGRAM

For the year ended December 31, 2016, Eagle paid dividends of \$0.0775 per share for the quarters ended March 31 and June 30, 2016. Eagle paid dividends of \$0.08 per share for the quarters ended September 30 and December 31, 2016. A dividend of \$0.08 per share was declared on January 26, 2017, and paid March 3, 2017 to shareholders of record on February 10, 2017. A dividend of \$0.08 per share was declared on April 20, 2017, payable on June 2, 2017 to shareholders of record on May 12, 2017. A dividend of \$0.09 per share was declared on July 20, 2017, payable on September 1, 2017 to shareholders of record on August 11, 2017.

On July 20, 2017, the Board authorized the repurchase of up to 100,000 shares of its common stock. Under the plan, shares may be purchased by the Company on the open market or in privately negotiated transactions. The extent to which the company repurchases its shares and the timing of such repurchase will depend upon market conditions and other corporate considerations. The plan expires on July 20, 2018.

On July 21, 2016, the Board authorized the repurchase of up to 100,000 shares of its common stock. Under the plan, shares could be purchased by the Company on the open market or in privately negotiated transactions. No shares were purchased under this plan during the year ended December 31, 2016. No shares were purchased under this plan during the three months ended March 31, 2017 or June 30, 2017. The plan expired on July 21, 2017.

On July 23, 2015, the Board of Directors authorized the repurchase of up to 100,000 shares of its common stock. Under the plan, shares could be purchased by the Company on the open market or in privately negotiated transactions. During the three months ended December 31, 2015, 15,000 shares were purchased at an average price of \$11.75 per share. During the three months ended September 30, 2015, 46,065 shares were purchased at an average price of \$11.47 per share. The plan expired on July 23, 2016.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 10. DERIVATIVES AND HEDGING ACTIVITIES

Mortgage Loan Commitments

Mortgage loan commitments are referred to as derivative loan commitments if the loan that will result from exercise of the commitment will be held-for-sale upon funding. The Company enters into commitments to fund residential mortgage loans at specified times in the future, with the intention that these loans will subsequently be sold in the secondary market. A mortgage loan commitment binds the Company to lend funds to a potential borrower at a specified interest rate and within a specified period of time, generally up to 60 days after inception of the rate lock.

Interest Rate Lock Commitments

Outstanding derivative loan commitments expose the Company to the risk that the price of the loans arising from exercise of the loan commitment might decline from inception of the rate lock to funding of the loan due to increases in mortgage interest rates. If interest rates increase, the value of these loan commitments decreases. Conversely, if interest rates decrease, the value of these loan commitments increases. The notional amount of interest rate lock commitments was \$35,341,000 and \$19,738,000 at June 30, 2017 and December 31, 2016, respectively. The fair value of such commitments was insignificant.

The Company has no other off-balance-sheet arrangements or transactions with unconsolidated, special purpose entities that would expose the Company to liability that is not reflected on the face of the financial statements.

NOTE 11. FAIR VALUE DISCLOSURES

FASB ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and, (iv) willing to transact.

FASB ASC 820 requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement costs). Valuation techniques should be consistently applied.

Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, FASB ASC 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs.

The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date, or convert to cash in the short term.

Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Table of Contents

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 11. FAIR VALUE DISCLOSURES – continued

Level 3 Inputs - Significant unobservable inputs that reflect an entity's own assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Available-for-Sale Securities – Securities classified as available-for-sale are reported at fair value utilizing Level 1 and Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U. S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayments speeds, credit information and the bond's terms and conditions, among other things.

Impaired Loans – Impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on internally customized discounting criteria.

Loans Held-for-Sale – These loans are reported at the lower of cost or fair value. Fair value is determined based on expected proceeds based on sales contracts and commitments and are considered Level 2 inputs.

Repossessed Assets – Fair values are valued at the time the loan is foreclosed upon and the asset is transferred from loans. The value is based upon primary third party appraisals, less costs to sell. The appraisals are generally discounted based on management’s historical knowledge, changes in market conditions from the time of valuation, and/or management’s expertise and knowledge of the client and client’s business. Such discounts are typically significant and result in Level 3 classification of the inputs for determining fair value. Repossessed assets are reviewed and evaluated on at least a quarterly basis for additional impairment and adjusted accordingly, based on same or similar factors above.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 11. FAIR VALUE DISCLOSURES - continued

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

The following table summarizes financial assets and financial liabilities measured at fair value on a nonrecurring basis, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	June 30, 2017			
	Level 1	Level 2	Level 3	Total
	Inputs	Inputs	Inputs	Fair
	(In Thousands)			
Impaired loans	\$-	\$ -	\$1,573	\$1,573
Repossessed assets	-	-	493	493

	December 31, 2016			
	Level 1	Level 2	Level 3	Total
	Inputs	Inputs	Inputs	Fair
	(In Thousands)			
Impaired loans	\$-	\$ -	\$ 649	\$ 649
Repossessed assets	-	-	825	825

As of June 30, 2017, certain impaired loans were remeasured and reported at fair value through a specific valuation allowance allocation of the allowance for possible loan losses based upon the fair value of the underlying collateral. Impaired loans with a carrying value of \$1,611,000 were reduced by specific valuation allowance allocations totaling \$38,000 to a total reported fair value of \$1,573,000 based on collateral valuations utilizing Level 3 valuation inputs.

As of December 31, 2016, certain impaired loans were remeasured and reported at fair value through a specific valuation allowance allocation of the allowance for possible loan losses based upon the fair value of the underlying collateral. Impaired loans with a carrying value of \$657,000 were reduced by specific valuation allowance allocations totaling \$8,000 to a total reported fair value of \$649,000 based on collateral valuations utilizing Level 3 valuation inputs.

The following table represents the Banks's Level 3 financial assets and liabilities, the valuation techniques used to measure the fair value of those financial assets and liabilities, and the significant unobservable inputs and the ranges of values for those inputs.

Instrument (Dollars In Thousands)	Fair Value at June 30, 2017	December 31, 2016	Principal Valuation Technique	Significant Unobservable Inputs	Range of Significant Input Values
Impaired loans	\$1,573	\$ 649	Appraisal of collateral ⁽¹⁾	Appraisal adjustments	10 - 30%
Repossessed assets	\$493	\$ 825	Appraisal of collateral ⁽¹⁾⁽³⁾	Liquidation expenses ⁽²⁾	10 - 30%

(1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various Level 3 inputs which are not identifiable, less associated allowance.

(2) Appraisals may be adjusted for qualitative factors such as economic conditions and estimated liquidation expenses.

(3) The range of liquidation expenses and other appraisal adjustments are presented as a percent of the appraisal.

(3) Includes qualitative adjustments by management and estimated liquidation expenses.

NOTE 11. FAIR VALUE DISCLOSURES - continued

FASB ASC Topic 825 requires disclosure of the fair value of financial instruments, both assets and liabilities recognized and not recognized in the statement of financial position, for which it is practicable to estimate fair value. The tables below summarize the fair market values of financial instruments of the Company, followed by methods and assumptions that were used by the Company in estimating the fair value of the classes of financial instruments.

The estimated fair value amounts of financial instruments have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

The following methods and assumptions were used by the Company in estimating the fair value of the following classes of financial instruments. However, the Form 10-K for the year ended December 31, 2016 provides additional description of valuation methodologies used in estimating fair value of these financial instruments.

Cash, Interest Bearing Accounts, Accrued Interest and Dividend Receivable and Accrued Expenses and Other Liabilities – The carrying amounts approximate fair value due to the relatively short period of time between the

origination of these instruments and their expected realization.

Stock in the Federal Home Loan Bank of Des Moines ("FHLB") and Federal Reserve Bank ("FRB") – The fair value of stock approximates redemption value.

Loans Receivable – Fair values are estimated by stratifying the loan portfolio into groups of loans with similar financial characteristics. Loans are segregated by type such as real estate, commercial, and consumer, with each category further segmented into fixed and adjustable rate interest terms. For mortgage loans, the Company uses the secondary market rates in effect for loans that have similar characteristics. The fair value of other fixed rate loans is calculated by discounting scheduled cash flows through the anticipated maturities adjusted for prepayment estimates. Adjustable interest rate loans are assumed to approximate fair value because they generally reprice within the short term.

Fair values are adjusted for credit risk based on assessment of risk identified with specific loans, and risk adjustments on the remaining portfolio based on credit loss experience.

Assumptions regarding credit risk are judgmentally determined using specific borrower information, internal credit quality analysis, and historical information on segmented loan categories for non-specific borrowers.

Mortgage Servicing Rights – the fair value of servicing rights was determined using discount rates ranging from approximately 13.00% to 15.00%, prepayment speeds ranging from approximately 104.00% to 277.00% PSA, depending on stratification of the specific right. The fair value was also adjusted for the effect of potential past dues and foreclosures.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 11. FAIR VALUE DISCLOSURES - continued

Cash Surrender Value of Life Insurance – The carrying amount for cash surrender value of life insurance approximates fair value as policies are recorded at redemption value.

Deposits and Time Certificates of Deposit – The fair value of deposits with no stated maturity, such as checking, passbook, and money market, is equal to the amount payable on demand. The fair value of time certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar maturities.

Advances from the FHLB and Subordinated Debentures – The fair value of the Company's advances and debentures are estimated using discounted cash flow analysis based on the interest rate that would be effective June 30, 2017 and December 31, 2016, respectively if the borrowings repriced according to their stated terms.

Off-Balance-Sheet Instruments - Fair values for off-balance-sheet, credit-related financial instruments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. The fair values of these financial instruments are considered insignificant. Additionally, those financial instruments have no carrying value.

NOTE 12. RECENT ACCOUNTING PRONOUNCEMENTS

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606). This guidance is a comprehensive new revenue recognition standard that will supersede substantially all existing revenue recognition guidance. The new standard's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under existing guidance. These may include identifying performance obligations in the contract,

estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. On July 9, 2015, the FASB agreed to delay the effective date of the standard by one year. Therefore, the new standard will be effective in the first quarter of 2018 and is not expected to have a significant impact to the Company's consolidated financial statements.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments – Overall: Recognition and Measurement of Financial Assets and Financial Liabilities (Subtopic 825-10). The amendment has a number of provisions including the requirements that public business entities use the exit price notion when measuring the fair value of financial instruments for disclosure purposes, a separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (i.e. securities or loans receivables), and eliminating the requirement for public business entities to disclose the methods and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost. The amendment is effective for annual and interim reporting periods beginning after December 15, 2017 and is not expected to have a significant impact to the Company's consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) intended to improve financial reporting regarding leasing transactions. The new standard affects all companies and organizations that lease assets. The standard will require organizations to recognize on the balance sheet the assets and liabilities for the rights and obligations created by those leases if the lease terms are more than 12 months. The guidance also will require qualitative and quantitative disclosures providing additional information about the amounts recorded in the financial statements. The amendments in this update are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company is evaluating the potential impact of the amendment on the Company's consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 12. RECENT ACCOUNTING PRONOUNCEMENTS - continued

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments – Credit Losses (Topic 326) intended to improve financial reporting by requiring timelier recording of credit losses on loans and other financial instruments held by financial institutions and other organizations. The standard requires an organization to measure all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions and reasonable and supportable forecasts. Financial institutions and other organizations will now use forward-looking information to better inform their credit loss estimates. The standard also requires enhanced disclosures to help investors and other financial statement users better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an organization’s portfolio. These disclosures include qualitative and quantitative requirements that provide additional information about the amounts recorded in the financial statements. Additionally, the standard amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. The amendments in this update are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. All entities may adopt the amendments in this update earlier as of the fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. An entity will apply the amendments in this update through a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective (that is, a modified-retrospective approach). The Company believes the amendments in this update will have an impact on the Company’s consolidated financial statements and is working to evaluate the significance of that impact.

In January 2017, the FASB issued ASU No. 2017-04, Intangibles – Goodwill and Other (Topic 350) to amend and simplify current goodwill impairment testing to eliminate Step 2 from the current provisions. Under the new guidance, an entity should perform the goodwill impairment test by comparing the fair value of a reporting unit with its carrying value and recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit’s fair value. An entity still has the option to perform the quantitative assessment for a reporting unit to determine if a quantitative impairment test is necessary. The guidance will be effective for the Company on January 1, 2020 and is not expected to have a significant impact on the Company’s consolidated financial statements.

In March 2017, the FASB issued ASU No. 2017-08, Receivables–Nonrefundable Fees and Other Costs (Subtopic 310-20) to shorten the amortization period for certain purchased callable debt securities held at a premium to the earliest call date. Currently, entities generally amortize the premium as a yield adjustment over the contractual life of the security. The guidance does not change the accounting for callable debt securities held at a discount. For public

business entities, the guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted, including in an interim period. The Company is evaluating the potential impact of the amendment on the Company's consolidated financial statements.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

The Company's primary business activity is the ownership of its wholly owned subsidiary, Opportunity Bank of Montana (the "Bank"). The Bank is a Montana chartered commercial bank that focuses on both consumer and commercial lending. It engages in typical banking activities: acquiring deposits from local markets and originating loans and investing in securities. Its deposits are insured by the Federal Deposit Insurance Corporation. The Bank's primary component of earnings is its net interest margin (also called spread or margin), the difference between interest income and interest expense. The net interest margin is managed by management (through the pricing of its products and by the types of products offered and kept in portfolio), and is affected by changes in market interest rates. The Bank also generates noninterest income in the form of fee income and gain on sale of loans.

The Bank has a strong mortgage lending focus, with a large portion of its loan originations represented by single-family residential mortgages, which has enabled it to successfully market home equity loans, as well as a wide range of shorter term consumer loans for various personal needs (automobiles, recreational vehicles, etc.). In recent years, the Bank has focused on adding commercial loans to its portfolio, both real estate and non-real estate. We have made significant progress in this initiative. The purpose of this diversification is to mitigate the Bank's dependence on the residential mortgage market, as well as to improve its ability to manage its spread. The Bank's management recognizes that fee income will also enable it to be less dependent on specialized lending and it now maintains a significant loan serviced portfolio which provides a steady source of fee income. Fee income is also supplemented with fees generated from the Bank's deposit accounts. The Bank has a high percentage of non-maturity deposits, such as checking accounts and savings accounts, which allows management flexibility in managing its spread. Non-maturity deposits and certificates of deposits do not automatically reprice as interest rates rise. Gain on sale of loans also provides significant noninterest income in periods of high mortgage loan origination volumes. Such income will be adversely affected in periods of lower mortgage activity.

In recent years, management's focus has been on improving the Bank's core earnings. Core earnings can be described as income before taxes, with the exclusion of gain on sale of loans and adjustments to the market value of the Bank's loan servicing portfolio. Management believes that the Bank will need to continue to focus on increasing net interest margin, other areas of fee income and control of operating expenses to achieve earnings growth going forward. Management's strategy of growing the bank's loan portfolio and deposit base is expected to help achieve these goals as follows: loans typically earn higher rates of return than investments; a larger deposit base should yield higher fee income; increasing the asset base will reduce the relative impact of fixed operating costs. The biggest challenge to the strategy is funding the growth of the Bank's balance sheet in an efficient manner. Though deposit growth has been steady, it may become more difficult to maintain due to significant competition and possible reduced customer demand for deposits as customers may shift into other asset classes.

The level and movement of interest rates impacts the Bank's earnings as well. The Federal Open Market Committee changed the federal funds target rate from 0.5% to 0.75% in December 2016. The rate increased from 0.75% to 1.0% during the three months ended March 31, 2017. The rate increased from 1.0% to 1.25% during the three months ended June 30, 2017.

Financial Condition

Comparisons of financial condition in this section are between June 30, 2017 and December 31, 2016.

Total assets were \$710.21 million at June 30, 2017, an increase of \$36.28 million, or 5.4%, from \$673.93 million at December 31, 2016. The increase was largely due to the change in loans receivable. Loans receivable increased by \$41.52 million, or 9.0%, to \$502.91 million at June 30, 2017, from \$461.39 million at December 31, 2016. Total liabilities were \$648.09 million at June 30, 2017, an increase of \$33.62 million, or 5.5%, from \$614.47 million at December 31, 2016. The increase was primarily due to an increase in Federal Home Loan Bank ("FHLB") advances and other borrowings, as well as, an increase in other long-term debt. FHLB advances and other borrowings increased \$21.77 million to \$104.18 million at June 30, 2017 from \$82.41 million at December 31, 2016. Other long-term debt increased by \$9.81 million to \$24.78 million at June 30, 2017 from \$14.97 million at December 31, 2016.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Financial Condition – continued**Balance Sheet Details*****Investment Activities***

The following table summarizes investment activities:

	June 30, 2017		December 31, 2016			
	Fair Value	Percentage of Total	Fair Value	Percentage of Total		
(Dollars in Thousands)						
Securities available-for-sale:						
U.S. government and agency	\$4,246	3.25	% \$5,608	4.18	%	
Municipal obligations	65,924	50.44	% 67,664	50.45	%	
Corporate obligations	9,606	7.35	% 9,307	6.94	%	
MBSs - government-backed	27,717	21.21	% 29,512	22.01	%	
CMOs - government-backed	15,698	12.01	% 16,345	12.19	%	
Total securities available-for-sale	123,191	94.26	% 128,436	95.77	%	
Interest bearing deposits	1,797	1.37	% 787	0.59	%	
FHLB capital stock, at cost	4,841	3.70	% 4,012	2.99	%	
FRB capital stock, at cost	871	0.67	% 871	0.65	%	
Total	\$130,700	100.00	% \$134,106	100.00	%	

Securities available-for-sale were \$123.19 million at June 30, 2017, a decrease of \$5.25 million, or 4.1%, from \$128.44 million at December 31, 2016. All categories of securities available-for-sale decreased during the period with the exception of corporate obligations. The decreases in U.S. government and agency and municipal obligations were primarily due to investment sales. The slight increase in corporate securities was primarily due to securities purchases largely offset by calls.

Deferred loan fees	(1,008)		(1,092)	
Allowance for loan losses	(5,225)		(4,770)	
Total loans, net	\$ 502,907		\$ 461,391	

⁽¹⁾ Excludes loans held-for-sale.

Loans receivable increased \$41.52 million to \$502.91 million at June 30, 2017. The increase was largely due to an increase in commercial real estate loans of \$31.08 million. Real estate construction loans also increased \$8.90 million and commercial loans increased \$3.52 million. Residential mortgage decreased slightly by \$2.35 million. Total loan originations were \$218.93 million for the six months ended June 30, 2017, with residential mortgage accounting for \$136.02 million of the total. Commercial real estate and land loan originations were \$47.46 million. Consumer loan originations were \$4.19 million and home equity originations were \$8.54 million. Real estate construction loan originations were \$10.68 million. Commercial loans originations were \$12.04 million, with none originating from loan syndication programs with borrowers residing outside of Montana. Loans held-for-sale decreased by \$2.02 million, to \$16.21 million at June 30, 2017 from \$18.23 million at December 31, 2016.

Nonperforming Assets. Generally, our collection procedures provide that when a loan is 15 or more days delinquent, the borrower is sent a past due notice. If the loan becomes 30 days delinquent, the borrower is sent a written delinquency notice requiring payment. If the delinquency continues, subsequent efforts are made to contact the delinquent borrower, including face to face meetings and counseling to resolve the delinquency. All collection actions are undertaken with the objective of compliance with the Fair Debt Collection Act.

Financial Condition – continued*Lending Activities– continued*

For mortgage loans and home equity loans, if the borrower is unable to cure the delinquency or reach a payment agreement, we will institute foreclosure actions. If a foreclosure action is taken and the loan is not reinstated, paid in full or refinanced, the property is sold at judicial sale at which we may be the buyer if there are no adequate offers to satisfy the debt. Any property acquired as the result of foreclosure, or by deed in lieu of foreclosure, is classified as real estate owned until such time as it is sold or otherwise disposed of. When real estate owned is acquired, it is recorded at its fair market value less estimated selling costs. The initial recording of any loss is charged to the allowance for loan losses. Subsequent write-downs are recorded as a charge to operations. As of June 30, 2017, the Bank had \$483,000 of real estate owned.

The following table sets forth information regarding nonperforming assets:

Other certificates	108,857	21.17 %	118,405	23.09 %
Total certificates of deposit	149,227	29.02 %	165,278	32.23 %
Total deposits	\$514,265	100.00 %	\$512,795	100.00 %

Deposits increased slightly by \$1.47 million, or 0.3%, to \$514.27 million at June 30, 2017 from \$512.80 million at December 31, 2016. Noninterest checking increased by \$8.93 million. Savings and interest bearing checking increased by \$6.47 million and \$2.11 million, respectively. These increases were largely offset by a decrease in certificates of deposit of \$16.05 million. Money market accounts remained consistent period over period.

The following table summarizes borrowing activity:

	June 30, 2017		December 31, 2016	
	Net Amount	Percent of Total	Net Amount	Percent of Total
	(Dollars in Thousands)			
FHLB advances and other borrowings	\$104,182	80.79 %	\$82,413	84.63 %
Other long-term debt:				
Senior notes fixed at 5.75%, due 2022	9,798	7.60 %	-	0.00 %
Subordinated debentures fixed at 6.75%, due 2025	9,825	7.61 %	9,815	10.08 %
Subordinated debentures variable, due 2035	5,155	4.00 %	5,155	5.29 %
Total other long-term debt	24,778	19.21 %	14,970	15.37 %
Total borrowings	128,960	100.00 %	97,383	100.00 %

FHLB advances and other borrowings increased by \$21.77 million, or 26.4%, to \$104.18 million at June 30, 2017 from \$82.41 million at December 31, 2016. The borrowings were used to help fund the continued loan growth.

Long-term debt increased by \$9.81 million to \$24.78 million at June 30, 2017 from \$14.97 million at December 31, 2016 primarily due to the issuance of \$10.00 million aggregate principal amount of 5.75% fixed senior unsecured notes due in 2022.

Shareholders' Equity

Total shareholders' equity increased \$2.66 million, or 4.5%, to \$62.12 million at June 30, 2017 from \$59.46 million at December 31, 2016. This was primarily the result of a net income of \$1.83 million and other comprehensive income of \$1.28 million, partially offset by dividends paid of \$609,000.

Table of Contents

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Analysis of Net Interest Income

The Bank's earnings have historically depended primarily upon net interest income, which is the difference between interest income earned on loans and investments and interest paid on deposits and any borrowed funds. It is the single largest component of Eagle's operating income. Net interest income is affected by (i) the difference between rates of interest earned on loans and investments and rates paid on interest bearing deposits and borrowings (the "interest rate spread") and (ii) the relative amounts of loans and investments and interest bearing deposits and borrowings.

The following tables include average balances for balance sheet items, as well as, interest and dividends and average yields related to the average balances. All average balances are daily average balances. Non-accrual loans were included in the computation of average balances, but have been reflected in the table as loans carrying a zero yield. The yields include the effect of deferred fees and discounts and premiums that are amortized or accreted to interest income or expense.

	For the Three Months Ended June 30,

(1) Includes loans held-for-sale.

(2) Interest rate spread represents the difference between the average yield on interest-earning assets and the average rate on interest-bearing liabilities.

(3) Net interest margin represents income before the provision for loan losses divided by average interest-earning assets.

(4) For purposes of this table, tax exempt income is not calculated on a tax equivalent basis.

Rate/Volume Analysis

The following tables present the dollar amount of changes in interest income and interest expense for major components of interest earning assets and interest bearing liabilities. For each category of interest earning assets and interest bearing liabilities, information is provided on changes attributable to: (1) changes in volume multiplied by the old rate; (2) changes in rate, which are changes in rate multiplied by the old volume; and (3) changes not solely attributable to rate or volume, which have been allocated proportionately to the change due to volume and the change due to rate.

Results of Operations for the Three Months Ended June 30, 2017 and 2016

Net Income. Eagle's net income for the three months ended June 30, 2017 was \$1.07 million compared to \$1.26 million for the three months ended June 30, 2016. The decrease of \$198,000, or 15.7%, was due to an increase in noninterest expense of \$934,000, a decrease in noninterest income of \$236,000 and an increase in income tax expense of \$122,000, partially offset by an increase in net interest income after loan loss provision of \$1.10 million. Basic and diluted earnings per share were \$0.28 and \$0.27, respectively, for the current period. Basic and diluted earnings per

share were \$0.34 and \$0.32, respectively, for the prior year comparable period.

Net Interest Income. Net interest income increased to \$5.88 million for the three months ended June 30, 2017, from \$4.94 million for the same quarter in the prior year. This increase of \$937,000, or 19.0%, was the result of an increase in interest and dividend income of \$1.20 million, partially offset by an increase in interest expense of \$257,000.

Interest and Dividend Income. Interest and dividend income was \$6.93 million for the three months ended June 30, 2017, compared to \$5.73 million for the three months ended June 30, 2016, an increase of \$1.20 million, or 20.9%. Interest and fees on loans increased to \$6.17 million for the three months ended June 30, 2017 from \$4.96 million for the three months ended June 30, 2016. This increase of \$1.21 million, or 24.4%, was due to an increase in the average balance of loans, as well as, an increase in the average yield of loans for the quarter ended June 30, 2017. Average balances for loans receivable, net, including loans held-for-sale, for the three months ended June 30, 2017 were \$512.14 million, compared to \$448.16 million for the prior year period. This represents an increase of \$63.98 million, or 14.3%. The average interest rate earned on loans receivable increased by 40 basis points, from 4.42% to 4.82%. Interest and dividends on investment securities available-for-sale decreased slightly period over period. Average interest rates earned on investments increased to 2.25% from 2.07%. However, average balances for investments decreased to \$126.94 million for the three months ended June 30, 2017, from \$143.27 million for the three months ended June 30, 2016.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations for the Three Months Ended June 30, 2017 and 2016 – continued

Interest Expense. Total interest expense was \$1.05 million for the three months ended June 30, 2017 compared to \$788,000 for the three months ended June 30, 2016. The increase of \$257,000 or 32.6% was largely attributable to an increase in interest expense on FHLB advances and other borrowings including long-term debt. The average borrowing balance increased from \$93.78 million for the three months ended June 30, 2016 to \$122.62 million for the three months ended June 30, 2017. The average rate paid increased from 1.74% for the three months ended June 30, 2016, to 2.18% for the three months ended June 30, 2017. Borrowings have been used to help fund the continued loan growth. Also, in February 2017, the Company completed the issuance of \$10.00 million in aggregate principal amount of 5.75% fixed senior unsecured notes due in 2022. The small decrease in interest on deposits is due to the overall average rate on interest-bearing deposits decreasing slightly.

Loan Loss Provision. Loan loss provisions are charged to earnings to maintain total allowance for loan losses at a level considered adequate by management of the Bank, to provide for probable loan losses based on prior loss experience, volume and type of lending conducted by the Bank and past due loans in the portfolio. The Bank's policies require review of assets on a quarterly basis. The Bank classifies loans as well as other assets if warranted. While management believes it uses the best information available to make a determination with respect to the allowance for loan losses, it recognizes that future adjustments may be necessary. The Bank recorded \$302,000 in provision for loan losses for the three months ended June 30, 2017 and \$459,000 for the three months ended June 30, 2016.

Noninterest Income. Total noninterest income decreased slightly to \$3.57 million for the three months ended June 30, 2017, from \$3.81 million for the three months ended June 30, 2016, a decrease of \$236,000 or 6.2%. The decrease is primarily due to a decrease in net gain on sale of loans which decreased to \$2.26 million for the three months ended June 30, 2017 from \$2.44 million for the three months ended June 30, 2016. The decrease is due to gross margin on sale of mortgage loans of approximately 3.1% for the three months ended June 30, 2017 compared to approximately 3.5% for the three months ended June 30, 2016. The decrease in gross margin on sale of mortgage loans is due to interest rate movements in the mortgage market. During the three months ended June 30, 2017, \$84.30 million residential mortgages were originated compared to \$80.23 million for the three months ended June 30, 2016. In addition, \$73.34 million mortgage loans were sold during the current quarter compared to \$68.78 million in the same quarter in the prior year. In addition, the Company incurred a net loss on sale of available-for-sale securities of \$14,000 for the three months ended June 30, 2017 compared to a net gain of \$84,000 for the three months ended June 30, 2016.

Noninterest Expense. Noninterest expense was \$7.62 million for the three months ended June 30, 2017 compared to \$6.69 million for the three months ended June 30, 2016. The increase of \$934,000 or 14.0% is largely due to increased salaries and employee benefits expense of \$670,000. The increase is due in part to higher commission-based compensation related to the continued loan growth and additional staff related to compliance with mortgage rules.

Income Tax Expense. Income tax expense was \$462,000 for the three months ended June 30, 2017, compared to \$340,000 for the three months ended June 30, 2016. The effective tax rate for the three months ended June 30, 2017 was 30.2%.

Results of Operations for the Six Months Ended June 30, 2017 and 2016

Net Income. Eagle's net income for the six months ended June 30, 2017 was \$1.83 million compared to \$1.91 million of net income for the six months ended June 30, 2016. The slight decrease of \$82,000, or 4.3%, was primarily due to an increase in noninterest expense of \$1.83 million and an increase in income tax expense of \$191,000, largely offset by an increase in net interest income after loan loss provision of \$1.86 million and an increase in noninterest income of \$76,000. Basic and diluted earnings per share were \$0.48 and \$0.47, respectively, for the current period. Basic and diluted earnings per share were \$0.51 and \$0.49, respectively, for the prior year comparable period.

Net Interest Income. Net interest income increased to \$11.36 million for the six months ended June 30, 2017, from \$9.81 million for the previous year's six month period. This increase of \$1.55 million, or 15.8%, was the result of an increase in interest and dividend income of \$1.92 million partially offset by an increase in interest expense of \$364,000.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations for the Six Months Ended June 30, 2017 and 2016 – continued

Interest and Dividend Income. Interest and dividend income was \$13.27 million for the six months ended June 30, 2017, compared to \$11.35 million for the six months ended June 30, 2016, an increase of \$1.92 million, or 16.9%. Interest and fees on loans increased to \$11.74 million for the six months ended June 30, 2017 from \$9.79 million for the same period ended June 30, 2016. This increase of \$1.95 million, or 19.9%, was due to an increase in the average balance of loans, as well as, an increase in the average yield on loans. Average balances for loans receivable, net, including loans held-for-sale, for the six months ended June 30, 2017 were \$493.39 million, compared to \$438.28 million for the prior year period. This represents an increase of \$55.11 million, or 12.6%. The average interest rate earned on loans receivable increased by 29 basis points, from 4.47% to 4.76%. Interest and dividends on investment securities available-for-sale decreased slightly period over period. Average balances for investments decreased to \$127.70 million for the six months ended June 30, 2017, from \$144.59 million for the six months ended June 30, 2016. However, average interest rates earned on investments increased to 2.26% from 2.06%.

Interest Expense. Total interest expense for the six months ended June 30, 2017 was \$1.90 million compared to \$1.54 million for the six months ended June 30, 2016. The increase of \$364,000, or 23.7%, was largely attributable to an increase in interest expense on FHLB advances and other borrowings and other long-term debt. The average borrowing balance increased from \$91.56 million for the six months ended June 30, 2016 to \$103.24 million for the six months ended June 30, 2017. The average rate paid increased from 1.75% for the six months ended June 30, 2016, to 2.22% for the six months ended June 30, 2017. Borrowings have been used to help fund the continued loan growth. Also, in February 2017, the Company completed the issuance of \$10.00 million in aggregate principal amount of 5.75% fixed senior unsecured notes due in 2022. The slight increase in interest on deposits is due to higher overall average balances for interest-bearing deposits. The overall average rate on interest-bearing deposits decreased slightly compared to the six months ended June 30, 2016.

Loan Loss Provision. Loan loss provisions are charged to earnings to maintain the total allowance for loan losses at a level considered adequate by management of the Bank, to provide for probable loan losses based on prior loss experience, volume and type of lending conducted by the Bank and past due loans in the portfolio. The Bank's policies require a review of assets on a quarterly basis. The Bank classifies loans as well as other assets if warranted. While management believes it uses the best information available to make a determination with respect to the allowance for loan losses, it recognizes that future adjustments may be necessary. The Bank recorded \$603,000 in loan loss provisions for the six months ended June 30, 2017 and \$909,000 in the six months ended June 30, 2016. Total

nonperforming loans, including restructured loans, was \$1.69 million at June 30, 2017. As of June 30, 2017, the Bank had \$493,000 in foreclosed real estate property and other repossessed property.

Noninterest Income. Total noninterest income increased to \$6.78 million for the six months ended June 30, 2017, from \$6.70 million for the six months ended June 30, 2016, a slight increase of \$76,000 or 1.1%. The increase is largely due to an increase in mortgage loan servicing fees of \$251,000. During the six months ended June 30, 2017, \$129.91 million mortgage loans were sold compared to \$121.11 million in the same period in the prior year. This increase was partially offset by the change in the net loss/gain on sale of available-for-sale securities. The Company incurred a net loss on sale of available-for-sale securities of \$14,000 for the six months ended June 30, 2017 compared to a net gain of \$84,000 for the six months ended June 30, 2016.

Noninterest Expense. Noninterest expense was \$15.06 million for the six months ended June 30, 2017 compared to \$13.23 million for the six months ended June 30, 2016. The increase of \$1.83 million, or 13.8%, is largely due to increased salaries and employee benefits expense of \$1.41 million. The increase in salaries expense is due in part to higher commission-based compensation related to the continued loan growth and additional staff related to compliance with mortgage rules.

Income Tax Expense. Income tax expense was \$650,000 for the six months ended June 30, 2017, compared to \$459,000 for the six months ended June 30, 2016. The effective tax rate for the six months ended June 30, 2017 was 26.2%. Income tax expense has increased with our increased income levels. However, tax free municipal bond income and Bank owned life insurance income help to lower the overall effective tax rates. The effective tax rate is further reduced by a tax credit investment entered into by the Company in 2012. The Bank made an investment in Certified Development Entities which have received allocations of New Markets Tax Credits ("NMTC"). Administered by the Community Development Financial Institutions Fund of the U.S. Department of the Treasury, the NMTC program is aimed at stimulating economic and community development and job creation in low-income communities. The federal income tax credits received are claimed over an estimated seven-year credit allowance period.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Liquidity and Capital Resources

Liquidity

The Bank is required to maintain minimum levels of liquid assets as defined in the regulations of the Montana Division of Banking and Financial Institutions and Federal Reserve Bank ("FRB") regulations. The liquidity requirement is retained for safety and soundness purposes, and appropriate levels of liquidity will depend upon the types of activities in which the company engages. For internal reporting purposes, the Bank uses policy minimums of 1.0%, and 8.0% for "basic surplus" and "basic surplus with FHLB" as internally defined. In general, the "basic surplus" is a calculation of the ratio of unencumbered short-term assets reduced by estimated percentages of CD maturities and other deposits that may leave the Bank in the next 90 days divided by total assets. "Basic surplus with FHLB" adds to "basic surplus" the additional borrowing capacity the Bank has with FHLB. The Bank exceeded those minimum ratios as of both June 30, 2017 and December 31, 2016.

The Bank's primary sources of funds are deposits, repayment of loans and mortgage-backed and collateralized mortgage obligation securities, maturities of investments, funds provided from operations and advances from FHLB and other borrowings. Scheduled repayments of loans and mortgage-backed and collateralized mortgage obligation securities and maturities of investment securities are generally predictable. However, other sources of funds, such as deposit flows and loan prepayments, can be greatly influenced by the general level of interest rates, economic conditions and competition. The Bank uses liquidity resources principally to fund existing and future loan commitments. It also uses them to fund maturing certificates of deposit, demand deposit withdrawals and to invest in other loans and investments, maintain liquidity and meet operating expenses.

Liquidity may be adversely affected by unexpected deposit outflows, higher interest rates paid by competitors and similar matters. Management monitors projected liquidity needs and determines the level desirable, based in part on commitments to make loans and management's assessment of the Bank's ability to generate funds.

Capital Resources

At May 31, 2017 (the most recent report available for June 30, 2017), the Bank's internally determined measurement of sensitivity to interest rate movements as measured by a 200 basis point rise in interest rates scenario, decreased the economic value of equity ("EVE") by 0.8% compared to an increase of 2.1% at November 30, 2016 (the most recent report available for December 31, 2016). The Bank is within the guidelines set forth by the Board of Directors for interest rate risk sensitivity in rising interest rate scenarios.

Beginning January 1, 2015, community banking organizations became subject to a new regulatory rule recently adopted by federal banking agencies (commonly referred to as Basel III). The new rule establishes a new regulatory capital framework that incorporates revisions to the Basel capital framework, strengthens the definition of regulatory capital, increases risk-based capital requirements, and amends the methodologies for determining risk-weighted assets. These changes are expected to increase the amount of capital required by community banking organizations. Basel III includes a multiyear transition period from January 1, 2015 through December 31, 2019.

The Banks's Tier I leverage ratio, as measured under State of Montana and FRB rules, increased from 9.23% as of December 31, 2016 to 10.39% as of June 30, 2017. The Bank's strong capital position helps to mitigate its interest rate risk exposure.

As of June 30, 2017, the Bank's regulatory capital was in excess of all applicable regulatory requirements. As of June 30, 2017, the Bank's total capital, Tier 1 capital, common equity Tier 1 capital and Tier 1 leverage ratios were 15.09%, 14.06%, 14.06% and 10.39%, respectively, compared to regulatory requirements of 9.25%, 7.25%, 5.75% and 5.25%, respectively. These regulatory requirement ratios include the capital conservation buffer of 1.25% phased-in beginning January 1, 2017.

Interest Rate Risk

Interest rate risk is the potential for loss of future earnings resulting from adverse changes in the level of interest rates. Interest rate risk results from several factors and could have a significant impact on the Company's net interest income, which is the Company primary source of income. Net interest income is affected by changes in interest rates, the

relationship between rates on interest bearing assets and liabilities, the impact of interest fluctuations on asset prepayments and the mix of interest bearing assets and liabilities.

Although interest rate risk is inherent in the banking industry, banks are expected to have sound risk management practices in place to measure, monitor and control interest rate exposures. The objective of interest rate risk management is to contain the risks associated with interest rate fluctuations. The process involves identification and management of the sensitivity of net interest income to changing interest rates.

The ongoing monitoring and management of this risk is an important component of the Company's asset/liability committee, which is governed by policies established by the Company's Board that are reviewed and approved annually. The Board delegates responsibility for carrying out the asset/liability management policies to the Bank's asset/liability committee. In this capacity, the asset/liability committee develops guidelines and strategies impacting the Company's asset/liability management related activities based upon estimated market risk sensitivity, policy limits and overall market interest rate levels and trends. The Company's goal of its asset and liability management practices is to maintain or increase the level of net interest income within an acceptable level of interest rate risk. Our asset and liability policy and strategies are expected to continue as described so long as competitive and regulatory conditions in the financial institution industry and market interest rates continue as they have in recent years.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARIES

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Interest Rate Risk – continued

The Bank has established acceptable levels of interest rate risk as follows: Projected net interest income over the next twelve months will not be reduced by more than 15.0% given a change in interest rates of up to 200 basis points (+ or -).

The following table includes the Banks’s net interest income sensitivity analysis.

Changes in Market Interest Rates (Basis Points)	Rate Sensitivity As of May 31, 2017		Policy Limits
	Year 1	Year 2	
+200	-1.62%	-2.11%	-15.00%
-100	-0.85%	-4.56%	-15.00%

Impact of Inflation and Changing Prices

Our financial statements and the accompanying notes have been prepared in accordance with generally accepted accounting principles, which require the measurement of financial position and operating results in terms of historical dollars without considering the change in the relative purchasing power of money over time and due to inflation. The impact of inflation is reflected in the increased cost of our operations. Interest rates have a greater impact on our performance than do the general levels of inflation. Interest rates do not necessarily move in the same direction or to the same extent as the prices of goods and services.

CONTROLS AND PROCEDURES

Item 4. Controls and Procedures

As of the end of the period covered by this report, we conducted an evaluation under the supervision and with the participation of our management including our Chief Executive Officer (“CEO”) and our Chief Financial Officer (“CFO”) of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, to ensure that information required to be disclosed by us in the reports filed or submitted by us under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission’s rules and forms, including to ensure that information required to be disclosed by us in the reports filed or submitted by us under the Exchange Act is accumulated and communicated to management to allow timely decisions regarding required disclosure. Based on that evaluation, our CEO and CFO concluded that as of June 30, 2017, our disclosure controls and procedures were effective. During the last quarter, there were no changes in the Company’s internal control over financial reporting that have materially affected, or were reasonably likely to materially affect, the Company’s internal control over financial reporting.

Part II - OTHER INFORMATION

Item 1. Legal Proceedings.

Neither the Company nor the Bank is involved in any pending legal proceeding other than non-material legal proceedings occurring in the ordinary course of business.

Item 1A. Risk Factors.

There have not been any material changes in the risk factors previously disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2016.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

On July 20, 2017, the Board authorized the repurchase of up to 100,000 shares of its common stock. Under the plan, shares may be purchased by the Company on the open market or in privately negotiated transactions. The extent to which the company repurchases its shares and the timing of such repurchase will depend upon market conditions and other corporate considerations. The plan expires on July 20, 2018.

On July 21, 2016, the Board authorized the repurchase of up to 100,000 shares of its common stock. Under the plan, shares could be purchased by the Company on the open market or in privately negotiated transactions. No shares were purchased under this plan during the year ended December 31, 2016. No shares were purchased under this plan during the three months ended March 31, 2017 or June 30, 2017. The plan expired on July 21, 2017.

On July 23, 2015, the Board of Directors authorized the repurchase of up to 100,000 shares of its common stock. Under the plan, shares could be purchased by the Company on the open market or in privately negotiated transactions. During the three months ended December 31, 2015, 15,000 shares were purchased at an average price of \$11.75 per share. During the three months ended September 30, 2015, 46,065 shares were purchased at an average price of

\$11.47 per share. The plan expired on July 23, 2016.
