

SOUTHWESTERN ENERGY CO

Form 10-Q

August 01, 2013

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-Q

(Mark One)

Quarterly Report pursuant to Section 13 or 15(d) of the Securities

Exchange Act of 1934

For the quarterly period ended June 30, 2013

Or

Transition Report pursuant to Section 13 or 15(d) of the Securities

Exchange Act of 1934

For the transition period from _____ to _____

Commission file number: 1-08246

Southwestern Energy Company

(Exact name of registrant as specified in its charter)

Delaware

71-0205415

(State or other jurisdiction of incorporation or (I.R.S. Employer Identification No.)
organization)

2350 North Sam Houston Parkway East, Suite 77032

125, Houston, Texas

(Address of principal executive offices) (Zip Code)

(281) 618-4700

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Edgar Filing: SOUTHWESTERN ENERGY CO - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer”, “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer’s classes of common stock, as of the latest practicable date:

Class	Outstanding as of July 30, 2013
Common Stock, Par Value \$0.01	351,512,483

CAUTIONARY STATEMENT ABOUT FORWARD-LOOKING STATEMENTS

All statements, other than historical fact or present financial information, may be deemed to be forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements that address activities, outcomes and other matters that should or may occur in the future, including, without limitation, statements regarding the financial position, business strategy, production and reserve growth and other plans and objectives for our future operations, are forward-looking statements. Although we believe the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance. We have no obligation and make no undertaking to publicly update or revise any forward-looking statements, except as may be required by law.

Forward-looking statements include the items identified in the preceding paragraph, information concerning possible or assumed future results of operations and other statements in this Form 10-Q identified by words such as “anticipate,” “project,” “intend,” “estimate,” “expect,” “believe,” “predict,” “budget,” “projection,” “goal,” “plan,” “forecast,” “target” or similar

You should not place undue reliance on forward-looking statements. They are subject to known and unknown risks, uncertainties and other factors that may affect our operations, markets, products, services and prices and cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. In addition to any assumptions and other factors referred to specifically in connection with forward-looking statements, risks, uncertainties and factors that could cause our actual results to differ materially from those indicated in any forward-looking statement include, but are not limited to:

- the timing and extent of changes in market conditions and prices for natural gas and oil (including regional basis differentials);
- our ability to fund our planned capital investments;
- our ability to transport our production to the most favorable markets or at all;
- the timing and extent of our success in discovering, developing, producing and estimating reserves;
- the economic viability of, and our success in drilling, our large acreage position in the Fayetteville Shale play overall as well as relative to other productive shale gas plays;

- the impact of government regulation, including any increase in severance or similar taxes, legislation relating to hydraulic fracturing, the climate and over the counter derivatives;
- the costs and availability of oilfield personnel, services and drilling supplies, raw materials, and equipment, including pressure pumping equipment and crews;
- our ability to determine the most effective and economic fracture stimulation for the Fayetteville Shale play and Marcellus Shale play;
- our future property acquisition or divestiture activities;
- the impact of the adverse outcome of any material litigation against us;
- the effects of weather;
- increased competition and regulation;
- the financial impact of accounting regulations and critical accounting policies;
- the comparative cost of alternative fuels;
- conditions in capital markets, changes in interest rates and the ability of our lenders to provide us with funds as agreed;
- credit risk relating to the risk of loss as a result of non-performance by our counterparties; and
- any other factors listed in the reports we have filed and may file with the Securities and Exchange Commission (“SEC”).

We caution you that forward-looking statements contained in this Form 10-Q are subject to all of the risks and uncertainties, many of which are beyond our control, incident to the exploration for and development, production and sale of natural gas and oil. These risks include, but are not limited to, commodity price volatility, third-party interruption of sales to market, inflation, lack of availability of goods and services, environmental risks, drilling and other operating risks, regulatory changes, the uncertainty inherent in estimating proved natural gas and oil reserves and in projecting future rates of production and timing of development expenditures and the other risks described in our Annual Report on Form 10-K for the year ended December 31, 2012 (the “2012 Annual Report on Form 10-K”), and all quarterly reports on Form 10-Q filed subsequently thereto, including this Form 10-Q (“Form 10-Qs”).

Should one or more of the risks or uncertainties described above or elsewhere in this Form 10-Q occur, or should underlying assumptions prove incorrect, our actual results and plans could differ materially from those expressed in any forward-looking statements. We specifically disclaim all responsibility to publicly update any information contained in a forward-looking statement or any forward-looking statement in its entirety and therefore disclaim any resulting liability for potentially related damages.

All forward-looking statements attributable to us are expressly qualified in their entirety by this cautionary statement.

SOUTHWESTERN ENERGY COMPANY AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(1) BASIS OF PRESENTATION

Southwestern Energy Company (including its subsidiaries, collectively, “we”, “Southwestern” or the “Company”) is an independent energy company engaged in natural gas and oil exploration, development and production. The Company engages in natural gas and oil exploration and production, natural gas gathering and natural gas marketing through its subsidiaries. Southwestern’s exploration, development and production (“E&P”) activities are principally focused within the United States on development of an unconventional gas reservoir located on the Arkansas side of the Arkoma Basin, which the Company refers to as the Fayetteville Shale play. The Company is actively engaged in exploration and production activities in Pennsylvania, where we are targeting the unconventional gas reservoir known as the Marcellus Shale, and to a lesser extent in Texas and in Arkansas and Oklahoma in the Arkoma Basin. The Company also actively seeks to find and develop new oil and natural gas plays with significant exploration and exploitation potential. Southwestern’s natural gas gathering and marketing (“Midstream Services”) activities primarily support the Company’s E&P activities in Arkansas, Pennsylvania and Texas.

The accompanying unaudited condensed consolidated financial statements were prepared using accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information and in accordance with the rules and regulations of the Securities and Exchange Commission. Certain information relating to the Company’s organization and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been appropriately condensed or omitted in this Quarterly Report on Form 10-Q. The Company believes the disclosures made are adequate to make the information presented not misleading.

The unaudited condensed consolidated financial statements contained in this report include all normal and recurring material adjustments that, in the opinion of management, are necessary for a fair statement of the financial position, results of operations and cash flows for the interim periods presented herein. It is recommended that these unaudited condensed consolidated financial statements be read in conjunction with the consolidated financial statements and the notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012 (“2012 Annual Report on Form 10-K”).

The Company’s significant accounting policies, which have been reviewed and approved by the Audit Committee of the Company’s Board of Directors, are summarized in Note 1 in the Notes to the Consolidated Financial Statements included in the Company’s 2012 Annual Report on Form 10-K.

Certain reclassifications have been made to the prior year financial statements to conform to the 2013 presentation. The effects of the reclassifications were not material to the Company's unaudited condensed consolidated financial statements.

(2) ACQUISITIONS AND DIVESTITURES

In April 2013, the Company entered into a definitive purchase agreement to acquire natural gas properties located in Pennsylvania prospective for the Marcellus Shale for approximately \$93.0 million, subject to closing conditions. The Company utilized its revolving credit facility to finance the acquisition. The Company closed on the acquisition during the second quarter of 2013 and accounted for it as an asset acquisition.

In May 2012, the Company sold certain oil and natural gas leases, wells and gathering equipment in East Texas for approximately \$166.0 million. The assets included in the sale represented all of the Company's interests and related assets in the Overton Field in Smith County. The net production from the sold assets was approximately 24.0 MMcfe per day as of the closing date and our net proved reserves were approximately 143.0 Bcfe at December 31, 2011.

(3) PREPAID EXPENSES

The components of prepaid expenses included in other current assets as of June 30, 2013 and December 31, 2012 consisted of the following:

	June 30, 2013	December 31, 2012
	(in thousands)	
Prepaid drilling costs	\$ 18,107	\$ 30,101
Prepaid insurance	2,825	9,507
Total	\$ 20,932	\$ 39,608

(4) INVENTORY

Inventory recorded in current assets includes \$3.7 million at June 30, 2013 and \$5.6 million at December 31, 2012 for natural gas in underground storage owned by the Company's E&P segment, and \$34.4 million at June 30, 2013 and \$22.5 million at December 31, 2012 for tubular and other equipment used in the E&P segment.

Other assets include \$15.9 million at June 30, 2013 and \$13.8 million at December 31, 2012, respectively, for inventory held by the Midstream Services segment consisting primarily of pipe that will be used to construct gathering systems for the Fayetteville Shale play.

(5) NATURAL GAS AND OIL PROPERTIES

The Company utilizes the full cost method of accounting for costs related to the exploration, development and acquisition of natural gas and oil reserves. Under this method, all such costs (productive and nonproductive), including salaries, benefits and other internal costs directly attributable to these activities are capitalized on a country by country basis and amortized over the estimated lives of the properties using the units-of-production method. These capitalized costs, less accumulated amortization and related deferred income taxes, are subject to a ceiling test that limits such pooled costs to the aggregate of the present value of future net revenues attributable to proved natural gas and oil reserves, net of taxes, discounted at 10 percent plus the lower of cost or market value of unproved properties. Any costs in excess of the ceiling are written off as a non-cash expense. The expense may not be reversed in future periods, even though higher natural gas and oil prices may subsequently increase the ceiling. Full cost companies must

use the average quoted price from the first day of each month from the previous 12 months, including the impact of derivatives qualifying as cash flow hedges, to calculate the ceiling value of their reserves.

Using the average quoted price from the first day of each month from the previous 12 months for Henry Hub natural gas of \$3.44 per MMBtu and \$88.13 per barrel for West Texas Intermediate oil, adjusted for market differentials, the Company's net book value of its United States natural gas and oil properties did not exceed the ceiling amount and did not result in a ceiling test impairment at June 30, 2013. Cash flow hedges of natural gas production in place increased the ceiling value by \$150.8 million, net of tax, at June 30, 2013. Decreases in average quoted prices from June 30, 2013 levels as well as changes in production rates, levels of reserves, capitalized costs, the evaluation of costs excluded from amortization, future development costs, service costs and taxes could result in future ceiling test impairments.

Using the average quoted price from the first day of each month from the previous 12 months for Henry Hub natural gas of \$3.15 per MMBtu and \$92.17 per barrel for West Texas Intermediate oil, adjusted for market differentials, the Company's net book value of its United States natural gas and oil properties exceeded the ceiling by approximately \$496.4 million (net of tax) at June 30, 2012 and resulted in a non-cash ceiling test impairment. Cash flow hedges of natural gas production in place increased the ceiling by \$354.8 million at June 30, 2012.

All of the Company's costs directly associated with the acquisition and evaluation of properties in Canada relating to its exploration program at June 30, 2013 were unproved and did not exceed the ceiling amount. If the exploration program in Canada is unsuccessful on all or a portion of these properties, a ceiling test impairment may result in the future.

(6) EARNINGS PER SHARE

The following table presents the computation of earnings per share for the three- and six-month periods ended June 30, 2013 and 2012:

	For the three months ended June 30,		For the six months ended June 30,	
	2013	2012	2013	2012
Net income (loss) (in thousands)	\$ 245,631	\$ (405,132)	\$ 373,146	\$ (297,428)
Number of common shares:				
Weighted average outstanding	350,448,806	348,162,723	350,241,768	348,081,399
Issued upon assumed exercise of outstanding stock options	386,999	–	481,528	–
Effect of issuance of nonvested restricted common stock	247,002	–	188,596	–
Weighted average and potential dilutive outstanding ⁽¹⁾	351,082,807	348,162,723	350,911,892	348,081,399
Earnings (loss) per share:				
Basic	\$ 0.70	\$ (1.16)	\$ 1.07	\$ (0.85)
Diluted	\$ 0.70	\$ (1.16)	\$ 1.06	\$ (0.85)

(1) Options for 1,599,246 shares and 29,251 shares of restricted stock were excluded from the calculation for the three months ended June 30, 2013 because they would have had an antidilutive effect. Due to the net loss for the three months ended June 30, 2012, options for 1,723,316 shares and 156,047 shares of restricted stock were antidilutive and excluded from the calculation. Options for 2,079,849 shares and 246,347 shares of restricted stock were excluded from the calculation for the six months ended June 30, 2013 because they would have had an antidilutive effect. Due to the net loss for the six months ended June 30, 2012, options for 1,783,073 shares and 121,078 shares of restricted stock were antidilutive and excluded from the calculation.

(7) DERIVATIVES AND RISK MANAGEMENT

The Company is exposed to volatility in market prices and basis differentials for natural gas and crude oil which impacts the predictability of its cash flows related to the sale of natural gas and oil, and is exposed to volatility in interest rate risks. These risks are managed by the Company's use of certain derivative financial instruments. At June 30, 2013 and December 31, 2012, the Company's derivative financial instruments consisted of price swaps, basis swaps, fixed price call options, and interest rate swaps. A description of the Company's derivative financial instruments is provided below:

Fixed price swaps	The Company receives a fixed price for the contract and pays a floating market price to the counterparty.
Floating price swaps	The Company receives a floating market price from the counterparty and pays a fixed price.
Costless-collars	Arrangements that contain a fixed floor price (put) and a fixed ceiling price (call). If the market price exceeds the call strike price or falls below the put strike price, the Company receives the fixed price and pays the market price. If the market price is between the call and the put strike price, no payments are due from either party.
Basis swaps	Arrangements that guarantee a price differential for natural gas from a specified delivery point. The Company receives a payment from the counterparty if the price differential is greater than the stated terms of the contract and pays the counterparty if the price differential is less than the stated terms of the contract.
Fixed price call options	The Company sells fixed price call options in exchange for a premium. At the time of settlement, if the market price exceeds the fixed price of the call option, the Company pays the counterparty such excess on sold fixed price call options. If the market price settles below the fixed price of the call option, no payment is due from either party.
Interest rate swaps	Interest-rate swaps are used to fix or float interest rates on existing or anticipated indebtedness. The purpose of these instruments is to manage the Company's existing or anticipated exposure to unfavorable interest-rate changes.

GAAP requires that all derivatives be recognized in the balance sheet as either an asset or liability and be measured at fair value. Under GAAP, certain criteria must be satisfied in order for derivative financial instruments to be classified and accounted for as either a cash flow or a fair value hedge. Accounting for qualifying hedges requires a derivative's gains and losses to be recorded either in earnings or as a component of other comprehensive income. Gains and losses on derivatives that are not elected for hedge accounting treatment or that do not meet hedge accounting requirements are recorded in earnings.

The Company utilizes counterparties for its derivative instruments that it believes are credit-worthy at the time the transactions are entered into and the Company closely monitors the credit ratings of these counterparties. Additionally, the Company performs both quantitative and qualitative assessments of these counterparties based on their credit ratings and credit default swap rates where applicable. However, the events in the financial markets in recent years demonstrate there can be no assurance that a counterparty will be able to meet its obligations to the Company.

The balance sheet classification of the assets related to derivative financial instruments are summarized below at June 30, 2013 and December 31, 2012:

	Derivative Assets		Derivative Liabilities	
	June 30, 2013		December 31, 2012	
	Balance Sheet	Fair Value	Balance Sheet	Fair Value
	Classification		Classification	
	(in thousands)			
Derivatives designated as hedging instruments:				
Fixed price swaps	Hedging asset	\$ 189,541	Hedging asset	\$ 279,443
Fixed price swaps	Other assets	12,214	Other assets	8,550
Total derivatives designated as hedging instruments		\$ 201,755		\$ 287,993
Derivatives not designated as hedging instruments:				
Basis swaps	Hedging asset	\$ 8,402	Hedging asset	\$ 3,250
Fixed price swaps	Hedging asset	48,512	Hedging asset	–
Basis swaps	Other assets	2,565	Other assets	901
Fixed price swaps	Other assets	39,276	Other assets	–
Interest rate swaps	Other assets	6,218	Other assets	–
Total derivatives not designated as hedging instruments		\$ 104,973		\$ 4,151
Total derivative assets		\$ 306,728		\$ 292,144
Derivatives not designated as hedging instruments:				
Basis swaps	Other current liabilities	\$ 69	Other current liabilities	\$ 138
	Other long-term liabilities	38,856	Other long-term liabilities	4,128
Fixed price call options				
Interest rate swaps	Other current liabilities	308	Other current liabilities	–
	Other long-term liabilities	3,294	Other long-term liabilities	–
Interest rate swaps				
Total derivatives not designated as hedging instruments		\$ 42,527		\$ 4,266
Total derivative liabilities		\$ 42,527		\$ 4,266

Cash Flow Hedges

The reporting of gains and losses on cash flow derivative hedging instruments depends on whether the gains or losses are effective at offsetting changes in the cash flows of the hedged item. The effective portion of the gains and losses on the derivative hedging instruments are recorded in other comprehensive income until recognized in earnings during the period that the hedged transaction takes place. The ineffective portion of the gains and losses from the derivative hedging instrument is recognized in earnings immediately.

As of June 30, 2013, the Company had cash flow hedges on the following volumes of natural gas production (in Bcf):

Year	Fixed price swaps
2013	168.8
2014	51.1

As of June 30, 2013, the Company recorded a net gain in accumulated other comprehensive income related to its hedging activities of \$119.7 million. This amount is net of a deferred income tax liability recorded as of June 30, 2013 of \$79.8 million. The amount recorded in accumulated other comprehensive income will be relieved over time and recognized in the statement of operations as the physical transactions being hedged occur. Assuming the market prices of natural gas futures as of June 30, 2013 remain unchanged, the Company would expect to transfer an aggregate after-tax net gain of \$112.5 million from accumulated other comprehensive income to earnings during the next 12 months. Gains or losses from derivative instruments designated as cash flow hedges are reflected as adjustments to gas sales in the unaudited condensed consolidated statements of operations. Volatility in earnings and other comprehensive income may occur in the future as a result of the Company's derivative activities.

The following tables summarize the before tax effect of all cash flow hedges on the unaudited condensed consolidated financial statements for the three- and six-month periods ended June 30, 2013 and 2012:

Derivative Instrument	Gain (Loss) Recognized in Other Comprehensive Income (Effective Portion)			
	For the three months ended June 30,		For the six months ended June 30,	
	2013	2012	2013	2012
Fixed price swaps	\$ 112,621	\$ (47,829)	\$ 38,719	\$ 171,128
Costless-collars	\$ –	\$ (12,370)	\$ –	\$ 44,141
	(in thousands)

Costless-collars	Gas Sales	\$ –	\$ (371)	\$ –	\$ 540

Fair Value Hedges

For fair value hedges, the gain or loss on the derivative instrument as well as the offsetting gain or loss on the hedged item are recognized in earnings immediately. For the three- and six-months ended June 30, 2012, the impact on earnings was not material and as of June 30, 2013 and December 31, 2012, the Company had no fair value hedges.

Other Derivative Contracts

Although the Company's basis swaps meet the objective of managing commodity price exposure, these trades are typically not entered into concurrent with the Company's derivative instruments that qualify as cash flow hedges and therefore do not generally qualify for hedge accounting. Basis swap derivative instruments that do not qualify as cash flow hedges are recorded on the balance sheet at their fair values under hedging assets, other assets and other current liabilities, as applicable, and all realized and unrealized gains and losses related to these contracts are recognized immediately in the unaudited condensed consolidated statements of operations as a component of gain (loss) on derivatives.

As of June 30, 2013, the Company had basis swaps on natural gas production that did not qualify for hedge accounting treatment of 14.1 Bcf and 15.2 Bcf in 2013 and 2014, respectively.

As of June 30, 2013, the Company had fixed price call options on 199.8 Bcf of 2015 natural gas production that did not qualify for hedge accounting treatment and 181.6 Bcf of 2014 natural gas production on fixed price swaps not designated for hedge accounting.

The Company is a party to an interest rate swap with counterparty banks. The interest rate swap was entered into in order to mitigate the Company's exposure to volatility in interest rates related to its building lease. The interest rate swap has a notional amount of \$170 million and expires on June 20, 2020. The Company did not designate the interest rate swap for hedge accounting. Changes in the fair value of the interest rate swap are included in gain (loss) on derivatives in the unaudited condensed consolidated statements of operations. The Company had no interest rate swaps in 2012.

The following table summarizes the before tax effect of basis swaps, fixed price call options that did not qualify for hedge accounting, fixed price swaps not designated for hedge accounting, and interest rate swaps not designated for hedge accounting on the unaudited condensed consolidated statements of operations for the three- and six-month periods ended June 30, 2013 and 2012:

Income Statement Classification	Unrealized Gain (Loss) Recognized in Earnings	
	For the three months ended June 30,	For the six months ended June 30,

As of June 30, 2013, the Company had fixed price swaps not designated for hedge accounting on the following volumes of natural gas production (in Bcf):

Year	Fixed price swaps not designated for hedge accounting
2014	181.6

(8) RECLASSIFICATIONS FROM ACCUMULATED OTHER COMPREHENSIVE INCOME

In February 2013, the FASB issued Accounting Standards Update No. 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income (“Update 2013-02”), which finalizes proposed ASU No. 2012-240, and seeks to improve the transparency of reporting reclassifications out of accumulated other comprehensive income. Update 2013-02 requires an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. GAAP to be reclassified in its entirety to net income.

The following tables detail the components of accumulated other comprehensive income and the related tax effects for the six-months ended June 30, 2013:

	For the six months ended June 30, 2013			
	Gains and (Losses) on Cash Flow Hedges (in thousands) ⁽¹⁾	Pension and Other Postretirement	Foreign Currency	Total
Beginning balance, December 31, 2012	\$ 172,166	\$ (22,311)	\$ (51)	\$ 149,804
Other comprehensive income (loss) before reclassifications	22,091	–	(2,447)	19,644
Amounts reclassified from accumulated other comprehensive income (loss) ⁽²⁾	(74,536)	534	–	(74,002)
Net current-period other comprehensive income (loss)	(52,445)	534	(2,447)	(54,358)
Ending balance, June 30, 2013	\$ 119,721	\$ (21,777)	\$ (2,498)	\$ 95,446

- (1) All amounts are net-of-tax.
- (2) See separate table below for details about these reclassifications.

15

The following table details the amounts reclassified from accumulated other comprehensive income into earnings for the six-months ended June 30, 2013:

Details about Accumulated Other Comprehensive Income	Amount Reclassified from Accumulated Other Comprehensive Income	Affected Line Item in the Consolidated Statement of Operations
Gains (losses) on cash flow hedges		
Settlements	\$ 124,956	Gas sales
Ineffectiveness	(731)	Gas sales
	124,225	Income before income taxes
	49,689	Provision for income taxes
	\$ 74,536	Net income
Pension and other postretirement		
Amortization of prior service cost included in net periodic pension cost ⁽¹⁾	\$ (890)	General and administrative expenses
	(890)	Loss before income taxes
	(356)	Provision for income taxes
	\$ (534)	Net loss
Total reclassifications for the period	\$ 74,002	Net income

(1) This accumulated other comprehensive income component is included in the computation of net periodic pension cost (see footnote 13 for additional details.)

(9) FAIR VALUE MEASUREMENTS

The carrying amounts and estimated fair values of the Company's financial instruments as of June 30, 2013 and December 31, 2012 were as follows:

June 30, 2013		December 31, 2012	
Carrying Amount	Fair Value	Carrying Amount	Fair Value
(in thousands)			

Cash and cash equivalents	\$ 25,685	\$ 25,685	\$ 53,583	\$ 53,583
Restricted cash	\$ –	\$ –	\$ 8,542	\$ 8,542
Unsecured revolving credit facility	\$ 230,000	\$ 230,000	\$ –	\$ –
Senior notes	\$ 1,668,934	\$ 1,791,429	\$ 1,669,473	\$ 1,917,005
Derivative instruments	\$ 264,201	\$ 264,201	\$ 287,878	\$ 287,878

The carrying values of cash and cash equivalents, restricted cash, accounts receivable, accounts payable, other current assets and current liabilities on the unaudited condensed consolidated balance sheets approximate fair value because of their short-term nature. For debt and derivative instruments, the following methods and assumptions were used to estimate fair value:

Debt: The fair values of the Company's senior notes were based on the market for the Company's publicly-traded debt as determined based on yield of the Company's 7.5% Senior Notes due 2018, which was 3.1% at June 30, 2013 and 2.6% at December 31, 2012, and its 4.10% Senior Notes due 2022, which was 4.2% at June 30, 2013. The carrying value of the borrowings under the Company's unsecured revolving credit facility at June 30, 2013, approximate fair value because the interest rate is variable and reflective of market rates. The Company considers the fair value of its debt to be a Level 2 measurement on the fair value hierarchy.

Derivative Instruments: The fair value of all derivative instruments is the amount at which the instrument could be exchanged currently between willing parties. The amounts are based on quoted market prices, best estimates obtained from counterparties and an option pricing model, when necessary, for price option contracts.

GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. As presented in the tables below, this hierarchy consists of three broad levels:

Level 1 valuations - Consist of unadjusted quoted prices in active markets for identical assets and liabilities and have the highest priority.

Level 2 valuations - Consist of quoted market information for the calculation of fair market value.

Level 3 valuations - Consist of internal estimates and have the lowest priority.

Pursuant to GAAP, the Company has classified its derivatives into these levels depending upon the data utilized to determine their fair values. The Company's Level 2 fair value measurements include fixed-price and floating-price swaps and are estimated using internal discounted cash flow calculations using the NYMEX futures index. The Company utilizes discounted cash flow models for valuing its interest rate derivatives. The net derivative values attributable to the Company's interest rate derivative contracts as of June 30, 2013 are based on (i) the contracted notional amounts, (ii) active market-quoted London Interbank Offered Rate ("LIBOR") yield curves and (iii) the applicable credit-adjusted risk-free rate yield curve. The Company's interest rate derivative asset and liability measurements represent Level 2 inputs in the hierarchy. The Company's Level 3 fair value measurements include fixed price call options and basis swaps. The Company's fixed price call options are valued using the Black-Scholes model, an industry standard option valuation model, and takes into account inputs such as contract terms, including maturity, and market parameters, including assumptions of the NYMEX futures index, interest rates, volatility and credit worthiness. The Company's basis swaps are estimated using internal discounted cash flow calculations based upon forward commodity price curves.

The accounting group, reporting to the Vice President and Controller, is responsible for determining the Company's Level 3 fair value measurements. Inputs to the Black-Scholes model, including the volatility input, which is the significant unobservable input for Level 3 fair value measurements, are obtained from a third-party pricing source, with independent verification of most significant inputs on a monthly basis. An increase (decrease) in volatility would result in an increase (decrease) in fair value measurement, respectively.

Edgar Filing: SOUTHWESTERN ENERGY CO - Form 10-Q

Assets and liabilities measured at fair value on a recurring basis are summarized below (in thousands):

	June 30, 2013			
	Fair Value Measurements Using:			
	Quoted			
	Prices Significant			
	in			
	Active	Other	Significant	Assets
	Markets	Observable	Unobservable	(Liabilities)
	(Level	Inputs	Inputs	at Fair
	1)	(Level 2)	(Level 3)	Value
Derivative assets	\$ –	\$ 295,761	\$ 10,967	\$ 306,728
Derivative liabilities	–	(3,602)	(38,925)	(42,527)
Total	\$ –	\$ 292,159	\$ (27,958)	\$ 264,201

	December 31, 2012			
	Fair Value Measurements Using:			
	Quoted			
	Prices Significant			
	in			
	Active	Other	Significant	Assets
	Markets	Observable	Unobservable	(Liabilities)
	(Level	Inputs	Inputs	at Fair
	1)	(Level 2)	(Level 3)	Value
Derivative assets	\$ –	\$ 287,993	\$ 4,151	\$ 292,144
Derivative liabilities	–	–	(4,266)	(4,266)
Total	\$ –	\$ 287,993	\$ (115)	\$ 287,878

The table below presents reconciliations for the change in net fair value of derivative assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three- and six-month periods ended June 30, 2013 and June 30, 2012. The fair values of Level 3 derivative instruments are estimated using proprietary valuation models that utilize both market observable and unobservable parameters. Level 3 instruments presented in the table consist of net derivatives valued using pricing models incorporating assumptions that, in the Company's judgment, reflect the assumptions a reasonable marketplace participant would have used at June 30, 2013 and June 30, 2012.

	For the three months ended June 30, 2013		For the six months ended June 30, 2012

Total debt	\$ 1,898,934	\$ 1,669,473

Issuance of Senior Notes and Subsidiary Guarantees

The indentures governing the Company's senior notes contain covenants that, among other things, restrict the ability of the Company and/or its subsidiaries' ability to incur liens, to engage in sale and leaseback transactions and to merge, consolidate, or sell assets. All of the Company's senior notes are currently guaranteed by its subsidiaries, SEECO, Inc. ("SEECO"), Southwestern Energy Production Company ("SEPCO") and Southwestern Energy Services Company ("SES"). If no default or event of default has occurred and is continuing, these guarantees will be released (i) automatically upon any sale, exchange, or transfer of all of the Company's equity interests in the guarantor; (ii) automatically upon the liquidation and dissolution of a guarantor; (iii) following delivery of notice to the trustee of the release of the guarantor of its obligations under the Company's credit facility; and (iv) upon legal or covenant defeasance or other satisfaction of the obligations under the notes.

Please refer to Note 17, "Condensed Consolidating Financial Information" in this Form 10-Q for additional information.

In March 2012, the Company issued \$1.0 billion of 4.10% Senior Notes due 2022 in a private placement. The 4.10% Senior Notes are redeemable at the Company's election, in whole or in part, at any time prior to December 15, 2021, at a redemption price equal to the greater of: (1) 100% of the principal amount of the notes to be redeemed then outstanding; and (2) the sum of the present values of the remaining scheduled payments of principal and interest on the notes to be redeemed (not including any portion of such payments of interest accrued to the date of redemption) discounted to the redemption date on a semiannual basis (assuming a 360-day year consisting of twelve 30-day months) as determined in accordance with the indenture, plus 35 basis points, plus, in either of such cases, accrued and unpaid interest to the date of redemption on the notes to be redeemed. In addition, if the Company undergoes a "change of control," as defined in the indenture, holders of the 4.10% Senior Notes will have the option to require the Company to purchase all or any portion of the notes at a purchase price equal to 101% of the principal amount of the notes to be purchased plus any accrued and unpaid interest to, but excluding, the change of control date. Payment obligations with respect to the 4.10% Senior Notes are currently guaranteed by the Company's subsidiaries, SEECO, SEPCO and SES, which guarantees may be unconditionally released in certain circumstances. The indentures governing the 4.10% Senior Notes and the Company's other senior notes contain covenants that, among other things, restrict the ability of the Company and/or its subsidiaries to incur liens, to engage in sale and leaseback transactions and to merge, consolidate or sell assets. In December 2012, the Company completed its offer to exchange up to \$1.0 billion aggregate principal amount of its 4.10% Senior Notes due 2022 (the "Exchange Notes", which were registered under the Securities Act of 1933, as amended (the "Act"), for any and all of its outstanding 4.10% Senior Notes due 2022, which were issued in a private placement in March 2012 (the "Private Notes"). The Exchange Notes have substantially identical terms to the Private Notes, except that the offering of the Exchange Notes was registered under the Act, and the Exchange Notes are not subject to any transfer restrictions. The Company exchanged \$999,500,000 of Private Notes for Exchange Notes, and has no further obligations under the related registration rights agreement.

Credit Facility

In February 2011, the Company amended and restated its unsecured revolving credit facility, increasing the borrowing capacity to \$1.5 billion and extending the maturity date to February 2016 (“Credit Facility”). The amount available under the Credit Facility may be increased to \$2.0 billion at any time upon the Company’s agreement with its existing or additional lenders. The interest rate on the Credit Facility is calculated based upon our debt rating and is currently 200 basis points over the current London Interbank Offered Rate (LIBOR) and was 200 basis points over LIBOR at June 30, 2013. The Credit Facility is guaranteed by the Company’s subsidiary, SEECO and requires additional subsidiary guarantors if certain guaranty coverage levels are not satisfied. The facility contains covenants which impose certain restrictions on the Company. Under the credit agreement, the Company may not issue total debt in excess of 60% of its total adjusted capital and must maintain a ratio of earnings before interest, taxes, depreciation and amortization (EBITDA) to interest expense of 3.5 or above. The terms of the Credit Facility also include covenants that restrict the ability of the Company and its material subsidiaries to merge, consolidate or sell all or substantially all of their assets, restrict the ability of the Company and its subsidiaries to incur liens and restrict the ability of the Company’s subsidiaries to incur indebtedness. As of June 30, 2013, the Company was in compliance with the covenants of its debt agreements. While the Company believes all of the lenders under the Credit Facility have the ability to provide funds, it cannot predict whether each will be able to meet its obligation under the facility.

(11) COMMITMENTS AND CONTINGENCIES

Commitments

In the first quarter of 2010, the Company was awarded exclusive licenses by the Province of New Brunswick in Canada to conduct an exploration program covering approximately 2.5 million acres in the province. The licenses require the Company to make certain capital investments in New Brunswick of approximately \$47.0 million in the aggregate over a three year period. In order to obtain the licenses, the Company provided promissory notes payable on demand to the Minister of Finance of the Province of New Brunswick with an aggregate principal amount of \$44.5 million Canadian dollars. The promissory notes secure the Company's capital expenditure obligations under the licenses and are returnable to the Company to the extent the Company performs such obligations. If the Company fails to fully perform, the Minister of Finance may retain a portion of the applicable promissory notes in an amount equal to any deficiency. The Company commenced its Canada exploration program in 2010 and no liability has been recognized in connection with the promissory notes due to the Company's investments in New Brunswick as of June 30, 2013 and its future investment plans. In December 2012, we received two one-year extensions to our exploration license agreements which expire on March 16, 2014 and March 16, 2015, respectively.

In response to the Company's well performance, SES and SEPCO entered into new and amended natural gas transportation and gathering arrangements with third party pipelines, during the second quarter of 2013, in support of the Company's production in the Marcellus Shale Play. As of June 30, 2013, SES's and SEPCO's obligations for demand and similar charges under the firm transportation agreements and gathering agreements totaled approximately \$3.1 billion and the Company has guarantee obligations of up to \$100.0 million of that amount.

Environmental Risk

The Company is subject to laws and regulations relating to the protection of the environment. Environmental and cleanup related costs of a non-capital nature are accrued when it is both probable that a liability has been incurred and when the amount can be reasonably estimated. Management believes any future remediation or other compliance related costs will not have a material effect on the financial position or reported results of operations of the Company.

Litigation

Tovah Energy

In February 2009, SEPCO was added as a defendant in a Third Amended Petition in the matter of Tovah Energy, LLC and Toby Berry-Helfand v. David Michael Grimes, et. al. In the Sixth Amended Petition, filed in July 2010, in the 273rd District Court in Shelby County, Texas (collectively, the “Sixth Petition”), plaintiff alleged that, in 2005, they provided SEPCO with proprietary data regarding two prospects in the James Lime formation pursuant to a confidentiality agreement and that SEPCO refused to return the proprietary data to the plaintiff, subsequently acquired leases based upon such proprietary data and profited therefrom. Among other things, the plaintiff’s allegations in the Sixth Petition included various statutory and common law claims, including, but not limited to claims of misappropriation of trade secrets, violation of the Texas Theft Liability Act, breach of fiduciary duty and confidential relationships, various fraud based claims and breach of contract, including a claim of breach of a purported right of first refusal on all interests acquired by SEPCO between February 2005 and February 2006. In the Sixth Petition, plaintiff sought actual damages of over \$55.0 million as well as other remedies, including special damages and punitive damages of four times the amount of actual damages established at trial.

Immediately before the commencement of the trial in November 2010, plaintiff was permitted, over SEPCO’s objections, to file a Seventh Amended Petition claiming actual damages of \$46.0 million and also seeking the equitable remedy of disgorgement of all profits for the misappropriation of trade secrets and the breach of fiduciary duty claims. In December 2010, the jury found in favor of the plaintiff with respect to all of the statutory and common law claims and awarded \$11.4 million in compensatory damages. The jury did not, however, award the plaintiff any special, punitive or other damages. In addition, the jury separately determined that SEPCO’s profits for purposes of disgorgement were \$381.5 million. This profit determination does not constitute a judgment or an award. The plaintiff’s entitlement to disgorgement of profits as an equitable remedy will be determined by the judge and it is within the judge’s discretion to award none, some or all the amount of profit to the plaintiff. In December 2010, the plaintiff filed a motion to enter the judgment based on the jury’s verdict. In February 2011, SEPCO filed a motion for a judgment notwithstanding the verdict and a motion to disregard certain findings. In March 2011, the plaintiff filed an amended motion for judgment and intervenor filed its motion for judgment seeking not only the monetary damages and the profits determined by the jury but also seeking, as a new remedy, a constructive trust for profits from 143 wells as well

as future drilling and sales of properties in the prospect areas. At the suggestion of the judge, all parties voluntarily agreed to participate in non-binding mediation efforts. The mediation occurred in April 2011 and was unsuccessful. In June 2011, SEPCO received by mail a letter dated June 2011 from the judge, in which he made certain rulings with respect to the post-verdict motions and responses filed by the parties. In his rulings, the judge denied SEPCO's motion for judgment, judgment notwithstanding the verdict and to disregard certain findings. Plaintiff's and intervenor's claim for a constructive trust was denied but the judge ruled that plaintiff and intervenor shall recover from SEPCO \$11.4 million and a reasonable attorney's fee of 40% of the total damages awarded and are entitled to recover on their claim for disgorgement. The judge instructed that SEPCO calculate the profit on the designated wells for each respective period. SEPCO performed the calculation and provided it to the judge in June 2011. In July 2011, plaintiff and intervenor filed a letter with the court raising objections to the accounting provided by SEPCO, to which SEPCO filed a response in July 2011. In July 2011, the judge sent a letter to the parties in which he ruled that after reviewing the parties' respective position letters, he was awarding \$23.9 million in disgorgement damages in favor of the plaintiff and intervenor. In the July 2011 letter, the judge instructed the plaintiff and intervenor to prepare a judgment for his approval prior to July 2011 consistent with his findings in his June 2011 letter and the disgorgement award. In August 2011, a judgment was entered pursuant to which plaintiff and intervenor are entitled to recover approximately \$11.4 million in actual damages and approximately \$23.9 million in disgorgement as well as prejudgment interest and attorneys' fees which currently are estimated to be up to \$8.9 million and all costs of court of the plaintiff and intervenor. In September 2011, SEPCO filed a motion for a new trial and in November 2011 filed a notice of appeal. In November 2011, the court approved SEPCO's supersedeas bond in the amount of \$14.1 million, which stays execution on the judgment pending appeal. The bond covers the \$11.4 million judgment for actual damages, plus \$1.3 million in pre-judgment interest, \$1.3 million in post-judgment interest (estimating two years for the duration of appeal), and court costs.

In June 2012, SEPCO filed its appellate brief and, in June 2012, plaintiff and intervenor filed a cross-appellate brief seeking limited remand to reassess the disgorgement determination. The parties filed their responses to the appellate and cross appellate briefs in November 2012. Oral argument was held before the Tyler Court of Appeals on March 8, 2013. On July 10, 2013, the Tyler Court of Appeals ordered that (1) the judgment awarding plaintiff and intervenor \$23.9 million as disgorgement of illicit gains be reversed and judgment rendered that they take nothing, (2) the award of \$11.4 million for actual damages, insofar as it is based on the jury's findings of breach of fiduciary duty, fraud, breach of contract, and theft of trade secret is reversed and judgment rendered that plaintiff and intervenor take nothing under those theories of recovery, (3) the award of \$11.4 million to plaintiff and intervenor as damages for misappropriation of trade secret is affirmed, (4) the case be remanded to the trial court for a determination and award of attorney's fees for SEPCO as the prevailing party under the Texas Theft Liability Act, and (5) in all other respects, the judgment is affirmed. On July 25, 2013, SEPCO filed its motion for rehearing with the Tyler Court of Appeals, seeking reversal of every part of plaintiff and intervenor's recovery. Plaintiff and intervenor filed an unopposed motion for an extension of their deadline to file a motion for rehearing, which the Tyler Court of Appeals has granted; their deadline to file their motion is now August 26, 2013.

Based on the Company's understanding and judgment of the facts and merits of this case, including appellate defenses, and after considering the advice of counsel, the Company has determined that, although reasonably possible after exhaustion of all appeals, an adverse final outcome to this lawsuit is not probable. As such, the Company has not accrued any amounts with respect to this lawsuit. If the plaintiff and intervenor were to ultimately prevail in the appellate process, the Company currently estimates, based on the judgments to date, that SEPCO's potential liability would be up to \$45.5 million, including interest and attorney's fees. The Company's assessment may change in the future due to occurrence of certain events, such as denied appeals, and such re-assessment could lead to the

determination that the potential liability is probable and could be material to the Company's results of operations, financial position or cash flows.

Bureau of Land Management

In March 2010, the Company's subsidiary, SEECO, was served with a subpoena from a federal grand jury in Little Rock, Arkansas. Based on the documents requested under the subpoena and subsequent discussions described below, the Company believes the grand jury is investigating matters involving approximately 27 horizontal wells operated by SEECO in Arkansas, including whether appropriate leases or permits were obtained therefore and whether royalties and other production attributable to federal lands have been properly accounted for and paid. The Company believes it has fully complied with all requests related to the federal subpoena and delivered its affidavit to that effect. The Company and representatives of the Bureau of Land Management and the U.S. Attorney have had discussions since the production of the documents pursuant to the subpoena. In January 2011, the Company voluntarily produced additional materials informally requested by the government arising from these discussions. Although, to the Company's knowledge, no proceeding in this matter has been initiated against SEECO, the Company cannot predict whether or when one might be

initiated. The Company intends to fully comply with any further requests and to cooperate with any related investigation. No assurance can be made as to the time or resources that will need to be devoted to this inquiry or the impact of the final outcome of the discussions or any related proceeding.

Other

We are subject to various litigation, claims and proceedings that have arisen in the ordinary course of business. Management believes, individually or in aggregate, such litigation, claims and proceedings will not have a material adverse impact on our financial position, results of operations or cash flows but these matters are subject to inherent uncertainties and management's view may change in the future. If an unfavorable final outcome were to occur, there exists the possibility of a material impact on our financial position, results of operations or cash flows for the period in which the effect becomes reasonably estimable. We accrue for such items when a liability is both probable and the amount can be reasonably estimated.

(12) SUPPLEMENTAL DISCLOSURES OF CASH FLOW INFORMATION

Supplemental disclosures of cash flow information:

	For the three months ended June 30, 2013		For the six months ended June 30, 2013	
	2012	2012	2012	2012
	(in thousands)			
Cash paid for interest	\$ 5,875	\$ 3,368	\$ 50,218	\$ 29,820
Cash paid for income taxes	965	–	17,306	68
Noncash property changes	10,325	3,220	46,182	20,789

(13) PENSION PLAN AND OTHER POSTRETIREMENT BENEFITS

The Company has defined pension and postretirement benefit plans which cover substantially all of the Company's employees. Net periodic pension and other postretirement benefit costs include the following components for the three- and six-month periods ended June 30, 2013 and 2012:

	Pension Benefits			
	For the three months ended June 30, 2013		For the six months ended June 30, 2012	
	2013	2012	2013	2012
	(in thousands)			
Service cost	\$ 3,448	\$ 2,735	\$ 6,895	\$ 5,471
Interest cost	1,026	1,012	2,052	2,025
Expected return on plan assets	(1,534)	(1,356)	(3,068)	(2,713)
Amortization of prior service cost	26	72	52	143
Amortization of net loss	385	305	770	610
Net periodic benefit cost	\$ 3,351	\$ 2,768	\$ 6,701	\$ 5,536
	Postretirement Benefits			
	For the three months ended June 30, 2013		For the six months ended June 30, 2012	
	2013	2012	2013	2012
	(in thousands)			
Service cost	\$ 574	\$ 458	\$ 1,148	\$ 916
Interest cost	110	99	220	199
Amortization of transition obligation	–	16	–	32
Amortization of prior service cost	3	4	7	7
Amortization of net loss	30	23	60	46
Net periodic benefit cost	\$ 717	\$ 600	\$ 1,435	\$ 1,200

As of June 30, 2013, the Company has contributed \$6.0 million to the pension plan and \$0.1 million to the postretirement benefit plan, and expects to contribute \$12.0 million to the pension plan and \$0.1 million to the postretirement benefit plan.

The Company maintains a non-qualified deferred compensation supplemental retirement savings plan (“Non-Qualified Plan”) for certain key employees who may elect to defer and contribute a portion of their compensation, as permitted by the plan. Shares of the Company’s common stock purchased under the terms of the Non-Qualified Plan are presented as treasury stock and totaled 14,442 shares at June 30, 2013 compared to 64,715 shares at December 31, 2012.

(14) STOCK-BASED COMPENSATION

The Company recognized the following amounts in employee stock-based compensation costs for the three- and six-months ended June 30, 2013 and 2012:

	For the three months ended June 30, 2013		For the six months ended June 30, 2012	
	2013	2012	2013	2012
	(in thousands)			
Stock-based compensation cost – expensed	\$ 2,968	\$ 2,705	\$ 5,962	\$ 5,549
Stock-based compensation cost – capitalized	\$ 2,872	\$ 2,442	\$ 5,734	\$ 5,306

As of June 30, 2013, there was \$43.7 million of total unrecognized compensation cost related to the Company's unvested stock option and restricted stock grants. This cost is expected to be recognized over a weighted-average period of 2.5 years.

The following table summarizes stock option activity for the first six months ended June 30, 2013 and provides information for options outstanding as of June 30, 2013:

	Number of Options	Weighted Average Exercise Price
Outstanding at December 31, 2012	3,649,520	\$ 29.84
Granted	5,210	34.84
Exercised	(466,887)	11.32
Forfeited or expired	(39,369)	37.95
Outstanding at June 30, 2013	3,148,474	32.50
Exercisable at June 30, 2013	1,931,580	\$ 30.62

The following table summarizes restricted stock activity for the six months ended June 30, 2013 and provides information for unvested shares as of June 30, 2013:

	Number of Shares	Weighted Average Grant Date Fair Value
Unvested shares at December 31, 2012	1,117,515	\$ 35.64
Granted	13,540	36.60
Vested	(26,044)	36.17
Forfeited	(41,501)	35.88
Unvested shares at June 30, 2013	1,063,510	\$ 35.63

(15) SEGMENT INFORMATION

The Company's reportable business segments have been identified based on the differences in products or services provided. Revenues for the E&P segment are derived from the production and sale of natural gas and crude oil. The Midstream Services segment generates revenue through the marketing of both Company and third-party produced natural gas volumes and through gathering fees associated with the transportation of natural gas to market.

Summarized financial information for the Company's reportable segments is shown in the following table. The accounting policies of the segments are the same as those described in Note 1 of the Notes to Consolidated Financial Statements included in Item 8 of the 2012 Annual Report on Form 10-K. Management evaluates the performance of its segments based on operating income, defined as operating revenues less operating costs. Income before income taxes, for the purpose of reconciling the operating income amount shown below to consolidated income before income taxes, is the sum of operating income, interest expense and interest and other income (loss). The "Other" column includes items not related to the Company's reportable segments including real estate and corporate items.

- (1) The operating loss for the E&P segment for the three and six months ended June 30, 2012 includes a \$800.7 million non-cash ceiling test impairment of our natural gas and oil properties.
- (2) Interest expense and the provision for income taxes by segment are allocated as they are incurred at the corporate level.
- (3) Other assets represent corporate assets not allocated to segments and assets, including restricted cash and investments in cash equivalents, for non reportable segments.
- (4) Capital investments includes increases of \$7.5 million and \$0.2 million for the three-month periods ended June 30, 2013 and 2012, respectively, and increases of \$40.4 million and \$15.5 million for the six-month periods ended June 30, 2013 and 2012, respectively, relating to the change in accrued expenditures between periods.

Included in intersegment revenues of the Midstream Services segment are \$559.0 million and \$245.5 million for the three months ended June 30, 2013 and 2012, respectively, and \$978.5 million and \$531.6 million for the six months ended June 30, 2013 and 2012, respectively, for marketing of the Company's E&P sales. Corporate assets include cash and cash equivalents, restricted cash, furniture and fixtures, prepaid debt and other costs. Corporate general and administrative costs, depreciation expense and taxes other than income are allocated to the segments. For the three

months ended June 30, 2013 and 2012, capital investments within the E&P segment include \$5.6 million and \$2.3 million, respectively, related to the Company's activities in Canada. For the six months ended June 30, 2013 and 2012, capital investments within the E&P segment include \$7.9 million and \$4.7 million, respectively, relating to the Company's activities in Canada. At June 30, 2013, E&P segment assets include \$51.3 million and at June 30, 2012, assets include \$33.2 million related to the Company's activities in Canada.

(16) NEW ACCOUNTING PRONOUNCEMENTS ADOPTED

In February 2013, the FASB issued Accounting Standards Update No. 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income (“Update 2013-02”), which finalizes proposed ASU No. 2012-240, and seeks to improve the transparency of reporting reclassifications out of accumulated other comprehensive income. Update 2013-02 replaces the presentation requirements in ASU No. 2011-05, Comprehensive Income (Topic 220): Presentation of Comprehensive Income, and ASU No. 2011-12, Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05. Update 2013-02 requires an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. GAAP to be reclassified in its entirety to net income. For public entities, Update 2013-02 is effective prospectively for reporting periods beginning after December 15, 2012, with early adoption permitted. The implementation of the disclosure requirement did not have a material impact on the Company’s consolidated results of operations, financial position or cash flows.

In January 2013, the FASB issued Accounting Standards Update No. 2013-01, Balance Sheet (Topic 210): Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities (“Update 2013-01”), which finalizes Proposed ASU No. 2012-250 and clarifies the scope of transactions that are subject to disclosures concerning offsetting. Update 2013-01 addresses implementation issues regarding the scope of ASU No. 2011-11, Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities, issued in December 2011. Update 2013-01 clarifies that the scope of the disclosures under U.S. GAAP is limited to derivatives, repurchase agreements and reverse purchase agreements, and securities borrowing and securities lending transactions that are offset either in accordance with FASB ASC Section 210-20-45, Balance Sheet—Offsetting—Other Presentation Matters, or FASB ASC Section 815-10-45, Derivatives and Hedging—Overall—Other Presentation Matters, or are subject to a master netting arrangement or similar agreement. Update 2013-01 requires an entity (1) to apply the amendments for annual reporting periods beginning on or after January 1, 2013 and (2) to provide the required disclosures retrospectively for all comparative periods presented. The implementation of the disclosure requirement did not have a material impact on the Company’s consolidated results of operations, financial position or cash flows.

(17) CONDENSED CONSOLIDATING FINANCIAL INFORMATION

The Company is providing condensed consolidating financial information for SEECO, SEPCO and SES, its subsidiaries that are currently guarantors of the Company’s registered public debt, and for its other subsidiaries that are not guarantors of such debt. These wholly owned subsidiary guarantors have jointly and severally, fully and unconditionally guaranteed the Company’s 7.35% Senior Notes, 7.125% Senior Notes and 4.10% Senior Notes. The subsidiary guarantees (i) rank equally in right of payment with all of the existing and future senior debt of the

subsidiary guarantors; (ii) rank senior to all of the existing and future subordinated debt of the subsidiary guarantors; (iii) are effectively subordinated to any future secured obligations of the subsidiary guarantors to the extent of the value of the assets securing such obligations; and (iv) are structurally subordinated to all debt and other obligations of the subsidiaries of the guarantors.

The Company has not presented separate financial and narrative information for each of the subsidiary guarantors because it believes that such financial and narrative information would not provide any additional information that would be material in evaluating the sufficiency of the guarantees. The following condensed consolidating financial information summarizes the results of operations, financial position and cash flows for the Company's guarantor and non-guarantor subsidiaries.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following updates information as to Southwestern Energy Company's financial condition provided in our 2012 Annual Report on Form 10-K and analyzes the changes in the results of operations between the three- and six-month periods ended June 30, 2013 and 2012. For definitions of commonly used natural gas and oil terms used in this Form 10-Q, please refer to the "Glossary of Certain Industry Terms" provided in our 2012 Annual Report on Form 10-K.

The following discussion contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in forward-looking statements for many reasons, including the risks described in the "Cautionary Statement About Forward-Looking Statements" in the forepart of this Form 10-Q, in Item 1A, "Risk Factors" in Part I and elsewhere in our 2012 Annual Report on Form 10-K, and Item 1A, "Risk Factors" in Part II in this Form 10-Q and any other Form 10-Q filed during the fiscal year. You should read the following discussion with our unaudited condensed consolidated financial statements and the related notes included in this Form 10-Q.

OVERVIEW

Background

Southwestern Energy Company is an independent energy company engaged in natural gas and oil exploration, development and production, or E&P. We are also focused on creating and capturing additional value through our natural gas gathering and marketing businesses, which we refer to as Midstream Services. We operate principally in two segments: E&P and Midstream Services.

Our primary business is the exploration for and production of natural gas and oil, with our current operations being principally focused within the United States on development of an unconventional gas reservoir located on the Arkansas side of the Arkoma Basin, which we refer to as the Fayetteville Shale play. We are also actively engaged in exploration and production activities in Pennsylvania, where we are targeting the unconventional gas reservoir known as the Marcellus Shale, and to a lesser extent in Texas and in Arkansas and Oklahoma in the Arkoma Basin. We have recently commenced exploration operations in Arkansas and Louisiana testing an unconventional oil play targeting the Lower Smackover Brown Dense, or LSBDD formation, as well as in Colorado and Montana. In 2010, we commenced

an exploration program in New Brunswick, Canada, which represents our first operations outside of the United States.

We are focused on providing long-term growth in the net asset value of our business. We derive the vast majority of our operating income and cash flow from the natural gas production of our E&P business and expect this to continue in the future. We expect that growth in our operating income and revenues will depend primarily on natural gas prices and our ability to increase our natural gas production. We expect our natural gas production volumes will continue to increase due to our ongoing development of the Fayetteville Shale play in Arkansas and the Marcellus Shale play in Pennsylvania. The price we expect to receive for our natural gas is a critical factor in the capital investments we make in order to develop our properties and increase our production. In recent years, there has been volatility in natural gas prices as evidenced by New York Mercantile Exchange, or NYMEX, natural gas prices ranging from a high of \$13.58 per MMBtu in 2008 to a recent low of \$1.91 per MMBtu in April 2012. Natural gas prices fluctuate due to a variety of factors we cannot control or predict. These factors, which include increased supplies of natural gas due to greater exploration and development activities, weather conditions, political and economic events, and competition from other energy sources, impact supply and demand for natural gas, which in turn determines the sale prices for our production. In addition to the factors identified above, the prices we realize for our production are affected by our hedging activities as well as locational differences in market prices.

Three Months Ended June 30, 2013 Compared with Three Months Ended June 30, 2012

We reported a net income of \$245.6 million for the three months ended June 30, 2013, or \$0.70 per diluted share, compared to a net loss of \$405.1 million, or \$1.16 per diluted share, for the comparable period in 2012.

Our natural gas and oil production increased to 160.1 Bcfe for the three months ended June 30, 2013, up 17% from 137.4 Bcfe for the three months ended June 30, 2012. The 22.7 Bcfe increase in our second quarter 2013 production was primarily due to a 24.0 Bcf increase in net production from our Marcellus Shale properties and a 0.3 Bcf increase in net production from our Fayetteville Shale properties, which more than offset a 1.6 Bcfe decrease in net production from our Ark-La-Tex properties primarily due to the sale of certain East Texas oil and natural gas properties in 2012.

The average price realized for our gas production, including the effects of hedges, increased 23% to \$3.85 per Mcf for the three months ended June 30, 2013 compared to \$3.12 per Mcf for the same period in 2012.

Our E&P segment reported operating income of \$252.5 million for the three months ended June 30, 2013, up from an operating loss of \$718.3 million for the three months ended June 30, 2012. The loss for the three months ended June 30, 2012 included an \$800.7 million non-cash ceiling test impairment of our natural gas and oil properties. Excluding the \$800.7 non-cash ceiling test impairment, operating income for the three months ended June 30, 2013 increased \$170.2 million as a result of an increase in revenue of \$110.5 million from increased prices from the sale of our natural gas production, an increase in revenue of \$71.4 million from higher natural gas production volumes, offset slightly by an increase in operating costs and expenses of \$12.8 million due to increased compression and gathering costs.

Operating income for our Midstream Services segment was \$72.9 million for the three months ended June 30, 2013, up from \$71.8 million for the three months ended June 30, 2012, primarily due to an increase of \$11.8 million in gas gathering revenues and an increase of \$3.4 million in the margin generated from our gas marketing activities, which was partially offset by a \$14.1 million increase in operating costs and expenses associated with an increase in gas volumes gathered, exclusive of gas purchase costs.

Capital investments were \$694.9 million for the three months ended June 30, 2013, of which \$631.2 million was invested in our E&P segment, compared to \$588.6 million for the same period of 2012, of which \$531.8 million was invested in our E&P segment.

Six Months Ended June 30, 2013 Compared with Six Months Ended June 30, 2012

We reported a net income of \$373.1 million for the six months ended June 30, 2013, or \$1.06 per diluted share, compared to net loss of \$297.4 million, or \$0.85 per diluted share, for the comparable period in 2012.

Our natural gas and oil production increased to 307.9 Bcfe for the six months ended June 30, 2013, up 14% from 270.8 Bcfe for the six months ended June 30, 2012. The 37.1 Bcfe increase in our 2013 production was primarily due to a 38.2 Bcf increase in net production from our Marcellus Shale properties and a 3.3 Bcf increase in net production from our Fayetteville Shale properties, which more than offset a 4.4 Bcfe decrease in net production from our Ark-La-Tex properties primarily due to the sale of certain East Texas oil and natural gas properties in 2012. The average price realized for our gas production, including the effects of hedges, increased 11% to \$3.65 per Mcf for the six months ended June 30, 2013 compared to \$3.29 per Mcf for the same period in 2012.

Our E&P segment reported operating income of \$428.3 million for the six months ended June 30, 2013, up from an operating loss of \$603.7 million for the six months ended June 30, 2012. The loss for the six months ended June 30, 2012 included an \$800.7 million non-cash ceiling test impairment of our natural gas and oil properties. Excluding the \$800.7 non-cash ceiling test impairment, operating income for the six months ended June 30, 2013 increased \$231.3 million as a result of an increase in revenue of \$101.4 million from increased prices realized from the sale of our natural gas production, an increase in revenue of \$122.1 million from higher natural gas production volumes, an increase in revenues of \$3.8 million from higher oil and NGL volumes, and a decrease in operating costs and expenses of \$2.1 million due primarily to lower salt water disposal costs.

Operating income for our Midstream Services segment was \$149.2 million for the six months ended June 30, 2013, up from \$141.1 million for the six months ended June 30, 2012, primarily due to an increase of \$20.9 million in gas gathering revenues and an increase of \$2.8 million in the margin generated from our gas marketing activities, which was partially offset by a \$15.6 million increase in operating costs and expenses associated with an increase in gas volumes gathered, exclusive of gas purchase costs.

Net cash provided by operating activities increased 5% to \$877.6 million for the six months ended June 30, 2013, up from \$837.4 million for the same period in 2012, due to an increase in net income adjusted for non-cash expenses primarily resulting from increased revenues due to higher realized gas prices, higher natural gas production and gathering volumes, offset slightly by a decrease in changes in working capital. Capital investments were \$1,212.9 million for the six months ended June 30, 2013, of which \$1,106.6 million was invested in our E&P segment, compared to \$1,161.7 million for the same period of 2012, of which \$1,065.0 million was invested in our E&P segment.

RESULTS OF OPERATIONS

The following discussion of our results of operations for our segments is presented before intersegment eliminations. We evaluate our segments as if they were stand alone operations and accordingly discuss their results prior to any intersegment eliminations. Interest expense, income tax expense and stock-based compensation are discussed on a consolidated basis.

Exploration and Production

	For the three months ended June 30,		For the six months ended June 30,	
	2013	2012	2013	2012
Revenues (in thousands)	\$ 618,558	\$ 435,587	\$ 1,130,161	\$ 900,931

(1) Represents the realized commodity derivative income (loss) associated with derivatives not designated or not qualifying for hedge accounting.

(2) Had we included the unrealized effects of hedging contracts not designated or not qualifying for hedge accounting, our average price for total natural gas would have been \$4.42, \$3.12, \$3.85, and \$3.30 per Mcf for the three months ended June 30, 2013 and 2012, and the six months ended June 30, 2013 and 2012, respectively.

Revenues

Revenues for our E&P segment were \$618.6 million for the three months ended June 30, 2013, up \$183.0 million, or 42%, compared to the same period in 2012. Increased prices realized from the sale of our natural gas production increased revenues by \$110.5 million, and higher natural gas production volumes increased revenues by \$71.4 million. E&P revenues were \$1.1 billion for the six months ended June 30, 2013, up \$229.2 million, or 25%. The increase in revenue was driven by a \$101.4 million increase from prices realized from the sale of our natural gas production, a \$122.1 million increase from higher natural gas production volumes, and a \$3.8 million increase from higher oil and NGL volumes. We expect our natural gas production volumes to continue to increase due to our development and growth of our shale properties. Natural gas prices are difficult to predict and subject to wide price fluctuations. As of July 30, 2013, we had hedged 168.8 Bcf of our remaining 2013 gas production and 232.7 Bcf of our 2014 gas production to limit our exposure to price fluctuations. We refer you to Note 7 to the unaudited condensed consolidated financial statements included in this Form 10-Q and to the discussion of "Commodity Prices" provided below for additional information.

Production

For the three months ended June 30, 2013, our natural gas and oil production increased 17% to 160.1 Bcfe, up from 137.4 Bcfe from the same period in 2012, and was produced entirely by our properties in the United States. The 22.7 Bcfe increase in our 2013 production was primarily due to a 24.0 Bcf increase in net production from our Marcellus Shale properties and a 0.3 Bcf increase in net production from our Fayetteville Shale properties, which more than offset a 1.6 Bcfe decrease in net production from our Ark-La-Tex properties. Net production from our Fayetteville Shale and Marcellus Shale properties was 121.2 Bcf and 33.9 Bcf, respectively, for the three months ended June 30, 2013 compared to 121.0 Bcf and 9.9 Bcf, respectively, for the same period in 2012. For the six months ended June 30, 2013, our natural gas and oil production increased 14% to 307.9 Bcfe, up from 270.8 Bcfe from the same period in 2012, and was produced entirely by our properties in the United States. The 37.1 Bcfe increase in our 2013 production was primarily due to a 38.2 Bcf increase in net natural gas production from our Marcellus Shale properties and a 3.3 Bcf increase in net production from our Fayetteville Shale play, which more than offset a 4.4 Bcfe decrease in net production from our Ark-La-Tex properties. Net production from our Fayetteville Shale and Marcellus Shale properties was 240.1 Bcf and 57.4 Bcf, respectively, for the six months ended June 30, 2013 compared to 236.8 Bcf and 19.2 Bcf, respectively, for the same period in 2012.

Commodity Prices

The average realized price for our natural gas production, including the effects of cash flow hedges, increased to \$3.85 per Mcf for the three months ended June 30, 2013, as compared to \$3.12 for the same period in 2012. The increase was the result of a \$1.82 per Mcf increase in average natural gas prices, excluding hedges, partially offset by a \$1.09 per Mcf decrease in the impact of our price hedging activities. The average price realized for our natural gas production, excluding the effects of hedges, increased 103% to \$3.58 per Mcf for the three months ended June 30, 2013, as compared to the same period in 2012. Our cash flow hedges increased the average realized natural gas price \$0.27 per Mcf for the three months ended June 30, 2013 compared to an increase of \$1.36 per Mcf for the same period in 2012. The average price realized for our natural gas production, including the effects of hedges, increased 11% to \$3.65 per Mcf for the six months ended June 30, 2013, as compared to the same period in 2012. The increase in the average price realized for six months ended June 30, 2013, as compared to the same period in 2012, primarily reflects the \$1.24 Mcf increase in average gas prices, excluding hedges, which was partially offset by the \$0.88 Mcf decreased effect of our price hedging activities. Our hedging activities increased the average natural gas price \$0.41 per Mcf for the six months ended June 30, 2013 compared to an increase of \$1.29 per Mcf for the same period in 2012. We periodically enter into various hedging and other financial arrangements with respect to a portion of our projected natural gas and crude oil production in order to ensure certain desired levels of cash flow and to minimize the impact of price fluctuations, including fluctuations in locational basis differentials (we refer you to Item 3 and Note 7 to the unaudited condensed consolidated financial statements included in this Form 10-Q for additional discussion).

Our E&P segment receives a sales price for our natural gas at a discount to average monthly NYMEX settlement prices due to locational basis differentials, while transportation charges and fuel charges also reduce the price received. Excluding the impact of hedges, the average price received for our natural gas production for the six months ended June 30, 2013 of \$3.24 per Mcf was approximately \$0.47 lower than the average monthly NYMEX settlement

price, primarily due to locational basis differentials and transportation costs. We protected approximately 51% of our natural gas production for the six months ended June 30, 2013 from the impact of widening basis differentials through our hedging activities and sales arrangements. For the remainder of 2013, we expect our total natural gas sales discount to NYMEX to be approximately \$0.55 per Mcf. At June 30, 2013, we had basis protected on approximately 128 Bcf of our remaining 2013 expected natural gas production through financial hedging activities and physical sales arrangements at a differential to NYMEX natural gas prices of approximately (\$0.06) per Mcf, excluding transportation and fuel charges. Additionally, at June 30, 2013, we had basis protected on approximately 74 Bcf and 17 Bcf of our 2014 and 2015 expected natural gas production, respectively, through financial hedging activities and physical sales arrangements.

In addition to the basis hedges discussed above, at June 30, 2013, we had NYMEX fixed price hedges in place on notional volumes of 168.8 Bcf of our remaining 2013 natural gas production at an average price of \$4.68 per MMBtu and notional volumes of 232.7 Bcf of our 2014 natural gas production at an average price of \$4.41 per MMBtu.

Operating Income

Our E&P segment reported operating income of \$252.5 million for the three months ended June 30, 2013, up from an operating loss of \$718.3 million for the three months ended June 30, 2012. The loss for the three months ended June 30, 2012 included an \$800.7 million non-cash ceiling test impairment of our natural gas and oil properties. Excluding the \$800.7 non-cash ceiling test impairment, operating income for the three months ended June 30, 2013 increased \$170.2 million as a result of an increase in revenue of \$110.5 million from increased prices realized from the sale of our natural gas production, an increase in revenue of \$71.4 million from higher natural gas production volumes, offset slightly by an increase in operating costs and expenses of \$12.8 million primarily due to increased compression costs. Our E&P segment reported operating income of \$428.3 million for the six months ended June 30, 2013, up from an operating loss of \$603.7 million for the six months ended June 30, 2012. The loss for the six months ended June 30, 2012 included an \$800.7 million non-cash ceiling test impairment of our natural gas and oil properties. Excluding the \$800.7 non-cash ceiling test impairment, operating income for the six months ended June 30, 2013 increased \$231.3 million as a result of an increase in revenue of \$101.4 million from increased prices realized from the sale of our natural gas production, an increase in revenue of \$122.1 million from higher natural gas production volumes, an increase in revenues of \$3.8 million from higher oil and NGL volumes and prices, and a decrease in operating costs and expenses of \$2.1 million primarily due to lower salt water disposal costs.

Operating Costs and Expenses

Lease operating expenses per Mcfe for our E&P segment were \$0.85 for the three months ended June 30, 2013 compared to \$0.79 for the same period in 2012. The increase in lease operating expense per unit of production for the three months ended June 30, 2013 as compared to the same period of 2012, was primarily due to increase in compression and gathering cost in our Marcellus Shale play, offset slightly by a decrease in salt water disposal cost in our Fayetteville Shale play. Lease operating expense per Mcfe for our E&P segment were \$0.83 for the six months ended June 30, 2013 compared to \$0.81 for the same period in 2012, was primarily due to an increase in gathering cost related to our Marcellus Shale play, offset slightly by a decrease in salt water disposal cost.

General and administrative expenses per Mcfe for our E&P segment were \$0.24 for the three months ended June 30, 2013 compared to \$0.27 for the same period in 2012 primarily due a decrease in personnel costs and information system costs. General and administrative expenses per Mcfe was \$0.23 for the six months ended June 30, 2013 compared to \$0.29 for same period in 2012 primarily due to a decrease in personnel costs and information system costs. In total general and administrative expenses for our E&P segment were \$39.1 million for the three months ended June 30, 2013 compared to \$37.4 million for the same period in 2012, and were \$69.6 million for the six months ended June 30, 2013 compared to \$77.3 million for the same period in 2012. The decrease in general and administrative expenses for the six months ended June 30, 2013 as compared to the same period of 2012, was primarily a result of decreased personnel costs and information system costs.

Taxes other than income taxes per Mcfe increased to \$0.11 for the three months ended June 30, 2013 compared to \$0.08 for the same period in 2012 and remained flat at \$0.11 for the six months ended June 30, 2013 compared to the same period in 2012. Taxes other than income taxes per Mcfe vary from period to period due to changes in severance and ad valorem taxes that result from the mix of our production volumes and fluctuations in commodity prices.

Our full cost pool amortization rate averaged \$1.05 per Mcfe for the three months ended June 30, 2013 compared to \$1.38 for the same period in 2012. For the first six months of 2013, our full cost pool amortization rate averaged \$1.07 per Mcfe compared to \$1.36 per Mcfe for the same period in 2012. The amortization rate is impacted by the timing and amount of reserve additions and the costs associated with those additions, revisions of previous reserve estimates due to both price and well performance, write-downs that result from full cost ceiling tests, proceeds from the sale of properties that reduce the full cost pool and the levels of costs subject to amortization. We cannot predict our future full cost pool amortization rate with accuracy due to the variability of each of the factors discussed above, as well as other factors, including but not limited to the uncertainty of the amount of future reserves.

Unevaluated costs excluded from amortization were \$1,149.8 million at June 30, 2013 compared to \$1,023.9 million at December 31, 2012. The increase in unevaluated costs since December 31, 2012 primarily resulted from our acquisition of Marcellus acreage in the second quarter 2013 and an increase in our wells in progress. Unevaluated costs excluded from amortization at June 30, 2013 included \$45.8 million related to our properties in Canada, compared to \$40.4 million at December 31, 2012.

The timing and amount of production and reserve additions and revisions could have a material adverse impact on our per unit costs.

Midstream Services

	For the three months ended June 30,		For the six months ended June 30,	
	2013	2012	2013	2012
	(\$ in thousands, except volumes)			
Revenues – marketing	\$ 760,274	\$ 373,696	\$ 1,359,887	\$ 807,973
Revenues – gathering	\$ 126,501	\$ 114,699	\$ 247,795	\$ 226,876
Gas purchases – marketing	\$ 750,181	\$ 366,994	\$ 1,341,644	\$ 792,489
Operating costs and expenses	\$ 63,705	\$ 49,580	\$ 116,842	\$ 101,250
Operating income	\$ 72,889	\$ 71,821	\$ 149,196	\$ 141,110
Gas volumes marketed (Bcf)	188.7	168.0	368.5	327.5
Gas volumes gathered (Bcf)	223.4	206.2	437.4	408.2

Revenues

Revenues from our marketing activities were up 103% to \$760.3 million for the three months ended June 30, 2013 and were up 68% to \$1,359.9 million for the six months ended June 30, 2013 compared to the same period in 2012. For the three months ended June 30, 2013, the volumes marketed increased 12% and the price received for volumes marketed increased 82% compared to the same period in 2012. For the six months ended June 30, 2013, the volumes marketed increased 13% and the price received for volumes marketed increased 49% compared to the same period in 2012. Increases and decreases in marketing revenues due to changes in commodity prices are largely offset by corresponding changes in gas purchase expenses. Of the total volumes marketed, production from our affiliated E&P operated wells accounted for 97% and 93% of the marketed volumes for the three months ended June 30, 2013 and 2012, respectively. For the six months ended June 30, 2013 and 2012, production from our affiliated E&P operated wells accounted for 96% and 95% of the marketed volumes, respectively.

Revenues from our gathering activities were up 10% to \$126.5 million for the three months ended June 30, 2013 and up 9% to \$247.8 million for the six months ended June 30, 2013 compared to respective periods in 2012. The increase in gathering revenues resulted primarily from an 8% increase in gas volumes gathered for the three months ended June 30, 2013 and a 7% increase in gas volumes for the six months ended June 30, 2013 compared to the same period in 2012. A majority of the increase in gathering revenues for the three months and six months ended June 30, 2013 resulted from increases in volumes gathered due to our development and growth of our shale properties. Gathering volumes, revenues and expenses for this segment are expected to continue to grow as reserves related to our shale properties are developed and production increases.

Operating Income

Operating income from our Midstream Services segment increased to \$72.9 million for the three months ended June 30, 2013 compared to \$71.8 million for the same period in 2012 and increased to \$149.2 million for the six months ended June 30, 2013 compared to \$141.1 million for the same period in 2012. Operating income was higher due to increases in gas volumes gathered which primarily resulted from our rising E&P production volumes. The \$1.1 million increase in operating income for the three months ended June 30, 2013 was primarily due to an increase of \$11.8 million in gathering revenues and an increase of \$3.4 million in the margin generated from our gas marketing activities, which was partially offset by a \$14.1 million increase in operating costs and expenses associated with an increase in gas volumes gathered, exclusive of gas purchase costs. The \$8.1 million increase in operating income for the six months ended June 30, 2013 was primarily due to an increase of \$20.9 million in gathering revenues and an increase of \$2.8 million in the margin generated from our gas marketing activities, which was partially offset by a \$15.6 million increase in operating costs and expenses, exclusive of gas purchase costs, associated with the increase in gas volumes gathered.

The margin generated from gas marketing activities was \$10.1 million for the three months ended June 30, 2013 compared to \$6.7 million for the three months ended June 30, 2012. The margin generated from gas marketing activities was \$18.2 million for the six months ended June 30, 2013 compared to \$15.5 million for the six months ended June 30, 2012. Margins are primarily driven by volumes of natural gas marketed and may fluctuate depending on the prices paid for commodities and the ultimate disposition of those commodities. We enter into hedging activities from time to time with respect to our natural gas marketing activities to provide margin protection. We refer you to Item 3, "Quantitative and Qualitative Disclosures about Market Risks" included in this Form 10-Q for additional information.

Interest Expense

Interest expense, net of capitalization, increased to \$9.3 million for the three months ended June 30, 2013, compared to \$8.4 million for the same period in 2012 and increased to \$18.3 million for the six months ended June 30, 2013 compared to \$15.7 million for the same period in 2012. The increase in interest expense, net of capitalization, for the three- and six-month periods ended June 30, 2013 was primarily due to our increased borrowing level, partially offset by an increase in capitalized interest. We capitalized interest of \$16.8 million and \$33.0 million for the three- and six-month periods ended June 30, 2013, compared to \$16.6 million and \$30.0 million for the same periods in 2012. The increases in capitalized interest were primarily due to the increase in our unevaluated property balance during 2013.

Income Taxes

Our effective tax rates were 40.0% and 38.0% for the six months ended June 30, 2013 and 2012, respectively. For the six months ended June 30, 2013, we recorded an income tax expense of \$249.3 million compared to an income tax benefit of \$182.3 million for the same period in 2012.

Stock-Based Compensation Expense

We recognized expense of \$3.0 million and capitalized \$2.9 million for stock-based compensation during the three-month period ended June 30, 2013 compared to \$2.7 million expense and \$2.4 million capitalized for the comparable period in 2012. We recognized expense of \$6.0 million and capitalized \$5.7 million for stock-based compensation costs

recognized during the six-month period ended June 30, 2013 compared to \$5.5 million expense and \$5.3 million capitalized for the comparable period in 2012. We refer you to Note 14 in the unaudited condensed consolidated financial statements included in this Form 10-Q for additional discussion of our equity based compensation plans.

New Accounting Standards

In February 2013, the FASB issued Accounting Standards Update No. 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income (“Update 2013-02”), which finalizes proposed ASU No. 2012-240, and seeks to improve the transparency of reporting reclassifications out of accumulated other comprehensive income. Update 2013-02 replaces the presentation requirements in ASU No. 2011-05, Comprehensive Income (Topic 220): Presentation of Comprehensive Income, and ASU No. 2011-12, Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of

Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05. Update 2013-02 requires an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. GAAP to be reclassified in its entirety to net income. For public entities, Update 2013-02 is effective prospectively for reporting periods beginning after December 15, 2012, with early adoption permitted. The implementation of the disclosure requirement did not have a material impact on the Company's consolidated results of operations, financial position or cash flows.

In January 2013, the FASB issued Accounting Standards Update No. 2013-01, Balance Sheet (Topic 210): Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities ("Update 2013-01"), which finalizes Proposed ASU No. 2012-250 and clarifies the scope of transactions that are subject to disclosures concerning offsetting. Update 2013-01 addresses implementation issues regarding the scope of ASU No. 2011-11, Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities, issued in December 2011. Update 2013-01 clarifies that the scope of the disclosures under U.S. GAAP is limited to derivatives, repurchase agreements and reverse purchase agreements, and securities borrowing and securities lending transactions that are offset either in accordance with FASB ASC Section 210-20-45, Balance Sheet—Offsetting—Other Presentation Matters, or FASB ASC Section 815-10-45, Derivatives and Hedging—Overall—Other Presentation Matters, or are subject to a master netting arrangement or similar agreement. Update 2013-01 requires an entity (1) to apply the amendments for annual reporting periods beginning on or after January 1, 2013 and (2) to provide the required disclosures retrospectively for all comparative periods presented. The implementation of the disclosure requirement did not have a material impact on the Company's consolidated results of operations, financial position or cash flows.

LIQUIDITY AND CAPITAL RESOURCES

We depend primarily on internally-generated funds, our Credit Facility and funds accessed through debt and equity markets as our primary sources of liquidity.

For the remainder of 2013, assuming natural gas prices remain at current levels, we intend to draw on a portion of the funds available under our Credit Facility to fund our planned capital investments (discussed below under “Capital Investments”). We refer you to Note 10 to the unaudited condensed consolidated financial statements included in this Form 10-Q and the section below under “Financing Requirements” for additional discussion of our Credit Facility.

Net cash provided by operating activities increased 5% to \$877.6 million for the six months ended June 30, 2013 compared to \$837.4 million for the same period in 2012, is primarily due to an increase in net income adjusted for non-cash expenses primarily resulting from increased revenues due to higher realized gas prices, higher natural gas production and gathering volumes, offset slightly by a decrease in changes in working capital. During the six months ended June 30, 2013, requirements for our capital investments were funded primarily from our cash generated by operating activities, cash and cash equivalents, and net proceeds from borrowings under our Credit Facility. For the six months ended June 30, 2013, cash generated from our operating activities funded 75% of our cash requirements for capital investments and 73% for the six months ended June 30, 2012.

We believe that our operating cash flow, cash equivalents, and available funds under our Credit Facility will be adequate to meet our capital and operating requirements for 2013. The credit status of the financial institutions participating in our Credit Facility could adversely impact our ability to borrow funds under the Credit Facility. While we believe all of the lenders under the facility have the ability to provide funds, we cannot predict whether each will be able to meet its obligation.

Our cash flow from operating activities is highly dependent upon the market prices that we receive for our natural gas and oil production. Natural gas and oil prices are subject to wide fluctuations and are driven by market supply and demand factors which are impacted by the overall state of the economy. The price received for our production is also influenced by our commodity hedging activities, as more fully discussed in Item 3, “Quantitative and Qualitative Disclosures about Market Risks” and Note 7 in the unaudited condensed consolidated financial statements included in this Form 10-Q. Our commodity hedging activities are subject to the credit risk of our counterparties being financially unable to complete the transaction. We actively monitor the credit status of our counterparties, performing both quantitative and qualitative assessments based on their credit ratings and credit default swap rates where applicable, and to date have not had any credit defaults associated with our transactions. However, any future failures by one or more counterparties could negatively impact our cash flow from operating activities.

Additionally, our short-term cash flows are dependent on the timely collection of receivables from our customers and partners. We actively manage this risk through credit management activities and through the date of this filing have not experienced any significant write-offs for non-collectable amounts. However, any sustained inaccessibility of credit by our customers and partners could adversely impact our cash flows.

Due to the above factors, we are unable to forecast with certainty our future level of cash flow from operations. Accordingly, we will adjust our discretionary uses of cash dependent upon available cash flow.

Capital Investments

Our capital investments were \$1.2 billion for the six months ended June 30, 2013 and 2012. Our E&P segment investments were \$1.1 billion for the six months ended June 30, 2013 and 2012. Our E&P segment capitalized internal costs of \$86.3 million for the six months ended June 30, 2013 compared to \$80.7 million for the comparable period in 2012. These internal costs were directly related to acquisition, exploration and development activities and are included as part of the cost of natural gas and oil properties.

Our capital investments for 2013 are planned to be approximately \$2.2 billion, consisting of \$2.0 billion for E&P, \$160 million for Midstream Services and \$90 million for corporate and other purposes. Of the approximate \$2.0 billion for E&P, we expect to allocate approximately \$900 million to our Fayetteville Shale play and approximately \$870 million to our Marcellus Shale play. Our planned level of capital investments in 2013 is expected to allow us to continue our progress in the Fayetteville Shale and Marcellus Shale programs and explore and develop other existing natural gas and oil properties and generate new drilling prospects. Our remaining 2013 capital investment program is expected to be funded through cash flow from operations and borrowings under our revolving credit facility. The planned capital program for 2013 is flexible and can be modified. We will reevaluate our proposed investments as needed to take into account

prevailing market conditions and, if natural gas prices change significantly in 2013, we could change our planned investments.

Financing Requirements

Our total debt outstanding was \$1.9 billion at June 30, 2013 compared to \$1.7 billion at December 31, 2012. In February 2011, we amended and restated our unsecured revolving credit facility, increasing the borrowing capacity to \$1.5 billion and extending the maturity date to February 2016. The amount available under the revolving credit facility may be increased to \$2.0 billion at any time upon the Company's agreement with its existing or additional lenders. We had \$230.0 million outstanding under our revolving credit facility at June 30, 2013 compared to no borrowings on our credit facility at December 31, 2012.

The interest rate on our Credit Facility is calculated based upon our public debt rating and is currently 200 basis points over LIBOR. Our publicly traded notes are rated BBB- by Standard and Poor's and we have a long term debt rating of Baa3 by Moody's. Any downgrades in our public debt ratings could increase our cost of funds under the Credit Facility.

Our Credit Facility contains covenants which impose certain restrictions on us. Under the Credit Facility, we must keep our total debt at or below 60% of our total capital, and must maintain a ratio of EBITDA to interest expense of 3.5 or above. Our Credit Facility's financial covenants with respect to capitalization percentages exclude hedging activities, pension and other postretirement liabilities as well as the effects of non-cash entries that result from any full cost ceiling impairments occurring after the date of the agreement. At June 30, 2013, our capital structure as determined under our Credit Facility was 30% debt and 70% equity, which excluded hedging activities, pension and other postretirement liabilities, and if applicable, the effect of the non-cash full cost ceiling impairment. We were in compliance with all of the covenants of our Credit Facility at June 30, 2013. Although we do not anticipate any violations of our financial covenants, our ability to comply with those covenants is dependent upon the success of our exploration and development program and upon factors beyond our control, such as the market prices for natural gas and oil. If we are unable to borrow under our Credit Facility, we may have to decrease our capital investment plans.

In March 2012, we issued \$1 billion of 4.10% Senior Notes due 2022 in a private placement. A portion of the net proceeds of the offering were used to repay the amounts outstanding under the Company's revolving credit facility and the remaining proceeds were used for general corporate purposes.

At June 30, 2013, our capital structure consisted of 36% debt and 64% equity (exclusive of cash and cash equivalents and restricted cash) and \$25.7 million in cash and cash equivalents and restricted cash, compared to 35% debt and 65% equity at December 31, 2012. Equity at June 30, 2013 included an accumulated other comprehensive gain of \$119.7 million related to our hedging activities, partially offset by \$21.8 million related to our pension and other

postretirement liabilities. The amount recorded in equity for our hedging activities is based on current market values for our hedges at June 30, 2013 and does not necessarily reflect the value that we will receive or pay when the hedges are ultimately settled, nor does it take into account revenues to be received associated with the physical delivery of sales volumes hedged.

Our hedges allow us to ensure a certain level of cash flow to fund our operations. At June 30, 2013, we had NYMEX commodity price hedges in place on 168.8 Bcf of our remaining targeted 2013 natural gas production and 232.7 Bcf of our expected 2014 natural gas production. The amount of long-term debt we incur will be largely dependent upon commodity prices and our capital investment plans.

Contractual Obligations and Contingent Liabilities and Commitments

We have various contractual obligations in the normal course of our operations and financing activities. There have been no material changes to our contractual obligations from those disclosed in our 2012 Annual Report on Form 10-K.

Contingent Liabilities and Commitments

In the first quarter of 2010, the Company was awarded exclusive licenses by the Province of New Brunswick in Canada to conduct an exploration program covering approximately 2.5 million acres in the province. The licenses require the Company to make certain capital investments in New Brunswick of approximately \$47 million in the aggregate over a three year period. In order to obtain the licenses, the Company provided promissory notes payable on

demand to the Minister of Finance of the Province of New Brunswick with an aggregate principal amount of \$44.5 million Canadian dollars. The promissory notes secure the Company's capital expenditure obligations under the licenses and are returnable to the Company to the extent the Company performs such obligations. If the Company fails to fully perform, the Minister of Finance may retain a portion of the applicable promissory notes in an amount equal to any deficiency. The Company commenced its Canada exploration program in 2010 and no liability has been recognized in connection with the promissory notes due to the Company's investments in New Brunswick as of June 30, 2013 and its future investment plans. In December 2012, we received two one-year extensions to our exploration license agreements which expire on March 16, 2014 and March 16, 2015, respectively.

Substantially all of our employees are covered by defined pension and postretirement benefit plans. As of June 30, 2013, the Company has contributed \$6.0 million to the pension plan and \$0.1 million to the postretirement benefit plan, and expects to contribute \$12.0 million to the pension plan and \$0.1 million to the postretirement benefit plan. At June 30, 2013, we recognized a liability of \$34.7 million as a result of the underfunded status of our pension and other postretirement benefit plans compared to a liability of \$33.5 million at December 31, 2012.

We are subject to litigation, claims and proceedings (including with respect to environmental matters) that arise in the ordinary course of business. Management believes, individually or in aggregate, such litigation, claims and proceedings will not have a material adverse impact on our financial position, results of operations, or cash flows, but these matters are subject to inherent uncertainties and management's view may change in the future. If an unfavorable final outcome were to occur, there exists the possibility of a material impact on our financial position, results of operations or cash flows for the period in which the effect becomes reasonably estimable. We accrue for such items when a liability is both probable and the amount can be reasonably estimated. For further information regarding commitments and contingencies, we refer you to Note 11 in the unaudited condensed consolidated financial statements included in this Form 10-Q.

Working Capital

We had negative working capital of \$54.2 million at June 30, 2013 and positive working capital of \$41.1 million at December 31, 2012. Current assets decreased by \$16.1 million during the six months ended June 30, 2013 primarily due to a \$36.2 million decrease in current hedging asset, a \$36.4 million decrease in cash, cash equivalents and restricted cash, and a \$21.7 million decrease in other current assets. These decreases were partially offset by a \$68.3 million increase in accounts receivable and a \$10.0 million increase in inventory. Current liabilities increased by \$79.3 million during the six months ended June 30, 2013 primarily as a result of a \$115.1 million increase in accounts payable, a \$17.6 million increase in taxes payable, and a \$26.7 million increase in other current liabilities, offset slightly by a \$68.9 million decrease in advances from partners, a \$10.2 million decrease in current deferred income taxes, and a \$1.1 million decrease in interest payable. We maintain access to funds that may be needed to meet capital requirements through our Credit Facility described in "Financing Requirements" above.

Natural Gas in Underground Storage

We record our natural gas stored in inventory that is owned by the E&P segment at the lower of weighted average cost or market. The natural gas in inventory for the E&P segment is used primarily to supplement production in meeting the segment's contractual commitments, especially during periods of colder weather. In determining the lower of cost or market for storage gas, we utilize the natural gas futures market in assessing the price we expect to be able to realize for our natural gas in inventory. A decline in the future market price of natural gas could result in write-downs of our natural gas in underground storage carrying cost.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Market risks relating to our operations result primarily from the volatility in commodity prices, basis differentials and interest rates, as well as credit risk concentrations. We use natural gas and crude oil swap agreements and options and interest rate swaps to reduce the volatility of earnings and cash flow due to fluctuations in the prices of natural gas and oil and in interest rates. Our Board of Directors has approved risk management policies and procedures to utilize financial products for the reduction of defined commodity price risk. The Board of Directors has approved our use of financial products for the reduction of interest rate risks. These policies prohibit speculation with derivatives and limit swap agreements to counterparties with appropriate credit standings.

Credit Risk

Our financial instruments that are exposed to concentrations of credit risk consist primarily of trade receivables and derivative contracts associated with commodities trading. Concentrations of credit risk with respect to receivables are limited due to the large number of our customers and their dispersion across geographic areas. No single customer accounted for greater than 10% of revenues for the six months ended June 30, 2013. See “Commodities Risk” below for discussion of credit risk associated with commodities trading.

Interest Rate Risk

At June 30, 2013, we had approximately \$1.9 billion of total debt with a weighted average interest rate of 5.1%. Our revolving credit facility has a floating interest rate (2.17% at June 30, 2013). At June 30, 2013, we had borrowings outstanding of \$230.0 million under our Credit Facility.

Interest rate swaps may be used to adjust interest rate exposures when deemed appropriate. At June 30, 2013, the Company had a net derivative asset position of \$2.6 million related to interest-rate swaps. A 10% increase or decrease in interest rates would not result in a material increase or decrease in the aggregate fair value of outstanding interest-rate swap agreements. For a summary of the Company’s open interest-rate derivative positions, see Note 7—Derivative Instruments in the Notes to Consolidated Financial Statements under Part I, Item 1 of this Form 10-Q.

Commodities Risk

We use over-the-counter natural gas and crude oil swap agreements and options to hedge sales of our production and to hedge activity in our Midstream Services segment against the inherent price risks of adverse price fluctuations or locational pricing differences between a published index and the NYMEX futures market. These swaps and options include (1) transactions in which one party will pay a fixed price (or variable price) for a notional quantity in exchange for receiving a variable price (or fixed price) based on a published index (referred to as price swaps), (2) transactions in which parties agree to pay a price based on two different indices (referred to as basis swaps) and (3) the purchase and sale of index-related puts and calls (collars) that provide a “floor” price, below which the counterparty pays funds equal to the amount by which the price of the commodity is below the contracted floor, and a “ceiling” price above which we pay to the counterparty the amount by which the price of the commodity is above the contracted ceiling.

The primary market risks relating to our derivative contracts are the volatility in market prices and basis differentials for natural gas and crude oil. However, the market price risk is offset by the gain or loss recognized upon the related sale or purchase of the natural gas or sale of the oil that is hedged. Credit risk relates to the risk of loss as a result of non-performance by our counterparties. The counterparties are primarily major commercial banks, investment banks and integrated energy companies which management believes present minimal credit risks. The credit quality of each counterparty and the level of financial exposure we have to each counterparty are closely monitored to limit our credit risk exposure. Additionally, we perform both quantitative and qualitative assessments of these counterparties based on their credit ratings and credit default swap rates where applicable. We have not incurred any counterparty losses related to non-performance and do not anticipate any losses given the information we have currently. However, given the recent volatility in the financial markets, we cannot be certain that we will not experience such losses in the future.

Exploration and Production

The following table provides information about our financial instruments that are sensitive to changes in commodity prices and that are used to hedge prices for natural gas production. The table presents the notional amount in Bcf, the weighted average contract prices and the fair value by expected maturity dates. At June 30, 2013, the net fair value of our financial instruments related to natural gas production was a \$261.6 million asset.

	Volume (Bcf)	Weighted Average Price to be Swapped (\$/MMBtu)	Weighted Average Floor Price (\$/MMBtu)	Weighted Average Ceiling Price (\$/MMBtu)	Weighted Average Basis Differential (\$/MMBtu)	Fair value at June 30, 2013 (\$ in millions)
Natural Gas (Bcf):						
Fixed Price Swaps:						
2013	168.8	\$ 4.68	\$ -	\$ -	\$ -	\$ 174.7
2014	232.7	\$ 4.41	\$ -	\$ -	\$ -	\$ 114.8
Basis Swaps:						
2013	14.1	\$ -	\$ -	\$ -	\$ 0.05	\$ 5.0
2014	15.2	\$ -	\$ -	\$ -	\$ 0.04	\$ 5.9
Fixed Price Call Options:						
2015	199.8	\$ -	\$ 5.09	\$ -	\$ -	\$ (38.8)

At June 30, 2013, our basis swaps did not qualify for hedge accounting treatment. Changes in the fair value of derivatives that do not qualify as cash flow hedges are recorded in gas and oil sales. For the six months ended June 30, 2013, we recorded an unrealized loss of \$34.7 million related to fixed price call options that did not qualify for hedge accounting treatment, an unrealized gain of \$87.8 million related to fixed price swaps not designated for hedge accounting, an unrealized gain of \$6.9 million related to the basis swaps that did not qualify for hedge accounting treatment and an unrealized loss of \$0.7 million related to the change in estimated ineffectiveness of our cash flow hedges. Typically, our hedge ineffectiveness results from changes at the end of a reporting period in the price differentials between the index price of the derivative contract, which is primarily a NYMEX price, and the index price for the point of sale for the cash flow that is being hedged.

Item 4. Controls and Procedures.

Material Weakness in Internal Control over Financial Reporting

As previously discussed in Item 8. "Financial Statements and Supplementary Data" of our 2012 Annual Report on Form 10-K, we reported a material weakness, solely related to the review of the tax benefit associated with capitalized intangible drilling costs within the ceiling calculation of the full cost ceiling test. As discussed below, we have concluded that the controls related to our previously identified material weakness are designed and operating effectively and, therefore, have concluded that, as of June 30, 2013, such material weakness has been remediated.

Evaluation of Disclosure Controls and Procedures

We have performed an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act). Our disclosure controls and procedures are the controls and other procedures that we have designed to ensure that we record, process, accumulate and communicate information to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures and submission within the time periods specified in the SEC's rules and forms. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those determined to be effective can provide only a level of reasonable assurance with respect to financial statement preparation and presentation. Based on the evaluation, our management, including our Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures were effective as of June 30, 2013 at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the three months ended June 30, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Remediation of Previously Identified Material Weakness

During the six months ended June 30, 2013, we continued efforts to address the material weakness in our internal control over financial reporting as identified by management in conjunction with the preparation of our 2012 Annual Report on Form 10-K solely related to the review of the tax benefit associated with capitalized intangible drilling costs within the ceiling calculation of the full cost ceiling test. These efforts have included enhanced analytical analysis and improved cross-functional management review of this tax benefit within the ceiling calculation of the full cost ceiling test. We have tested the internal controls related to the remediation of this deficiency and have found them to be effective and have concluded that the previously identified and disclosed material weakness has been remediated as of June 30, 2013.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

The Company is subject to laws and regulations relating to the protection of the environment. Our policy is to accrue environmental and cleanup related costs of a non-capital nature when it is both probable that a liability has been incurred and when the amount can be reasonably estimated. Management believes any future remediation or other compliance related costs will not have a material effect on our financial position, results of operations, and cash flows.

Tovah Energy

In February 2009, SEPCO was added as a defendant in a Third Amended Petition in the matter of Tovah Energy, LLC and Toby Berry-Helfand v. David Michael Grimes, et, al. In the Sixth Amended Petition, filed in July 2010, in the 273rd District Court in Shelby County, Texas (collectively, the "Sixth Petition"), plaintiff alleged that, in 2005, they provided SEPCO with proprietary data regarding two prospects in the James Lime formation pursuant to a confidentiality agreement and that SEPCO refused to return the proprietary data to the plaintiff, subsequently acquired

leases based upon such proprietary data and profited therefrom. Among other things, the plaintiff's allegations in the Sixth Petition included various statutory and common law claims, including, but not limited to claims of misappropriation of trade secrets, violation of the Texas Theft Liability Act, breach of fiduciary duty and confidential relationships, various fraud based claims and breach of contract, including a claim of breach of a purported right of first refusal on all interests acquired by SEPCO between February 2005 and February 2006. In the Sixth Petition, plaintiff sought actual damages of over \$55.0 million as well as other remedies, including special damages and punitive damages of four times the amount of actual damages established at trial.

Immediately before the commencement of the trial in November 2010, plaintiff was permitted, over SEPCO's objections, to file a Seventh Amended Petition claiming actual damages of \$46.0 million and also seeking the equitable remedy of disgorgement of all profits for the misappropriation of trade secrets and the breach of fiduciary duty claims. In December 2010, the jury found in favor of the plaintiff with respect to all of the statutory and common law claims and awarded \$11.4 million in compensatory damages. The jury did not, however, award the plaintiff any special, punitive or other damages. In addition, the jury separately determined that SEPCO's profits for purposes of disgorgement were \$381.5 million. This profit determination does not constitute a judgment or an award. The plaintiff's entitlement to disgorgement of profits as an equitable remedy will be determined by the judge and it is within the judge's discretion to award none, some or all the amount of profit to the plaintiff. In December 2010, the plaintiff filed a motion to enter the judgment based on the jury's verdict. In February 2011, SEPCO filed a motion for a judgment notwithstanding the verdict and a motion to disregard certain findings. In March 2011, the plaintiff filed an amended motion for judgment and intervenor filed its motion for judgment seeking not only the monetary damages and the profits determined by the jury but also seeking, as a new remedy, a constructive trust for profits from 143 wells as well as future drilling and sales of properties in the prospect areas. At the suggestion of the judge, all parties voluntarily agreed to participate in non-binding mediation efforts. The mediation occurred in April 2011 and was unsuccessful. In June 2011, SEPCO received by mail a letter dated June 2011 from the judge, in which he made certain rulings with respect to the post-verdict motions and responses filed by the parties. In his rulings, the judge denied SEPCO's motion for judgment, judgment notwithstanding the verdict and to disregard certain findings. Plaintiff's and intervenor's claim for a constructive trust was denied but the judge ruled that plaintiff and intervenor shall recover from SEPCO \$11.4

million and a reasonable attorney's fee of 40% of the total damages awarded and are entitled to recover on their claim for disgorgement. The judge instructed that SEPCO calculate the profit on the designated wells for each respective period. SEPCO performed the calculation and provided it to the judge in June 2011. In July 2011, plaintiff and intervenor filed a letter with the court raising objections to the accounting provided by SEPCO, to which SEPCO filed a response in July 2011. In July 2011, the judge sent a letter to the parties in which he ruled that after reviewing the parties' respective position letters, he was awarding \$23.9 million in disgorgement damages in favor of the plaintiff and intervenor. In the July 2011 letter, the judge instructed the plaintiff and intervenor to prepare a judgment for his approval prior to July 2011 consistent with his findings in his June 2011 letter and the disgorgement award. In August 2011, a judgment was entered pursuant to which plaintiff and intervenor are entitled to recover approximately \$11.4 million in actual damages and approximately \$23.9 million in disgorgement as well as prejudgment interest and attorneys' fees which currently are estimated to be up to \$8.9 million and all costs of court of the plaintiff and intervenor. In September 2011, SEPCO filed a motion for a new trial and in November 2011 filed a notice of appeal. In November 2011, the court approved SEPCO's supersedeas bond in the amount of \$14.1 million, which stays execution on the judgment pending appeal. The bond covers the \$11.4 million judgment for actual damages, plus \$1.3 million in pre-judgment interest, \$1.3 million in post-judgment interest (estimating two years for the duration of appeal), and court costs.

In June 2012, SEPCO filed its appellate brief and, in June 2012, plaintiff and intervenor filed a cross-appellate brief seeking limited remand to reassess the disgorgement determination. The parties filed their responses to the appellate and cross appellate briefs in November 2012. Oral argument was held before the Tyler Court of Appeals on March 8, 2013. On July 10, 2013, the Tyler Court of Appeals ordered that (1) the judgment awarding plaintiff and intervenor \$23.9 million as disgorgement of illicit gains be reversed and judgment rendered that they take nothing, (2) the award of \$11.4 million for actual damages, insofar as it is based on the jury's findings of breach of fiduciary duty, fraud, breach of contract, and theft of trade secret is reversed and judgment rendered that plaintiff and intervenor take nothing under those theories of recovery, (3) the award of \$11.4 million to plaintiff and intervenor as damages for misappropriation of trade secret is affirmed, (4) the case be remanded to the trial court for a determination and award of attorney's fees for SEPCO as the prevailing party under the Texas Theft Liability Act, and (5) in all other respects, the judgment is affirmed. On July 25, 2013, SEPCO filed its motion for rehearing with the Tyler Court of Appeals, seeking reversal of every part of plaintiff and intervenor's recovery. Plaintiff and intervenor filed an unopposed motion for an extension of their deadline to file a motion for rehearing, which the Tyler Court of Appeals has granted; their deadline to file their motion is now August 26, 2013.

Based on the Company's understanding and judgment of the facts and merits of this case, including appellate defenses, and after considering the advice of counsel, the Company has determined that, although reasonably possible after exhaustion of all appeals, an adverse final outcome to this lawsuit is not probable. As such, the Company has not accrued any amounts with respect to this lawsuit. If the plaintiff and intervenor were to ultimately prevail in the appellate process, the Company currently estimates, based on the judgments to date, that SEPCO's potential liability would be up to \$45.5 million, including interest and attorney's fees. The Company's assessment may change in the future due to occurrence of certain events, such as denied appeals, and such re-assessment could lead to the determination that the potential liability is probable and could be material to the Company's results of operations, financial position or cash flows.

In March 2010, the Company's subsidiary, SEECO, was served with a subpoena from a federal grand jury in Little Rock, Arkansas. Based on the documents requested under the subpoena and subsequent discussions described below, the Company believes the grand jury is investigating matters involving approximately 27 horizontal wells operated by SEECO in Arkansas, including whether appropriate leases or permits were obtained therefore and whether royalties and other production attributable to federal lands have been properly accounted for and paid. The Company believes it has fully complied with all requests related to the federal subpoena and delivered its affidavit to that effect. The Company and representatives of the Bureau of Land Management and the U.S. Attorney have had discussions since the production of the documents pursuant to the subpoena. In January 2011, the Company voluntarily produced additional materials informally requested by the government arising from these discussions. Although, to the Company's knowledge, no proceeding in this matter has been initiated against SEECO, the Company cannot predict whether or when one might be initiated. The Company intends to fully comply with any further requests and to cooperate with any related investigation. No assurance can be made as to the time or resources that will need to be devoted to this inquiry or the impact of the final outcome of the discussions or any related proceeding.

ITEM 1A. RISK FACTORS.

There were no additions or material changes to the Company's risk factors as disclosed in Item 1A of Part I in the Company's 2012 Annual Report on Form 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

Not applicable.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

Not applicable.

ITEM 4. MINE SAFETY DISCLOSURES.

Our sand mining operations, in support of our E&P business, are subject to regulation by the Federal Mine Safety and Health Administration under the Federal Mine Safety and Health Act of 1977. Information concerning mine safety violations or other regulatory matters required by section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K (17 CFR 229.106) is included in Exhibit 95.1 to this Form 10-Q.

ITEM 5. OTHER INFORMATION.

Not applicable.

ITEM 6. EXHIBITS.

Edgar Filing: SOUTHWESTERN ENERGY CO - Form 10-Q

- (10.1) Southwestern Energy Company 2013 Incentive Plan. (Incorporated by reference to Annex A of the Registrant's Proxy Statement filed April 8, 2013)
- (10.2*) Southwestern Energy Company 2013 Incentive Plan Guidelines for Performance Unit Awards.
