ITEM 2.02 Results of Operations and Financial Condition

On February 27, 2017, Perrigo Company plc (the “Company”) released preliminary unaudited financial results for the calendar year ended December 31, 2016. The related press is attached as Exhibit 99.1.

The Company provides non-GAAP financial measures as additional information that it believes is useful to investors and analysts in evaluating the performance of the Company's ongoing operating trends, facilitating comparability between periods and companies in similar industries, and assessing the Company's prospects for future performance. These non-GAAP financial measures exclude items, such as impairment charges, amortization expense related primarily to acquired intangible assets, restructuring charges, and acquisition and integration-related charges, as well as the related tax effects of these items that by their nature affect comparability of operational performance or obscure underlying business operational trends. The non-GAAP measures the Company provides are consistent with how management analyzes and assesses the operating performance of the Company, and disclosing them provides investor insight into management's view of the business. Management uses these adjusted financial measures for planning and forecasting in future periods, and evaluating segment and overall operating performance. In addition, management uses certain of the profit measures as factors in determining compensation.

Non-GAAP measures related to profit measurements, which include adjusted operating income and adjusted diluted earnings per share, are useful to investors as they provide them with supplemental information to enhance their understanding of the Company's underlying business performance and trends, and enhance the ability of investors and analysts to compare the Company's period-to-period financial results. The Company discloses adjusted net sales, which excludes operating results attributable to held-for-sale businesses, in order to provide information about sales of the Company's continuing business. The Company believes these supplemental financial measures provide investors with consistency in financial reporting, enabling meaningful comparisons of past, present and future underlying operating results, and also facilitate comparison of the Company's operating performance to the operating performance of its competitors.

ITEM 2.05 Costs Associated with Exit or Disposal Activities.

On February 21, 2017, the Company approved a workforce reduction plan as part of a larger cost optimization strategy across the Company. The Company expects to reduce its global workforce by approximately 750 employees which includes some actions already taken and 243 employees who have elected to participate in a voluntary early retirement program. This represents a reduction of approximately 14% of the Company's global non-production workforce. The changes to the Company's workforce will vary by country, based on legal requirements and required consultations with works councils and other employee representatives, as appropriate.

In connection with this plan, the Company estimates that it will recognize total pre-tax restructuring charges to its GAAP financial results of approximately \$70-80 million, consisting of one-time termination benefits, severance arrangements, and other termination costs. Of the \$70-80 million, \$5-10 million is expected to be non-cash based. The Company anticipates recognizing substantially all of these charges by the end of fiscal 2017, with the remaining balance to be recognized during the first quarter of fiscal 2018.
