Notes to the Unaudited Condensed Interim Consolidated Financial Statements

1.
The Group's business and general information

Cresud was founded in 1936 as a subsidiary of Credit Foncier, a Belgian company primarily engaged in providing rural and urban loans in Argentina and administering real estate holdings foreclosed by Credit Foncier. Credit Foncier was liquidated in 1959, and as part of such liquidation, the shares of Cresud were distributed to Credit Foncier's shareholders. From the 1960s through the end of the 1970s, the business of Cresud shifted exclusively to agricultural activities.

In 2002, Cresud acquired a 19.85% interest in IRSA, a real estate company related to certain shareholders of Cresud. In 2009, Cresud increased its ownership percentage in IRSA to 55.64% and IRSA became Cresud's directly principal subsidiary.

Cresud and its subsidiaries are collectively referred to hereinafter as the Group.

Main shareholders of the Company are jointly Inversiones Financieras del Sur S.A. and Agroinvestment S.A. Both entities are companies incorporated in Uruguay and the same controlling group and ultimate beneficiary.

These Financial Statements have been approved for issue by the Board of Directors on May 11, 2018.

As of March 31, 2018, the Group operates in two major lines of business: (i) agricultural business and (ii) urban properties and investments business, which is divided into two operations centers: (a) Operations Center in Argentina and (b) Operations Center in Israel. They are developed through several operating companies and the main ones are listed below:

2.
Summary of significant accounting policies

2.1.
Basis of preparation of the Unaudited Financial Statements

The current Financial Statements have been prepared in accordance with IAS 34 "Interim Financial Reporting", therefore, should be read together with the Annual Financial Statements of the Group as of June 30, 2017, prepared in accordance with IFRS in force. Furthermore, these Financial Statements include supplementary information required by Law N° 19,550 and/or regulations of CNV. Such information is included in notes to the Financial Statements according to IFRS.

These Financial Statements corresponding to the nine-month periods ended as of March 31, 2018 and 2017 have not been audited. The management considers they include all necessary adjustments to fairly present the results of each period. Results for the nine-month periods ended as of March 31, 2018 and 2017 do not necessarily reflect the proportion of the Group's full year results.

Under IAS 29 "Financial Reporting in Hyperinflationary Economies", the Financial Statements of an entity whose functional currency belongs to a hyperinflationary economy, regardless of whether they apply historic cost or current cost methods, should be stated at the current unit of measure as of the date of this Consolidated Financial Statements. For such purpose, in general, inflation is to be computed in non-monetary items from the acquisition or revaluation date, as applicable. In order to determine whether an economy is to be considered hyperinflationary, the standard lists a set of factors to be taken into account, including an accumulated inflation rate near or above 100% over a three year period.

For the Group's business in Argentina, considering the released inflation data, the declining inflation trend and in view that all other indicators do not lead to a final conclusion, the Management understands that there is no enough evidence to conclude that Argentina is a hyperinflationary economy. Therefore, no restatement has been applied on financial information, as set forth by IAS 29, for the reported periods. However, over the last years, certain macroeconomic variables, such as payroll costs and goods prices, have experienced significant annual changes, which should be taken into consideration in assessing and interpreting the financial situation and results of operations of the Group in these Financial Statements.

The consolidated Financial Statements are presented in millions of Argentine Pesos. Unless otherwise stated or the context otherwise requires, references to 'Peso amounts' or 'Ps.', are in Argentine Pesos, references to 'US\$' or 'US Dollar' are in millions of United States dollars, references to 'Rs.' are in millions of Brazilian Reais and references to "NIS" are in millions of New Israeli Shekel.

2.2
Significant accounting policies

The accounting policies applied in the presentation of these Financial Statements are consistent with those applied in the preparation of the Annual Financial Statements under IFRS as described in Note 2 to the Annual Financial Statements as of June 30, 2017.

In addition to the policies described in the Annual Financial Statements, during the current period the Group acquired CLN tokens, which are valued at the lower value between the cost of acquisition and the net realizable value, and were

classified as other non-current assets.

2.2.a)

Changes to Financial Statements previously issued due to change in accounting policies

As mentioned in Note 2 to the Consolidated Financial Statements as of June 30, 2017, during the fiscal year ended June 30, 2017 the Group's Board of Directors decided to change the accounting policy for investment property from cost model to fair value model, as permitted under IAS 40. Therefore, the previously issued Interim Financial Statements were retroactively changed as required by IAS 8.

The tables below include the reconciliation between the Statements of Income and of the Statements of Comprehensive Income for the nine and three-month periods ended March 31, 2017 as they were originally issued, and the statements included in these Financial Statements for comparative purposes. There is no impact on the relevant total amounts in the Consolidated Statement of Cash Flows.

2.2.b)

Changes in the presentation of Financial Statements previously issued due to change in accounting policies

Expenses relating to the agricultural activity include items as planting, harvesting, irrigation, agrochemicals, fertilizers, veterinary services and others. The Group chose not to continue to charge these costs to income as they are incurred; instead, it capitalized them as part of the cost of biological assets. The Group believes this change will help to better understand the performance of the agribusiness activity and therefore provides more relevant information to Management, users of the Financial Statements and others.

The Group has therefore retroactively changed the previously issued Consolidated Financial Statements as required by IAS 8. There is no impact on the total and subtotal amounts of the Financial Statements.

2.3

Use of estimates

The preparation of Financial Statements at a certain date requires the Management of the Group to make estimations and evaluations affecting the amount of assets and liabilities recorded and contingent assets and liabilities disclosed at such date, as well as income and expenses recorded during the period. Actual results might differ from the estimates and evaluations made at the date of preparation of these Financial Statements.

In the preparation of these Unaudited Financial Statements, the significant judgments made by Management in applying the Group's accounting policies and the main sources of uncertainty were the same applied by the Group in the preparation of the Annual Financial Statements for the year ended as of June 30, 2017, as described in Note 5 to those Financial Statements.

2.4

Comparability of information

Amounts as of June 30, 2017 and March 31, 2017 which are disclosed for comparative purposes have been taken from Financial Statements then ended, except for changes described in Notes 2.2.a) and 2.2.b).

3.

Seasonal effects on operations

Agricultural business

Some of the Group's businesses are more affected by seasonal effects than others. The operations of the Group's agricultural business are subject to seasonal effects. The harvests and sale of grains in Argentina generally take place each year since March in the case of corn and soybean, since October in the case of wheat, and since December in the case of sunflower. In Brazil, the harvest and sale of soybean take place since February, and in the case of corn weather conditions make it possible to have two seasons, therefore the harvest take place between March and July. In Bolivia, weather conditions also make it possible to have two soybean, corn and sorghum seasons and, therefore, these crops are harvested in July and May, whereas wheat is harvested in August and September, respectively. In the case of sugarcane, harvest and sale take place between April and November of each year. Other segments of the agricultural business, such as beef cattle and milk production tend to be more stable. However, beef cattle and milk production is

generally larger during the second quarter, when conditions are more favorable. As a result, there may be material fluctuations in the agricultural business results across quarters.

Urban properties and investments business

Operations Center in Argentina

The operations of the Group's shopping malls are subject to seasonal effects, which affect the level of sales recorded by lessees. During summer time in Argentina (January and February), the lessees of shopping malls experience the lowest sales levels in comparison with the winter holidays (July) and Christmas and year-end holidays celebrated in December when they tend to record peaks of sales. Apparel stores generally change their collections during the spring and the fall, which impacts positively on shopping mall sales. Sale discounts at the end of each season also impact the business. As a consequence, for shopping mall operations, a higher level of business activity is expected in the period ranging between July and December, compared to the period between January and June.

Operations Center in Israel

The operations of the Supermarket chain are subject to fluctuations of quarterly sales and income due to the increase in activity during religious holidays in different quarters throughout the year. For instance, in Pesaj (Passover) between March and April, and Rosh Hashaná (Jewish New Year), sometime between September and October each year.

The results of operations of Telecommunications and Tourism are also usually affected by seasonality in summer months in Israel and by the Jewish New Year, given a higher consumption due to internal and external tourism.

4.

Acquisitions and disposals

Below are detailed the significant acquisitions and disposals for the nine-month period ended March 31, 2018. The significant acquisitions and disposals for the fiscal year ended June 30, 2017, are detailed in Note 3 to the Annual Financial Statements.

Spin-off of Cresca S.A.

In February 2018, the spin-off of Cresca, a Paraguayan company, was consummated. As a result, the Group, through Brasilagro, went from having an investment in a joint venture to controlling a set of net assets that meets the definition of business in accordance with paragraph 42 of IFRS 3.

In this way, Brasilagro holds 100% of the capital and votes of Palmeiras and Moroti, both Paraguayan companies, which continued the exploitation previously carried out by Cresca. Likewise, Cresca will continue to exist with the remaining assets consisting of cash and a receivable to cover the expenses related to the spin-off. Brasilagro continues

to hold a 50% interest in the aforementioned residual entity.

The consideration for the acquisition of the business is the investment previously held in Cresca.

The Group has recognized gains of Ps. 510 as result of this transaction, that has been recognized in the line "Other operating results, net" (Note 25).

For purposes of the transaction, a committee of independent directors has been set up to assess the tender offer and negotiate the terms and conditions. The Audit Committee has issued an opinion without reservations as to the transaction in accordance with the terms of section 72 et al. of the Capital Markets Law N° 26,831.

In November 2017, Dolphin IL Investments Ltd. (Dolphin IL), a subsidiary of Dolphin Netherlands B.V., has subscribed the final documents for the acquisition of the total shares owned by IDBD in DIC.

The transaction has been made for an amount of NIS 1,843 (equivalent to NIS 17.20 per share of DIC). The consideration was paid NIS 70 in cash (equivalent to Ps. 348 as of the date of the transaction) and NIS 1,773 million (equivalent to Ps. 8,814 as of the date of the transaction) were financed by IDBD to Dolphin, maturing in five years, with the possibility of an extension of three additional years in tranches of one year each, that will accrue an initial interest of 6.5% annually, which will increase by 1% annually in case of extension for each annual tranche. Furthermore, guarantees have been implemented for IDBD, for IDBD bondholders and their creditors, through pledges of different degree of privilege over DIC shares resulting from the purchase. Moreover, a pledge will be granted in relation to 9,636,097 (equivalent to 6.38%) of the shares of DIC that Dolphin currently holds in the first degree of privilege in favor of IDBD and in second degree of privilege in favor of IDBD's creditors. This transaction has no effect in the Groups consolidation structure and has been accounted in equity as a decrease in the equity attributable to the parent for an amount of Ps. 72.

It should be noted that the financial position of IDBD and its subsidiaries at the Operations Center in Israel does not affect the financial position of IRSA and subsidiaries at the Operations Center in Argentina. In addition, the commitments and other covenants resulting from IDBD's financial debt do not have impact on IRSA since such indebtedness has no recourse against IRSA and it is not granted by IRSA's assets.

Purchase of IDBD shares by IFISA

In December, 2017, Dolphin Netherlands BV (Dolphin), has executed a stock purchase agreement for all of the shares that IFISA held of IDBD, which amounted to 31.7% of the capital stock. In this way, as of the end of December 31, 2017, Dolphin holds the 100% of IDBD's shares.

The transaction was made at a price of NIS 398 (equivalent to NIS 1.894 per share and approximately to Ps. 1,968 as of the date of the transaction). As consideration of the transaction all receivables from IFISA to Dolphin have been canceled plus a payment of USD 33.7 (equivalents to Ps. 588 as of the date of the transaction). This transaction was accounted in equity as a decrease in the equity attributable to the parent for an amount of Ps. 1,853.

Tender offer for Clal

In July 2017, IDBD received a non-binding offer from an international group for the potential acquisition of its entire interest in Clal. The consideration will be based on the equity value of Clal, in accordance with Clal Financial Statement at the time of completing the transaction and is subject to the performance of a due diligence and the execution of an agreement, as well as obtaining the approvals required by law. IDBD is analyzing the offer. On June 30, 2017, this value amounted to NIS 4,880 (equivalent to approximately Ps. 23,278 as of the date of these Financial Statements), at the proportionate equity interest as of the date of the transaction. In November 2017 the period for the parties to execute an agreement for the sale of the shares, has expired. However, the parties continue negotiating according to the principles of the initial proposal. There is no certainty that the offer will go forward under the terms proposed, or that the transaction will be completed.

Sale of Shufersal shares

On December 24, 2017, DIC sold shares of Shufersal, in a manner whereby its equity interest decreased from 53.30% to 50.12%. The consideration with respect to the sale of the aforementioned shares amounted to approximately NIS 169.5 (equivalent to Ps. 847 as of the date of the transaction). This transaction was accounted in equity as an increase in the equity attributable to the parent for an amount of Ps. 244.

Acquisition of New Pharm

As mentioned in Note 3.G to the Consolidated Financial Statements as of June 30, 2017, Shufersal entered into an agreement for the purchase of the shares of New Pharm Drugstores Ltd. ("New Pharm"), representative of 100% of that Company's share capital. On December 20, 2017, the transaction was completed and Shufersal is the sole shareholder of New Pharm, after the sale of one of its stores and the approval by the antitrust committee. The total consideration was NIS 126 (equivalent to Ps. 630 as of the date of the transaction).

The Group is working on the allocation of the purchase price of the net assets acquired. The information below is preliminar and is subject to change. The following table summarizes the consideration, the fair value of the assets acquired and the liabilities assumed:

	December 2017
Identified assets and assumed liabilities:	
Property, plant and equipment	200
Inventories	380
Trade and other receivables	335

Cash and cash equivalents	25
Provisions	(15)
Borrowings	(260)
Employee benefits	(25)
Trade and other payables	(930)
Total identified net assets	(290)
Goodwill (pending allocation)	920
Total consideration	630

Revenues of New Pharm as of March 31, 2018 are not significant. If New Pharm had been consolidated since the beginning of the year, the Group's consolidated statement of income for the nine-month period ended March 31, 2018 would show a pro forma income of PS. 68,256 and a pro-forma net result of Ps. 11,501.

Ispro

In August 2017, PBC's Board of Directors, decided to start a process to examine the potential sale of its interest in Ispro. In this respect, it has received several offers. As of the date of these Financial Statements, the transaction does not comply with the requirements to be classified as assets held for sale.

Israir

On January 10, 2018, the Anti-Trust Authority communicated IDBD its objection to the transaction between Sun D'or and Israir, described in Note 3.f to the Annual Consolidated Financial Statements. The Group is evaluating the reasons for the objection and has appealed the ruling. The Group evaluated the situation and the criteria established by IFRS 5 and kept the classification of the investment as discontinued operations.

Transfer of Cellcom's shares

On January 22, 2018 DIC transferred 5% of Cellcom's shares (the "Transferred Shares"), by way of a loan transaction in equal parts to two private companies incorporated in Israel, which are related parties to the Group. The agreement will be in effect from the date of its closing until December 31, 2018 and will be extended automatically for a year, until it is terminated in accordance with its terms. DIC will be entitled to terminate the agreement at any time, in its discretion, and to receive back all or some of the Transferred Shares. The Israeli entities will not be entitled to transfer the Transferred Shares to any entity whatsoever without DIC's consent. The Israeli entities will together be entitled to appoint 10% of Cellcom directors (i.e., as of the present date - one director). Additionally, the Israeli entities and the designated director will undertake to vote, together with DIC, on all resolutions which will be presented to Cellcom's general meeting. Furthermore, the economic benefits of the Transferred Shares will be kept by DIC. The Transferred Shares are pledged in favor of DIC.

Financial risk management and fair value estimates

These Financial Statements do not include all the information and disclosures of the risk management, so they should be read together with Note 4 to the Annual Financial Statements as of June 30, 2017. There have been no changes in the risk management or risk management policies applied by the Group since the fiscal year-end.

Since June 30, 2017, as of the date of these Financial Statements, there have been no significant changes in business or economic circumstances affecting the fair value of the Group's assets and liabilities (either measured at fair value or amortized cost). Neither have been transfers between the several tiers used in estimating the fair value of the Group's financial instruments.

6.

Segment information

As explained in Note 6 to the Annual Consolidated Financial Statements, segment information is reported from the perspective of products and services: (i) agricultural business and (ii) urban properties and investment business. In addition, this last segment is reported divided from the geographic point of view in two Operations Centers to manage its global interests: Argentina and Israel.

Edgar Filing: CRESUD INC - Form 6-K

At the beginning of the fiscal year initiated as of July 1, 2017 the CODM reviewed certain corporate expenses associated with all the segments of the Operations Center in Argentina and Israel in an aggregate manner. During this period, the corporate expenses analysis were done separately, and it has been included as a new Corporate segment. Likewise, Management fee is excluded from profit from operations since it does not provide useful information of the business performance. The segment information for the period ended March 31, 2017 has been modified for comparability purposes.

Below is a summary of the business unit and a reconciliation between the operating income according to segment information and the operating income of the statement of income and other comprehensive income of the Group for the periods ended March 31, 2018 and 2017:

(1)

IDBD has the right to make an early repayment, total or partial. As a collateral for the full compliance of all the commitments IDBD has placed approximately 60.4 million shares in DIC under a single fixed charge of first line and, in an unlimited amount, in favor of the trustee for the holders of the NCN.

(2)

Corresponds to an expansion of the series.

Corporate Notes Class XXIII

On February 16, 2018, the Company issued its twelfth Series of Corporate Notes, for an amount equivalent to its par value of US\$ 113.16 million, in one class of notes.

Corporate Notes Class XXIII has a maturity of 60 months from issuance, which accrue interest at annual fixed rate of 6.50% payable semiannually. The principal is to be amortized in one installment due on February 16, 2023.

DIC

On September 28, 2017 DIC offered the holders of Series F NCN to swap their notes for Series J NCN. Series J NCN terms and conditions differ substantially from those of Series F. Therefore, DIC recorded the payment of Series F NCN and recognized a new financial commitment at fair value for Series J NCN. As a result of the swap, DIC recorded a loss resulting from the difference between the Series F NCN cancellation value and the new debt value in the amount of approximately NIS 461 (equal to approximately Ps. 2,228 as of that date), which was accounted for under "Finance costs" (Note 26).

IDBD

On November 28, 2017, IDBD made an early redemption of the Series L NCN for an amount of NIS 424 (or Ps. 2,120 as of the transaction date).

Subsequent events

Sale of farmlands of Brasilagro

At the beginning of May 2018, the Group through its subsidiary Braslagro, has entered into a purchase-sale agreement for the partial sale 956 hectares (660 arable hectares) of Araucaria Farm, located in Mineiros, Brazil, for an amount of 1,208 soybean bags per arable hectare of BRL 61.6 million (BRL/ha. 93,356). The impact of the abovementioned transaction will be recognized in the forth quarter of the current fiscal year.

Sale of Clal shares

On May 3, 2018, continuing with the instructions given by the Commissioner of Capital Markets, Insurance and Savings of Israel, IDBD has sold 5% of its stake in Clal through a swap transaction, in accordance with the same principles that applied to the swap transactions made and informed to the market on May and August 2017 and January 2018. The consideration was set at an amount of approximately NIS 155.5 (equivalent to approximately Ps.

910). After the completion of the transaction, IDBD's interest in Clal was reduced to 34.8% of its share capital.

Swap on shares of DIC

On May 6, 2018, IDBD entered into a SWAP transaction on shares of DIC held by third parties with a banking institution not related to the Group for a period of one year with the possibility of extending it an additional year. The total shares subject to the agreement are 6,020,811 and the value of the swap at the time of subscription is on average NIS 10.12 per share, approximately NIS 60 (equivalent to approximately PS. 342 at the transaction day). The present transaction will be settled in cash for the difference between the quotation at the end of the agreement and the agreed price. For this transaction, the group has not increased its participation in and has granted guarantees on certain financial assets.

Dividends distribution of BHSA

On April 9, 2018, Banco Hipotecario approved the distribution of a cash dividend for an amount of Ps. 200, which was made available on April 23, 2018. The stake of the group is 29.9%.

Devaluation of the Argentine peso

As of the issuance date of these Financial Statements, the Argentine peso has suffered a devaluation against the US dollar and other currencies close to 13%, which has an impact on the figures presented in these financial statements, mainly originated by exposure to the exchange rate of our revenues and costs of the "offices and other properties" segment in the Operation Center in Argentina and the revenues and costs of the Operation Center in Israel, and our assets and liabilities, denominated in foreign currency.

REVIEW REPORT ON THE UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL
STATEMENTS

To the Shareholders, President and Directors of
Cresud Sociedad Anónima, Comercial, Inmobiliaria, Financiera y Agropecuaria
Legal address: Moreno 877 – 23° floor
Autonomous City Buenos Aires
Tax Code No. 30-50930070-0

Introduction

We have reviewed the unaudited condensed interim consolidated financial statements of Cresud Sociedad Anónima, Comercial, Inmobiliaria, Financiera y Agropecuaria and its subsidiaries (hereinafter “the Company”) which included the unaudited condensed interim consolidated statement of financial position as of March 31, 2018 and the unaudited condensed interim consolidated statements of income and other comprehensive income for the nine-month period and three-month period ended March 31, 2018, the unaudited condensed interim consolidated statements of changes in shareholders’ equity and the unaudited condensed interim consolidated statements of cash flows for the nine-month period then ended and selected explanatory notes.

The balances and other information corresponding to the fiscal year ended June 30, 2017 and the interim periods within that fiscal year are an integral part of these financial statements and, therefore, they should be considered in relation to those financial statements.

Management responsibility

The Board of Directors of the Company is responsible for the preparation and presentation of these unaudited condensed interim consolidated financial statements in accordance with the International Financial Reporting Standards (IFRS), adopted by the Argentine Federation of Professional Councils in Economic Sciences (FACPCE) as professional accounting standards and added by the National Securities Commission (CNV) to its regulations, as approved by the International Accounting Standard Board (IASB) and , for this reason, is responsible for the preparation and presentation of the unaudited condensed interim consolidated financial statements above mentioned in the first paragraph according to the International Accounting Standard No 34 "Interim Financial Reporting" (IAS 34).

Scope of our review

Our review was limited to the application of the procedures established in the International Standard on Review Engagements ISRE 2410 "Review of interim financial information performed by the independent auditor of the entity", which was adopted as a review standard in Argentina in Technical Resolution No. 33 of the FACPCE, without modification as approved by the International Auditing and Assurance Standards Board (IAASB). A review of interim financial information consists of making inquiries of persons responsible for the preparation of the information included in the unaudited condensed interim consolidated financial statements, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all

significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on the consolidated statement of financial position, the consolidated statements of income and other comprehensive income and consolidated statement of cash flows of the Company.

Conclusion

Nothing came to our attention as a result of our review that caused us to believe that these unaudited condensed interim consolidated financial statements above mentioned in the first paragraph of this report have not been prepared in all material respects in accordance with International Accounting Standard 34.

General information

Cresud Sociedad Anónima, Comercial, Inmobiliaria, Financiera y Agropecuaria (“Cresud” or the “Company”) was founded in 1936 as a subsidiary of Credit Foncier, a Belgian company primarily engaged in providing rural and urban loans in Argentina and administering real estate holdings foreclosed by Credit Foncier. Credit Foncier was liquidated in 1959, and as part of such liquidation, the shares of Cresud were distributed to Credit Foncier’s shareholders. From the 1960s through the end of the 1970s, the business of Cresud shifted exclusively to agricultural activities.

Cresud is a company organized and domiciled in the Republic of Argentina. The address of its registered office is Moreno 877, 23rd Floor, Buenos Aires, Argentina.

These Unaudited Condensed Interim Separate Financial Statements have been approved for issue by the Board of Directors on May 11, 2018.

2.
Basis of preparation of the Unaudited Condensed Interim Separate Financial Statements

2.1.
Basis of preparation

These Financial Statements have been prepared in accordance with IAS 34 "Interim Financial Reporting", therefore, should be read together with the Annual Financial Statements of the Company as of June 30, 2017, prepared in accordance with IFRS in force. Furthermore, these Financial Statements include supplementary information required by Law N° 19,550 and/or regulations of CNV. Such information is included in notes to the Financial Statements, according to IFRS.

These Financial Statements corresponding to the nine-month periods ended as of March 31, 2018 and 2017 have not been audited. The management considers they include all necessary adjustments to fairly present the results of each period. Results for the nine-month periods ended as of March 31, 2018 and 2017 do not necessarily reflect proportionally the Company’s results for the complete fiscal years.

2.1.a) Changes to financial statements previously issued due to change in accounting policies

As mentioned in Note 2 to the Consolidated Financial Statements as of June 30, 2017, during the fiscal year ended June 30, 2017 the Company’s Board of Directors decided to change the accounting policy for investment property from cost model to fair value model, as permitted under IAS 40 "investment properties". The Company believes this change reflects better the current value of its core assets and therefore provides more relevant information to Management, users of financial statements and others.

Therefore, the previously issued Financial Statements were retroactively changed as required by IAS 8.

2.1.b) Changes in presentation of financial statements previously issued due to change in accounting policies

Expenses relating to the agricultural activity include items as planting, harvesting, irrigation, agrochemicals, fertilizers, veterinary services and others. The Company chose not to continue to charge these costs to income as they are incurred; instead, it capitalized them as part of the cost of biological assets. The Company believes this change will help to better understand the performance of the agribusiness activity and therefore provides more relevant information to Management, users of the Financial Statements and others.

The Company has therefore retroactively changed the previously issued Consolidated Financial Statements as required by IAS 8. There is no impact on the total and subtotal amounts of the Financial Statements.

The tables below include reconciliations between the Statements of Comprehensive Income for the nine and three-months period ended March 31, 2017 as they were originally issued, and these Financial Statements (recast). 2.2.
Significant accounting policies

The accounting policies applied in the preparation of these Unaudited Condensed Interim Financial Statements are consistent with those applied in the Annual Financial Statements as of June 30, 2017, except for the changes mentioned in Note 2.1.a) and 2.1.b).

2.3.
Use of estimates

The preparation of financial statements at a certain date requires the Management to make estimations and evaluations affecting the amount of assets and liabilities recorded and contingent assets and liabilities disclosed at such date, as well as income and expenses recorded during the period. Future results might differ from the estimates and evaluations made at the date of preparation of these Unaudited Condensed Interim Separate Financial Statements.

In the preparation of these Unaudited Condensed Interim Separate Financial Statements, the significant judgments made by Management in applying the Company's accounting policies and the main sources of uncertainty were the same applied by the Company in the preparation of the Separate Financial Statements for the fiscal year ended June 30, 2017, except for changes in provisions for income tax, for legal claims and for doubtful accounts.

3.
Seasonal effects on operations

The operations of the Company are also subject to seasonal effects. The harvests and sale of grains (corn, soybean and sunflower) generally take place between January and September every year. Wheat is generally harvested between November and February every year. However, milk production is generally larger during the second quarter, when conditions are more favorable. As a result, there may be material fluctuations in the agricultural business results each quarter.

4.
Acquisitions and disposals

FyO participation sale

On November 9, 2017 Cresud sold to a non-related party 154,929 shares of its subsidiary FyO, representing 9,493% of FyO's capital stock for an amount of US\$ 3.04, which were collected in full. As a result, Cresud reduced its equity interest in FyO from 59.6% to 50.1%.

This transaction generated a gain of Ps. 43 in the Separate Financial Statements, which are disclosed in Other operating results, net (Note 23).

See summary of acquisitions and additional disposals of the Company for the nine-month period ended March 31, 2018 in Note 4 to Unaudited Condensed Interim Consolidated Financial Statements.

Introduction

We have reviewed the unaudited condensed interim separate financial statements of Cresud Sociedad Anónima, Comercial, Inmobiliaria, Financiera y Agropecuaria (hereinafter “the Company”) which included the unaudited condensed interim separate statement of financial position as of March 31, 2018, and the unaudited condensed interim separate statements of income and other comprehensive income for the nine-month period and three-month period ended March 31, 2018, the unaudited condensed interim separate statements of changes in shareholders’ equity and the unaudited condensed interim separate statements of cash flows for the nine-month period then ended and selected explanatory notes.

REVIEW REPORT ON THE UNAUDITED CONDENSED
INTERIM SEPARATE FINANCIAL STATEMENTS (Continued)

Scope of our review

Our review was limited to the application of the procedures established in the International Standard on Review Engagements ISRE 2410 "Review of interim financial information performed by the independent auditor of the entity", which was adopted as a review standard in Argentina in Technical Resolution No. 33 of the FACPCE, without modification as approved by the International Auditing and Assurance Standards Board (IAASB). A review of interim financial information consists of making inquiries of persons responsible for the preparation of the information included in the unaudited condensed interim separate financial statements, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on the separate statement of financial position, the separate statement of income, the separate statement of other comprehensive income and the separate statement of cash flows of the Company.

Conclusion

Nothing came to our attention as a result of our review that caused us to believe that these unaudited condensed interim separate financial statements above mentioned in the first paragraph of this report have not been prepared in all material respects in accordance with International Accounting Standard 34.

Agricultural Business

Period Summary

The 2018 season is developing in the region with mixed climate conditions, rising commodity prices and a competitive exchange rate mainly in Argentina. Regarding the weather, an important drought was observed in Argentina, more pronounced in the eastern part of the country, in the provinces of Entre Ríos, Santa Fe and Buenos Aires, reducing the expected production of soybean by approximately 30% and corn by 22%. Cresud mitigated part of that effect since much of its production comes from the north of the country, where the effects of the lack of water were not severe. In Brazil and Paraguay, the campaign will end with very good production and high yields due to very good weather conditions, while in Bolivia, the conditions were more adverse due to excess rainfall.

Commodity prices maintained a growing trend in the first nine months of the FY 2018. Soybean Chicago price reached as of March 30, 2018 USD / ton 383.89 (+10.4% var YoY) and corn price reached USD / ton 152.65 (+6.4% var YoY).

As of March 31, 2018 the harvest progress in the region was a 63% in soybean and 14% in corn.

As concerns sale of farms, in the first quarter of fiscal year 2018 we consummated the sale of “La Esmeralda” farm, located in Santa Fe, for USD 19 million. Gain from this transaction will be recorded in the fourth quarter of fiscal year 2018, upon execution of the title deed.

After the end of the quarter, our subsidiary Brasilagro has sold a fraction of 956 hectares (660 productive) of the Araucaria farm for BRL 61.6 million. The result of this sale operation will be recognized in the fourth quarter of fiscal year 2018. We expect to concrete new farmland sales in the last quarter of FY 2018.

Our Portfolio

Our portfolio under management is composed of 764,666 hectares, of which 306,974 are in operation and 457,692 are land reserves distributed among the four countries in the region where we operate: Argentina, with a mixed model combining land development and agricultural production; Bolivia, with a productive model in Santa Cruz de la Sierra; and through our subsidiary BrasilAgro, Brazil and Paraguay, where the strategy is exclusively focused on the development of lands.

Land Development, Transformation and Sales

We periodically sell properties that have reached a considerable appraisal to reinvest in new farms with higher appreciation potential. We analyze the possibility of selling based on a number of factors, including the expected future yield of the farmland for continued agricultural and livestock exploitation, the availability of other investment opportunities and cyclical factors that have a bearing on the global values of farmlands.

3

During the first quarter of fiscal year 2018 we executed a preliminary agreement with an unrelated third party for the sale of the entire “La Esmeralda” farm, comprising 9,352 hectares intended for agriculture and cattle breeding, located in the District of 9 de Julio, Province of Santa Fe, Argentina. The total transaction amount was USD 19 million (USD 2,031 per hectare) of which USD 4 million (equivalent to Ps. 69) have been paid. The outstanding balance of USD 15 million will be collected as follows: USD 3 million upon execution of the title deed and surrender of possession in June 2018, and the balance (which is secured by a mortgage on the property) is payable in four equal instalments, the last one maturing in April 2022, accruing interest at 4% per annum over outstanding balances. The farm was booked at approximately ARS 52 million. The gain from the sale of “La Esmeralda” will be booked in the fourth quarter of fiscal year 2018.

In May 2018, our subsidiary Brasilagro has subscribed a purchase-sale ticket for the sale of a fraction of 956 hectares (660 productive) of the Araucaria field, located in the town of Mineiros, Brazil for a price of 1,208 bags of soybeans per hectare or BRL 61.6 million (BRL / ha 93,356). The result of this sale operation will be recognized in the fourth quarter of fiscal year 2018.

In view of this, no results from disposition of farmlands were recorded in the nine-month period of 2018, compared to a gain of ARS 93 million in the same period of 2017 resulting from the sale of “El Invierno” and “La Esperanza” farms, comprising 2,615 hectares intended for agriculture, located in the District of “Rancul”, Province of La Pampa.

Profit from this segment increased by ARS 259 million, from a profit of ARS 414 million for the nine-month period of FY 2017 to a profit of ARS 673 million for the same period of FY 2018. The higher result is explained by the ARS 510 million gain from Brazil due to the spin-off of Cresca (a society with Carlos Casado owner of a farm in Paraguay) partially offset by a lower profit on the result of changes in the fair value of the farms leased to third parties in Brazil for ARS 157.5 million and the impact in 9M17 of the ARS 93 million result from the sale of “El Invierno” and “La Esperanza”.

The result of the Grains activity increased ARS 428 million, from ARS 78 million loss during the nine-month period of the FY 2017 to ARS 350 million gain during the same period of the FY 2018, mainly as a result of:

A positive variation in the holding and sales result of ARS 350.1 million originated in Argentina, as a result of the profit that took place in the current period due to the increase in the prices of corn, soybean and wheat, while in the previous period there was a loss due to the adjustment of the prices of corn and soybeans after the price peak reached at the end of June 2016;

A higher income production result from Brazil and Argentina for ARS 285.7 million, product of:

a positive result from soybean in Brazil, originated in a larger harvested area and higher yields and prices and;

a gain in the expected results of corn and soybean in Argentina, determined mainly by higher prices and the increase in the exchange rate partially offset by lower yields;

A negative variation on commodities derivatives results of ARS 196.5 million originated mainly from soybean derivatives in Argentina and Brazil.

The result of the Sugar Cane activity increased by ARS 176 million, going from a profit of ARS 1 million in the first semester of the FY 2017 to a profit of ARS 177 million in the same period of the FY 2018. This is mainly due to higher production results mainly from Brazil as a result of a larger area given the acquisition of Sao Jose field, lower costs and better prices partially offset by lower yields.

During the nine-month period of FY 2018, we observed a result of ARS 20 million higher than in the same period of FY 2017. This is mainly due to a greater gain on the holding result originated in Brazil. The cattle stock as of March 31, 2018, excluding the diary activity that ceased in December 2017, increased by 27.6% (from 77 thousand to 98 thousand heads).

In December 2017 we decided to discontinue our dairy activity developed in the farm “El Tigre” in Argentina due to the adverse conditions of the sector. The result of the activity increased by ARS 11 million, going from a loss of ARS 8 million for the nine-month of the FY 2017 to a gain of ARS 3 million for the same period of the FY 2018. This was mainly due to the sale of the milking cows farm as a result of the ending of the activity.

Profit from this segment for the nine months of 2018 increased 90.6% as compared to the same period of the previous fiscal year, mainly due to an increase in leased hectares in Fazenda Jatobá and the addition of Fazenda Sao José in the first quarter of fiscal year 2018, boosted by the variation in the exchange rate.

III) Other Segments

We include within "Others" the results coming from our Agroindustrial activity, developed in our refrigeration plant in La Pampa and our investment in FyO.

The result of the "Others" segment increased by ARS 15 million, going from a loss of ARS 59 million for the nine months of fiscal year 2017 to a loss of ARS 44 million for the same period of 2018, mainly explained by

lower losses of ARS 9.3 million of our agro-industrial business due to an increase in sales to the foreign and domestic markets originated by the increase in slaughter levels and prices, higher reimbursements for exports and controlled costs and,

a positive result of our subsidiary Futures and Options (FyO) for ARS 2.5 million, mainly originated by the increase in the price of Agrofy shares, a company that continues to grow in Argentina as the main agricultural online platform.

IV) Corporate Segment

The result of the segment increased by ARS 3 million, going from a loss of ARS 66 million in the nine-month period of FY 2017 to a loss of ARS 63 million for the same period of FY 2018. This variation corresponds to an increase of the corporate administration expenses due to the inflationary context compensated with a 44% drop in the directors' fees.

Net Financial Debt (USD million)

Debt(1)	Amount
IDBD	737
DIC	963

(1)
Net Debt as of December 31, 2017 according to the companies Separate Statutory Financial Statements.

On September 28, 2017, DIC made a partial swap offer to the holders of series F bonds, proposing them to exchange such bonds for series J bonds. Series J has substantially different terms from those applicable to series F; therefore, a payment for series F was booked, and a new financial commitment at fair value was recorded in respect of series J. In addition, the previous debt (series F) had been recorded as of October 11, 2015 (IDBD's consolidation date) at its listing value as of such date with a discount over par. As a result of this swap, DIC recorded a loss equal to the difference between the amount repaid and the amount of the new debt, for approximately NIS 461 million (equivalent to approximately ARS 2,228 million as of such date) which was included under "Financial costs".

- (i) Maximum amount of the investment: Up to ARS 500,000,000.
- (ii) Maximum number of shares to be acquired: Up to 5% of the capital stock of the Company, as established by the applicable argentine laws and regulation, in the form of common shares or American Depositary Shares, percentage that is within the maximum limit of 10% of the Company's capital stock, in accordance with the provisions of the applicable regulations.

To make such a decision, the Board of Directors has taken into account that there is a notable difference between the fair value of the assets of the Company, determined by independent appraisers, and the market price of the shares on the market, which does not reflect the value or economic reality that they have today, resulting in detriment of the interests of the shareholders of the Company.

During the nine-month period ended March 31, 2018, the Company acquired 1,565,765 ordinary shares (V.N. ARS 1 per share) for a total of Ps. 66.99 million and 270,884 ADRs (representing 2,708,840 ordinary shares) for a total of US \$ 5.65 million, completing the terms and conditions of the share repurchase plan.

Febrero 2018: Spin Off CRESCA S.A.

In February 2018, the spin-off of the company CRESCA S.A., owner of a field of 116,894 hectares in Paraguay whose social capital was held by Brasilagro in a 50% and by Carlos Casado in the remaining 50%, was consummated. As a result of the spin-off, Brasilagro became the owner of 100% of the capital and the votes of Morotí Agropecuaria S.A., resulting company of the spin-off and owner of 59,600 hectares of that farm.

Prospects for the next quarter

We expect a 2018 campaign with agricultural productive results in line with those observed in 2017, average yields and controlled costs. In Argentina, an important drought was observed, more pronounced in the eastern part of the country, in the provinces of Entre Ríos, Santa Fe and Buenos Aires, reducing the expected production of soybean by 30% and corn by 22%. Cresud mitigated part of that effect since much of its production comes from the north of the country, where the effects of the lack of water were not severe. In Brazil and Paraguay, the campaign will end with very good production and high yields due to very good weather conditions, while in Bolivia, the conditions were more adverse due to excess rainfall.

In relation to the cattle activity, we will continue to focus our production in our own farms, mainly in the Northwest of the country controlling costs and with stabilized prices.

In terms of sales and land development, we hope to have the permits to increase the area under development since we have a large area of land reserves in the region with agricultural and / or cattle potential while we will continue selling the farms that have reached their maximum level of appreciation. We hope to be able to concrete new farmland sales during the last quarter of 2018.

In relation to our segment of urban properties and investments, we expect the real estate businesses from our subsidiary IRSA to maintain the solidity they demonstrated in the first nine months of the year in their two operations centers: Argentina and Israel.

We believe that companies like Cresud, with many years of experience and great knowledge of the sector, will have excellent opportunities to take advantage of the best opportunities in the market, especially considering that our main job is to produce food for a world population that grows and demands it.
