(in millions, except per share data, unless otherwise indicated)

1. Basis of Presentation

The accompanying unaudited condensed consolidated interim financial statements include the accounts of R.R. Donnelley & Sons Company and its subsidiaries (the “Company” or “RR Donnelley”) and have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information and in accordance with the rules and regulations of the United States Securities and Exchange Commission (the “SEC”). Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. These unaudited condensed consolidated interim financial statements reflect all normal and recurring adjustments that are, in the opinion of management, necessary for a fair presentation of the results for the interim periods and should be read in conjunction with the consolidated financial statements and the related notes thereto included in the Company’s latest Annual Report on Form 10-K for the year ended December 31, 2014 filed with the SEC on February 25, 2015. Operating results for the six months ended June 30, 2015 are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2015. All significant intercompany transactions have been eliminated in consolidation. These unaudited condensed consolidated interim financial statements include estimates and assumptions of management that affect the amounts reported in the condensed consolidated financial statements. Actual results could differ from these estimates.

Note 2. Acquisitions and Dispositions

2015 Acquisitions

On June 8, 2015, the Company acquired Courier Corporation (“Courier”), a leader in digital printing and publishing primarily in the United States, specializing in educational, religious and trade books. The purchase price for Courier was \$137.3 million in cash and 8.0 million shares of RR Donnelley common stock, or a total transaction value of \$291.5 million based on the Company’s closing share price on June 5, 2015, plus the assumption of Courier’s debt of \$78.2 million. Restructuring and Impairment Charges

For the three and six months ended June 30, 2015, the Company recorded net restructuring charges of \$6.8 million and \$21.0 million, respectively, for employee termination costs for 1,201 employees, of whom 1,173 were terminated as of June 30, 2015. These charges primarily related to one facility closure in the International segment, one facility closure in the Variable Print segment and the reorganization of certain operations. Additionally, the Company incurred lease termination and other restructuring charges of \$4.8 million and \$8.4 million, respectively, for the three and six months ended June 30, 2015. For the three and six months ended June 30, 2015, the Company also recorded \$0.1 million and \$0.8 million, respectively, of net impairment charges primarily related to buildings and machinery and equipment associated with facility closures.

For the three and six months ended June 30, 2014, the Company recorded net restructuring charges of \$9.1 million and \$23.0 million, respectively, for employee termination costs for 408 employees, substantially all of whom were terminated as of June 30, 2015. These charges primarily related to the integration of Consolidated Graphics, including the closure of six Consolidated Graphics facilities as well as one additional facility closure within the Variable Print segment, one facility closure in the Publishing and Retail Services segment and the reorganization of certain operations. Additionally, the Company incurred lease termination and other restructuring charges of \$6.8 million and \$10.9 million, respectively, for the three and six months ended June 30, 2014, including charges related to multi-employer pension plan withdrawal obligations as a result of facility closures. For the three and six months ended June 30, 2014, the Company also recorded \$3.1 million and \$9.8 million, respectively, of impairment charges primarily related to buildings and machinery and equipment and trade names associated with facility closings. The fair values of the buildings and machinery and equipment were determined to be Level 3 under the fair value hierarchy and were estimated based on discussions with real estate brokers, review of comparable properties, if available, discussions with machinery and equipment brokers, dealer quotes and internal expertise related to the current marketplace conditions.

Other Charges

For the three and six months ended June 30, 2015, the Company recorded other charges of \$20.5 million and \$21.8 million, respectively, including integration charges of \$19.1 million for payments made to certain Courier employees upon the termination of Courier’s executive severance plan, immediately prior to the acquisition.

For the three and six months ended June 30, 2014, the Company recorded other charges of \$3.8 million and \$24.3 million, respectively, for multi-employer pension plan withdrawal obligations unrelated to facility closures. The total liabilities for the withdrawal obligations associated with the Company’s decision to withdraw from multi-employer pension plans included in accrued liabilities and other noncurrent liabilities are \$11.1 million and \$85.0 million, respectively, as of June 30, 2015.

The Company’s withdrawal liabilities could be affected by the financial stability of other employers participating in the plans and any decisions by those employers to withdraw from the plans in the future. While it is not possible to quantify the potential impact of future events or circumstances, reductions in other employers’ participation in multi-employer pension plans, including certain plans from which the Company has previously withdrawn, could have a material impact on the Company’s previously estimated withdrawal liabilities, consolidated results of operations,

financial position or cash flows.

As a result of the acquisition of Courier, the Company participates in two multi-employer pension plans, one of which the Company's contributions account for approximately 70% of the total plan contributions. Both plans are estimated to be underfunded and have a Pension Protection Act zone status of critical ("red"). Red status identifies plans that are less than 65% funded.

Restructuring Reserve

The restructuring reserve as of December 31, 2014 and June 30, 2015, and changes during the six months ended June 30, 2015, were as follows:

	December 31, 2014	Restructuring Charges	Foreign Exchange and Other	Cash Paid	June 30, 2015
Employee terminations	\$ 13.0	\$ 21.0	\$ (0.4)	\$(19.4)	\$14.2

R.R. DONNELLEY & SONS COMPANY AND SUBSIDIARIES (“RR DONNELLEY”)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(in millions, except per share data, unless otherwise indicated)

The current portion of restructuring reserves of \$22.7 million at June 30, 2015 was included in accrued liabilities, while the long-term portion of \$37.6 million, primarily related to multi-employer pension plan withdrawal obligations related to facility closures and lease termination costs, was included in other noncurrent liabilities at June 30, 2015.

The Company anticipates that payments associated with the employee terminations reflected in the above table will be substantially completed by June 2016.

Payments on all of the Company’s multi-employer pension plan withdrawal obligations are scheduled to be substantially completed by 2034. Changes based on uncertainties in these estimated withdrawal obligations could affect the ultimate charges related to multi-employer pension plan withdrawals.

The restructuring liabilities classified as “lease terminations and other” consisted of lease terminations, other facility closing costs and contract termination costs. Payments on certain of the lease obligations are scheduled to continue until 2026. Market conditions and the Company’s ability to sublease these properties could affect the ultimate charges related to the lease obligations. Any potential recoveries or additional charges could affect amounts reported in the Company’s financial statements.

9. Earnings per Share

Basic earnings per share is calculated by dividing net earnings attributable to RR Donnelley common shareholders by the weighted average number of common shares outstanding for the period. In computing diluted earnings per share, basic earnings per share is adjusted for the assumed issuance of all potentially dilutive share-based awards, including stock options, restricted stock units and performance share units. Performance share units are considered anti-dilutive and excluded if the performance targets upon which the issuance of the shares is contingent have not been achieved and the respective performance period has not been completed as of the end of the current period. Additionally, stock options are considered anti-dilutive when the exercise price exceeds the average of the Company's stock price during the applicable period.

12. Commitments and Contingencies

The Company is subject to laws and regulations relating to the protection of the environment. The Company provides for expenses associated with environmental remediation obligations when such amounts are probable and can be reasonably estimated. Such accruals are adjusted as new information develops or circumstances change and are generally not discounted. The Company has been designated as a potentially responsible party or has received claims in twelve active federal and state Superfund and other multiparty remediation sites. In addition to these sites, the Company may also have the obligation to remediate nine other previously and currently owned facilities. At the Superfund sites, the Comprehensive Environmental Response, Compensation and Liability Act provides that the Company’s liability could be joint and several, meaning that the Company could be required to pay an amount in excess of its proportionate share of the remediation costs.

The Company’s understanding of the financial strength of other potentially responsible parties at the multiparty sites and of other liable parties at the previously owned facilities has been considered, where appropriate, in the determination of the Company’s estimated liability. The Company established reserves, recorded in accrued liabilities and other noncurrent liabilities, that it believes are adequate to cover its share of the potential costs of remediation at each of the multiparty sites and the previously and currently owned facilities. It is not possible to quantify with certainty the potential impact of actions regarding environmental matters, particularly remediation and other compliance efforts that the Company may undertake in the future. However, in the opinion of management, compliance with the present environmental protection laws, before taking into account estimated recoveries from third parties, will not have a material effect on the Company’s consolidated results of operations, financial position or cash flows.

From time to time, the Company’s customers and others file voluntary petitions for reorganization under United States bankruptcy laws. In such cases, certain pre-petition payments received by the Company from these parties could be considered preference items and subject to return. In addition, the Company is party to certain litigation arising in the ordinary course of business. Management believes that the final resolution of these preference items and litigation will not have a material effect on the Company’s consolidated results of operations, financial position or cash flows.

(a) As of June 30, 2015 and December 31, 2014, the interest rate on the 11.25% senior notes due February 1, 2019 was 12.75% as a result of downgrades in the ratings of the notes by the rating agencies.

(b) Includes fair value adjustments to the 8.25% senior notes due March 15, 2019 related to the Company’s fair value hedges, miscellaneous debt obligations and capital leases.

The fair values of the senior notes and debentures, which were determined using the market approach based upon interest rates available to the Company for borrowings with similar terms and maturities, were determined to be Level 2 under the fair value hierarchy. The fair value of the Company’s debt was greater than its book value by approximately \$311.5 million and \$259.5 million at June 30, 2015 and December 31, 2014, respectively.

Edgar Filing: RR Donnelley & Sons Co - Form 10-Q

Effective September 9, 2014, the aggregate revolving commitments of the Lenders under the Company's senior secured revolving credit facility (the "Credit Agreement") were increased from \$1.15 billion to \$1.5 billion and the expiration date of the Credit Agreement was extended from October 15, 2017 to September 9, 2019.

The Credit Agreement is subject to a number of covenants, including a minimum Interest Coverage Ratio and a maximum Leverage Ratio, as defined and calculated pursuant to the Credit Agreement, that, in part, restrict the Company's ability to incur additional indebtedness, create liens, engage in mergers and consolidations, make restricted payments and dispose of certain assets. The Credit Agreement generally allows annual dividend payments of up to \$225.0 million in aggregate, though additional dividends may be allowed subject to certain conditions.

The weighted average interest rate on borrowings under the Credit Agreement was 2.0% during the six months ended June 30, 2015 and 2014.

Cash on hand and borrowings under the Credit Agreement were used to pay the \$200.0 million 5.50% senior notes that matured on May 15, 2015.

R.R. DONNELLEY & SONS COMPANY AND SUBSIDIARIES (“RR DONNELLEY”)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(in millions, except per share data, unless otherwise indicated)

Cash on hand and borrowings under the Credit Agreement were used to pay the \$258.2 million 4.95% senior notes that matured on April 1, 2014.

On March 20, 2014, the Company issued \$400.0 million of 6.00% senior notes due April 1, 2024. Interest on the notes is payable semi-annually on April 1 and October 1, and commenced on October 1, 2014. The net proceeds from the offering along with borrowings under the Credit Agreement were used to repurchase \$211.1 million of the 8.25% senior notes due March 15, 2019, \$100.0 million of the 7.25% senior notes due May 15, 2018, and \$50.0 million of the 7.625% senior notes due June 15, 2020. The repurchases resulted in a pre-tax loss on debt extinguishment of \$77.1 million for the six months ended June 30, 2014 related to the premiums paid, unamortized debt issuance costs, elimination of the \$2.8 million fair value adjustment on the 8.25% senior notes and other expenses.

Interest income was \$1.2 million and \$2.9 million for the three and six months ended June 30, 2015, respectively, and \$2.2 million and \$4.7 million for the three and six months ended June 30, 2014, respectively.

14. Derivatives

All derivatives are recorded as other current or noncurrent assets or other current or noncurrent liabilities in the Condensed Consolidated Balance Sheets at their respective fair values. Unrealized gains and losses related to derivatives are recorded in other comprehensive income (loss), net of applicable income taxes, or in the Condensed Consolidated Statements of Operations, depending on the purpose for which the derivative is held. For derivatives designated and that qualify as cash flow hedges, the effective portion of the unrealized gain or loss related to the derivatives are generally recorded in other comprehensive income (loss) until the transaction affects earnings. For derivatives designated and that qualify as fair value hedges, the gain or loss on the derivative, as well as the offsetting gain or loss on the hedged item attributable to the hedged risk, are recognized in the Condensed Consolidated Statements of Operations. Changes in the fair value of derivatives that do not meet the criteria for designation as a hedge at inception, or fail to meet the criteria thereafter, are recognized currently in the Condensed Consolidated Statements of Operations. At the inception of a hedge transaction, the Company formally documents the hedge relationship and the risk management objective for undertaking the hedge. In addition, the Company assesses both at inception of the hedge and on an ongoing basis, whether the derivative in the hedging transaction has been highly effective in offsetting changes in fair value or cash flows of the hedged item and whether the derivative is expected to continue to be highly effective. The impact of any ineffectiveness is also recognized currently in the Condensed Consolidated Statements of Operations.

The Company is exposed to the impact of foreign currency fluctuations in certain countries in which it operates. The exposure to foreign currency movements is limited in many countries because the operating revenues and expenses of its various subsidiaries and business units are substantially in the local currency of the country in which they operate. To the extent borrowings, sales, purchases, revenues, expenses or other transactions are not in the local currency of the subsidiary or operating unit, the Company is exposed to currency risk. Periodically, the Company uses foreign exchange forward contracts to hedge exposures resulting from foreign exchange fluctuations. Accordingly, the gains and losses associated with the fair values of foreign currency exchange contracts are recognized currently in the Condensed Consolidated Statements of Operations and are generally offset by gains and losses on underlying

payables, receivables and net investments in foreign subsidiaries. The Company does not use derivative financial instruments for trading or speculative purposes. The aggregate notional value of the forward contracts at June 30, 2015 and December 31, 2014 was \$348.5 million and \$377.2 million, respectively. The fair values of foreign exchange forward contracts were determined to be Level 2 under the fair value hierarchy and are valued using market exchange rates.

On March 13, 2012, the Company entered into interest rate swap agreements to manage interest rate risk exposure, effectively changing the interest rate on \$400.0 million of its fixed-rate senior notes to a floating-rate based on LIBOR plus a basis point spread. The interest rate swaps, with a notional value of \$400.0 million at inception, were designated as fair value hedges against changes in the value of the Company's \$450.0 million 8.25% senior notes due March 15, 2019, which were attributable to changes in the benchmark interest rate. During the six months ended June 30, 2014, the Company repurchased \$211.1 million of the 8.25% senior notes due March 15, 2019, and related interest rate swaps with a notional amount of \$210.0 million were terminated, resulting in payments of \$4.2 million for the fair value of the interest rate swaps. As a result of the termination, the remaining notional value of the interest rate swap agreements as of June 30, 2015 was \$190.0 million. The interest rate swaps were designated as fair value hedges against changes in the value of \$238.9 million of the Company's 8.25% senior notes due March 15, 2019.

R.R. DONNELLEY & SONS COMPANY AND SUBSIDIARIES (“RR DONNELLEY”)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(in millions, except per share data, unless otherwise indicated)

On April 9, 2010, the Company entered into interest rate swap agreements to manage interest rate risk exposure, effectively changing the interest rate on \$600.0 million of its fixed-rate senior notes to a floating-rate LIBOR plus a basis point spread. The interest rate swaps, with a notional value of \$600.0 million at inception, are designated as fair value hedges against changes in the value of the Company’s 4.95% senior notes due April 1, 2014, which are attributable to changes in the benchmark interest rate. During March 2012, the Company repurchased \$341.8 million of the 4.95% senior notes due April 1, 2014, and related interest rate swaps with a notional value of \$342.0 million were terminated, resulting in proceeds of \$11.0 million for the fair value of the interest rate swaps. In conjunction with the 4.95% senior notes’ maturity in April 2014, the remaining interest rate swap agreements matured.

The fair values of interest rate swaps were determined to be Level 2 under the fair value hierarchy and were developed using the market standard methodology of netting the discounted future fixed cash payments and the discounted expected variable cash receipts. The variable cash receipts are based on the expectation of future interest rates derived from observed market interest rate curves. In addition, credit valuation adjustments, which consider the impact of any credit enhancements to the contracts, are incorporated in the fair values to account for potential nonperformance risk. On at least a quarterly basis, the Company evaluates the credit value adjustments of the interest rate swap agreements, which take into account the possibility of counterparty and the Company’s own default.

The Company’s foreign exchange forward contracts and interest rate swaps are subject to enforceable master netting agreements that allow the Company to settle positive and negative positions with the respective counterparties. The Company settles foreign exchange forward contracts on a net basis when possible. Foreign exchange forward contracts that can be settled on a net basis are presented net in the Condensed Consolidated Balance Sheets. Interest rate swaps are settled on a gross basis and presented gross in the Condensed Consolidated Balance Sheets.

The Company manages credit risk for its derivative positions on a counterparty-by-counterparty basis, considering the net portfolio exposure with each counterparty, consistent with its risk management strategy for such transactions. The Company’s agreements with each of its counterparties contain a provision where the Company could be declared in default on its derivative obligations if it either defaults or, in certain cases, is capable of being declared in default of any of its indebtedness greater than specified thresholds. These agreements also contain a provision where the Company could be declared in default subsequent to a merger or restructuring type event if the creditworthiness of the resulting entity is materially weaker.

At June 30, 2015 and December 31, 2014, the total fair value of the Company’s foreign exchange forward contracts, which were the only derivatives not designated as hedges, and fair value hedges, along with the accounts in the Condensed Consolidated Balance Sheets in which the fair value amounts were included, were as follows:

	June 30, 2015	December 31, 2014

15. Venezuela Currency Remeasurement

As described in Note 2, Acquisitions and Dispositions, on April 29, 2015 the Company sold its 50.1% interest in its Venezuelan operating entity.

Since January 1, 2010, the three-year cumulative inflation for Venezuela using the blended Consumer Price Index and National Consumer Price Index has exceeded 100%. As a result, Venezuela’s economy is considered highly inflationary and the financial statements of the Company’s Venezuelan subsidiaries were remeasured as if the functional currency were the U.S. Dollar. Prior to March 31, 2014, the financial statements were remeasured based on the official rate determined by the government of Venezuela.

During the first quarter of 2014, the Venezuelan government expanded the operation of the Supplementary System for the Administration of Foreign Currency (“SICAD 1”) currency exchange mechanism for use with certain transactions. In addition, the Venezuelan government also began operating the SICAD 2 exchange which the government indicated was available to all entities for all transactions. The Venezuelan government indicated that the official rate of 6.3 Bolivars per U.S. Dollar would be reserved only for settlement of U.S. Dollar denominated purchases of “essential goods and services.” As of June 30, 2014, the SICAD 1 and SICAD 2 exchange rates were 10.6 and 50.0 Bolivars per U.S. Dollar, respectively. Beginning March 31, 2014, certain assets of the Company’s Venezuelan subsidiaries were remeasured at the SICAD 2 rate as the Company believed those assets would ultimately be utilized to settle U.S. Dollar denominated liabilities using SICAD 2. Remaining net monetary assets were remeasured at the SICAD 1 rate, as the Company believed SICAD 1 would be applicable for future transactions, and dividend remittances, if any, from the Company’s Venezuelan subsidiaries. During the three months ended June 30, 2014, certain transactions pending approval at the official rate of 6.3 Bolivars per U.S. Dollar were approved, resulting in foreign exchange gains. As a result of the remeasurement at the SICAD 1 and SICAD 2 rates and foreign exchange gains resulting from certain transactions approved at the official rate during the three months ended June 30, 2014, a net pre-tax gain of \$3.2 million (\$0.9 million after-tax) was recognized in net investment and other expense, of which \$0.7 million was included in income attributable to noncontrolling interests. During the six months ended June 30, 2014, a pre-tax loss, net of foreign exchange gains, of \$18.6 million (\$14.0 million after-tax) was recognized in net investment and other expense, of which \$6.4 million was included in loss attributable to noncontrolling interests, as a result of remeasurement at the SICAD 1 and SICAD 2 rates.

In February 2015, the Venezuelan government discontinued the SICAD 2 rate and introduced a new currency exchange rate mechanism (“SIMADI”). As of February 28, 2015, monetary assets and liabilities of the Company’s Venezuelan subsidiaries were remeasured at the SIMADI rate as the Company believed the SIMADI was the exchange rate mechanism most likely to be available to the Company’s Venezuelan subsidiaries to settle U.S. Dollar denominated transactions. As of March 31, 2015, the SIMADI rate was 193 Bolivars per U.S. Dollar.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(in millions, except per share data, unless otherwise indicated)

As a result of the remeasurement at the SIMADI rate and the related impact of the devaluation, during the six months ended June 30, 2015, a pre-tax loss of \$30.3 million (\$27.5 million after-tax) was recognized in net investment and other expense, of which \$10.5 million was included in loss attributable to noncontrolling interest.

16. New Accounting Pronouncements

In April 2015, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update No. 2015-03 “Interest—Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs” (“ASU 2015-03”), which requires debt issuance costs to be presented in the balance sheet as a direct deduction from the carrying value of the associated debt. ASU 2015-03 requires retrospective application and represents a change in accounting principle. The update becomes effective on January 1, 2016 and early adoption of the standard is permitted. The Company plans to adopt the standard in the fourth quarter of 2015. Based on the balances as of June 30, 2015, the adoption will require the Company to reclassify \$28.0 million of unamortized debt issuance costs from "Other noncurrent assets" to "Long-term debt."

In May 2014, the FASB issued Accounting Standards Update No. 2014-09 “Revenue from Contracts with Customers (Topic 606)” (“ASU 2014-09”), which outlines a single comprehensive model for entities to use in accounting for revenue using a five-step process that supersedes virtually all existing revenue guidance. ASU 2014-09 also requires additional quantitative and qualitative disclosures. On April 1, 2015, the FASB proposed a one year deferral of the effective date of ASU 2014-09 to January 1, 2018. Early adoption of the standard would be permitted in the first quarter of 2017. The standard allows the option of either a full retrospective adoption, meaning the standard is applied to all periods presented, or a modified retrospective adoption, meaning the standard is applied only to the most current period. The Company is evaluating the impact of the provisions of ASU 2014-09 and the related deferral and currently anticipates applying the modified retrospective approach when adopting the standard.

The following recently issued standards are not expected to have a material impact on the Company’s Consolidated Financial Statements:

- Accounting Standards Update No. 2015-11 “Inventory (Topic 330): Simplifying the Measurement of Inventory”

- Accounting Standards Update No. 2014-12 “Compensation—Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period”

The following standards were effective for and adopted by the Company in 2015. The adoption of these standards did not have a material impact on the Company’s consolidated financial position, results of operations or cash flows:

- Accounting Standards Update No. 2015-10 “Technical Corrections and Improvements: Amendments to the FASB Accounting Standards Codification”

Executive Overview

Second Quarter Overview

Net sales decreased by \$154.4 million, or 5.3%, for the second quarter of 2015 compared to the same period in the prior year. On a proforma basis, the Company’s net sales decreased by approximately \$170.2 million, or 5.7%, (see Note 2, Acquisitions and Dispositions, to the Condensed Consolidated Financial Statements). There was a \$59.0 million, or 2.1%, decrease due to foreign exchange rates. The net sales decrease was primarily due to volume declines and decreases in pass-through paper sales in the Publishing and Retail Services segment, volume declines in the Variable Print segment and a \$27.7 million, or 1.0% decrease, due to the impact of the currency devaluation in Venezuela and the sale of the Company’s Venezuelan operating entity. The decreases were partially offset by increases in volume in the Strategic Services segment and the acquisition of Courier.

Net cash provided by operating activities for the three months ended June 30, 2015 was \$205.3 million as compared to \$150.1 million for the three months ended June 30, 2014. The increase in net cash provided by operating activities during the three months ended June 30, 2015 reflected the timing of customer and supplier payments and lower pension and other postretirement benefit plan contributions, partially offset by higher payments for interest and income taxes.

The Company continues to take actions across all platforms to reduce its cost structure and enhance productivity. During the six months ended June 30, 2015, the Company realized cost savings from restructuring activities, including the reorganization of administrative and support functions across all segments as well as continuing facility consolidations and reorganizations across platforms. Additionally, cost savings were realized as a result of synergies from the acquisitions of Consolidated Graphics and Esselte and lower incentive compensation expense.

Proposed Spinoff Transactions

On August 4, 2015, the Company announced that its Board of Directors intends to create three independent public companies: (i) a financial communications services company with estimated 2014 net sales of approximately \$1 billion (the “Financial Services Company”), (ii) a publishing and retail-centric print services company with estimated 2014 net sales of approximately \$3.5 billion (the “Publishing and Retail Services Company”), and (iii) a multichannel communications management company with estimated 2014 net sales of approximately \$7 billion (the “Multichannel Communications Management Company”). The Financial Services Company is expected to consist of the Company’s current financial reporting unit of the Company’s Strategic Services segment. The Publishing and Retail Services Company is expected to consist of the Company’s current Publishing and Retail Services segment as well as the office products reporting unit from the Company’s Variable Print segment, the Europe reporting unit of the Company’s International segment and certain Mexican operations currently within the Latin America reporting unit of the Company’s International segment. The Multichannel Communications Management Company is expected to consist of the current Variable Print segment except for the office products reporting unit that will become part of the Publishing and Retail Services Company, the logistics, sourcing, and digital and creative solutions reporting units within the current Strategic Services segment, and the current International segment except for the Europe reporting unit and certain Mexican operations that will become part of the Publishing and Retail Services Company. The transaction is expected to take the form of a tax-free distribution to RR Donnelley shareholders of shares of stock in two new, independent, publicly traded companies, the Financial Services Company and the Publishing and Retail Services Company.

The transactions are subject to customary conditions, including obtaining rulings from the Internal Revenue Service and/or tax opinions, execution of inter-company agreements and final approval by the Company's Board of Directors. The Company expects to complete the transactions prior to the end of 2016, but there can be no assurance that the transactions will be completed on the anticipated timeline or at all or that the terms of the transactions will not change. See "Part II, Item 1A – Risk Factors" for certain risk factors relating to the proposed transactions. The disclosures within this Management Discussion and Analysis of Financial Condition and Results of Operations are on a consolidated Company basis, reflect the Company's current operating and management structure, and do not take into account the proposed transactions.

OUTLOOK

Competition and Strategy

Technological changes, including the electronic distribution of documents and data, online distribution and hosting of media content, and advances in digital printing, print-on-demand and Internet technologies, continue to impact the market for the Company's products and services. One of the Company's competitive strengths is that it offers a wide array of communications products and services, including print, which provide differentiated solutions for its customers. The Company works with its customers to create, manage, deliver and optimize their multi-channel communications strategies. The Company has and will continue to develop and expand its creative and design, content management, digital and print production, supply chain management and distribution services to address its customers' evolving needs while supporting the strategic objective of becoming a leading global provider of integrated communication services.

The print and related services industry, in general, continues to have excess capacity and remains highly competitive. Despite consolidation in recent years, the industry remains highly fragmented. Across the Company's range of products and services, competition is based primarily on price in addition to quality and the ability to service the special needs of customers. Management expects that prices for the Company's products and services will continue to

be a focal point for customers in coming years. Therefore, the Company believes it needs to continue to lower its cost structure and continue to differentiate its product and service offerings.

The impact of digital technologies has been felt in many print products. Electronic communication and transaction technology has eliminated or reduced the role of many traditional printed products and has continued to drive electronic substitution in directory and statement printing, in part driven by environmental concerns and cost pressures at key customers. In addition, e-book substitution is having a continuing impact on consumer print book volume, though adoption rates are stabilizing, and a limited impact on educational and specialty books. Digital technologies have also impacted printed magazines, as some advertiser spending has moved from print to electronic media. The future impact of technology on the Company's business is difficult to predict and could result in additional expenditures to restructure impacted operations or develop new technologies. In addition, the Company has made targeted acquisitions and investments in the Company's existing business to offer customers innovative services and solutions that further secure the Company's position as a technology leader in the industry.

The acquisitions of Courier, Consolidated Graphics, Esselte and MultiCorpora support the Company's strategic objective of generating profitable growth and improved cash flow and liquidity through targeted acquisitions. These acquisitions have enhanced the Company's existing capabilities and ability to serve its customers and have provided cost savings through the combination of best practices, complementary products and manufacturing and distribution capabilities.

The Company has implemented a number of strategic initiatives to reduce its overall cost structure and improve efficiency, including the restructuring, reorganization and integration of operations and streamlining of administrative and support activities. Future cost reduction initiatives could include the reorganization of operations and the consolidation of facilities. Implementing such initiatives might result in future restructuring or impairment charges, which may be substantial. Management also reviews the Company's operations and management structure on a regular basis to balance appropriate risks and opportunities to maximize efficiencies and to support the Company's long-term strategic goals.

Seasonality

Advertising and consumer spending trends affect demand in several of the end-markets served by the Company. Historically, demand for printing of magazines, catalogs, retail inserts and books is higher in the second half of the year driven by increased advertising pages within magazines, and holiday volume in catalogs, retail inserts and books. Partially offsetting this pattern, demand for financial print and related services is typically stronger in the first half of the year due to annual compliance requirements. As a result of the acquisition of Consolidated Graphics, which provides significant campaign-related printed products, quarterly and annual results may also be impacted by U.S. election cycles. These typical seasonal patterns can be impacted by overall trends in the U.S. and world economy. The Company expects the seasonality impact in 2015 and future years to be in line with historical patterns.

Raw Materials

The primary raw materials the Company uses in its print businesses are paper and ink. The Company negotiates with leading suppliers to maximize its purchasing efficiencies and uses a wide variety of paper grades, formats, ink formulations and colors. In addition, a substantial amount of paper used by the Company is supplied directly by customers. Variations in the cost and supply of certain paper grades and ink formulations used in the manufacturing process may affect the Company's consolidated financial results. Paper prices fluctuated during the first six months of 2015, and volatility in the future is expected. Generally, customers directly absorb the impact of changing prices on customer-supplied paper. With respect to paper purchased by the Company, the Company has historically passed most changes in price through to its customers. Contractual arrangements and industry practice should support the Company's continued ability to pass on any future paper price increases, but there is no assurance that market conditions will continue to enable the Company to successfully do so. Management believes that the paper supply is consolidating, and there may be shortfalls in the future in supplies necessary to meet the demands of the entire

marketplace. Higher paper prices and tight paper supplies may have an impact on customers' demand for printed products. The Company has undertaken various strategic initiatives to mitigate any foreseeable supply disruptions with respect to the Company's ink requirements. The Company also resells waste paper and other print-related by-products and may be impacted by changes in prices for these by-products.

The Company continues to monitor the impact of changes in the price of crude oil and other energy costs, which impact the Company's ink suppliers, logistics operations and manufacturing costs. Crude oil and energy prices continue to be volatile. The Company believes its logistics operations will continue to be able to pass a substantial portion of any increases in fuel prices directly to its customers in order to offset the impact of related cost increases. Decreases in fuel prices are also passed on to customers which negatively impacts sales. The Company generally cannot pass on to customers the impact of higher energy prices on its manufacturing costs. However, the Company enters into fixed price contracts for a portion of its natural gas purchases to mitigate the impact of changes in energy prices. The Company cannot predict sudden changes in energy prices and the impact that possible future changes in energy prices might have upon either future operating costs or customer demand and the related impact either will have on the Company's consolidated annual results of operations, financial position or cash flows.

Distribution

The Company's products are distributed to end-users through the U.S. or foreign postal services, through retail channels, electronically or by direct shipment to customer facilities. Through its logistics operations, the Company manages the distribution of most customer products printed by the Company in the U.S. and Canada to maximize efficiency and reduce costs for customers.

Postal costs are a significant component of many customers' cost structures and postal rate changes can influence the number of pieces that the Company's customers are willing to print and mail. Under the 2006 Postal Accountability and Enhancement Act, it had been anticipated that postage would increase annually by an amount equal to or slightly less than the Consumer Price Index (the "CPI"). However, on December 24, 2013, the Postal Regulatory Commission (the "PRC") approved the United States Postal Service ("USPS") Board of Governors' request under the Exigency Provision in the applicable law for price increases of 4.3%. The exigent rate increase was approved as a surcharge in addition to a 1.7% rate increase, equal to the CPI, for total price increases of 6.0%, on average, across all significant mail categories, effective January 26, 2014. On January 15, 2015, the USPS filed for a CPI rate increase of approximately 2.0%, which was approved by the PRC on May 7, 2015, and became effective May 31, 2015. Plans to phase-out the 2014 exigent price increase have been developed by the USPS, but remain subject to approval by the PRC. As a leading provider of print logistics and among the largest mailers of standard mail in the U.S., the Company works closely with its customers and the USPS to offer innovative products and mail preparation services to minimize postage costs. While the Company does not directly absorb the impact of higher postal rates on its customers' mailings, demand for products distributed through the U.S. or foreign postal services has been negatively impacted by increases in postal rates. The impact to the Company of the USPS's restructuring plans, many of which require legislative action, cannot currently be estimated. Mail delivery services through the USPS accounted for approximately 42% of the Company's logistics revenues during the six months ended June 30, 2015.

Goodwill Impairment Assessment

The Company performs its goodwill impairment tests annually as of October 31, or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. As part of its interim review for indicators of impairment, management analyzed potential changes in value of individual reporting units with goodwill based on each reporting unit's operating results for the six months ended June 30, 2015 compared to expected results. In addition, management considered how other key assumptions, including discount rates and expected long-term growth rates, used in the last fiscal year's impairment analysis, could be impacted by changes in market conditions and economic events.

Management considered trends in these factors when performing its assessment of whether an interim impairment review was required for any reporting unit. Based on this interim assessment, management concluded that as of June 30, 2015, no events or changes in circumstances indicated that it was more likely than not that the fair value for any reporting unit had declined below its carrying value. Nevertheless, significant changes in economic and market conditions could result in changes to expectations of future financial results and key valuation assumptions. Such changes could result in revisions of management's estimates of the fair value of the Company's reporting units and could result in a material impairment of goodwill as of October 31, 2015, the Company's next annual measurement date.

The digital and creative solutions reporting unit has been impacted by a decline in expected full year net sales primarily as the result of the bankruptcy of two premedia services customers. The Europe reporting unit has been impacted by a decline in expected full year net sales as the result of the continued challenging economic conditions in

Europe. Further negative developments having a significant impact on the estimated fair values of these reporting units could result in future goodwill impairment charges. As of the October 31, 2014 annual goodwill impairment test, the digital and creative solutions reporting unit and the Europe reporting unit's estimated fair values exceeded book values by approximately 29.4% and 24.8%, respectively. As of June 30, 2015, \$25.5 million of goodwill was allocated to the digital and creative solutions reporting unit, which is included within the Strategic Services segment and \$13.6 million of goodwill was allocated to the Europe reporting unit, which is included within the International segment.

Pension and Other Postretirement Benefit Plans

The funded status of the Company's pension and other postretirement benefits plans is dependent upon many factors, including returns on invested assets and the level of certain market interest rates. Market conditions may lead to changes in the discount rates (used to value the year-end benefit obligations of the plans) and the market value of the securities held by the plans, which could significantly increase or decrease the funded status of the plans. The Company reviews its actuarial assumptions on an annual basis as of December 31. Based on current estimates, the Company expects to make cash contributions of approximately \$25.0 million to \$30.0 million to its pension and other postretirement benefits plans for the full year 2015, of which \$14.5 million has been contributed during the six months ended June 30, 2015.

Financial Review

In the financial review that follows, the Company discusses its consolidated results of operations, financial position, cash flows and certain other information. This discussion should be read in conjunction with the Company's Condensed Consolidated Financial Statements and related notes.

LIQUIDITY AND CAPITAL RESOURCES

The Company believes it has sufficient liquidity to support its ongoing operations and to invest in future growth to create value for its shareholders. Operating cash flows and the Company's \$1.5 billion senior secured revolving credit facility (the "Credit Agreement") are the Company's primary sources of liquidity and are expected to be used for, among other things, payment of interest and principal on the Company's long-term debt obligations, distributions to shareholders that may be approved by the Board of Directors, acquisitions, capital expenditures necessary to support productivity improvement and growth and completion of restructuring programs.

The following describes the Company's cash flows for the six months ended June 30, 2015 and 2014.

Cash Flows From Operating Activities

Operating cash inflows are largely attributable to sales of the Company's products and services. Operating cash outflows are largely attributable to recurring expenditures for raw materials, labor, rent, interest, taxes and other operating activities.

Net cash provided by operating activities was \$61.0 million for the six months ended June 30, 2015, compared to \$69.7 million for the same period in 2014. Management regularly evaluates whether foreign earnings are expected to be permanently reinvested. This evaluation requires judgment about the future operating and liquidity needs of the Company and its foreign subsidiaries. Changes in economic and business conditions, foreign or U.S. tax laws, or the Company's financial situation could result in changes to these judgments and the need to record additional tax liabilities.

Edgar Filing: RR Donnelley & Sons Co - Form 10-Q

Borrowings under the Credit Agreement bear interest at a base or Eurocurrency rate plus an applicable margin determined at the time of the borrowing. In addition, the Company pays facility commitment fees which fluctuate dependent on the Credit Agreement's credit ratings. The Credit Agreement is used for general corporate purposes, including acquisitions and letters of credit. The Company's obligations under the Credit Agreement are guaranteed by its material and certain other domestic subsidiaries and are secured by a pledge of the equity interests of certain subsidiaries, including most of its domestic subsidiaries, and a security interest in substantially all of the domestic current assets and mortgages of certain domestic real property of the Company.

The Credit Agreement is subject to a number of covenants, including a minimum Interest Coverage Ratio and a maximum Leverage Ratio, as defined and calculated pursuant to the Credit Agreement, that, in part, restrict the Company's ability to incur additional indebtedness, create liens, engage in mergers and consolidations, make restricted payments and dispose of certain assets.

There were \$300.0 million of borrowings under the Credit Agreement as of June 30, 2015. Based on the Company's results of operations for the twelve months ended June 30, 2015 and existing debt, the Company would have had the ability to utilize approximately \$1.0 billion of the \$1.5 billion Credit Agreement and not have been in violation of the terms of the agreement.

The Company was in compliance with its debt covenants as of June 30, 2015, and expects to remain in compliance based on management's estimates of operating and financial results for 2015 and the foreseeable future. However, declines in market and economic conditions or demand for certain of the Company's products and services could impact the Company's ability to remain in compliance with its debt covenants in future periods. As of June 30, 2015, the Company met all the conditions required to borrow under the Credit Agreement and management expects the Company to continue to meet the applicable borrowing conditions.

The failure of a financial institution supporting the Credit Agreement would reduce the size of the Company's committed facility unless a replacement institution were added. Currently, the Credit Agreement is supported by seventeen U.S. and international financial institutions.

As of June 30, 2015, the Company had \$94.3 million in outstanding letters of credit and bank guarantees, of which \$55.9 million were issued under the Credit Agreement. The letters of credit used under the Credit Agreement did not reduce availability under the Credit Agreement as of June 30, 2015, as the amounts issued were less than the reduction in availability from the Leverage Ratio covenant. As of June 30, 2015, the Company also had \$183.1 million in other uncommitted credit facilities, primarily outside the U.S. (the “Other Facilities”). As of June 30, 2015, bank acceptance drafts, letters of credit and guarantees of \$50.0 million were issued, and reduced availability, under the Company’s Other Facilities. Total borrowings under the Credit Agreement and the Other Facilities (the “Combined Facilities”) were \$308.6 million as of June 30, 2015.

On June 19, 2015, Moody’s Investors Service (“Moody’s”) reaffirmed the Company’s long-term corporate credit rating and changed the ratings outlook from negative to stable. The Company’s Standard & Poor’s Rating Services (“S&P”) and Moody’s credit ratings as of June 30, 2015 are shown in the table below:

	S&P	Moody's
Long-term corporate credit rating	BB-, stable outlook	Ba2, stable outlook
Senior unsecured debt	BB-	Ba3
Credit Agreement	BB+	Baa2

Dividends

During the six months ended June 30, 2015, the Company paid cash dividends of \$104.1 million. On July 23, 2015, the Board of Directors of the Company declared a quarterly cash dividend of \$0.26 per common share payable on September 1, 2015 to RR Donnelley shareholders of record on August 14, 2015.

Acquisitions and Dispositions

During the six months ended June 30, 2015, the Company paid \$118.1 million, net of cash acquired, substantially all for the acquisition of Courier. The Company financed the cash portion of the Courier acquisition with a combination of cash on hand and borrowings under the Credit Agreement.

During the year ended December 31, 2014, the Company paid \$380.8 million of total cash purchase prices, net of cash acquired, substantially all for the acquisitions of Consolidated Graphics, Esselte and MultiCorpora. The Company financed the cash portion of these acquisitions with a combination of cash on hand, including net proceeds from the \$350.0 million 6.50% senior note issuance on November 12, 2013, and borrowings under the Credit Agreement.

During the year ended December 31, 2014, the Company sold the assets and liabilities of Journalism Online, a provider of online subscription management services, for net proceeds of \$10.7 million. As a result of a sale price adjustment in accordance with the agreement, a \$0.2 million reduction in proceeds was recognized during the six months ended June 30, 2015, resulting in total proceeds of \$10.5 million. The Company also sold the assets and liabilities of GRES, its commercial and residential real estate advisory services business, for net proceeds of \$1.8 million.

Debt Issuances

On March 20, 2014, the Company issued \$400.0 million of 6.00% senior notes due April 1, 2024. Interest on the notes is payable semi-annually on April 1 and October 1, and commenced on October 1, 2014. The net proceeds from the offering along with borrowings under the Credit Agreement were used to repurchase \$211.1 million of the 8.25% senior notes due March 15, 2019, \$100.0 million of the 7.25% senior notes due May 15, 2018 and \$50.0 million of the

7.625% senior notes due June 15, 2020.

MANAGEMENT OF MARKET RISK

The Company is exposed to interest rate risk on its variable debt and price risk on its fixed-rate debt. At June 30, 2015, the Company was exposed to interest rate fluctuations on variable-interest borrowings of \$498.6 million, or 13%, of the Company's total debt, including \$190.0 million notional amount of interest rate swap agreements (see Note 14, Derivatives, to the Condensed Consolidated Financial Statements) and \$308.6 million in borrowings under the Combined Facilities. Including the effect of the fixed to floating interest rate swaps, approximately 94% of the Company's outstanding term debt was comprised of fixed-rate debt as of June 30, 2015.

The Company assesses market risk based on changes in interest rates utilizing a sensitivity analysis that measures the potential loss in earnings, fair values and cash flows based on a hypothetical 10% change in interest rates. Using this sensitivity analysis, such

changes would not have a material effect on interest income or expense and cash flows and would change the fair values of fixed-rate debt at June 30, 2015 and 2014 by approximately \$90.2 million and \$102.2 million, respectively.

The Company is exposed to the impact of foreign currency fluctuations in certain countries in which it operates. The exposure to foreign currency movements is limited in many countries because the operating revenues and expenses of its various subsidiaries and business units are substantially in the local currency of the country in which they operate. To the extent that borrowings, sales, purchases, revenues, expenses or other transactions are not in the local currency of the subsidiary, the Company is exposed to currency risk and may enter into foreign exchange forward contracts to hedge the currency risk. As of June 30, 2015 and December 31, 2014, the aggregate notional amount of outstanding foreign exchange forward contracts was approximately \$348.5 million and \$377.2 million, respectively (see Note 14, Derivatives, to the Condensed Consolidated Financial Statements). Net unrealized gains from these foreign exchange forward contracts were \$28.8 million and \$6.5 million at June 30, 2015 and December 31, 2014, respectively. The Company does not use derivative financial instruments for trading or speculative purposes.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

For a discussion of exposure to market risk, refer to Part II, Item 7A – Quantitative and Qualitative Disclosures about Market Risk, set for in the Company’s 2014 Form 10-K.

Item 4. Controls and Procedures

(a) Disclosure controls and procedures.

As required by Rule 13a-15(b) and Rule 15d-15(e) of the Securities Exchange Act of 1934, the Company’s management, including the Chief Executive Officer and Chief Financial Officer, is responsible for establishing and maintaining effective disclosure controls and procedures, as defined under Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934. As of June 30, 2015, an evaluation was performed under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company’s disclosure controls and procedures. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that disclosure controls and procedures as of June 30, 2015 were effective in ensuring information required to be disclosed in our SEC reports was recorded, processed, summarized, and reported within the time periods specified in the SEC’s rules and forms, and that such information was accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

There have not been any changes in the Company’s internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) that occurred during the quarter ended June 30, 2015 that had materially affected, or were reasonably likely to materially affect, the Company’s internal control over financial reporting.

PART II— OTHER INFORMATION

Item 1: Legal Proceedings

For a discussion of certain litigation involving the Company, see Note 12, Commitments and Contingencies, to the Condensed Consolidated Financial Statements.

Item 1A. Risk Factors.

The Company's Annual Report on Form 10-K for the year ended December 31, 2014 contains a detailed discussion of risk factors that could materially adversely affect the Company's business, its operating results, or its financial condition. The risk factors described below are in addition to those risk factors.

The proposed spinoffs of the Company's Publishing and Retail Services Company and Financial Services Company may not be completed on the terms or timeline currently contemplated, if at all, and may not achieve the intended results.

Unanticipated developments could delay, prevent or otherwise adversely affect the proposed spinoffs of the Publishing and Retail Services Company and the Financial Services Company, including possible problems or delays in obtaining favorable rulings from the Internal Revenue Service or tax opinions, disruptions in general market conditions, or other developments. In addition, consummation of the proposed transactions will require final approval from the Company's Board of Directors. Therefore, the Company cannot assure that it will be able to complete the transactions on the terms or on the timeline that it announced, if at all.

The Company will incur significant expenses in connection with the transactions. In addition, completion of the proposed transactions will require significant amounts of management's time and effort which may divert management's attention from other aspects of the Company's business operations.

Further, if the transactions are completed, they may not achieve the intended results. The anticipated benefits of the separation are based on a number of assumptions, some of which may prove incorrect. Any such difficulties could adversely affect the Company's business, results of operations or financial condition.

The terms of the spinoffs and the stand-alone capital structure of each entity have not been determined.

The terms of the proposed spinoffs and each entity's stand-alone capital structure have not yet been determined. The Company's preliminary plans are described in "Management's Discussion and Analysis of Financial Condition and Results of Operations – Proposed Spinoff Transactions." However, the final structure and terms of the transactions may not coincide with those set forth in this quarterly report.

Following the spinoffs, the price of the Company's common stock may fluctuate significantly.

We cannot predict the prices at which the Company's common stock may trade after the spinoffs, the effect of the spinoffs on the trading prices of the Company's common stock or whether the market value of the Company's common stock and the common stock of each of the new public companies held by a stockholder after the spinoffs will be, in the aggregate, less than, equal to or greater than the market value of the Company's common stock held by such stockholder prior to the spinoffs.
