Pursuant to SEC disclosure requirements for this offering, we filed today a current report on Form 6-K in which we discuss certain recent developments since September 30, 2016. We will announce our results for the fourth quarter of 2016 and the full year 2016 on February 23, 2017. Our results will be affected by a variety of factors, including improved prices for iron ore, trends in prices for our other products and the impact of changing exchange rates. In addition, we expect to recognize impairments (with no cash effect) in our fertilizers segment, with an impact in our results of approximately US\$1.2 billion after tax, resulting from the agreement to sell certain assets for US\$2.5 billion announced in December 2016. Also, as a result of a lower price outlook for certain products, we expect to recognize additional impairments (with no cash effect) in our base metals operations in Vale Newfoundland and Labrador (VNL) and in New Caledonia (VNC). We have not yet finally determined the amount of these impairments in VNL and VNC, but based on our current estimates we expect it to be significantly less than the impairment recognized on these assets in 2015. As of the date of this Form 6-K we have not completed our closing and review procedures, the preparation of our financial statements, or our assessment of internal control over financial reporting, and our auditors have not completed their audit of our financial statements.
