**Transition Report Pursuant to Section 13 or 15(d)
of the Securities Exchange Act of 1934**

Commission File Number: 814-00899

TCP CAPITAL CORP.

(Exact Name of Registrant as Specified in Charter)

Delaware

(State or Other Jurisdiction of Incorporation)

56-2594706

(IRS Employer Identification No.)

2951 28th Street, Suite 1000

Santa Monica, California

(Address of Principal Executive Offices)

90405

(Zip Code)

Registrant's telephone number, including area code **(310) 566-1000**

Securities registered pursuant to Section 12(b) of the Act:

Common Stock, par value \$0.001 per share

(Title of each class)

NASDAQ Global Select Market

(Name of each exchange where registered)

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months and (2) has been subject to such filing requirements for the past 90 days: Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer
Non-accelerated filer

Accelerated filer
Smaller Reporting company

Edgar Filing: TCP Capital Corp. - Form 10-K

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the Registrant's common stock held by non-affiliates of the Registrant at June 30, 2015 (the last business day of the Registrant's most recently completed second quarter) was \$744.1 million based upon the last sales price reported for such date on The NASDAQ Global Select Market. For purposes of this disclosure, shares of common stock beneficially owned by executive officers and directors of the Registrant and members of their families have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily conclusive for other purposes. The Registrant has no non-voting common stock.

The number of shares of the Registrant's common stock, \$0.001 par value, outstanding as of February 26, 2016 was 48,708,719.

Documents Incorporated by Reference: Portions of the Registrant's Proxy Statement relating to the Registrant's 2016 Annual Meeting of Stockholders to be filed not later than 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K are incorporated by reference into Part III of this Report.

TABLE OF CONTENTS

Part I

In this annual report in Form 10-K, except as otherwise indicated, the terms:

Holding Company refers to *Special Value Continuation Fund, LLC*, a Delaware limited liability company, for the periods prior to the consummation of the Conversion described elsewhere in this report and to *TCP Capital Corp.* for the periods after the consummation of the Conversion;

Operating Company refers to *Special Value Continuation Partners, LP*, a Delaware limited partnership;

TCPC Funding refers to *TCPC Funding I LLC*, a Delaware limited liability company;

The Advisor refers to *Tennenbaum Capital Partners, LLC*, a Delaware limited liability company and the investment manager; and

General Partner and *Administrator* refer to *SVOF/MM, LLC*, a Delaware limited liability company, the general partner of the Operating Company and an affiliate of the Advisor and administrator of the Holding Company and the Operating Company.

For simplicity, this report uses the terms *Company*, *we*, *us* and *our* to include the Holding Company and, where appropriate in the context, the Operating Company, on a consolidated basis.

Item 1. Business

The Holding Company is a Delaware corporation formed on April 2, 2012 and is an externally managed, closed-end, non-diversified management investment company. We have elected to be treated as a business development company (BDC) under the Investment Company Act of 1940, as amended (the 1940 Act). Our investment objective is to achieve high total returns through current income and capital appreciation, with an emphasis on principal protection. We seek to achieve our investment objective primarily through investments in debt securities of middle-market companies, which we typically define as those with enterprise values between \$100 million and \$1.5 billion. While we intend to primarily focus on privately negotiated investments in debt of middle-market companies, we may make investments of all kinds and at all levels of the capital structure, including in equity interests such as preferred or common stock and warrants or options received in connection with our debt investments. Our investment activities will benefit from what we believe are the competitive advantages of our Advisor, including its diverse in-house skills, proprietary deal flow, and consistent and rigorous investment process focused on established, middle-market companies. We expect to generate returns through a combination of the receipt of contractual interest payments on debt investments and origination and similar fees, and, to a lesser extent, equity appreciation through options, warrants, conversion rights or direct equity investments.

Investment operations are conducted in the Operating Company, either directly or in one of the Operating Company's wholly owned subsidiaries, TCPC Funding I, LLC (TCPC Funding) and TCPC SBIC, LP (the SBIC). The Holding Company owns 100% of the common limited partner interests of the Operating Company. The Operating Company has also elected to be treated as a BDC under the 1940 Act. The General Partner of the Operating Company is SVOF/MM, LLC (SVOF/MM), which also serves as the administrator (the Administrator) of the Holding Company and the Operating Company. The managing member of SVOF/MM is Tennenbaum Capital Partners, LLC (the Advisor), which serves as the investment manager to both the Holding Company and the Operating Company. Most of the equity interests in the General Partner are owned directly or indirectly by the Advisor and its employees.

The Holding Company has elected to be treated as a regulated investment company (RIC) for U.S. federal income tax purposes. As a RIC, we will not be taxed on our income to the extent that we distribute such income each year and

satisfy other applicable income tax requirements. The Operating Company has elected to be treated as a partnership for U.S. federal income tax purposes.

On April 2, 2012, the Holding Company converted from a limited liability company to a corporation (the Conversion). At the time of the Conversion, all limited liability company interests of Special Value Continuation Fund, LLC (SVCF) were exchanged for 15,725,635 shares of common stock in TCP Capital Corp. As a result of the Conversion, the books and records of SVCF became the books and records of the surviving entity.

TABLE OF CONTENTS

On April 3, 2012, the Company priced its initial public offering (the Offering), selling 5,750,000 shares of its common stock at a public offering price of \$14.75 per share.

To qualify as a RIC, we must, among other things, meet certain source-of-income and asset diversification requirements and timely distribute to our stockholders generally at least 90% of our investment company taxable income, as defined by the Internal Revenue Code of 1986, as amended (the Code), for each year. Pursuant to this election, we generally will not have to pay corporate level taxes on any income that we distribute to our stockholders provided that we satisfy those requirements.

Tennenbaum Capital Partners, LLC

Our investment activities are managed by the Advisor. The Advisor is a leading investment manager (including specialty lending to middle-market companies). The Advisor is a Delaware limited liability company and is registered as an investment advisor under the Investment Advisers Act of 1940. As of December 31, 2015, the Advisor had in excess of \$6.4 billion in committed capital under management, approximately 25.8% of which consists of the Company's committed capital, and a team of over 80 people including investment professionals and other personnel that focus on operations, finance, legal, and compliance, accounting and reporting, investor relations, information technology, and administration. The Advisor was founded in 1999 by Michael E. Tennenbaum, Mark K. Holdsworth and Howard M. Levkowitz, and its predecessor entity, formed by the same individuals, commenced operations in 1996. Mark K. Holdsworth and Howard M. Levkowitz along with David Adler, David A. Hollander, Michael E. Leitner, Philip M. Tseng, Rajneesh Vig, and Lee Landrum constitute the Advisor's active partners (the Advisor Partners). The Advisor Partners have significant industry experience, including experience investing in middle-market companies. Together, the Advisor Partners have invested approximately \$16.3 billion in 447 companies since the Advisor's inception, through multiple business and credit cycles, across all segments of the capital structure and through a broad set of credit-oriented strategies including leveraged loan origination, secondary investments of discounted debt securities, and distressed and control opportunities. We believe the Advisor Partners' investment perspectives, complementary skills, and collective investment experience provide the Advisor with a strategic and competitive advantage in middle-market investing.

As our investment advisor, the Advisor is responsible for sourcing potential investments, conducting research, analyzing investment opportunities and structuring our investments and monitoring our portfolio companies on an ongoing basis. We believe that the Advisor has a proven long-term track record of positive performance, notwithstanding some periods during which losses were incurred, of sourcing deals, originating loans and successfully investing in middle-market companies and that the relationships of its investment professionals are integral to the Advisor's success. The Advisor's investment professionals have long-term working relationships with key sources of investment opportunities and industry expertise, including investment bankers, financial advisors, attorneys, private equity sponsors, other senior lenders, high-yield bond specialists, research analysts, accountants, and senior management teams. Additionally, the Advisor's structure includes both a board of advisors and a group of Senior Executive Advisors, a team comprised of approximately 17 current and former executives from a variety of industries, which extends the reach of the Advisor's relationships through a group of seasoned industry leaders and that can enhance our deal sourcing and due diligence activities.

We also benefit from the existing infrastructure and administrative capabilities of an established investment manager. The General Partner, an affiliate of the Advisor, serves as our Administrator and provides us with office space, equipment and office services. The tasks of our Administrator include overseeing our financial records, preparing reports to our stockholders and reports filed with the SEC and generally monitoring the payment of our expenses and the performance of administrative and professional services rendered to us by others.

Since the beginning of 2011, the Advisor executed across its funds approximately \$4.6 billion in direct origination leveraged loans primarily to middle-market companies, of which approximately \$1.8 billion was for our account. There can be no assurance that similar deal flow or terms will be available in the future for loans in which we may invest.

Operating and Regulatory Tax Structure

The Holding Company elected to be treated for U.S. federal income tax purposes as a RIC under the Code. As a RIC, the Holding Company generally does not have to pay corporate-level federal income taxes on any net ordinary income or capital gain that we distribute to our stockholders as dividends if we meet certain

TABLE OF CONTENTS

source-of-income, distribution and asset diversification requirements. The Operating Company is not a RIC nor will it seek RIC status and instead is intended to be treated as a partnership for tax purposes. The Holding Company and the Operating Company have elected to be treated as BDCs under the 1940 Act. As a BDC we are required to invest at least 70% of our total assets primarily in securities of private and certain public U.S. companies (other than investment companies and certain financial institutions), cash, cash equivalents, U.S. Government securities, and other high-quality debt investments that mature in one year or less and to comply with other regulatory requirements, including limitations on our use of debt. Because the Holding Company and the Operating Company are each BDCs, their assets, liabilities and results of operations will be consolidated for purposes of this 70% requirement.

Investment Strategy

To achieve our investment objectives, we intend to focus on a subset of the broader investment strategies historically pursued by the Advisor. Our primary investment focus is the ongoing origination of and investments in leveraged loans of performing middle-market companies, building on the Advisor's established track record of origination and participation in the original syndication of approximately \$8.3 billion of leveraged loans to 235 companies since 1999, of which we invested over \$2.3 billion in 139 companies. For the purposes of this filing, the term leveraged loans refers to senior debt investments that rank ahead of subordinated debt and that generally have the benefit of security interests in the assets of the borrower. Our investments generally range from \$10 million to \$50 million per company, the size of which may grow over time in proportion with our capital base. We expect to generate current returns through a combination of the receipt of contractual interest payments on debt investments and origination and similar fees, and, to a lesser extent, equity appreciation through options, warrants, conversion rights or direct equity investments. We often receive equity interests such as preferred or common stock and warrants or options in connection with our debt investments. From time to time we may also use other investment strategies, which are not our primary focus, to attempt to enhance the overall return of our portfolio. These investment strategies may include, but are not limited to, the purchase of discounted debt, opportunistic investments, and financial instruments to hedge currency or interest rate risk associated with our portfolio.

Our typical investments are in performing middle-market companies. We believe that middle-market companies are generally less able to secure financing than larger companies and thus offer better return opportunities for those able to conduct the necessary diligence to appropriately evaluate these companies. We focus primarily on U.S. companies where we believe our Advisor's perspective, complementary skills and investment experience provides us with a competitive advantage and in industries where our Advisor sees an attractive risk reward profile due to macroeconomic trends and existing Advisor industry expertise.

Investment Portfolio

At December 31, 2015, our investment portfolio of \$1,182.9 million (at fair value) consisted of 88 portfolio companies and was invested 95.5% in debt investments, of which 99.9% was in senior secured debt and 0.1% in unsecured and subordinated debt. In aggregate, our investment portfolio was invested 81.5% in senior secured loans, 14.0% in senior secured notes, 0.1% in unsecured and subordinated debt, and 4.4% in equity investments. Our average portfolio company investment at fair value was approximately \$13.4 million. Our largest portfolio company investment by value was approximately \$43.3 million and our five largest portfolio company investments by value comprised approximately 15.7% of our portfolio at December 31, 2015.

TABLE OF CONTENTS

The following charts summarize our portfolio mix by industry and type based on the fair value of our investments as of December 31, 2015.

Investment Process

The Advisor's investment process is designed to maximize its strategic advantages: a strong brand name as a specialty lender to the middle-market and diverse in-house expertise and skills. The Advisor seeks out opportunities by conducting a rigorous and disciplined investment process that combines the following characteristics:

Deal Sourcing

As a leading middle-market corporate debt investment manager with a 16-year history and in excess of \$6.4 billion in committed capital as of December 31, 2015, approximately 25.8% of which consists of the Company's committed capital, the Advisor is active in new deal financing opportunities in the middle-market segment. However, we believe that the Advisor's real deal flow advantage comes from the proprietary network of established relationships of its investment professionals and synergies among its professionals and portfolio companies. Members of the Advisor's Investment Committee for the Company (the Investment Committee) have long-term relationships with deal sources including investment bankers, restructuring professionals, bankruptcy attorneys, senior lenders, high yield bond specialists, research analysts, accountants, fund management teams, the Advisor's Advisory Board, Senior Executive Advisors, board members of former clients, former colleagues and other operating professionals to facilitate deal flow. The Investment Committee is currently comprised of five voting members. In total, the Investment Committee consists of approximately 30 members from the Advisor. The number of voting and non-voting members of the Investment Committee is subject to increase or decrease in the sole discretion of the Advisor. All members of the Investment Committee attend investment meetings and are encouraged to participate in discussions. In addition, members of the Investment Committee have relationships with other investors, including insurance companies, bond funds, mezzanine funds, private equity funds, hedge funds and other funds which invest in similar assets. Further, the Advisor regularly calls on both active and recently retired senior executives from the relevant industries to assist with the due diligence of potential investments. Historically, these relationships with retired senior executives have also been a valuable source of transactions and information. The Advisor anticipates that they will continue to provide future opportunities. We believe the Advisor's strong relationships with its portfolio companies facilitate positive word-of-mouth recommendations to other companies seeking the Advisor's expertise. The Advisor's relationships often result in the ability to access investment opportunities earlier than many of its competitors and in some cases on an exclusive basis.

TABLE OF CONTENTS

Due Diligence Process

The foundation of the Advisor's investment process is intensive investment research and analysis by its experienced staff of investment professionals. The Advisor's senior professionals have worked together for numerous years and we believe that they have a superior level of credit investing knowledge relative to other credit investors. The Advisor supplements its in-house knowledge with industry experts, including CEO/CFO-level executives, with direct management experience in the industries under consideration. The Advisor prefers these industry experts to consultants because of the practical business advice that comes from having managed businesses. The Advisor rigorously and comprehensively analyzes issuers of securities of interest. The process includes a quantitative and qualitative assessment of the issuer's business, an evaluation of its management, an analysis of the business strategy and industry trends, and an in-depth examination of the company's capital structure, financial results and projections. The Advisor's due diligence process includes:

- an assessment of the outlook for the industry and general macroeconomic trends;
- discussions with issuer management and other industry executives, including the assessment of management/board strengths and weaknesses;
- an analysis of the fundamental asset values and the enterprise value of the issuer;
- review of the issuer's key assets, core competencies, competitive advantages, historical and projected financial statements, capitalization, financial flexibility, debt amortization requirements, and tax, environmental, legal and regulatory contingencies;
- review of the issuer's existing credit documents, including credit agreements, indentures, intercreditor agreements, and security agreements; and
- review of documents governing the issuer, including charter, by-laws, and key contracts.

Structuring Originations

As an early non-bank participant in the leveraged loan market, we believe that loan origination is a core competency of the Advisor. Supplementing industry deal teams' experience and competency, the Advisor has six professionals (including investment professionals) with legal experience, two of whom have a quarter-century each of relevant experience in secured credit. Deal teams work with the Advisor's in-house legal specialists and outside counsel to structure over-collateralized loans with what we believe to be strong creditor protections and contractual controls over borrower operations. In many cases, the Advisor works to obtain contractual governance rights and board seats to protect principal and maximize post-investment returns. Deals usually include original issue discounts, upfront fees and/or equity participations through warrants or direct equity stakes.

Trading and Secondary Market Purchases

A key element in maximizing investment returns in secondary purchases is buying and selling investments at the best available prices. The Advisor has a dedicated trading staff for both the highly specialized traded loan market and for high-yield bonds. Through its trading operations, the Advisor maintains its established relationships with a network of broker-dealers in the debt securities markets. These relationships provide the Advisor with access to the trading dynamics of existing or potential investments and assist it in effectively executing transactions. These relationships may also lead to the early identification of potential investment opportunities for the Company.

Portfolio Management & Monitoring

The Advisor actively monitors the financial performance of its portfolio companies and market developments. This constant monitoring permits the Advisor to update position risk assessments, seek to address potential problems early, refine exit plans, and make follow-on investment decisions quickly. We view active portfolio monitoring as a vital part of our investment process.

We consider board observation and information rights, regular dialogue with company management and sponsors, and detailed internally generated monitoring reports to be critical to our performance. We have developed a monitoring template that seeks to ensure compliance with these standards and that is used as a tool by the Investment Committee to assess investment performance relative to plan.

TABLE OF CONTENTS

- Deal teams maintain contact with portfolio company management through regularly scheduled and *ad hoc* conference calls and onsite visits.
- Deal teams review portfolio company progress relative to plan and pre-determined performance benchmarks. Adverse or unexpected developments, as well as consequential routine updates, are reported to the
- Investment Committee and thoroughly discussed at regularly scheduled weekly meetings. If merited, the Investment Committee will hold ad hoc meetings as necessary to address urgent issues. Deal teams, with Investment Committee approval, encourage portfolio company managers to catalyze events
- to monetize holdings for greater return, or where needed, take corrective actions to address shortfalls to plan or benchmarks.
- All existing portfolio holdings are formally reviewed in detail by the entire Investment Committee once per quarter at the Advisor's quarterly portfolio review.

Investment Committee and Decision Process

The Advisor's investment process is organized around the Investment Committee that provides for a centralized, repeatable decision process. The Investment Committee meets weekly and, with respect to each fund the Advisor advises, certain members of the Investment Committee are voting members. The voting members of the Investment Committee for the Company are currently Mark K. Holdsworth, Michael E. Leitner, Howard M. Levkowitz, Philip M. Tseng and Rajneesh Vig. Approval by a simple majority vote of the voting members of the Investment Committee for each respective fund is required for the purchase or sale of any investment, with certain de-minimis exceptions. No voting member has veto power. The Advisor's investment process is designed to maximize risk-adjusted returns and preserve downside protection.

Regulation

We have filed an election to be regulated as a BDC under the 1940 Act. The 1940 Act contains prohibitions and restrictions relating to transactions between BDCs and their affiliates (including any investment advisors or co-advisors), principal underwriters and affiliates of those affiliates or underwriters and requires that a majority of the directors be persons other than interested persons, as that term is defined in the 1940 Act. In addition, the 1940 Act provides that we may not change the nature of our business so as to cease to be, or to withdraw our election as, a BDC unless approved by a majority of our outstanding voting securities, which is defined in the 1940 Act as the lesser of a majority of the outstanding voting securities or 67% or more of the securities voting if a quorum of a majority of the outstanding voting securities is present.

We may invest up to 100% of our assets in securities acquired directly from issuers in privately negotiated transactions. With respect to such securities, we may, for the purpose of public resale, be deemed an underwriter as that term is defined in the Securities Act of 1933, or the Securities Act. We do not intend to acquire securities issued by any investment company that exceed the limits imposed by the 1940 Act. Under these limits, except for registered money market funds we generally cannot acquire more than 3% of the voting stock of any investment company, invest more than 5% of the value of our total assets in the securities of one investment company or invest more than 10% of the value of our total assets in the securities of more than one investment company. With regard to that portion of our portfolio invested in securities issued by investment companies, it should be noted that such investments might indirectly subject our stockholders to additional expenses as they will indirectly be responsible for the costs and expenses of such companies. None of our investment policies are fundamental and any may be changed without stockholder approval. Pursuant to the 1940 Act, our investment in the Operating Company is not subject to these limits because, among other reasons, (i) the Operating Company is our sole investment and (ii) we pass-through our votes on Operating Company matters to our stockholders and vote all of our interests in the Operating Company in the same proportion and manner as our stockholders vote their common stock on such matters.

TABLE OF CONTENTS

Qualifying assets

Under the 1940 Act, a BDC may not acquire any asset other than assets of the type listed in section 55(a) of the 1940 Act, which are referred to as qualifying assets, unless, at the time the acquisition is made, qualifying assets represent at least 70% of the Company's total assets. The principal categories of qualifying assets relevant to our proposed business are the following:

- Securities purchased in transactions not involving any public offering from the issuer of such securities, which issuer (subject to certain limited exceptions) is an eligible portfolio company, or from any person who is, or has been during the preceding 13 months, an affiliated person of an eligible portfolio company, or from any other person, subject to such rules as may be prescribed by the SEC. An eligible portfolio company is defined in the 1940 Act as any issuer which:
 - is organized under the laws of, and has its principal place of business in, the United States;
 - is not an investment company (other than a small business investment company wholly owned by the BDC) or a company that would be an investment company but for certain exclusions under the 1940 Act; and
 - satisfies either of the following:
 - has a market capitalization of less than \$250.0 million or does not have any class of securities listed on a national securities exchange; or
 - is controlled by a BDC or a group of companies including a BDC, the BDC actually exercises a controlling influence over the management or policies of the eligible portfolio company, and, as a result thereof, the BDC has an affiliated person who is a director of the eligible portfolio company.
- Securities of any eligible portfolio company which we control.
- Securities purchased in a private transaction from a U.S. issuer that is not an investment company or from an affiliated person of the issuer, or in transactions incident thereto, if the issuer is in bankruptcy and subject to reorganization or if the issuer, immediately prior to the purchase of its securities was unable to meet its obligations as they came due without material assistance other than conventional lending or financing arrangements.
- Securities of an eligible portfolio company purchased from any person in a private transaction if there is no ready market for such securities and we already own 60% of the outstanding equity of the eligible portfolio company.
- Securities received in exchange for or distributed on or with respect to securities described above, or pursuant to the exercise of warrants or rights relating to such securities.
- Cash, cash equivalents, U.S. Government securities or high-quality debt securities maturing in one year or less from the time of investment.

Managerial assistance to portfolio companies

A BDC must have been organized and have its principal place of business in the United States and must be operated for the purpose of making investments in the types of securities described in Qualifying assets above. However, in order to count portfolio securities as qualifying assets for the purpose of the 70% test, the BDC must either control the issuer of the securities or must offer to make available to the issuer of the securities significant managerial assistance. Where the BDC purchases such securities in conjunction with one or more other persons acting together, the BDC will satisfy this test if one of the other persons in the group makes available such managerial assistance, although reliance on other investors may not be the sole method by which the BDC satisfies the requirement to make available managerial assistance. Making available managerial assistance means, among other things, any arrangement whereby the BDC, through its investment manager, directors, officers or employees, offers to provide, and, if accepted, does so provide, significant guidance and counsel concerning the management, operations or business objectives and policies of a portfolio company.

TABLE OF CONTENTS

Small Business Administration Regulations

On April 22, 2014, the SBIC received a license from the Small Business Administration (the "SBA") to operate as a small business investment company. The SBIC license allows us to borrow funds from the SBA against eligible investments. The Small Business Investment Company regulations currently limit the amount that is available to borrow by any SBIC to \$150.0 million. There is no assurance that we will draw up to the maximum limit available under the Small Business Investment Company program.

Small business investment companies are designed to stimulate the flow of private equity capital to eligible small businesses. Under present Small Business Administration regulations, eligible small businesses include businesses that have a tangible net worth not exceeding \$19.5 million and have average annual fully taxed net income not exceeding \$6.5 million for the two most recent fiscal years. In addition, a small business investment company must devote 25% of its investment activity to "smaller" concerns as defined by the Small Business Administration. A smaller concern is one that has a tangible net worth not exceeding \$6.0 million and has average annual fully taxed net income not exceeding \$2.0 million for the two most recent fiscal years. Small Business Administration regulations also provide alternative size standard criteria to determine eligibility, which depend on the industry in which the business is engaged and are based on such factors as the number of employees and gross sales. According to Small Business Administration regulations, small business investment companies may make long-term loans to small businesses, invest in the equity securities of such businesses and provide them with consulting and advisory services. We plan to provide long-term loans to qualifying small businesses, and in connection therewith, make equity investments.

The SBIC is periodically examined and audited by the Small Business Administration's staff to determine its compliance with small business investment company regulations.

Taxation of the company

We have elected to be taxed as a RIC under Subchapter M of the Code. To continue to qualify as a RIC, we must, among other things, (a) derive in each taxable year at least 90 percent of our gross income from dividends, interest (including tax-exempt interest), payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, other income (including but not limited to gain from options, futures and forward contracts) derived with respect to our business of investing in stock, securities or currencies, or net income derived from an interest in a "qualified publicly traded partnership" (a "QPTP"); and (b) diversify our holdings so that, at the end of each quarter of each taxable year (i) at least 50 percent of the market value of our total assets is represented by cash and cash items, U.S. Government securities, the securities of other RICs and other securities, with other securities limited, in respect of any one issuer, to an amount not greater than five percent of the value of our total assets and not more than 10 percent of the outstanding voting securities of such issuer (subject to the exception described below), and (ii) not more than 25 percent of the market value of our total assets is invested in the securities (other than U.S. Government securities and the securities of other regulated investment companies) (A) of any issuer, (B) of any two or more issuers that we control and that are determined to be engaged in the same business or similar or related trades or businesses, or (C) of one or more QPTPs. The Code provides for certain exceptions to the foregoing diversification requirements. We may generate certain income that might not qualify as good income for purposes of the 90% annual gross income requirement described above. We monitor our transactions to endeavor to prevent our disqualification as a RIC.

If we fail to satisfy the 90% annual gross income requirement or the asset diversification requirements discussed above in any taxable year, we may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures of the asset diversification requirements where we correct the failure within a specified period. If the applicable relief provisions are not available or cannot be met, all of

our income would be subject to corporate-level U.S. federal income tax as described below. We cannot provide assurance that we would qualify for any such relief should we fail the 90% annual gross income requirement or the asset diversification requirements discussed above.

As a RIC, in any taxable year with respect to which we timely distribute at least 90% of the sum of our (i) investment company taxable income (which includes, among other items, dividends, interest and the excess of any net short-term capital gain over net long-term capital loss and other taxable income (other than any net capital gain), reduced by deductible expenses) determined without regard to the deduction for dividends and

TABLE OF CONTENTS

distributions paid and (ii) net tax exempt interest income (which is the excess of our gross tax exempt interest income over certain disallowed deductions) (the Annual Distribution Requirement), we (but not our stockholders) generally will not be subject to U.S. federal income tax on investment company taxable income and net capital gain (generally, net long-term capital gain in excess of short-term capital loss) that we distribute to our stockholders. We intend to distribute annually all or substantially all of such income on a timely basis. To the extent that we retain our net capital gain for investment or any investment company taxable income, we will be subject to U.S. federal income tax at the regular corporate income tax rates. We may choose to retain our net capital gains for investment or any investment company taxable income, and pay the associated federal corporate income tax, including the federal excise tax described below.

Certain amounts not distributed during a calendar year are subject to a nondeductible four percent U.S. federal excise tax payable by us. To avoid this tax, we would need to distribute (or be deemed to have distributed) during each calendar year an amount equal to the sum of:

- (1) at least 98 percent of our ordinary income (not taking into account any capital gains or losses) for the calendar year;
at least 98.2 percent of the amount by which our capital gains exceed our capital losses (adjusted for certain
- (2) ordinary losses) for a one-year period generally ending on October 31 of the calendar year (unless an election is made by us to use our taxable year); and
- (3) certain undistributed amounts from previous years on which we paid no U.S. federal income tax.

While we intend to distribute any income and capital gains in the manner necessary to minimize imposition of the four percent federal excise tax, sufficient amounts of our taxable income and capital gains may not be distributed to avoid entirely the imposition of the tax. In that event, we will be liable for the tax only on the amount by which we do not meet the foregoing distribution requirement.

If, in any particular taxable year, we do not satisfy the Annual Distribution Requirement or otherwise were to fail to qualify as a RIC (for example, because we fail the 90% annual gross income requirement described above), and relief is not available as discussed above, all of our taxable income (including our net capital gains) will be subject to tax at regular corporate rates without any deduction for distributions to stockholders, and distributions generally will be taxable to the stockholders as ordinary dividends to the extent of our current and accumulated earnings and profits.

We may decide to be taxed as a regular corporation even if we would otherwise qualify as a RIC if we determine that treatment as a corporation for a particular year would be in our best interests.

As a RIC, we are permitted to carry forward a net capital loss realized in a taxable year beginning before December 23, 2010 to offset our capital gain, if any, realized during the eight years following the year of the loss. A capital loss carryforward realized in a taxable year beginning before December 23, 2010 is treated as a short-term capital loss in the year to which it is carried. We are permitted to carry forward a net capital loss realized in taxable years beginning on or after December 23, 2010 to offset capital gain indefinitely. For net capital losses realized in taxable years beginning on or after December 23, 2010, the excess of our net short-term capital loss over our net long-term capital gain is treated as a short-term capital loss arising on the first day of our next taxable year and the excess of our net long-term capital loss over our net short-term capital gain is treated as a long-term capital loss arising on the first day of our next taxable year. If future capital gain is offset by carried forward capital losses, such future capital gain is not subject to fund-level U.S. federal income tax, regardless of whether they are distributed to stockholders. Accordingly, we do not expect to distribute any such offsetting capital gain. A RIC cannot carry back or carry forward any net operating losses.

Investment Structure

Once we determine that a prospective portfolio company is suitable for a direct investment, we work with the management of that company and its other capital providers, including senior and junior lenders, and equity holders, to structure an investment. We negotiate among these parties to agree on how our investment is expected to be structured relative to the other capital in the portfolio company's capital structure.

TABLE OF CONTENTS

Leveraged Loans

We structure our investments primarily as secured leveraged loans. Leveraged loans are generally senior debt instruments that rank ahead of subordinated debt of the portfolio company. Leveraged loans generally have the benefit of security interests on the assets of the portfolio company, which may rank ahead of, or be junior to, other security interests.

High-Yield Securities

The Company's portfolio currently includes high-yield securities and the Company may invest in high-yield securities in the future. High-yield securities have historically experienced greater default rates than has been the case for investment grade securities and are generally rated below investment grade by one or more nationally recognized statistical rating organizations or will be unrated but of comparable credit quality to obligations rated below investment grade, and have greater credit and liquidity risk than more highly rated obligations. High-yield securities are generally unsecured and may be subordinate to other obligations of the obligor and are often issued in connection with leveraged acquisitions or recapitalizations in which the issuers incur a substantially higher amount of indebtedness than the level at which they had previously operated. The Company's portfolio also includes mezzanine investments which are generally unsecured and rated below investment grade. Mezzanine investments of the type in which the Company invests in are primarily privately negotiated subordinated debt securities often issued in connection with leveraged transactions, such as management buyouts, acquisitions, re-financings, recapitalizations and later stage growth capital financings, and are generally accompanied by related equity participation features such as options, warrants, preferred and common stock. In some cases, our debt investments may provide for a portion of the interest payable to be paid-in-kind interest. To the extent interest is paid-in-kind, it will be payable through the increase of the principal amount of the obligation by the amount of interest due on the then-outstanding aggregate principal amount of such obligation.

Warrants, Options and Minority Equity

In some cases, we will also receive nominally priced warrants or options to buy a minority equity interest in the portfolio company in connection with a loan. As a result, if a portfolio company appreciates in value, we may achieve additional investment return from this equity interest. We may structure such warrants to include provisions protecting our rights as a minority-interest holder, as well as a put, or right to sell such securities back to the issuer, upon the occurrence of specified events. In many cases, we may also seek to obtain registration rights in connection with these equity interests, which may include demand and piggyback registration rights.

Distressed Debt

The Company's portfolio currently includes distressed debt investments and the Company is authorized to continue to invest in the securities and other obligations of distressed and bankrupt issuers, including debt obligations that are in covenant or payment default. As of December 31, 2015, two of the Company's debt investments were in non-accrual status. The Company does not anticipate distressed debt to be a significant part of its ongoing investment strategy. Such investments generally trade significantly below par and are considered speculative. The repayment of defaulted obligations is subject to significant uncertainties. Defaulted obligations might be repaid only after lengthy workout or bankruptcy proceedings, during which the issuer might not make any interest or other payments. Typically such workout or bankruptcy proceedings result in only partial recovery of cash payments or an exchange of the defaulted obligation for other debt or equity securities of the issuer or its affiliates, which may in turn be illiquid or speculative.

Opportunistic Investments

Opportunistic investments may include, but are not limited to, investments in debt securities of all kinds and at all levels of the capital structure and may include equity securities of public companies that are thinly traded, emerging market debt, structured finance vehicles such as CLO funds and debt of middle-market companies located outside the United States. We do not intend such investments to be our primary focus.

We tailor the terms of each investment to the facts and circumstances of the transaction and the prospective portfolio company, negotiating a structure that protects our rights and manages our risk while creating incentives

TABLE OF CONTENTS

for the portfolio company to achieve its business plan and improve its operating results. We seek to limit the downside potential of our investments by:

- requiring a total return on our investments (including both interest and potential equity appreciation) that we believe will compensate us appropriately for credit risk;
- negotiating covenants in connection with our investments that afford our portfolio companies as much flexibility in managing their businesses as possible, consistent with the preservation of our capital. Such restrictions may include affirmative and negative covenants, default penalties, lien protection, change of control provisions and board rights, including either observation or rights to a seat on the board of directors under some circumstances; and
- selecting investments that we believe have a very low probability of loss.

We expect to hold most of our investments to maturity or repayment, but we may sell some of our investments earlier if a liquidity event occurs, such as a sale, recapitalization or worsening of the credit quality of the portfolio company.

Code of Ethics

We and the Advisor have each adopted a code of ethics pursuant to Rule 17j-1 under the 1940 Act and Rule 204A-1 under the Investment Advisers Act of 1940 (the Advisers Act), respectively, that establishes procedures for personal investments and restricts certain transactions by our personnel. Our codes of ethics generally do not permit investments by our employees in securities that may be purchased or held by us. You may read and copy these codes of ethics at the SEC's Public Reference Room in Washington, D.C. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1 (800) SEC-0330. In addition, each code of ethics is available on the EDGAR Database on the SEC's Internet site at <http://www.sec.gov>. You may also access the codes of ethics by going to our website at <http://investors.tpcapital.com/>.

Compliance Policies and Procedures

We and the Advisor have adopted and implemented written policies and procedures reasonably designed to detect and prevent violation of the federal securities laws. We are required to review these compliance policies and procedures annually for their adequacy and the effectiveness of their implementation and to designate a chief compliance officer to be responsible for their administration. Elizabeth Greenwood currently serves as our chief compliance officer.

Proxy Voting Policies and Procedures

We have delegated our proxy voting responsibility to our investment adviser. A summary of the Proxy Voting Policies and Procedures of the Advisor are set forth below. The guidelines are reviewed periodically by the adviser and our non-interested directors, and, accordingly, are subject to change.

The Advisor is registered under the Investment Advisers Act of 1940 and has a fiduciary duty to act solely in the best interests of its clients. As part of this duty, it recognizes that it must vote securities held by its clients in a timely manner free of conflicts of interest. These policies and procedures for voting proxies for investment advisory clients are intended to comply with Section 206 of, and Rule 206(4)-6 under, the Advisers Act.

Our investment adviser votes proxies relating to our portfolio securities in the best interest of our stockholders. The Advisor reviews on a case-by-case basis each proposal submitted for a proxy vote to determine its impact on our investments. Although it generally votes against proposals that may have a negative impact on our investments, it may vote for such a proposal if there exists compelling long-term reasons to do so.

The proxy voting decisions of the Advisor are made by the senior officers who are responsible for monitoring each of our investments. To ensure that our vote is not the product of a conflict of interest, it requires that: (i) anyone involved in the decision making process disclose to the managing member any potential conflict that he or she is aware of and any contact that he or she has had with any interested party regarding a proxy vote; and (ii) employees involved in the decision making process or vote administration are prohibited from revealing how we intend to vote on a proposal in order to reduce any attempted influence from interested parties.

TABLE OF CONTENTS

You may obtain information about how we voted proxies by making a written request for proxy voting information to: Tennenbaum Capital Partners, LLC, 2951 28th Street, Suite 1000, Santa Monica, CA 90405, Attention: Investor Relations.

Privacy Principles

We are committed to maintaining the privacy of our stockholders and to safeguarding their non-public personal information. The following information is provided to help you understand what personal information we collect, how we protect that information and why, in certain cases, we may share information with select other parties.

Generally, we do not receive any non-public personal information relating to our stockholders, although certain non-public personal information of our stockholders may become available to us. We do not disclose any non-public personal information about our stockholders or former stockholders to anyone, except as permitted by law or as is necessary in order to service stockholder accounts (for example, to a transfer agent or third-party administrator).

We restrict access to non-public personal information about our stockholders to employees of the Advisor and its affiliates with a legitimate business need for the information. We maintain physical, electronic and procedural safeguards designed to protect the non-public personal information of our stockholders.

Investment Management Agreements

The Holding Company and the Operating Company have entered into separate but substantially identical investment management agreements with the Advisor, under which the Advisor, subject to the overall supervision of our respective boards of directors, manages the day-to-day operations and provides investment advisory services to the Holding Company and the Operating Company. In addition, pursuant to the Amended and Restated Limited Partnership Agreement, the General Partner directs and executes the day-to-day operational activities of the Operating Company. For providing these services, the Advisor receives a base management fee and, in addition, the Advisor or the General Partner may receive incentive compensation.

The base management fee is currently paid by the Operating Company to the Advisor and the incentive compensation, if any, is paid by the Operating Company to the General Partner or the Advisor. The Holding Company, therefore, indirectly bears these amounts, which are reflected in our consolidated financial statements. If the Operating Company is terminated or for any other reasons incentive compensation is not paid by the Operating Company, such amounts will be paid directly by the Holding Company to the Advisor pursuant to its investment management agreement with the Advisor.

Under the terms of our investment management agreements, the Advisor:

- determines the composition of our portfolio, the nature and timing of the changes to our portfolio and the manner of implementing such changes;
- identifies, evaluates and negotiates the structure of the investments we make (including performing due diligence on our prospective portfolio companies); and
- closes, monitors and administers the investments we make, including the exercise of any voting or consent rights.

The Advisor's services under the investment management agreements are not exclusive, and it is free to furnish similar services to other entities so long as its services to us are not impaired.

Pursuant to our investment management agreements, we pay the Advisor compensation for investment advisory and management services consisting of base management compensation and a two-part incentive compensation.

Management Fee. The base management fee is calculated at an annual rate of 1.5% of the Holding Company's total assets (excluding cash and cash equivalents) payable quarterly in arrears. For purposes of calculating the base management fee, total assets is determined without deduction for any borrowings or other liabilities. The base management fee is calculated based on the value of our total assets (excluding cash and cash equivalents) at the end of the most recently completed calendar quarter. The base management fee for any partial quarter is appropriately pro-rated.

TABLE OF CONTENTS

Incentive Compensation. We also pay incentive compensation to the Advisor or the General Partner. Under the investment management agreements and the Amended and Restated Limited Partnership Agreement, no incentive compensation was incurred until after January 1, 2013.

Beginning January 1, 2013, the incentive compensation equals the sum of (1) 20% of all ordinary income since that date and (2) 20% of all net realized capital gains (net of any net unrealized capital depreciation) since that date, with each component being subject to a total return requirement of 8% of contributed common equity annually. The incentive compensation initially is an equity allocation to the General Partner under the Amended and Restated Limited Partnership Agreement. If the Operating Company is terminated or for any other reasons incentive compensation is not distributed by the Operating Company, it would be paid pursuant to the investment management agreement between the Holding Company and the Advisor.

The incentive compensation has two components, ordinary income and capital gains. Each component is payable or distributable quarterly in arrears (or upon termination of the Advisor as the investment manager or the General Partner as the general partner of the Operating Company, as of the termination date) beginning January 1, 2013 and calculated as follows:

Each of the two components of incentive compensation is separately subject to a total return limitation. Thus, notwithstanding the following provisions, we are not be obligated to pay or distribute any ordinary income incentive compensation or any capital gains incentive compensation if our cumulative total return does not exceed an 8% annual return on daily weighted average contributed common equity. If our cumulative annual total return is above 8%, the total cumulative incentive compensation we pay will not be more than 20% of our cumulative total return, or, if lower, the amount of our cumulative total return that exceeds the 8% annual rate.

Subject to the above limitation, the ordinary income component is the amount, if positive, equal to 20% of the cumulative ordinary income before incentive compensation, less cumulative ordinary income incentive compensation previously paid or distributed.

Subject to the above limitation, the capital gains component is the amount, if positive, equal to 20% of the cumulative realized capital gains (computed net of cumulative realized losses and cumulative net unrealized capital depreciation), less cumulative capital gains incentive compensation previously paid or distributed. For assets held on January 1, 2013, capital gain, loss and depreciation are measured on an asset by asset basis against the value as of December 31, 2012. The capital gains component is paid or distributed in full prior to payment or distribution of the ordinary income component.

For purposes of the foregoing computations and the total return limitation, the following definitions apply:

- **cumulative** means amounts for the period commencing January 1, 2013 and ending as of the applicable calculation date .
- **contributed common equity** means the value of net assets attributable to our common stock as of December 31, 2012 plus the proceeds to us of all issuances of common stock less (A) offering costs of any of our securities or leverage facilities, (B) all distributions by us representing a return of capital and (C) the total cost of all repurchases of our common stock by us, in each case after December 31, 2012 and through the end of the preceding calendar quarter in question, in each case as determined on an accrual and consolidated basis.
- **ordinary income before incentive compensation** means our interest income, dividend income and any other income (including any other fees, such as commitment, origination, structuring, diligence, managerial assistance and consulting fees or other fees that we receive from portfolio companies) during the period, (i) minus our operating expenses during the period (including the base management fee, expenses payable under

the administration agreement, any interest expense and any dividends paid on any issued and outstanding preferred stock), (ii) plus increases and minus decreases in net assets not treated as components of income, operating expense, gain, loss, appreciation or depreciation and not treated as contributions or distributions in respect of common equity, and (iii) without reduction for any incentive compensation and any organization or offering costs, in each case determined on an accrual and consolidated basis.

TABLE OF CONTENTS

- total return means the amount equal to the combination of ordinary income before incentive compensation, realized capital gains and losses and unrealized capital appreciation and depreciation of the Company for the period, in each case determined on an accrual and consolidated basis.

If our total return does not exceed the total return limitation, the limitation will not have the effect of eliminating the possibility of paying such incentive compensation, but rather will postpone any incentive compensation until our cumulative annual total return exceeds the 8% threshold. The nature of the total return limitation may also make it easier for the Advisor to earn incentive compensation in higher interest rate environments or if our net asset value has increased.

Total Return Limitation (based on cumulative annual total return)

Percentage of ordinary income and net realized capital gain separately payable at various levels of total return.

The financial highlights in the notes to our financial statements include a calculation of total return based on the change in the market value of our shares. The financial highlights in the notes to our financial statements also include a calculation of total return based on the change in our net asset value from period to period. The total return limitation for purposes of the incentive compensation calculations is based on the stated elements of return: ordinary income before incentive compensation, realized capital gain and loss and unrealized capital appreciation and depreciation. It differs from the total return based on the market value or net asset value of our shares in that it is a cumulative measurement that is compared to our daily weighted-average contributed common equity rather than a periodic measurement that is compared to our net asset value or market value, and in that it excludes incentive compensation.

Examples of Incentive Compensation Calculation

Example 1: Income Portion of Incentive Compensation:

Assumptions

- Total return limitation⁽¹⁾ = 8%
- Management fee⁽²⁾ = 1.5%
- Other expenses (legal, accounting, custodian, transfer agent, etc.)⁽³⁾ = 1%

Alternative 1

Additional Assumptions

- cumulative gross ordinary income (including interest, dividends, fees, etc.) = 11.5%
- cumulative ordinary income before incentive compensation (gross ordinary income-(management fee + other expenses)) = 9%
- cumulative annual total return = 7%
- prior ordinary income incentive compensation = 0%

Cumulative total return does not exceed total return limitation, therefore there is no income incentive compensation.

(1) Represents 8.0% annualized total return limitation.

(2) Represents 1.5% annualized management fee, assuming no liabilities.

(3) Excludes organizational and offering costs.

TABLE OF CONTENTS

Alternative 2

Additional Assumptions

- cumulative gross ordinary income (including interest, dividends, fees, etc.) = 11%
- cumulative ordinary income before incentive compensation (gross ordinary income – (management fee + other expenses)) = 8.5%
- cumulative annual total return = 9.5%
- prior ordinary income incentive compensation = 0%

Cumulative ordinary income before incentive compensation is positive and the cumulative total return exceeds the total return limitation, therefore there is income incentive compensation.

Income incentive compensation = ((20% x ordinary income before incentive compensation) but not more than ((100% x (cumulative total return up to 10%–8% total return limitation)) + (20% x cumulative total return above 10%)))

$$= ((20\% \times 8.5\%) \text{ or, if less, } ((100\% \times (9.5\% - 8\%)) + (20\% \times 0\%)))$$

$$= 1.7\% \text{ or, if less, } 1.5\%$$

$$= 1.5\%$$

Alternative 3

Additional Assumptions

- cumulative gross ordinary income (including interest, dividends, fees, etc.) = 15.5%
- cumulative ordinary income before incentive compensation (gross ordinary income – (management fee + other expenses)) = 13%
- cumulative annual total return = 18%
- prior ordinary income incentive compensation = 1%

Cumulative ordinary income before incentive compensation is positive and cumulative total return exceeds the total return limitation, therefore there is income incentive compensation.

Income incentive compensation = ((20% x ordinary income before incentive compensation) but not more than ((100% x (cumulative total return up to 10% – 8% total return limitation)) + (20% x cumulative total return above 10%))), less income incentive compensation previously paid

$$= ((20\% \times 13\%) \text{ or, if less, } ((100\% \times (10\% - 8\%)) + (20\% \times (18\% - 10\%))) - 1\%$$

$$= (2.6\% \text{ or, if less, } ((2\% + (20\% \times 8\%))) - 1\%$$

$$= (2.6\% \text{ or, if less, } (2\% + 1.6\%)) - 1\%$$

$$= (2.6\% \text{ or, if less, } 3.6\%) - 1\%$$

$$= 1.6\%$$

Note that due to the priority of capital gains compensation over ordinary income compensation, had the 5%(4) of cumulative unrealized capital gains been realized, the capital gains incentive compensation would have been 1% (i.e.

20% x 5%) and would have reduced ordinary income compensation from 1.6% to 0.6%. Further, if there had been 1.6% or more of prior capital gains compensation, the ordinary income compensation payment would have been zero.

- (4) 5% of cumulative unrealized capital gains = 18% cumulative annual total return – 13% cumulative ordinary income before incentive compensation.

15

TABLE OF CONTENTS

Example 2: Capital Gains Portion of Incentive Compensation:

Alternative 1:

Assumptions

- Year 1: \$20 million investment made in Company A (Investment A), and \$30 million investment made in Company B (Investment B).
- Year 2: Investment A sold for \$50 million and fair market value, or FMV, of Investment B determined to be \$32 million. Cumulative annual total return of 40%.
- Year 3: FMV of Investment B determined to be \$25 million. Cumulative annual total return of 15%.
- Year 4: Investment B sold for \$31 million. Cumulative annual total return of 10%.

The capital gains portion of the incentive compensation would be:

- Year 1: None.
- Year 2: Capital gains incentive compensation of \$6 million (\$6 million = \$30 million realized capital gains on sale of Investment A multiplied by 20% and total return limitation satisfied).
- Year 3: None; no realized capital gains.
- Year 4: Capital gains incentive compensation of \$0.2 million (\$31 million cumulative realized capital gains multiplied by 20%, less \$6 million of capital gains incentive compensation paid in year 2 and total return limitation satisfied).

Alternative 2

Assumptions

- Year 1: \$20 million investment made in Company A (Investment A), \$30 million investment made in Company B (Investment B) and \$25 million investment made in Company C (Investment C).
- Year 2: Investment A sold for \$50 million, FMV of Investment B determined to be \$25 million and FMV of Investment C determined to be \$25 million. Cumulative annual total return of 15%.
- Year 3: FMV of Investment B determined to be \$27 million and Investment C sold for \$30 million. Cumulative annual total return of 7%.
- Year 4: FMV of Investment B determined to be \$35 million. Cumulative annual total return of 20%.
- Year 5: Investment B sold for \$40 million. Cumulative annual total return of 20%.

The capital gains portion of the incentive compensation would be:

- Year 1: None.
- Year 2: Capital gains incentive compensation of \$5 million; 20% multiplied by \$25 million (\$30 million realized capital gains on Investment A less \$5 million unrealized capital depreciation on Investment B, and the total return limitation is satisfied).
- Year 3: None as the total return limitation is not satisfied.
- Year 4: Capital gains incentive compensation of \$2 million (\$35 million cumulative realized capital gains (including \$5 million of realized capital gains from year 3 at a time when the total return limitation was not satisfied and no cumulative unrealized capital depreciation) multiplied by 20%, less \$5 million capital gains incentive compensation paid in year 2, and the total return limitation is satisfied).
- Year 5: Capital gains incentive compensation of \$2 million (\$45 million cumulative realized capital gains multiplied by 20%, less \$7 million in capital gains incentive compensation paid in years 2 and 4, and the total return limitation is satisfied).

TABLE OF CONTENTS

Payment of our expenses

All investment professionals and staff of the Advisor, when and to the extent engaged in providing investment advisory and management services, and the compensation and routine overhead expenses of such personnel allocable to such services (including health insurance, 401(k) plan benefits, payroll taxes and other compensation related matters), are provided and paid for by the Advisor. We bear all other costs and expenses of our operations and transactions, including those relating to:

- our organization;
- calculating our net asset value and net asset value per share (including the cost and expenses of any independent valuation firm);
- expenses, including travel expense, incurred by the Advisor or payable to third parties in performing due diligence on prospective portfolio companies, monitoring our investments and, if necessary, enforcing our rights;
- interest payable on debt, if any, incurred to finance our investments;
- the costs of all future offerings of common stock and other securities, if any;
- the base management fee and any incentive management fee;
- distributions on our shares;
- administration fees payable under our administration agreement;
- transfer agent and custody fees and expenses;
- the allocated costs incurred by the General Partner as our Administrator in providing managerial assistance to those portfolio companies that request it;
- amounts payable to third parties relating to, or associated with, evaluating, making and disposing of investments;
- brokerage fees and commissions;
- registration fees;
- listing fees;
- taxes;
- director fees and expenses;
- costs of preparing and filing reports or other documents with the SEC;
- the costs of any reports, proxy statements or other notices to our stockholders, including printing costs;
- costs of holding stockholder meetings;
- our fidelity bond;
- directors and officers/errors and omissions liability insurance, and any other insurance premiums;
- litigation, indemnification and other non-recurring or extraordinary expenses;
- direct costs and expenses of administration and operation, including audit and legal costs;
- dues, fees and charges of any trade association of which we are a member; and
- all other expenses reasonably incurred by us or the Administrator in connection with administering our business, such as the allocable portion of overhead under our administration agreement, including rent and other allocable portions of the cost of certain of our officers and their respective staffs.

From time to time, the Advisor may pay amounts owed by us to third party providers of goods or services. We will subsequently reimburse the Advisor for such amounts paid on our behalf.

TABLE OF CONTENTS

Limitation of liability and indemnification

The investment management agreements provide that the Advisor and its officers, directors, employees and affiliates are not liable to us or any of our stockholders for any act or omission by it or its employees in the supervision or management of our investment activities or for any loss sustained by us or our stockholders, except that the foregoing exculpation does not extend to any act or omission constituting willful misfeasance, bad faith, gross negligence or reckless disregard of its obligations under the investment management agreement. The investment management agreements also provide for indemnification by us of the Advisor's members, directors, officers, employees, agents and control persons for liabilities incurred by it in connection with their services to us, subject to the same limitations and to certain conditions.

Board and shareholder approval of the investment management agreements

Our board of directors held an in-person meeting on May 6, 2015, in order to consider and reapprove our investment management agreements. In its consideration of the investment management agreement, the board of directors focused on information it had received relating to, among other things: (a) the nature, quality and extent of the advisory and other services to be provided to us by the Advisor; (b) comparative data with respect to advisory fees or similar expenses paid by other business development companies with similar investment objectives; (c) our financial performance, operating expenses and expense ratio compared to business development companies with similar investment objectives; (d) any existing and potential sources of indirect income to the Advisor from its relationships with us and the profitability of those relationships; (e) information about the services performed and the personnel performing such services under the investment management agreements; (f) the organizational capability and financial condition of the Advisor and its affiliates; (g) the Advisor's practices regarding the selection and compensation of brokers that execute our portfolio transactions and the brokers' provision of brokerage and research services to our investment advisor; and (h) the possibility of obtaining similar services from other third party service providers or through an internally managed structure.

Based on the information reviewed and the discussions, the board of directors, including a majority of the non-interested directors, concluded that the investment management fee rates are reasonable in relation to the services to be provided.

Duration and termination

The investment management agreements will remain in effect from year to year if approved annually by our board of directors or by the affirmative vote of the holders of a majority of our outstanding voting securities, including, in either case, approval by a majority of our directors who are not interested persons. The investment management agreements will automatically terminate in the event of its assignment. The investment management agreements may be terminated by either party without penalty upon not less than 60 days written notice to the other. Any termination by us must be authorized either by our board of directors or by vote of our stockholders. See **Risk Factors — Risks related to our business — We are dependent upon senior management personnel of the Advisor for our future success, and if the Advisor is unable to retain qualified personnel or if the Advisor loses any member of its senior management team, our ability to achieve our investment objective could be significantly harmed.**

Administration Agreement

We have entered into administration agreements with the Administrator, which we refer to as the administration agreement, under which the Administrator provides administrative services to us. The Administrator provides services including, but not limited to, the arrangement for the services of, and the overseeing of, custodians, depositories, transfer agents, dividend disbursing agents, other stockholder servicing agents, accountants, attorneys, underwriters,

brokers and dealers, corporate fiduciaries, insurers, banks, stockholders and such other persons in any such other capacity deemed to be necessary or desirable. The Administrator also makes reports to the board of its performance of obligations under the administration agreement and furnishes advice and recommendations with respect to such other aspects of our business and affairs that we determine to be desirable. The Administrator is responsible for our financial and other records that are required to be maintained and prepares all reports and other materials required by any agreement or to be filed with the Securities and Exchange Commission or any other regulatory authority, including reports on Forms 8-K, 10-Q, 10-K and periodic reports to stockholders, determining the amounts available for distribution

TABLE OF CONTENTS

as dividends and distributions to be paid by us to our stockholders, reviewing and implementing any share purchase programs authorized by the board, maintaining or overseeing the maintenance of our books and records as required under the 1940 Act, and maintaining (or overseeing maintenance by other persons) such other books and records required by law or for our proper operation. For providing these services, facilities and personnel, we reimburse the Administrator for expenses incurred by the Administrator in performing its obligations under the administration agreement, including our allocable portion of overhead under the administration agreement and the cost of certain of our officers and the Administrator's administrative staff and providing, at our request and on our behalf, significant managerial assistance to our portfolio companies to which we are required to provide such assistance. From time to time, the Administrator may pay amounts owed by us to third-party providers of goods or services. We subsequently reimburse the Administrator for such amounts paid on our behalf.

Leverage

Our leverage program is comprised of \$116.0 million in available debt under a senior secured revolving credit facility issued by the Operating Company (the SVCP Revolver), a \$100.5 million term loan issued by the Operating Company (the Term Loan and together with the SVCP Revolver, the SVCP Facility), \$350.0 million in available debt under a senior secured revolving credit facility issued by TCPC Funding (the TCPC Funding Facility,), \$108.0 million in convertible senior unsecured notes issued by the Holding Company (the Convertible Notes) and \$75.0 million in committed leverage from the SBA (the SBA Program and, together with the SVCP Facility, the TCPC Funding Facility and the Convertible Notes, the Leverage Program). Prior to the repurchase and retirement of the remaining preferred interests on September 3, 2015, the Leverage Program also included amounts outstanding under a preferred equity facility issued by the Operating Company (the Preferred Interests).

The SVCP Facility matures on July 31, 2018 and bore interest at an annual rate equal to 0.44% plus either LIBOR or the lender's cost of funds (subject to a cap of LIBOR plus 20 basis points) through July 31, 2014. Advances under the SVCP Facility for periods from July 31, 2014 through September 3, 2015 bore interest at an annual rate equal to 2.50% plus either LIBOR or the lender's cost of funds (subject to a cap of LIBOR plus 20 basis points). Advances under the SVCP Facility from September 3, 2015 through July 31, 2016 bear interest at an annual rate equal to 1.75% plus either LIBOR or the lender's cost of funds (subject to a cap of LIBOR plus 20 basis points). Advances under the SVCP Facility from July 31, 2016 through the maturity date of the facility will bear interest at an annual rate of 2.50% plus either LIBOR or the lender's cost of funds (subject to a cap of LIBOR plus 20 basis points). In addition to amounts due on outstanding debt, the SVCP Revolver accrues commitment fees of 0.20% per annum on the unused portion of the facility, or 0.25% per annum when less than \$46.4 million in borrowings are outstanding.

The TCPC Funding Facility matures on March 6, 2020, subject to extension by the lender at the request of TCPC Funding, and contains an accordion feature which allows for expansion of the facility up to \$400.0 million subject to consent from the lender and other customary conditions. Borrowings under the TCPC Funding Facility bear interest at a rate of LIBOR plus either 2.25% or 2.50% per annum subject to certain funding requirements, plus an administrative fee of 0.25% per annum. In addition to amounts due on outstanding debt, the facility accrues commitment fees of 0.50% per annum on the unused portion of the facility, or 0.75% per annum when the unused portion is greater than 33.0% of the total facility, plus an administrative fee of 0.25% per annum.

On June 11, 2014, the Company issued \$108.0 million of convertible senior unsecured notes that mature on December 15, 2019, unless previously converted or repurchased in accordance with their terms. The Convertible Notes are general unsecured obligations of the Company, and rank structurally junior to the SVCP Facility and TCPC Funding Facility. The Company does not have the right to redeem the Convertible Notes prior to maturity. The Convertible Notes bear interest at an annual rate of 5.25%, payable semi-annually.

The SBIC is able to issue up to \$75.0 million in SBA Debentures, subject to funded regulatory capital and other customary regulatory requirements. The Operating Company has committed \$75.0 million of regulatory capital to the SBIC, \$58.0 million of which had been funded at December 31, 2015. SBA Debentures are non-recourse and may be prepaid at any time without penalty. The interest rate on SBA Debentures is fixed at the time of issuance at a market-driven spread over 10-year U.S. Treasury Notes.

The Leverage Program is subject to certain financial or other covenants. As of December 31, 2015, we were in full compliance with such covenants.

TABLE OF CONTENTS

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act of 2002 imposes a wide variety of regulatory requirements on publicly-held companies and their insiders. Many of these requirements affect us. For example:

- Pursuant to Rule 13a-14 of the 1934 Act, our Chief Executive Officer and Chief Financial Officer must certify the accuracy of the financial statements contained in our periodic reports;
- Pursuant to Item 307 of Regulation S-K, our periodic reports must disclose our conclusions about the effectiveness of our disclosure controls and procedures;
- Pursuant to Rule 13a-15 of the 1934 Act, our management must prepare a report regarding its assessment of our internal control over financial reporting; and
- Pursuant to Item 308 of Regulation S-K and Rule 13a-15 of the 1934 Act, our periodic reports must disclose whether there were significant changes in our internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

The Sarbanes-Oxley Act requires us to review our current policies and procedures to determine whether we comply with the Sarbanes-Oxley Act and the regulations promulgated thereunder. We will continue to monitor our compliance with all regulations that are adopted under the Sarbanes-Oxley Act and will take actions necessary to ensure that we are in compliance therewith.

Item 1A. Risk Factors

An investment in our securities involves certain risks relating to our structure and investment objectives. The risks set forth below are not the only risks we face, and we face other risks which we have not yet identified, which we do not currently deem material or which are not yet predictable. If any of the following risks occur, our business, financial condition and results of operations could be materially adversely affected. In such case, our net asset value and the trading price of our common stock could decline, and you may lose all or part of your investment.

Certain risks in the current environment

Capital markets may experience periods of disruption and instability. Such market conditions may materially and adversely affect debt and equity capital markets in the United States and abroad, which may have a negative impact on our business and operations.

From time to time, capital markets may experience periods of disruption and instability, which may be evidenced by a lack of liquidity in debt capital markets, write-offs in the financial services sector, re-pricing of credit risk and failure of certain major financial institutions. An example of such disruption and instability occurred between 2008 and 2009. During that period, despite actions of the U.S. federal government and foreign governments, such disruption and instability contributed to worsening general economic conditions that materially and adversely impacted the broader financial and credit markets and reduced the availability of debt and equity capital for the market as a whole and financial services firms in particular. While capital markets have improved in recent years, these conditions could deteriorate again and global financial markets could experience significant volatility. During such market disruptions, we may have difficulty raising debt or equity capital especially as a result of regulatory constraints. There can be no assurance that adverse market conditions will not repeat themselves or worsen in the future. Equity capital may be difficult to raise because, subject to some limited exceptions, as a BDC, we are generally not able to issue additional shares of common stock at a price less than net asset value without first obtaining approval for such issuance from our stockholders and our independent directors. At our annual meeting of stockholders held on May 20, 2015, subject to the condition that the maximum number of shares salable below net asset value pursuant to this authority in any particular offering that could result in such dilution is limited to 25% of our then outstanding common stock immediately prior to each such offering, our stockholders approved our ability to sell or otherwise issue shares of our

common stock at a price below its then current net asset value per share for a twelve month period expiring on the anniversary of the date of stockholder approval. It should be noted that, theoretically, we may offer up to 25% of our then outstanding common stock each day. In addition, our ability to incur indebtedness (including by issuing preferred stock) is limited by applicable regulations such that our asset coverage, as calculated in accordance with the 1940

TABLE OF CONTENTS

Act, must equal at least 200% immediately after each time we incur indebtedness. The debt capital that will be available to us in the future, if at all, may be at a higher cost and on less favorable terms and conditions than our current leverage. Any inability to raise capital could have a negative effect on our business, financial condition and results of operations.

Market conditions may in the future make it difficult to extend the maturity of or refinance our existing indebtedness and any failure to do so could have a material adverse effect on our business. The re-appearance of market conditions similar to those experienced from 2008 through 2009 for any substantial length of time could make it difficult to extend the maturity of or refinance our existing indebtedness or obtain new indebtedness with similar terms and any failure to do so could have a material adverse effect on our business. The debt capital that will be available to us in the future, if at all, may be at a higher cost and on less favorable terms and conditions than what we currently experience. Further, if we are unable to raise or refinance debt, then our equity investors may not benefit from the potential for increased returns on equity resulting from leverage and we may be limited in our ability to make new commitments or to fund existing commitments to our portfolio companies.

The illiquidity of our investments may make it difficult for us to sell such investments if required. As a result, we may realize significantly less than the value at which we have recorded our investments. In addition, significant changes in the capital markets, including the disruption and volatility, have had, and may in the future have, a negative effect on the valuations of our investments and on the potential for liquidity events involving our investments. An inability to raise capital, and any required sale of our investments for liquidity purposes, could have a material adverse impact on our business, financial condition and results of operations.

Price declines and illiquidity in the corporate debt markets have adversely affected, and may in the future adversely affect, the fair value of our portfolio investments, reducing our net asset value through increased net unrealized depreciation.

As a BDC, we are required to carry our investments at market value or, if no market value is ascertainable, at fair value as determined in good faith by or under the direction of our board of directors. Decreases in the market values or fair values of our investments are recorded as unrealized depreciation, which reduces our net asset value. Depending on market conditions, we could incur substantial realized losses and may suffer additional unrealized losses in future periods, which could have a material adverse impact on our business, financial condition and results of operations.

The downgrade of the U.S. credit rating, the economic crisis in Europe, turbulence in Chinese markets and global commodity markets or other macro-economic events could negatively impact our business, financial condition and earnings.

Although U.S. lawmakers passed legislation to raise the federal debt ceiling and Standard & Poor's Ratings Services affirmed its 'AA+' long-term sovereign credit rating on the United States and revised the outlook on the long-term rating from negative to stable in June of 2013, U.S. debt ceiling and budget deficit concerns together with signs of deteriorating sovereign debt conditions in Europe continue to present the possibility of a credit-rating downgrade, economic slowdowns, or a recession for the United States. The impact of any further downgrades to the U.S. government's sovereign credit rating or downgraded sovereign credit ratings of European countries or the Russian Federation, or their perceived creditworthiness could adversely affect the U.S. and global financial markets and economic conditions. These developments, along with any further European sovereign debt issues, could cause interest rates and borrowing costs to rise, which may negatively impact our ability to access the debt markets on favorable terms. Continued adverse economic conditions could have a material adverse effect on our business, financial condition and results of operations.

In 2010, a financial crisis emerged in Europe, triggered by high budget deficits and rising direct and contingent sovereign debt in Greece, Ireland, Italy, Portugal and Spain, which created concerns about the ability of these nations to continue to service their sovereign debt obligations. While the financial stability of many of such countries has improved significantly, risks resulting from any future debt crisis in Europe or any similar crisis could have a detrimental impact on the global economic recovery, sovereign and non-sovereign debt in these countries and the financial condition of European financial institutions. In July and August 2015, Greece reached agreements with its international creditors for bailouts that provide aid in exchange for austerity terms that had previously been rejected by Greek voters. Market and economic disruptions have affected, and may in the future affect, consumer confidence levels and spending, personal bankruptcy rates, levels of incurrence and

TABLE OF CONTENTS

default on consumer debt and home prices, among other factors. We cannot assure you that market disruptions in Europe, including the increased cost of funding for certain governments and financial institutions, will not impact the global economy, and we cannot assure you that assistance packages will be available, or if available, be sufficient to stabilize countries and markets in Europe or elsewhere affected by a financial crisis. To the extent uncertainty regarding any economic recovery in Europe negatively impacts consumer confidence and consumer credit factors, our business, financial condition and results of operations could be significantly and adversely affected.

In addition, stock prices in China experienced a significant decline in the second quarter of 2015, resulting primarily from continued sell-off of shares trading in Chinese markets. In August 2015, Chinese authorities sharply devalued China's currency. Chinese market volatility has been followed by volatility in stock markets around the world, including in the United States, and increased volatility in commodity markets, such as reductions in prices of crude oil. Continued volatility in Chinese markets may have a contagion effect across the financial markets. These market and economic disruptions affected, and may in the future affect, the U.S. capital markets, which could adversely affect our business.

Additionally, Russian intervention in Ukraine beginning in 2014 significantly increased regional geopolitical tensions. The situation remains fluid with potential for further escalation of geopolitical tensions, increased severity of sanctions against Russian interests, and possible Russian countermeasures. Further economic sanctions could destabilize the economic environment and result in increased volatility. Should the economic recovery in the United States be adversely impacted by increased volatility in the global financial markets caused by developments as a result of the Russian sanctions, further turbulence in Chinese markets and global commodity markets or for any other reason, loan and asset growth and liquidity conditions at U.S. financial institutions, including us, may deteriorate.

In October 2014, the Federal Reserve announced that it was concluding its bond-buying program, or quantitative easing, which was designed to stimulate the economy and expand the Federal Reserve's holdings of long-term securities, suggesting that key economic indicators, such as the unemployment rate, had showed signs of improvement since the inception of the program. It is unclear what effect, if any, the conclusion of the Federal Reserve's bond-buying program will have on credit markets and the value of our investments. However, it is possible that, without quantitative easing by the Federal Reserve, these developments, along with the United States government's credit and deficit concerns and the European sovereign debt crisis, could cause interest rates and borrowing costs to rise, which may negatively impact our ability to access the debt markets on favorable terms.

Rising interest rates may adversely affect the value of our portfolio investments which could have an adverse effect on our business, financial condition and results of operations.

Our debt investments may be based on floating rates, such as London Interbank Offer Rate (LIBOR), EURIBOR, the Federal Funds Rate or the Prime Rate. General interest rate fluctuations may have a substantial negative impact on our investments, the value of our common stock and our rate of return on invested capital. A reduction in the interest rates on new investments relative to interest rates on current investments could also have an adverse impact on our net interest income. An increase in interest rates could decrease the value of any investments we hold which earn fixed interest rates, including subordinated loans, senior and junior secured and unsecured debt securities and loans and high yield bonds, and also could increase our interest expense, thereby decreasing our net income. Also, an increase in interest rates available to investors could make investment in our common stock less attractive if we are not able to increase our dividend rate, which could reduce the value of our common stock.

Because we have borrowed money, and may issue preferred stock to finance investments, our net investment income depends, in part, upon the difference between the rate at which we borrow funds or pay distributions on preferred stock and the rate that our investments yield. As a result, we can offer no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income. In periods of rising interest rates,

our cost of funds would increase except to the extent we have issued fixed rate debt or preferred stock, which could reduce our net investment income.

TABLE OF CONTENTS

You should also be aware that a change in the general level of interest rates can be expected to lead to a change in the interest rate we receive on many of our debt investments. Accordingly, a change in the interest rate could make it easier for us to meet or exceed the performance threshold and may result in a substantial increase in the amount of incentive fees payable to our Advisor with respect to the portion of the Incentive Fee based on income.

Changes relating to the LIBOR calculation process may adversely affect the value of the LIBOR-indexed, floating-rate debt securities in our portfolio.

In the recent past, concerns have been publicized that some of the member banks surveyed by the British Bankers Association (BBA) in connection with the calculation of LIBOR across a range of maturities and currencies may have been under-reporting or otherwise manipulating the inter-bank lending rate applicable to them in order to profit on their derivatives positions or to avoid an appearance of capital insufficiency or adverse reputational or other consequences that may have resulted from reporting inter-bank lending rates higher than those they actually submitted. A number of BBA member banks entered into settlements with their regulators and law enforcement agencies with respect to alleged manipulation of LIBOR, and investigations by regulators and governmental authorities in various jurisdictions are ongoing.

Actions by the BBA, regulators or law enforcement agencies as a result of these or future events, may result in changes to the manner in which LIBOR is determined. Potential changes, or uncertainty related to such potential changes may adversely affect the market for LIBOR-based securities, including our portfolio of LIBOR-indexed, floating-rate debt securities. In addition, any further changes or reforms to the determination or supervision of LIBOR may result in a sudden or prolonged increase or decrease in reported LIBOR, which could have an adverse impact on the market for LIBOR-based securities or the value of our portfolio of LIBOR-indexed, floating-rate debt securities.

Risks related to our business

We may not replicate the Company s historical performance or the historical performance of other entities managed or supported by the Advisor.

We may not be able to replicate the Company s historical performance or the historical performance of the Advisor s investments, and our investment returns may be substantially lower than the returns achieved by the Company in the past. We can offer no assurance that the Advisor will be able to continue to implement our investment objective with the same degree of success as it has had in the past.

Our business model depends upon the development and maintenance of strong referral relationships with other asset managers and investment banking firms.

We are substantially dependent on our informal relationships, which we use to help identify and gain access to investment opportunities. If we fail to maintain our relationships with key firms, or if we fail to establish strong referral relationships with other firms or other sources of investment opportunities, we will not be able to grow our portfolio of equity investments and achieve our investment objective. In addition, persons with whom we have informal relationships are not obligated to inform us of investment opportunities, and therefore such relationships may not lead to the origination of equity or other investments. Any loss or diminishment of such relationships could effectively reduce our ability to identify attractive portfolio companies that meet our investment criteria, either for direct equity investments or for investments through private secondary market transactions or other secondary transactions.

The Advisor s liability is limited under the investment management agreement, and we are required to indemnify the Advisor against certain liabilities, which may lead the Advisor to act in a riskier manner on our behalf than it

would when acting for its own account.

The Advisor has not assumed any responsibility to us other than to render the services described in the investment management agreement, and it will not be responsible for any action of our board of directors in declining to follow the Advisor's advice or recommendations. Pursuant to the investment management agreement, the Advisor and its members and their respective officers, managers, partners, agents, employees, controlling persons and members and any other person or entity affiliated with it will not be liable to us for their acts under the investment management agreement, absent willful misfeasance, bad faith, gross negligence or reckless

TABLE OF CONTENTS

disregard in the performance of their duties. We have agreed to indemnify, defend and protect the Advisor and its members and their respective officers, managers, partners, agents, employees, controlling persons and members and any other person or entity affiliated with it with respect to all damages, liabilities, costs and expenses resulting from acts of the Advisor not arising out of willful misfeasance, bad faith, gross negligence or reckless disregard in the performance of their duties under the investment and management agreement. These protections may lead the Advisor to act in a riskier manner when acting on our behalf than it would when acting for its own account.

We may suffer credit losses.

Investment in middle-market companies is highly speculative and involves a high degree of risk of credit loss, and therefore our securities may not be suitable for someone with a low tolerance for risk. These risks are likely to increase during an economic recession.

Our use of borrowed funds, including under the Leverage Program, to make investments exposes us to risks typically associated with leverage.

The Operating Company borrows money, both directly and indirectly through TCPC Funding and the SBIC. As a result:

- our common stock is exposed to incremental risk of loss and a decrease in the value of our investments would have a greater negative impact on the value of our common stock than if we did not use leverage;
- adverse changes in interest rates could reduce or eliminate the incremental income we make with the proceeds of leverage;
- we, and indirectly our common stockholders, bear the entire cost of issuing and paying interest or dividends on any borrowed funds issued by us or the Operating Company;
- our ability to pay dividends on our common stock will be restricted if our asset coverage ratio is not at least 200% and any amounts used to service indebtedness would not be available for such dividends; and
- our ability to amend the Operating Company organizational documents or investment management agreements may be restricted if such amendment could have a material adverse impact on lenders under our Leverage Program.

The use of leverage creates increased risk of loss and is considered a speculative investment technique. The use of leverage magnifies the potential gains and losses from an investment and increases the risk of loss of capital. To the extent that income derived by us from investments purchased with borrowed funds is greater than the cost of borrowing, our net income will be greater than if borrowing had not been used. Conversely, if the income from investments purchased from these sources is not sufficient to cover the cost of the leverage, our net investment income will be less than if leverage had not been used, and the amount available for ultimate distribution to the holders of common stock will be reduced. The extent to which the gains and losses associated with leveraged investing are increased will generally depend on the degree of leverage employed. We may, under some circumstances, be required to dispose of investments under unfavorable market conditions in order to maintain our leverage, thus causing us to recognize a loss that might not otherwise have occurred. In the event of a sale of investments upon default under our borrowing arrangements, secured creditors will be contractually entitled to direct such sales and may be expected to do so in their interest, rather than in the interests of the holders of common stock. Holders of common stock will incur losses if the proceeds from a sale in any of the foregoing circumstances are insufficient, after payment in full of amounts due and payable on leverage, including administrative expenses, to repay such holders investments in our common stock. As a result, you could experience a total loss of your investment. Any decrease in our revenue would cause our net income to decline more than it would have had we not borrowed funds and could negatively affect our ability to make distributions on our common stock. The ability to service any debt that we have or may have outstanding depends largely on our financial performance and is subject to prevailing economic conditions and competitive pressures. There is no limitation on the percentage of portfolio investments that can be pledged to secure

borrowings. The amount of leverage that we employ at any particular time will depend on our Advisor s and our board of director s assessments of market and other factors at the time of any proposed borrowing.

TABLE OF CONTENTS

In addition to regulatory restrictions that restrict our ability to raise capital, the Leverage Program contains various covenants which, if not complied with, could accelerate repayment under the SVCP Facility and TCPC Funding Facility, thereby materially and adversely affecting our liquidity, financial condition and results of operations.

Under the Leverage Program, we must comply with certain financial and operational covenants. These covenants include:

- restrictions on the level of indebtedness that we are permitted to incur in relation to the value of our assets;
- restrictions on our ability to make distributions and other restricted payments under certain circumstances;
- restrictions on extraordinary events, such as mergers, consolidation and sales of assets;
- restrictions on our ability to incur liens and incur indebtedness; and
- maintenance of a minimum level of stockholders' equity.

In addition, by limiting the circumstances in which borrowings may occur under the SVCP Facility and TCPC Funding Facility, the credit agreements related to such facilities (the Credit Agreements) in effect provide for various asset coverage, credit quality and diversification limitations on our investments. Such limitations may cause us to be unable to make or retain certain potentially attractive investments or to be forced to sell investments at an inappropriate time and consequently impair our profitability or increase losses or result in adverse tax consequences. As of February 26, 2016, we were in compliance with these covenants. However our continued compliance with these covenants depends on many factors, some of which are beyond our control. Accordingly, there are no assurances that we will continue to comply with the covenants in the Credit Agreements. Failure to comply with these covenants would result in a default under the Credit Agreements which, if we were unable to obtain a waiver from the respective lenders thereunder, could result in an acceleration of repayments under the Credit Agreements.

The SVCP Facility also has certain key man provisions. For example, it is an event of default if either Howard M. Levkowitz or Rajneesh Vig cease to be actively involved in the management of the Advisor and is not replaced with someone with comparable skills within 180 days. Further, if any two of the individuals cease to be actively involved in management of the Advisor, the administrative agent under the Operating Company's Credit Agreement may veto a proposed replacement for one of such individuals and may veto any of the Operating Company's portfolio transactions that are in excess of 15% of its total assets until a replacement has been appointed to fill one of such positions.

The SVCP Facility matures in July 2018 and the TCPC Funding Facility matures in March 2020, subject to extension by the lenders at our request. Any inability to renew, extend or replace the SVCP Facility and/or TCPC Funding Facility could adversely impact our liquidity and ability to find new investments or maintain distributions to our stockholders.

The SVCP Facility matures July 31, 2018, subject to extension by the lenders at our request. Advances under the SVCP Facility generally bear interest at LIBOR plus 2.50% per annum during the period August 1, 2014 through September 3, 2015, subject to certain limitations. Advances under the SVCP Facility from September 3, 2015 through July 31, 2016 generally bear interest at LIBOR plus 1.75% per annum, subject to certain limitations. The TCPC Funding Facility matures on March 6, 2020, subject to an extension by the lender at our request. Advances under the TCPC Funding Facility generally bear interest based on LIBOR plus either 2.25% or 2.50% per annum, subject to certain limitations. We do not currently know whether we will renew, extend or replace the SVCP Facility and TCPC Funding Facility upon their maturities or whether we will be able to do so on terms that are as favorable as the SVCP Facility and TCPC Funding Facility. In addition, we will be required to liquidate assets to repay amounts due under the SVCP Facility and TCPC Funding Facility if we do not renew, extend or replace the SVCP Facility and TCPC Funding Facility prior to their respective maturities.

Upon the termination of the SVCP Facility and TCPC Funding Facility, there can be no assurance that we will be able to enter into a replacement facility on terms that are as favorable to us, if at all. Our ability to replace the SVCP Facility and TCPC Funding Facility may be constrained by then-current economic conditions

TABLE OF CONTENTS

affecting the credit markets. In the event that we are not able to replace the SVCP Facility and TCPC Funding Facility at the time of their maturity, this could have a material adverse effect on our liquidity and ability to fund new investments, our ability to make distributions to our stockholders and our ability to qualify as a RIC.

The creditors under the SVCP Facility and TCPC Funding Facility have a first claim on all of the Company's assets included in the collateral for the respective facilities.

Lenders have fixed dollar claims on our assets that are superior to the claims of our common stockholders. Substantially all of our current assets have been pledged as collateral under the SVCP Facility and TCPC Funding Facility. If an event of default occurs under either of the SVCP Facility and TCPC Funding Facility, the respective lenders would be permitted to accelerate amounts due under the respective facilities and liquidate our assets to pay off amounts owed under the respective facilities and limitations would be imposed on us with respect to the purchase or sale of investments. Such limitations may cause us to be unable to make or retain certain potentially attractive investments or to be forced to sell investments at an inappropriate time and consequently impair our profitability or increase our losses or result in adverse tax consequences.

In the event of the dissolution of the Operating Company or otherwise, if the proceeds of the Operating Company's assets (after payment in full of obligations to any such debtors) are insufficient to repay capital invested in us by the holders of the common stock, no other assets will be available for the payment of any deficiency. None of our board of directors, the Advisor, the General Partner or any of their respective affiliates, have any liability for the repayment of capital contributions made to the Company by the holders of common stock. Holders of common stock could experience a total loss of their investment in the Company.

Lenders under the SVCP Facility may have a veto power over the Company's investment policies.

If a default has occurred under the SVCP Facility, the lenders under the SVCP Facility may veto changes in investment policies. The SVCP Facility also has certain limitations on unusual types of investments such as commodities, real estate and speculative derivatives, which are not part of the Company's investment strategy or policies in any event.

The SBIC may be unable to make distributions to us that will enable us to meet or maintain RIC status, which could result in the imposition of an entity-level tax.

In order for us to continue to qualify for RIC tax treatment and to minimize corporate-level taxes, we will be required to distribute substantially all of our net ordinary income and net capital gain income, including income from certain of our subsidiaries, which includes the income from the SBIC. We will be partially dependent on the SBIC for cash distributions to enable us to meet the RIC distribution requirements. The SBIC may be limited by the Small Business Investment Act of 1958, and SBA regulations governing SBICs, from making certain distributions to us that may be necessary to enable us to maintain our status as a RIC. We may have to request a waiver of the SBA's restrictions for the SBIC to make certain distributions to maintain our eligibility for RIC status. We cannot assure you that the SBA will grant such a waiver and if the SBIC is unable to obtain a waiver, compliance with the SBA regulations may result in loss of RIC tax treatment and a consequent imposition of an entity-level tax on us.

The SBIC is subject to SBA regulations, and any failure to comply with SBA regulations could have an adverse effect on our operations.

On April 22, 2014, the SBIC received an SBIC license from the SBA. The SBIC license allows the SBIC to obtain leverage by issuing SBA-guaranteed debentures, subject to the issuance of a capital commitment by the SBA and other customary procedures. SBA-guaranteed debentures are non-recourse, interest only debentures with interest

payable semi-annually and have a ten year maturity. The principal amount of SBA-guaranteed debentures is not required to be paid prior to maturity but may be prepaid at any time without penalty. The interest rate of SBA-guaranteed debentures is fixed on a semi-annual basis at a market-driven spread over U.S. Treasury Notes with 10-year maturities. The SBA, as a creditor, will have a superior claim to the SBIC's assets over our stockholders in the event we liquidate the SBIC or the SBA exercises its remedies under the SBA-guaranteed debentures issued by the SBIC upon an event of default.

Under current SBA regulations, a licensed SBIC can provide capital to those entities that have a tangible net worth not exceeding \$19.5 million and an average annual net income after Federal income taxes not exceeding

TABLE OF CONTENTS

\$6.5 million for the two most recent fiscal years. In addition, a licensed SBIC must devote 25% of its investment activity to those entities that have a tangible net worth not exceeding \$6.0 million and an average annual net income after Federal income taxes not exceeding \$2.0 million for the two most recent fiscal years. The SBA regulations also provide alternative size standard criteria to determine eligibility, which depend on the industry in which the business is engaged and are based on factors such as the number of employees and gross sales. The SBA regulations permit licensed SBICs to make long term loans to small businesses, invest in the equity securities of such businesses and provide them with consulting and advisory services. The SBA also places certain limitations on the financing terms of investments by SBICs in portfolio companies and prohibits SBICs from providing funds for certain purposes or to businesses in a few prohibited industries. Compliance with SBA requirements may cause the SBIC to forego attractive investment opportunities that are not permitted under SBA regulations.

Further, the SBA regulations require that a licensed SBIC be periodically examined and audited by the SBA to determine its compliance with the relevant SBA regulations. The SBA prohibits, without prior SBA approval, a change of control of an SBIC or any transfers of the capital stock of a licensed SBIC. If the SBIC fails to comply with applicable SBA regulations, the SBA could, depending on the severity of the violation, limit or prohibit its use of debentures, declare outstanding debentures immediately due and payable, and/or limit it from making new investments. In addition, the SBA can revoke or suspend a license for willful or repeated violation of, or willful or repeated failure to observe, any provision of the Small Business Investment Act of 1958 or any rule or regulation promulgated thereunder. The Advisor, as the SBIC's investment adviser, does not have any previous experience managing an SBIC. Its limited experience in complying with SBA regulations may hinder its ability to take advantage of the SBIC's access to SBA-guaranteed debentures. Any failure to comply with SBA regulations could have an adverse effect on our operations.

SBA regulations limit the outstanding dollar amount of SBA-guaranteed debentures that may be issued by an SBIC or group of SBICs under common control.

The SBA regulations currently limit the dollar amount of SBA-guaranteed debentures that can be issued by any one SBIC to \$150.0 million or to a group of SBICs under common control to \$225.0 million. A proposed bill in the U.S. Senate, the Expanding Access to Capital for Entrepreneurial Act, or Senate Bill 511, would increase the total SBIC leverage capacity for affiliated SBIC funds from \$225.0 million to \$350.0 million. However, the ultimate form and likely outcome of such legislation or any similar legislation cannot be predicted.

An SBIC may not borrow an amount in excess of two times (and in certain cases, up to three times) its regulatory capital. As of December 31, 2015, the SBIC had \$42.8 million in SBA-guaranteed debentures outstanding. If we reach the maximum dollar amount of SBA-guaranteed debentures permitted, and if we require additional capital, our cost of capital may increase, and there is no assurance that we will be able to obtain additional financing on acceptable terms.

Moreover, the current status of the SBIC as an SBIC does not automatically assure that the SBIC will continue to receive SBA-guaranteed debenture funding. Receipt of SBA leverage funding is dependent upon the SBIC continuing to be in compliance with SBA regulations and policies and available SBA funding. The amount of SBA leverage funding available to SBICs is dependent upon annual Congressional authorizations and in the future may be subject to annual Congressional appropriations. There can be no assurance that there will be sufficient debenture funding available at the times desired by the SBIC.

The debentures guaranteed by the SBA have a maturity of ten years and require semi-annual payments of interest. The SBIC will need to generate sufficient cash flow to make required interest payments on the debentures. If the SBIC is unable to meet their financial obligations under the debentures, the SBA, as a creditor, will have a superior claim to the SBIC's assets over our stockholders in the event we liquidate the SBIC or the SBA exercises its remedies under such debentures as the result of a default by us.

If we incur additional leverage, it will increase the risk of investing in shares of our common stock.

The Company has indebtedness pursuant to the Leverage Program and expects, in the future, to borrow additional amounts under the SVCP Facility and TCPC Funding Facility and may increase the size of the SVCP Facility and TCPC Funding Facility or enter into other borrowing arrangements.

Illustration. The following table illustrates the effect of leverage on returns from an investment in our common stock assuming various annual returns, net of expenses. The calculations in the table below are

TABLE OF CONTENTS

hypothetical and actual returns may be higher or lower than those appearing below. The calculation is based on our level of leverage at December 31, 2015, which represented borrowings equal to 40.4% of our total assets. On such date, we also had \$1,243.3 million in total assets; \$1,182.9 million in total investments; an average cost of funds of 3.20%; \$502.4 million aggregate principal amount of debt outstanding; and \$722.0 million of total net assets. In order to compute the Corresponding Return to Common Stockholders, the Assumed Return on Portfolio (Net of Expenses Other than Interest) is multiplied by the total value of our investment portfolio at December 31, 2015 to obtain an assumed return to us. From this amount, interest expense multiplied the combined rate of interest of 3.20% by the \$502.4 million of debt is subtracted to determine the return available to stockholders. The return available to stockholders is then divided by the total value of our net assets at December 31, 2015 to determine the Corresponding Return to Common Stockholders. Actual interest payments may vary.

Assumed Return on Portfolio (Net of Expenses Other than Interest)

	-10 %	-5 %	0 %	5 %	10 %
Corresponding Return to Common Stockholders	-19 %	-10 %	-2 %	6 %	14 %

The assumed portfolio return in the table is based on SEC regulations and is not a prediction of, and does not represent, our projected or actual performance. The table also assumes that we will maintain a constant level of leverage. The amount of leverage that we use will vary from time to time.

The lack of liquidity in substantially all of our investments may adversely affect our business.

Our investments generally are made and will continue to be made in private companies. Substantially all of these securities will be subject to legal and other restrictions on resale or will be otherwise less liquid than publicly traded securities. The illiquidity of our investments may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we had previously recorded our investments. Further, we may face other restrictions on our ability to liquidate an investment in a portfolio company to the extent that we or an affiliated manager has material non-public information regarding such portfolio company.

A substantial portion of our portfolio investments may be recorded at fair value as determined using a consistently applied valuation process in accordance with our documented valuation policy that has been reviewed and approved by our board of directors, who also approve in good faith the valuation of such securities and, as a result, there may be uncertainty regarding the value of our portfolio investments.

The debt and equity investments that we make for which market quotations are not readily available will be valued at fair value as determined using a consistently applied valuation process in accordance with our documented valuation policy that has been reviewed and approved by our board of directors, who also approve in good faith the valuation of such securities. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of our investments may differ significantly from the values that would have been used had a readily available market value existed for such investments, and the differences could be material. Our net asset value could be adversely affected if determinations regarding the fair value of these investments were materially higher than the values ultimately realized upon the disposal of such investments.

We are exposed to risks associated with changes in interest rates.

General interest rate fluctuations may have a substantial negative impact on our investments, the value of our common stock and our rate of return on invested capital. A reduction in the interest rates on new investments relative to interest rates on current investments could also have an adverse impact on our net investment income. An increase in interest rates could decrease the value of any investments we hold that earn fixed interest rates, including subordinated loans,

senior and junior secured and unsecured debt securities and loans and high-yield bonds, and also could increase our interest expense, thereby decreasing our net income. Also, an increase in interest rates available to investors could make investment in our common stock less attractive if we are not able to increase our dividend rate, which could reduce the value of our common stock.

TABLE OF CONTENTS

The Advisor may face conflicts in allocating investment opportunities between us and certain other entities that could adversely impact our investment returns.

The Advisor and its affiliates, employees and associates currently do and in the future may manage other funds and accounts, including for other accounts in which certain holders of our common stock have investments, which we refer to as Other Advisor Accounts. Other Advisor Accounts invest in assets that are also eligible for purchase by us. Our investment policies, fee arrangements and other circumstances may vary from those of Other Advisor Accounts. Accordingly, conflicts may arise regarding the allocation of investments or opportunities among us and Other Advisor Accounts. [In general, the Advisor and its affiliates will allocate investment opportunities pro rata among us and Other Advisor Accounts (assuming the investment satisfies the objectives of each) based on the amount of committed capital each then has available. The allocation of certain investment opportunities in private placements is subject to independent director approval pursuant to the terms of the co-investment exemptive order applicable to us and described below. In certain cases, investment opportunities may be made other than on a pro rata basis.] For example, we may desire to retain an asset at the same time that one or more Other Advisor Accounts desire to sell it or we may not have additional capital to invest at a time Other Advisor Accounts do. When our investment allocations are made on a basis other than pro rata our investment performance may be less favorable when compared to the investment performance of Other Advisor Accounts with respect to those investments. The Advisor and its affiliates intend to allocate investment opportunities to us and Other Advisor Accounts in a manner that they believe in their judgment and based upon their fiduciary duties to be appropriate given the investment objectives, size of transaction, investable assets, alternative investments potentially available, prior allocations, liquidity, maturity, expected holding period, diversification, lender covenants and other limitations of ours and the Other Advisor Accounts. See — Risks related to our operations as a BDC — While our ability to enter into transactions with our affiliates is restricted under the 1940 Act, we have received an exemptive order from the SEC permitting certain affiliated investments subject to certain conditions. As a result, the Advisor may face conflicts of interests and investments made pursuant to the exemptive order conditions could in certain circumstances adversely affect the price paid or received by us or the availability or size of the position purchased or sold by us.

There may be situations in which Other Advisor Accounts and the Company might invest in different securities issued by the same portfolio company. It is possible that if the portfolio company's financial performance and condition deteriorates such that one or both investments are or could be impaired, the Advisor might face a conflict of interest given the difference in seniority of the respective investments. In such situations, the Advisor would review the conflict on a case-by-case basis and implement procedures consistent with its fiduciary duty to enable it to act fairly to the Other Advisor Accounts and the Company in the circumstances. Any steps by the Advisor will take into consideration the interests of each of the affected clients, the circumstances giving rise to the conflict, the procedural efficacy of various methods of addressing the conflict and applicable legal requirements.

Moreover, the Advisor's investment professionals, its Investment Committee (as defined below), its senior management and employees serve or may serve as officers, directors or principals of entities that operate in the same or a related line of business. Accordingly, these individuals may have obligations to investors in those entities or funds, the fulfillment of which might not be in our best interests or the best interests of our stockholders. In addition, certain of the personnel employed by the Advisor or focused on our business may change in ways that are detrimental to our business.

We have limited operating history as a BDC and, if the Advisor is unable to manage our investments effectively, we may be unable to achieve our investment objective.

Our ability to achieve our investment objective will depend on our ability to manage our business, which will depend, in turn, on the ability of the Advisor to identify, invest in and monitor companies that meet our investment criteria. Accomplishing this result will largely be a function of the Advisor's investment process. Although the Advisor has

managed closed-end funds with similar restrictions, the 1940 Act imposes numerous constraints on the operations of BDCs. The Advisor's limited experience in operating under these constraints may hinder the Advisor's ability to help us take advantage of attractive investment opportunities and to achieve our investment objectives. For example, BDCs are prohibited from making any nonqualifying investment unless at least 70% of their total assets are primarily in qualifying investments, which are primarily securities of private or

TABLE OF CONTENTS

thinly-traded U.S. companies (excluding certain financial companies), cash, cash equivalents, U.S. Government securities and other high quality debt investments that mature in one year or less. The Advisor has limited experience investing under these constraints. In addition, the General Partner has limited experience administering a BDC.

The Advisor and its partners, officers, directors, members, managers, employees, affiliates and agents may be subject to certain potential or actual conflicts of interest in connection with the activities of, and investments by, us.

The Advisor and its affiliates may spend substantial time on other business activities, including investment management and advisory activities for entities with the same or overlapping investment objectives, investing for their own account, financial advisory services (including services for entities in which we invest), and acting as directors, officers, creditor committee members or in similar capacities. Subject to the requirements of the 1940 Act and other applicable laws, the Advisor and its affiliates and associates intend to engage in such activities and may receive compensation from third parties for their services. Subject to the same requirements, such compensation may be payable by entities in which we invest in connection with actual or contemplated investments, and the Advisor may receive fees and other compensation in connection with structuring investments which they will share.

The Advisor's management fee is based on a percentage of our total assets (other than cash or cash equivalents) and the Advisor may have conflicts of interest in connection with decisions that could affect our total assets, such as decisions as to whether to incur additional debt to increase management fees paid and to recoup the Advisor's payment of half of the sales load in connection with our initial public offering in April 2012.

Our incentive compensation may induce our Advisor to make certain investments, including speculative investments.

The incentive compensation payable by us to the Advisor and the General Partner may create an incentive for the Advisor to make investments on our behalf that are risky or more speculative than would be the case in the absence of such compensation arrangement. The way in which the incentive compensation payable to the Advisor is determined may encourage the Advisor to increase the use of leverage or take additional risk to increase the return on our investments. Under certain circumstances, the use of leverage may increase the likelihood of default, which would disfavor the holders of our common stock, or of securities convertible into our common stock or warrants representing rights to purchase our common stock or securities convertible into our common stock. A rise in the general level of interest rates can be expected to lead to higher interest rates applicable to certain of our debt investments and may accordingly result in a substantial increase in the amount of incentive compensation payable to the Advisor with respect to our cumulative investment income. Although the incentive compensation payable to the General Partner or the Advisor is subject to a total return limitation, the Advisor may have some ability to accelerate the realization of gains to obtain incentive compensation earlier than it otherwise would when it may be in our best interests to not yet realize gains. Our directors monitor our use of leverage and the Advisor's management of our investment program in the best interests of our common stockholders.

We may invest, to the extent permitted by law, in the securities and instruments of other investment companies, including private funds, and, to the extent we so invest, we will bear our ratable share of any such investment company's expenses, including management and performance fees. We will also remain obligated to pay management and incentive compensation to the Advisor with respect to the assets invested in the securities and instruments of other investment companies. With respect to each of these investments, each of our common stockholders will bear his or her share of our management and incentive compensation as well as indirectly bear the management and performance fees and other expenses of any investment companies in which we invest.

We may be obligated to pay the Advisor incentive compensation payments in excess of the amounts we would have paid if such compensation was subject to clawback arrangements.

The Advisor or the General Partner is entitled to incentive compensation for each fiscal quarter after January 1, 2013 in an amount equal to a percentage of our ordinary income (before deducting incentive compensation) since that date and, separately, a percentage of our realized capital gains (net of realized capital losses and unrealized depreciation) since that date, in each case subject to a cumulative total return requirement.

TABLE OF CONTENTS

If we pay incentive compensation and thereafter experience additional realized capital losses or unrealized capital depreciation such that we would no longer have been required to provide incentive compensation, we will not be able to recover any portion of the incentive compensation previously paid or distributed because our incentive compensation arrangements do not contain any clawback provisions. As a result, the incentive compensation could exceed 20% of our cumulative total return, depending on the timing of unrealized appreciation, net unrealized depreciation and net realized capital losses. For example, part of the incentive compensation payable or distributable by us that relates to our ordinary income is computed on income that may include interest that has been accrued but not yet received in cash. If a portfolio company defaults on a loan, it is possible that accrued interest previously used in the calculation of the incentive compensation will become uncollectible. Similarly, the income component is measured against a total return limitation that includes unrealized gains. Such gains may not be realized or may be realized at a lower amount. Consequently, we may have paid incentive compensation on income in circumstances where we otherwise would not have done so and with respect to which we do not have a clawback right against the Advisor or the General Partner.

The General Partner may have certain interests that conflict with the interests of the board of directors in the governance of the Operating Company.

The General Partner, an affiliate of the Advisor, is responsible for the day-to-day operations of the Operating Company subject to the general supervision of the board of directors including various significant matters such as the issuance of additional classes of securities of the Operating Company and the determination of the timing and amounts of distributions payable by the Operating Company. The decisions of the General Partner with respect to these and other matters may be subject to various conflicts of interest arising out of its relationship with us and its affiliates. The General Partner could be confronted with decisions where it will, directly or indirectly, have an economic incentive to place its interests or the interests of its affiliates above ours.

We are dependent upon senior management personnel of the Advisor for our future success, and if the Advisor is unable to retain qualified personnel or if the Advisor loses any member of its senior management team, our ability to achieve our investment objective could be significantly harmed.

The success of the Company is highly dependent on the financial and managerial expertise of the Advisor. The loss of one or more of the voting members of the Investment Committee could have a material adverse effect on the performance of the Company. Although the Advisor and the voting members of the Investment Committee devote a significant amount of their respective efforts to the Company, they actively manage investments for other clients and are not required to (and will not) devote all of their time to the Company's affairs.

The Advisor or its affiliates may, from time to time, possess material non-public information, limiting our investment discretion.

The Advisor's investment professionals, Investment Committee or their respective affiliates may serve as directors of, or in a similar capacity with, companies in which we invest. In the event that material non-public information is obtained with respect to such companies, or we became subject to trading restrictions under the internal trading policies of those companies or as a result of applicable law or regulations, we could be prohibited for a period of time from purchasing or selling the securities of such companies, and this prohibition may have an adverse effect on us and, consequently, your interests as a stockholder.

The Advisor can resign on 60 days' notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

The Advisor has the right, under our investment management agreement, to resign at any time upon not more than 60 days written notice, whether we have found a replacement or not. If the Advisor resigns, we may not be able to find a new investment advisor or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and investment activities is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of

TABLE OF CONTENTS

executives having the expertise possessed by the Advisor and its affiliates. Even if we are able to retain comparable management, whether internal or external, the integration of such management and their lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

We may in the future determine to fund a portion of our investments by issuing preferred stock, which would magnify the potential gains or losses and the risks of investing in us in the same manner as our borrowings.

The issuance of shares of preferred stock with dividend or conversion rights, liquidation preferences or other economic terms favorable to the holders of preferred stock could adversely affect the market price for our common stock by making an investment in the common stock less attractive. In addition, preferred stock, which is another form of leverage, has the same risks to our common stockholders as borrowings because the dividends on any preferred stock we issue must be cumulative. Payment of dividends and repayment of the liquidation preference of preferred stock must take preference over any dividends or other payments to our common stockholders, and holders of preferred stock are not subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference (other than convertible preferred stock that converts into common stock). Lastly, under the 1940 Act, preferred stock constitutes a senior security for purposes of the 200% asset coverage test.

We may experience fluctuations in our periodic operating results.

We could experience fluctuations in our periodic operating results due to a number of factors, including the interest rates payable on the debt securities we acquire, the default rate on such securities, the level of our expenses (including the interest rates payable on our borrowings), the dividend rates payable on preferred stock we issue, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which we encounter competition in our markets and general economic conditions. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

If we fail to maintain our status as a business development company, our business and operating flexibility could be significantly reduced.

We qualify as business development companies under the 1940 Act. The 1940 Act imposes numerous constraints on the operations of business development companies. For example, BDCs are prohibited from making any unqualifying investments unless at least 70% of their total assets are invested in qualifying investments which are primarily securities of private or thinly-traded U.S. companies, cash, cash equivalents, U.S. government securities and other high quality debt investments that mature in one year or less. Failure to comply with the requirements imposed on business development companies by the 1940 Act could cause the SEC to bring an enforcement action against us and/or expose us to claims of private litigants. In addition, any such failure could cause an event of default under the Leverage Program, which could have a materially adverse effect on our business, financial conditions or results of operations.

Because we intend to distribute substantially all of our income to our stockholders to maintain our status as a RIC, we will continue to need additional capital to finance growth. If additional funds are unavailable or not available on favorable terms, our ability to grow will be impaired.

In order for the Holding Company to qualify for the tax benefits available to RICs and to avoid payment of excise taxes, we intend to distribute to our stockholders substantially all of our annual taxable income, except that we may retain certain net capital gains for reinvestment in common interests of the Operating Company, and treat such amounts as deemed distributions to our stockholders. If we elect to treat any amounts as deemed distributions, we

must pay income taxes at the corporate rate on such deemed distributions on behalf of our stockholders and our stockholders will receive a tax credit for such amounts and an increase in basis. A stockholder that is not subject to U.S. federal income tax or otherwise is not required to file a U.S. federal income tax return would be required to file a U.S. federal income tax return on the appropriate form in order to claim a refund for the taxes we paid. As a result of these requirements, we will likely need to raise capital from other sources to grow our business. Unfavorable economic or capital market conditions may increase our funding costs, limit our access to the capital markets or could result in a decision by lenders not to extend credit to us. An inability to successfully access the capital markets could limit our ability to grow our business and fully execute our business strategy and could decrease our earnings, if any.

TABLE OF CONTENTS

As a BDC, we are not able to incur senior securities unless after giving effect thereto we meet a coverage ratio of total assets, less liabilities and indebtedness not represented by senior securities, to total senior securities, which includes all of our borrowings, of at least 200%. This means that for every \$100 of net assets, we may raise \$100 from senior securities, such as borrowings or issuing preferred stock. These requirements limit the amount that we may borrow. On July 13, 2015, we obtained exemptive relief from the SEC to permit us to exclude the debt of TCPC SBIC LP guaranteed by the SBA from our 200% asset coverage test under the 1940 Act. The exemptive relief provides us with increased flexibility under the 200% asset coverage test by permitting the SBIC to borrow up to \$150.0 million more than it would otherwise be able to absent the receipt of this exemptive relief.

Because we will continue to need capital to grow our investment portfolio, these limitations may prevent us from incurring debt and require us to raise additional equity at a time when it may be disadvantageous to do so. While we expect we will be able to borrow and to issue additional debt securities and expect that we will be able to issue additional equity securities, we cannot assure you that debt and equity financing will be available to us on favorable terms, or at all. In addition, as a business development company, we generally will not be permitted to issue equity securities priced below net asset value without stockholder approval. If additional funds are not available to us, we could be forced to curtail or cease new investment activities and our net asset value or common stock price could decline.

The highly competitive market in which we operate may limit our investment opportunities.

A number of entities compete with us to make the types of investments that we make. We compete with other BDCs, public and private funds, commercial and investment banks, commercial financing companies, and, to the extent they provide an alternative form of financing, private equity funds. Additionally, because competition for investment opportunities generally has increased among alternative investment vehicles, such as hedge funds, those entities now invest in areas in which they have not traditionally invested, including making investments in middle-market private companies. As a result of these new entrants, competition for investment opportunities intensified over the past several years and may intensify further in the future. Some of our existing and potential competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions and valuation requirements that the 1940 Act imposes on us as a BDC and that the Code imposes on us as a RIC. We cannot assure you that the competitive pressures we face will not have a material adverse effect on our business, financial condition and results of operations. Also, as a result of this existing and potentially increasing competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we can offer no assurance that we will be able to identify and make investments that are consistent with our investment objective.

We do not seek to compete primarily based on the interest rates we offer, and we believe that some of our competitors make loans with interest rates that are comparable to or lower than the rates we offer.

We may lose investment opportunities if we do not match our competitors' pricing, terms and structure. If we match our competitors' pricing, terms and structure, we may experience decreased net interest income and increased risk of credit loss. As a result of operating in such a competitive environment, we may make investments that are on better terms to our portfolio companies than what we may have originally anticipated, which may impact our return on these investments.

Our board of directors may change our operating policies and strategies without prior notice or stockholder approval.

Our board of directors has the authority to modify or waive our operating policies and strategies without prior notice and without stockholder approval. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, operating results or value of our stock. Nevertheless, the effects could adversely affect our business and impact our ability to make distributions and cause you to lose all or part of your investment.

TABLE OF CONTENTS

Risks related to our investments

Our investments may be risky, and you could lose all or part of your investment.

We invest primarily in middle-market companies primarily through leveraged loans.

Risks Associated with middle-market companies. Investing in private middle-market companies involves a number of significant risks, including:

- these companies may have limited financial resources and may be unable to meet their obligations under their debt securities that we hold, which may be accompanied by a deterioration in the value of any collateral; they typically have shorter operating histories, narrower product lines and smaller market shares than larger
- businesses, which tend to render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns;
- they are more likely to depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on the portfolio company and, in turn, on us;
- they generally have less predictable operating results, may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence, and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position;
- our executive officers, directors and the Advisor may, in the ordinary course of business, be named as defendants in litigation arising from our investments in the portfolio companies;
- changes in laws and regulations, as well as their interpretations, may adversely affect their respective businesses, financial structures or prospects; and
- they may have difficulty accessing the capital markets to meet future capital needs.

Little public information exists about private middle-market companies, and we expect to rely on the Advisor's investment professionals to obtain adequate information to evaluate the potential returns from investing in these companies. These companies and their financial information are not subject to the Sarbanes-Oxley Act of 2002 and other rules that govern disclosures and financial controls of public companies. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose money on our investment.

Lower Credit Quality Obligations. Most of our debt investments are likely to be in lower grade obligations. The lower grade investments in which we invest may be rated below investment grade by one or more nationally-recognized statistical rating agencies at the time of investment or may be unrated but determined by the Advisor to be of comparable quality. Debt securities rated below investment grade are commonly referred to as "junk bonds" and are considered speculative with respect to the issuer's capacity to pay interest and repay principal. The debt that we invest in typically is not rated prior to our investment by any rating agency, but we believe that if such investments were rated, they would be below investment grade (rated lower than Baa3 by Moody's Investors Service, lower than BBB- by Fitch Ratings or lower than BBB- by Standard & Poor's). We may invest without limit in debt of any rating, as well as debt that has not been rated by any nationally recognized statistical rating organization.

Investment in lower grade investments involves a substantial risk of loss. Lower grade securities or comparable unrated securities are considered predominantly speculative with respect to the issuer's ability to pay interest and principal and are susceptible to default or decline in market value due to adverse economic and business developments. The market values for lower grade debt tend to be very volatile and are less liquid than investment grade securities. For these reasons, your investment in our company is subject to the following specific risks:

- increased price sensitivity to a deteriorating economic environment;
- greater risk of loss due to default or declining credit quality;

TABLE OF CONTENTS

- adverse company specific events are more likely to render the issuer unable to make interest and/or principal payments; and
- if a negative perception of the lower grade debt market develops, the price and liquidity of lower grade securities may be depressed. This negative perception could last for a significant period of time.

Adverse changes in economic conditions are more likely to lead to a weakened capacity of a lower grade issuer to make principal payments and interest payments than an investment grade issuer. The principal amount of lower grade securities outstanding has proliferated in the past decade as an increasing number of issuers have used lower grade securities for corporate financing. An economic downturn could severely affect the ability of highly leveraged issuers to service their debt obligations or to repay their obligations upon maturity. Similarly, downturns in profitability in specific industries could adversely affect the ability of lower grade issuers in that industry to meet their obligations. The market values of lower grade debt tend to reflect individual developments of the issuer to a greater extent than do higher quality investments, which react primarily to fluctuations in the general level of interest rates. Factors having an adverse impact on the market value of lower grade debt may have an adverse effect on our net asset value and the market value of our common stock. In addition, we may incur additional expenses to the extent we are required to seek recovery upon a default in payment of principal or interest on our portfolio holdings. In certain circumstances, we may be required to foreclose on an issuer's assets and take possession of its property or operations. In such circumstances, we would incur additional costs in disposing of such assets and potential liabilities from operating any business acquired.

The secondary market for lower grade debt is unlikely to be as liquid as the secondary market for more highly rated debt, a factor which may have an adverse effect on our ability to dispose of a particular instrument. There are fewer dealers in the market for lower grade securities than investment grade obligations. The prices quoted by different dealers may vary significantly and the spread between the bid and asked price is generally larger than for higher quality instruments. Under adverse market or economic conditions, the secondary market for lower grade debt could contract further, independent of any specific adverse changes in the condition of a particular issuer, and these instruments may become highly illiquid. As a result, we could find it more difficult to sell these instruments or may be able to sell the securities only at prices lower than if such instruments were widely traded. Prices realized upon the sale of such lower rated or unrated securities, under these circumstances, may be less than the prices used in calculating our net asset value.

Since investors generally perceive that there are greater risks associated with lower grade debt of the type in which we may invest a portion of our assets, the yields and prices of such debt may tend to fluctuate more than those for higher rated instruments. In the lower quality segments of the fixed income markets, changes in perceptions of issuers' creditworthiness tend to occur more frequently and in a more pronounced manner than do changes in higher quality segments of the income securities market, resulting in greater yield and price volatility.

Distressed Debt Securities Risk. At times, distressed debt obligations may not produce income and may require us to bear certain extraordinary expenses (including legal, accounting, valuation and transaction expenses) in order to protect and recover our investment. Therefore, our ability to achieve current income for our stockholders may be diminished. We also will be subject to significant uncertainty as to when and in what manner and for what value the distressed debt we invest in will eventually be satisfied (e.g., through a liquidation of the obligor's assets, an exchange offer or plan of reorganization involving the distressed debt securities or a payment of some amount in satisfaction of the obligation). In addition, even if an exchange offer is made or plan of reorganization is adopted with respect to distressed debt we hold, there can be no assurance that the securities or other assets received by us in connection with such exchange offer or plan of reorganization will not have a lower value or income potential than may have been anticipated when the investment was made. Moreover, any securities received by us upon completion of an exchange offer or plan of reorganization may be restricted as to resale. As a result of our participation in negotiations with respect to any exchange offer or plan of reorganization with respect to an issuer of distressed debt, we may be restricted from disposing of such securities.

Payment-in-kind Interest Risk. Our loans may contain a payment-in-kind, or PIK, interest provision. PIK investments carry additional risk as holders of these types of securities receive no cash until the cash payment date unless a portion of such securities is sold. If the issuer defaults the Company may obtain no return on its investment. The PIK interest, computed at the contractual rate specified in each loan agreement, is added to the principal balance of the loan and recorded as interest income. To avoid the imposition of corporate-level tax on

TABLE OF CONTENTS

us, this non-cash source of income needs to be paid out to stockholders in cash distributions or, in the event that we determine to do so and in certain cases, in shares of our common stock, even though we have not yet collected and may never collect the cash relating to the PIK interest. As a result, we may have to distribute a taxable stock dividend to account for PIK interest even though we have not yet collected the cash.

Preferred Stock Risk. To the extent we invest in preferred securities, there are special risks, including:

Deferral. Preferred securities may include provisions that permit the issuer, at its discretion, to defer distributions for a stated period without any adverse consequences to the issuer. If we own a preferred security that is deferring its distributions, we may be required to report income for tax purposes although we have not yet received such income.

Subordination. Preferred securities are subordinated to bonds and other debt instruments in a company's capital structure in terms of priority to corporate income and liquidation payments, and therefore will be subject to greater credit risk than more senior debt instruments.

Liquidity. Preferred securities may be substantially less liquid than many other securities, such as common stocks or U.S. Government securities.

Limited Voting Rights. Generally, preferred security holders have no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may elect a number of directors to the issuer's board. Generally, once all the arrearages have been paid, the preferred security holders no longer have voting rights.

Equity Security Risk. We may have exposure to equity securities. Although equity securities have historically generated higher average total returns than fixed-income securities over the long term, equity securities also have experienced significantly more volatility in those returns. The equity securities that we acquire may fail to appreciate and may decline in value or become worthless.

Hedging Transactions. We may employ hedging techniques to minimize currency exchange rate risks or interest rate risks, but we can offer no assurance that such strategies will be effective. If we engage in hedging transactions, we may expose ourselves to risks associated with such transactions. Hedging against a decline in the values of our portfolio positions does not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of such positions decline. Moreover, it may not be possible to hedge against an exchange rate or interest rate fluctuation that is so generally anticipated that we are not able to enter into a hedging transaction at an acceptable price. Additionally, engaging in certain hedging transactions could result in adverse tax consequences, e.g. giving rise to income that does not qualify for the 90% annual gross income requirement applicable to RICs.

Because our investments are generally not in publicly traded securities, there will be uncertainty regarding the value of our investments, which could adversely affect the determination of our net asset value.

Our portfolio investments will generally not be in publicly traded securities. As a result, although we expect that some of our equity investments may trade on private secondary marketplaces, the fair value of our direct investments in portfolio companies will often not be readily determinable. Under the 1940 Act, investments for which there are no readily available market quotations, including securities that while listed on a private securities exchange have not actively traded, will be valued at fair value as determined using a consistently applied valuation process in accordance with our documented valuation policy that has been reviewed and approved by our board of directors, who also approve in good faith the valuation of such securities. In connection with that approval, the board of directors utilizes the services of an independent valuation firm, which prepares valuation reports on a quarterly basis for most of our portfolio investments that are not publicly traded or for which we do not have readily available market quotations,

including securities that while listed on a private securities exchange, have not actively traded. However, the board of directors retains ultimate authority as to the appropriate valuation of each such investment. The types of factors that the board of directors takes into account in approving fair value with respect to such non-traded investments includes, as relevant and, to the extent available, the portfolio company's earnings, the markets in which the portfolio company does business, comparison to valuations of publicly traded companies, comparisons to recent sales of comparable companies, the discounted value of the cash flows of the portfolio company and other relevant factors. This information may not be available because it is difficult to obtain financial and other information with respect to private companies, and even where we are able to obtain such information, there can be no assurance that it is complete or accurate.

TABLE OF CONTENTS

Because such valuations are inherently uncertain and may be based on estimates, our determinations of fair value may differ materially from the values that would be assessed if a readily available market for these securities existed. Due to this uncertainty, our fair value determinations with respect to any non-traded investments we hold may cause our net asset value on a given date to materially understate or overstate the value that we may ultimately realize on one or more of our investments. As a result, investors purchasing our securities based on an overstated net asset value may pay a higher price than the value of our investments might warrant. Conversely, investors selling securities based on a net asset value that understates the value of our investments may receive a lower price for their securities than the value of our investments might warrant.

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies may be susceptible to economic slowdowns or recessions and may be unable to repay our loans during these periods. Therefore, our non-performing assets may increase and the value of our portfolio may decrease during these periods as we are required to record the values of our investments. Adverse economic conditions also may decrease the value of collateral securing some of our loans and the value of our equity investments. Economic slowdowns or recessions could lead to financial losses in our portfolio and a decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing investments and harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans and foreclosure on its secured assets, which could trigger cross-defaults under other agreements and jeopardize our portfolio company's ability to meet its obligations under the debt securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting portfolio company. In addition, if one of our portfolio companies were to go bankrupt, even though we or one of our affiliates may have structured our interest in such portfolio company as senior debt, depending on the facts and circumstances, including the extent to which we actually provided managerial assistance to that portfolio company, a bankruptcy court might re-characterize our debt holding as equity and subordinate all or a portion of our claim to claims of other creditors.

We may not be in a position to exercise control over our portfolio companies or to prevent decisions by management of our portfolio companies that could decrease the value of our investments.

We do not generally intend to take controlling equity positions in our portfolio companies. To the extent that we do not hold a controlling equity interest in a portfolio company, we are subject to the risk that such portfolio company may make business decisions with which we disagree, and the stockholders and management of such portfolio company may take risks or otherwise act in ways that are adverse to our interests. Due to the lack of liquidity for the debt and equity investments that we typically hold in our portfolio companies, we may not be able to dispose of our investments in the event we disagree with the actions of a portfolio company, and may therefore suffer a decrease in the value of our investments.

In addition, we may not be in a position to control any portfolio company by investing in its debt securities. As a result, we are subject to the risk that a portfolio company in which we invest may make business decisions with which we disagree and the management of such company, as representatives of the holders of their common equity, may take risks or otherwise act in ways that do not serve our interests as debt investors.

Our portfolio companies may incur debt that ranks equally with, or senior to, our investments in such companies.

The portfolio companies we invest in usually have, or may be permitted to incur, other debt that ranks equally with, or senior to, the debt securities in which we invest. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which we are entitled to receive payments in respect of the debt securities in which we invest. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of debt instruments ranking senior to our investment in that portfolio company would typically be entitled to receive payment in full before we receive any distribution in respect of our investment. After repaying such senior creditors, such portfolio company may not have any remaining assets to use for repaying its obligation to us. In

TABLE OF CONTENTS

the case of debt ranking equally with debt securities in which we invest, we would have to share any distributions on an equal and ratable basis with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company.

Additionally, certain loans that we make to portfolio companies may be secured on a second priority basis by the same collateral securing senior secured debt of such companies. The first priority liens on the collateral will secure the portfolio company's obligations under any outstanding senior debt and may secure certain other future debt that may be permitted to be incurred by the portfolio company under the agreements governing the loans. The holders of obligations secured by the first priority liens on the collateral will generally control the liquidation of and be entitled to receive proceeds from any realization of the collateral to repay their obligations in full before us. In addition, the value of the collateral in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the proceeds, if any, from the sale or sales of all of the collateral would be sufficient to satisfy the loan obligations secured by the second priority liens after payment in full of all obligations secured by the first priority liens on the collateral. If such proceeds are not sufficient to repay amounts outstanding under the loan obligations secured by the second priority liens, then we, to the extent not repaid from the proceeds of the sale of the collateral, will only have an unsecured claim against the portfolio company's remaining assets, if any.

The rights we may have with respect to the collateral securing the loans we make to our portfolio companies with senior debt outstanding may also be limited pursuant to the terms of one or more intercreditor agreements, including agreements governing first out and last out structures, that we enter into with the holders of senior debt. Under such an intercreditor agreement, at any time that obligations that have the benefit of the first priority liens are outstanding, any of the following actions that may be taken in respect of the collateral will be in good faith under the direction of the holders of the obligations secured by the first priority liens: the ability to cause the commencement of enforcement proceedings against the collateral; the ability to control the conduct of such proceedings; the approval of amendments to collateral documents; releases of liens on the collateral; and waivers of past defaults under collateral documents. We may not have the ability to control or direct such actions, even if our rights are adversely affected.

When we are a debt or minority equity investor in a portfolio company, we are often not in a position to exert influence on the entity, and other equity holders and management of the company may make decisions that could decrease the value of our portfolio holdings.

When we make debt or minority equity investments, we are subject to the risk that a portfolio company may make business decisions with which we disagree and the other equity holders and management of such company may take risks or otherwise act in ways that do not serve our interests. As a result, a portfolio company may make decisions that could decrease the value of our investment.

We may also make unsecured loans to portfolio companies, meaning that such loans will not benefit from any interest in collateral of such companies. Liens on such portfolio companies' collateral, if any, will secure the portfolio company's obligations under its outstanding secured debt and may secure certain future debt that is permitted to be incurred by the portfolio company under its secured loan agreements. The holders of obligations secured by such liens will generally control the liquidation of, and be entitled to receive proceeds from, any realization of such collateral to repay their obligations in full before us. In addition, the value of such collateral in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the proceeds, if any, from sales of such collateral would be sufficient to satisfy our unsecured loan obligations after payment in full of all secured loan obligations. If such proceeds were not sufficient to repay the outstanding secured loan obligations, then our unsecured claims would rank equally with the unpaid portion of such secured creditors' claims against the portfolio company's remaining assets, if any.

There may be circumstances in which our debt investments could be subordinated to claims of other creditors or we could be subject to lender liability claims.

If one of our portfolio companies were to go bankrupt, even though we may have structured our interest as senior debt, depending on the facts and circumstances, a bankruptcy court might recharacterize our debt holding as an equity investment and subordinate all or a portion of our claim to that of other creditors. In addition, lenders can be subject to lender liability claims for actions taken by them where they become too involved in the borrower's business or exercise control over the borrower. For example, we could become subject to a lender's liability claim, if, among other things, we actually render significant managerial assistance.

TABLE OF CONTENTS

Our portfolio companies may be highly leveraged.

Some of our portfolio companies may be highly leveraged, which may have adverse consequences to these companies and to us as an investor. These companies may be subject to restrictive financial and operating covenants and the leverage may impair these companies' ability to finance their future operations and capital needs. As a result, these companies' flexibility to respond to changing business and economic conditions and to take advantage of business opportunities may be limited. Further, a leveraged company's income and net assets will tend to increase or decrease at a greater rate than if borrowed money were not used.

Our portfolio companies may prepay loans, which prepayment may reduce stated yields in the future if capital returned cannot be invested in transactions with equal or greater expected yields.

Certain of the loans we make are prepayable at any time, some of them of them at no premium to par. We cannot predict when such loans may be prepaid. Whether a loan is prepaid will depend both on the continued positive performance of the portfolio company and the existence of favorable financing market conditions that permit such company to replace existing financing with less expensive capital. As market conditions change frequently, it is unknown when, and if, this may be possible for each portfolio company. In the case of some of these loans, having the loan prepaid early may reduce the achievable yield for the Company in the future below the current yield disclosed for our portfolio if the capital returned cannot be invested in transactions with equal or greater expected yields.

Our failure to make follow-on investments in our portfolio companies could impair the value of our portfolio.

Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as follow-on investments in order to: (1) increase or maintain in whole or in part our equity ownership percentage; (2) exercise warrants, options or convertible securities that were acquired in the original or subsequent financing; or (3) attempt to preserve or enhance the value of our initial investment.

We may elect not to make follow-on investments or otherwise lack sufficient funds to make those investments. Our failure to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful operation. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make such follow-on investment because we may not want to increase our concentration of risk, because we prefer other opportunities, because we are inhibited by compliance with BDC requirements or because we desire to maintain our tax status.

Our investments in foreign securities may involve significant risks in addition to the risks inherent in U.S. investments.

Our investment strategy contemplates that a portion of our investments may be in securities of foreign companies in order to provide diversification or to complement our U.S. investments, although we are required generally to invest at least 70% of our assets in companies organized and having their principal place of business within the U.S. and its possessions. Accordingly, we may invest on an opportunistic basis in certain non-U.S. companies, including those located in emerging markets, that otherwise meet our investment criteria. In regards to the regulatory requirements for business development companies, some of these investments may not qualify as investments in eligible portfolio companies, and thus may not be considered qualifying assets. Eligible portfolio companies generally include U.S. companies that are not investment companies and that do not have securities listed on a national exchange. If at any time less than 70% of our gross assets are comprised of qualifying assets, including as a result of an increase in the value of any non-qualifying assets or decrease in the value of any qualifying assets, we would generally not be permitted to acquire any additional non-qualifying assets until such time as 70% of our then current gross assets were

comprised of qualifying assets. We would not be required, however, to dispose of any non-qualifying assets in such circumstances. In addition, investing in foreign companies, and particularly those in emerging markets, may expose us to additional risks not typically associated with investing in U.S. companies. These risks include changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility. These risks may be more

TABLE OF CONTENTS

pronounced for portfolio companies located or operating primarily in emerging markets, whose economies, markets and legal systems may be less developed. Further, we may have difficulty enforcing our rights as equity holders in foreign jurisdictions. In addition, to the extent we invest in non-U.S. companies, we may face greater exposure to foreign economic developments.

Although it is anticipated that most of our investments will be denominated in U.S. dollars, our investments that are denominated in a foreign currency will be subject to the risk that the value of a particular currency may change in relation to the U.S. dollar. Among the factors that may affect currency values are trade balances, the level of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation and political developments. We may employ hedging techniques to minimize these risks, but we can offer no assurance that we will, in fact, hedge currency risk or, that if we do, such strategies will be effective. As a result, a change in currency exchange rates may adversely affect our profitability.

Our investments in the software publishing sector are subject to various risks, including intellectual property infringement issues and rapid technological changes, which may adversely affect our performance. Software publishing is our largest industry concentration. Each industry contains certain industry related credit risks.

General risks of companies in the software publishing industry sector include intellectual property infringement liability issues, the inability to protect software and other proprietary technology, extensive competition and limited barriers to entry. Generally, the market for software products is characterized by rapid technological change, evolving industry standards, changes in customer requirements and frequent new product introduction and enhancements. If a portfolio company in the software publishing sector cannot develop new products and enhance its current products in response to technological changes and competing products, its business and operating results will be negatively affected. In addition, there has been a substantial amount of litigation in the software industry relating to intellectual property rights. Regardless of whether claims that a company is infringing patents or other intellectual property have any merit, these claims are time-consuming and costly. Moreover, a software publishing company must monitor the unauthorized use of its intellectual property, which may be difficult and costly. A company's failure to protect its intellectual property could put it at a disadvantage to its competitors and harm its business, results of operations and financial condition. If a software publishing company in which we invest is unable to navigate these risks, our performance may be adversely affected.

The effect of global climate change may impact the operations of our portfolio companies.

There may be evidence of global climate change. Climate change creates physical and financial risk and some of our portfolio companies may be adversely affected by climate change. For example, the needs of customers of energy companies vary with weather conditions, primarily temperature and humidity. To the extent weather conditions are affected by climate change, energy use could increase or decrease depending on the duration and magnitude of any changes. Increases in the cost of energy could adversely affect the cost of operations of our portfolio companies if the use of energy products or services is material to their business. A decrease in energy use due to weather changes may affect some of our portfolio companies' financial condition, through decreased revenues. Extreme weather conditions in general require more system backup, adding to costs, and can contribute to increased system stresses, including service interruptions.

Risks related to our operations as a BDC

While our ability to enter into transactions with our affiliates is restricted under the 1940 Act, we have received an exemptive order from the SEC permitting certain affiliated investments subject to certain conditions. As a result, the Advisor may face conflicts of interests and investments made pursuant to the exemptive order conditions could in certain circumstances adversely affect the price paid or received by us or the availability or size of the position

purchased or sold by us.

Any person that owns, directly or indirectly, 5% or more of our outstanding voting securities or is managed by the Advisor will generally be our affiliate for purposes of the 1940 Act and we are generally prohibited from participating in certain transactions such as co-investing with, or buying or selling any security from or to, such affiliate, absent the prior approval of our independent directors and, in some cases, of the SEC. However, the Advisor and the funds managed by the Advisor have received an exemption from certain SEC regulations prohibiting transactions with affiliates. The exemptive order requires that certain procedures be followed prior to

TABLE OF CONTENTS

making an investment subject to the order and such procedures could in certain circumstances adversely affect the price paid or received by us or the availability or size of the position purchased or sold by us. The Advisor may also face conflicts of interest in making investments pursuant to the exemptive order. See Risks related to our business — We have limited operating history as a BDC, and if the Advisor is unable to manage our investments effectively, we may be unable to achieve our investment objective. In addition, the Advisor may face conflicts in allocating investment opportunities between us and certain other entities that could impact our investment returns.

The 1940 Act also prohibits certain joint transactions with certain of our affiliates, which could include investments in the same portfolio company (whether at the same or different times), without prior approval of our independent directors and, in some cases, of the SEC. We are prohibited from buying or selling any security from or to any person who owns more than 25% of our voting securities and from or to certain of that person's affiliates, or entering into prohibited joint transactions with such persons, absent the prior approval of the SEC (other than certain limited situations pursuant to current regulatory guidance). The analysis of whether a particular transaction constitutes a joint transaction requires a review of the relevant facts and circumstances relating to the particular transaction. Similar restrictions limit our ability to transact business with our officers or directors or their affiliates.

Regulations governing our operation as a BDC may limit our ability to, and the way in which we raise additional capital, which could have a material adverse impact on our liquidity, financial condition and results of operations.

Our business may in the future require a substantial amount of capital. We may acquire additional capital from the issuance of additional shares of our common stock or from the additional issuance of senior securities (including debt and preferred stock). However, we may not be able to raise additional capital in the future on favorable terms or at all.

Our board of directors may decide to issue common stock to finance our operations rather than issuing debt or other senior securities. As a BDC, we are generally not able to issue our common stock at a price below net asset value without first obtaining required approvals from our stockholders and our independent directors. If our common stock trades at a discount to net asset value, those restrictions could adversely affect our ability to raise equity capital. Except in connection with the exercise of warrants or the conversion of convertible securities, in any such case the price at which our securities are to be issued and sold may not be less than a price, that in the determination of our board of directors, closely approximates the market value of such securities at the relevant time. We may also make rights offerings to our stockholders at prices per share less than the net asset value per share, subject to the requirements of the 1940 Act. If we raise additional funds by issuing more common stock or senior securities convertible into, or exchangeable for, our common stock, the percentage ownership of our stockholders at that time would decrease, and such stockholders may experience dilution.

We may only issue senior securities up to the maximum amount permitted by the 1940 Act. The 1940 Act permits us to issue senior securities only in amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200% after such issuance or incurrence. If our assets decline in value and we fail to satisfy this test or any stricter test under the terms of our leverage instruments, we may be required to liquidate a portion of our investments and repay a portion of our indebtedness at a time when such sales or repayment may be disadvantageous, which could have a material adverse impact on our liquidity, financial condition and results of operations.

Changes in the laws or regulations governing our business or the business of our portfolio companies, or changes in the interpretations thereof or newly enacted legislation and regulations, and any failure by us or our portfolio companies to comply with these laws or regulations, could have a material adverse effect on our business, results of operations or financial condition of us or our portfolio companies.

We are subject to changing rules and regulations of federal and state governments, as well as the stock exchange in which our common stock is listed. These entities, including the Public Company Accounting Oversight Board, the

SEC and The Nasdaq Global Select Market, have issued a significant number of new and increasingly complex requirements and regulations over the course of the last several years and continue to develop additional regulations.

Changes in the laws or regulations or the interpretations of the laws and regulations that govern BDCs, RICs or non-depository commercial lenders could significantly affect our operations and our cost of doing

TABLE OF CONTENTS

business. We are subject to federal, state and local laws and regulations and are subject to judicial and administrative decisions that affect our operations, including our loan originations, maximum interest rates, fees and other charges, disclosures to portfolio companies, the terms of secured transactions, collection and foreclosure procedures and other trade practices. If these laws, regulations or decisions change, or if we expand our business into jurisdictions that have adopted more stringent requirements than those in which we currently conduct business, we may have to incur significant expenses in order to comply, or we might have to restrict our operations. In addition, if we do not comply with applicable laws, regulations and decisions, we may lose licenses needed for the conduct of our business and may be subject to civil fines and criminal penalties, any of which could have a material adverse effect upon our business, results of operations of financial condition.

If we do not invest a sufficient portion of our assets in qualifying assets, we could be precluded from investing in certain assets or could be required to dispose of certain assets, which could have a material adverse effect on our business, financial condition and results of operations.

As a BDC, we are prohibited from acquiring any assets other than qualifying assets unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets. As of December 31, 2015, approximately \$221.6 million, or approximately 18.0%, of our total assets were not qualifying assets. If we do not invest a sufficient portion of our assets in qualifying assets, we will be prohibited from investing in additional non-qualifying assets, which could have a material adverse effect on our business, financial condition and results of operations. Similarly, these rules could prevent us from making follow-on investments in existing portfolio companies (which could result in the dilution of our position) or could require us to dispose of investments at inopportune times in order to come into compliance with the 1940 Act. If we need to dispose of these investments quickly, it may be difficult to dispose of such investments on favorable terms. For example, we may have difficulty in finding a buyer and, even if a buyer is found, we may have to sell the investments at a substantial loss.

We will be subject to corporate-level U.S. federal income tax on all of our income if we are unable to qualify as a RIC under the Code, which would have a material adverse effect on our financial performance.

Although we are currently qualified as a RIC, no assurance can be given that we will be able to maintain RIC status. To maintain RIC status and be relieved of U.S. federal income taxes on income and gains distributed to its stockholders, we generally must meet the annual distribution, source-of-income and asset diversification requirements described below. In addition, our Leverage Program prohibits us from making distributions if doing so causes us to fail to maintain the asset coverage ratios stipulated by the 1940 Act or the Leverage Program.

To qualify as a RIC under the Code, we generally must meet certain source-of-income, asset diversification and annual distribution requirements. The annual distribution requirement for a RIC is satisfied if we distribute at least 90% of our ordinary income and net short-term capital gain in excess of net long-term capital loss, if any, to our stockholders. Since we use debt financing, we are subject to certain asset coverage ratio requirements and other financial covenants under the terms of the Leverage Program, and we are, in some circumstances, also subject to similar requirements under the 1940 Act. The requirements could, under certain circumstances, restrict us from making distributions necessary to qualify as a RIC. If we are unable to obtain cash from other sources, we may fail to qualify as a RIC and, thus, may be subject to corporate-level income tax. To qualify as a RIC, we generally must also meet certain asset diversification requirements at the end of each calendar quarter. Failure to meet these tests may result in our having to dispose of certain investments quickly in order to prevent the loss of RIC status. Because we anticipate that most of our investments will be in private companies, any such dispositions could be made at disadvantageous prices and may result in substantial losses.

If we fail to qualify as a RIC for any reason and become subject to corporate-level income tax, the resulting corporate-level income taxes could substantially reduce our net assets, the amount of income available for distribution

and the amount of our distributions.

We may have difficulty paying our required distributions if we recognize income before or without receiving cash representing such income.

For U.S. federal income tax purposes, we may include in income certain amounts that we have not yet received in cash, such as original issue discount, which may arise if we receive warrants in connection with the making of a loan or possibly in other circumstances, or PIK interest, which represents contractual interest added to the loan balance and due in the future, often only at the end of the loan. Such original issue discount, which

TABLE OF CONTENTS

could be significant relative to our overall investment activities, or increases in loan balances as a result of PIK arrangements are generally included in our taxable income before we receive any corresponding cash payments. We also may be required to include in income certain other amounts that we do not receive in cash.

Since we may recognize taxable income before or without receiving cash representing such income, if we invest to a substantial extent in non-cash paying debt instruments we may have difficulty meeting the tax requirement to distribute at least 90% of our ordinary income and net short-term capital gain in excess of net long-term capital loss, if any, to maintain our status as a RIC. Accordingly, we may have to sell some of our investments at times we would not consider advantageous, raise additional debt or equity capital or reduce new investment originations to meet these distribution requirements.

There is a risk that you may not receive distributions or that our distributions may not grow over time and a portion of our distributions may be a return of capital.

We intend to make distributions on a quarterly basis to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. Our ability to pay distributions might be adversely affected by the impact of one or more of the risk factors described in this filing. Due to the asset coverage test applicable to us under the 1940 Act as a BDC, we may be limited in our ability to make distributions. Additionally, a portion of such distributions may include a return of stockholder capital. Distributions in excess of our current and accumulated earnings and profits are considered nontaxable distributions and serve to reduce the basis of our shares in the hands of the common stockholders rather than being currently taxable. As a result of the reduction of the basis of our shares, common stockholders may incur additional capital gains taxes or may have lower capital losses.

If we fail to maintain an effective system of internal control over financial reporting, we may not be able to accurately report our financial results or prevent fraud. As a result, stockholders could lose confidence in our financial and other public reporting, which would harm our business and the trading price of our common stock.

Effective internal controls over financial reporting are necessary for us to provide reliable financial reports and, together with adequate disclosure controls and procedures, are designed to prevent fraud. Any failure to implement required new or improved controls, or difficulties encountered in their implementation could cause us to fail to meet our reporting obligations. In addition, any testing by us conducted in connection with Section 404 of the Sarbanes-Oxley Act, or the subsequent testing by our independent registered public accounting firm (when undertaken, as noted below), may reveal deficiencies in our internal controls over financial reporting that are deemed to be material weaknesses or that may require prospective or retroactive changes to our consolidated financial statements or identify other areas for further attention or improvement. Inferior internal controls could also cause investors and lenders to lose confidence in our reported financial information, which could have a negative effect on the trading price of our common stock.

We may experience cyber-security incidents and are subject to cyber-security risks.

Our business operations rely upon secure information technology systems for data processing, storage and reporting. Despite careful security and controls design, implementation and updating, our information technology systems could become subject to cyber-attacks. Cyber-attacks include, but are not limited to, gaining unauthorized access to digital systems (e.g., through hacking or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber-attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make network services unavailable to intended users). Network, system, application and data breaches could result in operational disruptions or information misappropriation, which could have a material adverse effect on our business,

results of operations and financial condition.

Cyber-security failures or breaches by the Advisor, any sub-adviser(s) and other service providers (including, but not limited to, accountants, custodians, transfer agents and administrators), and the issuers of securities in which we invest, have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with our ability to calculate our net asset value, impediments to trading, the inability of our stockholders to transact business, violations of applicable privacy and other laws, regulatory fines,

penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future. While we have established a business continuity plan in the event of, and risk management systems to prevent, such cyberattacks, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, we cannot control the cyber security plans and systems put in place by our service providers and issuers in which we invest. We and our stockholders could be negatively impacted as a result.

The failure in cyber-security systems, as well as the occurrence of events unanticipated in our disaster recovery systems and management continuity planning could impair our ability to conduct business effectively.

The occurrence of a disaster such as a cyber-attack, a natural catastrophe, an industrial accident, a terrorist attack or war, events unanticipated in our disaster recovery systems, or a support failure from external providers, could have an adverse effect on our ability to conduct business and on our results of operations and financial condition, particularly if those events affect our computer-based data processing, transmission, storage, and retrieval systems or destroy data. If a significant number of our managers were unavailable in the event of a disaster, our ability to effectively conduct our business could be severely compromised.

We depend heavily upon computer systems to perform necessary business functions. Despite our implementation of a variety of security measures, our computer systems could be subject to cyber-attacks and unauthorized access, such as physical and electronic break-ins or unauthorized tampering. Like other companies, we may experience threats to our data and systems, including malware and computer virus attacks, unauthorized access, system failures and disruptions. If one or more of these events occurs, it could potentially jeopardize the confidential, proprietary and other information processed and stored in, and transmitted through,
