FRANKLIN ELECTRIC COMPANY
REPORTS INCREASED INCOME AND SALES
FOR THE THIRD QUARTER AND FIRST NINE MONTHS OF 2003

Bluffton, Indiana-October 9, 2003--Franklin Electric Co., Inc. (NASDAQ:FELE) reported record third quarter 2003 diluted earnings per share of \$0.93, a 9 percent increase from \$0.85 for the third quarter of 2002. Third quarter 2003 net income was a record \$10.5 million, an increase of 9 percent from \$9.6 million for the same period a year ago. For the first three quarters of 2003, diluted earnings per share were a record \$2.12, an increase of 8 percent compared to 2003 earnings per share of \$1.96, and net income was a record \$23.9 million, an increase of 7 percent compared to last year's \$22.3 million.

Sales for the third quarter of 2003 were a record \$99.7 million, an increase of 3 percent compared to sales of \$97.1 million for the same period a year ago. Foreign currencies, particularly the euro, strengthened relative to the U.S. dollar since the third quarter of 2002. The impact of this change in exchange rates was a \$3.7 million increase in the Company's reported third quarter 2003 sales. For the first three quarters of 2003, sales were a record \$263.3 million, an increase of 2 percent compared to 2002 sales of \$258.9 million. The impact of strengthening foreign currencies on the first three quarters of 2003 was an \$11.3 million increase in the Company's reported sales. In addition, the year on year impact of the inclusion of the sales of Intelligent Controls, Inc. ("INCON"), acquired by the Company in July 2002, was an increase in sales of \$4.1 million in the first three quarters of 2003 compared to last year.

Operating earnings in the third quarter of 2003 were \$15.8 million, up slightly compared to \$15.6 million a year ago. For the first three quarters of 2003, operating earnings were \$36.0 million compared to last year's \$35.0 million.

R. Scott Trumbull, Chairman and Chief Executive Officer, stated, "We are pleased that our earnings increased in spite of reduced unit sales in one of our key markets. Last year we had unusually strong sales in the North American Residential water well market as drought conditions prevailed over much of the East coast. This year our residential water sales have fallen back to normal levels. We were pleased with the growth of our motor sales to the agricultural, industrial and municipal markets during the quarter; and we

were also encouraged by the continuing improvement of our fueling systems business. During the quarter we completed the construction and moved into our new motor components facilities in the Czech Republic and China; and we initiated the construction phase of the planned expansion of our motor plant in Linares Mexico. Also during the quarter our Board approved the construction of a new motor plant in the Czech Republic. These initiatives — which will require approximately 2 years to complete — will result in moving a significant amount of our production to lower cost regions of the world.

North America water systems products sales were down slightly in the third

quarter as compared to last year. The decrease during the quarter reflected continued weak demand in the market attributed to extremely wet weather conditions throughout the Eastern half of the country partially offset by strong export sales.

Water System sales in Europa (Europe, the Middle East and North Africa) were up due primarily to sales in the Middle East. South Africa showed higher quarter over quarter sales. Sales in the Asia/Pacific region were higher as well.

Sales of the SubDrive(tm) family of electronic drive systems for water wells continued to grow quarter over quarter. Another SubDrive(tm) product will be launched in the fourth quarter further extending the product line.

Fueling system product sales continued to strengthen in the quarter and margins were up significantly as compared to the first half of the year and the third quarter last year. The integration of INCON remained on schedule.

Third quarter industrial motor products sales were down primarily due to the slowness of the market. During the quarter, the Company started sales of its new V Series(tm) product line manufactured in China. The Company's HydroDuty(tm) (patents pending) product line was made commercially available at the end of the quarter as well."

Franklin Electric, a technical leader in electric motors, drives and controls, is the world's largest manufacturer of submersible water and fueling systems motors, a manufacturer of underground fueling systems hardware and flexible piping systems and a leader in engineered industrial motor products.
