NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 – SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“US GAAP”) and the rules of the U.S. Securities and Exchange Commission (“SEC”). The year-end consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by US GAAP. In the opinion of management, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair statement of the results for interim periods have been included. Results for interim periods should not be considered indicative of results for a full year. These financial statements and related notes contain the accounts of DENTSPLY SIRONA Inc. and Subsidiaries (“Dentsply Sirona” or the “Company”) on a consolidated basis and should be read in conjunction with the consolidated financial statements and notes included in the Company’s most recent Form 10-K for the year ended December 31, 2017.

The accounting policies of the Company, as applied in the interim consolidated financial statements presented herein are substantially the same as presented in the Company’s Form 10-K for the year ended December 31, 2017, except as may be indicated below.

Revenue Recognition

Revenue is recognized when performance obligations under the terms of a contract with a customer are satisfied; generally this occurs with the transfer of risk and/or control of Dental and Healthcare Consumables products (“consumable” products), Dental Technology products (“technology” products), or Dental Equipment products (“equipment” products). Revenue is measured as the amount of consideration the Company expects to receive in exchange for transferring goods or providing services. Sales, value add and other taxes collected concurrent with revenue-producing activities are excluded from revenue. Incidental items that are immaterial in the context of the contract are recognized as expense.

For most of consumable, technology and equipment products, the Company transfers control and recognizes a sale when products are shipped from the manufacturing facility or warehouse to the customer (distributors and direct to dentists). For contracts with customers that contain destination shipping terms, revenue is not recognized until risk has transferred and the goods are delivered to the agreed upon destination. The amount of consideration received and revenue recognized varies with changes in marketing incentives (e.g., discounts, rebates, free goods) and returns offered to customers and their customers. When the Company gives customers the right to return eligible products and receive credit, returns are estimated based on an analysis of historical experience. However, returns of products, excluding warranty related returns, are infrequent and insignificant. The Company adjusts the estimate of revenue at the earlier of when the most likely amount of consideration can be estimated, the amount expected to be received changes, or when the consideration becomes fixed. Consideration received from customers in advance of revenue recognition is classified as deferred revenue.

Depending on the terms of the arrangement, the Company will defer the recognition of a portion of the consideration received when performance obligations are not yet satisfied (e.g., extended maintenance/service contracts, software and licenses, customer loyalty points and coupon programs). The Company uses an observable price, typically average selling price, to determine the stand-alone selling price for separate performance obligations. The Company

determines the stand-alone selling price, based on Company geographic sales locations' database of pricing and discounting practices for the specific product or service when sold separately, and utilizes this data to arrive at average selling prices by product. Revenue is then allocated proportionately, based on the determined stand-alone selling price, to the unsatisfied performance obligation, which is deferred until satisfied. At June 30, 2018, the Company had \$26.2 million of deferred revenue recorded in Accrued liabilities on the Consolidated Balance Sheets. The Company expects to recognize significantly all of the deferred revenue within the next twelve months.

The Company has elected to account for shipping and handling activities as a fulfillment cost within the cost of products sold, and records shipping and handling costs collected from customers in net sales. The Company has adopted two practical expedients: the "right to invoice" practical expedient, which allows us to recognize revenue in the amount of the invoice when it corresponds directly with the value of performance completed to date; and relief from considering the existence of a significant financing component when the payment for the good or service is expected to be one year or less.

The Company offers discounts to its customers and distributors if certain conditions are met. Discounts are primarily based on the volume of products purchased or targeted to be purchased by the customer. Discounts are deducted from revenue at the time of sale or when the discount is offered, whichever is later. The Company estimates volume discounts based on an individual customer's historical and estimated future product purchases.

Certain of the Company's customers are offered cash rebates based on targeted sales increases. The Company estimates rebates based on the forecasted performance of a customer and their expected level of achievement within the rebate programs. In accounting for these rebate programs, the Company records an accrual and reduces sales ratably as sales occur over the rebate period. The Company updates the accruals for these rebate programs as actual results and updated forecasts impact the estimated achievement for customers within the rebate programs.

A portion of the Company's net sales is comprised of sales of precious metals generated through its precious metal dental alloy product offerings. As the precious metal content of the Company's sales is largely a pass-through to customers, the Company uses its cost of precious metal purchased as a proxy for the precious metal content of sales, as the precious metal content of sales is not separately tracked and invoiced to customers. The Company believes that it is reasonable to use the cost of precious metal content purchased in this manner since precious metal alloy sale prices are typically adjusted when the prices of underlying precious metals change.

Accounts and Notes Receivable

The Company records a provision for doubtful accounts, which is included in Selling, general and administrative expenses on the Consolidated Statements of Operations.

Accounts and notes receivables – trade, net are stated net of allowances for doubtful accounts and trade discounts, which were \$23.4 million at June 30, 2018 and \$22.4 million at December 31, 2017.

Marketable Securities

During the three months ended March 31, 2018, the Company sold its direct investment in the DIO Corporation (“DIO”) for \$54.1 million, resulting in a gain of \$44.1 million. At December 31, 2017, the Company had recorded an unrealized gain of \$45.0 million in accumulated other comprehensive loss. This gain was transferred out of Accumulated other comprehensive loss (“AOCI”), and recorded in Other expense (income), net on the Consolidated Statements of Operations. The fair value of the direct investment at December 31, 2017 was \$54.4 million.

Income Taxes

The Company has accounted for the tax effects of the Tax Cuts and Jobs Act, enacted on December 22, 2017, on a provisional basis. At December 31, 2017, the accounting for certain income tax effects was incomplete, but the Company determined reasonable estimates for those effects which were included in the financial statements. The Company expects to complete the accounting during 2018 in accordance with the one year measurement period.

Recently Adopted Accounting Pronouncements

Effective January 1, 2018, the Company adopted Accounting Standards Update (“ASU”) No. 2014-09, “Revenue from Contracts with Customers”, as amended (Topic 606, commonly referred to as ASC 606) to all contracts using the modified retrospective method. The Company recognized the cumulative effect of initially applying the new revenue standard as an adjustment to the opening balance of retained earnings. The comparative information has not been restated and continues to be reported under the accounting standards in effect for those periods.

Most of the Company's sales revenue continues to be recognized when products are shipped from manufacturing facilities. For certain customer and dealer incentive programs, such as coupons, customer loyalty and free goods, the Company recognizes the proportionate revenue and cost of product when the incentives are shipped or awarded. Prior to adoption of ASC 606, costs for these types of programs were recognized when triggering events occurred. For contracts with customers where performance occurs over time, such as software sales, the Company recognizes revenue ratably over the performance period.

The new revenue standard also provided additional guidance that resulted in reclassifications to or from Net sales, Cost of products sold, Selling, general and administrative expenses, and the resultant change in Provision (benefit) for income taxes.

The cumulative effect of the changes made on the Consolidated Balance Sheets at December 31, 2017 for the adoption of ASC 606, is as follows:

Effective January 1, 2018, the Company adopted ASU No. 2016-16, "Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory." This accounting standard seeks to improve the accounting for the income tax consequences of intra-entity transfers of assets other than inventory. Previously, US GAAP prohibited the recognition of current and deferred income taxes for an intra-entity asset transfer until the asset has been sold to a third party, which is an exception to the principle of comprehensive recognition of current and deferred income taxes in US GAAP. ASU No. 2016-16 eliminates this exception. The Company adopted this accounting standard using the modified retrospective method with a cumulative-effect adjustment directly to retained earnings. Upon adoption, the Company made the following reclassification:

In March 2017, the FASB issued ASU No. 2017-07, "Compensation - Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost." This newly issued accounting standard is primarily intended to improve the presentation of net periodic pension cost and net periodic postretirement benefit cost. The amendments in this update require an employer to report the service cost component of net periodic benefit cost in operating income, while the interest cost, amortization, return on assets and any settlement or curtailment expense will be reported below operating income. More specifically, the service cost will be reported in the same line item as other compensation costs arising from the services rendered by the pertinent employee during the period. The amendments in this update are required for annual and interim periods beginning after December 15, 2017, and should be applied retrospectively for the presentation of the components of net periodic benefit cost and net periodic postretirement benefit cost in the income statement. The amendment allows a practical expedient that permits an employer to use the amounts disclosed in its pension and other postretirement benefit plan note for the prior comparative periods as the estimation basis for applying the retrospective presentation requirements. The Company adopted this accounting standard on January 1, 2018, and applied the practical expedient upon adoption. The impact of adopting this standard, by financial statement line item, is reflected below:

In February 2018, the FASB issued ASU No. 2018-02, “Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income.” This newly issued accounting standard allows for a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from tax rate changes due to the Tax Cuts and Jobs Act. The amendments in this update are required for annual and interim periods beginning after December 15, 2018. This standard also requires the Company to disclose its accounting policy for releasing income tax effects from accumulated other comprehensive income. In general, the Company applies the individual item approach. As permitted by the accounting standard, the Company early adopted this accounting standard on January 1, 2018. As a result of the adoption, the Company elected to reclassify the income tax effects from AOCI to Retained earnings and reclassified \$8.1 million.

Recently Issued Accounting Pronouncements Not Yet Adopted

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) with subsequent amendments (collectively, “Topic 842”). This accounting standard seeks to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. The adoption of this standard is required for interim and fiscal periods ending after December 15, 2018, using the modified retrospective approach. Topic 842 provides for an additional optional transition method that allows application of the new standard beginning January 1, 2019 with recognition of a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. Periods prior to adoption would continue to conform to current US GAAP (Topic 840, Leases) and periods after adoptions would conform to Topic 842. The Company anticipates adopting Topic 842 using the optional transition method and is currently assessing the impact that this standard will have on its financial position, results of operations, cash flows and disclosures.

In August 2017, the FASB issued ASU No. 2017-12, “Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities.” This newly issued accounting standard improves the financial reporting and disclosure of hedging relationships to better portray the economic results of an entity’s risk management activities in its financial statements. The amendments in this update make improvements to simplify the application of the hedge accounting guidance in current US GAAP based on the feedback received from preparers, auditors, users and other stakeholders. More specifically, this update expands and refines hedge accounting for both nonfinancial and financial risk components and aligns the recognition and presentation of the effects of the hedging instrument and the hedged item in the financial statements. The amendments in this update are required for annual and interim periods beginning after December 15, 2018. Early adoption is permitted. The effect of adoption should be reflected as of the beginning of the fiscal year of adoption. For cash flow and net investment hedges existing at the date of adoption, an entity should apply a cumulative-effect adjustment related to eliminating the separate measurement of ineffectiveness to

accumulated other comprehensive income with a corresponding adjustment to the opening balance of retained earnings as of the beginning of the fiscal year that an entity adopts the amendments in this update. The amended presentation and disclosure guidance is required only prospectively. The Company is currently assessing the impact that this standard will have on its financial position, results of operations, cash flows and disclosures.

NOTE 2 – STOCK COMPENSATION

The following table represents total stock based compensation expense for non-qualified stock options, restricted stock units (“RSU”) and the tax related benefit for the three and six months ended June 30, 2018 and 2017.

(in millions)	Three Months Ended		Six Months Ended	
	2018	2017	2018	2017
Stock option expense	\$ 2.7	\$ 2.5	\$3.4	\$5.2
RSU expense	(2.6)	8.0	5.9	15.7
Total stock based compensation expense	\$ 0.1	\$ 10.5	\$9.3	\$20.9
Related deferred income tax benefit	\$ —	\$ 2.5	\$1.6	\$5.8

For the three and six months ended June 30, 2018, stock compensation expense of \$0.1 million and \$9.3 million, respectively, was recorded on the Consolidated Statements of Operations. For the three months ended June 30, 2018 the Company lowered the likely payout level on certain performance-based grants. For the three and six months ended June 30, 2018, \$1.2 million and \$8.3 million, respectively, was recorded in Selling, general, and administrative expense, and \$0.1 million and \$0.4 million, respectively, was recorded in Cost of products sold on the Consolidated Statements of Operations. For the three and six months ended June 30, 2018, the Company recorded income of \$1.2 million and expense of \$0.5 million, respectively, in Restructuring and other costs on the Consolidated Statements of Operations.

For the three and six months ended June 30, 2017, stock compensation expense of \$10.5 million and \$20.9 million, respectively, was recorded on the Consolidated Statements of Operations. For the three and six months ended June 30, 2017, \$10.3 million and \$20.4 million, respectively, was recorded in Selling, general, and administrative expense, and \$0.2 million and \$0.5 million, respectively, was recorded in Cost of products sold on the Consolidated Statements of Operations.

NOTE 3 – COMPREHENSIVE INCOME (LOSS)

The following table summarizes the components of comprehensive income (loss), net of tax, for the three and six months ended June 30, 2018 and 2017:

(in millions)	Three Months Ended		Six Months
	2018	2017	Ended 2018/2017
Foreign currency translation gains	\$ —	\$ 248.2	\$—\$304.8
Foreign currency translation losses	(223.4)	—	(1)39.4
Foreign currency translation gain on hedges of net investments	31.0	—	12.1—
Foreign currency translation loss on hedges of net investments	—	(24.2) — (33.6)

These amounts are recorded in AOCI, net of any related tax adjustments. At June 30, 2018 and December 31, 2017, the cumulative tax adjustments were \$168.5 million and \$203.8 million, respectively, primarily related to foreign currency translation gains and losses.

The cumulative foreign currency translation adjustments included translation losses of \$117.3 million and gains \$22.1 million at June 30, 2018 and December 31, 2017, respectively, and cumulative losses on loans designated as hedges of net investments of \$114.5 million and \$126.6 million, respectively. These foreign currency translation gains and losses were partially offset by movements on derivative financial instruments, which are discussed in Note 10, Financial Instruments and Derivatives.

Changes in AOCI, net of tax, by component for the six months ended June 30, 2018 and 2017 were as follows:

NOTE 4 – EARNINGS PER COMMON SHARE

The calculation of weighted average diluted common shares outstanding excludes stock options and RSUs of 5.5 million and 4.7 million equivalent shares of common stock that were outstanding during the three and six months ended June 30, 2018, respectively, because their effect would be antidilutive. There were 0.8 million and 1.2 million antidilutive equivalent shares of common stock outstanding during the three and six months ended June 30, 2017, respectively.

NOTE 5 – BUSINESS COMBINATIONS

On May 1, 2018, the Company acquired all of the outstanding shares of privately held OraMetrix, Inc. for \$120.0 million, with an additional payment totaling \$30.0 million, subject to meeting earn-out provisions. OraMetrix specializes in orthodontic treatment planning software, wire bending, and clear aligner manufacturing and is headquartered in Richardson, Texas. At June 30, 2018, the Company recorded a preliminary estimate of \$62.8 million in goodwill related to the fair value of assets acquired and liabilities assumed and the consideration given for the acquisition. The purchase price has been assigned on the basis of the preliminary estimate of the fair values of assets acquired and liabilities assumed. Goodwill is considered to represent the value associated with workforce and synergies the two companies anticipate realizing as a combined company. The goodwill is not expected to be deductible for tax purposes.

Intangible assets acquired consist of the following:

		Weighted Average Useful Life
(in millions, except for useful life)	Amount	(in years)
Customer relationships	\$ 17.5	15
Developed technology and patents	63.4	15
Trade names and trademarks	12.8	Indefinite
Total	\$ 93.7	

During the quarter ended June 30, 2017, the Company acquired Recherche Techniques Dentaires (“RTD”), a privately-held France-based manufacturer of endodontic posts for \$132.0 million. The Company recorded \$83.9 million in goodwill related to the fair value of assets acquired and liabilities assumed and the consideration given for the acquisition. Goodwill is considered to represent the value associated with workforce and synergies the two companies anticipate realizing as a combined company. The goodwill is not expected to be deductible for tax purposes.

Intangible assets acquired consist of the following:

		Weighted Average Useful Life
(in millions, except for useful life)	Amount	(in years)
Customer relationships	\$ 18.1	15
Developed technology and patents	22.4	15
Trade names and trademarks	8.5	Indefinite
Total	\$ 49.0	

The results of operations for these businesses have been included in the accompanying financial statements as of the effective date of each transactions. These transactions were not material to the Company’s net sales and net loss attributable to Dentsply Sirona for the quarter ended June 30, 2018.

NOTE 6 – SEGMENT INFORMATION

The Company has numerous operating businesses covering a wide range of dental consumable products and dental technology products primarily serving the professional dental market, and certain healthcare products. Professional dental products represented approximately 92% of net sales for all periods presented.

The operating businesses are combined into two operating groups, which generally have overlapping geographical presence, customer bases, distribution channels, and regulatory oversight. These operating groups are considered the Company's reportable segments as the Company's chief operating decision-maker regularly reviews financial results at the operating group level and uses this information to manage the Company's operations. The accounting policies of the segments are consistent with those described in the Company's most recently filed Form 10-K, in the summary of significant accounting policies.

The Company evaluates performance of the segments based on the groups' net third party sales, excluding precious metal content, and segment adjusted operating income. The Company defines net third party sales excluding precious metal content as the Company's net sales excluding the precious metal cost within the products sold, which is considered a measure not calculated in accordance with US GAAP, and is therefore considered a non-US GAAP measure. Management believes that the presentation of net sales, excluding precious metal content, provides useful information to investors because a portion of Dentsply Sirona's net sales is comprised of sales of precious metals generated through sales of the Company's precious metal dental alloy products, which are used by third parties to construct crown and bridge materials. Due to the fluctuations of precious metal prices and because the cost of the precious metal content of the Company's sales is largely passed through to customers and has minimal effect on earnings, Dentsply Sirona reports net sales both with and without precious metal content to show the Company's performance independent of precious metal price volatility and to enhance comparability of performance between periods. The Company uses its cost of precious metal purchased as a proxy for the precious metal content of sales, as the precious metal content of sales is not separately tracked and invoiced to customers. The Company believes that it is reasonable to use the cost of precious metal content purchased in this manner since precious metal dental alloy sale prices are typically adjusted when the prices of underlying precious metals change. The Company's exclusion of precious metal content in the measurement of net third party sales enhances comparability of performance between periods as it excludes the fluctuating market prices of the precious metal content. The Company also evaluates segment performance based on each segment's adjusted operating income before provision for income taxes and interest. Segment adjusted operating income is defined as operating income before income taxes and before certain corporate headquarter unallocated costs, restructuring and other costs, interest expense, interest income, other expense (income), net, amortization of intangible assets and depreciation resulting from the fair value step-up of property, plant and equipment from acquisitions. The Company's segment adjusted operating income is considered a non-US GAAP measure. A description of the products and services provided within each of the Company's two operating segments is provided below.

Technologies & Equipment

This segment is responsible for the worldwide design, manufacture, sales and distribution of the Company's Dental Technology and Equipment Products and Healthcare Consumable Products. These products include dental implants, laboratory dental products, CAD/CAM systems, imaging systems, treatment centers, as well as consumable medical device products.

Consumables

This segment is responsible for the worldwide design, manufacture, sales and distribution of the Company's Dental Consumable Products which include preventive, restorative, instruments, endodontic, and orthodontic dental products.

The following tables set forth information about the Company's segments for the three and six months ended June 30, 2018 and 2017. Certain reclassifications have been made to the prior year's data in order to conform to the current year presentation:

NOTE 7 – INVENTORIES

Inventories are stated at the lower of cost and net realizable value. The cost of inventories determined by the last-in, first-out (“LIFO”) method at June 30, 2018 and December 31, 2017 were \$12.7 million and \$12.4 million, respectively. The cost of remaining inventories was determined by the first-in, first-out (“FIFO”) or average cost methods. If the FIFO method had been used to determine the cost of LIFO inventories, the amounts at which net inventories are stated would be higher than reported at June 30, 2018 and December 31, 2017 by \$8.8 million and \$10.6 million, respectively.

Inventories, net of inventory valuation reserves, consist of the following:

(in millions)	June 30, December 31,	
	2018	2017
Finished goods	\$ 441.6	\$ 387.6
Work-in-process	88.4	90.4
Raw materials and supplies	136.3	145.1
Inventories, net	\$ 666.3	\$ 623.1

The inventory valuation allowance was \$75.1 million and \$71.7 million at June 30, 2018 and December 31, 2017, respectively.

NOTE 8 – BENEFIT PLANS

The following sets forth the components of net periodic benefit cost of the Company's defined benefit plans for the three and six months ended June 30, 2018 and 2017:

Defined Benefit Plans (in millions)	Three Months Ended		Six Months Ended		Location on Consolidated Statements of Operations

(a) Prior period presented reflects adoption of ASU 2017-07. For further discussion on the reclassification, refer to Note 1, Significant Accounting Policies.

The following sets forth the information related to the contributions to the Company's defined benefit plans for 2018:

(in millions)	Pension Benefits
Actual contributions through June 30, 2018	\$ 7.7
Expected contributions for the remainder of the year	8.4
Total actual and expected contributions	\$ 16.1

NOTE 9 – RESTRUCTURING AND OTHER COSTS

Restructuring Costs

During the three and six months ended June 30, 2018, the Company recorded net restructuring costs and other costs of \$188.9 million and \$199.1 million, respectively, which includes net restructuring costs of \$3.4 million and \$10.8 million, respectively. During the three and six months ended June 30, 2017, the Company recorded net restructuring costs and other cost of \$81.7 million and \$84.8 million, respectively, which includes net restructuring costs of \$1.5 million and \$3.8 million, respectively. These costs are recorded in Restructuring and other costs on the Consolidated Statements of Operations and the associated liabilities are recorded in Accrued liabilities on the Consolidated Balance Sheets.

At June 30, 2018, the Company's restructuring accruals were as follows:

(in millions)	Severance			Total

Other Costs

Other costs for the three and six months ended June 30, 2018 were \$185.5 million and \$188.3 million, respectively. Other costs for the three and six months ended June 30, 2017 were \$80.2 million and \$81.0 million, respectively.

For the three months ended June 30, 2018, the Company recorded an impairment charge of \$179.2 million. The impaired indefinite-lived intangibles are tradenames and trademarks related to two reporting units within the Technologies & Equipment segment and one reporting unit within the Consumables segment. For further information, see Note 14, Goodwill and Intangibles.

For the three months ended June 30, 2017, the Company recorded an impairment charge of \$79.8 million. The impaired indefinite-lived intangibles are tradenames and trademarks related to two reporting units within the Technologies & Equipment segment.

NOTE 10 – FINANCIAL INSTRUMENTS AND DERIVATIVES

Derivative Instruments and Hedging Activities

The Company's activities expose it to a variety of market risks, which primarily include the risks related to the effects of changes in foreign currency exchange rates and interest rates. These financial exposures are monitored and managed by the Company as part of its overall risk management program. The objective of this risk management program is to reduce the volatility that these market risks may have on the Company's operating results and equity. The Company employs derivative financial instruments to hedge certain anticipated transactions, firm commitments, or assets and liabilities denominated in foreign currencies. Additionally, the Company utilizes interest rate swaps to convert variable rate debt to fixed rate debt.

Derivative Instruments Designated as Hedging

Cash Flow Hedges

The following table summarizes the notional amounts of cash flow hedges by derivative instrument type at June 30, 2018 and the notional amounts expected to mature during the next 12 months, with a discussion of the various cash flow hedges by derivative instrument type following the table:

(in millions)	Aggregate Notional Amount	Aggregate Notional Amount Maturing within 12 Months
Foreign exchange forward contracts	\$ 301.4	\$ 232.7
Interest rate swaps	113.2	—
Total derivative instruments designated as cash flow hedges	\$ 414.6	\$ 232.7

Foreign Exchange Risk Management

The Company uses a layered hedging program to hedge select anticipated foreign currency cash flows to reduce volatility in both cash flows and reported earnings of the consolidated Company. The Company accounts for the designated foreign exchange forward contracts as cash flow hedges. As a result, the Company records the fair value of the contracts primarily through AOCI based on the assessed effectiveness of the foreign exchange forward contracts. The Company measures the effectiveness of cash flow hedges of anticipated transactions on a spot-to-spot basis rather than on a forward-to-forward basis. Accordingly, the spot-to-spot change in the derivative fair value will be deferred in AOCI and released and recorded on the Consolidated Statements of Operations in the same period that the hedged transaction is recorded. The time value component of the fair value of the derivative is deemed ineffective and is reported currently in Other expense (income), net on the Consolidated Statements of Operations in the period which it is applicable. Any cash flows associated with these instruments are included in cash from operating activities on the Consolidated Statements of Cash Flows. The Company hedges various currencies, with the most significant activity occurring in euros, Swedish kronor, Canadian dollars, British pounds, Swiss francs, Japanese yen and Australian dollars.

These foreign exchange forward contracts generally have maturities up to 18 months and the counterparties to the transactions are typically large international financial institutions.

Interest Rate Risk Management

The Company uses interest rate swaps to convert a portion of its variable interest rate debt to fixed interest rate debt. At June 30, 2018, the Company has one significant exposure hedged with interest rate contracts. The exposure is hedged with derivative contracts having notional amounts totaling 12.6 billion Japanese yen, which effectively converts the underlying variable interest rate debt facility to a fixed interest rate of 0.9% for an initial term of five years ending September 2019.

The Company enters into interest rate swap contracts infrequently as they are only used to manage interest rate risk on long-term debt instruments and not for speculative purposes. Any cash flows associated with these instruments are included in cash from operating activities on the Consolidated Statements of Cash Flows.

Cash Flow Hedge Activity

The following tables summarize the amount of gains (losses) recorded in AOCI on the Consolidated Balance Sheets and income (expense) on the Company's Consolidated Statements of Operations related to all cash flow hedges for the three months ended June 30, 2018 and 2017:

Overall, the derivatives designated as cash flow hedges are considered to be highly effective. At June 30, 2018, the Company expects to reclassify \$6.5 million of deferred net losses on cash flow hedges recorded in AOCI on the Consolidated Statements of Operations during the next 12 months. The term over which the Company is hedging exposures to variability of cash flows (for all forecasted transactions, excluding interest payments on variable interest rate debt) is typically 18 months.

For the rollforward of derivative instruments designated as cash flow hedges in AOCI see Note 3, Comprehensive Income.

Hedges of Net Investments in Foreign Operations

The Company has significant investments in foreign subsidiaries the most significant of which are denominated in euros, Swiss francs, Japanese yen and Swedish kronor. The net assets of these subsidiaries are exposed to volatility in currency exchange rates. The Company employs both derivative and non-derivative financial instruments to hedge a portion of this exposure. The derivative instruments consist of foreign exchange forward contracts and cross currency basis swaps. The non-derivative instruments consist of foreign currency denominated debt held at the parent company level. Translation gains and losses related to the net assets of the foreign subsidiaries are offset by gains and losses in derivative and non-derivative financial instruments designated as hedges of net investments, which are included in AOCI. Any cash flows associated with these instruments are included in investing activities on the Consolidated Statements of Cash Flows except for derivative instruments that include an other-than-insignificant financing element, for which all cash flows are classified as financing activities on the Consolidated Statements of Cash Flows.

On January 2, 2018, the Company entered into a 245.6 million euro cross currency basis swap maturing in August 2021, that was designated as a hedge of net investments. This contract effectively converts the \$295.7 million bond coupon from 4.1% to 1.7%, which will result in a net reduction of interest expense through maturity in 2021.

The following table summarizes the notional amount of hedges of net investments by derivative instrument at June 30, 2018 and the notional amounts expected to mature during the next 12 months:

(in millions)	Aggregate Notional Amount	Aggregate Notional Amount
---------------	---------------------------------	---------------------------------

		Maturing within 12 Months
Foreign exchange forward contracts	\$ 600.6	\$ 299.5
Cross currency basis swaps	286.5	—
Total for instruments not designated as hedges	\$ 887.1	\$ 299.5

The fair value of the foreign exchange forward contracts is the estimated amount the Company would receive or pay at the reporting date, taking into account the effective interest rates and foreign exchange rates. The effective portion of the change in the value of these derivatives is recorded in AOCI, net of tax effects.

The following tables summarize the amount of gains (losses) recorded in AOCI on the Consolidated Balance Sheets and Other expense (income), net on the Company's Consolidated Statements of Operations related to the hedges of net investments for the three months ended June 30, 2018 and 2017:

Derivative Instruments Not Designated as Hedges

The Company enters into derivative instruments with the intent to partially mitigate the foreign exchange revaluation risk associated with recorded assets and liabilities that are denominated in a non-functional currency. The gains and losses on these derivative transactions offset the gains and losses generated by the revaluation of the underlying non-functional currency balances and are recorded in Other expense (income), net on the Consolidated Statements of Operations. The Company primarily uses foreign exchange forward contracts and cross currency basis swaps to hedge these risks. Any cash flows associated with the foreign exchange forward contracts and interest rate swaps not designated as hedges are included in cash from operating activities on the Consolidated Statements of Cash Flows. Any cash flows associated with the cross currency basis swaps not designated as hedges are included in investing activities on the Consolidated Statements of Cash Flows except for derivative instruments that include an other-than-insignificant financing element, for which the cash flows are classified as financing activities on the Consolidated Statements of Cash Flows.

The following tables summarize the aggregate notional amounts of the Company's economic hedges not designated as hedges by derivative instrument types at June 30, 2018 and the notional amounts expected to mature during the next 12 months:

Balance Sheet Offsetting

Substantially all of the Company's derivative contracts are subject to netting arrangements, whereby the right to offset occurs in the event of default or termination in accordance with the terms of the arrangements with the counterparty. While these contracts contain the enforceable right to offset through netting arrangements with the same counterparty, the Company elects to present them on a gross basis on the Consolidated Balance Sheets.

NOTE 11 – FAIR VALUE MEASUREMENT

The Company records financial instruments at fair value with unrealized gains and losses related to certain financial instruments reflected in AOCI on the Consolidated Balance Sheets. In addition, the Company recognizes certain liabilities at fair value. The Company applies the market approach for recurring fair value measurements. Accordingly, the Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Financial assets and liabilities that are recorded at fair value as of the balance sheet date are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

The fair value of financial instruments is determined by reference to various market data and other valuation techniques as appropriate. The Company believes the carrying amounts of cash and cash equivalents, accounts receivable (net of allowance for doubtful accounts), prepaid expenses and other current assets, accounts payable, accrued liabilities, income taxes payable and notes payable approximate fair value due to the short-term nature of these instruments. The Company estimated the fair value using Level 1 inputs and carrying value of total long-term debt, including the current portion, was \$1,598.5 million and \$1,595.4 million, respectively at June 30, 2018. At December 31, 2017, the Company estimated the fair value and carrying value, including the current portion, was \$1,629.9 million and \$1,620.8 million, respectively. The variable interest rate on the Japanese yen term loan is consistent with current market conditions, therefore the fair value approximates the loan's carrying value.

The following tables set forth by level within the fair value hierarchy the Company's financial assets and liabilities that were accounted for at fair value on a recurring basis at June 30, 2018 and December 31, 2017:

(in millions)	June 30, 2018

Total liabilities	\$30.6	\$	-\$22.0	\$ 8.6

There have been no transfers between levels during the six months ended June 30, 2018 and 2017.

Derivative valuations are based on observable inputs to the valuation model including interest rates, foreign currency exchange rates and credit risks. The Company utilizes interest rate swaps and foreign exchange forward contracts that are considered cash flow hedges. In addition, the Company at times employs forward exchange contracts that are considered hedges of net investment in foreign operations. Designated derivative instruments are further discussed in Note 10, Financial Instruments and Derivatives.

The Company's Level 3 liabilities at June 30, 2018 and December 31, 2017 are related to earn-out obligations on prior acquisitions. The following table presents a reconciliation of the Company's Level 3 holdings measured at fair value on a recurring basis using unobservable inputs:

(in millions)	Earn-out Obligations

For the six months ended June 30, 2018, there were no other purchases, issuances or transfers of Level 3 financial instruments.

NOTE 12 – INCOME TAXES

Uncertainties in Income Taxes

The Company recognizes in the interim consolidated financial statements, the impact of a tax position, if that position is more likely than not of being sustained on audit, based on the technical merits of the position.

It is reasonably possible that certain amounts of unrecognized tax benefits will significantly increase or decrease within 12 months of the reporting date of the Company's interim consolidated financial statements. Final settlement and resolution of outstanding tax matters in various jurisdictions during the next twelve months are not expected to be significant.

Other Tax Matters

During the quarter ended June 30, 2018, the Company recorded the following discrete tax items, \$0.5 million of excess tax benefit related to employee share-based compensation, tax benefits of \$0.7 million related to valuation allowances, \$2.5 million related to enacted statutory rate changes and \$0.6 million of tax benefit for other discrete tax matters. The Company also recorded a \$50.4 million tax benefit as a discrete item related to the indefinite-lived intangible asset impairment charge, \$1.1 million for the fixed asset impairment charge, and \$3.3 million related to goodwill that was tax-deductible for the three months ended June 30, 2018. In addition the Company also recorded a \$0.6 million tax benefit as a discrete item related to the gain on sale of marketable securities.

During the quarter ended June 30 2017, the Company recorded the following discrete tax items, \$4.2 million of excess tax benefit related to employee share-based compensation, \$0.5 million of tax expense related to enacted statutory rate changes and \$1.5 million of tax expense for other discrete tax matters. The Company also recorded a \$23.5 million tax benefit as a discrete item related to the indefinite-lived intangible asset impairment charge recorded during the three months ended June 30, 2017. The goodwill impairment charge for the quarter ended June 30, 2017 was non-deductible for income tax purposes.

U.S. Federal Legislative Changes

On December 22, 2017, the Tax Cuts and Jobs Act (the "Act" or "U.S. tax reform") was enacted. U.S. tax reform, among other things, reduced the U.S. federal income tax rate to 21% in 2018 from 35%, instituted a dividends received deduction for foreign earnings with a related tax for the deemed repatriation of unremitted foreign earnings and created a new U.S. minimum tax on earnings of foreign subsidiaries. In addition, the SEC staff issued Staff Accounting Bulletin No. 118 ("SAB 118"), which provides guidance on accounting for enactment effects of the Act and provides a measurement period of up to one year from the Act's enactment date for companies to complete their accounting under Accounting Standards Codification No. 740 "Income Taxes", ("ASC 740"). In accordance with SAB 118, to the extent that a company's accounting for certain income tax effects of the Act is incomplete but it is able to determine a reasonable estimate, it must record a provisional estimate in its financial statements. If a company cannot determine a provisional estimate to be included in its financial statements, it should continue to apply ASC 740 on the basis of the provisions of the tax laws that were in effect immediately before the enactment of the Act. The Company has accounted for the tax effects of the Act on a provisional basis. At December 31, 2017, the accounting for certain income tax effects was incomplete, but the Company determined reasonable estimates for those effects which were included in the financial statements. The Company expects to complete the accounting during 2018 to comply with the one year measurement period.

Based on information available, at December 31, 2017, the Company estimated the cumulative undistributed foreign earnings and recorded a provisional estimate of income tax expense related to the one-time deemed repatriation toll

charge. There is still uncertainty as to the application of the Act, in particular as it relates to state income taxes. Further, the Company has not yet completed the analysis of the components of the computation, including the amount of the foreign earnings subject to U.S. income tax, and the portion of the foreign earnings held in cash or other specified assets. At June 30, 2018, the estimated cash liability for the deemed repatriation of foreign earnings is approximately \$1.0 million primarily due to the utilization of foreign tax credit carryforwards and certain other tax attributes. However, as the Company completes its analysis an additional liability could be recorded and the Company would elect to make installment payments as allowed under the Act.

As a result of the Act, the Company can repatriate the cumulative undistributed foreign earnings back to the U.S. when needed with minimal U.S. income tax consequences other than the one-time deemed repatriation toll charge. The Company is still evaluating whether to change its indefinite reinvestment assertion in light of the Act and consider that conclusion to be incomplete in accordance SAB 118.

For the Global Intangible Low Tax Income (“GILTI”) provision of the Act, the Company recorded an estimate for the six months ended June 30, 2018, as a period expense based on current guidance, but the Company has not yet completed its assessment or elected an accounting policy to either recognize deferred taxes for basis differences expected to reverse as GILTI or to record GILTI as period costs if and when incurred.

In accordance with SEC guidance, provisional amounts may be refined as a result of additional guidance from, and interpretations by, U.S. regulatory and standard-setting bodies, and changes in assumptions. In subsequent periods, provisional amounts will be adjusted for the effects, if any, of interpretative guidance issued by the U.S. Department of the Treasury. The effects of the Act may be subject to changes for items that were previously reported as provisional amounts, as well as any element of the Act that a provisional estimate could not be made, and such changes could be material.

NOTE 13 – FINANCING ARRANGEMENTS

The Company's revolving credit facility, term loans and Senior Notes contain certain affirmative and negative covenants relating to the Company's operations and financial condition. At June 30, 2018, the Company was in compliance with all debt covenants.

At June 30, 2018, there were no outstanding borrowings under the current \$500.0 million multi-currency revolving credit facility. During the quarter ended June 30, 2018, the Company had issued \$205.0 million of Commercial Paper which was outstanding at June 30, 2018. The multi-currency revolving credit facility serves as a back-stop facility for the Company's \$500.0 million Commercial Paper program.

On July 27, 2018, the Company amended and extended its \$500.0 million multicurrency revolving credit facility increasing the total available to \$700.0 million through July 27, 2023. In addition, certain new lenders joined the bank group. The Company has access to the full \$700.0 million through July 27, 2023. The facility is unsecured and contains certain affirmative and negative covenants relating to the operations and financial condition of the Company. The most restrictive of these covenants pertain to asset dispositions and prescribed ratios of indebtedness to total capital and operating income, plus depreciation and amortization to interest expense.

At June 30, 2018, the Company had \$322.9 million of borrowing available under lines of credit, including lines available under its short-term arrangements and revolving credit agreement.

NOTE 14 – GOODWILL AND INTANGIBLE ASSETS

The Company performed its annual impairment tests of goodwill as of April 30, 2018 on 11 reporting units. To determine the fair value of the Company's reporting units, the Company uses a discounted cash flow model with market-based support as its valuation technique to measure the fair value for its reporting units. The discounted cash flow model uses five- to ten- year forecasted cash flows plus a terminal value based on a multiple of earnings or by capitalizing the last period's cash flows using a perpetual growth rate. In the development of the forecasted cash flows, the Company applies revenue, gross profit and operating expense assumptions taking into consideration historical trends as well as future expectations. These future expectations include, but are not limited to, new product development and distribution channel changes for the respective reporting units. The Company also considers the current and projected market conditions for dental and medical device industries, both in the U.S. and globally, when determining its assumptions. The total forecasted cash flows are discounted based on a range between 7.9% to 10.5%. The discount rate used is based on the weighted-average cost of capital adjusted for the relevant risk associated with business-specific characteristics and the uncertainty related to the reporting unit's ability to execute on the projected cash flows. The Company's significant estimates in the discounted cash flow models include, but is not limited to, the weighted average cost of capital, long-term rate of growth and profitability of the reporting unit's business and working capital effects. A change in any of these estimates and assumptions could produce a different fair value, which could have a material impact on the Company's results of operations.

Unfavorable developments in the market for the dental or medical device industries, an increase in discount rates, unfavorable changes in earnings multiples or a decline in future cash flow projections, among other factors, may cause a change in circumstances indicating that the carrying value of the indefinite-lived assets and goodwill within the Company's reporting units may not be recoverable.

In connection with the updating of the estimates and assumptions with the annual impairment tests of goodwill and the preparation of the financial statements for the three months ended June 30, 2018, the Company determined that the goodwill associated with the CAD/CAM, Imaging and Orthodontics reporting units was impaired. Additionally, near the end of the quarter, the Company recognized that the CAD/CAM and Imaging reporting units' ("equipment reporting units") revenue and operating margins would not meet forecasted expectations for the quarter as a result of several significant unfavorable developments which also affected the reporting units' projections for future revenue and operating margins. As a result, the Company recorded a goodwill impairment charge of \$1,085.8 million. The CAD/CAM and Imaging reporting units are within the Technologies & Equipment segment and the Orthodontics reporting unit is within the Consumables segment. The significant unfavorable developments in the current period which are reflected in the Company's April 30, 2018 goodwill impairment testing model, are as follows:

The equipment reporting units were negatively affected in connection with the continued transition of the Company's distribution relationships primarily in the U.S. from exclusive to non-exclusive. The Company's expectations for revenue growth from its non-exclusive distribution relationships, which replaced its former long-term exclusive distribution relationship, were not met. As a result, the Company's forecasts of current and future third-party demand have been reduced as the Company's U.S. distributors continue to offer and promote competitive alternatives to the Company's full CAD/CAM systems and lower-priced alternatives to the Imaging reporting units' products.

The Imaging reporting unit observed revenue and operating margins being negatively impacted by aggressive competition with a focus on value-based products in the marketplace as opposed to the reporting unit's premium products. This has resulted in increased competition from low-cost products in certain regions throughout the world causing the reporting unit to offer additional product features at the current price levels and to offer additional promotions and reduce its future sales forecasts.

-

The CAD/CAM and Imaging reporting units have also experienced lower than expected sales with respect to higher margin products as well as a regional shift in sales to emerging markets each of which has negatively impacted the reporting units' overall operating margins as compared to the original forecasts for the period and for future sales forecasts.

The equipment reporting units were also further impacted by the unfavorable change in the discount rate due primarily to a higher risk factor, which represents management's assessment of increased risk with respect to the CAD/CAM and Imaging reporting units' forecasts primarily due to the factors described above, and to a lesser extent a higher risk-free interest rate for all reporting units.

The increased reduction of inventory being held by the Company's U.S. distributors in the second quarter, which was larger than anticipated for the period, and planned further reductions of inventory, will impact the Company's near-term results.

As a result of the factors described above, and the resulting reduced revenue and profitability expectations for these reporting units, we have forecasted reductions in unit volume growth rates and operating margins and lower future cash flows used to estimate the fair value of these reporting units, which resulted in a determination that an impairment adjustment was required.

The Orthodontics reporting unit goodwill impairment charge was primarily driven by lower operating margins and lower sales growth. The products manufactured and sold within this reporting unit have consisted mainly of traditional orthodontic treatment products, i.e., brackets, bands and wires. The impairment charge is unrelated to the Company's acquisition of OraMetrix. The Company has observed a continuing decline in operating margins as the marketplace has seen higher than expected price competition primarily due to increased supply of traditional orthodontic products in the market. In addition, the Company has seen lower than expected revenue growth which is reflected in its future forecast. The Company believes the revenue trend is the result of competition as well as the growing end-user demand for newer orthodontic treatment options.

For the Company's reporting units that were not impaired, the Company applied a hypothetical sensitivity analysis. Had the discount rate of each of these reporting units been hypothetically increased by 100 basis points at April 30, 2018, the fair value of one reporting unit, Treatment Centers, would not exceed net book value. If the fair value of each of these reporting units had been hypothetically reduced by 10% at April 30, 2018, the fair value of one reporting unit, Treatment Centers, would not exceed net book value. Goodwill for the Treatment Centers reporting unit totals \$292.7 million at June 30, 2018.

In conjunction with the goodwill and indefinite-lived intangibles impairment test, the Company utilized its best estimate of future cash flows as of April 30, 2018, which include significant management assumptions such as future revenue growth rates, operating margins, weighted average cost of capital, and future economic and market conditions affecting the dental and medical device industries. Any changes to these assumptions and estimates could have a negative impact on the fair value of these reporting units and may result in further impairment. Given the uncertainty in the marketplace and other factors affecting management's assumptions underlying the Company's discounted cash flow model, these estimates could vary significantly in the future, which may result in a goodwill impairment charge at that time. The goodwill impairment charge is not expected to result in future cash expenditures.

The Company also assessed the annual impairment of indefinite-lived intangible assets as of April 30, 2018, which largely consists of acquired tradenames, in conjunction with the annual impairment tests of goodwill. As a result of the annual impairment tests of indefinite-lived intangible assets, the Company recorded an impairment charge of \$179.2 million for the three months ended June 30, 2018 which was recorded in Restructuring and other costs on the Consolidated Statements of Operations. The impaired indefinite-lived intangible assets are tradenames and trademarks related to the CAD/CAM, Imaging, and Instrument reporting units. The impairment charge was primarily driven by a decline in forecasted sales resulting from increased competition and the impact of low-cost competitive products, as discussed above with respect to goodwill. In addition, the unfavorable impact of an increase in the equipment reporting units' respective risk factors, along with increases in the risk-free rate, increased the discount rate. The assumptions and estimates used in determining the fair value of the indefinite-lived intangible assets contain uncertainties, and any changes to these assumptions and estimates could have a negative impact and result in a future impairment.

A reconciliation of changes in the Company's goodwill by reportable segment is as follows:

NOTE 15 – COMMITMENTS AND CONTINGENCIES

Litigation

The SEC's Division of Enforcement has asked the Company to provide documents and information concerning the Company's accounting and disclosures. The Company is cooperating with the SEC's investigation. The Company is unable to predict the ultimate outcome of this matter, or whether it will have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

On May 5, 2015, Roth Licensing, LLC ("Roth Licensing") filed a demand for arbitration alleging that GAC International, LLC, a subsidiary of the Company ("GAC"), infringes a registered trademark of Roth Licensing pursuant to the Lanham Act, California Civil Code Section 3344.1, and certain other common law causes of action. On August 9, 2017, the arbitrator issued an interim decision on liability finding that GAC had willfully infringed the registered trademark of Roth Licensing. On November 8, 2017, the arbitrator served his Final Award on damages awarding Roth Licensing approximately \$16.0 million for damages, attorneys' fees and costs as well as injunctive relief regarding the ROTH mark and any reproduction, counterfeit, copy, or colorable imitation of the ROTH mark and Dr. Roth's image. The Company believes that the arbitrator failed to follow the applicable arbitration procedures, and it has filed a Motion to Vacate Arbitration Award with the Eastern District of New York.

On January 11, 2018, Thomas Redlich, a former employee, filed a lawsuit against the Company, demanding supplemental compensation pursuant to an agreement allegedly entered into with Sirona Dental GmbH which was intended to entice Mr. Redlich to continue to work for the company for no less than eight years following the date of this agreement. The Company filed its response on April 4, 2018, denying the authenticity and enforceability of, and all liability under, the alleged agreement. The Court held an initial hearing on the matter on April 11, 2018, allowing Mr. Redlich to file a reply to the Company's response on July 9, 2018, and allowing the Company to respond to that reply. The Court has set a further hearing on August 30, 2018 for this matter. The Company intends to defend this claim vigorously.

On January 25, 2018, Futureodontics, Inc. received service of a purported class action lawsuit brought by Henry Olivares and other similarly situated individuals in the Superior Court of the State of California for the County of Los Angeles. The plaintiff class alleges several violations of the California wage and hours laws, including, but not limited to, failure to provide rest and meal breaks and the failure pay overtime. The Company has filed its answer to the complaint and the parties have initiated written and other discovery. The Company continues to vigorously defend against this matter.

On June 7, 2018, John Castronovo filed a putative class action suit in the County of New York alleging that the Company and certain of its present and former officers and directors violated U.S. securities laws by allegedly making false and misleading statements in connection with a February 2016 registration statement issued in connection with the acquisition of and merger with former Sirona Dental Systems, Inc. by former Dentsply International Inc. The Company intends to defend itself vigorously.

In addition to the matters disclosed above, the Company is, from time to time, subject to a variety of litigation and similar proceedings incidental to its business. These legal matters primarily involve claims for damages arising out of the use of the Company's products and services and claims relating to intellectual property matters including patent infringement, employment matters, tax matters, commercial disputes, competition and sales and trading practices, personal injury and insurance coverage. The Company may also become subject to lawsuits as a result of past or future acquisitions or as a result of liabilities retained from, or representations, warranties or indemnities provided in connection with, divested businesses. Some of these lawsuits may include claims for punitive and consequential, as well as compensatory damages. Based upon the Company's experience, current information and applicable law, it does

not believe that these proceedings and claims will have a material adverse effect on its consolidated results of operations, financial position or liquidity. However, in the event of unexpected further developments, it is possible that the ultimate resolution of these matters, or other similar matters, if unfavorable, may be materially adverse to the Company's business, financial condition, results of operations or liquidity.

While the Company maintains general, product, property, workers' compensation, automobile, cargo, aviation, crime, fiduciary and directors' and officers' liability insurance up to certain limits that cover certain of these claims, this insurance may be insufficient or unavailable to cover such losses. In addition, while the Company believes it is entitled to indemnification from third parties for some of these claims, these rights may also be insufficient or unavailable to cover such losses.

Purchase Commitments

From time to time, the Company enters into long-term inventory purchase commitments with minimum purchase requirements for raw materials and finished goods to ensure the availability of products for production and distribution. These commitments may have a significant impact on levels of inventory maintained by the Company.

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

Information included in or incorporated by reference in this Form 10-Q, and other filings with the U. S. Securities and Exchange Commission (the “SEC”) and the Company’s press releases or other public statements, contains or may contain forward-looking statements. Please refer to a discussion of the Company’s forward-looking statements and associated risks in Part I, “Forward-Looking Statements” and Part I, Item 1A “Risk Factors” of the Company’s Form 10-K for the year ended December 31, 2017.

OVERVIEW

Highlights

For the three months ended June 30, 2018, the Company reported a sales increase of 5.0% compared to the three months ended June 30, 2017. On a constant currency basis sales increased 1.3% compared to the same year ago period.

On a geographic basis, the Company generated constant currency sales growth of 4.2% in the Rest of World region, a decline of 1.4% in Europe, and growth in the United States of 2.3% for the three month period ended June 30, 2018.

For the three months ended June 30, 2018, the Company generated a loss per diluted share of \$4.98 compared to a loss per diluted share of \$4.58 for the three months ended June 30, 2017. On an adjusted basis (a non-US GAAP measure as reconciled under Net income attributable to Dentsply Sirona below) for the three months ended June 30, 2018 earnings per diluted share was \$0.60 as compared to \$0.65 earnings per diluted share for the three months ended June 30, 2017.

Cash flow from operations for the first six months of 2018 was \$172.0 million, as compared to \$208.7 million in the first six months of 2017.

Company Profile

Dentsply Sirona is the world’s largest manufacturer of professional dental products and technologies, with over a century of innovation and service to the dental industry and patients worldwide. Dentsply Sirona develops, manufactures, and markets a comprehensive solutions offering including dental and oral health products as well as other consumable medical devices under a strong portfolio of world class brands. As The Dental Solutions Company, Dentsply Sirona’s products provide innovative, high-quality and effective solutions to advance patient care and deliver better, safer and faster dentistry. Dentsply Sirona’s global headquarters is located in York, Pennsylvania. The Company’s shares are listed in the United States on Nasdaq under the symbol XRAY.

BUSINESS

The Company operates in two business segments:

The Technologies & Equipment segment is responsible for the worldwide design, manufacture, sales and distribution of the Company’s Dental Technology, Equipment Products and Healthcare Consumable Products. These products include dental implants, laboratory dental products, CAD/CAM systems, imaging systems, treatment centers as well as consumable medical device products.

The Consumables segment is responsible for the worldwide design, manufacture, sales and distribution of the Company's Dental Consumable Products which includes preventive, restorative, instruments and endodontic and orthodontic dental products.

Principal Measurements

The principal measurements used by the Company in evaluating its business are: (1) constant currency sales growth by segment and geographic region; (2) internal sales growth by segment and geographic region; and (3) adjusted operating income and margins of each reportable segment, which excludes the impacts of purchase accounting, corporate expenses, and certain other items to enhance the comparability of results period to period. These principal measurements are not calculated in accordance with accounting principles generally accepted in the United States; therefore, these items represent non-US GAAP measures. These non-US GAAP measures may differ from other companies and should not be considered in isolation from, or as a substitute for, measures of financial performance prepared in accordance with US GAAP.

The Company defines “constant currency” sales growth as the increase or decrease in net sales from period to period excluding precious metal content and the impact of changes in foreign currency exchange rates. This impact is calculated by comparing current-period revenues to prior-period revenues, with both periods converted at the U.S. dollar to local currency foreign exchange rate for each month of the prior period, for the currencies in which the Company does business. The Company defines “internal” sales growth as constant currency sales growth excluding the impacts of net acquisitions and divestitures, Merger accounting impacts and discontinued products.

Business Drivers

The primary drivers of internal growth include macroeconomic factors, global dental market growth, innovation and new product launches by the Company, as well as continued investments in sales and marketing resources, including clinical education. Management believes that the Company’s ability to execute its strategies should allow it to grow faster than the underlying dental market over time. On a short term basis, changes in strategy or distributor inventory levels, competition and the impact of low-cost products can impact the Company’s internal growth.

The Company has a focus on maximizing operational efficiencies on a global basis. The Company has expanded the use of technology as well as process improvement initiatives to enhance global efficiency. In addition, management continues to evaluate the consolidation of operations and functions, as part of integration activities, to further reduce costs. While the current period results continue to reflect the unfavorable impact of incomplete integration related activities, the Company believes that the future benefits from these global efficiency and integration initiatives will improve its cost structure. In 2017, the Company targeted a cost reduction initiative of approximately \$100 million expected to be achieved over the next several years as the benefits of these initiatives, net of related investments, are realized over time. The Company expects that it will record restructuring charges, from time to time, associated with such initiatives. Consistent with these efforts, the Company is currently evaluating plans to simplify the organizational structure and consolidate its supply chain. The Company expects to announce final plans by the end of 2018. Future restructuring charges could be material to the Company’s consolidated financial statements and there can be no assurance that the cost reduction will be achieved.

Product innovation is a key component of the Company’s overall growth strategy. New advances in technology are anticipated to have a significant influence on future products in the dentistry and consumable medical device markets in which the Company operates. As a result, the Company continues to pursue research and development initiatives to support technological development, including collaborations with various research institutions and dental schools. In addition, the Company licenses and purchases technologies developed by third parties. Although the Company believes these activities will lead to new innovative dental, healthcare consumable and dental technology products, they involve new technologies and there can be no assurance that commercialized products will be developed.

The Company’s business is subject to quarterly fluctuations of consolidated net sales and net income. Price increases, promotional activities as well as changes in inventory levels at distributors contribute to this fluctuation. The Company typically implements most of its price increases in October or January of a given year across most of its businesses. Distributor inventory levels tend to increase in the period leading up to a price increase and decline in the period following the implementation of a price increase. Required minimum purchase commitments under agreements with key distributors may increase inventory levels in excess of retail demand. These net inventory changes have impacted the Company’s consolidated net sales and net income in the past, and may continue to do so in the future, over a given period or multiple periods. In addition, the Company may from time to time, engage in new distributor relationships that could cause quarterly fluctuations of consolidated net sales and net income. Distributor inventory levels may fluctuate, and may differ from the Company’s predictions, resulting in the Company’s projections of future results being different than expected. There can be no assurance that the Company’s dealers and customers will maintain levels of inventory in accordance with the Company’s predictions or past history, or that the timing of customers’ inventory build or liquidation will be in accordance with the Company’s predictions or past history. Any of

these fluctuations could be material to the Company's consolidated financial statements.

The Company continues to be impacted by the transition in distribution strategy with Patterson Companies, Inc. (“Patterson”) and Henry Schein, Inc. (“Henry Schein”). During 2017, the Company signed new distribution agreements with Patterson and Henry Schein for the Company’s equipment products. The Company shipped initial stocking orders for the equipment products to Henry Schein under the agreements primarily in the second and third quarters of 2017 which resulted in unfavorable year-over-year sales growth comparisons. Based on the Company’s estimate, year-over-year changes in distributor inventories associated with these agreements negatively impacted the Company’s reported sales growth in the first six months of 2018 by approximately \$5 million. Based on the Company’s estimate, distributor inventories decreased during the first six months of 2017 by approximately \$29 million as compared to a decrease of approximately \$34 million during the first six months of 2018. At this time, the Company estimates that net changes in distributor inventories will unfavorably impact the Company’s sales by approximately \$130 million to \$135 million for the balance of 2018. Based on the Company’s estimate, year-over-year changes in distributor inventories associated with these agreements is projected to unfavorably impact the Company’s reported sales growth for the full year of 2018 by approximately \$135 million to \$140 million.

The Company will continue to pursue opportunities to expand the Company’s product offerings, technologies and sales and service infrastructure through partnerships and acquisitions. Although the professional dental and the consumable medical device markets in which the Company operates have experienced consolidation, they remain fragmented. Management believes that there will continue to be adequate opportunities to participate as a consolidator in the industry for the foreseeable future.

Impact of Foreign Currencies and Interest Rates

Due to the Company’s significant international presence, movements in foreign exchange and interest rates may impact the Consolidated Statements of Operations. With approximately two-thirds of the Company’s net sales located in regions outside the United States, the Company’s consolidated net sales are impacted negatively by the strengthening or positively impacted by the weakening of the U.S. dollar. Additionally, movements in certain foreign exchange rates may unfavorably or favorably impact the Company’s results of operations, financial condition and liquidity as a number of the Company’s manufacturing and distribution operations are located outside of the U.S.

Reclassification of Prior Year Amounts

Certain reclassifications have been made to the prior year’s data in order to conform to the current year presentation.

RESULTS OF OPERATIONS, QUARTER ENDED JUNE 30, 2018 COMPARED TO QUARTER ENDED JUNE 30, 2017

Net Sales

The discussion below summarizes the Company’s sales growth which excludes precious metal content, into the following components: (1) constant currency sales growth, which includes internal sales growth and net acquisition sales growth, and (2) foreign currency impacts. These disclosures of net sales growth provide the reader with sales results on a comparable basis between periods.

Management believes that the presentation of net sales, excluding precious metal content, provides useful information to investors because a portion of Dentsply Sirona’s net sales is comprised of sales of precious metals generated through sales of the Company’s precious metal dental alloy products, which are used by third parties to construct crown and bridge materials. Due to the fluctuations of precious metal prices and because the cost of the precious metal content of the Company’s sales is largely passed through to customers and has minimal effect on earnings, Dentsply Sirona reports net sales both with and without precious metal content to show the Company’s performance independent of

precious metal price volatility and to enhance comparability of performance between periods. The Company uses its cost of precious metal purchased as a proxy for the precious metal content of sales, as the precious metal content of sales is not separately tracked and invoiced to customers. The Company believes that it is reasonable to use the cost of precious metal content purchased in this manner since precious metal dental alloy sale prices are typically adjusted when the prices of underlying precious metals change.

The presentation of net sales, excluding precious metal content, is considered a measure not calculated in accordance with US GAAP, and is therefore considered a non-US GAAP measure. The Company provides the following reconciliation of net sales to net sales, excluding precious metal content. The Company's definitions and calculations of net sales, excluding precious metal content, and other operating measures derived using net sales, excluding precious metal content, may not necessarily be the same as those used by other companies.

(in millions)	Three Months Ended June 30,			
	2018	2017	\$ Change	% Change
Net sales	\$1,042.1	\$992.7	\$49.4	5.0 %
Less: precious metal content of sales	9.4	9.7	(0.3)	(3.1 %)
Net sales, excluding precious metal content	\$1,032.7	\$983.0	\$49.7	5.1 %

Net sales, excluding precious metal content, for the three months ended June 30, 2018 were \$1,032.7 million, an increase of \$49.7 million from the three months ended June 30, 2017. The increase in net sales, excluding precious metal content, was negatively impacted, based on the Company's estimate, by approximately \$9 million as a result of net changes in equipment inventory levels in the current quarter as compared to the prior year quarter at certain distributors in North America and Europe, that the Company believes is related to the transition in distribution strategy (see "Business Drivers" under this section for further detail). Based on the Company's estimate, inventory held by these distributors decreased by approximately \$26 million during the three months ended June 30, 2018, compared to a decrease of approximately \$17 million in the same three month period in 2017. At this time, the Company estimates that net changes in distributor inventories will unfavorably impact the Company's sales by approximately \$130 million to \$135 million for the balance of 2018. Based on the Company's estimate, year-over-year changes in distributor inventories associated with these agreements is projected to unfavorably impact the Company's reported sales growth for the full year of 2018 by approximately \$135 million to \$140 million.

For the three months ended June 30, 2018, net sales, excluding precious metal content, increased 1.3% on a constant currency basis. This includes a benefit of 0.4% from acquisitions, which results in internal sales growth of 0.9%. Net sales, excluding precious metal content, were positively impacted by approximately 3.8% due to the weakening of the U.S. dollar over the prior year period. The internal sales growth was attributable to the Consumables segment, offset by a decline in the Technologies & Equipment segment.

Sales Growth by Region

United States

Net sales increased by 2.1% in the quarter ended June 30, 2018 as compared to the quarter ended June 30, 2017. Net sales, excluding precious metal content, increased by 2.1% in the second quarter of 2018 as compared to the second quarter of 2017.

For the three month period ended June 30, 2018, net sales, excluding precious metal content, increased 2.3% on a constant currency basis. This includes a benefit of 1.0% from acquisitions, which results in internal sales growth of 1.3%. The internal sales growth was attributable to both the Technologies & Equipment and Consumables segments.

Based on the Company's estimate, sales growth for the three months ended June 30, 2018 was negatively impacted by approximately \$11 million from net changes in equipment inventory levels in the current quarter as compared to the prior year quarter at the two distributors in the United States related to the transition in distribution strategy (see "Business Drivers" under this section for further detail). Based on the Company's estimate, inventory held by these distributors decreased by approximately \$24 million during the three months ended June 30, 2018 compared to a decrease of approximately \$13 million during the three months of June 30, 2017. At this time, the Company estimates that net changes in distributor inventories will unfavorably impact the Company's sales by approximately \$130 million to \$135 million for the balance of 2018 in the United States. Based on the Company's estimate, year-over-year changes in distributor inventories associated with these agreements is projected to unfavorably impact the Company's reported sales growth for the full year of 2018 by approximately \$135 million to \$140 million in this region.

Europe

Net sales increased by 6.1% in the quarter ended June 30, 2018 as compared to the quarter ended June 30, 2017. Net sales, excluding precious metal content, increased by 6.2% in the second quarter of 2018 as compared to the second quarter of 2017, which was positively impacted by approximately 7.6% due to the weakening of the U.S. dollar over the prior year period.

For the three month period ended June 30, 2018, net sales, excluding precious metal content, decreased 1.4% on a constant currency basis, resulting in negative internal sales growth of 1.4%. The decline in internal sales growth was driven primarily by the Technologies & Equipment segment.

Provision for Income Taxes

For the three months ended June 30, 2018, income taxes were a net benefit of \$41.3 million as compared to a net benefit of \$14.5 million in the quarter ended June 30, 2017.

During the quarter ended June 30, 2018, the Company recorded the following discrete tax items, \$0.5 million of excess tax benefit related to employee share-based compensation, tax benefits of \$0.7 million related to valuation allowances, \$2.5 million related to enacted statutory rate changes and \$0.6 million of tax benefit for other discrete tax matters. The Company also recorded a \$50.4 million tax benefit as a discrete item related to the indefinite-lived intangible asset impairment charge, \$1.1 million for the fixed asset impairment charge, and \$3.3 million related to tax-deductible goodwill for the three months ended June 30, 2018. In addition the Company also recorded \$0.6 million of tax benefit as a discrete item related to the gain on sale of marketable securities. Excluding these discrete tax items and adjusting pretax income for the gain on the sale of marketable securities and adjusting for the pretax loss related to the impairment of indefinite-lived intangible assets, tax deductible and non-deductible goodwill impairment charges, the Company's effective tax rate was 17.02%.

For the second quarter of 2017, the Company recorded the following discrete tax items, \$4.2 million of excess tax benefit related to employee share-based compensation, \$0.5 million of tax expense related to enacted statutory rate changes and \$1.5 million of tax expense related to other discrete tax matters. The Company also recorded a \$23.5 million tax benefit as a discrete item related to the indefinite-lived intangible asset impairment charge recorded during the three months ended June 30, 2017. Excluding these discrete tax items and adjusting pretax loss to exclude the pretax loss related to the impairment of the indefinite-lived intangible assets and non-deductible goodwill impairment charge, the Company's effective tax rate was 10.4%. The effective tax rate was favorably impacted by the Company's change in the mix of consolidated earnings.

The Company's effective income tax rate for the second quarter of 2018 included the net impact of restructuring program related costs and other costs, amortization of purchased intangible assets, business combination related costs, credit risk and fair value adjustments, business combination related costs and income tax related adjustments which impacted income before income taxes and the provision for income taxes by \$1,337.7 million and \$78.9 million, respectively.

The Company's effective income tax rate for the second quarter of 2017 included the net impact of restructuring program related costs and other costs, amortization of purchased intangible assets, business combination related costs, fair value adjustments, credit risk and fair value adjustments and income tax related adjustments which impacted the loss before income taxes and the provision for income taxes by \$1,244.2 million and \$43.5 million, respectively.

On December 22, 2017, the Tax Cuts and Jobs Act (the "Act" or "U.S. tax reform") was enacted. U.S. tax reform, among other things, reduced the U.S. federal income tax rate to 21% in 2018 from 35%, instituted a dividends received deduction for foreign earnings with a related tax for the deemed repatriation of unremitted foreign earnings and created a new U.S. minimum tax on earnings of foreign subsidiaries. In addition, the SEC staff issued Staff Accounting Bulletin No. 118 ("SAB 118"), which provides guidance on accounting for enactment effects of the Act and provides a measurement period of up to one year from the Act's enactment date for companies to complete their accounting under Accounting Standards Codification No. 740 "Income Taxes", ("ASC 740"). In accordance with SAB 118, to the extent that a company's accounting for certain income tax effects of the Act is incomplete but it is able to determine a reasonable estimate, it must record a provisional estimate in its financial statements. If a company cannot determine a provisional estimate to be included in its financial statements, it should continue to apply ASC 740 on the basis of the provisions of the tax laws that were in effect immediately before the enactment of the Act. The Company has accounted for the tax effects of the Act on a provisional basis. At December 31, 2017, the accounting for certain income tax effects was incomplete, but the Company determined reasonable estimates for those effects which were included in the financial statements. The Company expects to complete the accounting during 2018 to comply with the one year measurement period.

Based on information available, at December 31, 2017, the Company estimated the cumulative undistributed foreign earnings and recorded a provisional estimate of income tax expense related to the one-time deemed repatriation toll

charge. There is still uncertainty as to the application of the Act, in particular as it relates to state income taxes. Further, the Company has not yet completed the analysis of the components of the computation, including the amount of the foreign earnings subject to U.S. income tax, and the portion of the foreign earnings held in cash or other specified assets. At June 30, 2018, primarily due to the utilization of foreign tax credit carryforwards and certain other tax attributes the estimated cash liability for the deemed repatriation of foreign earnings is approximately
