TEXTRON INC.

Notes to the Consolidated Financial Statements (Unaudited)

Note 1: Basis of Presentation

The consolidated interim financial statements included in this quarterly report should be read in conjunction with the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 30, 2006. In the opinion of management, the interim financial statements reflect all adjustments (consisting only of normal recurring adjustments) that are necessary for the fair presentation of our consolidated financial position, results of operations and cash flows for the interim periods presented. The results of operations for the interim periods are not necessarily indicative of the results to be expected for the full year.

Our financings are conducted through two separate borrowing groups. The Manufacturing group consists of Textron Inc., consolidated with the entities that operate in the Bell, Cessna and Industrial segments, while the Finance group consists of the Finance segment, comprised of Textron Financial Corporation and its subsidiaries. We designed this framework to enhance our borrowing power by separating the Finance group. Our Manufacturing group operations include the development, production and delivery of tangible goods and services, while our Finance group provides financial services. Due to the fundamental differences between each borrowing group's activities, investors, rating agencies and analysts use different measures to evaluate each group's performance. To support those evaluations, we present balance sheet and cash flow information for each borrowing group within the consolidated financial statements. All significant intercompany transactions are eliminated from the consolidated financial statements, including retail and wholesale financing activities for inventory sold by our Manufacturing group that is financed by our Finance group.

Note 2: Inventories

<i>(In millions)</i>	March 31, 2007	December 30, 2006
Finished goods	\$ 729	\$ 665
Work in process	1,719	1,562
Raw materials	445	435
	2,893	2,662
Less progress/milestone payments	551	593
	\$ 2,342	\$ 2,069

Note 3: Finance Receivables

In the first quarter of 2007, we adopted Financial Accounting Standards Board ("FASB") Staff Position No. 13-2 "Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction" ("FSP 13-2"). FSP 13-2 requires a recalculation of returns on leveraged leases if there is a change or projected change in the timing of cash flows related to income taxes generated by the leveraged leases. The impact of any estimated change in projected cash flows must be reported as an adjustment to the net leveraged lease investment and retained earnings at the date of adoption. Our Finance group has leveraged leases with an initial investment balance of \$209 million that we estimate could be impacted by changes in the timing of cash flows related to income taxes. Upon the adoption, we reduced retained earnings for the \$33 million cumulative effect of a change in accounting principle, and reduced our investment in these leveraged leases by \$50 million and deferred income tax liabilities by \$17 million.

7.

Note 4: Comprehensive Income

Our comprehensive income for the periods is provided below:

<i>(In millions)</i>	Three Months Ended	
	March 31, 2007	April 1, 2006
Net income	\$ 196	\$ 168
Other comprehensive income:		
Recognition of prior service cost and unrealized losses on pension and postretirement benefits	15	-
Other	(2)	1
Comprehensive income	\$ 209	\$ 169

Note 5: Earnings per Share

We calculate basic and diluted earnings per share based on income available to common shareholders, which approximates net income for each period. We use the weighted-average number of common shares outstanding during the period for the computation of basic earnings per share. Diluted earnings per share includes the dilutive effect of convertible preferred shares, stock options and restricted stock in the weighted-average number of common shares outstanding.

The weighted-average shares outstanding for basic and diluted earnings per share are as follows:

<i>(In thousands)</i>	Three Months Ended	
	March 31, 2007	April 1, 2006
Basic weighted-average shares outstanding	125,047	130,093
Dilutive effect of convertible preferred shares, stock options and restricted stock	2,390	2,763
Diluted weighted-average shares outstanding	127,437	132,856

Note 6: Share-Based Compensation

The compensation expense we recorded in net income for our share-based compensation plans is as follows:

<i>(In millions)</i>	Three Months Ended	
	March 31, 2007	April 1, 2006
Compensation expense, net of hedge income or expense	\$ 13	\$ 22
Income tax benefit	(2)	(13)
Total net compensation cost included in net income	\$ 11	\$ 9
Net compensation costs included in discontinued operations	-	1
Net compensation costs included in continuing operations	\$ 11	\$ 8

8.

Stock Options

The stock option compensation cost calculated under the fair value approach is recognized over the vesting period of the stock options. The weighted-average fair value of options granted per share was \$28 and \$25 in the first quarter of 2007 and 2006, respectively. We estimate the fair value of options granted on the date of grant using the Black-Scholes option-pricing model. Expected volatilities are based on implied volatilities from traded options on our common stock, historical volatilities and other factors. We use historical data to estimate option exercise behavior, adjusted to reflect anticipated increases in expected life.

The weighted-average assumptions used in our Black-Scholes option-pricing model for awards issued during the respective periods are as follows:

Three Months Ended	
March 31,	April 1,

Edgar Filing: TEXTRON INC - Form 10-Q

	2007	2006
Dividend yield	2%	2%
Expected volatility	30%	25%
Risk-free interest rate	5%	4%
Expected lives (In years)	5.5	6.0

Stock option activity under the 1999 Long-Term Incentive Plan ("Plan") during the three months ended March 31, 2007 is as follows:

	Number of Options (In thousands)	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Life (In years)	Aggregate Intrinsic Value (In millions)
Outstanding at beginning of year	5,420	\$ 63.77		
Granted	924	91.70		
Exercised	(452)	57.43		
Canceled, expired or forfeited	(54)	76.37		
Outstanding at end of period	5,838	\$ 68.57	6.56	\$ 125
Exercisable at end of period	3,972	\$ 59.65	5.31	\$ 119

Restricted Stock

The fair value of restricted stock is based on the trading price of our common stock on the date of grant, less required adjustments to reflect the fair value of the award, as dividends are not paid or accrued until the restricted stock vests. The weighted-average grant-date fair value of restricted stock granted in the three months ended March 31, 2007 and April 1, 2006 was approximately \$86 and \$82 per share, respectively.

9.

Restricted stock activity under the Plan during the three months ended March 31, 2007 is as follows:

(Shares in thousands)	Number of Shares	Weighted-Average Grant-Date Fair Value
Outstanding at beginning of year, nonvested	1,219	\$ 65.38
Granted	305	86.08
Vested	(92)	56.32
Forfeited	(42)	60.32
Outstanding at end of period, nonvested	1,390	\$ 70.67

Share-Based Compensation Awards

The value of the share-based compensation awards that vested and/or were paid during the respective periods is as follows:

(In millions)	Three Months Ended March 31, 2007	April 1, 2006

Subject only to service conditions:			
Value of shares, options or units vested	\$	25	\$ 17
Intrinsic value of cash awards paid	\$	4	\$ 5
Subject to performance vesting conditions:			
Value of units vested	\$	-	\$ -
Intrinsic value of cash awards paid	\$	42	\$ 35
Intrinsic value of amounts paid under Deferred Income Plan	\$	2	\$ 1

Note 7: Retirement Plans

We provide defined benefit pension plans and other postretirement benefits to eligible employees. The components of net periodic benefit cost for these plans for the three months ended March 31, 2007 and April 1, 2006 are as follows:

<i>(In millions)</i>	Pension Benefits		Postretirement Benefits Other Than Pensions	
	2007	2006	2007	2006
Service cost	\$ 33	\$ 35	\$ 2	\$ 2
Interest cost	73	69	10	10
Expected return on plan assets	(99)	(96)	-	-
Amortization of prior service cost (credit)	4	5	(1)	(1)
Amortization of net loss	13	12	6	6
Net periodic benefit cost	\$ 24	\$ 25	\$ 17	\$ 17

Note 8: Income Taxes

We adopted the provisions of FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - An Interpretation of FASB Statement No. 109" ("FIN 48") at the beginning of fiscal 2007, which resulted in an increase of approximately \$22 million to our December 31, 2006 retained earnings balance. FIN 48 provides a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions taken or expected to be taken in income tax returns. Unrecognized tax benefits represent tax positions for which reserves have been established.

10.

As of the date of adoption, our unrecognized tax benefits totaled approximately \$356 million, of which \$225 million in benefits, if recognized, would favorably affect our effective tax rate in any future period. The remaining \$131 million in unrecognized tax benefits are related to discontinued operations. We do not believe that it is reasonably possible that our estimates of unrecognized tax benefits will change significantly in the next 12 months.

We conduct business globally and, as a result, file numerous consolidated and separate income tax returns in the U.S. federal jurisdiction and various state and foreign jurisdictions. In the normal course of business, we are subject to examination by taxing authorities throughout the world, including such major jurisdictions as Belgium, Canada, Germany, the United Kingdom and the U.S. With few exceptions, we are no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations for years before 1997 in these major jurisdictions.

We recognize interest and penalties related to unrecognized tax benefits in income tax expense in our consolidated statements of operations. At the date of adoption, we had \$77 million of accrued interest included in other liabilities on our consolidated balance sheet.

Note 9: Commitments and Contingencies

We are subject to legal proceedings and other claims arising out of the conduct of our business, including proceedings and claims relating to private sector transactions; government contracts; compliance with applicable laws and regulations; production partners; product liability; employment; and environmental, safety and health matters. Some of these legal proceedings and claims seek damages, fines or penalties in substantial amounts or remediation of environmental contamination. As a government contractor, we are subject to audits, reviews and investigations to determine whether our operations are being conducted in accordance with applicable regulatory requirements. Under federal government procurement regulations, certain claims brought by the U.S. Government could result in our being suspended or debarred from U.S. Government contracting for a period of time. On the basis of information presently available, we do not believe that existing proceedings and claims will have a material effect on our financial position or results of operations.

In connection with the 2002 recall of certain of our Lycoming turbocharged airplane engines, a former third-party supplier filed a lawsuit against Lycoming claiming that the former supplier had been wrongly blamed for aircraft engine failures resulting from its crankshaft forging process and that Lycoming's design was the cause of the engine failures. In February 2005, a jury returned a verdict against Lycoming for \$86 million in punitive damages, \$2.7 million in expert fees and \$1.7 million in increased insurance costs. The jury also found that the former supplier's claim that it had incurred \$5.3 million in attorneys' fees was reasonable. Judgment was entered on the verdict on March 29, 2005, awarding the former supplier \$9.7 million in alleged compensatory damages and attorneys' fees and \$86 million in alleged punitive damages. While the ultimate outcome of the litigation cannot be assured, management strongly disagrees with the verdict and believes that it is probable that the verdict will be reversed through the appellate process.

The Internal Revenue Service ("IRS") has challenged both the ability to accelerate the timing of tax deductions and the amounts of those deductions related to certain leveraged lease transactions within the Finance segment. These transactions, along with other transactions with similar characteristics, have an initial investment of approximately \$209 million. Resolution of these issues may result in an adjustment to the timing of taxable income and deductions that reduce the effective yield of the leveraged lease transactions. In addition, resolution of these issues could result in the acceleration of cash payments to the IRS. Deferred tax liabilities of \$164 million are recorded on our consolidated balance sheet related to these leases at March 31, 2007. We believe that the proposed IRS adjustments are inconsistent with the tax law in existence at the time the leases were originated and intend to vigorously defend our position.

11.

Armed Reconnaissance Helicopter Program

Bell Helicopter is performing under a U.S. Government contract for System Development and Demonstration ("SDD") of the Armed Reconnaissance Helicopter ("ARH"). In the fourth quarter of 2006, we completed certain phases of the critical design review under the ARH SDD contract and determined the initial production configuration of the aircraft, which included aircraft configuration changes required by the U.S. Government. At the end of 2006, our cost estimates based on this configuration exceeded the fixed pricing contained in the two options the U.S. Government had under this program resulting in a reasonably possible exposure in the range of no loss to a possible loss of \$4 million per aircraft. During the first quarter of 2007, the option for the first production lot (for 6-12 aircraft) expired, while the option for the second lot (for 18-36 aircraft) will expire in December 2007. Certain additional development requirements under the ARH SDD contract must be met before the U.S. Government can exercise the remaining option. Based on the program status at the end of the first quarter, we do not believe it is likely that the option for the second lot, as currently configured, would be exercised by the U.S. Government.

In March, 2007, we received correspondence from the U.S. Government which required that we provide, by April 23, 2007, a written plan describing a strategy to maximize contract performance, while minimizing negative cost and schedule impact to the U.S. Government. The correspondence also indicated specific limitations of government funding on the ARH SDD contract, but allowed us to continue program development efforts at our risk if we so chose.

12

The U.S. Government has indicated that after review of our plan, it will make a decision to either continue with ARH SDD development, or terminate the contract. We are committed to the ARH program, and believe that the U.S. Government will continue with the program.

Although not contractually obligated to do so, we have continued to work under the ARH SDD contract, as well as efforts to secure long-lead materials for the anticipated production aircraft, at our risk. At March 31, 2007, our costs incurred and supplier obligations related to the ARH program in excess of contract funding are estimated to be approximately \$25 million, which have been expensed in the first quarter of 2007. We expect to continue to expense development costs and supplier obligations until discussions with the U.S. Government are resolved, because recovery of these amounts cannot be assured at this time.

Should the U.S. Government choose to continue with the ARH program, production aircraft requirements may be changed under a new or modified contract to include revised aircraft specifications, pricing and delivery schedules. We cannot determine the impact of such changes until discussions with the U.S. Government are resolved. Alternatively, should the U.S. Government choose to terminate the ARH program, we would incur additional costs specifically related to the termination. The timing and amount of these costs and their recoverability would depend on the nature of the termination and costs incurred.

Note 10: Guarantees and Indemnifications

As disclosed under the caption "Guarantees and Indemnifications" in Note 17 to the consolidated financial statements in Textron's 2006 Annual Report on Form 10-K, Textron has issued or is party to certain guarantees. As of March 31, 2007, there has been no material change to these guarantees.

We provide limited warranty and product maintenance programs, including parts and labor, for certain products for periods ranging from one to five years. We estimate the costs that may be incurred under warranty programs and record a liability in the amount of such costs at the time product revenue is recognized. Factors that affect this liability include the number of products sold, historical and anticipated rates of warranty claims, and cost per claim. We assess the adequacy of our recorded warranty and product maintenance liabilities periodically and adjust the amounts as necessary.

12.

Changes in our warranty and product maintenance liabilities are as follows:

<i>(In millions)</i>	Three Months Ended	
	March 31, 2007	April 1, 2006
Accrual at the beginning of period	\$ 315	\$ 318
Provision	45	50
Settlements	(46)	(43)
Adjustments to prior accrual estimates	6	(10)
Accrual at the end of period	\$ 320	\$ 315

Note 11: Recently Announced Accounting Pronouncements

In September 2006, the FASB issued Statement of Financial Accounting Standards ("SFAS") No. 157, "Fair Value Measurements." This Statement replaces multiple existing definitions of fair value with a single definition, establishes a consistent framework for measuring fair value and expands financial statement disclosures regarding fair value measurements. This Statement applies only to fair value measurements that already are required or permitted by other accounting standards and does not require any new fair value measurements. SFAS No. 157 is effective for the first

quarter of 2008, and we currently are evaluating the impact of adoption on our financial position and results of operations.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities - Including an amendment to FASB Statement No. 115." SFAS 159 allows companies to choose to measure eligible assets and liabilities at fair value with changes in value recognized in earnings. Fair value treatment for eligible assets and liabilities may be elected either prospectively upon initial recognition, or if an event triggers a new basis of accounting for an existing asset or liability. SFAS 159 is effective in the first quarter of 2008, and we currently are evaluating the impact of adoption on our financial position and results of operations.

Note 12: Segment Information

Our four reportable segments are: Bell, Cessna, Industrial and Finance. These segments reflect the manner in which we manage our operations. Segment profit is an important measure used to evaluate performance and for decision-making purposes. Segment profit for the manufacturing segments excludes interest expense, certain corporate expenses and special charges. The measurement for the Finance segment includes interest income and expense and excludes special charges. Provisions for losses on finance receivables involving the sale or lease of our products are recorded by the selling manufacturing division when our Finance group has recourse to the Manufacturing group.

13.

Our revenues by segment and a reconciliation of segment profit to income from continuing operations before income taxes are as follows:

<i>(In millions)</i>	Three Months Ended	
	March 31, 2007	April 1, 2006

Income from continuing operations before income taxes	\$ 284	\$ 213

14.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Consolidated Results of Operations

Business Overview

In the first quarter, we continued to realize the benefits of our focus to drive revenue growth and improve operational efficiencies as earnings per share from continuing operations increased 30% to \$1.55 compared to the corresponding quarter of 2006. Revenues were \$3 billion, a 13% increase over the first quarter of last year as each of our segments reported higher revenues, while organic revenue growth (sales from existing business, excluding the effects of foreign exchange and mergers and acquisition activity) was nearly 11%.

Our revenue growth was largely due to a favorable mix of Citation business jets at Cessna and higher armored security vehicle ("ASV") deliveries in the Bell segment. Increased revenues in the Industrial segment reflected higher volume at Kautex and increased European volume in Greenlee's electrical tools business. Finance revenues benefited from an increase of about \$500 million in managed receivables since the end of last year. Earnings increased due to the impact of the higher revenues and our improved operating performance, which drove the increase in earnings per share. Additionally, the number of diluted weighted-average shares outstanding has decreased by 5.4 million shares compared to the shares outstanding in the corresponding quarter of 2006, primarily due to our share repurchase program. This decrease in the share base outstanding contributed \$0.06 of the earnings per share growth in the current quarter.

Backlog in the Cessna and Bell Helicopter businesses grew to nearly \$12 billion in the first quarter largely due to an increase of approximately \$500 million at Cessna, as new business jet orders outpaced deliveries by nearly two to one. The continued strength in Citation orders gives us confidence in the sustainability of this market cycle.

Revenues

In the first quarter of 2007, our revenues increased \$332 million compared with the corresponding quarter in 2006 primarily due to higher manufacturing sales volume and product mix of \$157 million, higher pricing of \$71 million, favorable foreign exchange impact of \$35 million in the Industrial segment, the reimbursement of costs related to Hurricane Katrina of \$28 million and the benefit from acquisitions of \$27 million, largely due to Overwatch Systems. Additionally, revenues in our Finance segment increased \$28 million. These increases were partially offset by the 2006 divestiture of non-core product lines of \$16 million in the Industrial segment.

Segment Profit

Our segment profit increased \$74 million in the first quarter of 2007, compared with the corresponding quarter in 2006, primarily due to higher pricing of \$71 million, favorable cost performance of \$43 million and the net benefit from higher volume and product mix of \$14 million, partially offset by inflation of \$50 million.

15.

Income Taxes

A reconciliation of the federal statutory income tax rate to the effective income tax rate is provided below:

	Three Months Ended	
	March 31, 2007	April 1, 2006
Federal statutory income tax rate	35.0%	35.0%
Increase (decrease) in taxes resulting from:		
State income taxes	0.7	1.6
Foreign tax rate differential	(2.1)	(3.1)
Manufacturing deduction	(1.4)	(0.5)
Export sales benefit	-	(1.1)
Canadian functional currency	(0.5)	-
Favorable tax settlements	-	(5.6)
Other, net	(1.4)	(0.5)
Effective income tax rate	30.3%	25.8%

Segment Analysis

Our four reportable segments are: Bell, Cessna, Industrial and Finance. These segments reflect the manner in which we manage our operations. Segment profit is an important measure used to evaluate performance and for decision-making purposes. Segment profit for the manufacturing segments excludes interest expense, certain corporate expenses and special charges. The measurement for the Finance segment includes interest income and expense and excludes special charges.

Bell

<i>(In millions)</i>	Three Months Ended	
	March 31, 2007	April 1, 2006
Revenues	\$ 939	\$ 783
Segment profit	91	69

Revenues

U.S. Government Business

In the first quarter of 2007, revenues increased \$129 million, compared with 2006 primarily due to higher net volume and mix of \$87 million, the reimbursement of costs related to Hurricane Katrina of \$28 million and the benefit from acquisitions of \$16 million. The volume increase is primarily due to higher ASV deliveries of \$63 million, higher H-1 revenue of \$52 million and higher Intelligent Battlefield Systems volume of \$15 million, partially offset by lower volume of \$27 million for Joint Direct Attack Munition and Sensor Fuzed Weapon products and \$16 million in lower helicopter spares and service sales.

Commercial Business

In the first quarter of 2007, commercial revenues increased \$27 million, compared with 2006 primarily due to higher pricing of \$19 million and the benefit from acquisitions of \$11 million. Our commercial business volume was slightly lower as the impact of lower Huey II kit deliveries of \$22 million was largely offset by higher volume of commercial helicopters of \$13 million and other commercial deliveries of \$6 million.

16.

Segment Profit

U.S. Government Business

In the first quarter of 2007, profit in our U.S. Government business increased \$12 million, compared with 2006. The increase was primarily due to improved performance of \$14 million and the impact from the higher net volume and

mix of \$7 million, partially offset by the unfavorable impact from inflation and pricing of \$6 million. The favorable performance reflected the Hurricane Katrina cost reimbursement of \$28 million and lower charges of \$8 million recorded on the H-1 program, partially offset by higher charges recorded for the Armed Reconnaissance Helicopter (“ARH”) program of \$22 million due to a \$25 million charge in 2007 and lower V-22 profitability of \$8 million.

Bell Helicopter is performing under a U.S. Government contract for System Development and Demonstration (“SDD”) of the ARH. In the fourth quarter of 2006, we completed certain phases of the critical design review under the ARH SDD contract and determined the initial production configuration of the aircraft, which included aircraft configuration changes required by the U.S. Government. At the end of 2006, our cost estimates based on this configuration exceeded the fixed pricing contained in the two options the U.S. Government had under this program resulting in a reasonably possible exposure in the range of no loss to a possible loss of \$4 million per aircraft. During the first quarter of 2007, the option for the first production lot (for 6-12 aircraft) expired, while the option for the second lot (for 18-36 aircraft) will expire in December 2007. Certain additional development requirements under the ARH SDD contract must be met before the U.S. Government can exercise the remaining option. Based on the program status at the end of the first quarter, we do not believe it is likely that the option for the second lot, as currently configured, would be exercised by the U.S. Government.

In March, 2007, we received correspondence from the U.S. Government which required that we provide, by April 23, 2007, a written plan describing a strategy to maximize contract performance, while minimizing negative cost and schedule impact to the U.S. Government. The correspondence also indicated specific limitations of government funding on the ARH SDD contract, but allowed us to continue program development efforts at our risk if we so chose. The U.S. Government has indicated that after review of our plan, it will make a decision to either continue with ARH SDD development, or terminate the contract. We are committed to the ARH program, and believe that the U.S. Government will continue with the program.

Although not contractually obligated to do so, we have continued to work under the ARH SDD contract, as well as efforts to secure long-lead materials for the anticipated production aircraft, at our risk. At March 31, 2007, our costs incurred and supplier obligations related to the ARH program in excess of contract funding are estimated to be approximately \$25 million, which have been expensed in the first quarter of 2007. We expect to continue to expense development costs and supplier obligations until discussions with the U.S. Government are resolved, because recovery of these amounts cannot be assured at this time.

Should the U.S. Government choose to continue with the ARH program, production aircraft requirements may be changed under a new or modified contract to include revised aircraft specifications, pricing and delivery schedules. We cannot determine the impact of such changes until discussions with the U.S. Government are resolved. Alternatively, should the U. S. Government choose to terminate the ARH program, we would incur additional costs specifically related to the termination. The timing and amount of these costs and their recoverability would depend on the nature of the termination and costs incurred.

Commercial Business

In the first quarter of 2007, commercial profit increased \$10 million, compared with 2006 primarily due to higher pricing of \$19 million and favorable cost performance of \$7 million, partially offset by the net impact of lower volume and an unfavorable product mix of \$12 million and inflation of \$9 million.

<i>(In millions)</i>	March 31, 2007	April 1, 2006
Revenues	\$ 968	\$ 869
Segment profit	155	117

Revenues

Revenues at Cessna increased \$99 million in the first quarter of 2007, compared with 2006 due to favorable Citation jet mix of \$63 million and pricing of \$44 million. We delivered 67 Citation business jets in both the first quarter of 2007 and 2006.

Segment Profit

Segment profit increased \$38 million at Cessna in the first quarter of 2007, compared with 2006 primarily due to higher pricing of \$44 million and the impact of favorable product mix of \$17 million, partially offset by inflation of \$18 million and increased product development expenses of \$7 million.

Industrial

<i>(In millions)</i>	Three Months Ended	
	March 31, 2007	April 1, 2006
Revenues	\$ 847	\$ 798
Segment profit	60	49

Revenues

Revenues in the Industrial segment increased \$49 million in the first quarter of 2007, compared with 2006 primarily due to favorable foreign exchange impact of \$35 million, higher volume of \$18 million and higher pricing of \$10 million, partially offset by the divestiture of non-core product lines of \$16 million.

Segment Profit

Segment profit in the Industrial segment increased \$11 million in the first quarter of 2007, compared with 2006 mainly due to \$19 million of improved cost performance and higher pricing of \$10 million, partially offset by \$19 million of inflation.

Finance

<i>(In millions)</i>	Three Months Ended	
	March 31, 2007	April 1, 2006
Revenues	\$ 210	\$ 182
Segment profit	52	49

Revenues

Revenues in the Finance segment increased \$28 million in the first quarter of 2007, compared with 2006. The increase was primarily due to a \$33 million increase related to higher average finance receivables and an \$11 million increase from a higher interest rate environment, partially offset by \$11 million in lower leveraged lease earnings due to an unfavorable cumulative earnings adjustment attributable to the recognition of a residual value impairment. Average finance receivables increased primarily due to growth in the distribution and aviation finance businesses.

18.

Segment Profit

18

Segment profit in the Finance segment increased \$3 million in the first quarter of 2007, compared with 2006 primarily due to a benefit from higher average finance receivables of \$16 million, partially offset by \$11 million in lower leveraged lease earnings due to an unfavorable cumulative earnings adjustment attributable to the recognition of a residual value impairment.

The following table presents information about the Finance segment's portfolio quality:

<i>(Dollars in millions)</i>	March 31, 2007	December 30, 2006
Nonperforming assets	\$ 116	\$ 113
Ratio of nonperforming assets to total finance assets	1.32%	1.28%
Ratio of allowance for losses on receivables to nonaccrual finance receivables	123.2%	123.1%
60+ days contractual delinquency as a percentage of finance receivables	0.80%	0.77%

The Finance segment has continued to sustain favorable portfolio quality. Net charge-offs for the first quarter of 2007 totaled \$4 million compared with \$5 million in the corresponding period of 2006.

Liquidity and Capital Resources

Our financings are conducted through two separate borrowing groups. The Manufacturing group consists of Textron Inc., consolidated with the entities that operate in the Bell, Cessna and Industrial segments, while the Finance group consists of the Finance segment, comprised of Textron Financial Corporation and its subsidiaries. We designed this framework to enhance our borrowing power by separating the Finance group. Our Manufacturing group operations include the development, production and delivery of tangible goods and services, while our Finance group provides financial services. Due to the fundamental differences between each borrowing group's activities, investors, rating agencies and analysts use different measures to evaluate each group's performance. To support those evaluations, we present balance sheet and cash flow information for each borrowing group within the consolidated financial statements.

Through our Finance group, we provide diversified commercial financing to third parties. In addition, this group finances retail purchases and leases for new and used aircraft and equipment manufactured by our Manufacturing group, otherwise known as captive financing. In the consolidated statements of cash flows, cash received from customers or from securitizations is reflected as operating activities when received. However, in the cash flow information provided for the separate borrowing groups, cash flows related to captive financing activities are reflected based on the operations of each group. For example, when product is sold by our Manufacturing group to a customer that is financed by the Finance group, the origination of the finance receivable is recorded within investing activities as a cash outflow on our Finance group's statement of cash flows. Meanwhile, the Manufacturing group records the cash received from the Finance group on the customer's behalf within operating cash flows as a cash inflow on our Manufacturing group's statement of cash flows. Although cash is transferred between the two borrowing groups, there is no cash transaction reported in the consolidated cash flows at the time of the original financing. These captive financing activities, along with all significant intercompany transactions, are reclassified or eliminated from the consolidated statements of cash flows, as detailed below in the operating cash flows of continuing operations section.

The debt (net of cash)-to-capital ratio for our Manufacturing group as of March 31, 2007 was 32%, compared with 29% at December 30, 2006, and the gross debt-to-capital ratio was 40% at both March 31, 2007 and December 30, 2006. Our Manufacturing group targets a gross debt-to-capital ratio that is consistent with an A rated company.

Edgar Filing: TEXTRON INC - Form 10-Q

We have a policy of maintaining unused committed bank lines of credit in an amount not less than outstanding commercial paper balances. These facilities are in support of commercial paper and letters of credit issuances only, and neither of these primary lines of credit was drawn at March 31, 2007 or December 30, 2006.

Our primary committed credit facilities at March 31, 2007 include the following:

<i>(In millions)</i>	Facility Amount	Commercial Paper Outstanding	Letters of Credit Outstanding	Amount Not Reserved as Support for Commercial Paper and Letters of Credit
Manufacturing group - multi-year facility expiring in 2011*	\$ 1,250	\$ -	\$ 19	\$ 1,231
Finance group - multi-year facility expiring in 2011	\$ 1,750	\$ 1,035	\$ 12	\$ 703

*The Finance group is permitted to borrow under this multi-year facility.

Both of these facilities were amended in April 2007, and the expiration dates were extended by one year to 2012.

At March 31, 2007, our Finance group had \$2.6 billion in debt and \$432 million in other liabilities that are payable within the next 12 months.

Operating Cash Flows of Continuing Operations

<i>(In millions)</i>	Three Months Ended	
	March 31, 2007	April 1, 2006
Manufacturing group	\$ 86	\$ 128
Finance group	69	100
Reclassifications and elimination adjustments	(220)	(151)
Consolidated	\$ (65)	\$ 77

Our consolidated operating cash flows decreased in the first quarter of 2007 compared with the first quarter of 2006 primarily due to the timing of payments of accounts payable for the Manufacturing group and accrued interest for the Finance group, as well as increased inventory levels to support continued growth in our Cessna and Bell Helicopter businesses.

Reclassifications between operating and investing cash flows and eliminations adjustments for the quarters are summarized below:

<i>(In millions)</i>	Three Months Ended	
	March 31, 2007	April 1, 2006
Reclassifications from investing activities:		
Finance receivable originations for Manufacturing group		
inventory sales	\$ (225)	\$ (228)
Cash received from customers and securitizations for captive financing	151	155
Other	(11)	(16)
Total reclassifications from investing activities	(85)	(89)
Dividends paid by Finance group to Manufacturing group	(135)	(62)
Total reclassifications and adjustments	\$ (220)	\$ (151)

In the first quarter of 2007, the Finance group increased the dividends it paid to the Manufacturing group by \$73 million, compared to the corresponding quarter in 2006. The payment of these dividends represents the distribution of the Finance group's retained earnings to achieve its targeted leverage ratio.

Investing Cash Flows of Continuing Operations

<i>(In millions)</i>	Three Months Ended	
	March 31, 2007	April 1, 2006
Manufacturing group	\$ (58)	\$ (59)
Finance group	(28)	(488)
Reclassifications to operating activities	85	89
Consolidated	\$ (1)	\$ (458)

Our consolidated investing cash flows increased largely due to proceeds received from the incremental securitization of \$588 million in distribution finance receivables, partially offset by a net increase of \$120 million in finance receivable originations, net of collections.

Financing Cash Flows of Continuing Operations

<i>(In millions)</i>	Three Months Ended	
	March 31, 2007	April 1, 2006
Manufacturing group	\$ (237)	\$ (293)
Finance group	(40)	388
Dividends paid by Finance group to Manufacturing group	135	62
Consolidated	\$ (142)	\$ 157

The decrease in our consolidated financing cash flows during the first quarter of 2007 is due primarily to a reduction in short-term debt issuances, net of repayments, of \$589 million, partially offset by an increase in proceeds from the issuance of long-term debt by the Finance group of \$318 million. The reduction in short-term debt issuances was primarily related to the Finance group where the proceeds from receivable sales and securitizations were used to fund receivable originations during the first quarter of 2007.

Stock Repurchases

In the first quarter of 2007 and 2006, we repurchased 1,762,592 and 2,576,572 shares of common stock, respectively, under Board-authorized share repurchase programs for an aggregate cost of \$164 million and \$219 million, respectively.

Dividends

Our Board of Directors approved a quarterly dividend of \$0.3875 in the first quarter of 2007 and 2006. We made dividend payments to shareholders of \$49 million in the first quarter of 2007, compared with \$97 million in the first quarter of 2006. The decrease in dividend payments reflects the fourth quarter 2005 dividend that was paid in the first quarter of 2006, while the fourth quarter 2006 dividend was paid in the fourth quarter.

Capital Resources

Under a shelf registration statement previously filed with the Securities and Exchange Commission, our Manufacturing group may issue public debt and other securities in one or more offerings up to a total maximum offering of \$2.0 billion. At March 31, 2007, we had \$1.6 billion available under this registration statement.

Under a previously filed registration statement, the Finance group may issue an unlimited amount of public debt. Our Finance group issued \$530 million of term debt and CAD 60 million of term debt during the first quarter of 2007 under this registration statement. We used the proceeds from these issuances to fund receivable growth and repay short-term debt. In addition, during the first quarter of 2007, the Finance group issued \$300 million of 6%

21.

Fixed-to-Floating Rate Junior Subordinated Notes, which mature on February 15, 2067. The Finance group has the right to redeem the notes at par on or after February 15, 2017, and is obligated to redeem the notes beginning on February 15, 2042, the redemption of which must be made from the sale of certain replacement capital securities or a capital contribution from Textron.

Foreign Exchange Risks

Our financial results are affected by changes in foreign currency exchange rates and economic conditions in the foreign markets in which our products are manufactured and/or sold. For the first quarter of 2007, the impact of foreign exchange rate changes from the first quarter of 2006 increased revenues by approximately \$35 million (1.3%) and increased segment profit by approximately \$2 million (0.6%).

Recently Announced Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (“FASB”) issued Statement of Financial Accounting Standards (“SFAS”) No. 157, “Fair Value Measurements.” This Statement replaces multiple existing definitions of fair value with a single definition, establishes a consistent framework for measuring fair value and expands financial statement disclosures regarding fair value measurements. This Statement applies only to fair value measurements that already are required or permitted by other accounting standards and does not require any new fair value measurements. SFAS No. 157 is effective for the first quarter of 2008, and we currently are evaluating the impact of adoption on our financial position and results of operations.

In February 2007, the FASB issued SFAS No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities - Including an amendment to FASB Statement No. 115.” SFAS 159 allows companies to choose to measure eligible assets and liabilities at fair value with changes in value recognized in earnings. Fair value treatment for eligible assets and liabilities may be elected either prospectively upon initial recognition, or if an event triggers a new basis of accounting for an existing asset or liability. SFAS 159 is effective in the first quarter of 2008, and we currently are evaluating the impact of adoption on our financial position and results of operations.

Forward-Looking Information

Certain statements in this Quarterly Report on Form 10-Q and other oral and written statements made by Textron from time to time are forward-looking statements, including those that discuss strategies, goals, outlook or other non-historical matters; or project revenues, income, returns or other financial measures. These forward-looking statements speak only as of the date on which they are made, and we undertake no obligation to update or revise any forward-looking statements. These forward-looking statements are subject to risks and uncertainties that may cause actual results to differ materially from those contained in the statements, including the following: [a] changes in worldwide economic and political conditions that impact demand for our products, interest rates and foreign exchange rates; [b] the interruption of production at Textron facilities or Textron’s customers or suppliers; [c] Textron’s ability to perform as anticipated and to control costs under contracts with the U.S. Government; [d] the U.S. Government’s ability to unilaterally modify or terminate its contracts with Textron for the U.S. Government’s convenience or for Textron’s failure to perform, to change applicable procurement and accounting policies, and, under certain circumstances, to suspend or debar Textron as a contractor eligible to receive future contract awards; [e] changes in national or international funding priorities and government policies on the export and import of

military and commercial products; [f] the ability to control costs and successful implementation of various cost-reduction programs; [g] the timing of new product launches and certifications of new aircraft products; [h] the occurrence of slowdowns or downturns in customer markets in which Textron products are sold or supplied or where Textron Financial Corporation offers financing; [i] changes in aircraft delivery schedules or cancellation of orders; [j] the impact of changes in tax legislation; [k] the extent to which Textron is able to pass raw material price increases through to customers or offset such price increases by reducing other costs; [l] Textron's ability to offset, through cost reductions, pricing pressure brought by original equipment manufacturer customers; [m] Textron's ability to realize full value of receivables; [n] the availability and cost of insurance; [o] increases in pension expenses and other postretirement employee

22.

costs; [p] Textron Financial Corporation's ability to maintain portfolio credit quality; [q] Textron Financial Corporation's access to debt financing at competitive rates; [r] uncertainty in estimating contingent liabilities and establishing reserves to address such contingencies; [s] performance of acquisitions; [t] the efficacy of research and development investments to develop new products; [u] the launching of significant new products or programs which could result in unanticipated expenses; and [v] bankruptcy or other financial problems at major suppliers or customers that could cause disruptions in Textron's supply chain or difficulty in collecting amounts owed by such customers.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There has been no significant change in our exposure to market risk during the first quarter of 2007. For discussion of our exposure to market risk, refer to Item 7A. Quantitative and Qualitative Disclosures about Market Risk contained in Textron's 2006 Annual Report on Form 10-K.

Item 4. CONTROLS AND PROCEDURES

We have carried out an evaluation, under the supervision and with the participation of our management, including our Chairman, President and Chief Executive Officer (the "CEO") and our Executive Vice President and Chief Financial Officer (the "CFO"), of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Act")) as of the end of the fiscal quarter covered by this report. Based upon that evaluation, our CEO and CFO concluded that our disclosure controls and procedures are effective in providing reasonable assurance that (a) the information required to be disclosed by us in the reports that we file or submit under the Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and (b) such information is accumulated and communicated to our management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in our internal control over financial reporting during the fiscal quarter ended March 31, 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

23.

Month 3 (March 4, 2007 - March 31, 2007)	480,000	\$ 90.48	480,000	2,625,208
Total	1,762,592	\$ 93.10	1,762,592	

On January 26, 2006, Textron's Board approved a new share repurchase plan under which Textron is authorized to repurchase up to 12 million shares of common stock. The new plan has no expiration date.

On March 1, 2007, Textron issued 1,000 shares of its Common Stock to James L. Ziemer upon his joining Textron's Board of Directors pursuant to Textron's practice of issuing 1,000 shares of its Common Stock to each new non-employee Director. The sale or transfer of these shares is restricted, and the shares were not registered under the Securities Act of 1933 pursuant to the exemption afforded by section 4(2) of that Act for transactions by an issuer not involving any public offering.

Item 5. OTHER INFORMATION

Because this Quarterly Report on Form 10-Q is being filed within four business days from the date of the reportable event, we have elected to make the following disclosures in this Quarterly Report on Form 10-Q instead of in a Current Report on Form 8-K under Item 5.02 -- Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers.

At our annual meeting of shareholders held on April 25, 2007, shareholders approved the Textron Inc. Short-Term Incentive Plan and the Textron Inc. 2007 Long-Term Incentive Plan.

Textron Inc. Short-Term Incentive Plan

The Textron Inc. Short-Term Incentive Plan (the "Short-Term Plan") has materially the same components as the previous Annual Incentive Plan, which was terminated upon approval of the Short-Term Plan. The Short-Term Plan permits the awarding of cash bonuses to employees of Textron and its subsidiaries based on the achievement of pre-established performance goals. The maximum amount payable to any participant for any plan year is \$4,000,000. The Short-Term Plan will be administered by the Organization and Compensation Committee of our Board of Directors (the "O&C Committee"), which may, to the extent specified in the Short-Term Plan, delegate its responsibilities. For each executive officer of Textron, the O&C Committee will establish objective written performance goals. Following the end of each plan year or other performance period, the O&C Committee will certify the extent to which performance goals have been achieved and compute the final amounts to be paid to each participant. Further information on the Short-Term Plan appears on pages 46-47 of Textron's 2007 annual meeting

Proxy Statement dated March 19, 2007. The full text of the Short-Term Plan is attached as Exhibit 10.1 to this Report.

24.

Textron Inc. 2007 Long-Term Incentive Plan

The Textron Inc. 2007 Long-Term Incentive Plan (the “2007 Plan”) has materially the same components as the Textron 1999 Long-Term Incentive Plan (the “1999 Plan”), under which no further awards will be made. The 2007 Plan authorizes the grant of stock options, stock appreciation rights, performance stock, restricted stock, restricted stock units, performance share units and other awards. The 2007 Plan authorizes the issuance of up to 6,000,000 shares of Textron common stock (“Shares”), 1,500,000 of which may be issued in connection with full-value awards such as restricted stock, restricted stock units, performance stock and performance share units. Only awards settled in Shares will count against these totals. No remaining Shares available for grant from the 1999 Plan will be brought forward to add to these totals, although any shares that become available for issuance upon cancellation, forfeiture or expiration of awards granted under the 1999 Plan without having been exercised or settled will be added to the totals referred to above. In the case of awards under the 2007 Plan that are denominated and intended to be settled in Shares but which are forfeited or cancelled or otherwise expire without having been exercised or settled in shares, the corresponding Shares again will be available for issuance under the 2007 Plan. In addition to these aggregate limits, no more than 200,000 shares may be made subject to stock options or stock appreciation rights granted to a participant in any calendar year, no more than 200,000 shares may be granted to a participant in any calendar year in connection with awards to be settled in Shares other than stock options or stock appreciation rights, no more than \$15 million may be paid to any participant in any calendar year with respect to awards settled in cash and a maximum of 5% of the Shares available under the 2007 Plan may be issued as restricted stock, restricted stock units, performance stock or performance share units not subject to certain minimum vesting conditions.

The 2007 Plan will be administered by the O&C Committee, which may, to the extent specified in the 2007 Plan, delegate some or all of its authority under the 2007 Plan. The O&C Committee has the responsibility to select participants, which may include employees and non-employee directors of Textron and its subsidiaries and certain other persons.

Except as specifically authorized by Textron’s shareholders, no stock option or stock appreciation right may be directly or indirectly repriced. Except in the case of certain substitute awards, the exercise price of a stock option may not be less than the closing price of a share on the date of grant. No stock option granted under the 2007 Plan may have a term in excess of ten years, and stock options intended to qualify as incentive stock options are subject to additional restrictions and limitations. Further information on the 2007 Plan appears on pages 47-50 of Textron’s 2007 annual meeting Proxy Statement dated March 19, 2007. The full text of the 2007 Plan is attached as Exhibit 10.2 to this Report.
