DORMAN PRODUCTS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE THIRTY-NINE WEEKS ENDED SEPTEMBER 30, 2006 AND SEPTEMBER 24, 2005
(UNAUDITED)

1. Basis of Presentation

Effective May 24, 2006, the Company changed its name from R&B, Inc. to Dorman Products, Inc. (the "Company").

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. However, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the thirty-nine week period ended September 30, 2006 are not necessarily indicative of the results that may be expected for the fiscal year ending December 30, 2006. The Company may experience significant fluctuations from quarter to quarter in its results of operations due to the timing of orders placed by the Company's customers. Generally, the second and third quarters have the highest level of customer orders, but the introduction of new products and product lines to customers may cause significant fluctuations from quarter to quarter. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2005.

2. Sales of Accounts Receivable

The Company has entered into several customer sponsored programs administered by unrelated financial institutions that permit the Company to sell, without recourse, certain accounts receivable at discounted rates to the financial institutions. The Company does not retain any servicing requirements for these accounts receivable. Transactions under these agreements are accounted for as sales of accounts receivable following the provisions of Statement of Financial Accounting Standards (SFAS) No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities - A Replacement of FASB Statement 125." At September 30, 2006 and December 31, 2005, respectively, \$25.2 million and \$23.2 million of accounts receivable were sold and removed from the consolidated balance sheets. Selling, general and administrative expenses for the thirty-nine weeks ended September 30, 2006 and

Edgar Filing: Dorman Products, Inc. - Form 10-Q

September 24, 2005 include \$1.4 million and \$0.8 million, respectively, in financing costs associated with these accounts receivable sales programs.

Page 7 of 28

3. Inventories

Inventories include the cost of material, freight, direct labor and overhead utilized in the processing of the Company's products. Inventories were as follows:

(in thousands)	September 30, 2006		December 31, 2005
Bulk product.....	\$ 28,826	\$	30,548
Finished product.....	42,889		42,317
Packaging materials.....	2,970		2,670
Total.....	74,685	\$	75,535

Included in finished product as of September 30, 2006 is approximately \$1.1 million in inventory held on consignment with one customer.

4. Goodwill

During the second quarter of fiscal year 2006, the Company assessed the value of the goodwill recorded at its Swedish subsidiary Scan-Tech Sweden AB (Scan-Tech) as a result of a review of the Scan-Tech business in response to bad debt charge offs at two large customers and the resulting loss of those customers in the first half of the year. After completing the required analyses, the Company concluded that the goodwill balance existing at the subsidiary was impaired. Accordingly, an impairment charge of approximately \$2.9 million, which represents the entire goodwill balance at the subsidiary, was recorded in the consolidated statements of operations. In addition, the Company recorded a \$0.3 million charge to its provision for income taxes to write off deferred tax assets of the subsidiary which it deemed unrealizable.

In June 2005, the Company acquired The Automotive Edge/Hermoff (Hermoff) for approximately \$1.7 million. The consolidated results include Hermoff since June 1, 2005. The Company has not presented pro forma results of operations for the thirty-nine weeks ended September 24, 2005 assuming the acquisition had occurred at the beginning of the period as this result would not have been materially different than actual results for the period. Total goodwill recognized in connection with the acquisition was \$0.9 million.

Goodwill activity for the thirty-nine weeks ended September 30, 2006 is as follows (in thousands):

Balance, December 31, 2005	\$	29,617
Goodwill impairment		(2,897)
Acquisition adjustments		125
Translation		153
Balance, September 30, 2006	\$	26,998

5. Long-Term Debt

In July 2006, the Company amended its Revolving Credit Facility. The amended facility extended the expiration date from June 2007 to June 2008. The

Edgar Filing: Dorman Products, Inc. - Form 10-Q

July 2006 amendment also increased the total credit facility from \$20 million to \$30 million. Borrowings under the amended facility are on an unsecured basis

Page 8 of 28

with interest rates ranging from LIBOR plus 65 basis points to LIBOR plus 150 basis points based upon the achievement of certain benchmarks related to the ratio of funded debt to EBITDA. The loan agreement also contains covenants, the most restrictive of which pertain to net worth and the ratio of debt to EBITDA.

In September 2006, the Company borrowed \$625,000 under a commercial loan granted in connection with the opening of a new distribution facility. The principal balance will be paid monthly in equal installments through September 2013. The outstanding balance bears interest at an annual rate of 4% payable monthly. The loan is secured by a letter of credit issued under the Company's revolving credit facility..

6. Stock-Based Compensation

Effective May 18, 2000, the Company amended and restated its incentive Stock Option Plan (the "Plan"). Under the terms of the Plan, the Board of Directors of the Company may grant incentive stock options or non-qualified stock options or combinations thereof to purchase up to 2,345,000 shares of common stock to officers, directors and employees. Grants under the Plan must be made within 10 years of the plan amendment date and are exercisable at the discretion of the Board of Directors, but in no event more than 10 years from the date of grant. At date September 30, 2006, options to acquire 278,760 shares were available for grant under the Plan.

Effective January 1, 2006, the Company adopted SFAS No. 123R and related interpretations and began expensing the grant-date fair value of employee stock options. Prior to January 1, 2006, the Company applied Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations in accounting for the Plan. Accordingly, no compensation expense was recognized in net income for employee stock options for those options granted which had an exercise price equal to the market value of the underlying common stock on the date of grant.

The Company adopted SFAS No. 123R using the modified prospective transition method and therefore has not restated prior periods. Under this transition method, compensation cost associated with employee stock options recognized in 2006 includes amortization related to the remaining unvested portion of stock option awards granted prior to January 1, 2006, and amortization related to new awards granted after January 1, 2006. Prior to the adoption of SFAS No. 123R, the Company presented tax benefits resulting from stock-based compensation as operating cash flows in the consolidated statements of cash flows. SFAS No. 123R requires that cash flows resulting from tax deductions in excess of compensation cost recognized in the financial statements be classified as financing cash flows.

Compensation cost is recognized on a straight-line basis over the vesting period during which employees perform related services. The compensation cost charged against income for the thirteen and thirty-nine week periods ended September 30, 2006 was \$122,000 and \$365,000 before taxes, respectively. The compensation cost recognized is classified as selling, general and administrative expense in the consolidated statement of operations. No cost was capitalized during fiscal 2006. The Company included a forfeiture assumption of 2.6% in the calculation of expense.

Page 9 of 28

Edgar Filing: Dorman Products, Inc. - Form 10-Q

The fair value of options granted in 2006 was estimated using the Black-Scholes option valuation model that used the assumptions noted in the table below. Expected volatility and expected dividend yield are based on the actual historical experience of the Company's common stock. The expected life represents the period of time that options granted are expected to be outstanding and was calculated using the simplified method prescribed by the Securities and Exchange Commission Staff Accounting Bulletin No. 107. The risk-free rate is based on the U.S. Treasury security with terms equal to the expected time of exercise as of the grant date.

Expected dividend yield.....	0%
Expected stock price volatility.....	47.1%
Risk-free interest rate.....	4.3%
Expected life of options.....	6.5 years

The weighted-average grant-date fair value of options granted during 2006 was \$4.83 per option.

Transactions under the Plan for 2006 were as follows:

	Shares	Weighted Average Price	Weighted Average Remaining Term (In years)	
Balance at December 31, 2005.....	995,216	\$ 4.80		
Granted.....	20,000	9.15		
Exercised.....	(22,400)	3.86		
Canceled.....	(1,200)	3.02		
Balance at September 30, 2006.....	991,616	\$ 4.91	6.0	\$
Options exercisable at September 30, 2006	618,716	\$ 2.50	5.0	\$

The total intrinsic value of stock options exercised during 2006 was \$150,000.

As of date September 30, 2006, there was approximately \$1.3 million of unrecognized compensation cost related to nonvested stock options, which is expected to be recognized over a weighted-average period of approximately 2.7 years.

Cash received from option exercises during 2006 was \$86,000. The total tax benefit generated from options granted prior to January 1, 2006, which were exercised during 2006, was approximately \$26,000 and was credited to additional paid in capital.

In November 2005, the FASB issued FSP No. FAS 123(R)-3, "Transition Election Related to Accounting for the Tax Effects of Share-Based Payment Awards." This FSP provides an elective alternative transition method for calculating the pool of excess tax benefits available to absorb tax deficiencies recognized subsequent to the adoption of SFAS No. 123R. Companies may take up to one year from the effective date of the FSP to evaluate the available transition alternatives and make a one-time election as to which method to adopt. The Company is currently in the process of evaluating the alternative methods.

Edgar Filing: Dorman Products, Inc. - Form 10-Q

Page 10 of 28

7. Earnings Per Share

The following table sets forth the computation of basic earnings per share and diluted earnings per share for the thirteen and thirty-nine week periods ended September 30, 2006 and September 24, 2005:

(in thousands, except per share data)	Thirteen Weeks Ended		Thirty
	September	September	Septemb
	30, 2006	24, 2005	30, 200
Numerator:			
Net income.....	\$ 4,549	\$ 4,613	\$ 8,8
Denominator:			
Weighted average shares outstanding used in			
basic earnings per share calculation.....	17,708	17,932	17,7
Effect of dilutive stock options.....	439	512	4
Adjusted weighted average shares outstanding			
diluted earnings per share.....	18,147	18,444	18,1
Basic earnings per share.....	\$ 0.26	\$ 0.26	\$ 0.
Diluted earnings per share.....	\$ 0.25	\$ 0.25	\$ 0.

Options to purchase 193,500 shares were outstanding at September 30, 2006, but were not included in the computation of diluted earnings per common share, as their effect would have been antidilutive. No outstanding options at September 24, 2005 were excluded from the computation of diluted earnings per share.

Through 2005, the Company applied Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations in accounting for its stock option plans. Accordingly, no compensation expense for stock options was recognized. If compensation cost for these plans had been determined using the fair-value method prescribed by SFAS No. 123, "Accounting for Stock-Based Compensation," the Company's net income and earnings per share for the thirteen and thirty-nine weeks ended September 24, 2005 would have been reduced to the following pro forma amounts (in thousands, except per share data):

	Thirteen Weeks		Thirty-nin
	Ended	Ended	
	September	September	Septemb
	24, 2005	24, 20	
Net income, as reported.....	\$ 4,613	\$ 12,69	
Less: Stock-based compensation expense, net of related tax			
effects, determined under the fair value based method			
for all awards.....	(66)	(18	
Net income, pro forma.....	\$ 4,547	\$ 12,50	
Earnings per share:			
Basic - as reported	\$ 0.26	\$ 0.7	
Basic - pro forma	\$ 0.25	\$ 0.7	
Diluted - as reported	\$ 0.25	\$ 0.6	
Diluted - pro forma	\$ 0.25	\$ 0.6	

The fair value of each option grant was estimated on the date of grant using the Black-Scholes option valuation model with the following weighted average assumptions for 2005:

Expected dividend yield.....	0%
Expected stock price volatility.....	47%
Risk-free interest rate.....	3.9%
Expected life of option.....	7.5 years

On February 24, 2005, the Company's Board of Directors approved a two-for-one split of the Company's common stock, payable in the form of a stock dividend of one share for each share held. The Board set March 15, 2005 as the record date for the determination of the shareholders entitled to receive the additional shares. The shares were distributed to the shareholders of record on March 28, 2005. All earnings per share and common stock information is presented as if the stock split occurred prior to the earliest period included in these consolidated financial statements.

8. Related-Party Transactions

The Company has entered into a noncancelable operating lease for its primary operating facility from a partnership in which Richard N. Berman, the Company's Chief Executive Officer, and Steven L. Berman, the Company's Executive Vice President, are partners. Total rental payments in 2005 to the partnership under the lease arrangement were \$1.3 million.

9. New Accounting Pronouncements

In June 2006, the Financial Accounting Standards Board (FASB) issued FIN 48, "Accounting for Uncertainty in Income Taxes--an interpretation of FASB Statement No. 109, Accounting for Income Taxes," which clarifies the accounting for uncertainty in income taxes. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Interpretation requires that the Company recognize in the financial statements, the impact of a tax position, if that position is more likely than not of being sustained on audit, based on the technical merits of the position. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods and disclosure. The provisions of FIN 48 are effective beginning January 1, 2007 with the cumulative effect of the change in accounting principle recorded as an adjustment to opening retained earnings. The Company is currently evaluating the impact of adopting FIN 48 on the financial statements.

In May 2005, the FASB issued SFAS No. 154, "Accounting Changes and Error Corrections." SFAS No. 154 is a replacement of stocktickerABP No. 20 and FSAB Statement No. 3. SFAS No. 154 provides guidance on the accounting for and reporting of accounting changes and error corrections. It establishes retrospective application as the required method for reporting a change in accounting principle. SFAS No. 154 provides guidance for determining whether retrospective application of a change in accounting principle is impracticable and for reporting a change when retrospective application is impracticable. The reporting of a correction of an error by restating previously issued financial statements is also addressed by SFAS No. 154. SFAS No. 154 is effective for accounting changes and corrections of errors made in fiscal years beginning

Edgar Filing: Dorman Products, Inc. - Form 10-Q

after December 15, 2005. The adoption of this statement did not have an impact on the Company's consolidated financial condition or results of operations.

In December 2004, the FASB issued SFAS No. 151 "Inventory Costs, an Amendment of ARB No. 43, Chapter 4." SFAS No. 151 clarifies the accounting for abnormal amounts of idle facility expense, freight, handling costs and wasted material and requires that these items be recognized as current period charges. SFAS No. 151 applies only to inventory costs incurred during periods beginning after the effective date and also requires that the allocation of fixed production overhead to conversion costs be based on the normal capacity of the production facilities. SFAS No. 151 is effective for the Company's fiscal year beginning January 1, 2006. The adoption of this statement did not have a material effect on the results of operations.

In September 2006, the SEC Office of the Chief Accountant and Divisions of Corporation Finance and Investment Management released SAB No. 108, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements," that provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. The SEC staff believes that registrants should quantify errors using both a balance sheet and an income statement approach and evaluate whether either approach results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. This pronouncement is effective for fiscal years ending after November 15, 2006.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements." SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements. Accordingly, SFAS No. 157 does not require any new fair value measurements. The provisions of SFAS No. 157 are to be applied prospectively and are effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company is currently evaluating what effect, if any, adoption of SFAS No. 157 will have on the Company's consolidated results of operations and financial position.

Page 13 of 28

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

The Company is a leading supplier of Original Equipment (OE) Dealer "Exclusive" automotive replacement parts, automotive hardware, brake products, and household hardware to the automotive aftermarket and mass merchandise markets. Dorman automotive parts and hardware are marketed under the OE Solutions(TM), HELP!(R), AutoGrade(TM), First Stop(TM), Conduct-Tite(R), Pik-A-Nut(R), and Scan-Tech(TM) brand names. The Company designs, packages and markets over 73,000 different automotive replacement parts (including brake parts), fasteners and service line products manufactured to its specifications. The Company's products are sold under one of the seven Dorman brand names listed above. The Company's products are sold primarily in the United States through

Edgar Filing: Dorman Products, Inc. - Form 10-Q

automotive aftermarket retailers (such as AutoZone, Advance and O'Reilly), national, regional and local warehouse distributors (such as Carquest and NAPA) and specialty markets including parts manufacturers for resale under their own private labels and salvage yards. Through its Scan-Tech and Hermoff subsidiaries, the Company is increasing its international distribution of automotive replacement parts, with sales into Canada, Europe, the Middle East and the Far East.

The automotive aftermarket in which the Company competes has been growing in size; however, the market continues to consolidate. As a result, the Company's customers regularly seek more favorable pricing, product returns and extended payment terms when negotiating with the Company. While the Company does its best to avoid such concessions, in some cases pricing concessions have been made, customer payment terms have been extended and returns of product have exceeded historical levels. The product returns and more favorable pricing primarily affect the Company's profit levels while terms extensions generally reduce operating cash flow and require additional capital to finance the business. Management expects both of these trends to continue for the foreseeable future. Gross profit margins have declined over the past two years as a result of this pricing pressure. Another contributing factor in the Company's gross profit margin decline is a shift in mix to higher-priced, but lower gross margin products. Both of these trends are expected to continue for the foreseeable future. The Company has increased its focus on efficiency improvements and product cost reduction initiatives to offset the impact of price pressures.

In addition, the Company is relying on new product development as a way to offset some of these customer demands and as its primary vehicle for growth. As such, new product development is a critical success factor for the Company. The Company has invested heavily in resources necessary for it to increase its new product development efforts and to strengthen its relationships with its customers. These investments are primarily in the form of increased product development resources and awareness programs, customer service improvements and increased customer credits and allowances. This has enabled the Company to provide an expanding array of new product offerings and grow its revenues.

Page 14 of 28

The Company may experience significant fluctuations from quarter to quarter in its results of operations due to the timing of orders placed by the Company's customers. Generally, the second and third quarters have the highest level of customer orders, but the introduction of new products and product lines to customers may cause significant fluctuations from quarter to quarter.

The Company operates on a fifty-two, fifty-three week period ending on the last Saturday of the calendar year.

Cautionary Statement Regarding Forward Looking Statements

Certain statements in this document constitute "forward-looking statements" within the meaning of the Federal Private Securities Litigation Reform Act of 1995. While forward-looking statements sometimes are presented with numerical specificity, they are based on various assumptions made by management regarding future circumstances over many of which the Company has little or no control. Forward-looking statements may be identified by words including "anticipate," "believe," "estimate," "expect," and similar expressions. The Company cautions readers that forward-looking statements, including, without limitation, those relating to future business prospects, revenues, working capital, liquidity, and income, are subject to certain risks and uncertainties that would cause actual results to differ materially from those indicated in the forward-looking statements. Factors that could cause

Edgar Filing: Dorman Products, Inc. - Form 10-Q

actual results to differ from forward-looking statements include but are not limited to competition in the automotive aftermarket industry, concentration of the Company's sales and accounts receivable among a small number of customers, the impact of consolidation in the automotive aftermarket industry, foreign currency fluctuations, dependence on senior management and other risks and factors identified from time to time in the reports the Company files with the Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated or projected. For additional information concerning factors that could cause actual results to differ materially from the information contained in this report, reference is made to the information in Part I, "Item 1A, Risk Factors" in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2005.

Stock Split

All prior period common stock and applicable share and per share amounts have been retroactively adjusted to reflect a two-for-one split in the form of a stock dividend of the Company's common stock effective March 28, 2005.

Write Off of Goodwill and Deferred Tax Asset Related to Swedish Subsidiary

During the second quarter of fiscal 2006, the Company assessed the value of the goodwill recorded at its Swedish subsidiary (Scan-Tech) as a result of a review of the Scan-Tech business in response to bad debt charge offs at two large customers and the resulting loss of those customers in the first half of the year. After completing the required analyses, the Company concluded that the goodwill balance existing at the subsidiary was impaired. Accordingly, an impairment charge of approximately \$2.9 million, which represented the entire goodwill balance at the subsidiary, was recorded in the consolidated statements of operations. In addition, the Company recorded a \$0.3 million charge to its provision for income taxes to write off deferred tax assets of the subsidiary which it deemed unrealizable.

Page 15 of 28

Acquisition

In June 2005, the Company acquired The Automotive Edge/Hermoff ("Hermoff") for approximately \$1.7 million. The consolidated results include Hermoff since June 1, 2005. The Company has not presented pro forma results of operations for the period ended September 24, 2005, assuming the acquisition had occurred at the beginning of the respective periods, as these results would not have been materially different than actual results for the periods.

Stock-Based Compensation

Effective January 1, 2006, the Company adopted SFAS No. 123R and related interpretations and began expensing the grant-date fair value of employee stock options. Prior to January 1, 2006, the Company applied Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations in accounting for its stock option plans. Accordingly, no compensation expense was recognized in net income for employee stock options for those options granted which had an exercise price equal to the market value of the underlying common stock on the date of grant.

The Company adopted SFAS No. 123R using the modified prospective transition method and therefore has not restated prior periods. Under this

Edgar Filing: Dorman Products, Inc. - Form 10-Q

transition method, compensation cost associated with employee stock options recognized in 2006 includes amortization related to the remaining unvested portion of stock option awards granted prior to January 1, 2006, and amortization related to new awards granted after January 1, 2006. Prior to the adoption of SFAS No. 123R, the Company presented tax benefits resulting from stock-based compensation as operating cash flows in the consolidated statements of cash flows. SFAS No. 123R requires that cash flows resulting from tax deductions in excess of compensation cost recognized in the financial statements be classified as financing cash flows.

Compensation cost is recognized on a straight-line basis over the vesting period during which employees perform related services. The compensation cost charged against income for the thirteen and thirty-nine week periods ended September 30, 2006 was \$122,000 and \$365,000 before taxes, respectively. The compensation cost recognized is classified as selling, general and administrative expense in the consolidated statement of operations. No cost was capitalized during fiscal 2006. The Company included a forfeiture assumption of 2.6% in the calculation of expense.

Results of Operations

The following table sets forth, for the periods indicated, the percentage of net sales represented by certain items in the Company's Consolidated Statements of Operations:

Page 16 of 28

	Percentage of Net Sales For the Thirteen Weeks Ended		Percentage For the Thirteen Weeks Ended
	September 30, 2006	September 24, 2005	September 30, 2006
Net Sales.....	100.0%	100.0%	100.0%
Cost of goods sold.....	65.0	65.1	64.4
Gross profit.....	35.0	34.9	35.6
Selling, general and administrative expenses.....	24.6	24.0	25.9
Goodwill impairment.....	-	-	1.3
Income from operations.....	10.4	10.9	8.4
Interest expense, net.....	0.7	1.0	0.8
Income before taxes.....	9.7	9.9	7.6
Provision for taxes.....	3.6	3.6	3.5
Net Income.....	6.1%	6.3%	4.1%

Thirteen Weeks Ended September 30, 2006 Compared to Thirteen Weeks Ended September 24, 2005

Net sales increased 1% to \$74.9 million for the thirteen weeks ended September 30, 2006 from \$73.8 million for the same period in 2005. Sales volume during the third quarter of 2006 was up just 1% due to general weakness throughout the automotive aftermarket.

Cost of goods sold, as a percentage of sales, remained relatively constant at 65.0% for the thirteen weeks ended September 30, 2006 as compared to 65.1% in the same period last year. This resulted in a gross profit margin

Edgar Filing: Dorman Products, Inc. - Form 10-Q

of 35.0% in the third quarter of 2006.

Selling, general and administrative expenses for the thirteen weeks ended September 30, 2006 increased \$0.6 million, or 3%, to \$18.4 million from \$17.8 million for the same period in 2005. This increase was the result of the Company's decision to invest additional resources in new product development and promotional support and inflationary increases in wages and other costs. These increases were partially offset by a \$0.5 million reduction in incentive compensation expense in the current year due to the Company's lower earnings levels. Selling, general and administrative expenses for the thirteen weeks ended September 30, 2006 and September 24, 2005 include \$0.4 million and \$0.4 million, respectively, in financing costs associated with accounts receivable sales programs whereby the Company sells its accounts receivable on a non-recourse basis to financial institutions.

Interest expense, net, was down \$0.1 million in the thirteen weeks ended September 30, 2006 due to lower borrowing levels as a result of cash generated from operations.

The Company's effective tax rate was 37.1% for the thirteen weeks ended September 30, 2006 and September 24, 2005.

Page 17 of 28

Thirty-nine Weeks Ended September 30, 2006 Compared to Thirty-nine Weeks Ended September 24, 2005

Net sales increased 7% to \$217.9 million for the thirty-nine weeks ended September 30, 2006 from \$203.6 million for the same period in 2005. Sales volume in 2006 increased as a result of continued sales growth from products introduced within the last twenty-four months.

Cost of goods sold, as a percentage of sales, increased to 64.4% for the thirty-nine weeks ended September 30, 2006 from 63.9% in the same period last year. The Company has experienced gross margin reductions in several product lines as a result of higher customer returns and allowances and selling price reductions due to competitive pressures.

Selling, general and administrative expenses for the thirty-nine weeks ended September 30, 2006 increased \$5.0 million, or 10%, to \$56.4 million from \$51.3 million for the same period in 2005. This increase was the result of the Company's decision to invest additional resources in new product development and promotional support as well as volume-driven variable expense increases, inflationary increases in wages and other costs, and an \$0.8 million write-off of accounts receivable in the first half of the year after the loss of two large customers of the Company's Swedish subsidiary. Selling, general and administrative expenses for the thirty-nine weeks ended September 30, 2006 and September 24, 2005 include \$1.4 million and \$0.8 million, respectively, in financing costs associated with accounts receivable sales programs whereby the Company sells its accounts receivable on a non-recourse basis to financial institutions.

As noted above, the Company recorded a \$2.9 million charge in the second quarter of 2006 to write off the goodwill of its Swedish subsidiary.

Interest expense, net, decreased to \$1.8 million for the thirty-nine weeks ended September 30, 2006 from \$2.0 million in the same period last year due to lower borrowing levels.

The Company's effective tax rate increased to 46.1% for the thirty-nine weeks ended September 30, 2006 from 37.0% for the thirty-nine weeks ended

Edgar Filing: Dorman Products, Inc. - Form 10-Q

September 24, 2005. The increase is primarily the result of the \$2.9 million second quarter goodwill impairment charge which is not tax deductible and therefore had no income tax benefit associated with it. In addition, the Company's provision for income taxes for the thirty-nine weeks ended September 30, 2006 includes a \$0.3 million charge to write off deferred tax assets.

Liquidity and Capital Resources

Historically, the Company has financed its growth through a combination of cash flow from operations, accounts receivable sales programs provided by certain customers and through the issuance of senior indebtedness through its bank credit facility and senior note agreements. At September 30, 2006, working capital was \$122.2 million, total long-term debt (including the current portion and revolving credit borrowings) was \$31.0 million and shareholders' equity was \$148.2 million. Cash and cash equivalents as of September 30, 2006 totaled \$5.0 million.

Page 18 of 28

Over the past several years the Company has extended payment terms to certain customers as a result of customer requests and market demands. These extended terms have resulted in increased accounts receivable levels and significant uses of cash flow. The Company participates in accounts receivable sales programs with several customers which allow it to sell its accounts receivable on a non-recourse basis to financial institutions to offset the negative cash flow impact of these payment terms extensions. As of September 30, 2006 and December 31, 2005, respectively, the Company had sold \$25.2 million and \$23.2 million in accounts receivable under these programs and had removed them from its balance sheets. The Company expects continued pressure to extend its payment terms for the foreseeable future. Further extensions of customer payment terms will result in additional uses of cash flow or increased costs associated with the sale of accounts receivable.

In July 2006, the Company amended its revolving credit facility. The amendment increased the size of the total credit facility from \$20 million to \$30 million and extended the expiration date from June 2007 to June 2008. Borrowings under the facility are on an unsecured basis with interest at rates ranging from LIBOR plus 65 basis points to LIBOR plus 150 basis points based upon the achievement of certain benchmarks related to the ratio of funded debt to EBITDA. The interest rate at September 30, 2006 was LIBOR plus 85 basis points (6.18%). Borrowings under the facility were \$13.3 million as of September 30, 2006. The loan agreement also contains covenants, the most restrictive of which pertain to net worth and the ratio of debt to EBITDA. The Company was in compliance with all financial covenants contained in the Notes and Revolving Credit Facility at September 30, 2006.

At September 30, 2006, long-term debt includes \$17.2 million in Senior Notes that were originally issued in August 1998, in a private placement on an unsecured basis ("Notes"). The Notes bear a 6.81% fixed interest rate, payable quarterly. Annual principal payments of \$8.6 million are due each August 2007 and August 2008. The Notes require, among other things, that the Company maintain certain financial covenants relating to debt to capital ratios and minimum net worth.

In September 2006, the Company borrowed \$625,000 under a commercial loan granted in connection with the opening of a new distribution facility. The principal balance will be monthly in equal installments through September 2013. The outstanding balance bears interest at an annual rate of 4% payable monthly. The loan is secured by a letter of credit issued under the Company's revolving credit facility.

The Company's business activities do not include the use of

Edgar Filing: Dorman Products, Inc. - Form 10-Q

unconsolidated special purpose entities, and there are no significant business transactions that have not been reflected in the accompanying financial statements.

The Company reported a net source of cash flow from its operating activities of \$12.9 million in the thirty-nine weeks ended September 30, 2006. Net income, depreciation and a \$1.4 million decrease in inventory were the primary sources of operating cash flow in the thirty-nine weeks ended September 30, 2006. Inventory levels declined despite higher sales volumes as a result of the Company's efforts to reduce vendor lead times and more accurately forecast customer demand for its products. The primary uses of cash flow were accounts payable and accounts receivable. Accounts payable decreased \$2.8 million as a result of lower inventory purchasing levels and the timing of payments to suppliers. Accounts receivable grew due to a lengthening of payment terms to certain customers.

Page 19 of 28

Investing activities used \$5.4 million of cash in the thirty-nine weeks ended September 30, 2006 as a result of additions to property, plant and equipment. The Company's largest 2006 capital project was the automation and expansion of its central distribution center in Warsaw, Kentucky, which was completed in the third quarter of 2006 at a cost of approximately \$7.0 million. Capital spending in the thirty-nine weeks ended September 30, 2006 also included tooling associated with new products, purchases of equipment to outfit our new distribution center in Portland, Tennessee, upgrades to information systems, purchases of equipment designed to improve operational efficiencies and scheduled equipment replacements.

Financing activities used \$5.4 million in cash in the thirty-nine weeks ended September 30, 2006. The primary use of cash flow was a scheduled \$8.6 million repayment of the Company's Senior Notes in August 2006. This repayment was partially funded with \$3.1 million in borrowings under the Company's revolving credit facility with the rest coming from operating cash flow.

The Pension Protection Act of 2006, signed into law on August 17, 2006 (the "Act"), limits the ability of defined contribution retirement plans, like the Company's 401(k) Plan, to mandate investment in employer securities. The Act requires plans that hold investments in publicly traded employer securities to permit participants to diversify account balances invested in those securities by permitting the sale of some or all of those securities held in the Plan. Currently, the Company's 401(k) Plan holds approximately 665,000 shares of the Company's Common Stock. The amount of cash needed to fund the diversification will depend on the actual amount of shares that eligible participants elect to diversify. Under the Act, the Company must make arrangements for diversification by plan participants of approximately 351,000 shares (estimated at approximately \$3.5 million based on a stock price of \$10.00 per share) no later than the end of the first quarter of 2007, 157,000 shares (estimated at approximately \$1.6 million based on a stock price of \$10.00) by 2008, and another 157,000 shares (estimated at approximately \$1.6 million based on a stock price of \$10.00) in 2009. The Company is currently evaluating options available to fund this diversification.

Based on its current operating plan, the Company believes that its available sources of capital under its Revolving Credit Agreement and accounts receivable sales programs will be sufficient to meet its ongoing cash needs for the next twelve months.

Foreign Currency Fluctuations

Edgar Filing: Dorman Products, Inc. - Form 10-Q

In 2005, approximately 65% of the Company's products were purchased from a variety of foreign countries. The products generally are purchased through purchase orders with the purchase price specified in U.S. dollars. Accordingly, the Company does not have exposure to fluctuations in the relationship between the dollar and various foreign currencies between the time of execution of the purchase order and payment for the product. However, weakness in the dollar has resulted in some materials price increases and pressure from several foreign suppliers to increase prices further. To the extent that the dollar decreases in value to foreign currencies in the future or the present weakness in the dollar continues for a sustained period of time, the price of the product in dollars for new purchase orders may increase further.

Page 20 of 28

The Company makes significant purchases of product from Chinese vendors. Prior to 2005, the Chinese Yuan exchange rate had been fixed against the U.S. Dollar since 1998. In July 2005, the Chinese government announced an immediate 2% revaluation of the Yuan against the U.S. Dollar and that going forward it will allow the Yuan to fluctuate against a basket of currencies. Since that time the Yuan has strengthened another 2% against the U.S. Dollar. Most experts believe that the value of the Yuan will increase further relative to the U.S. Dollar over the next few years. Such a move would most likely result in an increase in the cost of products that are purchased from placecountry-regionChina.

Impact of Inflation

The Company has experienced increases in the cost of materials and transportation costs as a result of raw materials shortages and commodity price increases. These increases did not have a material impact on the Company. The Company believes that further cost increases could potentially be mitigated by passing along price increases to customers or through the use of alternative suppliers or resourcing purchases to other countries, however there can be no assurance that the Company will be successful in such efforts.

Related-Party Transactions

The Company has entered into a noncancelable operating lease for its primary operating facility from a partnership in which Richard N. Berman, the Company's Chief Executive Officer, and Steven L. Berman, the Company's Executive Vice President, are partners. Total rental payments in 2005 to the partnership under the lease arrangement were \$1.3 million.

Critical Accounting Policies

The Company's discussion and analysis of its financial condition and results of operations are based upon the consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities and the reported amounts of revenues and expenses. The Company regularly evaluates its estimates and judgments, including those related to revenue recognition, bad debts, customer credits, inventories, goodwill and income taxes. Estimates and judgments are based upon historical experience and on various other assumptions believed to be accurate and reasonable under the circumstances. Actual results may differ materially from these estimates under different assumptions or conditions. The Company believes the following critical accounting policies affect its more significant estimates and judgments used in the preparation of its consolidated financial statements:

Allowance for Doubtful Accounts. The preparation of the Company's

Edgar Filing: Dorman Products, Inc. - Form 10-Q

financial statements requires management to make estimates of the collectability of its accounts receivable. Management specifically analyzes accounts receivable and historical bad debts, customer creditworthiness, current economic trends and changes in customer payment patterns when evaluating the adequacy of the allowance for doubtful accounts. A significant percentage of the Company's accounts receivable has been, and will continue to be, concentrated among a

Page 21 of 28

relatively small number of automotive retailers and warehouse distributors in the United States. The Company's five largest customers accounted for 77% of net accounts receivable as of December 31, 2005 and December 25, 2004. A bankruptcy or financial loss associated with a major customer could have a material adverse effect on the Company's sales and operating results.

Revenue Recognition and Allowance for Customer Credits. Revenue is recognized from product sales when goods are shipped, title and risk of loss have been transferred to the customer and collection is reasonably assured. The Company records estimates for cash discounts, product returns and warranties, discounts and promotional rebates in the period of the sale ("Customer Credits"). The provision for Customer Credits is recorded as a reduction from gross sales and reserves for Customer Credits are shown as a reduction of accounts receivable. Amounts billed to customers for shipping and handling are included in net sales. Costs associated with shipping and handling are included in cost of goods sold. Actual Customer Credits have not differed materially from estimated amounts for each period presented.

Excess and Obsolete Inventory Reserves. Management must make estimates of potential future excess and obsolete inventory costs. The Company provides reserves for discontinued and excess inventory based upon historical demand, forecasted usage, estimated customer requirements and product line updates. The Company maintains contact with its customer base in order to understand buying patterns, customer preferences and the life cycle of its products. Changes in customer requirements are factored into the reserves as needed.

Goodwill. The Company follows the provisions of SFAS No. 142, "Goodwill and Other Intangible Assets". The Company employs a discounted cash flow analysis and a market comparable approach in conducting its impairment tests. Cash flows were discounted at 12% and an earnings multiple of 5.75 to 6.0 times EBITDA was used when conducting these tests in 2005. The Company has completed an impairment test required by SFAS No. 142, with respect to its Swedish subsidiary (Scan-Tech), the results of which are discussed in Note 4 of the Notes to Consolidated Financial Statements in this report.

Income Taxes. The Company follows the liability method of accounting for deferred income taxes. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year and for deferred tax liabilities and assets for the future tax consequences of events that have been recognized in an entity's financial statements or tax returns. The Company must make assumptions, judgments and estimates to determine its current provision for income taxes and also its deferred tax assets and liabilities and any valuation allowance to be recorded against a deferred tax asset. Management's judgments, assumptions and estimates relative to the current provision for income tax take into account current tax laws, its interpretation of current tax laws and possible outcomes of current and future audits conducted by tax authorities. Changes in tax laws or management's interpretation of tax laws and the resolution of current and future tax audits could significantly impact the amounts provided for income taxes in the Company's consolidated financial statements. Management's assumptions, judgments and estimates relative to the value of a deferred tax asset take into account predictions of the amount

Edgar Filing: Dorman Products, Inc. - Form 10-Q

and category of future taxable income. Actual operating results and the underlying amount and category of income in future years could render management's current assumptions, judgments and estimates of recoverable net deferred taxes inaccurate. Any of the assumptions, judgments and estimates mentioned above could cause the Company's actual income tax obligations to differ from its estimates.

Page 22 of 28

Recent Accounting Pronouncements

In June 2006, the Financial Accounting Standards Board (FASB) issued FIN 48, Accounting for Uncertainty in Income Taxes--an interpretation of FASB Statement No. 109, Accounting for Income Taxes, which clarifies the accounting for uncertainty in income taxes. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Interpretation requires that the Company recognize in the financial statements, the impact of a tax position, if that position is more likely than not of being sustained on audit, based on the technical merits of the position. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods and disclosure. The provisions of FIN 48 are effective beginning January 1, 2007 with the cumulative effect of the change in accounting principle recorded as an adjustment to opening retained earnings. The Company is currently evaluating the impact of adopting FIN 48 on the financial statements.

In May 2005, the FASB issued SFAS No. 154, "Accounting Changes and Error Corrections". SFAS No. 154 is a replacement of ABP No. 20 and FSAB Statement No. 3. SFAS No. 154 provides guidance on the accounting for and reporting of accounting changes and error corrections. It establishes retrospective application as the required method for reporting a change in accounting principle. SFAS No. 154 provides guidance for determining whether retrospective application of a change in accounting principle is impracticable and for reporting a change when retrospective application is impracticable. The reporting of a correction of an error by restating previously issued financial statements is also addressed by SFAS No. 154. SFAS No. 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. The adoption of this statement did not have an impact on the Company's consolidated financial condition or results of operations.

In December 2004, the FASB issued SFAS No. 151 "Inventory Costs, an Amendment of ARB No. 43, Chapter 4". SFAS No. 151 clarifies the accounting for abnormal amounts of idle facility expense, freight, handling costs and wasted material and requires that these items be recognized as current period charges. SFAS No. 151 applies only to inventory costs incurred during periods beginning after the effective date and also requires that the allocation of fixed production overhead to conversion costs be based on the normal capacity of the production facilities. SFAS No. 151 is effective for the Company's fiscal year beginning January 1, 2006. The adoption of this statement did not have a material effect on the results of operations.

In September 2006, the SEC Office of the Chief Accountant and Divisions of Corporation Finance and Investment Management released stocktickerSAB No. 108, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements," that provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. The SEC staff believes that registrants should quantify errors using both a

balance sheet and an income statement approach and evaluate whether either approach results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. This pronouncement is effective for fiscal years ending after November 15, 2006.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements." SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements. Accordingly, SFAS No. 157 does not require any new fair value measurements. The provisions of SFAS No. 157 are to be applied prospectively and are effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company is currently evaluating what effect, if any, adoption of SFAS No. 157 will have on the Company's consolidated results of operations and financial position.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

The Company's market risk is the potential loss arising from adverse changes in interest rates. With the exception of the Company's revolving credit facility, long-term debt obligations are at fixed interest rates and denominated in U.S. dollars. The Company manages its interest rate risk by monitoring trends in interest rates as a basis for determining whether to enter into fixed rate or variable rate agreements. Under the terms of the Company's revolving credit facility and customer-sponsored programs to sell accounts receivable, a change in either the lender's base rate or LIBOR would affect the rate at which the Company could borrow funds thereunder. The Company believes that the effect of any such change would be minimal.

Item 4. Controls and Procedures

Quarterly Evaluation of the Company's Disclosure Controls and Internal Controls Over Financial Reporting.

The Company evaluated the effectiveness of the design and operation of its "disclosure controls and procedures" as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Act"), as of the end of the period covered by this Form 10-Q ("Disclosure Controls"). This evaluation ("Disclosure Controls Evaluation") was done under the supervision and with the participation of the Company's management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO").

The Company's management, with the participation of the CEO and CFO, also conducted an evaluation of the Company's internal control over financial reporting, as defined in Rule 13a-15(f) of the Act, to determine whether any changes occurred during the fiscal quarter ended September 30, 2006 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Limitations on the Effectiveness of Controls

Control systems, no matter how well conceived and operated, are designed to provide a reasonable, but not an absolute, level of assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can

Edgar Filing: Dorman Products, Inc. - Form 10-Q

provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. The Company conducts periodic evaluation of its internal controls to enhance, where necessary, its procedures and controls.

Page 24 of 28

Conclusions

Based upon the Disclosure Controls Evaluation, the CEO and CFO have concluded that the Disclosure Controls are effective in reaching a reasonable level of assurance that (i) information required to be disclosed by the Company in the reports that it files or submits under the Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and (ii) information required to be disclosed by the Company in the reports that it files or submits under the Act is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in internal controls over financial reporting as defined in Rule 13a-15(f) of the Act that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is a party to or otherwise involved in legal proceedings that arise in the ordinary course of business, such as various claims and legal actions involving contracts, competitive practices, trademark rights, product liability claims and other matters arising out of the conduct of the Company's business. In the opinion of management, none of the actions, individually or in the aggregate, would likely have a material financial impact on the Company.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item A, Risk Factors" in the Company's Annual Report on Form 10-K for the year ended December 31, 2005, which could materially affect the Company's business, financial condition or future results. The risks described in the Company's Annual Report on Form 10-K are not the only risks facing the Company. Additional risks and uncertainties not currently known to the Company or that the Company currently deems to be immaterial also may materially adversely affect the Company's business, financial condition and/or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Not Applicable
