**Microsemi Corporation Reiterates its Superior \$11.88 Per Share Cash and Stock Bid for PMC-Sierra, Inc.**

**ALISO VIEJO, Calif. Nov. 2, 2015** Microsemi Corporation (Nasdaq: MSCC), a leading provider of semiconductor solutions differentiated by power, security, reliability and performance, today announced it is disappointed the PMC-Sierra board of directors has chosen not to deem its \$11.88 per share bid a Superior Proposal. Microsemi's acquisition proposal would provide PMC shareholders \$9.04 in cash and 0.0771x of a Microsemi common share for each PMC common share held at the close of the transaction. The implied enterprise value is \$2.3 billion, net of PMC's net cash balance as of Sept. 27, 2015.

A PMC-Sierra press release issued yesterday suggested the stock portion of Microsemi's bid was the reason its proposal was not deemed to be a Superior Proposal by PMC's board. Microsemi highlights that less than one-quarter of its merger consideration is in the form of stock. Since its Oct. 19 press release and conference call discussing Microsemi's interest to acquire PMC, Microsemi has been transparent with its shareholders regarding the strategic and financial benefits of the transaction as well as the nature and structure of the financing. The current trading price of Microsemi's shares reflects the market's understanding of and appreciation for the merits of a combination of Microsemi with PMC.

In response to the PMC board's position with respect to the stock portion of the merger consideration, contemplated in Microsemi's acquisition proposal, the company notes the following:

Capital markets are inherently volatile, but Microsemi has executed in that market environment over the last five years and delivered superior returns, with less overall business volatility due to its unique end market mix.

Microsemi is followed by 11 sellside analysts that maintain an average price target of \$42.18 per share, a 16 percent increase over where the stock closed today, Nov. 2, 2015.

Microsemi has seen a 17 percent appreciation since the beginning of September due to investor focus on Microsemi's uniquely diversified, defensible market position. The company feels this is also due to the execution it has delivered in growing its portfolio of products and realizing leverage of scale in its business. Microsemi further believes its stock has appreciated as a result of previously disclosed record bookings, backlog and revenue levels.

Microsemi has explained the leverage the company will have pro forma for the acquisition of PMC and has conveyed its ability to aggressively pay down this debt level and grow EBITDA. At close, it is expected to have a total debt to trailing pro forma EBITDA of 4.5x, achieving 3.5x in 12 months and 3.0x in 18 months. This is based on its ability to execute on its current business, deliver the synergies identified, and generate strong cash flow.

Microsemi has an impressive track record of delivering value for its shareholders in acquiring 12 companies since the beginning of fiscal year 2010 and growing its EBITDA at a 22 percent CAGR over that time.

With respect to timing and deal certainty, Microsemi believes its proposal is clearly more attractive than the alternative with Skyworks:

Microsemi has completed the acquisition of seven public companies since 2006. On average, the company has closed these transactions 40 days after entering into a definitive merger agreement.

In contrast, Skyworks has completed the acquisition of one public company, Advanced Analogic Technologies, Inc. (“AATI”), over the past 10 years. That transaction required regulatory approval in Korea but not in China (as would its acquisition of PMC) and ultimately closed more than seven and a half months after it was announced. During the interim period between sign and close, Skyworks accused AATI of breaching its merger agreement, entered into arbitration in the Chancery Court of Delaware and ultimately reduced the consideration to AATI’s shareholders versus what had been agreed to at announcement.

Based on Microsemi’s proposed exchange offer structure, the company believes it would be in a position to close on the acquisition of PMC approximately two months after it signs a merger agreement.

“We reiterate our proposal offers superior value to PMC’s shareholders, and Microsemi is uniquely positioned to realize significant synergies,” said James J. Peterson, Microsemi’s chairman and CEO. “Our offer is more strategic, offers more speed and certainty in terms of the closing approval process, and delivers a higher per share price than the Skyworks offer. Shareholders receive cash now as well as the opportunity to participate in the significant upside potential of a global analog and mixed-signal leader with a highly diversified platform for growth and profitability. While the PMC board has chosen to determine that our proposal is not superior, we hope that the PMC shareholders will express their concern over this decision as well as the board’s decision to raise the break-up fee with Skyworks by more than 26 percent, a move which is clearly not in the shareholders’ best interest.”

Microsemi looks forward to updating shareholders on Thursday, Nov. 5, 2015 at 4:45 p.m. EST with its quarterly earnings call where it will report on the company’s fiscal 2015 fourth quarter, its fiscal 2015 full year results, and its outlook for its fiscal 2016 first quarter.

services; potential non-realization of expected orders or non-realization of backlog; failure to make sales indicated by the company's book-to-bill ratio; intense competition in the semiconductor industry and resultant downward price pressure; the effect of events such as natural disasters and related disruptions on our operations; the concentration of the factories that service the semiconductor industry; delays in beginning production, implementing production techniques, resolving problems associated with technical equipment malfunctions, or issues related to government or customer qualification of facilities; our dependence on third parties for key functions; increases in the costs of credit and the availability of credit or additional capital only under more restrictive conditions or not at all; changes to laws or regulations; unanticipated changes in Microsemi's tax obligations, results of tax examinations or exposure to additional income tax liabilities; changes in generally accepted accounting principles; principal, liquidity and counterparty risks related to Microsemi's holdings in securities; inability to develop new technologies and products to satisfy changes in customer demand or the development by the company's competitors of products that decrease the demand for Microsemi's products; unfavorable or declining conditions in end markets; inability of Microsemi's compound semiconductor products to compete successfully with silicon-based products; production delays related to new compound semiconductors; variability of the company's manufacturing yields; potential effects of system outages; inability by Microsemi to fulfill customer demand and resulting loss of customers; variations in customer order preferences; difficulties foreseeing future demand; rises in inventory levels and inventory obsolescence; environmental or other regulatory matters or litigation, or any matters involving contingent liabilities or other claims; the uncertainty of litigation, the costs and expenses of litigation, the potential material adverse effect litigation could have on Microsemi's business and results of operations if an adverse determination in litigation is made, and the time and attention required of management to attend to litigation; difficulties in determining the scope of, and procuring and maintaining, adequate insurance coverage; difficulties and costs of protecting patents and other proprietary rights; the hiring and retention of qualified personnel in a competitive labor market; any circumstances that adversely impact the end markets of acquired businesses; and difficulties in closing or disposing of operations or assets or transferring work, assets or inventory from one plant to another. In addition to these factors and any other factors mentioned elsewhere in this news release, the reader should refer as well to the factors, uncertainties or risks identified in Microsemi's most recent Form 10-K and any subsequent Form 10-Q reports filed by Microsemi with the SEC. Additional risk factors may be identified from time to time in Microsemi's future filings. The forward-looking statements included in this release speak only as of the date hereof, and Microsemi does not undertake any obligation to update these forward-looking statements to reflect subsequent events or circumstances.

Guidance is provided only on a non-GAAP basis due to the inherent difficulty of forecasting the timing or amount of certain items that have been excluded from the forward-looking non-GAAP measures, and a reconciliation to the comparable GAAP guidance has not been provided because certain factors that are materially significant to Microsemi's ability to estimate the excluded items are not accessible or estimable on a forward-looking basis.

### **Additional Information and Where to Find It**

This communication does not constitute an offer to buy or solicitation of an offer to sell any securities. This communication relates to a proposal which Microsemi Corporation ("Microsemi") has made for a business combination transaction with PMC-Sierra Inc. ("PMC"). In furtherance of this proposal and subject to future developments, Microsemi (and, if a negotiated transaction is agreed to, PMC) may file one or more registration statements, prospectuses, proxy statements or other documents with the U.S. Securities and

Exchange Commission (“SEC”). This communication is not a substitute for any registration statement, prospectus, proxy statement or other document Microsemi and/or PMC may file with the SEC in connection with the proposed transaction. INVESTORS AND SECURITY HOLDERS OF MICROSEMI AND PMC ARE URGED TO READ THE REGISTRATION STATEMENT, PROSPECTUS, PROXY STATEMENT AND OTHER DOCUMENTS FILED WITH THE SEC CAREFULLY IN THEIR ENTIRETY IF AND WHEN THEY BECOME AVAILABLE AS THEY WILL CONTAIN IMPORTANT INFORMATION ABOUT THE PROPOSED TRANSACTION. Any definitive proxy statement (if and when available) will be mailed to stockholders of PMC. Investors and security holders will be able to obtain free copies of these documents (if and when available) and other documents filed with the SEC by Microsemi through the web site maintained by the SEC at <http://www.sec.gov>.

### **Certain Information Regarding Participants**

Microsemi and certain of its directors and executive officers may be deemed to be participants in any solicitation with respect to the proposed transaction under the rules of the SEC. Security holders may obtain information regarding the names and interests of Microsemi’s directors and executive officers Microsemi’s Annual Report on Form 10-K for the year ended September 28, 2014, which was filed with the SEC on November 13, 2014, and Microsemi’s proxy statement for the 2015 Annual Meeting of Shareholders, which was filed with the SEC on December 19, 2014. These documents can be obtained free of charge from the sources indicated above. Additional information regarding the interests of these participants in the proxy solicitation and a description of their direct and indirect interests, by security holdings or otherwise, will also be included in any proxy statement and other relevant materials to be filed with the SEC if and when they become available.
