2 SEMI-ANNUAL REPORT FEBRUARY 28, 2013	

Dear Shareholder

Despite a number of headwinds, risk assets generated strong returns during the 6- and 12-month periods as investors sought meaningful yields in the ongoing low-interest-rate environment. About this time one year ago, the European debt crisis returned to the headlines as unresolved policy decisions left it unclear as to how troubled peripheral countries would finance their sovereign debt, causing yields to soar. In the second quarter of 2012, political instability in Greece and severe deficit and liquidity problems in Spain raised the specter of a full-blown euro collapse. Alongside the drama in Europe, investors were discouraged by gloomy economic reports from various parts of the world. A slowdown in China, a key powerhouse for global growth, emerged as a particular concern. As the outlook for the global economy worsened, however, investors grew increasingly optimistic that the world s largest central banks would soon intervene to stimulate growth. This theme, along with the announcement of the European Central Bank s (ECB s) firm commitment to preserve the euro currency bloc, drove most asset classes higher through the summer. Policy relief came in early September, when the ECB announced its decision to support the eurozone s debt-laden countries with unlimited purchases of short term sovereign debt. Days later, the US Federal Reserve announced its own much-anticipated stimulus package.

Although financial markets world-wide were buoyed by accommodative monetary policies, risk assets weakened in the fall. Global trade began to slow as many European countries fell into recession and growth continued to decelerate in China, where a once-a-decade leadership change compounded uncertainty. In the United States, stocks slid on lackluster corporate earnings reports and market volatility rose in advance of the US Presidential election. In the post-election environment, investors grew increasingly concerned over the fiscal cliff, the automatic tax increases and spending cuts that had been scheduled to take effect at the beginning of 2013. There was widespread fear that the fiscal cliff would push the United States into recession unless politicians could agree upon alternate measures to reduce the deficit before the end of 2012. Worries that bipartisan gridlock would preclude a timely budget deal triggered higher levels of volatility in financial markets around the world in the months leading up to the last day of the year. Ultimately, the worst of the fiscal cliff was averted with a last-minute tax deal; however, decisions relating to spending cuts and the debt ceiling continued to weigh on investors minds.

Investors shook off the nerve-wracking finale to 2012 and began the New Year with a powerful equity rally. Money that had been pulled to the sidelines amid year-end tax-rate uncertainty poured back into the markets in January. Key indicators signaled modest but broad-based improvements in the world s major economies, particularly in China. Global equities soared through January while rising US Treasury yields pressured high-quality fixed income assets. However, bond markets strengthened in February when economic momentum slowed and investors toned down their risk appetite. US stocks continued to rise, but at a more moderate pace. Uncertainty about how long the Federal Reserve would maintain its easing bias drove high levels of volatility later in the month, but these fears abated as the budget sequester (automatic spending cuts scheduled to take effect March 1) began to appear imminent and was deemed likely to deter any near-term curtailment of monetary easing policies. Outside the United States, equities largely declined as political uncertainty escalated after the Italian presidential election ended in a stalemate.

On the whole, riskier asset classes outperformed lower-risk investments for the 6- and 12-month periods ended February 28, 2013. International, US small cap and emerging market equities were the leading asset classes for the 6-month period, while US stocks and high yield bonds generated the strongest returns for the 12-month period. US Treasury yields remained relatively low overall, but have inched higher in recent months, pressuring Treasuries and investment-grade bonds. Tax-exempt municipal bonds, however, continued to benefit from favorable supply-and-demand dynamics. Near-zero short term interest rates continued to keep yields on money market securities near their all-time lows.

Investors continue to face many of the same risks as in years past. But we see a world of possibilities. BlackRock was built to provide the global market insight, breadth of capabilities, unbiased investment advice and deep risk management expertise these times require. Investors everywhere are asking, *So what do I do with my money?* Visit **www.blackrock.com** for answers.

Sincerely,

Rob Kapito President, BlackRock Advisors, LLC

Trust Summary as of February 28, 2013 BlackRock Core Bond Trust

Trust Overview

BlackRock Core Bond Trust s (BHK) (the Trust) investment objective is to provide current income and capital appreciation. The Trust seeks to achieve its investment objective by investing at least 75% of its assets in bonds that are investment grade quality at the time of investment. The Trust s investments will include a broad range of bonds, including corporate bonds, US government and agency securities and mortgage-related securities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six-month period ended February 28, 2013, the Trust returned 0.49% based on market price and 3.30% based on net asset value (NAV). For the same period, the closed-end Lipper Corporate BBB-Rated Debt Funds (Leveraged) category posted an average return of 4.48% based on market price and 5.05% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Spread sectors outperformed government-related debt for the six-month period as accommodative monetary policy in the United States and Europe along with the continued recovery of the US economy drove credit spreads tighter. The Trust s allocations to high yield and investment grade corporate credit were significant contributors to performance during the period. In particular, the Trust s preference for banking, insurance and communication-related names contributed meaningfully to returns.

Additionally, the Trust benefited from its exposure to structured products including commercial mortgage-backed securities (CMBS), asset-backed securities (ABS) and non-agency residential mortgage-backed securities (MBS). As interest rates generally trended higher during the period, the Trust s duration profile (sensitivity to interest rate movements) detracted from performance, as did its yield curve positioning. **Describe recent portfolio activity**.

During the six-month period, the Trust maintained a positive view on spread sectors and increased exposure to high yield credit and securitized products such as CMBS and ABS. Within investment grade credit, the Trust favored financials and industrials over utilities. In financials, the Trust rotated out of senior bank debt into subordinated bank debt to take advantage of the yield differential. In addition, the Trust added to positions in floating rate preferred securities to benefit from a potential rise in interest rates. Finally, the Trust shortened its duration profile in light of expectations that positive economic data may lead to a gradual increase in interest rates. **Describe portfolio positioning at period end**.

At period end, the Trust maintained diversified exposure to non-government spread sectors, including investment grade credit, high yield corporate credit, CMBS, ABS and non-agency residential MBS. The Trust also held allocations to government-related sectors such as US Treasuries, US agency debt and agency MBS. The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of February 28, 2013 BlackRock Corporate High Yield Fund V, Inc.

Trust Overview

BlackRock Corporate High Yield Fund V, Inc. s (HYV) (the Trust) investment objective is to provide shareholders with current income by investing primarily in a diversified portfolio of fixed income securities that are rated in the lower rating categories of the established rating services (BB or lower by S&P or Ba or lower by Moody s) or in unrated securities considered by the Trust s investment adviser to be of comparable quality. The Trust also seeks to provide shareholders with capital appreciation. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in domestic and foreign high yield debt instruments, including high yield bonds (commonly referred to as junk bonds) and high yield corporate loans which are below investment grade quality. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six-month period ended February 28, 2013, the Trust returned 1.78% based on market price and 9.62% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of 4.30% based on market price and 8.66% based on NAV. All returns reflect reinvestment of dividends. The Fund moved from a premium to NAV to a discount by period-end, which accounts for the difference between performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

Security selection among the lower quality tiers of high yield credit had a positive impact on performance. From an industry perspective, holdings within gaming, automotive and building materials boosted returns. The Trust s exposure to select common stocks and preferred securities also enhanced results.

Detracting from performance was security selection within middle quality tier credits, as well as within non-rated securities. On an industry basis, selection in metals, paper and wireless impaired results. The Trust s tactical allocation to floating rate loan interests (bank loans) hindered relative performance as the asset class underperformed high yield bonds during the period.

Describe recent portfolio activity.

The Trust maintained its focus on higher-quality income-oriented credit names with stable fundamentals, good earnings/revenue visibility and an attractive coupon rate. The Trust remained generally cautious of cyclical credits that tend to be more vulnerable to slower economic growth and bouts of weakness, but allowed some risk in companies with positive growth catalysts or idiosyncratic characteristics. Also during the period, the Trust increased exposure to floating rate loan interests as valuations appeared increasingly attractive relative to certain segments of the high yield universe such as higher-quality short-dated paper. **Describe portfolio positioning at period end.**

At period end, the Trust held 73% of its total portfolio in corporate bonds and 19% in floating rate loan interests, with the remainder in common stocks and preferred stocks. The Trust held its largest industry exposures in healthcare, wirelines and consumer services (housing-related), while reflecting less emphasis on the riskier, more volatile segments of the market such as the banking sector and supermarkets and restaurants industries. The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to

change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of February 28, 2013

BlackRock High Income Shares

Trust Overview

BlackRock High Income Shares (HIS) (the Trust) primary investment objective is to provide the highest current income attainable consistent with reasonable risk as determined by the Trust s investment adviser, through investment in a professionally managed, diversified portfolio of high yield, high risk fixed income securities (commonly referred to as junk bonds). The Trust s secondary objective is to provide capital appreciation, but only when consistent with its primary objective. The Trust seeks to achieve its objectives by investing primarily in high yield, high risk debt instruments rated in the medium to lower categories by nationally recognized rating services (BBB or lower by S&P or Baa or lower by Moody s) or non-rated securities, which, in the investment adviser s opinion, are of comparable quality. Under normal market conditions, the average maturity of the Trust s portfolio is between eight and twelve years. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objectives will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six-month period ended February 28, 2013, the Trust returned 5.48% based on market price and 6.92% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of 4.30% based on market price and 8.66% based on NAV. All returns reflect reinvestment of dividends. The Fund s premium to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

Security selection among the lower quality tiers of high yield credit had a positive impact on performance. From an industry perspective, holdings within non-captive diversified (consumer credit-related businesses), automotive and building materials boosted returns. The Trust s exposure to select common stocks and preferred securities also enhanced results.

Detracting from performance was security selection within middle quality tier credits, where the Trust held its quality bias. On an industry basis, selection in metals, paper and wireless impaired results. The Trust s tactical allocation to floating rate loan interests (bank loans) hindered relative performance as the asset class underperformed high yield bonds during the period.

Describe recent portfolio activity.

The Trust maintained its focus on higher-quality income-oriented credit names with stable fundamentals, good earnings/revenue visibility and an attractive coupon rate. The Trust remained generally cautious of cyclical credits that tend to be more vulnerable to slower economic growth and bouts of weakness, but allowed some risk in companies with positive growth catalysts or idiosyncratic characteristics. Also during the period, the Trust increased exposure to floating rate loan interests as valuations appeared increasingly attractive relative to certain segments of the high yield universe such as higher-quality short-dated paper.

Describe portfolio positioning at period end.

At period end, the Trust held 76% of its total portfolio in corporate bonds and 19% in floating rate loan interests, with the remainder in common stocks and preferred securities. The Trust held its largest industry exposures in healthcare, media non-cable and wireless, while reflecting less emphasis on the riskier, more volatile segments of the market such as the banking sector and supermarkets and restaurants industries.

Trust Summary as of February 28, 2013

BlackRock Income Opportunity Trust, Inc.

Trust Overview

BlackRock Income Opportunity Trust, Inc. s (BNA) (the Trust) investment objective is to provide current income and capital appreciation. The Trust seeks to achieve its investment objective by investing at least 75% of its assets in bonds that are investment grade quality at the time of investment. The Trust s investments will include a broad range of bonds, including corporate bonds, US government and agency securities and mortgage-related securities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six-month period ended February 28, 2013, the Trust returned (0.39)% based on market price and 3.33% based on NAV. For the same period, the closed-end Lipper Corporate BBB-Rated Debt Funds (Leveraged) category posted an average return of 4.48% based on market price and 5.05% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Spread sectors outperformed government-related debt for the six-month period as accommodative monetary policy in the United States and Europe along with the continued recovery of the US economy drove credit spreads tighter. The Trust s allocations to high yield and investment grade corporate credit were significant contributors to performance during the period. In particular, the Trust s preference for banking, insurance and communication-related names contributed meaningfully to returns.

Additionally, the Trust benefited from its exposure to structured products including commercial mortgage-backed securities (CMBS), asset-backed securities (ABS) and non-agency residential mortgage-backed securities (MBS). As interest rates generally trended higher during the period, the Trust s duration profile (sensitivity to interest rate movements) detracted from performance, as did its yield curve positioning. **Describe recent portfolio activity**.

During the six-month period, the Trust maintained a positive view on spread sectors and increased exposure to high yield credit and securitized products such as CMBS and ABS. Within investment grade credit, the Trust favored financials and industrials over utilities. In financials, the Trust rotated out of senior bank debt into subordinated bank debt to take advantage of the yield differential. In addition, the Trust added to positions in floating rate preferred securities to benefit from a potential rise in interest rates. Finally, the Trust shortened its duration profile in light of expectations that positive economic data may lead to a gradual increase in interest rates. **Describe portfolio positioning at period end.**

At period end, the Trust maintained diversified exposure to non-government spread sectors, including investment grade credit, high yield corporate credit, CMBS, ABS and non-agency residential MBS. The Trust also held allocations to government-related sectors such as US Treasuries, US agency debt and agency MBS. The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of February 28, 2013

BlackRock Income Trust, Inc.

Trust Overview

BlackRock Income Trust, Inc. s (BKT) (the Trust) investment objective is to manage a portfolio of high-quality securities to achieve both preservation of capital and high monthly income. The Trust seeks to achieve its investment objective by investing at least 65% of its assets in mortgage-backed securities. The Trust invests at least 80% of its assets in securities that are (i) issued or guaranteed by the US government or one of its agencies or instrumentalities or (ii) rated at the time of investment either AAA by S&P or Aaa by Moody s. Securities issued or guaranteed by the US government or its agencies or guaranteed by the US government alities are generally considered to be of the same or higher credit or quality as privately issued securities rated AAA or Aaa. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six-month period ended February 28, 2013, the Trust returned (3.47)% based on market price and (0.60)% based on NAV. For the same period, the closed-end Lipper US Mortgage Funds category posted an average return of 5.02% based on market price and 6.93% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

The Trust s focus on high quality agency mortgage-backed securities (MBS) detracted from returns as the sector lagged other credit-sensitive fixed income assets during a period of rising interest rates. It should be noted that the Lipper US Mortgage Funds category experienced a wide dispersion of returns primarily determined by the extent to which a fund allocated to non-agency residential MBS.

Also detracting from performance during the period was the Trust s yield curve positioning. Exposure to the long end of the US Treasury curve hurt returns as the yield curve steepened and interest rates moved higher in early 2013. Contributing positively to performance was the Trust s leveraged exposure to agency pass-through MBS, despite uncertainty around how long the US Federal Reserve would maintain its accommodative monetary policy programs. Further enhancing performance was the Trust s positioning within the agency MBS coupon range, where heavier weightings in middle- and high-coupon issues proved beneficial. Higher coupons outperformed as rising interest rates led to reduced prepayment risk, making these issues more appealing to mortgage market participants. The Trust uses interest rate derivatives including futures, options, swaps and swaptions, mainly for the purpose of managing duration, convexity and yield curve positioning. During the period, the Trust held short positions in US Treasury futures in order to reduce the overall duration profile of the portfolio. These positions were beneficial to the Trust s performance during certain periods of rising interest rates. **Describe recent portfolio activity.**

During the six-month period, the economy continued to show signs of growth despite higher tax rates and reduced government spending. As the economy s resilience coupled with an improving housing market could cause interest rates to gradually move higher, the Trust increased exposure to agency MBS while reducing its strategic exposure to long-term US Treasuries.

The Trust maintained a strong level of yield by increasing exposure to stable-cash-flow collateralized mortgage obligations (CMOs), which tend to outperform pass-through agency MBS in a rising interest rate environment. The Trust also continued to maintain small allocations to commercial mortgage-backed securities (CMBS) and non-agency residential MBS, which have performed well primarily due to improving underlying fundamentals. **Describe portfolio positioning at period end**.

Despite higher prices in agency MBS, the backdrop for the sector continued to appear constructive given the presence of the US Federal Reserve s large asset purchase program, which has the effect of limiting net supply and is supportive of valuations. However, the Trust continued to maintain a cautious stance as prepayment risk for higher-coupon agency MBS still remains high as borrowers organically take advantage of historically low mortgage rates. As of period end, the Trust maintained leveraged exposure to high quality agency MBS with varying maturities and coupon rates. The Trust continued to hold positions in intermediate and longer dated stable-cash-flow CMOs as well as small allocations to non-agency MBS.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of February 28, 2013

BlackRock Strategic Bond Trust

Trust Overview

BlackRock Strategic Bond Trust s (BHD) (the Trust) investment objective is to provide total return through high current income and capital appreciation. The Trust seeks to achieve its investment objective by investing primarily in a diversified portfolio of fixed income securities including corporate bonds, US government and agency securities, mortgage-related and asset-backed securities and other types of fixed income securities. The Trust invests, under normal market conditions, a significant portion of its assets in corporate fixed income securities that are below investment grade quality, including high-risk, high yield bonds (commonly referred to as junk bonds) and other such securities, such as preferred stocks. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six-month period ended February 28, 2013, the Trust returned 7.60% based on market price and 6.12% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of 4.30% based on market price and 8.66% based on NAV. All returns reflect reinvestment of dividends. The Trust s premium to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

Security selection within investment-grade credits had a positive impact on performance. From an industry perspective, holdings within gaming, non-captive diversified (consumer credit-related businesses) and wirelines boosted returns. The Trust s exposure to select equity positions also enhanced results.

Detracting from performance was security selection within middle quality tier credits, where the Trust held its quality bias. On an industry basis, selection in metals, paper and wireless impaired results. The Trust s tactical allocation to floating rate loan interests (bank loans) hindered relative performance as the asset class underperformed high yield bonds during the period.

Describe recent portfolio activity.

The Trust maintained its focus on higher-quality income-oriented credit names with stable fundamentals, good earnings/revenue visibility and an attractive coupon rate. The Trust remained generally cautious of cyclical credits that tend to be more vulnerable to slower economic growth and bouts of weakness, but allowed some risk in companies with positive growth catalysts or idiosyncratic characteristics. Also during the period, the Trust increased exposure to floating rate loan interests as valuations appeared increasingly attractive relative to certain segments of the high yield universe such as higher-quality short-dated paper. **Describe portfolio positioning at period end.**

At period end, the Trust held 79% of its total portfolio in corporate bonds and 19% in floating rate loan interests, with the remainder in preferred securities and US treasury obligations. The Trust held its largest industry exposures in healthcare, media non-cable and wireless, while reflecting less emphasis on the riskier, more volatile segments of the market such as the supermarkets and restaurants industries.

The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV of their common shares (Common Shares). However, these objectives cannot be achieved in all interest rate environments.

The Trusts may utilize leverage through a credit facility, by entering into reverse repurchase agreements and/or treasury roll transactions. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of each Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Trust s shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Trusts had not used leverage.

To illustrate these concepts, assume a Trust s capitalization is \$100 million and it borrows for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust pays borrowing costs and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with assets received from the borrowings earn income based on long-term interest rates. In this case, the borrowing costs and interest expense of the borrowings is significantly lower than the income earned on the Trust s long-term investments, and therefore the Trust s shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates, the yield curve has a negative slope. In this case, the Trust pays higher short-term interest rates whereas the Trust s total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Trusts portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Trusts debt securities does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trusts NAVs positively or negatively in addition to the impact on Trust performance from leverage from borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Trusts, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Trusts NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Trusts net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Trust s net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. Each Trust may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Trust to incur losses. The use of leverage may limit each Trust s ability to invest in certain types of securities or use certain types of hedging strategies. Each Trust will incur expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income.

Under the Investment Company Act of 1940, as amended (the 1940 Act), the Trusts are permitted to issue senior securities representing indebtedness up to 33¹/3% of their total managed assets (each Trust s net assets plus the proceeds of any outstanding borrowings). If the Trusts segregate liquid assets having a value not less than the repurchase price (including accrued interest), a reverse repurchase agreement will not be considered a senior security and therefore will not be subject to this limitation. In addition, each Trust voluntarily limits its aggregate economic leverage to 50% of its managed assets. As of February 28, 2013, the Trusts had aggregate economic leverage from reverse repurchase agreements, treasury roll transactions and/or borrowings through a credit facility as a percentage of their total managed assets as follows:

Percent of Economic Leverage

ВНК	31%
HYV	29%
HYT	28%
HIS	26%
BHY	27%
BNA	31%
BKT	30%
BHD	21%

Derivative Financial Instruments

The Trusts may invest in various derivative financial instruments, including financial futures contracts, foreign currency exchange contracts, options and swaps, as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a security, index and/or market without owning or taking physical custody of securities or to hedge market, equity, credit, interest rate, foreign currency exchange rate and/or other risks. Derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Trusts ability to use a derivative financial instrument successfully depends on the investment advisor s ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Trust to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Trust can realize on an investment, may result in lower dividends paid to shareholders or may cause a Trust to hold an investment that it might otherwise sell. The Trusts investments in these instruments are discussed in detail in the Notes to Financial Statements.

BlackRock Core Bond Trust (BHK)

Schedule of Investments (continued)

- (d) Non-income producing security.
- (e) All or a portion of security has been pledged as collateral in connection with open reverse repurchase agreements.
- (f) Convertible security.
- (g) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown is as of report date.
- (h) Issuer filed for bankruptcy and/or is in default of principal and/or interest payments.
- (i) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.
- (j) Security is perpetual in nature and has no stated maturity date.
- (k) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (I) All or a portion of security has been pledged as collateral in connection with open financial futures contracts.
- (m) Represents or includes a TBA transaction. Unsettled TBA transactions as of February 28, 2013 were as follows:

Counterparty	Value	Unrealized Appreciation (Depreciation)
Goldman Sachs Group, Inc.	\$16,875,594	\$53,484
Deutsche Bank AG	\$ (22,313)	\$ (984)

- (n) Warrants entitle the Trust to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date of the warrants, if any.
- (o) Investments in issuers considered to be an affiliate of the Trust during the six months ended February 28, 2013, for purposes of Section 2(a)(3) of the 1940 Act, were as follows:

Affiliate	Shares Held at August 31, 2012	Net Activity	Shares Held at February 28, 2013	Income	Realized Gain
BlackRock Liquidity Funds, TempFund, Institutional Class	534,025	2,143,100	2,677,125	\$ 1,715	\$ 72

(p) Represents the current yield as of report date.

For Trust compliance purposes, the Trust s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease. Reverse repurchase agreements outstanding as of February 28, 2013 were as follows:

- Trust pays the fixed rate and receives the floating rate.
- Trust pays the floating rate and receives the fixed rate.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

unadjusted price quotations in active markets/exchanges for identical assets and liabilities Level 1 that the Trust has the ability to access

Level 2 other observable inputs (including, but not limited to, guoted prices for similar assets or liabilities in markets that are active, guoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted guoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

See Notes to Financial Statements.

BlackRock Core Bond Trust (BHK)

Schedule of Investments (continued)

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Trust s policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the Trust s investments and derivative financial instruments categorized in the disclosure hierarchy as of February 28, 2013:

	Level 1	Level 2	Level 3	Total
Assets:				
Investments:

Sales	(56,343)		(3,297,749)	(420,174)	(3,774,266)
Closing Balance, as of					
February 28, 2013	\$7,728,225	\$146,201	\$ 6,324,790	\$ 884,032	\$15,083,248

As of August 31, 2012, the Trust used observable inputs in determining the value of certain investments. As of February 28, 2013, the Trust used significant unobservable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$4,712,948 transferred from Level 2 to Level 3 in the disclosure hierarchy.

As of August 31, 2012, the Trust used significant unobservable inputs in determining the value of certain

2 investments. As of February 28, 2013, the Trust used observable inputs in determining the value of the same

² investments. As a result, investments with a beginning of period value of \$365,529 transferred from Level 3 to Level 2 in the disclosure hierarchy.

Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of February 28, 2013 was \$365,574. Certain of the Trust s investments that are categorized as Level 3 were valued utilizing transaction prices or third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in third party information inputs could result in a significantly lower or higher value of such Level 3 investments.

See Notes to Financial Statements.

Notes to Consolidated Schedule of Investments

- (a) Non-income producing security.
- (b) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (c) Variable rate security. Rate shown is as of report date.
- (d) Convertible security.
- (e) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (f) All or a portion of security has been pledged as collateral in connection with swaps.
- (g) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.
- (h) When-issued security. Unsettled when-issued transactions were as follows:

Counterparty

Value

		Unrealized Appreciation (Depreciation)
Bank of America Corp	\$ 171,063	\$ 971
Citigroup, Inc	\$ 847,875	\$(2,125)
Deutsche Bank AG	\$1,418,813	\$ 8,053
Goldman Sachs & Co., Inc	\$ 657,900	\$ 8,705
Pershing LLC	\$ 309,037	\$ 2,949
Sun Trust Capital	\$ 165,240	\$ 2,187

(i) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown is as of report date.

- (j) Issuer filed for bankruptcy and/or is in default of principal and/or interest payments.
- (k) Security is perpetual in nature and has no stated maturity date.
- (I) Other interests represent beneficial interests in liquidation trusts and other reorganization or private entities.
- (m) Warrants entitle the Trust to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date of the warrants, if any.
- (n) Investments in issuers considered to be an affiliate of the Trust during the six months ended February 28, 2013, for purposes of Section 2(a)(3) 1940 act, were as follows:

Affiliate	Shares Held at August 31, 2012	Net Activity	Shares Held at February 28, 2013	Income	Realized Gain
BlackRock Liquidity Funds, TempFund, Institutional Class		4,128,807	4,128,807	\$ 893	\$ 114

(o) Represents the current yield as of report date.

For Trust compliance purposes, the Trust s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease. Financial futures contracts as of February 28, 2013 were as follows:

Contracts Sold	Issue	Exchange	Expiration	Notional Value		Unrealized Depreciation
(73) See Notes to F	S&P 500 E-Mini Index Financial State	Chicago Mercantile ements.	March 2013	USD	5,523,545	\$(92,603)

¹Using S&P s rating of the issuer.

² The maximum potential amount the Trust may pay should a negative credit event take place as defined under the terms of the agreement.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for consolidated financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Trust has the ability to access

Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy

within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Trust s policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the Trust s investments and derivative financial instruments categorized in the disclosure hierarchy as of February 28, 2013:

	Level 1	Level 2	Level 3	Total
Assets: Investments: Long-Term Investments:				
Common Stocks	\$ 30,384,458	\$ 2,412,176	\$ 8,233,437	\$ 41,030,071

Consolidated Schedule of Investments (continued)

BlackRock Corporate High Yield Fund V, Inc. (HYV)

	Level 1	Level 2	Level 3	Total
Derivative Financial Instrume	nts ¹			
Assets:				
Credit contracts		\$1,328,092		\$1,328,092
Foreign currency exchange				
contracts		1,524,216		1,524,216
Liabilities:				
Credit contracts		(137,447)		(137,447)
Equity contracts	\$(92,603)		(92,603)
Foreign currency exchange				
contracts		(12,470)		(12,470)
Total	\$ (92,603	3) \$ 2,702,391		\$ 2,609,788

Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and ¹ options written. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options written are shown at value.

Certain of the Trust s assets and liabilities are held at carrying amount, which approximates fair value for financial statement purposes. As of February 28, 2013, such assets and liabilities are categorized within the disclosure hierarchy as follows:

	Leve	el 1	Leve	12	Level 3	Total	
Assets:							
Foreign currency at value	\$	5,581				\$	5,581
Cash pledged as collateral for financial futures contracts		207.000					207 000
Cash pledged as collateral		307,000					307,000
for swaps		400,000					400,000
Liabilities:							
Bank overdraft			\$	(138,781)			(138,781)
Cash received as collateral							
for swaps				(1,200,000)		(1,200,000)
Loan payable			(1	74,000,000)		(17-	4,000,000)
Total	\$	712,581	\$(1	75,338,781)		\$(17	4,626,200)

There were no transfers between Level 1 and Level 2 during the six months ended February 28, 2013. A reconciliation of Level 3 investments and derivative financial instruments is presented when the Trust had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

		Floating Rate			
Common	Corporate	Loan	Other		
Stocks	Bonds	Interests	Interests	Warrants	Total

Balance, as of						
31, 2012	\$6,755,302	\$ 6,576,954	\$19,411,992	\$ 8,463	\$ 1	\$ 32,75
s into Level 3 ²	15,101	2,120,575	2,296,471			4,43
s out of Level 3 ³			(1,924,364)			(1,92

zed gain (loss)		10,524	(117,320)			(10
ige in unrealized						
ation/depreciation ⁴	703,574	(1,945,433)	1,097,715	11,356	98,568	(3
es	759,460	3,657,923	7,418,353			11,83
		(4,054,011)	(6,370,624)			(10,42
Balance, as of February 28, 2013	\$8,233,437	\$ 6,352,772	\$21,881,941	\$19,819	\$98,569	\$ 36,58

As of August 31, 2012, the Trust used observable inputs in determining the value of certain investments. As of February 28, 2013, the Trust used significant unobservable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$4,432,147 transferred from Level 2 to Level 3 in the disclosure hierarchy.

³As of August 31, 2012, the Trust used significant unobservable inputs in determining the value of certain investments. As of February 28, 2013, the Trust used observable inputs in determining the value on the same investments. As a result, investments with a beginning of period value of \$1,924,364 transferred from Level 3 to Level 2 in the disclosure hierarchy.

⁴Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of February 28, 2013 was \$697,183. See Notes to Financial Statements.

Consolidated Schedule of Investments (concluded)

BlackRock Corporate High Yield Fund V, Inc. (HYV)

The following table is a reconciliation of Level 3 derivative financial instruments for which significant unobservable inputs were used in determining fair value:

	Credit Contracts
Assets:	
Opening Balance, as of August 31, 2012	\$ 829,910
Transfers into Level 3 ¹	
Transfers out of Level 3 ¹	(205,351)
Accrued discounts/premiums	
Net realized gain (loss)	
Net change in unrealized appreciation/depreciation ²	(624,559)
Purchases	
Issues ³	
Sales	
Settlements ⁴	
Closing Balance, as of February 28, 2013	

¹Transfers into and transfers out of Level 3 represent the values as of the beginning of the reporting period. ²Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations.

³Issues represent upfront cash received on certain derivative financial instruments.

Settlements represent periodic contractual cash flows and/or cash flows to terminate certain derivative financial instruments.

The following table summarizes the valuation techniques used and unobservable inputs developed by the BlackRock Global Valuation Methodologies Committee (Global Valuation Committee) to determine the value of certain of the Trust s Level 3 investments as of February 28, 2013. The table does not include Level 3 investments with values derived utilizing third party pricing information without adjustment. A significant change in third party pricing information could result in a significantly lower or higher value of such Level 3 investments. The value of Level 3 investments derived using third party pricing information is \$20,080,471.

	Value	Valuation Techniques	Unobservable Inputs ⁵	Range of Unobservable Inputs Utilized
Assets:				
Common Stocks	\$ 6,835,434	Market	EBITDA	6.56x
		Comparable Companies	Multiple	
		-	Enterprise	CAD ⁶ 0.44x
			Value/Oil	
			Barrel	
			Multiple	
	332,660		N/A	

		Restructure		
		Terms ⁷

\$16,506,067

⁵A change to the unobservable input may result in a significant change to the value of the investment as follows:

Unobservable Input	Impact to Value if Input Increases	Impact to Value if Input Decreases
EBITDA Multiple	Increase	Decrease
Enterprise Value/Oil Barrel Multiple	Increase	Decrease
Yield	Decrease	Increase
Distribution Rate	Decrease	Increase
Implied Volatility	Increase	Decrease

6Canadian Dollar.

Total

7 Investment is valued based on the company s financial restructuring plan.

The Trust fair values certain of its Level 3 investments using prior transaction prices (acquisition cost), although the transaction may not have occurred during the current reporting period. In such cases, these investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are ⁸reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public companies are not identical to the investments being fair valued by the Trust.

See Notes to Financial Statements.

Consolidated Schedule of Investments (continued)

BlackRock Corporate High Yield Fund VI, Inc. (HYT)

Notes to Consolidated Schedule of Investments

- (a) Non-income producing security.
- (b) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (c) Variable rate security. Rate shown is as of report date.
- (d) Convertible security.
- (e) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (f) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.
- (g) When-issued security. Unsettled when-issued transactions were as follows:

Counterparty	Value	Unrealized Appreciation (Depreciation)
Bank of America Corp.	\$ 181,125	\$ 1,028
Citigroup, Inc.	\$ 887,775	\$(2,225)
Deutsche AG	\$1,484,219	\$ 8,425
Goldman Sachs & Co., Inc	\$ 688,500	\$ 9,122
Pershing LLC	\$ 319,168	\$ 3,047
Sun Trust Capital	\$ 173,400	\$ 2,297

- (h) All or a portion of security has been pledged as collateral in connection with swaps.
- (i) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown is as of report date.
- (j) Issuer filed for bankruptcy and/or is in default of principal and/or interest payments.
- (k) Other interests represent beneficial interests in liquidation trusts and other reorganization or private entities.
- (I) Warrants entitle the Trust to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date of the warrants, if any.
- (m) Investments in issuers considered to be an affiliate of the Trust during the six months ended February 28, 2013, for purposes of Section 2(a)(3) of the 1940 Act, were as follows:

Affiliate	Shares Held at August 31, 2012		Shares Held at February 28, 2013	Incor	Realized neGain
BlackRock Liquidity Funds, TempFund, Institutional	4,840,770 4,840,770		\$ 872	\$ 110	

(n) Represents the current yield as of report date.

For Trust compliance purposes, the Trust s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. These definitions may not apply for purposes of

this report, which may combine such industry sub-classifications for reporting ease. Financial futures contracts as of February 28, 2013 were as follows:

² The maximum potential amount the Trust may pay should a negative credit event take place as defined under the terms of the agreement.

³Using S&P s rating of the issuer.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for consolidated financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Trust has the ability to access

See Notes to Financial Statements.

Consolidated Schedule of Investments (continued) BlackRock Corporate High Yield Fund VI, Inc. (HYT) Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Trust s policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the Trust s investments and derivative financial instruments categorized in the disclosure hierarchy as of February 28, 2013:

Derivative Financial Instruments¹ **Assets:**

Credit contracts		\$ 1,351,785	\$ 1	,351,785
Foreign currency exchange contracts		1,622,949	1	,622,949
Liabilities: Credit contracts		(143,840)		(143,840)
Equity contracts	\$ (98,075)	(143,040)		(143,840) (98,075)
Foreign currency exchange		(10 704)		(10 70 4)
contracts		(13,704)		(13,704)
Total	\$ (98,075)	\$ 2,817,190	\$ 2	2,719,115
	 	• •		

Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and ¹ options written. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options written are shown at value.

Certain of the Trust s assets and liabilities are held at carrying amount, which approximates fair value for financial statement purposes. As of February 28, 2013, such assets and liabilities are categorized within the disclosure hierarchy as follows:

	Leve	el 1	Leve	12	Level 3	Total	
Assets:							
Foreign currency at value	\$	317,411				\$	317,411
Cash pledged as collateral for							
financial futures contracts		324,000					324,000
Cash pledged as collateral							
for swaps		400,000					400,000
Liabilities:							
Bank overdraft			\$	(307,820)			(307,820)
Cash held as collateral for							
swaps				(1,200,000)		(1,200,000)
Loan payable			(1	78,000,000)		(17	8,000,000)
Total	\$	1,041,411	\$(1	79,507,820)		\$(17	8,466,409)

There were no transfers between Level 1 and Level 2 during the six months ended February 28, 2013.

See Notes to Financial Statements.

Consolidated Schedule of Investments (continued) BlackRock Corporate High Yield Fund VI, Inc. (HYT) A reconciliation of Level 3 investments and derivative financial instruments is presented when the Trust had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Other Interests	ts Warrar	nts	Total
sets: ening Balance, as of							
ust 31, 2012	\$7,005,140	\$ 4,924,921	\$19,461,069	\$71	\$	1	\$ 31,391,20

realized gain (loss) change in unrealized		11,264	(118,542)				(107,27)
reciation/depreciation ³	800,479	(2,291,902)	1,226,432		100	,822	(164,16
chases	831,801	3,947,719	7,770,453				12,549,97
es		(3,846,141)	(6,684,060)				(10,530,20
sing Balance, as of							· · ·
oruary 28, 2013	\$8,653,232	\$ 5,000,092	\$21,941,452	\$71	\$100,	,823	\$ 35,695,67

As of August 31, 2012, the Trust used observable inputs in determining the value of certain investments. As of February 28, 2013, the Trust used significant unobservable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$4,756,430 transferred from Level 2 to Level 3 in the disclosure hierarchy.

As of August 31, 2012, the Trust used significant unobservable inputs in determining the value of certain

² investments. As of February 28, 2013, the Trust used observable inputs in determining the value of the same

investments. As a result, investments with a beginning of period value of \$2,245,765 transferred from Level 3 to Level 2 in the disclosure hierarchy.

³Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of February 28, 2013 was \$870,743.

The following table is a reconciliation of Level 3 derivative financial instruments for which significant unobservable inputs were used in determining fair value:

	Credit Contracts
Assets:	
Opening Balance, as of August 31, 2012	\$ 869,356
Transfers into Level 3 ⁴	
Transfers out of Level 3 ⁴	(205,779)
Accrued discounts/premiums	
Net realized gain (loss)	
Net change in unrealized appreciation/depreciation ⁵	(663,577)
Purchases	
Issues ⁶	

Sales Settlements⁷

Closing Balance, as of February 28, 2013

⁴Transfers into and transfers out of Level 3 represent the values as of the beginning of the reporting period.

⁵Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations.

6 Issues represent upfront cash received on certain derivative financial instruments.

Settlements represent periodic contractual cash flows and/or cash flows to terminate certain derivative financial instruments.

See Notes to Financial Statements.

Edgar Filing: BLACKROCK INCOME TRUST INC. - Form N-CSRS

Consolidated Schedule of Investments (concluded)

BlackRock Corporate High Yield Fund VI, Inc. (HYT)

The following table summarizes the valuation techniques used and unobservable inputs developed by the Global Valuation Committee to determine the value of certain of the Trust s Level 3 investments as of February 28, 2013. The table does not include Level 3 investments with values derived utilizing third party pricing information without adjustment. A significant change in third party pricing information could result in a significantly lower or higher value of such Level 3 investments. The value of Level 3 investments derived using third party pricing information is \$19,957,170.

	Value	Valuation Techniques	Unobservable Inputs ¹	Range of Unobservable Inputs Utilized
Assets:				
Common Stocks	\$ 7,147,761	Market Comparable Companies	EBITDA Multiple	6.56x
		Ĩ	Enterprise Value/Oil Barrel Multiple	CAD ² 0.44x
	365,274	Restructure Terms ³	N/A	
Corporate Bonds	996,332	Discounted Cash Flow	Yield	12%
	2,759,300	Cost ⁴	N/A	
Floating Rate Loan Interests	1,077,719	Discounted Cash Flow	Yield	9.50%
	3,250,000	Cost ⁴	N/A	
Warrant	48,442	Discounted Vendor Price	Distribution Rate	0.51639
	93,672	Black-Sholes	Implied Volatility	90%
Total	\$15,738,500		•	

¹A change to the unobservable input may result in a significant change to the value of the investment as follows:

Unobservable Input	Impact to Value if Input Increases	Impact to Value if Input Decreases
EBITDA Multiple	Increase	Decrease
Enterprise Value/Oil Barrel Multiple	Increase	Decrease
Yield	Decrease	Increase
Distribution Rate	Decrease	Increase
Implied Volatility	Increase	Decrease
anadian Dallan		

²Canadian Dollar.

³Investment is valued based on the company s financial restructuring plan.

⁴The Trust fair values certain of its Level 3 investments using prior transaction prices (acquisition cost), although the transaction may not have occurred during the current reporting period. In such cases, these investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The

Edgar Filing: BLACKROCK INCOME TRUST INC. - Form N-CSRS

determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public companies are not identical to the investments being fair valued by the Trust.

Notes to Schedule of Investments

- (a) Non-income producing security.
- (b) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (c) Convertible security.
- (d) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (e) When-issued security. Unsettled when-issued transactions were as follows:

Counterparty	Value	Unrealized Appreciation (Depreciation)
Citigroup Global Markets	\$543,637	\$(1,363)
Goldman Sachs & Co	\$193,802	\$(1,354)
Pershing LLC	\$287,640	\$ 3,824

(f) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares. See Notes to Financial Statements.

BlackRock High Income Shares (HIS)

Schedule of Investments (continued)

- (g) Variable rate security. Rate shown is as of report date.
- (h) Issuer filed for bankruptcy and/or is in default of principal and/or interest payments.
- (i) Warrants entitle the Trust to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the until the expiration date of the warrants, if any.
- (j) Investments in issuers considered to be an affiliate of the Trust during the six months ended February 28, 2013, for purposes of Section 2(a)(3) of the 1940 Act, were as follows:

Affiliate	Shares Held at August 31, 2012	Net Activity	Shares Held at February 28, 2013	Income	Realized Gain
BlackRock Liquidity Funds, TempFund, Institutional Class		2,757,840	2,757,840	\$ 402	\$ 33

(k) Represents the current yield as of report date.

For Trust compliance purposes, the Trust s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease. Financial futures contracts as of February 28, 2013 were as follows:

Contracts Sold	Issue	Exchange	Notional Expiration Value			Unrealized Depreciation	
(25)	S&P 500 E-Mini Index	Chicago Mercantile	March 2013	USD	1,891,625	\$ (38,018)	

Foreign currency exchange contracts as of February 28, 2013 were as follows:

Currenc	Currency Purchased		ased Currency Sold Co		Settlement Date	Unrealized Appreciation (Depreciation)
USD	897,075	GBP	560,000	Goldman Sachs Group, Inc.	4/17/13	\$ 47,728
EUR	100,000	USD	134,940	Citigroup, Inc.	4/23/13	(4,339)
EUR	120,000	USD	160,434	Credit Suisse Group AG	4/23/13	(3,711)
USD Total	4,571,808	EUR	3,431,000	Citigroup, Inc.	4/23/13	90,855 \$ 130,533

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Trust has the ability to access

Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Trust s policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

See Notes to Financial Statements.

BlackRock High Income Shares (HIS)

Equity contracts	\$	(38,018)					(38,018)
Total	\$	(38,018)	\$	130,533		\$	92,515
Derivative financial instru	ments are financial fut	tures contracts	and fore	eign currency exchar	nge contr	acts.	Financial

Derivative financial instruments are financial futures contracts and foreign currency exchange contracts. Financial ¹futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument.

Certain of the Trust s assets and liabilities are held at carrying amount, which approximates fair value for financial statement purposes. As of February 28, 2013, such assets and liabilities are categorized within the disclosure hierarchy as follows:

	Level 1	Level 2	Level 3	Total	
Assets:					
Foreign currency at value	\$ 31,721			\$	31,721
Cash pledged as collateral for					
financial futures contracts	122,000				122,000
Liabilities:		• • • • • • • • • • • • •			
Loan payable		\$ (44,000,000)		· ·	1,000,000)
Total	\$ 153,721	\$ (44,000,000)		\$ (43	3,846,279)

As of August 31, 2012, the Trust used observable inputs in determining the value of certain equity securities. As of February 28, 2013, the Trust valued the same securities using unadjusted price quotations from an exchange. As a result, investments with a beginning of period value of \$1,778,390 transferred from Level 2 to Level 1 in the disclosure hierarchy.

A reconciliation of Level 3 investments is presented when the Trust had a significant amount of Level 3 investments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Total
Assets:				
Opening Balance, as of				
August 31, 2012	\$ 663,716	\$ 1,655,876	\$ 4,877,951	\$ 7,197,543
Transfers into Level 3 ²	4,560	674,112	714,628	1,393,300
Transfers out of Level 3 ³			(889,422)	(889,422)
Accrued discounts/premiums				
Net realized gain (loss)		3,696	(1,498)	2,198
Net change in unrealized				
appreciation/depreciation ⁴	418,263	(678,693)	261,564	1,134
Purchases	221,407	824,749	2,189,481	3,235,637
Sales		(1,202,465)	(1,460,073)	(2,662,538)
Closing Balance, as of				
February 28, 2013	\$1,307,946	\$ 1,277,275	\$ 5,692,631	\$ 8,277,852

As of August 31, 2012, the Trust used observable inputs in determining the value of certain investments. As of ²February 28, 2013, the Trust used significant unobservable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$1,393,300 transferred from Level 2 to Level 3 in the disclosure hierarchy.

As of August 31, 2012, the Trust used significant unobservable inputs in determining the value of certain

investments. As of February 28, 2013, the Trust used observable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$889,422 transferred from Level 3 to Level 2 in the disclosure hierarchy.

⁴ Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of February 28, 2013 was \$390,756. See Notes to Financial Statements.

BlackRock High Income Shares (HIS)

Schedule of Investments (concluded)

The following table summarizes the valuation techniques used and unobservable inputs developed by the Global Valuation Committee to determine the value of certain of the Trust s Level 3 investments as of February 28, 2013. The table does not include Level 3 investments with values derived utilizing third party pricing information without adjustment. A significant change in third party pricing information could result in a significantly lower or higher value of such Level 3 investments. The value of Level 3 investments derived using third party pricing information is \$5,912,283.

	Value	Valuation Techniques	Unobservable Inputs ¹	Range of Unobservable Inputs Utilized
Assets:				
Common Stocks	\$ 864,928	Market	EBITDA	6.56x
		Comparable	Multiple	
		Companies		
	104,364	Restructure	N/A	
		Terms ²		
Corporate Bonds	714	Estimated	Recovery	0.05%
		Final	Rate	
		Distribution		
	519,961	Market	Yield	12.10%
		Comparable		
		Companies		
	522,000	Cost ³	N/A	
Floating Rate Loan Interests	353,602	Discounted Cash Flow	Yield	9.50%
Total	\$2,365,569			

¹A change to the unobservable input may result in a significant change to the value of the investment as follows:

Unobservable Input	Impact to Value if Input Increases	Impact to Value if Input Decreases
EBITDA Multiple	Increase	Decrease
Recovery Rate	Increase	Decrease
Yield	Decrease	Increase

²Investment is valued based on the company s financial restructuring plan.

³The Trust fair values certain of its Level 3 investments using prior transaction prices (acquisition cost), although the transaction may not have occurred during the current reporting period. In such cases, these investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public

companies are not identical to the investments being fair valued by the Trust. See Notes to Financial Statements.
