NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

NOTE 1 BASIS OF PRESENTATION

The interim Condensed Consolidated Financial Statements (“interim statements”) of Newmont Mining Corporation and its subsidiaries (collectively, “Newmont” or the “Company”) are unaudited. In the opinion of management, all adjustments and disclosures necessary for a fair presentation of these interim statements have been included. The results reported in these interim statements are not necessarily indicative of the results that may be reported for the entire year. These interim statements should be read in conjunction with Newmont’s Consolidated Financial Statements for the year ended December 31, 2013 filed on June 13, 2014 on Form 8-K. The year-end balance sheet data was derived from the audited financial statements and, in accordance with the instructions to Form 10-Q, certain information and footnote disclosures required by United States generally accepted accounting principles (“GAAP”) have been condensed or omitted. References to “A\$” refer to Australian currency, “C\$” to Canadian currency and “NZ\$” to New Zealand currency.

On February 18, 2014 the Company redeemed all outstanding exchangeable shares (other than those held by Newmont and its affiliates). On the date of the redemption, holders of exchangeable shares received, in exchange for each exchangeable share, one share of common stock of Newmont. At December 31, 2013, the value of the remaining outstanding exchangeable shares was included in Additional paid-in capital and Common shares.

Certain amounts in prior years have been reclassified to conform to the 2014 presentation.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Risks and Uncertainties

As a global mining company, our revenue, profitability and future rate of growth are substantially dependent on prevailing prices for gold, copper and, to a lesser extent, silver. Historically, the commodity markets have been very volatile, and there can be no assurance that commodity prices will not be subject to wide fluctuations in the future. A substantial or extended decline in commodity prices could have a material adverse effect on our financial position, results of operations, cash flows, access to capital and on the quantities of reserves that we can economically produce. The carrying value of our property, plant and mine development assets, inventories, stockpiles and ore on leach pads, and deferred tax assets are particularly sensitive to the outlook for commodity prices. A decline in our long term price outlook from current levels could result in material impairment charges related to these assets.

In September 2014, PT Newmont Nusa Tenggara (“PTNNT”) and the Government of Indonesia signed a Memorandum of Understanding (“MoU”) that resulted in PTNNT receiving a six-month permit to export copper concentrate. Effective with the signing of the MoU, PTNNT agreed to pay export duties set forth in a new regulation issued in July 2014, provide a \$25 surety bond to demonstrate its support for smelter development, and pay royalties of 4 percent for copper, 3.75 percent for gold, and 3.25 percent for silver. On July 25, 2014, the Minister of Finance revised its

January 2014 regulations to reduce export duties on copper concentrate providing for export duties on copper concentrate to reduce as smelter development progresses, with duties initially at 7.5 percent, then declining to 5 percent when development progress exceeds 7.5 percent and finally to 0 percent when smelter progress exceeds 30 percent. The MoU also outlines terms for the six main elements of the Contract of Work renegotiation, which will be incorporated into an amendment of the Contract of Work. The six areas are: concession area size; royalties, taxes and export duties; domestic processing and refining; ownership divestment; utilization of local manpower, domestic goods and services; and duration of the Contract of Work. Negotiations between PTNNT and the Government of Indonesia to amend the Contract of Work remain on-going. No assurances can be made at this time with respect to the outcome of such negotiations. Future amendments to the Contract of Work and/or failure to successfully renegotiate the Contract of Work prior to the expiration of the export permit may negatively impact future operations and financial results at Batu Hijau.

As a result of the on-going Contract of Work renegotiations at Batu Hijau, we have evaluated, and will continue to evaluate, the need for asset impairments, inventory write-downs, tax valuation allowances and other applicable accounting charges due to the status of the mine.

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Recently Adopted Accounting Pronouncements

Discontinued Operations

In April 2014, FASB Accounting Standards Codification (“ASC”) guidance was issued related to Discontinued Operations which changed the criteria for determining which disposals can be presented as discontinued operations and modified related disclosure requirements. The updated guidance requires an entity to only classify discontinued operations due to a major strategic shift or a major effect on an entity’s operations in the financial statements. The updated guidance will also require additional disclosures relating to discontinued operations. The Company early adopted this guidance prospectively at the beginning of fiscal year January 1, 2014. Adoption of the new guidance did not have an impact on the consolidated financial position, results of operations or cash flows.

Presentation of an Unrecognized Tax Benefit

In July 2013, ASC guidance was issued related to the presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss or a tax credit carryforward exists. The updated guidance requires an entity to net its unrecognized tax benefits against its jurisdictional deferred tax assets related to net operating loss carryforward, a similar tax loss, or tax credit carryforwards. A gross presentation will be required only if such carryforwards are not available or would not be used by the entity to settle any additional income taxes resulting from disallowance of the uncertain tax position. Adoption of the new guidance, effective for the fiscal year beginning January 1, 2014, had no impact on the consolidated financial position, results of operations or cash flows.

Foreign Currency Matters

In March 2013, ASC guidance was issued related to foreign currency matters to clarify the treatment of cumulative translation adjustments when a parent sells a part or all of its investment in a foreign entity or no longer holds a controlling financial interest in a subsidiary or group of assets that is a business within a foreign entity. The updated guidance also resolves the diversity in practice for the treatment of business combinations achieved in stages in a foreign entity. Adoption of the new guidance, effective for the fiscal year beginning January 1, 2014, had no impact on the consolidated financial position, results of operations or cash flows.

Recently Issued Accounting Pronouncements

Stock based compensation

In June 2014, ASU guidance was issued to resolve the diversity of practice relating to the accounting for stock based performance awards that the performance target could be achieved after the employee completes the required service period. The update is effective prospectively or retrospectively beginning January 1, 2015. The Company does not expect the updated guidance to have an impact on the consolidated financial position, results of operations or cash flows.

Revenue Recognition

In May 2014, ASU guidance was issued related to revenue from contracts with customers. The new standard provides a five-step approach to be applied to all contracts with customers and also requires expanded disclosures about revenue recognition. The ASU is effective for annual reporting periods beginning after December 15, 2016, including interim periods and is to be retrospectively applied. Early adoption is not permitted. The Company is currently evaluating this guidance and the impact it will have on its consolidated financial statements.

(dollars in millions, except per share, per ounce and per pound amounts)

NOTE 3 SEGMENT INFORMATION

The Company's reportable segments are based upon the Company's management structure that is focused on the geographic region for the Company's operations. Geographic regions include North America, South America, Australia/New Zealand, Indonesia, Africa and Corporate and Other. Segment results for 2013 have been retrospectively revised to reflect a change in our reportable segments to align with a change in the chief operating decision makers' evaluation of the organization, effective in the first quarter of 2014. The Nevada operations have been revised to reflect Carlin, Phoenix, and Twin Creeks segments and Other Australia/New Zealand operations have been revised to reflect Tanami, Jundee, Waihi and Kalgoorlie segments. The Conga development project will be reported in the Other South America segment. The Nimba and Merian development projects, historically reported in Other Africa and Other South America, respectively, will be reported in Corporate and Other. The financial information relating to the Company's segments for all periods presented have been updated to reflect these changes.

On July 1, 2014, the Company completed the sale of its Jundee underground gold mine in Australia to Northern Star Resources Limited for total cash proceeds of \$94.

On October 6, 2014, the Company completed the sale of its 44% interest in La Herradura to Fresnillo plc for total cash proceeds of \$450. At September 30, 2014, total assets and total liabilities were \$520 and \$133, respectively.

(dollars in millions, except per share, per ounce and per pound amounts)

NOTE 4 RECLAMATION AND REMEDIATION

The Company's Reclamation and remediation expense consisted of:

	Three Months Ended September 30, 2014		Nine Months Ended September 30, 2013	
Reclamation	\$-	\$ 3	\$-	\$ 3
Accretion - operating	18	15	54	45
Accretion - non-operating	2	2	7	8
	\$20	\$ 20	\$61	\$ 56

At September 30, 2014 and December 31, 2013, \$1,427 and \$1,432, respectively, were accrued for reclamation obligations relating to operating properties. In addition, the Company is involved in several matters concerning environmental obligations associated with former, primarily historic, mining activities. Generally, these matters concern developing and implementing remediation plans at the various sites involved. At September 30, 2014 and December 31, 2013, \$152 and \$179, respectively, were accrued for such obligations. These amounts are also included in Reclamation and remediation liabilities.

The following is a reconciliation of Reclamation and remediation liabilities:

	Nine Months Ended September 30, 2014		2013	
Balance at beginning of period	\$1,611	\$1,539		
Additions, changes in estimates and other	(2)	1		
Liabilities settled	(91)	(41)		
Accretion expense	61	53		
Balance at end of period	\$1,579	\$1,552		

The current portion of Reclamation and remediation liabilities of \$84 and \$98 at September 30, 2014 and December 31, 2013, respectively, are included in Other current liabilities (see Note 21).

NOTE 5 WRITE-DOWNS

	Three Months Ended		Nine Months Ended	
	September 30, 2014	2013	September 30, 2014	2013
Property, plant and mine development				
Carlin	\$ 3	\$ -	\$3	\$-
Phoenix	2	-	2	-
Yanacocha	-	2	-	3
Other South America	-	-	13	-
Boddington	-	-	-	2,107
Tanami	-	1	-	67
Batu Hijau	-	-	-	1
	5	3	18	2,178
Other long-term assets				
Boddington	-	-	-	31
Tanami	-	-	-	56
	-	-	-	87
	\$ 5	\$ 3	\$18	\$2,265

The 2014 year-to-date write-downs are primarily related to non-essential equipment in Carlin, Phoenix and Other South America, specifically for certain assets at Conga that have been sold. The 2013 write-downs were primarily related to Boddington and Tanami and caused by an interim impairment assessment necessitated by a decrease in the Company's long-term gold and copper price assumptions during the second quarter to \$1,400 per ounce and \$3.00 per pound, respectively, and rising operating costs.

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

Goodwill was included in the interim impairment assessment, due to the above conditions in 2013. As a result, the Company recorded an impairment of \$56 at Tanami.

NOTE 8 INCOME AND MINING TAXES

The Company's income and mining tax expense differed from the amounts computed by applying the United States statutory corporate income tax rate for the following reasons:

	Three Months Ended		Nine Months Ended	
	September 30, 2014	2013	September 30, 2014	2013
Income (loss) before income and mining				
tax and other items	\$25	\$575	\$260	\$(1,516)
Tax at statutory rate	35 % \$9	35 % \$201	35 % \$91	35 % \$(531)
Reconciling items:				
Percentage depletion	(152)% (38)	(1)% (6)	(25)% (66)	7 % (99)
Change in valuation allowance on				
deferred tax assets	(124)% (31)	1 % 7	(36)% (93)	(46)% 698
Tax planning on sale of Canadian Oil Sands and				
Canadian capital gains tax rate	-	(11)% (61)	-	4 % (61)
Mining and other taxes	24 % 6	2 % 11	5 % 14	(3)% 47
Disallowed loss on Midas Sale	-	-	5 % 13	-
Tax impact on Jundee Sale	32 % 8	-	3 % 8	-
Effect of foreign earnings, net of credits	-	2 % 9	3 % 8	(3)% 48
Other	(3)% (1)	-	1 % 3	3 % (48)
Income and mining tax expense (benefit)	(188)% \$(47)	28 % \$161	(9)% \$(22)	(3)% \$54

A valuation allowance is provided for those deferred tax assets for which it is more likely than not that the related benefits will not be realized. In determining the amount of the valuation allowance, each quarter the Company considers future reversals of existing taxable temporary differences, estimated future taxable income, taxable income in prior carryback year(s), as well as feasible tax planning strategies in each jurisdiction to determine if the deferred tax assets are realizable. If it is determined that the Company will not realize all or a portion of its deferred tax assets, it will place or increase a valuation allowance. Conversely, if determined that it will ultimately be able to realize all or a portion of the related benefits for which a valuation allowance has been provided, all or a portion of the related valuation allowance will be reduced. There are a number of risk factors that could impact the Company's ability to realize the deferred tax assets. See Note 2, Summary of Significant Accounting Policies, Risks and Uncertainties.

The Company operates in numerous countries around the world and accordingly it is subject to, and pays annual income taxes under, the various income tax regimes in the countries in which it operates. Some of these tax regimes are defined by contractual agreements with the local government, and others are defined by the general corporate income tax laws of the country. The Company has historically filed, and continues to file, all required income tax returns and pay the income taxes reasonably determined to be due. The tax rules and regulations in many countries are highly complex and subject to interpretation. From time to time the Company is subject to a review of its historic income tax filings and in connection with such reviews, disputes can arise with the taxing authorities over the interpretation or application of certain rules to the Company's business conducted within the country involved.

At September 30, 2014, the Company's total unrecognized tax benefit was \$460 for uncertain income tax positions taken or expected to be taken on income tax returns. Of this, \$58 represents the amount of unrecognized tax benefits that, if recognized, would affect the Company's effective income tax rate.

As a result of the statute of limitations that expire in the next 12 months in various jurisdictions, and possible settlements of audit-related issues with taxing authorities in various jurisdictions with respect to which none of the issues are individually significant, the Company believes that it is reasonably possible that the total amount of its net unrecognized income tax benefits will decrease by approximately \$65 to \$70 in the next 12 months.

NOTE 9 DISCONTINUED OPERATIONS

Discontinued operations includes a retained royalty obligation ("Holt") from Holloway Mining Company. Holloway Mining Company, which owned the Holt-McDermott property, was sold to St. Andrew Goldfields Ltd. ("St. Andrew") in 2006. The Company

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

records adjustments based on short and long-term gold prices, discount rate assumptions and resource estimates published by St. Andrew.

During the third quarter and first nine months of 2014, the Company recorded a benefit of \$3 and a charge of \$16, net of tax expense of \$2 and benefit of \$7, respectively. During the third quarter and first nine months of 2013, the Company recorded a charge of \$21 and a benefit of \$53, net of tax benefit of \$10 and expense of \$24, respectively.

Net operating cash used in discontinued operations of \$10 and \$14 in the first nine months of 2014 and 2013 respectively relates to payments on the Holt property royalty.

NOTE 10 NET INCOME (LOSS) ATTRIBUTABLE TO NONCONTROLLING INTERESTS

	Three Months Ended		Nine Months Ended	
	September		September 30,	
	2014	2013	2014	2013
Minera Yanacocha	\$(6)	\$5	\$(55)	\$86
Batu Hijau	(125)	(10)	(158)	(251)
TMAC	(11)	(3)	(18)	(17)
Other	4	4	6	6
	\$(138)	\$(4)	\$(225)	\$(176)

Newmont has a 51.35% ownership interest in Minera Yanacocha S.R.L. (“Yanacocha”), with the remaining interests held by Compañia de Minas Buenaventura, S.A.A. (43.65%) and the International Finance Corporation (5%).

Newmont has a 48.5% effective economic interest in PT Newmont Nusa Tenggara (“PTNNT”) with remaining interests held by an affiliate of Sumitomo Corporation of Japan and various Indonesian entities. PTNNT operates the Batu Hijau copper and gold mine in Indonesia.

Newmont’s economic ownership interest in TMAC was reduced to 45.2% from 70.4% in April 2014 due to TMAC’s private placement to raise funds. The remaining interests are held by TMAC management and various outside investors.

Based on ASC guidance for variable interest entities, Newmont consolidates PTNNT and TMAC in its condensed consolidated financial statements.

(dollars in millions, except per share, per ounce and per pound amounts)

NOTE 11 INCOME PER COMMON SHARE

Basic income per common share is computed by dividing income available to Newmont common stockholders by the weighted average number of common shares outstanding during the period. Diluted income per common share is computed similarly except that weighted average common shares is increased to reflect all dilutive instruments.

	Three Months Ended		Nine Months Ended	
	September 30, 2014	2013	September 30, 2014	2013
Net income (loss) attributable to Newmont stockholders				
Continuing operations	\$210	\$419	\$509	\$(1,400)
Discontinued operations	3	(21)	(16)	53
	\$213	\$398	\$493	\$(1,347)
Weighted average common shares (millions):				
Basic	499	498	499	497
Effect of employee stock-based awards	1	-	-	-
Diluted	500	498	499	497
Income (loss) per common share				
Basic:				
Continuing operations	\$0.42	\$0.84	\$1.02	\$(2.82)
Discontinued operations	0.01	(0.04)	(0.03)	0.11
	\$0.43	\$0.80	\$0.99	\$(2.71)
Diluted:				
Continuing operations	\$0.42	\$0.84	\$1.02	\$(2.82)
Discontinued operations	0.01	(0.04)	(0.03)	0.11
	\$0.43	\$0.80	\$0.99	\$(2.71)

Options to purchase 3 million and 3 million shares of common stock at average exercise prices of \$48 and \$48 were outstanding at September 30, 2014 and 2013, respectively, but were not included in the computation of diluted weighted average common shares because their exercise prices exceeded the average price of the Company's common stock for the respective periods presented.

Other outstanding options to purchase 1 million shares of common stock were not included in the computation of diluted weighted average common shares in the first nine months of 2013 because their effect would have been anti-dilutive.

Newmont is required to settle the principal amount of its 2017 Convertible Senior Note in cash and may elect to settle the remaining conversion premium (average share price in excess of the conversion price), if any, in cash, shares or a combination thereof. The 2014 Convertible Senior Note was settled in July of 2014. The effect of contingently convertible instruments on diluted earnings per share is calculated under the net share settlement method in accordance with ASC guidance. The conversion price exceeded the Company's share price for the periods presented, therefore no additional shares were included in the computation of diluted weighted average common shares.

NOTE 14 FAIR VALUE ACCOUNTING

The following table sets forth the Company's assets and liabilities measured at fair value on a recurring basis (at least annually) by level within the fair value hierarchy. As required by accounting guidance, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

	Fair Value at September 30, 2014			
	Total	Level 1	Level 2	Level 3
Assets:				
Cash equivalents	\$ 1,103	\$ 1,103	\$ -	\$ -
Marketable equity securities:				
Extractive industries	217	217	-	-
Other	17	17	-	-
Marketable debt securities:				
Asset backed commercial paper	24	-	-	24
Auction rate securities	6	-	-	6
Trade receivable from provisional copper and gold concentrate sales, net	93	93	-	-
	\$ 1,460	\$ 1,430	\$ -	\$ 30
Liabilities:				
Derivative instruments, net:				
Foreign exchange forward contracts	\$ 70	\$ -	\$ 70	\$ -
Diesel forward contracts	6	-	6	-
Boddington contingent consideration	10	-	-	10
Holt property royalty	147	-	-	147
	\$ 233	\$ -	\$ 76	\$ 157

The fair values of the derivative instruments in the table above are presented on a net basis. The gross amounts related to the fair value of the derivatives instruments above are included in the Derivatives Instruments Note (see Note 15). All other Fair Value disclosures in the above table are presented on a gross basis.

The following table sets forth a summary of the quantitative and qualitative information related to the unobservable inputs used in the calculation of the Company's Level 3 financial assets and liabilities at September 30, 2014:

Edgar Filing: NEWMONT MINING CORP /DE/ - Form 10-Q

Description	At September 30, 2014	Valuation technique	Unobservable input	Range/Weighted average	
Auction Rate Securities	\$ 6	Discounted cash flow	Weighted average recoverability rate	80	%
Asset Backed Commercial Paper	24	Discounted cash flow	Recoverability rate	90	%
Boddington Contingent Consideration	10	Monte Carlo	Discount rate	5	%
			Long Term Gold price	\$ 1,300	
			Long Term Copper price	\$ 3.00	
Holt property royalty	147	Monte Carlo	Weighted average discount rate	4	%
			Long Term Gold price	\$ 1,300	

18

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

The following table sets forth a summary of changes in the fair value of the Company's Level 3 financial assets and liabilities at September 30, 2014:

	Auction Rate	Asset Backed Commercial Paper	Total Assets	Boddington Contingent Royalty	Holt Property Royalty	Total Liabilities
Balance at beginning of period	\$ 5	\$ 25	\$ 30	\$ 10	\$ 134	\$ 144
Settlements	-	-	-	-	(10)	(10)
Revaluation	1	(1)	-	-	23	23
Balance at end of period	\$ 6	\$ 24	\$ 30	\$ 10	\$ 147	\$ 157

At September 30, 2014, assets and liabilities classified within Level 3 of the fair value hierarchy represent 2% and 67%, respectively, of total assets and liabilities measured at fair value.

NOTE 15 DERIVATIVE INSTRUMENTS

The Company's strategy is to provide shareholders with leverage to changes in gold and copper prices by selling its production at spot market prices. Consequently, the Company does not hedge its gold and copper sales. The Company continues to manage certain risks associated with commodity input costs, interest rates and foreign currencies using the derivative market. All of the derivative instruments described below were transacted for risk management purposes and qualify as cash flow hedges.

Cash Flow Hedges

The foreign currency and diesel contracts are designated as cash flow hedges, and as such, the effective portion of unrealized changes in market value have been recorded in Accumulated other comprehensive income (loss) and are reclassified to income during the period in which the hedged transaction affects earnings. Gains and losses from hedge ineffectiveness are recognized in current earnings.

Foreign Currency Contracts

Newmont had the following foreign currency derivative contracts outstanding at September 30, 2014:

	Expected Maturity Date					Total/Average
	2014	2015	2016	2017	2018	
A\$ Operating Fixed Forward Contracts:						
A\$ notional (millions)	75	270	158	105	6	614

comprehensive income into income (loss)						
(effective portion) ⁽¹⁾	\$ 31	\$ 68	\$ -	\$ 1	\$ (14)	\$ (14)

⁽¹⁾The gain (loss) recognized for the effective portion of cash flow hedges is included in Cost applicable to sales, Write-downs and Interest expense, net.

Based on fair values at September 30, 2014 the amount to be reclassified from Accumulated other comprehensive income (loss), net of tax to income for derivative instruments during the next 12 months is a gain of approximately \$5.

Provisional Copper and Gold Sales

The Company's provisional copper and gold sales contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of the gold and copper concentrates at the prevailing indices' prices at the time of sale. The embedded derivative, which does not qualify for hedge accounting, is marked to market through earnings each period prior to final settlement.

The Company recorded an average price of \$3.13 per pound before mark-to-market adjustments and treatment and refining charges during the three and nine months ended September 30, 2014. During this same period, changes in copper prices resulted in a provisional pricing mark-to-market loss of \$4 (\$0.08 per pound) and loss of \$15 (\$0.11 per pound), respectively. At September 30, 2014, Newmont had copper sales of 59 million pounds priced at an average of

\$3.04 per pound, subject to final pricing over the next several months.

The Company recorded an average price of \$1,280 and \$1,286 per ounce before mark-to-market adjustments and treatment and refining charges during the three and nine months ended September 30, 2014. During this same period, changes in gold prices resulted in a provisional pricing mark-to-market loss of \$6 (\$5 per ounce) and loss of \$2 (nil per ounce), respectively. At September 30, 2014, Newmont had gold sales of 112,000 ounces priced at an average of \$1,234 per ounce, subject to final pricing over the next several months.

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

The following tables present the gross unrealized losses and fair value of the Company's investments with unrealized losses that are not deemed to be other-than-temporarily impaired, aggregated by length of time that the individual securities have been in a continuous unrealized loss position:

	Less than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
At September 30, 2014						
Marketable equity securities	\$143	\$ 37	\$-	\$ -	\$143	\$ 37
Auction rate securities	-	-	6	2	6	2
	\$143	\$ 37	\$6	\$ 2	\$149	\$ 39

	Less than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
At December 31, 2013						
Marketable equity securities	\$54	\$ 4	\$-	\$ -	\$54	\$ 4
Auction rate securities	-	-	5	3	5	3
	\$54	\$ 4	\$5	\$ 3	\$59	\$ 7

While the fair value of the Company's investments in marketable equity securities and auction rate securities are below their respective cost, the Company views these declines as temporary. The Company has the ability and intends to hold its auction rate securities until maturity or such time that the market recovers.

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

	At September 30, 2014	At December 31, 2013
Stockpiles and ore on leach pads:		
Carlin	\$ 389	\$ 439
Phoenix	111	109
Twin Creeks	300	327
La Herradura	108	57
Yanacocha	408	504
Boddington	351	304
Tanami	16	12
Jundee	-	7
Waihi	1	2
Kalgoorlie	117	107
Batu Hijau	1,194	1,290
Ahafo	358	292
Akyem	94	35
	\$ 3,447	\$ 3,485

The Company recorded write-downs classified as components of Costs applicable to sales of \$248 and \$430 for the third quarter and first nine months of 2014, respectively, compared to \$56 and \$611 for the same periods in 2013. The Company recorded write-downs classified as components of Depreciation and amortization of \$61 and \$123 for the third quarter and first nine months of 2014, respectively, compared to \$20 and \$146 for the same periods in 2013. Write-downs are recorded to reduce the carrying value of stockpiles and ore on leach pads to net realizable value. Adjustments to net realizable value are a result of current and prior stripping costs, lower long-term metal prices and the associated historical and estimated future processing costs in relation to the Company's long term price assumptions.

Of the write-downs in first nine months of 2014, \$119 are related to Carlin, \$5 to Phoenix, \$9 to Twin Creeks, \$105 to Yanacocha, \$83 to Boddington and \$232 to Batu Hijau. The write downs recorded at Batu Hijau were impacted by the signing of the MoU with the Government of Indonesia due to the increase in royalties which increase the estimated future processing costs.

Of the write-downs in the first nine months of 2013, \$3 are related to Carlin, \$1 to Twin Creeks, \$104 to Yanacocha, \$133 to Boddington, \$2 to Tanami, \$4 to Waihi, \$48 to Kalgoorlie and \$462 to Batu Hijau.

NOTE 20 DEBT

Scheduled minimum debt repayments are \$5 for the remainder of 2014, \$168 in 2015, \$221 in 2016, \$771 in 2017, \$1 in 2018 and \$5,680 thereafter.

Term Loan and Revolver Extension

On July 11, 2014, the Company borrowed \$575 under a new uncollateralized term loan facility entered into with a syndicate of banks. Borrowings under the facility bear interest at LIBOR plus a margin ranging from 0.875% to 1.65%, and mature on July 11, 2019. Fees and other debt issuance costs related to the facility were capitalized and will be amortized over the term of the debt. Proceeds were used to retire the \$575 convertible debt on July 15, 2014.

On March 31, 2014, the Company's Corporate Revolving Credit Facility was amended to extend the facility two years to 2019. The available capacity under the Corporate Revolving Credit Facility remains at \$3,000. There are no borrowings outstanding under the facility at September 30, 2014.

NOTE 26 COMMITMENTS AND CONTINGENCIES

General

The Company follows ASC guidance in accounting for loss contingencies. Accordingly, estimated losses from contingencies are accrued by a charge to income when information available prior to issuance of the financial statements indicates that it is probable that a liability could be incurred and the amount of the loss can be reasonably estimated. Legal expenses associated with the contingency are expensed as incurred. If a loss contingency is not probable or reasonably estimable, disclosure of the contingency and estimated range of loss, if determinable, is made in the financial statements when it is at least reasonably possible that a material loss could be incurred.

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

Operating Segments

The Company's operating segments are identified in Note 3. Except as noted in this paragraph, all of the Company's commitments and contingencies specifically described in this Note 26 relate to the Corporate and Other reportable segment. The Yanacocha matters relate to the Yanacocha reportable segment. The PTNNT matters relate to the Batu Hijau reportable segment.

Environmental Matters

The Company's mining and exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and are generally becoming more restrictive. The Company conducts its operations so as to protect the public health and environment and believes its operations are in compliance with applicable laws and regulations in all material respects. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations, but cannot predict the full amount of such future expenditures.

Estimated future reclamation costs are based principally on legal and regulatory requirements. At September 30, 2014 and December 31, 2013, \$1,427 and \$1,432, respectively, were accrued for reclamation costs relating to currently or recently producing mineral properties in accordance with asset retirement obligation guidance. The current portions of \$58 and \$66 at September 30, 2014 and December 31, 2013, respectively, are included in Other current liabilities.

In addition, the Company is involved in several matters concerning environmental obligations associated with former mining activities. Generally, these matters concern developing and implementing remediation plans at the various sites involved. The Company believes that the related environmental obligations associated with these sites are similar in nature with respect to the development of remediation plans, their risk profile and the compliance required to meet general environmental standards. Based upon the Company's best estimate of its liability for these matters, \$152 and \$179 were accrued for such obligations at September 30, 2014 and December 31, 2013, respectively. These amounts are included in Other current liabilities and Reclamation and remediation liabilities. Depending upon the ultimate resolution of these matters, the Company believes that it is reasonably possible that the liability for these matters could be as much as 151% greater or 1% lower than the amount accrued at September 30, 2014. The amounts accrued are reviewed periodically based upon facts and circumstances available at the time. Changes in estimates are recorded in Reclamation and remediation in the period estimates are revised.

Details about certain of the more significant matters involved are discussed below.

Newmont Mining Corporation

Empire Mine. On July 19, 2012, the California Department of Parks and Recreation ("Parks") served Newmont, New Verde Mines LLC, Newmont North America Exploration Limited, Newmont Realty Company and Newmont USA Limited with a complaint for damages and declaratory relief under CERCLA, specifically for costs associated with water treatment at the Empire Mine State Park and for a declaration that Newmont is liable for past and future

response costs, as well as indemnification to Parks. In 1975 Parks purchased the Empire Mine site in Grass Valley, California from Newmont to create a historic state park featuring the mining of the Empire Mine. Parks has operated the Empire Mine Site for over 35 years. Newmont intends to vigorously defend this lawsuit. Newmont cannot reasonably predict the outcome of this matter.

Newmont USA Limited - 100% Newmont Owned

Ross-Adams Mine Site. By letter dated June 5, 2007, the U.S. Forest Service notified Newmont that it had expended approximately \$0.3 in response costs to address environmental conditions at the Ross-Adams mine in Prince of Wales, Alaska, and requested Newmont USA Limited pay those costs and perform an Engineering Evaluation/Cost Analysis ("EE/CA") to assess what future response activities might need to be completed at the site. Newmont intends to vigorously defend any formal claims by the EPA. Newmont has agreed to perform the EE/CA. Newmont cannot reasonably predict the likelihood or outcome of any future action against it arising from this matter.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

Other Legal Matters

Minera Yanacocha S.R.L. (“Yanacocha”) - 51.35% Newmont Owned

Choropampa. In June 2000, a transport contractor of Yanacocha spilled approximately 151 kilograms of elemental mercury near the town of Choropampa, Peru, which is located 53 miles (85 kilometers) southwest of the Yanacocha mine. Elemental mercury is not used in Yanacocha’s operations but is a by-product of gold mining and was sold to a Lima firm for use in medical instruments and industrial applications. A comprehensive health and environmental remediation program was undertaken by Yanacocha in response to the incident. In August 2000, Yanacocha paid under protest a fine of 1,740,000 Peruvian soles (approximately \$0.5) to the Peruvian government. Yanacocha has entered into settlement agreements with a number of individuals impacted by the incident. As compensation for the disruption and inconvenience caused by the incident, Yanacocha entered into agreements with and provided a variety of public works in the three communities impacted by this incident. Yanacocha cannot predict the likelihood of additional expenditures related to this matter.

Additional lawsuits relating to the Choropampa incident were filed against Yanacocha in the local courts of Cajamarca, Peru, in May 2002 by over 900 Peruvian citizens. A significant number of the plaintiffs in these lawsuits entered into settlement agreements with Yanacocha prior to filing such claims. In April 2008, the Peruvian Supreme Court upheld the validity of these settlement agreements, which the Company expects to result in the dismissal of all claims brought by previously settled plaintiffs. Yanacocha has also entered into settlement agreements with approximately 350 additional plaintiffs. The claims asserted by approximately 200 plaintiffs remain. In 2011, Yanacocha was served with 23 complaints alleging grounds to nullify the settlements entered into between Yanacocha and the plaintiffs. Yanacocha has answered the complaints and the court has dismissed several of the matters and the plaintiffs have filed appeals. All appeals were referred to the Civil Court of Cajamarca, which affirmed the decisions of the lower court judge. The plaintiffs have filed appeals of such orders before the Supreme Court. Some of these appeals were dismissed by the Supreme Court in favor of Yanacocha, and others are pending resolution. Yanacocha will continue to vigorously defend its position. Neither the Company nor Yanacocha can reasonably estimate the ultimate loss relating to such claims.

Administrative Actions. The Peruvian government agency responsible for environmental evaluation and inspection, Organismo Evaluacion y Fiscalizacion Ambiental (“OEFA”), conducts periodic reviews of the Yanacocha site. In 2011, 2012, and 2013, OEFA issued notices of alleged violations of OEFA standards to Yanacocha and Conga relating to past inspections. Total fines for all outstanding OEFA alleged violations remain dependent upon the number of units associated with the alleged violations. The alleged violations currently range from zero to 60,216 units, with each unit having a potential fine equivalent to approximately \$.00130. Yanacocha and Conga are responding to all notices of alleged violations, but cannot reasonably predict the outcome of the agency allegations.

PT Newmont Nusa Tenggara (“PTNNT”) – 31.5% Newmont Owned

Divestiture: Under the Batu Hijau Contract of Work, beginning in 2006 and continuing through 2010, a portion of PTNNT’s shares were required to be offered for sale, first, to the Indonesian government or, second, to Indonesian

nationals, equal to the difference between the following percentages and the percentage of shares already owned by the Indonesian government or Indonesian nationals (if such number is positive): 23% by March 31, 2006; 30% by March 31, 2007; 37% by March 31, 2008; 44% by March 31, 2009; and 51% by March 31, 2010. As PT Pukuafu Indah (“PTPI”), an Indonesian national, owned a 20% interest in PTNNT at all relevant times, in 2006, a 3% interest was required to be offered for sale and, in each of 2007 through 2010, an additional 7% interest was required to be offered (for an aggregate 31% interest). The price at which such interests were offered for sale to the Indonesian parties was the fair market value of such interest considering PTNNT as a going concern, as agreed with the Indonesian government. Following certain disputes and an arbitration with the Indonesian government, in November and December 2009, sale agreements were concluded pursuant to which the 2006, 2007 and 2008 shares were sold to PT Multi Daerah Bersaing (“PTMDB”), the nominee of the local governments, and the 2009 shares were sold to PTMDB in February 2010, resulting in PTMDB owning a 24% interest in PTNNT.

On December 17, 2010, the Ministry of Energy & Mineral Resources, acting on behalf of the Indonesian government, accepted the offer to acquire the final 7% interest in PTNNT. Subsequently, the Indonesian government designated Pusat Investasi Pemerintah (“PIP”), an agency of the Ministry of Finance, as the entity that will buy the final stake. On May 6, 2011, PIP and the foreign shareholders entered into a definitive agreement for the sale and purchase of the final 7% divestiture stake, subject to receipt of approvals from certain Indonesian government ministries. Subsequent to signing the agreement, a disagreement arose between the Ministry of Finance and the Indonesian parliament in regard to whether parliamentary approval was needed to allow PIP to make the

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

share purchase. In July 2012, the Constitutional Court ruled that parliament approval is required for PIP to use state funds to purchase the shares, which approval has not yet been obtained. Further disputes may arise in regard to the divestiture of the 2010 shares.

WALHI: In September 2011, an Indonesian non-governmental organization named Wahana Lingkungan Hidup Indonesia (“WALHI”) brought an administrative law claim against Indonesia’s Ministry of Environment to challenge the May 2011 renewal of PTNNT’s submarine tailings permit. PTNNT and the regional government of KSB (“KSB”) filed separate applications for intervention into the proceedings, both of which were accepted by the Administrative Court. KSB intervened on the side of WALHI, and PTNNT joined on the side of the Ministry of Environment. On April 3, 2012, the Administrative Court ruled in favor of the Ministry of Environment and PTNNT, finding that the Ministry of Environment properly renewed the permit in accordance with Indonesian law and regulations. WALHI appealed the verdict. On October 2, 2012, the High Administrative Law Court rejected WALHI’s appeal, after which WALHI filed a notice to appeal the case to the Supreme Court. On May 28, 2013, the Supreme Court of Indonesia updated its website to provide that WALHI’s appeal in this matter was rejected. The parties are still awaiting the written decision from the court. PTNNT will continue to defend its submarine tailings permit and is confident that the Ministry of Environment acted properly in renewing PTNNT’s permit.

Export Issue: On June 27, 2014, PTNNT and its majority shareholder Nusa Tenggara Partnership B.V. (“NTPBV,” a Dutch entity) submitted a request for arbitration to the International Centre for Settlement of Investment Disputes (“ICSID”) against the Government of Indonesia seeking relief from application of recent Indonesian export regulations. On August 26, 2014, PTNNT and NTPBV requested dismissal of the arbitration and with the Government of Indonesia’s consent, ICSID dismissed the arbitration. Subsequently, on September 3, 2014, PTNNT entered into a Memorandum of Understanding (“MoU”) with the Government of Indonesia (referred to herein as the “Government”) under which the Government and PTNNT agreed to certain increases in Government revenues and to negotiate certain amendments to the Contract of Work. Effective with the signing of the MoU, PTNNT agreed to pay export duties at the rates set forth in a new regulation issued in July 2014; to provide a \$25 surety bond to demonstrate its support for smelter development; and to increase royalties to 4.0% for copper, 3.75% for gold, and 3.25% for silver. On July 25, 2014, the Government’s Ministry of Finance revised its January 2014 regulations to reduce export duty rates on copper concentrate. The revised regulations provide for export duties to reduce as smelter development progresses. The export duties are set at 7.5% while smelter development progress is in the 0% - 7.5% range, declining to 5% when development progress exceeds 7.5% and 0% when development progress exceeds 30%. The MoU also outlines terms for the six main elements of the Contract of Work renegotiation, which will be incorporated into an amendment of the Contract of Work. The six areas are: concession area size; royalties, taxes and export duties; domestic processing and refining; ownership divestment; utilization of local manpower, domestic goods and services; and duration of the Contract of Work. The negotiation of the amendment to the Contract of Work contemplated by the MoU remains on-going. Continued future operations at Batu Hijau are subject to various factors, including, without limitation, the successful renegotiation of the Contract of Work, issuance of future export permits and approvals, negotiations with the labor union, future in-country smelting availability and regulations relating to export quotas, and certain other factors.

NWG Investments Inc. v. Fronteer Gold Inc.

In April 2011, Newmont acquired Fronteer Gold Inc. (“Fronteer”).

Fronteer acquired NewWest Gold Corporation (“NewWest Gold”) in September 2007. At the time of that acquisition, NWG Investments Inc. (“NWG”) owned approximately 86% of NewWest Gold and an individual named Jacob Safra owned or controlled 100% of NWG. Prior to its acquisition of NewWest Gold, Fronteer entered into a June 2007 lock-up agreement with NWG providing that, among other things, NWG would support Fronteer’s acquisition of NewWest Gold. At that time, Fronteer owned approximately 42% of Aurora Energy Resources Inc. (“Aurora”), which, among other things, had a uranium exploration project in Labrador, Canada.

NWG contends that, during the negotiations leading up to the lock-up agreement, Fronteer represented to NWG that Aurora would commence uranium mining in Labrador by 2013, that this was a firm date, that Fronteer was not aware of any obstacle to doing so, that Aurora faced no serious environmental issues in Labrador and that Aurora’s competitors faced greater delays in commencing uranium mining. NWG further contends that it entered into the lock-up agreement and agreed to support Fronteer’s acquisition of NewWest Gold in reliance upon these purported representations. On October 11, 2007, less than three weeks after the Fronteer-NewWest Gold transaction closed, a member of the Nunatsiavut Assembly introduced a motion calling for the adoption of a moratorium on uranium mining in Labrador. On April 8, 2008, the Nunatsiavut Assembly adopted a three-year moratorium on uranium mining in Labrador. NWG contends that Fronteer was aware during the negotiations of the NWG/Fronteer lock-up agreement that the Nunatsiavut Assembly planned on adopting this moratorium and that its adoption would preclude Aurora from commencing uranium mining by 2013, but Fronteer nonetheless fraudulently induced NWG to enter into the lock-up agreement.

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

On September 24, 2012, NWG served a summons and complaint on NMC, and then amended the complaint to add Newmont Canada Holdings ULC as a defendant. The complaint also named Fronteer Gold Inc. and Mark O’Dea as defendants. The complaint sought rescission of the merger between Fronteer and NewWest Gold and \$750 in damages. In August 2013 the Supreme Court of New York, New York County issued an order granting the defendants’ motion to dismiss on forum non conveniens. Subsequently, NWG filed a notice of appeal of the decision and then a notice of dismissal of the appeal on March 24, 2014.

On February 26, 2014, NWG filed a lawsuit in Ontario Superior Court of Justice against Fronteer Gold Inc., Newmont Mining Corporation, Newmont Canada Holdings ULC, Newmont FH B.V. and Mark O’Dea. The Ontario Complaint is based upon the same allegations contained in the New York lawsuit with claims for fraud and negligent misrepresentation. NWG seeks disgorgement of profits since the close of the NWG deal on September 24, 2007 and punitive damages.

Newmont intends to vigorously defend this matter, but cannot reasonably predict the outcome.

Other Commitments and Contingencies

Tax contingencies are provided for in accordance with ASC income tax guidance (see Note 8).

The Company has minimum royalty obligations on one of its producing mines in Nevada for the life of the mine. Amounts paid as a minimum royalty (where production royalties are less than the minimum obligation) in any year are recoverable in future years when the minimum royalty obligation is exceeded. Although the minimum royalty requirement may not be met in a particular year, the Company expects that over the mine life, gold production will be sufficient to meet the minimum royalty requirements. Minimum royalty payments payable are \$30 in 2014, \$34 in 2015 through 2018 and \$323 thereafter.

As part of its ongoing business and operations, the Company and its affiliates are required to provide surety bonds, bank letters of credit and bank guarantees as financial support for various purposes, including environmental reclamation, exploration permitting, workers compensation programs and other general corporate purposes. At September 30, 2014 and December 31, 2013, there were \$1,737 and \$1,807, respectively, of outstanding letters of credit, surety bonds and bank guarantees. The surety bonds, letters of credit and bank guarantees reflect fair value as a condition of their underlying purpose and are subject to fees competitively determined in the market place. The obligations associated with these instruments are generally related to performance requirements that the Company addresses through its ongoing operations. As the specific requirements are met, the beneficiary of the associated instrument cancels and/or returns the instrument to the issuing entity. Certain of these instruments are associated with operating sites with long-lived assets and will remain outstanding until closure. Generally, bonding requirements associated with environmental regulation are becoming more restrictive. However, the Company believes it is in compliance with all applicable bonding obligations and will be able to satisfy future bonding requirements through existing or alternative means, as they arise.

Newmont is from time to time involved in various legal proceedings related to its business. Except in the above described proceedings, management does not believe that adverse decisions in any pending or threatened proceeding or that amounts that may be required to be paid by reason thereof will have a material adverse effect on the Company's financial condition or results of operations.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION (dollars in millions, except per share, per ounce and per pound amounts)

The following discussion provides information that management believes is relevant to an assessment and understanding of the consolidated financial condition and results of operations of Newmont Mining Corporation and its subsidiaries (collectively, "Newmont," the "Company," "our" and "we"). We use certain non-GAAP financial measures in our MD&A. For a detailed description of each of the non-GAAP financial measures used in this MD&A, please see the discussion under "Non-GAAP Financial Measures" beginning on page 60. References to "A\$" refer to Australian currency, "C\$" to Canadian currency and "NZ\$" to New Zealand currency.

This item should be read in conjunction with our interim unaudited Condensed Consolidated Financial Statements and the notes thereto included in this quarterly report. Additionally, the following discussion and analysis should be read in conjunction with Management's Discussion and Analysis of Consolidated Financial Condition and Results of Operations and the consolidated financial statements included in Part II of our Annual Report on Form 10-K for the year ended December 31, 2013 filed February 20, 2014 and revisions filed June 13, 2014 on Form 8-K.

Overview

Newmont is one of the world's largest gold producers and is the only gold company included in the S&P 500 Index and Fortune 500. We have been included in the Dow Jones Sustainability Index-World for eight consecutive years and have adopted the World Gold Council's Conflict-Free Gold Policy. We are also engaged in the exploration for and acquisition of gold and copper properties. We have significant operations and/or assets in the United States, Australia, Peru, Indonesia, Ghana, Mexico, Suriname and New Zealand.

Our vision is to be the most valued and respected mining company through industry leading performance.

We continue to position the business to capture benefits of economic recovery and demand growth in the current volatile commodity market environment. Our team has spent considerable time over the past eighteen months optimizing our project portfolio so that when the time is right, we can move forward with developing projects that generate value. We are focused on providing sustainable efficiency, productivity and cost improvements over the next three years and expect to deliver significant cost and cash savings improvement initiatives. One of the programs we launched in 2013 to achieve these improvements was the Full Potential program ("Full Potential"). Full Potential is designed to leverage our industry experience and discipline to accelerate the delivery of business improvement opportunities across our operations and support areas, resulting in improved levels of operating cash flow.

Third quarter 2014 highlights are included below and discussed further in Results of Consolidated Operations.

Operating highlights

Sales of \$1,746 and \$5,275 for the third quarter and first nine months of 2014;

Average realized gold and copper prices of \$1,270 per ounce and \$2.71 per pound, respectively, for the third quarter and \$1,282 per ounce and \$2.75 per pound, respectively, for first nine months of 2014;

Consolidated gold production of 1,251,000 ounces (1,152,000 attributable ounces) for the third quarter of 2014, at Costs applicable to sales of \$705 per ounce;

Consolidated gold production of 3,842,000 ounces (3,584,000 attributable ounces) for the first nine months of 2014, at Costs applicable to sales of \$733 per ounce;

Consolidated copper production of 34 million pounds (30 million attributable pounds) for the third quarter of 2014, at Costs applicable to sales of \$5.73 per pound;

Consolidated copper production of 173 million pounds (128 million attributable pounds) for the first nine months of 2014, at Costs applicable to sales of \$3.75 per pound;

Gold operating margin (see “Non-GAAP Financial Measures” on page 60) of \$565 and \$549 per ounce for the third quarter and first nine months of 2014, respectively.

Table of Contents

Our global project pipeline.

We manage our wider project portfolio to maintain flexibility to address the development risks associated with our projects including permitting, local community and government support, engineering and procurement availability, technical issues, escalating costs and other associated risks that could adversely impact the timing and costs of certain opportunities.

Projects included in our global pipeline comprise an important part of the Company's growth strategy and reflect opportunities throughout the development cycle. The most advanced projects, including early stage development and projects in or near the Execution phase are described below. The exploration, construction and execution of these projects may require significant funding to complete.

Turf Vent Shaft, Nevada. The Turf No. 3 Vent Shaft Project is in the construction phase and is planned to achieve commercial production in late 2015 and is expected to add between 100,000 and 150,000 ounces of production annually. Capital costs for the project are estimated at approximately \$400. The Turf No. 3 Vent Shaft project provides the ventilation required to increase production, and decrease mine costs over the 11 year mine life at greater Leeville.

Merian, Suriname. On July 29, 2014 the Board of Directors of Newmont approved full funding for the Merian project in Suriname and construction mobilization began in August 2014. Following the project approval by Newmont, the Government of Suriname granted the Right of Exploitation on August 22, 2014. The government of Suriname has until December 2014 to exercise the option to purchase a 25% equity ownership in Merian, which, if exercised, will bring Newmont's ownership to 75%. The project allows Newmont to pursue a new district with upside potential and the opportunity to grow and extend the operating life of the South American region. Average life of mine estimated gold production (on a 100% basis) of 300,000 to 400,000 ounces per year is expected, once Merian comes into production in late 2016. Total capital spend on the project is expected to range from \$900 to \$1,000 on a 100% ownership basis. At December 31, 2013, gold Reserves at Merian contained 119,000 thousand tons of Probable Reserves, grading 0.035 ounces per ton for 4.2 million ounces on a 100% ownership basis.

Waihi Correnso, New Zealand. Waihi Correnso is in the construction phase and is planned to achieve commercial production in 2015. Total capital costs to complete the project are estimated at approximately \$30 to \$35. The project is an extension of the operating Favona, Moonlight and Trio underground mines and will leverage the existing surface and processing infrastructure. The Correnso deposit is a conventional high grade vein, and offers upside resource potential in and around Correnso.

Conga, Peru. Due to local political and community protests, construction and development activities at the Conga project were largely suspended in November 2011. The results of the Peruvian Central Government initiated Environmental Impact Assessment ("EIA") independent review were announced on April 20, 2012 and confirmed our initial EIA met Peruvian and International standards. The review made recommendations to provide additional water capacity and social funds, which we have largely accepted. We announced our decision to move the project forward on a "water first" approach on June 22, 2012. We anticipate spending in 2014 to be approximately \$65, focusing on building access roads and permitting work around the Perol water reservoir, and gaining further social acceptance for the project. Total property, plant and mine development was \$1,619 at September 30, 2014. At December 31, 2013 we reported 303,400 thousand tons of Probable Reserves, grading 0.021 ounces per ton for 6.4 million attributable ounces of gold Reserves and 0.28% copper for 1,690 million attributable pounds of copper Reserves at Conga. Construction

of Conga and the implementation of the independent EIA review recommendations will continue provided it can be done in a safe manner with risk-adjusted returns that justify future investment. Should we be unable to continue with the current development plan at Conga, we may reprioritize and reallocate capital to other alternatives, which may result in a potential accounting impairment. See Item 1A, Risk Factors in Newmont's Annual Report on Form 10-K for the year ended December 31, 2013 filed February 20, 2014 for a description of political risks related to the project's development.

Long Canyon, Nevada. The project is in the definition stage of development and we continue to develop our understanding of Long Canyon and the district. We have submitted the Plan-of-Operations to the Bureau of Land Management in support of our Environmental Impact Statement ("EIS") and continue to progress the exploration program. At December 31, 2013, we reported 15,700 thousand tons of Probable Reserves, grading 0.065 ounce per ton for 1.0 million attributable ounces of gold Reserves at Long Canyon. The definition stage engineering and permitting is on track to be completed by the end of 2014 and we anticipate an investment decision in early 2015.

Tanami Production Expansion, Australia. The goal of the Tanami Production Expansion project is to increase production and lower All-in-sustaining-cost per ounce of the mine. Incremental improvements are driven by bringing ounces forward, mining additional ounces at depth and leveraging the fixed costs of the mine and processing facilities. The scope for this project includes a ventilation upgrade, additional mining equipment, a second mine access (Dual Access) and increasing process plant capacity. An investment decision is expected in early 2015.

Table of Contents

Subika Underground, Ghana. Subika Underground is in the confirmation stage of development as work continues to optimize the mine plan and reduce costs. The project is expected to produce approximately 200,000 ounces of gold per year and an investment decision is expected in late 2015 or 2016.

Ahafo Mill Expansion, Ghana. We continue to evaluate development alternatives for this project. Current engineering efforts are focused on reducing the scale of the project. The potential improved economics and feasibility of the project will be assessed, and the project considered for an investment decision in the second half of 2015.

Selected Financial and Operating Results

(2) Excludes development ounces.

(3) Excludes Depreciation and amortization and Reclamation and remediation.

Consolidated Financial Results

Net income (loss) attributable to Newmont stockholders for the third quarter of 2014 was \$213 (\$0.43 per share) compared to income of \$398 (\$0.80 per share) for the third quarter of 2013. Results for the third quarter of 2014 compared to the third quarter of 2013 were impacted by stockpile inventory adjustments triggered by increased future costs as a result of the Memorandum of Understanding (“MoU”) with the Government of Indonesia at Batu Hijau, lower realized gold prices and the inability to export concentrate in Indonesia partially offset by a favorable deferred tax settlement in the current quarter. Net income (loss) attributable to Newmont stockholders for the first nine months of 2014 was \$493 (\$0.99 per share) compared to a loss of \$1,347 (\$(2.71) per share) for the first nine months of 2013. Results for the first nine months of 2014 compared to the same period in 2013 were impacted by lower asset impairments, inventory adjustments due to decreases in metal prices during the second quarter of 2013, partially offset by lower realized gold prices and the inability to export concentrate in Indonesia.

Table of Contents

Gold Sales decreased 11% and 14% in the third quarter and first nine months of 2014, respectively, as compared to the same periods in 2013 due to lower sales volumes as a result of current year divestitures, and lower realized prices. The following analysis summarizes consolidated gold sales:

	Three Months Ended		Nine Months Ended	
	September 30, 2014	2013	September 30, 2014	2013
Consolidated gold sales:				
Gross before provisional pricing	\$1,622	\$1,815	\$4,906	\$5,733
Provisional pricing mark-to-market	(7)	9	(2)	(13)
Gross after provisional pricing	1,615	1,824	4,904	5,720
Treatment and refining charges	(8)	(19)	(17)	(28)
Net	\$1,607	\$1,805	\$4,887	\$5,692
Consolidated gold ounces sold (thousands):	1,267	1,365	3,814	3,948
Average realized gold price (per ounce):				
Gross before provisional pricing	\$1,280	\$1,330	\$1,286	\$1,452
Provisional pricing mark-to-market	(5)	6	-	(4)
Gross after provisional pricing	1,275	1,336	1,286	1,448
Treatment and refining charges	(5)	(14)	(4)	(6)
Net	\$1,270	\$1,322	\$1,282	\$1,442

The change in consolidated gold sales is due to:

	Three Months Ended September 30, 2014 vs. 2013	Nine Months Ended September 30, 2014 vs. 2013
Change in consolidated ounces sold	\$ (131)	\$ (194)
Change in average realized gold price	(78)	(622)
Change in treatment and refining charges	11	11
	\$ (198)	\$ (805)

Copper Sales decreased 35% and 27% in the third quarter and first nine months of 2014, respectively, as compared to the same period in 2013 due to lower copper pounds sold, primarily related to the export issues at Batu Hijau and lower realized prices. The following analysis summarizes consolidated copper sales:

	Three Months Ended	Nine Months Ended

Costs applicable to sales includes a 16% and 11% reduction in direct operating costs in the third quarter and first nine months of 2014, respectively, compared to the same periods in 2013. This reduction in direct operating costs is partially offset by the addition of Akyem which reached commercial production in the fourth quarter of 2013. Costs applicable to sales for gold decreased in the third quarter and first nine months of 2014 compared to the same periods in 2013 due to the direct operating cost reductions mentioned above and the impact of stockpile inventory adjustments due to decreased metal prices during the second quarter of 2013. Costs applicable to sales for copper increased in the third quarter compared to the same period in 2013 due to stockpile inventory adjustments triggered by increased future costs as a result of the MoU with the Government of Indonesia at Batu Hijau, partially offset by the aforementioned reduction in direct operating costs. Costs applicable to sales for the first nine months decreased compared to the same period in 2013 due to stockpile inventory adjustments due to decreased metal prices during the second quarter of 2013 and

Table of Contents

the reduction of direct operating costs discussed above. For a complete discussion regarding variations in operations, see Results of Consolidated Operations below.

Depreciation and amortization in the third quarter of 2014 increased compared to the same period in 2013 due to stockpile inventory adjustments triggered by increased future costs as a result of the MoU with the Government of Indonesia at Batu Hijau, partially offset from the sale of Jundee. Depreciation and amortization in the first nine months of 2014 decreased compared to the same period in 2013 due to inventory adjustments due to decreased metal prices during the second quarter of 2013 and from the sale of Jundee in the third quarter of 2014.

The following is a summary of Costs applicable to sales and Depreciation and amortization:

Exploration expense decreased \$16 and \$76 in the third quarter and first nine months of 2014, respectively, compared to the same periods of 2013 due to decreases in both brownfields and greenfields expenditures in all our regions.

Table of Contents

Advanced projects, research and development expense decreased \$31 and \$45 in the third quarter and first nine months of 2014, respectively, compared to the same periods of 2013 due to deferment of various studies, to reductions in project and technical services costs, and the decision to advance the Merian project to execution.

General and administrative expense decreased by \$3 and \$20 for the third quarter and first nine months of 2014, respectively, compared to the same periods of 2013 due primarily to lower labor costs.

Write-downs totaled \$5 and \$18 for the three and nine months ended September 30, 2014, and \$3 and \$2,265 for the three and nine months ended September 30, 2013, respectively. The 2014 year-to-date write-downs are primarily related to non-essential equipment in Carlin, Phoenix and Other South America. The 2013 write-downs were primarily related to Boddington and Tanami and caused by an interim impairment assessment necessitated by a decrease in the Company's long-term gold and copper price assumptions during the second quarter to \$1,400 per ounce and \$3.00 per pound, respectively, and rising operating costs.

Other expense, net decreased by \$26 in the third quarter of 2014 compared to the third quarter of 2013 mainly due to lower community development. Other expense, net decreased by \$99 in the first nine months of 2014 compared to the first nine months of 2013 mainly due to lower community development, restructuring expenses, and transaction costs related to TMAC that occurred in the first quarter of 2013.

Other income, net decreased by \$211 in the third quarter of 2014 compared to the third quarter of 2013 and decreased by \$238 in the first nine months of 2014 compared to the first nine months of 2013 due to a gain on the sale of the Canadian Oil Sands investment in the third quarter of 2013 and lower dividends as a result of that sale and lower foreign exchange gains in the current year, partially offset by a gain on asset sales. Gains were recorded on the sale of Midas in the first quarter of 2014 and the sale of Jundee and McCoy Cove, a non-operating property in Nevada, in the third quarter of 2014.

Interest expense, net increased by \$13 and \$65 for the third quarter and first nine months of 2014, respectively, compared to the same periods in 2013 due to decreased capitalized interest. Capitalized interest decreased by \$14 and \$66 in the third quarter and first nine months of 2014, respectively, compared to the same periods in 2013 from capital projects being completed at Akyem and Phoenix copper leach.

Income and mining tax expenses during the third quarter of 2014 resulted in an estimated benefit of \$47, for an effective tax rate of (188)%. The negative tax rate is the result of recording a tax benefit on net earnings for the period. Estimated income and mining tax expense during the third quarter of 2013 was \$161 for an effective tax rate of 28%. The Company's effective tax rate is driven by a number of factors as illustrated in the table below. The percentage impact of these items is exaggerated during the current quarter due to the lower pretax income. The rate for the third quarter 2014 compared to 2013 is also shown below and differs primarily due to a net reduction in the Company's valuation allowance in 2014 from an overall decrease in the Company's tax credits (due to tax refunds, reduction in estimated foreign taxes for the current year, settlements of income tax audits, and impact of Jundee sale) partially offset by an increase from stockpile inventory adjustments at Batu Hijau. In addition to the changes in valuation allowance, the Company's effective tax rate for the current quarter is favorably influenced by a larger impact from percentage depletion due to the jurisdictional mix of the Company's income.

Three Months Ended
September 30,

Edgar Filing: NEWMONT MINING CORP /DE/ - Form 10-Q

	2014		2013		Variance
Income (loss) before income and mining tax and other items		\$25		\$575	
Tax at statutory rate	35 %	\$9	35 %	\$201	
Reconciling items:					
Percentage depletion	(152)%	(38)	(1)%	(6)	(151)%
Change in valuation allowance on deferred tax assets	(124)%	(31)	1%	7	(125)%
Tax planning on sale of Canadian Oil Sands and Canadian capital gains	-	-	(11)%	(61)	11%
Mining and other taxes	24%	6	2%	11	22%
Tax impact on Jundee Sale	32%	8	-	-	32%
Effect of foreign earnings, net of credits	-	-	2%	9	(2)%
Other	(3)%	(1)	-	-	(3)%
Income and mining tax expense (benefit)	(188)%	\$(47)	28%	\$161	(216)%

During the first nine months of 2014, the estimated income and mining tax benefit was \$22, resulting in an effective tax rate of (9)%. The negative rate is the result of recording a tax benefit on net earnings for the period. Estimated income and mining tax

Table of Contents

expense during the first nine months of 2013 was \$54 for an effective tax rate of (3)%. The negative rate is the result of recording tax expense on the net loss for the period. The Company's effective tax rate is driven by a number of factors as illustrated in the table below. The rate for the first nine months 2014 compared to 2013 is also shown below and differs largely due to changes in valuation allowances (releases in the current year due to tax refunds, settlement of audits, etc. versus increases in the prior year due to asset impairments) and the overall impact of percentage depletion due to the jurisdictional mix of the Company's income.

	Nine Months Ended September					
	2014		2013		Variance	
Income (loss) before income and mining tax and other items		\$260		\$(1,516)		
Tax at statutory rate	35 %	\$91	35 %	\$(531)		
Reconciling items:						
Percentage depletion	(25)%	(66)	7 %	(99)	(32)	%
Change in valuation allowance on deferred tax assets	(36)%	(93)	(46)%	698	10	%
Tax planning on sale of Canadian Oil Sands and Canadian capital gains	-	-	4 %	(61)	(4)	%
Mining and other Taxes	5 %	14	(3)%	47	8	%
Disallowed loss on Midas Sale	5 %	13	-	-	5	%
Tax impact on Jundee Sale	3 %	8	-	-	3	%
Effect of foreign earnings, net of credits	3 %	8	(3)%	48	6	%
Other	1 %	3	3 %	(48)	(2)	%
Income and mining tax expense (benefit)	(9)%	\$(22)	(3)%	\$54	(6)	%

A valuation allowance is provided for those deferred tax assets for which it is more likely than not that the related benefits will not be realized. In determining the amount of the valuation allowance, each quarter the Company considers future reversals of existing taxable temporary differences, estimated future taxable income, taxable income in prior carryback year(s), as well as feasible tax planning strategies in each jurisdiction to determine if the deferred tax assets are realizable. If it is determined we will not realize all or a portion of its deferred tax assets, we will place or increase a valuation allowance. Conversely, if we determine that we will ultimately be able to realize all or a portion of the related benefits for which a valuation allowance has been provided, all or a portion of the related valuation allowance will be reduced. There are a number of risk factors that could impact the Company's ability to realize the deferred tax assets. See Note 2, Summary of Significant Accounting Policies, Risks and Uncertainties.

There are a number of factors that can potentially impact the Company's effective tax, including the geographic distribution of income, the non-recognition of tax assets, percentage depletion, changes in tax laws, and the impact of specific transactions and assessments. For a complete discussion of the factors that influence our effective tax rate, see Management's Discussion and Analysis of Consolidated Financial Condition and Results of Operations for the year ended December 31, 2013 filed June 13, 2014 on Form 8-K.

Due to the factors discussed above and the sensitivity of the Company's income tax expense and effective tax rate to these factors, it is expected that the effective tax rate will fluctuate, sometimes significantly, in future periods.

Net income (loss) attributable to noncontrolling interests in the third quarter and first nine months of 2014 was a loss of \$138 and \$225, respectively, compared to a loss of \$4 and \$176 in the same periods of 2013, respectively. The increased loss is a result of decreased earnings at Batu Hijau and Minera Yanacocha as well as an increase in noncontrolling interests related to the TMAC share sale in April 2014.

Income (loss) from discontinued operations includes a decrease in the Holt property royalty liability as of September 30, 2014. During the third quarter and first nine months of 2014, the Company recorded a benefit of \$3 and charge of \$16, net of tax expense of \$2 and benefit of \$7, respectively. During the third quarter of 2013, the Company recorded a charge of \$21 and a benefit of \$53, net of tax benefit of \$10 and expense of \$24, respectively. Due to the nature of the sliding scale royalty calculation, changes in expected production, discount rates and gold price have a significant impact on the fair value of the liability.

⁽¹⁾Excludes Depreciation and amortization and Reclamation and remediation.

⁽²⁾Includes 8 and 17 attributable ounces in 2014 and 2013, respectively, from our interest in La Zanja and 18 and 14 attributable ounces in 2014 and 2013, respectively, from our interest in Duketon.

⁽³⁾All-In Sustaining Costs is a non-GAAP financial measure. See page 60 for a reconciliation.

⁽⁴⁾Includes 31 and 49 attributable ounces in 2014 and 2013, respectively, from our interest in La Zanja and 43 and 43 attributable ounces in 2014 and 2013, respectively, from our interest in Duketon.

Third quarter 2014 compared to 2013

Consolidated gold production decreased 9% due to planned lower production across our regions partially offset by higher production from Africa. Consolidated copper production decreased 45% due to lower production from Batu Hijau related to the export issue partially offset by production from the Phoenix copper leach facility that reached commercial production in the fourth quarter of 2013.

Costs applicable to sales per consolidated gold ounce sold increased 6% due to planned North America stripping campaigns at Gold Quarry and stockpile inventory adjustment triggered by increased future costs as a result of the MoU with the Government of Indonesia at Batu Hijau, partially offset by lower direct operating costs. Costs applicable to sales per consolidated copper pound increased 138% due to stockpile inventory adjustments triggered by increased future costs as a result of the MoU with the Government of Indonesia at Batu Hijau and lower production volume due to the export issue at Batu Hijau.

Depreciation and amortization decreased 2% per consolidated gold ounce sold due to lower stockpile and leach pad inventory adjustments partially offset by higher asset retirement costs at Yanacocha. Depreciation and amortization increased 211% per copper pound due to increased future costs as a result of the stockpile inventory adjustment triggered by increased future costs as a result of the MoU with the Government of Indonesia at Batu Hijau and lower production volume due to the export issue at Batu Hijau.

First nine months 2014 compared to 2013

Consolidated gold production decreased 3% from lower production at North America and South America partially offset by higher production from Africa related to Akyem. Consolidated copper production decreased 9% due primarily to the export issue at Batu Hijau.

Table of Contents

Costs applicable to sales per consolidated gold ounce sold decreased 5% due to reduced direct operating costs as a result of Full Potential projects and low cost production from Akyem. Costs applicable to sales per consolidated copper pound sold decreased 11% due to the inventory adjustments due to a decrease in metal prices during the second quarter of 2013.

Depreciation and amortization per consolidated gold ounce sold was essentially in line with prior year. Depreciation and amortization increased 5% per consolidated copper pound sold due to increased future costs as a result of the MoU with the Government of Indonesia at Batu Hijau.

(1) Excludes Depreciation and amortization and Reclamation and remediation.

(2) Our proportionate 44% share.

(3) Includes 4 development ounces from the newly constructed mill at La Herradura in 2014.

(4) All-In Sustaining Costs is a non-GAAP financial measure. See page 60 for a reconciliation.

Third quarter 2014 compared to 2013

Carlin, USA. Gold ounces produced decreased 16% due primarily to planned stripping campaigns and lower developments rates at Leeville. Mill 6 throughput and Mill 5 recovery were positively impacted by the Full Potential projects. Costs applicable to sales per ounce increased 43% due to planned stripping at Gold Quarry and the Carlin North Area partially offset by lower direct operating costs. Lower direct operating costs were positively impacted by Full Potential projects that lowered contract haulage costs, which optimized the haul road distances and reduced leach pad consumables. Depreciation and amortization per ounce increased 52% due to costs related to the ongoing stripping campaign.

Phoenix, USA. Gold ounces produced decreased 10% due to lower mill throughput as a result of harder ore and planned lower grades mined partially offset by higher recoveries. Copper pounds produced increased 38% due to production from the Phoenix Copper Leach facility which was completed in the fourth quarter of 2013. Costs applicable to sales per ounce increased 29% due to

Table of Contents

lower ounces sold, lower by-product credits and slightly higher operating costs. Costs applicable to sales per pound increased 58% due to lower copper mill grades mined, lower by-product credits as well as a higher allocation of costs to copper. Depreciation and amortization increased 45% per ounce and increased 52% per pound due to lower gold production and the amortization of the copper leach facility.

Twin Creeks, USA. Gold ounces produced decreased 29% due to lower production following the sale of Midas as well as a planned stripping campaign. Costs applicable to sales per ounce decreased 5% due to the sale of Midas. Depreciation and amortization per ounce decreased 48% due to the Midas sale.

La Herradura, Mexico. Gold production decreased 10% due to the timing of leach recoveries as the mine ramps back up to full production following the receipt of the explosives permit. Costs applicable to sales per ounce increased 22% due to lower leach production. Depreciation and amortization per ounce increased 31% due to the new mill and additional mining equipment as well as lower production. On October 6, 2014, we completed the sale of our 44% interest in La Herradura.

First nine months 2014 compared to 2013

Carlin, USA. Gold ounces produced decreased 6% due primarily to planned stripping campaigns and lower development rates at Leeville, partially offset by higher Mill 6 throughput and higher Mill 5 recovery as a result of Full Potential projects. Costs applicable to sales per ounce increased 24% due to planned stripping at Gold Quarry and the Carlin North Area partially offset by lower direct operating costs. Lower direct operating costs were positively impacted by Full Potential projects that lowered contract haulage costs, which optimized the haul road distances and reduced leach pad consumables. Depreciation and amortization per ounce increased 40% due to costs related to the ongoing stripping campaign.

Phoenix, USA. Gold ounces produced decreased 10% due to lower mill throughput as a result of harder ore and planned lower grades mined, partially offset by higher recoveries. Copper pounds produced increased 40% due to production from the Phoenix Copper Leach facility which was completed in the fourth quarter of 2013. Costs applicable to sales per ounce decreased 5% due to higher allocation of costs to copper. Costs applicable to sales per pound increased 31% due to lower copper mill grades mined, lower by-product credits as well as a higher allocation of costs. Depreciation and amortization increased 3% per ounce and increased 6% per pound due to lower gold production and the amortization of the copper leach facility.

Twin Creeks, USA. Gold ounces produced decreased 18% due to lower production following the sale of Midas as well as a planned stripping campaign. Costs applicable to sales per ounce decreased 9% due to the sale of Midas. Depreciation and amortization per ounce decreased 45% due to the Midas sale.

La Herradura, Mexico. Gold production decreased 25% due to the timing of leach recoveries as the mine ramps back up to full production following the receipt of the explosives permit. Costs applicable to sales per ounce decreased 3% due to lower leach production. Depreciation and amortization per ounce increased 81% due to the new mill and additional mining equipment as well as lower production. On October 6, 2014, we completed the sale of our 44% interest in La Herradura.

Third quarter 2014 compared to 2013

Yanacocha, Peru. Gold production decreased 2% due primarily to lower leach production as a result of prior year stripping, mainly offset by higher mill production from higher grade ore at Tapado Oeste. Costs applicable to sales per ounce decreased 17% due to lower direct operating costs and higher ore tons allocated to stockpiles. Depreciation and amortization per ounce decreased 10% due to higher ore tons allocated to stockpiles.

First nine months 2014 compared to 2013

Yanacocha, Peru. Gold production decreased 22% due primarily to lower leach production from lower beginning ore on leach pads and lower grade ore milled through the first half of 2014. Yanacocha completed a stripping campaign at the end of the second quarter which will result in higher production in the second half of 2014. Costs applicable to sales per ounce increased 34% due to lower production partially offset by lower direct operating costs as a result of Full Potential projects that increased haul efficiency including fuel and tire savings. Depreciation and amortization per ounce increased 34% due to higher asset retirement costs, and lower ounces sold.

Boddington	23	23						

⁽¹⁾ Excludes Depreciation and amortization and Reclamation and remediation.

⁽²⁾ Includes 18 and 14 attributable ounces in the third quarter 2014 and 2013, respectively, and 43 and 43 attributable ounces in the first nine months of 2014 and 2013, respectively, from our interest in Duketon.

⁽³⁾ All-In Sustaining Costs is a non-GAAP financial measure. See page 60 for a reconciliation.

Third quarter 2014 compared to 2013

Boddington, Australia. Gold production decreased 7% due to planned lower ore grade milled as a result of lower ore grade mined and lower recoveries. This was mostly offset by higher throughput as the result of an increase in mill utilization due to the sustainable process improvements implemented with the Full Potential project. Copper production was in line with prior year. Costs applicable to sales decreased 9% per ounce due to lower mill maintenance costs, repeal of the carbon tax, lower costs allocated to gold, partially offset by lower gold production, higher mining costs and higher stockpile inventory adjustments compared to prior year. Costs applicable to sales increased 11% per pound due to higher costs allocated to copper. Depreciation and amortization decreased 17% per ounce due to lower costs allocated to gold. Depreciation and amortization per pound was in line with prior year.

Tanami, Australia. Gold ounces produced decreased 28% due to lower ore grades milled as a result of planned lower ore grade stopes mined compared to higher grade stopes mined in prior period. This was partially offset by improved mining rates which were primarily due to higher truck utilization and stope availability leading to higher tons mined and higher mill throughput. Costs applicable to sales increased 30% per ounce mainly due to lower production. Depreciation and amortization per ounce was in line with prior year.

Jundee, Australia. The Jundee mine was sold on July 1, 2014.

Waihi, New Zealand. Gold ounces produced increased 50% due to higher throughput as a result of higher ore tons mined as compared to the stripping campaign in the prior year. Costs applicable to sales decreased 45% per ounce due to higher production. Depreciation and amortization decreased 42% per ounce due to higher production.

Kalgoorlie, Australia. Gold ounces produced was in line with prior year. Costs applicable to sales increased 3% per ounce mainly due to lower production and higher mill maintenance costs. Depreciation and amortization per ounce was in line with prior year.

First nine months 2014 compared to 2013

Boddington, Australia. Gold production decreased 3% due to planned lower ore grade milled as a result of lower ore grade mined. This was mostly offset by higher throughput as the result of an increase in mill utilization due to the sustainable process improvements implemented with the Full Potential project. Copper production was in line with prior year. Costs applicable to sales decreased 17% per ounce and 5% per pound due to inventory adjustments from decreases in metal prices in the second quarter of 2013, lower mill maintenance costs, and lower costs allocated to gold. Depreciation and amortization decreased 35% per ounce and 27% per pound due to the impact of the prior year asset impairment and inventory adjustments from decreases in metal prices in the prior year.

(3) All-In Sustaining Costs is a non-GAAP financial measure. See page 60 for a reconciliation.

Table of Contents

Third quarter 2014 compared to 2013

Batu Hijau, Indonesia. Gold and copper production decreased 78% per ounce and 82% per pound, respectively, due to the export issue. Costs applicable to sales and Depreciation and amortization include \$37 and \$27, respectively, of abnormal costs related to the suspended operation. Costs applicable to sales increased 239% per ounce and increased 258% per pound due to the lower gold and copper sales as a result of the export issue in addition to stockpile inventory adjustments triggered by increased future costs as a result of the MoU with the Government of Indonesia. Depreciation and amortization increased 334% per ounce and increased 402% per pound due to lower sales as a result of the export issue and stockpile inventory adjustments triggered by increased future costs as a result of the MoU with the Government of Indonesia.

First nine months 2014 compared to 2013

Batu Hijau, Indonesia. Gold production decreased 8% per ounce and copper production decreased 23% per pound due to the export issue. Costs applicable to sales and Depreciation and amortization include \$53 and \$37, respectively, of abnormal costs related to the suspended operation. Costs applicable to sales decreased 27% per ounce and 2% per pound due to inventory adjustments as a result of decreases in metal price in the second quarter of 2013. Depreciation and amortization decreased 2% per ounce due to inventory adjustments as a result of decreases in metal prices in the second quarter of 2013, partially offset by lower gold production. Depreciation and amortization increased 38% per pound due to lower copper production.

On September 19, 2014, PTNNT received its six-month export permit and concentrate shipments have resumed. Operations resumed in September, following signing of the MoU with the Government of Indonesia, and planned milling and mining levels were achieved during October. The negotiation of the amendment to the Contract of Work contemplated by the MoU with the Government of Indonesia remains on-going. Continued future operations at Batu Hijau are subject to various factors, including, without limitation, the successful renegotiation of the Contract of Work, issuance of future export permits and approvals, negotiations with the labor union, future in-country smelting availability and regulations relating to export quotas, and certain other factors. For a discussion of other factors which could impact future financial performance and operating results at Batu Hijau, see Item 1A, under the heading "Risk Factors," of the Company's Form 10-K, filed on February 20, 2014.

Third quarter 2014 compared to 2013

Ahafo, Ghana. Gold production decreased 26% due to planned lower mill throughput from depletion of softer ore and lower ore grade processed. Costs applicable to sales per ounce decreased 1% due to lower labor costs, decreased mining rates to synchronize with mill throughput, and operating efficiencies from the Full Potential project including lower mill consumables and improved tire life. Depreciation and amortization per ounce decreased 2%.

Akyem, Ghana. Gold ounces produced of 106,000, Costs applicable to sales per ounce of \$361, and Depreciation and amortization per ounce of \$178 are due to the commencement of commercial production in the fourth quarter of 2013.

Table of Contents

First nine months 2014 compared to 2013

Ahafo, Ghana. Gold production decreased 17% due to planned lower mill grade, depletion of softer ore and lower mill availability from unplanned downtime creating lower mill throughput. Costs applicable to sales per ounce decreased 4% due to lower labor costs, a decrease in mining rates to synchronize with mill throughput and operating efficiencies from the Full Potential project, partially offset by lower ounces sold. Depreciation and amortization was in line with prior year.

Akyem, Ghana. Gold ounces produced of 338,000, Costs applicable to sales per ounce of \$355, and Depreciation and amortization per ounce of \$181 are due to the commencement of commercial production in the fourth quarter of 2013.

Foreign Currency Exchange Rates

Our foreign operations sell their gold and copper production based on U.S. dollar metal prices. Approximately 50% and 45% of Costs applicable to sales for our foreign operations were paid in currencies other than the U.S. dollar during the third quarter of 2014 and 2013, respectively. Approximately 46% and 49% of Costs applicable to sales for our foreign operations were paid in currencies other than the U.S. dollar during the first nine months of 2014 and 2013, respectively. Variations in the local currency exchange rates in relation to the U.S. dollar at our foreign mining operations Costs applicable to sales decreased \$31 per ounce and \$22 per ounce, net of hedging gains, during the third quarter and first nine months of 2014, respectively, compared to the same periods in 2013.

Liquidity and Capital Resources

Cash Provided from Operating Activities

Net cash provided from continuing operations was \$889 in the first nine months of 2014, a decrease of \$286 from the first nine months of 2013, primarily due to lower average realized gold price and sales volume partially offset by a decrease in direct operating costs.

Table of Contents

Investing Activities

Net cash used in investing activities decreased to \$592 during first nine months of 2014 compared to \$937 during the same period of 2013, respectively. Additions to property, plant and mine development were as follows:

	Nine Months Ended September 30, 2014 2013	
North America:		
Carlin	\$ 169	\$ 182
Phoenix	22	105

Corporate and Other	42	80
Accrual basis	735	1,469
Decrease in accrued capital expenditures	31	59
Cash basis	\$ 766	\$ 1,528

Capital expenditures in North America during the first nine months of 2014 primarily related to the development of the Turf Vent Shaft project, capitalized drilling and engineering at Long Canyon, surface and underground mine development, capitalized exploration drilling, infrastructure improvements and tailings facility upgrades. Capital expenditures in South America were primarily related to the Conga project, the Yanacocha Water Treatment Project, leach pad expansions and upgrades and capitalized equipment component purchases. The majority of capital expenditures in Australia and New Zealand were for the Correnso project in Waihi, underground mine development,

processing equipment, tailings facility construction, mining equipment and equipment component purchases and infrastructure improvements. Capital expenditures in Indonesia were primarily for equipment and equipment component purchases. Capital expenditures in Africa were related to Subika Expansion studies as well as tailings facility construction and equipment and equipment component purchases. Capital expenditures in Corporate were primarily related to the Merian project and Corporate software improvements.

Capital expenditures in North America during the first nine months of 2013 primarily related to the construction of the Phoenix Copper Leach project, the development of the Turf Vent Shaft project, surface and underground mine development and infrastructure improvements in Nevada, as well as mill expansion capital in Mexico. Capital expenditures in South America were primarily related to the Conga project, surface mine development, leach pad and other infrastructure improvements and equipment purchases. The majority of capital expenditures in Australia and New Zealand were for underground mine development, tailings facility construction, mining equipment purchases and infrastructure improvements. Capital expenditures in Indonesia were primarily for equipment and equipment component purchases. Capital expenditures in Africa were primarily related to Akyem development, the Subika expansion project and the Ahafo Mill expansion project, as well as equipment purchases and surface mine development at Ahafo. Capital expenditures in Corporate were primarily related to the Merian project.

Table of Contents

Acquisitions, net. During the first nine months of 2014 we purchased the remaining 20% noncontrolling interest in the Merian project. During the first nine months of 2013 we paid \$13 in contingent payments in accordance with the 2009 Boddington acquisition agreement.

Sale of marketable securities. During the first nine months of 2014 we received \$25 primarily from the sale of Paladin Energy Ltd. securities. During the first nine months of 2013 we received \$588 primarily from the sale of Canadian Oil Sands securities.

Proceeds from sale of other assets. During the first nine months of 2014, we received \$191, of which, \$94 was from the sale of Jundee, \$57 from the sale of Midas, \$19 from the sale of equipment at Conga and \$15 from the sale of McCoy Cove. During the first nine months of 2013 we received \$55 primarily from the sale of equipment at Conga.

Financing Activities

Net cash used in financing activities was \$53 and \$292 during the first nine months of 2014 and 2013, respectively.

Proceeds from and repayment of debt. During the first nine months of 2014, we received net proceeds from debt of \$596, of which \$575 was from the 2019 term loan facility, and we paid \$581 in debt, of which \$575 was for 2014 Convertible Senior Notes. During the first nine months of 2013, we received net proceeds from debt of \$1,262 from our revolving credit facilities and other short-term debt. Proceeds from the issuance of debt were partially offset by payments of \$1,060 on our revolving credit facility. At September 30, 2014, \$162 of the \$3,000 Corporate revolving credit facility was used to secure the issuance of letters of credit, primarily supporting reclamation obligations (see “Off-Balance Sheet Arrangements” below).

Scheduled minimum debt repayments are \$5 for the remainder of 2014, \$168 in 2015, \$221 in 2016, \$771 in 2017, \$1 in 2018 and \$5,680 thereafter. We expect to be able to fund debt maturities and capital expenditures from Net cash provided by operating activities, short-term investments, existing cash balances and available credit facilities.

At September 30, 2014 and 2013, Newmont Mining Corporation was in compliance with all required debt covenants and other restrictions related to material debt agreements.

Proceeds from stock issuance, net. We received proceeds of \$2 during the first nine months of 2013, from the issuance of common stock, primarily related to employee stock sales and option exercises.

Sale of noncontrolling interests. We received \$71 and \$32 in proceeds, net of transaction costs, during the first nine months of 2014 and 2013, respectively, related to TMAC’s private placements to raise funds.

Acquisition of noncontrolling interests. In the first nine months of 2014 and 2013, we advanced certain funds to PTPI, an unrelated noncontrolling shareholder of PTNNT, in accordance with a loan agreement. Our economic interest in PTNNT did not change as a result of these transactions.

Dividends paid to noncontrolling interests. We paid dividends of \$4 and \$2 to noncontrolling interests in the first nine months of 2014 and 2013, respectively.

Dividends paid to common stockholders. We declared regular quarterly dividends totaling \$0.200 and \$1.025 per common share for the nine months ended September 30, 2014 and 2013, respectively. Additionally, Newmont Mining Corporation of Canada Limited, a subsidiary of the Company, declared regular quarterly dividends on its

exchangeable shares totaling C\$1.0485 through September 30, 2013. We paid dividends of \$102 and \$509 to common stockholders in the first nine months of 2014 and 2013, respectively.

Discontinued Operations

Net operating cash used in discontinued operations was \$10 and \$14 in the first nine months of 2014 and 2013, respectively, related to payments on the Holt property royalty.

Off-Balance Sheet Arrangements

We have the following off-balance sheet arrangements: operating leases (as discussed in Note 29 to the Consolidated Financial Statements for the year ended December 31, 2013, filed on June 13, 2014 on Form 8-K) and \$1,737 of outstanding letters of credit, surety bonds and bank guarantees (see Note 26 to the Condensed Consolidated Financial Statements).

Table of Contents

We also have sales agreements to sell copper and gold concentrates at market prices as follows (in thousands of tons):

	2014	2015	2016	2017	2018	Thereafter
Batu Hijau	313	270	-	-	-	-
Boddington	61	220	215	209	165	66
Phoenix	48	41	71	-	-	-
	422	531	286	209	165	66

Other Liquidity Matters

At September 30, 2014, the Company had \$1,778 in cash and cash equivalents, of which \$1,071 was held in foreign subsidiaries and is primarily held in U.S. dollar denominated accounts with the remainder in foreign currencies readily convertible to U.S. dollars. At September 30, 2014, \$377 of the consolidated cash and cash equivalents was attributable to noncontrolling interests primarily related to our Indonesian and Peruvian operations which is being held to fund those operations and development projects. At September 30, 2014, \$973 in consolidated cash and cash equivalents (\$616 attributable to Newmont) was held at certain foreign subsidiaries that, if repatriated, may be subject to withholding taxes. The repatriation of this cash and the applicable withholding taxes would generate foreign tax credits in the U.S. As a result, we expect that there would be no additional tax burden upon repatriation after considering the cash cost associated with the withholding taxes.

We believe that our liquidity and capital resources from U.S. operations and flow-through foreign subsidiaries are adequate to fund our U.S. operations and corporate activities.

Environmental

Our mining and exploration activities are subject to various federal and state laws and regulations governing the protection of the environment. We have made, and expect to make in the future, expenditures to comply with such laws and regulations, but cannot predict the full amount of such future expenditures. At September 30, 2014 and December 31, 2013, \$1,427 and \$1,432, respectively, were accrued for reclamation costs relating to currently or recently producing mineral properties.

In addition, we are involved in several matters concerning environmental obligations associated with former mining activities. Based upon our best estimate of our liability for these matters, \$152 and \$179 were accrued for such obligations at September 30, 2014 and December 31, 2013, respectively. We spent \$29 and \$23 during the first nine months of 2014 and 2013, respectively, for environmental obligations related to the former, primarily historic, mining activities and have classified \$26 as a current liability at September 30, 2014.

During the first nine months of 2014 and 2013, capital expenditures were approximately \$90 and \$69, respectively, to comply with environmental regulations. Ongoing costs to comply with environmental regulations have not been a significant component of operating costs.

For more information on the Company's reclamation and remediation liabilities, see Notes 4 and 26 to the Condensed Consolidated Financial Statements.

Accounting Developments

For a discussion of Recently Adopted and Recently Issued Accounting Pronouncements, see Note 2 to the Condensed Consolidated Financial Statements.

Non-GAAP Financial Measures

Non-GAAP financial measures are intended to provide additional information only and do not have any standard meaning prescribed by generally accepted accounting principles (“GAAP”). These measures should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP.

Table of Contents

Adjusted net income (loss)

Management of the Company uses Adjusted net income (loss) to evaluate the Company's operating performance, and for planning and forecasting future business operations. The Company believes the use of Adjusted net income (loss) allows investors and analysts to compare results of the continuing operations of the Company and its direct and indirect subsidiaries relating to the production and sale of minerals to similar operating results of other mining companies, by excluding exceptional or unusual items. Management's determination of the components of Adjusted net income (loss) are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts. Net income (loss) attributable to Newmont stockholders is reconciled to Adjusted net income (loss) as follows:

	Three Months Ended		Nine Months Ended	
	September		September 30,	
	2014	2013	2014	2013
Net income (loss) attributable to Newmont stockholders	\$213	\$398	\$493	\$(1,347)
Loss (income) from discontinued operations	(3)	21	16	(53)
Impairments and loss provisions	5	29	12	1,530
Tax valuation allowance	21	-	(77)	535
Restructuring and other	11	12	18	28
Asset sales	(17)	(243)	(31)	(243)
Abnormal production costs at Batu Hijau	19	-	28	-
TMAC transaction costs	-	-	-	30
Adjusted net income (loss)	\$249	\$217	\$459	\$480
Adjusted net income (loss) per share, basic	\$0.50	\$0.44	\$0.92	\$0.97
Adjusted net income (loss) per share, diluted	\$0.50	\$0.44	\$0.92	\$0.97

Costs applicable to sales per ounce/pound

Costs applicable to sales per ounce/pound are non-GAAP financial measures. These measures are calculated by dividing the costs applicable to sales of gold and copper by gold ounces or copper pounds sold, respectively. These measures are calculated on a consistent basis for the periods presented on a consolidated basis. Costs applicable to sales per ounce/pound statistics are intended to provide additional information only and do not have any standardized meaning prescribed by GAAP and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The measures are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP. Other companies may calculate these measures differently.

The following tables reconcile these non-GAAP measures to the most directly comparable GAAP measures.

Costs applicable to sales per ounce

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Costs applicable to sales ⁽¹⁾	\$893	\$912	\$2,797	\$3,055
Gold sold (thousand ounces)	1,267	1,365	3,814	3,948
Costs applicable to sales per ounce	\$705	\$668	\$733	\$774

⁽¹⁾ Includes by-product credits of \$13 and \$54 in the third quarter and first nine months of 2014, respectively and \$26 and \$75 in the third quarter and first nine months of 2013, respectively.

Table of Contents

Costs applicable to sales per pound

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Costs applicable to sales ⁽¹⁾	\$292	\$166	\$531	\$762
Copper sold (million pounds)	51	70	141	181
Costs applicable to sales per pound	\$5.73	\$2.41	\$3.75	\$4.23

⁽¹⁾ Includes by-product credits of \$6 and \$12 in the third quarter and first nine months of 2014, respectively and \$4 and \$9 in the third quarter and first nine months of 2013, respectively.

All-In Sustaining Costs

Newmont has worked to develop a metric that expands on GAAP measures such as cost of goods sold and non-GAAP measures to provide visibility into the economics of our mining operations related to expenditures, operating performance and the ability to generate cash flow from operations.

Current GAAP-measures used in the mining industry, such as cost of goods sold, do not capture all of the expenditures incurred to discover, develop, and sustain gold production. Therefore, we believe that All-in sustaining costs is a non-GAAP measure that provides additional information to management, investors, and analysts that aid in the understanding of the economics of our operations and performance compared to other producers and in the investor's visibility by better defining the total costs associated with production.

All-in sustaining cost ("AISC") amounts are intended to provide additional information only and do not have any standardized meaning prescribed by GAAP and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The measures are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP. Other companies may calculate these measures differently as a result of differences in the underlying accounting principles, policies applied and in accounting frameworks such as in International Financial Reporting Standards ("IFRS"), or by reflecting the benefit from selling non-gold metals as a reduction to AISC. Differences may also arise related to definitional differences of sustaining versus development capital activities based upon each company's internal policies.

The following disclosure provides information regarding the adjustments made in determining the All-in sustaining costs measure:

Cost Applicable to Sales - Includes all direct and indirect costs related to current production incurred to execute the current mine plan. Costs Applicable to Sales ("CAS") includes by-product credits from certain metals obtained during the process of extracting and processing the primary ore-body. CAS is accounted for on an accrual basis and excludes Depreciation and amortization and Reclamation and remediation, which is consistent with our presentation of CAS on the Condensed Consolidated Statements of Operations. In determining All-in sustaining costs, only the CAS associated with producing and selling an ounce of gold or a pound of copper is included in the measure. Therefore, the amount of CAS included in AISC is derived from the CAS presented in the Company's Condensed Consolidated

Statements of Operations. The allocation of CAS between gold and copper at the Phoenix, Boddington, and Batu Hijau mines is based upon the relative production percentage of copper and gold sold during the period.

Remediation Costs - Includes accretion expense related to asset retirement obligations (“ARO”) and the amortization of the related Asset Retirement Cost (“ARC”) for the Company’s operating properties recorded as an ARC asset. Accretion related to ARO and the amortization of the ARC assets for reclamation and remediation do not reflect annual cash outflows but are calculated in accordance with GAAP. The accretion and amortization reflect the periodic costs of reclamation and remediation associated with current gold production and are therefore included in the measure. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix, Boddington, and Batu Hijau mines.

Advanced Projects and Exploration - Includes incurred expenses related to projects that are designed to increase or enhance current gold production and gold exploration. We note that as current reserves are depleted, exploration and advance projects are necessary for us to replace the depleting reserves or enhance the recovery and processing of the current reserves. As this relates to sustaining our gold production, and is considered a continuing cost of a mining company, these costs are included in the AISC measure. These costs are derived from the Advanced projects, research and development and Exploration amounts presented in the Company’s Condensed Consolidated Statements of Operations. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix, Boddington, and Batu Hijau mines.

Table of Contents

General and Administrative - Includes cost related to administrative tasks not directly related to current gold production, but rather related to support our corporate structure and fulfilling our obligations to operate as a public company. Including these expenses in the AISC metric provides visibility of the impact that general and administrative activities have on current operations and profitability on a per ounce basis.

Other Expense, net - Includes costs related to regional administration and community development to support current production. We exclude certain exceptional or unusual expenses from Other expense, net, such as restructuring, as these are not indicative to sustaining our current operations. Furthermore, this adjustment to Other expense, net is also consistent with the nature of the adjustments made to Net income (loss) as disclosed in the Company's non-GAAP financial measure Adjusted net income (loss). The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix, Boddington, and Batu Hijau mines.

Treatment and Refining Costs - Includes costs paid to smelters for treatment and refining of our concentrates to produce the salable precious metal. These costs are presented net as a reduction of Sales.

Sustaining Capital - We determined sustaining capital as those capital expenditures that are necessary to maintain current gold production and execute the current mine plan. Capital expenditures to develop new operations, or related to projects at existing operations where these projects will enhance gold production or reserves, are considered development. We determined the breakout of sustaining and development capital costs based on a systematic review of our project portfolio in light of the nature of each project. Sustaining capital costs are relevant to the AISC metric as these are needed to maintain the Company's current gold operations and provide improved transparency related to our ability to finance these expenditures from current operations. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix, Boddington, and Batu Hijau mines.

Table of Contents

Operating margin per ounce/pound

Operating margin per ounce/pound are non-GAAP financial measures. These measures are calculated by subtracting the costs applicable to sales per ounce of gold and per pound of copper from the average realized gold price per ounce and copper price per pound, respectively. These measures are calculated on a consistent basis for the periods presented on a consolidated basis. Operating margin per ounce/pound statistics are intended to provide additional information only and do not have any standardized meaning prescribed by GAAP and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The measures are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP. Other companies may calculate these measures differently. Operating margin per ounce/pound is calculated as follows:

	Gold			
	Three Months		Nine Months	
	Ended		Ended	
	September 30,		September 30,	
	2014	2013	2014	2013

Safe Harbor Statement

Certain statements contained in this report (including information incorporated by reference) are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and are intended to be covered by the safe harbor provided for under these sections. Our forward-looking statements include, without limitation: (a) statements regarding future earnings, and the sensitivity of earnings to gold and other metal prices; (b) estimates of future mineral production and sales for specific operations and on a consolidated basis; (c) estimates of future production costs and other expenses, for specific operations and on a consolidated basis; (d) estimates of future cash flows and the sensitivity of cash flows to gold and other metal prices; (e) estimates of future capital expenditures and other cash needs for specific operations and on a consolidated basis and expectations as to the funding thereof; (f) statements as to the projected development

of certain ore deposits, including estimates of development and other capital costs, financing plans for these deposits, and expected production commencement dates; (g) estimates of future costs and other liabilities for certain environmental matters; (h) estimates of reserves, and statements regarding future exploration results and reserve replacement; (i) statements regarding modifications to Newmont's hedge positions; (j) statements regarding future transactions relating to portfolio management or rationalization efforts; and (k) projected synergies and costs associated with acquisitions and related matters.

Where we express an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, our forward-looking statements are subject to risks, uncertainties, and other factors, which could cause actual results to differ materially from future results expressed, projected, or implied by those forward-looking statements. Important factors that could cause actual results to differ materially from such forward-looking statements ("cautionary statements") are disclosed under "Risk Factors" in the Newmont Annual Report on Form 10-K for the year ended December 31, 2013, as well as in other filings with the Securities and Exchange Commission. Many of these factors are beyond Newmont's ability to control or predict. Given these uncertainties, readers are cautioned not to place undue reliance on our forward-looking statements.

All subsequent written and oral forward-looking statements attributable to Newmont or to persons acting on its behalf are expressly qualified in their entirety by the cautionary statements. Newmont disclaims any intention or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

(dollars in millions, except per ounce and per pound amounts).

Metal Prices

Changes in the market price of gold significantly affect our profitability and cash flow. Gold prices can fluctuate widely due to numerous factors, such as demand; forward selling by producers; central bank sales, purchases and lending; investor sentiment; the strength of the U.S. dollar; inflation, deflation, or other general price instability; and global mine production levels. Changes in the market price of copper also affect our profitability and cash flow. Copper is traded on established international exchanges and copper prices generally reflect market supply and demand, but can also be influenced by speculative trading in the commodity or by currency exchange rates.

Decreases in the market price of gold and copper can also significantly affect the value of our product inventory and stockpiles and it may be necessary to record a write-down to the net realizable value ("NRV"). NRV represents the estimated future sales price based on short-term and long-term metals prices, less estimated costs to complete production and bring the product to sale. The primary factors that influence the need to record write-downs of stockpiles and product inventory include short-term and long-term metals prices and costs for production inputs such as labor, fuel and energy, materials and supplies, as well as realized ore grades and recovery rates. The significant assumptions in determining the stockpile NRV for each mine site reporting unit at September 30, 2014 included production cost and capitalized expenditure assumptions unique to each operation, a long-term gold price of \$1,300 per ounce, a long-term copper price of \$3.00 per pound and an Australian to U.S. dollar exchange rate of \$ 0.920.

The NRV measurement involves the use of estimates and assumptions unique to each mining operation regarding current and future operating and capital costs, metal recoveries, production levels, commodity prices, proven and probable reserve quantities, engineering data and other factors. A high degree of judgment is involved in determining such assumptions and estimates and no assurance can be given that actual results will not differ significantly from those estimates and assumptions.

Hedging

Our strategy is to provide shareholders with leverage to changes in gold and copper prices by selling our production at spot market prices. Consequently, we do not hedge our gold and copper sales. We have and will continue to manage certain risks associated with commodity input costs, interest rates and foreign currencies using the derivative market.

By using derivatives, we are affected by credit risk, market risk and market liquidity risk. Credit risk is the risk that a third party might fail to fulfill its performance obligations under the terms of a financial instrument. We mitigate credit risk by entering into derivatives with high credit quality counterparties, limiting the amount of exposure to each counterparty, and monitoring the financial condition of the counterparties. Market risk is the risk that the fair value of a derivative might be adversely affected by a change in underlying commodity prices, interest rates, or currency exchange rates, and that this in turn affects our financial condition. We manage market risk by establishing and monitoring parameters that limit the types and degree of market risk that may be undertaken. We mitigate this potential risk to our financial condition by establishing trading agreements with counterparties under which we are not required to post any collateral or make any margin calls on our derivatives. Our counterparties cannot require settlement solely because of an adverse change in the fair value of a derivative. Market liquidity risk is the risk that a derivative cannot be eliminated quickly, by either liquidating it or by establishing an offsetting position. Under the terms of our trading agreements, counterparties cannot require us to immediately settle outstanding derivatives, except upon the occurrence of customary events of default such as covenant breaches, including financial covenants, insolvency or bankruptcy. We further mitigate market liquidity risk by spreading out the maturity of our derivatives

over time.

69

Table of Contents

Cash Flow Hedges

Foreign Currency Exchange Risk

We had the following foreign currency derivative contracts outstanding at September 30, 2014:

	Expected Maturity Date					Total/Average
	2014	2015	2016	2017	2018	
A\$ Operating Fixed Forward Contracts:						
A\$ notional (millions)	75	270	158	105	6	614
Average rate (\$/A\$)	0.99	0.98	0.95	0.93	0.92	0.96
Expected hedge ratio	19 %	18 %	11 %	7 %	4 %	
NZ\$ Operating Fixed Forward Contracts:						
NZ\$ notional (millions)	18	56	11	-	-	85
Average rate (\$/NZ\$)	0.81	0.80	0.80	-	-	0.80
Expected hedge ratio	68 %	45 %	16 %	-	-	

The fair value of the A\$ foreign currency operating derivative contracts was a net liability position of \$67 at September 30, 2014 and \$96 at December 31, 2013. The fair value of the NZ\$ foreign currency derivative contracts was a net liability position of \$3 at September 30, 2014 and a net asset position of \$1 at December 31, 2013.

Diesel Price Risk

We had the following diesel derivative contracts outstanding at September 30, 2014:

	Expected Maturity Date				Total/Average
	2014	2015	2016	2017	
Diesel Fixed Forward Contracts:					
Diesel gallons (millions)	7	22	13	4	46
Average rate (\$/gallon)	2.82	2.78	2.70	2.69	2.75
Expected Nevada hedge ratio	73 %	58 %	33 %	12 %	

Commodity Price Risk

Our provisional copper and gold sales contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of the gold and copper concentrates at the prevailing indices' prices at the time of sale. The embedded derivative, which does not qualify for hedge accounting, is marked to market through earnings each period prior to final settlement.

The Company recorded an average price of \$3.13 per pound before mark-to-market adjustments and treatment and refining charges during the three and nine months ended September 30, 2014. During these same periods, changes in copper prices resulted in a provisional pricing mark-to-market loss of \$4 (\$0.08 per pound) and loss of \$15 (\$0.11 per pound), respectively. At September 30, 2014, Newmont had copper sales of 59 million pounds priced at an average of \$3.04 per pound, subject to final pricing over the next several months. Each \$0.10 change in the price for provisionally priced copper sales would have an approximate \$3 effect on our net income (loss) attributable to

Newmont stockholders. The LME closing settlement price at September 30, 2014 for copper was \$3.06 per pound.

The Company recorded an average price of \$1,280 and \$1,286 per ounce before mark-to-market adjustments and treatment and refining charges during the three and nine months ended September 30, 2014. During these same periods, changes in gold prices resulted in a provisional pricing mark-to-market loss of \$6 (\$5 per ounce) and loss of \$2 (nil per ounce), respectively. At September 30, 2014, Newmont had gold sales of 112,000 ounces priced at an average of \$1,234 per ounce, subject to final pricing over the next several months. Each \$25 change in the price for provisionally priced gold sales would have an approximate \$2 effect on our net income (loss) attributable to Newmont stockholders. The London P.M. closing settlement price at September 30, 2014 for gold was \$1,217 per ounce.

ITEM 4. CONTROLS AND PROCEDURES.

During the fiscal period covered by this report, the Company's management, with the participation of the Chief Executive Officer and Chief Financial Officer of the Company, carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the required time periods and are designed to ensure that information required to be disclosed in its reports is accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

September 1, 2014 through September 30, 2014	4,334	(1) 25.41	-	N/A

(1) Represents shares delivered to the Company from restricted stock units held by a Company employee upon vesting for the purpose of covering the recipient's tax withholding obligations.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. MINE SAFETY DISCLOSURES.

At Newmont, safety is a core value and we strive for superior performance. Our health and safety management system, which includes detailed standards and procedures for safe production, addresses topics such as employee training, risk management, workplace inspection, emergency response, accident investigation and program auditing. In addition to strong leadership and involvement from all levels of the organization, these programs and procedures form the cornerstone of safety at Newmont, ensuring that employees are provided a safe and healthy environment and are intended to reduce workplace accidents, incidents and losses, comply with all mining-related regulations and provide support for both regulators and the industry to improve mine safety.

In addition, we have established our “Rapid Response” process to mitigate and prevent the escalation of adverse consequences if existing risk management controls fail, particularly if an incident may have the potential to seriously impact the safety of employees, the community or the environment. This process provides appropriate support to an affected site to complement their technical response to an incident, so as to reduce the impact by considering the environmental, strategic, legal, financial and public image aspects of the incident, to ensure communications are being carried out in accordance with legal and ethical requirements and to identify actions in addition to those addressing the immediate hazards.

The operation of our U.S. based mines is subject to regulation by the Federal Mine Safety and Health Administration (“MSHA”) under the Federal Mine Safety and Health Act of 1977 (the “Mine Act”). MSHA inspects our mines on a regular basis and issues various citations and orders when it believes a violation has occurred under the Mine Act. Following passage of The Mine Improvement and New Emergency Response Act of 2006, MSHA significantly increased the numbers of citations and orders charged against mining operations. The dollar penalties assessed for citations issued has also increased in recent years.

Newmont is required to report certain mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K, and that required information is included in Exhibit 95 and is incorporated by reference into this Quarterly Report.
