Form 10-K  
February 28, 2012

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

FORM 10-K

(x) ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended: December 31, 2011  
OR

( ) TRANSITION REPORT PURSUANT TO SECTION 13 or 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number: 1-10026

ALBANY INTERNATIONAL CORP.  
(Exact name of registrant as specified in its charter)

<u>Delaware</u>	<u>14-0462060</u>
(State or other jurisdiction of incorporation or organization)	(IRS Employer Identification No.)

<u>216 Airport Drive, Rochester, New Hampshire</u>	<u>03867</u>
(Address of principal executive offices)	(Zip Code)

Registrant's telephone number, including area code 603-330-5850

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Class A Common Stock (\$0.001 par value)	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:

None  
(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. [ ]

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a small reporting company.

Large accelerated filer  Accelerated filer

Non-accelerated filer  Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes  No

The aggregate market value of the Common Stock held by non-affiliates of the registrant on June 30, 2011, the last business day of the registrant's most recently completed second quarter, computed by reference to the price at which Common Stock was last sold on such a date, was \$734.9 million.

The registrant had 28.1 million shares of Class A Common Stock and 3.2 million shares of Class B Common Stock outstanding as of December 31, 2011.

## Forward-Looking Statements

This annual report and the documents incorporated or deemed to be incorporated by reference in this annual report contain statements concerning future results and performance and other matters that are “forward-looking” statements within the meaning of Section 27A of the Securities Act and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). The words “believe,” “expect,” “anticipate,” “intend,” “plan,” “project,” “may,” “will,” and various such words or similar expressions are intended, but are not the exclusive means, to identify forward-looking statements. Because forward-looking statements are subject to risks and uncertainties, actual results may differ materially from those expressed or implied by the forward-looking statements.

There are a number of risks, uncertainties, and other important factors that could cause actual results to differ materially from the forward-looking statements, including, but not limited to:

- Conditions in the industries in which our Machine Clothing segment competes, including the paper industry, along with general risks associated with economic downturns;

- Failure to remain competitive in the industries in which our Machine Clothing segment competes;

- Failure to have achieved or maintain anticipated profitable growth in our Engineered Composites; and

- Other risks and uncertainties detailed in this report.

Further information concerning important factors that could cause actual events or results to be materially different from the forward-looking statements can be found in the “Risk Factors”, “Trends” and “Outlook” sections of this annual report. Statements expressing our assessments of the growth potential of the Engineered Composites segment are not intended as forecasts of actual future growth, and should not be relied on as such. While we believe such assessments to have a reasonable basis, such assessments are, by their nature, inherently uncertain. This report sets forth a number of assumptions regarding these assessments, including projected timing and volume of demand for aircraft and for LEAP aircraft engines. Such assumptions could prove incorrect. Although we believe the expectations reflected in our forward-looking statements are based on reasonable assumptions, it is not possible to foresee or identify all factors that could have a material and negative impact on our future performance. The forward-looking statements included or incorporated by reference in this annual report are made on the basis of our assumptions and analyses, as of the time the statements are made, in light of our experience and perception of historical conditions, expected future developments, and other factors believed to be appropriate under the circumstances.

Except as otherwise required by the federal securities laws, we disclaim any obligation or undertaking to publicly release any updates or revisions to any forward-looking statement contained or incorporated by reference in this annual report to reflect any change in our expectations with regard thereto or any change in events, conditions, or circumstances on which any such statement is based.

## PART I

### Item 1. BUSINESS

Albany International Corp. (the Registrant, the Company, we, us, or our) and its subsidiaries are engaged in three business segments.

During the third quarter of 2011, we announced plans to combine our Paper Machine Clothing and Engineered Fabrics operating and reporting segments into a single business segment. The combined segment will be referred to in this and future reports as “Machine Clothing”. This report presents separate segment results for Paper Machine Clothing and Engineered Fabrics through December 31, 2011, by which date these two groups had become fully integrated.

The Machine Clothing segment includes paper machine clothing - engineered fabrics and belts used in the manufacture of paper and paperboard – as well as engineered fabrics and belts used in many other industrial applications.

We design, manufacture, and market paper machine clothing for each section of the paper machine. We manufacture and sell more paper machine clothing worldwide than any other company. Paper machine clothing consists of large permeable and non-permeable continuous belts of custom-designed and custom-manufactured engineered fabrics that are installed on paper machines and carry the paper stock through each stage of the paper production process. Paper machine clothing products are consumable products of technologically sophisticated design that utilize polymeric materials in a complex structure. The design and material composition of paper machine clothing can have a considerable effect on the quality of paper products produced and the efficiency of the paper machines on which it is used. Principal products in the paper machine clothing segment include forming, pressing, and dryer fabrics, and process belts. A forming fabric assists in sheet formation and conveys the very wet sheet (more than 75% water) through the forming section. Press fabrics are designed to carry the sheet through the press section, where water is pressed from the sheet as it passes through the press nip. In the dryer section, dryer fabrics manage air movement and hold the sheet against heated cylinders to enhance drying. Process belts are used in the press section to increase dryness and enhance sheet properties, as well as in other sections of the machine to improve runnability and enhance sheet qualities.

The Machine Clothing segment also supplies consumable fabrics used to process paper pulp, as well as engineered fabrics used in a range of industries other than papermaking. These other products include belts used to make nonwovens, fiber cement building products, roofing shingles, and corrugated sheets used in boxboard, as well as belts used in tannery and textile applications.

We sell our Machine Clothing products directly to customer end-users, which include paper industry companies, nonwovens manufacturers, and building products companies, some of which operate in multiple regions of the world. Our products, manufacturing processes, and distribution channels for Machine Clothing are substantially the same in each region of the world in which we operate. The sales of forming, pressing, and dryer fabrics, individually and in aggregate, accounted for more than 10% of our consolidated net sales during one year or more of the last three years.

The Engineered Composites segment (AEC) provides custom-designed advanced composite structures based on proprietary technology to customers in the aerospace and defense industries. AEC’s largest current development program relates to the LEAP engine being developed by CFM International. Under this program, AEC is developing a

family of composite parts, including fan blades, to be incorporated into the LEAP engine under a long-term supply contract. In 2011, approximately 25% of this segment's sales were related to U.S. government contracts or programs.

The PrimaLoft® Products segment includes sales of insulation for outdoor clothing, gloves, footwear, sleeping bags, and home furnishings. This segment has sales operations in the United States, Europe, and Asia, through which it sells products produced by third parties according to the Company's proprietary specifications. This segment also generates a portion of its income as royalties from the licensing of its intellectual property. Approximately one-quarter of this segment's sales in each of the past two years has been to the U.S. military (for high-performance outerwear).

On October 28, 2011, the Company announced that it had entered into an agreement to sell the business and assets of its Albany Door Systems (ADS) segment to ASSA ABLOY AB. The sale transaction was completed on January 11, 2012. The ADS segment was engaged in the design, manufacture, sale, and service of high-speed, high-performance industrial doors worldwide, for a wide range of interior, exterior, and machine protection industrial applications. Details relating to the transaction are reported in Note 2 of Notes to Consolidated Financial Statements.

See "Business Environment and Trends" under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, for a discussion of general segment developments in recent years.

Following is a table of net sales by segment for 2011, 2010, and 2009.

(in thousands)	2011	2010	2009
Paper Machine Clothing	<b>\$657,569</b>	\$623,555	\$609,897
Engineered Fabrics	<b>81,642</b>	77,465	74,908
Engineered Composites	<b>48,076</b>	41,867	33,824
PrimaLoft® Products	<b>27,409</b>	22,882	18,992
Consolidated total	<b>\$814,696</b>	\$765,769	\$737,621

The table setting forth certain sales, operating income, and balance sheet data that appears in Note 3, "Reportable Segments and Geographic Data," of the Financial Statements, included under Item 8 of this Form 10-K, is incorporated herein.

## International Operations

We maintain manufacturing facilities in Brazil, Canada, China, France, Germany, Italy, Mexico, South Korea, Sweden, the United Kingdom, and the United States. We also have a 50% interest in a company in Russia (see Note 1 of Notes to Consolidated Financial Statements).

Our geographically diversified operations allow us to serve our markets efficiently and to provide extensive technical services to our customers. We benefit from the transfer of research and development and product innovations between geographic regions. The worldwide scope of our manufacturing and marketing efforts could also mitigate the impact of economic downturns that are limited to a geographic region.

Our global presence subjects us to certain risks, including controls on foreign exchange and the repatriation of funds. However, we have been able to repatriate current earnings in excess of working capital requirements from the countries in which we operate without substantial governmental restrictions and do not foresee any material changes in our ability to continue to do so in the future. In addition, we believe that the risks associated with our operations outside the United States are no greater than those normally associated with doing business in those locations.

## Technology, Working Capital, Customers, Seasonality, and Backlog

Machine Clothing is custom-designed for each user, depending on the type, size, and speed of the machine, and the products being produced. Product design is also a function of the machine section, the grade of product

6

being produced, and the quality of the stock used. Technical expertise, judgment, and experience are critical in designing the appropriate clothing for machine, position, and application. As a result, we employ highly skilled sales and technical service personnel who work directly with each customer's plant operating management. Our technical service programs give our service engineers field access to the measurement and analysis equipment needed for troubleshooting and application engineering in many areas. Sales, service, and technical expenses are major cost components of the Company. Many employees in sales and technical functions have engineering degrees, paper mill experience, or other manufacturing experience in the markets in which they operate. Our market leadership position reflects our commitment to technological innovation.

Payment terms granted to paper industry and other process machine clothing customers reflect general competitive practices. Terms vary with product, competitive conditions, and the country of operation. In some markets, customer agreements require us to maintain significant amounts of finished goods inventories to assure continuous availability of our products. Working capital and payment terms in our other segments follow normal commercial practices.

In addition to supplying paper companies, the Machine Clothing segment is a leading supplier to the nonwovens industry (which includes the manufacture of products such as diapers, personal care and household wipes, and fiberglass-reinforced roofing shingles), the wood and cement-based building products industry, and the pulp industry. These non-paper industries have a wide range of customers, with markets that vary from industrial applications to consumer use.

Albany Engineered Composites primarily serves customers in commercial and military aircraft engine and airframe markets.

PrimaLoft® Products are marketed to customers for use in performance outerwear, high-end retail home furnishings and military applications.

Seasonal trends resulting from paper mill downtime in July, August, and December, can contribute to lower quarterly sales of Machine Clothing in the first, third and fourth quarters of each calendar year. Seasonality is not a significant factor in the other markets served by the Machine Clothing segment, nor in the Engineered Composites segment. Although it enjoyed a strong fourth quarter in 2011, PrimaLoft® Products has traditionally experienced its strongest quarters in the first half of the year.

Total backlog was \$376.3 million, \$407.6 million, and \$354.3 million at December 31, 2011, 2010, and 2009, respectively. Inventory restocking by our Paper Machine Clothing customers led to a strong backlog position at the end of 2010. Backlogs at the end of 2011 were at more normal levels for paper machine clothing. The backlog is generally expected to be invoiced during the next 12 months.

## **Research and Development**

We invest in research, new product development, and technical analysis with the objective of maintaining our technological leadership in each business segment. While much research activity supports existing products, we also engage in research for new products and product enhancements. New product research has focused primarily on more sophisticated paper machine clothing and engineered fabrics and has resulted in a stream of new products and enhancements such as HYDROCROSS, AEROPOINT, SEAM HYDROCROSS, AEROPULSE, SEAMPLANE, KMX, and EVM BELTS.

Product engineering and research and development expenses totaled \$31.1 million in 2011, \$29.3 million in 2010, and \$28.2 million in 2009. In 2011, these costs were 3.8% of total company net sales, including \$6.0 million or about 12.4% of net sales spent in our AEC segment.

We conduct our major research and development in Halmstad, Sweden; Manchester, UK; Menasha, Wisconsin and Rochester, New Hampshire. Additionally, we conduct process and product design development activities at locations in Albany, New York; Quebec, Canada; Menasha, Wisconsin; and St. Stephen, South Carolina.

7

We have developed, and continue to develop, proprietary intellectual property. Our intellectual property takes many forms, including patents, trademarks, and trade secrets. Our trade secrets include, among other things, manufacturing know-how, and unique processes and equipment. We aggressively protect our proprietary intellectual property, pursuing patent protection when appropriate. Our active portfolio currently contains well over 2,100 patents, and more than 300 new patents are typically granted each year. Because intellectual property in the form of patents is published, we often decide to forgo patent protection and preserve some of our intellectual property as trade secrets. While we consider our total portfolio of intellectual property, including our patents, to be an important competitive advantage, we do not believe that any single patent is critical to the continuation of our business. All brand names and product names are trade names of Albany International Corp. or its subsidiaries. We have from time to time licensed some of our patents to one or more competitors, and have been licensed under some competitors' patents, in each case mainly to enhance customer acceptance of new products. The revenue from such licenses is less than 1% of consolidated net sales.

### **Raw Materials and Inventory**

Primary raw materials for our Machine Clothing and PrimaLoft® Products segments are synthetic fibers and polymer monofilaments, which have generally been available from a number of suppliers. Therefore, we have not needed to maintain raw material inventories in excess of our current needs to assure availability. In addition, we manufacture polymer monofilaments, a basic raw material for all types of Machine Clothing, at our facility in Homer, New York, which supplies approximately 50% of our worldwide monofilament requirements. This manufacturing enhances our ability to develop proprietary products and helps balance the total supply requirements for monofilaments. Polymer monofilaments are petroleum-based products and are therefore sensitive to changes in the price of petroleum and petroleum intermediates. Carbon fiber and other raw materials used by AEC are available from a number of suppliers, subject to material qualification requirements for specific programs.

### **Competition**

The industries in which our Machine Clothing segment competes includes several companies that compete in all global markets, along with other companies that compete primarily on a regional basis. In the paper machine clothing market, we believe that we had a worldwide market share of approximately 29% in 2011, while the two largest competitors each had a market share of approximately half of ours.

While some competitors in the Machine Clothing segment tend to compete more on the basis of price, and others attempt to compete more on the basis of technology, both are significant competitive factors in this industry. Some of the Company's paper machine clothing competitors also supply paper machines and papermaking equipment, and endeavor to compete by bundling clothing and equipment sales. We, like our competitors, provide technical support to customers through our sales and technical service personnel, including (1) consulting on performance of the machine, (2) consulting on machine configurations, both new and rebuilt, (3) selection and custom manufacture of the appropriate machine clothing, and (4) storing fabrics for delivery to the user. Revenues earned from these services are reflected in the prices charged for our products.

The primary competitive factor in the markets in which our Albany Engineered Composites segment competes is product performance. Our unique, proprietary capabilities in composites enable us to offer customers the opportunity to displace metal components and, in some cases, conventional composites with lower-weight, high-strength, and potentially high-temperature composites. Achieving lower weight without sacrificing strength is the key to improving fuel efficiency, and is a critical performance requirement in the aerospace industry.

In our PrimaLoft® Products segment, competitive success is dependent upon superior performance of the materials in each of the applications in which we compete.

## Employees

We employ approximately 4,300 persons, of whom approximately 72% are engaged in manufacturing our products. Wages and benefits are competitive with those of other manufacturers in the geographic areas in which our facilities are located. In general, we consider our relations with employees to be excellent.

Approximately 70 U.S. employees working at two different facilities are subject to two separate collective bargaining agreements. The agreement related to employees at the Menands, New York facility will remain in effect until mid-2014, while the agreement related to employees at the Menasha, Wisconsin facility will remain in effect until mid-2012. A number of hourly employees outside of the United States are also members of various unions.

## Executive Officers of the Registrant

The following table sets forth certain information with respect to the executive officers of the Company as of February 23, 2012:

Name	Age	Position
Joseph G. Morone	58	President and Chief Executive Officer
John B. Cozzolino	45	Chief Financial Officer and Treasurer
Ralph M. Polumbo	60	Senior Vice President Chief Operating Officer, Albany Engineered Composites
Daniel A. Halftermeyer	50	President Machine Clothing
Robert A. Hansen	54	Senior Vice President and Chief Technology Officer
David M. Pawlick	50	Vice President Controller
Charles J. Silva, Jr.	52	Vice President General Counsel and Secretary
Dawne H. Wimbrow	54	Vice President Global Information Services and Chief Information Officer
Joseph M. Gaug	48	Associate General Counsel and Assistant Secretary

*Joseph G. Morone* joined the Company in 2005. He has served the Company as President and Chief Executive Officer since January 1, 2006, and President since August 1, 2005. He has been a director of the Company since 1996. From 1997 to July 2005, he served as President of Bentley University in Waltham, Massachusetts. Prior to joining Bentley, he served as the Dean of the Lally School of Management and Technology at Rensselaer Polytechnic Institute, where he also held the Andersen Consulting Professorship of Management. He currently serves as the Presiding Director of Transworld Entertainment Corporation.

*John B. Cozzolino* joined the Company in 1994. He has served the Company as Chief Financial Officer and Treasurer since February 2011. From September 2010 to February 2011, he served as Vice President – Corporate Treasurer and Strategic Planning/Acting Chief Financial Officer, from February 2009 to September 2010, he served as Vice President – Corporate Treasurer and Strategic Planning, and from 2007 to February 2009, he served the Company as Vice President – Strategic Planning. From 2000 until 2007 he served as Director – Strategic Planning, and from 1994 to 2000 he served as Manager – Corporate Accounting.

*Ralph M. Polumbo* joined the Company in 2006. He has served as Chief Operating Officer, Albany Engineered Composites, since December 2010. He previously served the Company as Chief Administrative Officer (CAO) from September 2008 to December 2010, and as Senior Vice President – Human Resources from 2006 to 2008. From 2004 to April 2006 he served as Head of Human Capital for Deephaven Capital Management. From 1999 to 2004 he served as Vice President – Human Resources and Business Integration for MedSource Technologies. Prior to MedSource, he held the positions of Vice President – Integration and Vice President – Human Resources for Rubbermaid. From 1974 to 1994, he held various management and executive positions for The Stanley Works.

*Daniel A. Halftermeyer* joined the Company in 1987. He has served the Company as President – Machine Clothing since February 2012. He previously served the Company as President – Paper Machine Clothing and Engineered Fabrics from August 2011 to February 2012, as President – Paper Machine Clothing from January 2010 until August 2011, Group Vice President – Paper Machine Clothing Europe from 2005 to August 2008, Vice President and General Manager – North American Dryer Fabrics from 1997 to March 2005, and Technical Director – Dryer Fabrics from 1993 to 1997. He held various technical and management positions in St. Stephen, South Carolina, and Sélestat, France, from 1987 to 1993.

*Robert A. Hansen* joined the Company in 1981. He has served the Company as Senior Vice President and Chief Technology Officer since January 2010, Vice President – Corporate Research and Development from April 2006 to January 2010, and Director of Technical and Marketing – Europe Press Fabrics from 2004 to April 2006. From 2000 to 2004, he served as Technical Director – Press Fabrics, Göppingen, Germany. Previously he had the position of Technical Director in Dieren, The Netherlands, and had also held technical management and research and development positions in the Company’s Järvenpää, Finland, and Albany, New York facilities.

*David M. Pawlick* joined the Company in 2000. He has served the Company as Vice President – Controller since March 2008, and as Director of Corporate Accounting from 2000 to 2008. From 1994 to 2000 he served as Director of Finance and Controller for Ahlstrom Machinery, Inc. in Glens Falls, New York. Prior to 1994, he was employed as an Audit Manager for Coopers & Lybrand.

*Charles J. Silva Jr.* joined the Company in 1994. He has served the Company as Vice President – General Counsel and Secretary since 2002. He served as Assistant General Counsel from 1994 until 2002. Prior to 1994, he was an associate with Cleary, Gottlieb, Steen and Hamilton, an international law firm with headquarters in New York City.

*Dawne H. Wimbrow* joined the Company in 1993. She has served the Company as Vice President – Global Information Services and Chief Information Officer since September 2005. She previously served the Company in various management positions in the Global Information Systems organization. From 1980 to 1993, she worked as a consultant supporting the design, development, and implementation of computer systems for various textile, real estate, insurance, and law firms.

*Joseph M. Gaug* joined the Company in 2004. He has served the Company as Associate General Counsel since 2004 and as Assistant Secretary since 2006. Prior to 2004, he was a principal with McNamee, Lochner, Titus & Williams, P.C., a law firm located in Albany, New York.

We are incorporated under the laws of the State of Delaware and are the successor to a New York corporation originally incorporated in 1895, which was merged into the Company in August 1987 solely for the purpose of changing the domicile of the corporation. Upon such merger, each outstanding share of Class B Common Stock of the predecessor New York corporation was changed into one share of Class B Common Stock of the Company. References to the Company that relate to any time prior to the August 1987 merger should be understood to refer to the predecessor New York corporation.

Our Corporate Governance Guidelines, Business Ethics Policy, and Code of Ethics for the Chief Executive Officer, Chief Financial Officer, and Controller, and the charters of the Audit, Compensation, and Governance Committees of the Board of Directors are available at the Corporate Governance section of the Registrant's website ([www.albint.com](http://www.albint.com)).

Our current reports on Form 8-K, quarterly reports on Form 10-Q, and annual reports on Form 10-K are electronically filed with the Securities and Exchange Commission (SEC), and all such reports and amendments to such reports filed subsequent to November 15, 2002, have been and will be made available, free of charge, through our website (www.albint.com) as soon as reasonably practicable after such filing. The public may read and copy any materials filed by the Company with the SEC at the SEC's Public Reference Room at 450 Fifth Street, NW, Washington, D.C. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC0330. The SEC maintains a website (www.sec.gov) that contains reports, proxy, information statements, and other information regarding issuers that file electronically with the SEC.

#### **Item 1A. RISK FACTORS**

*The Company's business, operations, and financial condition are subject to various risks. Some of these risks are described below and in the documents incorporated by reference, and investors should take these risks into account in evaluating any investment decision involving the Company. This section does not describe all risks applicable to the Company, its industry or business, and it is intended only as a summary of certain material factors.*

#### ***There are a number of factors inhibiting revenue growth in the Company's Machine Clothing segment***

Significant consolidation and rationalization in the paper industry in recent years has reduced global consumption of paper machine clothing in certain markets. Developments in digital media have adversely affected demand for newsprint and for printing and writing grades of paper in North America and Europe, which has had, and could continue to have, an adverse effect on demand for paper machine clothing in those markets. At the same time, technological advances in papermaking, including in paper machine clothing, while contributing to the papermaking efficiency of customers, have in some cases lengthened the useful life of our products and reduced the number of pieces required to produce the same volume of paper. These factors have had, and in future are likely to have, an adverse effect on paper machine clothing sales, and to keep the rate of any future growth in paper machine clothing sales lower than the rate of growth in paper production.

The market for paper machine clothing in recent years has been characterized by increased price competition, especially in Europe, which negatively affected our net sales and operating results. We expect price competition to remain intense in all paper machine clothing markets, especially during periods of customer consolidation, plant closures, or when major contracts are being renegotiated.

The basic papermaking process, while it has undergone dramatic increases in efficiency and speed, has always relied on paper machine clothing. In the event that a paper machine builder or other person was to develop a commercially viable manner of paper manufacture that did not require paper machine clothing, sales of our products in this segment could be expected to decline significantly. A significant decline in Machine Clothing sales and operating income could have an adverse impact on the Company's ability to fund the growth of Albany Engineered Composites.

***Some of the Company's competitors in the Machine Clothing segment have the capability to make and sell paper machines and papermaking equipment as well as other engineered fabrics***

Although customers historically have tended to view the purchase of paper machine clothing and the purchase of paper machines as separate purchasing decisions, the ability to coordinate research and development efforts, and to market machines and fabrics together, could provide a competitive advantage. This underscores the importance of our ability to maintain the technological competitiveness and value of our products, and a failure to do so could have a material adverse effect on our business, financial condition, and results of operations.

Moreover, we cannot predict how the nature of competition in this segment may continue to evolve as a result of future consolidation among our competitors, or consolidation involving our competitors and other suppliers to our customers.

***The Standish family has a significant influence on our Company and could prevent transactions that might be in the best interests of our other stockholders***

As of December 31, 2011, J. Spencer Standish and related persons (including Christine L. Standish and John C. Standish, both directors of the Company) and Thomas R. Beecher Jr., as sole trustee of trusts for the benefit of descendants of J. Spencer Standish, held in the aggregate shares entitling them to cast approximately 54% of the combined votes entitled to be cast by all stockholders of the Company. The Standish family has significant influence over the management and affairs of the Company and matters requiring stockholder approval, including the election of directors and approval of significant corporate transactions. The Standish family currently has, in the aggregate, sufficient voting power to elect all of our directors and determine the outcome of any shareholder action requiring a majority vote. This could have the effect of delaying or preventing a change in control or a merger, consolidation, or other business combination at a premium price, even though it might be in the best interest of our other stockholders.

***We are a “controlled company” within the meaning of the Corporate Governance Rules of the New York Stock Exchange (the “NYSE”) and qualify for, and rely on, certain exemptions from corporate governance requirements applicable to other listed companies***

As a result of the greater than 50% voting power of the Standish family described above, we are a “controlled company” within the meaning of the rules of the NYSE. Therefore, we are not required to comply with certain corporate governance rules that would otherwise apply to us as a listed company on the NYSE. Specifically, we have elected to avail ourselves of the provision exempting a controlled company from the requirement that the Board of Directors include a majority of “independent” directors (as defined by the rules of the NYSE) and the requirement that the Compensation and Governance Committees each be composed entirely of “independent” directors. Should the interests of the Standish family differ from those of other stockholders, the other stockholders would not be afforded such protections as might otherwise exist if our Board of Directors, or these Committees, were controlled by directors who were independent of the Standish family or our management.

***There can be no assurance that the expected sales growth in the Engineered Composites segment will be realized***

The expected size and steep growth rate of the market for LEAP engines will put significant growth pressure on AEC in the short- and medium-term. In the short term, AEC must fulfill critical product and process design and test milestones, establish key elements of the supply chain, begin construction of the first LEAP composites plant, and continue to hire and train employees required to staff the LEAP operation. In the medium-term, AEC will be required to ramp up these new operations to full production. AEC’s ability to realize the full growth potential of the LEAP program will depend on how effectively it accomplishes these goals.

Future growth and long-term success of AEC beyond the LEAP program will depend, in part, on the success of new commercial and military aircraft programs. AEC is currently working with customers on projects to supply components for a number of commercial, general aviation, and military aircraft programs. AEC may not be successful in obtaining contracts, or may not be successful in the execution of contracts it obtains.

In cases in which AEC secures contracts, cancellation, reductions, or delays of orders or contracts by our customers in any of these programs, including the LEAP program, could also have a material adverse effect on revenues and

12

earnings in this segment in any period. Such events could also result in the write-off of deferred charges that have been accumulated in anticipation of future revenue streams.

***Conditions in the paper industry have required, and could further require, the Company to reorganize its operations, which could result in significant expense and could pose risks to the Company's operations***

During the last several years, we have engaged in significant restructuring that included the closing of a number of manufacturing operations in North America, Europe, and Australia. These restructuring activities were intended to match manufacturing capacity to shifting global demand, and also to improve the efficiency of manufacturing and administrative processes. Future shifting of customer demand, the need to reduce costs, or other factors could cause us to determine in the future that additional restructuring steps are required. Restructuring involves risks such as employee work stoppages, slowdowns, or strikes, which can threaten uninterrupted production, maintenance of high product quality, meeting of customers' delivery deadlines, and maintenance of administrative processes. Increases in output in remaining manufacturing operations can likewise impose stress on these remaining facilities as they undertake the manufacture of greater volume and, in some cases, a greater variety of products. Competitors can be quick to attempt to exploit these situations. Although we consider these risks, plan each step of the process carefully, and work to reassure customers who could be affected by any such matters that their requirements will continue to be met, we could lose customers and associated revenues if we fail to plan properly, or if the foregoing tactics are ineffective.

***The Company may experience supply constraints due to a limited number of suppliers of certain raw materials***

There are a limited number of suppliers of polymer fiber and monofilaments, key raw materials used in the manufacture of Machine Clothing, and of carbon fiber and carbon resin, key raw materials used by Albany Engineered Composites. For our Machine Clothing production in Europe and Asia, we purchase most of our monofilament from third parties. For our Machine Clothing production in North America, we currently produce a significant portion of our own monofilament needs. While we have always been able to meet our raw material needs, the limited number of producers of these materials creates the potential for disruptions in supply. Lack of supply, delivery delays, or quality problems relating to supplied raw materials could harm our production capacity and make it difficult to supply our customers with products on time, which could have a negative impact on our business, financial condition, and results of operations.

***The recent recession had a significant impact on our customers and our business during 2008 and 2009; a recurrence, or lingering effects of general economic uncertainty, could negatively affect our customers and adversely affect our results of operations***

The global recession had a significant negative effect on the Company and the markets in which it competes, and recent forecasts have increased concerns about stagnating or contracting economies in Europe. A return of economic weakness, or a reversal or weakening of the current economic recovery, could have an adverse impact on the Company's business and results of operations.

The Company identifies in this section a number of risks, the effects of which may be exacerbated by an unfavorable economic climate. For example, unfavorable global economic and paper industry conditions may lead to greater consolidation and rationalization within the paper industry, further reducing global consumption of paper machine clothing. Reduced consumption of paper machine clothing could in turn increase the risk of greater price competition within the paper machine clothing industry, and greater efforts by competitors to gain market share at the expense of the Company. Sales of the Company's other Machine Clothing products, as well as in the Company's other business segments, may also be adversely affected by unfavorable economic conditions.

Weak or unstable economic conditions also increase the risk that one or more of our customers could be unable to pay outstanding accounts receivable, whether as the result of bankruptcy or an inability to obtain working capital financing from banks or other lenders. In such a case, we could be forced to write off such accounts, which could have a material adverse effect on our operating results, financial condition, and/or liquidity. Furthermore, many of our businesses design and manufacture products that are custom-designed for a specific customer application, at a

specific location. In the event of a customer liquidity issue, the Company could also be required to write off amounts that are included in inventories.

***Inflation as a result of changes in prices of commodities and labor costs may adversely impact our financial results of operations.***

The Company is a significant user of petroleum-based products and metal components required for the manufacture of our products. The Company also relies on the labor market in many regions of the world to meet our operational requirements. Increases in the prices of such commodities or in labor costs, particularly in regions that are experiencing higher-levels of inflation, could increase our costs, and we may not be able to fully offset the effects through price increases, productivity improvements, and cost-reduction programs.

***Fluctuations in currency exchange rates could adversely affect the Company's business, financial condition, and results of operations***

We operate our business in many regions of the world, and currency rate movements can have a significant effect on operating results. Changes in exchange rates can result in revaluation gains and losses that are recorded in Selling, Technical, General and Research expenses or Other income/expense, net. Revaluation gains and losses occur when our business units have intercompany or third-party trade receivable or payable balances in a currency other than their local reporting (or functional) currency. Operating results can also be affected by the translation of sales and costs, for each non-U.S. subsidiary, from the local functional currency to the U.S. dollar. The translation effect on the income statement is dependent on our net income or expense position in each non-U.S. currency in which we do business. A net income position exists when sales realized in a particular currency exceed expenses paid in that currency; a net expense position exists if the opposite is true.

***The Company may fail to adequately protect its proprietary technology, which would allow competitors or others to take advantage of its research and development efforts***

Proprietary trade secrets are a source of competitive advantage in each of our segments. If our trade secrets were to become available to competitors, it could have a negative impact on our competitive strength. We employ measures to maintain the confidential nature of these secrets, including maintaining employment and confidentiality agreements; maintaining clear policies intended to protect such trade secrets; educating our employees about such policies; clearly identifying proprietary information subject to such agreements and policies; and vigorously enforcing such agreements and policies. Despite such measures, our employees, consultants, and third parties to whom such information may be disclosed in the ordinary course of our business may breach their obligations not to reveal such information, and any legal remedies available to us may be insufficient to compensate our damages.

***At December 31, 2011, the Company had outstanding long-term debt totaling \$373.1 million. The Company may not be able to repay its outstanding debt in the event that default provisions are triggered due to a breach of loan covenants***

Existing borrowing agreements contain a number of covenants and financial ratios that the Company is required to satisfy. The most restrictive of these covenants pertain to prescribed leverage and interest coverage ratios and asset dispositions. Any breach of any such covenants or restrictions would result in a default under such agreements that would permit the lenders to declare all borrowings under such agreements to be immediately due and payable and, through cross-default provisions, could entitle other lenders to accelerate their loans. In such an event, the Company would need to modify or restructure all or a portion of such indebtedness. Depending on prevailing economic conditions at the time, the Company might find it difficult to modify or restructure on attractive terms, or at all.

We may incur a substantial amount of additional indebtedness in the future. As of December 31, 2011, we had borrowed \$187.0 million under our \$390 million revolving credit facility. Incurrence of additional indebtedness could increase the risks associated with higher leverage. These risks include limiting our ability to make acquisitions or capital expenditures to grow our business, limiting our ability to withstand business and economic downturns, limiting our ability to invest operating cash flow in our business, and limiting our ability to pay dividends. In addition, any such indebtedness could contain terms that are more restrictive than our current facilities.

Almost all of our long-term indebtedness is located in the United States. While we have been successful in recent years bringing significant amounts of cash into the United States to pay down indebtedness in a cost-effective manner, we continue to generate substantial cash offshore, and we may not be as successful in future periods identifying cost-effective strategies for the repatriation of such cash.

***The Company must successfully maintain and/or upgrade its information technology systems***

We rely on various information technology systems to manufacture and ship our products, manage our assets, inventory and employees, process business transactions, prepare financial and other reports, and conduct other business functions that are critical to our operations. We recently completed a multi-year process of Company-wide modifications and upgrades to our systems, including the replacement of legacy systems, modifications to legacy systems, and the acquisition of new systems with new functionality. Despite these efforts, we may be subject to system failures or disruptions due to power failures, interruptions in telecommunications, natural disasters, viral attacks, or other similar events. Measures that we have adopted to mitigate these risks may, despite our efforts, prove to be ineffective in addressing such failures or disruptions, which could have a materially adverse effect on our ability to conduct these critical business functions.

***The Company is subject to legal proceedings and legal compliance risks, and has been named as defendant in a large number of suits relating to the actual or alleged exposure to asbestos-containing products***

We are subject to a variety of legal proceedings. Pending proceedings that the Company determines are material are disclosed in Item 3, Legal Proceedings, of this annual report. Litigation is an inherently unpredictable process and unanticipated negative outcomes are always possible. An adverse outcome in any period could have an adverse impact on the Company's operating results for that period.

We are also subject to a variety of legal compliance risks. While we believe that we have adopted appropriate risk management and compliance programs, the global and diverse nature of our operations means that legal compliance risks will continue to exist and related legal proceedings and other contingencies, the outcome of which cannot be predicted with certainty, are likely to arise from time to time. Failure to resolve successfully any legal proceedings related to compliance matters could have an adverse impact on our results in any period.

***Changes in performance of pension plan assets and assumptions used to estimate our pension and postretirement benefit costs and liabilities could adversely affect our liabilities and net income***

We have pension and postretirement benefit costs and liabilities that are developed from actuarial valuations. As of December 31, 2011, liabilities under our defined benefit pension plans exceeded plan assets by \$101.2 million (\$38.5 million for the U.S. plan, \$62.7 million for non-U.S. plans). Additionally, the liability for unfunded postretirement welfare benefits, principally in the United States, totaled \$79.0 million.

In the first quarter of 2012, we disclosed plans to fund and, in some areas, permanently settle part of our global pension liabilities. Our target is to have this plan substantially completed by the end of the second quarter of 2012. We expect that, upon completion of the plan, global unfunded pension liabilities will decline to approximately \$30 million. Implementation of these plans could result in pension settlement charges as high as \$130 million in 2012.

While annual pension expense associated with these plans, as well as annual cash contributions, should decline significantly, these amounts remain subject to a number of variables, including discount rates and return on plan assets, actuarial assumptions, and differences between actuarial assumptions and actual future experience. Weakness in investment returns on plan assets, changes in discount rates or actuarial assumptions, and actual future experience could result in higher benefit plan expense and the need to increase pension plan contributions in

future years, which could have a material effect on our financial condition and results of operations in the periods in which they occur.

***The Company is exposed to the risk of increased expense in health-care related costs***

We are largely self-insured for some employee and business risks, including health care and workers' compensation programs in the United States. Losses under all of these programs are accrued based upon estimates of the ultimate liability for claims reported and an estimate of claims incurred but not reported, with assistance from third-party actuaries and service providers. However, these liabilities are difficult to assess and estimate due to unknown factors, including the severity of an illness or injury and the number of incidents not reported. The accruals are based upon known facts and historical trends, and management believes such accruals to be adequate. The Company also maintains stop-loss insurance policies to protect against catastrophic claims above certain limits. If actual results significantly differ from estimates, our financial condition, results of operations, and cash flows could be materially impacted by losses under these programs, as well as higher stop-loss premiums in future periods.

***Changes in or interpretations of tax rules, structures, country profitability mix, and regulations may adversely affect our effective tax rates***

We are a United States-based multinational company subject to tax in the United States and foreign tax jurisdictions. Unanticipated changes in our tax rates, or tax policies of the countries in which we operate, could affect our future results of operations. Our future effective tax rates could be unfavorably affected by changes in or interpretation of tax rules and regulations in the jurisdictions in which we do business, by structural changes in the Company's businesses, by unanticipated decreases in the amount of revenue or earnings in countries with low statutory tax rates, or by changes in the valuation of our deferred tax assets and liabilities.

***The Company has substantial deferred tax assets that could become impaired and result in a charge to earnings***

The Company has a net deferred tax asset in several tax jurisdictions, including a U.S. asset of approximately \$81.9 million at December 31, 2011. Realization of this and other deferred tax assets is dependent upon many factors, including generation of future income in specific countries. Lower than expected operating results, organizational changes, or changes in tax laws could result in those deferred tax assets becoming impaired, thus resulting in a charge to earnings.

***Our business could be adversely affected by adverse outcomes of pending tax matters***

The Company is currently under audit in U.S. and non-U.S. taxing jurisdictions, and the Company's positions on certain tax matters are being contested by tax authorities in those countries. (These matters are discussed in Note 7 of Notes to Consolidated Financial Statements.) While the Company believes that its positions are correct and that it has reserved adequately for such matters, a final adverse outcome with respect to one or more of these matters could have a material adverse impact on the Company's results in any period in which they occur.

***The Company's insurance coverage may be inadequate to cover other significant risk exposures***

In addition to asbestos-related claims, the Company may be exposed to other liabilities related to the products and services we provide. AEC is engaged in designing, developing, and manufacturing components for commercial jet aircraft and defense and technology systems and products. We expect this portion of the business to grow in future periods. Although we maintain insurance for the risks associated with this business, there can be no assurance that the amount of our insurance coverage will be adequate to cover all claims or liabilities. In addition, there can be no assurance that insurance coverage will continue to be available to us in the future at a cost that is acceptable. Any

material liability not covered by insurance could have a material adverse effect on our business, financial condition, and results of operations.

***In addition to the general risks that the Company already faces outside the U.S., the Company now conducts more of its manufacturing operations in emerging markets than it did in the past, which could involve many uncertainties***

We currently have manufacturing facilities outside the U.S. In 2011, 60.2% of consolidated net sales were generated by our non-U.S. subsidiaries. Operations outside of the U.S. are subject to a number of risks and uncertainties, including: governments may impose limitations on our ability to repatriate funds; governments may impose withholding or other taxes on remittances and other payments from our non-U.S. operations, or the amount of any such taxes may increase; an outbreak or escalation of any insurrection or armed conflict may occur; governments may seek to nationalize our assets; or governments may impose or increase investment barriers or other restrictions affecting our business. In addition, emerging markets pose other uncertainties, including the protection of our intellectual property, pressure on the pricing of our products, and risks of political instability. The occurrence of any of these conditions could disrupt our business or prevent us from conducting business in particular countries or regions of the world.

***The Company is subject to laws and regulations worldwide, changes to which could increase our costs and have a material adverse effect on our financial condition or results of operations***

The Company is subject to laws and regulations relating to employment practices and benefits, taxes, import and export matters, corruption, foreign-exchange controls, competition, workplace health and safety, intellectual property, health-care, the environment and other areas. These laws and regulations have a significant impact on our domestic and international operations.

We incur significant expenses to comply with laws and regulations. Changes or additions to laws and regulations, including those related to climate change, could increase these expenses, which could have an adverse impact on our financial condition and results of operations. Such changes could also have an adverse impact on our customers and suppliers, which in turn could adversely impact the Company.

While we have implemented policies and training programs designed to ensure compliance, there can be no assurance that our employees or agents will not violate such laws, regulations or policies, which could have a material adverse impact on our financial condition or results of operations.

#### **Item 1B. UNRESOLVED STAFF COMMENTS**

None.

#### **Item 2. PROPERTIES**

Our principal manufacturing facilities are located in Brazil, Canada, China, France, Germany, Italy, Mexico, South Korea, Sweden, the United Kingdom, and the United States. The aggregate square footage of our operating facilities in the United States and Canada is approximately 2.1 million square feet, of which 1.9 million square feet are owned and 0.2 million square feet are leased. Our facilities located outside the United States and Canada comprise approximately 3.1 million square feet, of which 3.0 million square feet are owned and 0.1 million square feet are leased. We consider these facilities to be in good condition and suitable for our purpose. The capacity associated with these facilities is adequate to meet production levels required and anticipated through 2012.

#### **Item 3. LEGAL PROCEEDINGS**

**Asbestos Litigation**

17

Albany International Corp. is a defendant in suits brought in various courts in the United States by plaintiffs who allege that they have suffered personal injury as a result of exposure to asbestos-containing products that we previously manufactured. We produced asbestos-containing paper machine clothing synthetic dryer fabrics marketed during the period from 1967 to 1976 and used in certain paper mills. Such fabrics generally had a useful life of three to twelve months.

We were defending 4,427 claims as of January 30, 2012.

The following table sets forth the number of claims filed, the number of claims settled, dismissed or otherwise resolved, and the aggregate settlement amount paid each year since 2005:

Year ended December 31,	<i>Opening Number of Claims</i>	Claims Dismissed, Settled, or Resolved	<i>New Claims</i>	Closing Number of Claims	Amounts Paid to Settle or Resolve (000's)
2005	29,411	6,257	1,297	24,451	\$ 504
2006	24,451	6,841	1,806	19,416	3,879
2007	19,416	808	190	18,798	15
2008	18,798	523	110	18,385	52
2009	18,385	9,482	42	8,945	88
2010	8,945	3,963	188	5,170	159
2011	5,170	789	65	4,446	1,111
2012 to date	4,446	25	6	4,427	\$ 338

We anticipate that additional claims will be filed against the Company and related companies in the future, but are unable to predict the number and timing of such future claims.

Exposure and disease information sufficiently meaningful to estimate a range of possible loss of a particular claim is typically not available until late in the discovery process, and often not until a trial date is imminent and a settlement demand has been received. For these reasons, we do not believe a meaningful estimate can be made regarding the range of possible loss with respect to pending or future claims.

While we believe we have meritorious defenses to these claims, we have settled certain claims for amounts we consider reasonable given the facts and circumstances of each case. Our insurer, Liberty Mutual, has defended each case and funded settlements under a standard reservation of rights. As of January 30, 2012, we had resolved, by means of settlement or dismissal, 36,305 claims. The total cost of resolving all claims was \$8,453,500. Of this amount, almost 100% was paid by our insurance carrier. The Company has approximately \$130 million in confirmed insurance coverage that should be available with respect to current and future asbestos claims, as well as additional insurance coverage that we should be able to access.

Brandon Drying Fabrics, Inc. ("Brandon"), a subsidiary of Geschmay Corp., which is a subsidiary of the Company, is also a separate defendant in many of the asbestos cases in which Albany is named as a defendant. Brandon was defending against 7,878 claims as of January 30, 2012.

The following table sets forth the number of claims filed against Brandon, the number of Brandon claims settled, dismissed or otherwise resolved, and the aggregate settlement amount paid to resolve Brandon claims each year since 2005:

Year ended December 31,	Opening Number of Claims	Claims Dismissed, Settled, or Resolved	<i>New Claims</i>	Closing Number of Claims	Amounts Paid to Settle or Resolve (000's)
2005	9,985	642	223	9,566	0
2006	9,566	1,182	730	9,114	0
2007	9,114	462	88	8,740	0
2008	8,740	86	10	8,664	0
2009	8,664	760	3	7,907	0
2010	7,907	47	9	7,869	0
2011	7,869	3	11	7,877	0
2012 to date	7,877	0	1	7,878	0

We acquired Geschmay Corp., formerly known as Wangner Systems Corporation, in 1999. Brandon is a wholly owned subsidiary of Geschmay Corp. In 1978, Brandon acquired certain assets from Abney Mills (“Abney”), a South Carolina textile manufacturer. Among the assets acquired by Brandon from Abney were assets of Abney’s wholly owned subsidiary, Brandon Sales, Inc. which had sold, among other things, dryer fabrics containing asbestos made by its parent, Abney. Although Brandon manufactured and sold dryer fabrics under its own name subsequent to the asset purchase, none of such fabrics contained asbestos. Because Brandon did not manufacture asbestos-containing products, and because it does not believe that it was the legal successor to, or otherwise responsible for obligations of Abney with respect to products manufactured by Abney, it believes it has strong defenses to the claims that have been asserted against it. As of January 30, 2012, Brandon has resolved, by means of settlement or dismissal, 9,721 claims for a total of \$0.2 million. Brandon’s insurance carriers initially agreed to pay 88.2% of the total indemnification and defense costs related to these proceedings, subject to the standard reservation of rights. The remaining 11.8% of the costs had been borne directly by Brandon. During 2004, Brandon’s insurance carriers agreed to cover 100% of indemnification and defense costs, subject to policy limits and the standard reservation of rights, and to reimburse Brandon for all indemnity and defense costs paid directly by Brandon related to these proceedings.

For the same reasons set forth above with respect to Albany’s claims, as well as the fact that no amounts have been paid to resolve any Brandon claims since 2001, we do not believe a meaningful estimate can be made regarding the range of possible loss with respect to these remaining claims.

In some of these asbestos cases, the Company is named both as a direct defendant and as the “successor in interest” to Mount Vernon Mills (“Mount Vernon”). We acquired certain assets from Mount Vernon in 1993. Certain plaintiffs allege injury caused by asbestos-containing products alleged to have been sold by Mount Vernon many years prior to this acquisition. Mount Vernon is contractually obligated to indemnify the Company against any liability arising out of such products. We deny any liability for products sold by Mount Vernon prior to the acquisition of the Mount Vernon assets. Pursuant to its contractual indemnification obligations, Mount Vernon has assumed the defense of these claims. On this basis, we have successfully moved for dismissal in a number of actions.

Although we do not believe, based on currently available information and for the reasons stated above, that a meaningful estimate of a range of possible loss can be made with respect to such claims, based on our understanding of the insurance policies available, how settlement amounts have been allocated to various policies, our settlement experience, the absence of any judgments against the Company or Brandon, the ratio of paper mill claims to total claims filed, and the defenses available, we currently do not anticipate any material liability relating to the resolution of the aforementioned pending proceedings in excess of existing insurance limits. Consequently, we currently do not anticipate, based on currently available information, that the ultimate resolution of the aforementioned proceedings will have a material adverse effect on the financial position, results of operations, or cash flows of the Company. Although we cannot predict the number and timing of future claims, based on the foregoing factors and the trends in claims against us to date, we do not anticipate that additional claims likely to be filed against us in the future will have a material adverse effect on our financial position, results of operations, or cash flows. We are aware that litigation is inherently uncertain, especially when the outcome is dependent primarily on determinations of factual matters to be made by juries.

### **NAFTA Audits**

The Company's affiliate in Mexico was notified in November 2010 that Mexican customs authorities expected to issue demands for duties on certain imports of Paper Machine Clothing from the Company and the Company's affiliate in Canada for which the Company has claimed duty-free treatment under the North American Free Trade Agreement ("NAFTA").

The notices result from a decision by the Mexican Servicio de Administración Tributaria ("SAT") to invalidate NAFTA certificates provided by the Company on products shipped to its Mexican affiliate during the years 2006 through 2008. The Demand Notices arose from an SAT audit during 2010, at the conclusion of which the SAT determined that the Company had failed to provide documentation sufficient to show that the certificates were validly issued, and declared the certificates issued during this period to be invalid. The Company believes that the certificates of origin were valid and properly issued and therefore commenced administrative appeals with SAT disputing its resolutions. While these appeals were pending, SAT revoked its earlier declarations of invalidation with respect to the certificates of origin at issue in 28 of the 36 open audits, and ordered a further review of such certificates. SAT is still considering the Company's appeal with regard to the remaining 8 open audits. The import duties identified in the notices sent to the Company's Mexican affiliate are approximately US \$2.5 million, and relate to only a portion of the shipments covered by the certificates of origin initially invalidated by SAT.

In the event of an adverse ruling at the conclusion of the administrative appeal process, the Company would have an opportunity to appeal the outcome in Mexican Tax Court, during which it would have an opportunity to present evidence to establish that the shipments in question were of U.S. and Canadian origin and entitled to the benefits of NAFTA. As all of the shipments covered by the invalidated certificates were, in fact, of U.S. or Canadian origin, the Company expects that it will be able to demonstrate that the certificates were validly issued. The Company has been advised by counsel that, if this is the case, then the Tax Court is likely to revoke any pending SAT invalidation actions and rule in favor of the Company.

In the unlikely event that the Company were not to prevail, however, then it could become subject to additional demand notices for the balance of the shipments during the period from 2006 through 2008 covered by the invalidated certificates. If such demand notices were to be issued for all the shipments so covered, then the Company could be liable for duties aggregating between \$8.0 and \$10.0 million. The Company has also been advised by counsel that SAT would likely seek additional antidumping duties and penalties which could increase these amounts by up to 900%, but that the possibility that SAT would succeed in obtaining such additional duties and penalties is remote. The

Company also does not believe that it faces any material risk of certificates being invalidated with respect to any period other than the 2006 through 2008 audit period. For this reason, the Company

does not feel that this matter is likely to have a material adverse effect on the Company's financial position, results of operations and cash flows.

Item 4. MINE SAFETY DISCLOSURES

None.

21

## PART II

**Item 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock is principally traded on the New York Stock Exchange under the symbol AIN. As of December 31, 2011, there were approximately 6,600 beneficial owners of our common stock, including employees owning shares through our 401(k) defined contribution plan. Our cash dividends and the high and low common stock prices per share were as follows:

<b>Quarter Ended</b>	<b>March 31</b>	<b>June 30</b>	<b>September 30</b>	<b>December 31</b>
<b>2011</b>				
Cash dividends per share	\$0.12	\$0.13	\$0.13	\$0.13
Class A Common Stock prices:				
High	\$25.09	\$27.90	\$27.68	\$25.70
Low	\$21.84	\$23.54	\$17.82	\$17.24
<b>2010</b>				
Cash dividends per share	\$0.12	\$0.12	\$0.12	\$0.12
Class A Common Stock prices:				
High	\$23.27	\$25.73	\$20.89	\$25.62
Low	\$18.32	\$16.00	\$15.06	\$18.68

Restrictions on dividends and other distributions are described in Note 12 of the Notes to Consolidated Financial Statements (see Item 8).

Disclosures of securities authorized for issuance under equity compensation plans and the performance graph are included under Item 12 of this Form 10-K.

In August 2006, we announced that the Board of Directors authorized management to purchase up to 2 million additional shares of our Class A Common Stock. The Board's action authorized management to purchase shares from time to time, in the open market or otherwise, whenever it believes such purchase to be advantageous to our shareholders, and it is otherwise legally permitted to do so. Management has made no share purchases under that authorization.

Item 6. SELECTED FINANCIAL DATA

The following selected historical financial data have been derived from our Consolidated Financial Statements (see Item 8). The data should be read in conjunction with those financial statements and Management's Discussion and Analysis of Financial Condition and Results of Operations (see Item 7).

(in thousands, except per share amounts)	2011	2010	2009	2008	2007
Summary of Operations					
Net sales (1)	\$814,696	\$765,769	\$737,621	\$897,169	\$898,951

- In 2012, we sold our Albany Door Systems business. Previously reported data for net sales, cost of sales, and operating income for years prior to 2012 have been adjusted to reflect only the activity from continuing operations.
- (1) In 2008, we sold our Filtration Technologies business. Previously reported data for net sales, cost of sales, and operating income for years prior to 2008 have been adjusted to reflect only the activity from continuing operations. Income tax expense in 2011 includes a favorable adjustment of \$3.5 million to correct errors from periods prior to 2006. The Company does not believe that the corrected item is or was material to any previously reported quarterly or annual financial statements. As a result, the Company has not restated its previously issued annual or quarterly financial statements.
- (2) During the period 2007 through 2011, we recorded restructuring and other charges related to cost reduction initiatives.
- (3) In 2008, a Goodwill impairment charge of \$72.7 million was recorded, as well as an Intangible impairment charge of \$1.0 million for customer contracts.
- (4) In 2009, we adopted new accounting guidance for convertible debt instruments that may be settled in cash upon conversion, which required certain retrospective adjustments to the years 2008 and 2007. During 2009, we entered into agreements to exchange a portion of these convertible debt instruments for cash plus an equivalent amount of our Senior Notes (“New Notes”). In each case, we simultaneously entered into additional agreements to purchase the New Notes, which resulted in \$52.0 million of pretax gains on early retirement of debt.
- (5) In 2009, there was a \$10.0 million purchase price adjustment related to the sale of the Filtration business, which was also paid during the year.
- (6)

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis ("MD&A") is intended to help the reader understand the results of operations and financial condition of the Company. MD&A is provided as a supplement to, and should be read in conjunction with, our Consolidated Financial Statements and the accompanying Notes.

### *Overview*

Our reportable segments: Paper Machine Clothing, Engineered Fabrics, AEC and PrimaLoft® Products all draw on the same Paper Machine Clothing advanced textiles and materials processing capabilities, and compete on the basis of proprietary, product-based advantage that is grounded in those core capabilities. As a result, technology and manufacturing advances in one tend to benefit the other. While not enjoying comparable synergies with Paper Machine Clothing, Engineered Fabrics and AEC, PrimaLoft® Products is also based on expertise in textiles and material processing, and also competes on the basis of product advantage.

Paper Machine Clothing is the Company's long-established core business and primary generator of cash.

While the paper and paperboard industry in our traditional geographic markets has suffered from well-documented overcapacity in publication grades, especially newsprint, the industry is still expected to grow on a global basis, driven by demand for packaging and tissue grades, as well as the expansion of paper consumption and production in Asia and South America. Although we do not consider the market for Paper Machine Clothing as having significant growth potential, we do believe it provides the Company with significant prospects for long-term cash generation. We feel we are now well-positioned in these markets, with high-quality, low-cost production in growth markets, substantially lower fixed costs in mature markets, and continued strength in new product development, field services, and manufacturing technology. We seek to maintain the cash-generating potential of this business by maintaining the low costs that we achieved through restructuring, and competing vigorously by using our differentiated products and services to reduce our customers' total cost of operation and improve their paper quality.

The Engineered Fabrics segment supplies consumable fabrics used to process paper pulp, as well as fabrics used in a range of industries other than papermaking. These other products include belts used to make non wovens, fiber cement building products, roofing shingles and corrugated sheets used in boxboard, as well as belts used in tannery and textile applications.

We believe that AEC provides the greatest growth potential, both near and long term, for our Company. Our strategy is to grow organically by focusing our proprietary technology on high-value aerospace and defense applications that cannot be served effectively by conventional composites. AEC supplies a number of customers in the aerospace industry. AEC's most significant aerospace customer is the SAFRAN Group, for whom we make braces for the Boeing 787-8 main landing gear, outer guide vanes for the CFM-56 engine, and fan blades and other components for the LEAP engine. AEC is also developing other new and potentially significant composite products for aerospace (engine and airframe) applications.

**Recent Announcements**

During the third quarter of 2011, we announced plans to combine our Paper Machine Clothing and Engineered Fabrics operating and reporting segments into a single business segment. The combined segment will be referred to in this and future reports as “Machine Clothing”. This report presents separate segment results for Paper Machine Clothing and Engineered Fabrics through December 31, 2011. The cash generating potential of this segment will be enhanced as the result of expected technical, manufacturing and administrative synergies resulting from the merger of the Engineered Fabrics and Paper Machine Clothing segments.

During October 2011, we announced an agreement to sell the assets and liabilities of our Albany Door Systems (ADS) business to Assa Abloy for \$130 million. The transaction was closed on January 11, 2012. As a result of this transaction, the ADS segment is reported as a discontinued operation in this report.

**Consolidated Results of Operations****Net sales**

The following table summarizes our net sales by business segment:

(USD in thousands)

Years ended December 31,	2011	2010	2009
Paper Machine Clothing	<b>\$657,569</b>	\$623,555	\$609,897
Engineered Fabrics	<b>81,642</b>	77,465	74,908
Engineered Composites	<b>48,076</b>	41,867	33,824
PrimaLoft® Products	<b>27,409</b>	22,882	18,992
Total	<b>\$814,696</b>	\$765,769	\$737,621
% change	<b>6.4%</b>	3.8%	

**2011 vs. 2010**

Changes in currency translation rates had the effect of increasing net sales by \$16.1 million during 2011 as compared to 2010.

- Excluding the effect of changes in currency translation rates, 2011 net sales increased 4.3% as compared to 2010.
- Sales volume in 2011 increased in all of our business segments as worldwide economic conditions improved.
- Excluding the effect of changes in currency translation rates:

- ◆ Net sales in Paper Machine Clothing increased 3.2%.
- ◆ Net sales in EF increased 3.4%
- ◆ Net sales in Engineered Composites increased 14.8%
- ◆ Net sales in PrimaLoft® Products increased 17.8%

**2010 vs. 2009**

Changes in currency translation rates had the effect of decreasing net sales by \$2.2 million during 2010 as compared to 2009.

- Excluding the effect of changes in currency translation rates, 2010 net sales increased 4.1% as compared to 2009.

- Sales volume in 2010 increased in all of our business segments as worldwide economic conditions improved.
- Excluding the effect of changes in currency translation rates:

- ◆ Net sales in Paper Machine Clothing increased 2.5%.
- ◆ Net sales in EF increased 3.6%
- ◆ Net sales in Engineered Composites increased 23.8%
- ◆ Net sales in PrimaLoft® Products increased 22.2%

### **Backlog**

Total backlog was \$376.3 million, \$407.6 million, and \$354.3 million at December 31, 2011, 2010, and 2009, respectively. Inventory restocking by our Paper Machine Clothing customers led to a strong backlog position at the end of 2010. Backlogs at the end of 2011 were at more normal levels for paper machine clothing. The backlog is generally expected to be invoiced during the next 12 months.

**Gross Profit**

The following table summarizes gross profit by business segment:

(USD in thousands)

Years ended December 31,	2011	2010	2009
Paper Machine Clothing	\$288,456	\$265,111	\$228,301
Engineered Fabrics	29,528	25,315	23,333
Engineered Composites	507	(2,608 )	(2,487 )
PrimaLoft® Products	14,795	12,790	8,853
Unallocated expenses	(4,325 )	(5,845 )	(4,714 )
Total	\$328,961	\$294,763	\$253,286
% of Net Sales	40.4 %	38.5 %	34.3 %

The increase in gross profit during 2011 was principally due to the net effect of the following:

- \$3.6 million increase due to higher gross profit margin in Paper Machine Clothing.
- \$14.5 million increase due to higher sales in Paper Machine Clothing.
- \$3.1 million increase in Engineered Composites gross profit, of which \$1.6 million was due to inventory write-offs in 2010 that did not recur in 2011.
- \$2.0 million increase in PrimaLoft® Products due principally to the increase in sales.
- \$1.5 million improvement in Unallocated expenses principally due to 2010 write-offs of \$1.6 million in our Paper Machine Clothing machinery building operation in France. Expenses associated with the U.S. postretirement medical plan represent the majority of Unallocated expenses in 2011, 2010 and 2009.

The increase in gross profit during 2010 was principally due to the net effect of the following:

- \$31.7 million increase due to higher gross profit margin in Paper Machine Clothing, reflecting the impact of cost reduction initiatives and significant reductions in costs related to restructuring and performance improvement activities.
- \$5.1 million increase due to higher sales in Paper Machine Clothing, reflecting the improved economic conditions in 2010.
- \$2.0 million increase in Engineered Fabrics, reflecting the impact of cost reduction initiatives.
- \$3.9 million increase in PrimaLoft® Products due, principally, to the increase in sales.

**Selling, Technical, General, and Research (STG&R)**

The following table summarizes STG&R by business segment:

(USD in thousands)

Years ended December 31,	2011	2010	2009
Paper Machine Clothing	\$ 119,668	\$ 104,845	\$ 118,736
Engineered Fabrics	15,878	15,157	15,975
Engineered Composites	4,654	5,638	3,875
PrimaLoft® Products	6,255	6,180	5,103
Research	29,007	26,064	23,849
Unallocated	61,109	61,847	53,700
Total	\$ 236,571	\$ 219,731	\$ 221,238
% of Net Sales	29.0	% 28.7	% 30.0

STG&R expenses for 2011 increased \$16.8 million in comparison with 2010, principally due to the net effect of the following:

Currency translation increased STG&R by \$6.4 million as compared to 2010.

Paper Machine Clothing STG&R included the benefit of gains on sales on the sale of former manufacturing facilities totaling \$9.4 million in 2010 and \$1.0 million in 2011.

Research and development costs increased \$2.1 million, excluding the effect of changes in currency translation rates, largely due to increased research activities at AEC.

Revaluation of nonfunctional currency assets and liabilities provided gains of \$2.7 million in 2011 and \$0.4 million in 2010.

STG&R expenses for 2010 decreased \$1.5 million in comparison with 2009, principally due to the net effect of the following:

Expense increased by \$9.2 million for U.S. pension plan, which is included in Unallocated expense. That increase in cost is principally due to amortization of the loss on pension assets that occurred in 2008, and lower than expected investment return on U.S. pension assets.

Revaluation of nonfunctional currency assets and liabilities provided a gain of \$0.4 million compared to a loss of \$2.7 million in 2009. The change to revaluation gains was principally due to the U.S. dollar strengthening against the euro, and the resulting effects on nonfunctional currency trade receivables and payables.

Gains on sales of buildings totaled \$9.4 million in 2010.

Research expense increased \$2.0 million, excluding the effect of currency translation, due to activities that support the growth in our AEC segment.

**SAP Implementation**

In 2006, we announced a plan to migrate our global enterprise resource planning system to SAP, and we completed the project in the first half of 2011. SAP implementation expenses were \$2.9 million, \$4.5 million, and \$5.9 million in 2011, 2010, and 2009, respectively. The decrease each year reflects progress toward completion of the initiative. These expenses were included in the Unallocated expenses reportable segment because they were the result of company-wide initiatives.

**Operating Income**

The following table summarizes operating income/(loss) by business segment:

(USD in thousands)

Years ended December 31,	2011	2010	2009
Paper Machine Clothing	\$165,528	\$156,561	\$ 42,624
Engineered Fabrics	11,230	9,101	3,047
Engineered Composites	(4,204 )	(9,176 )	(6,653 )
PrimaLoft® Products	8,540	6,610	3,689
Research expense	(29,007 )	(26,064 )	(23,849)
Unallocated expenses	(69,014 )	(65,747 )	(54,984)
Total	\$83,073	\$71,285	(\$36,126 )

In addition to the items discussed above affecting gross profit and STG&R, operating income in all years presented was reduced by restructuring costs.

**Restructuring Expense**

The following table summarizes restructuring expense by business segment:

(USD in thousands)

Years ended December 31,	2011	2010	2009
Paper Machine Clothing	\$3,260	\$3,705	\$66,941
Engineered Fabrics	2,420	1,057	4,311
Engineered Composites	57	930	291
PrimaLoft® Products	—	—	61
Unallocated expenses	3,580	(1,945)	(3,430 )
Total	\$9,317	\$3,747	\$68,174

In 2011, we incurred restructuring costs principally due to actions to merge the Paper Machine Clothing and Engineered Fabrics reportable segments, to reduce Paper Machine Clothing manufacturing capacity in the United States, and to move the Company headquarters offices from New York to New Hampshire. Restructuring costs totaled \$9.3 million, including a \$1.8 million provision for impairment of property and equipment at the Company's location in Albany, New York. The Company expects to incur additional restructuring expense in 2012 related to the merger of Paper Machine Clothing and EF, and the movement of the Company headquarters, but is presently unable to determine the amount of additional expense that may be incurred. On February 23, 2012, we announced that our subsidiary in France has initiated consultation with the employee works council in France regarding a proposal to cease operations at the Company's facility in St. Junien. The consultation will be completed in accordance with applicable French legislation.

Restructuring expenses for 2009 and 2010 were the result of previously announced restructuring and performance improvement plans affecting each of our reportable segments. The restructuring activities were driven by the need for us to balance our manufacturing capacity with anticipated demand. We also took actions to reduce costs and to create

process efficiencies within STG&R; improve efficiency in all aspects of our business, and to strengthen our competitive position.

Restructuring expenses totaled \$68.2 million in 2009 and \$3.7 million in 2010. Restructuring expense was reduced by pension and postretirement net curtailment gains of \$6.6 million in 2009 and \$1.2 million in 2010.

Paper Machine Clothing restructuring activities in 2009 and 2010 included closure or significant reductions of manufacturing in Canada, France, Finland, Germany, Sweden, Australia, and the United States. Restructuring expense included provisions for property, plant, and equipment impairments of \$1.2 million in 2010, and \$8.6 million in 2009. Restructuring expense in 2009 included \$5.1 million in impairment provisions related to a joint venture investment located in South Africa.

The Engineered Fabrics business was affected by the announcement of a plan in June 2009 to discontinue manufacturing at its plant in Gosford, Australia, and to transfer production to its St. Stephen, South Carolina,

manufacturing facility. The actions as part of that plan resulted in net restructuring charges in our EF segment of \$4.3 million in 2009 and \$1.1 million in 2010. Restructuring expense in 2009 included a \$4.8 million charge for the impairment of plant and equipment.

### Other Earnings Items

(USD in thousands)

Years ended December 31,	2011	2010	2009
Interest expense, net	\$18,121	\$17,240	\$20,627
Other (income)/expense, net	2,720	(884 )	(49,700)
Income tax expense/(benefit)	35,779	23,545	14,440
Equity in earnings of associated companies	81	92	32
Income/(loss) from discontinued operations, net of tax	8,404	6,160	(11,997)

### Interest Expense, net

Interest expense increased \$0.9 million in 2011 due to the effect of higher interest rates under our new revolving credit agreement that we entered into during 2010, which offset the effect of lower average debt. Interest expense, net, decreased \$3.4 million from 2009 to 2010 principally due to lower average debt in 2010. See the Capital Resources section below for further discussion of borrowings and interest rates.

### Other (Income)/Expense, net

Other (income)/expense, net included the following:

- Foreign currency revaluations of intercompany balances resulted in gains of \$0.1 million in 2011, \$4.6 million in 2010 and \$2.3 million in 2009. The changes in the gains were principally due to the euro's relative strength against the U.S. dollar, Canadian dollar, Australian dollar, and Japanese yen.
- Extinguishment of debt during 2009 resulted in gains totaling \$52.0 million.
- Amortization of capitalized debt issuance costs were \$1.8 million, \$1.7 million, and \$1.9 million in 2011, 2010, and 2009, respectively.
- Fees for a letter-of-credit (LOC) were \$1.5 million, \$1.8 million, and \$1.5 million in 2011, 2010, and 2009, respectively. The fees were associated with an LOC required by the Canadian government until pending tax issues are resolved.

### Income Tax Expense/(Benefit)

The income tax expense during 2011 includes the following:

- \$22.8 million of expense for valuation allowances, principally in Germany that results from the Company's sale of Albany Door Systems. While the gain associated with that transaction will be recorded in 2012, the expected reduction of future taxable income in Germany resulted in the discrete tax charge in 2011.
- Income tax expense in 2011 includes a favorable adjustment of \$3.5 million to correct errors from periods prior to 2006. The Company does not believe that the corrected item is or was material to any previously reported quarterly or annual financial statements. As a result, the Company has not restated its previously issued annual or quarterly financial statements.
- \$3.3 million of reduction to expense resulting from a change in the applicable tax regime in Mexico.
- \$1.2 million net tax benefit related to the settlement of audits and other discrete tax matters.
- The income tax rate on continuing operations, excluding the items noted above, was 34%.

The income tax expense during 2010 includes the following:

- \$9.4 million of expense due to the redemption of our company-owned life insurance policies.
- \$2.3 million of benefit due to the repatriation of prior year's earnings from our subsidiary in Mexico, which is a discrete item.
- \$0.5 million of benefit resulting from other discrete income tax adjustments.
- The income tax rate on continuing operations, excluding the items noted above, was 31%.

Income tax expense during 2009 includes the following:

- \$20.3 million of expense from gains on note buybacks.
- \$5.3 million of expense to reflect a change in reserve associated with an uncertain tax position.
- \$0.6 million of expense resulting from other discrete income tax adjustments.
- The income tax rate on continuing operations, excluding the items noted above, was 20%.

## Discontinued Operations

On October 27, 2011 we entered into a contract to sell the assets and liabilities of our Albany Door Systems business to Assa Abloy AB for \$130 million. Closing on the transaction occurred on January 11, 2012. Under the terms of the contract, Assa Abloy AB acquired our equity ownership of Albany Doors Systems GmbH in Germany, Albany Door Systems AB in Sweden, and other ADS affiliates in Germany, France, the Netherlands, Turkey, Poland, Belgium, New Zealand, and other countries, as well as the remaining ADS business assets, most of which are located in the United States, Australia, China, and Italy.

In July 2008, we closed on the sale of our Filtration Technologies business, the principal operations of which were in Gosford, Australia, and Zhangjiagang, China. At closing, we received approximately \$45.0 million, which resulted in a pretax gain of \$5.4 million. During 2009, the purchaser asserted that various working capital items included in the sale were improperly valued at the time of sale. As a result, without admitting liability, we returned a portion of the original \$45.0 million purchase price, in exchange for a broad release of future claims under the purchase agreement or related to the business, including claims of breach of representations or warranties, related indemnity obligations, and certain other postclosing obligations related to the business. A charge of \$10.0 million was recorded in 2009, which was the accounting period during which the likelihood of an unfavorable outcome became probable and estimable.

In accordance with the applicable accounting guidance for discontinued businesses, the associated results of operations and financial position are reported separately in our financial statements for all periods presented. Cash flows of the discontinued operation were combined with cash flows from continuing operations in the consolidated statements of cash flows.

## Segment Results of Operations

### Paper Machine Clothing Segment

#### Business Environment and Trends

Paper Machine Clothing is our primary business segment and accounted for nearly 81% of our consolidated revenues during 2011. Paper machine clothing is purchased primarily by manufacturers of paper and paperboard.

According to RISI, Inc., global production of paper and paperboard is expected to grow at an annual rate of 2-4% over the next five years, driven primarily by secular demand increases in the Asia and South America, with stabilization in the mature markets of Europe and North America.

Shifting demand for paper, across different paper grades as well as across geographical regions, continues to drive the elimination of papermaking capacity in areas with significant established capacity, primarily in the mature markets of Europe and North America. At the same time, the newest, most efficient machines were being installed in areas of growing demand, including Asia and South America generally, as well as tissue and towel paper grades in all regions. Recent technological advances in Paper Machine Clothing, while contributing to the papermaking efficiency of customers, have lengthened the useful life of many of our products and had an adverse impact on overall paper machine clothing demand. These factors help to explain why Paper Machine Clothing revenue growth grows at a lesser rate than growth in paper production.

The Company's manufacturing and product platforms position us well to meet these shifting demands across product grades and geographic regions. Our strategy for meeting these challenges continues to be to grow share in all markets,

with new products and technology, and to maintain our manufacturing footprint to align with global demand, while we offset the effects of inflation through continuous productivity improvement.

We have incurred significant restructuring charges in recent periods as we reduced Paper Machine Clothing manufacturing capacity in the United States, Canada, Germany, Finland, France, and Australia. We have also incurred costs for idle capacity and equipment relocation that were related to the shutdown of these plants, and underutilized costs related to our Paper Machine Clothing plant in China. Expenses related to these items were included in “Cost of Goods Sold” in the periods in which they were incurred. In addition, we incurred restructuring charges related to the centralization of Paper Machine Clothing administrative functions in Europe, and reorganization of our research and development function that has improved our ability to bring value-added products to market faster.

## Review of Operations

(USD in thousands)

Years ended December 31,	2011	2010	2009
Net sales	\$657,569	\$623,555	\$609,897
% change from prior year	5.5	% 2.2	%
Gross profit	288,456	265,111	228,301
% of net sales	43.9	% 42.5	% 37.4
Operating income	165,528	156,561	42,624

## Net Sales

## 2011 vs. 2010

- Changes in currency translation rates had the effect of increasing 2011 sales by \$14.2 million. Excluding the effect of changes in currency translation rates, 2011 sales increased 3.2%, and principally resulted from the first half of 2011, in comparison to the first half of 2010.
- The increase in 2011 sales was primarily in Asia and South America.
- Sales were relatively flat in North America and Europe.

## 2010 vs. 2009

- Changes in currency translation rates had the effect of decreasing 2010 sales by \$1.9 million.
- Excluding the effect of changes in currency translation rates, 2010 sales increased 2.5%.
- The increase in 2010 sales was primarily in Asia and other emerging regions.
- Sales were relatively flat in North America and Europe as those markets stabilized during the year.

**Gross Profit**

The increase in 2011 gross profit was principally due to the net effect of the following:

- \$14.5 million increase due to higher sales.
- \$5.5 million increase due to restructuring-related equipment relocation costs in 2010 that did not recur in 2011.
- \$2.6 million increase due to 2010 idle and underutilized plant capacity related to cost reduction initiatives. We did not incur costs in 2011 for idle and under utilized capacity that were related to restructuring initiatives.

The increase in 2010 gross profit was principally due to the net effect of the following:

- \$5.1 million increase due to higher sales.
- \$12.3 million increase due to lower idle and underutilized capacity.
- \$1.0 million increase due to lower machinery and equipment relocation costs.

- \$5.9 million increase due to lower depreciation expense.
- \$12.9 million increase due to other gross margin improvements, principally lower manufacturing costs as a result of prior year restructuring activities and cost reduction initiatives.

## **Operating Income**

The increase in 2011 operating income was principally due to the net effect of the following:

- \$23.3 million increase due to higher gross profit.
- \$8.4 million decrease due to lower gains on sale of buildings.
- STG&R expenses, excluding effects of currency translation and the gains on sale of buildings, increased \$5.0 million, principally due to higher travel expense.

The increase in 2010 operating income was principally due to the net effect of the following:

- \$36.8 million increase due to higher gross profit.
- Revaluation of nonfunctional currency assets and liabilities provided a gain of \$1.8 million compared to a loss of \$2.0 million in 2009. The change to revaluation gains was principally due to the U.S. dollar strengthening against the euro, and the resulting effects on nonfunctional currency trade receivables and payables.
- \$9.4 million increase due to gains on building sales.
- \$63.2 million increase due to lower restructuring costs.

## Outlook

Sales in the Paper Machine Clothing segment slowed toward the end of 2011, especially in North America, and the slowdown continued into January 2012. But as the month of January 2012 progressed, orders strengthened, suggesting that, unless we experience a global economic slowdown, Paper Machine Clothing sales and income should continue to strengthen through the course of the year. While it is very unlikely that Q1 2012 will match the strong performance of Q1 2011 (which, like Q4 2010, benefited from high backlogs and inventory restocking), we do expect that overall Paper Machine Clothing performance in 2012 should be comparable to overall performance in 2011.

### Engineered Fabrics Segment

#### Business Environment and Trends

The Engineered Fabrics segment manufactures products similar to paper machine clothing, but for customers in industries other than paper. The largest portion of revenue in this segment is derived from sales to the nonwovens industry, which includes the manufacture of diapers, and personal care and household wipes. Other markets that are served by this segment are businesses adjacent to the paper industry, and manufacturers of tannery, textile and building products. Segment sales in the European and Pacific regions combined are almost at the same level as sales within the Americas.

#### Review of Operations

Years ended December 31,	2011	2010	2009
Net sales	\$81,642	\$77,465	\$74,908
% change from prior year	5.4 %	3.4 %	
Gross profit	29,528	25,315	23,333
% of net sales	36.2 %	32.7 %	31.1 %
Operating income	11,230	9,101	3,047

#### Net Sales

##### 2011 vs. 2010

- Changes in currency translation rates increased sales by \$1.5 million in 2011.
- Excluding the effect on changes in translation rates, sales increased 3.4%.
- 2011 sales in the Americas were flat with 2010, while sales in Eurasia increased.

##### 2010 vs. 2009

Changes in currency translation rates had very little impact on sales during 2010.

The increase in 2010 sales was principally due to higher sales volume in products that support the tannery industry in Italy.

Sales were relatively flat in all other EF product lines, indicating that a bottom was reached during 2009, and recovery in those industries was slow during 2010, especially in our nonwoven product markets.

## Gross Profit

The increase in 2011 gross profit is principally due to following:

· \$1.4 million increase due to higher sales.

· The remainder of the increase was principally due to the implementation of cost reduction initiatives.

The increase in 2010 gross profit is principally due to following:

· \$0.8 million increase due to higher sales.

· The remainder of the increase was principally due to implementation of cost reduction initiatives.

**Operating Income**

2011 operating income increased principally due to the following changes:

· \$4.2 million increase due to higher gross profit.

· \$1.4 million decrease due to higher restructuring costs.

2010 operating income increased principally due to the following changes:

- \$2.0 million increase due to higher gross profit.
- \$3.3 million increase due to lower restructuring costs.

## Outlook

During 2011, we announced that the Paper Machine Clothing and Engineered Fabrics businesses would be merged. We made good progress on this initiative in the fourth quarter of 2011. We are targeting \$15 million of incremental EBITDA by mid-2013 from this integration. The two groups are now fully merged, and beginning with our Q1 2012 earnings release, we will no longer report them separately. Previously announced closures of an Engineered Fabrics corrugator belt facility and a Paper Machine Clothing forming plant, and the transition of manufacturing to other facilities in North America, are well underway. The first is scheduled for completion by the end of Q1, the second by the end of Q3 2012.

## Engineered Composites Segment

### Business Environment and Trends

The Engineered Composites segment (AEC) provides custom-designed advanced composite structures based on proprietary technology to customers in the aerospace and defense industries. AEC's largest current development program relates to the LEAP engine being developed by CFM International. Under this program, AEC is developing a family of composite parts, including fan blades, to be incorporated into the LEAP engine. In 2011, approximately 25% of this segment's sales were related to U.S. government contracts or programs.

### Review of Operations

(USD in thousands)

Years ended December 31,	2011	2010	2009
Net sales	\$48,076	\$41,867	\$33,824
% change from prior year	14.8 %	23.8 %	
Gross profit	507	(2,608 )	(2,487 )
% of net sales	1.1 %	-6.2 %	-7.4 %
Operating loss	(4,204 )	(9,176 )	(6,653 )

## Net Sales

- The increase in 2011 sales over 2010 was principally due to the ramp-up of LEAP program.
- The increase in 2010 sales over 2009 was principally due to the ramp-up of production of Landing Braces, LEAP, and Joint Strike Fighter advanced composite material programs.

## Gross Profit

2011 gross profit included the following:

- \$1.6 million increase due to write-offs in 2010 related to obsolete equipment and materials.
- The remainder of the increase was due to manufacturing efficiencies and improved pricing.

2010 gross profit included the following:

- \$1.8 million increase due to higher sales.
- \$0.8 million increase due to lower machinery and equipment relocation costs.
- \$1.6 million decrease due to write-offs related to obsolete equipment and materials.
- \$1.1 million decrease due to higher depreciation expense as more equipment was put into place as production ramped up.

**Operating Income**

2011 operating income improved principally due to the following:

- \$3.1 million increase due to higher gross profit.
- \$0.9 million increase due to lower restructuring costs.

2010 operating income decreased principally due to the following:

- \$0.1 million decrease due to lower gross profit.
- \$0.6 million decrease due to higher restructuring costs.
- \$1.0 million decrease due to higher selling expense, principally higher wages.
- \$0.7 million decrease due to an increased bad debt reserve.

## Outlook

AEC performed well in Q4 2011, with sales 20 percent higher than Q4 2010, and operating income improved almost \$2 million, bringing EBITDA above break-even. We expect sales to grow by at least another 20 percent in 2012, while income will likely hold at 2011 levels, reflecting significant costs associated with the aggressive ramp up of operations and the composites organization. 2012 will be a pivotal year for AEC. The expected size and timing of the LEAP engine market have become more definite, and we are planning for a market of at least 1,500 engines per year, with a very fast ramp-up beginning in mid-decade.

### PrimaLoft® Products Segment

#### Business Environment and Trends

The PrimaLoft® Products segment includes sales of insulation for outdoor clothing, gloves, footwear, sleeping bags, and home furnishings. This segment has sales operations in the United States, Europe, and Asia, through which it sells products produced by third parties according to the Company's proprietary specifications. This segment also generates a portion of its sales from the licensing of its intellectual property. Approximately one-quarter of this segment's sales in each of the past two years has been to the U.S. military (for high-performance outerwear). Reduced military budgets could affect sales in 2011 and beyond.

#### Review of Operations

(USD in thousands)

Years ended December 31,	2011	2010	2009
Net sales	\$27,409	\$22,882	\$18,992
% change from prior year	19.8 %	20.5 %	
Gross profit	14,795	12,790	8,853
% of net sales	54.0 %	55.9 %	46.6 %
Operating income	8,540	6,610	3,689

#### Net Sales

- Changes in currency translation rates had the effect of increasing 2011 sales by \$0.5 million.
- Excluding the effect of changes in currency translation rates, 2011 sales increased 17.8%.
- The 2011 sales increase was principally related to growth in outerwear sales, particularly in Europe.
- The increase in sales for 2010 was principally due to weak global economic conditions in the first half of 2009.

#### Gross Profit

- 2011 gross profit was \$2.5 million higher due to higher sales.
- 2010 gross profit was \$1.8 million higher than 2009 due to higher sales.
- 2010 gross profit increased \$2.1 million due to higher profitability related to outsourcing certain manufacturing processes to third-parties.

#### Operating Income

- Operating income increased \$1.9 million in 2011, principally due to the improvement in gross profit.
- Operating income increased \$2.9 million in 2010, principally due to the improvement in gross profit.

## **Outlook**

PrimaLoft® Products had a strong fourth quarter in 2011, with sales and income well ahead of the comparable period last year. Growth was especially strong in sales of insulation for outerwear in Europe. More generally, it appears that the normal seasonal pattern for sales in this business has shifted, with retailers in North America and Europe placing orders for outerwear earlier than in past years, pulling sales forward. Order patterns point to another year of strong growth for this segment in 2012.

## Liquidity and Capital Resources

### Cash Flow Summary

(USD in thousands)

For the years ended December 31,	2011	2010	2009
Net income/(loss)	\$34,938	\$37,636	(\$33,458)
Changes in working capital	3,061	(14,550)	) 30,458
Other operating items	67,270	76,486	16,975
Net cash provided by operating activities	105,269	99,572	13,975
Net cash (used in)/provided by investing activities	(25,820)	) 28,065	(43,647)
Net cash (used in)/provided by financing activities	(65,923)	) (93,517)	) 22,092
Effect of exchange rate changes on cash flows	(3,373)	) (9,285)	) (1,525)
Increase/(decrease) in cash and cash equivalents	10,153	24,835	(9,105)
Change in cash balances of discontinued operations	(9,169)	) (1,049)	) (754)
Cash and cash equivalents at beginning of year	122,301	97,466	106,571
Cash and cash equivalents at end of year	\$118,909	\$117,925	\$94,139

### Operating activities

The increase in cash provided by operating activities in 2011 was principally due to favorable changes in working capital balances as compared to 2010. In comparison to 2009, the increase in cash provided by operating activities in 2010 was principally due to improvement in net income. Changes in working capital include changes in inventories and accounts receivable. Inventories decreased \$7.1 million, \$16.6 million, and \$42.1 million in 2011, 2010, and 2009, respectively. Accounts receivable increased \$12.1 million in 2011 and \$9.5 million in 2010, and decreased \$43.5 million in 2009. The significant change from 2009 to 2010 in Other operating items was principally due to the 2009 early retirement of debt.

Contributions to the United States qualified pension plan amounted to \$15.0 million in 2011, \$10.0 million in 2010, and \$20.0 million in 2009. The Company has developed a plan to use approximately \$70 million of the cash received from the sale of Albany Door Systems, as well as about \$30 million of cash held outside of the U.S., to fund and, in some areas, permanently settle part of our global pension liabilities. Our target is to have this plan substantially completed by the end of Q2 2012. We expect that, upon completion of the plan, global unfunded pension liabilities will drop from around \$100 million to \$30 million. While actual requirements will be affected by future interest rates and investment performance, under current market conditions, the required cash contributions to all defined benefit pension plans should drop from around \$20 million per year to approximately \$3 million per year; pension expense associated with these plans should decline from about \$13 million per year to approximately \$4 million per year. Income tax deductions generated by the cash contributions are expected to reduce future cash taxes by approximately \$25 million. Along with the financial effects noted above, the full execution of this strategy will impact the income statement, mostly in Q2 2012, with a significant pension settlement charge that could be as high as \$130 million, primarily due to the recognition of net actuarial losses that until now have been reflected on the balance sheet as deferred charges reported in Shareholders' Equity.

Cash payments for income taxes, net of refunds, on continuing operations were \$13.7 million, \$9.2 million, and \$28.2 million in 2011, 2010, and 2009, respectively. We expect to make payments for income taxes in the range \$10.0 to \$15.0 million during 2012.

During 2011 we purchased foreign currency derivative instruments for \$0.9 million. The derivatives serve as part of our strategy to mitigate volatility in operating cash flows and EBITDA caused by the effect of changes in foreign currency rates on sales and costs denominated in currencies other than the U.S. dollar.

### **Investing Activities**

Capital expenditures for continuing operations, including purchased software, were \$27.5 million in 2011, which includes carryover effects of delayed capital spending from 2010 as well as new capital investments for the planned accelerated growth in our AEC business. Capital spending was \$31.0 million in 2010, and \$41.9 million in 2009. Additionally, capital expenditures related to the discontinued Albany Door Systems segment were \$1.2 million in 2011, \$0.6 million in 2010, and \$0.6 million in 2009. Capital expenditures have decreased since 2009 principally due to the completion of a Paper Machine Clothing strategic investment program, which included building a paper machine clothing manufacturing facility in Hangzhou, China. We estimate capital spending for 2012 to be approximately \$40.0 to \$50.0 million.

We actively manage our global portfolio of real estate that is available for sale due to prior restructuring activities. In 2011 we sold two properties located in the United States for \$2.9 million in cash. In 2010 we sold two other

properties located in the United States for \$12.3 million in cash proceeds. Cash proceeds from a single property disposition amounted to \$7.5 million in 2009. Proceeds received from any sale in the future should help to offset a portion of capital expenditures, although the amount or timing of the proceeds to be realized cannot yet be predicted accurately.

During Q2 2010, we liquidated all of our holdings in life insurance policies, which provided cash of \$49.3 million and led to a discrete tax charge of \$9.4 million. During Q2 and Q3 2010, we repatriated funds held by a subsidiary, which resulted in a discrete tax benefit of \$1.4 million and an adjustment to estimated taxes that increased earnings by \$0.3 million. The proceeds from these transactions were used to pay down the Company's revolving debt prior to refinancing and reduce our overall leverage.

During Q1 2010, we acquired certain assets and liabilities of Envico Ltd., a New Zealand based manufacturer and distributor of high-performance doors, for approximately \$1.9 million.

In Q3 2009, we made a \$10.0 million payment representing a partial purchase price return related to our Filtration Technologies business that was sold in July 2008. During 2009, the purchaser asserted that various working capital items included in the sale were improperly valued at the time of sale. As a result, without admitting liability, we made the payment in exchange for a broad release of future claims under the purchase agreement or related to the business, including claims of breach of representations or warranties, related indemnity obligations, and certain other postclosing obligations of our Company related to the business.

### **Financing Activities**

Cash dividends paid were \$15.6 million, \$14.9 million, and \$14.6 million in 2011, 2010, and 2009, respectively. Dividends have been declared each quarter since the fourth quarter of 2001. Decisions with respect to whether a dividend will be paid, and the amount of the dividend, are made by the Board of Directors each quarter. To the extent the Board declares cash dividends in the future, we would expect to pay such dividends out of operating cash flow. Future cash dividends will depend on debt covenants and on the Board's assessment of our ability to generate sufficient cash flows.

As described below in the Capital Resources section, in 2009 we entered into several agreements to purchase and retire our previously issued 2.25% convertible notes.

### **Capital Resources**

We finance our business activities primarily with cash generated from operations and borrowings, largely through our revolving credit agreement as discussed below. Our subsidiaries outside of the United States may also maintain working capital lines with local banks, but borrowings under such local facilities tend not to be significant.

In January 2012, the Company completed the \$130 million sale of Albany Door Systems to Assa Abloy AB. After taxes and fees, the Company expects to net more than \$120 million from the transaction. The Company received \$117 million from the buyer in January 2012 and expects the remaining \$13 million in mid-2013. With the transaction complete, the Company has developed a plan to use approximately \$70 million of the cash received from the sale, as well as about \$30 million of cash held outside of the U.S., to fund and, in some areas, permanently settle part of our global pension liabilities. In addition, approximately \$40 million of the proceeds from the sale of ADS will be used to pay down outstanding borrowings on the Company's \$390 million credit facility.

During 2010 we executed a \$390.0 million five-year revolving credit agreement, which replaced the former \$460.0 million five-year facility agreement made in 2006. During 2011, we reduced debt under the revolving credit agreement by \$50.0 million, of which \$45.0 million was provided by cash repatriations from subsidiaries during Q2

and Q4 of 2011. During 2010, we reduced debt under the agreement by \$71.0 million, of which \$49.3 million was provided by the redemption of our company-held insurance policies. Under the terms of the 2010 agreement, the impact of cash and the cash surrender value of life insurance policies is limited to \$65.0 million for the purposes of calculating net debt in the leverage ratio. As of December 31, 2011, \$187.0 million was outstanding under the revolving credit agreement. In addition, \$50.2 million in letters of credit were outstanding under the agreement. The applicable interest rate for borrowings under the new agreement is LIBOR plus a spread (all-in), based on our

leverage ratio at the time of borrowing. Spreads under the 2010 agreement are higher than under the old agreement, reflecting changes in market spreads. The all-in 12-month average interest rate was 3.59% in 2011 and 2.25% in 2010.

Also in 2010, we entered into interest rate hedging transactions that have the effect of fixing the LIBOR portion of the effective interest rate (before addition of the spread) on \$105.0 million of the indebtedness drawn under the new credit agreement at the rate of 2.04% for the next five years. Under the terms of these transactions, we pay the fixed rate of 2.04% and the counterparties pay a floating rate based on the three-month LIBOR rate at each quarterly calculation date. The net effect is to fix the effective interest rate on \$105 million of indebtedness at 2.04%, plus the applicable spread, until these swap agreements expire on July 16, 2015. On December 31, 2011, the applicable spread was 2.25%, yielding an effective annual rate of 4.29%.

We also have a \$150.0 million borrowing from the Prudential Insurance Company of America, for which the agreement was amended and restated during 2010. The principal is due in three installments of \$50.0 million each in 2013, 2015, and 2017, and the interest rate is fixed at 6.84%.

We are currently required to maintain a leverage ratio of not greater than 3.50 to 1.00 and to maintain a minimum interest coverage of 3.00 to 1.00 under the revolving credit agreement and the Prudential agreement.

As of December 31, 2011, our leverage ratio was 1.75 to 1.00 and our interest coverage ratio was 8.80 to 1.00. We may purchase our Common Stock or pay dividends to the extent our leverage ratio remains at or below 3.50 to 1.00, and may make acquisitions with cash provided our leverage ratio would not exceed 3.00 to 1.00 after giving pro forma effect to the acquisition. As of December 31, 2011, we were in compliance with the covenants of our debt and credit agreements.

Our ability to borrow additional amounts under the credit agreement is conditional upon the absence of any defaults, as well as the absence of any material adverse change. Based on the maximum leverage ratio and our consolidated EBITDA (as defined in the new agreement), and without modification to any other credit agreements, as of December 31, 2011, we would have been able to borrow an additional \$152.0 million under our credit agreements.

If our earnings were to decline as a result of continued difficult market conditions or for other reasons, it may impact our ability to maintain compliance with these covenants. If we determined that our compliance with these covenants may be under pressure, we may elect to take a number of actions, including reducing expenses in order to increase earnings, using available cash to repay all or a portion of the outstanding debt subject to these covenants, or seeking to negotiate with lenders to modify the terms or to restructure the debt. Using available cash to repay indebtedness would make the cash unavailable for other uses, and might affect the liquidity discussions and conclusions above. Entering into any modification or restructuring of our debt would likely result in additional fees or interest payments.

Prior to 2009, we had \$180 million principal amount of 2.25% convertible notes that were issued in March 2006. During 2009 we entered into several agreements to exchange our 2.25% convertible senior notes due in 2026 for cash plus an equivalent amount of our 2.25% senior notes due in 2026 (the "new notes"), resulting in gains on the extinguishment of debt. In each case, we simultaneously entered into additional agreements to purchase the new notes. The aggregate cost of the new notes repurchased was \$88.9 million, which had a book value of \$134.6 million and resulted in a pretax gain on extinguishment of debt of \$52.0 million. The cash used to buy the new notes was provided by our credit agreement. Long-term debt was reduced by \$45.7 million (book value less aggregate cost) as a result of these transactions. As of December 31, 2010, \$28.4 million principal amount of convertible notes was outstanding.

As of December 31, 2011, we had outstanding letters of credit totaling \$50.2 million from the credit agreement in respect of preliminary assessments for income tax contingencies. Income tax contingencies are more fully described in Note 7 of Notes to Consolidated Financial Statements.

**Off-Balance Sheet Arrangements**

As of December 31, 2011, we have no off-balance sheet arrangements required to be disclosed pursuant to Item 303(a)(4) of Regulation S-K.

38

## Contractual Obligations

As of December 31, 2011, we have the following cash flow obligations:

(in millions)	Total	Payments Due by Period			
		Less than one year	One to three years	Three to five years	After five years
Total debt	\$374.8	\$1.7	\$86.0	\$237.0	\$50.1
Interest payments (a)	66.6	18.6	31.8	13.6	2.6
Pension plan contributions (b)	37.1	37.1	—	—	—
Other postretirement benefits (c)	51.6	5.9	11.3	10.4	24.0
Restructuring accruals	7.0	7.0	—	—	—
Other noncurrent liabilities (d)	—	—	—	—	—
Operating leases	10.1	4.1	4.4	1.4	0.2
Totals	\$547.2	\$74.4	\$133.5	\$262.4	\$76.9

The terms of variable-rate debt arrangements, including interest rates and maturities, are included in Note 12 of Notes to Consolidated Financial Statements. The interest payments are based on the assumption that we maintain (a) \$187.0 million of variable rate debt until the July 2010 credit agreement matures on July 16, 2015, and the rate as of December 31, 2011 (3.61%) continues until maturity.

Our 2012 contribution to defined benefit pension plans is estimated to be \$37.1 million. However, that estimate is (b) subject to revision based on many factors. The amount of contributions after 2012 is subject to many variables, including return of pension plan assets, interest rates, and tax and employee benefit laws. Therefore, contributions beyond 2011 are not included in this schedule.

Estimated cash outflow for other postretirement benefits is consistent with the expected benefit payments as (c) presented in Note 4 of Notes to Consolidated Financial Statements.

Estimated payments for deferred compensation, taxes, and other noncurrent liabilities are not included in this table (d) due to the uncertain timing of the ultimate cash settlement. Also, this table does not reflect unrecognized tax benefits of \$27.1 million, the timing of which is uncertain. Refer to Note 7 of Notes to Consolidated Financial Statements for additional discussion on unrecognized tax benefits.

The foregoing table should not be deemed to represent all of our future cash requirements, which will vary based on our future needs. While the cash required to satisfy the obligations set forth in the table is reasonably determinable in advance, many other cash needs, such as raw materials costs, payroll, and taxes, are dependent on future events and are harder to predict. In addition, while the contingencies described in Note 15 of Notes to Consolidated Financial Statements are not currently anticipated to have a material adverse effect on our Company, there can be no assurance that this will be the case. Subject to the foregoing, we currently expect that cash from operations and the other sources of liquidity described above will be sufficient to enable us to meet the foregoing cash obligations, as well as to meet our other cash requirements.

## Recent Accounting Pronouncements

In October 2009, the Financial Accounting Standards Board (FASB) amended authoritative guidance related to accounting and disclosure of revenue recognition for multiple-element arrangements. This guidance provides principles for allocation of consideration among multiple elements, allowing more flexibility in identifying and accounting for separate deliverables under an arrangement. This guidance introduces an estimated selling price method for allocating revenue to the elements of a bundled arrangement if vendor-specific objective evidence or

third-party evidence of selling price is not available, and significantly expands related disclosure requirements. We adopted this pronouncement on January 1, 2011, and it resulted in the recognition of additional revenue and operating income in the Albany Doors reportable segment, which is now reported as a discontinued operation.

In May 2011, the Financial Accounting Standards Board (FASB) amended authoritative guidance related to common fair value measurements and disclosure requirements. This pronouncement was issued to provide a consistent definition of fair value and ensure that the fair value measurement and disclosure requirements are similar between U.S. GAAP and IFRS. This pronouncement changes certain fair value measurement principles and enhances the disclosure requirements, particularly for level 3 fair value measurements, and is effective for reporting periods beginning on or after December 15, 2011. The adoption of this guidance is not expected to have a material effect on our financial statements.

In June and December 2011, the FASB issued guidance that eliminates the option to report other comprehensive income and its components in the statement of changes in stockholders' equity and requires an entity to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement or in two separate but consecutive statements. This pronouncement is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The adoption of this guidance concerns presentation and disclosure only and will not have a material impact on our financial statements.

In September 2011, the FASB issued guidance intended to reduce the cost and complexity of the annual goodwill impairment test by providing entities an option to perform a "qualitative" assessment to determine whether further impairment testing is necessary. Annually, the company performs a qualitative assessment for each of its reporting units to determine if the two step process for impairment testing is required. If the Company determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, the company evaluates the recoverability of goodwill using a two-step impairment test approach at the reporting unit level. This pronouncement is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of this guidance is not expected to have a material effect on our financial statements.

### ***Critical Accounting Policies and Assumptions***

The following should be read in conjunction with the Consolidated Financial Statements and Notes thereto.

The Company's discussion and analysis of its financial condition and results of operations are based on the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. Some of these estimates require judgments about matters that are inherently uncertain.

### **Revenue Recognition**

We record sales when persuasive evidence of an arrangement exists, delivery has occurred, title has been transferred, the selling price is fixed, and collectability is reasonably assured. We include in revenue any amounts invoiced for shipping and handling. The timing of revenue recognition is dependent upon the contractual arrangement with customers. These arrangements, which may include provisions for transfer of title and guarantees of workmanship, are specific to each customer. Some of these contracts provide for a transfer of title upon delivery, or upon reaching a specific date, while other contracts provide for title transfer to occur upon consumption of the product.

Products and services provided under long-term contracts represent a significant portion of sales in the Engineered Composites segment. We use the percentage of completion (actual cost to estimated cost) method for accounting for these projects. That method requires significant judgment and estimation, which could be considerably different if the underlying circumstances were to change. When adjustments in estimated contract revenues or costs are required, any changes from prior estimates are included in earnings in the current period.

The Engineered Composites segment also has some long-term aerospace contracts under which there are two phases: a phase during which the production part is designed and tested, and a phase of supplying production parts. Certain costs are capitalized during the first phase, such as costs for engineering, equipment, and inventory, where recovery is probable. Revenue will be recognized during the second phase using a percentage of completion method. Accumulated capitalized costs are written-off when those costs are determined to be unrecoverable. Depending on the type of contract, we determine our percentage of completion using either the cost to cost method, or the units of delivery method.

We limit the concentration of credit risk in receivables by closely monitoring credit and collection policies. We record allowances for sales returns as a deduction in the computation of net sales. Such provisions are recorded on the basis of written communication with customers and/or historical experience. Any value added taxes that are imposed on sales transactions are excluded from net sales.

### **Restructuring Charges**

We may incur expenses related to restructuring of our operations, which could include employee termination costs, costs to consolidate or close facilities, or costs to terminate contractual relationships. Employee termination costs include the severance pay and social costs for periods after employee service is completed. Termination costs

related to an ongoing benefit arrangement are recognized when the amount becomes probable and estimable. Termination costs related to a one-time benefit arrangement are recognized at the communication date to employees. Costs related to contract termination, relocation of employees, and the consolidation or the closure of facilities, are recognized when incurred.

### **Allowance for Doubtful Accounts**

The Company maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. If the financial condition of the Company's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

### **Reserves for Inventory Impairment**

The Company maintains reserves for possible impairment in the value of inventories. Such reserves can be specific to certain inventory, or general based on judgments about the overall condition of the inventory. General reserves are established based on percentage write-downs applied to aged inventories, or for inventories that are slow-moving. If actual results differ from estimates, additional inventory write-downs may be necessary. These general reserves for aged inventory are relieved through income only when the inventory is sold.

### **Property, Plant, and Equipment (PP&E)**

PP&E is recorded at cost, which is generally objectively quantifiable when assets are purchased singly. However, when assets are purchased in groups, as would be the case for a business acquisition, costs assigned to PP&E are based on an estimate of fair value of each asset at the date of acquisition. These estimates are based on assumptions about asset condition, remaining useful life, and market conditions. The Company may employ appraisers to aid in allocating cost to assets purchased as a group. Included in the cost basis of PP&E are those costs that substantially increase the useful lives or capacity of existing PP&E. Significant judgment is needed to determine which costs should be capitalized under these criteria, and which should be expensed as repairs and maintenance costs. Economic useful life is the duration of time an asset is expected to be productively employed by the Company, which may be less than its physical life. Management's estimate of useful life is monitored to determine its appropriateness, especially in light of changed business circumstances. Changes in these estimates that affect PP&E could have a significant impact on the Company's financial statements. However, significant adjustments have not been required in recent years. Management also monitors changes in business conditions and events such as a plant closure that could indicate that PP&E asset values are impaired. The determination of asset impairment involves significant judgment about market values and future cash flows.

### **Goodwill**

Goodwill impairment exists when the carrying amount of goodwill exceeds its fair value. Assessments of possible impairment of goodwill are made when events or changes in circumstances indicate that the carrying value of the asset may not be recoverable through future operations. Additionally, testing for possible impairment of recorded goodwill and certain intangible asset balances is required annually. The amount and timing of any impairment charges based on these assessments require the estimation of future cash flows and the fair market value of the related assets based on management's best estimates of certain key factors, including future selling prices and volumes; operating, raw material, energy, and freight costs; and various other projected operating and economic factors. When testing, fair values of the reporting units and the related implied fair values of their respective goodwill are established using public company analysis and discounted cash flows.

### **Health Care Liabilities**

The Company is self-insured for some employee and business risks, including health care and workers' compensation programs in the United States. Losses under all of these programs are accrued based on estimates of the ultimate liability for claims reported and an estimate of claims incurred but not reported, with assistance from third-party actuaries and service providers. However, these liabilities are difficult to assess and estimate due to unknown factors, including the severity of an illness or injury and the number of incidents not reported. The accruals are based upon known facts and historical trends, and management believes such accruals to be adequate. If actual results significantly differ from estimates used to calculate the liability, the Company's financial condition, results of operations and cash flows could be materially impacted by losses under these programs, as well as higher stop-loss premiums in future periods.

#### **Pension and Postretirement Liabilities**

The Company has pension and postretirement benefit costs and liabilities that are developed from actuarial valuations. Inherent in these valuations are key assumptions, including discount rates and expected return on plan

assets, which are updated on an annual basis. As of December 31, 2011, liabilities under our defined benefit pension plans exceeded plan assets by \$101.2 million, of which \$62.7 million was for plans outside of the U.S. The U.S. pension plan liability of \$38.5 million includes an obligation of \$30.0 million under a qualified retirement plan, and \$8.5 million for a nonqualified supplemental executive retirement plan.

We are required to consider current market conditions, including changes in interest rates, in making these assumptions. Changes in the related pension and postretirement benefit costs or credits may occur in the future due to changes in the assumptions. The amount of annual pension plan funding and annual expense is subject to many variables, including the investment return on pension plan assets and interest rates. Assumptions used for determining pension plan liabilities and expenses are evaluated and updated at least annually.

### **Deferred Taxes**

We record deferred income tax assets and liabilities for the tax consequences of differences between financial statement and tax bases of existing assets and liabilities. A tax valuation allowance is established, as needed, to reduce net deferred tax assets to the amount expected to be realized. In the event it becomes more likely than not that some or all of the deferred tax asset allowances will not be needed, the valuation allowance will be adjusted. Management judgment is required to determine income tax expense and the related balance sheet amounts. Judgments are required concerning the ultimate outcome of tax contingencies and the realization of deferred tax assets. Actual income taxes paid may differ from estimates, depending upon changes in income tax laws, actual results of operations, and the final audit of tax returns by authorities. Additionally, tax assessments may arise several years after the tax returns have been filed. We believe our recorded tax liabilities adequately provide for the estimated outcome of these assessments.

### **Contingencies**

We have contingent liabilities for litigation, claims, and assessments that result from the ordinary course of business. These matters are more fully described in Note 15 to the Consolidated Financial Statements.

### **Financial Assets and Liabilities**

We have certain financial assets and liabilities that are measured at fair-value on a recurring basis, in accordance with the applicable accounting guidance. Fair values are based on assumptions that market participants would use in pricing an asset or liability, which include review of observable inputs, market quotes, and assumptions of expected cash flows. In certain cases this determination of value may require some level of valuation analysis, interpretation of information, and judgment. As these key observable inputs and assumptions change in future periods, the Company will update its valuation to reflect market conditions.

We may enter into hedging transactions from time to time in order to mitigate volatility in cash flows, which can be caused by changes in currency exchange rates. To qualify for hedge accounting under the applicable accounting guidance, the hedging relationship between the hedging instrument and the hedged item must be effective in achieving the offset of changes that are attributable to the hedged risk, both at the inception of the hedge and on a continuing basis until maturity or settlement of the hedging instrument. Hedge effectiveness, which would be tested by the Company periodically, is dependent upon market factors and changes in currency exchange rates, which are unpredictable. In the event that the hedged item falls below the hedging instrument, any gains or losses related to the ineffective portion of the hedge will be recognized in the current period in earnings.

### **Non-GAAP Measures**

This Form 10-K contains certain items, such as earnings before interest, taxes, depreciation and amortization (EBITDA), EBITDA excluding restructuring charges, currency effects, and building sale gains, sales excluding

currency effects, effective income tax rate exclusive of income tax adjustments, net debt, and certain income and expense items on a per share basis, that could be considered non-GAAP financial measures. Such items are provided because management believes that, when presented together with the GAAP items to which they relate, they provide additional useful information to investors regarding the Company's operational performance. Presenting increases or decreases in sales, after currency effects are excluded, can give management and investors insight into underlying sales trends. An understanding of the impact in a particular quarter of specific restructuring costs, or gains and losses such as the gain from the sale of a building, on operating income or EBITDA can give management and investors additional insight into quarterly performance, especially when compared to quarters in which such items had a greater or lesser effect, or no effect.

The effect of changes in currency translation rates is calculated by converting amounts reported in local currencies into U.S. dollars at the exchange rate of a prior period. That amount is then compared to the U.S. dollar amount reported in the current period. The Company calculates Income tax adjustments by adding discrete tax items to the effect of a change in tax rate for the reporting period. The Company calculates its effective income tax rate, exclusive of income tax adjustments, by removing income tax adjustments from total Income tax expense, then dividing that result by Income before tax. The Company calculates EBITDA by adding Interest expense net, Income taxes, Depreciation and Amortization to Net income. EBITDA excluding restructuring charges, foreign currency effects, and building sale gains is calculated by adding to EBITDA, costs associated with restructuring, and then adding or subtracting revaluation losses or gains and subtracting building share gains. The Company believes that EBITDA and EBITDA excluding the effect of such items provide useful information to investors because they provide an indication of the strength and performance of the Company's ongoing business operations, including its ability to fund discretionary spending such as capital expenditures and strategic investments, as well as its ability to incur and service debt. While depreciation and amortization are operating costs under GAAP, they are non-cash expenses equal to current period allocation of costs associated with capital and other long-lived investments made in prior periods. While restructuring expenses, foreign currency revaluation losses or gains, and building sale gains have an impact on the Company's net income, removing them from EBITDA can provide, in the opinion of the Company, a better measure of operating performance. EBITDA is also a calculation commonly used by investors and analysts to evaluate and compare the periodic and future operating performance and value of companies. EBITDA, as defined by the Company, may not be similar to EBITDA measures of other companies. Such EBITDA measures may not be considered measurements under GAAP, and should be considered in addition to, but not as substitutes for, the information contained in the Company's statements of operations.

The following table shows the calculation of EBITDA from continuing operations, and EBITDA excluding restructuring charges, currency revaluation effects, and gains from the sale of buildings and early retirement of debt:

(USD in thousands)

Years ended December 31,	2011	2010	2009
Income/(loss) from continuing operations	\$26,534	\$31,476	(\$21,461 )
Interest expense, net	18,121	17,240	20,627
Income tax expense/(benefit)	35,779	23,545	14,440
Depreciation and amortization	64,203	60,817	67,839
EBITDA from continuing operations	144,637	133,678	81,445
Restructuring and other, net	9,317	3,747	68,174
Foreign currency revaluation (gains)/losses	(2,759 )	(5,003 )	462
(Gain) on sale of former manufacturing facilities	(1,008 )	(9,400 )	—
(Gain) on early retirement of debt	—	—	(51,959)
EBITDA from continuing operations, excluding restructuring charges, revaluation effects, and gains from building sales and early retirement of debt	\$150,187	\$122,422	\$ 98,122

We disclose certain income and expense items on a per share basis. We believe that such disclosures provide important insight into the underlying quarterly earnings and are financial performance metrics commonly used by investors. We calculate the per share amount for items included in continuing operations by using the effective tax rate utilized during the applicable reporting period and the weighted average number of shares outstanding for the period.

The following tables show the earnings per share effect of certain income and expense items:

(USD in thousands, except per share amounts)

	Pre tax	Tax	After tax	Shares	Per

Item 7a. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We have market risk with respect to foreign currency exchange rates and interest rates. The market risk is the potential loss arising from adverse changes in these rates as discussed below.

**Foreign Currency Exchange Rate Risk**

We have manufacturing plants and sales transactions worldwide and therefore are subject to foreign currency risk. This risk is composed of both potential losses from the translation of foreign currency financial statements and the remeasurement of foreign currency transactions. To manage this risk, we periodically enter into forward exchange contracts either to hedge the net assets of a foreign investment or to provide an economic hedge against future cash flows. The total net assets of non-U.S. operations and long-term intercompany loans denominated in nonfunctional currencies subject to potential loss amount to approximately \$622.4 million. The potential loss in fair value resulting from a hypothetical 10% adverse change in quoted foreign currency exchange rates amounts to \$62.2 million. Furthermore, related to foreign currency transactions, we have exposure to various nonfunctional currency balances totaling \$142.5 million. This amount includes, on an absolute basis, exposures to assets and liabilities held in currencies other than our local entity's functional currency. On a net basis, we had approximately \$28.7 million of foreign currency liabilities as of December 31, 2011. As currency rates change, these nonfunctional currency balances are revalued, and the corresponding adjustment is recorded in the income statement. A hypothetical change of 10% in currency rates could result in an adjustment to the income statement of approximately \$2.9 million. Actual results may differ.

**Interest Rate Risk**

We are exposed to interest rate fluctuations with respect to our variable rate debt, depending on general economic conditions.

On December 31, 2011, we had the following variable rate debt:

(in thousands, except interest rates)

**Short-term debt**

Notes payable, end of period interest rate of 1.30% \$424

**Long-term debt**

Credit agreement with borrowings outstanding, net of \$105.0 million fixed rate portion,  
at an end of period interest rate of 2.75% in 2011, due in 2015 82,000

Various notes and mortgages relative to operations principally outside the United States, at an average end  
of period rate of 3.02% in 2011, due in varying amounts through 2014 10,000

Total \$92,424

Assuming borrowings were outstanding for an entire year, an increase/decrease of one percentage point in weighted average interest rates would increase/decrease interest expense by \$0.9 million. To manage interest rate risk, we may periodically enter into interest rate swap agreements to effectively fix the interest rates on variable debt to a specific rate for a period of time.

**Item 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA**

INDEX TO CONSOLIDATED FINANCIAL STATEMENTS

Report of Independent Registered Public Accounting Firm 47

Consolidated Statements of Operations and Retained Earnings for the years ended December 31, 2011, 2010, and 2009 48

Consolidated Statements of Comprehensive Income for the years ended December 31, 2011, 2010, and 2009 49

Consolidated Balance Sheets as of December 31, 2011 and 2010 50

Consolidated Statements of Cash Flows for the years ended December 31, 2011, 2010, and 2009 51

Notes to Consolidated Financial Statements 52

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Albany International Corp.:

In our opinion, the consolidated financial statements listed in the accompanying index, present fairly, in all material respects, the financial position of Albany International Corp. and its subsidiaries at December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2011 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The accompanying notes are an integral part of the consolidated financial statements.

## Notes to Consolidated Financial Statements

### *1. Accounting Policies*

#### **Basis of Consolidation**

The consolidated financial statements include the accounts of Albany International Corp. and its subsidiaries (the Company, we, us, or our) after elimination of intercompany transactions. We have a 50% interest in an entity in Russia. The consolidated financial statements include our original investment in the entity, plus our share of undistributed earnings or losses, in the account "Investments in associated companies."

#### **Estimates**

The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates are used in accounting for, among other things, allowances for doubtful accounts, rebates and sales allowances, inventory allowances, pension benefits, goodwill and intangible assets, contingencies and other accruals. Our estimates are based on historical experience and on various other assumptions, which are believed to be reasonable under the circumstances. Due to the inherent uncertainty involved in making estimates, actual results reported in future periods may differ from those estimates. Estimates and assumptions are reviewed periodically, and the effect of any revisions are reflected in the consolidated financial statements in the period they are determined to be necessary.

#### **Revenue Recognition**

We record sales when persuasive evidence of an arrangement exists, delivery has occurred, title has been transferred, the selling price is fixed, and collectability is reasonably assured. We include in revenue any amounts invoiced for shipping and handling. The timing of revenue recognition is dependent upon the contractual arrangement with customers. These arrangements, which may include provisions for transfer of title and guarantees of workmanship, are specific to each customer. Some of these contracts provide for a transfer of title upon delivery, or upon reaching a specific date, while other contracts provide for title transfer to occur upon consumption of the product.

Effective January 1, 2011, we adopted a recent accounting pronouncement regarding multiple-element arrangements, which had the effect of accelerating the timing on revenue recognition on some contracts in the Albany Door Systems segment, which is now reported as a discontinued operation. As a result of adopting this accounting pronouncement, revenue and operating income for the first quarter of 2011 were increased by \$2.4 million and \$0.9 million, respectively. However, since the Albany Door Systems business is reported as a discontinued operation, the effect of adopting this accounting pronouncement does not affect results from continuing operations.

Products and services provided under long-term contracts represent a significant portion of sales in the Engineered Composites segment. We use the percentage of completion (actual cost to estimated cost) method for accounting for these projects. That method requires significant judgment and estimation, which could be considerably different if the underlying circumstances were to change. When adjustments in estimated contract revenues or costs are required, any changes from prior estimates are included in earnings in the current period.

The Engineered Composites segment also has long-term aerospace contracts under which there are two phases: a phase during which the production part is designed and tested, and a phase of supplying production parts. Certain costs are capitalized during the first phase, such as costs for engineering, equipment, and inventory, where recovery is probable. Revenue will be recognized during the second phase using a percentage of completion method.

Accumulated capitalized costs are written off when those costs are determined to be unrecoverable. Depending on the type of contract, we determine our percentage of completion using either the cost to cost method, or the units of delivery method.

We limit the concentration of credit risk in receivables by closely monitoring credit and collection policies. We record allowances for sales returns as a deduction in the computation of net sales. Such provisions are recorded on the basis of written communication with customers and/or historical experience. Any value added taxes that are imposed on sales transactions are excluded from net sales.

## **Cost of Goods Sold**

Cost of goods sold includes the cost of materials, provisions for obsolete inventories, labor and supplies, shipping and handling costs, depreciation of manufacturing facilities and equipment, purchasing, receiving, warehousing, and other expenses.

## **Selling, General, Technical, Product Engineering, and Research Expenses**

Selling, general, technical, and product engineering expenses are primarily comprised of wages, benefits, travel, professional fees, revaluation of trade foreign currency balances, and other costs, and are expensed as incurred. Provisions for bad debts are included in selling expense. Research expenses are charged to operations as incurred and consist primarily of compensation, supplies, and professional fees incurred in connection with intellectual property.

## **Restructuring Expense**

We may incur expenses related to restructuring of our operations, which could include employee termination costs, costs to consolidate or close facilities, or costs to terminate contractual relationships. Employee termination costs include the severance pay and social costs for periods after employee service is completed. Termination costs related to an ongoing benefit arrangement are recognized when the amount becomes probable and estimable. Termination costs related to a one-time benefit arrangement are recognized at the communication date to employees. Costs related to contract termination, relocation of employees, and the consolidation or the closure of facilities, are recognized when incurred.

## **Income Taxes**

Deferred income taxes are recognized for the tax consequences of temporary differences by applying enacted statutory tax rates applicable for future years to differences between financial statement and tax bases of existing assets and liabilities. The effect of tax rate changes on deferred taxes is recognized in the income tax provision in the period that includes the enactment date. A tax valuation allowance is established, as needed, to reduce net deferred tax assets to the amount expected to be realized. In the event it becomes more likely than not that some or all of the deferred tax asset allowances will not be needed, the valuation allowance will be adjusted.

## **Discontinued Operations**

The income/(loss) from discontinued operations includes operating income and expenses previously attributed to that business and, additionally, amounts previously reported as Unallocated expenses, and Other income/expense that were directly related to the divested business. Unallocated expenses attributed to the discontinued business include expenses related to global information systems. Interest expense is attributed to the discontinued business only when such expense results from direct third-party borrowings.

## **Earnings Per Share**

Net income or loss per share is computed using the weighted average number of shares of Class A Common Stock and Class B Common Stock outstanding during each year. Diluted net income per share includes the effect of all potentially dilutive securities.

## **Translation of Financial Statements**

Assets and liabilities of non-U.S. operations are translated at year-end rates of exchange, and the income statements are translated at the average rates of exchange for the year. Gains or losses resulting from translating non-U.S.

currency financial statements are recorded in other comprehensive income and accumulated in shareholders' equity in the caption Translation adjustments.

Gains or losses resulting from short-term intercompany loans and balances denominated in a currency other than the entity's local currency, forward exchange contracts that are not designated as hedges for accounting purposes, and futures contracts are generally included in income in Other (income)/expense, net. Gains and losses on long-term intercompany loans not intended to be repaid in the foreseeable future are recorded in other comprehensive income. Gains and losses resulting from other balances denominated in a currency other than the entity's local currency are recorded in Selling and general expenses.

The following table summarizes foreign currency transaction gains and losses recognized in the income statement:

(in thousands)	2011	2010	2009
(Gains)/losses included in:			
Selling and general expenses	(\$2,675)	(\$377)	\$2,715
Other (income)/expense, net		(84)	(4,626)
Total transaction (gains)/losses	(\$2,759)	(\$5,003)	\$462

### Cash and Cash Equivalents

Cash and cash equivalents consist of cash and highly liquid short-term investments with original maturities of three months or less.

### Inventories

Inventories are stated at the lower of cost or market, and are valued at average cost, net of reserves. We record a provision for obsolete inventory based on the age and category of the inventories. As of December 31, 2011 and 2010, inventories consisted of the following:

(in thousands)	2011	2010
Raw materials	\$30,769	\$29,679
Work in process	39,552	43,200
Finished goods	63,328	70,678
Total inventories	\$133,649	\$143,557

### Property, Plant and Equipment

Property, plant and equipment are recorded at cost. Depreciation is recorded using the straight-line method over the estimated useful lives of the assets for financial reporting purposes; in some cases, accelerated methods are used for income tax purposes. Significant additions or improvements extending assets' useful lives are capitalized; normal maintenance and repair costs are expensed as incurred. The cost of fully depreciated assets remaining in use is included in the respective asset and accumulated depreciation accounts. When items are sold or retired, related gains or losses are included in net income.

Computer software purchased for internal use, at cost, is amortized on a straight-line basis over five to eight years, depending on the nature of the asset, after being placed into service, and is included in property, plant, and equipment. In 2006, we initiated a project to migrate our global enterprise resource planning (ERP) system to SAP and the implementation was completed in 2011. We capitalize internal and external costs incurred related to the software development stage. Capitalized salaries, travel, and consulting costs related to the software development amounted to \$2.3 million in 2011 and \$4.2 million in 2010.

We review the carrying value of property, plant and equipment and other long-lived assets for impairment whenever events and circumstances indicate that the carrying value of an asset may not be recoverable from the estimated future cash flows expected to result from its use and eventual disposition.

## **Goodwill, Intangibles, and Other Assets**

Goodwill and intangible assets with indefinite useful lives are not amortized, but are tested for impairment at least annually. Goodwill represents the excess of the purchase price over the fair value of the net tangible and identifiable intangible assets acquired in each business combination. Our reporting units are consistent with our operating segments.

Determining the fair value of a reporting unit requires the use of significant estimates and assumptions, including revenue growth rates, operating margins, discount rates, and future market conditions, among others. Annually, the company performs a qualitative assessment for each of its reporting units to determine if the two step process for impairment testing is required. If the Company determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, the company evaluates the recoverability of goodwill using a two-step impairment test approach at the reporting unit level. In addition, goodwill and other long-lived assets are reviewed for impairment whenever events, such as significant changes in the business climate, plant closures, changes in product offerings, or other circumstances indicate that the carrying amount may not be recoverable. We are continuing to amortize certain patents, trade names, customer contracts, and technology assets that have finite lives.

We have an investment in a company that is accounted for under the equity method of accounting and is reported as Investments in associated companies. We perform regular reviews of the financial condition of the investee to determine if our investment is other than temporarily impaired. If the financial condition of the investee were to no longer support their valuation, we would record an impairment provision.

## **Cash Surrender Value of Life Insurance**

We were the owner and beneficiary of life insurance policies on certain present and former employees. The cash surrender value of the policies generated income that was reported as a reduction to selling and general expenses. The rate of return on the policies varies with market conditions and was approximately 5.2% in 2009. In 2010, we converted the cash surrender value of these policies to cash by surrendering the policies for \$49.3 million. Due to the timing of our liquidation, there was no return on these policies during 2010. We reported the cash surrender value of life insurance as a separate noncurrent asset on the Consolidated Balance Sheets.

## **Stock-Based Compensation**

As described in Note 17, we have stock-based compensation plans for key employees. Stock options are accounted for in accordance with applicable guidance for the modified prospective transition method of share-based payments. No options have been granted since 2002.

In 2011, shareholders approved the Albany International 2011 Incentive Plan, replacing the similar 2005 Incentive Plan approved by shareholders in 2005. Awards granted to date under these plans provide key members of management with incentive compensation based on achieving certain performance targets. Awards under these plans have had performance periods of from one to three years. Awards with one-year performance periods have been payable in full after the performance period, or over a three-year period following the performance period, partly in cash and partly in shares of Class A Common Stock. Awards with a three-year performance period have been payable in full after the performance period. These awards are measured at fair value as of the end of each reporting period. If a person terminates employment prior to the award becoming fully vested, the person will forfeit all or a portion of the incentive compensation award. Expense associated with these awards is recognized over the vesting period, which includes the year for which performance targets are measured and may, if payment is made over three years, include the two subsequent years.

In 2008, we decided to use our Class A Common Stock to pay portions of incentive compensation earned in that year, in lieu of making cash payments. Accordingly, shares were distributed to covered employees in 2009.

### **Derivatives**

We use derivatives from time to time to reduce potentially large adverse effects from changes in currency exchange rates and interest rates. We monitor our exposure to these risks and evaluate, on an ongoing basis, the risk of potentially large adverse effects versus the costs associated with hedging such risks.

We use interest rate swaps in the management of interest rate exposures and foreign currency derivatives in the management of foreign currency exposure related to assets and liabilities (including net investments in subsidiaries located outside the U.S.) denominated in foreign currencies. When we enter into a derivative contract, we make a determination whether the transaction is deemed to be a hedge for accounting purposes. For those contracts

deemed to be a hedge, we formally document the relationship between the derivative instrument and the risk being hedged. In this documentation, we specifically identify the asset, liability, forecasted transaction, cash flow, or net investment that has been designated as the hedged item, and evaluate whether the derivative instrument is expected to reduce the risks associated with the hedged item. To the extent these criteria are not met, we do not use hedge accounting for the derivative.

All derivative contracts are recorded in the balance sheet at fair value. For transactions that are designated as hedges, we perform an evaluation of the effectiveness of the hedge. To the extent that the hedge is effective, changes in the fair value of the hedge are recorded, net of tax, in other comprehensive income. We measure the effectiveness of hedging relationships both at inception and on an ongoing basis. The ineffective portion of a hedge, if any, and changes in the fair value of a derivative not deemed to be a hedge, are recorded in Other (income)/expense, net.

For derivatives that are designated and qualify as hedges of net investments in subsidiaries located outside the United States, changes in the fair value of derivatives are reported in other comprehensive income as part of the Cumulative translation adjustment.

### **Pension and Postretirement Benefit Plans**

As described in Note 4, we have pension and postretirement benefit plans covering substantially all employees. Our defined benefit pension plan in the United States was closed to new participants as of October 1998 and, as of February 2009, benefits accrued under this plan were frozen. The plans are generally trustee or insured, and accrued amounts are funded as required in accordance with governing laws and regulations. We have provided certain postretirement medical, dental, and life insurance benefits to certain retirees in the United States and Canada. The annual expense and liabilities recognized for defined benefit pension plans and postretirement benefit plans are developed from actuarial valuations. Inherent in these valuations are key assumptions, including discount rates and expected return on plan assets, which are updated on an annual basis at the beginning of each fiscal year. We consider current market conditions, including changes in interest rates, in making these assumptions. Discount rate assumptions are based on the population of plan participants and a mixture of high-quality fixed-income investments for which the average maturity approximates the average remaining service period of plan participants. The assumption for expected return on plan assets is based on historical and expected returns on various categories of plan assets.

### **Reportable Segments**

In accordance with applicable disclosure guidance for enterprise segments and related information, the internal organization that is used by management for making operating decisions and assessing performance is used as the source of our reportable segments. The reportable segments, which are described in more detail in Note 3, are Paper Machine Clothing, Engineered Fabrics, Engineered Composites, and PrimaLoft® Products. In the determination of segment operating income, we exclude expenses for Research and Development, and Unallocated expenses, which consist primarily of corporate headquarters and global information systems costs.

### **Recent Accounting Pronouncements**

In October 2009, the Financial Accounting Standards Board (FASB) amended authoritative guidance related to accounting and disclosure of revenue recognition for multiple-element arrangements. This guidance provides principles for allocation of consideration among multiple elements, allowing more flexibility in identifying and accounting for separate deliverables under an arrangement. This guidance introduces an estimated selling price method for allocating revenue to the elements of a bundled arrangement if vendor-specific objective evidence or third-party evidence of selling price is not available, and significantly expands related disclosure requirements. We adopted this pronouncement on January 1, 2011, and it resulted in the recognition of additional revenue and operating income in the Albany Doors reportable segment, which is now reported as a discontinued operation.

In May 2011, the Financial Accounting Standards Board (FASB) amended authoritative guidance related to common fair value measurements and disclosure requirements. This pronouncement was issued to provide a consistent definition of fair value and ensure that the fair value measurement and disclosure requirements are similar between U.S. GAAP and IFRS. This pronouncement changes certain fair value measurement principles and enhances the disclosure requirements, particularly for level 3 fair value measurements, and is effective for reporting periods beginning on or after December 15, 2011. The adoption of this guidance is not expected to have a material effect on our financial statements.

In June and December 2011, the FASB issued guidance that eliminates the option to report other comprehensive income and its components in the statement of changes in stockholders' equity and requires an entity to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement or in two separate but consecutive statements. This pronouncement is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The adoption of this guidance concerns presentation and disclosure only and will not have a material impact on our financial statements.

In September 2011, the FASB issued guidance intended to reduce the cost and complexity of the annual goodwill impairment test by providing entities an option to perform a "qualitative" assessment to determine whether further impairment testing is necessary. Annually, the company performs a qualitative assessment for each of its reporting units to determine if the two step process for impairment testing is required. If the Company determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, the company evaluates the recoverability of goodwill using a two-step impairment test approach at the reporting unit level. This pronouncement is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of this guidance is not expected to have a material effect on our financial statements.

## ***2. Discontinued Operations***

On October 27, 2011 we entered into a contract to sell the assets and liabilities of our Albany Door Systems business to Assa Abloy AB for \$130 million. Closing of the transaction occurred on January 11, 2012. Under the terms of the contract, Assa Abloy AB acquired our equity ownership of Albany Doors Systems GmbH in Germany, Albany Door Systems AB in Sweden, and other ADS affiliates in Germany, France, the Netherlands, Turkey, Poland, Belgium, New Zealand, and other countries, as well as the remaining ADS business assets, most of which are located in the United States, Australia, China, and Italy.

In July 2008, we closed on the sale of our Filtration Technologies business, the principal operations of which were in Gosford, Australia, and Zhangjiagang, China. At closing, we received approximately \$45.0 million, which resulted in a pretax gain of \$5.4 million. During 2009, the purchaser asserted that various working capital items included in the sale were improperly valued at the time of sale. As a result, without admitting liability, we returned a portion of the original \$45.0 million purchase price, in exchange for a broad release of future claims under the purchase agreement or related to the business, including claims of breach of representations or warranties, related indemnity obligations, and certain other postclosing obligations related to the business. A charge of \$10.0 million was recorded in 2009, which was the accounting period during which the likelihood of an unfavorable outcome became probable and estimable.

In accordance with the applicable accounting guidance for discontinued businesses, the associated results of operations and financial position are reported separately in the accompanying Consolidated Statements of Operations and Balance Sheets. Cash flows of the discontinued operations were combined with cash flows from continuing operations in the consolidated statements of cash flows.

The table below summarizes operating results of the discontinued operations:

(in thousands)	2011	2010	2009
Net sales	\$184,142	\$148,587	\$133,423
Income/(Loss) from operations of discontinued business before tax	15,636	9,497	(2,061)

(Loss) on disposition of discontinued operations	-	-	(10,000)
Income tax expense/(benefit)	7,232	3,337	(64)

Income tax expense in 2011 includes a charge of \$2.6 million pertaining to cash repatriations that will occur in 2012 as a result of the sale of the Albany Doors business.

The table below summarizes major categories of assets and liabilities for the discontinued Albany Doors business:

(in thousands)	2011	2010
Assets of Discontinued Operations:		
Cash	\$ 13,545	\$ 4,376
Accounts receivable, net of allowance for doubtful accounts	35,120	28,202
Inventories	12,661	12,614
Property, plant and equipment, net	6,344	6,169
Goodwill and intangibles	39,227	41,024
Other current and noncurrent assets	5,114	5,056
Total assets of discontinued operation	\$ 112,011	\$ 97,441
Liabilities of Discontinued Operations:		
Accounts payable	\$ 8,300	\$ 8,492
Accrued liabilities	10,883	10,628
Other current liabilities	1,763	383
Liabilities for defined benefit pension plans	9,513	8,152
Other noncurrent liabilities	4,552	4,033
Total liabilities of discontinued operation	\$ 35,011	\$ 31,688

### ***3. Reportable Segments and Geographic Data***

In accordance with applicable disclosure guidance for enterprise segments and related information, the internal organization that is used by management for making operating decisions and assessing performance is used as the source of our reportable segments.

The accounting policies of the segments are the same as those described in Note 1. We do not allocate research costs and corporate headquarters expenses to the segments because the decision-making for the majority of these expenses does not reside within the segments. Corporate headquarters (unallocated) expenses include wages and benefits for headquarters personnel, costs related to information systems development and support, and professional fees related to legal, audit, and other activities.

During the third quarter of 2011, we announced plans to combine our Paper Machine Clothing and Engineered Fabrics operating and reporting segments into a single business segment. The combined segment will be referred to in future reports as "Machine Clothing". This report presents separate segment results for Paper Machine Clothing and Engineered Fabrics through December 31, 2011, by which date these two groups had become fully integrated.

The Paper Machine Clothing segment includes paper machine clothing and process belts used in the manufacture of paper and paperboard. We design, manufacture, and market Paper Machine Clothing for each section of the paper machine. We manufacture and sell more paper machine clothing worldwide than any other company. Paper Machine Clothing consists of large continuous belts of custom-designed and custom-manufactured engineered fabrics that are installed on paper machines and carry the paper stock through each stage of the paper production process. Paper Machine Clothing is a consumable product of technologically sophisticated design that utilizes polymeric materials in a complex structure.

The Engineered Fabrics segment derived its revenue from various industries that use fabrics and belts for industrial applications other than the manufacture of paper and paperboard. Product lines within this segment include nonwovens, which includes fabrics and belts used in the manufacture of diapers as well as personal care and

household wipes, markets that are adjacent to the paper industry, and the building products market.

The AEC segment serves primarily the aerospace industry, with custom-designed composite and advanced composite parts for static and dynamic applications. AEC leverages our core competencies in advanced textiles and materials, including specialty materials and composite structures for aircraft and other applications.

58

The PrimaLoft segment includes sales of insulation for outdoor clothing, gloves, footwear, sleeping bags, and home furnishings. The segment has operations in the United States, Europe, and Asia.

The following tables show data by reportable segment, reconciled to consolidated totals included in the financial statements:

(in thousands)	2011	2010	2009
Net sales			
Paper Machine Clothing	\$657,569	\$623,555	\$609,897
Engineered Fabrics	81,642	77,465	74,908
Engineered Composites	48,076	41,867	33,824
PrimaLoft® Products	27,409	22,882	18,992
Consolidated total	\$814,696	\$765,769	\$737,621
Depreciation and amortization			
Paper Machine Clothing	45,831	43,979	49,864
Engineered Fabrics	2,350	5,057	5,902
Engineered Composites	4,959	4,277	4,591
PrimaLoft® Products	391	373	427
Research and Unallocated expenses	10,672	7,131	7,055
Consolidated total	\$64,203	\$60,817	\$67,839
Operating income/(loss)			
Paper Machine Clothing	\$165,528	\$156,561	\$42,624
Engineered Fabrics	11,230	9,101	3,047
Engineered Composites	(4,204)	(9,176)	(6,653)
PrimaLoft® Products	8,540	6,610	3,689
Research expense	(29,007)	(26,064)	(23,849)
Unallocated expenses	(69,014)	(65,747)	(54,984)
Operating income/(loss) before reconciling items	83,073	71,285	(36,126)
Reconciling items:			
Interest income	2,027	1,165	741
Interest expense	(20,148)	(18,405)	(21,368)
Other income/(expense), net	(2,720)	884	49,700
Consolidated income/(loss) from continuing operations before income taxes	\$62,232	\$54,929	(\$7,053)

The table below presents restructuring costs by reportable segment (also see Note 5):

(in thousands)	2011	2010	2009
Paper Machine Clothing	\$3,260	\$3,705	\$66,941
Engineered Fabrics	2,420	1,057	4,311
Engineered Composites	57	930	291
PrimaLoft® Products	-	-	61
Unallocated expenses	3,580	(1,945)	(3,430)
Consolidated total	\$9,317	\$3,747	\$68,174

In the measurement of invested capital utilized by each reportable segment, we include accounts receivable, inventories, net property, plant and equipment, intangibles and goodwill. Excluded from invested capital are cash, tax related assets, prepaids and other current assets, investments in associated companies, other assets, and assets from discontinued businesses. The following table presents invested capital and capital expenditures by reportable segment:

(in thousands)	2011	2010	2009
<b>Invested capital</b>			
Paper Machine Clothing	\$667,189	\$702,547	\$742,662
Engineered Fabrics	45,953	70,588	78,234
Engineered Composites	80,916	74,332	68,088

#### ***4 .. Pensions and Other Postretirement Benefit Plans***

##### *Pension Plans*

The Company has defined benefit pension plans covering certain U.S. and non-U.S. employees. The U.S. qualified defined benefit pension plan has been closed to new participants since October 1998 and, as of February 2009, benefits accrued under this plan were frozen, resulting in a charge of \$2.5 million that was recorded in 2008. As a result of the freeze, employees covered by the pension plan will receive, at retirement, benefits already accrued through February 2009, but no new benefits accrue after that date. Benefit accruals under the U.S. Supplemental Executive Retirement Plan ("SERP") were similarly frozen. The U.S. pension plan accounts for 67% of consolidated pension plan assets, and 60% of consolidated pension plan obligations. The eligibility, benefit formulas, and contribution requirements for plans outside of the U.S. vary by location.

##### *Other Postretirement Benefits*

In addition to providing pension benefits, the Company provides various medical, dental, and life insurance benefits for certain retired United States employees. U.S. employees hired prior to 2005 may become eligible for these benefits if they reach normal retirement age while working for the Company. Benefits provided under this plan are subject to change. Retirees share in the cost of these benefits. Effective January 2005, any new employees who wish to be covered under this plan will be responsible for the full cost of such benefits, except for life insurance benefits, which continue to be provided. The Company also provides certain postretirement life insurance benefits to retired employees in Canada. As of December 31, 2011, the accrued postretirement liability was \$77.9 million in the U.S. and \$1.1 million in Canada. The Company accrues the cost of providing postretirement benefits during the active service period of the employees. The Company currently funds the plan as claims are paid.

Accounting guidance requires the recognition of the funded status of each defined benefit and other postretirement benefit plan. Each overfunded plan is recognized as an asset and each underfunded plan is recognized as a liability. Company pension plan data for U.S. and non-U.S. plans has been combined for both 2011 and 2010, except where indicated below.

The Company's pension and postretirement benefit costs and benefit obligations are based on actuarial valuations that are affected by many assumptions, the most significant of which are the assumed discount rate, expected rate of return on pension plan assets, and mortality. Each of the assumptions is reviewed and updated annually, as appropriate. The assumed rates of return for pension plan assets are determined for each major asset category based on historical rates of return for assets in that category and expectations of future rates of return based, in part, on simulated future capital market performance. The assumed discount rate is based on yields from a portfolio of currently available high-quality fixed-income investments with durations matching the expected future payments, based on the demographics of the plan participants and the plan provisions.

The benefit obligation as of December 31, 2011 and 2010, as well as pension expense for those years, was calculated using the RP-2000 Combined Healthy Mortality table projected to 2016 using Scale AA with phase-out to the IRS Static Mortality table.

Gains and losses arise from changes in the assumptions used to measure the benefit obligations, and experience different from what had been assumed, including asset returns different than what had been expected. The Company amortizes gains and losses in excess of a "corridor" over the average future service of the plan's current participants. The corridor is defined as 10% of the greater of the plan's projected benefit obligation or market-related value of plan assets. The market-related value of plan assets is also used to determine the expected return on plan assets component of net periodic cost. The Company's market-related value for its U.S. plan is measured by first determining the absolute difference between the actual and the expected return on the plan assets. The absolute

difference in excess of 5% of the expected return is added to the market-related value over two years; the remainder is added to the market-related value immediately.

To the extent the Company's unrecognized net losses and unrecognized prior service costs, including the amount recognized through accumulated other comprehensive income, are not reduced by future favorable plan experience, they will be recognized as a component of the net periodic cost in future years. The Company's unrecognized net loss in its pension plans is primarily attributable to recent declines in interest rates and unfavorable investment returns in 2008.

The Company has classified \$3.6 million of its accrued pension liability as a current liability at December 31, 2011. Company contributions into pension investment funds totaled \$37.2 million in 2011, and the Company also paid \$4.0 million directly to retirees. For U.S. pension funding purposes, the Company uses the plan's IRS-basis current liability as its funding target, which is determined based on mandated assumptions. Weak investment returns and low interest rates could result in equal or greater contributions to the pension plans in future years.

The following table sets forth the plan benefit obligations:

(in thousands)	As of December 31, 2011		As of December 31, 2010	
	Pension plans	Other postretirement benefits	Pension plans	Other postretirement benefits
Benefit obligation, beginning of year	\$374,115	\$72,137	\$353,971	\$73,208
Service cost	3,117	931	3,572	910
Interest cost	19,958	3,869	19,645	4,054
Plan participants' contributions	387	-	378	607

Rate of compensation increase - U.S. plan	-	-	-	3.00%	3.00%	3.00%
Rate of compensation increase - non-U.S. plans	3.47%	3.42%	3.24%	-	-	-
Health care cost trend rate (U.S. and non-U.S. plans):						
Initial rate	-	-	-	-	-	-
Ultimate rate	-	-	-	-	-	-
Years to ultimate	-	-	-	-	-	-

Other changes in plan assets and benefit obligations recognized in other comprehensive income during 2011 were as follows:

(in thousands)	Pension plan	Other postretirement benefits
Settlements	\$ (327)	\$ -
Exchange rate effect	(1,204)	-
Current year actuarial loss	39,713	6,977
Asset loss (gain)	(18,355)	-
Amortization of actuarial (loss)	(5,672)	(3,022)
Amortization of prior service (cost)/credit	(37)	3,666
Amortization of transition (obligation)	(83)	-
Currency impact	-	(3)
Total recognized in other comprehensive income	\$14,035	\$7,618
Total recognized in net periodic benefit cost and other comprehensive income	\$27,604	\$12,719

The estimated amounts that will be amortized from accumulated other comprehensive income into net periodic benefit cost in 2012 are as follows:

(in thousands)	Total pension	Total postretirement benefits
Actuarial loss	\$7,092	\$3,215
Prior service cost/(benefit)	35	(3,666)
Transition obligation	74	-
Total	\$7,201	(\$451)

#### *Investment Strategy*

Our investment strategy for pension assets differs for the various countries in which we have defined benefit pension plans. Some of our defined benefit plans do not require funded trusts and, in those arrangements, the Company funds the plans on a “pay as you go” basis. The largest of the funded defined benefit plans is the United States plan, which accounts for 67% of the Company’s pension plan assets.

#### United States plan:

During 2009, we changed our investment strategy for the United States pension plan by adopting a liability-driven investment strategy. Under this arrangement, the Company seeks to invest in assets that track closely to the discount rate that is used to measure the plan liabilities. Accordingly, the plan assets are primarily debt securities. The change in investment strategy is reflective of the Company’s 2008 decision to freeze benefit accruals under the plan.

#### Non United States plans:

For the countries in which the Company has funded pension trusts, the investment strategy is to achieve a competitive, total investment return, achieving diversification between and within asset classes and managing other risks. Investment objectives for each asset class are determined based on specific risks and investment opportunities identified. Actual allocations to each asset class vary from target allocations due to periodic investment strategy

changes, market value fluctuations, the length of time it takes to fully implement investment allocation positions, and the timing of benefit payments and contributions.

65

*Fair-Value Measurements*

The following tables present plan assets as of December 31, 2011 and 2010, using the fair-value hierarchy, which has three levels based on the reliability of inputs used, as described in Note 13:

(in thousands)	Total fair value at December 31, 2011	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Common stocks	\$48,993	\$48,993	\$ -	\$ -
Debt securities	243,839	-	243,839	-
Insurance contracts	2,361	-	-	2,361
Limited partnerships	8,676	-	-	8,676
Hedge funds	557	-	-	557
Cash and short-term investments	232	232	-	-
Total plan assets	\$304,658	\$49,225	\$243,839	\$11,594

(in thousands)	Total fair value at December 31, 2010	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Common stocks	\$44,181	\$44,181	\$ -	\$ -
Debt securities	190,170	-	190,170	-
Insurance contracts	2,050	-	-	2,050
Limited partnerships	9,115	-	-	9,115
Hedge funds	10,699	-	-	10,699
Cash and short-term investments	6,161	6,161	-	-
Total plan assets	\$262,376	\$50,342	\$190,170	\$21,864

The following tables present a reconciliation of Level 3 assets held during the years ended December 31, 2011 and 2010:

(in thousands)	December 31, 2010	Net realized (losses)/ gains	Net unrealized gains/(losses)	Net purchases, issuances and settlements	Net transfers (out of) Level 3	December 31, 2011
Insurance contracts	\$2,050	\$ -	\$311	\$ -	\$ -	\$2,361
Limited partnerships	9,115	107	235	-	(781)	8,676
Hedge funds	10,699	(19)	(132)	-	(9,991)	557
Total	\$21,864	\$88	\$414	\$0	(\$10,772)	\$11,594

(in thousands)	December 31, 2009	Net realized (losses)/gains	Net unrealized gains/(losses)	Net purchases, issuances and settlements	Net transfers (out of) Level 3	December 31, 2010
Insurance contracts	\$1,549	\$ (25)	\$203	\$426	(\$103)	\$2,050
Limited partnerships	9,066	(2)	1,247	-	(1,196)	9,115
Hedge funds	19,594	1,194	928	-	(11,017)	10,699
Total	\$30,209	\$1,167	\$2,378	\$426	(\$12,316)	\$21,864

The asset allocation for the Company's U.S. and non-U.S. pension plans for 2011 and 2010, and the target allocation for 2012, by asset category, are as follows:

Asset category	United States Plan			Non-U.S. Plans		
	Target	Percentage of plan assets at plan		Target	Percentage of plan assets at plan	
	Allocation	measurement		Allocation	measurement	
	date	date	date	date	date	date
	2012	2011	2010	2012	2011	2010
Equity securities	—	—	—	51 %	49 %	51 %
Debt securities	100 %	92 %	86 %	43 %	45 %	46 %
Real estate	—	2 %	3 %	3 %	3 %	—
Cash	—	3 %	3 %	—	—	—
Other (1)	—	3 %	8 %	3 %	3 %	3 %
	100 %	100 %	100 %	100 %	100 %	100 %

Other includes hedged equity and absolute return strategies, and private equity. The Company has procedures to (1) closely monitor the performance of these investments and compares asset valuations to audited financial statements of the funds.

The targeted plan asset allocation is based on an analysis of the actuarial liabilities, a review of viable asset classes, and an analysis of the expected rate of return, risk, and other investment characteristics of various investment asset classes.

At the end of 2011 and 2010, the projected benefit obligation, accumulated benefit obligation, and fair value of plan assets for pension plans with projected benefit obligation in excess of plan assets and for pension plans with an accumulated benefit obligation in excess of plan assets were as follows:

(in thousands)	Projected and accumulated benefit obligation exceeds plan assets	
	2011	2010
Projected benefit obligation	\$376,595	\$341,870
Accumulated benefit obligation	363,228	325,602
Fair value of plan assets	267,594	227,784

Information about expected cash flows for the pension and other benefit obligations are as follows:

(in thousands)	Pension plans	Other postretirement benefits
Expected employer contributions in the next fiscal year	\$37,144	\$5,949
Expected benefit payments		
2012	\$23,160	\$5,949
2013	24,087	5,765
2014	23,551	5,577
2015	23,656	5,354
2016	24,094	5,174
2017-2021	123,344	24,195

## 5. Restructuring

In 2011, we incurred restructuring costs principally due to actions to merge the Paper Machine Clothing and Engineered Fabrics (EF) reportable segments, to reduce Paper Machine Clothing manufacturing capacity in the United States, and to move the Company headquarters offices from New York to New Hampshire. Restructuring costs totaled \$9.3 million, including a \$1.8 million provision for impairment of property and equipment at the Company's location in Albany, New York. The Company expects to incur additional restructuring expense in 2012 related to the merger of Paper Machine Clothing and EF, and the movement of the Company headquarters, but is presently unable to determine the amount of additional expense that may be incurred. On February 23, 2012, we announced that our subsidiary in France has initiated consultation with the employee works council in France regarding a proposal to cease operations at the Company's facility in St. Junien. The consultation will be completed in accordance with applicable French legislation.

Restructuring expenses for 2009 and 2010 were the result of previously announced restructuring and performance improvement plans affecting each of our reportable segments. The restructuring activities were driven by the need for us to balance our manufacturing capacity with anticipated demand, improving efficiency in all aspects of our business, and to strengthen our competitive position. We also took actions to reduce costs and to create process efficiencies within STG&R.

Restructuring expenses totaled \$68.2 million in 2009 and \$3.7 million in 2010. Restructuring expense was reduced by pension and postretirement net curtailment gains of \$6.6 million in 2009 and \$1.2 million in 2010. Paper Machine Clothing restructuring activities in 2009 and 2010 included closure or significant reductions of manufacturing in Canada, France, Finland, Germany, Sweden, Australia, and the United States. Restructuring expense included provisions for property, plant, and equipment impairments of \$1.2 million in 2010, and \$8.6 million in 2009. Restructuring expense in 2009 included \$5.1 million in impairment provisions related to a joint venture investment located in South Africa. The Engineered Fabrics business was affected by the announcement of a plan in June 2009 to discontinue manufacturing at its plant in Gosford, Australia, and to transfer production to its St. Stephen, South

Carolina, manufacturing facility. The actions as part of that plan resulted in net restructuring charges in our EF segment of \$4.3 million in 2009 and \$1.1 million in 2010. Restructuring expense in 2009 included a \$4.8 million charge for the impairment of plant and equipment.

The following table summarizes charges reported in the Statements of Operations and Retained Earnings under Restructuring and other, net:

<b>Year ended December 31, 2011</b>	<b>Total restructuring costs incurred</b>	<b>Termination and other costs</b>	<b>Impairment of plant and equipment</b>	<b>Benefit plan curtailment/settlement</b>
<b>(in thousands)</b>				
Paper Machine Clothing	\$3,260	\$3,260	\$ -	\$ -

**6. Other Expense/(income), net**

The components of other (income)/expense, net, are:

<b>(in thousands)</b>	2011	2010	2009
Currency transactions	(\$84)	(\$4,626)	(\$2,253)
Amortization of debt issuance costs and loan origination fees	1,837	1,704	1,880
Letter of credit fees	1,479	1,831	1,475
Gain on early retirement of debt	-	-	(51,959)
Other	(512)	207	1,157
Total	\$2,720	(\$884)	(\$49,700)

**7. Income Taxes**

The following tables present components of income tax expense and income/(loss) before income taxes on continuing operations:

(in thousands)	2011	2010	2009
Income tax based on income from continuing operations, at estimated tax rates of 34%, 31%, and 20%, respectively	\$21,011	\$16,904	(\$11,730)
Provision for gain on extinguishment of debt	-	-	20,276
Redemption of life insurance policies	-	9,382	-
Income tax from continuing operations before discrete items	21,011	26,286	8,546
Discrete tax expense/(benefit):			
Change in tax status	(3,344)	(161)	1,848
Enacted legislation change	115	324	-
Adjustments to prior period tax liabilities	(1,624)	100	(1,420)
Provision for/resolution of tax audits and contingencies, net	289	-	5,267
Provision for/adjustment to beginning of year valuation allowances	22,798	-	(6)
Repatriation of non-U.S. prior years' earnings	-	(2,262)	-
Adjustment due to a prior year error	(3,553)	-	-
Other discrete tax adjustments, net	87	(742)	205
Total income tax expense from continuing operations	\$35,779	\$23,545	\$14,440

Income tax expense in 2011 includes a favorable adjustment of \$3.5 million to correct errors from periods prior to 2006. The Company does not believe that the corrected item is or was material to any previously reported quarterly or annual financial statements. As a result, the Company has not restated its previously issued annual or quarterly financial statements.

(in thousands)	2011	2010	2009
Income/(loss) before income taxes:			
U.S.	(\$3,677)	\$3,836	\$31,171
Non-U.S.	65,909	51,093	(38,224)
	\$62,232	\$54,929	(\$7,053)
Income tax provision:			
Current:			
Federal	(\$7,157)	(\$602)	\$0
State	364	289	500
Non-U.S.	18,701	9,748	6,645
	\$11,908	\$9,435	\$7,145
Deferred:			
Federal	\$3,519	\$11,838	\$15,084
State	113	1,893	2,574
Non-U.S.	20,239	379	(10,363)
	\$23,871	\$14,110	\$7,295
Total provision for income taxes from continuing operations	\$35,779	\$23,545	\$14,440

The significant components of deferred income tax expense are as follows:

(in thousands)	2011	2010	2009
Net effect of temporary differences	\$ 1,044	\$ 7,882	\$16,724
Provision for gain on extinguishment of debt	-	(20,276)	20,276
Changes in tax status	(3,344)	(161)	1,848
Enacted changes in tax laws and rates	115	324	-
Adjustments to beginning-of-the-year valuation allowance balance for changes in circumstances	22,798	-	(6)
Net benefit of operating loss carryforwards	3,258	26,341	(31,547)
Total	\$ 23,871	\$14,110	\$7,295

A reconciliation of the U.S. federal statutory tax rate to the Company's effective income tax rate is as follows:

	2011	2010	2009
U.S. federal statutory tax rate	35.0	%35.0	%35.0
State taxes, net of federal benefit	0.7	3.4	(23.7)
Other non-U.S. local income taxes	2.0	2.5	36.7
Foreign rate differential	(22.0)	(28.2)	(93.5)
Changes in prior year non-U.S. estimated taxes	5.0	(4.6)	7.7
U.S. tax on non-U.S. earnings and foreign withholding	11.1	6.8	(28.0)
Statutory tax rate changes	0.2	0.6	-
Net change to income tax contingencies	2.0	1.8	(98.2)
Research and development and other tax credits	(1.9)	(3.4)	22.7
