Freud Pozzo Uses Magic Software's iBOLT and eDeveloper to Integrate and Enhance its Internal Systems

Houten, The Netherlands, (February 2, 2005) - Magic Software Enterprises (Nasdaq: MGIC), a leading provider of state-of-the-art business integration and development technology, announced today that Freud Pozzo has chosen Magic iBOLT for a significant internal integration project. Freud Pozzo is one of the leading producers of tools for the woodworking industry.

With over forty years of experience, Freud Pozzo is renowned for its technologically advanced and innovative solutions, capable of resolving any problems related to the cutting or working of wood. They have chosen the iBOLT Integration Suite (www.magicsoftware.com/ibolt) as part of their integration program to better respond to their business needs and to provide timely information to the Management across this international company. The solution will interconnect their account systems to their production cycle, warehouses and sales force. This will allow their distributors to check product availability in real time. In addition, Freud Pozzo will improve and further customize its own existing applications, with the use of eDeveloper, a leading application development tool.

It is crucial for us to reduce complexities and cost, while working towards our goal of supplying real-time information to our client base and internal team, said Mr. Silvio Moretti, Freud Pozzo Project manager. Both iBOLT and eDeveloper will enable us to rapidly and cost-effectively create the kind of federated architecture needed to implement this strategy, while leveraging, rather than replacing, our current IT infrastructures.

We are very pleased to work with a market leader like Freud Pozzo which has taken the strategic decision to use iBOLT for their EAI and BPM needs, said Regev Yativ, Managing Director of Magic Software Europe. This deal with Freud Pozzo is a clear demonstration of iBOLT's ability to deliver complex integration solutions to global enterprises that will increase their productivity while preserving the existing infrastructure."

About Magic Software Enterprises
