Dual Directional Trigger PLUS Based on the Performance of the Energy Select Sector SPDR® Fund due January 21, 2022

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

Fully and Unconditionally Guaranteed by JPMorgan Chase & Co.

The Dual Directional Trigger PLUS, or “Trigger PLUS,” will pay no interest and do not guarantee any return of your principal at maturity. At maturity, if the ETF Shares have **appreciated** in price, investors will receive the stated principal amount of their investment plus leveraged upside performance of the ETF Shares, subject to a maximum payment at maturity. If the ETF Shares have **depreciated** in price but by no more than 25%, investors will receive at maturity the stated principal amount of the Trigger PLUS plus an unleveraged positive return equal to the absolute value of the percentage decline, which will effectively be limited to a positive 25% return. However, if the ETF Shares have **depreciated** in price by more than 25% in value, at maturity investors will lose the benefit of the absolute return feature and will lose 1% of the stated principal amount for every 1% of decline in the price of the ETF Shares over the term of the Trigger PLUS. The Trigger PLUS are for investors who are willing to risk their principal and forgo current income and upside above the maximum payment at maturity in exchange for the leverage and absolute return features that in each case apply to a limited range of the performance of the ETF Shares. The Trigger PLUS are unsecured and unsubordinated obligations of JPMorgan Chase Financial Company LLC, which we refer to as JPMorgan Financial, the payment on which is fully and unconditionally guaranteed by JPMorgan Chase & Co., issued as part of JPMorgan Financial’s Medium-Term Notes, Series A, program. **Any payment on the Trigger PLUS is subject to the credit risk of JPMorgan Financial, as issuer of the Trigger PLUS, and the credit risk of JPMorgan Chase & Co., as guarantor of the Trigger PLUS. The investor may lose some or all of the stated principal amount of the Trigger PLUS.**

FINAL TERMS

Issuer:	JPMorgan Chase Financial Company LLC, an indirect, wholly owned finance subsidiary of JPMorgan Chase & Co.
Guarantor:	JPMorgan Chase & Co.
ETF Shares:	Shares of the Energy Select Sector SPDR® Fund
Aggregate principal amount:	\$592,100

Payment at maturity:	<p>If the final share price is <i>greater than</i> the initial share price, for each \$10 stated principal amount Trigger PLUS: \$10 + leveraged upside payment <i>In no event will the payment at maturity exceed the maximum payment at maturity.</i></p> <p>If the final share price is <i>less than or equal to</i> the initial share price but is <i>greater than or equal to</i> the trigger level, for each \$10 stated principal amount Trigger PLUS: \$10 + (\$10 × absolute share return) <i>In this scenario, you will receive a 1% positive return on the Trigger PLUS for each 1% negative return on the ETF Shares. In no event will this amount exceed the stated principal amount plus \$2.50.</i></p> <p>If the final share price is <i>less than</i> the trigger level, for each \$10 stated principal amount Trigger PLUS: \$10 × share performance factor <i>This amount will be less than the stated principal amount of \$10 per Trigger PLUS and will represent a loss of more than 25%, and possibly all, of your investment.</i></p>
Leveraged upside payment:	\$10 × leverage factor × share percent change
Share percent change:	(final share price – initial share price) / initial share price
Absolute share return:	The absolute value of the share percent change. For example, a -5% share percent change will result in a +5% absolute share return.
Initial share price:	The closing price of one ETF Share on the pricing date, which was \$63.84
Final share price:	The closing price of one ETF Share on the valuation date
Share adjustment factor:	The share adjustment factor is referenced in determining the closing price of one ETF Share and is set initially at 1.0 on the pricing date. The share adjustment factor is subject to adjustment in the event of certain events affecting the ETF Shares.
Trigger level:	\$47.88, which is 75% of the initial share price
Leverage factor:	200%
Share performance factor:	final share price / initial share price
Maximum payment at maturity:	\$14.515 (145.15% of the stated principal amount) per Trigger PLUS
Stated principal amount:	\$10 per Trigger PLUS
Issue price:	\$10 per Trigger PLUS (see “Commissions and issue price” below)
Pricing date:	January 18, 2019
Original issue date (settlement date):	January 24, 2019
Valuation date:	January 18, 2022, subject to postponement in the event of certain market disruption events and as described under “General Terms of Notes — Postponement of a Determination Date — Notes Linked to a Single Underlying — Notes Linked to a Single Underlying (Other Than a Commodity Index)” in the accompanying product supplement
Maturity date:	January 21, 2022, subject to postponement in the event of certain market disruption events and as described under “General Terms of Notes — Postponement of a Payment Date” in

CUSIP / ISIN:	the accompanying product supplement 48130X844 / US48130X8442		
Listing:	The Trigger PLUS will not be listed on any securities exchange.		
Agent:	J.P. Morgan Securities LLC (“JPMS”)		
Commissions and issue price:	Price to public⁽¹⁾	Fees and commissions	Proceeds to issuer
Per Trigger PLUS	\$10.00	\$0.15 ⁽²⁾ \$0.05 ⁽³⁾	\$9.80
Total	\$592,100.00	\$11,842.00	\$580,258.00

(1) See “Additional Information about the Trigger PLUS — Supplemental use of proceeds and hedging” in this document for information about the components of the price to public of the Trigger PLUS.

(2) JPMS, acting as agent for JPMorgan Financial, will pay all of the selling commissions of \$0.15 per \$10 stated principal amount Trigger PLUS it receives from us to Morgan Stanley Smith Barney LLC (“Morgan Stanley Wealth Management”). See “Plan of Distribution (Conflicts of Interest)” in the accompanying product supplement.

(3) Reflects a structuring fee payable to Morgan Stanley Wealth Management by the agent or its affiliates of \$0.05 for each \$10 stated principal amount Trigger PLUS.

The estimated value of the Trigger PLUS on the pricing date was \$9.769 per \$10 stated principal amount Trigger PLUS. See “Additional Information about the Trigger PLUS — The estimated value of the Trigger PLUS” in this document for additional information.

Investing in the Trigger PLUS involves a number of risks. See “Risk Factors” beginning on page PS-10 of the accompanying product supplement, “Risk Factors” beginning on page US-1 of the accompanying underlying supplement and “Risk Factors” beginning on page 6 of this document.

Neither the Securities and Exchange Commission (the “SEC”) nor any state securities commission has approved or disapproved of the Trigger PLUS or passed upon the accuracy or the adequacy of this document or the accompanying product supplement, underlying supplement, prospectus supplement and prospectus. Any representation to the contrary is a criminal offense.

The Trigger PLUS are not bank deposits, are not insured by the Federal Deposit Insurance Corporation or any other governmental agency and are not obligations of, or guaranteed by, a bank.

You should read this document together with the related product supplement, underlying supplement, prospectus supplement and prospectus, each of which can be accessed via the hyperlinks below. Please also see “Additional Information about the Trigger PLUS” at the end of this document.

JPMorgan Chase Financial Company LLC

Dual Directional Trigger PLUS Based on the Performance of the Energy Select Sector SPDR[®] Fund due January 21, 2022

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

Investment Summary

Dual Directional Trigger Performance Leveraged Upside Securities

Principal at Risk Securities

The Dual Directional Trigger PLUS Based on the Performance of the Energy Select Sector SPDR[®] Fund due January 21, 2022 (the “Trigger PLUS”) can be used:

As an alternative to direct exposure to the ETF Shares that enhances returns for a certain range of positive performance of the ETF Shares.

To enhance returns and potentially outperform the ETF Shares in a moderately bullish scenario.

To potentially achieve similar levels of upside exposure to the ETF Shares as a direct investment, subject to the maximum payment at maturity, while using fewer dollars by taking advantage of the leverage factor.

To provide an unleveraged positive return in the event of a decline of the ETF Shares but only if the final share price is *greater than or equal to* the trigger level.

Maturity: Approximately 3 years
Leverage factor: 200% (applicable only if the final share price is greater than the initial share price)
Trigger level: 75% of the initial share price
Maximum payment at maturity: \$14.515 (145.15% of the stated principal amount) per Trigger PLUS.
Minimum payment at maturity: None. Investors may lose their entire initial investment in the Trigger PLUS.
Supplemental Terms of the Trigger PLUS

For purposes of the accompanying product supplement, the Energy Select Sector SPDR[®] Fund is a “Fund.”

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

Key Investment Rationale

Trigger PLUS offer leveraged upside exposure to an underlying asset and the opportunity, through the absolute return feature, to earn a positive return at maturity for a limited range of negative performance of the underlying asset. At maturity, if the underlying asset has **appreciated**, investors will receive the stated principal amount of their investment plus leveraged upside performance of the underlying asset, subject to the maximum payment at maturity. At maturity, if the underlying asset has **depreciated** in value but by no more than 25%, investors will receive the stated principal amount of their investment plus an unleveraged positive return equal to the absolute value of the percentage decline in the underlying asset, which will effectively be limited to a positive 25% return. However, at maturity, if the underlying asset has **depreciated** in value by more than 25%, investors will lose the benefit of the absolute return feature and will lose 1% of the stated principal amount for every 1% of decline, without any buffer. **Investors may lose some or all of the stated principal amount of the Trigger PLUS.**

Leveraged Upside Performance	The Trigger PLUS offer investors an opportunity to capture enhanced returns for a certain range of positive performance relative to a direct investment in the ETF Shares.
Absolute Return Feature	The Trigger PLUS offer investors an opportunity to earn an unleveraged positive return if the final share price is less than or equal to the initial share price but is greater than or equal to the trigger level.
Upside Scenario if the ETF Shares Appreciates	The final share price is greater than the initial share price and, at maturity, the Trigger PLUS pay the stated principal amount of \$10 <i>plus</i> a return equal to 200% of the share percent change, subject to the maximum payment at maturity of \$14.515 (145.15% of the stated principal amount) per Trigger PLUS.
Absolute Return Scenario	The final share price is less than or equal to the initial share price but is greater than or equal to the trigger level, which is 75% of the initial share price. In this case, the Trigger PLUS pay a 1% positive return for each 1% negative return of the ETF Shares. For example, if the final share price is 5% less than the initial share price, the Trigger PLUS will provide a total positive return of 5% at maturity. The maximum return you may receive in this scenario is a positive 25% return at maturity.
Downside Scenario	The final share price is less than the trigger level. In this case, the Trigger PLUS pay an amount that is over 25% less than the stated principal amount and this decrease will be by an amount that is proportionate to the percentage decline in the final share price from the initial share price. (Example: if the ETF Shares decrease in value by 30%, the Trigger PLUS will pay an amount that is less than the stated principal amount by 30%, or \$7 per Trigger PLUS.)

Principal at Risk Securities

How the Dual Directional Trigger PLUS Work

Payoff Diagram

The payoff diagram below illustrates the payment at maturity on the Trigger PLUS based on the following terms:

Stated principal amount:	\$10 per Trigger PLUS
Leverage factor:	200%
Trigger level:	75% of the initial share price
Maximum payment at maturity:	\$14.515 (145.15% of the stated principal amount) per Trigger PLUS

Dual Directional Trigger PLUS Payoff Diagram

How it works

Upside Scenario. If the final share price is greater than the initial share price, for each \$10 principal amount Trigger PLUS, investors will receive the \$10 stated principal amount *plus* a return equal to 200% of the appreciation of the ETF Shares over the term of the Trigger PLUS, subject to the maximum payment at maturity. Under the terms of the Trigger PLUS, an investor will realize the maximum payment at maturity at a final share price of 122.575% of the initial share price.

For example, if the ETF Shares appreciate 5%, investors will receive a 10% return, or \$11 per Trigger PLUS.

Absolute Return Scenario. If the final share price is less than or equal to the initial share price but is greater than or equal to the trigger level, investors will receive a 1% positive return on the Trigger PLUS for each 1% negative return of the ETF Shares.

For example, if the ETF Shares depreciate 5%, investors will receive a 5% return, or \$10.50 per Trigger PLUS.

The maximum return you may receive in this scenario is a positive 25% return at maturity.

Downside Scenario. If the final share price is less than the trigger level, investors will lose the benefit of the absolute return feature and will instead receive an amount that is significantly less than the stated principal amount by an amount proportionate to the percentage decrease of the final share price from the initial share price. This amount will be less than 75% of the stated principal amount per Trigger PLUS.

For example, if the ETF Shares depreciate 50%, investors will lose 50% of their principal and receive only \$5 per Trigger PLUS at maturity, or 50% of the stated principal amount.

The hypothetical returns and hypothetical payments on the Trigger PLUS shown above apply **only if you hold the Trigger PLUS for their entire term**. These hypotheticals do not reflect fees or expenses that would be

Risk Factors

The following is a non-exhaustive list of certain key risk factors for investors in the Trigger PLUS. For further discussion of these and other risks, you should read the sections entitled "Risk Factors" of the accompanying product supplement and the accompanying underlying supplement. We urge you to consult your investment, legal, tax, accounting and other advisers in connection with your investment in the Trigger PLUS.

The Trigger PLUS do not pay interest or guarantee the return of any principal and your investment in the Trigger PLUS may result in a loss. The terms of the Trigger PLUS differ from those of ordinary debt securities in that the Trigger PLUS do not pay interest or guarantee the payment of any principal amount at maturity. If the final share price is less than the trigger level (which is 75% of the initial share price), you will lose the benefit of the absolute return feature and the payment at maturity will be an amount in cash that is over 25% less than the stated principal amount of each Trigger PLUS, and this decrease will be by an amount that is proportionate to the decrease in the value of the ETF Shares and may be zero. There is no minimum payment at maturity on the Trigger PLUS, and, accordingly, you could lose your entire initial investment in the Trigger PLUS.

The appreciation potential of the Trigger PLUS is limited by the maximum payment at maturity. The appreciation potential of Trigger PLUS is limited by the maximum payment at maturity of \$14.515 (145.15% of the stated principal amount) per Trigger PLUS. Although the leverage factor provides 200% exposure to any increase in the final share price as compared to the initial share price on the valuation date, because the maximum payment at maturity will be limited to 145.15% of the stated principal amount for the Trigger PLUS, any increase in the final share price by more than 22.575% will not further increase the return on the Trigger PLUS.

Your maximum downside gain on the Trigger PLUS is limited by the trigger level. If the final share price is less than or equal to the initial share price and greater than or equal to the trigger level, you will receive at maturity \$10 plus a return equal to the absolute share return, which will reflect a 1% positive return for each 1% negative return on the ETF Shares, subject to an effective limit of 25%. Because you will not receive a positive return if the ETF Shares have depreciated below the trigger level, your maximum downside payment will be \$12.50 per \$10.00 stated principal amount Trigger PLUS.

The Trigger PLUS are subject to the credit risks of JPMorgan Financial and JPMorgan Chase & Co., and any actual or anticipated changes to our or JPMorgan Chase & Co.'s credit ratings or credit spreads may adversely affect the market value of the Trigger PLUS. Investors are dependent on our and JPMorgan Chase & Co.'s ability to pay all amounts due on the Trigger PLUS. Any actual or anticipated decline in our or JPMorgan Chase & Co.'s credit ratings or increase in our or JPMorgan Chase & Co.'s credit spreads determined by the market for taking that credit

risk is likely to adversely affect the market value of the Trigger PLUS. If we and JPMorgan Chase & Co. were to default on our payment obligations, you may not receive any amounts owed to you under the Trigger PLUS and you could lose your entire investment.

As a finance subsidiary, JPMorgan Financial has no independent operations and has limited assets. As a finance subsidiary of JPMorgan Chase & Co., we have no independent operations beyond the issuance and administration of our securities. Aside from the initial capital contribution from JPMorgan Chase & Co., substantially all of our assets relate to obligations of our affiliates to make payments under loans made by us or other intercompany agreements. As a result, we are dependent upon payments from our affiliates to meet our obligations under the Trigger PLUS. If these affiliates do not make payments to us and we fail to make payments on the Trigger PLUS, you may have to seek payment under the related guarantee by JPMorgan Chase & Co., and that guarantee will rank *pari passu* with all other unsecured and unsubordinated obligations of JPMorgan Chase & Co.

Economic interests of the issuer, the guarantor, the calculation agent, the agent of the offering of the Trigger PLUS and other affiliates of the issuer may be different from those of investors. We and our affiliates play a variety of roles in connection with the issuance of the Trigger PLUS, including acting as calculation agent and as an agent of the offering of the Trigger PLUS, hedging our obligations under the Trigger PLUS and making the assumptions used to determine the pricing of the Trigger PLUS and the estimated value of the Trigger PLUS, which we refer to as the estimated value of the Trigger PLUS. In performing these duties, our and JPMorgan Chase & Co.'s economic interests and the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the Trigger PLUS. The calculation agent has determined the initial share price and the trigger level, will determine the final share price and will calculate the amount of payment you will receive at maturity, if any. Determinations made by the calculation agent, including with respect to the occurrence or non-occurrence of market disruption events, the selection of a successor to the ETF Shares or calculation of the final share price in the event of a discontinuation of the ETF Shares, and any anti-dilution adjustments, may affect the

JPMorgan Chase Financial Company LLC

Dual Directional Trigger PLUS Based on the Performance of the Energy Select Sector SPDR[®] Fund due January 21, 2022

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

payment to you at maturity. In addition, our and JPMorgan Chase & Co.'s business activities, including hedging and trading activities, could cause our and JPMorgan Chase & Co.'s economic interests to be adverse to yours and could adversely affect any payment on the Trigger PLUS and the value of the Trigger PLUS. It is possible that hedging or trading activities of ours or our affiliates in connection with the Trigger PLUS could result in substantial returns for us or our affiliates while the value of the Trigger PLUS declines. Please refer to "Risk Factors — Risks Relating to Conflicts of Interest" in the accompanying product supplement for additional information about these risks.

The benefit provided by the trigger level may terminate on the valuation date. If the final share price is less than the trigger level, the benefit provided by the trigger level will terminate and you will be fully exposed to any depreciation of the ETF Shares.

The estimated value of the Trigger PLUS is lower than the original issue price (price to public) of the Trigger PLUS. The estimated value of the Trigger PLUS is only an estimate determined by reference to several factors. The original issue price of the Trigger PLUS exceeds the estimated value of the Trigger PLUS because costs associated with selling, structuring and hedging the Trigger PLUS are included in the original issue price of the Trigger PLUS. These costs include the selling commissions, the structuring fee, the projected profits, if any, that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the Trigger PLUS and the estimated cost of hedging our obligations under the Trigger PLUS. See "Additional Information about the Trigger PLUS — The estimated value of the Trigger PLUS" in this document.

The estimated value of the Trigger PLUS does not represent future values of the Trigger PLUS and may differ from others' estimates. The estimated value of the Trigger PLUS is determined by reference to internal pricing models of our affiliates. This estimated value of the Trigger PLUS is based on market conditions and other relevant factors existing at the time of pricing and assumptions about market parameters, which can include volatility, dividend rates, interest rates and other factors. Different pricing models and assumptions could provide valuations for the Trigger PLUS that are greater than or less than the estimated value of the Trigger PLUS. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect. On future dates, the value of the Trigger PLUS could change significantly based on, among other things, changes in market conditions, our or JPMorgan Chase & Co.'s creditworthiness, interest rate movements and other relevant factors, which may impact the price, if any, at which JPMS would be willing to buy Trigger PLUS from you in secondary market transactions. See "Additional Information about the Trigger PLUS — The estimated value of the Trigger PLUS" in this document.

The estimated value of the Trigger PLUS is derived by reference to an internal funding rate. The internal funding rate used in the determination of the estimated value of the Trigger PLUS is based on, among other things, our and our affiliates' view of the funding value of the Trigger PLUS as well as the higher issuance, operational and ongoing liability management costs of the Trigger PLUS in comparison to those costs for the conventional fixed-rate debt of JPMorgan Chase & Co. The use of an internal funding rate and any potential changes to that rate may have an adverse effect on the terms of the Trigger PLUS and any secondary market prices of the Trigger PLUS. See "Additional Information about the Trigger PLUS — The estimated value of the Trigger PLUS" in this document.

The value of the Trigger PLUS as published by JPMS (and which may be reflected on customer account statements) may be higher than the then-current estimated value of the Trigger PLUS for a limited time period. We generally expect that some of the costs included in the original issue price of the Trigger PLUS will be partially paid back to you in connection with any repurchases of your Trigger PLUS by JPMS in an amount that will decline to zero over an initial predetermined period. These costs can include selling commissions, the structuring fee, projected hedging profits, if any, and, in some circumstances, estimated hedging costs and our internal secondary market funding rates for structured debt issuances. See "Additional Information about the Trigger PLUS — Secondary market prices of the Trigger PLUS" in this document for additional information relating to this initial period. Accordingly, the estimated value of your Trigger PLUS during this initial period may be lower than the value of the Trigger PLUS as published by JPMS (and which may be shown on your customer account statements).

Secondary market prices of the Trigger PLUS will likely be lower than the original issue price of the Trigger PLUS. Any secondary market prices of the Trigger PLUS will likely be lower than the original issue price of the Trigger PLUS because, among other things, secondary market prices take into account our internal secondary market funding rates for structured debt issuances and, also,

because secondary

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

market prices (a) exclude selling commissions and the structuring fee and (b) may exclude projected hedging profits, if any, and estimated hedging costs that are included in the original issue price of the Trigger PLUS. As a result, the price, if any, at which JPMS will be willing to buy Trigger PLUS from you in secondary market transactions, if at all, is likely to be lower than the original issue price. Any sale by you prior to the maturity date could result in a substantial loss to you. See the immediately following risk factor for information about additional factors that will impact any secondary market prices of the Trigger PLUS.

The Trigger PLUS are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your Trigger PLUS to maturity. See “— Secondary trading may be limited” below.

Secondary market prices of the Trigger PLUS will be impacted by many economic and market factors. The secondary market price of the Trigger PLUS during their term will be impacted by a number of economic and market factors, which may either offset or magnify each other, aside from the selling commissions, structuring fee, projected hedging profits, if any, estimated hedging costs and the price of one share of the ETF Shares, including:

any actual or potential change in our or JPMorgan Chase & Co.’s creditworthiness or credit spreads;

customary bid-ask spreads for similarly sized trades;

our internal secondary market funding rates for structured debt issuances;

the actual and expected volatility in the prices of the ETF Shares;

the time to maturity of the Trigger PLUS;

the dividend rates on the ETF Shares and the equity securities underlying the ETF Shares;

interest and yield rates in the market generally;

the occurrence of certain events to the ETF Shares that may or may not require an adjustment to the share adjustment factor; and

a variety of other economic, financial, political, regulatory and judicial events.

Additionally, independent pricing vendors and/or third party broker-dealers may publish a price for the Trigger PLUS, which may also be reflected on customer account statements. This price may be different (higher or lower) than the price of the Trigger PLUS, if any, at which JPMS may be willing to purchase your Trigger PLUS in the secondary market.

Investing in the Trigger PLUS is not equivalent to investing in the ETF Shares. Investing in the Trigger PLUS is not equivalent to investing in the ETF Shares, the index tracked by the ETF Shares, which we refer to as the underlying index, or the stocks underlying the ETF Shares or the underlying index. Investors in the Trigger PLUS will not have voting rights or rights to receive dividends or other distributions or any other rights with respect to the ETF Shares, the reference index or the stocks held by the ETF Shares or the underlying index.

Adjustments to the ETF Shares or the underlying index could adversely affect the value of the Trigger PLUS.

Those responsible for calculating and maintaining the ETF Shares and the underlying index, can add, delete or substitute the components of the ETF Shares or the underlying index, or make other methodological changes that could change the value of the ETF Shares or the underlying index. Any of these actions could adversely affect the price of the ETF Shares and, consequently, the value of the Trigger PLUS.

There are risks associated with the ETF Shares. Although the ETF Shares are listed for trading on a securities exchange and a number of similar products have been traded on various securities exchanges for varying periods of time, there is no assurance that an active trading market will continue for the ETF Shares or that there will be liquidity in the trading market. The ETF Shares are subject to management risk, which is the risk that the investment strategy of the investment adviser to the ETF Shares, the implementation of which is subject to a number of constraints, may not produce the intended results. These constraints could adversely affect the market price of the ETF Shares and, consequently, the value of the Trigger PLUS.

January 2019 Page 8

JPMorgan Chase Financial Company LLC

Dual Directional Trigger PLUS Based on the Performance of the Energy Select Sector SPDR[®] Fund due January 21, 2022

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

The performance and market value of the ETF Shares, particularly during periods of market volatility, may not correlate with the performance of the underlying index as well as the net asset value per ETF Share. The Energy Select Sector SPDR[®] Fund does not fully replicate the underlying index and may hold securities different from those included in the underlying index. In addition, the performance of the ETF Shares will reflect additional transaction costs and fees that are not included in the calculation of the underlying index. All of these factors may lead to a lack of correlation between the performance of the ETF Shares and the underlying index. In addition, corporate actions with respect to the equity securities underlying the ETF Shares (such as mergers and spin-offs) may impact the variance between the performances of the ETF Shares and the underlying index. Finally, because the ETF Shares are traded on a securities exchange and are subject to market supply and investor demand, the market value of one ETF Share may differ from the net asset value per ETF Share.

During periods of market volatility, securities underlying the ETF Shares may be unavailable in the secondary market, market participants may be unable to calculate accurately the net asset value per ETF Share and the liquidity of the ETF Shares may be adversely affected. This kind of market volatility may also disrupt the ability of market participants to create and redeem ETF Shares. Further, market volatility may adversely affect, sometimes materially, the prices at which market participants are willing to buy and sell ETF Shares. As a result, under these circumstances, the market value of ETF Shares may vary substantially from the net asset value per ETF Share. For all of the foregoing reasons, the performance of the ETF Shares may not correlate with the performance of the underlying index as well as its net asset value per ETF Share, which could materially and adversely affect the value of the Trigger PLUS in the secondary market and/or reduce any payment on the Trigger PLUS.

The Trigger PLUS are subject to risks associated with the energy sector. All or substantially all of the equity securities underlying the ETF Shares are issued by companies whose primary line of business is directly associated with the energy sector. As a result, the value of the Trigger PLUS may be subject to greater volatility and be more adversely affected by a single economic, political or regulatory occurrence affecting this sector than a different investment linked to securities of a more broadly diversified group of issuers. Issuers in energy-related industries can be significantly affected by fluctuations in energy prices and supply and demand of energy fuels. Markets for various energy-related commodities can have significant volatility, and are subject to control or manipulation by large producers or purchasers. Companies in the energy sector may need to make substantial expenditures, and to incur significant amounts of debt, in order to maintain or expand their reserves. Oil and gas exploration and production can be significantly affected by natural disasters as well as changes in exchange rates, interest rates, government regulation, world events and economic conditions. These companies may be at risk for environmental damage claims. These factors could affect the energy sector and could affect the value of the equity securities underlying the ETF Shares and the price of one ETF Share during the term of the Trigger PLUS, which may adversely affect the value of the Trigger PLUS.

The anti-dilution protection for the ETF Shares is limited. The calculation agent will make adjustments to the share adjustment factor for certain events affecting the ETF Shares. However, the calculation agent will not make an adjustment in response to all events that could affect the ETF Shares. If an event occurs that does not require the calculation agent to make an adjustment, the value of the Trigger PLUS may be materially and adversely affected.

Hedging and trading activities by the issuer and its affiliates could potentially affect the value of the Trigger PLUS. The hedging or trading activities of the issuer's affiliates and of any other hedging counterparty with respect to the Trigger PLUS on or prior to the pricing date and prior to maturity could have adversely affected, and may continue to adversely affect, the value of the ETF Shares and, as a result, could decrease the amount an investor may receive on the Trigger PLUS at maturity, if any. Any of these hedging or trading activities on or prior to the pricing date could potentially affect the initial share price and the trigger level and, therefore, could have increased the price that the final share price must reach before you receive a payment at maturity that exceeds the issue price of the Trigger PLUS or so that you do not suffer a loss on your initial investment in the Trigger PLUS. Additionally, these hedging or trading activities during the term of the Trigger PLUS, including on the valuation date, could adversely

January 2019 Page 9

JPMorgan Chase Financial Company LLC

Dual Directional Trigger PLUS Based on the Performance of the Energy Select Sector SPDR[®] Fund due January 21, 2022

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

affect the final share price and, accordingly, the payment to you at maturity, if any. It is possible that these hedging or trading activities could result in substantial returns for us or our affiliates while the value of the Trigger PLUS declines.

Secondary trading may be limited. The Trigger PLUS will not be listed on a securities exchange. There may be little or no secondary market for the Trigger PLUS. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the Trigger PLUS easily. JPMS may act as a market maker for the Trigger PLUS, but is not required to do so. Because we do not expect that other market makers will participate significantly in the secondary market for the Trigger PLUS, the price at which you may be able to trade your Trigger PLUS is likely to depend on the price, if any, at which JPMS is willing to buy the Trigger PLUS. If at any time JPMS or another agent does not act as a market maker, it is likely that there would be little or no secondary market for the Trigger PLUS.

The tax consequences of an investment in the Trigger PLUS are uncertain. There is no direct legal authority as to the proper U.S. federal income tax characterization of the Trigger PLUS, and we do not intend to request a ruling from the IRS. The IRS might not accept, and a court might not uphold, the treatment of the Trigger PLUS described in “Additional Information about the Trigger PLUS Additional Provisions Tax considerations” in this document and in “Material U.S. Federal Income Tax Consequences” in the accompanying product supplement. If the IRS were successful in asserting an alternative treatment for the Trigger PLUS, the timing and character of any income or loss on the Trigger PLUS could differ materially and adversely from our description herein.

Even if the treatment of the Trigger PLUS is respected, the IRS may assert that the Trigger PLUS constitute “constructive ownership transactions” within the meaning of Section 1260 of the Internal Revenue Code of 1986, as amended (the “Code”), in which case any gain recognized in respect of the Trigger PLUS that would otherwise be long-term capital gain and that is in excess of the “net underlying long-term capital gain” (as defined in Section 1260) would be treated as ordinary income, and a notional interest charge would apply as if that income had accrued for tax purposes at a constant yield over your holding period for the Trigger PLUS. Our special tax counsel has not expressed an opinion with respect to whether the constructive ownership rules apply to the Trigger PLUS.

In addition, in 2007 Treasury and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require investors in these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; the relevance of factors such as the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the constructive ownership regime described above. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Trigger PLUS, possibly with retroactive effect.

You should review carefully the section entitled “Material U.S. Federal Income Tax Consequences” in the accompanying product supplement and consult your tax adviser regarding the U.S. federal income tax consequences of an investment in the Trigger PLUS, including the potential application of the constructive ownership rules, possible alternative treatments and the issues presented by this notice.

Energy Select Sector SPDR® Fund Overview

The Energy Select Sector SPDR® Fund is an exchange-traded fund of the Select Sector SPDR® Trust, a registered investment company, that seeks to provide investment results that, before expenses, correspond generally to the price and yield performance of publicly traded equity securities of companies in the Energy Select Sector Index. Information provided to or filed with the SEC by the Select Sector SPDR® Trust pursuant to the Securities Act of 1933 and the Investment Company Act of 1940 can be located by reference to the SEC file numbers 333-57791 and 811-08837, respectively, through the SEC's website at <http://www.sec.gov>. For additional information about the Energy Select Sector SPDR® Fund, see the information set forth under "Fund Descriptions — The Select Sector SPDR Funds" in the accompanying underlying supplement.

Information as of market close on January 18, 2019:

Bloomberg Ticker Symbol:	XLE	52 Week High (on 5/21/2018):	\$78.91
Current Closing Price:		52 Week Low (on 12/24/2018):	\$53.84
		52 Weeks Ago (on 1/18/2018):	\$76.48

The following table sets forth the published high and low closing prices, as well as end-of-quarter closing prices, of the ETF Shares for each quarter in the period from January 1, 2014 through January 18, 2019. The closing price of one ETF Share on January 18, 2019 was \$63.84. The associated graph shows the closing prices of one ETF Share for each day in the same period. We obtained the closing price information above and in the table and graph below from the Bloomberg Professional® service ("Bloomberg"), without independent verification. The closing prices may have been adjusted by Bloomberg for actions taken relating to the ETF Shares, such as stock splits. The historical closing prices of the ETF Shares should not be taken as an indication of future performance, and no assurance can be given as to the closing price of one ETF Share on the valuation date.

The Energy Select Sector SPDR® Fund – Daily Closing Prices

January 2, 2014 to January 18, 2019

*The dotted line in the graph indicates the trigger level, equal to 75% of the initial share price.

This document relates only to the Trigger PLUS offered hereby and does not relate to the ETF Shares. We have derived all disclosures contained in this document regarding the Energy Select Sector SPDR® Fund from the publicly available documents described in the first paragraph under this “Energy Select Sector SPDR Fund Overview” section, without independent verification. In connection with the offering of the Trigger PLUS, neither we nor the agent has participated in the preparation of such documents or made any due diligence inquiry with respect to the Energy Select Sector SPDR® Fund. Neither we nor the agent makes any representation that such publicly available documents or any other publicly available information regarding the Energy Select Sector SPDR® Fund is accurate or complete. Furthermore, we cannot give any assurance that all events occurring prior to the date hereof (including events that would affect the accuracy or completeness of the publicly available documents described in the first paragraph under this “Energy Select Sector SPDR® Fund Overview” section) that would affect the trading price of the ETF Shares (and therefore the price of the ETF Shares at the time we priced the Trigger PLUS) have been publicly disclosed. Subsequent disclosure of any such events or the disclosure of or failure to disclose material future events concerning the Energy Select Sector SPDR® Fund could affect the value received at maturity, if any, with respect to the Trigger PLUS and therefore the trading prices of the Trigger PLUS.

Neither we nor any of our affiliates makes any representation to you as to the performance of the ETF Shares.

The Energy Select Sector Index. The Energy Select Sector Index is a modified market capitalization-based index that measures the performance of the GICS® energy sector of the S&P 500® Index, which currently includes companies in the following industries: energy equipment and services; and oil, gas and consumable fuels. For additional information about the Energy Select Sector Index, see the information set forth under “Equity Index Descriptions — The S&P Select Sector Indices” in the accompanying underlying supplement.

Additional Information about the Trigger PLUS

Please read this information in conjunction with the summary terms on the front cover of this document.

Additional Provisions:

Postponement of maturity date: If the scheduled maturity date is not a business day, then the maturity date will be the following business day. If the scheduled valuation date is not a trading day or if a market disruption event occurs on that day so that the valuation date is postponed and falls less than three business days prior to the scheduled maturity date, the maturity date of the Trigger PLUS will be postponed to the third business day following the valuation date as postponed.

Minimum ticketing size: \$1,000 / 100 Trigger PLUS

Trustee: Deutsche Bank Trust Company Americas (formerly Bankers Trust Company)

Calculation agent: JPMS

The estimated value of the Trigger PLUS: The estimated value of the Trigger PLUS set forth on the cover of this document is equal to the sum of the values of the following hypothetical components: (1) a fixed-income debt component with the same maturity as the Trigger PLUS, valued using the internal funding rate described below, and (2) the derivative or derivatives underlying the economic terms of the Trigger PLUS. The estimated value of the Trigger PLUS does not represent a minimum price at which JPMS would be willing to buy your Trigger PLUS in any secondary market (if any exists) at any time. The internal funding rate used in the determination of the estimated value of the Trigger PLUS is based on, among other things, our and our affiliates' view of the funding value of the Trigger PLUS as well as the higher issuance, operational and ongoing liability management costs of the Trigger PLUS in comparison to those costs for the conventional fixed-rate debt of JPMorgan Chase & Co. For additional information, see "Risk Factors — The estimated value of the Trigger PLUS is derived by reference to an internal funding rate" in this document. The value of the derivative or derivatives underlying the economic terms of the Trigger PLUS is derived from internal pricing models of our affiliates. These models are dependent on inputs such as the traded market prices of comparable derivative instruments and on various other inputs, some of which are market-observable, and which can include volatility, dividend rates, interest rates and other factors, as well as assumptions about future market events and/or environments. Accordingly, the estimated value of the Trigger PLUS on the pricing date is based on market conditions and other relevant factors and assumptions existing at that time. See "Risk Factors — The estimated value of the Trigger PLUS does not represent future values of the Trigger PLUS and may differ from others' estimates" in this document.

The estimated value of the Trigger PLUS is lower than the original issue price of the Trigger PLUS because costs associated with selling, structuring and hedging the Trigger PLUS are included in the

original issue price of the Trigger PLUS. These costs include the selling commissions paid to JPMS and other affiliated or unaffiliated dealers, the structuring fee, the projected profits, if any, that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the Trigger PLUS and the estimated cost of hedging our obligations under the Trigger PLUS. Because hedging our obligations entails risk and may be influenced by market forces beyond our control, this hedging may result in a profit that is more or less than expected, or it may result in a loss. A portion of the profits, if any, realized in hedging our obligations under the Trigger PLUS may be allowed to other affiliated or unaffiliated dealers, and we or one or more of our affiliates will retain any remaining hedging profits. See “Risk Factors — The estimated value of the Trigger PLUS is lower than the original issue price (price to public) of the Trigger PLUS” in this document.

For information about factors that will impact any secondary market prices of the Trigger PLUS, see “Risk Factors — Secondary market prices of the Trigger PLUS will be impacted by many economic and market factors” in this document. In addition, we generally expect that some of the costs included in the original issue price of the Trigger PLUS will be partially paid back to you in connection with any repurchases of your Trigger PLUS by JPMS in an amount that will decline to zero over an initial predetermined period that is intended to be the shorter of two years and one-half of the stated term of the Trigger PLUS. The length of any such initial period reflects the structure of the Trigger PLUS, whether our affiliates expect to earn a profit in connection with our hedging activities, the estimated costs of hedging the Trigger PLUS and when these costs are incurred, as determined by our affiliates. See “Risk Factors — The value of the Trigger PLUS as published by JPMS (and which may be reflected on customer account statements) may be higher than the then-current estimated value of the Trigger PLUS for a limited time period.”

Tax considerations: You should review carefully the section entitled “Material U.S. Federal Income Tax Consequences” in the accompanying product supplement no. MS-1-I. The following discussion, when read in combination with that section, constitutes the full opinion of our special tax counsel, Davis Polk & Wardwell LLP, regarding the material U.S. federal income tax consequences of owning and disposing of the Trigger PLUS.

Based on current market conditions, in the opinion of our special tax counsel, your Trigger PLUS should be treated as “open transactions” that are not debt instruments for U.S. federal income tax purposes, as more fully described in “Material U.S. Federal Income Tax Consequences — Tax Consequences to U.S. Holders — Notes Treated as Open Transactions That Are Not Debt Instruments” in the accompanying product supplement. Assuming this treatment is respected, subject to the possible application of the “constructive ownership” rules, the gain or loss on your Trigger PLUS should be treated as long-term capital gain or loss if you hold your Trigger PLUS for more than a year, whether or not you are an initial purchaser of Trigger PLUS at the issue price. The Trigger PLUS could be treated as “constructive ownership transactions” within the meaning of Section 1260 of the Code, in which case any gain recognized in respect of the Trigger PLUS that would otherwise be long-term capital gain and that was in excess of the “net underlying long-term capital gain” (as defined in Section 1260) would be treated as ordinary income, and a notional interest charge would apply as if that income had accrued for tax purposes at a constant yield over your holding period for the Trigger PLUS. Our special tax counsel has not expressed an opinion with respect to whether the constructive ownership rules apply to the Trigger PLUS. Accordingly, U.S. Holders should consult their tax advisers regarding the potential application of the constructive ownership rules.

The IRS or a court may not respect the treatment of the Trigger PLUS described above, in which case the timing and character of any income or loss on your Trigger PLUS could be materially and adversely affected. In addition, in 2007 Treasury and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require investors in these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; the relevance of factors such as the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the constructive ownership regime described above. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Trigger PLUS, possibly with retroactive effect. You should

consult your tax adviser regarding the U.S. federal income tax consequences of an investment in the Trigger PLUS, including the potential application of the constructive ownership rules, possible alternative treatments and the issues presented by this notice.

Section 871(m) of the Code and Treasury regulations promulgated thereunder (“Section 871(m)”) generally impose a 30% withholding tax (unless an income tax treaty applies) on dividend equivalents paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities. Section 871(m) provides certain exceptions to this withholding regime, including for instruments linked to certain broad-based indices that meet requirements set forth in the applicable Treasury regulations (such as an index, a “Qualified Index”). Additionally, a recent IRS notice excludes from the scope of Section 871(m) instruments issued prior to January 1, 2021 that do not have a delta of one with respect to underlying securities that could pay U.S.-source dividends for U.S. federal income tax purposes (each an “Underlying Security”). Based on certain determinations made by us, our special tax counsel is of the opinion that Section 871(m) should not apply to the Trigger PLUS with regard to Non-U.S. Holders. Our determination is not binding on the IRS, and the IRS may disagree with this determination. Section 871(m) is complex and its application may depend on your particular circumstances, including whether you enter into other transactions with respect to an Underlying Security. You should consult your tax adviser regarding the potential application of Section 871(m) to the Trigger PLUS.

Withholding under legislation commonly referred to as “FATCA” may (if the Trigger PLUS are recharacterized as debt instruments) apply to amounts treated as interest paid with respect to the Trigger PLUS, as well as to payments of gross proceeds of a taxable disposition, including redemption at maturity, of a Trigger PLUS, although under recently proposed regulations (the preamble to which specifies that taxpayers are permitted to rely on them pending finalization), no withholding will apply to payments of gross proceeds (other than any amount treated as interest). You should consult your tax adviser regarding the potential application of FATCA to the Trigger PLUS.

**Supplemental
use of proceeds
and hedging:**

The Trigger PLUS are offered to meet investor demand for products that reflect the risk-return profile and market exposure provided by the Trigger PLUS. See “How the Trigger PLUS Work” in this document for an illustration of the risk-return profile of the Trigger PLUS and “Energy Select Sector SPDR® Fund Overview” in this document for a description of the

JPMorgan Chase Financial Company LLC

Dual Directional Trigger PLUS Based on the Performance of the Energy Select Sector SPDR® Fund due January 21, 2022

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

market exposure provided by the Trigger PLUS.

The original issue price of the Trigger PLUS is equal to the estimated value of the Trigger PLUS plus the selling commissions paid to JPMS and other affiliated or unaffiliated dealers and the structuring fee, plus (minus) the projected profits (losses) that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the Trigger PLUS, plus the estimated cost of hedging our obligations under the Trigger PLUS.

Benefit plan investor considerations:

See “Benefit Plan Investor Considerations” in the accompanying product supplement.

Subject to regulatory constraints, JPMS intends to use its reasonable efforts to offer to purchase the Trigger PLUS in the secondary market, but is not required to do so. JPMS, acting as agent for JPMorgan Financial, will pay all of the selling commissions it receives from us to Morgan Stanley Wealth Management. In addition, Morgan Stanley Wealth Management will receive a structuring fee as set forth on the cover of this document for each Trigger PLUS.

Supplemental plan of distribution:

We or our affiliate may enter into swap agreements or related hedge transactions with one of our other affiliates or unaffiliated counterparties in connection with the sale of the Trigger PLUS and JPMS and/or an affiliate may earn additional income as a result of payments pursuant to the swap or related hedge transactions. See “— Supplemental use of proceeds and hedging” above and “Use of Proceeds and Hedging” in the accompanying product supplement.

We expect that delivery of the Trigger PLUS will be made against payment for the Trigger PLUS on or about the original issue date set forth on the front cover of this document, which will be the third business day following the pricing date of the Trigger PLUS (this settlement cycle being referred to as “T+3”). Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended, trades in the secondary market generally are required to settle in two business days, unless the parties to that trade expressly agree otherwise. Accordingly, purchasers who wish to trade Trigger PLUS on any date prior to two business days before delivery will be required to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement and should consult their own advisors

Validity of the Trigger PLUS and the guarantee:

In the opinion of Davis Polk & Wardwell LLP, as special products counsel to JPMorgan Financial and JPMorgan Chase & Co., when the Trigger PLUS offered by this pricing supplement have been executed and issued by JPMorgan Financial and authenticated by the trustee pursuant to the indenture, and delivered against payment as contemplated herein, such Trigger PLUS will be valid and binding obligations of JPMorgan Financial and the related guarantee will constitute a valid and binding obligation of JPMorgan Chase & Co., enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors’ rights generally, concepts of

reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), *provided* that such counsel expresses no opinion as to (i) the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above or (ii) any provision of the indenture that purports to avoid the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law by limiting the amount of JPMorgan Chase & Co.'s obligation under the related guarantee. This opinion is given as of the date hereof and is limited to the laws of the State of New York, the General Corporation Law of the State of Delaware and the Delaware Limited Liability Company Act. In addition, this opinion is subject to customary assumptions about the trustee's authorization, execution and delivery of the indenture and its authentication of the Trigger PLUS and the validity, binding nature and enforceability of the indenture with respect to the trustee, all as stated in the letter of such counsel dated March 8, 2018, which was filed as an exhibit to the Registration Statement on Form S-3 by JPMorgan Financial and JPMorgan Chase & Co. on March 8, 2018.

Contact:

Morgan Stanley Wealth Management clients may contact their local Morgan Stanley branch office or Morgan Stanley's principal executive offices at 1585 Broadway, New York, New York 10036 (telephone number (800) 869-3326).

You should read this document together with the accompanying prospectus, as supplemented by the accompanying prospectus supplement relating to our Series A medium-term notes of which these Trigger PLUS are a part, and the more detailed information contained in the accompanying product supplement and the accompanying underlying supplement.
