RICHARDSON ELECTRONICS, LTD.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. DESCRIPTION OF THE COMPANY

Richardson Electronics, Ltd. (“we”, “us”, “the Company”, and “our”) is incorporated in the state of Delaware. We are a leading global provider of engineered solutions, power grid and microwave tubes and related components, and customized display solutions, serving customers in the alternative energy, aviation, broadcast, communications, industrial, marine, medical, military, scientific, and semiconductor markets. Our strategy is to provide specialized technical expertise and “engineered solutions” based on our core engineering and manufacturing capabilities. We provide solutions and add value through design-in support, systems integration, prototype design and manufacturing, testing, logistics, and aftermarket technical service and repair.

Our products include electron tubes and related components, microwave generators, subsystems used in semiconductor manufacturing, and visual technology solutions. These products are used to control, switch or amplify electrical power signals, or are used as display devices in a variety of industrial, commercial, medical, and communication applications.

On September 4, 2012, we acquired the assets of D and C Import-Export, Inc. (“D and C”) for approximately \$2.6 million. D and C, a Florida-based distributor of power grid tubes and associated RF components, services the broadcast, commercial, industrial, medical, military, and scientific markets. This acquisition provides us with access to additional product lines, vendors, and customers.

On July 5, 2013, we acquired the assets of WVS-Technology (“WVS”) for approximately \$1.0 million. WVS, located in Meerbusch, Germany, develops and sells RF and microwave products, power grid tubes, vacuum capacitors, as well as industrial microwave equipment. This acquisition provides us with engineering and sales expertise to help expand our presence in the vacuum capacitor market.

We have two operating segments, which we define as follows:

Electron Device Group (“EDG”) provides engineered solutions and distributes electronic components to customers in alternative energy, aviation, broadcast, communications, industrial, marine, medical, military, scientific, and semiconductor markets. EDG focuses on various applications including broadcast transmission, CO2 laser cutting, diagnostic imaging, dielectric and induction heating, high energy transfer, high voltage switching, plasma, power conversion, radar, and radiation oncology. EDG also offers its customers technical services for both microwave and industrial equipment.

Canvys provides customized display solutions serving the corporate enterprise, financial, healthcare, industrial, and medical original equipment manufacturer (“OEM”) markets.

We currently have operations in the following major geographic regions:

- North America;
- Asia/Pacific;
- Europe; and
- Latin America.

2. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with United States Generally Accepted Accounting Principles (“GAAP”) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all the information and notes required by GAAP for complete financial statements.

Our fiscal quarter ends on the Saturday nearest the end of the quarter-ending month. The first nine months of fiscal 2014 and 2013 contained 39 weeks, respectively.

Table of Contents

In the opinion of management, all adjustments, which are of a normal and recurring nature, necessary for a fair presentation of the results of interim periods have been made. All inter-company transactions and balances have been eliminated. The unaudited consolidated financial statements presented herein include the accounts of our wholly owned subsidiaries. Certain information and note disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. The results of our operations for the three and nine months ended March 1, 2014, are not necessarily indicative of the results that may be expected for the fiscal year ending May 31, 2014.

The financial information contained in this report should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended June 1, 2013, that we filed on July 26, 2013.

**3. UPDATES TO CRITICAL ACCOUNTING POLICIES AND ESTIMATES**

**Inventories:** Our worldwide inventories are stated at the lower of cost or market, generally using a weighted-average cost method. Our inventories from continuing operations include approximately \$32.2 million of finished goods and \$3.0 million of raw materials and work-in-progress as of March 1, 2014, as compared to approximately \$31.6 million of finished goods and \$2.4 million of raw materials and work-in-progress as of June 1, 2013.

At this time, we do not anticipate any material risks or uncertainties related to possible future inventory write-downs.

**Revenue Recognition:** Our product sales are recognized as revenue upon shipment, when title passes to the customer, when delivery has occurred or services have been rendered, and when collectability is reasonably assured. We also record estimated discounts and returns based on our historical experience. Our products are often manufactured to meet the specific design needs of our customers' applications. Our engineers work closely with customers to ensure that our products will meet their needs. Our customers are under no obligation to compensate us for designing the products we sell.

In the limited cases where remaining performance obligations exist after delivery of the product, the obligation relative to the unit of accounting is inconsequential or perfunctory and is not essential to the functionality of the delivered product. This conclusion was reached based on the following facts: the timing of any remaining obligation is agreed upon with the customer, which in most cases, is performed immediately after the delivery of the product; the cost and time involved to complete the remaining obligation is insignificant in relation to the item sold, and the costs and time do not vary significantly; we have a demonstrated history of completing the remaining obligations timely; and finally, failure to complete the remaining obligation does not enable the customer to receive a full or partial refund of the product or service, and the timing of the payment for the product is not contingent upon completion of remaining performance obligations, if any.

**Discontinued Operations:** During fiscal year 2011, we completed the sale of the assets primarily used or held for use in, and certain liabilities of, our RF, Wireless and Power Division ("RFPD"), as well as certain other Company assets, including our information technology assets, to Arrow Electronics, Inc. ("Arrow") in exchange for \$238.8 million ("the Transaction"). In accordance with Accounting Standards Codification ("ASC") 205-20, Presentation of Financial Statements - Discontinued Operations ("ASC 205-20"), we reported the financial results of RFPD as a discontinued operation. Refer to Note 4 "Discontinued Operations" of our notes to our unaudited consolidated financial statements for additional discussion on the sale of RFPD.

**Loss Contingencies:** We accrue a liability for loss contingencies when it is probable that a liability has been incurred and the amount can be reasonably estimated. When only a range of possible loss can be established, the most probable amount in the range is accrued. If no amount within this range is a better estimate than any other amount within the range, the minimum amount in the range is accrued. If we determine that there is at least a reasonable possibility that a loss may have been incurred, we will include a disclosure describing the contingency.

Table of Contents

Goodwill and Other Intangible Assets: Goodwill is initially recorded based on the premium paid for acquisitions and is subsequently tested for impairment. We test goodwill for impairment annually and whenever events or circumstances indicates an impairment may have occurred, such as a significant adverse change in the business climate, loss of key personnel or a decision to sell or dispose of a reporting unit. As of March 1, 2014, our goodwill balance was \$1.7 million and represents the premium we paid for Powerlink Specialist Electronics Support Limited ("Powerlink") of \$1.4 million during our second quarter of fiscal 2012, adjusted for foreign currency translation; the premium we paid for D and C Import-Export, Inc. ("D and C") of \$0.2 million during our second quarter of fiscal 2013; and the premium we paid for WVS of less than \$0.1 million during our first quarter of fiscal 2014. During the fourth quarter of each fiscal year, our goodwill balances are reviewed for impairment through the application of a fair value based test, using the third quarter as the measurement date. In performing our annual review of goodwill balances for impairment, we estimate the fair value of each of our reporting units based primarily on projected future operating results, discounted cash flows, and other assumptions. Projected future operating results and cash flows used for valuation purposes may reflect considerable improvements relative to historical periods with respect to, among other things, revenue growth and operating margins. Although we believe our projected future operating results and cash flows and related estimates regarding fair values are based on reasonable assumptions, historically, projected operating results and cash flows have not always been achieved. In accordance with ASC 350 "Intangibles - Goodwill and Other", if indicators of impairment are deemed to be present, we would perform an interim impairment test and any resulting impairment loss would be charged to expense in the period identified. Intangible assets are initially recorded at their fair market values determined on quoted market prices in active markets, if available, or recognized valuation models. Intangible assets that have finite useful lives are amortized on a straight-line basis over their useful lives.

**4. DISCONTINUED OPERATIONS**

## Notes:

(1) Gross loss for fiscal year 2014 and 2013 includes unabsorbed manufacturing labor and overhead expenses and adjustments to inventory reserves related to the Manufacturing Agreement with RFPD which ended March 1, 2014. Net sales and gross loss for the three and nine months ended March 1, 2014, reflect our financial results relating to the Manufacturing Agreement with Arrow that we entered into in connection with the Transaction. Pursuant to the three-year agreement, we agreed to continue to manufacture certain RFPD products. There was also an income tax provision for the third quarter of fiscal 2014, reflecting the tax reserve for an ongoing income tax audit in Italy. Net sales for the third quarter ended March 2, 2013, reflect a return of inventory from RFPD of approximately \$0.1 million.

Table of Contents

Entities that do not present separate operating cash flow information related to discontinued operations must do so consistently for all periods presented, which may include periods long after the sale or liquidation of the operation. ## 5. ACQUISITIONS

On September 4, 2012, we acquired the assets of D and C Import-Export, Inc. ("D and C") for approximately \$2.6 million. D and C, a Florida-based distributor of power grid tubes and associated RF components, services the broadcast, commercial, industrial, medical, military, and scientific markets. This acquisition provides us with access to additional product lines, vendors, and customers.

The final purchase price was recorded during the fourth quarter of fiscal 2013, and allocated as follows: \$0.2 million of trade receivables, \$1.5 million of inventory, \$0.7 million of specifically identified intangible assets, and \$0.2 million of goodwill. Pro forma financial information is not presented due to immateriality.

On July 5, 2013, we acquired the assets of WVS for approximately \$1.0 million. WVS, located in Meerbusch, Germany, develops and sells RF and microwave products, power grid tubes, vacuum capacitors, as well as industrial microwave equipment. This acquisition provides us with engineering and sales expertise to help expand our presence in the vacuum capacitor market.

The allocation of the preliminary purchase price recorded during the first quarter of fiscal 2014, included \$0.7 million of inventory and \$0.3 million of fixed assets. The purchase price is preliminary and subject to change based on the completion of a valuation of the respective assets. Pro forma financial information is not presented due to immateriality.

## 6. GOODWILL AND OTHER INTANGIBLE ASSETS

Changes in the carrying value of goodwill are as follows (in thousands):

	TOTAL
Balance at June 1, 2013	\$1,519
Premium Paid for WVS Acquisition	25
Foreign currency translation	124
Balance at March 1, 2014	\$1,668

Table of Contents

The goodwill balance in its entirety relates to our EDG segment.

Intangible assets are initially recorded at their fair market values determined on quoted market prices in active markets, if available, or recognized valuation models. Intangible assets that have finite useful lives are amortized on a straight-line basis over their useful lives.

Our intangible assets represent the fair value for trade name, customer relationships, and non-compete agreements acquired in connection with our acquisitions.

Intangible assets subject to amortization as well as amortization expense are as follows (in thousands):

	Intangible Assets Subject to Amortization as of	
	March 1, 2014	June 1, 2013
Gross Amounts:		
Trade Name	\$29	\$29
Customer Relationship	977	947
Non-compete Agreements	47	47
Total Gross Amounts	\$1,053	\$1,023
Accumulated Amortization:		
Trade Name	\$16	\$8
Customer Relationship	161	101
Non-compete Agreements	12	6
Total Accumulated Amortization	\$189	\$115

The amortization expense associated with the intangible assets subject to amortization for the next five years is presented in the following table (in thousands):

	Amortization Expense
Fiscal Year	
Remaining 2014	\$22
2015	83
2016	68
2017	58
2018	57
Thereafter	576

The weighted average number of years of amortization expense remaining is 17.6.

## 7. INVESTMENTS

As of March 1, 2014, we had approximately \$34.6 million invested in time deposits and certificates of deposit ("CD"). Of this, \$33.3 million mature in less than twelve months and \$1.3 million mature in greater than twelve months. The fair value of these investments is equal to the face value of each time deposit and CD.

As of June 1, 2013, we had approximately \$44.0 million invested in time deposits and CD's. Of this, \$39.0 million mature in less than twelve months and \$5.0 million mature in greater than twelve months. The fair value of these investments is equal to the face value of each time deposit and CD.

Table of Contents

We also have investments in equity securities, all of which are classified as available-for-sale and are carried at their fair value based on quoted market prices. Our investments in equity securities, which are included in non-current assets, had a carrying amount of \$0.5 million as of March 1, 2014, and \$0.4 million as of June 1, 2013. Proceeds from the sale of securities were \$0.2 million during the third quarter of fiscal 2014 and fiscal 2013. We reinvested proceeds from the sale of securities, and the cost of the equity securities sold was based on a specific identification method. Gross realized gains and losses on those sales were less than \$0.1 million during the third quarter and year to date of fiscal 2014 and fiscal 2013. Net unrealized holding losses of less than \$0.1 million during the third quarter and year to date of fiscal 2014 and fiscal 2013 have been included in accumulated other comprehensive income.

**8. WARRANTIES**

We offer warranties for the limited number of specific products we manufacture. We also provide extended warranties for some products we sell that lengthen the period of coverage specified in the manufacturer's original warranty. Our warranty terms generally range from one to three years.

Warranty reserves are established for costs that are expected to be incurred after the sale and delivery of products under warranty. Warranty reserves are included in accrued liabilities on our consolidated balance sheets. The warranty reserves are determined based on known product failures, historical experience, and other available evidence.

Warranty reserves were approximately \$0.2 million as of March 1, 2014, and June 1, 2013.

**9. LEASE OBLIGATIONS, OTHER COMMITMENTS, AND CONTINGENCIES**

We lease certain warehouse and office facilities and office equipment under non-cancelable operating leases. Rent expense from continuing operations during the first nine months of fiscal 2014 was \$1.2 million compared to \$1.1 million during the first nine months of fiscal 2013. Under the terms of the Transaction, Arrow assumed many of our facility leases and we are sub-leasing space from Arrow. Our future lease commitments for minimum rentals, including common area maintenance charges and property taxes during the next five years have been adjusted to reflect the Transaction as follows (in thousands):

Fiscal Year	Payments
Remaining 2014	\$341
2015	1,211
2016	771
2017	133
2018	86
Thereafter	110

**10. INCOME TAXES**

The effective income tax rate from continuing operations during the first nine months of fiscal 2014 was 17.5%, as compared to 2.1% during the first nine months of fiscal 2013. The increase in rate during the first nine months of fiscal 2014, as compared to fiscal 2013, was due to an increase in the amount of foreign earnings not considered to be permanently reinvested as compared to US earnings and an increase in forecasted earnings available in foreign jurisdictions for distribution with respect to ASC 740-30, Income Taxes – Other Considerations or Special Areas ("ASC 740-30"). The 17.5% effective income tax rate is lower than the federal statutory rate of 34.0% as a result of our geographic distribution of income and apportionment of income to various states. Additionally, during the second quarter of fiscal 2014, we developed a strategy for the recently acquired German business to pursue increased market opportunities in Germany; therefore, we have changed our position with respect to earnings in Germany which are now considered to be permanently reinvested under ASC 740-30. This change in the Company's assertion further reduced the effective tax rate for the first nine months of fiscal 2014.

Table of Contents

In the normal course of business, we are subject to examination by taxing authorities throughout the world. Generally, years prior to fiscal 2006 are closed for examination under the statute of limitations for U.S. federal, state or local, or non-U.S. tax jurisdictions. During fiscal 2013, we completed federal audits in the U.S. for fiscal 2009, 2010, and 2011 as well as foreign audits in Germany for fiscal 2006, 2007, and 2008. Our primary foreign tax jurisdictions are the Netherlands and Germany. We have tax years open in the Netherlands and Germany beginning in fiscal 2008 and in Italy beginning in fiscal 2011.

As of March 1, 2014, approximately \$46.3 million of cumulative positive earnings of some of our foreign subsidiaries are still considered permanently reinvested pursuant to ASC 740-30. Due to various tax attributes that are continuously changing, it is not practical to determine what, if any, tax liability might exist if such earnings were to be repatriated.

As of March 1, 2014, our worldwide liability for uncertain tax positions related to continuing operations, excluding interest and penalties, was \$0.2 million as compared to \$0.4 million as of March 2, 2013. We recorded penalties and interest relating to uncertain tax positions in the income tax expense line item within the unaudited consolidated statements of income and comprehensive income.

It is not expected that there will be a change in the unrecognized tax benefits within the next 12 months.

**11. CALCULATION OF EARNINGS PER SHARE**

We have authorized 30,000,000 shares of common stock, 10,000,000 shares of Class B common stock, and 5,000,000 shares of preferred stock. The Class B common stock has 10 votes per share and has transferability restrictions; however, Class B common stock may be converted into common stock on a share-for-share basis at any time. With respect to dividends and distributions, shares of common stock and Class B common stock rank equally and have the same rights, except that Class B common stock cash dividends are limited to 90% of the amount of Class A common stock cash dividends.

In accordance with ASC 260-10, Earnings Per Share ("ASC 260"), our Class B common stock is considered a participating security requiring the use of the two-class method for the computation of basic and diluted earnings per share. The two-class computation method for each period reflects the cash dividends paid per share for each class of stock, plus the amount of allocated undistributed earnings per share computed using the participation percentage which reflects the dividend rights of each class of stock. Basic and diluted earnings per share were computed using the two-class method as prescribed in ASC 260. The shares of Class B common stock are considered to be participating convertible securities since the shares of Class B common stock are convertible on a share-for-share basis into shares of common stock and may participate in dividends with common stock according to a predetermined formula which is 90% of the amount of Class A common stock cash dividends.

## 12. SEGMENT REPORTING

In accordance with ASC 280-10, Segment Reporting, we have identified two reportable segments: EDG and Canvys. EDG provides engineered solutions and distributes electronic components to customers in alternative energy, aviation, broadcast, communications, industrial, marine, medical, military, scientific, and semiconductor markets. EDG focuses on various applications including broadcast transmission, CO2 laser cutting, diagnostic imaging, dielectric and induction heating, high energy transfer, high voltage switching, plasma, power conversion, radar, and radiation oncology. EDG also offers its customers technical services for both microwave and industrial equipment. Canvys provides global customized display solutions serving the corporate enterprise, financial, healthcare, industrial, and OEM markets.

The CEO evaluates performance and allocates resources primarily based on the gross profit of each segment.

Operating results by segment are summarized in the following table (in thousands):

We sell our products to customers in diversified industries and perform periodic credit evaluations of our customers' financial condition. Terms are generally on open account, payable net 30 days in North America, and vary throughout Asia/Pacific, Europe, and Latin America. Estimates of credit losses are recorded in the financial statements based on monthly reviews of outstanding accounts. Other primarily includes net sales not allocated to a specific geographical region, unabsorbed value-add costs, and other unallocated expenses.

### 13. LITIGATION

We are involved in several pending judicial proceedings concerning matters arising in the ordinary course of business. While the outcome of litigation is subject to uncertainties, based on information available at the time the financial statements were issued, we determined disclosure of contingencies relating to any of our pending judicial proceedings was not necessary because there was less than a reasonable possibility that a material loss had been incurred.

During the first and third quarters of fiscal 2014, we received settlements in the amount of \$2.1 million and \$0.4 million, respectively, related to a class action lawsuit settlement. The settlement was recorded as proceeds from legal settlement within the Other Income/Expense section of our Consolidated Statements of Comprehensive Income (Loss).

### 14. FAIR VALUE MEASUREMENTS

ASC 820, Fair Value Measurements and Disclosures ("ASC 820"), defines fair value, establishes a framework for measuring fair value in accordance with accounting principles generally accepted in the United States, and expands disclosures about fair value measurements.

ASC 820 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists; therefore requiring an entity to develop its own assumptions.

As of March 1, 2014, we held investments that are required to be measured at fair value on a recurring basis. Our investments consist of time deposits and CDs, which face value is equal to fair value, and equity securities of publicly traded companies for which market prices are readily available.

Table of Contents

Investments measured at fair value on a recurring basis subject to the disclosure requirements of ASC 820 as of March 1, 2014, and June 1, 2013, were as follows (in thousands):

	Level 1

Time deposits/CDs	\$34,572
Equity securities	507
Total	\$35,079

INTRODUCTION

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to assist the reader in better understanding our business, results of operations, financial condition, changes in financial condition, critical accounting policies and estimates, and significant developments. MD&A is provided as a supplement to, and should be read in conjunction with, our consolidated financial statements and the accompanying notes appearing elsewhere in this filing. This section is organized as follows:

Business Overview

Results of Operations – an analysis and comparison of our consolidated results of operations for the three and nine months ended March 1, 2014, and March 2, 2013, as reflected in our consolidated statements of comprehensive income (loss).

Liquidity, Financial Position, and Capital Resources – a discussion of our primary sources and uses of cash for the three and nine months ended March 1, 2014, and March 2, 2013, and a discussion of changes in our financial position.

Business Overview

Richardson Electronics, Ltd. ("we", "us", "the Company", and "our") is incorporated in the state of Delaware. We are a leading global provider of engineered solutions, power grid and microwave tubes and related components, and customized display solutions, serving customers in the alternative energy, aviation, broadcast, communications, industrial, marine, medical, military, scientific, and semiconductor markets. Our strategy is to provide specialized technical expertise and "engineered solutions" based on our core engineering and manufacturing capabilities. We provide solutions and add value through design-in support, systems integration, prototype design and manufacturing, testing, logistics, and aftermarket technical service and repair.

Our products include electron tubes and related components, microwave generators, subsystems used in semiconductor manufacturing, and visual technology solutions. These products are used to control, switch or amplify electrical power signals, or are used as display devices in a variety of industrial, commercial, medical, and communication applications.

On September 4, 2012, we acquired the assets of D and C Import-Export, Inc. ("D and C") for approximately \$2.6 million. D and C, a Florida-based distributor of power grid tubes and associated RF components, services the broadcast, commercial, industrial, medical, military, and scientific markets. This acquisition provides us with access to additional product lines, vendors, and customers.

Table of Contents

On July 5, 2013, we acquired the assets of WVS-Technology ("WVS") for approximately \$1.0 million. WVS, located in Meerbusch, Germany, develops and sells RF and microwave products, power grid tubes, vacuum capacitors, as well as industrial microwave equipment. This acquisition provides us with engineering and sales expertise to help expand our presence in the vacuum capacitor market.

We have two operating segments, which we define as follows:

Electron Device Group ("EDG") provides engineered solutions and distributes electronic components to customers in alternative energy, aviation, broadcast, communications, industrial, marine, medical, military, scientific, and semiconductor markets. EDG focuses on various applications including broadcast transmission, CO2 laser cutting, diagnostic imaging, dielectric and induction heating, high energy transfer, high voltage switching, plasma, power conversion, radar, and radiation oncology. EDG also offers its customers technical services for both microwave and industrial equipment.

Canvys provides customized display solutions serving the corporate enterprise, financial, healthcare, industrial, and medical original equipment manufacturer ("OEM") markets.

We currently have operations in the following major geographic regions:

- North America;
- Asia/Pacific;
- Europe; and
- Latin America.

The \$0.7 million in the third quarter of fiscal 2014 was primarily due to an antitrust class action lawsuit settlement of \$0.4 million, investment income of \$0.1 million and interest income of \$0.1 million. The \$0.2 million in fiscal 2013 was comprised of investment and interest income of \$0.3 million offset by a foreign exchange loss of \$0.5 million. Our foreign exchange gains and losses are primarily due to the translation of U.S. dollars held in non-U.S. entities. We currently do not utilize derivative instruments to manage our exposure to foreign currency.

### **Income Tax Provision**

The effective income tax rate from continuing operations during the first nine months of fiscal 2014 was 17.5%, as compared to 2.1% during the first nine months of fiscal 2013. The increase in rate during the first nine months of fiscal 2014, as compared to fiscal 2013, was due to an increase in the amount of foreign earnings not considered to be permanently reinvested as compared to US earnings and an increase in forecasted earnings available in foreign jurisdictions for distribution with respect to ASC 740-30, Income Taxes – Other Considerations or Special Areas ("ASC 740-30"). The 17.5% effective income tax rate is lower than the federal statutory rate of 34.0% as a result of our geographic distribution of income and apportionment of income to various states. Additionally, during the second quarter of fiscal 2014, we developed a strategy for the recently acquired German business to pursue increased market opportunities in Germany; therefore, we have changed our position with respect to earnings in Germany which are now considered to be permanently reinvested under ASC 740-30.

In the normal course of business, we are subject to examination by taxing authorities throughout the world. Generally, years prior to fiscal 2006 are closed for examination under the statute of limitation for U.S. federal, state or local, or non-U.S. tax jurisdictions. During fiscal 2013, we completed federal audits in the U.S. for fiscal 2009, 2010, and 2011

as well as foreign audits in Germany for fiscal 2006, 2007, and 2008. Our primary foreign tax

jurisdictions are the Netherlands and Germany. We have tax years open in the Netherlands and Germany beginning in fiscal 2008 and in Italy beginning in fiscal 2011.

As of March 1, 2014, approximately \$46.3 million of cumulative positive earnings of some of our foreign subsidiaries are still considered permanently reinvested pursuant to ASC 740-30. Due to various tax attributes that are continuously changing, it is not practical to determine what, if any, tax liability might exist if such earnings were to be repatriated.

As of March 1, 2014, our worldwide liability for uncertain tax positions related to continuing operations, excluding interest and penalties, was \$0.2 million as compared to \$0.4 million as of March 2, 2013. We recorded penalties and interest relating to uncertain tax positions in the income tax expense line item within the unaudited consolidated statements of income and comprehensive income.

It is not expected that there will be a change in the unrecognized tax benefits within the next 12 months.

Entities that do not present separate operating cash flow information related to discontinued operations must do so consistently for all periods presented, which may include periods long after the sale or liquidation of the operation.

### Cash Flows from Operating Activities

The cash flow from operating activities primarily resulted from our net income, adjusted for non-cash items, and changes in our operating assets and liabilities.

Operating activities, which include our discontinued operations, used \$1.4 million of cash during the first nine months of fiscal 2014. We had net income of \$2.0 million during the first nine months of fiscal 2014, which included non-cash stock-based compensation expense of \$0.6 million associated with the issuance of stock option awards and depreciation and amortization expense of \$0.8 million associated with our property and equipment as well as amortization of our intangible assets. Changes in our operating assets and liabilities, net of effects of acquired businesses, used \$4.7 million of cash during the first nine months of fiscal 2014, due primarily to the decrease in our inventory of \$0.1 million, a decrease in our accounts payable of \$3.2 million, and an increase in our accounts receivable of \$1.5 million, partially offset by a decrease in our long-term tax liabilities of \$0.3 million. Provided by cash relating to inventory, excluding net of acquired business, primarily relates to a reduction in our inventory for discontinued operations partially offset by an increase in purchases related our Canvys business. The decrease in our accounts payable relates primarily to the timing of payments to some of our major suppliers. The increase in our accounts receivables of \$1.5 million was due primarily to a slight increase in our day sales outstanding caused primarily by a shift in customer mix by geography.

Operating activities, which include our discontinued operations, provided \$4.9 million of cash during the first nine months of fiscal 2013. We had net income of \$1.4 million in the first nine months of fiscal 2013, which included non-cash stock-based compensation expense of \$0.4 million associated with the issuance of stock option

The decrease in our accounts receivable of \$0.5 million was due primarily to improvement in our day sales outstanding. The increase in prepaid expenses of \$0.3 million was due primarily to the renewal of our liability insurance coverage.

**Cash Flows from Investing Activities**

The cash flow from investing activities has consisted primarily of purchases and maturities of investments and capital expenditures.

Cash provided by investing activities of \$6.7 million during the first nine months of fiscal 2014 included proceeds from the maturities of investments of \$258.3 million, offset by the purchase of investments of \$248.9 million, \$1.0 million for the acquisition of WVS, and \$1.8 million in capital expenditures.

Our purchases and proceeds from investments consist of time deposits and CDs. Purchasing of future investments may vary from period to period due to interest and foreign currency exchange rates.

**Cash Flows from Financing Activities**

The cash flow from financing activities primarily consists of repurchases of common stock and cash dividends paid.

Cash used in financing activities of \$11.1 million during the first nine months of fiscal 2014 resulted from \$8.7 million of cash used to repurchase common stock under our share repurchase authorization and \$2.5 million of cash used to pay dividends, offset by \$0.2 million of proceeds from the issuance of common stock.

The repurchase of common stock relates to our share repurchase authorizations.

All payments of dividends are at the discretion of the Board of Directors. Dividend payments will depend on earnings, capital requirements, operating conditions, and other factors that the Board may deem relevant.

We believe that the existing sources of liquidity, including current cash, will provide sufficient resources to meet known capital requirements and working capital needs for the next 12 months.

The interpretation and analysis of these disclosures should not be considered in isolation since such variances in exchange rates would likely influence other economic factors. Such factors, which are not readily quantifiable, would likely also affect our operations. Additional disclosure regarding various market risks are set forth in Part I, Item 1A, "Risk Factors" of our Annual Report on Form 10-K for the year ended June 1, 2013, filed July 26, 2013.
