Company Overview

We are a patent acquisition and licensing company. We acquire patents from a wide-range of patent holders, from individual inventors to Fortune 500 companies. Our strategy of acquiring patents that cover a wide-range of subject matter allows us to achieve diversity within our patent asset portfolio. We monetize our diversified portfolio through actively managed concurrent licensing campaigns. This approach is expected to result in a long term, diversified revenue stream.

As of December 27, 2013, we have a patent portfolio consisting of 116 U.S. and foreign patents, including 17 recently acquired patents, and five open applications. In the second quarter of 2013, we began to generate revenue from our patent portfolio.

Corporate Information

We were incorporated in the State of Nevada on February 23, 2010 under the name “Verve Ventures, Inc.” On December 7, 2011, we changed our name to “American Strategic Minerals Corporation” and we were primarily engaged in exploration and potential development of uranium and vanadium minerals business. During June 2012, we decided to discontinue our uranium and vanadium minerals business and engaged in the business of acquiring, renovating, and selling real estate properties located within the areas of Southern California. On November 14, 2012, we acquired all the intellectual property rights of Sampo IP LLC, decided to discontinue our real estate business and to redirect the company’s operations to the patent acquisition and licensing business under new management experienced in that business.

Our principal office is located at 2331 Mill Road, Suite 100, Alexandria, VA 22314. Our telephone number is (703) 232-1701. Our website is <http://www.marathonpg.com/>. Information on or accessed through our website is not incorporated into this prospectus and is not a part of this prospectus.

Risk Factors

Our business is subject to a number of risks of which you should be aware before making an investment decision. These risks are described in more detail in the “Risk Factors” section of this prospectus immediately following this prospectus summary. These risks include the following:

- We have changed the focus of our business to acquiring, developing and monetizing patents through licensing and enforcement. We may not be able to successfully monetize the patents that we acquire and thus we may fail to realize all of the anticipated benefits of such acquisition.
-

We are presently reliant exclusively on the patent assets we acquired from other companies. If we are unable to license or otherwise monetize such assets and generate revenue and profit through those assets or by other means, there is a significant risk that our business would fail.

- Our limited operating history makes it difficult to evaluate our current business and future prospects.
- The price of our common shares could be highly volatile due to a number of factors, which could lead to losses by investors and costly securities litigation.

- 1,347,692 shares of common stock issuable upon the exercise of options outstanding as of December 27, 2013

at a weighted average exercise price of \$5.87 per share;
and

- 100,000 shares of common stock reserved for issuance on future vesting of restricted stock unit awards granted as of December 27, 2013.

RISK FACTORS

There are numerous and varied risks, known and unknown, that may prevent us from achieving our goals. If any of these risks actually occur, our business, financial condition or results of operation may be materially adversely affected. In such case, the trading price of our common stock could decline and investors could lose all or part of their investment.

Risks Related to Our Company

We have changed the focus of our business to acquiring, developing and monetizing patents through initiating licensing campaigns and when necessary through litigation. We may not be able to successfully monetize the patents which we acquire and thus we may fail to realize all of the anticipated benefits of such acquisition.

There is no assurance that we will be able to successfully acquire, develop or monetize our patent portfolio. The acquisition of the patents could fail to produce anticipated benefits, or could have other adverse effects that we do not currently foresee. Failure to successfully monetize our patents may have a material adverse effect on our business, financial condition and results of operations.

In addition, the acquisition of patent portfolios is subject to a number of risks, including, but not limited to the following:

- There is a significant time lag between acquiring a patent portfolio and recognizing revenue from those patent assets. During that time lag, material costs are likely to be incurred that would have a negative effect on our results of operations, cash flows and financial position; and
- The integration of a patent portfolio will be a time consuming and expensive process that may disrupt our operations. If its integration efforts are not successful, our results of operations could be harmed. In addition, we may not achieve anticipated synergies or other benefits from such acquisition.

Therefore, there is no assurance that the monetization of our patent portfolios will generate enough revenue to recoup our investment.

We are presently reliant exclusively on the patent assets we acquired from other companies. If we are unable to license or otherwise monetize such assets and generate revenue and profit through those assets or by other means, there is a significant risk that our business would fail.

At the commencement of our current line of business in 2012, we acquired a portfolio of patent assets from Sampo IP LLC (“Sampo”), a company affiliated with our Chief Executive Officer, Douglas Croxall, that we plan to license or otherwise monetize. On April 16, 2013, we acquired US Patent 5,331,637 from Mosaid Technologies Incorporated, a Canadian corporation. On April 22, 2013, we acquired a foundational patent portfolio through a merger between Cyberfone Acquisition Corp., a Texas corporation and our wholly owned subsidiary and Cyberfone Systems LLC, a Texas limited liability company (“Cyberfone Systems”). In September 2013, we acquired a portfolio from TeleCommunication Sytems and an additional portfolio from Intergraph Corporation. In October of 2013, we acquired a patent portfolio from TT IP, LLC. In December 2013, we acquired a patent portfolio from Delphi Technologies, Inc. If our efforts to generate revenue from these assets fail, we will have incurred significant losses and may be unable to acquire additional assets. If this occurs, our business would likely fail. We did not obtain any independent valuation with respect to the portfolios we acquired.

Our limited operating history makes it difficult to evaluate our current business and future prospects.

We are a development stage company. We have, prior to the acquisition of Sampo, been involved in unrelated businesses. Our efforts to license existing patents and develop new patents are still in development. Therefore, we not only have no operating history in executing our business model which includes, among other things, creating, prosecuting, licensing, litigating or otherwise monetizing our patent assets. Our lack of operating history makes it difficult to evaluate our current business model and future prospects.

In light of the costs, uncertainties, delays and difficulties frequently encountered by companies in the early stages of development with no operating history, there is a significant risk that we will not be able to:

- implement or execute our current business plan, or demonstrate that our business plan is sound; and/or
- raise sufficient funds in the capital markets to effectuate our business plan.

If we cannot execute any one of the foregoing or similar matters relating to our operations, our business may fail.

We may commence legal proceedings against certain companies, and we expect such litigation to be time-consuming and costly, which may adversely affect our financial condition and our ability to operate our business.

To license or otherwise monetize our patent assets, we may commence legal proceedings against certain companies, pursuant to which we may allege that such companies infringe on one or more of our patents. Our viability could be highly dependent on the outcome of the litigation, and there is a risk that we may be unable to achieve the results we desire from such litigation, which failure would harm our business to a great degree. In addition, the defendants in the litigations are likely to be much larger than us and have substantially more resources than we do, which could make our litigation efforts more difficult.

We anticipate that these legal proceedings may continue for several years and may require significant expenditures for legal fees and other expenses. Disputes regarding the assertion of patents and other intellectual property rights are highly complex and technical. Once initiated, we may be forced to litigate against others to enforce or defend our intellectual property rights or to determine the validity and scope of other parties' proprietary rights. The defendants or other third parties involved in the lawsuits in which we are involved may allege defenses and/or file counterclaims in an effort to avoid or limit liability and damages for patent infringement. If such defenses or counterclaims are successful, they may preclude our ability to derive licensing revenue from the patents. A negative outcome of any such litigation, or one or more claims contained within any such litigation, could materially and adversely impact our business. Additionally, we anticipate that our legal fees and other expenses will be material and will negatively impact our financial condition and results of operations and may result in our inability to continue our business.

We may seek to internally develop additional new inventions and intellectual property, which would take time and be costly. Moreover, the failure to obtain or maintain intellectual property rights for such inventions would lead to the loss of our investments in such activities.

Part of our business may include the internal development of new inventions or intellectual property that we will seek to monetize. However, this aspect of our business would likely require significant capital and would take time to achieve. Such activities could also distract our management team from its present business initiatives, which could have a material and adverse effect on our business. There is also the risk that our initiatives in this regard would not yield any viable new inventions or technology, which would lead to a loss of our investments in time and resources in such activities.

In addition, even if we are able to internally develop new inventions, in order for those inventions to be viable and to compete effectively, we would need to develop and maintain, and we would be heavily reliant upon, a proprietary position with respect to such inventions and intellectual property. However, there are significant risks associated with any such intellectual property we may develop principally including the following:

- patent applications we may file may not result in issued patents or may take longer than we expect to result in issued patents;

- we may be subject to interference proceedings;
- we may be subject to opposition proceedings in the U.S. or foreign countries;
- any patents that are issued to us may not provide meaningful protection;
- we may not be able to develop additional proprietary technologies that are patentable;
- other companies may challenge patents issued to us;
- other companies may have independently developed and/or patented (or may in the future independently develop and patent) similar or alternative technologies, or duplicate our technologies;
- other companies may design around technologies we have developed; and
- enforcement of our patents would be complex, uncertain and very expensive.

We cannot be certain that patents will be issued as a result of any future applications, or that any of our patents, once issued, will provide us with adequate protection from competing products. For example, issued patents may be circumvented or challenged, declared invalid or unenforceable, or narrowed in scope. In addition, since publication of discoveries in scientific or patent literature often lags behind actual discoveries, we cannot be certain that we will be the first to make our additional new inventions or to file patent applications covering those inventions. It is also possible that others may have or may obtain issued patents that could prevent us from commercializing our products or require us to obtain licenses requiring the payment of significant fees or royalties in order to enable us to conduct our business. As to those patents that we may license or otherwise monetize, our rights will depend on maintaining our obligations to the licensor under the applicable license agreement, and we may be unable to do so. Our failure to obtain or maintain intellectual property rights for our inventions would lead to the loss of our investments in such activities, which would have a material and adverse effect on us.

Moreover, patent application delays could cause delays in recognizing revenue from our internally generated patents and could cause us to miss opportunities to license patents before other competing technologies are developed or introduced into the market.

New legislation, regulations or court rulings related to enforcing patents could harm our business and operating results.

If Congress, the United States Patent and Trademark Office or courts implement new legislation, regulations or rulings that impact the patent enforcement process or the rights of patent holders, these changes could negatively affect the Company's business model. For example, limitations on the ability to bring patent enforcement claims, limitations on potential liability for patent infringement, lower evidentiary standards for invalidating patents, increases in the cost to resolve patent disputes and other similar developments could negatively affect the Company's ability to assert its patent or other intellectual property rights.

In addition, on September 16, 2011, the Leahy-Smith America Invents Act (the "Leahy-Smith Act"), was signed into law. The Leahy-Smith Act includes a number of significant changes to United States patent law. These changes include provisions that affect the way patent applications will be prosecuted and may also affect patent litigation. The U.S. Patent Office is currently developing regulations and procedures to govern administration of the Leahy-Smith Act, and many of the substantive changes to patent law associated with the Leahy-Smith Act recently became effective. Accordingly, it is too early to tell what, if any, impact the Leahy-Smith Act will have on the operation of the

Company's business. However, the Leahy-Smith Act and its implementation could increase the uncertainties and costs surrounding the prosecution of patent applications and the enforcement or defense of the Company's issued patents, all of which could have a material adverse effect on the Company's business and financial condition.

On February 27, 2013, US Representatives DeFazio and Chaffetz introduced HR845. In general, the bill known as the SHIELD Act (“Saving High-tech Innovators from Egregious Legal Disputes”), seeks to assess legal fee liability to plaintiffs in patent infringement actions for defendants costs. In the event that the bill becomes law, the potential obligation to pay the legal fees of defendants in patent disputes could have a material adverse effect on the Company’s business or financial condition.

On June 4, 2013, the Obama Administration issued executive actions and legislative recommendations. The legislative measures recommended by the Obama Administration include requiring patentees and patent applicants to disclose the “Real Party-in-Interest”, giving district courts more discretion to award attorney’s fees to the prevailing party, requiring public filing of demand letters such that they are accessible to the public, and protecting consumers against liability for a product being used off-the shelf and solely for its intended use.

The executive actions includes ordering the USPTO to make rules to require the disclosure of the Real Party-in-Interest by requiring patent applicants and owners to regularly update ownership information when they are involved in proceedings before the USPTO (e.g. specifying the “ultimate parent entity”) and requiring the USPTO to train its examiners to better scrutinize functional claims to prevent allowing overly broad claims.

It is impossible to determine the extent of the impact of any new laws, regulations or initiatives that may be proposed, or whether any of the proposals will become enacted as laws. Compliance with any new or existing laws or regulations could be difficult and expensive, affect the manner in which the Company conducts its business and negatively impact the Company’s business, prospects, financial condition and results of operations.

Our acquisitions of patent assets may be time consuming, complex and costly, which could adversely affect our operating results.

Acquisitions of patent or other intellectual property assets, which are and will be critical to our business plan, are often time consuming, complex and costly to consummate. We may utilize many different transaction structures in our acquisitions and the terms of such acquisition agreements tend to be heavily negotiated. As a result, we expect to incur significant operating expenses and will likely be required to raise capital during the negotiations even if the acquisition is ultimately not consummated. Even if we are able to acquire particular patent assets, there is no guarantee that we will generate sufficient revenue related to those patent assets to offset the acquisition costs. While we will seek to conduct confirmatory due diligence on the patent assets we are considering for acquisition, we may acquire patent assets from a seller who does not have proper title to those assets. In those cases, we may be required to spend significant resources to defend our interest in the patent assets and, if we are not successful, our acquisition may be invalid, in which case we could lose part or all of our investment in the assets.

We may also identify patent or other intellectual property assets that cost more than we are prepared to spend with our own capital resources. We may incur significant costs to organize and negotiate a structured acquisition that does not ultimately result in an acquisition of any patent assets or, if consummated, proves to be unprofitable for us. These higher costs could adversely affect our operating results, and if we incur losses, the value of our securities will decline.

In addition, we may acquire patents and technologies that are in the early stages of adoption in the commercial, industrial and consumer markets. Demand for some of these technologies will likely be untested and may be subject to fluctuation based upon the rate at which our licensees will adopt our patents and technologies in their products and services. As a result, there can be no assurance as to whether technologies we acquire or develop will have value that we can monetize.

In certain acquisitions of patent assets, we may seek to defer payment or finance a portion of the acquisition price. This approach may put us at a competitive disadvantage and could result in harm to our business.

We have limited capital and may seek to negotiate acquisitions of patent or other intellectual property assets where we can defer payments or finance a portion of the acquisition price. These types of debt financing or deferred payment arrangements may not be as attractive to sellers of patent assets as receiving the full purchase price for those assets in cash at the closing of the acquisition. As a result, we might not compete effectively against other companies in the market for acquiring patent assets, many of whom have greater cash resources than we have. In addition, any failure to satisfy our debt repayment obligations may result in adverse consequences to our operating results.

Any failure to maintain or protect our patent assets or other intellectual property rights could significantly impair our return on investment from such assets and harm our brand, our business and our operating results.

Our ability to operate our business and compete in the intellectual property market largely depends on the superiority, uniqueness and value of our acquired patent assets and other intellectual property. To protect our proprietary rights, we rely on and will rely on a combination of patent, trademark, copyright and trade secret laws, confidentiality agreements with our employees and third parties, and protective contractual provisions. No assurances can be given that any of the measures we undertake to protect and maintain our assets will have any measure of success.

Following the acquisition of patent assets, we will likely be required to spend significant time and resources to maintain the effectiveness of those assets by paying maintenance fees and making filings with the United States Patent and Trademark Office. We may acquire patent assets, including patent applications, which require us to spend resources to prosecute the applications with the United States Patent and Trademark Office. Further, there is a material risk that patent related claims (such as, for example, infringement claims (and/or claims for indemnification resulting therefrom), unenforceability claims, or invalidity claims) will be asserted or prosecuted against us, and such assertions or prosecutions could materially and adversely affect our business. Regardless of whether any such claims are valid or can be successfully asserted, defending such claims could cause us to incur significant costs and could divert resources away from our other activities.

Despite our efforts to protect our intellectual property rights, any of the following or similar occurrences may reduce the value of our intellectual property:

- our applications for patents, trademarks and copyrights may not be granted and, if granted, may be challenged or invalidated;
- issued trademarks, copyrights, or patents may not provide us with any competitive advantages when compared to potentially infringing other properties;
- our efforts to protect our intellectual property rights may not be effective in preventing misappropriation of our technology; or
- our efforts may not prevent the development and design by others of products or technologies similar to or competitive with, or superior to those we acquire and/or prosecute.

Moreover, we may not be able to effectively protect our intellectual property rights in certain foreign countries where we may do business in the future or from which competitors may operate. If we fail to maintain, defend or prosecute

our patent assets properly, the value of those assets would be reduced or eliminated, and our business would be harmed.

Weak global economic conditions may cause infringing parties to delay entering into licensing agreements, which could prolong our litigation and adversely affect our financial condition and operating results.

Our business plan depends significantly on worldwide economic conditions, and the United States and world economies have recently experienced weak economic conditions. Uncertainty about global economic conditions poses a risk as businesses may postpone spending in response to tighter credit, negative financial news and declines in income or asset values. This response could have a material negative effect on the willingness of parties infringing on our assets to enter into licensing or other revenue generating agreements voluntarily. Entering into such agreements is critical to our business plan, and our failure to do so could cause material harm to our business.

We are a development stage company with no historically significant income and there is a significant doubt about our ability to continue our activities as a going concern.

We are still a development stage company. Our operations are subject to all of the risks inherent in development stage companies that do not have significant revenues or operating income. Our potential for success must be considered in light of the problems, expenses, difficulties, complications and delays frequently encountered in connection with a new business. We cannot provide any assurance that our business objectives will be accomplished. All of our audited consolidated financial statements, since inception, have contained a statement by our management that raises significant doubt about us being able to continue as a going concern unless we are able to raise additional capital. Our consolidated financial statements do not include any adjustment relating to the recovery and classification of recorded asset amounts or the amount and classification of liabilities that might be necessary should our operations cease.

If we are unable to adequately protect our intellectual property, we may not be able to compete effectively.

Our ability to compete depends in part upon the strength of our proprietary rights that we own or may hereafter acquire in our technologies, brands and content. We rely on a combination of U.S. and foreign patents, copyrights, trademark, trade secret laws and license agreements to establish and protect our intellectual property and proprietary rights. The efforts we take to protect our intellectual property and proprietary rights may not be sufficient or effective at stopping unauthorized use of our intellectual property and proprietary rights. In addition, effective trademark, patent, copyright and trade secret protection may not be available or cost-effective in every country in which our services are made available. There may be instances where we are not able to fully protect or utilize our intellectual property in a manner that maximizes competitive advantage. If we are unable to protect our intellectual property and proprietary rights from unauthorized use, the value of our products may be reduced, which could negatively impact our business. Our inability to obtain appropriate protections for our intellectual property may also allow competitors to enter our markets and produce or sell the same or similar products. In addition, protecting our intellectual property and other proprietary rights is expensive and diverts critical managerial resources. If any of the foregoing were to occur, or if we are otherwise unable to protect our intellectual property and proprietary rights, our business and financial results could be adversely affected.

If we are forced to resort to legal proceedings to enforce our intellectual property rights, the proceedings could be burdensome and expensive. In addition, our proprietary rights could be at risk if we are unsuccessful in, or cannot afford to pursue, those proceedings. We also rely on trade secrets and contract law to protect some of our proprietary technology. We will enter into confidentiality and invention agreements with our employees and consultants. Nevertheless, these agreements may not be honored and they may not effectively protect our right to our un-patented trade secrets and know-how. Moreover, others may independently develop substantially equivalent proprietary information and techniques or otherwise gain access to our trade secrets and know-how.

Risks Relating to Our Common Stock

Our management will be able to exert significant influence over us to the detriment of minority stockholders.

Our executive officers and directors beneficially own approximately 14.48% of our outstanding common stock as of December 27, 2013. These stockholders, if they act together, will be able to exert significant influence on our management and affairs and all matters requiring stockholder approval, including significant corporate transactions. This concentration of ownership may have the effect of delaying or preventing our change in control and might affect the market price of our common stock.

Exercise of warrants will dilute your percentage of ownership.

We have issued options and warrants to purchase our common stock to our officers, directors, consultants and certain shareholders. In the future, we may grant additional stock options, warrants and convertible securities. The exercise or conversion of stock options, warrants or convertible securities will dilute the percentage ownership of our other stockholders. The dilutive effect of the exercise or conversion of these securities may adversely affect our ability to obtain additional capital. The holders of these securities may be expected to exercise or convert them when we would be able to obtain additional equity capital on terms more favorable than these securities.

We may fail to qualify for continued trading on the OTC Bulletin Board which could make it more difficult for investors to sell their shares.

Our common stock is quoted on the Over the Counter Bulletin Board (“OTCBB”). There can be no assurance that trading of our common stock on such market will be sustained. In the event that our common stock fails to qualify for continued inclusion, our common stock could thereafter only be quoted on the “pink sheets.” Under such circumstances, shareholders may find it more difficult to dispose of, or to obtain accurate quotations, for our common stock, and our common stock would become substantially less attractive to certain purchasers such as financial institutions, hedge funds and other similar investors.

Our common stock may be affected by limited trading volume and price fluctuations which could adversely impact the value of our common stock.

There has been limited trading in our common stock and there can be no assurance that an active trading market in our common stock will either develop or be maintained. Our common stock has experienced, and is likely to experience in the future, significant price and volume fluctuations which could adversely affect the market price of our common stock without regard to our operating performance. In addition, we believe that factors such as quarterly fluctuations in our financial results and changes in the overall economy or the condition of the financial markets could cause the price of our common stock to fluctuate substantially. These fluctuations may also cause short sellers to periodically enter the market in the belief that we will have poor results in the future. We cannot predict the actions of market participants and, therefore, can offer no assurances that the market for our common stock will be stable or appreciate over time.

Our stock price may be volatile.

The market price of our common stock is likely to be highly volatile and could fluctuate widely in price in response to various factors, many of which are beyond our control, including the following:

- changes in our industry;
- competitive pricing pressures;
- our ability to obtain working capital financing;
- additions or departures of key personnel;
- sales of our common stock;
- our ability to execute our business plan;
- operating results that fall below expectations;
- loss of any strategic relationship;
- regulatory developments; and
- economic and other external factors.

In addition, the securities markets have from time to time experienced significant price and volume fluctuations that are unrelated to the operating performance of particular companies. These market fluctuations may also materially and adversely affect the market price of our common stock.

We have never paid nor do we expect in the near future to pay dividends.

We have never paid cash dividends on our capital stock and do not anticipate paying any cash dividends on our common stock for the foreseeable future. Investors should not rely on an investment in us if they require income generated from dividends paid on our capital stock. Any income derived from our common stock would only come from rise in the market price of our common stock, which is uncertain and unpredictable.

Offers or availability for sale of a substantial number of shares of our common stock may cause the price of our common stock to decline.

If our stockholders sell substantial amounts of our common stock in the public market upon the expiration of any statutory holding period, under Rule 144, or issued upon the exercise of outstanding warrants, it could create a circumstance commonly referred to as an "overhang" and in anticipation of which the market price of our common stock could fall. The existence of an overhang, whether or not sales have occurred or are occurring, also could make more difficult our ability to raise additional financing through the sale of equity or equity-related securities in the future at a time and price that we deem reasonable or appropriate. The shares of our restricted common stock will be freely tradable upon the earlier of: (i) effectiveness of a registration statement covering such shares and (ii) the date on which such shares may be sold without registration pursuant to Rule 144 (or other applicable exemption) under the Securities Act.

Because we became public by means of a reverse merger, we may not be able to attract the attention of major brokerage firms.

There may be risks associated with us becoming public through a "reverse merger." Securities analysts of major brokerage firms may not provide coverage of us since there is no incentive to brokerage firms to recommend the purchase of our common stock. No assurance can be given that brokerage firms will, in the future, want to conduct any secondary offerings on our behalf.

Investor relations activities, nominal "float" and supply and demand factors may affect the price of our stock.

We expect to utilize various techniques such as non-deal road shows and investor relations campaigns in order to create investor awareness for us. These campaigns may include personal, video and telephone conferences with investors and prospective investors in which our business practices are described. We may provide compensation to investor relations firms and pay for newsletters, websites, mailings and email campaigns that are produced by third-parties based upon publicly-available information concerning us. We do not intend to review or approve the content of such analysts' reports or other materials based upon analysts' own research or methods. Investor relations firms should generally disclose when they are compensated for their efforts, but whether such disclosure is made or complete is not under our control. In addition, investors in us may, from time to time, also take steps to encourage investor awareness through similar activities that may be undertaken at the expense of the investors. Investor awareness activities may also be suspended or discontinued which may impact the trading market our common stock.

The SEC and FINRA enforce various statutes and regulations intended to prevent manipulative or deceptive devices in connection with the purchase or sale of any security and carefully scrutinize trading patterns and company news and other communications for false or misleading information, particularly in cases where the hallmarks of "pump and dump" activities may exist, such as rapid share price increases or decreases. We, and our shareholders may be subjected to enhanced regulatory scrutiny due to the small number of holders who initially will own the registered shares of our common stock publicly available for resale, and the limited trading markets in which such shares may be offered or sold which have often been associated with improper activities concerning penny-stocks, such as the OTC

Bulletin Board or the OTCQB Marketplace (Pink OTC) or pink sheets. Until such time as our restricted shares are registered or available for resale under Rule 144, there will continue to be a small percentage of shares held by a small number of investors, many of whom acquired such shares in privately negotiated purchase and sale transactions, which will constitute the entire available trading market. The Supreme Court has stated that manipulative action is a term of art connoting intentional or willful conduct designed to deceive or defraud investors by controlling or artificially affecting the price of securities. Often times, manipulation is associated by regulators with forces that upset the supply and demand factors that would normally determine trading prices. Since only a small percentage of our shares of outstanding common stock will initially be available for trading and will be held by a small number of individuals and entities, the supply of our common stock for sale will be extremely limited for an indeterminate length of time, which could result in higher bids, asks or sales prices than would otherwise exist. Securities regulators have often cited factors such as thinly-traded markets, small numbers of holders, and awareness campaigns as hallmarks of claims of price manipulation and other violations of law when combined with manipulative trading, such as wash sales, matched orders or other manipulative trading timed to coincide with false or touting press releases. There can be no assurance that our or third-parties' activities, or the small number of potential sellers or small percentage of stock in the "float," or determinations by purchasers or holders as to when or under what circumstances or at what prices they may be willing to buy or sell stock will not artificially impact (or would be claimed by regulators to have affected) the normal supply and demand factors that determine the price of the stock.

Our common stock is subject to the “penny stock” rules of the SEC, which makes transactions in our stock cumbersome and may reduce the value of an investment in our stock.

Our common stock is considered a “Penny Stock”. The Securities and Exchange Commission has adopted Rule 15c-9 which generally defines “penny stock” to be any equity security that has a market price (as defined) less than \$5.00 per share or an exercise price of less than \$5.00 per share, subject to certain exceptions. Our securities are covered by the penny stock rules, which impose additional sales practice requirements on broker-dealers who sell to persons other than established customers and “accredited investors”. The term “accredited investor” refers generally to institutions with assets in excess of \$5,000,000 or individuals with a net worth in excess of \$1,000,000 or annual income exceeding \$200,000 or \$300,000 jointly with their spouse. The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from the rules, to deliver a standardized risk disclosure document in a form prepared by the SEC which provides information about penny stocks and the nature and level of risks in the penny stock market. The broker-dealer also must provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker-dealer and its salesperson in the transaction and monthly account statements showing the market value of each penny stock held in the customer's account. The bid and offer quotations, and the broker-dealer and salesperson compensation information, must be given to the customer orally or in writing prior to effecting the transaction and must be given to the customer in writing before or with the customer's confirmation. In addition, the penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from these rules; the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements may have the effect of reducing the level of trading activity in the secondary market for the stock that is subject to these penny stock rules. Consequently, these penny stock rules may affect the ability of broker-dealers to trade our securities. We believe that the penny stock rules discourage investor interest in and limit the marketability of our common stock. The Financial Industry Regulatory Authority, or FINRA, has adopted sales practice requirements which may also limit a stockholder's ability to buy and sell our stock. In addition to the “penny stock” rules described above, FINRA has adopted rules that require that in recommending an investment to a customer, a broker-dealer must have reasonable grounds for believing that the investment is suitable for that customer. Prior to recommending speculative low priced securities to their non-institutional customers, broker-dealers must make reasonable efforts to obtain information about the customer's financial status, tax status, investment objectives and other information. Under interpretations of these rules, FINRA believes that there is a high probability that speculative low priced securities will not be suitable for at least some customers. FINRA requirements make it more difficult for broker-dealers to recommend that their customers buy our common stock, which may limit investors' ability to buy and sell our stock and have an adverse effect on the market for our shares.

If we lose key personnel or are unable to attract and retain additional qualified personnel we may not be able to successfully manage our business and achieve our objectives.

We believe our future success will depend upon our ability to retain our key management, including Doug Croxall, our Chief Executive Officer. We may not be successful in attracting, assimilating and retaining our employees in the future. The loss of Mr. Croxall would have an adverse effect on our operations. We have entered into an amendment to the employment agreement with Mr. Croxall, which extends the term of his employment agreement to November 2017. We are competing for employees against companies that are more established than we are and have the ability to pay more cash compensation than we do. As of the date hereof, we have not experienced problems hiring employees in the recent past.

If we fail to establish and maintain an effective system of internal control, we may not be able to report our financial results accurately and timely or to prevent fraud. Any inability to report and file our financial results accurately and timely could harm our reputation and adversely impact the trading price of our common stock.

Effective internal control is necessary for us to provide reliable financial reports and prevent fraud. If we cannot provide reliable financial reports or prevent fraud, we may not be able to manage our business as effectively as we would if an effective control environment existed, and our business and reputation with investors may be harmed. As a result, our small size and any future internal control deficiencies may adversely affect our financial condition, results of operation and access to capital. We have not performed an in-depth analysis to determine if historical un-discovered failures of internal controls exist, and may in the future discover areas of our internal control that need improvement.

DIVIDEND POLICY

We currently intend to retain earnings, if any, to finance the growth and development of our business, and we do not expect to pay any cash dividends to our stockholders in the foreseeable future.

DILUTION

Our net tangible book value as of September 30, 2013 was approximately \$6,126,503, or \$1.15 per share of common stock. Net tangible book value per share is determined by dividing our total tangible assets less total liabilities by the actual number of outstanding shares of our common stock. After giving effect to our issuance of _____ shares at the assumed public offering price of \$ _____ per share, and after deducting estimated offering expenses payable by us, our net tangible book value as of September 30, 2013 would have been \$ _____ or \$ _____ per share of common stock. This represents an immediate increase in pro forma net tangible book value of \$ _____ per share to our existing stockholders and an immediate dilution of \$ _____ per share to new investors in this offering. The following table illustrates this per share dilution:

Assumed public offering price per share		\$
Net tangible book value per share as of September 30, 2013	\$1.15	
Increase per share attributable to new investors	\$	
Pro forma net tangible book value per share after this offering		
Dilution per share to new investors		\$

Dilution per share to new investors is determined by subtracting pro forma net tangible book value per share after this offering from the assumed public offering price per share paid by a new investor. If any shares are issued in connection with outstanding options, you will experience further dilution. A \$ _____ increase or decrease in the assumed public offering price would increase or decrease, respectively, the pro forma as adjusted net tangible book value as of September 30, 2013 by \$ _____ per common stock, and the dilution per share to new investors by \$ _____ per share, assuming the aggregate dollar value of shares offered by us, as set forth in the registration calculation table on the cover page of this registration statement, remains the same and after deducting estimated offering expenses. Additionally, a \$ _____ increase in the assumed public offering price, assuming the aggregate dollar value of shares offered by us, as set forth in the registration calculation table on the cover page of this registration statement, remains the same, would decrease the number of shares issued by us in the offering by _____. A \$ _____ decrease in the assumed public offering price, assuming the aggregate dollar value of shares offered by us, as set forth in the registration calculation table on the cover page of this registration statement, remains the same, would increase the number of shares issued by us in the offering by _____.

On December 7, 2011, we changed our name to "American Strategic Minerals Corporation" and were primarily engaged in exploration and potential development of uranium and vanadium minerals business. On November 14, 2012, we completed a share exchange and acquired all the intellectual property rights of Sampo. On November 14, 2012, we decided to discontinue our real estate business.

We are a patent acquisition and licensing company. We acquire patents from a wide-range of patent holders, from individual inventors to Fortune 500 companies. Our strategy of acquiring patents that cover a wide-range of subject matter allows us to achieve diversity within our patent asset portfolio. We monetize our diversified portfolio through actively managed concurrent licensing campaigns. This approach is expected to result in a long-term, diversified revenue stream.

Our principal office is located at 2331 Mill Road, Suite 100, Alexandria, VA 22314. Our telephone number is (703) 232-1701.

Recent Events

Reverse Split

On May 31, 2013, shareholders holding a majority of our outstanding voting capital approved a reverse stock split of our issued and outstanding common stock by a ratio of not less than one-for-five and not more than one-for-fifteen at any time prior to April 30, 2014, with the exact ratio to be set at a whole number within this range as determined by our Board of Directors in its sole discretion.

On July 18, 2013, we filed a certificate of amendment to our Amended and Restated Articles of Incorporation with the Secretary of State of the State of Nevada in order to effectuate a reverse stock split of our issued and outstanding common stock, par value \$0.0001 per share on a one (1) for thirteen (13) basis (the "Reverse Split"). The Reverse Split became effective with the FINRA at the open of business on July 22, 2013. As a result of the Reverse Stock Split, every thirteen shares of our pre-reverse split common stock will be combined and reclassified into one share of our common stock. No fractional shares of common stock will be issued as a result of the Reverse Split. Stockholders who otherwise would be entitled to a fractional share shall receive the next highest number of whole shares.

Throughout this prospectus, each instance which refers to a number of shares of our common stock, refers to the number of shares of common stock after giving effect to the Reverse Split, unless otherwise indicated.

Private Placement

On May 31, 2013, we sold an aggregate of 1,153,844 units representing gross proceeds of \$6,000,000 to certain accredited investors pursuant to a securities purchase agreement, among which, 999,998 units representing \$5,200,000 were funded. Each unit was subscribed for a purchase price of \$5.20 per unit and consists of: (i) one share of our common stock, and (ii) a three (3) year warrant to purchase one half share of our common stock at an exercise price of

\$6.50 per share, subject to adjustment upon the occurrence of certain events such as stock splits and stock dividends and similar events. The warrants contain limitations on the holders' ability to exercise the warrants in the event such exercise causes the holder to beneficially own in excess of 9.99% of our issued and outstanding common stock. The Company paid placement agent fees of \$170,000 to two broker-dealers in connection with the sale of the units of which \$30,000 was previously paid by us as a retainer. On July 29, 2013, we converted legal fees of \$29,620 into 5,696 units. In August 2013, two investors who had subscribed for an aggregate of 153,846 units for an aggregate purchase price of \$800,000 on May 31, 2013 assigned their subscriptions to other investors. Such other investors each funded their subscriptions and such additional units were issued. Additionally, we paid placement agent fees of \$35,029 and legal fees of \$42,375 in connection with the sale of units.

CyberFone Acquisition

On April 22, 2013, CyberFone Acquisition Corp. (“CyberFone Acquisition Corp.”), a Texas corporation and our newly formed wholly owned subsidiary entered into a merger agreement (the “CyberFone Merger Agreement”) with CyberFone Systems LLC, a Texas limited liability company (“CyberFone Systems”), TechDev Holdings LLC (“TechDev”) and The Spangenberg Family Foundation for the Benefit of Children’s Healthcare and Education (“Spangenberg Foundation”). TechDev and Spangenberg Foundation owned 100% of the membership interests of CyberFone Systems (collectively, the ‘CyberFone Sellers”).

CyberFone Systems owns a foundational patent portfolio that includes claims that provide specific transactional data processing, telecommunications, network and database inventions, including financial transactions. The portfolio, which has a large and established licensing base, consists of ten United States patents and 27 foreign patents and one patent pending. The patent rights that cover digital communications and data transaction processing are foundational to certain applications in the wireless, telecommunications, financial and other industries. IP Navigation Group LLC (“IP Nav”), a company founded by Erich Spangenberg and associated with the CyberFone Sellers will continue to support and manage the portfolio of patents and retain a contingent participation interest in all recoveries. IP Nav provides patent monetization and support services under an existing agreement with CyberFone Systems.

Pursuant to the terms of the CyberFone Merger Agreement, CyberFone Systems merged with and into CyberFone Acquisition Corp with CyberFone Systems surviving the merger as our wholly owned subsidiary. We (i) issued 461,538 post-split (6,000,000 pre-split) shares of common stock to the CyberFone Sellers, (ii) paid the CyberFone Sellers \$500,000 cash and (iii) issued a \$500,000 promissory note to TechDev (the “Note”). On June 21, 2013, we paid \$500,000 to TechDev in satisfaction of the note.

On September 30, 2013, we entered into a patent purchase agreement with TeleCommunication Systems, Inc., a Maryland corporation, pursuant to which we acquired a patent portfolio that includes automated device-to-device transfer systems and web page content translator.

On October 15, 2013, we closed a patent purchase agreement with TT IP, LLC, a Texas limited liability company, pursuant to which we acquired a patent portfolio for 150,000 shares of our common stock. The shares are subject to a forfeiture right for our benefit in the event that no enforcement action is effected by the lapse of the enforcement period.

On December 18, 2013, we closed the purchase of a portfolio of patents from Delphi Technologies, Inc., a Delaware corporation.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with US GAAP. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Management believes the following critical accounting policies affect the significant judgments and estimates used in the preparation of the financial statements.

Principles of Consolidation

The condensed consolidated financial statements are prepared in accordance with US GAAP and present the financial statements of the Company and our wholly-owned subsidiary. In the preparation of our consolidated financial statements, intercompany transactions and balances are eliminated.

Development Stage Companies

We are a development stage company. Activities during the development stage include organizing the business, raising capital, enforcement and development of our intellectual property and acquiring additional intellectual property. We are a development stage company with insignificant revenues and no profits from its planned principal operations. We have not commenced significant operations and, in accordance with ASC Topic 915 "Development Stage Entities", is considered a development stage company.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America ("US GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates made by management include, but are not limited to, the assumptions used to calculate fair value of warrants granted, common stock issued for services, common stock issued in connection with an option agreement, common stock issued for acquisition of patents, and the valuation of mineral rights.

Fair Value of Financial Instruments

We adopted Financial Accounting Standards Board ("FASB") ASC 820, "Fair Value Measurements and Disclosures", for assets and liabilities measured at fair value on a recurring basis. ASC 820 establishes a common definition for fair value to be applied to existing US GAAP that require the use of fair value measurements which establishes a framework for measuring fair value and expands disclosure about such fair value measurements.

ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Additionally, ASC 820 requires the use of valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. These inputs are prioritized below:

Level 1: Observable inputs such as quoted market prices in active markets for identical assets or liabilities

Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data

Level 3: Unobservable inputs for which there is little or no market data, which require the use of the reporting entity's own assumptions.

In addition, FASB ASC 825-10-25 “Fair Value Option” was effective for January 1, 2008. ASC 825-10-25 expands opportunities to use fair value measurements in financial reporting and permits entities to choose to measure many financial instruments and certain other items at fair value.

Stock-based Compensation

Stock-based compensation is accounted for based on the requirements of the Share-Based Payment Topic of ASC 718 which requires recognition in the consolidated financial statements of the cost of employee and director services received in exchange for an award of equity instruments over the period the employee or director is required to perform the services in exchange for the award (presumptively, the vesting period). The ASC also requires measurement of the cost of employee and director services received in exchange for an award based on the grant-date fair value of the award.

Pursuant to ASC Topic 505-50, for share-based payments to consultants and other third-parties, compensation expense is determined at the “measurement date.” The expense is recognized over the vesting period of the award. Until the measurement date is reached, the total amount of compensation expense remains uncertain. The Company initially records compensation expense based on the fair value of the award at the reporting date.

Long-Lived Assets

We review for impairment whenever events or circumstances indicate that the carrying amount of assets may not be recoverable, pursuant to guidance established in ASC 360-10-35-15, “Impairment or Disposal of Long-Lived Assets”. We recognize an impairment loss when the sum of expected undiscounted future cash flows is less than the carrying amount of the asset. The amount of impairment is measured as the difference between the asset’s estimated fair value and its book value.

Revenue Recognition

We recognize revenue in accordance with ASC Topic 605, “Revenue Recognition”. Revenue is recognized when (i) persuasive evidence of an arrangement exists, (ii) all obligations have been substantially performed, (iii) amounts are fixed or determinable and (iv) collectability of amounts is reasonably assured.

We consider its licensing and enforcement activities as one unit of accounting under ASC 605-25, “Multiple-Element Arrangements” as the delivered items do not have value to customers on a standalone basis, there are no undelivered elements and there is no general right of return relative to the license. Under ASC 605-25, the appropriate recognition of revenue is determined for the combined deliverables as a single unit of accounting and revenue is recognized upon delivery of the final elements, including the license for past and future use and the release. Also due to the fact that the settlement element and license element for past and future use are the major central business, we do not present these two elements as different revenue streams in its statement of operations. We do not expect to provide licenses that do not provide some form of settlement or release.

Cost of Revenue

Cost of revenues mainly includes expenses incurred in connection with our patent enforcement activities, such as legal fees, consulting costs, patent maintenance, royalty fees for acquired patents and other related expenses. Cost of revenue does not include expenses related to product development, patent amortization, integration or support, as these are included in general and administrative expenses.

Recent Accounting Pronouncements

In April 2013, the FASB ASU 2013-07, "Presentation of Financial Statements: Topic Liquidation Basis of Accounting". ASU 2013-07 requires an entity to prepare its financial statements using the liquidation basis of accounting when liquidation is imminent. Liquidation is considered imminent when the likelihood is remote that the organization will return from liquidation and either: (a) a plan for liquidation is approved by the person or persons with the authority to make such a plan effective and the likelihood is remote that the execution of the plan will be blocked by other parties; or (b) a plan for liquidation is being imposed by other forces. ASU 2013-07 will be effective for the Company beginning on January 1, 2014. We do not expect the adoption of ASU 2013-07 to have a material impact on our financial position, results of operations nor cash flows.

In July 2013, the FASB issued ASU 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." ASU 2013-11 provides guidance on the presentation of unrecognized tax benefits related to any disallowed portion of net operating loss carryforwards, similar tax losses, or tax credit carryforwards, if they exist. ASU 2013-11 is effective for fiscal years beginning after December 15, 2013. The adoption of ASU 2013-11 is not expected to have a material impact on our consolidated financial statements.

Other accounting standards that have been issued or proposed by the FASB that do not require adoption until a future date are not expected to have a material impact on the financial statements upon adoption.

Results of Operations

Our business began on April 30, 2011. We are still in our development stage and have generated insignificant revenues to date in connection with our current patent business.

For the Three and Nine months ended September 30, 2013 and 2012

We generated revenues of \$710,500 and \$2,235,479 during the three and nine months ended September 30, 2013, respectively, as compared to no revenue during the three and nine months ended September 30, 2012. Revenues from patent enforcement activities accounted for 100% of our revenues for the three and nine months ended September 30, 2013. Included in revenues for the nine months ended September 30, 2013 are non-cash revenue in connection with a settlement and license agreement dated May 6, 2013 whereby the customer agreed to assign and transfer to us 3 US patents and rights valued at \$1,000,000 in lieu of cash payment.

Cost of revenues during the three and nine months ended September 30, 2013 amounted to \$403,013 and \$687,638, respectively, which mainly includes expenses incurred in connection with our patent enforcement activities, such as legal fees, consulting costs, patent maintenance, royalty fees for acquired patents and other related expenses. Our gross profit margin during the three and nine months ended September 30, 2013 was approximately 43% and 69%, respectively. The increase in the nine month period in 2013 is primarily attributable to the non-cash revenue of \$1,000,000 discussed above.

We incurred operating expenses of \$4,124,249 and \$5,150,853 for the nine months ended September 30, 2013 and 2012, respectively, a decrease of \$1,026,604 or 20%. We incurred operating expenses of \$1,349,426 and \$1,809,126 for the three months ended September 30, 2013 and 2012, respectively, a decrease of \$459,700 or 25%. These expenses primarily consisted of amortization of patents, general expenses, compensation to our officers, directors and employees, professional fees and consulting incurred in connection with the day to day operation of our business. The operating expenses include non-cash expenses which are discussed below and in detail as seen under the Liquidity and

Capital Resources – Operating Activities section. The operating expenses consisted of the following:

Discontinued Operations

During June 2012, we decided to discontinue our exploration and potential development of uranium and vanadium minerals business and prior periods have been restated in our consolidated financial statements and related footnotes to conform to this presentation. Subsequently, in November 2012, we decided to discontinue our real estate business and we intend to sell and dispose our remaining real estate holdings during fiscal 2013. We are now engage in the acquisition, development and monetization of intellectual property through both the prosecution and licensing of our own patent portfolio, the acquisition of additional intellectual property or partnering with others to defend and enforce their patent rights.

The following table indicates selected financial data of our discontinued operations of our uranium and vanadium minerals business and real estate business.

Net Loss

We reported a net loss of \$2,351,355 or \$(0.54) per common shares - basic and diluted and \$6,449,769 or \$(2.38) per common share - basic and diluted, respectively, for the nine months ended September 30, 2013 and 2012, respectively, a decrease of \$4,098,414 or 64%. The net loss includes non-cash items which are discussed in detail as seen under the Liquidity and Capital Resources – Operating Activities section.

Liquidity and Capital Resources

Liquidity is the ability of a company to generate funds to support its current and future operations, satisfy its obligations, and otherwise operate on an ongoing basis. At September 30, 2013, we had a cash balance of \$5,864,388 and working capital of \$6,118,447. During the nine months ended September 30, 2013, we have been funding our operations through the sale of our common stock, the revenues generated from patent enforcement activities and the sale of our remaining real estate properties which is included in our discontinued operations. We received net proceeds from the sale of our common stock of approximately \$5,752,000 during the nine months ended September 30, 2013.

We may be required to raise additional funds, particularly if we are unable to generate positive cash flow as a result of our operations. We estimate that based on current plans and assumptions, that our available cash is sufficient to satisfy our cash requirements under our present operating expectations for at least the next twelve months. We presently have no other alternative source of working capital. We may not have sufficient working capital to fund the expansion of our operations and to provide working capital necessary for our ongoing operations and obligations after 12 months. We have not generated revenues to support our current daily operations from the inception of development stage. We may need to raise significant additional capital to fund our future operating expenses, pay our obligations, and grow our Company. Although we generated revenue during the nine months ended September 30, 2013, such revenue is not sufficient to fund our ongoing operations. Therefore our future operations will be dependent on our ability to secure additional financing. Financing transactions may include the issuance of equity or debt securities, obtaining credit facilities, or other financing mechanisms. The trading price of our common stock could make it more difficult to obtain financing through the issuance of equity or debt securities. Even if we are able to raise the funds required, it is possible that we could incur unexpected costs and expenses, or experience unexpected cash requirements that would force us to seek alternative financing. Furthermore, if we issue additional equity or debt securities, stockholders may experience additional dilution or the new equity securities may have rights, preferences or privileges senior to those of existing holders of our common stock. Our inability to obtain additional capital may restrict our ability to grow and may reduce our ability to continue to conduct business operations. If we are unable to obtain additional financing, we will likely be required to curtail our development plans and possibly cease our operations.

Operating Activities

We have not generated positive cash flows from operating activities. For the nine months ended September 30, 2013, net cash flows used in operating activities was \$947,344 and was primarily attributable to our net loss of \$2,351,355, adjusted for non-cash items such as stock based compensation expenses of \$1,203,678, stock based consulting expenses of \$294,262, stock based legal fees of \$66,328, amortization and depreciation expense of \$862,601, realized loss from the sale of marketable securities - available for sale of \$38,819 and total changes in assets and liabilities of \$106,539 offset by non-cash revenue of \$1,000,000 and gain on sale of assets of discontinued operations of \$168,216. The total changes in assets and liabilities is primarily attributable to a decrease in prepaid expenses of \$39,000, decrease in assets of discontinued operations of \$82,145, increase in accounts payable and accrued expenses of

\$315,394 offset by an increase in accounts receivable of \$330,000. During the three months ended September 30, 2013, net loss of \$935,320 includes non-cash expenses such as stock based compensation expenses of \$245,310, stock based consulting expenses of \$200,067, stock based legal fees of \$65,370, amortization and depreciation expense of \$385,810, realized loss from the sale of marketable securities-available for sale of \$38,819 and offset by gain on sale of assets of discontinued operations of \$168,216.

For the nine months ended September 30, 2012, net cash flows used in operating activities was \$1,163,389 and was primarily attributable to our net loss of \$6,439,273, adjusted for the add-back of non-cash items such as stock based compensation of \$4,190,200, impairment of mining rights and assets of discontinued operations of \$1,286,248 and other income of \$125,000, and total changes in assets and liabilities of \$65,068 primarily attributable to an increase in prepaid expenses of \$54,516, increase in deposits of \$235,660, and increase in accounts payable and accrued expenses of \$201,193.

Investing Activities

Net cash flows provided by investing activities were \$795,033 in connection with the sale of real estate property of \$1,052,320 and proceeds received from the sale of marketable securities of \$129,397 offset by acquisition of patents of \$1,450,000, acquisition of CyberFone Systems of \$500,000, capitalized cost related to improvements of real estate property of \$16,750 and purchase of property and equipment of \$10,000 during the nine months ended September 30, 2013.

Net cash flows used in investing activities were \$1,993,955 in connection with acquisition of mineral rights of \$325,000, investment in note receivable of \$147,708 and acquisition of real estate property including capitalized improvements of \$1,521,247 during the nine months ended September 30, 2012.

Financing Activities

Net cash flows provided by financing activities were \$5,252,596 in connection with net proceeds from sale of our common stock of \$5,752,596 offset by \$500,000 payment of note payable related to the CyberFone acquisition during the nine months ended September 30, 2013. Net cash flows provided by financing activities were \$4,553,991 for the nine months ended September 30, 2012. We received net proceeds from the sale of our securities of \$5,768,965 offset by payment on notes payable of \$1,082,974 and payments of \$132,000 in connection with the rescission agreement during the nine months ended September 30, 2012.

Off-balance Sheet Arrangements

We have not entered into any other financial guarantees or other commitments to guarantee the payment obligations of any third parties. We have not entered into any derivative contracts that are indexed to our shares and classified as stockholder's equity or that are not reflected in our consolidated financial statements. Furthermore, we do not have any retained or contingent interest in assets transferred to an unconsolidated entity that serves as credit, liquidity or market risk support to such entity.

Liquidity and Capital Resources

Liquidity is the ability of a company to generate funds to support its current and future operations, satisfy its obligations, and otherwise operate on an ongoing basis. At December 31, 2012, we had a cash balance of approximately \$2.4 million and working capital of approximately \$2.4 million. We have been funding our operations through the sale of our common stock through private placements for operating capital purposes.

We may be required to raise additional funds, particularly if we are unable to generate positive cash flow as a result of our operations. We estimate that based on current plans and assumptions, that our available cash is sufficient to satisfy our cash requirements under our present operating expectations for up to 12 months. We presently have no other alternative source of working capital. We may not have sufficient working capital to fund the expansion of our operations and to provide working capital necessary for our ongoing operations and obligations after 12 months. We have not generated revenues to support our current daily operations from the inception of development stage. We may need to raise significant additional capital to fund our future operating expenses, pay our obligations, and grow our Company. We do not anticipate we will generate significant revenues in 2013. Therefore our future operations will be

dependent on our ability to secure additional financing. Financing transactions may include the issuance of equity or debt securities, obtaining credit facilities, or other financing mechanisms. The trading price of our common stock could make it more difficult to obtain financing through the issuance of equity or debt securities. Even if we are able to raise the funds required, it is possible that we could incur unexpected costs and expenses, or experience unexpected cash requirements that would force us to seek alternative financing. Furthermore, if we issue additional equity or debt securities, stockholders may experience additional dilution or the new equity securities may have rights, preferences or privileges senior to those of existing holders of our common stock. The inability to obtain additional capital may restrict our ability to grow and may reduce our ability to continue to conduct business operations. If we are unable to obtain additional financing, we will likely be required to curtail our development plans and possibly cease our operations.

Operating Activities

We have not generated positive cash flows from operating activities. For the year ended December 31, 2012, net cash flows used in operating activities was \$1,261,404 and was primarily attributable to our net loss of \$6,927,812, adjusted for non-cash items such as stock based compensation of \$4,436,387, impairment of mining rights and assets of discontinued operations of \$1,286,248, realized loss other than temporary decline – available for sale securities of \$112,500 and add back by other income of \$125,000, and total changes in assets and liabilities of \$42,004 primarily attributable to an increase in prepaid expenses of \$36,933, increase in assets of discontinued operations of \$62,145, and increase in accounts payable and accrued expenses of \$53,159.

For the period from inception (April 30, 2011) to December 31, 2011, net cash flows used in operating activities was (\$29,348) and was primarily attributable to our net loss of \$109,322, offset by impairment of mining rights of \$99,474, and add back total changes in assets and liabilities of \$19,500 due to an increase in prepaid expenses of \$20,000, increase in deposits of \$3,500 and increase in accounts payable and accrued expenses of (\$4,000).

Contractual Obligations

We have certain fixed contractual obligations and commitments that include future estimated payments. Changes in our business needs, cancellation provisions, changing interest rates, and other factors may result in actual payments differing from the estimates. We cannot provide certainty regarding the timing and amounts of payments. We have presented below a summary of the most significant assumptions used in our determination of amounts presented in the tables, in order to assist in the review of this information within the context of our consolidated financial position, results of operation, and cash flows.

The following table summarizes our contractual obligations as of December 31, 2012, and the effect these obligations are expected to have on our liquidity and cash flows in future periods:

Furthermore, we do not have any retained or contingent interest in assets transferred to an unconsolidated entity that serves as credit, liquidity or market risk support to such entity.

BUSINESS

We are a patent acquisition and licensing company. We acquire patents from a wide-range of patent holders, from individual inventors to Fortune 500 companies. Our strategy of acquiring patents that cover a wide-range of subject matter allows us to achieve diversity within our patent asset portfolio. We monetize our diversified portfolio through actively managed concurrent licensing campaigns. This approach is expected to result in a long-term, diversified revenue stream.

Currently, as of December 27, 2013, we owned a patent portfolio consisting of 116 U.S. and foreign patents, including 17 recently acquired patents, and 5 open applications. Beginning in the second quarter of 2013, we began generating revenue from our patent portfolio.

We were incorporated in the State of Nevada on February 23, 2010 under the name "Verve Ventures, Inc." On December 7, 2011, we changed our name to "American Strategic Minerals Corporation" and were primarily engaged in exploration and potential development of uranium and vanadium minerals business. During June 2012, we decided to discontinue our uranium and vanadium minerals business and engaged in the business of acquiring, renovating, and selling real estate properties located within the areas of Southern California. On November 14, 2012, we acquired all the intellectual property rights of Sampo. On November 14, 2012, we decided to discontinue our real estate business. Our principal office is located at 2331 Mill Road, Suite 100, Alexandria, VA 22314. Our telephone number is (703) 232-1701.

Industry Overview and Market Opportunity

Under U.S. law an inventor or patent owner has the right to exclude others from making, selling or using their patented invention. Unfortunately, in the majority of cases, infringers are generally unwilling, at least initially, to negotiate or pay reasonable royalties for their unauthorized use of third-party patents and will typically fight any allegations of patent infringement. Inventors and/or patent holders, without sufficient legal, financial and/or expert technical resources to bring and continue the pursuit of legal action, may lack credibility in dealing with potential licensees and as a result, are often ignored. As a result of the common reluctance of patent infringers to negotiate and ultimately take a patent license for the use of third-party patented technologies, patent licensing and enforcement often

begins with the filing of patent enforcement litigation. However, the majority of patent infringement contentions settle out of court based on the strength of the patent claims, validity, and persuasive evidence and clarity that the patent is being infringed.

Due to the relative infancy of the IP monetization industry, we believe that the absolute size of our market opportunity is very significant but difficult to quantify.

Business Model and Strategy – Overview

Our business model is based on two strategies: 1.) The identification, analysis and acquisition of patents and patent rights; and 2.) The generation of licensing revenues from the acquired patents or patent rights.

Typically, we compensate the patent seller through a cash fee paid upon the acquisition of the patents or patent rights as well as the assignment of the patents or patent rights to us or one of our operating subsidiaries. Additionally, a patent seller may also seek to receive compensation through participation in the licensing revenue generated by us from the patents or patent rights. The patent seller may also receive compensation through a combination of both cash and revenue participation.

Key Factors of Our Business Model

Diversification within the Asset Class

We currently own 116 U.S. and foreign patents, including 17 recently acquired patents, and 5 open applications. We intend to add more patents and patent applications for the purpose of generating licensing revenues. By owning multiple patent assets, we will become diversified in both the types of patents that we own as well as the frequency and size of the licensing revenues generated. This diversification will prevent us from relying on a single patent, or patent family to generate all of our revenue. Additionally, by commencing multiple settlement and licensing campaigns with our different patent assets, we intend to generate frequent revenue events through the execution of multiple settlement and licensing agreements. Our diversification of patent assets and revenue generation allows us to avoid the binary risk that can be associated with owning a single patent asset that typically generates a single stream of licensing revenues.

Supply of Patent Acquisition Opportunities

We have worked to establish a supply of patent acquisition opportunities with patent brokers and dealers, with individual inventors and patent owners, as well as with large corporations who own patent portfolios. Service providers, such as patent prosecution and litigation attorneys and patent licensing professionals have also become key suppliers of patent opportunities. An example of a key supplier of patent opportunities is IP Nav. We have received a significant amount of our patent acquisition opportunities from our relationship with IP Nav. We intend to continue to add to our patent acquisition opportunities by increasing the number of third parties that we work with when reviewing potential patent acquisition opportunities. Additionally, we intend to seek opportunities to acquire patents from companies and patent owners that are in industry sectors that we have not acquired patents from in the past.

Patent Portfolio Evaluation

We follow a disciplined due diligence approach when analyzing potential patent acquisitions. Each opportunity to acquire a patent portfolio can vary based on the amount and type of patent assets, the complexity of the underlying inventions, and the analysis of the industries in which the invention is being used.

Subtleties in the language of a patent, recorded interactions with the patent office, and the evaluation of prior art and literature can make a significant difference in the potential licensing and enforcement revenue derived from a patent or patent portfolio. Our specialists are trained and skilled in these areas. It is important to identify potential problem areas, if any, and determine whether potential problem areas can be overcome, prior to acquiring a patent portfolio or launching an effective licensing program. We have developed processes and procedures for identifying problem areas and evaluating the strength of a patent portfolio before the decision is made to allocate resources to an acquisition or

to launch an effective licensing and enforcement effort

We seek to use third-party experts in addition to our internal management team in the evaluation and due diligence of the patent assets. The combination of our management team and third-party patent attorneys, intellectual property licensing executives, and technology engineers allow us to conduct our tailored patent acquisition and evaluation processes and procedures. We may also leverage the expertise of external specialists and technology consultants. We evaluate both the types and strength of the claims of the patent as well as the file history of the patent.

Finally, prior to making a final decision to acquire a patent asset, we identify and consider potential problem areas, if any, and determine whether any potential problem areas can be overcome prior to acquiring a patent portfolio or launching an effective licensing program. Additionally, we identify potential infringers; industries within which the potential infringers exist; longevity of the patented technology; and a variety of other factors that directly impact the magnitude and potential success of a licensing and enforcement program.

Commencement of Licensing Campaign

If we complete the due diligence and have determined that the patent acquisition opportunity is worth pursuing, we may enter into final negotiations to acquire the patent assets. The owner of the patent will typically receive an upfront acquisition payment, or a portion of the revenues generated from a patent portfolio's licensing and enforcement campaign, or a combination of the two. We control the licensing and enforcement process and utilize experienced patent litigation and licensing professionals on a contingency basis to reduce the typical high costs associated with patent litigation.

Our due diligence process may also identify potential infringers that are using the acquired patent assets in an unauthorized manner. We generate, or have generated on our behalf, presentations that identify the potentially infringing technologies. Furthermore, we present an analysis of the claims of our patents and demonstrate how they apply to companies we believe are using our technologies in their products or services. These presentations can take place in a non-adversarial business setting, but can also occur through the litigation process, if necessary.

Our Products and Services

We acquire IP from patent holders in order to maximize the value of their patent holdings by conducting and managing a licensing campaign. Some patent holders tend to have limited internal resources and/or expertise to effectively address the unauthorized use of their patented technologies or they simply make the strategic business decision to outsource their intellectual property licensing. Typically, we, or an operating subsidiary acquires a patent portfolio in exchange for a combination of an upfront cash payment, a percentage of our operating subsidiary's gross recoveries from the licensing and enforcement of the portfolio, or a combination of the two.

Competition

We expect to encounter significant competition from others seeking to acquire interests in intellectual property assets and monetize such assets. This includes an increase in the number of competitors seeking to acquire the same or similar patents and technologies that we may seek to acquire. Most of our competitors have much longer operating histories, and significantly greater financial and human resources, than we do. Entities such as Vringo, Inc. (NYSE MKT: VRNG), VirnetX Holding Corp (NYSE MKT: VHC), Acacia Research Corporation (NASDAQ: ACTG), RPX Corporation (NASDAQ: RPXC), and others presently market themselves as being in the business of creating, acquiring, licensing or leveraging the value of intellectual property assets. We expect others to enter the market as the true value of intellectual property is increasingly recognized and validated. In addition, competitors may seek to acquire the same or similar patents and technologies that we may seek to acquire, making it more difficult for us to realize the value of its assets.

We also compete with venture capital firms, strategic corporate buyers and various industry leaders for technology acquisitions and licensing opportunities. Many of these competitors may have more financial and human resources than we do. As we become more successful, we may find more companies entering the market for similar technology opportunities, which may reduce our market share in one or more technology industries that we currently rely upon to generate future revenue.

Other companies may develop competing technologies that offer better or less expensive alternatives to our patented technologies that we may acquire and/or out-license. Many potential competitors may have significantly greater resources than we do. Technological advances or entirely different approaches developed by one or more of our competitors could render certain of the technologies owned or controlled by our operating subsidiaries obsolete and/or uneconomical.

Intellectual Property and Patent Rights

Our intellectual property is primarily comprised of trade secrets, patented know-how, issued and pending patents, copyrights and technological innovation.

We have a portfolio comprised of 116 U.S. and foreign patents, including 17 recently acquired patents, and 5 open applications.

We have included a list of our U.S. patents as of November 30, 2013 below. Each patent below is publicly accessible on the Internet website of the U.S. Patent and Trademark Office at www.uspto.gov.

Board Leadership Structure and Role in Risk Oversight

Although we have not adopted a formal policy on whether the Chairman and Chief Executive Officer positions should be separate or combined, we have traditionally determined that it is in the best interests of the Company and its shareholders to partially combine these roles. Due to the small size of the Company, we believe it is currently most effective to have the Chairman and Chief Executive Officer positions partially combined.

Our Board of Directors is primarily responsible for overseeing our risk management processes. The Board of Directors receives and reviews periodic reports from management, auditors, legal counsel, and others, as considered appropriate regarding the Company's assessment of risks. The Board of Directors focuses on the most significant risks facing us and our general risk management strategy, and also ensures that risks undertaken by us are consistent with the Board of Directors' appetite for risk. While the Board of Directors oversees the Company, our management is responsible for day-to-day risk management processes. We believe this division of responsibilities is the most effective approach for addressing the risks facing the Company and that our board leadership structure supports this approach.

DESCRIPTION OF SECURITIES

Authorized Capital Stock

We have 250,000,000 authorized shares of capital stock, par value \$0.0001 per share, of which 200,000,000 shares are common stock and 50,000,000 shares are “blank-check” preferred stock.

Capital Stock Issued and Outstanding

On July 18, 2013, we effectuated a Reverse Split at a ratio of 1-for-13. As of December 27, 2013, after giving effect to the Reverse Split, we have issued and outstanding securities as follows:

- 5,489,602 shares of common stock;
- Warrants to purchase 708,260 shares of common stock;
- Options to purchase 1,347,692 shares of common stock, and
- 100,000 shares of common stock reserved for issuance on future vesting of restricted stock unit awards granted as of December 27, 2013.

Common Stock

As of December 27, 2013, 5,489,602 shares of common stock were issued and outstanding. The holders of our common stock have equal ratable rights to dividends from funds legally available therefore, when, as and if declared by the Board of Directors and are entitled to share ratably in all of our assets available for distribution to holders of common stock upon the liquidation, dissolution or winding up of our affairs. Holders of shares of common stock do not have preemptive, subscription or conversion rights.

Holders of shares of common stock are entitled to one vote per share on all matters which shareholders are entitled to vote upon at all meetings of shareholders. The holders of shares of common stock do not have cumulative voting rights, which means that the holders of more than 50% of our outstanding voting securities can elect all of our directors.

The payment of dividends, if any, in the future rests within the discretion of our Board of Directors and will depend, among other things, upon our earnings, capital requirements and financial condition, as well as other relevant factors. We have not paid any dividends since our inception and do not intend to pay any cash dividends in the foreseeable future, but intend to retain all earnings, if any, for use in our business.

Warrants

On May 31, 2013, we sold an aggregate of 1,153,844 units representing gross proceeds of \$6,000,000 to certain accredited investors pursuant to a securities purchase agreement, among which, 999,998 units representing \$5,200,000 were funded. Each unit was subscribed for a purchase price of \$5.20 per unit and consists of: (i) one share of our common stock, and (ii) a three (3) year warrant to purchase one half share of our common stock at an exercise price of \$6.50 per share, subject to adjustment upon the occurrence of certain events such as stock splits and stock dividends and similar events. The warrants contain limitations on the holders' ability to exercise the warrants in the event such exercise causes the holder to beneficially own in excess of 9.99% of our issued and outstanding common stock. The Company paid placement agent fees of \$170,000 to two broker-dealers in connection with the sale of the units of which \$30,000 was previously paid by us as a retainer. On July 29, 2013, we converted legal fees of \$29,620 into 5,696 units. In August 2013, two investors who had subscribed for an aggregate of 153,846 units for an aggregate purchase price of \$800,000 on May 31, 2013 assigned their subscriptions to other investors. Such other investors each funded their subscriptions and such additional units were issued. Additionally, we paid placement agent fees of \$35,029 and legal fees of \$42,375 in connection with the sale of units.

Indemnification of Directors and Officers

Neither our articles of incorporation nor bylaws prevent us from indemnifying our officers, directors and agents to the extent permitted under the Nevada Revised Statute ("NRS"). NRS Section 78.7502, provides that a corporation may indemnify any director, officer, employee or agent of a corporation against expenses, including fees, actually and reasonably incurred by him in connection with any defense to the extent that a director, officer, employee or agent of a corporation has been successful on the merits or otherwise in defense of any action, suit or proceeding referred to Section 78.7502(1) or 78.7502(2), or in defense of any claim, issue or matter therein.

NRS 78.7502(1) provides that a corporation may indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, except an action by or in the right of the corporation, by reason of the fact that he is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses, including fees, judgments, fines and amounts paid in settlement actually and reasonably incurred by him in connection with the action, suit or proceeding if he: (a) is not liable pursuant to NRS 78.138; or (b) acted in good faith and in a manner which he reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his conduct was unlawful.

NRS Section 78.7502(2) provides that a corporation may indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of the corporation to procure a judgment in its favor by reason of the fact that he is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses, including amounts paid in settlement and fees actually and reasonably incurred by him in connection with the defense or settlement of the action or suit if he: (a) is not liable pursuant to NRS 78.138; or (b) acted in good faith and in a manner which he reasonably believed to be in or not opposed to the best interests of the corporation. Indemnification may not be made for any claim, issue or matter as to which such a person has been adjudged by a court of competent jurisdiction, after exhaustion of all appeals there from, to be liable to the corporation or for amounts paid in settlement to the corporation, unless and only to the extent that the court in which the action or suit was brought or other court of competent jurisdiction determines upon application that in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for such expenses as the court deems proper.

NRS Section 78.747 provides that except as otherwise provided by specific statute, no director or officer of a corporation is individually liable for a debt or liability of the corporation, unless the director or officer acts as the alter ego of the corporation. The court as a matter of law must determine the question of whether a director or officer acts as the alter ego of a corporation.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers or persons controlling us pursuant to the foregoing provisions, we have been informed that, in the opinion of the Securities and Exchange Commission, such indemnification is against public policy as expressed in the Securities Act and is therefore unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, we will, unless in the opinion of our counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by us is against public policy as expressed hereby in the Securities Act and we will be governed by the final adjudication of such issue.

PLAN OF DISTRIBUTION

The Company will solicit offers to purchase the shares of common stock in this offering. No placement agent nor any broker-dealer or FINRA member has been retained for this offering.

In connection with the Company's selling efforts in the offering, the Company will not register as a broker-dealer pursuant to Section 15 of the Securities and Exchange Act of 1934, as amended (the "Exchange Act"), but rather will rely upon the "safe harbor" provisions of SEC Rule 3a4-1, promulgated under the Exchange Act. Generally speaking, Rule 3a4-1 provides an exemption from the broker-dealer registration requirements of the Exchange Act for persons associated with an issuer that participate in an offering of the issuer's securities. Each of our officers and directors is not subject to a statutory disqualification, as that term is defined in Section 3(a)(39) of the Exchange Act. Each of our officers and directors will not be compensated in connection with his participation in the offering by payment of commissions or other remuneration based either directly or indirectly on transactions in our securities. Each of our officers and directors is not now, nor have they been within the past 12 months, a broker or dealer, and they have not been, within the past 12 months, an associated person of a broker or dealer. At the end of the offering, each of our officers and directors will continue to primarily perform substantial duties for the Company or on its behalf otherwise than in connection with transactions in securities. Each of our officers and directors will not and has not participated in selling an offering of securities for any issuer more than once every 12 months other than in reliance on Exchange Act Rule 3a4-1(a)(4)(i) or (iii).

In order to comply with the applicable securities laws of certain states, the securities will be offered or sold in those states only if they have been registered or qualified for sale, exempted from such registration or if a qualification requirement is available and with which the Company has complied. In addition, and without limiting the foregoing, the Company will be subject to applicable provisions, rules and regulations under the Exchange Act with regarding to security transactions during the period of time when this Registration Statement is effective.

We are subject to Regulation M of the Exchange Act. Regulation M governs activities of underwriters, issuers, selling security holders and others in connection with offerings of securities. Regulation M prohibits distribution participants and their affiliated purchasers from bidding for, purchasing or attempting to induce any person to bid for or purchase the securities being distributed.

The Company proposes to arrange for the sale of the shares it is offering pursuant to this registration statement to one or more investors through a securities purchase agreement directly between the investors and the Company. All of the shares will be sold at the same price and, we expect, at a single closing. We established the price following negotiations with prospective investors and with reference to the prevailing market price of our common stock, recent trends in such price and other factors. It is possible that not all of the shares we are offering pursuant to this registration statement will be sold at the closing, in which case our net proceeds would be reduced. We expect that the sale of the shares will be completed on the date indicated on the cover page of this prospectus.

In connection with this offering, the Company may distribute this registration statement and the accompanying prospectus electronically.

The estimated offering expenses payable by us are approximately \$55,782.80, which includes legal and printing costs and various other fees associated with registering the common stock. After deducting our estimated offering expenses, we expect the net proceeds from this offering to be approximately \$5,944,227.20.

LEGAL MATTERS

Sichenzia Ross Friedman Ference LLP will pass upon the validity of the shares of common stock sold in this offering.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors
Marathon Patent Group, Inc.
(Formerly American Strategic Minerals Corporation)
(Development Stage Company)

We have audited the accompanying consolidated balance sheets of Marathon Patent Group, Inc. (formerly American Strategic Minerals Corporation) (Development Stage Company) as of December 31, 2012 and 2011 and the related consolidated statements of operations, changes in stockholders' equity (deficit), and cash flows for the year ended December 31, 2012, for the period from April 30, 2011 (Inception) to December 31, 2011 and for the period from April 30, 2011 (Inception) to December 31, 2012. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Marathon Patent Group, Inc. (formerly American Strategic Minerals Corporation) (Development Stage Company) as of December 31, 2012 and 2011, and the results of its operations and its cash flows for the year ended December 31, 2012, for the period from April 30, 2011 (Inception) to December 31, 2011 and for the period from April 30, 2011 (Inception) to December 31, 2012 in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company had a net loss and net cash used in operations of \$6,938,308 and \$1,261,404, respectively, in 2012, had a deficit accumulated during the development stage of \$7,037,134 at December 31, 2012. These matters raise substantial doubt about the Company's ability to continue as a going concern. Management's plans as to these matters are also described in Note 1. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

NOTE 1 - ORGANIZATION AND DESCRIPTION OF BUSINESS

Organization

Marathon Patent Group, Inc. (“the Company”), formerly American Strategic Minerals Corporation, was incorporated under the laws of the State of Nevada on February 23, 2010.

On December 7, 2011, the Company filed a Certificate of Amendment to its Articles of Incorporation with the Secretary of State of the State of Nevada in order to change its name to “American Strategic Minerals Corporation” from “Verve Ventures, Inc.”, and increase the Company’s authorized capital to 200,000,000 shares of common stock, par value \$0.0001 per share, and 50,000,000 shares of preferred stock, par value \$0.0001 per share. During June 2012, the Company decided to discontinue its exploration and potential development of uranium and vanadium minerals business. Additionally, in November 2012, the Company decided to discontinue its real estate business.

On August 1, 2012, the shareholders holding a majority of the Company’s voting capital voted in favor of (i) changing the name of the Company to “Fidelity Property Group, Inc.” and (ii) the adoption the 2012 Equity Incentive Plan and reserving 10,000,000 shares of common stock for issuance thereunder (the “2012 Plan”). The Board of Directors of the Company approved the name change and the adoption of the 2012 Plan on August 1, 2012. The Company did not file an amendment to its Articles of Incorporation with the Secretary of State of Nevada and subsequently abandoned the decision to adopt the “Fidelity Property Group, Inc.” name.

On October 1, 2012, the shareholders holding a majority of the Company’s voting capital voted and authorized the Company to (i) change the name of the Company to Marathon Patent Group, Inc. (the “Name Change”) and (ii) effectuate a reverse stock split of the Company’s common stock by a ratio of 3-for-2 (the “Reverse Split”) within one year from the date of approval of the stockholders of the Company. The Board of Directors of the Company approved the Name Change and the Reverse Split on October 1, 2012. The Company’s Board of Directors determined the name “Marathon Patent Group, Inc.” better reflects the long-term strategy in exploring other opportunities and the identity of the Company going forward. On February 15, 2013, the Company filed the Certificate with the Secretary of State of the State of Nevada in order to effectuate the Name Change. Currently, the Reverse Split has been authorized by the Company’s shareholders but has not been effectuated.

On January 26, 2012, the Company entered into a Share Exchange Agreement (the “Exchange Agreement”) with American Strategic Minerals Corporation, a Colorado corporation (“Amicor”) and the shareholders of Amicor (the “Amicor Shareholders”). Upon closing of the transaction contemplated under the Exchange Agreement (the “Share Exchange”), on January 26, 2012, the Amicor Shareholders transferred all of the issued and outstanding capital stock of Amicor to the Company in exchange for an aggregate of 10,000,000 shares of the common stock of the Company. The Share Exchange caused Amicor to become a wholly-owned subsidiary of the Company. Additionally, as further consideration for entering into the Exchange Agreement, certain Amicor Shareholders received ten-year warrants to purchase an aggregate of 6,000,000 shares of the Company’s common stock with an exercise price of 0.50 per share. Prior to acquisition by the Company, Amicor owned certain mining and mineral rights.

Amicor, formerly Nuclear Energy Corporation, was incorporated under the laws of the State of Colorado on April 30, 2011. Amicor owns mining leases of federal unpatented mining claims and leases private lands in the states of Utah and Colorado for the purpose of exploration and potential development of uranium and vanadium minerals.

Prior to the Share Exchange, the Company was a shell company with no business operations.

The Share Exchange was accounted for as a reverse-merger and recapitalization. Amicor was the acquirer for financial reporting purposes and the Company was the acquired company. Consequently, the assets and liabilities and the operations reflected in the historical financial statements prior to the Share Exchange were those of Amicor and was recorded at the historical cost basis of Amicor, and the consolidated financial statements after completion of the Share Exchange included the assets and liabilities of the Company and Amicor, historical operations of Amicor and operations of the Company from the closing date of the Share Exchange.

F-7

On June 11, 2012, the Company terminated various leases related to its uranium mining claims (the "Claims"), consisting of: the Cutler King Property (3 unpatented mining claims); "Centennial-Sun Cup" (42 unpatented mining claims); "Bull Canyon" (2 unpatented mining claims); "Martin Mesa" (51 unpatented mining claims); "Avalanche/Ajax" (8 unpatented mining claims) and "Home Mesa" (9 unpatented mining claims). The Company had acquired the Claims through the acquisition of Amicor on January 26, 2012. The decision by the Company to terminate these leases followed changes in management and direction of the Company, a review of the uranium market, and the timing and costs expected to pursue the business.

On June 11, 2012, the Company entered into a rescission agreement (the "Rescission Agreement") with Amicor, and the Amicor Shareholders. Each of the Amicor Shareholders had previously received shares of the Company's common stock (and certain of the Amicor Shareholders also received warrants to purchase shares of the Company's common stock) (collectively, the "Shareholder Securities") pursuant to the Rescission Agreement. Each of the Amicor Shareholders, with the exception of one, agreed to return the Shareholder Securities to the Company for cancellation and to enter into joint mutual releases with the Company. Furthermore, pursuant to the terms of the Rescission Agreement, George Glasier resigned from his position as President, Chief Executive Officer and Chairman of the Company; Kathleen Glasier resigned from her position as Secretary of the Company, Michael Moore resigned from his position as Chief Operating Officer and Vice President of the Company and each of David Andrews and Kyle Kimmerle resigned from their position as a director of the Company. As a result of the foregoing, the Company cancelled 9,806,667 shares of the Company's common stock and 4,800,000 warrants and terminated the mining leases entered into with the Amicor Shareholders. Additionally, the Company paid an aggregate of \$132,000 to Amicor Shareholders upon the execution of the Rescission Agreement.

Under the terms of the Rescission Agreement, the Company's employment agreement with Mr. Glasier was terminated and all options, warrants and rights to acquire any shares of the Company's common stock, whether vested or unvested, were terminated as of the date of the Rescission Agreement. Additionally, under the terms of the Rescission Agreement, the Company's lease for certain office space, dated as of January 26, 2012 with Silver Hawk Ltd., an entity owned and controlled by George Glasier and Kathleen Glasier, was terminated.

On June 11, 2012, the Company and Pershing Gold Corporation ("Pershing") exercised its right under the Option Agreement executed in January 2012, through the assignment of Pershing's wholly owned subsidiary, Continental Resources Acquisition Sub, Inc. ("Acquisition Sub"), (see Note 5). As a result of the assignment, Acquisition Sub became a wholly owned subsidiary of the Company and the Company acquired all of Pershing's uranium assets.

On November 14, 2012, the Company entered into a Share Exchange Agreement (the "Sampo Exchange Agreement") with Sampo IP LLC, a Virginia limited liability company ("Sampo"), a company that holds certain intellectual property rights, and the members of Sampo (the "Sampo Members"). Upon closing of the transaction contemplated under the Sampo Exchange Agreement (the "Sampo Share Exchange"), on November 14, 2012, the Sampo Members (6 members) transferred all of the issued and outstanding membership interests of Sampo to the Company in exchange for an aggregate of 9,250,000 shares of the common stock of the Company. Additionally, the Company made a cash payment to Sampo of \$500,000 pursuant to the terms of the Sampo Exchange Agreement.

Upon the closing of the Sampo Share Exchange, Mark Groussman resigned as the Company's Chief Executive Officer and John Stetson resigned as the Company's President and Chief Operating Officer and simultaneously with the effectiveness of the Sampo Share Exchange, Doug Croxall was appointed as the Company's Chief Executive Officer and Chairman and John Stetson was appointed as the Company's Chief Financial Officer and Secretary. LVL Patent Group LLC, of which Mr. Croxall is the Chief Executive Officer, and John Stetson, were former members of Sampo and received 4,000,000 and 500,000 shares of the Company's common stock, respectively, in connection with the Sampo Share Exchange.

F-8

Through the Company's wholly owned subsidiary, Sampo, the Company intends to engage in the acquisition, development and monetization of intellectual property through both the prosecution and licensing of its own patent portfolio, the acquisition of additional intellectual property or partnering with others to defend and enforce their patent rights. Consequently, the Company decided to discontinue its real estate business and intends to sell and dispose its remaining real estate holdings during fiscal 2013.

Going Concern

The consolidated financial statements have been prepared on a going concern basis which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred losses since inception resulting in a deficit accumulated during the development stage of \$7,037,134 as of December 31, 2012, negative cash flows from operating activities and net loss of \$1,261,404 and \$6,938,308, respectively, for the year ended December 31, 2012. The Company anticipates further losses in the development of its business raising substantial doubt about the Company's ability to continue as a going concern. The ability to continue as a going concern is dependent upon the Company generating profitable operations in the future and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due. The ability to successfully resolve these factors raise substantial doubt about the Company's ability to continue as a going concern. The consolidated financial statements of the Company do not include any adjustments that may result from the outcome of these aforementioned uncertainties.

Based on current operating plans, the current resources of the Company, after taking into account the net funds received subsequent to balance sheet date from the sales and disposal of the remaining real estate properties, are expected to be sufficient for at least the next twelve months. The Company may choose to raise additional funds in connection with any future acquisition of additional intellectual property assets, operating businesses or other assets that it may choose to pursue. There can be no assurance, however, that any such opportunities will materialize. Moreover, any potential financing would likely be dilutive to the Company's stockholders.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation and Principle of Consolidation

The consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States of America ("US GAAP") and present the consolidated financial statements of the Company and its wholly-owned subsidiaries as of December 31, 2012. In the preparation of consolidated financial statements of the Company, intercompany transactions and balances were eliminated.

Development Stage Company

The Company is presented as a development stage company. Activities during the development stage include organizing the business, raising capital and acquiring additional intellectual property. The Company is a development stage company with no revenues and no profits. The Company has not commenced significant operations and, in accordance with Accounting Standards Codification ("ASC") Topic 915 "Development Stage Entities", is considered a development stage company.

Use of Estimates and Assumptions

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets

and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Significant estimates made by management include, but are not limited to, the assumptions used to calculate fair value of warrants granted, common stock issued for services, common stock issued in connection with an option agreement, common stock issued for acquisition of patents, and the valuation of mineral rights.

F-9

Intangible assets

Intangible assets include patents purchased and recorded based on the cost to acquire them. These assets are amortized over their remaining estimated useful lives. Useful lives of intangible assets are periodically evaluated for reasonableness and the assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may no longer be recoverable.

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments and other short-term investments with maturity of three months or less, when purchased, to be cash equivalents. The Company maintains cash and cash equivalent balances at one financial institution that is insured by the Federal Deposit Insurance Corporation. The Company's account at this institution is insured by the Federal Deposit Insurance Corporation ("FDIC") up to \$250,000. In addition to the basic insurance deposit coverage, the FDIC was providing temporary unlimited coverage for non-interest bearing transaction accounts through December 31, 2012. For the year ended December 31, 2012, the Company has reached bank balances exceeding the FDIC insurance limit of approximately \$958,000. To reduce its risk associated with the failure of such financial institution, the Company evaluates at least annually the rating of the financial institution in which it holds deposits.

Marketable Securities

Marketable securities that the Company invests in publicly traded equity securities and are generally restricted for sale under Federal securities laws. The Company's policy is to liquidate securities received when market conditions are favorable for sale. Since these securities are often restricted, the Company is unable to liquidate them until the restriction is removed. Pursuant to ASC Topic 320, "Investments – Debt and Equity Securities" the Company's marketable securities have a readily determinable and active quoted price, such as from NASDAQ, NYSE Euronext, the Over the Counter Bulletin Board, and the OTC Markets Group.

Available for sale securities are carried at fair value, with changes in unrealized gains or losses are recognized as an element of comprehensive income based on changes in the fair value of the security. Once liquidated, realized gains or losses on the sale of marketable securities available for sale are reflected in the net income (loss) for the period in which the security was liquidated.

Comprehensive Income

Accounting Standards Update ("ASU") No. 2011-05 amends Financial Accounting Standards Board ("FASB") Codification Topic 220 on comprehensive income (1) to eliminate the current option to present the components of other comprehensive income in the statement of changes in equity, and (2) to require presentation of net income and other comprehensive income (and their respective components) either in a single continuous statement or in two separate but consecutive statements. These amendments do not alter any current recognition or measurement requirements in respect of items of other comprehensive income. The amendments in this Update are to be applied prospectively.

Fair Value of Financial Instruments

The Company adopted FASB ASC 820, "Fair Value Measurements and Disclosures" ("ASC 820"), for assets and liabilities measured at fair value on a recurring basis. ASC 820 establishes a common definition for fair value to be applied to existing generally accepted accounting principles that require the use of fair value measurements,

establishes a framework for measuring fair value and expands disclosure about such fair value measurements. The adoption of ASC 820 did not have an impact on the Company's financial position or operating results, but did expand certain disclosures.

F-10

ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Additionally, ASC 820 requires the use of valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. These inputs are prioritized below:

- Level 1: Observable inputs such as quoted market prices in active markets for identical assets or liabilities
- Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data
- Level 3: Unobservable inputs for which there is little or no market data, which require the use of the reporting entity's own assumptions.

Investment measured at fair value on a recurring basis:

	Fair Value Measurements Using:		
	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Marketable securities – available for sale, net of discount for effect of restriction	\$ -	\$ -	\$ 12,500

The Company classifies the investments in marketable securities available for sale as Level 3, adjusted for the effect of restriction. The securities are restricted and cannot be readily resold by the Company absent a registration of those securities under the Securities Act of 1933, as amended (the "Securities Act") or the availabilities of an exemption from the registration requirements under the Securities Act. As these securities are often restricted, the Company is unable to liquidate them until the restriction is removed. Unrealized gains or losses on marketable securities available for sale are recognized as an element of comprehensive income based on changes in the fair value of the security. Once liquidated, realized gains or losses on the sale of marketable securities available for sale are reflected in our net income for the period in which the security was liquidated.

The carrying amounts reported in the balance sheet for cash, prepaid expenses, accounts payable, and accrued expenses, approximate their estimated fair market value based on the short-term maturity of this instrument.

In addition, FASB ASC 825-10-25 "Fair Value Option" was effective for January 1, 2008. ASC 825-10-25 expands opportunities to use fair value measurements in financial reporting and permits entities to choose to measure many financial instruments and certain other items at fair value.

Prepaid Expenses

Prepaid expenses of \$40,333 and \$0 at December 31, 2012 and 2011, respectively, consist primarily of costs paid for future services and expenses which will occur within a year. Prepaid expenses include prepayments in cash of public relation, consulting services and prepaid insurance which are being amortized over the terms of their respective agreements.

Income Taxes

The Company accounts for income taxes pursuant to the provision of ASC 740-10, "Accounting for Income Taxes" which requires, among other things, an asset and liability approach to calculating deferred income taxes. The asset and liability approach requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. A valuation allowance is provided to offset any net deferred tax assets for which management believes it is more likely than not that the net deferred asset will not be realized.

F-11

The Company follows the provision of the ASC 740-10 related to Accounting for Uncertain Income Tax Position. When tax returns are filed, it is highly certain that some positions taken would be situated upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. In accordance with the guidance of ASC 740-10, the benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is most likely that not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions.

Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above should be reflected as a liability for uncertain tax benefits in the accompanying balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination. The Company believes its tax positions are all highly certain of being upheld upon examination. As such, the Company has not recorded a liability for uncertain tax benefits.

The Company has adopted ASC 740-10-25 Definition of Settlement, which provides guidance on how an entity should determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits and provides that a tax position can be effectively settled upon the completion and examination by a taxing authority without being legally extinguished. For tax position considered effectively settled, an entity would recognize the full amount of tax benefit, even if the tax position is not considered more likely that not to be sustained based solely on the basis of its technical merits and the statute of limitations remains open. The federal and state income tax returns of the Company are subject to examination by the IRS and state taxing authorities, generally for three years after they were filed.

Basic and Diluted Net Loss per Share

Net loss per common share is calculated in accordance with ASC Topic 260: Earnings Per Share (“ASC 260”). Basic loss per share is computed by dividing net loss by the weighted average number of shares of common stock outstanding during the period. The computation of diluted net loss per share does not include dilutive common stock equivalents in the weighted average shares outstanding as they would be anti-dilutive. The Company has 2,000,000 options and 2,589,109 warrants outstanding at December 31, 2012 and was excluded from the computation of diluted shares outstanding as they would have had an anti-dilutive impact on the Company’s net loss.

The following table sets forth the computation of basic and diluted loss per share:

	For the Year ended December 31, 2012	For the period from inception, April 30, 2011 to December 31, 2011
Numerator:		
Loss from continuing operations	\$ (5,527,637)	\$ (9,848)
Loss from discontinued operations	\$ (1,410,671)	\$ (99,474)
Denominator:		
Denominator for basic and diluted loss per share (weighted-average shares)	36,238,712	7,469,388

Loss per common share, basic and diluted:			
Loss from continuing operations	\$	(0.15)	\$ (0.00)
Loss from discontinued operations	\$	(0.04)	\$ (0.01)

F-12

Impairment of Long-lived Assets

The Company accounts for the impairment or disposal of long-lived assets according to the ASC 360 “Property, Plant and Equipment”. The Company continually monitors events and changes in circumstances that could indicate that the carrying amounts of long-lived assets, including mineral rights, may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the estimated future net undiscounted cash flows expected to be generated by the asset. When necessary, impaired assets are written down to estimated fair value based on the best information available. Estimated fair value is generally based on either appraised value or measured by discounting estimated future cash flows. Considerable management judgment is necessary to estimate discounted future cash flows. Accordingly, actual results could vary significantly from such estimates. The Company recognizes an impairment loss when the sum of expected undiscounted future cash flows is less than the carrying amount of the asset.

Stock-based Compensation

Stock-based compensation is accounted for based on the requirements of the Share-Based Payment Topic of ASC 718 which requires recognition in the consolidated financial statements of the cost of employee and director services received in exchange for an award of equity instruments over the period the employee or director is required to perform the services in exchange for the award (presumptively, the vesting period). The ASC also requires measurement of the cost of employee and director services received in exchange for an award based on the grant-date fair value of the award.

Pursuant to ASC Topic 505-50, for share-based payments to consultants and other third-parties, compensation expense is determined at the “measurement date.” The expense is recognized over the vesting period of the award. Until the measurement date is reached, the total amount of compensation expense remains uncertain. The Company initially records compensation expense based on the fair value of the award at the reporting date.

Mineral Property Acquisition and Exploration Costs

Costs of lease, exploration, carrying and retaining unproven mineral lease properties were expensed as incurred. The Company expensed all mineral exploration costs as incurred. Such expenses are included in the loss from discontinued operations and prior periods have been restated in the Company’s financial statements and related footnotes to conform to this presentation.

The Company’s remaining claims which include (1) mining lease encompassing 1,520 acres of land owned by J. H. Ranch, Inc. located in San Juan County, Utah (2) certain unpatented lode mining claims acquired on March 9, 2012, located in San Juan County, Utah (3) the Pitchfork Claims, acquired in January 2012 and located in San Miguel County Colorado and (4) the claims acquired on June 11, 2012 from Pershing which include the Coso, Artillery Peak, Blythe and Carnotite properties.

Revenue Recognition

The Company has not generated revenue from the Company’s current patent business. The Company will recognize revenue when all the conditions for revenue recognition are met: (i) persuasive evidence of an arrangement exists, (ii) collection of the fee is probable, (iii) the sales price is fixed and determinable and (iv) delivery has occurred or services have been rendered.

Recent Accounting Pronouncements

In July 2012, the FASB issued ASU 2012-02, Intangibles – Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment, on testing for indefinite-lived intangible assets for impairment. The new guidance provides an entity to simplify the testing for a drop in value of intangible assets such as trademarks, patents, and distribution rights. The amended standard reduces the cost of accounting for indefinite-lived intangible assets, especially in cases where the likelihood of impairment is low. The changes permit businesses and other organizations to first use subjective criteria to determine if an intangible asset has lost value. The amendments to U.S. GAAP will be effective for fiscal years starting after September 15, 2012. The Company's adoption of this accounting guidance does not have a material impact on the consolidated financial statements and related disclosures.

F-13

There were other updates recently issued, most of which represented technical corrections to the accounting literature or application to specific industries and are not expected to have a material impact on the Company's financial position, results of operations or cash flows.

NOTE 3 - DISCONTINUED OPERATIONS

During June 2012, the Company decided to discontinue its exploration and potential development of uranium and vanadium minerals business and prior periods have been restated in the Company's consolidated financial statements and related footnotes to conform to this presentation. Additionally, in November 2012, the Company decided to discontinue its real estate business and intends to sell and dispose its remaining real estate holdings during fiscal 2013. The Company is now engage in the acquisition, development and monetization of intellectual property through both the prosecution and licensing of its own patent portfolio, the acquisition of additional intellectual property or partnering with others to defend and enforce their patent rights.

The remaining assets and liabilities of discontinued operations are presented in the balance sheet under the caption "Assets and Liabilities of discontinued operation" and relates to the discontinued operations of the uranium and vanadium minerals business and real estate business.

Deposits

Deposits at December 31, 2012 and 2011 were \$82,145 and \$3,500, respectively, which consist of earnest money deposits in connection with real estate properties under contract and are included in assets of discontinued operations. The Company expects to collect these deposits during fiscal 2013.

Real estate held for sale

Real estate held for sale consists of a residential property located in Southern California. Real estate held for sale is initially recorded at the lower of cost or estimated fair market value less the estimated cost to sell. After acquisition, costs incurred relating to the development and improvements of property are capitalized to the extent they do not cause the recorded value to exceed the net realizable value, whereas costs relating to holding and disposition of the property are expensed as incurred. After acquisition, real estate held for sale is analyzed periodically for changes in fair values and any subsequent write down is charged to impairment losses on real estate properties. Whenever events or changes in circumstances suggest that the carrying amount may not be recoverable, management assesses the recoverability of its real estate by comparing the carrying amount with its fair value. The process involved in the determination of fair value requires estimates as to future events and market conditions. This estimation process may assume that the Company has the ability to dispose of its real estate properties in the ordinary course of business based on management's present plans and intentions.

If management determines that the carrying value of a specific real estate investment is impaired, a write-down is recorded as a charge to current period operations. The evaluation process is based on estimates and assumptions and the ultimate outcome may be different.

The Company determined that the carrying value of the remaining real estate properties do not exceed the net realizable value and thus did not consider it necessary to record any impairment charges of real estate held for sale at December 31, 2012. The Company sold 3 real estate properties generating gross profit of \$147,964 during the year ended December 31, 2012 and is included in loss from discontinued operations. As of December 31, 2012 and 2011, real estate held for sale which includes capitalized improvements amounted to \$1,035,570 and \$0 respectively and are included in assets of discontinued operations. The Company intends to sell and dispose its remaining real estate holdings during fiscal 2013.

The Company recorded an impairment charge in connection with its mineral rights of \$1,256,000 and \$99,474 for the year ended December 31, 2012 and for the period from inception, April 30, 2011 to December 31, 2011, respectively, and has been included in loss from discontinued operations.

On November 14, 2012, upon the closing of the Sampo Share Exchange (See Note 1), LVL Patent Group LLC, of which Mr. Croxall is the Chief Executive Officer, and John Stetson, were former members of Sampo, received 4,000,000 and 500,000 shares of the Company's common stock, respectively, in connection with the Sampo Share Exchange.

NOTE 6 - STOCKHOLDERS' EQUITY (DEFICIT)

On November 25, 2011, the Board of Directors of the Company authorized a 1.362612612 for one forward split in the form of a dividend, whereby an additional 0.362612612 shares of common stock, par value \$0.0001 per share, were issued for each one share of common stock held by each shareholder of record on December 9, 2011. All share amounts have been adjusted to reflect the number of shares of common stock on a post-dividend/post-split basis.

On December 7, 2011, the Company filed a Certificate of Amendment to its Articles of Incorporation with the Secretary of State of the State of Nevada in order to increase the Company's authorized capital to 200,000,000 shares of common stock from 75,000,000 shares, change the par value to \$0.0001 per share from \$.001 per share, and authorized new 50,000,000 shares of preferred stock, par value \$0.0001 per share.

Common Stock

On January 26, 2012, the Company entered into the Exchange Agreement with Amicor and Amicor Shareholders (see Note 1). Upon closing of the Share Exchange, on January 26, 2012, the Amicor Shareholders transferred all of the issued and outstanding capital stock of Amicor to the Company in exchange for an aggregate of 10,000,000 shares of

the Company's common stock. Additionally, as further consideration for entering into the Exchange Agreement, certain Amicor Shareholders received ten-year warrants to purchase an aggregate of 6,000,000 shares of the Company's common stock with an exercise price of 0.50 per share.

F-16

Immediately following the closing of the Share Exchange and a private placement of the Company's securities (described below), under an Agreement of Conveyance, Transfer and Assignment of Assets and Assumption of Obligations (the "Conveyance Agreement"), the Company transferred all of the pre-Share Exchange assets and liabilities to a newly formed wholly-owned subsidiary of the Company, Verve Holdings, Inc. ("SplitCo"). Pursuant to a stock purchase agreement, the Company transferred all of the outstanding capital stock of SplitCo to certain former shareholders of the Company in exchange for the cancellation of an aggregate of 4,769,144 (post-split) shares of the Company's common stock that they owned (the "Split-Off"), with 7,500,000 (post split) shares of the Company's common stock held by persons who acquired such shares prior to the Share Exchange remaining outstanding. Accordingly, following the Split-Off, 7,500,000 shares will constitute as the Company's "public float".

On January 26, 2012, the Company sold 10,029,965 shares of the Company's common stock at a purchase price of \$0.50 per share in a private placement to accredited investors, resulting in aggregate net proceeds to the Company of \$4,993,965 (the "Private Placement"), which includes an aggregate of \$100,000 advanced to Amicor for general working capital purposes prior to the closing of the Share Exchange which was converted into an aggregate of 200,000 shares of common stock in the Private Placement and an aggregate of \$75,000 in debt owed in January 2012 for legal fees incurred by Amicor which was converted into an aggregate 150,000 shares of common stock in the Private Placement. On January 30, 2012, the Company sold an additional 600,000 shares of common stock in the Private Placement with gross proceeds to the Company of \$300,000 for total net proceeds to the Company of \$5,293,965. In connection with these private placements, the Company paid legal fees of \$21,000.

On January 26, 2012, contemporaneously with the Share Exchange, the Company also entered into an Option Agreement with Pershing pursuant to which the Company obtained the option (the "Option") to acquire certain uranium exploration rights and properties held by Pershing for a purchase price of \$10.00. In consideration for issuance of the Option, the Company issued to Pershing (i) a \$1,000,000 promissory note payable in installments upon satisfaction of certain conditions, expiring six months following issuance and (ii) 10 million shares of the Company's common stock (collectively, the "Option Consideration"). On January 26, 2012, Pershing held 26.65% of interest in the Company. David Rector and Joshua Bleak were former members of the Company's board of directors. David Rector was a former member of the board of Pershing and Joshua Bleak is the Chief Executive Officer and a director of Continental Resources Group, Inc. (a company which is one of the largest shareholders of Pershing).

Between February 1, 2012 and March 30, 2012, the Company sold 1,300,000 shares of the Company's common stock at a purchase price of \$0.50 per share in a private placement to accredited investors, resulting in aggregate net proceeds to the Company of \$650,000.

As of December 31, 2012, \$930,000 of the principal amount of note has been paid. Under the terms of the note, the Company was required to pay the balance of the note upon completion of a private placement totaling \$1 million or more on or before July 26, 2012. The \$1.0 million private placement was not completed by that date thus the Company was not required to pay the final \$70,000 due under the note and a total of \$930,000 has been paid under the note. On June 11, 2012, the Company and Pershing exercised its right under the Option, through the assignment of Pershing's wholly owned subsidiary, Acquisition Sub, (see Note 1). As a result of the assignment, Acquisition Sub became a wholly owned subsidiary of the Company and the Company acquired all of Pershing's uranium assets. The Company recorded the 10 million shares at par value or \$1,000. Pursuant to ASC 805-50-30-2 "Business Combinations", the Company determined that if the consideration paid is not in the form of cash, the measurement may be based on either (i) the cost which is measured based on the fair value of the consideration given or (ii) the fair value of the assets (or net assets) acquired, whichever is more clearly evident and thus more reliably measurable. The Company determined that the fair value of the net assets acquired was a better indicator thus more reliably measurable than the fair value of the common stock issued.

As a result, on June 11, 2012, the Company recorded the value of the Option Consideration amounting to \$931,000 to mineral rights which was initially recorded as a deposit before the date of exercise as reflected in the first quarter of 2012.

Between March 2012 and August 2012, the Company issued an aggregate of 4,494,829 shares of common stock in connection with the exercise of the 6,200,000 stock warrants on a cashless basis. The Company valued these common shares at par value (see Note – Common Stock Warrants).

F-17

On June 11, 2012, the Company cancelled a total of 9,806,667 shares of common stock and 4,800,000 warrants in connection with the Rescission Agreement (see Note 1). Upon the execution of the Rescission Agreement, the Company paid to Amicor Shareholders an aggregate of \$132,000 and was recorded to additional paid in capital.

In connection with the Sampo Exchange Agreement (see Note 1), on November 14, 2012, the Sampo Members transferred all of the issued and outstanding membership interests of Sampo to the Company in exchange for an aggregate of 9,250,000 shares of the common stock of the Company. Additionally, the Company made a cash payment to Sampo of \$500,000 pursuant to the terms of the Sampo Exchange Agreement. The 9,250,000 shares of common stock were valued at par value or \$925. In accordance with Accounting Standards Codification ("ASC") 805-50-30 "Business Combinations," the Company determined that if the consideration paid is not in the form of cash, the measurement may be based on either (i) the cost which is measured based on the fair value of the consideration given or (ii) the fair value of the assets (or net assets) acquired, whichever is more clearly evident and thus more reliably measurable. The Company determined that the fair value of the net assets acquired was a better indicator thus more reliably measurable than the fair value of the common stock issued.

Therefore the Company has determined, in accordance with ASC 805-50-30, that the value of the net assets acquired is equivalent to \$500,925 which represents the cash consideration paid of \$500,000 and the par value of 9,250,000 shares of the Company's common stock amounting to \$925. No independent valuation was done on the net assets or patents acquired before acquisition. The Company deemed that the fair value of the net asset of Sampo amounting to \$500,925 is more clearly evident and more reliable measurement basis.

On December 27, 2012, the Company sold an aggregate of 1,089,109 units with gross proceeds to the Company of \$866,287 to certain accredited investors pursuant to a subscription agreement. Each unit was sold for a purchase price of \$0.80 per unit and consists of: (i) two shares of the Company's common stock (2,178,218 common stock) and (ii) a five-year warrant to purchase an additional share of common stock at an exercise price of \$0.60 per share, subject to adjustment upon the occurrence of certain events such as stock splits and dividends. The sale of units consists of 1,870,000 shares of common stock issued for cash of \$743,000, 83,218 shares of common stock for the conversion of unpaid salaries of \$33,287 and 225,000 shares of common stock for certain outstanding amounts for legal fees of \$90,000 into units at the per unit offering price totaling \$866,287. The Company paid placement agent fees of \$5,000 in cash to a broker-dealer in connection with the sale of the Units.

Pursuant to a Registration Rights Agreement with the investors, the Company has agreed to file a "resale" registration statement with the SEC covering all shares of the common stock and shares underlying the warrants within 90 days of the final closing date of the sale of units on December 27, 2012 (the "Filing Date") and to maintain the effectiveness of the registration statement until all securities have been sold or are otherwise able to be sold pursuant to Rule 144. The Company has agreed to use its reasonable best efforts to have the registration statement declared effective within 90 days of the Filing Date (the "Effectiveness Date"). The Company is obligated to pay to investors a fee of 1% per month in cash for every thirty day period up to a maximum of 6%, (i) that the registration statement has not been filed and (ii) following the Effectiveness Date that the registration statement has not been declared effective; provided, however, that the Company shall not be obligated to pay any such liquidated damages if the Company is unable to fulfill its registration obligations as a result of rules, regulations, positions or releases issued or actions taken by the SEC pursuant to its authority with respect to "Rule 415", provided the Company registers at such time the maximum number of shares of common stock permissible upon consultation with the staff of the SEC.

Common Stock Warrants

On January 26, 2012, the Company issued to certain Amicor Shareholders ten-year warrants to purchase an aggregate of 6,000,000 shares of the Company's common stock with an exercise price of 0.50 per share in connection with the

Exchange Agreement (see Note 1).

F-18

The Company entered into consulting agreements with Melechdavid Inc. and GRQ Consultants, Inc., pursuant to which such consultants will provide consulting services to the Company in consideration for which the Company sold to the consultants warrants to purchase an aggregate of 3,500,000 shares of the Company's common stock with an exercise price of \$0.50 per share (the "Consulting Warrants"). The services provided by the consultants include introductions to banking relationships, consulting on strategic acquisitions and advice on capital restructuring.

The Consulting Warrants have a term of ten years and were exercisable on a cashless basis after twelve months if the shares of common stock underlying the Consulting Warrants are not registered with the Securities and Exchange Commission. In March 2012, the Company entered into a First Amendment to the Consulting Warrants (the "First Amendment") with such consultants to amend the cashless exercise terms of the warrants. The First Amendment provides for the exercise of the Consulting Warrants on a cashless basis immediately upon the execution of the First Amendment. The Director Warrants have a term of ten years and are exercisable on a cashless basis after twelve months if the shares of common stock underlying the Director Warrants are not registered with the Securities and Exchange Commission. The Director Warrants issued to Mr. Smith, Mr. Rector and Mr. Bleak vest in three equal annual installments with the first installment vesting one year from the date of issuance. The Director Warrant issued to Mr. Glasier is immediately exercisable.

In March 2012, the Company issued an aggregate of 1,166,667 shares of common stock to Mr. Glasier in connection with the exercise of the 1,500,000 stock warrants on a cashless basis. Such 1,166,667 shares were cancelled on June 11, 2012 in connection with the Rescission Agreement (see Note 1).

The Company also issued a ten-year warrant to purchase an aggregate of 300,000 shares of common stock with an exercise price of \$0.50 per share to Daniel Bleak, an outside consultant to the Company, which vests in three equal annual installments with the first installment vesting one year from the date of issuance (the "Additional Consulting Warrant"). The Additional Consulting Warrant is exercisable on a cashless basis after twelve months in the absence of an effective registration statement covering the resale of the shares of common stock underlying the Additional Consulting Warrant. Daniel Bleak is the father of Joshua Bleak, a former member of the Company's board of directors. The Company did not enter into a consulting agreement with Mr. Bleak.

The 6,500,000 warrants were valued on the grant date at approximately \$0.50 per warrant or a total of \$3,242,850 using the Black-Scholes option pricing model used for this valuation had the following assumptions: stock price of \$0.50 per share (based on the per share price of the Company's common stock in the most recent private placements), volatility of 191% (estimated using volatilities of similar companies), expected term of approximately ten years, and a risk free interest rate of 1.96%. Each unit was sold for a purchase price of \$0.80 per unit and consists of: (i) two shares of the Company's common stock (2,178,218 common stock) and (ii) a five-year warrant to purchase an additional share of common stock (1,089,109 warrants) at an exercise price of \$0.60 per share, subject to adjustment upon the occurrence of certain events such as stock splits and dividends. The warrants may be exercised on a cashless basis. The warrants contains limitations on the holder's ability to exercise the warrant in the event such exercise causes the holder to beneficially own in excess of 4.99% of the Company's issued and outstanding common stock, subject to a discretionary increase in such limitation by the holder to 9.99% upon 61 days' notice.

NOTE 9 – MARKETABLE SECURITIES

Marketable securities at December 31, 2012 consisted of the following:

	Cost	Gross Unrealized Gains/(losses)	Gross Realized Gains/(losses)	Fair Value
Publicly traded equity securities – available for sale	\$ 125,000	—	(112,500)	\$ 12,500

Available for sale securities are carried at fair value. Unrealized gains or losses on marketable securities - available for sale are recognized on a periodic basis as an element of comprehensive income based on changes in the fair value of the security. Once liquidated, realized gains or losses on the sale of marketable securities available for sale will be reflected in the Company’s net loss for the period in which the security are liquidated. At the end of each period, the Company evaluates the carrying value of the marketable securities for a decrease in value. The Company evaluates the company underlying these marketable securities to determine whether a decline in fair value below the amortized cost basis is other than temporary. If the decline in fair value is judged to be “other- than- temporary”, the cost basis of the individual security shall be written down to fair value as a new cost basis and the amount of the write-down is charged to earnings.

On March 19, 2012, the Company entered into an agreement with California Gold, pursuant to which the Company agreed to provide California Gold with a geological review (the “Report”) on or prior to March 30, 2012, of the Company’s certain uranium properties pursuant to which California Gold may determine and identify the approximate locations and scope of geologic formations that could contain potential gold deposits on these properties.

In consideration for delivery of the Report, California Gold agreed to pay the Company \$125,000, which payment may, at the election of California Gold, be paid in cash or in unregistered shares of California Gold common stock, par value \$0.001 per share (the “California Gold Common Stock”), issued by California Gold. In the event that California Gold elects to deliver the California Gold Common Stock, it shall deliver such number of shares of California Gold Common Stock that shall be equal to the number which results from dividing \$125,000 by the lesser of: (i) the closing price of a share of the California Gold Common Stock as quoted on the Over the Counter Bulletin Board on March 19, 2012 or (ii) the purchase price per share of California Gold Common Stock paid by investors in California Gold sold

in California Gold's next financing, if any, on or before March 30, 2012. In March 2012, the Company received 1,250,000 restricted shares of California Gold.

At the time of issuance, the Company valued the shares of California Gold and recorded the cost of investment at the fair market value (based on the closing price pursuant to the agreement) of the shares at \$0.10 per share or \$125,000 and was recorded as other income during the year ended December 31, 2012 as reflected in the accompanying consolidated statement of operations.

The Company evaluated these marketable securities and determined that the fair value is deemed to be other- than- temporary, the cost basis of the individual security shall be written down to fair value as a new cost basis and the amount of the write-down is charged to earnings. During the year ended December 31, 2012, as a result of the evaluation, the Company has recorded a realized loss on other than temporary decline of \$112,500.

NOTE 10 - INCOME TAXES

The Company accounts for income taxes under ASC Topic 740: Income Taxes which requires the recognition of deferred tax assets and liabilities for both the expected impact of differences between the financial statements and the tax basis of assets and liabilities, and for the expected future tax benefit to be derived from tax losses and tax credit carryforwards. ASC Topic 740 additionally requires the establishment of a valuation allowance to reflect the likelihood of realization of deferred tax assets. The Company has a net operating loss carryforward for tax purposes totaling approximately \$1,227,000 at December 31, 2012, expiring through the year 2032. Internal Revenue Code Section 382 places a limitation on the amount of taxable income that can be offset by carryforwards after certain ownership shifts.

Computed "expected" tax expense (benefit)	(34.0)%	(34.0)%
State income taxes	(5.0)%	(5.0)%

After consideration of all the evidence, both positive and negative, management has recorded a full valuation allowance at December 31, 2012, due to the uncertainty of realizing the deferred income tax assets. The valuation

NOTE 1 - ORGANIZATION AND DESCRIPTION OF BUSINESS

Organization

Marathon Patent Group, Inc. (the “Company”), formerly American Strategic Minerals Corporation, was incorporated under the laws of the State of Nevada on February 23, 2010.

The Company is a patent licensing company serving a wide range of patent owners from Fortune 500 companies to independent inventors. The Company provides its clients advice and services that enable them to realize financial and strategic returns on their intellectual property rights. The Company acquires patent assets, partners with patent holders, and monetizes patent portfolios through actively managed patent licensing campaigns.

On December 7, 2011, the Company filed a Certificate of Amendment to its Articles of Incorporation with the Secretary of State of the State of Nevada in order to change its name to “American Strategic Minerals Corporation” from “Verve Ventures, Inc.”, and increase the Company’s authorized capital to 200,000,000 shares of common stock, par value \$0.0001 per share, and 50,000,000 shares of preferred stock, par value \$0.0001 per share. During June 2012, the Company decided to discontinue its exploration and potential development of uranium and vanadium minerals business. Additionally, in November 2012, the Company decided to discontinue its real estate business.

On August 1, 2012, the shareholders holding a majority of the Company’s voting capital voted in favor of (i) changing the name of the Company to “Fidelity Property Group, Inc.” and (ii) the adoption the 2012 Equity Incentive Plan and reserving 10,000,000 shares of common stock for issuance thereunder (the “2012 Plan”). The board of directors of the Company (the “Board of Directors”) approved the name change and the adoption of the 2012 Plan on August 1, 2012. The Company did not file an amendment to its Articles of Incorporation with the Secretary of State of Nevada and subsequently abandoned the decision to adopt the “Fidelity Property Group, Inc.” name.

On October 1, 2012, the shareholders holding a majority of the Company’s voting capital had voted and authorized the Company to (i) change the name of the Company to Marathon Patent Group, Inc. (the “Name Change”) and (ii) effectuate a reverse stock split of the Company’s common stock by a ratio of 3-for-2 (the “Reverse Split”) within one year from the date of approval of the stockholders of the Company. The Board of Directors approved the Name Change and the Reverse Split on October 1, 2012. The Board of Directors determined the name “Marathon Patent Group, Inc.” better reflects the long-term strategy in exploring other opportunities and the identity of the Company going forward. On February 15, 2013, the Company filed the Certificate of Amendment with the Secretary of State of the State of Nevada in order to effectuate the Name Change. On May 31, 2013, shareholders of record holding a majority of the outstanding voting capital of the Company approved a reverse stock split of the Company’s issued and outstanding common stock by a ratio of not less than one-for-five and not more than one-for-fifteen at any time prior to April 30, 2014, with such ratio to be determined by the Company’s Board of Directors, in its sole discretion. On June 24, 2013, the reverse stock split ratio of one (1) for thirteen (13) basis was approved by the Board of Directors. On July 18, 2013, the Company filed a certificate of amendment to its Amended and Restated Articles of Incorporation with the Secretary of State of the State of Nevada in order to effectuate a reverse stock split of the Company’s issued and outstanding common stock, par value \$0.0001 per share on a one (1) for thirteen (13) basis. All share and per share values for all periods presented in the accompanying consolidated financial statements are retroactively restated for the effect of the reverse stock split.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2013

On January 26, 2012, the Company entered into a Share Exchange Agreement (the “Exchange Agreement”) with American Strategic Minerals Corporation, a Colorado corporation (“Amicor”) and the shareholders of Amicor (the “Amicor Shareholders”). Upon closing of the transaction contemplated under the Exchange Agreement (the “Share Exchange”), on January 26, 2012, the Amicor Shareholders transferred all of the issued and outstanding capital stock of Amicor to the Company in exchange for an aggregate of 769,231 post-split (10,000,000 pre-split) shares of the common stock of the Company. The Share Exchange caused Amicor to become a wholly-owned subsidiary of the Company.

Additionally, as further consideration for entering into the Exchange Agreement, certain Amicor Shareholders received ten-year warrants to purchase an aggregate of 461,538 post-split (6,000,000 pre-split) shares of the Company’s common stock with an exercise price of \$6.50 post-split (\$0.50 pre-split) per share. Prior to acquisition by the Company, Amicor owned certain mining and mineral rights.

Amicor, formerly Nuclear Energy Corporation, was incorporated under the laws of the State of Colorado on April 30, 2011. Amicor owns mining leases of federal unpatented mining claims and leases private lands in the states of Utah and Colorado for the purpose of exploration and potential development of uranium and vanadium minerals.

Prior to the Share Exchange, the Company was a shell company with no business operations.

The Share Exchange was accounted for as a reverse-merger and recapitalization. Amicor was the acquirer for financial reporting purposes and the Company was the acquired company. Consequently, the assets and liabilities and the operations reflected in the historical financial statements prior to the Share Exchange were those of Amicor and was recorded at the historical cost basis of Amicor, and the consolidated financial statements after completion of the Share Exchange included the assets and liabilities of the Company and Amicor, historical operations of Amicor and operations of the Company from the closing date of the Share Exchange.

On June 11, 2012, the Company terminated various leases related to its uranium mining claims (the “Claims”), consisting of: the Cutler King Property (3 unpatented mining claims); “Centennial-Sun Cup” (42 unpatented mining claims); “Bull Canyon” (2 unpatented mining claims); “Martin Mesa” (51 unpatented mining claims); “Avalanche/Ajax” (8 unpatented mining claims) and “Home Mesa” (9 unpatented mining claims). The Company had acquired the Claims through the acquisition of Amicor on January 26, 2012. The decision by the Company to terminate these leases followed changes in management and direction of the Company, a review of the uranium market, and the timing and costs expected to pursue the business.

On June 11, 2012, the Company entered into a rescission agreement (the “Rescission Agreement”) with Amicor, and the Amicor Shareholders. Each of the Amicor Shareholders had previously received shares of the Company’s common stock (and certain of the Amicor Shareholders also received warrants to purchase shares of the Company’s common stock) (collectively, the “Shareholder Securities”) pursuant to the Rescission Agreement. Each of the Amicor Shareholders, with the exception of one, agreed to return the Shareholder Securities to the Company for cancellation and to enter into joint mutual releases with the Company. Furthermore, pursuant to the terms of the Rescission Agreement, George Glasier resigned from his position as President, Chief Executive Officer and Chairman of the Company; Kathleen Glasier resigned from her position as Secretary of the Company, Michael Moore resigned from his position as Chief Operating Officer and Vice President of the Company and each of David Andrews and Kyle

Kimmerle resigned from their position as a director of the Company. As a result of the foregoing, the Company cancelled 754,359 post-split (9,806,667 pre-split) shares of the Company's common stock and 369,231 post-split (4,800,000 pre-split) warrants and terminated the mining leases entered into with the Amicor Shareholders. Additionally, the Company paid an aggregate of \$132,000 to Amicor Shareholders upon the execution of the Rescission Agreement.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2013

Under the terms of the Rescission Agreement, upon Mr. Glasier's resignation, the Company's employment agreement with Mr. Glasier was terminated and all options, warrants and rights to acquire any shares of the Company's common stock, whether vested or unvested, were terminated as of the date of the Rescission Agreement. Additionally, under the terms of the Rescission Agreement, the Company's lease for certain office space, dated as of January 26, 2012 with Silver Hawk Ltd., an entity owned and controlled by George Glasier and Kathleen Glasier, was terminated.

On June 11, 2012, the Company and Pershing Gold Corporation ("Pershing") exercised its right under the Option Agreement executed in January 2012, through the assignment of Pershing's wholly owned subsidiary, Continental Resources Acquisition Sub, Inc. ("Acquisition Sub"). As a result of the assignment, Acquisition Sub became a wholly owned subsidiary of the Company and the Company acquired all of Pershing's uranium assets.

On November 14, 2012, the Company entered into a Share Exchange Agreement (the "Sampo Exchange Agreement") with Sampo IP LLC, a Virginia limited liability company ("Sampo"), a company that holds certain intellectual property rights, and the members of Sampo (the "Sampo Members"). Upon closing of the transaction contemplated under the Sampo Exchange Agreement (the "Sampo Share Exchange"), on November 14, 2012, the Sampo Members (6 members) transferred all of the issued and outstanding membership interests of Sampo to the Company in exchange for an aggregate of 711,538 post-split (9,250,000 pre-split) shares of the common stock of the Company. Additionally, the Company made a cash payment to Sampo of \$500,000 pursuant to the terms of the Sampo Exchange Agreement.

Upon the closing of the Sampo Share Exchange, Mark Groussman resigned as the Company's Chief Executive Officer and John Stetson resigned as the Company's President and Chief Operating Officer and simultaneously with the effectiveness of the Sampo Share Exchange, Doug Croxall was appointed as the Company's Chief Executive Officer and Chairman and John Stetson was appointed as the Company's Chief Financial Officer and Secretary. LVL Patent Group LLC, of which Mr. Croxall is the Chief Executive Officer, and John Stetson, were former members of Sampo and received 307,692 post-split (4,000,000 pre-split) and 38,462 post-split (500,000 pre-split) shares of the Company's common stock, respectively, in connection with the Sampo Share Exchange.

On March 6, 2013, the Company entered into an Asset Purchase Agreement (the "Augme Agreement") with Augme Technologies ("Seller") whereby Seller agreed to sell to the Company certain office equipment, data, documentation, and business information related to the Seller's business and assign agreements and prospective clients and business opportunities to the Company. In consideration for the assets and assigned agreements, the Company paid \$10,000 at closing and provides litigation assistance as defined in the Agreement. As additional consideration, the Company also entered into a 2 year Service Agreement (the "Service Agreement") with the Seller whereby the Seller shall engage the Company to provide consulting services including patent litigation matters, sale, license involving the Seller's intellectual property and general consulting services to continue the Seller's business operations. The Company recorded the \$10,000 payment which was primarily attributable to property and equipment. Additionally, the Company assumed an office lease agreement that expired in July 2013.

On April 22, 2013, CyberFone Acquisition Corp. ("Acquisition Corp."), a Texas corporation and newly formed wholly owned subsidiary of the Company entered into a merger agreement (the "CyberFone Agreement") with CyberFone Systems LLC, a Texas limited liability company ("CyberFone Systems"), TechDev Holdings LLC ("TechDev") and The Spangenberg Family Foundation for the Benefit of Children's Healthcare and Education ("Spangenberg Foundation"). TechDev and Spangenberg Foundation owned 100% of the membership interests of CyberFone Systems

(collectively, the “CyberFone Sellers”) (see Note 3).

MARATHON PATENT GROUP, INC.
(FORMERLY AMERICAN STRATEGIC MINERALS CORPORATION)
(DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2013

Going Concern

The consolidated financial statements have been prepared on a going concern basis which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred losses since inception resulting in a deficit accumulated during the development stage of approximately \$9.4 million as of September 30, 2013, and negative cash flows from operating activities and net loss of approximately \$947,000 and \$2.4 million, respectively, for the nine months ended September 30, 2013. The Company anticipates further losses in the development of its business raising substantial doubt about the Company's ability to continue as a going concern. The ability to continue as a going concern is dependent upon the Company generating profitable operations in the future and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due. The ability to successfully resolve these factors raise substantial doubt about the Company's ability to continue as a going concern. The consolidated financial statements of the Company do not include any adjustments that may result from the outcome of these aforementioned uncertainties.

Based on current operating plans, the current resources of the Company, after taking into account the net funds received during the nine months ended September 30, 2013 from the sales and disposal of the remaining real estate properties and the sale of common stock of the Company, are expected to be sufficient for at least the next twelve months. The Company may choose to raise additional funds in connection with any future acquisition of additional intellectual property assets, operating businesses or other assets that it may choose to pursue. There can be no assurance, however, that any such opportunities will materialize. Moreover, any potential financing would likely be dilutive to the Company's stockholders.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation and Principles of Consolidation

The condensed consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States of America ("US GAAP") and present the financial statements of the Company and its wholly-owned subsidiaries. In the preparation of consolidated financial statements of the Company, intercompany transactions and balances were eliminated. All adjustments (consisting of normal recurring items) necessary to present fairly the Company's financial position as of September 30, 2013, and the results of operations and cash flows for the nine months ended September 30, 2013 have been included. The results of operations for the nine months ended September 30, 2013 are not necessarily indicative of the results to be expected for the full year. The accounting policies and procedures employed in the preparation of these condensed consolidated financial statements have been derived from the audited financial statements of the Company for the year ended December 31, 2012, which are contained in Form 10-K as filed with the Securities and Exchange Commission on March 28, 2013. The consolidated balance sheet as of December 31, 2012 was derived from those financial statements.

Development Stage Company

The Company is presented as a development stage company. Activities during the development stage include organizing the business, raising capital, enforcement and development of its intellectual property, and acquiring

additional intellectual property. The Company is a development stage company with insignificant revenues and no profits from its planned principal operations. The Company has not commenced significant operations and, in accordance with Accounting Standards Codification (“ASC”) Topic 915 “Development Stage Entities”, is considered a development stage company.

F-36

MARATHON PATENT GROUP, INC.
(FORMERLY AMERICAN STRATEGIC MINERALS CORPORATION)
(DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2013

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments and other short-term investments with maturity of three months or less, when purchased, to be cash equivalents. The Company maintains cash and cash equivalent balances at one financial institution that is insured by the Federal Deposit Insurance Corporation. The Company's account at this institution is insured by the Federal Deposit Insurance Corporation ("FDIC") up to \$250,000. For the nine months ended September 30, 2013, the Company has reached bank balances exceeding the FDIC insurance limit. To reduce its risk associated with the failure of such financial institution, the Company evaluates at least annually the rating of the financial institution in which it holds deposits.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates made by management include, but are not limited to, the assumptions used to calculate fair value of warrants and options granted, common stock issued for services, and common stock issued in connection with an option agreement and the valuation of mineral rights.

Accounts Receivable

The Company has a policy of reserving for questionable accounts based on its best estimate of the amount of probable credit losses in its existing accounts receivable. The Company periodically reviews its accounts receivable to determine whether an allowance is necessary based on an analysis of past due accounts and other factors that may indicate that the realization of an account may be in doubt. Account balances deemed to be uncollectible are charged to the bad debt expense after all means of collection have been exhausted and the potential for recovery is considered remote. At September 30, 2013 and 2012, there was no allowance for bad debt. Accounts receivable at September 30, 2013 and December 31, 2012, amounted to \$330,000 and \$0, respectively.

Concentration of Revenue and Geographic Area

Patent license revenue from enforcement activities is considered United States revenue as payments are for licenses for United States operations irrespective of the location of the licensee's or licensee's parent home domicile. As of September 30, 2013, three customers accounted for 100% of the Company's total accounts receivable. Revenues from five customers accounted for approximately 88% of the Company's revenues for the nine months ended September 30, 2013.

Revenue Recognition

The Company recognizes revenue in accordance with ASC Topic 605, "Revenue Recognition". Revenue is recognized when (i) persuasive evidence of an arrangement exists, (ii) all obligations have been substantially performed, (iii) amounts are fixed or determinable and (iv) collectability of amounts is reasonably assured.

The Company considers its licensing and enforcement activities as one unit of accounting under ASC 605-25, “Multiple-Element Arrangements” as the delivered items do not have value to customers on a standalone basis, there are no undelivered elements and there is no general right of return relative to the license. Under ASC 605-25, the appropriate recognition of revenue is determined for the combined deliverables as a single unit of accounting and revenue is recognized upon delivery of the final elements, including the license for past and future use and the release.

F-37

MARATHON PATENT GROUP, INC.
(FORMERLY AMERICAN STRATEGIC MINERALS CORPORATION)
(DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2013

Also due to the fact that the settlement element and license element for past and future use are the major central business, the Company does not present these two elements as different revenue streams in its statement of operations. The Company does not expect to provide licenses that do not provide some form of settlement or release. Revenues from patent enforcement activities accounted for 100% of the Company's revenues for the nine months ended September 30, 2013.

Cost of Revenue

Cost of revenues mainly includes expenses incurred in connection with the Company's patent enforcement activities, such as legal fees, consulting costs, patent maintenance, royalty fees for acquired patents and other related expenses. Cost of revenue does not include expenses related to product development, integration or support, as these are included in general and administrative expenses.

Prepaid Expenses

Prepaid expenses of \$321,025 and \$40,333 at September 30, 2013 and December 31, 2012, respectively, consist primarily of costs paid for future services which will occur within a year. Prepaid expenses include prepayments in cash and equity instruments for public relation services, business advisory, consulting and prepaid insurance which are being amortized over the terms of their respective agreements.

Marketable Securities

Marketable securities that the Company invests in publicly traded equity securities and are generally restricted for sale under Federal securities laws. The Company's policy is to liquidate securities received when market conditions are favorable for sale. Since these securities are often restricted, the Company is unable to liquidate them until the restriction is removed. Pursuant to ASC Topic 320, "Investments –Debt and Equity Securities" the Company's marketable securities have a readily determinable and active quoted price, such as from NASDAQ, NYSE Euronext, the Over the Counter Bulletin Board, and the OTC Markets Group.

Available for sale securities are carried at fair value, with changes in unrealized gains or losses are recognized as an element of comprehensive income based on changes in the fair value of the security. Once liquidated, realized gains or losses on the sale of marketable securities available for sale are reflected in the net income (loss) for the period in which the security was liquidated.

Related Party Transaction

Parties are considered to be related to the Company if the parties, directly or indirectly, through one or more intermediaries, control, are controlled by, or are under common control with the Company. Related parties also include principal owners of the Company, its management, members of the immediate families of principal owners of the Company and its management and other parties with which the Company may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests. The Company discloses all related party transactions.

Comprehensive Income

Accounting Standards Update (“ASU”) No. 2011-05 amends Financial Accounting Standards Board (“FASB”) Codification Topic 220 on comprehensive income (1) to eliminate the current option to present the components of other comprehensive income (loss) in the statement of changes in equity, and (2) to require presentation of net income (loss) and other comprehensive income (loss) (and their respective components) either in a single continuous statement or in two separate but consecutive statements. These amendments do not alter any current recognition or measurement requirements in respect of items of other comprehensive income. The amendments in this Update are to be applied prospectively.

Fair Value of Financial Instruments

The Company adopted FASB ASC 820, “Fair Value Measurements and Disclosures” (“ASC 820”), for assets and liabilities measured at fair value on a recurring basis. ASC 820 establishes a common definition for fair value to be applied to existing US GAAP that require the use of fair value measurements, establishes a framework for measuring fair value and expands disclosure about such fair value measurements. The adoption of ASC 820 did not have an impact on the Company’s financial position or operating results, but did expand certain disclosures. ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Additionally, ASC 820 requires the use of valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. These inputs are prioritized below:

- Level 1: Observable inputs such as quoted market prices in active markets for identical assets or liabilities
- Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data
- Level 3: Unobservable inputs for which there is little or no market data, which require the use of the reporting entity’s own assumptions.

Investment measured at fair value on a recurring basis at September 30, 2013:

	Fair Value Measurements Using:		
	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Marketable securities – available for sale, net of discount for effect of restriction	\$ -	\$ -	\$ 6,250

The Company classifies the investments in marketable securities available for sale as Level 3, adjusted for the effect of restriction. The securities are restricted and cannot be readily resold by the Company absent a registration of those

securities under the Securities Act of 1933, as amended (the “Securities Act”) or the availabilities of an exemption from the registration requirements under the Securities Act. As these securities are often restricted, the Company is unable to liquidate them until the restriction is removed. Unrealized gains or losses on marketable securities available for sale are recognized as an element of comprehensive income based on changes in the fair value of the security. Once liquidated, realized gains or losses on the sale of marketable securities available for sale are reflected in our net income for the period in which the security was liquidated.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2013

The carrying amounts reported in the balance sheet for cash, accounts receivable, prepaid expenses, accounts payable, and accrued expenses, approximate their estimated fair market value based on the short-term maturity of this instrument.

In addition, FASB ASC 825-10-25 "Fair Value Option" was effective for January 1, 2008. ASC 825-10-25 expands opportunities to use fair value measurements in financial reporting and permits entities to choose to measure many financial instruments and certain other items at fair value.

Income Taxes

The Company accounts for income taxes pursuant to the provision of ASC 740-10, "Accounting for Income Taxes" which requires, among other things, an asset and liability approach to calculating deferred income taxes. The asset and liability approach requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. A valuation allowance is provided to offset any net deferred tax assets for which management believes it is more likely than not that the net deferred asset will not be realized.

The Company follows the provision of the ASC 740-10 related to Accounting for Uncertain Income Tax Position. When tax returns are filed, it is highly certain that some positions taken would be situated upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. In accordance with the guidance of ASC 740-10, the benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is most likely that not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions.

Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above should be reflected as a liability for uncertain tax benefits in the accompanying balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination. The Company believes its tax positions are all highly certain of being upheld upon examination. As such, the Company has not recorded a liability for uncertain tax benefits.

The Company has adopted ASC 740-10-25 Definition of Settlement, which provides guidance on how an entity should determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits and provides that a tax position can be effectively settled upon the completion and examination by a taxing authority without being legally extinguished. For tax position considered effectively settled, an entity would recognize the full amount of tax benefit, even if the tax position is not considered more likely that not to be sustained based solely on the basis of its technical merits and the statute of limitations remains open. The federal and state income tax returns of the Company are subject to examination by the Internal Revenue Service and state taxing authorities, generally for three years after they were filed.

Basic and Diluted Net Loss per Share

Net loss per common share is calculated in accordance with ASC Topic 260: Earnings Per Share (“ASC 260”). Basic loss per share is computed by dividing net loss by the weighted average number of shares of common stock outstanding during the period. The computation of diluted net loss per share does not include dilutive common stock equivalents in the weighted average shares outstanding as they would be anti-dilutive. The Company has 842,307 post-split options and 708,620 post-split warrants outstanding at September 30, 2013 and was excluded from the computation of diluted shares outstanding as they would have had an anti-dilutive impact on the Company’s net loss.

Intangible Assets

Intangible assets include patents purchased and recorded based on the cost to acquire them. These assets are amortized over their remaining estimated useful lives. Useful lives of intangible assets are periodically evaluated for reasonableness and the assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may no longer be recoverable.

Goodwill and Other Intangible Assets

In accordance with ASC 350-30-65, "Intangibles - Goodwill and Others", the Company assesses the impairment of identifiable intangibles whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors the Company considers to be important which could trigger an impairment review include the following:

1. Significant underperformance relative to expected historical or projected future operating results;
2. Significant changes in the manner of use of the acquired assets or the strategy for the overall business; and
3. Significant negative industry or economic trends.

When the Company determines that the carrying value of intangibles may not be recoverable based upon the existence of one or more of the above indicators of impairment and the carrying value of the asset cannot be recovered from projected undiscounted cash flows, the Company records an impairment charge.

The Company measures any impairment based on a projected discounted cash flow method using a discount rate determined by management to be commensurate with the risk inherent in the current business model. Significant management judgment is required in determining whether an indicator of impairment exists and in projecting cash flows.

Impairment of Long-lived Assets

The Company accounts for the impairment or disposal of long-lived assets according to the ASC 360 “Property, Plant and Equipment”. The Company continually monitors events and changes in circumstances that could indicate that the carrying amounts of long-lived assets, including mineral rights, may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the estimated future net undiscounted cash flows expected to be generated by the asset. When necessary, impaired assets are written down to estimated fair value based on the best information available. Estimated fair value is generally based on either appraised value or measured by discounting estimated future cash flows. Considerable management judgment is necessary to estimate discounted future cash flows. Accordingly, actual results could vary significantly from such estimates. The Company recognizes an impairment loss when the sum of expected undiscounted future cash flows is less than the carrying amount of the asset. The Company recorded impairment charges on its long-lived assets of \$0 and \$1,256,000 during the nine months ended September 30, 2013 and 2012, respectively, and was included in loss from discontinued operations.

Stock-based Compensation

Stock-based compensation is accounted for based on the requirements of the Share-Based Payment Topic of ASC 718 which requires recognition in the consolidated financial statements of the cost of employee and director services received in exchange for an award of equity instruments over the period the employee or director is required to perform the services in exchange for the award (presumptively, the vesting period). The ASC also requires measurement of the cost of employee and director services received in exchange for an award based on the grant-date fair value of the award.

Pursuant to ASC Topic 505-50, for share-based payments to consultants and other third-parties, compensation expense is determined at the “measurement date.” The expense is recognized over the vesting period of the award. Until the measurement date is reached, the total amount of compensation expense remains uncertain. The Company initially records compensation expense based on the fair value of the award at the reporting date.

Mineral Property Acquisition and Exploration Costs

Costs of lease, exploration, carrying and retaining unproven mineral lease properties were expensed as incurred. The Company expensed all mineral exploration costs as incurred. Such expenses are included in the loss from discontinued operations and prior periods have been restated in the Company’s financial statements and related footnotes to conform to this presentation. In June 2012, the Company decided to discontinue its exploration stage gold and minerals business and currently does not hold any unpatented mining claims.

Recent Accounting Pronouncements

In April 2013, the FASB ASU 2013-07, “Presentation of Financial Statements: Topic Liquidation Basis of Accounting”. ASU 2013-07 requires an entity to prepare its financial statements using the liquidation basis of accounting when liquidation is imminent. Liquidation is considered imminent when the likelihood is remote that the organization will return from liquidation and either: (a) a plan for liquidation is approved by the person or persons with the authority to

make such a plan effective and the likelihood is remote that the execution of the plan will be blocked by other parties; or (b) a plan for liquidation is being imposed by other forces. ASU 2013-07 will be effective for the Company beginning on January 1, 2014. The Company does not expect the adoption of ASU 2013-07 to have a material impact on its financial position, results of operations nor cash flows.

In July 2013, the FASB issued ASU 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." ASU 2013-11 is effective for fiscal years beginning after December 15, 2013. The adoption of ASU 2013-11 is not expected to have a material impact on the Company's consolidated financial statements.

There were other updates recently issued, most of which represented technical corrections to the accounting literature or application to specific industries and are not expected to have a material impact on the Company's financial position, results of operations or cash flows.

NOTE 3 – ACQUISITION

On April 22, 2013, Acquisition Corp., a Texas corporation and newly formed wholly owned subsidiary of the Company entered into a merger agreement with CyberFone Systems, TechDev and Spangenberg Foundation. TechDev and Spangenberg Foundation owned 100% of the membership interests of CyberFone Systems.

CyberFone Systems owns a foundational patent portfolio that includes claims that provide specific transactional data processing, telecommunications, network and database inventions, including financial transactions. The portfolio, which has a large and established licensing base, consists of ten United States patents and 27 foreign patents and one patent pending. The patent rights that cover digital communications and data transaction processing are foundational to certain applications in the wireless, telecommunications, financial and other industries. IP Navigation Group LLC ("IP Nav"), a Company founded by Erich Spangenberg and associated with the CyberFone Sellers will continue to support and manage the portfolio of patents and retain a contingent participation interest in all recoveries. IP Nav provides patent monetization and support services under an existing agreement with CyberFone Systems.

Pursuant to the terms of the CyberFone Merger Agreement, CyberFone Systems merged with and into Acquisition Corp with CyberFone Systems surviving the merger as the wholly owned subsidiary of the Company (the "Merger"). The Company (i) issued 461,538 post-split (6,000,000 pre-split) shares of common stock to the CyberFone Sellers (the "Merger Shares"), (ii) paid the CyberFone Sellers \$500,000 cash and (iii) issued a \$500,000 promissory note to TechDev (the "Note"). The Company valued these common shares at the fair market value on the date of grant at \$4.94 post-split (\$0.38 pre-split) per share or \$2,280,000. The Note was non-interest bearing and was due on June 22, 2013, subject to acceleration in the event of default. The Company may prepay the Note at any time without premium or penalty. On June 21, 2013, we paid \$500,000 to TechDev in satisfaction of the note. The transaction resulted in a business combination and caused CyberFone Systems to become a wholly-owned subsidiary of the Company.

In addition to the payments described above, within 30 days following the end of each calendar quarter (commencing with the first full calendar quarter following the calendar quarter in which CyberFone Systems recovers \$4 million from licensing or enforcement activities related to the patents), CyberFone Systems will be required to pay out a certain percentage of such recoveries.

The Company accounted for the acquisition utilizing the purchase method of accounting in accordance with ASC 805 "Business Combinations". The Company is the acquirer for accounting purposes and CyberFone Systems is the acquired

company. Accordingly, the Company applied push-down accounting and adjusted to fair value all of the assets and liabilities directly on the financial statements of the subsidiary.

Real estate held for sale

Real estate held for sale consisted of residential properties located in Southern California. Real estate held for sale was initially recorded at the lower of cost or estimated fair market value less the estimated cost to sell. After acquisition, costs incurred relating to the development and improvements of property are capitalized to the extent they do not cause the recorded value to exceed the net realizable value, whereas costs relating to holding and disposition of the property are expensed as incurred. After acquisition, real estate held for sale was analyzed periodically for changes in fair values and any subsequent write down is charged to impairment losses on real estate properties. Whenever events or changes in circumstances suggest that the carrying amount may not be recoverable, management assessed the recoverability of its real estate by comparing the carrying amount with its fair value. The process involved in the determination of fair value requires estimates as to future events and market conditions. This estimation process may assume that the Company has the ability to dispose of its real estate properties in the ordinary course of business based on management's present plans and intentions. If management determines that the carrying value of a specific real estate investment is impaired, a write-down is recorded as a charge to current period operations. The evaluation process was based on estimates and assumptions and the ultimate outcome may be different.

The Company determined that the carrying value of the remaining real estate properties do not exceed the net realizable value and thus did not consider it necessary to record any impairment charges of real estate held for sale at September 30, 2013. The Company sold all the remaining real estate properties generating gross profit of \$206,596 during the nine months ended September 30, 2013 and is included in income (loss) from discontinued operations. As

of September 30, 2013 and December 31, 2012, real estate held for sale which includes capitalized improvements amounted to \$0 and \$1,035,570, respectively, and were included in assets of discontinued operations – long term.

Item 14. Indemnification of Directors and Officers.

Neither our articles of incorporation nor bylaws prevent us from indemnifying our officers, directors and agents to the extent permitted under the Nevada Revised Statute (“NRS”). NRS Section 78.7502, provides that a corporation may indemnify any director, officer, employee or agent of a corporation against expenses, including attorneys’ fees, actually and reasonably incurred by him in connection with any defense to the extent that a director, officer, employee or agent of a corporation has been successful on the merits or otherwise in defense of any action, suit or proceeding referred to Section 78.7502(1) or 78.7502(2), or in defense of any claim, issue or matter therein.

NRS 78.7502(1) provides that a corporation may indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, except an action by or in the right of the corporation, by reason of the fact that he is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses, including attorneys’ fees, judgments, fines and amounts paid in settlement actually and reasonably incurred by him in connection with the action, suit or proceeding if he: (a) is not liable pursuant to NRS 78.138; or (b) acted in good faith and in a manner which he reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his conduct was unlawful.

NRS Section 78.7502(2) provides that a corporation may indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of the corporation to procure a judgment in its favor by reason of the fact that he is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses, including amounts paid in settlement and attorneys’ fees actually and reasonably incurred by him in connection with the defense or settlement of the action or suit if he: (a) is not liable pursuant to NRS 78.138; or (b) acted in good faith and in a manner which he reasonably believed to be in or not opposed to the best interests of the corporation. Indemnification may not be made for any claim, issue or matter as to which such a person has been adjudged by a court of competent jurisdiction, after exhaustion of all appeals there from, to be liable to the corporation or for amounts paid in settlement to the corporation, unless and only to the extent that the court in which the action or suit was brought or other court of competent jurisdiction determines upon application that in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for such expenses as the court deems proper.

II-1

NRS Section 78.747 provides that except as otherwise provided by specific statute, no director or officer of a corporation is individually liable for a debt or liability of the corporation, unless the director or officer acts as the alter ego of the corporation. The court as a matter of law must determine the question of whether a director or officer acts as the alter ego of a corporation.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers or persons controlling us pursuant to the foregoing provisions, we have been informed that, in the opinion of the Securities and Exchange Commission, such indemnification is against public policy as expressed in the Securities Act and is therefore unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, we will, unless in the opinion of our counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by us is against public policy as expressed hereby in the Securities Act and we will be governed by the final adjudication of such issue.

Item 15. Recent Sales of Unregistered Securities.

Item 17. Undertakings.

The undersigned registrant hereby undertakes:

(1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

- (i) To include any prospectus required by Section 10(a)(3) of the Securities Act;
- (ii) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Securities and Exchange Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20 percent change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement; and
- (iii) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement.

(2) That, for the purpose of determining any liability under the Securities Act, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of the securities at that time shall be deemed to be the initial bona fide offering thereof.

(3) To remove from registration by means of a post-effective amendment any of the securities being registered that remain unsold at the termination of the offering.

(4) That, for the purpose of determining liability of the undersigned registrant under the Securities Act to any purchaser in the initial distribution of the securities:

The undersigned registrant undertakes that in a primary offering of securities of the undersigned registrant pursuant to this registration statement, regardless of the underwriting method used to sell the securities to the purchaser, if the securities are offered or sold to such purchaser by means of any of the following communications, the undersigned registrant will be a seller to the purchaser and will be considered to offer or sell such securities to such purchaser:

- (i)

Any preliminary prospectus or prospectus of the undersigned registrant relating to the offering required to be filed pursuant to Rule 424 (§ 230.424 of this chapter);

- (ii) Any free writing prospectus relating to the offering prepared by or on behalf of the undersigned registrant or used or referred to by the undersigned registrant;
- (iii) The portion of any other free writing prospectus relating to the offering containing material information about the undersigned registrant or its securities provided by or on behalf of the undersigned registrant; and
- (iv) Any other communication that is an offer in the offering made by the undersigned registrant to the purchaser.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable.

In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of such issue.

For the purpose of determining liability under the Securities Act to any purchaser, each prospectus filed pursuant to Rule 424(b) as part of a registration statement relating to an offering, other than registration statements relying on Rule 430B or other than prospectuses filed in reliance on Rule 430A (§ 230.430A of this chapter), shall be deemed to be part of and included in the registration statement as of the date it is first used after effectiveness. Provided, however, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such first use, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use.
