

First Bancorp, Inc /ME/
Form 424B5
March 25, 2013

The information in this preliminary prospectus supplement is not complete and may be changed. This preliminary prospectus supplement relates to an effective registration statement under the Securities Act of 1933. This preliminary prospectus supplement and the accompanying prospectus are not an offer to sell these securities, and we are not soliciting offers to buy these securities in any jurisdiction where the offer or sale is not permitted. SUBJECT TO COMPLETION, dated March 25, 2013

Preliminary Prospectus Supplement
(to Prospectus dated July 22, 2011)

Filed Pursuant to Rule 424(b)(5)
Registration No. 333-175722

_____ Shares
THE FIRST BANCORP, INC.
Common Shares

We are offering _____ of our common shares, \$0.01 par value (the "Common Shares"). Our Common Shares are listed on The NASDAQ Global Select Market under the symbol "FNLC." On March 22, 2013, the last reported sale price of our Common Shares on The NASDAQ Global Select Market was \$17.80 per share. Our Common Shares are not deposits or other obligations of a bank or depository institution and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency. Investing in our Common Shares involves risks. See "RISK FACTORS" beginning on page S-11 to read about the factors you should consider before making your investment decision.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined that this prospectus supplement or the accompanying prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	Price Per Common Share	Total
Public offering price	\$_	\$_
Underwriting discount and commissions	\$_	\$_
Proceeds, before expenses, to us	\$_	\$_

The underwriter may also purchase up to _____ additional Common Shares within 30 days of the date of this preliminary prospectus supplement to cover over-allotments, if any.

The underwriter expects to deliver the Common Shares in book-entry form only, through the facilities of The Depository Trust Company on or about March __, 2013.

ABOUT THIS PROSPECTUS SUPPLEMENT

You should rely only on the information contained in or incorporated by reference in this prospectus supplement and the accompanying prospectus. We have not, and Keefe, Bruyette & Woods, Inc., as underwriter, has not, authorized anyone to provide you with any other or different information. If anyone provides you with information that is different from, or inconsistent with, the information in this prospectus supplement, you should not rely on it. You should assume that the information contained or incorporated by reference in this prospectus supplement and the accompanying prospectus is accurate only as of its respective date, regardless of the time of delivery of this prospectus supplement and the accompanying prospectus or any sales of our Common Shares. Our business, financial condition, results of operations and prospects may have changed since such dates.

This prospectus supplement is a supplement to the accompanying prospectus that is also a part of this document. This prospectus supplement and the accompanying prospectus are part of a registration statement that we filed with the Securities and Exchange Commission (the “SEC”) using a “shelf” registration process. Under the shelf registration statement, we may offer and sell Common Shares or other securities described in the accompanying prospectus in one or more offerings. In this prospectus supplement, we provide you with specific information about the terms of this offering. Both this prospectus supplement and the accompanying prospectus include important information about us, our Common Shares and other information you should know before investing in our Common Shares. This prospectus supplement may also add, update and change information contained in the accompanying prospectus. To the extent that any statement that we make in this prospectus supplement is inconsistent with the statements made in the accompanying prospectus, the statements made in the accompanying prospectus are deemed modified or superseded by the statements made in this prospectus supplement and you should rely only on such modified or superseded statements. Before investing in our Common Shares you should read both this prospectus supplement and the accompanying prospectus, together with additional information described under the headings “WHERE YOU CAN FIND MORE INFORMATION” and “INCORPORATION OF CERTAIN INFORMATION BY REFERENCE”.

Unless otherwise indicated or unless the context requires otherwise, all references in this prospectus supplement to “we,” “us,” “our” or similar references mean The First Bancorp, Inc.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. The reports, proxy statements and other information that we file with the SEC are available to the public from the SEC's website at <http://www.sec.gov>. Copies of certain information filed by us with the SEC are also available through our Internet site at <http://www.thefirstbancorp.com>. Other than any documents expressly incorporated by reference, the information on the SEC website and on our website is not a part of, and is not incorporated into, this prospectus supplement. You may also read and copy any document we file with the SEC by visiting the SEC's Public Reference Room at 100 F Street N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for information on the operation of the Public Reference Room.

INCORPORATION OF CERTAIN INFORMATION BY REFERENCE

The SEC allows us to incorporate by reference into this prospectus supplement and the accompanying prospectus information in other documents we file with the SEC, which means that we can disclose important information to you by referring you to those documents. Information incorporated by reference is considered to be part of this prospectus supplement and the accompanying prospectus, except for any information that is modified or superseded by subsequent incorporated documents or by information that is included directly in this prospectus supplement. We incorporate by reference the documents listed below and, except as otherwise noted below, any filings we make with the SEC under Sections 13(a), 13(c), 14, or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), after the date of this prospectus supplement and prior to the time that we sell all the securities offered by this prospectus supplement and the accompanying prospectus:

• The description of common stock contained in our Registration Statement on Form S-18, as filed with the SEC on October 2, 1987;

• Annual Report on Form 10-K for the year ended December 31, 2012, filed on March 8, 2013;

• Portions of our Proxy Statement filed on March 8, 2013 that have been incorporated by reference into our Annual Report on Form 10-K for the year ended December 31, 2012;

Pursuant to General Instruction B of Form 8-K, any information furnished pursuant to "Item 2.02. Results of Operations and Financial Condition" or "Item 7.01. Regulation FD Disclosure" of Form 8-K is not deemed to be "filed" for purposes of Section 18 of the Exchange Act, and we are not incorporating by reference any information furnished pursuant to Item 2.02 or Item 7.01 of Form 8-K into this prospectus supplement or the accompanying prospectus.

We will provide without charge, upon written or oral request, a copy of any or all of the documents that are incorporated by reference into this prospectus supplement (other than exhibits, unless they are specifically incorporated by reference in the documents). Requests should be directed to:

F. Stephen Ward, Executive Vice President and Chief Financial Officer
The First Bancorp, Inc.
Post Office Box 940, Damariscotta, ME 04543 (207) 563-3195

FORWARD-LOOKING STATEMENTS

Certain statements contained in this prospectus supplement and the accompanying prospectus and in information incorporated by reference into this prospectus supplement and accompanying prospectus that are not historical facts may contain certain statements that may be considered forward-looking statements under the Private Securities Litigation Reform Act of 1995. The Company may make written or oral forward-looking statements in other documents we file with the SEC, in our annual reports to shareholders, in press releases and other written materials and in oral statements made by our officers, directors or employees. You can identify forward-looking statements by the use of the words “believe,” “expect,” “anticipate,” “intend,” “estimate,” “assume,” “will,” “should”, “may”, “might”, “could” expressions which predict or indicate future events or trends and which do not relate to historical matters. You should not rely on forward-looking statements, because they involve known and unknown risks, uncertainties and other factors, some of which are beyond the control of the Company. These risks, uncertainties and other factors may cause the actual results, performance or achievements of the Company to be materially different from the anticipated future results, performance or achievements expressed or implied by the forward-looking statements.

Some of the factors that might cause these differences include, but are not limited to, the following:

- General, national, regional or local economic conditions which are less favorable than anticipated, impacting the performance of the Company’s investment portfolio, quality of credits or the overall demand for services.
- Changes in loan default and charge-off rates which could affect the allowance for loan losses.
- Reductions in deposit levels could necessitate increased and/or higher cost borrowing to fund loans and investments.
- Declines in mortgage loan refinancing, equity loan and line of credit activity which could reduce net interest and non-interest income.
- Changes in the domestic interest rate environment and inflation, as substantially all of the Company’s assets and virtually all of its liabilities are monetary in nature.
- Changes in the carrying value of investment securities and other assets.
- Misalignment of the Company’s interest-bearing assets and liabilities.
- Increases in loan repayment rates affecting interest income and the value of mortgage servicing rights.
- Growth in new loans and deposits at recently acquired or newly opened branches may be insufficient to offset increase in operating costs attributable to those new locations.
- Changing business, banking, or regulatory conditions or policies, or new legislation or regulation affecting the financial services industry, including, but not limited to, Dodd-Frank and regulations enacted under it, that could lead to changes in the competitive balance among financial institutions, restrictions on bank activities, increased capital requirements, changes in costs (including deposit insurance premiums), increased regulatory scrutiny, declines in consumer confidence in depository institutions, or changes in the secondary market for bank loan and other products.
- Changes in accounting rules, Federal and State laws, Internal Revenue Service regulations, and other regulations and policies governing financial holding companies and their subsidiaries which may impact our ability to take appropriate action to protect our financial interests in certain loan situations.

These forward-looking statements were based on information, plans and estimates at the date of this prospectus supplement, and we do not promise to update any forward-looking statements to reflect changes in underlying assumptions or factors, new information, future events or other changes.

SUMMARY INFORMATION ABOUT THE FIRST BANCORP, INC.

You should read the following summary in conjunction with the more detailed information contained in this prospectus supplement and in the accompanying prospectus, including the information incorporated by reference in each. To the extent the following information is inconsistent with the information in the accompanying prospectus, you should rely on the following information. You should pay special attention to the “RISK FACTORS” section beginning on page S-11 of this prospectus supplement and the risks described in the other documents incorporated by reference herein to determine whether an investment in our Common Shares is appropriate for you.

We are a financial holding company organized under the laws of the State of Maine and registered under the Bank Holding Company Act of 1956. We are committed to the delivery of financial services through our subsidiary, The First, N.A. (the “Bank”). Founded in 1864, the Bank is an independent community bank with 16 offices in Lincoln, Knox, Hancock, Penobscot and Washington Counties. The Bank provides a full range of consumer and commercial banking products and services. First Advisors, a division of The First, N.A., provides investment advisory, private banking and trust services from four offices in Lincoln, Hancock and Penobscot Counties. As of December 31, 2012, The First Bancorp, Inc. (the “Company”) had:

- Consolidated assets of \$1.415 billion
- Total deposits of \$958.8 million
- Total loans of \$869.3 million
- Total shareholders’ equity of \$156.3 million

The Bank’s customers are primarily small businesses and individuals to whom the Bank offers a wide variety of services, including deposit accounts, consumer and commercial and mortgage loans. The banking business in the Bank’s market area is seasonal, with lower deposits in the winter and spring and higher deposits in the summer and fall. This swing is predictable and has not had a materially adverse effect on the Bank.

In addition to traditional banking services, we provide investment management and private banking services through First Advisors, which is an operating division of the Bank. First Advisors is focused on taking advantage of opportunities created as the larger banks have altered their service commitment to clients not meeting established account criteria. First Advisors is able to offer a comprehensive array of private banking, financial planning, investment management and trust services to individuals, businesses, non-profit organizations and municipalities of varying asset size, and to provide the highest level of personal service. The staff includes investment and trust professionals with extensive experience.

The Company believes that there will continue to be a need for a bank in the Bank’s primary market area with local management having decision-making power and emphasizing loans to small and medium-sized businesses and to individuals. The Bank has concentrated on extending business loans to such customers in the Bank’s primary market area and to extending investment and trust services to clients with accounts of all sizes. The Bank has worked and will continue to work to position itself to be competitive in its market area. The Bank’s ability to make decisions close to the marketplace, Management’s commitment to providing quality banking products, the caliber of the professional staff, and the community involvement of the Bank’s employees are all factors affecting the Bank’s ability to be competitive.

On October 26, 2012, the Bank completed the purchase of a branch at 63 Union Street in Rockland, Maine, from Camden National Bank (“Camden National”). The branch represents one of 15 Maine branches Camden National acquired from Bank of America and divested by Camden National to resolve competitive concerns in that market raised by the U.S. Department of Justice’s Antitrust Division. As part of the transaction, the Bank acquired approximately \$32.3 million in deposits as well as a small volume of loans. On the same date, the Bank completed the purchase, also from Camden National, of a full-service bank building at 145 Exchange Street in Bangor, Maine, where we opened a full-service branch in February of 2013. We believe that this Bangor location offers an excellent opportunity to enter the expanding Eastern Maine market. The total value of the transaction was \$6.6 million, which includes the premises and equipment for the two locations, the premium paid for the Rockland deposits, a small amount of loans, plus core deposit intangible and goodwill.

RECENT DEVELOPMENTS

Two-Month Period Ended February 28, 2013.

The following presents unaudited summary balance sheets as of February 28, 2013, the previous year end and the end of the previous first quarter, as well as summary unaudited results of operations for the two-months ended February 28, 2013, and February 29, 2012. Our first quarter of 2013 has not yet concluded and the following results are preliminary in nature and based upon currently available information. In the opinion of Management, such unaudited financial information includes all adjustments (consisting of normal recurring adjustments) necessary for a fair presentation of our financial position and results of operations for such periods, but may not include normal quarter-end adjustments. These results are also subject to further revision based upon final actual results for the entire quarter ending March 31, 2013, our review and the review of our independent auditors of such quarterly results. Therefore, no assurance can be given that, upon completion of our review and the review of our independent auditors, we will not report materially different financial results than those set forth below. In addition, we cannot assure you our results for this period will be indicative of our results for the entire quarter ending March 31, 2013, or for the entire year ending December 31, 2013.

PARTICIPATION IN THE CAPITAL PURCHASE PROGRAM

On January 9, 2009, the Company issued \$25 million in Fixed Rate Cumulative Perpetual Preferred Stock, Series A, having a liquidation preference of \$1,000 per share, to the U.S. Treasury under the Capital Purchase Program (“the CPP Shares”). The CPP Shares call for cumulative dividends at a rate of 5.0% per year for the first five years, and at a rate of 9.0% per year in following years, payable quarterly in arrears on February 15, May 15, August 15 and November 15 of each year. The CPP Shares qualify as Tier 1 capital on the Company's books for regulatory purposes and rank senior to the Company's common stock and senior or at an equal level in the Company's capital structure to any other shares of preferred stock the Company may issue in the future. The CPP Shares are “perpetual” preferred stock, which means that neither Treasury nor any subsequent holder would have a right to require that the Company redeem any of the shares.

On August 24, 2011, the Company repurchased \$12.5 million of the CPP Shares. The repurchase transaction was approved by the Federal Reserve Bank of Boston, the Company's primary regulator. Almost all of the repurchase was made from retained earnings accumulated since the preferred stock was issued in 2009. After the repurchase, \$12.5 million of the CPP shares remained outstanding.

On March 20, 2013, the Company received approval from the Federal Reserve Bank to repurchase an additional \$2.5 million of the CPP shares. The repurchase is scheduled to take place on March 27, 2013, and after this additional repurchase, \$10.0 million of the CPP shares will remain outstanding.

Subject to the prior approval of the Federal Reserve Bank of Boston, the Company intends to repurchase the remaining \$10.0 million of the CPP Shares using the net proceeds from the sale of Common Shares, together with (if necessary) any other funds available.

Incident to such issuance, the Company issued to the U.S. Treasury warrants (the “Warrants”) to purchase up to 225,904 shares of the Company's common stock at a price per share of \$16.60 (subject to adjustment). The CPP Shares and the related Warrants (and any shares of common stock issuable pursuant to the Warrants) are freely transferable by Treasury to third parties and the Company has filed a registration statement with the Securities and Exchange Commission to allow for possible resale of such securities. The Warrants have a term of ten years and could be exercised by Treasury or a subsequent holder at any time or from time to time during their term.

As a condition to Treasury's purchase of the CPP Shares, during the time that Treasury holds any equity or debt instrument the Company issued, the Company is required to comply with certain restrictions and other requirements relating to the compensation of the Company's chief executive officer, chief financial officer and three other most highly compensated executive officers. These restrictions include a prohibition on severance payments to those executive officers upon termination of their employment and a \$500,000 limit on the tax deductions the Company can take for compensation expense for each of those executive officers in a single year as well as a prohibition on bonus compensation to such officers other than limited amounts of long-term restricted stock. The Company has no present plan or intent to materially modify executive compensation if the Company repurchases the CPP Shares.

THE OFFERING AND USE OF PROCEEDS

The following summary contains basic information about our Common Shares and is not intended to be complete. It does not contain all of the information that is important to you. For a more complete description of our Common Shares, see “CAPITAL STOCK AND DIVIDENDS” beginning on page S-24 of this prospectus supplement.

Issuer: The First Bancorp, Inc.

Common Shares We Are Offering: _____ Common Shares

Common Shares Outstanding After This Offering: _____ Common Shares ^{1,2}

Use of Proceeds: We expect to receive net proceeds from this offering of approximately \$10 million, after deducting underwriting discounts and commissions and estimated expenses payable by us. Subject to receipt of approval by the Federal Reserve Bank of Boston, we intend to use the net proceeds from this offering to repurchase the remaining portion of the CPP Shares from the U.S. Treasury. We may also use the net proceeds for general corporate purposes: to bolster our capital ratios, support our organic growth and strengthen our liquidity position, as well as to better position us for business opportunities in our market areas.

Dividends: In 2011 and 2012, the Company paid dividends on its common stock at the rate of \$0.78 per share per year. The ability of the Company to pay cash dividends depends on receipt of dividends from the Bank. Dividends may be declared by the Bank out of its net profits as the directors deem appropriate, subject to the limitation that the total of all dividends declared by the Bank in any calendar year may not exceed the total of its net profits of that year plus retained net profits of the preceding two years. The amount available for dividends in 2013 will be that year’s net income plus \$6.8 million. The payment of dividends from the Bank to the Company may be additionally restricted if the payment of such dividends resulted in the Bank failing to meet regulatory capital requirements. See “RISK FACTORS” beginning on page S-11 of this prospectus supplement and other information included or incorporated by reference in this prospectus supplement and the accompanying prospectus for information regarding restrictions on our ability to pay dividends on Common Shares.

Risk Factors: See “RISK FACTORS” beginning on page S-11 of this prospectus supplement, the risks described in the other documents incorporated by reference herein and other information included or incorporated by reference in this prospectus supplement for a discussion of factors you should carefully consider before buying the Common Shares.

NASDAQ Global Market Select Symbol: FNLC

¹ The number of common shares outstanding immediately after the closing of this offering is based on 9,859,914 Common Shares outstanding as of December 31, 2012.

² Unless otherwise indicated, the number of Common Shares presented in this prospectus supplement excludes 352,659 Common Shares issuable under our stock compensation plans, 177,599 Common Shares issuable under our Employer and Director Stock Purchase Plan, 399,420 Common Shares issuable under our Dividend Reinvestment Plan, and 225,904 Common Shares issuable under the Warrant held by the U.S. Treasury.

RISK FACTORS

An investment in our Common Shares involves risks. The risks and uncertainties described below are not the only ones the Company faces. Additional risks and uncertainties that we are unaware of, or that we currently deem immaterial, also may become important factors that affect us and our business. If any of these risks were to occur, our business, financial condition or results of operations could be materially and adversely affected. Before you invest in our securities, in addition to the risk factors set forth below and other information, documents or reports included or incorporated by reference in this prospectus supplement and the accompanying prospectus, you should carefully consider the risk factors discussed below, as well as our most recent Annual Report on Form 10-K, and in our Quarterly Reports on Form 10-Q filed subsequent to the Annual Report on Form 10-K, which are incorporated by reference into this prospectus supplement in their entirety, as the same may be amended, supplemented or superseded from time to time by other reports we file with the SEC in the future.

Risk Associated With Our Business

We are subject to credit risk and may incur losses if loans are not repaid.

There are inherent risks associated with our lending activities. These risks include, among other things, the impact of changes in interest rates and changes in the economic conditions in the markets where we operate as well as those across the United States and abroad. Increases in interest rates and/or weakening economic conditions could adversely impact the ability of borrowers to repay outstanding loans or the value of the collateral securing these loans. We seek to mitigate the risks inherent in our loan portfolio by adhering to specific underwriting practices. Although we believe that our underwriting criteria are appropriate for the various kinds of loans we make, we may incur losses on loans that meet our underwriting criteria, and these losses may exceed the amounts set aside as reserves in our allowance for loan losses.

Our loan portfolio includes commercial and commercial real estate loans that may have higher risks than other types of loans.

Our commercial, commercial real estate, and commercial construction loans at December 31, 2012 and 2011 were \$354.9 million and \$375.0 million, respectively, or 40.8% and 43.4% of total loans. Commercial and commercial real estate loans generally carry larger loan balances and can involve a greater degree of financial and credit risk than other loans. As a result, banking regulators continue to give greater scrutiny to lenders with a high concentration of commercial real estate loans in their portfolios, and such lenders are expected to implement stricter underwriting, internal controls, risk management policies and portfolio stress testing, as well as higher capital levels and loss allowances. The increased financial and credit risk associated with these types of loans are a result of several factors, including the concentration of principal in a limited number of loans and borrowers, the size of loan balances, the effects of general economic conditions on income-producing properties and the increased difficulty of evaluating and monitoring these types of loans.

Regulators have the right to request banks to maintain elevated levels of capital or liquidity due to commercial real estate loan concentrations, and could do so, especially if there is a further downturn in our local real estate markets. In addition, when underwriting a commercial or industrial loan, we may take a security interest in commercial real estate, and, in some instances upon a default by the borrower, we may foreclose on and take title to the property, which may lead to potential financial risks for us under applicable environmental laws. If hazardous substances were discovered on any of these properties, we may be liable to governmental agencies or third parties for the costs of remediation of the hazard, as well as for personal injury and property damage. Many environmental laws can impose liability regardless of whether the Company knew of, or were responsible for, the contamination.

Furthermore, the repayment of loans secured by commercial real estate is typically dependent upon the successful operation of the related real estate or commercial project. If the cash flows from the project are reduced, a borrower's ability to repay the loan may be impaired. This cash flow shortage may result in the

failure to make loan payments. In such cases, we may be compelled to modify the terms of the loan. In addition, the nature of these loans is such that they are generally less predictable and more difficult to evaluate and monitor. As a result, repayment of these loans may, to a greater extent than residential loans, be subject to adverse conditions in the real estate market or economy.

Our allowance for loan losses may be insufficient and require additional provision from earnings.

The Bank maintains an allowance for loan losses based on, among other things, national and regional economic conditions, historical loss experience and delinquency trends. We make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of borrowers and the value of the real estate and other assets serving as collateral for the repayment of loans. In determining the size of the allowance for loan losses, we rely on our experience and our evaluation of economic conditions. However, we cannot predict loan losses with certainty, and we cannot provide assurance that charge-offs in future periods will not exceed the allowance for loan losses. If, as a result of general economic conditions, previously incorrect assumptions or an increase in defaulted loans, we determine that additional increases in the allowance for loan losses are necessary, we will incur additional provision expenses. In addition, regulatory agencies review the Bank's allowance for loan losses and may require additions to the allowance based on their judgment about information available to them at the time of their examination. Management could also decide that the allowance for loan losses should be increased. If charge-offs in future periods exceed the allowance for loan losses, we will need additional provisions to increase the allowance for loan losses. Furthermore, growth in the loan portfolio would generally lead to an increase in the provision for loan losses. Any increases in the allowance for loan losses will result in a decrease in net income and capital, and may have a material adverse effect on our financial condition, results of operations and cash flows. See the section captioned "Credit Risk Management and Allowance for Loan Losses" in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, in the Company's 2012 Annual Report on Form 10-K, for further discussion related to our process for determining the appropriate level of the allowance for loan losses.

The Maine foreclosure process can be lengthy and add additional losses for the Bank.

Residential foreclosures in Maine occur through the judicial system. Under ideal circumstances, it can take as little as six months to foreclose on a Maine property, however, if the borrower contests the foreclosure or the court delays the foreclosure, the process may take as long as two years. In 2009, the Maine Legislature passed "An Act to Preserve Home Ownership and Stabilize the Economy by Preventing Unnecessary Foreclosures." This law provides for mediation of foreclosure of residential mortgages and borrowers may choose mediation at which parties must attend and evaluate foreclosure alternatives in good faith. This law also provides that issues such as reinstatement of the mortgage, modification of the loan and restructuring of the mortgage debt are to be addressed at these mediations. Given the uncertain timeframe related to foreclosure in Maine, the Bank can incur additional legal fees and other costs, such as payment of property taxes and insurance, if the foreclosure process is extended. In addition, the value of the property may further decline if the borrower fails to maintain the property in good order.

Our level of troubled debt restructured ("TDR") has increased and could adversely affect our financial condition and results of operations.

Our efforts in 2011 and 2012 to assist homeowners and other borrowers increased our overall level of TDRs. In each case when a loan was modified, Management determined it was in the Bank's best interest to work with the borrower with modified terms rather than to proceed to foreclosure. Once a loan is classified as a TDR, however, it remains classified as a TDR until the balance is fully repaid, whether or not the loan is performing under the modified terms. As of December 31, 2012 there were 101 loans with an outstanding balance of \$30.0 million that have been restructured. This compares to 59 loans with a value of \$22.9 million as of December 31, 2011.

As of December 31, 2012, 70 loans with an aggregate balance of \$24.9 million were performing under the modified terms, seven loans with an aggregate balance \$1.7 million were more than 30 days past due and 24 loans with an aggregate balance of \$3.4 million were on nonaccrual. As a percentage of aggregate outstanding balances, 83.0% was performing under the modified terms, 5.8% was more than 30 days past due and 11.2% was on nonaccrual. Although a large percentage of TDRs continue to be performing, as a

group our TDRs are relatively unseasoned and the full collection of principal and interest on some TDRs may not occur, which could adversely affect our financial condition and results of operations.

Changes in interest rates could adversely affect our net interest income and profitability.

Our earnings and cash flows are largely dependent upon our net interest income. Net interest income is the difference between interest income earned on interest-earning assets, such as loans and securities, and interest expense paid on interest-bearing liabilities, such as deposits and borrowed funds. Interest rates are highly sensitive to many factors that are beyond our control, including general economic conditions, demand for loans, securities and deposits, and policies of various governmental and regulatory agencies and, in particular, the Board of Governors of the Federal Reserve System. Changes in monetary policy, including changes in interest rates, could influence not only the interest we receive on loans and securities and the amount of interest we pay on deposits and borrowings, but such changes could also affect

our ability to originate loans and obtain deposits;

the fair value of our financial assets and liabilities; and

the average duration of our loans and securities that are collateralized by mortgages.

If the interest rates paid on deposits and other borrowings increase at a faster rate than the interest rates received on loans and other investments, our net interest income, and therefore earnings, could be adversely affected. Earnings could also be adversely affected if the interest rates received on loans and other investments fall more quickly than the interest rates paid on deposits and other borrowings. If interest rates decline, our higher-rate loans and investments may be subject to prepayment risk, which could negatively impact our net interest margin. Conversely, if interest rates increase, our loans and investments may be subject to extension risk, which could negatively impact our net interest margin as well. Any substantial, unexpected, prolonged change in market interest rates could have a material adverse effect on our financial condition, results of operations and cash flows. See Item 7A. Quantitative and Qualitative Disclosures about Market Risk in the Company's 2012 Annual Report on Form 10-K, for further discussion related to our management of interest rate risk.

The value of our investment portfolio may be negatively affected by changes in interest rates and disruptions in securities markets.

The market for some of the investment securities held in our portfolio has become volatile over the past several years. Volatile market conditions may detrimentally affect the value of these securities due to the perception of heightened credit and liquidity risks. There can be no assurance that the declines in market value associated with these disruptions will not result in other than temporary impairments of these assets, which would lead to accounting charges that could have a material adverse effect on our net income and capital levels. Our mortgage-backed portfolio may be subject to extension risk as interest rates rise and borrowers are unable to refinance their current mortgages into lower rate mortgages, extending the average life of the bonds. As of December 31, 2012, we had \$291.6 million and \$143.3 million in available for sale and held to maturity investment securities, respectively. Numerous factors, including lack of liquidity for re-sales of certain investment securities, absence of reliable pricing information for investment securities, adverse changes in business climate, adverse actions by regulators, or unanticipated changes in the competitive environment could have a negative effect on our investment portfolio in future periods. If an impairment charge is significant enough it could affect the ability of the Bank to renew funding. This could have a material adverse effect on our liquidity and the Bank's ability to upstream dividends to the Company and for the Company to then pay dividends to shareholders. It could also negatively impact our regulatory capital ratios and result in our not being classified as "well-capitalized" for regulatory purposes.

Illiquidity could impair our ability to fund operations and jeopardize our financial condition.

Liquidity is essential to our business. An inability to raise funds through traditional deposits, brokered deposit renewals or rollovers, secured or unsecured borrowings, the sale of securities or loans and other sources could have a substantial negative effect on our liquidity. Our access to funding sources in amounts adequate to finance our activities could be impaired by factors that affect us specifically or the financial services industry or economy in general, or could be available only under terms which are unacceptable to

us. We rely primarily on commercial and retail deposits and, to a lesser extent, brokered deposit renewals and rollovers, advances from the Federal Home Loan Bank of Boston (the "FHLB") and other secured and unsecured borrowings to fund our operations. Factors that could detrimentally impact our access to liquidity sources include a decrease in the level of our business activity as a result of a downturn in the markets in which our loans are concentrated, adverse regulatory action against us, changes in market interest rates or increased competition for funding within our market. Disruptions in the capital markets or interest rate changes may make the terms of wholesale funding sources less favorable and may make it difficult to sell securities when needed to provide additional liquidity. In addition, if we fall below the FDIC's thresholds to be considered "well capitalized", we will be unable to continue to rollover or renew brokered funds, and the interest rate paid on deposits would be subject to restrictions. As a result, there is a risk that our cost of funding will increase or we will not have sufficient funds to meet our obligations when they become due.

Loss of lower-cost funding sources could lead to margin compression and decrease net interest income.

Checking and savings, NOW, and money market deposit account balances and other forms of customer deposits can decrease when customers perceive alternative investments, such as the stock market, as providing a better risk/return tradeoff. If customers move money out of bank deposits and into other investments, we could lose a relatively low-cost source of funds, increasing our funding costs and reducing our net interest income and net income. Advances from the FHLB are currently a relatively low-cost source of funding. The availability of qualified collateral on the Bank's balance sheet determines the level of advances available from FHLB and a deterioration in quality in the Bank's loan portfolio can adversely impact the availability of this source of funding, which could increase our funding costs and reduce our net interest income.

The soundness of other financial institutions could adversely affect us.

Since mid-2007, the financial services industry as a whole, as well as the securities markets generally, have been materially and adversely affected by very significant declines in the values of nearly all asset classes and by a very serious lack of liquidity. Financial institutions in particular have been subject to increased volatility and an overall loss in investor confidence. Our ability to engage in routine funding transactions could be adversely affected by the actions and commercial soundness of other financial institutions. Financial services companies are interrelated as a result of trading, clearing, counterparty, or other relationships. We have exposure to many different industries and counterparties, and we routinely execute transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks, mutual and hedge funds, and other institutional clients. As a result, defaults by, or even rumors or questions about, one or more financial services companies, or the financial services industry generally, have led to market-wide liquidity problems and could lead to losses or defaults by us or by other institutions. In addition, many of these transactions expose us to credit risk in the event of default of our counterparty or client. Further, our credit risk may be exacerbated when the collateral held by us cannot be realized or is liquidated at prices not sufficient to recover the full amount of the loan or derivative exposure due us. There is no assurance that any such losses would not materially and adversely affect our business, financial condition or results of operations.

Lack of loan demand may adversely impact net interest income.

During the past two years our loan portfolio has decreased \$18.3 million. Loan demand in the Bank's market area has been limited as a result of continued weak economic conditions. This has had the greatest impact on the commercial loan portfolio. In addition, in order to reduce the Bank's exposure to interest rate risk, the Bank has sold residential mortgages to the secondary market that have been refinanced by borrowers seeking to take advantage of lower interest rates. Should this trend continue, net interest income may be negatively impacted if loans are replaced by lower-yielding investment securities or if the balance sheet is allowed to shrink.

Our recent acquisitions may negatively impact earnings.

On October 26, 2012, the Company completed the purchase of the former Bank of America branch at 63 Union Street in Rockland, Maine, from Camden National Bank. As part of the transaction, the Company acquired approximately \$32.3 million in deposits as well as a small volume of loans. On the same date, the Company completed the purchase of a full-service bank building at 145 Exchange Street in Bangor, Maine, also from Camden National, and opened a full-service branch in this building in February of 2013. While we believe that these locations offer an excellent opportunity for the Company to expand its presence in Mid-Coast Maine and enter a new market in Eastern Maine, there is no guarantee that the increased operating costs for facilities and personnel will be offset by growth in loans and deposits in the new locations.

A decline in real estate values in our primary market area could adversely impact results of operations and financial condition.

Most of the Bank's lending is in Mid-Coast and Down East Maine. As a result of this geographic concentration, a significant broad-based deterioration in economic conditions in this area or Northern New England could have a material adverse impact on the quality of the Bank's loan portfolio, and could result in a decline in the demand for our products and services and, accordingly, could negatively impact our results of operations. Such a decline in economic conditions could impair borrowers' ability to pay outstanding principal and interest on loans when due and, consequently, adversely affect the cash flows of our business. The Bank's loan portfolio is largely secured by real estate collateral. A substantial portion of the real and personal property securing the loans in the Bank's portfolio is located in Mid-Coast and Down East Maine. Conditions in the real estate market in which the collateral for the Bank's loans is located strongly influence the level of the Bank's non-performing loans and results of operations. The recent decline in the Mid-Coast and Down East Maine area real estate values, as well as other external factors, could adversely affect the Bank's loan portfolio.

Our investment management activities are dependent on the value of investment securities which may lead to revenue fluctuations.

First Advisors is the investment management arm of the Bank, operating under trust powers granted from the OCC in the Bank's charter. First Advisors provides trustee, investment management and custody services for individual, municipal and business clients, predominately in the Bank's market area. First Advisors' revenues are directly tied to the market performance of the investments it manages for clients, and these may be adversely affected by a decline in the market value of these investments caused by normal fluctuations in the bond and stock markets.

We are dependent upon the services of our management team and if we are unable to retain the services of our management team, our business may suffer.

Our future success and profitability are substantially dependent upon the management and banking abilities of our senior executives. Changes in key personnel may be disruptive to our business and could have a material adverse effect on our business, financial condition and results of operations. We believe that our future results will also depend in part upon our attracting and retaining highly skilled and qualified management. Competition for the best people in most activities in which we are engaged can be intense, and we may not be able to retain or hire the people we want and/or need. In order to attract and retain qualified employees, we must compensate such employees at market levels. Typically, those levels have caused employee compensation to be our greatest expense. If we are unable to continue to attract and retain qualified employees, or do so at rates necessary to maintain our competitive position, our performance, including our competitive position, could suffer, and, in turn, have a material adverse effect on us. Although we have incentive compensation plans aimed, in part, at long-term employee retention, the unexpected loss of services of one or more of our key personnel could still occur, and such events may have a material adverse effect on us because of the loss of the employee's skills, knowledge of our market, years of industry experience and the difficulty of promptly finding qualified replacement personnel for our talented executives and/or relationship managers.

Pursuant to the standardized terms of the CPP, among other things, we agreed to institute certain restrictions on the compensation of certain senior executive management positions that could have an

adverse effect on our ability to hire or retain the most qualified senior executives. Other restrictions were imposed under the Recovery Act, the Dodd-Frank Act and other legislation or regulations. Our ability to attract and/or retain talented executives and/or relationship managers may be negatively affected by these developments or any new executive compensation limits.

Our internal control systems are inherently limited and may fail or be circumvented.

We face the risk that the design of our controls and procedures, including those intended to mitigate the risk of fraud by employees or outsiders, may prove to be inadequate or may be circumvented, thereby causing delays in detection of errors or inaccuracies in data and information. Although Management regularly reviews and updates our internal controls, disclosure controls and procedures, and corporate governance policies and procedures, the Company's systems of internal controls, disclosure controls and corporate governance policies and procedures are inherently limited. The inherent limitations of our system of internal controls include the use of judgment in decision-making that can be faulty; breakdowns can occur because of human error or mistakes; and controls can be circumvented by individual acts or by collusion of two or more people. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and any design may not succeed in achieving its stated goals under all potential future conditions. Because of the inherent limitation of a cost-effective control system, misstatements due to error or fraud may occur and may not be detected, which may have an adverse effect on the Company's business, results of operations or financial condition. Additionally, any plans of remediation for any identified limitations may be ineffective in improving internal controls.

Our business is continually undergoing rapid technological change that may give rise to customer expectations that exceed the capabilities of our systems or personnel.

The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Our future success depends, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in our operations. Our largest competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers. Failure to successfully keep pace with technological change affecting the financial services industry could have a material adverse effect on us.

We are subject to security, transactional and operational risks relating to the use of technology that could damage our reputation and our business.

We rely heavily on communications and information systems to conduct our business serving both internal and customer constituencies. Any failure, interruption or breach in security of these systems could result in failures or disruptions in our customer relationship management, general ledger, deposit, loan, and other systems. While we have policies and procedures, security applications and fraud mitigation applications, designed to prevent or limit the effect of the failure, interruption, fraud attacks or security breach of our information systems, there can be no assurance that any such failures, interruptions, fraud attacks or security breaches will not occur or, if they do occur, that they will be adequately addressed. Fraud attacks targeting customer-controlled devices, plastic payment card terminals, and merchant data collection points provide another source of potential loss, again through no fault of our own. The occurrence of any failures, interruptions or security breaches of information systems used to process customer transactions could damage our reputation, result in a loss of customer business, subject us to additional regulatory scrutiny, or expose us to civil litigation and possible financial liability, any of which could have a material adverse effect on our financial condition, results of operations and cash flows.

We are subject to claims and litigation that may impact our earnings and/or our reputation.

From time to time, customers, vendors or other parties may make claims and take legal actions against us. Whether any particular claims and legal actions are founded or unfounded, if such claims and legal actions are not resolved in a manner favorable to us, they may result in financial liability and/or adversely affect

the market perception of the Company and its products and services. Any financial liability or reputation damage could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations. We maintain reserves for certain claims when deemed appropriate based upon our assessment that a loss is probable, consistent with applicable accounting guidance. At any given time we may have legal actions asserted against us in various stages of litigation. Resolution of a legal action can often take years. We are also involved, from time to time, in other reviews, investigations and proceedings (both formal and informal) by governmental and self-regulatory agencies regarding our business, including, among other things, accounting and operational matters, certain of which may result in adverse judgments, settlements, fines, penalties, injunctions or other relief. The number and risk of these investigations and proceedings has increased in recent years with regard to many firms in the financial services industry due to legal changes to the consumer protection laws provided for by the Dodd-Frank Act, the creation of the CFPB, and the uncertainty as to whether federal preemption of certain state consumer laws remains intact for federally chartered financial institutions like the Bank. A weakening of federal pre-emption would potentially increase our compliance and operational costs and risks since we are a national bank and we would potentially face new state and local enforcement activity. There have also been a number of highly publicized cases involving fraud or misconduct by employees in the financial services industry in recent years, and we face the risk that employee misconduct could occur. It is not always possible to deter or prevent employee misconduct, and the precautions we take to prevent and detect this activity may not be effective in all cases. Any financial liability for which we have not adequately maintained reserves or insurance coverage, and/or any damage to our reputation from such claims and legal actions, could have a material adverse effect on us. Damage to our reputation could significantly harm our businesses.

Our ability to attract and retain customers, clients, investors and highly-skilled management and employees is impacted by our reputation. Public perception of the financial services industry declined since the recent downturn in the U.S. economy. We continue to face increased public and regulatory scrutiny resulting from the financial crisis and economic downturn. Significant harm to our reputation can also arise from other sources, including employee misconduct, actual or perceived unethical behavior, litigation or regulatory outcomes, failing to deliver minimum or required standards of service and quality, compliance failures, disclosure of confidential information, and the activities of our clients, customers and counterparties, including vendors. Actions by the financial services industry generally or by certain members or individuals in the industry can also significantly adversely affect our reputation. We could also suffer significant reputational harm if we fail to properly identify and manage potential conflicts of interest. The actual or perceived failure to adequately address conflicts of interest could affect the willingness of clients to deal with us, which could adversely affect our businesses. Our actual or perceived failure to address these and other issues gives rise to reputational risk that could cause significant harm to us and our business prospects, and may have a material adverse effect on us.

Our recent results may not be indicative of our future results.

We may not be able to sustain our historical rate of growth or may not even be able to grow our business at all. In addition, our recent growth may distort some of our historical financial ratios and statistics. Various factors, such as economic conditions, regulatory and legislative considerations and competition, may also impede our ability to expand our market presence. If we experience a significant decrease in our historical rate of growth, our results of operations and financial condition may be adversely affected due to a high percentage of our operating costs being fixed expenses.

Risks Associated With Our Industry

Our business has been and may continue to be adversely affected by conditions in the financial markets and economic conditions generally.

Negative developments in 2008 and 2009 in the financial services industry have resulted in uncertainty in the financial markets in general and a related general economic downturn, which have continued into 2013. In addition, as a consequence of the recent U.S. recession, businesses across a wide range of industries have faced serious difficulties due to the decrease in consumer spending, reduced consumer confidence brought on by deflated home values, among other things, and reduced liquidity in the credit markets. Unemployment also increased significantly over the past several years.

As a result of these financial and economic crises, many lending institutions, including us, have experienced in recent years declines in the performance of their loans, including construction, land development and land loans, commercial real estate loans and other commercial and consumer loans (see “Credit Risk Management and Allowance for Loan Losses” in ITEM 7: Management’s Discussion and Analysis of Financial Condition and Results of Operations in the Company’s 2012 Annual Report on Form 10-K). Moreover, competition among depository institutions for core deposits and quality loans has increased significantly. In addition, the values of real estate collateral supporting many commercial loans and home mortgages have declined and may continue to decline. BHC stock prices have been negatively affected, and the ability of banks and BHCs to raise capital or borrow in the debt markets has been more difficult compared to years prior to the economic downturn. As a result, bank regulatory agencies have been and are expected to continue to be very aggressive in responding to concerns and trends identified in examinations, including the issuance of formal or informal enforcement actions or orders. New legislation responding to these developments may negatively impact us by restricting our business operations, including our ability to originate or sell loans, and adversely impact our financial performance or our stock price.

In addition, further negative market developments may affect consumer confidence levels and may cause adverse changes in payment patterns, causing increases in delinquencies and default rates, which may impact our charge-offs and provision for credit losses. A worsening of these conditions would likely exacerbate the adverse effects of these difficult market conditions on us and others in the financial services industry.

Overall, during the past four years, the general business environment has had an adverse effect on our business, and there can be no assurance that the environment will improve in the near term. Until conditions improve, we expect our business, financial condition and results of operations to be adversely affected.

The downgrade of the U.S. credit rating and Europe’s debt crisis could have a material adverse effect on our business, financial condition and liquidity.

Standard & Poor’s lowered its long term sovereign credit rating on the United States of America from AAA to AA+ on August 5, 2011. A further downgrade or a downgrade by other rating agencies could have a material adverse impact on financial markets and economic conditions in the United States and worldwide. Any such adverse impact could have a material adverse effect on our liquidity, financial condition and results of operations. Many of our investment securities are issued by U.S. government agencies and U.S. government sponsored entities. In addition, the possibility that certain European Union (“EU”) member states will default on their debt obligations has negatively impacted economic conditions and global markets. The continued uncertainty over the outcome of international and the EU’s financial support programs and the possibility that other EU member states may experience similar financial troubles could further disrupt global markets. The negative impact on economic conditions and global markets could also have a material adverse effect on our liquidity, financial condition and results of operations.

We operate in a highly regulated environment and may be adversely affected by changes in law and regulations.

Bank holding companies and nationally chartered banks operate in a highly regulated environment and are subject to supervision and examination by various regulatory agencies. The Company is subject to the BHC Act, as amended, and to regulation and supervision by the Federal Reserve Board. The Bank is subject to

regulation and supervision by the OCC. The cost of compliance with regulatory requirements may adversely affect our results of operations or financial condition. Federal and state laws and regulations govern numerous matters including: changes in the ownership or control of banks and bank holding companies; maintenance of adequate capital and the financial condition of a financial institution; permissible types, amounts and terms of extensions of credit and investments; permissible non-banking activities; the required level of reserves against deposits; and restrictions on dividend payments. The OCC possesses cease and desist powers to prevent or remedy unsafe or unsound practices or violations of law by banks subject to their regulation, and the Federal Reserve Board possesses similar powers with respect to bank holding companies. These and other restrictions limit the manner in which we may conduct our business and obtain financing. Under regulatory capital adequacy guidelines and other regulatory requirements, we must meet guidelines that include quantitative measures of assets, liabilities, and certain off-balance sheet items, subject to qualitative judgments by regulators about components, risk weightings and other factors. If we fail to meet these minimum capital guidelines and other regulatory requirements, our financial condition would be materially and adversely affected. Our failure to maintain the status of “well-capitalized” under our regulatory framework could affect the confidence of our customers in us, thus compromising our competitive position, or could cause our regulators to take corrective or other supervisory action.

The Dodd-Frank Act created a new Consumer Financial Protection Bureau, tightened capital standards and will continue to result in new laws and regulations that are expected to increase our costs of operations.

The Dodd-Frank Act is significantly changing the current bank regulatory structure and affecting the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies are given significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and the impacts of the Dodd-Frank Act may not be known for many months or years. However, it is expected that the legislation and implementing regulations may materially increase our operating and compliance costs.

The Dodd-Frank Act created a new Consumer Financial Protection Bureau with broad powers to supervise and enforce consumer protection laws. The CFPB has broad rule-making authority for a wide range of consumer protection matters that apply to all banks and savings institutions, including the authority to prohibit “unfair, deceptive or abusive” acts and practices. The CFPB’s authority to prescribe rules governing the provision of consumer financial products and services could result in rules and regulations that reduce the profitability of such products or services, or impose new disclosure or substantive requirements on us that could increase the cost to us of providing such products and services. The Dodd-Frank Act also weakens the federal preemption rules that have been applicable to national banks and federal savings associations, and gives state attorneys general the ability to enforce federal consumer protection laws, which could increase our operating costs.

Effective July 21, 2011, the Dodd-Frank Act eliminated the federal prohibitions on paying interest on demand deposits, thus allowing businesses to have interest bearing checking accounts, which could result in an increase in our interest expense.

The Dodd-Frank Act also broadens the base for FDIC deposit insurance assessments. Assessments are now based on the average consolidated total assets less tangible equity capital of a financial institution, rather than deposits. The Dodd-Frank Act also permanently increases the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per depositor, retroactive to January 1, 2009. The legislation also increases the required minimum reserve ratio for the Deposit Insurance Fund, from 1.15% to 1.35% of insured deposits, but directs the FDIC to offset the effects of increased assessments on depository institutions, such as the Bank, with less than \$10 billion in assets. Any increase in our deposit insurance premiums will result in an increase in our non-interest expense.

The Dodd-Frank Act requires publicly traded companies to give stockholders a non-binding vote on executive compensation and so-called “golden parachute” payments. It also provides that the listing standards of the national securities exchanges shall require listed companies to implement and disclose “clawback” policies mandating the recovery of incentive compensation paid to executive officers in

connection with accounting restatements. The legislation also directs the Federal Reserve Board to promulgate rules prohibiting excessive compensation paid to bank holding company executives. These rules could adversely affect our ability to hire and retain qualified management, which could have an adverse effect on our business.

The short-term and long-term impact of changing regulatory capital requirements and anticipated new capital rules are uncertain.

On June 7, 2012, the Federal Reserve Board issued proposed rules that would substantially amend the regulatory risk-based capital rules applicable to us. The proposed rules implement the Basel III regulatory capital reforms and changes required by the Dodd-Frank Act. Basel III was initially intended to be implemented beginning January 1, 2013, however on November 9, 2012, the U.S. federal banking agencies announced that the proposed rules would not become effective on January 1, 2013, and it is not clear when the proposed rules will become effective.

Various provisions of the Dodd-Frank Act increase the capital requirements of financial institutions. The proposed rules include new minimum risk-based capital and leverage ratios, which would be phased in during 2013 and 2014, and would refine the definition of what constitutes “capital” for purposes of calculating these ratios. The proposed new minimum capital requirements would be:

- a new common equity Tier 1 capital ratio of 4.5%;
- a Tier 1 capital ratio of 6% (increased from 4%);
- a total capital ratio of 8% (unchanged from current rules); and
- a Tier 1 leverage ratio of 4% for all institutions.

The proposed rules would also establish a “capital conservation buffer” of 2.5% above the new regulatory minimum capital ratios, and would result in the following minimum ratios:

- a common equity Tier 1 capital ratio of 7.0%,
- a Tier 1 capital ratio of 8.5%, and
- a total capital ratio of 10.5%.

The new capital conservation buffer requirement would be phased in beginning in January 2016 at 0.625% of risk-weighted assets and would increase each year until fully implemented in January 2019. An institution would be subject to limitations on paying dividends, engaging in share repurchases, and paying discretionary bonuses if its capital level falls below the buffer amount. These limitations would establish a maximum percentage of eligible retained income that could be utilized for such actions. While the proposed Basel III changes and other regulatory capital requirements will result in higher regulatory capital standards, it is difficult at this time to predict when or how any new standards will ultimately be applied. In addition, in the current economic and regulatory environment, bank regulators may impose capital requirements that are more stringent than those required by applicable existing regulations.

The application of more stringent capital requirements could, among other things, result in lower returns on equity, require the raising of additional capital, and result in adverse regulatory actions if we were to be unable to comply with such requirements. Furthermore, the imposition of liquidity requirements in connection with the implementation of Basel III could result in our having to lengthen the term of our funding, restructure our business models, and/or increase our holdings of liquid assets. Implementation of changes to asset risk weightings for risk based capital calculations, items included or deducted in calculating regulatory capital or additional capital conservation buffers, could result in management modifying our business strategy and could limit our ability to make distributions, including paying dividends or buying back our shares.

Significant competition in the financial services industry may impact our results.

We face substantial competition in all areas of our operations from a variety of different competitors, many of which are larger and have more financial resources than we do. We compete with other providers of financial services such as commercial and savings banks, savings and loan associations, credit unions, money market and mutual funds, mortgage companies, asset managers, insurance companies and a wide array of other local, regional and national institutions which offer financial services. Mergers between financial institutions within Maine and in neighboring states have added competitive pressure. If we are unable to compete effectively, we will lose market share and our income generated from loans, deposits, and other financial products will decline.

Risks Associated With Our Common Stock

There may not be a robust trading market for the common stock.

Although our common stock is traded on the NASDAQ Global Select market, the trading volume of the common stock has historically not been substantial. For the year ended December 31, 2012, the average monthly trading volume of our common stock was 336,734 shares, or approximately 3.42% of the average number of outstanding common shares for the year. Due to the limited trading volume in our common stock, the intraday spread between bid and ask prices of the shares can be quite high. There can be no assurance that a more robust, active or economical trading market for our common stock will develop. The market value and liquidity of our common stock may, as a result, be adversely affected.

The price of our common stock may fluctuate.

The price of our common stock on the NASDAQ Global Select Market constantly changes and recently, given the uncertainty in the financial markets, has fluctuated widely. We expect the market price of our common stock will continue to fluctuate. Holders of our common stock will be subject to the risk of volatility and changes in prices. Our common stock price can fluctuate as a result of many factors which are beyond our control, including:

- quarterly fluctuations in our operating and financial results;
- operating results that vary from the expectations of Management and investors;
- changes in expectations as to our future financial performance, including financial estimates;
- events negatively impacting the financial services industry which result in a general decline for the industry;
- announcements of material developments affecting our operations or our dividend policy;
- future sales of our equity securities;
- new laws or regulations or new interpretations of existing laws or regulations applicable to our business;
- changes in accounting standards, policies, guidance, interpretations or principles; and
- general domestic economic and market conditions.

In addition, recently the stock market generally has experienced extreme price and volume fluctuations, and industry factors and general economic and political conditions and events, such as economic slowdowns or recessions, interest rate changes or credit loss trends, could also cause our stock price to decrease regardless of our operating results.

The inability to receive dividends from the Bank would negatively affect our ability to pay dividends to shareholders. The Company is a legal entity separate and distinct from the Bank. With the exception of cash raised from debt and equity issuances, we receive substantially all of our cash flow from dividends from the Bank. These dividends are the principal source of funds to pay dividends on our equity securities. Federal banking law and regulations limit the amount of dividends that the Bank can pay. For further information on the regulatory restrictions on the payment of dividends by the Bank, see "Supervision and Regulation" in Item 1 in the Company's 2012 Annual Report on Form 10-k. In the event the Bank is unable to pay dividends to the Company, we may not be able to service debt, pay obligations or pay dividends on our equity securities. Our right to participate in a distribution of assets upon a subsidiary's liquidation or reorganization is subject to the prior claims of the subsidiary's creditors.

If we do not manage our capital position strategically, our return on equity could be lower compared to our competitors as a result of our high level of capital.

If we are unable to use strategically our excess capital, or to successfully continue capital management programs, such as stock repurchase programs or quarterly dividends to our shareholders, then our goal of generating a return on average equity that is competitive, increasing earnings per share and book value per share without assuming undue risk, could be delayed or may not be attained. Failure to achieve a

competitive return on average equity might decrease investments in our common stock and might cause our common stock to trade at lower prices.

We may issue additional equity securities or engage in other transactions which dilute our book value or affect the priority of the common stock, which may adversely affect the market price of our common stock.

Our Board of Directors may determine from time to time that we need to raise additional capital by issuing additional shares of our common stock or other securities. Except pursuant to the rules of the NASDAQ Stock Market, we are not restricted from issuing additional shares of common stock, including securities that are convertible into or exchangeable for, or that represent the right to receive, common stock. Because our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of any future offerings, or the prices at which such offerings may be affected. Such offerings could be dilutive to common shareholders or reduce the market price of our common stock. Holders of our common stock are not entitled to preemptive rights or protection against dilution. New investors also may have rights, preferences and privileges that are senior to, and that adversely affect, our then current common shareholders. We may attempt to increase our capital resources or, if our or the Bank's capital ratios fall below the required minimums, we could be forced to raise additional capital, by making offerings of debt or preferred equity securities, including medium-term notes, trust preferred securities, senior or subordinated notes and preferred stock. Upon liquidation, holders of our shares of preferred stock and lenders with respect to other borrowings will receive distributions of our available assets prior to the holders of our common stock. Our Board of Directors is authorized to issue one or more series of preferred stock from time to time without any action on the part of our shareholders. Our Board of Directors also has the power, without shareholder approval, to set the terms of any such series of preferred stock that may be issued, including voting rights, dividend rights and preferences over our common stock with respect to dividends or upon our dissolution, winding-up and liquidation and other terms. If we issue preferred stock in the future that has a preference over our common stock with respect to the payment of dividends or upon our liquidation, dissolution or winding up, or if we issue preferred stock with voting rights that dilute the voting power of our common stock, the rights of holders of our common stock or the market price of our common stock could be adversely affected. Potential acquisitions may disrupt our business and dilute shareholder value.

Acquiring other banks, businesses, or branches involves various risks commonly associated with acquisitions, including:

- potential exposure to unknown or contingent liabilities of the target;
- exposure to potential asset quality issues of the target;
- difficulty and expense of integrating the operations and personnel of the target;
- potential disruption to our business;
- potential diversion of Management's time and attention;
- the possible loss of key employees and customers of the target;
- difficulty in estimating the value of the assets and liabilities of the target;
- potential changes in banking or tax laws or regulations that may affect the target.

Merger or acquisition discussions and, in some cases, negotiations may take place and future mergers or acquisitions involving cash, debt or equity securities may occur at any time. Acquisitions typically involve the payment of a premium over book and market values, and, therefore, some dilution of our tangible book value and net income per common share may occur in connection with any future transaction. Furthermore, failure to realize the expected revenue increases, cost savings, increases in geographic or product presence, and/or other projected benefits from an acquisition could have a material adverse effect on us.

Our participation in the TARP Capital Purchase Program may depress the market value of our common stock.

On January 9, 2009, the Company issued \$25 million of CPP Shares. The CPP Shares call for cumulative dividends at a rate of 5.0% per year for the first five years, and at a rate of 9.0% per year in following years.

On August 24, 2011, the Company repurchased \$12.5 million of the CPP Shares, and after the repurchase, \$12.5 million of the CPP shares remains outstanding. The Company may redeem the remaining CPP Shares at any time using any funds available, subject to the prior approval of the Federal Reserve Bank of Boston.

During the time that Treasury holds any equity or debt instrument the Company issued, the Company is required to comply with certain restrictions relating to the compensation of the Company's chief executive officer, chief financial officer and three other most highly compensated executive officers. Additional restrictions with regard to increasing shareholder dividends and repurchase of Company stock were in place for the first three years of participation in the program and were lifted on January 9, 2012. The Company's earnings may be adversely impacted if the remaining \$12.5 million of CPP Shares is not repaid before January 9, 2014, at which time the annual dividend rate on the CPP Shares increases from 5.0% to 9.0%. This in turn, may impact the price of the Company's shares.

We have broad discretion in how we may use the proceeds of this offering.

We expect to receive net proceeds from this offering of approximately \$10 million, after deducting underwriting discounts and commissions and estimated expenses payable by us. Subject to receipt of approval by the Federal Reserve Bank of Boston, we intend to use the net proceeds from this offering to repurchase the remaining portion of the CPP Shares from the U.S. Treasury. We have broad discretion, however, to use net proceeds for general corporate purposes: to bolster our capital ratios, support our organic growth and strengthen our liquidity position, or to better position us for business opportunities in our market areas. Moreover, the net proceeds may be applied in ways with which some of our shareholders may not agree or may be used for corporate purposes that may not increase our market value or make us more profitable.

CAPITAL STOCK AND DIVIDENDS

As of December 31, 2012, the Company's securities consisted of one class of common stock, one class of preferred stock, and warrants to purchase common stock. At that date, there were 9,859,914 shares of common stock outstanding. In addition, there were 12,500 shares of cumulative perpetual preferred stock outstanding with a preference value of \$1,000 per share, all of which were issued to the U.S. Treasury under its Capital Purchase Program. Incident to the issuance of the CPP Shares, the Company issued to the U.S. Treasury warrants to purchase up to 225,904 shares of the Company's common stock at a price per share of \$16.60 (the "Warrants").

The common stock and preferred stock of the Bank are the principal assets of the Company, which has no other subsidiaries. The Bank's capital stock consists of one class of common stock of which 120,000 shares, par value \$2.50 per share, are authorized and outstanding, and one class of non-cumulative perpetual preferred stock, \$1,000 preference value, of which 12,500 shares are authorized and outstanding. All of the Bank's common stock and preferred stock is owned by the Company.

The following table sets forth our audited consolidated capitalization as of December 31, 2012, and as adjusted to give effect to the issuance of the Common Shares offered by this prospectus supplement and the impact of the potential subsequent repurchase of the remaining \$12.5 million of CPP Shares issued to the U.S. Treasury under the Capital Purchase Program. You should read the following table with the consolidated financial statements and the related notes included in our Annual Report on Form 10-K for the year ended December 31, 2012, which is incorporated by reference in this prospectus supplement and the accompanying prospectus.

Dollars in thousands	Actual as of December 31, 2012	After Common Stock Issuance ¹	After Preferred Stock Repurchase	
Series A preferred stock	\$12,402	\$12,402	\$—	
Common stock	98	104	104

¹ Assumes that the net proceeds are approximately \$10.0 million after deducting underwriting discounts and our estimated expenses.

The common stock of the Company (ticker symbol FNLC) trades on the NASDAQ Global Select Market System. As of December 31, 2012, there were 9,859,914 shares outstanding and held of record by approximately 3,547 shareholders. The following table reflects the high and low prices of actual sales in each quarter of 2012 and 2011. Such quotations do not reflect retail mark-ups, mark-downs or brokers' commissions.

	2012		2011	
	High	Low	High	Low
1st Quarter	\$16.38	\$14.00	\$15.95	\$13.40
2nd Quarter	17.44	13.41	15.96	13.79
3rd Quarter	18.96	16.02	15.30	11.69
4th Quarter	18.14	14.32	15.95	11.75

The foregoing table shows only historical comparisons. These comparisons may not provide meaningful information to you in determining whether to purchase Common Shares. You are urged to obtain current market quotations for our Common Shares and to review carefully the other information contained in or incorporated by reference into this prospectus supplement and the accompanying prospectus.

The ability of the Company to pay cash dividends depends on receipt of dividends from the Bank. Dividends may be declared by the Bank out of its net profits as the directors deem appropriate, subject to the limitation that the total of all dividends declared by the Bank in any calendar year may not exceed the total of its net profits of that year plus retained net profits of the preceding two years. The amount available for dividends in 2013 will be that year's net income plus \$6.8 million. The payment of dividends from the Bank to the Company may be additionally restricted if the payment of such dividends resulted in the Bank failing to meet regulatory capital requirements. The table below sets forth the cash dividends declared in the last two full fiscal years:

Date Declared	Amount Per Share	Date Payable
March 17, 2011	\$0.195	April 29, 2011
June 15, 2011	\$0.195	July 29, 2011
September 15, 2011	\$0.195	October 28, 2011
December 15, 2011	\$0.195	January 31, 2012
March 15, 2012	\$0.195	April 30, 2012
June 20, 2012	\$0.195	July 31, 2012
September 20, 2012	\$0.195	October 31, 2012
December 20, 2012	\$0.195	January 31, 2013

ERISA CONSIDERATIONS

A fiduciary of a pension, profit-sharing or other employee benefit plan governed by the Employee Retirement Income Security Act of 1974, as amended (“ERISA”), should consider the fiduciary standards of ERISA in the context of the ERISA plan’s particular circumstances before authorizing an investment in the Common Shares. Among other factors, the fiduciary should consider whether such an investment is in accordance with the documents governing the ERISA plan and whether the investment is appropriate for the ERISA plan in view of its overall investment policy and diversification of its portfolio.

Certain provisions of ERISA and the Code prohibit employee benefit plans (as defined in Section 3(3) of ERISA) that are subject to Title I of ERISA, plans described in Section 4975(e)(1) of the Code (including, without limitation, retirement accounts and Keogh Plans), and entities whose underlying assets include plan assets by reason of a plan’s investment in such entities (including, without limitation, as applicable, insurance company general accounts), from engaging in certain transactions (each a “prohibited transaction”) involving “plan assets” with parties that are “parties in interest” under ERISA or “disqualified persons” under the Code with respect to the plan or entity. A violation of these prohibited transaction rules may result in civil penalties or other liabilities under ERISA and/or an excise tax under Section 4975 of the Code for those persons, unless exemptive relief is available under an applicable statutory, regulatory or administrative exemption. Certain plans including those that are governmental plans (as defined in Section 3(32) of ERISA), certain church plans (as defined in Section 3(33) of ERISA and Section 414(e) of the Code with respect to which the election provided by Section 410(d) of the Code has not been made), and foreign plans (as described in Section 4(b)(4) of ERISA) are not subject to the requirements of ERISA or Section 4975 of the Code but may be subject to similar provisions under applicable federal, state, local, foreign or other regulations, rules or laws. Any employee benefit plan or other entity, to which such provisions of ERISA, the Code or similar law apply, proposing to acquire the Common Shares should consult with its legal counsel.

We, directly or through our affiliates, may be considered a “party in interest” or a “disqualified person” as to a large number of plans. A purchase of Common Shares by any such plan may constitute or result in a prohibited transaction between the plan and us. Accordingly, Common Shares may not be purchased, held or disposed of by any such plan or any other person investing “plan assets” of any such plan that is subject to the prohibited transaction rules of ERISA or Section 4975 of the Code or other similar law, unless (1) such purchase, holding or disposition is eligible for the exemptive relief available under a Prohibited Transaction Class Exemption (“PTCE”) such as PTCE 96-23, PTCE 95-60, PTCE 91-38, PTCE 90-1 or PTCE 84-14 issued by the U.S. Department of Labor or there is some other basis on which the purchase, holding or disposition of Common Shares is not prohibited, such as the exemption under Section 408(b)(17) of ERISA and Section 4975(d)(20) of the Code; or (2) the requirements of U.S. Department of Labor Regulation (“DOL Regulation”) Section 2550.401c-1 regarding insurance company general accounts are satisfied so that the Common Shares held by the purchaser do not constitute plan assets.

Any purchaser of the Common Shares or any interest therein will be deemed to have represented and warranted on each day including the date of its purchase of the Common Shares through and including the date of disposition of such Common Shares that either:

- no portion of the assets used by such purchaser to acquire and hold the Common Shares constitutes assets of any employee benefits plan or similar arrangement; or

the purchase, holding and disposition of the Common Shares by such purchaser will not constitute a nonexempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code, or a violation under any applicable similar laws, and neither we, the underwriter, nor any of our affiliates is acting as a fiduciary (within the meaning of Section 3(21) of ERISA) in connection with the purchase, holding or disposition of our Common Shares and has not provided any advice

that has formed or may form a basis for any investment decision concerning the purchase, holding or disposition of our Common Shares; or

- the purchaser or holder has satisfied the requirements of DOL Regulation Section 2550.401c-1 such that the Common Shares held by the purchaser or holder do not constitute “plan assets.”

Any party who purchases, holds or disposes of our Common Shares or any interest therein on behalf of any governmental plan, church plan, or foreign plan will be deemed to have represented and warranted by its purchase, holding or disposition of our Common Shares or any interest therein that such purchase, holding or disposition does not violate any applicable similar laws.

Due to the complexity of these rules and the penalties imposed upon persons involved in prohibited transactions, it is important that any person considering the purchase of the Common Shares with plan assets consult with its counsel regarding the consequences under ERISA and the Code, or other similar law, of the acquisition and ownership of Common Shares and the availability of exemptive relief under the class exemptions listed above.

UNDERWRITING

We are offering the Common Shares described in this prospectus supplement and the accompanying prospectus through Keefe, Bruyette & Woods, Inc. Keefe, Bruyette & Woods is acting as sole underwriter (the “Underwriter”), and we have entered into an underwriting agreement with the Underwriter, dated March __, 2013 (the “Underwriting Agreement”). Subject to the terms and conditions of the Underwriting Agreement, the Underwriter has agreed to purchase the number of Common Shares set forth on the cover of this prospectus supplement.

Our Common Shares are offered subject to a number of conditions, including receipt and acceptance of the Common Shares by the Underwriter. In connection with this offering, the Underwriter may distribute documents to investors electronically.

Commissions and Discounts

Common Shares sold by the Underwriter to the public will be offered initially at the public offering price set forth on the cover of this prospectus supplement. The maximum compensation to be received by the Underwriter will not exceed 5.75% of the aggregate offering proceeds.

The following table shows the per share and total underwriting discounts and commissions we will pay to the Underwriter, assuming both no exercise and full exercise of the Underwriter’s over-allotment option to purchase an additional [] shares of common stock:

	No Exercise	Full Exercise
Per Share	\$[]	\$[]
Total	\$[]	\$[]

We estimate that the total expenses of this offering payable by us, not including the underwriting discounts and commissions but including our reimbursement of certain expenses of the Underwriter, will be approximately \$[].

Over-Allotment Option

We granted the Underwriter an option to buy up to _____ additional Common Shares at the public offering price, less underwriting discounts and commissions, for the purpose of covering over-allotments, if any, made in connection with this offering. The Underwriter has 30 days from the date of this prospectus supplement to exercise this option in whole or in part.

No Sales of Similar Securities

We and our executive officers and directors have entered into lock-up agreements with the Underwriter. Under these agreements, we and each of these persons may not, without the prior written approval of the Underwriter, subject to limited exceptions, (i) offer, pledge, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant for the sale of, or otherwise dispose of or transfer any Common Shares or any securities convertible into or exchangeable or exercisable for our Common Shares, whether now owned or hereafter acquired or with respect to which such person has or hereafter acquires the power of disposition, or file any registration statement under the Securities Act, with respect to any of the foregoing or (ii) enter into any swap or any other agreement or any transaction that transfers, in whole or in part, directly or indirectly, the economic consequence of ownership of the Common Shares, whether any such swap or transaction is to be settled by delivery of Common Shares or other securities, in cash or otherwise. These restrictions will be in effect for a period of 90 days after the date of the Underwriting Agreement. At any time and without public notice, the Underwriter may, in its sole discretion, release all or some of the securities from these lock-up agreements.

The 90-day restricted period described above is subject to extension under limited circumstances. In the event that either (1) during the period that begins on the date that is 15 calendar days plus 3 business days before the last day of the 90-day restricted period and ends on the last day of the 90-day restricted period, we issue an earnings release or material news or a material event relating to us occurs; or (2) prior to the expiration of the 90-day restricted period, we announce that we will release earnings results during the 16-day period beginning on the last day of the 90-day restricted period, then the restricted period will continue to apply until the expiration of the date that is 15 calendar days plus 3 business days after the date on which the earnings release is issued or the material news or material event relating to us occurs.

Indemnification and Contribution

We have agreed to indemnify the Underwriter and its affiliates, selling agents and controlling persons against certain liabilities. If we are unable to provide this indemnification, we will contribute to the payments the Underwriter and its affiliates, selling agents and controlling persons may be required to make in respect of those liabilities.

NASDAQ Global Select Market listing

Our Common Shares are listed on The NASDAQ Global Select Market under the symbol "FNLC."

Price Stabilization and Short Positions

In connection with this offering, the Underwriter may engage in activities that stabilize, maintain or otherwise affect the price of our Common Shares, including:

- stabilizing transactions;
- short sales; and
- purchases to cover positions created by short sales.

Stabilizing transactions consist of bids or purchases made for the purpose of preventing or retarding a decline in the market price of our Common Shares while this offering is in progress. These transactions may also include making short sales of our Common Shares, which involve the sale by the Underwriter of a greater number of Common Shares than it is required to purchase in this offering. Short sales may be "covered short sales," which are short positions in an amount not greater than the Underwriter's over-allotment option referred to above, or may be "naked short sales," which are short positions in excess of that amount.

The Underwriter may close out any covered short position either by exercising its over-allotment option, in whole or in part, or by purchasing shares in the open market. In making this determination, the Underwriter will consider, among other things, the price of shares available for purchase in the open market compared to the price at which it may purchase shares through the over-allotment option. The Underwriter must close out any naked short position by purchasing shares in the open market. A naked short position is more likely to be created if the Underwriter is concerned that there may be downward pressure on the price of the Common Shares in the open market that could adversely affect investors who purchased in this offering.

As a result of these activities, the price of our Common Shares may be higher than the price that otherwise might exist in the open market. If these activities are commenced, they may be discontinued by the Underwriter at any time without notice. The Underwriter may carry out these transactions on the NASDAQ Global Select Market, in the over-the-counter market or otherwise.

Passive Market Making

In connection with this offering, the Underwriter and selected dealers may engage in passive market making transactions in our Common Shares on The NASDAQ Global Select Market in accordance with Rule 103 of Regulation M under the Exchange Act during a period before the commencement of offers or

sales of Common Shares and extending through the completion of the distribution of this offering. A passive market maker must display its bid at a price not in excess of the highest independent bid of that security. However, if all independent bids are lowered below the passive market maker's bid, that bid must then be lowered when specified purchase limits are exceeded. Passive market making may cause the price of our Common Shares to be higher than the price that otherwise would exist in the open market in the absence of those transactions. The Underwriter and selected dealers are not required to engage in a passive market making and may end passive market making activities at any time.

Affiliations

The Underwriter and its affiliates may from time to time in the future perform services for us and engage in other transactions with us.

LEGAL MATTERS

The legality of the securities offered hereby will be passed upon for us by the law firm of Pierce Atwood LLP. Certain legal matters will be passed upon for the Underwriter by Nutter McClennen & Fish LLP.

EXPERTS

The financial statements incorporated in this prospectus supplement by reference to the Annual Report on Form 10-K for the year ended December 31, 2012 have been so incorporated in reliance on the report of Berry Dunn McNeil & Parker, LLC, independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

PROSPECTUS SUMMARY

ABOUT THIS PROSPECTUS

Unless the context requires otherwise or this prospectus indicates otherwise, in this prospectus, we use the terms “we,” “us,” “our,” “The First” and the “Company” to refer to The First Bancorp, Inc. and its subsidiary. The term “Bank” refers to our subsidiary, The First, N.A. This prospectus is part of a registration statement on Form S-3 that we filed with the Securities and Exchange Commission, which we refer to as the “SEC”, using a “shelf” registration process. Under this shelf registration process, we may sell, in one or more offerings, up to a total dollar amount of \$25,000,000, any combination of:

- Preferred Stock
- Common stock
- Warrants
- Senior debt securities
- Subordinated debt securities

We may provide a prospectus supplement containing specific information about the terms of a particular offering. The prospectus supplement may add, update or change information in this prospectus. If the information in this prospectus is inconsistent with a prospectus supplement, you should rely on the information in that prospectus supplement. You should read both this prospectus and, if applicable, any prospectus supplement. See “Where You Can Find More Information” for more information.

Our SEC registration statement containing this prospectus, including exhibits, provides additional information about us and the securities offered under this prospectus. The registration statement can be read at the SEC’s website or at the SEC’s offices. The SEC’s website and street addresses are provided under the heading “Where You Can Find More Information.”

You should rely only on the information contained in or incorporated by reference in this prospectus or a supplement to this prospectus. We have not authorized anyone to provide you with different information. This prospectus may only be used where it is legal to sell the securities. You should not assume that information contained in this prospectus, in any supplement to this prospectus, or in any document incorporated by reference is accurate as of any date other than the date on the front page of the document that contains the information, regardless of when this prospectus is delivered or when any sale of the securities occurs.

WHERE YOU CAN FIND MORE INFORMATION

This prospectus is part of a registration statement on Form S-3 that we filed with the SEC under the Securities Act of 1933, which we refer to as the “Securities Act”. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information appearing in this prospectus is accurate as of the date of this prospectus only. Our business, financial condition and results of operations may have changed since that date. The registration statement, including the attached exhibits, contains additional relevant information about us and the securities offered by this prospectus. SEC rules and regulations allow us to omit certain information included in the registration statement from this prospectus. You can obtain a copy of the registration statement from the SEC at the address provided below or on the SEC’s website (<http://www.sec.gov>).

We also file annual, quarterly and current reports, proxy statements and other information with the SEC. Our SEC filings are available to the public at the SEC’s website at <http://www.sec.gov>. Copies of certain information filed by us with the SEC are also available on our website at <http://www.thefirstbancorp.com>. Our website is not a part of this prospectus. You may also read and copy any document we file at the SEC’s public reference room, 100 F Street, N.E., Washington, D.C. 20549.

The SEC allows us to “incorporate by reference” into this registration statement information we file with it, which means that we can disclose important information to you by referring you to other documents. The information incorpora
