Openreach ahead on all 60 minimum service levels and on track to halve missed appointments this year

Edgar Filing: BT GROUP PLC - Form 6-K

Gavin Patterson, Chief Executive, commenting on the results, said:

“This is a positive set of results, both operationally and financially, and we remain on track to achieve our full year outlook. We’ve made good progress on the integration of EE and the delivery of our synergy targets. Our consumer facing lines of business have performed well, but in the enterprise space, UK public sector continues to be a challenging market. Across the group, we continue to drive cost reduction and productivity improvements. Customer experience remains a key priority, and we’re stepping up our investments in the second half of the year. And we’ll continue to invest in our ultrafast and 4G plans in 2017 and beyond. Ofcom’s consultation on the Digital Communications Review closed earlier this month; we’ve submitted our response and will continue to engage with Ofcom to reach the best outcome for the UK.”

n/m = not meaningful

Notes:

1.

Our commentary focuses on the trading results on an adjusted basis, which is a non-GAAP measure, being before specific items. Unless otherwise stated, revenue, operating costs, earnings before interest, tax, depreciation and

amortisation (EBITDA), operating profit, profit before tax, net finance expense, earnings per share (EPS) and normalised free cash flow are measured before specific items. This is consistent with the way that financial performance is measured by management and reported to the Board and the Operating Committee and assists in providing a meaningful analysis of the trading results of the group. The directors believe that presentation of the group's results in this way is relevant to the understanding of the group's financial performance as specific items are those that in management's judgement need to be disclosed by virtue of their size, nature or incidence. In determining whether an event or transaction is specific, management considers quantitative as well as qualitative factors such as the frequency or predictability of occurrence. Specific items may not be comparable with similarly titled measures used by other companies. Reported revenue, reported operating costs, reported operating profit, reported profit before tax, reported net finance expense and reported EPS are the equivalent unadjusted or statutory measures. Reconciliations of reported to adjusted revenue, operating costs and operating profit are set out in the Group income statement. Reconciliations of underlying revenue excluding transit adjusted for the acquisition of EE, underlying operating costs excluding transit adjusted for the acquisition of EE, EBITDA, underlying EBITDA adjusted for the acquisition of EE, net debt and free cash flow to the nearest measures prepared in accordance with IFRS are provided in the notes to the condensed consolidated financial statements and in the Additional information.

2.

Trends in underlying revenue excluding transit adjusted for the acquisition of EE, underlying operating costs excluding transit adjusted for the acquisition of EE, and underlying EBITDA adjusted for the acquisition of EE are non-GAAP measures which seek to reflect the underlying performance of the group that will contribute to long-term sustainable growth and as such exclude the impact of acquisitions and disposals, foreign exchange movements and any specific items. We exclude transit from the trends as transit traffic is low-margin and is affected by reductions in mobile termination rates. Given the significance of the EE acquisition to the group, in 2016/17 we are calculating underlying revenue excluding transit adjusted for the acquisition of EE, underlying operating costs excluding transit adjusted for the acquisition of EE and underlying EBITDA adjusted for the acquisition of EE (see note 3), as though EE had been part of the group from 1 April 2015. This is different from how we usually adjust for acquisitions, and is the basis for our 2016/17 outlook.

3.

We have prepared and published historical financial information adjusted for the acquisition of EE (previously described as pro forma historical financial information) for the eight quarters ended 31 March 2016 for the group and by line of business under our new organisational structure, to illustrate the results as though EE had been part of the group from 1 April 2014. This historical financial information adjusted for the acquisition of EE shows EE's historical results adjusted to reflect BT's accounting policies. In the consolidated group total, we've eliminated historical transactions between BT and EE as though they had been intercompany transactions. We've not made any adjustments to reflect the allocation of the purchase price for EE. And all deal and acquisition-related costs have been treated as specific items and therefore don't impact the published information.
