months ended March 31, 2005, total revenues, net income and net income per share on a diluted basis were \$5,735,000, \$3,039,000 and \$.39 per share, respectively. Net income for the three months ended March 31, 2005 includes income from discontinued operations of \$81,000, or \$.01 per diluted share. The weighted average number of common shares outstanding on a diluted basis was 7,945,242 and 7,806,385 for the three months ended March 31, 2006 and 2005, respectively.

For the six months ended March 31, 2006, BRT reported a 34% increase in total revenues and a 20% increase in net income. For the six months ended March 31, 2006, BRT reported revenues of \$15,521,000 and net income of \$8,834,000, or \$1.12 per share on a diluted basis. Net income for the six months ended March 31, 2006 includes \$2,531,000, or \$.32 per diluted share, representing gain on disposition of real estate related to unconsolidated real estate ventures, offset by \$750,000 representing BRT's share of the loss of unconsolidated joint ventures, primarily related to the prepayment by a joint venture of the mortgage related to the same property. The net income for the six months ended March 31, 2006 also includes \$283,000 of income from discontinued operations, or \$.03 per diluted share. For the six months ended March 31, 2005, BRT reported total revenues of \$11,541,000 and net income of \$7,350,000, or \$.94 per diluted share. Net income for the six months ended March 31, 2005 includes gain on sale of available-for-sale securities of \$680,000, or \$.09 per share, and \$190,000 of income from discontinued operations, or \$.02 per diluted share. The weighted average number of common shares outstanding on a diluted basis was 7,910,922 and 7,777,400 for the six months ended March 31, 2006 and 2005, respectively.

Commenting on the results of operations for the three and six months ended March 31, 2006, Jeffrey Gould, President and Chief Executive Officer of BRT, noted that the primary reason for the increase in revenues was the significant increase in the average balance of loans outstanding from \$130 million in the three months ended March 31, 2005 to \$191.5 million in the three months ended March 31, 2006 and from \$128.9 million in the six months ended March 31, 2005 to \$182.7 million in the six months ended March 31, 2006. Revenues in the current periods also benefited from an increase in the average interest rate earned on the loan portfolio and increases in fee income related to the increased loan portfolio.

On the expense side, Mr. Gould noted that interest expense increased significantly in both current periods as the average balance of borrowings increased as a direct result of borrowings under BRT's credit facilities to fund the increase in loan originations. Also contributing to the increased interest expense was an increase in the interest rate paid on borrowed funds in both current periods. There was also an increase in both current periods in all significant expense categories due to the increased level of business and the increase in loan originations. Among other items, there was an increase in the adviser's fee, in payroll and payroll related expenses due to increased staffing, increased bonuses, higher commissions to loan originators, an increase in restricted stock amortization, an increase in allocated expenses under a shared services agreement, an increase in accounting and auditing fees, and an increase in advertising.
