

TORONTO DOMINION BANK
Form 424B2
April 10, 2018
Filed Pursuant to Rule 424(b)(2)

Registration Statement No. 333-211718

The
Toronto-Dominion
Bank

\$20,714,000

Leveraged Capped
Buffered
Basket-Linked
Notes due August
10, 2020

The notes do not bear interest. The amount that you will be paid on your notes on the maturity date (August 10, 2020) is based on the performance of an unequally weighted basket of five indices: the EURO STOXX 50[®] Index (37% weighting), the FTSE[®] 100 Index (23% weighting), TOPIX (23% weighting), the Swiss Market Index (9% weighting), and the S&P/ASX 200 Index (8% weighting), as measured from the pricing date (April 6, 2018) to and including the valuation date (August 6, 2020).

If the final basket level on the valuation date is greater than the initial basket level, the return on your notes will be positive and will equal the participation rate of 220.00% times the percentage change of the basket, subject to the maximum payment amount of \$1,593.56 for each \$1,000 principal amount of your notes. If the final basket level declines by up to 20.00% from the initial basket level, you will receive the principal amount of your notes. **If the final basket level declines by more than 20.00% from the initial basket level, the return on your notes will be negative, and you will lose 1.25% of the principal amount of your notes for every 1% that the final basket level has declined below the buffer level of 80.00% of the initial basket level. Despite the inclusion of the buffer level, due to the downside multiplier you may lose your entire principal amount.**

The initial basket level was set to 100 on the pricing date and the final basket level will equal (i) 100 *times* (ii) the *sum* of 1 *plus*, as calculated for each basket component, (a) the percentage change of each basket component from the pricing date to the valuation date *multiplied by* (b) its weighting in the basket. The initial index level of each basket component is: 3,408.10 with respect to the EURO STOXX 50[®] Index, 7,183.64 with respect to the FTSE[®] 100 Index, 1,719.30 with respect to TOPIX, 8,671.04 with respect to the Swiss Market Index and 5,788.739 with respect to the S&P/ASX 200 Index.

To determine your payment at maturity, we will calculate the percentage change of the basket, which is the percentage increase or decrease in the final basket level from the initial basket level. At maturity, for each \$1,000 principal amount of your notes, you will receive an amount in cash equal to:

if the percentage change is positive (the final basket level is greater than the initial basket level), the *sum* of (i) \$1,000 *plus* (ii) the product of (a) \$1,000 *times* (b) 220.00% *times* (c) the percentage change, subject to the maximum payment amount;

if the percentage change is zero or negative but not below -20.00% (the final basket level is equal to the initial basket level or is less than the initial basket level, but not by more than 20.00%), \$1,000; or

if the percentage change is negative and is below -20.00% (the final basket level is less than the initial basket level by more than 20.00%), the *sum* of (i) \$1,000 *plus* (ii) the product of (a) \$1,000 *times* (b) the downside multiplier of 125.00% (see page P-4) *times* (c) the *sum* of the percentage change *plus* 20.00%. **You will receive less than the principal amount of your notes.**

Decreases in the levels of the basket components may offset increases in the levels of other basket components. The performance of the basket components with the higher weightings will have a larger impact on your return on the notes. The notes do not guarantee the return of principal at maturity.

The notes are unsecured and are not savings accounts or insured deposits of a bank. The notes are not insured or guaranteed by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation or any other governmental agency or instrumentality. Any payments on the notes are subject to our credit risk. The notes will not be listed or displayed on any securities exchange or electronic communications network.

You should read the disclosure herein to better understand the terms and risks of your investment. See “Additional Risk Factors” beginning on page P-8 of this pricing supplement.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined that this pricing supplement, the product prospectus supplement or the prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The initial estimated value of the notes at the time the terms of your notes were set on the pricing date is \$997.30 per \$1,000 principal amount, which is less than the public offering price listed below. See “Additional Information Regarding the Estimated Value of the Notes” on the following page and “Additional Risk Factors” beginning on page P-8 of this document for additional information. The actual value of your notes at any time will reflect many factors and cannot be predicted with accuracy.

	Public Offering Price ¹	Underwriting Discount ¹	Proceeds to TD
Per Note	\$1,000.00	\$0.00	\$1,000.00
Total	\$20,714,000.00	\$0.00	\$20,714,000.00

TD Securities (USA) LLC

Pricing Supplement dated April 6, 2018

¹ See “Supplemental Plan of Distribution (Conflicts of Interest)” on page P-51 herein.

The public offering price, underwriting discount and proceeds to TD listed above relate to the notes we issue initially. We may decide to sell additional notes after the date of this pricing supplement, at public offering prices and with underwriting discounts and proceeds to TD that differ from the amounts set forth above. The return (whether positive or negative) on your investment in the notes will depend in part on the public offering price you pay for such notes.

We, TD Securities (USA) LLC (“TDS”), or any of our affiliates, may use this pricing supplement in the initial sale of the notes. In addition, we, TDS or any of our affiliates may use this pricing supplement in a market-making transaction in a note after its initial sale. Unless we, TDS or any of our affiliates informs the purchaser otherwise in the confirmation of sale, this pricing supplement will be used in a market-making transaction.

Additional Information Regarding the Estimated Value of the Notes

The final terms for the Notes were determined on the Pricing Date, based on prevailing market conditions and are set forth in this pricing supplement. The economic terms of the Notes are based on TD’s internal funding rate (which is TD’s internal borrowing rate based on variables such as market benchmarks and TD’s appetite for borrowing), and several factors, including any sales commissions expected to be paid to TDS, any selling concessions, discounts, commissions or fees expected to be allowed or paid to non-affiliated intermediaries, the estimated profit that TD or any of TD’s affiliates expect to earn in connection with structuring the Notes, the estimated cost TD may incur in hedging its obligations under the Notes and the estimated development and other costs which TD may incur in connection with the Notes. Because TD’s internal funding rate generally represents a discount from the levels at which TD’s benchmark debt securities trade in the secondary market, the use of an internal funding rate for the Notes rather than the levels at which TD’s benchmark debt securities trade in the secondary market is expected to have had an adverse effect on the economic terms of the Notes. On the cover page of this pricing supplement, TD has provided the initial estimated value for the Notes. This initial estimated value was determined by reference to TD’s internal pricing models which take into account a number of variables and are based on a number of assumptions, which may or may not materialize, typically including volatility, interest rates (forecasted, current and historical rates), price-sensitivity analysis, time to maturity of the Notes, and TD’s internal funding rate. For more information about the initial estimated value, see “Additional Risk Factors” beginning on page P-8. Because TD’s internal funding rate generally represents a discount from the levels at which TD’s benchmark debt securities trade in the secondary market, the use of an internal funding rate for the Notes rather than the levels at which TD’s benchmark debt securities trade in the secondary market is expected, assuming all other economic terms are held constant, to increase the estimated value of the Notes. For more information see the discussion under “Additional Risk Factors — TD’s and TDS’s Estimated Value of the Notes are Determined By Reference to TD’s Internal Funding Rates and are Not Determined By Reference to Credit Spreads or the Borrowing Rate TD Would Pay for its Conventional Fixed-Rate Debt Securities”.

TD’s estimated value on the Pricing Date is not a prediction of the price at which the Notes may trade in the secondary market, nor will it be the price at which TDS may buy or sell the Notes in the secondary market. Subject to normal market and funding conditions, TDS or another affiliate of TD’s intends to offer to purchase the Notes in the secondary market but it is not obligated to do so.

Assuming that all relevant factors remain constant after the Pricing Date, the price at which TDS may initially buy or sell the Notes in the secondary market, if any, may exceed TD’s estimated value on the Pricing Date for a temporary period expected to be approximately 3 months after the Pricing Date because, in its discretion, TD may elect to effectively reimburse to investors a portion of the estimated cost of hedging its obligations under the Notes and other costs in connection with the Notes which TD will no longer expect to incur over the term of the Notes. TD made such discretionary election and determined this temporary reimbursement period on the basis of a number of factors, including the tenor of the Notes and any agreement TD may have with the distributors of the Notes. The amount of TD’s estimated costs which is effectively reimbursed to investors in this way may not be allocated ratably throughout the reimbursement period, and TD may discontinue such reimbursement at any time or revise the duration of the reimbursement period after the Pricing Date of the Notes based on changes in market conditions and other factors that

cannot be predicted.

If a party other than TDS or its affiliates is buying or selling your Notes in the secondary market based on its own estimated value of your Notes which was calculated by reference to TD's credit spreads or the borrowing rate TD would pay for its conventional fixed-rate debt securities (as opposed to TD's internal funding rate), the price at which such party would buy or sell your Notes could be significantly lower.

We urge you to read the "Additional Risk Factors" beginning on page P-8 of this pricing supplement.

P-2

Summary

The information in this “Summary” section is qualified by the more detailed information set forth in this pricing supplement, the product prospectus supplement and the prospectus.

Issuer: The Toronto-Dominion Bank (“TD”)
 Issue: Senior Debt Securities
 Type of Note: Leveraged Capped Buffered Basket-Linked Notes (the “Notes”)
 Term: Approximately 28 months
 Basket: An unequally weighted basket consisting of the following indices (each, a “Basket Component”):

Basket Component	Bloomberg Ticker	Component Weighting	Initial Index Level*
EURO STOXX 50® Index	SX5E	37%	3,408.10
FTSE® 100 Index	UKX	23%	7,183.64
TOPIX	TPX	23%	1,719.30
Swiss Market Index	SMI	9%	8,671.04
S&P/ASX 200 Index	AS51	8%	5,788.739

* With respect to each Basket Component, its Closing Level on the Pricing Date.

CUSIP / ISIN: 89114QMF2 / US89114QMF27

Agent: TD Securities (USA) LLC (“TDS”)

Currency: U.S. Dollars

Minimum Investment: \$1,000 and minimum denominations of \$1,000 in excess thereof

Principal Amount: \$1,000 per Note; \$20,714,000 in the aggregate for all the offered Notes; the aggregate principal amount of the offered Notes may be increased if the Issuer, at its sole option, decides to sell an additional amount of the offered Notes on a date subsequent to the date of this pricing supplement.

Pricing Date: April 6, 2018

Issue Date: April 13, 2018

Valuation Date: August 6, 2020, subject to postponement for market disruption events and other disruptions, as described in “— Final Index Levels” below.

Maturity Date: August 10, 2020, subject to postponement for market disruption events and other disruptions, as described under “General Terms of the Notes — Maturity Date” on page PS-18 in the product prospectus supplement and in “— Final Index Levels” below.

For each \$1,000 Principal Amount of the Notes, we will pay you on the Maturity Date an amount in cash equal to:

if the Final Basket Level is *greater than or equal to* the Cap Level, the Maximum Payment Amount;

if the Final Basket Level is *greater than* the Initial Basket Level but *less than* the Cap Level, the *sum* of (i) \$1,000 *plus* (ii) the *product* of (a) \$1,000 *times* (b) the Leverage Factor *times* (c) the Percentage Change;

Payment at Maturity: if the Final Basket Level is *equal to* or *less than* the Initial Basket Level but *greater than or equal to* the Buffer Level, \$1,000; or

if the Final Basket Level is *less than* the Buffer Level, the *sum* of (i) \$1,000 *plus* (ii) the *product* of (a) \$1,000 *times* (b) the Downside Multiplier *times* (c) the *sum* of the Percentage Change *plus* the Buffer Percentage.

If the Final Basket Level is less than the Buffer Level, the investor will receive less than the Principal Amount of the Notes at maturity and may lose their entire Principal Amount.

All amounts used in or resulting from any calculation relating to the Notes, including the Payment at Maturity, will be rounded upward or downward as appropriate, to the nearest cent.

Leverage Factor:	220.00%
Cap Level:	126.98% of the Initial Basket Level
Buffer Percentage:	20.00%
Buffer Level:	80.00% of the Initial Basket Level
Downside Multiplier:	The quotient of the Initial Basket Level divided by the Buffer Level, which equals 125.00%
Maximum Payment Amount:	\$1,593.56 per \$1,000 Principal Amount of the Notes (159.356% of the Principal Amount of the Notes). As a result of the Maximum Payment Amount, the maximum return at maturity of the Notes is 59.356% of the Principal Amount of the Notes.
Percentage Change:	The quotient of (1) the Final Basket Level minus the Initial Basket Level <i>divided by</i> (2) the Initial Basket Level, expressed as a percentage.
Initial Basket Level:	100
Final Basket Level:	$100 \times [1 + (\text{the sum of the products of the Basket Component Return for each Basket Component multiplied by its Component Weighting})]$ With respect to each Basket Component:
Basket Component Return:	$\frac{\text{Final Index Level} - \text{Initial Index Level}}{\text{Initial Index Level}}$
Initial Index Level:	With respect to each Basket Component, its Closing Level on the Pricing Date, as shown in the table above.

With respect to each Basket Component, its Closing Level on the Valuation Date, subject to adjustment as provided under “General Terms of the Notes — Unavailability of the Level of the Reference Asset” beginning on page PS-18 of the accompanying product prospectus supplement.

**Final
Index
Level:**

If the originally scheduled Valuation Date is not a Trading Day with respect to a Basket Component or a market disruption event with respect to a Basket Component occurs or is continuing on the originally scheduled Valuation Date, the Final Index Level for that Basket Component will be its Closing Level on the first Trading Day for such Basket Component following the originally scheduled Valuation Date on which the Calculation Agent determines that a market disruption event does not occur or is not continuing. If a market disruption event with respect to such Basket Component occurs or is continuing on each Trading Day to and including the tenth scheduled Trading Day following the originally scheduled Valuation Date, or if there are no Trading Days for a period of 10 scheduled Trading Days, the Final Index Level for that Basket Component will be determined (or, if not determinable, estimated by the Calculation Agent in a manner which is considered commercially reasonable under the circumstances) by the Calculation Agent on that tenth scheduled Trading Day, regardless of whether such day is a Trading Day or the occurrence or continuation of a market disruption event on that day. For the avoidance of doubt, if the originally scheduled Valuation Date is a Trading Day and no market disruption event exists on that day with respect to a Basket Component, the determination of that Basket Component’s Final Index Level will be made on the originally scheduled Valuation Date, irrespective of the non-Trading Day status or the existence of a market disruption event with respect to any other Basket Component. For the definition of a market disruption event, see “General Terms of the Notes — Market Disruption Events” beginning on page PS-19 of the product prospectus supplement. If the originally scheduled Valuation Date is postponed due to a non-Trading Day or a market disruption event for any Basket Component, the Maturity Date will be postponed to the second Business Day after the postponed Valuation Date.

**Closing
Level:**

With respect to each Basket Component, its Closing Level will be the official closing level of that Basket Component or any successor index (as defined in the product prospectus supplement) published by the Index Sponsor (as defined in the product prospectus supplement) on any Trading Day for that Basket Component.

**Business
Day:**

Any day that is a Monday, Tuesday, Wednesday, Thursday or Friday that is neither a legal holiday nor a day on which banking institutions are authorized or required by law to close in New York City or Toronto.

A Trading Day with respect to a Basket Component means a day on which:

**Trading
Day:**

(A) the Eurex (as to the EURO STOXX 50[®] Index), the London Stock Exchange (as to the FTSE[®] 100 Index), the Tokyo Stock Exchange (as to TOPIX), the SIX Swiss Exchange (as to the Swiss Market Index), or the Australian Stock Exchange (as to the S&P/ASX 200 Index) (or any successor to the foregoing exchanges), as applicable, is open for trading; and

(B) that Basket Component or its successor thereto is calculated and published.

**U.S. Tax
Treatment:**

By purchasing a Note, each holder agrees, in the absence of a statutory, regulatory, administrative or judicial ruling to the contrary, to characterize the Notes, for U.S. federal income tax purposes, as pre-paid derivative contracts with respect to the Basket. Based on certain factual representations received from us, in the opinion of our special U.S. tax counsel, Cadwalader, Wickersham & Taft LLP, it is reasonable to treat the Notes in the manner described above. However, because there is no authority that specifically addresses the tax treatment of the Notes, it is possible that your Notes could alternatively be treated for tax purposes as a single contingent payment debt instrument, or pursuant to some other characterization, such that the timing and character of your income from the Notes could differ materially from the treatment

described above. Please see the discussion below under “Supplemental Discussion of U.S. Federal Income Tax Consequences”.

P-5

Canadian Tax Treatment:	Please see the discussion in the product prospectus supplement under “Supplemental Discussion of Canadian Tax Consequences,” which applies to the Notes.
Calculation Agent:	TD
Listing:	The Notes will not be listed or displayed on any securities exchange or electronic communications network.
Clearance and Settlement:	DTC global (including through its indirect participants Euroclear and Clearstream, Luxembourg) as described under “Forms of the Debt Securities” and “Book-Entry Procedures and Settlement” in the prospectus.

P-6

Additional Terms of Your Notes

You should read this pricing supplement together with the prospectus, as supplemented by the product prospectus supplement, relating to our Senior Debt Securities, of which these Notes are a part. Capitalized terms used but not defined in this pricing supplement will have the meanings given to them in the product prospectus supplement. In the event of any conflict the following hierarchy will govern: first, this pricing supplement; second, the product prospectus supplement; and last, the prospectus. ***The Notes vary from the terms described in the product prospectus supplement in several important ways. You should read this pricing supplement carefully.***

This pricing supplement, together with the documents listed below, contains the terms of the Notes and supersedes all prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in “Additional Risk Factors” beginning on page P-8 of this pricing supplement, “Additional Risk Factors Specific to the Notes” beginning on page PS-5 of the product prospectus supplement and “Risk Factors” on page 1 of the prospectus, as the Notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the Notes. You may access these documents on the Securities and Exchange Commission (the “SEC”) website at www.sec.gov as follows (or if that address has changed, by reviewing our filings for the relevant date on the SEC website):

§ Prospectus dated June 30, 2016:
<https://www.sec.gov/Archives/edgar/data/947263/000119312516638441/d162493d424b3.htm>

§ Product Prospectus Supplement MLN-EI-1 dated June 30, 2016:
https://www.sec.gov/Archives/edgar/data/947263/000089109216015847/e70323_424b2.htm

Our Central Index Key, or CIK, on the SEC website is 0000947263. As used in this pricing supplement, the “Bank,” “we,” “us,” or “our” refers to The Toronto-Dominion Bank and its subsidiaries. Alternatively, The Toronto-Dominion Bank, any agent or any dealer participating in this offering will arrange to send you the product prospectus supplement and the prospectus if you so request by calling 1-855-303-3234.

Additional Risk Factors

The Notes involve risks not associated with an investment in conventional debt securities. This section describes the most significant risks relating to the terms of the Notes. For additional information as to these risks, please see “Additional Risk Factors Specific to the Notes” beginning on page PS-5 in the product prospectus supplement and “Risk Factors” on page 1 in the prospectus.

You should carefully consider whether the Notes are suited to your particular circumstances before you decide to purchase them. Accordingly, prospective investors should consult their investment, legal, tax, accounting and other advisors as to the risks entailed by an investment in the Notes and the suitability of the Notes in light of their particular circumstances.

Principal at Risk.

Investors in the Notes could lose their entire Principal Amount if there is a decline in the level of the Basket by more than the Buffer Percentage. If the Final Basket Level is less than the Initial Basket Level by more than 20.00%, you will lose a portion of each \$1,000 Principal Amount in an amount equal to (i) the Downside Multiplier times (ii) the sum of the negative Percentage Change plus the Buffer Percentage times (iii) \$1,000. Specifically, you will lose 1.25% of the Principal Amount of each of your Notes for every 1% that the Final Basket Level is less than the Initial Basket Level in excess of the Buffer Percentage and you may lose your entire Principal Amount.

The Notes Do Not Pay Interest and Your Return on the Notes May Be Less Than the Return on Conventional Debt Securities of Comparable Maturity.

There will be no periodic interest payments on the Notes as there would be on a conventional fixed-rate or floating-rate debt security having the same term. The return that you will receive on the Notes, which could be negative, may be less than the return you could earn on other investments. Even if your return is positive, your return may be less than the return you would earn if you bought a conventional senior interest bearing debt security of TD.

Your Potential Return on the Notes Is Limited by the Maximum Payment Amount and May Be Less Than the Return on a Direct Investment In the Basket Components.

The opportunity to participate in the possible increases in the level of the Basket through an investment in the Notes will be limited because the Payment at Maturity will not exceed the Maximum Payment Amount. Furthermore, the effect of the Leverage Factor will not be taken into account for any Final Basket Level exceeding the Cap Level no matter how much the level of the Basket may rise above the Cap Level. Accordingly, your return on the Notes may be less than your return would be if you made an investment in a security directly linked to the performance of the Basket Components.

Changes in the Level of One Basket Component May Be Offset by Changes in the Level of the Other Basket Components.

A change in the level of one Basket Component may not correlate with changes in the levels of the other Basket Components. The level of one or more Basket Components may increase while the level of one or more other Basket Components may not increase as much, or may even decrease. Therefore, in determining the level of the Basket as of any time, increases in the level of one Basket Component may be moderated, or wholly offset, by lesser increases or decreases in the level of one or more other Basket Components. Because the weightings of the Basket Components are not equal, the performances of the EURO STOXX 50[®] Index, the FTSE[®] 100 Index and TOPIX will have a significantly larger impact on your return on the Notes than the performance of the Swiss Market Index or the

S&P/ASX 200 Index.

Investors Are Subject to TD's Credit Risk, and TD's Credit Ratings and Credit Spreads May Adversely Affect the Market Value of the Notes.

Although the return on the Notes will be based on the performance of the Basket, the payment of any amount due on the Notes is subject to TD's credit risk. The Notes are TD's unsecured debt obligations. Investors are dependent on TD's ability to pay all amounts due on the Notes on the Maturity Date and, therefore, investors are subject to the credit risk of TD and to changes in the market's view of TD's creditworthiness. Any decrease in TD's credit ratings or increase in the credit spreads charged by the market for taking TD's credit risk is likely to adversely affect the market value of the Notes. If TD becomes unable to meet its financial obligations as they become due, you may not receive any amounts due under the terms of the Notes.

The Agent Discount, if any, Offering Expenses and Certain Hedging Costs Are Likely to Adversely Affect Secondary Market Prices.

Assuming no changes in market conditions or any other relevant factors, the price, if any, at which you may be able to sell the Notes will likely be lower than the public offering price. The public offering price includes, and any price quoted to you is likely to exclude, offering expenses as well as the cost of hedging our obligations under the Notes. In addition, any such

P-8

price is also likely to reflect any dealer discounts, mark-ups and other transaction costs, such as a discount to account for costs associated with establishing or unwinding any related hedge transaction. In addition, if the dealer from which you purchase Notes, or one of its affiliates, is to conduct hedging activities for us in connection with the Notes, that dealer, or one of its affiliates, may profit in connection with such hedging activities and such profit, if any, will be in addition to the compensation that the dealer receives for the sale of the Notes to you. You should be aware that the potential for that dealer or one of its affiliates to earn fees in connection with hedging activities may create a further incentive for that dealer to sell the Notes to you in addition to any compensation they would receive for the sale of the Notes.

There May Not Be an Active Trading Market for the Notes — Sales in the Secondary Market May Result in Significant Losses.

There may be little or no secondary market for the Notes. The Notes will not be listed or displayed on any securities exchange or electronic communications network. TDS and our or their respective affiliates may make a market for the Notes; however, they are not required to do so. TDS and our affiliates may stop any market-making activities at any time. Even if a secondary market for the Notes develops, it may not provide significant liquidity or trade at prices advantageous to you. We expect that transaction costs in any secondary market would be high. As a result, the difference between bid and ask prices for your Notes in any secondary market could be substantial.

If you sell your Notes before the Maturity Date, you may have to do so at a substantial discount from the public offering price irrespective of the levels of the Basket Components and, as a result, you may suffer substantial losses.

If the Level of the Basket Components Change, the Market Value of Your Notes May Not Change in the Same Manner.

Your Notes may trade quite differently from the performance of the Basket Components. Changes in the levels of the Basket Components may not result in a comparable change in the market value of your Notes. Even if the levels of the Basket Components increase above the Initial Index Levels during the life of the Notes, the market value of your Notes may not increase by the same amount and could decline.

The Payment at Maturity Is Not Linked to the Levels of the Basket Components at Any Time Other than the Valuation Date.

The Final Basket Level will be based on the Closing Levels of the Basket Components on the Valuation Date (subject to adjustment as described elsewhere in this pricing supplement). Therefore, if the Closing Levels of the Basket Components dropped precipitously on the Valuation Date, the Payment at Maturity for your Notes may be significantly less than it would have been had the Payment at Maturity been linked to the Closing Levels of the Basket Components prior to such drop in the levels of the Basket Components. Although the actual levels of the Basket Components on the Maturity Date or at other times during the life of your Notes may be higher than their levels on the Valuation Date, you will only benefit from the Closing Levels of the Basket Components on the Valuation Date.

We May Sell an Additional Aggregate Principal Amount of the Notes at a Different Public Offering Price.

At our sole option, we may decide to sell an additional aggregate Principal Amount of the Notes subsequent to the date of this pricing supplement. The public offering price of the Notes in the subsequent sale may differ substantially (higher or lower) from the original public offering price you paid as provided on the cover of this pricing supplement.

If You Purchase Your Notes at a Premium to Principal Amount, the Return on Your Investment Will Be Lower Than the Return on Notes Purchased at Principal Amount and the Impact of Certain Key Terms of the

Notes Will be Negatively Affected.

The Payment at Maturity will not be adjusted based on the public offering price you pay for the Notes. If you purchase Notes at a price that differs from the Principal Amount of the Notes, then the return on your investment in such Notes held to the Maturity Date will differ from, and may be substantially less than, the return on Notes purchased at Principal Amount. If you purchase your Notes at a premium to Principal Amount and hold them to the Maturity Date, the return on your investment in the Notes will be lower than it would have been had you purchased the Notes at Principal Amount or a discount to Principal Amount. In addition, the impact of the Buffer Level and the Cap Level on the return on your investment will depend upon the price you pay for your Notes relative to Principal Amount. For example, if you purchase your Notes at a premium to Principal Amount, the Cap Level will only permit a lower positive return on your investment in the Notes than would have been the case for Notes purchased at Principal Amount or a discount to Principal Amount. Similarly, the Buffer Level, while still providing some protection for the return on the Notes, will allow a greater percentage decrease in your investment in the Notes than would have been the case for Notes purchased at Principal Amount or a discount to Principal Amount.

You Will Not Have Any Rights to the Securities Included in Any Basket Component.

As a holder of the Notes, you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of securities included in a Basket Component (the “Basket Component Constituents”) would have. The Final Basket Level will not reflect any dividends paid on any Basket Component Constituents.

We Have No Affiliation with Any Index Sponsor and Will Not Be Responsible for Any Actions Taken by Any Index Sponsor.

No Index Sponsor is an affiliate of ours or will be involved in any offerings of the Notes in any way. Consequently, we have no control of any actions of an Index Sponsor, including any actions of the type that would require the Calculation Agent to adjust the Payment at Maturity. No Index Sponsor has any obligation of any sort with respect to the Notes. Thus, no Index Sponsor has any obligation to take your interests into consideration for any reason, including in taking any actions that might affect the value of the Notes. None of our proceeds from any issuance of the Notes will be delivered to any Index Sponsor, except to the extent that we are required to pay an Index Sponsor licensing fees with respect to the relevant Basket Component.

Trading and Business Activities by TD and Our Affiliates May Adversely Affect the Market Value of the Notes.

TD and our affiliates may hedge our obligations under the Notes by purchasing securities, futures, options or other derivative instruments with returns linked or related to changes in the levels of the Basket Components or the prices of one or more Basket Component Constituents, and we or they may adjust these hedges by, among other things, purchasing or selling securities, futures, options or other derivative instruments at any time. It is possible that we or one or more of our affiliates could receive substantial returns from these hedging activities while the market value of the Notes declines. We or one or more of our affiliates may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to changes in the performance of the applicable Basket Components or one or more Basket Component Constituents.

These trading activities may present a conflict between the holders’ interest in the Notes and the interests we and our affiliates will have in our or their proprietary accounts, in facilitating transactions, including options and other derivatives transactions, for our or their customers’ accounts and in accounts under our or their management. These trading activities could be adverse to the interests of the holders of the Notes.

We and our affiliates may, at present or in the future, engage in business with one or more issuers of a Basket Component Constituent (a “Basket Component Constituent Issuer”), including making loans to or providing advisory services to those companies. These services could include investment banking and merger and acquisition advisory services. These business activities may present a conflict between us and our affiliates obligations, and your interests as a holder of the Notes. Moreover, we, and our affiliates may have published, and in the future expect to publish, research reports with respect to one or more Basket Components or Basket Component Constituent Issuers. This research is modified from time to time without notice and may express opinions or provide recommendations that are inconsistent with purchasing or holding the Notes. Any of these business activities by us or one or more of our affiliates may affect the level of one or more Basket Components or one or more Basket Component Constituents and, therefore, the market value of the Notes.

TD’s Initial Estimated Value of the Notes at the Time of Pricing (When the Terms of Your Notes Were Set on the Pricing Date) Is Less Than the Public Offering Price of the Notes.

TD’s initial estimated value of the Notes is only an estimate. TD’s initial estimated value of the Notes is less than the public offering price of the Notes. The difference between the public offering price of the Notes and TD’s initial

estimated value reflects costs and expected profits associated with selling and structuring the Notes, as well as hedging its obligations under the Notes with a third party. Because hedging our obligations entails risks and may be influenced by market forces beyond our control, this hedging may result in a profit that is more or less than expected, or a loss.

TD's and TDS's Estimated Value of the Notes are Determined By Reference to TD's Internal Funding Rates and are Not Determined By Reference to Credit Spreads or the Borrowing Rate TD Would Pay for its Conventional Fixed-Rate Debt Securities.

TD's initial estimated value of the Notes and TDS's estimated value of the Notes at any time are determined by reference to TD's internal funding rate. The internal funding rate used in the determination of the estimated value of the Notes generally represents a discount from the credit spreads for TD's conventional fixed-rate debt securities and the borrowing rate TD would pay for its conventional fixed-rate debt securities. This discount is based on, among other things, TD's view of the funding value of the Notes as well as the higher issuance, operational and ongoing liability management costs of the Notes in comparison to those costs for TD's conventional fixed-rate debt, as well as estimated financing costs of any hedge positions, taking into account regulatory and internal requirements. If the interest rate implied by the credit spreads for TD's conventional fixed-rate debt securities, or the borrowing rate TD would pay for its conventional fixed-rate debt

securities were to be used, TD would expect the economic terms of the Notes to be more favorable to you. Additionally, assuming all other economic terms are held constant, the use of an internal funding rate for the Notes is expected to increase the estimated value of the Notes at any time.

TD's Initial Estimated Value of the Notes Does Not Represent Future Values of the Notes and May Differ From Others' (Including TDS's) Estimates.

TD's initial estimated value of the Notes was determined by reference to its internal pricing models when the terms of the Notes were set. These pricing models take into account a number of variables, such as TD's internal funding rate on the Pricing Date, and are based on a number of assumptions as discussed further under "Additional Information Regarding the Estimated Value of the Notes" on page P-2. Different pricing models and assumptions (including the pricing models and assumptions used by TDS) could provide valuations for the Notes that are different, and perhaps materially lower, from TD's initial estimated value. Therefore, the price at which TDS would buy or sell your Notes (if TDS makes a market, which it is not obligated to do) may be materially lower than TD's initial estimated value. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect.

The Estimated Value of the Notes Is Not a Prediction of the Prices at Which You May Sell Your Notes in the Secondary Market, If Any, and Such Secondary Market Prices, If Any, Will Likely be Lower Than the Public Offering Price of Your Notes and May Be Lower Than the Estimated Value of Your Notes.

The estimated value of the Notes is not a prediction of the prices at which TDS, other affiliates of ours or third parties may be willing to purchase the Notes from you in secondary market transactions (if they are willing to purchase, which they are not obligated to do). The price at which you may be able to sell your Notes in the secondary market at any time, if any, will be influenced by many factors that cannot be predicted, such as market conditions, and any bid and ask spread for similar sized trades, and may be substantially less than the estimated value of the Notes. Further, as secondary market prices of your Notes take into account the levels at which our debt securities trade in the secondary market, and do not take into account our various costs and expected profits associated with selling and structuring the Notes, as well as hedging our obligations under the Notes, secondary market prices of your Notes will likely be lower than the public offering price of your Notes. As a result, the price at which TDS, other affiliates of ours or third parties may be willing to purchase the Notes from you in secondary market transactions, if any, will likely be lower than the price you paid for your Notes, and any sale prior to the Maturity Date could result in a substantial loss to you.

The Temporary Price at Which TDS May Initially Buy the Notes in the Secondary Market May Not Be Indicative of Future Prices of Your Notes.

Assuming that all relevant factors remain constant after the Pricing Date, the price at which TDS may initially buy or sell the Notes in the secondary market (if TDS makes a market in the Notes, which it is not obligated to do) may exceed the estimated value of the Notes on the Pricing Date, as well as the secondary market value of the Notes, for a temporary period after the Pricing Date of the Notes, as discussed further under "Additional Information Regarding the Estimated Value of the Notes." The price at which TDS may initially buy or sell the Notes in the secondary market may not be indicative of future prices of your Notes.

The Market Value of Your Notes May Be Influenced by Many Unpredictable Factors.

When we refer to the market value of your Notes, we mean the value that you could receive for your Notes if you chose to sell them in the open market before the Maturity Date. A number of factors, many of which are beyond our control, will influence the market value of your Notes, including:

the levels of the Basket Components;
the volatility – i.e., the frequency and magnitude of changes – in the level of the Basket;
the dividend rates, if applicable, of the Basket Component Constituents;
economic, financial, regulatory and political, military or other events that may affect the prices of any of the Basket Component Constituents and thus the level of the Basket;
the correlation among the Basket Components;
interest rate and yield rates in the market;
the time remaining until your Notes mature;
any fluctuations in the exchange rate between currencies in which the Basket Component Constituents are quoted and traded and the U.S. dollar, as applicable; and
our creditworthiness, whether actual or perceived, and including actual or anticipated upgrades or downgrades in our credit ratings or changes in other credit measures.

P-11

These factors will influence the price you will receive if you sell your Notes before maturity, including the price you may receive for your Notes in any market-making transaction. If you sell your Notes prior to maturity, you may receive less than the Principal Amount of your Notes.

The future levels of the Basket cannot be predicted. The actual change in the level of the Basket over the life of the Notes, as well as the Payment at Maturity, may bear little or no relation to the hypothetical historical closing levels of the Basket or to the hypothetical examples shown elsewhere in this pricing supplement.

Investment in the Offered Notes Is Subject to Risks Associated with Non-U.S. Securities Markets.

The value of your Notes is linked to Basket Components which include Basket Component Constituents traded in one or more non-U.S. securities markets. Investments linked to the value of non-U.S. equity securities involve particular risks. Any non-U.S. securities market may be less liquid, more volatile and affected by global or domestic market developments in a different way than are the U.S. securities market or other non-U.S. securities markets. Both government intervention in a non-U.S. securities market, either directly or indirectly, and cross-shareholdings in non-U.S. companies, may affect trading prices and volumes in that market. Also, there is generally less publicly available information about non-U.S. companies than about those U.S. companies that are subject to the reporting requirements of the SEC. Further, non-U.S. companies are likely subject to accounting, auditing and financial reporting standards and requirements that differ from those applicable to U.S. reporting companies.

The prices of securities in a non-U.S. country are subject to political, economic, financial and social factors that are unique to such non-U.S. country's geographical region. These factors include: recent changes, or the possibility of future changes, in the applicable non-U.S. government's economic and fiscal policies; the possible implementation of, or changes in, currency exchange laws or other laws or restrictions applicable to non-U.S. companies or investments in non-U.S. equity securities; fluctuations, or the possibility of fluctuations, in currency exchange rates; and the possibility of outbreaks of hostility, political instability, natural disaster or adverse public health developments. The United Kingdom has voted to leave the European Union (popularly known as "Brexit"). The effect of Brexit is uncertain, and Brexit has and may continue to contribute to volatility in the prices of securities of companies located in Europe and currency exchange rates, including the valuation of the euro and British pound in particular. Any one of these factors, or the combination of more than one of these or other factors, could negatively affect such non-U.S. securities market and the prices of securities therein. Further, geographical regions may react to global factors in different ways, which may cause the prices of securities in a non-U.S. securities market to fluctuate in a way that differs from those of securities in the U.S. securities market or other non-U.S. securities markets. Non-U.S. economies may also differ from the U.S. economy in important respects, including growth of gross national product, rate of inflation, capital reinvestment, resources and self-sufficiency, which may have a positive or negative effect on non-U.S. securities prices.

Your Notes Are Linked to Basket Components that are comprised of Basket Component Constituents that Are Traded in Non-U.S. Currencies But Are Not Adjusted to Reflect Their U.S. Dollar Value, Therefore, the Return on Your Notes Will Not Be Adjusted for Changes in Exchange Rates.

Because your Notes are linked to Basket Components with Basket Component Constituents that are traded in non-U.S. currencies but are not adjusted to reflect their U.S. dollar value, the Payment at Maturity will not be adjusted for changes in the applicable non-U.S. currency/U.S. dollar exchange rates. The Payment at Maturity will be based solely upon the overall change in the levels of the Basket Components over the life of your Notes. Changes in exchange rates, however, may reflect changes in the economy of the countries in which the Basket Component Constituents are listed that, in turn, may affect the level of the relevant Basket Component, and therefore the Basket.

As of the Date of this Pricing Supplement, There is No Actual History for the Closing Levels of the Basket.

The Payment at Maturity, if any, for each of your Notes is linked to the Percentage Change in the Basket, which will begin to be calculated on the Pricing Date. Since there will be no actual history for the closing levels of the Basket, no actual historical information about the Closing Levels of the Basket will be available for you to consider in making an independent investigation of the performance of the Basket, which may make it difficult for you to make an informed decision with respect to an investment in your Notes.

Hypothetical Past Basket Performance is No Guide to Future Performance.

The actual performance of the Basket over the life of the Notes, as well as the Payment at Maturity, may bear little relation to the hypothetical historical closing levels of the Basket (when available) or to the hypothetical return examples set forth elsewhere in this pricing supplement. The future performance of the Basket cannot be predicted.

There Are Potential Conflicts of Interest Between You and the Calculation Agent.

The Calculation Agent will, among other things, determine the amount of your payment on the Notes. We will serve as the Calculation Agent and may appoint a different Calculation Agent after the Issue Date without notice to you. The Calculation Agent will exercise its judgment when performing its functions and may take into consideration our ability to

unwind any related hedges. Since this discretion by the Calculation Agent may affect payments on the Notes, the Calculation Agent may have a conflict of interest if it needs to make any such decision. For example, the Calculation Agent may have to determine whether a market disruption event affecting a Basket Component has occurred. This determination may, in turn, depend on the Calculation Agent's judgment whether the event has materially interfered with our ability or the ability of one of our affiliates to unwind our hedge positions. Since this determination by the Calculation Agent will affect the payment on the Notes, the Calculation Agent may have a conflict of interest if it needs to make a determination of this kind. For additional information as to the Calculation Agent's role, see "General Terms of the Notes — Role of Calculation Agent" in the product prospectus supplement.

Market Disruption Events and Adjustments.

The Valuation Date, and therefore the Maturity Date, are subject to postponement as described in the product prospectus supplement due to the occurrence of one or more market disruption events. For a description of what constitutes a market disruption event as well as the consequences of that market disruption event, see "General Terms of the Notes—Market Disruption Events" in the product prospectus supplement and "Summary—Final Index Levels" herein.

Significant Aspects of the Tax Treatment of the Notes Are Uncertain.

Significant aspects of the U.S. tax treatment of the Notes are uncertain. You should consult your tax advisor about your tax situation and should read carefully the section entitled "Supplemental Discussion of U.S. Federal Income Tax Consequences" below.

For a more complete discussion of the Canadian federal income tax consequences of investing in the Notes, please see the discussion in the product prospectus supplement under "Supplemental Discussion of Canadian Tax Consequences".

If you are not a Non-resident Holder (as that term is defined in the prospectus) for Canadian federal income tax purposes or if you acquire the Notes in the secondary market, you should consult your tax advisors as to the consequences of acquiring, holding and disposing of the Notes and receiving the payments that might be due under the Notes.

Hypothetical Returns

The examples and graph set out below are included for illustration purposes only. They should not be taken as an indication or prediction of future investment results and merely are intended to illustrate the impact that the various hypothetical Basket levels on the Valuation Date could have on the Payment at Maturity assuming all other variables remain constant.

The examples below are based on a range of Final Basket Levels and Final Index Levels that are entirely hypothetical; the Basket level on any day throughout the life of the Notes, including the Final Basket Level on the Valuation Date, cannot be predicted. The Basket Components have been highly volatile in the past — meaning that the levels of the Basket Components have changed considerably in relatively short periods — and the performance of the Basket cannot be predicted for any future period.

The information in the following examples reflects hypothetical rates of return on the offered Notes assuming that they are purchased on the Issue Date at the Principal Amount and held to the Maturity Date. If you sell your Notes in a secondary market prior to the Maturity Date, your return will depend upon the market value of your Notes at the time of sale, which may be affected by a number of factors that are not reflected in the examples below, such as interest rates, the volatility of the Basket Components and our creditworthiness. In addition, the estimated value of your Notes at the time the terms of your Notes are set on the Pricing Date is less than the original public offering price of your Notes. For more information on the estimated value of your Notes, see “Additional Risk Factors — TD’s Initial Estimated Value of the Notes at the Time of Pricing (When the Terms of Your Notes Were Set on the Pricing Date) Is Less Than the Public Offering Price of the Notes.” on page P-10 of this pricing supplement. The information in the examples also reflect the key terms and assumptions in the box below.

Key Terms and Assumptions

Principal Amount	\$1,000
Initial Basket Level	100
Leverage Factor	220.00%
Cap Level	126.98% of the Initial Basket Level
Maximum Payment Amount	\$1,593.56
Buffer Level	80.00% of the Initial Basket Level
Downside Multiplier	125.00%
Buffer Percentage	20.00%
Neither a market disruption event nor a non-Trading Day occurs with respect to any Basket Component on the originally scheduled Valuation Date	
No change in or affecting any of the Basket Components or the method by which an Index Sponsor calculates the relevant Basket Component	
Notes purchased on the Issue Date at the Principal Amount and held to the Maturity Date	

The actual performance of the Basket over the life of your Notes, as well as the Payment at Maturity, if any, may bear little relation to the hypothetical examples shown below or to the hypothetical levels of the Basket or the historical levels of the Basket Components shown elsewhere in this pricing supplement. For information about the historical levels of the Basket Components and the hypothetical levels of the Basket during recent periods, see “Information Regarding the Basket Components — Historical Information of the Basket Components” and “Information Regarding the Basket Components — Hypothetical Information of the Basket” below.

Also, the hypothetical examples shown below do not take into account the effects of applicable taxes. Because of the U.S. tax treatment applicable to your Notes, tax liabilities could affect the after-tax rate of return on your Notes to a comparatively greater extent than the after-tax return on the Basket Components.

P-14

The levels in the left column of the table below represent hypothetical Final Basket Levels and are expressed as percentages of the Initial Basket Level. The amounts in the right column represent the hypothetical Payment at Maturity, based on the corresponding hypothetical Final Basket Level, and are expressed as percentages of the Principal Amount of a Note (rounded to the nearest one-thousandth of a percent). Thus, a hypothetical Payment at Maturity of 100.000% means that the value of the cash payment that we would deliver for each \$1,000 of the outstanding Principal Amount of the offered Notes on the Maturity Date would equal 100.000% of the Principal Amount of a Note, based on the corresponding hypothetical Final Basket Level and the assumptions noted above.

Hypothetical Final Basket Level (as Percentage of Initial Basket Level)	Hypothetical Payment at Maturity (as Percentage of Principal Amount)
150.000%	159.356%
140.000%	159.356%
130.000%	159.356%
126.980%	159.356%
120.000%	144.000%
110.000%	122.000%
105.000%	111.000%
100.000%	100.000%
95.000%	100.000%
90.000%	100.000%
80.000%	100.000%
75.000%	93.750%
50.000%	62.500%
25.000%	31.250%
0.000%	0.000%

If, for example, the Final Basket Level were determined to be 25.000% of the Initial Basket Level, the Payment at Maturity that we would deliver on your Notes at maturity would be approximately 31.250% of the Principal Amount of your Notes, as shown in the table above. As a result, if you purchased your Notes on the Issue Date at the Principal Amount and held them to the Maturity Date, you would lose approximately 68.750% of your investment (if you purchased your Notes at a premium to Principal Amount you would lose a correspondingly higher percentage of your investment). If the Final Basket Level were determined to be 0.000% of the Initial Basket Level, you would lose 100.000% of your investment in the Notes. In addition, if the Final Basket Level were determined to be 150.000% of the Initial Basket Level, the Payment at Maturity that we would deliver on your Notes at maturity would be capped at the Maximum Payment Amount, or 159.356% of each \$1,000 Principal Amount of your Notes, as shown in the table above. As a result, if you held your Notes to the Maturity Date, you would not benefit from any increase in the Final Basket Level of greater than 126.980% of the Initial Basket Level.

The following examples illustrate the hypothetical Payment at Maturity for each Note based on hypothetical Final Basket Levels and hypothetical Final Index Levels of the Basket Components, calculated based on the key terms and assumptions above.

The levels in Column A represent hypothetical Initial Index Levels for each Basket Component, and the levels in Column B represent hypothetical Final Index Levels for each Basket Component. The percentages in Column C represent hypothetical Basket Component Returns for each Basket Component. The amounts in Column D represent the applicable weightings of each Basket Component, and the amounts in Column E represent the *products* of the percentages in Column C *times* the corresponding amounts in Column D. The Final Basket Level for each example is shown beneath each example, and will equal 100 multiplied by the sum of one plus the *sum* of the amounts shown in Column E, and the Percentage Change for each example will equal the *quotient* of (i) the Final Basket Level for such

example *minus* the Initial Basket Level *divided* by (ii) the Initial Basket Level, expressed as a percentage. The values below have been rounded for ease of analysis.

The hypothetical Initial Index Level for each Basket Component of 100.00 has been chosen for illustrative purposes only and does not represent the Initial Index Level for any Basket Component. Because each hypothetical Initial Index Level has been set to 100.00, these examples do not accurately reflect the differences in the levels of the Basket Components. For historical data regarding the actual historical levels of the Basket Components, please see the historical information set forth below under “Information Regarding the Basket Components — Historical Information of the Basket Components”.

P-15

Example 1: The Final Basket Level is greater than the Cap Level. The Payment at Maturity equals the Maximum Payment Amount.

	Column A	Column B	Column C	Column D	Column E
Basket Component	Hypothetical Initial Index Level	Hypothetical Final Index Level	Basket Component Return	Component Weighting	Column C x Column D
EURO STOXX 50 [®] Index	100.00	135.00	35.00%	37.00%	0.1295
FTSE [®] 100 Index	100.00	135.00	35.00%	23.00%	0.0805
TOPIX	100.00	135.00	35.00%	23.00%	0.0805
Swiss Market Index	100.00	135.00	35.00%	9.00%	0.0315
S&P/ASX 200 Index	100.00	135.00	35.00%	8.00%	0.0280

$$\text{Final Basket Level} = 100 \times [1 + (0.1295 + 0.0805 + 0.0805 + 0.0315 + 0.0280)] = 135.00$$

In this example, all of the hypothetical Final Index Levels for the Basket Components are greater than the applicable hypothetical Initial Index Levels, which results in the hypothetical Final Basket Level being greater than the Initial Basket Level of 100.00. Since the hypothetical Final Basket Level of 135.00 is greater than the Cap Level, the hypothetical Payment at Maturity that we would deliver on your Notes would be capped at the Maximum Payment Amount of \$1,593.56 for each \$1,000 Principal Amount of your Notes (i.e. 159.356% of each \$1,000 Principal Amount of your Notes).

Example 2: The Final Basket Level is greater than the Initial Basket Level but less than the Cap Level.

	Column A	Column B	Column C	Column D	Column E
Basket Component	Hypothetical Initial Index Level	Hypothetical Final Index Level	Basket Component Return	Component Weighting	Column C x Column D
EURO STOXX 50 [®] Index	100.00	101.00	1.00%	37.00%	0.0037
FTSE [®] 100 Index	100.00	102.00	2.00%	23.00%	0.0046
TOPIX	100.00	103.00	3.00%	23.00%	0.0069
Swiss Market Index	100.00	120.00	20.00%	9.00%	0.0180
S&P/ASX 200 Index	100.00	135.00	35.00%	8.00%	0.0280

$$\text{Final Basket Level} = 100 \times [1 + (0.0037 + 0.0046 + 0.0069 + 0.0180 + 0.0280)] = 106.12$$

$$\text{Percentage Change} = (106.12 - 100.00) / 100.00 = 6.12\%$$

In this example, all of the hypothetical Final Index Levels for the Basket Components are greater than the applicable hypothetical Initial Index Levels, which results in the hypothetical Final Basket Level being greater than the Initial Basket Level of 100.00. Since the hypothetical Final Basket Level of 106.12 is greater than the Initial Basket Level but less than the Cap Level, the hypothetical Payment at Maturity for each \$1,000 Principal Amount of your Notes will equal:

$$\text{Payment at Maturity} = \$1,000 + (\$1,000 \times 220.00\% \times 6.12\%) = \$1,134.64$$

P-16

Example 3: The Final Basket Level is less than the Initial Basket Level, but greater than the Buffer Level. The Payment at Maturity equals the \$1,000 Principal Amount.

	Column A	Column B	Column C	Column D	Column E
Basket Component	Hypothetical Initial Index Level	Hypothetical Final Index Level	Basket Component Return	Component Weighting	Column C x Column D
EURO STOXX 50® Index	100.00	95.00	-5.00%	37.00%	-0.0185
FTSE® 100 Index	100.00	95.00	-5.00%	23.00%	-0.0115
TOPIX	100.00	95.00	-5.00%	23.00%	-0.0115
Swiss Market Index	100.00	95.00	-5.00%	9.00%	-0.0045
S&P/ASX 200 Index	100.00	95.00	-5.00%	8.00%	-0.0040

$$\text{Final Basket Level} = 100 \times [1 + (-0.0185 + -0.0115 + -0.0115 + -0.0045 + -0.0040)] = 95.00$$

In this example, all of the hypothetical Final Index Levels for the Basket Components are less than the applicable Initial Index Levels, which results in the hypothetical Final Basket Level being less than the Initial Basket Level of 100.00. Since the hypothetical Final Basket Level of 95.00 is less than the Initial Basket Level but greater than the Buffer Level, the hypothetical Payment at Maturity for each \$1,000 Principal Amount of your Notes will equal the Principal Amount of the Note, or \$1,000.

Example 4: The Final Basket Level is less than the Buffer Level. The Payment at Maturity is less than the \$1,000 Principal Amount.

	Column A	Column B	Column C	Column D	Column E
Basket Component	Hypothetical Initial Index Level	Hypothetical Final Index Level	Basket Component Return	Component Weighting	Column C x Column D
EURO STOXX 50® Index	100.00	35.00	-65.00%	37.00%	-0.2405
FTSE® 100 Index	100.00	90.00	-10.00%	23.00%	-0.0230
TOPIX	100.00	100.00	0.00%	23.00%	0.0000
Swiss Market Index	100.00	135.00	35.00%	9.00%	0.0315
S&P/ASX 200 Index	100.00	135.00	35.00%	8.00%	0.0280

$$\text{Final Basket Level} = 100 \times [1 + (-0.2405 + -0.0230 + 0.0000 + 0.0315 + 0.0280)] = 79.60$$

$$\text{Percentage Change} = (79.60 - 100.00) / 100.00 = -20.40\%$$

In this example, the hypothetical Final Index Levels of the EURO STOXX 50[®] Index and the FTSE[®] 100 Index are less than their applicable hypothetical Initial Index Levels, while the hypothetical Final Index Level of the TOPIX is equal to its hypothetical Initial Index Level and the hypothetical Final Index Levels of the Swiss Market Index and the S&P/ASX 200 Index are greater than their applicable Initial Index Levels.

Because the Basket is unequally weighted, increases in the lower weighted Basket Components will be offset by decreases in the more heavily weighted Basket Components. In this example, the large decline in the EURO STOXX 50[®] Index and the FTSE[®] 100 Index results in the hypothetical Final Basket Level being less than the Buffer Level, even though the TOPIX remained flat and the Swiss Market Index and the S&P/ASX 200 Index increased.

Since the hypothetical Final Basket Level of 79.60 is less than the Buffer Level, the hypothetical Payment at Maturity for each \$1,000 Principal Amount of your Notes will equal:

$$\text{Payment at Maturity} = \$1,000 + [\$1,000 \times 125.00\% \times (-20.40\% + 20.00\%)] = \$995.00$$

Example 5: The Final Basket Level is less than the Buffer Level. The Payment at Maturity is less than the \$1,000 Principal Amount.

	Column A	Column B	Column C	Column D	Column E
Basket Component	Hypothetical Initial Index Level	Hypothetical Final Index Level	Basket Component Return	Component Weighting	Column C x Column D
EURO STOXX 50® Index	100.00	50.00	-50.00%	37.00%	-0.1850
FTSE® 100 Index	100.00	60.00	-40.00%	23.00%	-0.0920
TOPIX	100.00	60.00	-40.00%	23.00%	-0.0920
Swiss Market Index	100.00	65.00	-35.00%	9.00%	-0.0315
S&P/ASX 200 Index	100.00	55.00	-45.00%	8.00%	-0.0360

Final Basket Level = $100 \times [1 + (-0.1850 + -0.0920 + -0.0920 + -0.0315 + -0.0360)] = 56.35$

Percentage Change = $(56.35 - 100.00) / 100.00 = -43.65\%$

In this example, the hypothetical Final Index Levels for all of the Basket Components are less than the applicable hypothetical Initial Index Levels, which results in the hypothetical Final Basket Level being less than the Initial Basket Level of 100.00. Since the hypothetical Final Basket Level of 56.35 is less than the Buffer Level, the hypothetical Payment at Maturity for each \$1,000 Principal Amount of your Notes will equal:

Payment at Maturity = $\$1,000 + [\$1,000 \times 125.00\% \times (-43.65\% + 20.00\%)] = \704.38

The following chart shows a graphical illustration of the hypothetical Payment at Maturity that we would pay on your Notes on the Maturity Date, if the Final Basket Level were any of the hypothetical levels shown on the horizontal axis. The hypothetical Payments at Maturity in the chart are expressed as percentages of the Principal Amount of your Notes and the hypothetical Final Basket Levels are expressed as percentages of the Initial Basket Level. The chart shows that any hypothetical Final Basket Level of less than 80.00% (the section left of the 80.00% marker on the horizontal axis) would result in a hypothetical Payment at Maturity of less than 100.00% of the Principal Amount of your Notes (the section below the 100.00% marker on the vertical axis) and, accordingly, in a loss of principal to the holder of the Notes. The chart also shows that any hypothetical Final Basket Level of greater than or equal to 126.98% (the section right of the 126.98% marker on the horizontal axis) would result in a capped return on your investment.

P-18

The Payments at Maturity shown above are entirely hypothetical; they are based on levels of the Basket that may not be achieved on the Valuation Date and on assumptions that may prove to be erroneous. The actual market value of your Notes on the Maturity Date or at any other time, including any time you may wish to sell your Notes, may bear little relation to the hypothetical Payment at Maturity shown above, and these amounts should not be viewed as an indication of the financial return on an investment in the offered Notes. The hypothetical Payment at Maturity on the Notes in the examples above assume you purchased your Notes at their Principal Amount and have not been adjusted to reflect the actual public offering price you pay for your Notes. The return on your investment (whether positive or negative) in your Notes will be affected by the amount you pay for your Notes. If you purchase your Notes for a price other than the Principal Amount, the return on your investment will differ from, and may be significantly lower than, the hypothetical returns suggested by the above examples. Please read “Additional Risk Factors Specific to the Notes — The Market Value of Your Notes May Be Influenced by Many Unpredictable Factors” beginning on page PS-6 of the product prospectus supplement.

Payments on the Notes are economically equivalent to the amounts that would be paid on a combination of other instruments. For example, payments on the Notes are economically equivalent to a combination of a non-interest-bearing bond bought by the holder and one or more options entered into between the holder and us (with one or more implicit option premiums paid over time). The discussion in this paragraph does not modify or affect the terms of the Notes or the U.S. federal income tax treatment of the Notes, as described elsewhere in this pricing supplement.

We cannot predict the actual Final Basket Level or what the market value of your Notes will be on any particular Trading Day, nor can we predict the relationship between the level of any Basket Component and the market value of your Notes at any time prior to the Maturity Date. The actual amount that you will receive, if any, on the Maturity Date and the rate of return on the offered Notes will depend on the actual Final Basket Level, which will be determined by the Calculation Agent as described above. Moreover, the assumptions on which the hypothetical returns are based may turn out to be inaccurate. Consequently, the amount of cash to be paid in respect of your Notes, if any, on the Maturity Date may be very different from the information reflected in the examples above.

Information Regarding The Basket Components

All disclosures contained in this pricing supplement regarding the Basket Components, including, without limitation, their make-up, methods of calculation, and changes in their components, have been derived from publicly available sources. The information reflects the policies of, and is subject to change by, the Index Sponsors. Each Index Sponsor, which owns the copyright and all other rights to the relevant Basket Component, has no obligation to continue to publish, and may discontinue publication of, the relevant Basket Component. The consequences of an Index Sponsor discontinuing publication of the relevant Basket Component are discussed in the section of the product prospectus supplement entitled “General Terms of the Notes — Unavailability of the Level of the Reference Asset.” Neither we nor TDS accepts any responsibility for the calculation, maintenance or publication of any Basket Component or any successor index. None of the websites referenced in the Basket Component descriptions below, or any materials included in those websites, are incorporated by reference into this pricing supplement.

EURO STOXX 50[®] Index (“SX5E”)

The SX5E is a free-float market capitalization-weighted index of 50 European blue-chip stocks and was created by and is sponsored and maintained by STOXX Limited. Publication of the SX5E began on February 26, 1998, based on an initial index value of 1,000 at December 31, 1991. The level of the SX5E is disseminated on the STOXX Limited website. STOXX Limited is under no obligation to continue to publish the SX5E and may discontinue publication of it at any time. Additional information regarding the SX5E may be obtained from the STOXX Limited website: stoxx.com.

The top ten Basket Component Constituents of the SX5E as of February 28, 2018, by weight, are: Total S.A. (5.06%), Siemens AG (3.93%), Banco Santander S.A. (3.90%), SAP SE (3.68%), Allianz SE (3.65%), Bayer AG (3.39%), BASF SE (3.39%), BNP Paribas (3.21%), Sanofi (3.18%) and Daimler AG (3.00%); Basket Component Constituent weights may be found at stoxx.com/download/indices/factsheets/SX5GT.pdf and are updated periodically.

As of February 28, 2018, the top ten industry sectors which comprise the SX5E represent the following weights in the SX5E: Banks (16.1%), Industrial Goods & Services (11.0%), Health Care (10.0%), Personal & Household Goods (9.0%), Technology (7.6%), Insurance (7.2%), Oil & Gas (6.6%), Automobiles & Parts (5.4%), Chemicals (5.3%) and Utilities (4.9%); industry weightings may be found at stoxx.com/download/indices/factsheets/SX5GT.pdf and are updated periodically. Percentages may not sum to 100% due to rounding. Sector designations are determined by STOXX Limited using criteria it has selected or developed. Index sponsors may use very different standards for determining sector designations. In addition, many companies operate in a number of sectors, but are listed in only one sector and the basis on which that sector is selected may also differ. As a result, sector comparisons between indices with different index sponsors may reflect differences in methodology as well as actual differences in the sector composition of the indices.

As of February 28, 2018, the eight countries which comprise the SX5E represent the following weights in the SX5E: France (37.3%), Germany (32.5%), Netherlands (10.2%), Spain (10.1%), Italy (5.0%), Belgium (2.8%), Finland (1.2%) and Ireland (1.0%); country weightings may be found at stoxx.com/download/indices/factsheets/SX5GT.pdf and are updated periodically.

The above information was derived from information prepared by STOXX Limited, however, the percentages we have listed above are approximate and may not match the information available on STOXX Limited's website due to subsequent corporation actions or other activity relating to a particular stock.

SX5E Composition.

The SX5E is composed of 50 Basket Component Constituents chosen by STOXX Limited from the 19 EURO STOXX Supersector indices, which represent the Eurozone portion of the STOXX Europe 600 Supersector indices. The 19 supersectors from which stocks are selected for the SX5E are Automobiles & Parts, Banks, Basic Resources, Chemicals, Construction & Materials, Financial Services, Food & Beverages, Health Care, Industrial Goods & Services, Insurance, Media, Oil & Gas, Personal & Household Goods, Real Estate, Retail, Technology, Telecommunications, Travel & Leisure and Utilities, although stocks from each of these supersectors are not necessarily included at a given time.

Component Selection

The composition of the SX5E is reviewed by STOXX Limited annually in September. Within each of the 10 EURO STOXX Supersector indices, the respective Basket Component Constituents are ranked by free-float market capitalization. The largest stocks are added to the selection list until the coverage is close to, but still less than, 60% of the free-float market capitalization of the corresponding EURO STOXX Total Market Index Supersector Index. If the next highest-ranked stock brings the coverage closer to 60% in absolute terms, then it is also added to the selection list. All remaining stocks that are current SX5E components are then added to the selection list. The stocks on the selection list are then ranked by free-float market capitalization. The 40 largest stocks on the selection list are chosen as Basket Component Constituents. The remaining 10 stocks are then selected from the largest current stocks ranked between 41 and 60. If the number of Basket Component Constituents is still below 50, then the largest remaining stocks on the selection list are added until the SX5E contains 50 stocks. In exceptional cases, the STOXX Limited Management Board may make additions and

deletions to the selection list. Companies allocated to a Eurozone country but not traded in Euros are not eligible for inclusion in the SX5E.

Ongoing Maintenance of Basket Component Constituents

The Basket Component Constituents of the SX5E are monitored on an ongoing monthly basis for deletion and quarterly basis for addition. Changes to the composition of the SX5E due to corporate actions (including mergers and takeovers, spin—offs, sector changes and bankruptcy) are announced immediately, implemented two trading days later and become effective on the next trading day after implementation.

The Basket Component Constituents of the SX5E are subject to a “fast exit” rule. A Basket Component Constituent is deleted if it ranks 75 or below on the monthly selection list and it ranked 75 or below on the selection list of the previous month. The highest-ranked non-constituent will replace the exiting Basket Component Constituent. The SX5E is also subject to a “fast entry” rule. All stocks on the latest selection lists and initial public offering (IPO) stocks are reviewed for a fast-track addition on a quarterly basis. A stock is added if it qualifies for the latest blue-chip selection list generated at the end of February, May, August or November and if it ranks within the lower buffer (between 1 and 25) on the selection list. If added, the stock replaces the smallest Basket Component Constituent.

A deleted stock is replaced immediately to maintain the fixed number of stocks. The replacement is based on the latest monthly selection list. In the case of a merger or takeover where a Basket Component Constituent is involved, the original Basket Component Constituent is replaced by the new Basket Component Constituent. In the case of a spin-off, if the original stock was a Basket Component Constituent, then each spin-off stock qualifies for addition if it lies within the lower buffer (between 1 and 40) on the latest selection list. The largest qualifying spin-off stock replaces the original Basket Component Constituent, while the next qualifying spin-off stock replaces the lowest ranked Basket Component Constituent and likewise for other qualifying spin-off stocks.

The free float factors and outstanding number of shares for each Basket Component Constituent that STOXX Limited uses to calculate the SX5E, as described below, are reviewed, calculated and implemented on a quarterly basis and are fixed until the next quarterly review. Certain extraordinary adjustments to the free float factors and/or the number of outstanding shares are implemented and made effective more quickly. The timing depends on the magnitude of the change. Each component’s weight is capped at 10% of the SX5E’s total free float market capitalization. The free float factor reduces the Basket Component Constituent’s number of shares to the actual amount available on the market. All holdings that are larger than five percent of the total outstanding number of shares and held on a long-term basis are excluded from the index calculation (including, but not limited to, stock owned by the company itself, stock owned by governments, stock owned by certain individuals or families, and restricted shares).

Index Calculation

STOXX Limited calculates the SX5E using the “Laspeyres formula,” which measures the aggregate price changes in the Basket Component Constituents against a fixed base quantity weight. The discussion below describes the “price return” calculation of the SX5E. The formula for calculating the SX5E value can be expressed as follows:

Free Float Market

SX5E=Capitalization

of the SX5E

Divisor

The “free float market capitalization of the SX5E” is equal to the sum of the product of the price, the number of shares, the free float factor and the weighting cap factor for each Basket Component Constituent as of the time the SX5E is being calculated. The Basket Component Constituents trade in Euros and thus, no currency conversion is required. Where any Basket Component Constituent price is unavailable on any trading day, STOXX Limited will generally use the last reported price for such Basket Component Constituent.

In case the investability and tradability of the index and index based products is affected by an upcoming market or company event that is considered significant or “extreme” by the STOXX Management Board, the following actions or a combination of the following actions are taken. For all such changes a minimum notification period of two full trading days will be observed. The action scope may include but is not limited to:

- application of expert judgment for Basket Component Constituent pricing data,
- adjustment of operational procedures,
- postponement of index adjustments,
- adjustment of selection lists,
- change of weights of Basket Component Constituents by adjusting the number of shares, free-float factors or weighting cap-factors, or

P-21

adjustment of index compositions.

EURO STOXX 50[®] Divisor

The SX5E is calculated using a divisor that helps to maintain the continuity of the index's value so that corporate actions do not artificially increase or decrease the level of the SX5E.

The divisor is calculated by starting with the previous divisor in effect for the SX5E (which we call the "original divisor value") and multiplying it by a fraction, the numerator of which is the previous free float market capitalization of the SX5E, plus or minus the difference between the closing market capitalization of the SX5E and the adjusted closing market capitalization of the SX5E, and the denominator of which is the previous free float market capitalization of the SX5E. The adjusted free float market capitalization is calculated for stocks of companies that have experienced a corporate action of the type described below as of the time the new divisor value is being calculated using the free float market capitalization calculated with adjusted closing prices, the new number of shares, and the new free float factor minus the free float market capitalization calculated with that stock's original closing price, number of shares, and free float factor, in each case as used in calculating the original divisor value. Errors in divisor calculation are corrected on an intraday basis if discovered on the same day the new divisor is effective. If the error is discovered later, the error is corrected on an intraday basis if feasible and only if the error is considered significant by the STOXX Limited Management Board.

Divisor Adjustments

STOXX Limited adjusts the divisor for the SX5E to maintain the continuity of the SX5E values across changes due to corporate actions. Changes in weights due to corporate actions are distributed proportionally across all Basket Component Constituents and equal an investment into the portfolio. The following is a summary of the adjustments to any Basket Component Constituent made for corporate actions and the effect of such adjustments on the divisor, where shareholders of the Basket Component Constituent will receive "B" new shares for every "A" share held (where applicable) and assuming that the version of the index to which your notes are linked is the price return version. All adjusted prices consider withholding taxes based on the new shares being distributed, using "B * (1 - withholding tax where applicable)".

(1) Special cash dividend:

Adjusted price = closing price – dividend announced by the company * (1 - withholding tax if

applicable)

Divisor: decreases

(2) Split and reverse split:

Adjusted price = closing price * A / B

New number of shares = old number of shares * B / A

Divisor: no change

(3) Rights offering:

Adjusted price = (closing price * A + subscription price * B) / (A +

B)

New number of shares = old number of shares * (A + B) / A

Divisor: increases

If the subscription price is not available or if the subscription price is equal to or greater than the closing price on the day before the effective date, then no adjustment is made.

Extremely dilutive rights issues having a share ratio larger or equal to 2000% ($B/A \geq 20$) are treated as follows:

STOXX Limited will announce the deletion of the company from the index following the standard rules for index replacements if sufficient notice of two trading days before the ex-date can be given.

The company may enter the SX5E again at the next periodic index review, but only after the new rights issue shares have been listed.

P-22

Extremely dilutive rights issues for which two trading days' notice before the ex-date cannot be given, and all highly dilutive rights issues having a share ratio larger or equal to 200% ($B/A > 2$) are treated as follows:

The rights issue shares are included into the index with a theoretical price on the ex-date;

The rights issue shares must be listed on an eligible stock exchange and tradable starting on the ex-date, otherwise, only a price adjustment is made and the rights are not included;

The rights issue shares will have the same parameters as the parent company;

The rights issue shares will be removed at the close of the day they start to trade with traded price being available; and

The number of shares and weighting factors will be increased after the new rights issue shares have been listed.

(4) *Stock dividend:*

Adjusted price = closing price * A / (A + B)

New number of shares = old number of shares * (A + B) / A

Divisor: no change

(5) *Stock dividend from treasury stock if treated as extraordinary dividend:*

Adjusted close = close – close * B / (A + B)

Divisor: decreases

(6) *Stock dividend of another company:*

Adjusted price = (closing price * A – price of other company * B) / A

Divisor: decreases

(7) *Return of capital and share consolidation:*

Adjusted price = [closing price – capital return announced by company * (1 – withholding tax)] * A / B

New number of shares = old number of shares * B / A

Divisor: decreases

(8) *Repurchase of shares / self-tender:*

Adjusted price = [(price before tender * old number of shares) – (tender price * number of tendered shares)] / (old number of shares – number of tendered shares)

New number of shares = old number of shares – number of tendered shares

Divisor: decreases

(9) *Spin-off:*

Adjusted price = (closing price * A – price of spin-off shares * B) / A

Divisor: decreases

(10) *Combination stock distribution (dividend or split) and rights offering:*

For this corporate action, the following additional assumptions apply:

Shareholders receive B new shares from the distribution and C new shares from the rights offering for every A share held; and

If A is not equal to one, all the following “new number of shares” formulae need to be divided by A.

If rights are applicable after stock distribution (one action applicable to another):

Adjusted price = $[\text{closing price} * A + \text{subscription price} * C * (1 + B / A)] / [(A + B) * (1 + C / A)]$

New number of shares = $\text{old number of shares} * [(A + B) * (1 + C / A)] / A$

Divisor: increases

P-23

If stock distribution is applicable after rights (one action applicable to another):

Adjusted price = (closing price * A + subscription price * C) / [(A + C) * (1 + B / A)]

New number of shares = old number of shares * [(A + C) * (1 + B / A)]

Divisor: increases

Stock distribution and rights (neither action is applicable to the other):

Adjusted price = (closing price * A + subscription price * C) / (A + B + C)

New number of shares = old number of shares * (A + B + C) / A

Divisor: increases

(11) Addition/deletion of a company

No price adjustments are made. The net change in market capitalization determines the divisor adjustment.

(12) Free float and shares changes

No price adjustments are made. The change in market capitalization determines the divisor adjustment.

The SX5E is the intellectual property of STOXX Limited, Zurich, Switzerland and/or its licensors (“Licensors”), which is used under license. The securities or other financial instruments based on the SX5E are in no way sponsored, endorsed, sold or promoted by STOXX Limited and its Licensors and neither STOXX Limited nor its Licensors shall have any liability with respect thereto.

License Agreement

We have entered into a non-exclusive license agreement with STOXX Limited providing for the license to us and certain of our affiliated or subsidiary companies, in exchange for a fee, of the right to use indices owned and published by STOXX Limited (including the SX5E) in connection with certain securities, including the Notes offered hereby.

The license agreement between us and STOXX Limited requires that the following language be stated in this document:

STOXX Limited has no relationship to us, other than the licensing of the SX5E and the related trademarks for use in connection with the Notes. STOXX Limited does not:

- sponsor, endorse, sell, or promote the Notes;
- recommend that any person invest in the Notes offered hereby or any other securities;
- have any responsibility or liability for or make any decisions about the timing, amount, or pricing of the Notes;
- have any responsibility or liability for the administration, management, or marketing of the Notes; or
- consider the needs of the Notes or the holders of the Notes in determining, composing, or calculating the SX5E, or have any obligation to do so.

STOXX Limited will not have any liability in connection with the Notes. Specifically:

- STOXX Limited does not make any warranty, express or implied, and disclaims any and all warranty concerning:

the results to be obtained by the Notes, the holders of the Notes or any other person in connection with the use of the SX5E and the data included in the SX5E;

· the accuracy or completeness of the SX5E and its data;

· the merchantability and the fitness for a particular purpose or use of the SX5E and its data;

· STOXX Limited will have no liability for any errors, omissions, or interruptions in the SX5E or its data; and

Under no circumstances will STOXX Limited be liable for any lost profits or indirect, punitive, special, or consequential damages or losses, even if STOXX Limited knows that they might occur.

The licensing agreement between us and STOXX Limited is solely for their benefit and our benefit, and not for the benefit of the holders of the Notes or any other third parties.

P-24

FTSE® 100 Index (“UKX”)

The UKX is a market capitalization-weighted index of the 100 most highly capitalized U.K.-listed blue chip companies traded on the London Stock Exchange. The UKX is sponsored, calculated, published and disseminated by FTSE Russell, a company owned by the London Stock Exchange Group Companies that we refer to as FTSE. The UKX was first launched with a base level of 1,000 as of December 30, 1983. Additional information on the UKX is available from the following website: ftse.com/products/indices/uk. FTSE is under no obligation to continue to publish the UKX and may discontinue publication of the UKX at any time.

FTSE divides the 100 companies included in the UKX into 19 Industry Classification Benchmark supersectors: Oil & Gas, Chemicals, Basic Resources, Construction & Materials, Industrial Goods & Services, Automobiles & Parts, Food & Beverage, Personal & Household Goods, Health Care, Retail, Media, Travel & Leisure, Telecommunications, Utilities, Banks, Insurance, Real Estate, Financial Services and Technology.

Basket Component Constituent Weighting by Industry as of March 30, 2018

Industry*	Percentage**
Oil & Gas	15.43%
Banks	13.33%
Personal & Household Goods	12.75%
Health Care	9.79%
Basic Resources	8.20%
Industrial Goods & Services	6.93%
Insurance	6.24%
Travel & Leisure	4.00%
Food & Beverages	3.98%
Telecommunications	3.89%
Media	3.29%
Utilities	3.16%
Retail	2.72%
Financial Services	2.47%
Construction & Materials	1.11%
Real Estate	1.04%
Chemicals	0.64%
Technology	0.61%
Automobiles & Parts	0.44%

* Sector designations are determined by FTSE using criteria it has selected or developed. Index sponsors may use very different standards for determining sector designations. In addition, many companies operate in a number of sectors, but are listed in only one sector and the basis on which that sector is selected may also differ. As a result, sector comparisons between indices with different index sponsors may reflect differences in methodology as well as actual differences in the sector composition of the indices.

** Information provided by FTSE. Percentages may not sum to 100% due to rounding.

The top five Basket Component Constituents of the UKX as of March 30, 2018, by weight, are: HSBC Holdings PLC (7.34%); Royal Dutch Shell PLC Class A (5.65%); British American Tobacco PLC (5.20%); BP PLC (5.08%); and Royal Dutch Shell PLC Class B (4.70%).

The above information was derived from information prepared by FTSE, however, the percentages we have listed above are approximate and may not match the information available on FTSE's website due to subsequent corporation actions or other activity relating to a particular stock.

UKX Composition and Selection Criteria

The UKX consists of the 100 largest U.K.-listed blue chip companies, based on full market capitalization, that pass screening tests for free-float and liquidity. The UKX is reviewed on a quarterly basis in March, June, September and December based on data from the close of business on the Tuesday before the first Friday of the review month. The FTSE Russell Europe, Middle East & Africa Regional Equity Advisory Committee, which we refer to as the Committee, meets quarterly to approve the constituents of the index. Any Basket Component Constituent changes are implemented after the close of business on the third Friday of the review month (i.e. effective Monday), following the expiration of the Intercontinental Exchange Futures Europe futures and options contracts.

Eligibility Standards

Only “premium listed” equity shares, as defined by the Financial Conduct Authority in its Listing Rules Sourcebook, are eligible for inclusion in the UKX. Eligible stocks must pass free-float and liquidity screens before being included in the index.

P-25

Free-Float Screen — With regard to free-float, a stock must have a minimum free float (as described below) of 25% if the issuing company is incorporated in the United Kingdom and 50% if it is a non-United Kingdom incorporated company. Companies with a free float of 5% or below are excluded from the UKX. A new company may be initially included in the UKX with a free float outside of the above parameters so long as it has an initial free float above 5% and it is expected to meet the minimum free float requirements within 12 months of its first day of trading.

Minimum Voting Rights Screen — Companies are required to have greater than 5% of the company's voting rights (aggregated across all of its equity securities, including, where identifiable, those that are not listed or trading) in the hands of unrestricted shareholders in order to be eligible for inclusion in the UKX. Current constituents who do not meet this requirement will have until the September 2022 review to meet the requirement or they will be removed from the UKX.

Liquidity Screen — With regard to liquidity, each eligible stock is tested for liquidity annually in June by calculating its median daily trading per month. When calculating the median of daily trades per month of any security, a minimum of 5 trading days in each month must exist, otherwise the month is excluded from the test. Liquidity is tested from the first business day in May of the previous year to the last business day of April. The median trade is calculated by ranking each daily trade total and selecting the middle-ranking day. Any period of suspension is not included in the test. The liquidity test is applied on a pro-rata basis where the testing period is less than 12 months. A stock not presently included in the UKX that does not turnover at least 0.025% of its shares in issue (after application of any investability weightings) based on its median daily trade per month in at least ten of the 12 months prior to the annual index review in June will not be eligible for inclusion until the next annual review. An existing constituent failing to trade at least 0.015% of its shares in issue (after the application of any investability weightings) based on its median daily trade per month for at least eight of the 12 months prior to the annual index review will be removed from the UKX and will not be eligible for inclusion until the next annual review. New issues must have a minimum trading record of at least 20 trading days prior to the review date and that they have turned over at least 0.025% of their shares in issue (after the application of any investability weightings) based on their median daily trade each month, on a pro-rata basis since premium listing or UK Nationality allocation date if non-UK incorporated.

Price— With regard to price, the Committee must be satisfied that an accurate and reliable price exists for purposes of determining the market value of a company. To be eligible for inclusion in the UKX, a stock must have a full listing on the London Stock Exchange with a Sterling-denominated price on SETS (SETS is the London Stock Exchange's trading service for, for among other securities, those included in the UKX).

Market Capitalization Ranking — Eligible stocks that pass the free-float and liquidity screens and that have an accurate and reliable price are ranked by the Committee according to their market capitalization before the application of any adjustments based on the extent to which the shares are publicly traded. Only the quoted equity capital of a constituent company will be included in the calculation of its market capitalization. Where a company has two or more classes of equity, secondary lines will be included in the calculation of the market capitalization of the company only if those lines are significant and liquid. The Committee will add a stock to the UKX at the quarterly review if it has risen to 90th place or above on the full market capitalization rankings and will delete a stock at the quarterly review if it has fallen to 111th place or below on these rankings. Market capitalization rankings are calculated using data as of the close of business on the day before the review.

100 Constituent Limitation — The UKX always contains 100 Basket Component Constituents. If a greater number of companies qualify to be inserted in the UKX than qualify to be removed, the lowest ranking Basket Component Constituents of the UKX will be removed so that the total number of Basket Component Constituents remains at 100 following inclusion of those that qualify to be inserted. Likewise, if a greater number of companies qualify to be removed than to be inserted at the quarterly review, securities of the highest ranking companies that are then not included in the UKX will be inserted to match the number of companies being removed, in order to maintain the total

at 100.

UKX Calculation

The UKX is a market capitalization weighted index. This means that the price movement of a larger company (that is, one representing larger percentage of the index) will have a greater effect on the price of the index than will the price movement of a smaller company (that is, one representing a smaller percentage of the index).

The value of the UKX is represented by a fraction, (a) the numerator of which is the *sum* of the *product* of (i) the price of each Basket Component Constituent, (ii) the number of shares issued for each such Basket Component Constituent and (iii) a free float factor for each such Basket Component Constituent (described more fully below), and (b) the denominator of which is a divisor. The divisor represents the total issued share capital of the index on the base date; the divisor may be adjusted as necessary to allow for changes in issued share capital of individual securities without distorting the UKX.

As noted above, a free float factor is applied to each Basket Component Constituent. By employing this approach, FTSE uses the investable market capitalization, not the total market capitalization, of each Basket Component Constituent to determine the value of the UKX. Investable market capitalization depends on free float. The following are excluded from free float: shares directly owned by state, regional, municipal and local governments (excluding shares held by

P-26

independently managed pension schemes for governments); shares held by sovereign wealth funds where each holding is 10% or greater of the total number of shares in issue; shares held by directors, senior executives and managers of the company, and by their family and direct relations, and by companies with which they are affiliated; shares held within employee share plans; shares held by public companies or by non-listed subsidiaries of public companies; shares held by founders, promoters, former directors, founding venture capital and private equity firms, private companies and individuals (including employees) where the holding is 10% or greater of the total number of shares in issue; all shares where the holder is subject to a lock-in clause (for the duration of that clause, after which free float changes resulting from the expiration of a lock-in clause will be implemented at the next quarterly review subsequent to there being a minimum of 20 business days between the expiration date of such lock-in clause and the Tuesday before the first Friday of the review month; if the previously locked-in shares are sold by way of a corporate event (such as a secondary offering), any change to the free float will be applied T+2 following completion and therefore will not be subject to the minimum 20 business day rule); shares held by an investor, investment company or an investment fund that is actively participating in the management of a company or is holding shares for publicly announced strategic reasons or that has successfully placed a current member to the board of directors of a company; and shares that are subject to ongoing contractual agreements (such as swaps) where they would ordinarily be treated as restricted. In addition, while portfolio holdings such as pension funds, insurance funds or investment companies will generally not be considered as restricted from free float, where a single portfolio holding is 30% or greater it will be regarded as strategic and therefore restricted (and will remain restricted until the holding falls below 30%).

The UKX is recalculated whenever errors or distortions occur that are deemed to be significant. Users of the UKX are notified through appropriate media.

UKX Maintenance

The UKX is reviewed quarterly for changes in free float. A Basket Component Constituent's free float is updated during the June review regardless of the size of the change. At the March, September and December quarterly updates, a constituent with a free float greater than 15% will have its free float updated if it moves by more than three percentage points above or below the existing free float. A Basket Component Constituent with a free float of 15% or below will be subject to a one percentage point threshold. Free float changes resulting from corporate events will not be subject to the percentage change requirements, and will be implemented in line with the event. If a Basket Component Constituent is the target of a tender offer but the conditions for removal from the UKX are not met, FTSE may implement a free float change when (i) the minimum acceptance level as stipulated by the acquirer has been met, (ii) shareholders have validly tendered and the shares have been irrevocably accepted for payment, and (iii) all pertinent offer conditions have been reasonably met.

At each quarterly review, the Committee publishes a Reserve List containing the six highest ranking non-constituent companies of the UKX. The Reserve List will be used in the event that one or more Basket Component Constituent are deleted from the index during the period up to the next quarterly review. If a merger or takeover results in one Basket Component Constituent being absorbed by another Basket Component Constituent, the resulting company will remain a Basket Component Constituent and a vacancy will be created. This vacancy will be filled by selecting the highest ranking security in the Reserve List as at the close of the UKX calculation two days prior to the deletion and related index adjustment. If a Basket Component Constituent is taken over by a non-constituent company, the original constituent will be removed and replaced by the highest ranking non-constituent company on the Reserve List. Any eligible company resulting from the takeover will be eligible to become the replacement company if it is ranked higher than any other company on the Reserve List. If a constituent company is split to form two or more companies, then the resulting companies will be eligible for inclusion as UKX Basket Component Constituents, based on their respective full market capitalizations (before the application of any investability weightings), provided that they qualify in all other respects. Any eligible company resulting from a split that, after 20 business days, has no available market price and no known trading date will be removed. If a split results in the inclusion of an ineligible non-equity

security, such security will remain in the UKX for two trading days and then be removed. If a Basket Component Constituent is delisted or ceases to have a firm quotation, it will be removed from the list of constituents and be replaced by the highest ranking eligible company from the Reserve List. If a Basket Component Constituent is the target of a tender offer, it will normally be removed from the UKX with a minimum T+2 notice when either (a) offer acceptances reach 90%, shareholders have validly tendered and the shares have been irrevocably accepted for payment, and all pertinent offer conditions have been reasonably met and the acquirer has not explicitly stated that it does not intend to acquire the remaining shares; or (b) offer acceptances are below 90% and there is reason to believe that the remaining free float is under 5% based on information available at the time or, following completion of the offer, the acquirer has stated that the offer has been declared wholly unconditional.

Capitalization Adjustments

A secondary line of a company will be considered for index inclusion if its total market capitalization before the application of any adjustments based on the extent to which the shares are publicly traded, is greater than 25% of the total market capitalization of the company's principal line and the secondary line is eligible, in its own right. Should the total market

P-27

capitalization of a secondary line fall below 20% of the total market capitalization of the company's principal line at an annual review, the secondary line will be deleted from the UKX unless its total market capitalization remains above the qualification level for continued inclusion as a constituent of the UKX at that review. Where a company has partly paid shares, these shares, together with the outstanding call(s), are both included in the UKX.

Share Weighting Changes — For the purposes of computing the UKX, to prevent a large number of insignificant weighting changes, the number of shares in issue for each Basket Component Constituent is amended only when the total shares in issue held within the index system changes by more than 1% on a cumulative basis. Changes will be made quarterly after the close of business on the third Friday of March, June, September and December. The data for these changes will be taken from the close of business on the third Wednesday of the month prior to the review month.

If a corporate action is applied to a constituent which involves a change in the number of shares in issue, the change in shares will be applied simultaneously with the corporate action.

Shares in Issue Increase — When a company increases the number of shares it has in issue, the market capitalization of that company increases and the total market capitalization will rise accordingly. The index divisor is adjusted to maintain a constant index value.

Weighting Amendments — The market capitalization of a company is adjusted to take account of various corporate actions. To prevent the value of the UKX from changing due to such an event, all corporate actions which affect the market capitalization of the UKX require an offsetting divisor adjustment. By adjusting the divisor, the value of the UKX remains constant before and after the event. Below is a summary of the more frequent corporate actions and their resulting adjustment.

Type of Corporate Action	Adjustment	Adjustment to Divisor
Issue of new shares	Share weighting increased	Yes
Bonus issue of same stock or stock split	Number of shares held before issue or split divided by number of shares held after issue or split	No
Rights Issues/Entitlement Offers	-These are an entitlement issued to shareholders which give them the right to buy additional shares directly from the company in proportion to existing holdings. FTSE will only adjust the UKX to account for a right if the subscription price of the right is at a discount to the market price of the Basket Component Constituent. Provided FTSE has been alerted to the rights offer prior to the ex-date, a price adjustment and share increase proportionate to the terms of the offer will be implemented before the open on the ex-date. The rights become attached to the shares on the ex-date.	

Where the rights issue/entitlement offer subscription price remains unconfirmed on the ex-date, FTSE will estimate the subscription price using the value being raised and the offer terms. If the rights issue is greater than ten to one, FTSE will consider this "highly dilutive" and, to facilitate replication, will include on the ex-date a separate temporary line to reflect the market value of the rights (together with a temporary line at a fixed value to reflect the subscription cash) until the end of the subscription period, at which point the temporary lines will be deleted and the new shares will be consolidated into the existing share line.

Where the shares being issued are not entitled to the next dividend, FTSE will deviate from the standard index treatment and include on the ex-date a separate temporary line to reflect the market value of the rights (together with a temporary line at a fixed value to reflect the subscription cash). If the dividend ex-date occurs prior to the end of the rights subscription period, the temporary lines will be deleted and the new shares assimilated into the ordinary line at

the open on the dividend ex-date. If the dividend ex-date occurs after the expiration of the rights subscription period, the temporary rights and cash line will be deleted after the close on the last day of the rights subscription period, and replaced by a temporary dummy line equal to the ordinary line close price minus the upcoming dividend. On the open of the ex-dividend date, the dummy line is deleted and the shares are aggregated with the ordinary line.

In the event the rights issue involves a non-constituent (including non-equity) and the value of the right cannot be determined, there will be no adjustment on the ex-date. If the rights are scheduled to trade, a rights line will be added to the index at a value of zero on the ex-date and will be deleted from the index at the market price when it commences trading, with T+5 notice. If the rights have not commenced trading within 20 business days of the ex-date, they will be removed at zero value. No cash temporary line will be included as the index will not subscribe to the rights.

Where a company announces an open offer or a rights issue with an ex-entitlement date on the same day, FTSE will apply an index adjustment either before the market-open on the ex-entitlement day or as an intra-day adjustment as soon

P-28

as possible thereafter. The adjustment will be applied based on the previous day's closing price with the new shares included in the index weighting at the open offer price.

In the case of an accelerated rights offer, where the ex-date is theoretical and typically not quoted by the exchange, shares are increased and a price adjustment is applied according to the terms of the offer before the open on the day the security resumes trading.

Market Disruption

If there is a system problem or situation in the market that is judged by FTSE to affect the quality of the constituent prices at any time when an index is being calculated, the index will be declared indicative (e.g. normally where a "fast market" exists in the equity market). The message "IND" will be displayed against the index value calculated by FTSE.

All copyright and database rights in the index values and constituent list vest in FTSE.

License Agreement

We have entered into a non-exclusive license agreement with FTSE, whereby we and our affiliates and subsidiary companies, in exchange for a fee, will be permitted to use the UKX, which is owned and published by FTSE, in connection with certain products, including the Notes.

Neither FTSE nor the LSE makes any representation or warranty, express or implied, to the depositors of the Notes or any member of the public regarding the advisability of investing in structured products generally or in the Notes particularly, or the ability of the UKX to track general stock market performance. FTSE and the LSE's only relationship with the Issuer is the licensing of certain trademarks and trade names of FTSE, respectively, without regard to the Issuer or the Notes. FTSE and the LSE have no obligation to take the needs of the Issuer or the depositors of the Notes into consideration in determining, composing or calculating the UKX. Neither FTSE nor the LSE is responsible for and has not participated in the determination of the timing, price or quantity of the Notes to be issued or in the determination or calculation of the amount due at maturity of the Notes. Neither FTSE nor the LSE has any obligation or liability in connection with the administration, marketing or trading of the Notes.

The Notes are not in any way sponsored, endorsed, sold or promoted by FTSE or the LSE, and neither FTSE nor the LSE makes any warranty or representation whatsoever, expressly or impliedly, either as to the results to be obtained from the use of the UKX and/or the figure at which the said component stands at any particular time on any particular day or otherwise. The UKX is compiled and calculated by FTSE. However, neither FTSE nor the LSE shall be liable (whether in negligence or otherwise) to any person for any error in the UKX and neither FTSE nor the LSE shall be under any obligation to advise any person of any error therein.

TOPIX (“TPX”)

TPX, also known as the Tokyo Price Index, is a capitalization weighted index of all the domestic common stocks listed on the First Section of the Tokyo Stock Exchange, Inc., which we refer to as the TSE. Domestic stocks admitted to the TSE are assigned either to the TSE First Section, the TSE Second Section or the TSE Mothers. Stocks listed in the First Section, which number approximately 1,700, are among the most actively traded stocks on the TSE. TPX is supplemented by the sub-basket components of the 33 industry sectors and was developed with a base index value of 100 as of January 4, 1968. TPX is calculated and published by TSE. Additional information about TPX is available on the following website: jpx.co.jp/english/markets/indices/topix.

TPX**Basket Component Constituent Weighting by Sector as of March 30, 2018**

Sector:	Percentage (%)
Air Transportation	0.62%
Banks	7.04%
Chemicals	7.32%
Construction	3.19%
Electric Appliances	13.89%

Warehousing & Harbor	0.18%
Transportation Services	

Sector:	Percentage (%)
Wholesale Trade	4.72%

** Sector designations are determined by TSE using criteria it has selected or developed. Index sponsors may use very different standards for determining sector designations. In addition, many companies operate in a number of sectors, but are listed in only one sector and the basis on which that sector is selected may also differ. As a result, sector comparisons between indices with different index sponsors may reflect differences in methodology as well as actual differences in the sector composition of the indices.*

*** Information provided by TSE. Percentages may not sum to 100% due to rounding.*

TPX Composition and Maintenance

TPX is comprised of all domestic common stocks listed on the TSE First Section, excluding certain types of securities such as subscription warrant securities and preferred equity contribution securities. Companies scheduled to be delisted or newly listed companies that are still in the waiting period are excluded from the indices. TPX has no constituent review. The number of Basket Component Constituents will change according to new listings and delistings. The reasons for stock additions and deletions to the TSE First Section are described further below.

TPX Calculation

TPX is a free-float-adjusted market-capitalization-weighted index, which reflects movements in the market capitalization as measured from a base index value of 100 set on the base date of January 4, 1968.

TSE calculates TPX by *multiplying* the base index value of 100 by the *quotient* of the current free-float-adjusted market value *divided* by the base market value. The resulting value is not expressed in Japanese yen but presented as a number of points, rounded to the nearest one hundredth. The formula for calculating TPX value can be expressed as follows:

$$\text{Index value} = \text{Base index value of 100} \times \frac{\text{Current free-float - adjusted market value}}{\text{Base market value}}$$

The current free-float-adjusted market value is the sum of the products of the price times the number of free-float-adjusted shares for each Basket Component Constituent.

The number of free-float-adjusted shares for this calculation is the total number of listed shares multiplied by free-float weight. The total number of listed shares used for this purpose is usually the same as the number of actual listed shares. However, in some cases these numbers will differ as a consequence of the index methodology. For instance, in the case of a stock split, the number of listed shares will increase on the additional listing date after the stock split becomes effective; on the other hand, the number of listed shares for index calculation purposes will increase on the ex- rights date.

Free-float weight is the weight of listed shares deemed to be available for trading in the market, and is determined and calculated by the TSE for each Basket Component Constituent. It is calculated by *subtracting* the *quotient* of non-free-float shares *divided by* listed shares *from* one. Free-float weight is reviewed once a year in order to reflect the latest distribution of share ownership. The TSE estimates non-free-float shares using publicly available documents, and generally deems shares held by the top ten major shareholders (with certain exceptions), treasury stocks and shares held by members of the issuer's board of directors to be unavailable for trading in the market. The TSE may deem other shares to be unavailable for trading in the market. The timing of the yearly free-float-weight review is different according to the settlement terms of listed companies. In addition to the yearly review, extraordinary reviews may be conducted for events TSE expects will significantly affect the free-float weight. These include when new shares are allocated to a third party, preferred shares are converted or subscription warrants are exercised, as well as in the event of a company spin-off, merger, stock-swap, take-over bid and other events TSE judges deem will significantly affect free-float weight.

In the event of any increase or decrease in the current free-float-adjusted market value due to causes other than fluctuations in the stock market, such as public offerings or changes in the number of listed companies in the TSE First Section, adjustments are made by TSE to the base market value in order to maintain the continuity of TPX.

Additions and Deletions to the TSE First Section (and therefore, TPX)

TSE adds or removes securities for various listing and delisting events as shown in the table below.

Additions and Deletions of Constituents

	Event	Adjustment Date	Stock Price Used for Adjustment
Addition	A company is to be newly listed on the TSE First Section (directly listed or via another stock exchange)	Last business day of the month after such listing	Stock price at the end of trading on the business day before adjustment date
Addition	New listing of a newly formed company resulting from a corporate consolidation, acquisition, merger or split (personnel split) that results in a TPX or Ex-TPX constituent being delisted and the new company being included in TPX.	New listing date. If the initial listing date falls on a holiday, it will be the following business day	Base price
Addition	Assignment to the TSE First Section from the TSE Second Section, Tokyo Stock Exchange Mothers Index or JASDAQ Index.	Last business day of the month after such assignment (a free float weight of 0.00 is used from the assignment date to the month after the assignment date and thus the number of shares to be used for calculation will be 0.00 during such period)	Stock price at the end of trading on the business day before adjustment date
Deletion	New listing of a newly formed company resulting from a corporate consolidation, acquisition, merger or split (personnel split) that results in a TPX or Ex-TPX constituent being delisted and the new company being included in TPX.	Listing date of the newly formed company (normally three business days following delisting date)	Stock price at the end of trading on the business day before delisting date. The stock price at the end of trading on the business day before the delisting date is used to calculate TPX for the period from the delisting date to the removal date
Deletion	A Basket Component Constituent is to be delisted due to a reason other than as described in the preceding scenario	Delisting date	Stock price at the end of trading on the business day before adjustment date
Deletion	A Basket Component Constituent's securities are designated to be delisted	Four business days after designation. If the designation date falls on a holiday, it will be the next business day	Stock price at the end of trading on the business day before adjustment date
Deletion	Assignment to the TSE Second Section or JASDAQ from the TSE First Section	Date of change	Stock price at the end of trading on the business day before adjustment date

The adjusted base market value will equal the old base market value *multiplied* by the *quotient* of the free-float-adjusted market value on the business day before the adjustment date *plus* or *minus*, as applicable, the adjustment amount *divided* by the free-float-adjusted market value on the business day before the adjustment date.

The adjustment amount for the foregoing calculation will be an amount equal to the *product* of the change (the absolute value of the increase or decrease) in the number of shares used for index calculations *times* the price of the shares used for adjustment.

Changes in the number of shares and the price of the shares for adjustments to the base market value will be made as described in the table below.

P-33

Change in the Number of Shares

Event	Adjustment Date	Stock Price Used for Adjustment
Change of free-float weight	Date of change	Stock price at the end of trading on the business day before adjustment date
Public offering	Additional listing date (day after payment date). If listing date falls on a holiday, it will be the next business day	Stock price at the end of trading on the business day before adjustment date
Allocation of new shares to a third party	Five business days after additional listing date (two business days after payment date)	Stock price at the end of trading on the business day before adjustment date
Issues to shareholders with payment	Ex-rights date	Payment price per share
Exercise of subscription warrants	Last business day of the month following exercise	Stock price at the end of trading on the business day before adjustment date
Conversion of preferred shares	Last business day of the month following conversion	Stock price at the end of trading on the business day before adjustment date
Cancellation of treasury stock	Last business day of the month following cancellation	Stock price at the end of trading on the business day before adjustment date
Merger or acquisitions between a non-surviving constituent and another constituent	Delisting date of the non-surviving constituent	Stock price at the end of trading on the business day before adjustment date
Merger or acquisitions other than that described above	Listing change date (effective date)	Stock price at the end of trading on the business day before adjustment date
Rights offering	Ex-rights date	Payment price per share
Offering for sale of shares held by the Japanese government (Nippon Telegraph and Telephone and Japan Tobacco only)	Date determined by TSE (generally the delivery date)	Stock price at the end of trading on the business day before adjustment date
Company split (merged split)	Listing change date (the effective date)	Stock price at the end of trading on the business day before adjustment date
Other adjustments	Last business day of the month in which the information appears in "Sho-ho" (TSE Notice) the last business day of the following month	Stock price at the end of trading on the business day before adjustment date

No adjustments will be made to the base market value in the case of a stock split or reverse stock split.

Retroactive adjustments will not be made to revise the figures of the TPX that have already been calculated and disseminated even if issuing companies file amendments on previously released information.

Market Disruption

If trading in a certain constituent is halted, the TSE regards the constituent's share price for purposes of calculating TPX to be unchanged. Where an event that is not specified in the rules of TPX occurs, or if the TSE decides that it is impossible to use its existing methods to calculate TPX, the TSE may use an alternate method of index calculation as it deems valid.

TOPIX Value and TOPIX Marks are subject to the proprietary rights owned by the Tokyo Stock Exchange, Inc. and the Tokyo Stock Exchange, Inc. owns all rights and know-how relating to the TPX such as calculation, publication and use of TOPIX Value and relating to TOPIX Marks. The Tokyo Stock Exchange, Inc. shall reserve the rights to change the methods of calculation or publication, to cease the calculation or publication of TOPIX Value or to change TOPIX Marks or cease the use thereof. The Tokyo Stock Exchange, Inc. makes no warranty or representation whatsoever, either as to the results stemmed from the use of TOPIX Value and TOPIX Marks or as to the figure at which TOPIX Value stands on any particular day. The Tokyo Stock Exchange, Inc. gives no assurance regarding accuracy or completeness of TOPIX Value and data contained therein. Further, the Tokyo Stock Exchange, Inc. shall not be liable for the miscalculation, incorrect publication, delayed or interrupted publication of TOPIX Value. No securities are in any way sponsored, endorsed or promoted by the Tokyo Stock Exchange, Inc. The Tokyo Stock Exchange, Inc. shall not bear any obligation to give an explanation of the securities or an advice on investments to any purchaser of the securities or to the public. The Tokyo Stock Exchange, Inc. neither selects specific stocks or groups thereof nor takes into account any needs of the issuing company or any purchaser of the securities, for calculation of TOPIX Value. Including but not limited to the foregoing, the Tokyo Stock Exchange, Inc. shall not be responsible for any damage resulting from the issue and sale of the securities.

License Agreement

The Issuer or one of its affiliates has entered into a non-exclusive license agreement with the TSE, Inc. whereby it, in exchange for a fee, is permitted to use the TPX in connection with certain certificates of deposit, including the Notes. The Issuer is not affiliated with the TSE; the only relationship between the TSE and the Issuer is any licensing of the use of the TPX and trademarks relating to it.

The license agreement between the TSE and the Issuer or one of its affiliates provides that the following disclaimer must be set forth herein:

- The TOPIX Index Value and the TOPIX Index Marks are subject to the rights owned by the TSE and the TSE owns
- (i) all rights relating to the TPX, such as calculation, publication and use of the TOPIX Index Value and relating to the TOPIX Index Marks.
 - (ii) The TSE shall reserve the rights to change the methods of calculation or publication, to cease the calculation or publication of the TOPIX Index Value or to change the TOPIX Index Marks or cease the use thereof.
The TSE makes no warranty or representation whatsoever, either as to the results stemmed from the use of the
 - (iii) TOPIX Index Value and the TOPIX Index Marks or as to the figure at which the TOPIX Index Value stands on any particular day.
The TSE gives no assurance regarding accuracy or completeness of the TOPIX Index Value and data contained
 - (iv) therein. Further, the TSE shall not be liable for the miscalculation, incorrect publication, delayed or interrupted publication of the TOPIX Index Value.

- (v) No Notes are in any way sponsored, endorsed or promoted by the TSE.
- (vi) The TSE shall not bear any obligation to give an explanation of the Notes or an advice on investments to any purchaser of the Notes or to the public.
- (vii) The TSE neither selects specific stocks or groups thereof nor takes into account any needs of the issuing company or any purchaser of the Notes for calculation of the TOPIX Index Value.
- (viii) Including but not limited to the foregoing, the TSE shall not be responsible for any damage resulting from the issue and sale of the Notes.

The Notes have not been and will not be passed on by the TSE as to their legality or suitability. The Notes will not be issued, endorsed, sold or promoted by the TSE. THE TSE MAKES NO WARRANTIES AND BEARS NO LIABILITY WITH RESPECT TO THE NOTES.

Swiss Market Index (“SMI”)

The SMI:

was first launched with a base level of 1,500 as of June 30, 1988; and is sponsored, calculated, published and disseminated by SIX Group Ltd., certain of its subsidiaries, and the Management Committee of the SIX Swiss Exchange (the “Exchange”).

The SMI is a price return float-adjusted market capitalization-weighted index of the 20 largest stocks traded on the Swiss Stock Exchange. The Exchange has outsourced the calculation and determination of Basket Component Constituents as described below, to a specialized third-party financial service provider. All matters regarding the SMI that require a decision, including regarding processes outsourced to a specialized third-party financial service provider, are submitted to the Management Committee. The Management Committee of SIX Swiss Exchange is supported by an Index Commission (advisory board) in all index-related matters, notably in connection with changes to the SMI rules and adjustments, additions and exclusions outside of the established review and acceptance period. The Index Commission meets at least twice annually.

As of December 29, 2017, the top ten Basket Component Constituents of the SMI (and their respective weightings in the index) were: Nestle SA (18.04%); Roche Holding AG (17.79%); Novartis AG (17.71%); UBS Group AG (7.10%); ABB Ltd (4.88%); Financiere Richemont SA (4.74%); Zurich Insurance Group AG (4.61%); Credit Suisse Group AG (4.34%); Compagnie Swiss Re AG (3.01%); and LafargeHolcim LTD (2.71%).

As of December 29, 2017, the ICB industry sectors in the SMI (and their respective weights) were: Basic Materials (1.84%), Consumer Goods (24.03%), Financials (21.62%), Health Care (37.52%), Industrials (13.63%) and Telecommunications (1.35%) (may not sum to 100% due to rounding). Sector designations are determined by the Exchange using criteria it has selected or developed. Index sponsors may use very different standards for determining sector designations. In addition, many companies operate in a number of sectors, but are listed in only one sector and the basis on which that sector is selected may also differ. As a result, sector comparisons between indices with different index sponsors may reflect differences in methodology as well as actual differences in the sector composition of the indices.

SMI® Composition and Selection Criteria

The SMI is comprised of the 20 highest ranked stocks traded on the Exchange that have a free float of 20% or more and that are not investment companies. The equity universe is largely Swiss domestic companies, although in some cases foreign issuers with a primary listing on the Exchange that submit to certain reporting requirements or investment companies that do not hold any shares of any other eligible company and that have a primary listing on the Exchange may be included.

The ranking of each security is determined by a combination of the following criteria:

average free-float market capitalization over the last 12 months (compared to the capitalization of the entire SIX Exchange index family), and
cumulative on order book turnover over the last 12 months (compared to the total turnover of the SIX Exchange index family).

Each of these two factors is assigned a 50% weighting in ranking the stocks eligible for the SMI.

The SMI is reconstituted annually after prior notice of at least two months on the third Friday in September after the close of trading. For companies that were listed during the last 12 months, the cumulated on order book turnover generally excludes the first 5 trading days in the calculation. The ordinary index reconstitution is based on data from the previous July 1 through June 30. Provisional interim selection (ranking) lists based on the average free-float market capitalization and cumulative on order book turnover over the last 12 months are also published at the cut off dates March 31, September 30 and December 31.

P-36

In order to reduce turnover, a Basket Component Constituent will not be replaced unless it is ranked below 23 or, if it is ranked 21 or 22, if another share ranks 18 or higher. If a company has primary listings on several exchanges and less than 50% of that company's total turnover is generated on the Exchange, it will not be included in the SMI unless it ranks at least 18 or better on the selection list solely on the basis of its turnover on those exchanges on which it has a primary listing (i.e., without considering its free float).

Maintenance of the SMI

Basket Component Constituent Changes. In the case of major market changes as a result of capital events such as mergers or new listings, the Management Committee of SIX Swiss Exchange can decide at the request of the Index Commission that a security should be admitted to the SMI outside the annual review period as long as it clearly fulfills the criteria for inclusion. For the same reasons, a security can also be excluded if the requirements for admission to the SMI are no longer fulfilled. As a general rule, extraordinary acceptances into the SMI take place after a three-month period on a quarterly basis after the close of trading on the third Friday of March, June, September and December (for example, a security listed on or before the 5th trading day prior to the end of November cannot be included until the following March). If a delisting has been confirmed, it will be removed from the SMI at the next upcoming ordinary quarterly adjustment date (March, June, September and December) with a notice period of at least five days. An announced insolvency is deemed to be an extraordinary event and the security will be removed from the SMI with five trading days' prior notice if the circumstances permit such notice.

Capped Weightings and Intra-Quarter Breaches. The weight of any Basket Component Constituent that exceeds a weight of 18% within the SMI is reduced to that value at each ordinary quarterly adjustment date by applying a capping factor to the calculation of such constituent's free float market capitalization. A Basket Component Constituent's number of shares and free float figure are used to determine its capping factor. The excess weight (the difference of the original weight minus the capped weight) is distributed proportionally across the other Basket Component Constituents. The constituents are also capped to 18% as soon as two Basket Component Constituents exceed a weight of 20% (an "intra-quarter breach"). If an intra-quarter breach is observed after the close of the markets, a new calculation of the capping factors is executed immediately and communicated to the market in order to ensure that the maximum weight per constituent is capped at 18% for the opening on the next day. In order to achieve a capped weighting while attempting to not cause market distortion, a stepwise reduction is conducted based on the ordinary quarterly index adjustment reviews to ensure that no change in the weight (as a result of capping) from one review to the next exceeds 3%. The transition period is in effect until no component has a weight larger than 18%. In the case of an intra-quarter breach where two Basket Component Constituents exceed 20%, the weights are limited to the last defined weights as of the prior review.

Number of Shares and Free Float. The securities included in the SMI are weighted according to their free float. This means that shares deemed to be in firm hands are subtracted from the total market capitalization of that company. The free float is calculated on the basis of outstanding shares. Issued and outstanding equity capital is, as a rule, the total amount of equity capital that has been fully subscribed and wholly or partially paid in and documented in the Commercial Register. Not counting as issued and outstanding equity capital are the approved capital and the conditional capital of a company. The free float is calculated on the basis of listed shares only. If a company offers several different categories of listed participation rights, each is treated separately for the purposes of index calculation.

Fundamentally deemed to be shares held in firm hands are shareholdings that have been acquired by one person or a group of persons in companies domiciled in Switzerland and which, upon exceeding 5%, have been reported to the Exchange. Shares of persons and groups of persons who are subject to a shareholder agreement which is binding for more than 5% of the listed shares or who, according to publicly known facts, have a long-term interest in a company are also deemed to be in firm hands.

For the calculation of the number of shares in firm hands, the Exchange may also use other sources than the reports submitted to it. In particular, the Exchange may use data gained from issuer surveys that it conducts itself.

In general, shares held by custodian nominees, trustee companies, investment funds, pension funds and investment companies are deemed free-floating regardless of whether a report has been made to the Exchange. The Exchange classifies at its own discretion persons and groups of persons who, because of their area of activity or the absence of important information, cannot be clearly assigned.

The free-float rule applies only to bearer shares and registered shares. Capital issued in the form of participation certificates ("Partizipationsscheine") and bonus certificates ("Genussscheine") is taken into full account in calculating the SMI because it does not confer voting rights.

P-37

The number of securities in the SMI and the free-float factors are adjusted after the close of trading on four adjustment dates per year, the third Friday of March, June, September and December. Such changes are provisionally pre-announced at least one month before the adjustment date, although the index sponsor reserves the right to take account of recent changes up to five trading days before the adjustment date in the actual adjustment.

In order to avoid frequent slight changes to the weighting and to maintain the stability of the SMI, any extraordinary change of the total number of outstanding securities or the free float will only result in an extraordinary adjustment if it exceeds 10% and 5% respectively, occurs from one trading to the next and is in conjunction with a corporate action.

After a takeover, the index sponsor may, in exceptional cases, adjust the free float of the company in question upon publication of the end results after a five-day notification period or may exclude the security from the relevant index family. When an insolvency has been announced, an extraordinary adjustment will be made and the affected security will be removed from the SMI after five trading days' notice, and a replacement will be determined based on the current selection list.

The Exchange sponsor reserves the right to make an extraordinary adjustment, in exceptional cases, without observing the notification period.

Calculation of the SMI

The Exchange calculates the SMI using the "Laspeyres formula," with a weighted arithmetic mean of a defined number of securities issues. The formula for calculating the index value can be expressed as follows:

$$\text{Swiss Market Index} = \frac{\text{Free Float Market Capitalization of the SMI}^{\text{®}}}{\text{Divisor}}$$

The "free float market capitalization of the SMI" is equal to the sum of the product of the last-paid price, the number of shares, the free float factor, the capping factor and, if a foreign stock is included, the current CHF exchange rate as of the time the index value is being calculated. (As of October 3, 2014, all stocks in the SMI are denominated in Swiss Francs, known as CHF). The index value is calculated in real time and is updated whenever a trade is made in a Basket Component Constituent. Where any Basket Component Constituent price is unavailable on any trading day, the index sponsor will use the last reported price for such Basket Component Constituent. Only prices from the Exchange's electronic order book are used in calculating the SMI.

Divisor Value and Adjustments

The divisor is a technical number used to calculate the SMI and is adjusted to reflect changes in market capitalization due to corporate events.

Below are common corporate events and their impact on the divisor of the SMI.

Event	Divisor Change?
Regular cash dividend	No

Edgar Filing: TORONTO DOMINION BANK - Form 424B2

Repayments of capital through reduction of a share's par value	No
Special dividends, anniversary bonds and other extraordinary payments that, contrary to the company's usual dividend policy, are paid out or declared extraordinary.	Yes
Share dividends (company's own shares)	No
Share dividend (shares of another company)	Yes
The Exchange reserves the right to respond to any other corporate events with divisor adjustments or, in extraordinary circumstances, to depart from the provisions set forth above.

P-39

S&P/ASX 200 Index (“AS51”)

The AS51:

Convertible Securities. A convertible security is a preferred stock, warrant or other security that may be converted into or exchanged for a prescribed amount of common stock or other security of the same or a different issuer or into cash within a particular period of time at a specified price or formula. A convertible security generally entitles the holder to receive the dividend paid on preferred stock until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities generally have characteristics similar to both fixed income and equity securities. The value of convertible securities tends to decline as interest rates rise and, because of the conversion feature, tends to vary with fluctuations in the market value of the underlying securities. Convertible securities ordinarily provide a stream of income with generally higher yields than those of common stock of the same or similar issuers. Convertible securities generally rank senior to common stock in a corporation’s capital structure but are usually subordinated to comparable non-convertible securities. Convertible securities generally do not participate directly in any dividend increases or decreases of the underlying securities although the market prices of convertible securities may be affected by any dividend changes or other changes in the underlying securities.

Warrants and Rights. The Fund may invest in warrants or rights (including those acquired in units or attached to other securities) that entitle the holder to buy equity securities at a specific price for a specific period of time but will do so only if such equity securities are deemed appropriate by ClearBridge for inclusion in the Fund’s portfolio.

Restricted Securities and Securities with Limited Trading Markets

The Fund may invest up to 30% of its Managed Assets in unregistered or otherwise restricted securities, and up to 15% of its Managed Assets in restricted securities issued by non-public companies. If the Fund were to assume substantial positions in securities with limited trading markets, the activities of the Fund could have an adverse effect upon the liquidity and marketability of such securities and the Fund might not be able to dispose of its holdings in those securities at their current market prices. Circumstances could also exist when portfolio securities might have to be sold by the Fund at times which otherwise might be considered to be disadvantageous so that the Fund might receive lower proceeds from such sales than it had expected to realize. Investments in restricted securities may involve added expenses to the Fund should the Fund be required to bear registration costs with respect to such securities. The Fund could also be delayed in disposing of such securities which might have an adverse effect upon the price and timing of sales and the liquidity of the Fund. Restricted securities and securities for which there is a limited trading market may be significantly more difficult to value due to the unavailability of reliable market quotations for such securities, and investment in such securities may have an adverse impact on the Fund's net asset value. The Fund may purchase Rule 144A securities for which there may be a secondary market of qualified institutional buyers as contemplated by Rule 144A under the Securities Act of 1933, as amended (the 1933 Act).

Debt Securities

The Fund may invest up to 20% of its Managed Assets in debt securities, including both investment grade and non-investment grade debt securities, of MLPs and other issuers. Debt securities may have fixed or variable principal payments and all types of interest rate and dividend payment and reset terms, including fixed rate, adjustable rate, zero coupon, contingent, deferred, payment in kind and auction rate features. The Fund has the flexibility to invest in debt securities that are below investment grade quality (that is, rated Ba or lower by Moody's, BB+ or lower by S&P or Fitch, comparably rated by another NRSRO, or, if unrated, determined by ClearBridge to be of comparable credit quality). These debt securities are commonly referred to as high yield securities or junk bonds. The Fund may invest in debt securities without regard for their maturity. Issuers of securities rated Ba/BB+ are regarded as having current capacity to make principal and interest payments but are subject to business, financial or economic conditions which could adversely affect such payment capacity. Debt securities rated Baa3 or BBB- or above are considered investment grade securities. Debt securities rated below investment grade quality are obligations of issuers that are considered predominately speculative with respect to the issuer's capacity to pay interest and repay principal according to the terms of the obligation and, therefore, carry greater investment risk, including the possibility of issuer default and bankruptcy and increased market price volatility. Debt securities rated below investment grade tend to be less marketable than higher-quality securities because the market for them is less broad.

A general description of Moody's, S&P's and Fitch's ratings of bonds is set forth in Appendix A to the SAI. The ratings of Moody's, S&P and Fitch generally represent their opinions as to the quality of the bonds they rate. It should be emphasized, however, that such ratings are relative and subjective, are not absolute standards of quality, are subject to change and do not evaluate the market risk and liquidity of the securities. Consequently, bonds with the same maturity, coupon and rating may have different yields while obligations of the same maturity and coupon with different ratings may have the same yield. See Risks Below Investment Grade (High Yield or Junk Bond) Securities Risk.

Royalty Trusts

The Fund may invest in royalty trusts. However, such investments do not count towards the Fund's 80% policy. Royalty trusts are publicly traded investment vehicles that gather income on royalties and pay out almost all cash flows to stockholders as distributions. Royalty trusts typically have no physical operations and no management or employees. Typically royalty trusts own the rights to royalties on the production and sales of a natural resource, including oil, gas, minerals and timber. As these deplete, production and cash flows steadily decline, which may decrease distribution rates. Royalty trusts are, in some respects, similar to certain MLPs and include risks similar to those MLPs.

Other Sector Investments

The Fund may invest in MLPs or MLP affiliates in other sectors of the economy. For instance, the Fund may invest in entities operating in the natural resources sector including companies principally engaged in owning or developing non-energy natural resources (including timber and minerals) and industrial materials, or supplying goods or services to such companies. Additionally, the Fund may invest in MLPs that focus on developing infrastructure assets.

Foreign Securities and Emerging Markets

The Fund may invest in securities of foreign issuers including securities traded on non-U.S. exchanges and of emerging markets issuers. Such investments in securities of foreign issuers may include investments in American Depositary Receipts (ADRs). ADRs are certificates evidencing ownership of shares of a foreign issuer that are issued by depositary banks and generally trade on an established market in the United States or elsewhere. A fund that invests in foreign (non-U.S.) securities may experience more rapid and extreme changes in value than a fund that invests exclusively in securities of U.S. companies. The securities markets of many foreign countries are relatively small, with a limited number of companies representing a small number of industries. Investments in foreign securities (including those denominated in U.S. dollars) are subject to economic and political developments in the countries and regions where the issuers operate or are domiciled, or where the securities are traded, such as changes in economic or monetary policies. Values may also be affected by restrictions on receiving the investment proceeds from a foreign country. Less information may be publicly available about foreign companies than about U.S. companies. Foreign companies are generally not subject to the same accounting, auditing and financial reporting standards as are U.S. companies. In addition, the Fund's investments in foreign securities may be subject to the risk of nationalization or expropriation of assets, imposition of currency exchange controls or restrictions on the repatriation of foreign currency, confiscatory taxation, political or financial instability and adverse diplomatic developments. In addition, there may be difficulty in obtaining or enforcing a court judgment abroad. Dividends or interest on, or proceeds from the sale of, foreign securities may be subject to non-US. withholding taxes, and special U.S. tax considerations may apply.

The risks of foreign investment are greater for investments in emerging markets. The Fund considers a country to be an emerging market country if, at the time of investment, it is represented in the J.P. Morgan Emerging Markets Bond Index Global or categorized by the World Bank in its annual categorization as middle or low-income Emerging market countries typically have economic and political systems that are less fully developed, and that can be expected to be less stable, than those of more advanced countries. Low trading volumes may result in a lack of liquidity and in price volatility. Emerging market countries may have policies that restrict investment by foreigners, that require governmental approval prior to investments by foreign persons, or that prevent foreign investors from withdrawing their money at will. An investment in emerging market securities should be considered speculative.

Non-Diversification

The Fund may invest up to 15% of its Managed Assets, at the time of purchase, in securities of any single issuer.

Additional Investment Activities

Derivatives

Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to individual debt or equity instruments, interest rates, currencies or currency exchange rates, commodities, related indexes and other assets. The Fund may enter into derivative transactions, such as interest rate swaps, options contracts, futures contracts, forward contracts, options on futures contracts and indexed securities for investment, hedging and risk management purposes; provided that the Fund's exposure to derivative instruments, as measured by the total notional amount of all such instruments, will not exceed 33 1/3% of its Managed Assets. With respect to this limitation, the Fund may net derivatives with

opposite exposure to the same underlying instrument. To the extent that the security or index underlying the derivative or synthetic instrument is or is composed of securities of energy MLPs, the Fund will include such derivative and synthetic instruments for the purposes of the Fund's 80% policy. The Fund may sell certain equity securities short for investment and/or hedging purposes. See Risks Derivatives Risk. The Fund may use any or all of these techniques at any time, and the use of any particular derivative transaction will depend on market conditions. Additional information on the derivative transactions that the Fund may use is included in the SAI. The Fund's ability to pursue certain of these strategies may be limited by applicable regulations of the CFTC, SEC, or other applicable regulators.

The Fund is operated by persons who have claimed an exclusion, granted to operators of registered investment companies like the Fund, from registration as a commodity pool operator with respect to the Fund under the Commodity Exchange Act (the CEA), and, therefore, are not subject to registration or regulation with respect to the Fund under the CEA. As a result, effective December 31, 2012, the Fund is limited in its ability to use commodity futures (which include futures on broad-based securities indexes and interest rate futures) (collectively, commodity interests) or options on commodity futures, engage in certain swaps transactions or make certain other investments (whether directly or indirectly through investments in other investment vehicles) for purposes other than bona fide hedging, as defined in the rules of the Commodity Futures Trading Commission. With respect to transactions other than for bona fide hedging purposes, either: (1) the aggregate initial margin and premiums required to establish the Fund's positions in such investments may not exceed 5% of the liquidation value of the Fund's portfolio (after accounting for unrealized profits and unrealized losses on any such investments); or (2) the aggregate net notional value of such instruments, determined at the time the most recent position was established, may not exceed 100% of the liquidation value of the Fund's portfolio (after accounting for unrealized profits and unrealized losses on any such positions). In addition to meeting one of the foregoing trading limitations, the Fund may not market itself as a commodity pool or otherwise as a vehicle for trading in the futures, options or swaps markets.

The Fund may use interest rate swaps for hedging purposes only and not as a speculative investment and would typically use interest rate swaps to shorten the average interest rate reset time of the Fund's holdings. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (e.g., an exchange of fixed rate payments for floating rate payments). The Fund will only enter into interest rate swaps on a net basis, which means that the two payment streams are netted out in a cash settlement on the payment date or dates specified in the interest rate swap, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. If the other party to an interest rate swap defaults, the Fund's risk of loss consists of the net amount of payments that the Fund is contractually entitled to receive. The net amount of the excess, if any, of the Fund's obligations over its entitlements will be maintained in a segregated account by the Fund's custodian. The Fund will not enter into any interest rate swap unless the claims-paying ability of the other party thereto is considered to be investment grade by ClearBridge. If there is a default by the other party to such a transaction, the Fund will have contractual remedies pursuant to the agreements related to the transaction, which may or may not be limited by applicable bankruptcy, receivership, or other insolvency laws. These instruments are traded in the over-the-counter market, though in the future may be required to be traded through a derivatives clearing organization and/or a swap execution facility.

The Fund's use of derivative instruments involves risks different from, or possibly greater than, the risks associated with investment directly in securities and other more traditional investments.

Other Investment Companies

The Fund may, but has no current intention to, invest in securities of other closed-end or open-end investment companies that invest primarily in MLP entities in which the Fund may invest directly to the extent permitted by the 1940 Act. The Fund may invest in other investment companies during periods when it has large amounts of uninvested cash, such as the period shortly after the Fund receives the proceeds of the offering of its securities, during periods when there is a shortage of attractive MLP securities available in the market, or when ClearBridge believes share prices of other investment companies offer attractive values. The Fund may invest in investment companies that are advised by ClearBridge or its affiliates to the extent permitted by applicable law

and/or pursuant to exemptive relief from the SEC. As a stockholder in an investment company, the Fund bears its ratable share of that investment company's expenses, and would remain subject to payment of the Fund's management fees and other expenses with respect to assets so invested. Stockholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. ClearBridge takes expenses into account when evaluating the investment merits of an investment in an investment company relative to available investments. In addition, the securities of other investment companies may also be leveraged and therefore subject to the same leverage risks described herein. As described in the section entitled "Risks - Leverage Risk," the net asset value and market value of leveraged shares may be more volatile and the yield to stockholders may tend to fluctuate more than the yield generated by unleveraged shares. Other investment companies may have investment policies that differ from those of the Fund. In addition, to the extent the Fund invests in other investment companies, the Fund is dependent upon the investment and research abilities of persons other than ClearBridge.

New Securities and Other Investment Techniques

New types of securities and other investment and hedging practices are developed from time to time. ClearBridge expects, consistent with the Fund's investment objective and policies, to invest in such new types of securities and to engage in such new types of investment practices if ClearBridge believes that these investments and investment techniques may assist the Fund in achieving its investment objective. In addition, ClearBridge may use investment techniques and instruments that are not specifically described herein.

Temporary Defensive Strategies

At times ClearBridge may judge that conditions in the markets for securities of MLP entities make pursuing the Fund's primary investment strategy inconsistent with the best interests of its stockholders. At such times ClearBridge may, temporarily, use alternative strategies primarily designed to reduce fluctuations in the value of the Fund's assets. If the Fund takes a temporary defensive position, it may be unable to achieve its investment objective.

In implementing these defensive strategies, the Fund may invest all or a portion of its assets in cash, obligations of the U.S. government, its agencies or instrumentalities; other investment grade debt securities; investment grade commercial paper; certificates of deposit and bankers acceptances; or any other fixed income securities that ClearBridge considers consistent with this strategy. It is impossible to predict if, when or for how long the Fund will use these alternative strategies. There can be no assurance that such strategies will be successful.

Portfolio Turnover

It is not the Fund's policy to engage in transactions with the objective of seeking profits from short-term trading. However, the Fund may engage in active and frequent trading when ClearBridge believes such trading is, in light of prevailing economic and market conditions, in the best interests of the Fund's stockholders. Frequent trading also increases transaction costs, which could detract from the Fund's performance.

Fundamental Investment Policies

The Fund's investment objective, and the investment restrictions listed in the SAI, are considered fundamental and may not be changed without the approval of the holders of a majority of the outstanding Common Stock (and Preferred Stock, if any). A majority of the outstanding shares means (i) 67% or more of the shares present at a meeting, if the holders of more than 50% of the shares outstanding are present or represented by proxy or (ii) more than 50% of the shares outstanding, whichever of (i) or (ii) is less. See "Investment Restrictions" in the SAI for a complete list of the fundamental and non-fundamental investment policies of the Fund.

USE OF LEVERAGE

The Fund may seek to enhance the level of its cash distributions to Common Stockholders through the use of leverage. The Fund currently uses leverage through Borrowings and may in the future continue to use leverage through Borrowings in an aggregate amount of up to 33 1/3% of the Fund's total assets immediately after such Borrowings. In addition, the Fund may enter into investment management techniques that have similar effects as leverage, but which are not subject to the foregoing 33 1/3% limitation so long as the Fund has covered its commitment with respect to such techniques by segregating liquid assets, entering into offsetting transactions or owning positions covering its obligations. Furthermore, the Fund may use leverage through the issuance of Preferred Stock in an aggregate amount of up to 50% of the Fund's total assets immediately after such issuance. The Fund may not use leverage at all times and the amount of leverage may vary depending upon a number of factors, including LMPFA's and ClearBridge's outlook for the market and the costs that the Fund would incur as a result of such leverage. As of November 30, 2013, the Fund had outstanding senior secured notes and a revolving credit facility with a financial institution in place under which it had Borrowings representing approximately 22.9% of our Managed Assets. Currently, the Fund has no intention to issue Preferred Stock, but circumstances may arise such that the Fund may choose to issue Preferred Stock. Any Borrowings and Preferred Stock have seniority over the Common Stock. There is no assurance that the Fund's leveraging strategy will be successful.

Any Borrowings and Preferred Stock (if issued) leverage your investment in Common Stock. Common Stockholders bear the costs associated with any Borrowings, and if the Fund issues Preferred Stock, Common Stockholders bear the offering costs of the Preferred Stock issuance. The Board of Directors of the Fund may authorize the use of leverage through Borrowings and Preferred Stock without the approval of the Common Stockholders.

The Fund has and is permitted in the future to negotiate with financial institutions to arrange a floating rate credit facility (the Credit Facility) pursuant to which the Fund would be entitled to borrow an amount equal to approximately 33 1/3% of the Fund's Managed Assets less any amounts of existing leverage, including Debt Securities (as defined below). Any such Borrowings would constitute financial leverage. The Fund currently has one Credit Facility outstanding. The Fund has and is in the future permitted to issue senior secured notes or other debt securities (Debt Securities) pursuant to which the Fund would be entitled to borrow an amount equal to approximately 33% of the Fund's Managed Assets less any amounts of existing leverage, including any Credit Facility. The Fund currently has Debt Securities outstanding consisting of \$180 million of senior secured notes. See Effects of Leverage.

Under the 1940 Act, the Fund is not permitted to incur indebtedness unless immediately thereafter the total asset value of the Fund's portfolio is at least 300% of the aggregate amount of outstanding indebtedness (i.e., the aggregate amount of outstanding debt may not exceed 33 1/3% of the Fund's Managed Assets). In addition, the Fund is not permitted to declare any cash distribution on its Common Stock unless, at the time of such declaration, the net asset value of the Fund's portfolio (determined by deducting the amount of such distribution) is at least 300% of the aggregate amount of such outstanding indebtedness. If the Fund borrows money, the Fund intends, to the extent possible, to retire outstanding debt from time to time to maintain coverage of any outstanding indebtedness of at least 300%. Under the 1940 Act, the Fund may only issue one class of senior securities representing indebtedness.

The Fund may be required to prepay outstanding amounts or incur a penalty rate of interest upon the occurrence of certain events of default. The Fund's current Credit Facility and Debt Securities contain customary covenants that, among other things, limit the Fund's ability to pay distributions in certain circumstances, incur additional debt, change its fundamental investment policies and engage in certain transactions, including mergers and consolidations, and require asset coverage ratios in addition to those required by the 1940 Act. The Fund expects any future Credit Facility or Debt Securities to contain similar covenants. In connection with the Fund's current Credit Facility and Debt Securities, the Fund is required to pledge its assets and any future Credit Facility or Debt Securities may require the same. The Fund's custodian will retain all assets of the pledge, including those that are pledged. The Fund's custodian is not an affiliate of the Fund, as such term is defined in the 1940 Act.

The Fund expects that any such Credit Facility or Debt Securities would have customary covenant, negative covenant and default provisions. There can be no assurance that the Fund will enter into an agreement for any new Credit Facility or issue new Debt Securities on terms and conditions representative of the foregoing, or that additional material terms will not apply. In addition, if entered into or issued, the Credit Facility or Debt Securities may in the future be replaced or refinanced by one or more credit facilities having substantially different terms or by the issuance of Preferred Stock or debt securities.

Changes in the value of the Fund's portfolio securities, including costs attributable to Borrowings or Preferred Stock, are borne entirely by the holders of the Common Stock. If there is a net decrease (or increase) in the value of the Fund's investment portfolio, the leverage decreases (or increases) the net asset value per share of Common Stock to a greater extent than if the Fund were not leveraged. During periods when the Fund is using leverage through Borrowings or the issuance of Preferred Stock, the fees paid to LMPFA and ClearBridge for advisory services are higher than if the Fund did not use leverage because the fees paid are calculated on the basis of the Fund's Managed Assets, which includes the principal amount of the Borrowings and any assets attributable to the issuance of Preferred Stock. This means that LMPFA and ClearBridge have a financial incentive to increase the Fund's use of leverage.

Utilization of leverage is a speculative investment technique and involves certain risks to the Common Stockholders. These include the possibility of higher volatility of the net asset value of the Common Stock and potentially more volatility in the market value of the Common Stock. So long as the Fund is able to realize a higher net return on its investment portfolio than the then-current cost of any leverage together with other related expenses, the effect of the leverage is to cause Common Stockholders to realize a higher rate of return than if the Fund were not so leveraged. On the other hand, to the extent that the then-current cost of any leverage, together with other related expenses, approaches the net return on the Fund's investment portfolio, the benefit of leverage to Common Stockholders is reduced, and if the then-current cost of any leverage together with related expenses were to exceed the net return on the Fund's portfolio, the Fund's leveraged capital structure would result in a lower rate of return to Common Stockholders than if the Fund were not so leveraged.

The Fund's current Borrowings subject it to certain restrictions imposed by guidelines of one or more rating agencies. These guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed on the Fund by the 1940 Act. It is not anticipated that these covenants or guidelines will impede LMPFA and ClearBridge from managing the Fund's portfolio in accordance with the Fund's investment objective and policies.

Under the 1940 Act, the Fund is not permitted to issue Preferred Stock unless immediately after such issuance the value of the Fund's asset coverage is at least 200% of the liquidation value of the outstanding Preferred Stock (i.e., such liquidation value may not exceed 50% of the Fund's assets less all liabilities other than Borrowings and outstanding Preferred Stock). Under the 1940 Act, the Fund may only issue one class of Preferred Stock.

In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Stock unless, at the time of such declaration, the value of the Fund's assets less liabilities other than Borrowings and outstanding Preferred Stock satisfies the above-referenced 200% coverage requirement. If Preferred Stock is issued, the Fund intends, to the extent possible, to purchase or redeem Preferred Stock from time to time to the extent necessary in order to maintain coverage of at least 200%.

If Preferred Stock is outstanding, two of the Fund's Directors will be elected by the holders of Preferred Stock, voting separately as a class. The remaining Directors of the Fund will be elected by holders of Common Stock and Preferred Stock voting together as a single class. In the event that the Fund fails to pay dividends on the Preferred Stock for two years, holders of Preferred Stock would be entitled to elect a majority of the Directors of the Fund.

Effects of Leverage

We have Borrowings consisting of \$180 million outstanding senior secured notes and a revolving credit facility, which, as of November 30, 2013, had a total principal amount outstanding of \$80 million, totaling 22.9%

of Managed Assets. As of the date of this Prospectus, the Fund has no other forms of Borrowings or Preferred Stock outstanding. Assuming that our leverage levels are as described above, our average annual cost of leverage would be 2.99%. Income generated by our portfolio as of November 30, 2013 must exceed 0.63% in order to cover such leverage costs. These numbers are merely estimates used for illustration; actual dividend or interest rates on the leverage instruments will vary frequently and may be significantly higher or lower than the rate estimated above.

The interest rate payable by us on our Borrowings made under our revolving credit facility is LIBOR plus 0.80% and the commitment fee payable for unborrowed funds is 0.15%. As of November 30, 2013, there was \$80.0 million outstanding under this facility and the facility has a maximum availability of \$125 million.

The following table is furnished in response to requirements of the SEC. It is designed to illustrate the effect of leverage on Common Stock total return, assuming investment portfolio total returns (comprised of income and changes in the value of securities held in the Fund's portfolio) of -10%, -5%, 0%, 5% and 10%. These assumed investment portfolio returns are hypothetical figures and are not necessarily indicative of the investment portfolio returns experienced or expected to be experienced by the Fund. See Risks.

The table further reflects the issuance of leverage representing 22.9% of the Fund's Managed Assets, net of expenses, and the Fund's currently projected annual interest on its leverage of 2.99%.

Assumed Portfolio Total Return (Net of Expenses)	(10)%	(5)%	0%	5%	10%
Common Stock Total Return	(13.84)%	(7.36)%	(0.87)%	5.62%	12.10%

Common Stock Total Return is composed of two elements: the Common Stock dividends paid by the Fund (the amount of which is largely determined by the net investment income of the Fund after paying interest on its leverage) and gains or losses on the value of the securities the Fund owns. As required by SEC rules, the table above assumes that the Fund is more likely to suffer capital losses than to enjoy capital appreciation. For example, to assume a total return of 0% the Fund must assume that the return it receives on its investments is entirely offset by losses in the value of those investments.

RISKS

The Fund is a non-diversified, closed-end management investment company designed primarily as a long-term investment and not as a trading vehicle. The Fund is not intended to be a complete investment program and, due to the uncertainty inherent in all investments, there can be no assurance that the Fund will achieve its investment objective. Your securities at any point in time may be worth less than you invested, even after taking into account the reinvestment of Fund dividends and distributions.

Limited History of Operations

The Fund commenced operations on June 26, 2012 as a non-diversified, closed-end management investment company and has a limited history of operations and public trading.

Investment and Market Risk

An investment in the Fund is subject to investment risk, including the possible loss of the entire amount that you invest. Your investment in securities represents an indirect investment in MLPs and other securities owned by the Fund, most of which could be purchased directly. The value of the Fund's portfolio securities may move up or down, sometimes rapidly and unpredictably. At any point in time, your securities may be worth less than your original investment.

Risks of Investing in MLP Units

An investment in MLP units involves risks that differ from a similar investment in equity securities, such as common stock, of a corporation. Holders of MLP units have the rights typically afforded to limited partners in a limited partnership. As compared to common stockholders of a corporation, holders of MLP units have more limited control and limited rights to vote on matters affecting the partnership. Holders of MLP units are also exposed to the risk that they will be required to repay amounts to the MLP that are wrongfully distributed to them. There are certain tax risks associated with an investment in MLP units (described further below). Additionally, conflicts of interest may exist among common unit holders, subordinated unit holders and the general partner or managing member of an MLP; for example a conflict may arise as a result of incentive distribution payments.

Tax Risks of Investing in Equity Securities of MLPs

Much of the benefit the Fund derives from its investment in equity securities of MLPs is a result of MLPs generally being treated as partnerships for United States federal income tax purposes. Partnerships do not pay United States federal income tax at the partnership level. Rather, each partner of a partnership, in computing its United States federal income tax liability, will include its allocable share of the partnership's income, gains, losses, deductions and expenses. A change in current tax law, a change in the business of a given MLP, or a change in the types of income earned by a given MLP, could result in an MLP being treated as a corporation for United States federal income tax purposes, which would result in such MLP being required to pay United States federal income tax on its taxable income. The classification of an MLP as a corporation for United States federal income tax purposes would have the effect of reducing the amount of cash available for distribution by the MLP and causing any such distributions received by the Fund to be taxed as dividend income to the extent of the MLP's current or accumulated earnings and profits. Thus, if any of the MLPs owned by the Fund were treated as corporations for United States federal income tax purposes, the after-tax return to the Fund with respect to its investment in such MLPs would be materially reduced, which could cause a substantial decline in the value of the Common Stock.

In addition, the potential tax benefit to the Fund of investing in MLPs depends in part on the particular MLP securities selected, and whether any distributions paid by such MLPs are treated as a return of capital (as opposed to currently taxable income). Accordingly, the Fund relies on ClearBridge to select MLP securities that provide distributions in excess of allocable taxable income. If ClearBridge fails to do so, a greater portion of the distributions received by the Fund may be comprised of taxable income (which would reduce the ability of the Fund to make distributions to Common Stockholders that are treated as a return of capital for United States federal income tax purposes). In such case, the Fund may have more corporate income tax expense than

expected, which would result in less cash available to distribute to Common Stockholders. Also, in connection with managing the Fund's portfolio in order to seek to maximize the potential tax benefits discussed above, ClearBridge may be forced to sell securities at times or prices that may be disadvantageous to the Fund.

The Fund is treated as a regular corporation, or a C corporation, for United States federal income tax purposes and, as a result, unlike most investment companies, is subject to corporate income tax to the extent the Fund recognizes positive returns. Any taxes paid by the Fund reduce the amount available to pay distributions to Common Stockholders, and therefore investors in the Fund will likely receive lower distributions than if they invested directly in MLPs.

To the extent that the Fund invests in the equity securities of an MLP, the Fund will be a partner in such MLP. Accordingly, the Fund is required to include in its taxable income the Fund's allocable share of the income, gains, losses, deductions and expenses recognized by each such MLP, regardless of whether the MLP distributes cash to the Fund. Historically, MLPs have been able to offset a significant portion of their income with tax deductions. The Fund incurs a current tax liability on its allocable share of an MLP's income and gains that are not offset by the MLP's tax deductions, losses and credits, or its net operating loss carryforwards, if any. The portion, if any, of a distribution received by the Fund from an MLP that is offset by the MLP's tax deductions, losses or credits is treated as a return of capital. However, those distributions reduce the Fund's adjusted tax basis in the equity securities of the MLP, which results in an increase in the amount of gain (or decrease in the amount of loss) that is recognized by the Fund for United States federal income tax purposes upon the sale of any such equity securities or upon subsequent distributions in respect of such equity securities. The percentage of an MLP's income and gains that are offset by tax deductions, losses and credits will fluctuate over time for various reasons. A significant slowdown in acquisition activity or capital spending by MLPs held in the Fund's portfolio could result in a reduction of accelerated depreciation generated by new acquisitions, which may result in increased current tax liability for the Fund.

The Fund accrues deferred income taxes for its future tax liability associated with the difference between the Fund's tax basis in an MLP security and the fair market value of the MLP security. Upon the Fund's sale of an MLP security, the Fund will be liable for previously deferred taxes on taxable realized gains from such sale. The Fund relies to some extent on information provided by MLPs, which may not necessarily be timely, to estimate its deferred tax liability for purposes of financial statement reporting and determining its net asset value. From time to time, the Fund may modify its estimates or assumptions regarding its deferred tax liability as new information becomes available.

Because of the Fund's status as a corporation for United States federal income tax purposes and its investments in equity securities of MLPs, the Fund's earnings and profits for financial reporting purposes are calculated under GAAP, which are different from those used for calculating taxable income. Because of these differences, the Fund may make distributions out of its current or accumulated earnings and profits, which will be treated as dividends, in excess of its taxable income. See Certain United States Federal Income Tax Considerations.

In addition, changes in tax laws or regulations, or future interpretations of such laws or regulations, could adversely affect the Fund or the MLP investments in which the Fund invests. In particular, certain recent proposals have called for the elimination of tax incentives widely used by oil, gas and coal companies and the imposition of new fees on certain energy producers. The elimination of such tax incentives and imposition of such fees could materially adversely affect MLPs in which the Fund invests and the energy sector generally.

Lack of Diversification of MLP Customers and Suppliers

Certain MLPs in which the Fund invests or may invest in the future depend upon a limited number of customers for substantially all of their revenue. Similarly, certain MLPs in which the Fund invests or may invest in the future depend upon a limited number of suppliers of goods or services to continue their operations. The loss of any such customers or suppliers could materially adversely affect such MLPs' results of operations and cash flow, and their ability to make distributions to unit holders, such as the Fund, would therefore be materially adversely affected.

Affiliated Party Risk

Certain MLPs in which the Fund may invest depend upon their parent or sponsor entities for the majority of their revenues. Were their parent or sponsor entities to fail to make such payments or satisfy their obligations, the revenues and cash flows of such MLPs and ability of such MLPs to make distributions to unit holders, such as the Fund, would be adversely affected.

Equity Securities Risk

A substantial percentage of the Fund's assets are invested in equity securities, including MLP common units, MLP subordinated units, MLP preferred units, equity securities of MLP affiliates, including I-Shares, and common stocks of other issuers. Equity risk is the risk that MLP units or other equity securities held by the Fund will fall due to general market or economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, changes in interest rates, and the particular circumstances and performance of particular companies whose securities the Fund holds. The price of an equity security of an issuer may be particularly sensitive to general movements in the stock market, or a drop in the stock market may depress the price of most or all of the equity securities held by the Fund. In addition, MLP units or other equity securities held by the Fund may decline in price if the issuer fails to make anticipated distributions or dividend payments because, among other reasons, the issuer experiences a decline in its financial condition.

MLP subordinated units typically are convertible to MLP common units at a one-to-one ratio. The price of MLP subordinated units is typically tied to the price of the corresponding MLP common unit, less a discount. The size of the discount depends upon a variety of factors, including the likelihood of conversion, the length of time remaining until conversion and the size of the block of subordinated units being purchased or sold.

I-Shares represent an indirect investment in MLP I-units. Prices and volatilities of I-Shares tend to correlate to the price of common units. Holders of I-Shares are subject to the same risks as holders of MLP common units. In addition, I-Shares may trade less frequently, particularly those of issuers with smaller capitalizations. Given their potential for limited trading volume, I-Shares may display volatile or erratic price movements. In addition, I-Shares often may be subordinated in terms of liquidation rights to MLP common units.

Energy Sector Risks

MLPs and other entities operating in the energy sector are subject to many operating risks, including: equipment failure causing outages; structural, maintenance, impairment and safety problems; transmission or transportation constraints, inoperability or inefficiencies; dependence on a specified fuel source; changes in electricity and fuel usage; availability of competitively priced alternative energy sources; changes in generation efficiency and market heat rates; lack of sufficient capital to maintain facilities; significant capital expenditures to keep older assets operating efficiently; seasonality; changes in supply and demand for energy; catastrophic and/or weather-related events such as spills, leaks, well blowouts, uncontrollable flows, ruptures, fires, explosions, floods, earthquakes, hurricanes, discharges of toxic gases and similar occurrences; storage, handling, disposal and decommissioning costs; and environmental compliance. Breakdown or failure of an energy company's assets may prevent it from performing under applicable sales agreements, which in certain situations, could result in termination of the agreement or incurring a liability for liquidated damages. As a result of the above risks and other potential hazards associated with energy companies, certain companies may become exposed to significant liabilities for which they may not have adequate insurance coverage. Any of the aforementioned risks could have a material adverse effect on the business, financial condition, results of operations and cash flows of energy companies.

Because the Fund invests at least 80% of its Managed Assets in energy MLPs, concentration in the energy sector may present more risks than if the Fund were broadly diversified over numerous sectors of the economy. A downturn in the energy sector of the economy, adverse political, legislative or regulatory developments or other events could have a larger impact on the Fund than on an investment company that does not concentrate in the sector. At times, the performance of securities of companies in the sector may lag the performance of other sectors or the broader market as a whole. In addition, there are several specific risks associated with investments in the energy sector, including the following.

Regulatory Risk. The energy sector is highly regulated. MLPs and other entities operating in the energy sector are subject to significant regulation of nearly every aspect of their operations by federal, state and local governmental agencies. Such regulation can change rapidly or over time in both scope and intensity. For example, a particular by-product or process, including hydraulic fracturing, may be declared hazardous sometimes retroactively by a regulatory agency and unexpectedly increase production costs. Various governmental authorities have the power to enforce compliance with these regulations and the permits issued under them, and violators are subject to administrative, civil and criminal penalties, including civil fines, injunctions or both. Stricter laws, regulations or enforcement policies could be enacted in the future which would likely increase compliance costs and may materially adversely affect the financial performance of MLPs.

Specifically, the operations of wells, gathering systems, pipelines, refineries and other facilities are subject to stringent and complex federal, state and local environmental laws and regulations. These include, for example:

the federal Clean Air Act and comparable state laws and regulations that impose obligations related to air emissions;

the federal Clean Water Act and comparable state laws and regulations that impose obligations related to discharges of pollutants into regulated bodies of water;

RCRA and comparable state laws and regulations that impose requirements for the handling and disposal of waste from facilities; and

CERCLA, also known as Superfund, and comparable state laws and regulations that regulate the cleanup of hazardous substances that may have been released at properties currently or previously owned or operated by MLPs or at locations to which they have sent waste for disposal.

Failure to comply with these laws and regulations may trigger a variety of administrative, civil and criminal enforcement measures, including the assessment of monetary penalties, the imposition of remedial requirements, and the issuance of orders enjoining future operations. Certain environmental statutes, including RCRA, CERCLA, the federal Oil Pollution Act and analogous state laws and regulations, impose strict, joint and several liability for costs required to clean up and restore sites where hazardous substances have been disposed of or otherwise released. Moreover, it is not uncommon for neighboring landowners and other third parties to file claims for personal injury and property damage allegedly caused by the release of hazardous substances or other waste products into the environment.

There is an inherent risk that MLPs may incur environmental costs and liabilities due to the nature of their businesses and the substances they handle. For example, an accidental release from wells or gathering pipelines could subject them to substantial liabilities for environmental cleanup and restoration costs, claims made by neighboring landowners and other third parties for personal injury and property damage, and fines or penalties for related violations of environmental laws or regulations. Moreover, the possibility exists that stricter laws, regulations or enforcement policies could significantly increase the compliance costs of MLPs. For example, hydraulic fracturing, a technique used in the completion of certain oil and gas wells, has become a subject of increasing regulatory scrutiny and may be subject in the future to more stringent, and more costly to comply with, requirements. Similarly, the implementation of more stringent environmental requirements could significantly increase the cost of any remediation that may become necessary. MLPs may not be able to recover these costs from insurance.

Voluntary initiatives and mandatory controls have been adopted or are being discussed both in the United States and worldwide to reduce emissions of greenhouse gases such as carbon dioxide, a by-product of burning fossil fuels, and methane, the major constituent of natural gas, which many scientists and policymakers believe contribute to global climate change. These measures and future measures could result in increased costs to certain companies in which the Fund may invest to operate and maintain facilities and administer and manage a greenhouse gas emissions program and may reduce demand for fuels that generate greenhouse gases and that are managed or produced by companies in which the Fund may invest.

In the wake of a Supreme Court decision holding that the EPA has some legal authority to deal with climate change under the Clean Air Act, the EPA and the Department of Transportation jointly wrote regulations to cut

gasoline use and control greenhouse gas emissions from cars and trucks. The EPA has also taken action to require certain entities to measure and report greenhouse gas emissions and certain facilities may be required to control emissions of greenhouse gases pursuant to EPA air permitting and other regulatory programs. These measures, and other programs addressing greenhouse gas emissions, could reduce demand for energy or raise prices, which may adversely affect the total return of certain of the Fund's investments.

Commodity Price Risk. MLPs and other entities operating in the energy sector may be affected by fluctuations in the prices of energy commodities, including, for example, natural gas, natural gas liquids, crude oil and coal, in the short- and long-term. Fluctuations in energy commodity prices would impact directly companies that own such energy commodities and could impact indirectly companies that engage in transportation, storage, processing, distribution or marketing of such energy commodities. Fluctuations in energy commodity prices can result from changes in general economic conditions or political circumstances (especially of key energy producing and consuming countries); market conditions; weather patterns; domestic production levels; volume of imports; energy conservation; domestic and foreign governmental regulation; international politics; policies of OPEC; taxation; tariffs; and the availability and costs of local, intrastate and interstate transportation methods. The energy sector as a whole may also be impacted by the perception that the performance of energy sector companies is directly linked to commodity prices. High commodity prices may drive further energy conservation efforts, and a slowing economy may adversely impact energy consumption, which may adversely affect the performance of MLPs and other companies operating in the energy sector. Recent economic and market events have fueled concerns regarding potential liquidations of commodity futures and options positions.

Depletion Risk. MLPs and other entities engaged in the exploration, development, management or production of energy commodities face the risk that commodity reserves are depleted over time. Such companies seek to increase their reserves through expansion of their current businesses, acquisitions, further development of their existing sources of energy commodities, exploration of new sources of energy commodities or by entering into long-term contracts for additional reserves; however, there are risks associated with each of these potential strategies. If such companies fail to acquire additional reserves in a cost-effective manner and at a rate at least equal to the rate at which their existing reserves decline, their financial performance may suffer. Additionally, failure to replenish reserves could reduce the amount and affect the tax characterization of the distributions paid by such companies.

Supply and Demand Risk. MLPs and other entities operating in the energy sector could be adversely affected by reductions in the supply of or demand for energy commodities. The volume of production of energy commodities and the volume of energy commodities available for transportation, storage, processing or distribution could be affected by a variety of factors, including depletion of resources; depressed commodity prices; catastrophic events; labor relations; increased environmental or other governmental regulation; equipment malfunctions and maintenance difficulties; import volumes; international politics, policies of OPEC; and increased competition from alternative energy sources. Alternatively, a decline in demand for energy commodities could result from factors such as adverse economic conditions (especially in key energy-consuming countries); increased taxation; increased environmental or other governmental regulation; increased fuel economy; increased energy conservation or use of alternative energy sources; legislation intended to promote the use of alternative energy sources; or increased commodity prices.

Acquisition Risk. MLP investments owned by the Fund may depend on their ability to make acquisitions that increase adjusted operating surplus per unit in order to increase distributions to unit holders. The ability of such MLPs to make future acquisitions is dependent on their ability to identify suitable targets, negotiate favorable purchase contracts, obtain acceptable financing and outbid competing potential acquirers. To the extent that such MLPs are unable to make future acquisitions, or such future acquisitions fail to increase the adjusted operating surplus per unit, their growth and ability to make distributions to unit holders will be limited. There are risks inherent in any acquisition, including erroneous assumptions regarding revenues, acquisition expenses, operating expenses, cost savings and synergies; assumption of liabilities; indemnification; customer losses; key employee defections; distraction from other business operations; and unanticipated difficulties in operating or integrating new product areas and geographic regions.

Weather Risks. Weather plays a role in the seasonality of some MLPs' cash flows. MLPs in the propane industry, for example, rely on the winter season to generate almost all of their earnings. In an unusually warm winter season, propane MLPs experience decreased demand for their product. Although most MLPs can reasonably predict seasonal weather demand based on normal weather patterns, extreme weather conditions, such as the hurricanes that severely damaged cities along the U.S. Gulf Coast in recent years, demonstrate that no amount of preparation can protect an MLP from the unpredictability of the weather or possible climate change. The damage done by extreme weather also may serve to increase many MLPs' insurance premiums and could adversely affect such companies' financial condition and ability to pay distributions to shareholders.

Cyclical Industry Risk. The energy industry is cyclical and from time to time may experience a shortage of drilling rigs, equipment, supplies, or qualified personnel, or due to significant demand, such services may not be available on commercially reasonable terms. An MLP's ability to successfully and timely complete capital improvements to existing or other capital projects is contingent upon many variables. Should any such efforts be unsuccessful, an MLP could be subject to additional costs and/or the write-off of its investment in the project or improvement. The marketability of oil and gas production depends in large part on the availability, proximity and capacity of pipeline systems owned by third parties. Oil and gas properties are subject to royalty interests, liens and other burdens, encumbrances, easements or restrictions, all of which could impact the production of a particular MLP. Oil and gas MLPs operate in a highly competitive and cyclical industry, with intense price competition. A significant portion of their revenues may depend on a relatively small number of customers, including governmental entities and utilities.

Catastrophic Event Risk. MLPs and other entities operating in the energy sector are subject to many dangers inherent in the production, exploration, management, transportation, processing and distribution of natural gas, natural gas liquids, crude oil, refined petroleum and petroleum products and other hydrocarbons. These dangers include leaks, fires, explosions, damage to facilities and equipment resulting from natural disasters, inadvertent damage to facilities and equipment (such as those suffered by BP's Deepwater Horizon drilling platform in 2010) and terrorist acts. Since the September 11th terrorist attacks, the U.S. government has issued warnings that energy assets, specifically U.S. pipeline infrastructure, may be targeted in future terrorist attacks. These dangers give rise to risks of substantial losses as a result of loss or destruction of commodity reserves; damage to or destruction of property, facilities and equipment; pollution and environmental damage; and personal injury or loss of life. Any occurrence of such catastrophic events could bring about a limitation, suspension or discontinuation of the operations of MLPs and other entities operating in the energy sector. MLPs and other entities operating in the energy sector may not be fully insured against all risks inherent in their business operations and therefore accidents and catastrophic events could adversely affect such companies' financial condition and ability to pay distributions to shareholders.

Industry Specific Risks

MLPs and other entities operating in the energy sector are also subject to risks that are specific to the industry they serve.

Pipelines. Pipeline companies are subject to the demand for natural gas, natural gas liquids, crude oil or refined products in the markets they serve, changes in the availability of products for gathering, transportation, processing or sale due to natural declines in reserves and production in the supply areas serviced by the companies' facilities, sharp decreases in crude oil or natural gas prices that cause producers to curtail production or reduce capital spending for exploration activities, and environmental regulation. Demand for gasoline, which accounts for a substantial portion of refined product transportation, depends on price, prevailing economic conditions in the markets served, and demographic and seasonal factors. Companies that own interstate pipelines that transport natural gas, natural gas liquids, crude oil or refined petroleum products are subject to regulation by FERC with respect to the tariff rates they may charge for transportation services. An adverse determination by FERC with respect to the tariff rates of such companies could have a material adverse effect on their business, financial condition, results of operations and cash flows and their ability to pay cash distributions or dividends. In addition, FERC has a tax allowance policy, which permits such companies to include in their cost of service an income tax allowance to the extent that their owners have an actual or potential tax liability on the income

generated by them. If FERC's income tax allowance policy were to change in the future to disallow a material portion of the income tax allowance taken by such interstate pipeline companies, it would adversely impact the maximum tariff rates that such companies are permitted to charge for their transportation services, which would in turn could adversely affect such companies' financial condition and ability to pay distributions to shareholders.

Gathering and processing. Gathering and processing companies are subject to natural declines in the production of oil and natural gas fields, which utilize their gathering and processing facilities as a way to market their production, prolonged declines in the price of natural gas or crude oil, which curtails drilling activity and therefore production, and declines in the prices of natural gas liquids and refined petroleum products, which cause lower processing margins. In addition, some gathering and processing contracts subject the gathering or processing company to direct commodities price risk.

Midstream. Midstream MLPs and other entities that provide crude oil, refined product and natural gas services are subject to supply and demand fluctuations in the markets they serve which may be impacted by a wide range of factors including fluctuating commodity prices, weather, increased conservation or use of alternative fuel sources, increased governmental or environmental regulation, depletion, rising interest rates, declines in domestic or foreign production, accidents or catastrophic events, and economic conditions, among others.

Exploration and production. Exploration, development and production companies are particularly vulnerable to declines in the demand for and prices of crude oil and natural gas. Reductions in prices for crude oil and natural gas can cause a given reservoir to become uneconomic for continued production earlier than it would if prices were higher, resulting in the plugging and abandonment of, and cessation of production from, that reservoir. In addition, lower commodity prices not only reduce revenues but also can result in substantial downward adjustments in reserve estimates. The accuracy of any reserve estimate is a function of the quality of available data, the accuracy of assumptions regarding future commodity prices and future exploration and development costs and engineering and geological interpretations and judgments. Different reserve engineers may make different estimates of reserve quantities and related revenue based on the same data. Actual oil and gas prices, development expenditures and operating expenses will vary from those assumed in reserve estimates, and these variances may be significant. Any significant variance from the assumptions used could result in the actual quantity of reserves and future net cash flow being materially different from those estimated in reserve reports. In addition, results of drilling, testing and production and changes in prices after the date of reserve estimates may result in downward revisions to such estimates. Substantial downward adjustments in reserve estimates could have a material adverse effect on a given exploration and production company's financial position and results of operations. In addition, due to natural declines in reserves and production, exploration and production companies must economically find or acquire and develop additional reserves in order to maintain and grow their revenues and distributions.

Propane. Propane MLPs are subject to earnings variability based upon weather conditions in the markets they serve, fluctuating commodity prices, increased use of alternative fuels, increased governmental or environmental regulation, and accidents or catastrophic events, among others.

Coal. MLP entities and other entities with coal assets are subject to supply and demand fluctuations in the markets they serve, which may be impacted by a wide range of factors including fluctuating commodity prices, the level of their customers' coal stockpiles, weather, increased conservation or use of alternative fuel sources, increased governmental or environmental regulation, depletion, rising interest rates, declines in domestic or foreign production, mining accidents or catastrophic events, health claims and economic conditions, among others. It has become increasingly difficult to obtain and maintain the permits necessary to mine coal. Further, such permits, if obtained, have increasingly contained more stringent, and more difficult and costly to comply with, provisions relating to environmental protection.

Marine shipping. Marine shipping (or tanker companies) are exposed to many of the same risks as other energy companies. In addition, the highly cyclical nature of the tanker industry may lead to volatile changes in charter rates and vessel values, which may adversely affect the earnings of tanker companies in our portfolio. Fluctuations in charter rates and vessel values result from changes in the supply and demand for tanker capacity

and changes in the supply and demand for oil and oil products. Historically, the tanker markets have been volatile because many conditions and factors can affect the supply and demand for tanker capacity. Changes in demand for transportation of oil over longer distances and supply of tankers to carry that oil may materially affect revenues, profitability and cash flows of tanker companies. The successful operation of vessels in the charter market depends upon, among other things, obtaining profitable spot charters and minimizing time spent waiting for charters and traveling unladen to pick up cargo. The value of tanker vessels may fluctuate and could adversely affect the value of tanker company securities in our portfolio. Declining tanker values could affect the ability of tanker companies to raise cash by limiting their ability to refinance their vessels, thereby adversely impacting tanker company liquidity. Tanker company vessels are at risk of damage or loss because of events such as mechanical failure, collision, human error, war, terrorism, piracy, cargo loss and bad weather. In addition, changing economic, regulatory and political conditions in some countries, including political and military conflicts, have from time to time resulted in attacks on vessels, mining of waterways, piracy, terrorism, labor strikes, boycotts and government requisitioning of vessels. These sorts of events could interfere with shipping lanes and result in market disruptions and a significant loss of tanker company earnings.

Delay in Use of Proceeds Risk

Although the Fund currently intends to invest the proceeds from any sale of the securities offered hereby as soon as practicable following the completion of any offering under this Prospectus, such investments may be delayed if suitable investments are unavailable at the time. The trading market and volumes for securities of MLPs may at times be less liquid than the market for other securities. Prior to the time the proceeds of any offering under this Prospectus are invested, such proceeds may be invested in short-term money market instruments and U.S. government securities, pending investment in securities of MLPs or energy companies. Income received by the Fund from these securities would subject the Fund to corporate tax before any distributions to security holders. As a result, the return and yield on the securities for the period immediately following any offering pursuant to this Prospectus and related Prospectus Supplement may be lower than when the Fund is fully invested in accordance with its investment objective and policies. See Use of Proceeds.

Interest Rate Risk

Rising interest rates could increase the costs of capital thereby increasing operating costs and reducing the ability of MLPs and other entities operating in the energy sector to carry out acquisitions or expansions in a cost-effective manner. As a result, rising interest rates could negatively affect the financial performance of MLPs and other entities operating in the energy sector. Rising interest rates may also impact the price of the securities of MLPs and other entities operating in the energy sector as the yields on alternative investments increase. During periods of declining interest rates, the market price of fixed income securities generally rises. Conversely, during periods of rising interest rates, the market price of such securities generally declines.

Inflation/Deflation Risk

Inflation risk is the risk that the value of certain assets or income from the Fund's investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Stock and distributions on the Common Stock can decline. In addition, during any periods of rising inflation, the dividend rates or borrowing costs associated with the Fund's use of leverage would likely increase, which would tend to further reduce returns to Common Stockholders. Deflation risk is the risk that prices throughout the economy decline over time—the opposite of inflation. Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer defaults more likely, which may result in a decline in the value of the Fund's portfolio.

Liquidity Risk

Although the equity securities of the MLPs in which the Fund invests generally trade on major stock exchanges, certain securities owned by the Fund may trade less frequently, particularly those of MLPs and other issuers with smaller capitalizations. Securities with limited trading volumes may display volatile or erratic price movements. Also, the Fund may be one of the largest investors in certain sub-sectors of the energy or natural resource sectors. Thus, it may be more difficult for the Fund to buy and sell significant amounts of such

securities without an unfavorable impact on prevailing market prices. Larger purchases or sales of these securities by the Fund in a short period of time may cause abnormal movements in the market price of these securities. As a result, these securities may be difficult to dispose of at a fair price at the times when ClearBridge believe it is desirable to do so.

Natural Resources Sector Risks

The natural resources sector includes companies principally engaged in owning or developing non-energy natural resources (including timber and minerals) and industrial materials, or supplying goods or services to such companies. The Fund's investments in MLPs and other entities operating in the natural resources sector will be subject to the risk that prices of these securities may fluctuate widely in response to the level and volatility of commodity prices; exchange rates; import controls; domestic and global competition; environmental regulation and liability for environmental damage; mandated expenditures for safety or pollution control; the success of exploration projects; depletion of resources; tax policies; and other governmental regulation. Investments in the natural resources sector can be significantly affected by changes in the supply of or demand for various natural resources. The value of investments in the natural resources sector may be adversely affected by a change in inflation.

Small Capitalization Risk

The Fund may invest in securities of MLPs and other issuers that have comparatively smaller capitalizations relative to issuers whose securities are included in major benchmark indexes, which presents unique investment risks. These companies often have limited product lines, markets, distribution channels or financial resources, and the management of such companies may be dependent upon one or a few key people. The market movements of equity securities issued by MLPs with smaller capitalizations may be more abrupt or erratic than the market movements of equity securities of larger, more established companies or the stock market in general. Historically, smaller capitalization companies have sometimes gone through extended periods when they did not perform as well as larger companies. In addition, equity securities of smaller capitalization companies generally are less liquid than those of larger companies. This means that the Fund could have greater difficulty selling such securities at the time and price that the Fund would like.

Competition Risk

A number of alternatives to us as vehicles for investment in a portfolio of energy MLPs and their affiliates currently exist, including other publicly traded investment companies, structured notes and private funds. In addition, recent tax law changes have increased the ability of regulated investment companies or other institutions to invest in MLPs. These competitive conditions may adversely impact our ability to meet our investment objective, which in turn could adversely impact our ability to make distributions.

Restricted Securities Risk

The Fund may invest up to 30% of its Managed Assets in unregistered or otherwise restricted securities. The term "restricted securities" refers to securities that are unregistered, held by control persons of the issuer or are subject to contractual restrictions on their resale. Restricted securities are often purchased at a discount from the market price of unrestricted securities of the same issuer reflecting the fact that such securities may not be readily marketable without some time delay. Such securities are often more difficult to value and the sale of such securities often requires more time and results in higher brokerage charges or dealer discounts and other selling expenses than does the sale of liquid securities trading on national securities exchanges or in the over-the-counter markets. Contractual restrictions on the resale of securities result from negotiations between the issuer and purchaser of such securities and therefore vary substantially in length and scope. To dispose of a restricted security that the Fund has a contractual right to sell, the Fund may first be required to cause the security to be registered. A considerable period may elapse between a decision to sell the securities and the time when the Fund would be permitted to sell, during which time the Fund would bear market risks.

Cash Flow Risk

The Fund expects that a substantial portion of the cash flow it receives will be derived from its investments in equity securities of MLPs. The amount and tax characterization of cash available for distribution by an MLP

depends upon the amount of cash generated by such entity's operations. Cash available for distribution by MLPs will vary widely from quarter to quarter and is affected by various factors affecting the entity's operations. In addition to the risks described herein, operating costs, capital expenditures, acquisition costs, construction costs, exploration costs and borrowing costs may reduce the amount of cash that an MLP has available for distribution in a given period.

Capital Market Risk

Global financial markets and economic conditions have been, and continue to be, volatile due to a variety of factors, including significant write-offs in the financial services sector. As a result, the cost of raising capital in the debt and equity capital markets has increased substantially while the ability to raise capital from those markets has diminished significantly. In particular, as a result of concerns about the general stability of financial markets and specifically the solvency of lending counterparties, the cost of raising capital from the credit markets generally has increased as many lenders and institutional investors have increased interest rates, enacted tighter lending standards, refused to refinance debt on existing terms or at all and reduced, or in some cases ceased to provide, funding to borrowers. In addition, lending counterparties under existing revolving credit facilities and other debt instruments may be unwilling or unable to meet their funding obligations. Due to these factors, MLPs may be unable to obtain new debt or equity financing on acceptable terms or at all. If funding is not available when needed, or is available only on unfavorable terms, MLPs may not be able to meet their obligations as they come due. Moreover, without adequate funding, MLPs may be unable to execute their growth strategies, complete future acquisitions, take advantage of other business opportunities or respond to competitive pressures, any of which could have a material adverse effect on their revenues and results of operations.

Valuation Risk

Market prices generally are unavailable for some of the Fund's investments, including MLP subordinated units, direct ownership of general partner or managing member interests and restricted or unregistered securities of certain MLPs and private companies. The values of such securities are determined by fair valuations determined by the Board of Directors or its designee in accordance with procedures governing the valuation of portfolio securities adopted by the Board of Directors. Proper valuation of such securities may require more reliance on the judgment of ClearBridge than valuation of securities for which an active trading market exists. As a limited partner in the MLPs, the Fund includes its allocable share of the MLP's taxable income in computing its own taxable income. Deferred income taxes in the financial statements of the Fund reflect (i) taxes on unrealized gains/losses, which are attributable to the temporary difference between fair market value and the cost basis of the Fund's assets for financial reporting purposes, (ii) the net tax effects of temporary differences between the carrying amount and the cost basis of such assets and liabilities for financial reporting purposes and the amounts used for income tax purposes and (iii) the net tax benefit of accumulated net operating losses. To the extent the Fund has a deferred tax asset, consideration is given as to whether or not a valuation allowance is required. The need to establish a valuation allowance for deferred tax assets is assessed periodically by the Fund based on the criterion established by ASC Topic 740 that it is more likely than not that some portion or all of the deferred tax asset will not be realized. In the assessment for a valuation allowance, consideration is given to all positive and negative evidence related to the realization of the deferred tax asset. This assessment considers, among other matters, the nature, frequency and severity of current and cumulative losses, forecasts of future profitability (which are highly dependent on future MLP operating results), the duration of statutory carryforward periods and the associated risk that operating loss carryforwards may expire unused.

The Fund may rely to some extent on information provided by the MLPs, which may not necessarily be timely, to estimate taxable income allocable to the MLP units held in the portfolio and to estimate the associated deferred tax asset or liability. Such estimates are made in good faith. From time to time, as new information becomes available, the Fund modifies its estimates or assumptions regarding the deferred tax asset or liability.

Deferred tax assets may constitute a relatively high percentage of the Fund's net asset value. Any valuation allowance required against such deferred tax assets or future adjustments to a valuation allowance may reduce the Fund's deferred tax assets and could have a material impact on the Fund's net asset value and results of operations in the period the valuation allowance is recorded or adjusted.

Royalty Trust Risk

Royalty trusts are exposed to many of the same risks as other MLPs. In addition, the value of the equity securities of the royalty trusts in which the Fund invests may fluctuate in accordance with changes in the financial condition of those royalty trusts, the condition of equity markets generally, commodity prices, and other factors. Distributions on royalty trusts in which the Fund may invest will depend upon the declaration of distributions from the constituent royalty trusts, but there can be no assurance that those royalty trusts will pay distributions on their securities. Typically royalty trusts own the rights to royalties on the production and sales of a natural resource, including oil, gas, minerals and timber. As these deplete, production and cash flows steadily decline, which may decrease distributions. The declaration of such distributions generally depends upon various factors, including the operating performance and financial condition of the royalty trust and general economic conditions.

In many circumstances, the royalty trusts in which the Fund may invest may have limited operating histories. The value of royalty trust securities in which the Fund invests are influenced by factors that are not within the Fund's control, including the financial performance of the respective issuers, interest rates, exchange rates and commodity prices (which will vary and are determined by supply and demand factors including weather and general economic and political conditions), the hedging policies employed by such issuers, issues relating to the regulation of the energy industry and operational risks relating to the energy industry.

Market Discount from Net Asset Value Risk

Our Common Stock has traded both at a premium and at a discount to our net asset value. The last reported sale price, as of February 14, 2014 was \$22.15 per share. Our net asset value per share and percentage discount to net asset value per share of our Common Stock as of February 14, 2014 were \$23.53 and 5.86%, respectively. There is no assurance that this discount will not continue after the date of this Prospectus or that our Common Stock will again trade at a premium. Shares of closed-end investment companies frequently trade at a discount to their net asset value. This characteristic is a risk separate and distinct from the risk that our net asset value could decrease as a result of our investment activities and may be greater for investors expecting to sell their shares in a relatively short period following completion of any offering under this Prospectus. Although the value of our net assets is generally considered by market participants in determining whether to purchase or sell shares, whether investors will realize gains or losses upon the sale of our Common Stock depends upon whether the market price of our Common Stock at the time of sale is above or below the investor's purchase price for our Common Stock. Because the market price of our Common Stock is affected by factors such as net asset value, dividend or distribution levels (which are dependent, in part, on expenses), supply of and demand for our Common Stock, stability of distributions, trading volume of our Common Stock, general market and economic conditions, and other factors beyond our control, the Fund cannot predict whether the Common Stock will trade at, below or above net asset value or at, below or above the offering price. The Fund's Common Stock is designed primarily for long term investors and you should not view the Fund as a vehicle for trading purposes.

Dilution Risk

The voting power of current Common Stockholders will be diluted to the extent that current Common Stockholders do not purchase Common Stock in any future offerings of Common Stock or do not purchase sufficient Common Stock to maintain their percentage interest. If the Fund is unable to invest the proceeds of such offerings as intended, the Fund's per share distributions may decrease and the Fund may not participate in market advances to the same extent as if such proceeds were fully invested as planned. See Description of Shares.

Below Investment Grade (High Yield or Junk Bond) Securities Risk

The Fund may invest up to 20% of its Managed Assets in fixed income securities of below investment grade quality. Fixed income securities rated below investment grade are commonly referred to as "high yield" securities or "junk bonds" and are regarded as having predominantly speculative characteristics with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations and involve major risk exposure to adverse conditions. Fixed income securities rated as low as C by Moody's, CCC

or lower by S&P or CC or lower by Fitch are considered to have extremely poor prospects of ever attaining any real investment standing, to have a current identifiable vulnerability to default, to be unlikely to have the capacity to pay interest and repay principal when due in the event of adverse business, financial or economic conditions and/or to be in default or not current in the payment of interest or principal. Ratings may not accurately reflect the actual credit risk associated with a corporate security.

Fixed income securities rated below investment grade generally offer a higher current yield than that available from higher grade issues, but typically involve greater risk. These securities are especially sensitive to adverse changes in general economic conditions, to changes in the financial condition of their issuers and to price fluctuation in response to changes in interest rates. During periods of economic downturn or rising interest rates, issuers of below investment grade instruments may experience financial stress that could adversely affect their ability to make payments of principal and interest and increase the possibility of default. The secondary market for high yield securities may not be as liquid as the secondary market for more highly rated securities, a factor which may have an adverse effect on the Fund's ability to dispose of a particular security. There are fewer dealers in the market for high yield securities than for investment grade obligations. The prices quoted by different dealers may vary significantly, and the spread between the bid and ask price is generally much larger for high yield securities than for higher quality instruments. Under adverse market or economic conditions, the secondary market for high yield securities could contract further, independent of any specific adverse changes in the condition of a particular issuer, and these securities may become illiquid. In addition, adverse publicity and investor perceptions, whether or not based on fundamental analysis, may also decrease the values and liquidity of below investment grade securities, especially in a market characterized by a low volume of trading.

Default, or the market's perception that an issuer is likely to default, could reduce the value and liquidity of securities held by the Fund, thereby reducing the value of your investment in the Fund's securities. In addition, default may cause the Fund to incur expenses in seeking recovery of principal or interest on its portfolio holdings. In any reorganization or liquidation proceeding relating to a portfolio company, the Fund may lose its entire investment or may be required to accept cash or securities with a value less than its original investment. Among the risks inherent in investments in a troubled entity is the fact that it frequently may be difficult to obtain information as to the true financial condition of such issuer. ClearBridge's judgment about the credit quality of an issuer and the relative value of its securities may prove to be wrong. Investments in below investment grade securities may present special tax issues for the Fund to the extent that the issuers of these securities default on their obligations pertaining thereto, and the federal income tax consequences to the Fund as a holder of such distressed securities may not be clear.

Foreign Securities and Emerging Markets Risk

A fund that invests in foreign (non-U.S.) securities may experience more rapid and extreme changes in value than a fund that invests exclusively in securities of U.S. companies. The securities markets of many foreign countries are relatively small, with a limited number of companies representing a small number of industries. Investments in foreign securities (including those denominated in U.S. dollars) are subject to economic and political developments in the countries and regions where the issuers operate or are domiciled, or where the securities are traded, such as changes in economic or monetary policies. Values may also be affected by restrictions on receiving the investment proceeds from a foreign country. Less information may be publicly available about foreign companies than about U.S. companies. Foreign companies are generally not subject to the same accounting, auditing and financial reporting standards as are U.S. companies. In addition, the Fund's investments in foreign securities may be subject to the risk of nationalization or expropriation of assets, imposition of currency exchange controls or restrictions on the repatriation of foreign currency, confiscatory taxation, political or financial instability and adverse diplomatic developments. In addition, there may be difficulty in obtaining or enforcing a court judgment abroad. Dividends or interest on, or proceeds from the sale of, foreign securities may be subject to non-U.S. withholding taxes, and special U.S. tax considerations may apply.

The risks of foreign investment are greater for investments in emerging markets. The Fund considers a country to be an emerging market country if, at the time of investment, it is represented in the J.P. Morgan

Emerging Markets Bond Index Global or categorized by the World Bank in its annual categorization as middle or low-income Emerging market countries typically have economic and political systems that are less fully developed, and that can be expected to be less stable, than those of more advanced countries. Low trading volumes may result in a lack of liquidity and in price volatility. Emerging market countries may have policies that restrict investment by foreigners, that require governmental approval prior to investments by foreign persons, or that prevent foreign investors from withdrawing their money at will. An investment in emerging market securities should be considered speculative.

Currency Risk

If the Fund invests directly in securities that trade in, and receive revenues in, foreign (non-U.S.) currencies, it will be subject to the risk that those currencies will decline in value relative to the U.S. dollar. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, intervention (or the failure to intervene) by U.S. or foreign governments, central banks or supranational entities such as the International Monetary Fund, or the imposition of currency controls or other political developments in the United States or abroad. As a result, the Fund's investments in foreign currency denominated securities may reduce the returns of the Fund.

Leverage Risk

As of November 30, 2013, we had outstanding senior secured notes and a revolving credit facility with a financial institution in place under which we had Borrowings representing approximately 22.9% of our Managed Assets. In the future the Fund may elect to utilize leverage in an amount up to 33 ¹/₃% of the Fund's total assets through Borrowings and 50% of the Fund's total assets through the issuance of Preferred Stock. Leverage may result in greater volatility of the net asset value and market price of the Common Stock because changes in the value of the Fund's portfolio investments, including investments purchased with the proceeds from Borrowings or the issuance of Preferred Stock, if any, are borne entirely by Common Stockholders. Common Stock income may fall if the interest rate on Borrowings or the dividend rate on Preferred Stock rises, and may fluctuate as the interest rate on Borrowings or the dividend rate on Preferred Stock varies. The Fund's use of leverage results in increased operating costs. Thus, to the extent that the then-current cost of any leverage, together with other related expenses, approaches the net return on the Fund's investment portfolio, the benefit of leverage to Common Stockholders will be reduced, and if the then-current cost of any leverage together with related expenses were to exceed the net return on the Fund's portfolio, the Fund's leveraged capital structure would result in a lower rate of return to Common Stockholders than if the Fund were not so leveraged. There can be no assurance that the Fund's leveraging strategy will be successful.

During periods when the Fund is using leverage through Borrowings or the issuance of Preferred Stock, the fees paid to LMPFA and ClearBridge for advisory services will be higher than if the Fund did not use leverage because the fees paid will be calculated on the basis of the Fund's Managed Assets, which includes the amount of Borrowings and any assets attributable to the issuance of Preferred Stock. This means that LMPFA and ClearBridge have a financial incentive to increase the Fund's use of leverage.

Any decline in the net asset value of the Fund will be borne entirely by the Common Stockholders. Therefore, if the market value of the Fund's portfolio declines, the Fund's use of leverage will result in a greater decrease in net asset value to Common Stockholders than if the Fund were not leveraged. Such greater net asset value decrease will also tend to cause a greater decline in the market price for the Common Stock.

Certain types of Borrowings, including the Fund's current Borrowings, result in the Fund being subject to covenants relating to asset coverage, credit ratings or portfolio composition or otherwise. In addition, the Fund may be subject to certain restrictions imposed by guidelines of one or more rating agencies which may issue ratings for commercial paper or notes issued by the Fund. Such restrictions may be more stringent than those imposed by the 1940 Act. In addition, the terms of the Fund's current Borrowings also require that the Fund pledge its assets as collateral.

Derivatives Risk

The Fund may utilize a variety of derivative instruments such as interest rate swaps, options contracts, futures contracts, forward contracts, options on futures contracts and indexed securities. Generally, derivatives are financial contracts whose value depends on, or is derived from, the value of an underlying asset, reference rate or index, and may relate to individual debt or equity instruments, interest rates, currencies or currency exchange rates, commodities, related indexes and other assets. Derivatives are subject to a number of risks described elsewhere in this Prospectus, such as liquidity risk, interest rate risk, credit risk and management risk. Derivatives are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligation. Changes in the credit quality of the companies that serve as the Fund's counterparties with respect to its derivative transactions will affect the value of those instruments. By using derivatives that expose the Fund to counterparties, the Fund assumes the risk that its counterparties could experience financial hardships that could call into question their continued ability to perform their obligations. In addition, in the event of the insolvency of a counterparty to a derivative transaction, the derivative transaction would typically be terminated at its fair market value. If the Fund is owed this fair market value in the termination of the derivative transaction and its claim is unsecured, the Fund will be treated as a general creditor of such counterparty, and will not have any claim with respect to the underlying security. As a result, concentrations of such derivatives in any one counterparty would subject the Fund to an additional degree of risk with respect to defaults by such counterparty. Derivatives also involve the risk of mispricing or improper valuation and the risk that changes in the value of a derivative may not correlate perfectly with an underlying asset, interest rate or index. Suitable derivative transactions may not be available in all circumstances and there can be no assurance that the Fund will engage in these transactions to reduce exposure to other risks when that would be beneficial. If the Fund invests in a derivative instrument, it could lose more than the principal amount invested. Changes to the derivatives markets as a result of the Dodd-Frank Wall Street Reform and Consumer Protection Act and other government regulation may have an adverse effect on the Fund's ability to make use of derivative transactions.

Derivative instruments can be illiquid, may disproportionately increase losses and may have a potentially large impact on Fund performance. See The Fund's Investments Additional Investment Activities Derivatives and Investment Policies and Techniques Securities Derivatives in the SAI.

Short Sales Risk

To the extent the Fund makes use of short sales for investment and/or risk management purposes, the Fund may be subject to risks associated with selling short. Short sales are transactions in which the Fund sells securities or other instruments that the Fund does not own. Short sales expose the Fund to the risk that it will be required to cover its short position at a time when the securities have appreciated in value, thus resulting in a loss to the Fund. The Fund may engage in short sales where it does not own or have the right to acquire the security sold short at no additional cost. The Fund's loss on a short sale theoretically could be unlimited in a case where the Fund is unable, for whatever reason, to close out its short position. In addition, the Fund's short selling strategies may limit its ability to benefit from increases in the markets. If the Fund engages in short sales, it will segregate liquid assets, enter into offsetting transactions or own positions covering its obligations; however, such segregation and cover requirements will not limit or offset losses on related positions. Short selling also involves a form of financial leverage that may exaggerate any losses realized by the Fund. Also, there is the risk that the counterparty to a short sale may fail to honor its contractual terms, causing a loss to the Fund. The Fund will incur transaction costs with any short sales, which will be borne by shareholders. Finally, regulations imposed by the SEC or other regulatory bodies relating to short selling may restrict the Fund's ability to engage in short selling.

Legal and Regulatory Risk

Legal, tax and regulatory changes could occur and may adversely affect the Fund and its ability to pursue its investment strategies and/or increase the costs of implementing such strategies. New (or revised) laws or regulations may be imposed by the CFTC, the SEC, the U.S. Federal Reserve or other banking regulators, other governmental regulatory authorities or self-regulatory organizations that supervise the financial markets that

could adversely affect the Fund. In particular, these agencies are empowered to promulgate a variety of new rules pursuant to recently enacted financial reform legislation in the United States. The Fund also may be adversely affected by changes in the enforcement or interpretation of existing statutes and rules by these governmental regulatory authorities or self-regulatory organizations.

In addition, the securities and futures markets are subject to comprehensive statutes, regulations and margin requirements. The CFTC, the SEC, the Federal Deposit Insurance Corporation, other regulators and self-regulatory organizations and exchanges are authorized under these statutes, regulations and otherwise to take extraordinary actions in the event of market emergencies. The Fund and the Investment Manager have historically been eligible for exemptions from certain regulations. However, there is no assurance that the Fund and LMPFA will continue to be eligible for such exemptions.

The U.S. Government recently enacted legislation that provides for new regulation of the derivatives market, including clearing, margin, reporting, recordkeeping, and registration requirements. Although the CFTC has released final rules relating to clearing, reporting, recordkeeping and registration requirements under the legislation, many of the provisions are subject to further final rule making, and thus its ultimate impact remains unclear. New regulations could, among other things, restrict the Fund's ability to engage in derivatives transactions (for example, by making certain types of derivatives transactions no longer available to the Fund) and/or increase the costs of such derivatives transactions (for example, by increasing margin or capital requirements), and the Fund may be unable to execute its investment strategies as a result. It is unclear how the regulatory changes will affect counterparty risk.

The CFTC and certain futures exchanges have established limits, referred to as position limits, on the maximum net long or net short positions which any person may hold or control in particular options and futures contracts; those position limits may also apply to certain other derivatives positions the Fund may wish to take. All positions owned or controlled by the same person or entity, even if in different accounts, may be aggregated for purposes of determining whether the applicable position limits have been exceeded. Thus, even if the Fund does not intend to exceed applicable position limits, it is possible that different clients managed by the Investment Manager and its affiliates may be aggregated for this purpose. Therefore it is possible that the trading decisions of the Investment Manager may have to be modified and that positions held by the Fund may have to be liquidated in order to avoid exceeding such limits. The modification of investment decisions or the elimination of open positions, if it occurs, may adversely affect the performance of the Fund.

The SEC has in the past adopted interim rules requiring reporting of all short positions above a certain de minimis threshold and may adopt rules requiring monthly public disclosure in the future. In addition, other non-U.S. jurisdictions where the Fund may trade have adopted reporting requirements. If the Fund's short positions or its strategy become generally known, it could have a significant effect on ClearBridge's ability to implement its investment strategy. In particular, it would make it more likely that other investors could cause a short squeeze in the securities held short by the Fund forcing the Fund to cover its positions at a loss. Such reporting requirements also may limit the Investment Manager's ability to access management and other personnel at certain companies where ClearBridge seeks to take a short position. In addition, if other investors engage in copycat behavior by taking positions in the same issuers as the Fund, the cost of borrowing securities to sell short could increase drastically and the availability of such securities to the Fund could decrease drastically. Such events could make the Fund unable to execute its investment strategy. In addition, the SEC and other regulatory and self-regulatory authorities have implemented various rules and may adopt additional rules in the future that may impact those engaging in short selling activity. If additional rules were adopted regarding short sales, they could restrict the Fund's ability to engage in short sales in certain circumstances, and the Fund may be unable to execute its investment strategy as a result.

The SEC and regulatory authorities in other jurisdictions may adopt (and in certain cases, have adopted) bans on short sales of certain securities in response to market events. Bans on short selling may make it impossible for the Fund to execute certain investment strategies and may have a material adverse effect on the Fund's ability to generate returns.

Counterparty Risk

The Fund will be subject to credit risk with respect to the counterparties to the derivative contracts (whether a clearing corporation in the case of exchange-traded instruments or another third party in the case of over-the-counter instruments) and other instruments entered into directly by the Fund or held by special purpose or structured vehicles in which the Fund invests. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a dissolution, assignment for the benefit of creditors, liquidation, winding-up, bankruptcy, or other analogous proceeding. In addition, in the event of the insolvency of a counterparty to a derivative transaction, the derivative transaction would typically be terminated at its fair market value. If the Fund is owed this fair market value in the termination of the derivative transaction and its claim is unsecured, the Fund will be treated as a general creditor of such counterparty, and will not have any claim with respect to the underlying security. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances.

Counterparty risk with respect to certain exchange-traded and over-the-counter derivatives may be further complicated by recently enacted U.S. financial reform legislation. See [Legal and Regulatory Risk](#) for more information.

Privately Held Company Risk

Privately held companies are not subject to SEC reporting requirements, are not required to maintain their accounting records in accordance with generally accepted accounting principles, and are not required to maintain effective internal controls over financial reporting. As a result, ClearBridge may not have timely or accurate information about the business, financial condition and results of operations of the privately held companies in which the Fund invests.

Debt Securities Risks

Debt securities in which the Fund invests are subject to many of the risks described elsewhere in this section. In addition, they are subject to credit risk, interest rate risk, and, depending on their quality, other special risks. An issuer of a debt security may be unable to make interest payments and repay principal. The Fund could lose money if the issuer of a debt obligation is, or is perceived to be, unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. The downgrade of a security by rating agencies may further decrease its value. Certain debt instruments, particularly below investment grade securities, may contain call or redemption provisions which would allow the issuer thereof to prepay principal prior to the debt instrument's stated maturity. This is known as prepayment risk. Prepayment risk is greater during a falling interest rate environment as issuers can reduce their cost of capital by refinancing higher yielding debt instruments with lower yielding debt instruments. An issuer may also elect to refinance its debt instruments with lower yielding debt instruments if the credit standing of the issuer improves. To the extent debt securities in its portfolio are called or redeemed, the Fund may be forced to reinvest in lower yielding securities. Debt securities have reinvestment risk, which is the risk that income from the Fund's portfolio will decline if and when the Fund invests the proceeds from matured, traded or called fixed income instruments at market interest rates that are below the portfolio's current earnings rate. A decline in income could affect the Fund's Common Stock price or its overall return.

Redenomination Risk

Continuing uncertainty as to the status of the euro and the EMU has created significant volatility in currency and financial markets generally. Any partial or complete dissolution of the EMU could have significant adverse effects on currency and financial markets, and on the values of the Fund's portfolio investments. If one or more EMU countries were to stop using the euro as its primary currency, the Fund's investments in such countries may be redenominated into a different or newly adopted currency. As a result, the value of those investments could decline significantly and unpredictably. In addition, securities or other investments that are redenominated may be subject to foreign currency risk, liquidity risk and valuation risk to a greater extent than similar investments currently denominated in euros. To the extent a currency used for redenomination purposes is not specified in

respect of certain EMU-related investments, or should the euro cease to be used entirely, the currency in which such investments are denominated may be unclear, making such investments particularly difficult to value or dispose of. The Fund may incur additional expenses to the extent it is required to seek judicial or other clarification of the denomination or value of such securities.

Management Risk and Reliance on Key Personnel

The Fund is subject to management risk because it is an actively managed investment portfolio. ClearBridge and each individual portfolio manager may not be successful in selecting the best performing securities or investment techniques, and the Fund's performance may lag behind that of similar funds. The Fund depends upon the diligence and skill of ClearBridge's portfolio managers, who evaluate, negotiate, structure and monitor its investments. These individuals do not have long-term employment contracts with ClearBridge, although they do have equity interests and other financial incentives to remain with ClearBridge. The Fund also depends on the senior management of LMPFA, and the departure of any of the senior management of LMPFA could have a material adverse effect on the Fund's ability to achieve its investment objective.

Potential Conflicts of Interest Risk

LMPFA, ClearBridge and the portfolio managers have interests which may conflict with the interests of the Fund. In particular, LMPFA also manages, and ClearBridge serves as subadviser to, other closed-end investment companies listed on the NYSE that have investment objectives and investment strategies that are substantially similar to the Fund. Further, LMPFA and ClearBridge may at some time in the future manage and/or advise other investment funds or accounts with the same investment objective and strategies as the Fund. As a result, LMPFA, ClearBridge and the Fund's portfolio managers may devote unequal time and attention to the management of the Fund and those other funds and accounts, and may not be able to formulate as complete a strategy or identify equally attractive investment opportunities as might be the case if they were to devote substantially more attention to the management of the Fund. LMPFA, ClearBridge and the Fund's portfolio managers may identify a limited investment opportunity that may be suitable for multiple funds and accounts, and the opportunity may be allocated among these several funds and accounts, which may limit the Fund's ability to take full advantage of the investment opportunity. Additionally, transaction orders may be aggregated for multiple accounts for purpose of execution, which may cause the price or brokerage costs to be less favorable to the Fund than if similar transactions were not being executed concurrently for other accounts. At times, a portfolio manager may determine that an investment opportunity may be appropriate for only some of the funds and accounts for which he or she exercises investment responsibility, or may decide that certain of the funds and accounts should take differing positions with respect to a particular security. In these cases, the portfolio manager may place separate transactions for one or more funds or accounts which may affect the market price of the security or the execution of the transaction, or both, to the detriment or benefit of one or more other funds and accounts. For example, a portfolio manager may determine that it would be in the interest of another account to sell a security that the Fund holds, potentially resulting in a decrease in the market value of the security held by the Fund.

The portfolio managers may also engage in cross trades between funds and accounts, may select brokers or dealers to execute securities transactions based in part on brokerage and research services provided to LMPFA or ClearBridge which may not benefit all funds and accounts equally and may receive different amounts of financial or other benefits for managing different funds and accounts. Finally, LMPFA or its affiliates may provide more services to some types of funds and accounts than others.

There is no guarantee that the policies and procedures adopted by LMPFA, ClearBridge and the Fund will be able to identify or mitigate the conflicts of interest that arise between the Fund and any other investment funds or accounts that LMPFA and/or ClearBridge may manage or advise from time to time. For further information on potential conflicts of interest, see "Portfolio Managers' Potential Conflicts of Interest" in the SAI.

Market Disruption and Geopolitical Risk

The aftermath of the war in Iraq, instability in Afghanistan, Pakistan and the Middle East and terrorist attacks in the United States and around the world may result in market volatility, may have long-term effects on the U.S. and worldwide financial markets and may cause further economic uncertainties in the United States and

worldwide. The Fund does not know how long the securities markets may be affected by these events and cannot predict the effects of these events or similar events in the future on the U.S. economy and securities markets. The wars and occupation, terrorism and related geopolitical risks have led, and may in the future lead, to increased short-term market volatility and may have adverse long-term effects on U.S. and world economies and markets generally. Those events also could have an acute effect on individual issuers or related groups of issuers. These risks also could adversely affect individual issuers and securities markets, interest rates, secondary trading, ratings, credit risk, inflation, deflation and other factors relating to the Fund's investments and the market value and net asset value of the Common Stock.

Portfolio Turnover

The Fund's annual portfolio turnover rate may vary greatly from year to year. A higher portfolio turnover rate results in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund. High portfolio turnover may result in the Fund's recognition of gains that will be taxable to the Fund. Such gains will generally also increase the Fund's current and accumulated earnings and profits, possibly resulting in a greater portion of the Fund's distributions being treated as a dividend to the Common Stockholders.

Government Intervention in Financial Markets Risk

The recent instability in the financial markets has led the U.S. government and foreign governments to take a number of unprecedented actions designed to support certain financial institutions and segments of the financial markets that have experienced extreme volatility, and in some cases a lack of liquidity. U.S. federal and state governments and foreign governments, their regulatory agencies or self-regulatory organizations may take additional actions that affect the regulation of the securities in which the Fund invests, or the issuers of such securities, in ways that are unforeseeable. Issuers of corporate fixed income securities might seek protection under the bankruptcy laws. Legislation or regulation may also change the way in which the Fund itself is regulated. Such legislation or regulation could limit or preclude the Fund's ability to achieve its investment objective. ClearBridge monitors developments and seeks to manage the Fund's portfolio in a manner consistent with achieving the Fund's investment objective, but there can be no assurance that it will be successful in doing so.

Temporary Defensive Strategies Risk

When ClearBridge anticipates unusual market or other conditions, the Fund may temporarily depart from its primary investment strategy as a defensive measure and invest all or a portion of its assets in cash, obligations of the U.S. government, its agencies or instrumentalities; other investment grade debt securities; investment grade commercial paper; certificates of deposit and bankers' acceptances; or any other fixed income securities that ClearBridge considers consistent with this strategy. To the extent that the Fund invests defensively, it may not achieve its investment objective.

Non-Diversification Risk

The Fund is classified as non-diversified under the 1940 Act. As a result, it can invest a greater portion of its assets in obligations of a single issuer than a diversified fund. The Fund may therefore be more susceptible than a diversified fund to being adversely affected by any single corporate, economic, political or regulatory occurrence. See *The Fund's Investments*.

Anti-Takeover Provisions

The Fund's Articles and By-Laws include provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to an open-end fund. These provisions could have the effect of depriving Common Stockholders of opportunities to sell their Common Stock at a premium over the then-current market price of the Common Stock.

MANAGEMENT OF THE FUND

Directors and Officers

The overall management of the business and affairs of the Fund is vested in the Board of Directors. The Board of Directors approves all significant agreements between the Fund and persons or companies furnishing services to the Fund. The day-to-day operation of the Fund is delegated to the officers of the Fund, LMPFA and ClearBridge, subject always to the investment objective, restrictions and policies of the Fund and to the general direction of the Board of Directors. Certain Directors and officers of the Fund are affiliated with Legg Mason, the parent corporation of LMPFA and ClearBridge. All of the Fund's executive officers hold similar offices with some or all of the other funds advised by LMPFA.

Investment Manager

Legg Mason Partners Fund Advisor, LLC, located at 620 Eighth Avenue, New York, New York 10018, serves as the Fund's investment manager. LMPFA is a registered investment adviser and will provide administrative and management services to the Fund. As of December 31, 2013, LMPFA's total assets under management were approximately \$225.4 billion. LMPFA is a wholly owned subsidiary of Legg Mason. Legg Mason is a global asset management firm. As of December 31, 2013, Legg Mason's asset management operation had aggregate assets under management of approximately \$679.5 billion.

Subadviser

ClearBridge Investments, LLC, located at 620 Eighth Avenue, New York, New York 10018, serves as the Fund's subadviser. ClearBridge, a wholly owned subsidiary of Legg Mason, is a registered investment adviser and will be responsible for the day-to-day portfolio management of the Fund, subject to the supervision and direction of the Fund's Board of Directors and LMPFA. As of December 31, 2013, ClearBridge's total assets under management were approximately \$86.2 billion.

Investors should be aware that the investments made by the Fund and the results achieved by the Fund at any given time are not expected to be the same as those made by other funds for which LMPFA and ClearBridge acts as investment adviser and subadviser, respectively, including funds with names, investment objectives and policies similar to the Fund.

Investment Management Agreement and Sub-Advisory Agreement

Investment Management Agreement

Under the Fund's investment management agreement with LMPFA, subject to the supervision and direction of the Fund's Board of Directors, LMPFA is delegated the responsibility of managing the Fund's portfolio in accordance with the Fund's stated investment objective and policies, making investment decisions for the Fund and placing orders to purchase and sell securities. LMPFA supervises the day-to-day management of the Fund's portfolio by ClearBridge and provides administrative and management services necessary for the operation of the Fund, such as (1) supervising the overall administration of the Fund, including negotiation of contracts and fees with and the monitoring of performance and billings of the Fund's transfer agent, stockholder servicing agents, custodian and other independent contractors or agents; (2) providing certain compliance, Fund accounting, regulatory reporting and tax reporting services; (3) preparing or participating in the preparation of Board materials, registration statements, proxy statements and reports and other communications to stockholders; (4) maintaining the Fund's existence; and (5) maintaining the registration and qualification of the Fund's shares under federal and (if required) state laws.

LMPFA also provides the office space, facilities, equipment and personnel necessary to perform the following services for the Fund: SEC compliance, including record keeping, reporting requirements and registration statements and proxies; supervision of Fund operations, including coordination of functions of the transfer agent, custodian, accountants, counsel and other parties performing services or operational functions for the Fund; and certain administrative and clerical services, including certain accounting services and maintenance of certain books and records.

The Fund's investment management agreement was continued for a one-year term at an in-person meeting held on November 13 and 14, 2013 by the board of directors of the Fund, including a majority of its members who are not considered to be interested persons under the 1940 Act. The Fund's investment management agreement provides that LMPFA may render services to others. The Fund's investment management agreement is terminable without penalty on not more than 60 days nor less than 30 days written notice by the Fund when authorized either by a vote of holders of shares representing a majority of the outstanding voting securities of the Fund (as defined in the 1940 Act) or by a vote of a majority of the Fund's Directors, or by LMPFA on not less than 90 days written notice, and will automatically terminate in the event of its assignment. The Fund's investment management agreement provides that neither LMPFA nor its personnel or affiliates shall be liable for any error of judgment or mistake of law or for any loss arising out of any investment or for any act or omission in the execution of security transactions for the Fund, except for willful misfeasance, bad faith or gross negligence or reckless disregard of its or their obligations and duties.

Other than the cash management services it provides for certain equity funds, LMPFA does not provide day-to-day portfolio management services. Rather, portfolio management for the Fund is provided by ClearBridge.

ClearBridge Sub-Advisory Agreement

ClearBridge provides services to the Fund pursuant to a sub-advisory agreement between LMPFA and ClearBridge. Under the sub-advisory agreement, subject to the supervision and direction of the Fund's Board and LMPFA, ClearBridge will manage the Fund's portfolio in accordance with the Fund's investment objective and policies, make investment decisions for the Fund, place orders to purchase and sell securities, and employ professional portfolio managers and securities analysts who provide research services to the Fund.

The sub-advisory agreement was continued for a one-year term at an in-person meeting held on November 13 and 14, 2013 by the board of directors of the Fund, including a majority of its members who are not considered to be interested persons under the 1940 Act. The Board or a majority of the outstanding voting securities of the Fund (as defined in the 1940 Act) may terminate the Fund's sub-advisory agreement without penalty, in each case on not more than 60 days nor less than 30 days written notice to ClearBridge. ClearBridge may terminate the sub-advisory agreement on 90 days written notice to the Fund and LMPFA. LMPFA and ClearBridge may terminate the sub-advisory agreement upon their mutual written consent. The sub-advisory agreement will terminate automatically in the event of its assignment.

Advisory Fees

For its services, the Fund pays LMPFA an annual fee, payable monthly, in an amount equal to 1.00% of the Fund's average daily Managed Assets. The Fund's management fee and other expenses are borne by the Common Stockholders.

ClearBridge receives an annual subadvisory fee from LMPFA, payable monthly, in an amount equal to 70% of the management fee paid to LMPFA. No advisory fee is paid by the Fund directly to ClearBridge.

The basis for the Board of Directors' approval of the continuance of the Fund's investment management and sub-advisory agreements was provided in the Fund's stockholder report. The basis for subsequent continuations of the Fund's investment management and sub-advisory agreements will be provided in annual or semi-annual reports to stockholders for the periods during which such continuations occur.

Subadviser Philosophy

The Fund's portfolio managers believe that MLPs offer an attractive opportunity for total return given their typically high cash distributions and the potential for distribution growth and capital appreciation. Over the long term, ClearBridge believes an MLP's total return is generally driven by a combination of both its current distribution yield and its distribution growth rate. ClearBridge believes the market often inefficiently values MLPs by overemphasizing the importance of current yield and undervaluing the impact of distribution growth.

This inefficiency creates an opportunity to build a portfolio that offers high relative total return. ClearBridge believes that current yields on MLP units remain attractive on both an absolute and relative basis. ClearBridge

further believes that MLP distribution rates are poised to continue to grow over the next few years as new infrastructure projects come on line due to increasing U.S. production of oil, natural gas and natural gas liquids.

As tax-efficient partnerships, the types of MLPs in which the Fund intends to invest historically have made high levels of tax-deferred cash distributions to their limited partners and members, although there can be no assurance that they will continue to do so. In choosing MLP investments, the portfolio managers focus on MLPs that offer above-average distribution growth, as these MLPs have historically outperformed MLPs with slower distribution growth. They emphasize energy MLPs with stable, predictable cash flows and limited direct commodity exposure.

Subadviser Investment Process

ClearBridge employs a rigorous, bottom-up research process focused on seeking to find MLPs with attractive, sustainable and predictable distributions. In conducting this analysis, particular attention is paid to the rate at which the MLP has both historically grown and is expected to grow distributions in the future. ClearBridge also looks for MLPs with stable business models, quality balance sheets, a talented and experienced general partner/managing member with a solid track record of management, and valuation of the security. ClearBridge's primary valuation metric in analyzing MLPs is distributable cash flow yield. ClearBridge evaluates MLPs based on their geographic footprints, the markets and types of assets they invest in, their balance sheet strength and their ability to make accretive acquisitions.

ClearBridge places strong emphasis on risk management around its investment process. Risk management considerations are contemplated at both the level of the individual investment and the portfolio as a whole. At the level of the individual investment, the prime risk consideration revolves around the sustainability of the cash distribution and position size. In evaluating the distribution sustainability, the portfolio managers utilize balance sheet analysis and financial modeling. At the portfolio level, ClearBridge pays close attention to individual security weightings, sector weightings and allocations, and the amount of leverage employed, as well as macroeconomic and broader market considerations.

ClearBridge will evaluate the Fund's current individual investments on an on-going basis to ensure they meet the Fund's investment objective, strategies and risk management profile. When an individual security, in ClearBridge's assessment, no longer offers attractive distribution growth, stable and predictable cash flows, limited direct commodity exposure, or a strong management team, the Fund may sell the security. In addition, the Fund may also sell securities in instances where more attractive investments, based on ClearBridge's assessment of risk-adjusted total return, become available to the Fund.

Investment Management Team

Set forth below is information regarding the team of professionals at ClearBridge primarily responsible for overseeing the day-to-day operations of the Fund.

Name, Address and Title

Richard A. Freeman

Principal Occupation(s) During Past 5 Years

Co-portfolio manager of the Fund; Mr. Freeman is a Senior Portfolio Manager and Managing Director of ClearBridge and has 35 years of industry experience. Mr. Freeman joined the subadviser or its predecessor in 1983.

Michael Clarfeld, CFA

Co-portfolio manager of the Fund; Managing Director and Portfolio Manager of ClearBridge; he has been with ClearBridge since 2006. Prior to joining ClearBridge, Mr. Clarfeld was an equity analyst with Hygrove Partners, LLC and a financial analyst with Goldman Sachs.

Name, Address and Title

Chris Eades

Principal Occupation(s) During Past 5 Years

Co-portfolio manager of the Fund; Managing Director, Co-Director of Research, Senior Research Analyst for Energy joined ClearBridge in 2006 as a senior research analyst for energy and was named co-director of research in 2009. Prior to joining ClearBridge, Mr. Eades served as an energy analyst and portfolio manager at Saranac Capital from 2002 to 2006.

Peter Vanderlee, CFA

Co-portfolio manager of the Fund; Managing Director and Portfolio Manager with ClearBridge Advisors. Mr. Vanderlee has thirteen years of investment management experience and thirteen years of related investment experience.

Additional information about the portfolio managers' compensation, other accounts managed by them and other information is provided in the SAI.

Control Persons

A control person is a person who beneficially owns more than 25% of the voting securities of a company. The Fund currently has no control person.

NET ASSET VALUE

The Fund determines the net asset value of its Common Stock on each day the NYSE is open for business, as of the close of the customary trading session (normally 4:00 p.m. Eastern Time), or any earlier closing time that day. The Fund determines the net asset value per share of Common Stock by dividing the value of the Fund's securities, cash and other assets (including interest accrued but not collected) less all its liabilities (including accrued expenses, borrowings and interest payables) by the total number of shares of Common Stock outstanding.

The Fund's securities are valued in accordance with procedures approved by the Board. Under the procedures, equity securities and certain derivative instruments that are traded on an exchange are valued at the closing price or, if that price is unavailable or deemed not representative of market value, the last sale price. Where a security is traded on more than one exchange (as is often the case overseas), the security is generally valued at the price on the exchange considered to be the primary exchange. In the case of securities not traded on an exchange, or if exchange prices are not otherwise available, the prices are typically determined by independent third party pricing services that use a variety of techniques and methodologies.

The valuations for fixed income securities and certain derivative instruments are typically the prices supplied by independent third party pricing services, which may use market prices or broker/dealer quotations or a variety of fair valuation techniques and methodologies. Short-term fixed income securities that will mature in 60 days or less are valued at amortized cost, unless it is determined that using this method would not reflect an investment's fair value.

The valuations of securities traded on foreign markets and certain fixed income securities are generally based on prices determined as of the earlier closing time of the markets on which they primarily trade, unless a significant event has occurred. When the Fund holds securities or other assets that are denominated in a foreign currency, the Fund normally uses the currency exchange rates as of 4:00 p.m. (Eastern time) The Fund uses a fair value model developed by an independent third party pricing service to value foreign equity securities on days when a certain percentage change in the value of a domestic equity security index suggests that the closing prices on foreign exchanges may no longer represent the value of those securities at the time of closing of the NYSE. Foreign markets are open for trading on weekends and other days when the Fund does not price its shares and Common Stockholders cannot trade their Common Stock.

If independent third party pricing services are unable to supply prices for a portfolio investment, or if the prices supplied are deemed to be unreliable, the market price may be determined by using quotations from one or more broker/dealers. When such prices or quotations are not available, or when believed to be unreliable, securities may be priced using fair value procedures approved by the Board of Directors. These procedures permit, among other things, the use of a matrix, formula or other method that takes into consideration market indexes, yield curves and other specific adjustments to determine fair value. The Fund may also use fair value procedures if it is determined that a significant event has occurred between the time at which a market price is determined and the time at which the fund's net asset value is calculated. The effect of using fair value pricing is that the Common Stock's net asset value is subject to the judgment of the Board of Directors or its designee instead of being determined by the market.

As a limited partner in the MLPs, the Fund includes its allocable share of the MLP's taxable income in computing its own taxable income. Deferred income taxes in the financial statements of the Fund will reflect (i) taxes on unrealized gains/losses, which are attributable to the temporary difference between the fair market value and the tax basis of the Fund's assets, (ii) the net tax effects of temporary differences between the carrying amounts of such assets and liabilities for financial reporting purposes and the amounts used for income tax purposes and (iii) the net tax benefit of accumulated net operating losses. To the extent the Fund has a deferred tax asset, consideration is given as to whether or not a valuation allowance is required. The need to establish a valuation allowance for deferred tax assets is assessed periodically by the Fund based on the criterion established by ASC Topic 740 that it is more likely than not that some portion or all of the deferred tax asset will not be realized. In the assessment for a valuation allowance, consideration is given to all positive and negative evidence related to the realization of the deferred tax asset. This assessment considers, among other matters, the nature, frequency and severity of current and cumulative losses, forecasts of future profitability (which are highly dependent on future MLP cash distributions), the duration of statutory carryforward periods and the associated risk that operating loss carryforwards may expire unused.

The Fund may rely to some extent on information provided by the MLPs, which may not necessarily be timely, to estimate taxable income allocable to the MLP units held in the portfolio and to estimate the associated deferred tax asset or liability. Such estimates are made in good faith. From time to time, as new information becomes available, the Fund modifies its estimates or assumptions regarding the deferred tax asset or liability.

Deferred tax assets may constitute a relatively high percentage of the Fund's net asset value. Any valuation allowance required against such deferred tax assets or future adjustments to a valuation allowance may reduce the Fund's deferred tax assets and could have a material impact on the Fund's net asset value and results of operations in the period the valuation allowance is recorded or adjusted.

DISTRIBUTIONS

We have paid distributions to Common Stockholders every fiscal quarter since inception. The following table sets forth information about distributions we paid to our Common Stockholders, percentage participation by Common Stockholders in our dividend reinvestment program and reinvestments and related issuances of additional shares of Common Stock as a result of such participation (the information in the table is unaudited):

Distribution Payment Date to Common Stockholders	Amount of Distribution Per Share	Percentage of Common Stockholders Electing to Participate in Dividend Reinvestment Program	Amount of Corresponding Reinvestment through Dividend Reinvestment Program	Additional Shares of Common Stock Issued through Dividend Reinvestment Program
August 24, 2012	\$ 0.3250	3%	\$ 364,545	18,987
November 30, 2012	\$ 0.3250	5%	\$ 633,860	33,391
February 22, 2013	\$ 0.3300	7%	\$ 879,520	42,433
May 31, 2013	\$ 0.3300	7%	\$ 872,568	37,766
August 30, 2013	\$ 0.3300	8%	\$ 945,767	43,134
November 29, 2013	\$ 0.3300	7%	\$ 943,667	0

Under normal market conditions, the Fund intends to continue to distribute substantially all of the Fund's distributable cash flow received as cash distributions from MLPs, interest payments received on debt securities owned by the Fund and other payments on securities owned by the Fund, less Fund expenses. The Fund intends to continue to make distributions quarterly.

Unless a Common Stockholder elects to receive distributions in cash (i.e., opt out), all of such Common Stockholder's distributions, including any capital gains distributions on Common Stock, will be automatically reinvested in additional shares of Common Stock under the Fund's Dividend Reinvestment Plan. See Dividend Reinvestment Plan.

DIVIDEND REINVESTMENT PLAN

Unless a Common Stockholder elects to receive distributions in cash (i.e., opt-out), all distributions, including any capital gain distributions, on our Common Stock will be automatically reinvested by American Stock Transfer & Trust Company LLC, as agent for the stockholders (the Plan Agent), in additional shares of Common Stock under the Fund's Dividend Reinvestment Plan (the Plan). A Common Stockholder may elect not to participate in the Plan by contacting the Plan Agent. If a Common Stockholder does not participate, such Common Stockholder will receive all cash distributions paid by check mailed directly to such Common Stockholder by American Stock Transfer & Trust Company LLC, as dividend paying agent.

If a Common Stockholder participates in the Plan, the number of shares of Common Stock that Common Stockholder will receive will be determined as follows:

(1) If the market price of the Common Stock on the record date (or, if the record date is not a NYSE trading day, the immediately preceding trading day) for determining stockholders eligible to receive the relevant dividend or distribution (the determination date) is equal to or exceeds 98% of the net asset value per share of the Common Stock, the Fund will issue new Common Stock at a price equal to the greater of (a) 98% of the net asset value per share at the close of trading on the NYSE on the determination date or (b) 95% of the market price per share of the Common Stock on the determination date.

(2) If 98% of the net asset value per share of the Common Stock exceeds the market price of the Common Stock on the determination date, the Plan Agent will receive the dividend or distribution in cash and will buy Common Stock in the open market, on the NYSE or elsewhere, for such Common Stockholder's account as soon as practicable commencing on the trading day following the determination date and terminating no later than the earlier of (a) 30 days after the dividend or distribution payment date, or (b) the record date for the next succeeding dividend or distribution to be made to the stockholders; except when necessary to comply with applicable provisions of the federal securities laws. If during this period: (i) the market price rises so that it equals or exceeds 98% of the net asset value per share of the Common

Stock at the close of trading on the NYSE on the determination date before the Plan Agent has completed the open market purchases or (ii) if the Plan Agent is unable to invest the full amount eligible to be reinvested in open market purchases, the Plan Agent will cease purchasing Common Stock in the open market and the Fund shall issue the remaining Common Stock at a price per share equal to the greater of (a) 98% of the net asset value per share at the close of trading on the NYSE on the determination date or (b) 95% of the then current market price per share.

Common Stock in a Common Stockholder's account will be held by the Plan Agent in non-certificated form. Any proxy a Common Stockholder receives will include all shares of Common Stock such Common Stockholder has received under the Plan.

A Common Stockholder may withdraw from the Plan (i.e., opt-out) by notifying the Plan Agent in writing at P.O. Box 922, Wall Street Station, New York, NY 10269-0560 or by calling the Plan Agent at 877-366-6441. Such withdrawal will be effective immediately if notice is received by the Plan Agent not less than ten business days prior to any dividend or distribution record date; otherwise such withdrawal will be effective as soon as practicable after the Plan Agent's investment of the most recently declared dividend or distribution on the Common Stock. The Plan may be terminated, amended or supplemented by the Fund upon notice in writing mailed to stockholders at least 30 days prior to the record date for the payment of any dividend or distribution by the Fund for which the termination or amendment is to be effective.

Upon any termination, a Common Stockholder will be sent cash for any fractional share of Common Stock in such Common Stockholder's account. A Common Stockholder may elect to notify the Plan Agent in advance of such termination to have the Plan Agent sell part or all of such Common Stockholder's Common Stock on such Common Stockholder's behalf. A Common Stockholder will be charged a service charge and the Plan Agent is authorized to deduct brokerage charges actually incurred for this transaction from the proceeds.

There is no service charge for reinvestment of a Common Stockholder's dividends or distributions in Common Stock. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases. Because all dividends and distributions will be automatically reinvested in additional shares of Common Stock, this allows a Common Stockholder to add to such Common Stockholder's investment through dollar cost averaging, which may lower the average cost of such Common Stockholder's Common Stock over time. Dollar cost averaging is a technique for lowering the average cost per share over time if the Fund's net asset value declines. While dollar cost averaging has definite advantages, it cannot assure profit or protect against loss in declining markets.

Automatically reinvesting dividends and distributions does not mean that a Common Stockholder does not have to pay income taxes due upon receiving dividends and distributions. Investors will be subject to income tax on amounts reinvested under the Plan. See "Certain United States Federal Income Tax Considerations" in this Prospectus and the SAI.

The Fund reserves the right to amend or terminate the Plan if, in the judgment of the Board of Directors, the change is warranted. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan and a Common Stockholder's account may be obtained from the Plan Agent at 6201 15th Avenue, Brooklyn, New York 11219 or by calling the Plan Agent at 877-366-6441.

DESCRIPTION OF SHARES

Common Stock

As of February 14, 2014, we had approximately 38.3 million shares of Common Stock outstanding. All Common Stock offered pursuant to this Prospectus and any related Prospectus Supplement will be, upon issuance, duly authorized, fully paid and nonassessable, and will have no pre-emptive or conversion rights or rights to cumulative voting. All Common Stock offered pursuant to this Prospectus and any related Prospectus Supplement will be of the same class and will have identical rights, as described below.

The Articles authorize the issuance of 100,000,000 shares of Common Stock, par value \$0.001 per share. All shares of Common Stock have equal rights to the payment of dividends and the distribution of assets upon liquidation. The Board of Directors, without stockholder vote, can increase or decrease the aggregate number of shares of Common Stock or the number of shares of stock of any class or series that the Fund has authority to issue and can reclassify any authorized but unissued shares.

The Fund's Common Stock is listed on the NYSE under the trading or ticker symbol is CTR. The Fund intends to hold annual meetings of stockholders so long as the Common Stock is listed on a national securities exchange and such meetings are required as a condition to such listing. The Fund must continue to meet the NYSE requirements in order for the Common Stock to remain listed.

Unlike open-end funds, closed-end funds, like the Fund, do not continuously offer shares and do not provide daily redemptions. Rather, if a stockholder determines to buy additional shares of Common Stock or sell shares of Common Stock already held, the stockholder may do so by trading on the NYSE through a broker or otherwise. Shares of closed-end funds may frequently trade on an exchange at prices lower than net asset value.

The market value of the Common Stock may be influenced by such factors as dividend levels (which are in turn affected by expenses), call protection, dividend stability, portfolio credit quality, net asset value, relative demand for and supply of such Common Stock in the market, general market and economic conditions, and other factors beyond the control of the Fund. The Fund cannot assure you that Common Stock will trade at a price equal to or higher than net asset value in the future. The Fund's Common Stock is designed primarily for long-term investors, and investors in Common Stock should not view the Fund as a vehicle for trading purposes. See Repurchase of Fund Shares.

Each outstanding share of Common Stock entitles the holder to one vote on all matters submitted to a vote of Common Stockholders, including the election of Directors. Except as provided with respect to any other class or series, the Common Stockholders will possess the exclusive voting power. There is no cumulative voting in the election of Directors, which means that the holders of a majority of the outstanding shares of Common Stock can elect all of the Directors then standing for election, and the holders of the remaining shares of Common Stock will not be able to elect any Directors.

Preferred Stock

The Articles provide that the Fund's Board of Directors may classify and issue Preferred Stock with rights as determined by the Board of Directors, by action of the Board of Directors without the approval of the Common Stockholders. Common Stockholders have no preemptive right to purchase any Preferred Stock that might be issued.

The Fund may elect to issue Preferred Stock as part of its leveraging strategy. The Fund currently has the ability to issue leverage through the issuance of Preferred Stock, representing up to 50% of the Fund's total assets less liabilities and indebtedness of the Fund (other than leverage consisting of Preferred Stock and other senior securities) immediately after the leverage is issued. However, under current market conditions the Fund does not expect to issue Preferred Stock. Although the terms of any Preferred Stock, including dividend rate, liquidation preference and redemption provisions, will be set forth in a separate prospectus and the certificate of designation, the Fund believes that it is likely that the liquidation preference, voting rights and redemption provisions of the Preferred Stock may be similar to those stated below.

Liquidation Preference

In the event of any voluntary or involuntary liquidation, dissolution or winding up of the Fund, the holders of Preferred Stock will be entitled to receive a preferential liquidating distribution, which is expected to equal the original purchase price per Preferred Stock plus accrued and unpaid dividends, whether or not declared, before any distribution of assets is made to Common Stockholders. After payment of the full amount of the liquidating distribution to which they are entitled, the holders of Preferred Stock will not be entitled to any further participation in any distribution of assets by the Fund.

Voting Rights

The 1940 Act requires that the holders of any Preferred Stock, voting separately as a single class, have the right to elect at least two Directors at all times. The remaining Directors will be elected by holders of Common Stock and Preferred Stock, voting together as a single class. In addition, subject to the prior rights, if any, of the holders of any other class of senior securities outstanding, the holders of any Preferred Stock have the right to elect a majority of the directors of the Fund at any time that two years of dividends on any Preferred Stock are unpaid. The 1940 Act also requires that, in addition to any approval by the stockholders that might otherwise be required, the approval of the holders of a majority of any outstanding Preferred Stock, voting separately as a class, would be required to: (i) adopt any plan of reorganization that would adversely affect the Preferred Stock and (ii) take any action requiring a vote of security holders under Section 13(a) of the 1940 Act, including, among other things, changes in the Fund's subclassification as a closed-end investment company or changes in its fundamental investment restrictions. See Certain Provisions in the Articles of Incorporation and By-Laws. As a result of these voting rights, the Fund's ability to take any such actions may be impeded to the extent that there are any shares of Preferred Stock outstanding. The Board of Directors presently intends that, except as otherwise indicated in this Prospectus and except as otherwise required by applicable law or the Articles, holders of Preferred Stock will have equal voting rights with Common Stockholders (one vote per share, unless otherwise required by the 1940 Act) and will vote together with Common Stockholders as a single class.

The affirmative vote of the holders of a majority of the outstanding Preferred Stock, voting as a separate class, will be required to amend, alter or repeal any of the preferences, rights or powers of holders of Preferred Stock so as to affect materially and adversely such preferences, rights or powers, or to increase or decrease the authorized number of Preferred Stock. The class vote of holders of Preferred Stock described above will in each case be in addition to any other vote required to authorize the action in question.

Redemption, Purchase and Sale of Preferred Stock by the Fund

The terms of any Preferred Stock issued are expected to provide that: (i) shares are redeemable by the Fund in whole or in part at the original purchase price per share plus accrued dividends per share; (ii) the Fund may tender for or purchase Preferred Stock; and (iii) the Fund may subsequently resell any shares so tendered for or purchased. Any redemption or purchase of Preferred Stock by the Fund will reduce any leverage applicable to the Common Stock, while any resale of shares by the Fund will increase that leverage.

The discussion above describes the possible offering of Preferred Stock by the Fund. If the Board of Directors determines to proceed with such an offering, the terms of the Preferred Stock may be the same as, or different from, the terms described above, subject to applicable law and the Fund's Articles. The Board of Directors, without the approval of the Common Stockholders, may authorize an offering of Preferred Stock or may determine not to authorize such an offering, and may fix the terms of the Preferred Stock to be offered.

CERTAIN PROVISIONS IN THE ARTICLES OF INCORPORATION AND BY-LAWS

The Fund has provisions in its Articles and By-Laws that could have the effect of limiting the ability of other entities or persons to acquire control of the Fund, to cause it to engage in certain transactions or to modify its structure. These provisions could have the effect of depriving stockholders of opportunities to sell their Common Stock at a premium over the then-current market price of the Common Stock. At the Fund's first annual meeting of stockholders, the Board of Directors was divided into three classes, having initial terms of one, two and three years, respectively. At the annual meeting of stockholders in each year thereafter, the term of one class will expire and Directors will be elected to serve in that class for terms of three years. This provision could delay for up to two years the replacement of a majority of the Board of Directors. A Director may be removed from office only for cause and then only by a vote of the holders of at least 75% of the votes entitled to be cast for the election of Directors.

The Fund's By-Laws provide that with respect to any annual or special meeting of the stockholders, only such business shall be conducted as shall have been properly brought before the meeting. To be properly brought before an annual meeting, the business must be specified in the notice of meeting given by or at the direction of

the Board of Directors or otherwise properly brought by or at the direction of the Board of Directors or properly brought by a stockholder who is entitled to vote at the meeting and who complied with the advance notice procedures of the By-Laws, and must be a proper subject under applicable law for stockholder action. To be properly brought before a special meeting, the business must be specified in the notice of meeting given by or at the direction of the Board of Directors or otherwise properly brought by or at the direction of the Board of Directors, and must be a proper subject under applicable law for stockholder action.

The affirmative vote of at least 75% of the entire Board of Directors is required to authorize the conversion of the Fund from a closed-end to an open-end investment company. Such conversion also requires the affirmative vote of the holders of at least 75% of the votes entitled to be cast thereon by the stockholders of the Fund unless it is approved by a vote of at least 75% of the Continuing Directors (as defined below), in which event such conversion requires the approval of the holders of a majority of the votes entitled to be cast thereon by the stockholders of the Fund. A Continuing Director is any member of the Board of Directors of the Fund who (i) is not a person or affiliate of a person, other than an investment company advised by LMPFA or any of its affiliates, who enters or proposes to enter into a Business Combination (as defined below) with the Fund (an Interested Party) and (ii) who has been a member of the Board of Directors of the Fund for a period of at least 12 months, or has been a member of the Board of Directors since May 1, 2012, or is a successor of a Continuing Director who is unaffiliated with an Interested Party and is recommended to succeed a Continuing Director by a majority of the Continuing Directors then on the Board of Directors of the Fund. To amend the Articles to change any of the provisions of the first paragraph under this heading, or this paragraph, the Articles require either (i) the affirmative vote of at least 75% of the entire Board of Directors and at least 75% of the votes entitled to be cast by stockholders or (ii) the affirmative vote of 75% of the Continuing Directors and the approval of the holders of a majority of the votes entitled to be cast thereon by stockholders.

The affirmative votes of at least 75% of the entire Board of Directors and the holders of at least (i) 80% of the votes entitled to be cast thereon by the stockholders of the Fund and (ii) in the case of a Business Combination (as defined below), 66²/₃% of the votes entitled to be cast thereon by the stockholders of the Fund other than votes held by an Interested Party who is (or whose affiliate is) a party to a Business Combination (as defined below) or an affiliate or associate of the Interested Party, are required to authorize any of the following transactions:

- (i) a merger, consolidation or statutory share exchange of the Fund with or into any other person;
- (ii) issuance or transfer by the Fund (in one or a series of transactions in any 12-month period) of any securities of the Fund to any person or entity for cash, securities or other property (or combination thereof) having an aggregate fair market value of \$1,000,000 or more, excluding issuances or transfers of debt securities of the Fund, sales of securities of the Fund in connection with a public offering, issuances of securities of the Fund pursuant to a dividend reinvestment plan adopted by the Fund, issuances of securities of the Fund upon the exercise of any stock subscription rights distributed by the Fund and portfolio transactions effected by the Fund in the ordinary course of business;
- (iii) sale, lease, exchange, mortgage, pledge, transfer or other disposition by the Fund (in one or a series of transactions in any 12-month period) to or with any person or entity of any assets of the Fund having an aggregate fair market value of \$1,000,000 or more except for portfolio transactions (including pledges of portfolio securities in connection with borrowings) effected by the Fund in the ordinary course of its business (transactions within clauses (i), (ii) and (iii) above being known individually as a Business Combination);
- (iv) the voluntary liquidation or dissolution of the Fund or an amendment to the Articles to terminate the Fund's existence; or
- (v) unless the 1940 Act or federal law requires a lesser vote, any stockholder proposal as to specific investment decisions made or to be made with respect to the Fund's assets as to which stockholder approval is required under federal or Maryland law.

However, the stockholder vote described above will not be required with respect to the foregoing transactions (other than those set forth in (v) above) if they are approved by a vote of at least 75% of the Continuing Directors. In that case, if Maryland law requires stockholder approval, the affirmative vote of a majority of votes entitled to be cast thereon shall be required.

The Articles and By-Laws contain provisions the effect of which is to prevent matters, including nominations of Directors, from being considered at a stockholders' meeting where the Fund has not received notice of the matters generally at least 60 but no more than 90 days prior to the first anniversary of the preceding year's annual meeting.

The Fund has provisions in its Articles and By-Laws that authorize the Fund, to the maximum extent permitted by Maryland law, to indemnify any present or former Director or officer from and against any claim or liability to which that person may become subject or which that person may incur by reason of his or her status as a present or former Director or officer of the Fund and to pay or reimburse their reasonable expenses in advance of final disposition of a proceeding. Pursuant to the By-Laws, absent a court determination that an officer or Director seeking indemnification was not liable on the merits or guilty of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his office, the decision by the Fund to indemnify such person will be based upon the reasonable determination of independent counsel or nonparty Independent Directors, after review of the facts, that such officer or Director is not guilty of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his office.

Reference is made to the Articles and By-Laws of the Fund, on file with the SEC, for the full text of these provisions. These provisions could have the effect of depriving stockholders of an opportunity to sell their Common Stock at a premium over prevailing market prices by discouraging a third party from seeking to obtain control of the Fund in a tender offer or similar transaction. These provisions, however, offer several possible advantages. They may require persons seeking control of the Fund to negotiate with its management regarding the price to be paid for the Common Stock required to obtain such control, they promote continuity and stability and they enhance the Fund's ability to pursue long-term strategies that are consistent with its investment objective.

Maryland Business Combination Act

The Maryland Business Combination Act will not be applicable to the Fund as a closed-end investment company unless and until its Board of Directors adopts a resolution to be subject to the statute, provided that the resolution will not be effective with respect to a business combination with any person who has become an interested stockholder before the time that the resolution is adopted. Under the Maryland Business Combination Act, business combinations between a Maryland corporation and an interested stockholder or an affiliate of an interested stockholder are prohibited for five years after the most recent date on which the interested stockholder becomes an interested stockholder. These business combinations include a merger, consolidation, share exchange, or, in circumstances specified in the statute, an asset transfer or issuance or reclassification of equity securities. An interested stockholder is defined as:

any person who beneficially owns ten percent or more of the voting power of the corporation's shares; or

an affiliate or associate of the corporation who, at any time within the two-year period prior to the date in question, was the beneficial owner of ten percent or more of the voting power of the then outstanding voting stock of the corporation.

A person is not an interested stockholder under the statute if the board of directors approved in advance the transaction by which he otherwise would have become an interested stockholder.

After the five-year prohibition, any business combination between the Maryland corporation and an interested stockholder generally must be recommended by the board of directors of the corporation and approved by the affirmative vote of at least:

80% of the votes entitled to be cast by holders of outstanding shares of voting stock of the corporation; and

66 $\frac{2}{3}$ % of the votes entitled to be cast by holders of voting stock of the corporation other than shares held by the interested stockholder with whom or with whose affiliate the business combination is to be effected or held by an affiliate or associate of the interested stockholder.

These super-majority vote requirements do not apply if the corporation's Common Stockholders receive a minimum price, as defined under Maryland law, for their shares in the form of cash or other consideration in the same form as previously paid by the interested stockholder for its shares. The statute permits various exemptions from its provisions, including business combinations that are exempted by the board of directors prior to the time that the interested stockholder becomes an interested stockholder.

The Maryland Business Combination Act may discourage others from trying to acquire control of the Fund and increase the difficulty of consummating any offer.

Maryland Control Share Acquisition Act

The Maryland Control Share Acquisition Act will not be applicable to the Fund as a closed-end investment company unless and until its Board of Directors adopts a resolution to be subject to the statute, provided that the resolution will not be effective with respect to any person who has become a holder of control shares before the time that the resolution is adopted. The Maryland Control Share Acquisition Act provides that control shares of a Maryland corporation acquired in a control share acquisition have no voting rights except to the extent approved by a vote of two-thirds of the votes entitled to be cast on the matter. Shares owned by the acquiror, by officers or by directors who are employees of the corporation are excluded from shares entitled to vote on the matter. Control shares are voting shares of stock which, if aggregated with all other shares of stock owned by the acquiror or in respect of which the acquiror is able to exercise or direct the exercise of voting power (except solely by virtue of a revocable proxy), would entitle the acquiror to exercise voting power in electing directors within one of the following ranges of voting power:

one-tenth or more but less than one-third,

one-third or more but less than a majority, or

a majority or more of all voting power.

Control shares do not include shares the acquiring person is then entitled to vote as a result of having previously obtained stockholder approval. A control share acquisition means the acquisition of control shares, subject to certain exceptions.

A person who has made or proposes to make a control share acquisition may compel the board of directors of the corporation to call a special meeting of stockholders to be held within 50 days of demand to consider the voting rights of the shares. The right to compel the calling of a special meeting is subject to the satisfaction of certain conditions, including an undertaking to pay the expenses of the meeting. If no request for a meeting is made, the corporation may itself present the question at any stockholders meeting.

If voting rights are not approved at the meeting or if the acquiring person does not deliver an acquiring person statement as required by the statute, then the corporation may redeem for fair value any or all of the control shares, except those for which voting rights have previously been approved. The right of the corporation to redeem control shares is subject to certain conditions and limitations. Fair value is determined, without regard to the absence of voting rights for the control shares, as of the date of the last control share acquisition by the acquiror or of any meeting of stockholders at which the voting rights of the shares are considered and not approved. If voting rights for control shares are approved at a stockholders meeting and the acquiror becomes entitled to vote a majority of the shares entitled to vote, all other stockholders may exercise appraisal rights. The fair value of the shares as determined for purposes of appraisal rights may not be less than the highest price per share paid by the acquiror in the control share acquisition.

The Maryland Control Share Acquisition Act does not apply (a) to shares acquired in a merger, consolidation or share exchange if the corporation is a party to the transaction, or (b) to acquisitions approved or exempted by the charter or by-laws of the corporation.

The Maryland Control Share Acquisition Act may discourage others from trying to acquire control of the Fund and increase the difficulty of consummating any offer.

REPURCHASE OF FUND SHARES

The Fund is a closed-end investment company, and as such its stockholders do not have the right to cause the Fund to redeem their Common Stock. Instead, liquidity will be provided through trading in the open market. Notice is hereby given in accordance with Section 23(c) of the 1940 Act that the Fund may purchase at market prices from time to time shares of its Common Stock in the open market but is under no obligation to do so.

CERTAIN UNITED STATES FEDERAL INCOME TAX CONSIDERATIONS

The discussion below and disclosure in the SAI provide a summary of certain United States federal income tax considerations relating to the Fund and the purchase, ownership and disposition of our Common Stock as of the date hereof. Except where noted, this summary deals only with Common Stock offered pursuant to this Prospectus and held as a capital asset. This summary does not represent a detailed description of the United States federal income tax consequences applicable to a holder of our Common Stock if such holder is subject to special treatment under the United States federal income tax laws, including if the holder is:

a dealer in securities or currencies;

a financial institution;

a regulated investment company;

a real estate investment trust;

an insurance company;

a tax-exempt organization;

a person holding our Common Stock as part of a hedging, integrated or conversion transaction, a constructive sale or a straddle;

a trader in securities that has elected the mark-to-market method of accounting for its securities;

a person liable for alternative minimum tax;

a partnership or other pass-through entity for United States federal income tax purposes;

a controlled foreign corporation;

a passive foreign investment company;

a U.S. expatriate; or

a U.S. Holder (as defined below) whose functional currency is not the United States dollar.

As used herein, the term U.S. Holder means a beneficial owner of our Common Stock that is for United States federal income tax purposes:

an individual citizen or resident of the United States;

a corporation (or other entity treated as a corporation for United States federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;

an estate the income of which is subject to United States federal income taxation regardless of its source; or

a trust if it (1) is subject to the primary supervision of a court within the United States and one or more United States persons have the authority to control all substantial decisions of the trust or (2) has a valid election in effect under applicable United States Treasury regulations to be treated as a United States person.

As used herein, the term **non-U.S. Holder** means a beneficial owner of our Common Stock that is neither a U.S. Holder nor a partnership (or other entity treated as a partnership for United States federal income tax purposes).

The discussion below is based upon the provisions of the Code, and regulations, rulings and judicial decisions thereunder as of the date hereof, and such authorities may be replaced, revoked or modified, possibly with retroactive effect, so as to result in United States federal income tax consequences different from those discussed below. If a partnership (or other entity treated as a partnership for United States federal income tax purposes) holds our Common Stock, the tax treatment of a partner will generally depend upon the status of the partner and the activities of the partnership. Investors that are partners in a partnership holding our Common Stock should consult their tax advisors.

This summary does not contain a detailed description of all the United States federal income tax consequences applicable to the Fund or to investors in light of their particular circumstances, and does not address the effects of any state, local or non-United States tax laws. **Investors considering the purchase, ownership or disposition of our Common Stock should consult their own tax advisors concerning the United States federal income tax consequences to them in light of their particular situations as well as any consequences arising under the laws of any other taxing jurisdiction.**

Taxation of the Fund

The Fund is treated as a regular corporation, or a C corporation, for United States federal income tax purposes. Accordingly, the Fund generally will be subject to United States federal income tax on its taxable income at the graduated rates applicable to corporations (currently at a maximum rate of 35%). Such taxable income would generally include, among other items, all of the Fund's net income from its investments in the equity securities of MLPs, other types of equity securities, derivatives, debt securities, royalty trusts and foreign securities less Fund expenses. The Fund may be subject to a 20% alternative minimum tax on its alternative minimum taxable income to the extent that the alternative minimum tax exceeds the Fund's regular income tax liability. The Fund's payment of corporate income tax or alternative minimum tax could materially reduce the amount of cash available for the Fund to make distributions on its stock. In addition, distributions to stockholders of the Fund will be taxed under United States federal income tax laws applicable to corporate distributions, and thus the Fund's taxable income will be subject to a double layer of taxation. As a regular corporation, the Fund may also be subject to state income tax or foreign tax by reason of its investments in equity securities of MLPs.

MLP Equity Securities

MLPs are generally characterized as publicly traded partnerships for United States federal income tax purposes because MLPs are typically organized as limited partnerships or limited liability companies that are publicly traded. The Code generally requires all publicly traded partnerships to be treated as corporations for United States federal income tax purposes. If, however, a publicly traded partnership derives at least 90% of its gross income from qualifying sources as described in Section 7704 of the Code, the publicly traded partnership will be treated as a partnership for United States federal income tax purposes. These qualifying sources include interest, dividends, real estate rents, gain from the sale or disposition of real property, income and gain from mineral or natural resources activities, income and gain from the transportation or storage of certain fuels, and, in certain circumstances, income and gain from commodities or futures, forwards and options with respect to commodities. Mineral or natural resources activities include exploration, development, production, processing, mining, refining, marketing and transportation (including pipelines) of oil and gas, minerals, geothermal energy, fertilizer, timber or industrial source carbon dioxide. The Fund intends to invest primarily in MLPs that are taxed as partnerships for United States federal income tax purposes, and references in this discussion to MLPs include only MLPs that are so taxed.

When the Fund invests in the equity securities of an MLP, the Fund will be a partner in such MLP. Accordingly, the Fund will be required to include in its taxable income the Fund's allocable share of the income, gains, losses and deductions recognized by each such MLP, whether or not the MLP distributes cash to the Fund. A distribution from an MLP is treated as a tax-free return of capital to the extent of the Fund's tax basis in its

MLP interest and as gain from the sale or exchange of the MLP interest to the extent the distribution exceeds the Fund's tax basis in its MLP interest. Based upon a review of the historic results of the type of MLPs in which the Fund intends to invest, it is possible that the cash distributions it will receive with respect to its investments in equity securities of MLPs will exceed the taxable income allocated to the Fund from such MLPs. No assurance, however, can be given in this regard. If this is not the case, the Fund will have a larger corporate income tax expense, which would result in less cash available to distribute to Common Stockholders.

In addition, for purposes of calculating the Fund's alternative minimum taxable income, the Fund's allocable share of certain percentage-depletion deductions and intangible drilling costs of the MLPs in which the Fund invests may be treated as items of tax preference. Such items will increase the Fund's alternative minimum taxable income and increase the likelihood that the Fund may be subject to the alternative minimum tax.

U.S. Holders

The following is a summary of certain United States federal income tax consequences that will apply to holders of Common Stock that are U.S. Holders.

Taxation of Dividends

The gross amount of distributions by the Fund in respect of Common Stock will be taxable to a U.S. Holder as dividend income to the extent the distributions are paid out of the Fund's current or accumulated earnings and profits, as determined under United States federal income tax principles. Such income will be included in a U.S. Holder's gross income on the day actually or constructively received by such holder. Subject to certain holding period and other requirements, such dividend income will generally be eligible for the dividends received deduction in the case of corporate U.S. Holders and will generally be treated as qualified dividend income eligible for reduced rates of taxation for non-corporate U.S. Holders (including individuals).

To the extent that the amount of any distribution exceeds the Fund's current and accumulated earnings and profits for a taxable year, as determined under United States federal income tax principles, the distribution will first be treated as a tax-free return of capital, causing a reduction in the adjusted basis of the Common Stock (thereby increasing the amount of gain, or decreasing the amount of loss, to be recognized by a U.S. Holder on a subsequent disposition of the Common Stock), and the balance in excess of adjusted basis will be taxed as capital gain. Any such capital gain will be long-term capital gain if such U.S. Holder has held the applicable Common Stock for more than one year.

A corporation's earnings and profits are generally calculated by making certain adjustments to the corporation's reported taxable income. Based upon the historic performance of similar MLPs in which the Fund intends to invest, it is possible that the distributed cash from the MLPs in its portfolio during certain years will exceed the Fund's earnings and profits. Thus, it is possible that only a portion of the Fund's distributions will be treated as dividends to its Common Stockholders for United States federal income tax purposes, although no assurance can be given in this regard.

Because of the Fund's status as a corporation for United States federal income tax purposes and its investments in equity securities of MLPs, the Fund's earnings and profits may be calculated using accounting methods that are different from those used for calculating taxable income. For instance, the Fund may use a less accelerated method of depreciation and depletion for purposes of computing its earnings and profits than the method used for purposes of calculating the taxable income of the MLP. In that case, the Fund's earnings and profits would not be increased solely by its allocable share of the MLP's taxable income, but would also have to be increased for the amount by which the more accelerated depreciation and depletion methods used for purposes of computing taxable income exceed the less accelerated methods used for purposes of computing earnings and profits. Because of these differences, the Fund may make distributions out of its current or accumulated earnings and profits, treated as dividends, in years in which the Fund's distributions exceed its taxable income.

Taxation of Capital Gains

A U.S. Holder generally will recognize taxable gain or loss on any sale, exchange or other disposition of Common Stock in an amount equal to the difference between the amount realized for the Common Stock and the

holder's adjusted tax basis in such Common Stock. Generally, a U.S. Holder's adjusted tax basis in its Common Stock will be equal to the cost of the holder's Common Stock, reduced by adjustments for distributions paid by the Fund in excess of its earnings and profits (i.e., returns of capital). Such gain or loss will generally be capital gain or loss. Capital gains of non-corporate U.S. Holders (including individuals) derived with respect to capital assets held for more than one year are eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations.

Information Reporting and Backup Withholding

In general, information reporting will apply to distributions in respect of Common Stock and the proceeds from the sale, exchange or other disposition of Common Stock that are paid to a U.S. Holder within the United States (and in certain cases, outside the United States), unless the holder is an exempt recipient. A backup withholding tax (currently at a maximum rate of 28%) may apply to such payments if the holder fails to provide a taxpayer identification number (generally on an IRS Form W-9) or certification of other exempt status or fails to report in full dividend and interest income. Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules will be allowed as a refund or as a credit against a U.S. Holder's United States federal income tax liability provided the required information is timely furnished to the Internal Revenue Service.

Non-U.S. Holders

The following discussion is a summary of certain United States federal income tax consequences that will apply to holders of Common Stock that are non-U.S. Holders.

Taxation of Dividends

The gross amount of distributions by the Fund in respect of Common Stock will be treated as dividends to the extent paid out of the Fund's current or accumulated earnings and profits, as determined under United States federal income tax principles. Dividends paid to a non-U.S. Holder generally will be subject to withholding of United States federal income tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. However, dividends that are effectively connected with the conduct of a trade or business by a non-U.S. Holder within the United States (and, if required by an applicable income tax treaty, are attributable to a United States permanent establishment) are not subject to the withholding tax, provided certain certification and disclosure requirements (generally on an IRS Form W-8ECI) are satisfied. Instead, such dividends are subject to United States federal income tax on a net income basis in the same manner as if the non-U.S. Holder were a United States person as defined under the Code. Any such effectively connected dividends received by a foreign corporation may be subject to an additional branch profits tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty.

A non-U.S. Holder who wishes to claim the benefits of an applicable income tax treaty (and avoid backup withholding, as discussed below) for dividends will be required (a) to complete IRS Form W-8BEN (or other applicable form) and certify under penalty of perjury that such holder is not a United States person as defined under the Code and is eligible for treaty benefits or (b) if Common Stock is held through certain foreign intermediaries, to satisfy the relevant certification requirements of applicable United States Treasury regulations. Special certification and other requirements apply to certain non-U.S. Holders that are pass-through entities rather than corporations or individuals.

A non-U.S. Holder eligible for a reduced rate of United States withholding tax pursuant to an income tax treaty may obtain a refund of any excess amounts withheld by filing an appropriate claim for refund with the Internal Revenue Service.

If the amount of a distribution to a non-U.S. Holder exceeds the Fund's current and accumulated earnings and profits, such excess will be treated first as a tax-free return of capital to the extent of the non-U.S. Holder's tax basis in such holder's stock, and then as capital gain. As discussed above under the caption **U.S. Holders Taxation of Dividends**, it is possible that only a portion of the Fund's distributions to its stockholders will be treated as dividends for United States federal income tax purposes, although no assurance can be given in this regard. Capital gain recognized by a non-U.S. Holder as a consequence of a distribution by the Fund in

excess of its current and accumulated earnings and profits will generally not be subject to United States federal income tax, except as described below under the caption *Taxation of Capital Gains*.

Taxation of Capital Gains

A non-U.S. Holder generally will not be subject to United States federal income tax on any gain realized on the disposition of Common Stock unless:

the gain is effectively connected with a trade or business of the non-U.S. Holder in the United States (and, if required by an applicable income tax treaty, is attributable to a United States permanent establishment of the non-U.S. Holder);

the non-U.S. Holder is an individual who is present in the United States for 183 days or more in the taxable year of that disposition, and certain other conditions are met; or

the Fund is or has been a United States real property holding corporation for United States federal income tax purposes.

An individual non-U.S. Holder described in the first bullet point immediately above will be subject to tax on the net gain derived from the sale under regular graduated United States federal income tax rates. An individual non-U.S. Holder described in the second bullet point immediately above will be subject to a flat 30% tax on the gain derived from the sale, which may be offset by United States source capital losses, even though the individual is not considered a resident of the United States. If a non-U.S. Holder that is a foreign corporation falls under the first bullet point immediately above, the holder will be subject to tax on its net gain in the same manner as if the holder were a United States person as defined under the Code and, in addition, may be subject to the branch profits tax equal to 30% of its effectively connected earnings and profits or at such lower rate as may be specified by an applicable income tax treaty.

The Fund may be a United States real property holding corporation for United States federal income tax purposes. With respect to the third bullet point above, if the Fund is or becomes a United States real property holding corporation, so long as the Fund's Common Stock is regularly traded on an established securities market (such as the NYSE), only a non-U.S. Holder who holds or held (at any time during the shorter of the five year period preceding the date of disposition or the holder's holding period) more than 5% (directly or indirectly, as determined under applicable attribution rules of the Code) of the Fund's Common Stock will be subject to United States federal income tax on the disposition of such Common Stock.

Information Reporting and Backup Withholding

The Fund must report annually to the Internal Revenue Service and to each non-U.S. Holder the amount of distributions paid to such holder (whether treated as dividends or a return of capital) and the tax withheld with respect to such distributions. Copies of the information returns reporting such distributions and withholding may also be made available to the tax authorities in the country in which the non-U.S. Holder resides under the provisions of an applicable income tax treaty.

A non-U.S. Holder will be subject to backup withholding for dividends paid to such holder unless such holder certifies under penalty of perjury that it is a non-U.S. Holder (and the payor does not have actual knowledge or reason to know that such holder is a United States person as defined under the Code), or such holder otherwise establishes an exemption. Dividends subject to withholding of United States federal income tax as described under the caption *Taxation of Dividends* above will not be subject to backup withholding.

Information reporting and, depending on the circumstances, backup withholding will apply to the proceeds of a sale of Common Stock within the United States or conducted through certain United States-related financial intermediaries, unless the beneficial owner certifies under penalty of perjury that it is a non-U.S. Holder (and the payor does not have actual knowledge or reason to know that the beneficial owner is a United States person as defined under the Code), or such owner otherwise establishes an exemption.

Any amounts withheld under the backup withholding rules will be allowed as a refund or as a credit against a non-U.S. Holder's United States federal income tax liability provided the required information is timely furnished to the Internal Revenue Service.

Non-U.S. Holders should consult their tax advisor regarding the application of the information reporting and backup withholding rules to them.

Additional Withholding Requirements

Under legislation enacted in 2010 and administrative guidance, a 30% United States federal withholding tax may apply to any dividends paid after June 30, 2014, and the gross proceeds from a disposition of Common Stock occurring after December 31, 2016, in each case paid to (i) a foreign financial institution (as specifically defined in the legislation), whether such foreign financial institution is the beneficial owner or an intermediary, unless such foreign financial institution agrees to verify, report and disclose its United States account holders (as specifically defined in the legislation) and meets certain other specified requirements or (ii) a non-financial foreign entity, whether such non-financial foreign entity is the beneficial owner or an intermediary, unless such entity provides a certification that the beneficial owner of the payment does not have any substantial United States owners or provides the name, address and taxpayer identification number of each such substantial United States owner and certain other specified requirements are met. In certain cases, the relevant foreign financial institution or non-financial foreign entity may qualify for an exemption from, or be deemed to be in compliance with, these rules. Non-U.S. Holders should consult their tax advisor regarding this legislation and whether it may be relevant to their ownership and disposition of the Fund's Common Stock.

Medicare Tax on Net Investment Income

Recently enacted legislation will generally impose a tax on the net investment income of certain individuals and on the undistributed net investment income of certain estates and trusts. For these purposes, net investment income will generally include interest, dividends (including dividends paid with respect to our Common Stock), annuities, royalties, rent, net gain attributable to the disposition of property not held in a trade or business (including net gain from the sale, exchange or other taxable disposition of shares of our Common Stock) and certain other income, but will be reduced by any deductions properly allocable to such income or net gain. Common Stockholders are advised to consult their own tax advisors regarding additional taxation of net investment income.

Investment by Tax-Exempt Investors

Employee benefit plans and most other organizations exempt from United States federal income tax, including individual retirement accounts and other retirement plans, are subject to United States federal income tax on UBTI. Because the Fund is a corporation for United States federal income tax purposes, an owner of Common Stock will not report on its federal income tax return any of the Fund's items of income, gain, loss and deduction. Therefore, a tax-exempt investor generally will not have UBTI attributable to its ownership or sale of Common Stock unless its ownership of Common Stock is debt-financed. In general, a tax-exempt investor's Common Stock would be debt-financed if the tax-exempt investor incurs debt to acquire Common Stock or otherwise incurs or maintains a debt that would not have been incurred or maintained if its Common Stock had not been acquired.

Other Taxation

The Fund's Common Stockholders may be subject to alternative minimum tax, state, local and foreign taxes on distributions they receive. Common Stockholders are advised to consult their own tax advisors with respect to the particular tax consequences to them of an investment in the Fund.

PLAN OF DISTRIBUTION

We may sell our Common Stock from time to time under this Prospectus and any related Prospectus Supplement in any one or more of the following ways (1) directly to one or more purchasers, (2) through agents for the period of their appointment, (3) to underwriters as principals for resale to the public, (4) to dealers as principals for resale to the public, (5) through at-the-market transactions or (6) pursuant to our Dividend Reinvestment Plan.

Our securities may be sold from time to time in one or more transactions at a fixed price or fixed prices, which may change; at prevailing market prices at the time of sale; prices related to prevailing market prices; at

varying prices determined at the time of sale; or at negotiated prices. Our securities may be sold other than for cash, including in exchange transactions for non-control securities, or may be sold for a combination of cash and securities. The Prospectus Supplement will describe the method of distribution of our securities offered therein.

Each Prospectus Supplement relating to an offering of our securities will state the terms of the offering, including:

the names of any agents, underwriters or dealers;

any sales loads, underwriting discounts and commissions or agency fees and other items constituting underwriters' or agents' compensation;

any discounts, commissions, fees or concessions allowed or reallocated or paid to dealers or agents;

the public offering or purchase price of the offered securities and the estimated net proceeds we will receive from the sale; and

any securities exchange on which the offered securities may be listed.

Any public offering price and any discounts or concessions allowed or reallocated or paid to dealers may be changed from time to time.

Direct Sales

We may sell our securities directly to, and solicit offers from, purchasers, including institutional investors or others who may be deemed to be underwriters as defined in the Securities Act for any resales of the securities. In this case, no underwriters or agents would be involved. We may use electronic media, including the internet, to sell offered securities directly. We will describe the terms of any of those sales in a Prospectus Supplement.

Distribution Through Agents

We may offer and sell our securities on a continuous basis through agents that we designate. We will name any agent involved in the offer and sale and describe any commissions payable by us in the Prospectus Supplement. Unless otherwise indicated in the Prospectus Supplement, the agents will be acting on a best efforts basis for the period of their appointment.

Offers to purchase our securities may be solicited directly by the issuer or by agents designated by the issuer from time to time. Any such agent, who may be deemed to be an underwriter as the term is defined in the Securities Act, involved in the offer or sale of the offered securities in respect of which this Prospectus is delivered will be named, and any commissions payable by the issuer to such agent set forth, in a Prospectus Supplement.

Distribution Through Underwriters

We may offer and sell our securities from time to time to one or more underwriters who would purchase the securities as principal for resale to the public either on a firm commitment or best efforts basis. If we sell our securities to underwriters, we will execute an underwriting agreement with them at the time of the sale and will name them in the Prospectus Supplement. In connection with these sales, the underwriters may be deemed to have received compensation from us in the form of underwriting discounts and commissions. The underwriters also may receive commissions from purchasers of our securities for whom they may act as agent. Unless otherwise stated in the Prospectus Supplement, the underwriters will not be obligated to purchase our securities unless the conditions set forth in the underwriting agreement are satisfied, and if the underwriters purchase any of the securities, they will be required to purchase all of the offered securities. In the event of default by any underwriter, in certain circumstances, the purchase commitments may be increased among the non-defaulting underwriters or the Underwriting Agreement may be terminated. The underwriters may sell the offered securities to or through dealers, and those dealers may receive discounts, concessions or commissions from the underwriters as well as from the purchasers for whom they may act as agent. Sales of the offered securities by underwriters may be in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale. The Prospectus Supplement will describe the method of

reoffering by the underwriters. The Prospectus Supplement will also describe the discounts and commissions to be allowed or paid to the underwriters, if any, all other items constituting underwriting compensation, and the discounts and commissions to be allowed or paid to dealers, if any. If a Prospectus Supplement so indicates, we may grant the underwriters an option to purchase additional shares of our securities at the public offering price, less the underwriting discounts and commissions, within a specified number of days from the date of the Prospectus Supplement, to cover any overallotments.

Distribution Through Dealers

We may offer and sell our securities from time to time to one or more dealers who would purchase the securities as principal. The dealers then may resell the offered securities to the public at fixed or varying prices to be determined by those dealers at the time of resale. We will set forth the names of the dealers and the terms of the transaction in the Prospectus Supplement.

Distribution Through At-the-Market Offerings

We may engage in at-the-market offerings to or through a market maker or into an existing trading market, on an exchange or otherwise, in accordance with Rule 415(a)(4). An at-the-market offering may be through one or more underwriters or dealers acting as principal or agent for us.

General Information

Agents, underwriters, or dealers participating in an offering of our securities may be deemed to be underwriters, and any discounts and commissions received by them and any profit realized by them on resale of the offered securities for whom they may act as agent, may be deemed to be underwriting discounts and commissions under the Securities Act.

We may offer to sell our securities either at a fixed price or at prices that may vary, at market prices prevailing at the time of sale, at prices related to prevailing market prices, or at negotiated prices.

If indicated in the applicable Prospectus Supplement, we may authorize underwriters or other persons acting as our agents to solicit offers by certain institutions to purchase securities from us pursuant to contracts providing for payment and delivery on a future date. Institutions with which these contracts may be made include: commercial and savings banks, insurance companies, pension funds, educational and charitable institutions and others, but in all cases these institutions must be approved by us. The obligations of any purchaser under any contract will be subject only to those conditions described in the applicable Prospectus Supplement. The underwriters and the other agents will not have any responsibility for the validity or performance of the contracts. The applicable Prospectus Supplement will describe the commission payable for solicitation of those contracts.

In connection with any offering of the securities in an underwritten transaction, the underwriters may engage in transactions that stabilize, maintain, or otherwise affect the market price of the Common Stock. Those transactions may include overallotment, entering stabilizing bids, effecting syndicate covering transactions, and reclaiming selling concessions allowed to an underwriter or a dealer.

An overallotment in connection with an offering creates a short position in the offered securities for the underwriters' own account.

An underwriter may place a stabilizing bid to purchase an offered security for the purpose of pegging, fixing, or maintaining the price of that security.

Underwriters may engage in syndicate covering transactions to cover overallotments or to stabilize the price of the offered securities by bidding for, and purchasing, the offered securities or any other securities in the open market in order to reduce a short position created in connection with the offering.

The managing underwriter may impose a penalty bid on a syndicate member to reclaim a selling concession in connection with an offering when offered securities originally sold by the syndicate member are purchased in syndicate covering transactions or otherwise.

Any of these activities may stabilize or maintain the market price of the securities above independent market levels. The underwriters are not required to engage in these activities, and may end any of these activities at any time.

Any underwriters that are qualified market makers on the NYSE may engage in passive market making transactions in our securities on the NYSE in accordance with Regulation M under the Securities Exchange Act of 1934, as amended, during the business day prior to the pricing of the offering, before the commencement of offers or sales of the common stock. Passive market makers must comply with applicable volume and price limitations and must be identified as passive market makers. In general, a passive market maker must display its bid at a price not in excess of the highest independent bid for such security; if all independent bids are lowered below the passive market maker's bid, however, the passive market maker's bid must then be lowered when certain purchase limits are exceeded. Passive market making may stabilize the market price of the securities at a level above that which might otherwise prevail in the open market and, if commenced, may be discontinued at any time.

We will not require underwriters or dealers to make a market in the Common Stock. Any underwriters to whom the offered securities are sold for offering and sale may make a market in the offered securities, but the underwriters will not be obligated to do so and may discontinue any market-making at any time without notice.

Under agreements entered into with us, underwriters and agents may be entitled to indemnification by us against certain civil liabilities, including liabilities under the Securities Act, or to contribution for payments the underwriters or agents may be required to make. The underwriters, agents, and their affiliates may engage in financial or other business transactions with us and our subsidiaries, if any, in the ordinary course of business.

The aggregate offering price specified on the cover of this Prospectus relates to the offering of the securities not yet issued as of the date of this Prospectus. The place and time of delivery for the offered securities in respect of which this Prospectus is delivered are set forth in the accompanying Prospectus Supplement.

To the extent permitted under the 1940 Act and the rules and regulations promulgated thereunder, the underwriters may from time to time act as a broker or dealer and receive fees in connection with the execution of our portfolio transactions after the underwriters have ceased to be underwriters and, subject to certain restrictions, each may act as a broker while it is an underwriter.

A Prospectus and accompanying Prospectus Supplement in electronic form may be made available on the websites maintained by the underwriters. The underwriters may agree to allocate our securities for sale to their online brokerage account holders. Such allocations of our securities for internet distributions will be made on the same basis as other allocations. In addition, our securities may be sold by the underwriters to securities dealers who resell securities to online brokerage account holders.

Dividend Reinvestment Plan

We may issue and sell shares of Common Stock pursuant to our Plan.

CUSTODIAN AND TRANSFER AGENT

The custodian of the assets of the Fund is State Street Bank and Trust Company LLC, Lafayette Corporate Center, 2 Avenue de Lafayette, Boston, Massachusetts 02111. The Custodian performs custodial, fund accounting and portfolio accounting services. The Fund's transfer, stockholder services and dividend paying agent is American Stock Transfer & Trust Company LLC, 6201 15th Avenue, Brooklyn, New York 11219.

LEGAL OPINIONS

Certain legal matters in connection with the securities will be passed upon for the Fund by Simpson Thacher & Bartlett LLP, New York, New York. Simpson Thacher & Bartlett LLP may rely as to certain matters of Maryland law on the opinion of Foley & Lardner LLP.

FORM OF PROSPECTUS SUPPLEMENT

(To Prospectus dated _____, 2014)

Subject to completion, dated _____, 201 .

Shares

ClearBridge Energy MLP Total Return Fund Inc.

Common Stock \$ _____ per share

We are offering shares of our common stock (Common Stock). We are a non-diversified, closed-end management investment company that began investment activities on June 24, 2010 following our initial public offering. Our investment objective is to provide a high level of total return with an emphasis on cash distributions. We seek to achieve our investment objective by investing primarily in master limited partnerships (MLPs) in the energy sector. This Prospectus Supplement, together with the accompanying Prospectus dated _____, 201 , sets forth the information that you should know before investing.

Our currently outstanding shares of Common Stock are, and the Common Stock offered by this Prospectus Supplement and accompanying Prospectus, subject to notice of issuance, will be, listed on the New York Stock Exchange under the symbol CTR. The last reported sale price of our Common Stock on _____, 201 was per share. The net asset value per share of our Common Stock at the close of business on _____, 201 was _____.

This investment involves risks. See Risks beginning on page 58 of the accompanying Prospectus.

	Per Share	Total
Public offering price	\$ _____	\$ _____
Underwriting discount	\$ _____	\$ _____
Proceeds, before expenses, to us	\$ _____	\$ _____

[We have granted the underwriters an option to purchase up to an additional shares of our Common Stock at the public offering price, less the underwriting discount, to cover over-allotments, if any, within days from the date of this Prospectus Supplement. If the underwriters exercise the option in full, the total underwriting discount will be \$ _____, and the proceeds, before expenses, to us will be \$ _____.]

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this Prospectus Supplement. Any representation to the contrary is a criminal offense.

[Underwriter(s)]

The date of this Prospectus Supplement is _____, 201 .

You should rely only on the information contained or incorporated by reference in this Prospectus Supplement and the accompanying Prospectus, which we refer to collectively as the Prospectus. This Prospectus Supplement and the accompanying Prospectus set forth certain information about us that a prospective investor should carefully consider before making an investment in our securities. This Prospectus Supplement, which describes the specific terms of this offering, also adds to and updates information contained in the accompanying Prospectus and the documents incorporated by reference in the Prospectus. The Prospectus gives more general information, some of which may not apply to this offering. If the description of this offering varies between this Prospectus Supplement and the accompanying Prospectus, you should rely on the information contained in this Prospectus Supplement; provided that if any statement in one of these documents is inconsistent with a statement in another document having a later date and incorporated by reference into the Prospectus or Prospectus Supplement, the statement in the incorporated document having the later date modifies or supersedes the earlier statement. We have not authorized anyone to provide you with different information. If anyone

provides you with different or inconsistent information, you should not rely on it. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted or where the person making the offer or sale is not qualified to do so or to any person to whom it is not permitted to make such offer or sale. The information contained in or incorporated by reference in this Prospectus Supplement and the accompanying Prospectus is accurate only as of the respective dates on their front covers, regardless of the time of delivery of this Prospectus Supplement, the accompanying Prospectus, or the sale of the securities. Our business, financial condition, results of operations and prospects may have changed since that date.

You should read this Prospectus Supplement and the accompanying Prospectus before deciding whether to invest and retain it for future reference. A Statement of Additional Information, dated [REDACTED], 2014 (the "SAI"), as supplemented from time to time, containing additional information about us, has been filed with the Securities and Exchange Commission ("SEC") and is incorporated by reference in its entirety into this Prospectus. You may request a free copy of the SAI (the table of contents of which is on page 98 of the accompanying Prospectus), annual and semi-annual reports to stockholders (when available), and additional information about the Fund by calling (888) 777-0102, by writing to the Fund at 620 Eighth Avenue, 49th Floor, New York, NY 10018 or visiting the Fund's website (<http://www.lmcef.com>). The information contained in, or accessed through, the Fund's website is not part of this Prospectus. You may also obtain a copy of the SAI (and other information regarding the Fund) from the SEC's Public Reference Room in Washington, D.C. Information relating to the Public Reference Room may be obtained by calling the SEC at (202) 551-8090. Such materials, as well as the Fund's annual and semi-annual reports (when available) and other information regarding the Fund, are also available on the SEC's website (<http://www.sec.gov>). You may also e-mail requests for these documents to publicinfo@sec.gov or make a request in writing to the SEC's Public Reference Room, 100 F Street, N.E., Washington, D.C. 20549-0102.

CAUTIONARY NOTICE REGARDING FORWARD-LOOKING STATEMENTS

This Prospectus Supplement, the accompanying Prospectus and the SAI contain forward-looking statements. All statements other than statements of historical facts included in this Prospectus that address activities, events or developments that we expect, believe or anticipate will or may occur in the future are forward-looking statements including, in particular, the statements about our plans, objectives, strategies and prospects regarding, among other things, our financial condition, results of operations and business. We have identified some of these forward-looking statements with words like believe, may, could, might, forecast, possible, potential, project, will, should, expect, predict, anticipate, estimate, approximate or continue and other words and terms of similar meaning and the negative of such terms. Such forward-looking statements may be contained in this Prospectus Supplement as well as in the accompanying Prospectus. These forward-looking statements are based on current expectations about future events affecting us and are subject to uncertainties and factors relating to our operations and business environment, all of which are difficult to predict and many of which are beyond our control. Many factors mentioned in our discussion in this Prospectus, including the risks outlined under "Risk Factors," will be important in determining future results. In addition, several factors that could materially affect our actual results are the ability of the MLPs in which we invest to achieve their objectives, our ability to source favorable private investments, the timing and amount of distributions and dividends from the MLPs in which we intend to invest, the dependence of our future success on the general economy and its impact on the industries in which we invest and other factors discussed in our periodic filings with the SEC.

Although we believe that the expectations reflected in our forward-looking statements are reasonable, we do not know whether our expectations will prove correct. They can be affected by inaccurate assumptions we might make or by known or unknown risks and uncertainties. The factors identified above are believed to be important factors, but not necessarily all of the important factors, that could cause our actual results to differ materially from those expressed in any forward-looking statement. Unpredictable or unknown factors could also have material adverse effects on us. Since our actual results, performance or achievements could differ materially from those expressed in, or implied by, these forward-looking statements, we cannot give any assurance that any of the

events anticipated by the forward-looking statements will occur or, if any of them do, what impact they will have on our results of operations and financial condition. All forward-looking statements included in this Prospectus Supplement, the accompanying Prospectus or the SAI or are expressly qualified in their entirety by the foregoing cautionary statements. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of such documents. We do not undertake any obligation to update, amend or clarify these forward-looking statements or the risk factors contained therein, whether as a result of new information, future events or otherwise, except as may be required under the federal securities laws. We acknowledge that, notwithstanding the foregoing statements, the Private Securities Litigation Reform Act of 1995 does not apply to investment companies such as us.

S-iii

PROSPECTUS SUPPLEMENT SUMMARY

This summary highlights selected information contained elsewhere in this prospectus supplement (the "Prospectus Supplement"). This summary provides an overview of selected information and does not contain all of the information you should consider before investing in our common stock ("Common Stock"). You should read carefully the entire Prospectus Supplement, the accompanying prospectus (the "Base Prospectus"), including the section entitled "Risks," the statement of additional information (the "SAI"), and the financial statements and related notes, before making an investment decision.

The Fund

ClearBridge Energy MLP Total Return Fund Inc. (the "Fund") is a non-diversified, closed-end management investment company. Our investment objective is to provide long-term investors a high level of total return with an emphasis on cash distributions. We seek to achieve our investment objective by investing primarily in master limited partnerships ("MLPs") in the energy sector. Our currently outstanding shares of Common Stock are, and the Common Stock offered by this Prospectus Supplement and accompanying Base Prospectus, subject to notice of issuance, will be, listed on the New York Stock Exchange ("NYSE") under the symbol "CTR."

We began investment activities in June 2012 following our initial public offering. As of [redacted], 201 [redacted], we had approximately [redacted] million shares of Common Stock outstanding, net assets applicable to our Common Stock of approximately \$ [redacted] million and total assets of approximately \$ [redacted] million.

Investment Manager

LMPFA is the Fund's investment manager. LMPFA, a wholly-owned subsidiary of Legg Mason Inc. ("Legg Mason"), is a registered investment adviser and supervises the day-to-day management of the Fund's portfolio by ClearBridge Investments, LLC (f/k/a ClearBridge Advisors, LLC) ("ClearBridge"). As of [redacted], 201 [redacted], LMPFA's total assets under management were approximately \$ [redacted] billion. Legg Mason is a global asset management firm. As of [redacted], 201 [redacted], Legg Mason's asset management operations had aggregate assets under management of approximately \$ [redacted] billion.

Subadviser

ClearBridge is the Fund's subadviser. ClearBridge, a wholly-owned subsidiary of Legg Mason, is a registered investment adviser and is responsible for the day-to-day portfolio management of the Fund subject to the supervision of the Fund's Board of Directors and LMPFA. As of [redacted], 201 [redacted], ClearBridge's total assets under management were approximately \$ [redacted] billion, including \$ [redacted] billion in energy-related assets.

The Offering

Common Stock offered: [redacted] shares

Shares outstanding after the offering: [redacted] shares

Risks: See "Risks" and other information included in the Base Prospectus for a discussion of factors you should consider before deciding to invest in shares of our Common Stock.

SUMMARY OF FUND EXPENSES

The following table contains information about the costs and expenses that holders of our Common Stock will bear directly or indirectly. The table is based on the capital structure of the Fund as of (except as noted below). The purpose of the table and the example below is to help you understand the fees and expenses that you, as a holder of Common Stock, would bear directly or indirectly.

SHAREHOLDER TRANSACTION EXPENSES

Sales Load	%
Offering Expenses Borne by the Fund (as a percentage of offering price)	%(1)
Dividend Reinvestment Plan Fees(2)	None

TOTAL TRANSACTION EXPENSES (AS A PERCENTAGE OF OFFERING PRICE)

	Percentage of Net Assets Attributable to Common Shares(3)
ANNUAL EXPENSES	
Management fees(4)	%
Interest Payments on Borrowed Funds(5)	%
Other Expenses(6)	%
TOTAL ANNUAL EXPENSES	%

- Offering expenses payable by the Fund will be deducted from the Proceeds, before expenses, to the Fund.
- Common Stockholders will pay brokerage charges if they direct the Plan Agent (defined below) to sell Common Stock held in a dividend reinvestment account. See Dividend Reinvestment Plan in the Base Prospectus.
- Based upon net assets applicable to Common Stock as of _____.
- LMPFA receives an annual fee, payable monthly, in an amount equal to 1.00% of the Fund's average daily Managed Assets. Managed Assets means net assets plus the amount of any Borrowings and assets attributable to any Preferred Stock that may be outstanding. For the purposes of this table, we have assumed that the Fund has utilized Borrowings in an aggregate amount of _____% of its Managed Assets (after their issuance). If the Fund were to use financial leverage in excess of _____% of its Managed Assets, the management fees shown would be higher.
- Based on the Fund's outstanding Borrowings as of _____ of \$ _____ million, which represented financial leverage of _____% of the Fund's Managed Assets. The expenses and rates associated with leverage may vary as and when Borrowings are made.
- Other expenses are estimated based upon those incurred during the fiscal year ended _____.

Example

As required by relevant SEC regulations, the following Example illustrates the expenses that you would pay on a \$1,000 investment in Common Shares, assuming (1) Total annual expenses of _____% of net assets attributable to Common Shares, (2) the sales load of \$ _____ and estimated offering expenses of \$ _____, and (3) a 5% annual return*:

	1 Year	3 Years	5 Years	10 Years
Total Expenses Incurred(1)	\$ _____	\$ _____	\$ _____	\$ _____

- The Example should not be considered a representation of future expenses or returns. Actual expenses may be higher or lower than those assumed. Moreover, the Fund's actual rate of return may be higher or lower than the hypothetical 5% return shown in the Example.** The Example assumes that all dividends and distributions are reinvested at net asset value.

USE OF PROCEEDS

We estimate that the net proceeds from the sale of the shares of Common Stock that we are offering will be approximately \$ million, after deducting the underwriting discount and estimated offering expenses payable by us. If the underwriters exercise their over-allotment option in full, we estimate that our net proceeds from this offering will be approximately \$ million, after deducting the underwriting discount and estimated offering expenses payable by us.

We intend to use the net proceeds of the offering from selling shares of our Common Stock to make investments in portfolio companies in accordance with our investment objective and policies and for general corporate purposes.

Pending such investments, we anticipate either investing the proceeds in short-term securities issued by the U.S. government or its agencies or instrumentalities or in high quality, short-term or long-term debt obligations or money market instruments. A delay in the anticipated use of proceeds could lower returns and reduce our distribution to holders of our Common Stock (Common Stockholders).

CAPITALIZATION

The following table sets forth our capitalization (i) as of , 201 and (ii) as adjusted to give effect to the issuance of the common shares offered hereby. As indicated below, Common Stockholders will bear the offering costs associated with this offering.

	As of Actual	, 201 As Adjusted (\$ in 000s, except per share data) (Unaudited)
Cash and cash equivalents	\$	\$ (1)
Long-Term Debt:	\$	\$
Total Debt:	\$	\$
Common Stockholders Equity:		
Common Stock, \$0.001 par value per share, 100,000,000 shares authorized (shares issued and outstanding; shares issued and outstanding as adjusted)(2)(3)	\$	\$
Paid-in capital(4)		
Net investment loss, net of income taxes less dividends and distributions		
Accumulated realized gains on investments, securities sold short and interest rate swap contracts, net of income taxes		
Net unrealized gains on investments and interest rate swap contracts, net of income taxes		
Net assets applicable to Common Stockholders	\$	\$

- (1) As described under Use of Proceeds, we intend to use the net proceeds from this offering to make investments in accordance with our investment objective. Pending such investments, we anticipate either investing the proceeds in short-term securities or money market instruments.
- (2) We do not hold any of these outstanding securities for our account.
- (3) This does not include shares that may be issued in connection with the underwriters over-allotment option.
- (4) As adjusted, additional paid-in capital reflects the proceeds of the issuance of shares of Common Stock offered hereby (\$), less \$0.001 par value per share of Common Stock (\$), less the underwriting discount (\$) and less the net estimated offering costs borne by us (\$) related to the issuance of the shares.

UNDERWRITING/PLAN OF DISTRIBUTION

<u>Appendix C Proxy Voting Policies and Procedures of ClearBridge Investments, LLC</u>	AP-C-1

INVESTMENT OBJECTIVE

The Fund's investment objective is to provide a high level of total return, consisting of cash distributions and capital appreciation. There can be no assurance that the Fund will achieve its investment objective.

Under normal market conditions, the Fund invests at least 80% of its Managed Assets (as defined in the Prospectus) in energy MLPs (the 80% policy). For purposes of the 80% policy, the Fund considers investments in MLPs to include investments that offer economic exposure to public and private MLPs in the form of MLP equity securities, securities of entities holding primarily general partner or managing member interests in MLPs, securities that are derivatives of interests in MLPs, including I-Shares, exchange-traded funds that primarily hold MLP interests and debt securities of MLPs. Energy entities are engaged in the business of exploring, developing, producing, gathering, transporting, processing, storing, refining, distributing, mining or marketing of natural gas, natural gas liquids (including propane), crude oil, refined petroleum products or coal.

There can be no assurance that the Fund will achieve its investment objective or earn a return on its assets, and you could lose some or all of your investment.

INVESTMENT RESTRICTIONS

The following restrictions, along with the Fund's investment objective, are the Fund's only fundamental policies—that is, policies that cannot be changed without the approval of the holders of a majority of the Fund's outstanding voting securities. For the purposes of the foregoing, a majority of the Fund's outstanding voting securities means the lesser of (i) 67% of the shares represented at a meeting at which more than 50% of the outstanding shares are represented or (ii) more than 50% of the outstanding shares. The other policies and investment restrictions are not fundamental policies of the Fund and may be changed by the Fund's Board without stockholder approval. Except with respect to the Fund's ability to borrow under subparagraph (7) below, if a percentage restriction set forth below is adhered to at the time a transaction is effected, later changes in percentage resulting from any cause other than actions by the Fund will not be considered a violation. Under its fundamental restrictions, the Fund may not:

- (1) issue senior securities, except to the extent permitted by (i) the Investment Company Act of 1940, as amended (the 1940 Act), or interpretations or modifications by the SEC, the SEC staff or other authority with appropriate jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority;
- (2) make loans to other persons, except as permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority with appropriate jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority;
- (3) underwrite the securities of other issuers, except insofar as the Fund may be deemed to be an underwriter under the Securities Act of 1933, as amended (the 1933 Act), in connection with the sale and purchase of portfolio securities;
- (4) invest 25% or more of the value of its total assets in any one industry provided that such limitation shall not be applicable to industries in the energy sector and obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities;
- (5) purchase or sell real estate or interests therein other than corporate securities secured by real estate or interests therein;
- (6) purchase or sell commodities, commodity futures contracts or commodity options except as permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority with appropriate jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority; and
- (7) borrow money, except as permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority with appropriate jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority.

With respect to the limitation regarding the issuance of senior securities set forth in subparagraph (1) above, senior securities are defined as any bond, debenture, note, or similar obligation or instrument constituting a security and evidencing indebtedness, and any stock of a class having priority over any other class as to distribution of assets or payment of dividends.

The ability of a closed-end fund to issue senior securities is severely circumscribed by complex regulatory constraints under the 1940 Act that restrict, for instance, the amount, timing and form of senior securities that may be issued. Certain portfolio management techniques, such as credit default swaps, the purchase of securities on margin, short sales or the writing of puts on portfolio securities, may be considered senior securities unless appropriate steps are taken to segregate the Fund's assets or otherwise cover its obligations. To the extent the Fund covers its commitment under these transactions, including by the segregation of liquid assets, equal in value to the amount of the Fund's commitment, such instrument will not be considered a senior security by the Fund and therefore will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by the Fund.

Under the 1940 Act, a senior security does not include any promissory note or evidence of indebtedness where such loan is for temporary purposes only and in an amount not exceeding 5% of the value of the total assets of the issuer at the time the loan is made. A loan is presumed to be for temporary purposes if it is repaid within sixty days and is not extended or renewed.

With respect to the limitation regarding making loans to other persons set forth in subparagraph (2) above, the 1940 Act does not prohibit a fund from making loans; however, SEC staff interpretations currently prohibit funds from lending more than one-third of their total assets, except through the purchase of debt obligations or the use of repurchase agreements. A repurchase agreement is an agreement to purchase a security, coupled with an agreement to sell that security back to the original seller on an agreed-upon date at a price that reflects current interest rates. The SEC frequently treats repurchase agreements as loans.

With respect to the limitation regarding underwriting the securities of other issuers set forth in subparagraph (3) above, a technical provision of the 1933 Act deems certain persons to be underwriters if they purchase a security from an issuer and later sell it to the public. Although it is not believed that the application of this 1933 Act provision would cause a fund to be engaged in the business of underwriting, the policy set forth in subparagraph (3) will be interpreted not to prevent the Fund from engaging in transactions involving the acquisition or disposition of portfolio securities, regardless of whether the Fund may be considered to be an underwriter under the 1933 Act. Under the 1933 Act, an underwriter may be liable for material omissions or misstatements in an issuer's registration statement or prospectus.

For purposes of applying the limitation set forth in subparagraph (4) above, securities of the U.S. government, its agencies or instrumentalities and securities backed by the credit of a U.S. governmental entity are not considered to represent industries. If the Fund were to concentrate its investments in a particular industry, investors would be exposed to greater risks because the Fund's performance would be largely dependent on that industry's performance. The Fund will invest at least 25% of the value of its total assets in industries in the energy sector. The Fund's industry concentration policy does not preclude it from focusing investments in issuers in a group of related industrial sectors (such as different types of energy issuers).

With respect to the limitation regarding the purchase or sale of commodities, commodity futures contracts or commodity options set forth in subparagraph (6) above, the 1940 Act does not prohibit a fund from owning commodities, whether physical commodities and contracts related to physical commodities (such as oil or grains and related futures contracts), or financial commodities and contracts related to financial commodities (such as currencies and, possibly, currency futures). The value of commodities and commodity-related instruments may be extremely volatile and may be affected either directly or indirectly by a variety of factors. There also may be storage charges and risks of loss associated with physical commodities.

With respect to the limitation regarding the Fund's ability to borrow set forth in subparagraph (7) above, the 1940 Act requires the Fund to maintain at all times an asset coverage of at least 300% of the amount of its borrowings. For the purpose of borrowing money, asset coverage means the ratio that the value of the Fund's

total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Certain trading practices and investments may be considered to be borrowings and thus subject to the 1940 Act restrictions. On the other hand, certain practices and investments may involve leverage but are not considered to be borrowings under the 1940 Act, such as the purchasing of securities on a when-issued or delayed delivery basis, entering credit default swaps or futures contracts, engaging in short sales and writing options on portfolio securities, so long as the Fund covers its obligations by segregating liquid assets, entering into offsetting transactions or owning positions covering its obligations.

Except with respect to the Fund's ability to borrow under subparagraph (7) above, all limitations applicable to the Fund's investments (as stated above and elsewhere in this Statement of Additional Information) apply only at the time a transaction is entered into. Any subsequent change in a rating assigned by any rating service to a security (or, if unrated, deemed by ClearBridge Investments, LLC (f/k/a ClearBridge Advisors, LLC) (ClearBridge) to be of comparable quality), or change in the average maturity or duration of the Fund's investment portfolio, resulting from market fluctuations or other changes in the Fund's total assets, will not require the Fund to dispose of an investment until ClearBridge determines that it is practicable to sell or close out the investment without adverse market or tax consequences to the Fund. In the event that rating agencies assign different ratings to the same security, ClearBridge will treat the security as being in the highest rating category.

The Fund has neither sought nor obtained, nor does it currently intend to seek, any exemptive relief from the SEC.

The Fund may not change its policy to invest at least 80% of its Managed Assets in energy MLPs unless it provides stockholders with at least 60 days' written notice of such change.

INVESTMENT POLICIES AND TECHNIQUES

The following information supplements the discussion of the Fund's investment objective, policies, and techniques that are described in the Prospectus.

Under normal market conditions, the Fund invests at least 80% of its Managed Assets (as defined in the Prospectus) in energy MLPs (the 80% policy). For purposes of the 80% policy, the Fund considers investments in MLPs to include investments that offer economic exposure to public and private MLPs in the form of MLP equity securities, securities of entities holding primarily general partner or managing member interests in MLPs, securities that are derivatives of interests in MLPs, including I-Shares, exchange-traded funds that primarily hold MLP interests and debt securities of MLPs. Energy entities are engaged in the business of exploring, developing, producing, gathering, transporting, processing, storing, refining, distributing, mining or marketing natural gas, natural gas liquids (including propane), crude oil, refined petroleum products or coal. For as long as Energy MLP is in the name of the Fund, the Fund will invest at least 80% of its Managed Assets in energy MLPs. The Fund may not change its policy to invest at least 80% of its Managed Assets in energy MLPs unless it provides stockholders with at least 60 days' written notice of such change.

ClearBridge continues to believe that certain investors place too much emphasis on current distribution rates and do not effectively value an MLP's prospects for distribution growth. MLPs' distribution growth rates have historically varied widely, a trend that ClearBridge believes will continue in the future. ClearBridge also believes that distribution growth is the primary driver for MLP investment capital appreciation. A focus on MLPs with higher distribution growth rates, therefore, can help the Fund deliver attractive current distributions and offer the potential for above average total returns.

The Fund may invest up to 20% of its Managed Assets in securities of issuers that are not MLPs. This 20% allocation may be in any of the securities described in the Prospectus and the SAI. Such issuers may be treated as corporations for United States federal income tax purposes and, therefore, may not offer the tax benefits of investing in MLPs described in the Prospectus.

The Fund may invest up to 30% of its Managed Assets in unregistered or otherwise restricted securities. Restricted securities are securities that are unregistered, held by control persons of the issuer or subject to contractual restrictions on resale. In connection with its investments in restricted securities generally, the Fund may invest up to 15% of its Managed Assets in restricted securities issued by non-public companies.

The Fund may invest up to 20% of its Managed Assets in debt securities of MLPs and other issuers, including both investment grade debt securities and debt securities rated below investment grade (that is, rated Ba or lower by Moody's, BB+ or lower by S&P or Fitch, comparably rated by another NRSRO, or, if unrated, as determined by ClearBridge to be of comparable credit quality).

Portfolio Composition

Master Limited Partnerships

Entities commonly referred to as MLPs are generally organized under state law as limited partnerships or limited liability companies. The securities issued by many MLPs are listed and traded on a securities exchange. An MLP typically issues general partner and limited partner interests, or managing member and member interests. The general partner or managing member manages and often controls, has an ownership stake in, and is normally eligible to receive incentive distribution payments from, the MLP. If publicly traded, to be treated as a partnership for United States federal income tax purposes, an MLP must derive at least 90% of its gross income for each taxable year from specified qualifying sources as described in Section 7704 of the Internal Revenue Code of 1986, as amended (the Code).

These qualifying sources include interest, dividends, real estate rents, gain from the sale or disposition of real property, income and gain from mineral or natural resources activities, income and gain from the transportation or storage of certain fuels, and, in certain circumstances, income and gain from commodities or futures, forwards and options with respect to commodities. Mineral or natural resources activities include exploration, development, production, processing, mining, refining, marketing and transportation (including pipelines), of oil and gas, minerals, geothermal energy, fertilizer, timber or industrial source carbon dioxides. The

general partner or managing member may be structured as a private or publicly traded corporation or other entity. The general partner or managing member typically control the operations and management of the entity through an up to 2% general partner or managing member interest in the entity plus, in many cases, ownership of some percentage of the outstanding limited partner or member interests. The limited partners or members, through their ownership of limited partner or member interests, provide capital to the entity, are intended to have no role in the operation and management of the entity and receive cash distributions. Due to their structure as partnerships for United States federal income tax purposes and the expected character of their income, MLPs generally do not pay United States federal income taxes. Thus, unlike investors in corporate securities, direct MLP investors are generally not subject to double taxation (i.e., corporate level tax and tax on corporate dividends). Currently, most MLPs operate in the energy, natural resources or real estate sectors. For a further discussion of the United States federal income tax consequences relating to the MLPs, see Certain United States Federal Income Tax Considerations.

MLPs are typically structured such that common units and general partner or managing member interests have first priority to receive the minimum quarterly distributions (MQD). Common and general partner or managing member interests also accrue arrearages in distributions to the extent the MQD is not paid. Once common units and general partner or managing member interests have been paid, subordinated units generally receive distributions; however, subordinated units generally do not accrue arrearages. The subordinated units are normally owned by the owners or affiliates of the general partner or managing member and convert on a one for one basis into common units, generally in three to five years after the MLP s initial public offering or after certain distribution levels have been exceeded. Distributable cash in excess of the MQD is distributed to both common and subordinated units generally on a pro rata basis. The general partner or managing member is also normally eligible to receive incentive distributions if the general partner or managing member operates the business in a manner which results in payment of per unit distributions that exceed threshold levels above the MQD. As the general partner or managing member increases cash distributions to the limited partners or members, the general partner or managing member receives an increasingly higher percentage of the incremental cash distributions. A common arrangement provides that the general partner or managing member can reach a tier where it receives 50% of every incremental dollar distributed by the MLP. These incentive distributions encourage the general partner or managing member to increase the partnership s cash flow and raise the quarterly cash distribution by pursuing steady cash flow investment opportunities, streamlining costs and acquiring assets. Such results benefit all security holders of the MLP.

Energy MLPs can generally be classified into the following categories:

Pipeline MLPs. Pipeline MLPs are common carrier transporters of natural gas, natural gas liquids (primarily propane, ethane, butane and natural gasoline), crude oil or refined petroleum products (gasoline, diesel fuel and jet fuel). Pipeline MLPs also may operate ancillary businesses such as storage and marketing of such products. Pipeline MLPs derive revenue from capacity and transportation fees. Historically, pipeline output has been less exposed to cyclical economic forces due to its contract structure and government-regulated nature. In addition, most pipeline MLPs have limited direct commodity price exposure because they do not own the product being shipped.

Processing MLPs. Processing MLPs are gatherers and processors of natural gas as well as providers of transportation, fractionation and storage of natural gas liquids (NGLs). Processing MLPs derive revenue from providing services to natural gas producers, which require treatment or processing before their natural gas commodity can be marketed to utilities and other end user markets. Revenue for the processor is fee based, although it is not uncommon to have some participation in the prices of the natural gas and NGL commodities for a portion of revenue.

Gathering and Processing MLPs. Gathering and processing companies are subject to natural declines in the production of oil and natural gas fields, which utilize their gathering and processing facilities as a way to market their production, prolonged declines in the price of natural gas or crude oil, which curtails drilling activity and therefore production, and declines in the prices of natural gas liquids and refined petroleum products, which cause lower processing margins. In addition, some gathering and processing contracts subject the gathering or processing company to direct commodities price risk.

Midstream MLPs. Midstream MLPs and energy companies that provide crude oil, refined product and natural gas services are subject to supply and demand fluctuations in the markets they serve which will be impacted by a wide range of factors including, fluctuating commodity prices, weather, increased conservation or use of alternative fuel sources, increased governmental or environmental regulation, depletion, rising interest rates, declines in domestic or foreign production, accidents or catastrophic events, and economic conditions, among others.

Exploration and Production MLPs (E&P MLPs). E&P MLPs include MLPs that are engaged in the exploration, development, production and acquisition of crude oil and natural gas properties. E&P MLP cash flows generally depend on the volume of crude oil and natural gas produced and the realized prices received for crude oil and natural gas sales.

Propane MLPs. Propane MLPs are distributors of propane to homeowners for space and water heating. Propane MLPs derive revenue from the resale of the commodity on a margin over wholesale cost. The ability to maintain margin is a key to profitability. Propane serves a small portion of the household energy needs in the United States, largely for homes beyond the geographic reach of natural gas distribution pipelines. A majority of annual cash flow is earned during the winter heating season (October through March). Accordingly, volumes are weather dependent, but have utility type functions similar to electricity and natural gas.

Coal MLPs. Coal MLPs own, lease and manage coal reserves. Coal MLPs derive revenue from production and sale of coal, or from royalty payments related to leases to coal producers. Electricity generation is the primary use of coal in the United States. Demand for electricity and supply of alternative fuels to generators are the primary drivers of coal demand. Coal MLPs are subject to operating and production risks, such as: the MLP or a lessee meeting necessary production volumes; federal, state and local laws and regulations which may limit the ability to produce coal; the MLP's ability to manage production costs and pay mining reclamation costs; and the effect on demand that the Environmental Protection Agency's standards set in the Clean Air Act or other laws, regulations or trends have on coal end-users.

Marine Shipping MLPs. Marine shipping MLPs are primarily marine transporters of natural gas, crude oil or refined petroleum products. Marine shipping MLPs derive revenue from charging customers for the transportation of these products utilizing the MLPs' vessels. Transportation services are typically provided pursuant to a charter or contract, the terms of which vary depending on, for example, the length of use of a particular vessel, the amount of cargo transported, the number of voyages made, the parties operating a vessel or other factors.

MLPs typically achieve distribution growth by internal and external means. MLPs achieve growth internally by experiencing higher commodity volume driven by the economy and population, and through the expansion of existing operations including increasing the use of underutilized capacity, pursuing projects that can leverage and gain synergies with existing infrastructure and pursuing so called "greenfield" projects. External growth is achieved by making accretive acquisitions. MLPs also may achieve external growth due to higher commodity prices.

MLPs are subject to various federal, state and local environmental laws and health and safety laws as well as laws and regulations specific to their particular activities. These laws and regulations address: health and safety standards for the operation of facilities, transportation systems and the handling of materials; air and water pollution requirements and standards; solid waste disposal requirements; land reclamation requirements; and requirements relating to the handling and disposition of hazardous materials. MLPs are subject to the costs of compliance with such laws applicable to them, and changes in such laws and regulations may adversely affect their results of operations.

MLPs operating interstate pipelines and storage facilities are subject to substantial regulation by the Federal Energy Regulatory Commission (FERC), which regulates interstate transportation rates, services and other matters regarding natural gas pipelines including: the establishment of rates for service; regulation of pipeline storage and liquefied natural gas facility construction; issuing certificates of need for companies intending to provide energy services or constructing and operating interstate pipeline and storage facilities; and certain other

matters. FERC also regulates the interstate transportation of crude oil, including: regulation of rates and practices of oil pipeline companies; establishing equal service conditions to provide shippers with equal access to pipeline transportation; and establishment of reasonable rates for transporting petroleum and petroleum products by pipeline.

MLPs may be subject to liability relating to the release of substances into the environment, including liability under federal Superfund and similar state laws for investigation and remediation of releases and threatened releases of hazardous materials, as well as liability for injury and property damage for accidental events, such as explosions or discharges of materials causing personal injury and damage to property. Such potential liabilities could have a material adverse effect upon the financial condition and results of operations of MLPs.

MLPs are subject to numerous business related risks, including: deterioration of business fundamentals reducing profitability due to development of alternative energy sources, consumer sentiment with respect to global warming, changing demographics in the markets served, unexpectedly prolonged and precipitous changes in commodity prices and increased competition that reduces the MLP's market share; the lack of growth of markets requiring growth through acquisitions; disruptions in transportation systems; the dependence of certain MLPs upon the energy exploration and development activities of unrelated third parties; availability of capital for expansion and construction of needed facilities; a significant decrease in natural gas production due to depressed commodity prices or otherwise; the inability of MLPs to successfully integrate recent or future acquisitions; and the general level of the economy.

Non-MLPs

The Fund may also invest in companies that are not organized as MLPs. Non-MLP companies may include companies that operate energy assets but which are organized as corporations or limited liability companies rather than in partnership form. Generally, the partnership form is more suitable for companies that operate assets which generate more stable cash flows. Companies that operate midstream assets (e.g., transporting, processing, storing, distributing and marketing) tend to generate more stable cash flows than those that engage in exploration and development or delivery of products to the end consumer. Non-MLP companies also may include companies that provide services directly related to the generation of income from energy-related assets, such as oil drilling services, pipeline construction and maintenance, and compression services.

The energy industry and particular energy infrastructure companies may be adversely affected by possible terrorist attacks, such as the attacks that occurred on September 11, 2001. It is possible that facilities of energy infrastructure companies, due to the critical nature of their energy businesses to the United States, could be direct targets of terrorist attacks or be indirectly affected by attacks on others. They may have to incur significant additional costs in the future to safeguard their assets. In addition, changes in the insurance markets after September 11, 2001 may make certain types of insurance more difficult to obtain or obtainable only at significant additional cost. To the extent terrorism results in a lower level of economic activity, energy consumption could be adversely affected, which would reduce revenues and impede growth. Terrorist or war related disruption of the capital markets could also affect the ability of energy infrastructure companies to raise needed capital.

Securities

MLP Equity Securities

Equity securities issued by MLPs currently consist of common units, subordinated units and preferred units.

MLP Common Units. The common units of many MLPs are listed and traded on national securities exchanges, including the NYSE and the NASDAQ Stock Market (the "NASDAQ"). The Fund typically purchases such common units through open market transactions and underwritten offerings, but may also acquire common units through direct placements and privately negotiated transactions. Holders of MLP common units typically have very limited control and voting rights. Holders of such common units are typically entitled to receive the MQD, including arrearage rights, from the issuer. Generally, an MLP must pay (or set aside for payment) the MQD to holders of common units before any distributions may be paid to subordinated unit

holders. In addition, incentive distributions are typically not paid to the general partner or managing member unless the quarterly distributions on the common units exceed specified threshold levels above the MQD. In the event of a liquidation, common unit holders are intended to have a preference to the remaining assets of the issuer over holders of subordinated units. Master limited partnerships also issue different classes of common units that may have different voting, trading, and distribution rights. The Fund may invest in different classes of common units.

MLP Subordinated Units. Subordinated units, which, like common units, represent limited partner or member interests, are not typically listed on an exchange or publicly traded. The Fund typically purchases outstanding subordinated units through negotiated transactions directly with holders of such units or newly-issued subordinated units directly from the issuer. Holders of such subordinated units are generally entitled to receive a distribution only after the MQD and any arrearages from prior quarters have been paid to holders of common units. Holders of subordinated units typically have the right to receive distributions before any incentive distributions are payable to the general partner or managing member. Subordinated units generally do not provide arrearage rights. Most MLP subordinated units are convertible into common units after the passage of a specified period of time or upon the achievement by the issuer of specified financial goals. Master limited partnerships also issue different classes of subordinated units that may have different voting, trading, and distribution rights. The Fund may invest in different classes of subordinated units.

MLP Preferred Units. MLP preferred units are not typically listed on an exchange or publicly traded. The Fund typically purchases MLP preferred units through negotiated transactions directly with MLPs, affiliates of MLPs and institutional holders of such units. Holders of MLP preferred units can be entitled to a wide range of voting and other rights, depending on the structure of each separate security.

Other Equity Securities

The Fund may invest in equity securities issued by affiliates of MLPs, including the general partners or managing members of MLPs. Such issuers may be organized and/or taxed as corporations and therefore may not offer the advantageous tax characteristics of MLP units. The Fund intends to purchase equity securities through market transactions, but may also acquire equity securities through direct placements.

I-Shares. I-Shares represent an ownership interest issued by an MLP affiliate. The MLP affiliate uses the proceeds from the sale of I-Shares to purchase limited partnership interests in the MLP in the form of I-units. Thus, I-Shares represent an indirect interest in a MLP limited partnership interest. I-units generally have similar features as MLP common units in terms of voting rights and distribution but often may be subordinated in liquidation rights. I-Shares themselves have limited voting rights and are similar in that respect to MLP common units. I-Shares differ from MLP common units primarily in that instead of receiving cash distributions, holders of I-Shares will receive distributions of additional I-Shares (which are generally tax-free) in an amount equal to the cash distributions received by common unit holders. I-Shares are traded on the NYSE. For purposes of the Fund's 80% policy, securities that are derivatives of interests in MLPs include I-Shares and other derivative securities that have economic characteristics of MLP securities.

MLP General Partner or Managing Member Interests. The general partner or managing member interest in MLPs is typically retained by the original sponsors of an MLP, such as its founders, corporate partners and entities that sell assets to the MLP. The holder of the general partner or managing member interest can be liable in certain circumstances for amounts greater than the amount of the holder's investment in the general partner or managing member. General partner or managing member interests often confer direct board participation rights in, and in many cases control over the operations of, the MLP. General partner or managing member interests can be privately held or owned by publicly traded entities. General partner or managing member interests receive cash distributions, typically in an amount of up to 2% of available cash, which is contractually defined in the partnership or limited liability company agreement. In addition, holders of general partner or managing member interests typically receive incentive distribution rights, which provide them with an increasing share of the entity's aggregate cash distributions upon the payment of common unit distributions that exceed specified threshold levels above the MQD. Due to the incentive distribution rights, GP MLPs have higher distribution growth prospects than their underlying MLPs, but quarterly incentive distribution payments would also decline at

a greater rate than the decline rate in quarterly distributions to common and subordinated unit holders in the event of a reduction in the MLP's quarterly distribution. The ability of the limited partners or members to remove the general partner or managing member without cause is typically very limited. In addition, some MLPs permit the holder of incentive distribution rights to reset, under specified circumstances, the incentive distribution levels and receive compensation in exchange for the distribution rights given up in the reset.

Non-MLP Equity Securities

The Fund also may invest in common and preferred stock, convertible securities, warrants and depository receipts of companies that are organized as corporations, limited liability companies or limited partnerships.

Common Stock. Common stock generally represents an equity ownership interest in an issuer. Although common stocks have historically generated higher average total returns than fixed-income securities over the long term, common stocks also have experienced significantly more volatility in those returns and may under-perform relative to fixed-income securities during certain periods. An adverse event, such as an unfavorable earnings report, may depress the value of a particular common stock held by us. Also, prices of common stocks are sensitive to general movements in the stock market and a drop in the stock market may depress the price of common stocks to which the Fund has exposure. Common stock prices fluctuate for several reasons including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, or the occurrence of political or economic events which effect the issuers. In addition, common stock prices may be particularly sensitive to rising interest rates, which increases borrowing costs and the costs of capital.

Preferred Stock. Preferred stock has a preference over common stock in liquidation (and generally as to dividends as well) but is subordinated to the liabilities of the issuer in all respects. As a general rule, the market value of preferred stock with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk, while the market price of convertible preferred stock generally also reflects some element of conversion value. Because preferred stock is junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similarly stated yield characteristics. The market value of preferred stock will also generally reflect whether (and if so when) the issuer may force holders to sell their preferred shares back to the issuer and whether (and if so when) the holders may force the issuer to buy back their preferred shares. Generally, the right of the issuer to repurchase the preferred stock tends to reduce any premium that the preferred stock might otherwise trade at due to interest rate or credit factors, while the right of the holders to require the issuer to repurchase the preferred stock tends to reduce any discount that the preferred stock might otherwise trade at due to interest rate or credit factors. In addition, some preferred stocks are non-cumulative, meaning that the dividends do not accumulate and need not ever be paid. A portion of the portfolio may include investments in non-cumulative preferred securities, whereby the issuer does not have an obligation to make up any arrearages to its shareholders. There is no assurance that dividends or distributions on non-cumulative preferred stocks in which the Fund invests will be declared or otherwise paid. Preferred stock of certain companies offers the opportunity for capital appreciation as well as periodic income. This may be particularly true in the case of companies that have performed below expectations. If a company's performance has been poor enough, its preferred stock may trade more like common stock than like other fixed income securities, which may result in above average appreciation if the company's performance improves.

Convertible Securities. A convertible security is a preferred stock, warrant or other security that may be converted into or exchanged for a prescribed amount of common stock or other security of the same or a different issuer or into cash within a particular period of time at a specified price or formula. A convertible security generally entitles the holder to receive the dividend paid on preferred stock until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities generally have characteristics similar to both fixed income and equity securities. The value of convertible securities tends to decline as interest rates rise and, because of the conversion feature, tends to vary with fluctuations in the market value of the underlying securities. Convertible securities ordinarily provide a stream of income with generally higher yields than those of common stock of the same or similar issuers. Convertible securities generally rank senior to

common stock in a corporation's capital structure but are usually subordinated to comparable non-convertible securities. Convertible securities generally do not participate directly in any dividend increases or decreases of the underlying securities although the market prices of convertible securities may be affected by any dividend changes or other changes in the underlying securities.

Warrants and Rights. The Fund may invest in warrants or rights (including those acquired in units or attached to other securities) that entitle the holder to buy equity securities at a specific price for a specific period of time but does so only if such equity securities are deemed appropriate by ClearBridge for inclusion in the Fund's portfolio.

Restricted Securities and Securities with Limited Trading Markets

The Fund may purchase securities for which there is a limited trading market or which are subject to restrictions on resale to the public. If the Fund were to assume substantial positions in securities with limited trading markets, the activities of the Fund could have an adverse effect upon the liquidity and marketability of such securities and the Fund might not be able to dispose of its holdings in those securities at then current market prices. Circumstances could also exist when portfolio securities might have to be sold by the Fund at times which otherwise might be considered to be disadvantageous so that the Fund might receive lower proceeds from such sales than it had expected to realize. Investments in restricted securities may involve added expenses to the Fund should the Fund be required to bear registration costs with respect to such securities. The Fund could also be delayed in disposing of such securities which might have an adverse effect upon the price and timing of sales and the liquidity of the Fund. Restricted securities and securities for which there is a limited trading market may be significantly more difficult to value due to the unavailability of reliable market quotations for such securities, and investment in such securities may have an adverse impact on net asset value. As more fully described below, the Fund may purchase Rule 144A securities for which there may be a secondary market of qualified institutional buyers as contemplated by Rule 144A under the 1933 Act.

Royalty Trusts

The Fund may invest in royalty trusts. However, such investments do not count towards the Fund's 80% policy. Royalty trusts are publicly traded investment vehicles that gather income on royalties and pay out almost all cash flows to stockholders as distributions. Royalty trusts typically have no physical operations and no management or employees. Typically royalty trusts own the rights to royalties on the production and sales of a natural resource, including oil, gas, minerals and timber. As these deplete, production and cash flows steadily decline, which may decrease distributions. Royalty trusts are, in some respects, similar to certain MLPs and include risks similar to those MLPs.

Debt Securities

The Fund may invest in debt securities. Debt securities may have fixed or variable principal payments and all types of interest rate and dividend payment and reset terms, including fixed rate, adjustable rate, zero coupon, contingent, deferred, payment in kind and auction rate features. To the extent the Fund invests in auction rate securities, the Fund will be subject to certain risks associated with participating in an auction, including the risk that an auction may fail and the Fund may lose its investment. The Fund has the flexibility to invest in debt securities that are below investment grade quality (that is, rated Ba1 or lower by Moody's or BB+ or lower by S&P or Fitch), commonly referred to as high yield securities or junk bonds. Issuers of securities rated Ba1/BB+ are regarded as having current capacity to make principal and interest payments but are subject to business, financial or economic conditions which could adversely affect such payment capacity. Debt securities rated Baa3 or BBB- or above are considered investment grade securities. Debt securities rated below investment grade quality are obligations of issuers that are considered predominately speculative with respect to the issuer's capacity to pay interest and repay principal according to the terms of the obligation and, therefore, carry greater investment risk, including the possibility of issuer default and bankruptcy and increased market price volatility. Debt securities rated below investment grade tend to be less marketable than higher-quality securities because the market for them is less broad.

A general description of Moody's, S&P's and Fitch's ratings of bonds is set forth in Appendix A hereto. The ratings of Moody's, S&P and Fitch generally represent their opinions as to the quality of the bonds they rate. It should be emphasized, however, that such ratings are relative and subjective, are not absolute standards of quality, are subject to change and do not evaluate the market risk and liquidity of the securities. Consequently, bonds with the same maturity, coupon and rating may have different yields while obligations of the same maturity and coupon with different ratings may have the same yield.

If a security satisfies the Fund's minimum rating criteria at the time of purchase and is subsequently downgraded below such rating, the Fund will not be required to dispose of such security. If a downgrade occurs, ClearBridge will consider what action, including the sale of such security, is in the best interest of the Fund and its stockholders.

Securities Rated Below Investment Grade (High Yield or Junk Bonds)

Under rating agency guidelines, medium- and lower-rated securities and comparable unrated securities will likely have some quality and protective characteristics that are outweighed by large uncertainties or major risk exposures to adverse conditions. Medium- and lower-rated securities may have poor prospects of ever attaining any real investment standing, may have a current identifiable vulnerability to default or be in default, may be unlikely to have the capacity to pay interest and repay principal when due in the event of adverse business, financial or economic conditions, and/or may be likely to be in default or not current in the payment of interest or principal. Such securities are considered speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations. Accordingly, it is possible that these types of factors could reduce the value of securities held by the Fund with a commensurate effect on the value of the Fund's shares.

The secondary markets for high yield securities are generally not as liquid as the secondary markets for higher rated securities. The secondary markets for high yield securities are concentrated in relatively few market makers and participants in the market are mostly institutional investors, including insurance companies, banks, other financial institutions and mutual funds. In addition, the trading volume for high yield securities is generally lower than that for higher-rated securities, and the secondary markets could contract under adverse market or economic conditions independent of any specific adverse changes in the condition of a particular issuer. These factors may have an adverse effect on the ability of the Fund to dispose of particular portfolio investments, may adversely affect the Fund's net asset value per share and may limit the ability of the Fund to obtain accurate market quotations for purposes of valuing securities and calculating net asset value. If the Fund is not able to obtain precise or accurate market quotations for a particular security, it will become more difficult to value the Fund's portfolio securities, and a greater degree of judgment may be necessary in making such valuations. Less liquid secondary markets may also affect the ability of the Fund to sell securities at their fair value. If the secondary markets for high yield securities contract due to adverse economic conditions or for other reasons, certain liquid securities in the Fund's portfolio may become illiquid and the proportion of the Fund's assets invested in illiquid securities may significantly increase.

Prices for high yield securities may be affected by legislative and regulatory developments. These laws could adversely affect the Fund's net asset value and investment practices, the secondary market for high yield securities, the financial condition of issuers of these securities and the value of outstanding high yield securities. For example, federal legislation requiring the divestiture by federally insured savings and loan associations of their investments in high yield bonds and limiting the deductibility of interest by certain corporate issuers of high yield bonds adversely affected the market in the past. See *Risks Below Investment Grade (High Yield) Securities Risk* in the Prospectus.

Zero Coupon Securities and Payment-In-Kind Securities

The Fund may invest in zero coupon securities and payment-in-kind securities. Zero coupon securities are debt securities that pay no cash income and are sold at substantial discounts from their value at maturity. When a zero coupon security is held to maturity, its entire return, which consists of the amortization discount, comes from the difference between its purchase price and its maturity value. This difference is known at the time of

purchase, so that investors holding zero coupon securities until maturity know at the time of their investment what the expected return on their investment will be, assuming full repayment of the bond. The Fund also may purchase payment-in-kind securities. Payment-in-kind securities pay all or a portion of their interest in the form of debt or equity securities rather than cash.

Zero coupon securities and payment-in-kind securities tend to be subject to greater price fluctuations in response to changes in interest rates than are ordinary interest-paying debt securities with similar maturities. The value of zero coupon securities appreciates more during periods of declining interest rates and depreciates more during periods of rising interest rates than ordinary interest-paying debt securities with similar maturities. Zero coupon securities and payment-in-kind securities may be issued by a wide variety of corporate and governmental issuers.

Current United States federal income tax law requires the holder of a zero coupon security, certain payment-in-kind securities, and certain other securities acquired at a discount to accrue income with respect to these securities prior to the receipt of cash payments.

Variable Rate Obligations

The Fund may invest in variable rate obligations. Variable rate obligations bear interest at rates that are not fixed, but vary with changes in specified market rates or indexes, such as the prime rate, and at specified intervals. Such obligations include, but are not limited to, variable rate master demand notes, which are unsecured instruments issued pursuant to an agreement between the issuer and the holder that permit the indebtedness thereunder to vary and provide for periodic adjustments in the interest rate.

Certain of the variable rate obligations that may be purchased by the Fund may carry a demand feature that would permit the holder to tender them back to the issuer of the instrument or to a third party at par value prior to maturity. Some of the demand instruments that may be purchased by the Fund may not trade in a secondary market and would derive their liquidity solely from the ability of the holder to demand repayment from the issuer or third party providing credit support. If a demand instrument is not traded in a secondary market, the Fund will nonetheless treat the instrument as readily marketable for the purposes of determining whether the instrument is an illiquid security unless the demand feature has a notice period of more than seven days in which case the instrument will be characterized as not readily marketable and therefore illiquid. ClearBridge monitors on an ongoing basis the ability of an issuer of a demand instrument to pay principal and interest on demand.

The Fund's right to obtain payment at par on a demand instrument could be affected by events occurring between the date the Fund elects to demand payment and the date payment is due that may affect the ability of the issuer of the instrument or the third party providing credit support to make payment when due, except when such demand instruments permit same day settlement. To facilitate settlement, these same day demand instruments may be held in book entry form at a bank other than the Fund's custodian subject to a sub-custodian agreement approved by the Fund between that bank and the Fund's custodian.

U.S. Government Obligations

Securities issued or guaranteed by U.S. Government agencies and instrumentalities include obligations that are supported by: (a) the full faith and credit of the U.S. Treasury (e.g., direct pass-through certificates of the Government National Mortgage Association (Ginnie Maes)); (b) the limited authority of the issuer or guarantor to borrow from the U.S. Treasury (e.g., obligations of Federal Home Loan Banks); or (c) only the credit of the issuer or guarantor (e.g., obligations of the Federal Home Loan Mortgage Corporation (Freddie Macs)). In the case of obligations not backed by the full faith and credit of the U.S. Treasury, the agency issuing or guaranteeing the obligation is principally responsible for ultimate repayment.

Agencies and instrumentalities that issue or guarantee debt securities and that have been established or sponsored by the U.S. Government include, in addition to those identified above, the Bank for Cooperatives, the Export-Import Bank, the Federal Farm Credit System, the Federal Intermediate Credit Banks, the Federal Land Banks, the Federal National Mortgage Association and the Student Loan Marketing Association.

Loans of Portfolio Securities

The Fund may lend portfolio securities to brokers or dealers or other financial institutions although it has no current intention to do so. The procedure for the lending of securities includes the following features and conditions. The borrower of the securities deposit cash or liquid securities with the Fund in an amount equal to a minimum of 100% of the market value of the securities lent. The Fund invests the cash collateral in short-term debt securities or cash equivalents and earn the interest thereon. A negotiated portion of the income so earned may be paid to the borrower and/or the broker who arranged the loan. If the Fund receives securities as collateral, the Fund receives a fee from the borrower. If the value of the collateral drops below the required minimum at any time, the borrower may be called upon to post additional collateral. If the additional collateral is not paid, the loan will be immediately due and the Fund may use the collateral or its own cash to replace the securities by purchase in the open market charging any loss to the borrower. These are demand loans and may be terminated by the Fund at any time. The Fund receives any dividends and interest paid on the securities lent and the loans are structured to assure that the Fund is able to exercise its voting rights on the securities.

Rule 144A Securities

The Fund may purchase Rule 144A securities for which there is a secondary market of qualified institutional buyers, as defined in Rule 144A promulgated under the 1933 Act. Rule 144A provides an exemption from the registration requirements of the 1933 Act for the resale of certain restricted securities to qualified institutional buyers.

The Board of Directors of the Fund has determined that Rule 144A securities may be considered liquid securities if so determined by ClearBridge. ClearBridge has adopted policies and procedures for the purpose of determining whether securities that are eligible for resales under Rule 144A are liquid or illiquid. Pursuant to those policies and procedures, ClearBridge may make the determination as to whether a particular security is liquid or illiquid with consideration to be given to, among other things, the frequency of trades and quotes for the security, the number of dealers willing to sell the security, the number of potential purchasers, dealer undertakings to make a market in the security, the nature of the security and the time needed to dispose of the security.

To the extent that liquid Rule 144A securities that the Fund holds become illiquid, due to the lack of sufficient qualified institutional buyers or market or other conditions, the percentage of the Fund's assets invested in illiquid assets would increase. ClearBridge monitors Fund investments in Rule 144A securities and considers appropriate measures to enable the Fund to meet any investment limitations and to maintain sufficient liquidity for operating purposes.

Short Sales

The Fund may engage in short sales for investment and risk management purposes, including when ClearBridge believes an investment will under-perform due to a greater sensitivity to earnings growth of the issuer, default risk or interest rates. Short sales are transactions in which the Fund sells a security or other instrument that it does not own but can borrow in the market. Short selling allows the Fund to profit from a decline in market price to the extent such decline exceeds the transaction costs and the costs of borrowing the securities and to obtain a low cost means of financing long investments that ClearBridge believes are attractive. When the Fund engages in a short sale on a security, it must borrow the security sold short and deliver it to the counterparty. The Fund will ordinarily have to pay a fee or premium to borrow particular securities and be obligated to repay the lender of the security any coupon or interest that accrues on the securities during the period of the loan. The amount of any gain from a short sale will be decreased, and the amount of any loss increased, by the amount of the premium, dividends, interest or expenses the Fund pays in connection with the short sale. Also, there is the risk that the counterparty to a short sale may fail to honor its contractual terms, causing a loss to the Fund.

During the period of the short sale, the Fund may be required to maintain the short sale proceeds that the broker holds and any additional assets the lending broker requires as collateral. The Fund may also be required to designate, on its books or the books of its custodian, liquid assets (less any additional collateral held by the

broker) to cover the short sale obligation, marked-to-market daily. Depending on the arrangements made with the broker or custodian, the Fund may or may not receive any payments (including interest) on collateral it has deposited with the broker.

Derivatives

The Fund may use various investment strategies described below to hedge market risks (such as broad or specific market movements), to manage the effective maturity or duration of debt instruments held by the Fund, or to seek to increase the Fund's income or gain.

The Fund may invest in options contracts, futures contracts, forward contracts, options on futures contracts and indexed securities for investment, hedging and risk management purposes, and other similar transactions, which may be developed to the extent that ClearBridge determines that they are consistent with the Fund's investment objective and policies and applicable regulatory requirements (collectively, these transactions are referred to as *Derivatives*). The Fund may also enter into interest rate transactions, which may take the form of swaps, caps, floors, collars and other combinations of options, forwards, swaps and/or futures.

The Fund is not a commodity pool (i.e., a pooled investment vehicle which trades in commodity futures contracts and options thereon and the operator of which is registered with the Commodity Futures Trading Commission (CFTC)), and Derivatives involving futures contracts and options on futures contracts are purchased, sold or entered into only for bona fide hedging purposes, provided that the Fund may enter into such transactions for purposes other than bona fide hedging if, immediately thereafter,

(i) the pro rata share of the sum of the amount of initial margin deposits on futures contracts entered into by the Fund and premiums paid for unexpired options with respect to such contracts does not exceed 5% of the liquidation value of the Fund's net assets, after taking into account unrealized profits and unrealized losses on such contracts and options (in the case of an option that is in-the-money at the time of purchase, the in-the-money amount may be excluded in calculating the 5% limitation); or

(ii) the aggregate notional value (i.e., the size of the contract, in contract units, times the current market price (futures position) or strike price (options position) of each such unit) of the contract, does not exceed the liquidation value of the Fund, after taking into account unrealized profits and unrealized losses on such contracts and options.

Derivatives involve special risks, including possible default by the other party to the transaction, illiquidity and, to the extent ClearBridge's view as to certain market movements is incorrect, the risk that the use of Derivatives could result in significantly greater losses than if they had not been used.

Futures Contracts. The Fund may trade futures contracts: (1) on domestic and foreign exchanges on bond indexes; and (2) on domestic and, to the extent permitted by the CFTC or SEC, as applicable, foreign exchanges on single stocks and stock indexes. Futures contracts are generally bought and sold on the commodities exchanges on which they are listed with payment of initial and variation margin as described below. The sale of a futures contract creates a firm obligation by the Fund, as seller, to deliver to the buyer the specific type of financial instrument called for in the contract at a specific future time for a specified price (or with respect to certain instruments, the net cash amount). The Fund is not a commodity pool, and the Fund, where permitted, uses futures contracts and options thereon solely: (i) for bona fide hedging purposes; and (ii) for other purposes in amounts permitted by the rules and regulations promulgated by the CFTC. The Fund's use of financial futures contracts and options thereon is in all cases consistent with applicable regulatory requirements and in particular the rules and regulations of the CFTC. Maintaining a futures contract or selling an option on a futures contract typically requires the Fund to deposit with a financial intermediary, as security for its obligations, an amount of cash or other specified assets (initial margin) that initially is from 1% to 10% of the face amount of the contract (but may be higher in some circumstances). Additional cash or assets (variation margin) may be required to be deposited thereafter daily as the mark-to-market value of the futures contract fluctuates. In addition, the value of all futures contracts sold by the Fund (adjusted for the historical volatility relationship between the Fund and the contracts) does not exceed the total market value of the Fund's securities. In addition, the value of the Fund's long futures and options positions (futures contracts on stock or bond indexes, and call

options on such futures contracts) does not exceed the sum of: (a) liquid assets segregated for this purpose; (b) cash proceeds on existing investments due within thirty days; and (c) accrued profits on the particular futures or options positions.

Options. In order to hedge against adverse market shifts or to increase income or gain, the Fund may purchase put and call options or write covered put and call options on securities or fixed income instruments or on futures contracts on securities or stock indexes. A call option is covered if, so long as the Fund is obligated as the writer of the option, it will: (i) own the underlying investment subject to the option; (ii) own securities convertible or exchangeable without the payment of any consideration into the securities subject to the option; (iii) own a call option on the relevant security with an exercise price no higher than the exercise price on the call option written or (iv) deposit with its custodian in a segregated account liquid assets having a value equal to the excess of the value of the security or index that is the subject of the call over the exercise price. A put option is covered if, to support its obligation to purchase the underlying investment if a put option that the Fund writes is exercised, the Fund will either (a) deposit with its custodian in a segregated account liquid assets having a value at least equal to the exercise price of the underlying investment or (b) continue to own an equivalent number of puts of the same series (that is, puts on the same underlying investment having the same exercise prices and expiration dates as those written by the Fund), or an equivalent number of puts of the same class (that is, puts on the same underlying investment) with exercise prices greater than those that it has written (or, if the exercise prices of the puts it holds are less than the exercise prices of those it has written, it will deposit the difference with its custodian in a segregated account). Parties to options transactions must make certain payments and/or set aside certain amounts of assets in connection with each transaction, as described below.

In all cases, except for certain options on interest rate futures contracts, by writing a call, the Fund limits its opportunity to profit from an increase in the market value of the underlying investment above the exercise price of the option for as long as the Fund's obligation as writer of the option continues. By writing a put, the Fund limits its opportunity to profit from a decrease in the market value of the underlying investment below the exercise price of the option for as long as the Fund's obligation as writer of the option continues. Upon the exercise of a put option written by the Fund, the Fund may suffer an economic loss equal to the difference between the price at which the Fund is required to purchase the underlying investment and its market value at the time of the option exercise, less the premium received for writing the option. Upon the exercise of a call option written by the Fund, the Fund may suffer an economic loss equal to an amount not less than the excess of the investment's market value at the time of the option exercise over the Fund's acquisition cost of the investment, less the sum of the premium received for writing the option and the positive difference, if any, between the call price paid to the Fund and the Fund's acquisition cost of the investment.

In all cases except for certain options on interest rate futures contracts, in purchasing a put option, the Fund seeks to benefit from a decline in the market price of the underlying investment, while in purchasing a call option, the Fund seeks to benefit from an increase in the market price of the underlying investment. If an option purchased is not sold or exercised when it has remaining value, or if the market price of the underlying investment remains equal to or greater than the exercise price, in the case of a put, or remains equal to or below the exercise price, in the case of a call, during the life of the option, the Fund will lose its investment in the option. For the purchase of an option to be profitable, the market price of the underlying investment must decline sufficiently below the exercise price, in the case of a put, and must increase sufficiently above the exercise price, in the case of a call, to cover the premium and transaction costs.

In the case of certain options on interest rate futures contracts, the Fund may purchase a put option in anticipation of a rise in interest rates, and purchase a call option in anticipation of a fall in interest rates. By writing a covered call option on interest rate futures contracts, the Fund limits its opportunity to profit from a fall in interest rates. By writing a covered put option on interest rate futures contracts, the Fund limits its opportunity to profit from a rise in interest rates.

The Fund may choose to exercise the options it holds, permit them to expire or terminate them prior to their expiration by entering into closing transactions. The Fund may enter into a closing purchase transaction in which the Fund purchases an option having the same terms as the option it had written or a closing sale transaction in

which the Fund sells an option having the same terms as the option it had purchased. A covered option writer unable to effect a closing purchase transaction will not be able to sell the underlying security until the option expires or the underlying security is delivered upon exercise, with the result that the writer will be subject to the risk of market decline in the underlying security during such period. Should the Fund choose to exercise an option, the Fund will purchase in the open market the securities, commodities or commodity futures contracts underlying the exercised option.

Exchange-listed options on securities and currencies, with certain exceptions, generally settle by physical delivery of the underlying security or currency, although in the future, cash settlement may become available. Frequently, rather than taking or making delivery of the underlying instrument through the process of exercising the option, listed options are closed by entering into offsetting purchase or sale transactions that do not result in ownership of the new option. Index options are cash settled for the net amount, if any, by which the option is in-the-money (that is, the amount by which the value of the underlying instrument exceeds, in the case of a call option, or is less than, in the case of a put option, the exercise price of the option) at the time the option is exercised.

Put options and call options typically have similar structural characteristics and operational mechanics regardless of the underlying instrument on which they are purchased or sold. Thus, the following general discussion relates to each of the particular types of options discussed in greater detail below. In addition, many Derivatives involving options require segregation of Fund assets in special accounts.

A put option gives the purchaser of the option, upon payment of a premium, the right to sell, and the writer of the option the obligation to buy, the underlying security, index, currency or other instrument at the exercise price. The Fund's purchase of a put option on a security, for example, might be designed to protect its holdings in the underlying instrument (or, in some cases, a similar instrument) against a substantial decline in the market value of such instrument by giving the Fund the right to sell the instrument at the option exercise price. A call option, upon payment of a premium, gives the purchaser of the option the right to buy, and the seller the obligation to sell, the underlying instrument at the exercise price. The Fund's purchase of a call option on a security, financial futures contract, index, currency or other instrument might be intended to protect the Fund against an increase in the price of the underlying instrument that it intends to purchase in the future by fixing the price at which it may purchase the instrument. An American style put or call option may be exercised at any time during the option exercised period. A European style put or call option may be exercised only upon expiration. A Bermudan style put or call option may be exercised at any time on fixed dates occurring during the term of the option. Exchange-listed options are issued by a regulated intermediary such as the Options Clearing Corporation (the OCC), which guarantees the performance of the obligations of the parties to the options. The discussion below uses the OCC as an example, but is also applicable to other similar financial intermediaries.

Index options are cash settled for the net amount, if any, by which the option is in-the-money (that is, the amount by which the value of the underlying instrument exceeds, in the case of a call option, or is less than, in the case of a put option, the exercise price of the option) at the time the option is exercised. Frequently, rather than taking or making delivery of the underlying instrument through the process of exercising the option, listed options are closed by entering into offsetting purchase or sale transactions that do not result in ownership of the new option.

The Fund's ability to close out its position as a purchaser or seller of an OCC-issued or exchange-listed put or call option is dependent, in part, upon the liquidity of the particular option market. Among the possible reasons for the absence of a liquid option market on an exchange are: (1) insufficient trading interest in certain options, (2) restrictions on transactions imposed by an exchange, (3) trading halts, suspensions or other restrictions imposed with respect to particular classes or series of options or underlying securities, including reaching daily price limits, (4) interruption of the normal operations of the OCC or an exchange, (5) inadequacy of the facilities of an exchange or the OCC to handle current trading volume, or (6) a decision by one or more exchanges to discontinue the trading of options (or a particular class or series of options), in which event the relevant market for that option on that exchange would cease to exist, although any such outstanding options on that exchange would continue to be exercisable in accordance with their terms.

The hours of trading for listed options may not coincide with the hours during which the underlying financial instruments are traded. To the extent that the option markets close before the markets for the underlying financial instruments, significant price and rate movements can take place in the underlying markets that would not be reflected in the corresponding option markets.

Over the counter (OTC) options are purchased from or sold to securities dealers, financial institutions or other parties (collectively referred to as Counterparties and individually referred to as a Counterparty) through a direct bilateral agreement with the Counterparty. In contrast to exchange-listed options, which generally have standardized terms and performance mechanics, all of the terms of an OTC option, including such terms as method of settlement, term, exercise price, premium, guaranties and security, are determined by negotiation of the parties. The Fund generally only enters into OTC options that have cash settlement provisions, although it is not be required to do so.

Unless the parties provide for it, no central clearing or guaranty function is currently expected to be involved in an OTC option. As a result, if a Counterparty fails to make or take delivery of the security, currency or other instrument underlying an OTC option it has entered into with the Fund or fails to make a cash settlement payment due in accordance with the terms of that option, the Fund will lose any premium it paid for the option as well as any anticipated benefit of the transaction. Thus, ClearBridge must assess the creditworthiness of each such Counterparty or any guarantor or credit enhancement of the Counterparty's credit to determine the likelihood that the terms of the OTC option will be met. The Fund enters into OTC option transactions only with U.S. government securities dealers recognized by the Federal Reserve Bank of New York as primary dealers, or broker-dealers, domestic or foreign banks, or other financial institutions that ClearBridge deems to be creditworthy. In the absence of a change in the current position of the SEC, OTC options purchased by the Fund and the amount of the Fund's obligation pursuant to an OTC option sold by the Fund (the cost of the sell-back plus the in-the-money amount, if any) or the value of the assets held to cover such options will be deemed illiquid.

If the Fund sells a call option, it is foregoing its participation in the appreciation in the value of the underlying asset; however, the premium that it receives may serve as a partial hedge, to the extent of the option premium, against an increase in the value of the underlying securities or instruments held by the Fund and may increase the Fund's income. Similarly, the sale of put options can also provide gains for the Fund.

The Fund may purchase and sell call options on securities that are traded on U.S. and foreign securities exchanges and in the OTC markets, and on securities indexes, currencies and futures contracts. All calls sold by the Fund must be covered (that is, the Fund must own the securities or futures contract subject to the call), or must otherwise meet the asset segregation requirements described below for so long as the call is outstanding. Even though the Fund receives the option premium to help protect it against loss, a call sold by the Fund exposes the Fund during the term of the option to possible loss of opportunity to realize appreciation in the market price of the underlying security or instrument and may require the Fund to hold a security or instrument that it might otherwise have sold.

The Fund reserves the right to purchase or sell options on instruments and indexes which may be developed in the future to the extent consistent with applicable law and the Fund's investment objective and the restrictions set forth herein.

The Fund may purchase and sell put options on securities (whether or not it holds the securities in its portfolio) and on securities indexes, currencies and futures contracts. In selling put options, the Fund faces the risk that it may be required to buy the underlying security at a disadvantageous price above the market price.

Options on Futures Contracts. The Fund may purchase put and call options and write covered put and call options on futures contracts on stock indexes traded on domestic and, to the extent permitted by the CFTC, foreign exchanges, in order to hedge all or a portion of its investments or to increase income or gain and may enter into closing transactions in order to terminate existing positions. There is no guarantee that such closing transactions can be effected. An option on a stock index futures contract, as contrasted with the direct investment in such a contract, gives the purchaser the right, in return for the premium paid, to assume a position in the

underlying contract at a specified exercise price at any time on or before the expiration date of the option. Upon exercise of an option, the delivery of the futures position by the writer of the option to the holder of the option will be accompanied by delivery of the accumulated balance in the writer's futures margin account. The potential loss related to the purchase of an option on a futures contract is limited to the premium paid for the option (plus transaction costs). While the price of the option is fixed at the point of sale, the value of the option does change daily and the change would be reflected in the net asset value of the Fund.

The purchase of an option on a financial futures contract involves payment of a premium for the option without any further obligation on the part of the Fund. If the Fund exercises an option on a futures contract it will be obligated to post initial margin (and potentially variation margin) for the resulting futures position just as it would for any futures position. Futures contracts and options thereon are generally settled by entering into an offsetting transaction, but no assurance can be given that a position can be offset prior to settlement or that delivery will occur.

Swaps, Caps, Floors and Collars. The Fund may enter into interest rate swaps and purchase or sell related caps, floors and collars. The Fund enters into these transactions primarily for hedging purposes and not as a speculative investment. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments with respect to a notional amount of principal). The purchase of a cap entitles the purchaser to receive payments on a notional principal amount from the party selling such cap to the extent that the interest rate exceeds a predetermined interest rate. The purchase of a floor entitles the purchaser to receive payments on a notional principal amount from the party selling such floor to the extent that the interest rate falls below a predetermined interest rate. A collar is a combination of a cap and a floor that preserves a certain return within a predetermined range of interest rates.

Risk Factors. Derivatives have special risks associated with them, including possible default by the counterparty to the transaction, illiquidity and, to the extent ClearBridge's view as to certain market movements is incorrect, the risk that the use of the Derivatives could result in losses greater than if they had not been used. Use of put and call options could result in losses to the Fund, force the purchase or sale, as the case may be, of written portfolio securities at inopportune times or for prices higher than (in the case of written put options) or lower than (in the case of written call options) current market values, or cause the Fund to hold a security it might otherwise sell.

The use of futures and options transactions entails certain special risks. In particular, the variable degree of correlation between price movements of futures contracts and price movements in the related securities position of the Fund could create the possibility that losses on the hedging instrument are greater than gains in the value of the Fund's position. In addition, futures and options markets could be illiquid in some circumstances and certain OTC options could have no markets. As a result, in certain markets, the Fund might not be able to close out a transaction without incurring substantial losses. Although the Fund's use of futures and options transactions for hedging should tend to minimize the risk of loss due to a decline in the value of the hedged position, at the same time it tends to limit any potential gain to the Fund that might result from an increase in value of the position. There is also the risk of loss by the Fund of margin deposits in the event of bankruptcy of a broker with whom the Fund has an open position in a futures contract or option thereon. Finally, the daily variation margin requirements for futures contracts create a greater ongoing potential financial risk than would purchases of options, in which case the exposure is limited to the cost of the initial premium. However, because option premiums paid by the Fund are generally small in relation to the market value of the investments underlying the options, buying options can result in large amounts of leverage. This leverage offered by trading in options could cause the Fund's net asset value to be subject to more frequent and wider fluctuation than would be the case if the Fund did not invest in options. See "Use of Leverage" in the Prospectus.

Options Risk. To the extent the Fund writes covered call options, the Fund loses the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but the Fund retains the risk of loss should the price of the underlying security decline. The writer of an option has no control over the time when it may be required to fulfill its obligation as a writer of

the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price. There can be no assurance that a liquid market will exist when the Fund seeks to close out an option position. If trading were suspended in an option purchased by us, the Fund would not be able to close out the option. If the Fund were unable to close out a covered call option that the Fund had written on a security, the Fund would not be able to sell the underlying security unless the option expired without exercise.

As is the case with futures and options strategies, the effective use of swaps and related transactions by the Fund may depend, among other things, on the Fund's ability to terminate the transactions at times when ClearBridge deems it desirable to do so. To the extent the Fund does not, or cannot, terminate such a transaction in a timely manner, the Fund may suffer a loss in excess of any amounts that it may have received, or expected to receive, as a result of entering into the transaction.

Because the amount of interest and/or principal payments which the issuer of indexed securities is obligated to make is linked to the prices of other securities, securities indexes, currencies, or other financial indicators, such payments may be significantly greater or less than payment obligations in respect of other types of debt securities. As a result, an investment in indexed securities may be considered speculative. Moreover, the performance of indexed securities depends to a great extent on the performance of, and may be more volatile than, the security, currency, or other instrument to which they are indexed, and may also be influenced by interest rate changes in the United States and abroad. At the same time, indexed securities are subject to the credit risks associated with the issuer of the security, and their values may decline substantially if the issuer's creditworthiness deteriorates.

The use of interest rate swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. Depending on market conditions in general, the Fund's use of swaps could enhance or harm the overall performance of the Common Stock. To the extent interest rates decline, the value of the interest rate swap could decline and could result in a decline in the net asset value of the Common Stock. In addition, if short-term interest rates are lower than its fixed rate of payment on the interest rate swap, the swap will reduce its net earnings.

Interest rate swaps do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to interest rate swaps is limited to the net amount of interest payments that the Fund is contractually obligated to make. If the counterparty defaults, the Fund would not be able to use the anticipated net receipts under the swap to offset any declines in the value of its portfolio assets being hedged or the increase in its cost of leverage. Depending on whether the Fund would be entitled to receive net payments from the counterparty on the swap, which in turn would depend on the general state of the market rates at that point in time, such a default could negatively impact the performance of the Fund.

Losses resulting from the use of Derivatives will reduce the Fund's net asset value, and possibly income, and the losses can be greater than if Derivatives had not been used. See *Risks Derivatives Risk* in the Prospectus.

When conducted outside the United States, Derivatives transactions may not be regulated as rigorously as in the United States, may not involve a clearing mechanism and related guarantees, and are subject to the risk of governmental actions affecting trading in, or the prices of, foreign securities, currencies and other instruments. In addition, the price of any foreign futures or foreign options contract and, therefore, the potential profit and loss thereon, may be affected by any variance in the foreign exchange rate between the time an order is placed and the time it is liquidated, offset or exercised. The value of positions taken as part of non-U.S. Derivatives also could be adversely affected by: (1) other complex foreign political, legal and economic factors, (2) lesser availability of data on which to make trading decisions than in the United States, (3) delays in the Fund's ability to act upon economic events occurring in foreign markets during non-business hours in the United States, (4) the imposition of different exercise and settlement terms and procedures and margin requirements than in the United States and (5) lower trading volume and liquidity.

Use of Segregated and Other Special Accounts. Use of many Derivatives by the Fund requires, among other things, that the Fund segregate liquid assets with its custodian, or a designated sub-custodian, to the extent the

Fund's obligations are not otherwise covered through ownership of the underlying security or financial instrument. In general, either the full amount of any obligation by the Fund to pay or deliver securities or assets must be covered at all times by the securities or instruments required to be delivered, or, subject to any regulatory restrictions, an amount of liquid assets at least equal to the current amount of the obligation must be segregated with the custodian or subcustodian in accordance with established procedures. The segregated assets cannot be sold or transferred unless equivalent assets are substituted in their place or it is no longer necessary to segregate them. A call option on securities written by the Fund, for example, requires the Fund to hold the securities subject to the call (or securities convertible into the needed securities without additional consideration) or to segregate liquid high grade debt obligations sufficient to purchase and deliver the securities if the call is exercised. A call option sold by the Fund on an index requires the Fund to own portfolio securities that correlate with the index or to segregate liquid high grade debt obligations equal to the excess of the index value over the exercise price on a current basis. A put option on securities written by the Fund requires the Fund to segregate liquid high grade debt obligations equal to the exercise price.

OTC options entered into by the Fund, including those on securities, financial instruments or indexes, and OCC-issued and exchange-listed index options generally provides for cash settlement, although the Fund is not required to do so. As a result, when the Fund sells these instruments it segregates an amount of assets equal to its obligations under the options. OCC-issued and exchange-listed options sold by the Fund other than those described above generally settle with physical delivery, and the Fund segregates an amount of assets equal to the full value of the option. OTC options settling with physical delivery or with an election of either physical delivery or cash settlement are treated the same as other options settling with physical delivery.

In the case of a futures contract or an option on a futures contract, the Fund must deposit the initial margin and, in some instances, the daily variation margin in addition to segregating liquid assets sufficient to meet its obligations to purchase or provide securities or currencies, or to pay the amount owed at the expiration of an index-based futures contract. The Fund accrues the net amount of the excess, if any, of its obligations relating to swaps over its entitlements with respect to each swap on a daily basis and segregates with its custodian, or designated sub-custodian, an amount of liquid assets having an aggregate value equal to at least the accrued excess. Caps, floors and collars require segregation of liquid assets with a value equal to the Fund's net obligation, if any.

Derivatives may be covered by means other than those described above when consistent with applicable regulatory policies. The Fund may also enter into offsetting transactions so that its combined position, coupled with any segregated assets, equals its net outstanding obligation in related Derivatives. The Fund could purchase a put option, for example, if the strike price of that option is the same or higher than the strike price of a put option sold by the Fund. Moreover, instead of segregating assets if it holds a futures contract or forward contract, the Fund could purchase a put option on the same futures contract or forward contract with a strike price as high or higher than the price of the contract held. Other derivatives may also be offset in combinations. If the offsetting transaction terminates at the time of or after the primary transaction, no segregation is required, but if it terminates prior to that time, assets equal to any remaining obligation would need to be segregated.

Foreign Securities

Investors should recognize that investing in the securities of foreign issuers involves special considerations which are not typically associated with investing in the securities of U.S. issuers. Investments in securities of foreign issuers may involve risks arising from differences between U.S. and foreign securities markets, including less volume, much greater price volatility in and illiquidity of certain foreign securities markets, different trading and settlement practices and less governmental supervision and regulation, from changes in currency exchange rates, from high and volatile rates of inflation, from economic, social and political conditions such as wars, terrorism, civil unrest and uprisings, and, as with domestic multinational corporations, from fluctuating interest rates.

There may be less publicly-available information about a foreign issuer than about a U.S. issuer, and foreign issuers may not be subject to the same accounting, auditing and financial record-keeping standards and requirements as U.S. issuers. In particular, the assets and profits appearing on the financial statements of an

emerging market country issuer may not reflect its financial position or results of operations in the way they would be reflected had the financial statements been prepared in accordance with U.S. generally accepted accounting principles. In addition, for an issuer that keeps accounting records in local currency, inflation accounting rules may require, for both tax and accounting purposes, that certain assets and liabilities be restated on the issuer's balance sheet in order to express items in terms of currency of constant purchasing power. Inflation accounting may indirectly generate losses or profits. Consequently, financial data may be materially affected by restatements for inflation and may not accurately reflect the real condition of those issuers and securities markets. Finally, in the event of a default in any such foreign obligations, it may be more difficult for the Fund to obtain or enforce a judgment against the issuers of such obligations.

Other investment risks include the possible imposition of foreign withholding taxes on certain amounts of the Fund's income, the possible seizure or nationalization of foreign assets and the possible establishment of exchange controls, expropriation, confiscatory taxation, other foreign governmental laws or restrictions which might affect adversely payments due on securities held by the Fund, the lack of extensive operating experience of eligible foreign subcustodians and legal limitations on the ability of the Fund to recover assets held in custody by a foreign subcustodian in the event of the subcustodian's bankruptcy.

There generally is less governmental supervision and regulation of exchanges, brokers and issuers in foreign countries than there is in the United States. For example, there may be no comparable provisions under certain foreign laws to insider trading and similar investor protection securities laws that apply with respect to securities transactions consummated in the United States. Further, brokerage commissions and other transaction costs on foreign securities exchanges generally are higher than in the United States.

In some countries, banks or other financial institutions may constitute a substantial number of the leading companies or companies with the most actively traded securities. The 1940 Act limits the Fund's ability to invest in any equity security of an issuer which, in its most recent fiscal year, derived more than 15% of its revenues from securities related activities, as defined by the rules thereunder. These provisions may also restrict the Fund's investments in certain foreign banks and other financial institutions.

Foreign markets have different clearance and settlement procedures, and in certain markets there have been times when settlements have failed to keep pace with the volume of securities transactions, making it difficult to conduct such transactions. Further, satisfactory custodial services for investment securities may not be available in some countries having smaller, emerging capital markets, which may result in the Fund incurring additional costs and delays in transporting such securities outside such countries. Delays in settlement or other problems could result in periods when assets of the Fund are uninvested and no return is earned thereon. The inability of the Fund to make intended security purchases due to settlement problems or the risk of intermediary counterparty failures could cause the Fund to forego attractive investment opportunities. The inability to dispose of a portfolio security due to settlement problems could result either in losses to the Fund due to subsequent declines in the value of such portfolio security or, if the Fund has entered into a contract to sell the security, could result in possible liability to the purchaser.

Rules adopted under the 1940 Act permit the Fund to maintain its foreign securities and cash in the custody of certain eligible non-U.S. banks and securities depositories. Certain banks in foreign countries may not be eligible sub-custodians, as defined in the 1940 Act, for the Fund, in which event the Fund may be precluded from purchasing securities in certain foreign countries in which it otherwise would invest or which may result in the Fund's incurring additional costs and delays in providing transportation and custody services for such securities outside of such countries. The Fund may encounter difficulties in effecting on a timely basis portfolio transactions with respect to any securities of issuers held outside their countries. Other banks that are eligible foreign sub-custodians may be recently organized or otherwise lack extensive operating experience. In addition, in certain countries there may be legal restrictions or limitations on the ability of the Fund to recover assets held in custody by foreign sub-custodians in the event of the bankruptcy of the sub-custodian.

Certain of the risks associated with international investments and investing in smaller capital markets are heightened for investments in emerging market countries. For example, some of the currencies of emerging market countries have experienced devaluation relative to the U.S. dollar, and major adjustments have been made

periodically in certain of such currencies. Certain of such countries face serious exchange constraints. In addition, governments of many emerging market countries have exercised and continue to exercise substantial influence over many aspects of the private sector. In certain cases, the government owns or controls many companies. Accordingly, government actions in the future could have a significant effect on economic conditions in developing countries which could affect private sector companies and consequently, the value of certain securities held in the Fund's portfolio.

Investment in certain emerging market securities is restricted or controlled to varying degrees which may at times limit or preclude investment in certain emerging market securities and increase the costs and expenses of the Fund. Certain emerging market countries require governmental approval prior to investments by foreign persons, limit the amount of investment by foreign persons in a particular issuer, limit the investment by foreign persons only to a specific class of securities of an issuer that may have less advantageous rights than other classes, restrict investment opportunities in issuers in industries deemed important to national interests and/or impose additional taxes on foreign investors. For a discussion of the United States federal income tax consequences applicable to foreign investors, see *Certain United States Federal Income Tax Considerations Non-U.S. Holders*.

The manner in which foreign investors may invest in companies in certain emerging market countries, as well as limitations on such investments, also may have an adverse impact on the operations of the Fund. For example, the Fund may be required in some countries to invest initially through a local broker or other entity and then have the shares purchased re-registered in the name of the Fund. Re-registration may in some instances not occur on a timely basis, resulting in a delay during which the Fund may be denied certain of its rights as an investor.

Certain emerging market countries may require governmental approval for the repatriation of investment income, capital or the proceeds of sales of securities by foreign investors which could adversely affect the Fund. In addition, if a deterioration occurs in the country's balance of payments, it could impose temporary restrictions on foreign capital remittances. Investing in local markets in emerging market countries may require the Fund to adopt special procedures, seek local government approvals or take other actions, each of which may involve additional costs to the Fund.

With respect to investments in certain emerging market countries, different legal standards may have an adverse impact on the Fund. For example, while the potential liability of a shareholder in a U.S. corporation with respect to acts of the corporation is generally limited to the amount of the shareholder's investment, the notion of limited liability is less clear in certain emerging market countries. Similarly, the rights of investors in emerging market companies may be more limited than those of shareholders of U.S. corporations.

Certain markets are in only the earliest stages of development. There is also a high concentration of market capitalization and trading volume in a small number of issuers representing a limited number of industries, as well as a high concentration of investors and financial intermediaries. Many of such markets also may be affected by developments with respect to more established markets in the region. Brokers in emerging market countries typically are fewer in number and less capitalized than brokers in the United States. These factors, combined with the U.S. regulatory requirements for investment companies and the restrictions on foreign investment, result in potentially fewer investment opportunities for the Fund and may have an adverse impact on the investment performance of the Fund.

Other Investment Companies

The Fund may invest in securities of other open- or closed-end investment companies to the extent that such investments are consistent with the Fund's investment objective and policies and are permissible under the 1940 Act. The 1940 Act imposes the following restrictions on investments in other investment companies: (i) the Fund may not purchase more than 3% of the total outstanding voting stock of another investment company; (ii) the Fund may not invest more than 5% of its total assets in securities issued by another investment company; and (iii) the Fund may not invest more than 10% of its total assets in securities issued by other investment companies. These limitations do not apply to the purchase of shares of any investment company (i) in connection with a merger, consolidation, reorganization or acquisition of substantially all the assets of another investment company or (ii) pursuant to any exemption granted under the 1940 Act.

The Fund may invest in other investment companies either during periods when it has large amounts of uninvested cash, such as the period shortly after the Fund receives the proceeds of an offering of its Common Stock, during periods when there is a shortage of attractive securities available in the market, or when ClearBridge believes share prices of other investment companies offer attractive values. The Fund may invest in investment companies that are advised by ClearBridge or its affiliates to the extent permitted by applicable law and/or pursuant to exemptive relief from the SEC. As a stockholder in an investment company, the Fund would indirectly bear its proportionate share of the advisory fees and other operating expenses of such investment company, and would remain subject to payment of the Fund's management fees and other expenses with respect to assets so invested. Stockholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. ClearBridge takes expenses into account when evaluating the investment merits of an investment in an investment company relative to available investments in other securities. In addition, the securities of other investment companies may also be leveraged and are therefore subject to the same leverage risks described in the Prospectus and herein. The net asset value and market value of leveraged shares is more volatile and the yield to stockholders tends to fluctuate more than the yield generated by unleveraged shares. The Fund has neither sought nor obtained, nor does it currently intend to seek, any exemptive relief from the SEC.

Short-Term Debt Securities; Temporary Defensive Position; Invest-Up Period

During the period in which the net proceeds of an offering of Common Stock are being invested, the proceeds from the issuance of Preferred Stock, if any, commercial paper or notes and/or other borrowings are being invested, or during periods in which LMPFA or ClearBridge determines that it is temporarily unable to follow the Fund's investment strategy or that it is impractical to do so, the Fund may deviate from its investment strategy and invest all or any portion of its Managed Assets in cash and cash equivalents. LMPFA's or ClearBridge's determination that it is temporarily unable to follow the Fund's investment strategy or that it is impracticable to do so will generally occur only in situations in which a market disruption event has occurred and where trading in the securities selected through application of the Fund's investment strategy is extremely limited or absent. In such a case, the Fund may not pursue or achieve its investment objective.

Cash and cash equivalents are defined to include, without limitation, the following:

- (1) Non-U.S. government securities which have received the highest investment-grade credit rating and U.S. government securities, including bills, notes and bonds differing as to maturity and rates of interest that are either issued or guaranteed by the U.S. Treasury or by U.S. Government agencies or instrumentalities. U.S. government agency securities include securities issued by (a) the Federal Housing Administration, Farmers Home Administration, Export-Import Bank of the United States, Small Business Administration and the Government National Mortgage Association, whose securities are supported by the full faith and credit of the United States; (b) the Federal Home Loan Banks, Federal Intermediate Credit Banks, and the Tennessee Valley Authority, whose securities are supported by the right of the agency to borrow from the U.S. Treasury; (c) the Federal National Mortgage Association, whose securities are supported by the discretionary authority of the U.S. Government to purchase certain obligations of the agency or instrumentality; and (d) the Student Loan Marketing Association, whose securities are supported only by its credit. While the U.S. Government provides financial support to such U.S. Government-sponsored agencies or instrumentalities, no assurance can be given that it always will do so since it is not so obligated by law. The U.S. Government, its agencies and instrumentalities do not guarantee the market value of their securities. Consequently, the value of such securities may fluctuate.
- (2) Certificates of deposit issued against funds deposited in a bank or a savings and loan association. Such certificates are for a definite period of time, earn a specified rate of return, and are normally negotiable. The issuer of a certificate of deposit agrees to pay the amount deposited plus interest to the bearer of the certificate on the date specified thereon. Under current Federal Deposit Insurance Corporation regulations, the maximum insurance payable as to any one certificate of deposit is \$250,000; therefore, certificates of deposit purchased by the Fund may not be fully insured.

(3) Commercial paper, which consists of short-term unsecured promissory notes, including variable rate master demand notes issued by corporations to finance their current operations. Investments in commercial paper are limited to commercial paper rated in the highest categories by an NRSRO and which mature within one year of the date of purchase or carry a variable rate of interest. Master demand notes are direct lending arrangements between the Fund and a corporation. There is no secondary market for such notes. However, they are redeemable by the Fund at any time. ClearBridge considers the financial condition of the corporation (e.g., earning power, cash flow, and other liquidity measures) and continuously monitors the corporation's ability to meet all of its financial obligations, because the Fund's liquidity might be impaired if the corporation were unable to pay principal and interest on demand.

(4) The Fund may invest in bankers' acceptances, which are short-term credit instruments used to finance commercial transactions. Generally, an acceptance is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then accepted by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an asset or it may be sold in the secondary market at the going rate of interest for a specific maturity.

(5) The Fund may invest in bank time deposits, which are monies kept on deposit with banks or savings and loan associations for a stated period of time at a fixed rate of interest. There may be penalties for the early withdrawal of such time deposits, in which case the yields of these investments will be reduced.

(6) The Fund may invest in shares of money market funds in accordance with the provisions of the 1940 Act, the rules thereunder and interpretations thereof.

MANAGEMENT OF THE FUND
Board of Directors

The overall management of the business and affairs of the Fund is vested in the Board of Directors. The Board of Directors is classified, with respect to the time for which Directors severally hold office, into three classes – Class I, Class II and Class III, with the Directors in each Class to hold office until their successors are elected and qualified. At each succeeding annual meeting of stockholders, the successors to the Class of Directors whose terms expire at that meeting shall be elected to hold office for terms expiring at the later of the annual meeting of stockholders held in the third year following the year of their election or the election and qualification of their successors.

The Directors of the Fund, their ages, their principal occupations during the past five years (their titles may have varied during that period), the number of investment companies or portfolios in the Fund Complex that each Director oversees, and the other board memberships held by each Director is set forth below.

Name, Address and Age INTERESTED DIRECTORS:	Position(s) with Fund	Term of Office and Length of Time Served ¹	Principal Occupation(s) During Past 5 Years	Number of Investment Companies in Fund Complex ⁽¹⁾ Overseen by Director	Other Directorships Held by Director During Past Five Years
Kenneth D. Fuller* Legg Mason Inc. 620 Eighth Avenue, 49th Floor New York, NY 10018 Birth Year: 1958	Chairman, CEO, President and Director	Since June 2013 Class II	Managing Director of Legg Mason & Co., LLC (Legg Mason & Co.) (since 2013); Officer and/or Trustee/Director of 168 funds associated with LMPFA or its affiliates (since 2013); President and Chief Executive Officer of LM Asset Services, LLC (LMAS) and Legg Mason Fund Asset Management, Inc. (LMFAM) (formerly registered investment advisers) (since 2013); formerly, Senior Vice President of LMPFA (2012 to 2013); formerly, Director of Legg Mason & Co. (2012 to 2013); formerly, Vice President of Legg Mason & Co. (2009 to 2012); formerly, Vice President Equity Division of T. Rowe Price Associates (1993 to 2009), as well as Investment Analyst and Portfolio Manager for certain asset allocation accounts (2004 to 2009)	156	None

Jeswald W. Salacuse c/o Chairman of the Fund Legg Mason, Inc. 620 Eighth Avenue New York, NY 10018 Birth Year: 1938	Director and Member of Audit and Nominating Committees	Since May 2012 Class III	Henry J. Braker Professor of Commercial Law and formerly Dean, The Fletcher School of Law & Diplomacy, Tufts University (since 1986); President, Arbitration Tribunal, World Bank/ ICSID (since 2004)	31	Director of two registered investment companies advised by Aberdeen Asset Management Asia Limited (since 1994)

* Mr. Fuller is an interested person as defined in the 1940 Act because he is an officer of LMPFA and certain of its affiliates.

(1) The terms of office of Class I directors, Class II directors and Class III directors expire at the 2016, 2014 and 2015 Annual Meeting of Stockholders, respectively.

- (2) The term "Fund Complex" means two or more registered investment companies that:
- (a) hold themselves out to investors as related companies for purposes of investment and investor services; or
 - (b) have a common investment adviser or that have an investment adviser that is an affiliated person of the investment adviser of any of the other registered investment companies.

The Directors were selected to join the Board based upon the following as to each Board Member: his or her character and integrity; such person's service as a board member of other funds in the Legg Mason fund complex; such person's willingness to serve and willingness and ability to commit the time necessary to perform the duties of a Director; as to each Director other than Mr. Fuller, his or her status as not being an interested person as defined in the 1940 Act; and, as to Mr. Fuller, his role with Legg Mason. No factor, by itself, was controlling.

In addition to the information provided in the table included above, each Director possesses the following attributes: Ms. Colman, experience as a consultant and investment professional; Mr. Cronin, legal and managerial experience; Mr. Cucchi, experience as a college professor and leadership experience as an academic dean; Mr. Gelb, academic and world affairs and foreign relations experience and service as a board member of other registered investment companies; Mr. Hutchinson, experience in accounting and working with auditors, consulting, business and finance and service as a board member of another financial services company; Dr. Roett, expertise in Latin and South American societies and economies and academic leadership experience; Mr. Salacuse, academic leadership and managerial experience, world affairs and foreign relations experience and service as a board member of other registered investment companies; Ms. Kamerick, experience in business and finance, including financial reporting, and experience as a board member of a highly regulated financial services company; and Mr. Fuller, investment management experience as an executive and portfolio manager and leadership roles within Legg Mason and affiliated entities. References to the qualifications, attributes and skills of the Directors are pursuant to requirements of the Securities and Exchange Commission, do not constitute holding out of the Board or any Director as having any special expertise or experience, and shall not impose any greater responsibility or liability on any such person or on the Board by reason thereof.

Responsibilities of the Board of Directors

The Board of Directors is responsible under applicable state law for overseeing generally the management and operations of the Fund. The Directors oversee the Fund's operations by, among other things, meeting at its regularly scheduled meetings and as otherwise needed with the Fund's management and evaluating the performance of the Fund's service providers including LMPFA, ClearBridge, the custodian and the transfer agent. As part of this process, the Directors consult with the Fund's independent auditors and with their own separate independent counsel.

The Directors review the Fund's financial statements, performance, net asset value and market price and the relationship between them, as well as the quality of the services being provided to the Fund. As part of this process, the Directors review the Fund's fees and expenses in light of the nature, quality and scope of the services being received while also seeking to ensure that the Fund continues to have access to high quality services in the future.

The Board of Directors has four regularly scheduled meetings each year, and additional meetings may be scheduled as needed. During the fiscal year ended November 30, 2013, the Board of Directors held four regular meetings and seven special meetings. In addition, the Board has a standing Audit Committee and Corporate Governance and Nominating Committee (the "Nominating Committee") that meet periodically and whose responsibilities are described below.

Each Director has attended at least 75% of the aggregate number of meetings of the Board and the committees for which he or she was eligible. The Fund does not have a formal policy regarding attendance by Directors at annual meetings of stockholders.

The standing committees of the Board are the Audit Committee, the Nominating Committee and the Pricing Committee.

Each of the Audit Committee and the Nominating Committee is composed of all Directors who have been determined not to be interested persons of the Fund, LMPFA, ClearBridge or their affiliates within the meaning of the 1940 Act, and who are independent as defined in the New York Stock Exchange listing standards (Independent Directors), and is chaired by an Independent Director. The Board in its discretion from time to time may establish ad hoc committees.

The Board of Directors is currently comprised of nine directors, eight of whom are Independent Directors. Kenneth D. Fuller serves as Chairman of the Board. Mr. Fuller is an interested person of the Fund. The appointment of Mr. Fuller as Chairman reflects the Board's belief that his experience, familiarity with the Fund's day-to-day operations and access to individuals with responsibility for the Fund's management and operations provides the Board with insight into the Fund's business and activities and, with his access to appropriate administrative support, facilitates the efficient development of meeting agendas that address the Fund's business, legal and other needs and the orderly conduct of board meetings. Mr. Salacuse serves as Lead Independent Director. The Chairman develops agendas for Board meetings in consultation with the Lead Independent Director and presides at all meetings of the Board. The Lead Independent Director, among other things, chairs executive sessions of the Independent Directors, serves as a spokesperson for the Independent Directors and serves as a liaison between the Independent Directors and the Fund's management between Board meetings. The Independent Directors regularly meet outside the presence of management and are advised by independent legal counsel. The Board also has determined that its leadership structure, as described above, is appropriate in light of the size and complexity of the Fund, the number of Independent Directors (who constitute a super-majority of the Board's membership) and the Board's general oversight responsibility. The Board also believes that its leadership structure not only facilitates the orderly and efficient flow of information to the Independent Directors from management, including ClearBridge, the Fund's subadviser, but also enhances the independent and orderly exercise of its responsibilities.

Audit Committee

The Fund's Audit Committee is composed of all of the Independent Directors. The members of the Audit Committee are Ms. Colman and Messrs. Cronin, Cucchi, Gelb, Hutchinson, Roett and Salacuse. Mr. Hutchinson serves as the Chair of the Audit Committee and has been determined by the Board to be an audit committee financial expert. The principal functions of the Audit Committee are: to (a) oversee the scope of the Fund's audit, the Fund's accounting and financial reporting policies and practices and its internal controls and enhance the quality and objectivity of the audit function; (b) approve, and recommend to the Independent Board Members (as such term is defined in the Audit Committee Charter) for their ratification, the selection, appointment, retention or termination of the Fund's independent registered public accounting firm, as well as approving the compensation thereof; and (c) approve all audit and permissible non-audit services provided to the Fund and certain other persons by the Fund's independent registered public accounting firm. The Fund's Board of Directors reviewed and adopted an Audit Committee Charter at its organizational meeting, a copy of which is attached to the Fund's first proxy statement dated November 14, 2012. During the year ended November 30, 2013, the Audit Committee met two times.

Nominating Committee

The Fund's Nominating Committee, the principal function of which is to select and nominate candidates for election as Directors of the Fund, is composed of all of the Independent Directors. Mr. Cronin serves as the Chair of the Nominating Committee. The Nominating Committee may consider nominees recommended by the stockholder as it deems appropriate. Stockholders who wish to recommend a nominee should send recommendations to the Fund's Secretary that include all information relating to such person that is required to be disclosed in solicitations of proxies for the election of Directors. A recommendation must be accompanied by a written consent of the individual to stand for election if nominated by the Board of Directors and to serve if elected by the stockholders. The Fund's Board of Directors reviewed and adopted a Nominating Committee Charter at its organizational meeting, a copy of which is attached to the Fund's first proxy statement dated November 14, 2012. During the year ended November 30, 2013, the Nominating Committee met three times.

The Nominating Committee identifies potential nominees through its network of contacts, and in its discretion may also engage a professional search firm. The Nominating Committee meets to discuss and consider such candidates' qualifications and then chooses a candidate by majority vote. The Nominating Committee does not have specific, minimum qualifications for nominees and has not established specific qualities or skills that it regards as necessary for one or more of the Fund's Directors to possess (other than any qualities or skills that may be required by applicable law, regulation or listing standard). However, as set forth in the Nominating Committee Charter, in evaluating a person as a potential nominee to serve as a Director of the Fund, the Nominee Committee may consider the following factors, among any others it may deem relevant:

whether or not the person is an interested person as defined in the 1940 Act and whether the person is otherwise qualified under applicable laws and regulations to serve as a Director of the Fund;

whether or not the person has any relationships that might impair his or her independence, such as any business, financial or family relationships with Fund management, the investment manager of the Fund, Fund service providers or their affiliates;

whether or not the person serves on boards of, or is otherwise affiliated with, competing financial service organizations or their related mutual fund complexes;

whether or not the person is willing to serve, and willing and able to commit the time necessary for the performance of the duties of a Director of the Fund;

the contribution which the person can make to the Board and the Fund (or, if the person has previously served as a Director of the Fund, the contribution which the person made to the Board during his or her previous term of service), with consideration being given to the person's business and professional experience, education and such other factors as the Committee may consider relevant;

the character and integrity of the person; and

whether or not the selection and nomination of the person would be consistent with the requirements of the Fund's retirement policies.

The Nominating Committee does not have a formal diversity policy with regard to the consideration of diversity in identifying potential director nominees but may consider diversity of professional experience, education and skills when evaluating potential nominees for Board membership.

Pricing Committee

The members of the Pricing Committee are any one interested and any one disinterested director of the Fund. The members of the Pricing Committee are Kenneth D. Fuller and any of the non-interested directors listed above. The Pricing Committee is responsible for designating the amount, price and certain other terms of the securities sold by the Fund. During the year ended November 30, 2013, the Pricing Committee met two times.

Risk Oversight

The Board's role in risk oversight of the Fund reflects its responsibility under applicable state law to oversee generally, rather than to manage, the operations of the Fund. In line with this oversight responsibility, the Board receives reports and makes inquiry at its regular meetings and as needed regarding the nature and extent of significant Fund risks (including investment, compliance and valuation risks) that potentially could have a materially adverse impact on the business operations, investment performance or reputation of the Fund, but relies upon the Fund's management (including the Fund's portfolio managers) and Chief Compliance Officer, who reports directly to the Board, and LMPFA to assist it in identifying and understanding the nature and extent of such risks and determining whether, and to what extent, such risks may be eliminated or mitigated. In addition to reports and other information received from Fund management and LMPFA regarding the Fund's investment program

Edgar Filing: TORONTO DOMINION BANK - Form 424B2

and activities, the Board as part of its risk oversight efforts meets at its regular meetings and as needed with the Fund's Chief Compliance Officer to discuss, among other things, risk issues and issues regarding the policies, procedures and controls of the Fund. The Board may be assisted in performing aspects of its role in risk oversight by the Audit Committee and such other standing or special committees as may be established from

time to time by the Board. For example, the Audit Committee of the Board regularly meets with the Fund's independent public accounting firm to review, among other things, reports on the Fund's internal controls for financial reporting.

The Board believes that not all risks that may affect the Fund can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Fund's goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Directors as to risk management matters are typically summaries of relevant information and may be inaccurate or incomplete. As a result of the foregoing and other factors, the Board's risk management oversight is subject to substantial limitations.

Security Ownership of Management

The following table shows the dollar range of equity securities owned by the Directors in the Fund and in other investment companies overseen by the Directors within the same family of investment companies as of December 31, 2013. Investment companies are considered to be in the same family if they share the same investment adviser or principal underwriter and hold themselves out to investors as related companies for purposes of investment and investor services.

Name of Director	Dollar Range of Equity Securities in the Fund (\$)	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by the Director in the Family of Investment Companies(1) (\$)
Non-Interested Directors:		
Carol L. Colman	A	E
Daniel P. Cronin	D	E
Paolo M. Cucchi	A	C
Leslie H. Gelb	A	A
William R. Hutchinson	A	E
Dr. Riordan Roett	A	C
Jeswald W. Salacuse	A	D
Eileen Kamerick(2)	A	A
Interested Director:		
Kenneth D. Fuller(3)	A	E

Key: A: none, B: \$1-\$10,000, C: \$10,001-\$50,000, D: \$50,001-\$100,000, E: over \$100,000.

- (1) The term "family of investment companies" means any two or more registered investment companies that share the same investment adviser or principal underwriter or hold themselves out to investors as related companies for purposes of investment and investor services.
- (2) Effective February 1, 2013, Ms. Kamerick became a Director.
- (3) Effective June 1, 2013, Mr. Fuller became a Director.

None of the disinterested Directors nor their family members owned beneficially or of record securities issued by LMPFA, ClearBridge, or any person directly or indirectly controlling, controlled by, or under common control with LMPFA or ClearBridge as of December 31, 2013.

The members of the Board who are not interested persons, as defined in the 1940 Act, receive an annual fee, a fee for each meeting of the Fund's Board and committee meetings attended and are reimbursed for all out-of-pocket expenses relating to attendance at such meetings. The Directors who are interested persons, as defined in the 1940 Act, and the Fund's officers do not receive compensation from the Fund or any other fund in the Fund Complex of which the Fund is a part that is a U.S. registered investment company, but are reimbursed for all out-of-pocket expenses relating to attendance at such meetings.

Director Compensation

The following table sets forth compensation paid by the Fund during the Fund's most recently completed fiscal year.

Name of Directors	Aggregate Compensation from the Fund for Fiscal Period Ended 11/30/13	Total Compensation from the Fund and Fund Complex(1) for Calendar Year Ended 12/31/13
Non-Interested Directors:(2)		
Carol L. Colman	\$ 16,697	\$ 222,350
Daniel P. Cronin	16,697	222,350
Paolo M. Cucchi	15,820	210,381
Leslie H. Gelb	15,820	209,381
William R. Hutchinson	18,158	243,297
Dr. Riordan Roett	15,820	210,381
Jeswald W. Salacuse	19,647	240,315
Eileen Kamerick(3)	14,920	198,402
Interested Director:		
Kenneth D. Fuller	0	0

- (1) Fund Complex means two or more Funds (a registrant or, where the registrant is a series company, a separate portfolio of the registrant) that hold themselves out to investors as related companies for purposes of investment and investor services or have a common investment adviser or have an investment adviser that is an affiliated person of the investment adviser of any of the other Funds.
- (2) Each Non-Interested Director currently holds 31 investment company directorships within this Fund Complex.
- (3) Effective February 1, 2013, Ms. Kamerick became a Director.

Independent directors receive \$120,000 per annum plus (a) a fee of \$20,000 for attendance at each meeting of the Board of Directors in person and (b) a fee of \$1,000 for each telephonic meeting of the Board of Directors. In addition to the payments described above, the Lead Independent Director of the Board of Directors receives \$25,000 and the chairperson of the Audit Committee receives \$20,000. The annual compensation, fees and expenses are allocated among all the funds in the fund complex, including the Fund, on the basis of average net assets.

Officers of the Fund

The Fund's executive officers are chosen each year at a regular meeting of the Board to hold office until their respective successors are duly elected and qualified. In addition to Mr. Fuller, the Fund's Chairman, CEO and President, the executive officers of the Fund currently are:

Name, Address and Age	Position(s) with Fund	Term of Office and Length of Time Served	Principal Occupation(s) During Past 5 Years
Richard F. Sennett	Principal Financial Officer	Since Inception	Principal Financial Officer and Treasurer of certain mutual funds associated with Legg Mason & Co. or its affiliates (since 2011 and 2013); Managing Director of Legg Mason & Co. and Senior Manager of the Treasury Policy group for Legg Mason & Co.'s Global Fiduciary Platform (since 2011); formerly, Chief Accountant within the SEC's Division of Investment Management (2007 to 2011); formerly, Assistant Chief Accountant within the SEC's Division of Investment Management (2002 to 2007).

INVESTMENT MANAGER

Investment Manager and Subadviser

The Fund retains Legg Mason Partners Fund Advisor, LLC (LMPFA) to act as its investment manager. LMPFA is a wholly-owned subsidiary of Legg Mason. LMPFA serves as the investment manager to numerous individuals and institutions and other investment companies. The investment management agreement (the Management Agreement) between LMPFA and the Fund provides that LMPFA will manage the operations of the Fund, subject to the supervision, direction and approval of the Fund's Board and the objective and the policies stated in the Prospectus and this Statement of Additional Information.

Pursuant to the Management Agreement, LMPFA supervises the day-to-day management of the Fund's portfolio by ClearBridge. In addition, LMPFA performs administrative and management services necessary for the operation of the Fund, such as (1) supervising the overall administration of the Fund, including negotiation of contracts and fees with and the monitoring of performance and billings of the Fund's transfer agent, stockholder servicing agents, custodian and other independent contractors or agents; (2) providing certain compliance, Fund accounting, regulatory reporting and tax reporting services; (3) preparing or participating in the preparation of Board materials, registration statements, proxy statements and reports and other communications to stockholders; (4) maintaining the Fund's existence and (5) during such times as shares are publicly offered, maintaining the registration and qualification of the Fund's shares under federal and state laws.

Under the investment management agreement, the Fund pays an annual fee, paid monthly, in an amount equal to 1.00% of the Fund's average daily managed assets.

Advisory Fee.

	Fiscal Year or Period Ended November 30,	
	2013	2012 ⁽¹⁾
The Fund paid LMPFA approximate fees of	\$ 10,880,748	\$ 3,884,204

(1) For the period from June 27, 2012 (commencement of operations) through November 30, 2012.

Pursuant to a sub-advisory agreement, LMPFA has delegated the day-to-day portfolio management of the Fund to ClearBridge (the Sub-Advisory Agreement). ClearBridge is a wholly-owned subsidiary of Legg Mason. Investment decisions for the Fund are made independently from those of other funds or accounts managed by ClearBridge. Such other funds or accounts may also invest in the same securities as the Fund. If those funds or accounts are prepared to invest in, or desire to dispose of, the same security at the same time as the Fund, however, transactions in such securities will be made, insofar as feasible, for the respective funds and accounts in a manner deemed equitable to all. In some cases, this procedure may adversely affect the size of the position obtained for or disposed of by the Fund or the price paid or received by the Fund. In addition, because of different investment objective, a particular security may be purchased for one or more funds or accounts when one or more funds or accounts are selling the same security.

Each of the Management Agreement and the Sub-Advisory Agreement has an initial term of two years and continue in effect from year to year thereafter if such continuance is specifically approved at least annually by the Fund's Board or by a majority of the outstanding voting securities of the Fund, and in either event, by a majority of the disinterested Directors of the Board with such disinterested Directors casting votes in person at a meeting called for such purpose. The Board or the holders of a majority of the Fund's shares may terminate the Management Agreement on sixty days' written notice without penalty and LMPFA may terminate the agreement on ninety days' written notice without penalty. The Management Agreement terminates automatically in the event of an assignment (as defined in the 1940 Act). The Sub-Advisory Agreement may be terminated without penalty by the Board or by vote of a majority of the outstanding voting securities of the Fund, in each case on not more than 60 days' nor less than 30 days' written notice to ClearBridge, or by ClearBridge upon not less than 90 days' written notice to the Fund and LMPFA, and will be terminated upon the mutual written consent of LMPFA and ClearBridge. The Sub-Advisory Agreement terminates automatically in the event of an assignment (as defined in the 1940 Act).

Under the terms of the Management Agreement and the Sub-Advisory Agreement, neither LMPFA nor ClearBridge, will be liable for losses or damages incurred by the Fund, unless such losses or damages are attributable to the wilful misfeasance, bad faith or gross negligence on the part of LMPFA or ClearBridge, as the case may be, or from reckless disregard by them of their obligations and duties under the relevant agreement.

Codes of Ethics

Pursuant to Rule 17j-1 under the 1940 Act, the Fund, LMPFA and ClearBridge have each adopted codes of ethics that permit their respective personnel to invest in securities for their own accounts, including securities that may be purchased or held by a Fund. All personnel must place the interests of clients first and avoid activities, interests and relationships that might interfere with the duty to make decisions in the best interests of the clients. All personal securities transactions by employees must adhere to the requirements of the codes and must be conducted in such a manner as to avoid any actual or potential conflict of interest, the appearance of such a conflict, or the abuse of an employee's position of trust and responsibility.

When personnel covered by the Fund's Code of Ethics are employed by more than one of the managers affiliated with Legg Mason, those employees may be subject to such affiliate's Code of Ethics adopted pursuant to Rule 17j-1, rather than the Fund's Code of Ethics.

Copies of the Codes of Ethics of the Fund, LMPFA, and ClearBridge are on file with the SEC. These Codes of Ethics can be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information relating to the Public Reference Room may be obtained by calling the SEC at (202) 551-8090. Such materials are also available on EDGAR on the SEC's website (<http://www.sec.gov>). You may also e-mail requests for these documents, which may be obtained after paying a duplicating fee, to publicinfo@sec.gov, or make a request in writing to the SEC's Public Reference Section, 100 F Street, N.E., Washington, D.C. 20549-0102.

Proxy Voting Policies

Although individual Directors may not agree with particular policies or votes by LMPFA or ClearBridge, the Fund's Board has delegated proxy voting discretion to LMPFA and/or ClearBridge, believing that LMPFA, and/or ClearBridge should be responsible for voting because it is a matter relating to the investment decision making process.

LMPFA delegates the responsibility for voting proxies for the Fund to ClearBridge through the Sub-Advisory Agreement. ClearBridge uses its own proxy voting policies and procedures to vote proxies. Accordingly, LMPFA does not expect to have proxy voting responsibility for the Fund. Should LMPFA become responsible for voting proxies for any reason, such as the inability of ClearBridge to provide investment advisory services, LMPFA shall utilize the proxy voting guidelines established by ClearBridge to vote proxies until a new subadviser is retained. In the case of a material conflict between the interests of ClearBridge (or its affiliates if such conflict is known to persons responsible for voting at ClearBridge) and the Fund, the Board of Directors of ClearBridge shall consider how to address the conflict and/or how to vote the proxies. LMPFA shall maintain records of all proxy votes in accordance with applicable securities laws and regulations, to the extent that ClearBridge votes proxies. ClearBridge shall be responsible for gathering relevant documents and records related to proxy voting from ClearBridge and providing them to the Fund as required for the Fund to comply with applicable rules under the 1940 Act.

LMPFA's proxy voting policy is attached as Appendix B hereto. ClearBridge's proxy voting policy is attached as Appendix C hereto. Information regarding how the Fund voted proxies (if any) relating to portfolio securities during the most recent 12-month period ended June 30 are available without charge (1) by calling 888-777-0102, (2) on the Fund's website at <http://www.lmcef.com> and (3) on the SEC's website at <http://www.sec.gov> on Form N-PX.

PORTFOLIO MANAGERS

Unless otherwise indicated, the information below is provided as of the date of this SAI.

The table below identifies the number of accounts (other than the Fund) for which the Fund's portfolio managers have day-to-day management responsibilities and the total assets in such accounts, within each of the following categories: registered investment companies, other pooled investment vehicles and other accounts. None of these accounts have fees based on performance.

Portfolio Manager	Registered Investment	Other Pooled Investment	
	Companies	Vehicles	Other Accounts
Richard A. Freeman	8 registered investment companies with \$18.1 billion in total assets under management	3 other pooled investment vehicle with \$2.2 billion in assets under management	36,529 other accounts with \$11.8 billion in total assets under management
Michael Clarfeld	7 registered investment companies with \$11.7 billion in total assets under management	3 other pooled investment vehicle with \$910 million in assets under management	30,215 other accounts with \$4.7 billion in total assets under management
Chris Eades	4 registered investment companies under management with \$4.7 billion in total assets under management	1 other pooled investment vehicle with \$820 million in assets under management	3 other accounts with \$5.1 million in total assets under management
Peter Vanderlee	8 registered investment companies with \$12.9 billion in total assets under management	7 other pooled investment vehicle with \$2.0 billion in assets under management	30,216 other accounts with \$4.7 billion in total assets under management

Portfolio Manager Compensation

ClearBridge has incentive and deferred compensation plans (the Plans) for its investment professionals, including the Fund's portfolio managers and research analysts. The Plans are designed to align the objectives of ClearBridge investment professionals with those of fund shareholders and other ClearBridge clients. Additionally, the deferred plans are designed to retain its investment professionals and reward long-term performance.

Incentive Compensation

Investment performance is the key component in determining the final incentive award for all of ClearBridge's investment professionals. A portfolio manager's initial incentive award is based on the investment professional's ongoing contribution to ClearBridge's investment and

Edgar Filing: TORONTO DOMINION BANK - Form 424B2

business results and externally measured competitive pay practices for the portfolio manager's position/experience within the firm. This award is then adjusted upward or downward based on investment performance during the most recent year over a rolling 1, 3 and 5 year time period. Product performance is ranked among a peer group of non-ClearBridge investment managers and the applicable product benchmark (e.g., a securities index and, with respect to a fund, the benchmark set forth in the fund's Prospectus to which the fund's average annual total returns are compared).

The peer group of non-ClearBridge investment managers is defined by product style/type, vehicle type and geography and selected by independent vendors that track and provide (for a fee paid by ClearBridge) relevant peer group performance and ranking data (e.g., primarily Lipper or Callan).

The 1, 3 and 5 year performance versus benchmark and peer group approximate effective weightings are 35% for trailing 1 year performance, 50% for trailing 3 year performance and 15% for trailing 5 year performance.

Lastly, the incentive award for an investment professional may also be adjusted by ClearBridge's Chief Investment Officer and Chief Operating Officer based on other qualitative factors such as contribution to the firm and the development of investment staff.

For ClearBridge's centralized research professionals, there is an annual incentive compensation plan with a combined scorecard based on portfolio manager questionnaires/surveys, stock picking performance and contribution to the firm. The analyst's stock picks are tracked on a formal basis through FactSet and make up a portion of the analyst's overall scorecard performance. These stock picks are measured versus their respective sector indexes.

Deferred Award

Up to 20% of an investment professional's annual incentive compensation is subject to deferral. For portfolio managers, one-quarter of this deferral is invested in their primary managed product, one-quarter in a composite portfolio of the firm's new products and one-quarter in up to 14 elected proprietary ClearBridge managed funds. Consequently, portfolio managers potentially could have 50% of their deferred award amount tracking the performance of their primary managed product. The final one-quarter of the deferral is received in the form of Legg Mason restricted stock shares.

For centralized research analysts, one-half of their deferral is invested in up to 14 elected proprietary funds, while one-quarter is invested in the new product composite and the remaining one-quarter is received in the form of Legg Mason restricted stock shares.

Legg Mason then makes a company investment in the proprietary ClearBridge-managed funds equal to the deferral amounts by fund. This investment is a company asset held on the Legg Mason balance sheet and paid out to the employees in shares upon vesting over a four year deferral period.

Potential Conflicts of Interest

LMPFA, ClearBridge and the portfolio managers have interests which may conflict with the interests of the Fund. There is no guarantee that the policies and procedures adopted by LMPFA, ClearBridge and the Fund will be able to identify or mitigate these conflicts of interest.

Some examples of material conflicts of interest include:

Allocation of Limited Time and Attention. A portfolio manager who is responsible for managing multiple funds and/or accounts may devote unequal time and attention to the management of those funds and/or accounts. A portfolio manager may not be able to formulate as complete a strategy or identify equally attractive investment opportunities for each of those funds and accounts as might be the case if he or she were to devote substantially more attention to the management of a single fund. Such a portfolio manager may make general determinations across multiple funds, rather than tailoring a unique approach for each fund. The effects of this conflict may be more pronounced where funds and/or accounts overseen by a particular portfolio manager have different investment strategies.

Allocation of Limited Investment Opportunities; Aggregation of Orders. If a portfolio manager identifies a limited investment opportunity that may be suitable for multiple funds and/or accounts, the opportunity may be allocated among these several funds or accounts, which may limit the Fund's ability to take full advantage of the investment opportunity. Additionally, ClearBridge may aggregate transaction orders for multiple accounts for purpose of execution. Such aggregation may cause the price or brokerage costs to be less favorable to a particular client than if similar transactions were not being executed concurrently for other accounts. In addition, ClearBridge's trade allocation policies may result in the Fund's orders not being fully executed or being delayed in execution.

Pursuit of Differing Strategies. At times, a portfolio manager may determine that an investment opportunity may be appropriate for only some of the funds and/or accounts for which he or she exercises investment responsibility, or may decide that certain of the funds and/or accounts should take differing positions with respect to a particular security. In these cases, the portfolio manager may place separate transactions for one or more funds or accounts which may affect the market price of the security or the execution of the transaction, or both, to the detriment or benefit of one or more other funds and/or accounts. For example, a portfolio manager may determine that it would be in the interest of another account to sell a security that the Fund holds long, potentially resulting in a decrease in the market value of the security held by the Fund.

Cross Trades. Portfolio managers may manage funds that engage in cross trades, where one of the manager's funds or accounts sells a particular security to another fund or account managed by the same manager. Cross trades may pose conflicts of interest because of, for example, the possibility that one account sells a security to another account at a higher price than an independent third party would pay or otherwise enters into a transaction that it would not enter into with an independent party, such as the sale of a difficult-to-obtain security.

Selection of Broker/Dealers. Portfolio managers may select or influence the selection of the brokers and dealers that are used to execute securities transactions for the funds and/or accounts that they supervise. In addition to executing trades, some brokers and dealers provide ClearBridge with brokerage and research services. These services may be taken into account in the selection of brokers and dealers whether a broker is being selected to effect a trade on an agency basis for a commission or whether a dealer is being selected to effect a trade on a principal basis. This may result in the payment of higher brokerage fees and/or execution at a less favorable price than might have otherwise been available. The services obtained may ultimately be more beneficial to certain of the manager's funds or accounts than to others (but not necessarily to the funds that pay the increased commission or incur the less favorable execution). A decision as to the selection of brokers and dealers could therefore yield disproportionate costs and benefits among the funds and/or accounts managed.

Variation in Financial and Other Benefits. A conflict of interest arises where the financial or other benefits available to a portfolio manager differ among the funds and/or accounts that he or she manages. If the amount or structure of the investment manager's management fee and/or a portfolio manager's compensation differs among funds and/or accounts (such as where certain funds or accounts pay higher management fees or performance-based management fees), the portfolio manager might be motivated to help certain funds and/or accounts over others. Similarly, the desire to maintain assets under management or to enhance the portfolio manager's performance record or to derive other rewards, financial or otherwise, could influence the portfolio manager in affording preferential treatment to those funds and/or accounts that could most significantly benefit the portfolio manager. A portfolio manager may, for example, have an incentive to allocate favorable or limited opportunity investments or structure the timing of investments to favor such funds and/or accounts. Also, a portfolio manager's or LMPFA's or ClearBridge's desire to increase assets under management could influence the portfolio manager to keep a fund open for new investors without regard to potential benefits of closing the fund to new investors. Additionally, the portfolio manager might be motivated to favor funds and/or accounts in which he or she has an ownership interest or in which the investment manager and/or its affiliates have ownership interests. Conversely, if a portfolio manager does not personally hold an investment in the fund, the portfolio manager's conflicts of interest with respect to the Fund may be more acute.

Related Business Opportunities. LMPFA or its affiliates may provide more services (such as distribution or recordkeeping) for some types of funds or accounts than for others. In such cases, a portfolio manager may benefit, either directly or indirectly, by devoting disproportionate attention to the management of funds and/or accounts that provide greater overall returns to the investment manager and its affiliates.

A portfolio manager may also face other potential conflicts of interest in managing the Fund, and the description above is not a complete description of every conflict of interest that could be deemed to exist in managing both a Fund and the other accounts listed above.

Portfolio Manager Securities Ownership

The portfolio managers held the following amounts of securities of the Fund as of November 30, 2013.

Portfolio Manager	Dollar Range of Securities Beneficially Owned (\$)
Richard A. Freeman	100,001 500,000
Michael Clarfeld	10,001 50,000
Chris Eades	10,001 50,000
Peter Vanderlee	10,001 50,000

PORTFOLIO TRANSACTIONS AND BROKERAGE

Subject to policies as may be established by the Board from time to time, ClearBridge is primarily responsible for the Fund's portfolio decisions and the placing of the Fund's portfolio transactions. Commissions are negotiated with broker/dealers on all transactions.

Pursuant to the Management Agreement and the Subadvisory Agreement, each of LMPFA and ClearBridge is authorized to place orders pursuant to its investment determinations for the Fund either directly with the issuer or with any broker or dealer, foreign currency dealer, futures commission merchant or others selected by it. The general policy of LMPFA and ClearBridge in selecting brokers and dealers is to obtain the best results achievable in the context of a number of factors which are considered both in relation to individual trades and broader trading patterns, including the reliability of the broker/dealer, the competitiveness of the price and the commission, the research services received and whether the broker/dealer commits its own capital.

In connection with the selection of such brokers or dealers and the placing of such orders, subject to applicable law, brokers or dealers may be selected who also provide brokerage and research services (as those terms are defined in Section 28(e) of the Securities Exchange Act of 1934, as amended) to the Fund and/or the other accounts over which LMPFA, ClearBridge or their affiliates exercise investment discretion. LMPFA and ClearBridge are authorized to pay a broker or dealer who provides such brokerage and research services a commission for executing a portfolio transaction for the Fund which is in excess of the amount of commission another broker or dealer would have charged for effecting that transaction if LMPFA or ClearBridge, as applicable, determines in good faith that such amount of commission is reasonable in relation to the value of the brokerage and research services provided by such broker or dealer. Investment research services include information and analysis on particular companies and industries as well as market or economic trends and portfolio strategy, market quotations for portfolio evaluations, analytical software and similar products and services. If a research service also assists LMPFA or ClearBridge in a non-research capacity (such as bookkeeping or other administrative functions), then only the percentage or component that provides assistance to LMPFA or ClearBridge in the investment decision making process may be paid in commission dollars. This determination may be viewed in terms of either that particular transaction or the overall responsibilities that LMPFA or ClearBridge, as applicable, and its affiliates have with respect to accounts over which they exercise investment discretion. LMPFA and ClearBridge may also have arrangements with brokers pursuant to which such brokers provide research services to LMPFA or ClearBridge, as applicable, in exchange for a certain volume of brokerage transactions to be executed by such brokers. While the payment of higher commissions increases the Fund's costs, LMPFA and ClearBridge do not believe that the receipt of such brokerage and research services significantly reduces its expenses as LMPFA or ClearBridge, as applicable. Arrangements for the receipt of research services from brokers may create conflicts of interest.

Research services furnished to LMPFA or ClearBridge by brokers that effect securities transactions for the fund may be used by LMPFA or ClearBridge, as applicable, in servicing other investment companies and accounts which it manages. Similarly, research services furnished to LMPFA or ClearBridge by brokers who effect securities transactions for other investment companies and accounts which LMPFA or ClearBridge manages may be used by LMPFA or ClearBridge, as applicable, in servicing the Fund. Not all of these research services are used by the LMPFA or ClearBridge in managing any particular account, including the Fund.

The Fund contemplates that, consistent with the policy of obtaining the best net results, brokerage transactions may be conducted through affiliated broker/dealers, as defined in the 1940 Act. The Board has adopted procedures in accordance with Rule 17e-1 under the 1940 Act to ensure that all brokerage commissions paid to such affiliates are reasonable and fair in the context of the market in which such affiliates operate.

In certain instances there may be securities that are suitable as an investment for the Fund as well as for one or more of the LMPFA's or ClearBridge's other clients. Investment decisions for the Fund and for LMPFA's or ClearBridge's other clients are made with a view to achieving their respective investment objectives. It may develop that a particular security is bought or sold for only one client even though it might be held by, or bought or sold for, other clients. Likewise, a particular security may be bought for one or more clients when one or more clients are selling the same security. Some simultaneous transactions are inevitable when several clients receive

investment advice from the same investment adviser, particularly when the same security is suitable for the investment objectives of more than one client. When two or more clients are simultaneously engaged in the purchase or sale of the same security, the securities are allocated among clients in a manner believed to be equitable to each. It is recognized that in some cases this system could adversely affect the price of or the size of the position obtainable in a security for the fund. When purchases or sales of the same security for the Fund and for other portfolios managed by LMPFA or ClearBridge, as applicable, occur contemporaneously, the purchase or sale orders may be aggregated in order to obtain any price advantages available to large volume purchases or sales.

Although the Fund does not have any restrictions on portfolio turnover, it is not the Fund's policy to engage in transactions with the objective of seeking profits from short-term trading. It is expected that the annual portfolio turnover rate of the Fund will not exceed 100%. The portfolio turnover rate is calculated by dividing the lesser of sales or purchases of portfolio securities by the average monthly value of the Fund's portfolio securities. For purposes of this calculation, portfolio securities exclude all securities having a maturity when purchased of one year or less. A high rate of portfolio turnover involves correspondingly greater transaction costs than a lower rate, which costs are borne by the Fund and their stockholders.

NET ASSET VALUE

The Fund determines the net asset value of its Common Stock on each day the NYSE is open for business, as of the close of the customary trading session (normally 4:00 p.m. Eastern Time), or any earlier closing time that day. The Fund determines the net asset value per share of Common Stock by dividing the value of the Fund's securities, cash and other assets (including interest accrued but not collected) less all its liabilities (including accrued expenses, borrowings and interest payables) by the total number of shares of Common Stock outstanding.

The Fund's securities are valued in accordance with procedures approved by the Board. Under the procedures, equity securities and certain derivative instruments that are traded on an exchange are valued at the closing price or, if that price is unavailable or deemed not representative of market value, the last sale price. Where a security is traded on more than one exchange (as is often the case overseas), the security is generally valued at the price on the exchange considered to be the primary exchange. In the case of securities not traded on an exchange, or if exchange prices are not otherwise available, the prices are typically determined by independent third party pricing services that use a variety of techniques and methodologies.

The valuations for fixed income securities and certain derivative instruments are typically the prices supplied by independent third party pricing services, which may use market prices or broker/dealer quotations or a variety of fair valuation techniques and methodologies. Short-term fixed income securities that will mature in 60 days or less are valued at amortized cost, unless it is determined that using this method would not reflect an investment's fair value.

The valuations of securities traded on foreign markets and certain fixed income securities will generally be based on prices determined as of the earlier closing time of the markets on which they primarily trade, unless a significant event has occurred. When the Fund holds securities or other assets that are denominated in a foreign currency, the Fund will normally use the currency exchange rates as of 4:00 p.m. (Eastern time). The Fund uses a fair value model developed by an independent third party pricing service to value foreign equity securities on days when a certain percentage change in the value of a domestic equity security index suggests that the closing prices on foreign exchanges may no longer represent the value of those securities at the time of closing of the NYSE. Foreign markets are open for trading on weekends and other days when the Fund does not price its shares.

If independent third party pricing services are unable to supply prices for a portfolio investment, or if the prices supplied are deemed to be unreliable, the market price may be determined by using quotations from one or more broker/dealers. When such prices or quotations are not available, or when believed to be unreliable, securities may be priced using fair value procedures approved by the Board of Directors. These procedures permit, among other things, the use of a matrix, formula or other method that takes into consideration market

indexes, yield curves and other specific adjustments to determine fair value. The Fund may also use fair value procedures if it is determined that a significant event has occurred between the time at which a market price is determined and the time at which the fund's net asset value is calculated. The effect of using fair value pricing is that the Common Stock's net asset value will be subject to the judgment of the Board of Directors or its designee instead of being determined by the market.

Deferred tax assets may constitute a relatively high percentage of the Fund's net asset value. Any valuation allowance required against such deferred tax assets or future adjustments to it may reduce the Fund's deferred tax assets and could have a material impact on the Fund's net asset value and results of operations in the period it is recorded.

GENERAL INFORMATION

Certain Provisions in the Articles of Incorporation and By-Laws

The Articles include provisions that could limit the ability of other entities or persons to acquire control of the Fund. These provisions could have the effect of depriving stockholders of opportunities to sell their Common Stock at a premium over the then-current market price of the Common Stock. As described more completely in the Prospectus, starting with the first annual meeting of stockholders, the Articles divide the Directors into three classes of approximately equal size. As a result of this staggered Board structure, it would take a minimum of two years for other entities or groups of persons to gain a majority of seats on the Board. In addition, the By-Laws require that stockholders provide advance notice to the Fund in order to nominate candidates for election to the Board or to bring proposals before the annual meeting of stockholders. This prevents other entities or groups of persons from nominating Directors or raising proposals during an annual meeting of stockholders unless they have provided such advance notice to the Fund.

REPURCHASE OF FUND SHARES; CONVERSION TO AN OPEN-END FUND

Although it is under no obligation to do so, the Fund reserves the right to repurchase its shares on the open market in accordance with the 1940 Act and the rules and regulations thereunder. Subject to its investment limitations, the Fund may borrow to finance the repurchase of stock or to make a tender offer. Interest on any borrowings to finance share repurchase transactions or the accumulation of cash by the Fund in anticipation of share repurchases or tenders will reduce the Fund's net income. Any share repurchase, tender offer or borrowing that might be approved by the Board of Directors would also have to comply with the Securities Exchange Act of 1934, as amended, and the 1940 Act and the rules and regulations thereunder.

The repurchase by the Fund of its shares at prices below net asset value may result in an increase in the net asset value of those shares that remain outstanding. However, there can be no assurance that share repurchases or tenders at or below net asset value will result in the Fund's shares trading at a price equal to their net asset value. In addition, a purchase by the Fund of its Common Stock will decrease the Fund's total assets, which would likely have the effect of increasing the Fund's expense ratio.

If the Fund converted to an open-end investment company, the Common Stock would no longer be listed on the NYSE. In contrast to a closed-end investment company, stockholders of an open-end investment company may require the company to redeem their shares at any time (except in certain circumstances as authorized by the 1940 Act or the rules thereunder) at their net asset value, less any redemption charge that is in effect at the time of redemption. In order to avoid maintaining large cash positions or liquidating favorable investments to meet redemptions, open-end investment companies typically engage in a continuous offering of their shares. Open-end investment companies are thus subject to periodic asset in-flows and out-flows that can complicate portfolio management.

CERTAIN UNITED STATES FEDERAL INCOME TAX CONSIDERATIONS

The following is a summary of certain United States federal income tax considerations relating to the Fund and the purchase, ownership and disposition of our Common Stock as of the date hereof. Except where noted, this summary deals only with Common Stock offered pursuant to the Prospectus and held as a capital asset. This summary does not represent a detailed description of the United States federal income tax consequences applicable to a Common Stockholder if such holder is subject to special treatment under the United States federal income tax laws, including if the holder is:

a dealer in securities or currencies;

a financial institution;

a regulated investment company;

a real estate investment trust;

an insurance company;

a tax-exempt organization;

a person holding our Common Stock as part of a hedging, integrated or conversion transaction, a constructive sale or a straddle;

a trader in securities that has elected the mark-to-market method of accounting for its securities;

a person liable for alternative minimum tax;

a partnership or other pass-through entity for United States federal income tax purposes;

a controlled foreign corporation;

a passive foreign investment company;

a U.S. expatriate; or

a U.S. Holder (as defined below) whose functional currency is not the United States dollar.

As used herein, the term "U.S. Holder" means a beneficial owner of our Common Stock that is for United States federal income tax purposes:

an individual citizen or resident of the United States;

a corporation (or other entity treated as a corporation for United States federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;

an estate the income of which is subject to United States federal income taxation regardless of its source; or

a trust if it (1) is subject to the primary supervision of a court within the United States and one or more United States persons have the authority to control all substantial decisions of the trust or (2) has a valid election in effect under applicable United States Treasury regulations to be treated as a United States person.

As used herein, the term "non-U.S. Holder" means a beneficial owner of our Common Stock that is neither a U.S. Holder nor a partnership (or other entity treated as a partnership for United States federal income tax purposes).

The discussion below is based upon the provisions of the Code, and regulations, rulings and judicial decisions thereunder as of the date hereof, and such authorities may be replaced, revoked or modified, possibly with retroactive effect, so as to result in United States federal income tax consequences different from those discussed below. If a partnership (or other entity treated as a partnership for United States federal income tax purposes) holds our Common Stock, the tax treatment of a partner will generally depend upon the status of the partner and the activities of the partnership. Investors that are partners in a partnership holding our Common Stock should consult their tax advisors.

This summary does not contain a detailed description of all the United States federal income tax consequences applicable to the Fund or to investors in light of their particular circumstances, and does not address the effects of any state, local or non-United States tax laws. **Investors considering the purchase, ownership or disposition of our Common Stock should consult their own tax advisors concerning the United States federal income tax consequences to them in light of their particular situations as well as any consequences arising under the laws**

of any other taxing jurisdiction.

Taxation of the Fund

The Fund is treated as a regular corporation, or a C corporation, for United States federal income tax purposes. Accordingly, the Fund generally will be subject to United States federal income tax on its taxable income at the graduated rates applicable to corporations (currently at a maximum rate of 35%). Such taxable income would generally include, among other items, all of the Fund's net income from its investments in the

equity securities of MLPs, other types of equity securities, derivatives, debt securities, royalty trusts and foreign securities less Fund expenses. The Fund may be subject to a 20% alternative minimum tax on its alternative minimum taxable income to the extent that the alternative minimum tax exceeds the Fund's regular income tax liability. The Fund's payment of corporate income tax or alternative minimum tax could materially reduce the amount of cash available for the Fund to make distributions on its stock. In addition, distributions to stockholders of the Fund will be taxed under United States federal income tax laws applicable to corporate distributions, and thus the Fund's taxable income will be subject to a double layer of taxation. As a regular corporation, the Fund may also be subject to state income tax or foreign tax by reason of its investments in equity securities of MLPs.

The income from equity securities of certain MLPs is treated as qualifying income for purposes of qualifying as a regulated investment company under the Code. However, a regulated investment company may not invest more than 25% of its assets in the equity securities of MLPs. Thus, the Fund does not expect that it will be eligible to elect to be treated as a regulated investment company because the Fund intends to invest more than 25% of its assets in the equity securities of MLPs.

Certain of the Fund's Investments

MLP Equity Securities

MLPs are generally characterized as publicly traded partnerships for United States federal income tax purposes because MLPs are typically organized as limited partnerships or limited liability companies that are publicly traded. The Code generally requires all publicly traded partnerships to be treated as corporations for United States federal income tax purposes. If, however, a publicly traded partnership satisfies specific requirements, the publicly traded partnership will be treated as a partnership for United States federal income tax purposes. The Fund intends to invest in MLPs that satisfy (and references in this discussion to MLPs include only those MLPs that satisfy) these requirements. Under these requirements, an MLP is required to derive at least 90% of its gross income for each taxable year from specified sources of qualifying income, such as interest, dividends, real property rents, gain from the sale or disposition of real property, gains on sales of certain capital assets, and in certain limited circumstances, income and gain from commodities or futures, forwards and options with respect to commodities. Qualifying income also includes income and gains derived from mineral or natural resources (including energy related) activities, including the exploration, development, mining or production, processing, refining, transportation (including pipelines transporting gas, oil, or products thereof), or the marketing of any mineral or natural resource (including fertilizer, geothermal energy, and timber), industrial source carbon dioxide, or the transportation or storage of certain fuels (including alcohol, biodiesel and alternative fuels).

If the MLPs are taxed as partnerships, the MLPs will be taxed differently from corporations for United States federal income tax purposes. A corporation is required to pay United States federal income tax on its income, and, to the extent the corporation makes distributions to its stockholders in the form of dividends from current or accumulated earnings and profits, its stockholders are required to pay United States federal income tax on such dividends. For this reason, it is said that corporate income is taxed at two levels. MLPs, in contrast, are generally taxed as partnerships for United States federal income tax purposes if they meet the income requirements discussed above. In such case, no United States federal income tax would be imposed at the MLP entity level. A partnership's items of taxable income, gain, loss and deductions are generally allocated among all the partners in proportion to their interests in the partnership. Each partner is required to include in income its allocable shares of these tax items. Partnership income is thus said to be taxed only at one level at the partner level.

Although distributions from MLPs resemble corporate dividends, they are treated differently for United States federal income tax purposes. A distribution from an MLP is treated as a tax-free return of capital to the extent of the partner's tax basis in its MLP interest and as gain from the sale or exchange of the MLP interest to the extent the distribution exceeds the partner's tax basis in its MLP interest.

When the Fund invests in the equity securities of an MLP, the Fund will be a partner in such MLP. Accordingly, the Fund will be required to include in its taxable income the Fund's allocable share of the income,

gains, losses and deductions recognized by each such MLP, whether or not the MLP distributes cash to the Fund. Based upon a review of the historic results of the type of MLPs in which the Fund intends to invest, it is possible that the cash distributions the Fund will receive with respect to its investments in equity securities of MLPs will exceed the taxable income allocated to the Fund from such MLPs. No assurance, however, can be given in this regard. If this is not the case, the Fund will have a larger corporate income tax expense, which would result in less cash available to distribute to Common Stockholders.

The Fund will recognize gain or loss on the sale, exchange or other taxable disposition of an equity security of an MLP equal to the difference between the amount realized by the Fund on the sale, exchange or other taxable disposition and the Fund's adjusted tax basis in such equity security. Any such gain will be subject to United States federal income tax at the regular graduated corporate rates (currently at a maximum rate of 35%). Because the Fund is taxed as a regular corporation it will not be eligible for reduced rates of taxation with respect to such gain, even if such gain is long-term capital gain. The amount realized by the Fund generally will be the amount paid by the purchaser of the equity security plus the portion of the Fund's allocable share, if any, of the MLP's debt that will be allocated to the purchaser as a result of the sale, exchange or other taxable disposition. The Fund's adjusted tax basis in its equity securities in an MLP is generally equal to the amount the Fund paid for the equity securities, (x) increased by the Fund's allocable share of the MLP's net taxable income and the Fund's allocable share of the MLP's debt, if any, and (y) decreased by the Fund's allocable share of the MLP's net losses, reductions in the Fund's allocable share of the MLP's debt, if any, and any distributions received by the Fund from the MLP. Although any distribution by an MLP to the Fund in excess of the Fund's allocable share of such MLP's net taxable income generally will not be taxable to the extent the distribution does not exceed the Fund's tax basis in the MLP, such distribution will reduce the Fund's tax basis and thus increase the amount of gain (or decrease the amount of loss) that will be recognized on the sale of an equity security in the MLP by the Fund or on a subsequent distribution by the MLP to the Fund.

The Fund's allocable share of certain percentage-depletion deductions and intangible drilling costs of the MLPs in which the Fund invests may be treated as items of tax preference for purposes of calculating the Fund's alternative minimum taxable income. Such items will increase the Fund's alternative minimum taxable income and increase the likelihood that the Fund may be subject to the alternative minimum tax.

Other Investments

The Fund's transactions in foreign currencies, forward contracts, options and futures contracts (including options and futures contracts on foreign currencies), to the extent permitted, will be subject to special provisions of the Code (including provisions relating to hedging transactions and straddles) that, among other things, may affect the character of gains and losses realized by the Fund (i.e., may affect whether gains or losses are ordinary or capital or short-term versus long-term), accelerate recognition of income to the Fund and defer Fund losses. These provisions also (a) will require the Fund to mark-to-market certain types of the positions in its portfolio (i.e., treat them as if they were closed out at the end of each year) and (b) may cause the Fund to recognize income without receiving a corresponding amount cash. If the Fund invests in debt obligations having original issue discount, the Fund may recognize taxable income from such investments in excess of any cash received from the investments.

Foreign Investments

Dividends or other income (including, in some cases, capital gains) received by the Fund from investments in non-U.S. securities may be subject to withholding and other taxes imposed by foreign countries. Tax conventions between certain countries and the United States may reduce or eliminate such taxes in some cases. Foreign taxes paid by the Fund will reduce the return from the Fund's investments. Common Stockholders will not be entitled to claim credits or deductions on their own tax returns for foreign taxes paid by the Fund.

U.S. Holders

The following is a summary of certain United States federal income tax consequences that will apply to holders of Common Stock that are U.S. Holders.

Taxation of Dividends

The gross amount of distributions by the Fund in respect of Common Stock will be taxable to a U.S. Holder as dividend income to the extent the distributions are paid out of the Fund's current or accumulated earnings and profits, as determined under United States federal income tax principles. Such income will be included in a U.S. Holder's gross income on the day actually or constructively received by such holder. Subject to certain holding period and other requirements, such dividend income will generally be eligible for the dividends received deduction in the case of corporate U.S. Holders and will generally be treated as "qualified dividend income" eligible for reduced rates of taxation for non-corporate U.S. Holders (including individuals).

To the extent that the amount of any distribution exceeds the Fund's current and accumulated earnings and profits for a taxable year, as determined under United States federal income tax principles, the distribution will first be treated as a tax-free return of capital, causing a reduction in the adjusted basis of the Common Stock (thereby increasing the amount of gain, or decreasing the amount of loss, to be recognized by a U.S. Holder on a subsequent disposition of the Common Stock), and the balance in excess of adjusted basis will be taxed as capital gain. Any such capital gain will be long-term capital gain if such U.S. Holder has held the applicable Common Stock for more than one year.

A corporation's earnings and profits are generally calculated by making certain adjustments to the corporation's reported taxable income. Based upon the historic performance of similar MLPs in which the Fund intends to invest, it is possible that the distributed cash from the MLPs in its portfolio during certain years will exceed the Fund's earnings and profits. Thus, it is possible that only a portion of the Fund's distributions will be treated as dividends to its Common Stockholders for United States federal income tax purposes, although no assurance can be given in this regard.

Because of the Fund's status as a corporation for United States federal income tax purposes and its investments in equity securities of MLPs, the Fund's earnings and profits may be calculated using accounting methods that are different from those used for calculating taxable income. For instance, the Fund may use a less accelerated method of depreciation and depletion for purposes of computing its earnings and profits than the method used for purposes of calculating the taxable income of the MLP. In that case, the Fund's earnings and profits would not be increased solely by its allocable share of the MLP's taxable income, but would also have to be increased for the amount by which the more accelerated depreciation and depletion methods used for purposes of computing taxable income exceed the less accelerated methods used for purposes of computing earnings and profits. Because of these differences, the Fund may make distributions out of its current or accumulated earnings and profits, treated as dividends, in years in which the Fund's distributions exceeds its taxable income.

Distributions with respect to Common Stock will be treated in the manner described above regardless of whether such distributions are paid in cash or invested in additional Common Stock pursuant to the Plan.

Taxation of Capital Gains

A U.S. Holder generally will recognize taxable gain or loss on any sale, exchange or other disposition of Common Stock in an amount equal to the difference between the amount realized for the Common Stock and the holder's adjusted tax basis in such Common Stock. Generally, a U.S. Holder's adjusted tax basis in its Common Stock will be equal to the cost of the holder's Common Stock, reduced by adjustments for distributions paid by the Fund in excess of its earnings and profits (i.e., returns of capital). Such gain or loss will generally be capital gain or loss. Capital gains of non-corporate U.S. Holders (including individuals) derived with respect to capital assets held for more than one year are eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations.

Information Reporting and Backup Withholding

In general, information reporting will apply to distributions in respect of Common Stock and the proceeds from the sale, exchange or other disposition of Common Stock that are paid to a U.S. Holder within the United States (and in certain cases, outside the United States), unless the holder is an exempt recipient. A backup withholding tax (currently at a maximum rate of 28%) may apply to such payments if the holder fails to provide a

taxpayer identification number (generally on an IRS Form W-9) or certification of other exempt status or fails to report in full dividend and interest income. Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules will be allowed as a refund or as a credit against a U.S. Holder's United States federal income tax liability provided the required information is timely furnished to the Internal Revenue Service.

Non-U.S. Holders

The following discussion is a summary of certain United States federal income tax consequences that will apply to non-U.S. Holders.

Taxation of Dividends

The gross amount of distributions by the Fund in respect of Common Stock will be treated as dividends to the extent paid out of the Fund's current or accumulated earnings and profits, as determined under United States federal income tax principles. Dividends paid to a non-U.S. Holder generally will be subject to withholding of United States federal income tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. However, dividends that are effectively connected with the conduct of a trade or business by a non-U.S. Holder within the United States (and, if required by an applicable income tax treaty, are attributable to a United States permanent establishment) are not subject to the withholding tax, provided certain certification and disclosure requirements (generally on an IRS Form W-8ECI) are satisfied. Instead, such dividends are subject to United States federal income tax on a net income basis in the same manner as if the non-U.S. Holder were a United States person as defined under the Code. Any such effectively connected dividends received by a foreign corporation may be subject to an additional branch profits tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty.

A non-U.S. Holder who wishes to claim the benefits of an applicable income tax treaty (and avoid backup withholding, as discussed below) for dividends will be required (a) to complete IRS Form W-8BEN (or other applicable form) and certify under penalty of perjury that such holder is not a United States person as defined under the Code and is eligible for treaty benefits or (b) if Common Stock is held through certain foreign intermediaries, to satisfy the relevant certification requirements of applicable United States Treasury regulations. Special certification and other requirements apply to certain non-U.S. Holders that are pass-through entities rather than corporations or individuals.

A non-U.S. Holder eligible for a reduced rate of United States withholding tax pursuant to an income tax treaty may obtain a refund of any excess amounts withheld by filing an appropriate claim for refund with the Internal Revenue Service.

If the amount of a distribution to a non-U.S. Holder exceeds the Fund's current and accumulated earnings and profits, such excess will be treated first as a tax-free return of capital to the extent of the non-U.S. Holder's tax basis in the Common Stock, and then as capital gain. As discussed above under the caption U.S. Holders Taxation of Dividends, it is possible that only a portion of the Fund's distributions to its Common Stockholders will be treated as dividends for United States federal income tax purposes, although no assurance can be given in this regard. Capital gain recognized by a non-U.S. Holder as a consequence of a distribution by the Fund in excess of its current and accumulated earnings and profits will generally not be subject to United States federal income tax, except as described below under the caption Taxation of Capital Gains.

Taxation of Capital Gains

A non-U.S. Holder generally will not be subject to United States federal income tax on any gain realized on the disposition of Common Stock unless:

the gain is effectively connected with a trade or business of the non-U.S. Holder in the United States (and, if required by an applicable income tax treaty, is attributable to a United States permanent establishment of the non-U.S. Holder);

the non-U.S. Holder is an individual who is present in the United States for 183 days or more in the taxable year of that disposition, and certain other conditions are met; or

the Fund is or has been a United States real property holding corporation for United States federal income tax purposes. An individual non-U.S. Holder described in the first bullet point immediately above will be subject to tax on the net gain derived from the sale under regular graduated United States federal income tax rates. An individual non-U.S. Holder described in the second bullet point immediately above will be subject to a flat 30% tax on the gain derived from the sale, which may be offset by United States source capital losses, even though the individual is not considered a resident of the United States. If a non-U.S. Holder that is a foreign corporation falls under the first bullet point immediately above, the holder will be subject to tax on its net gain in the same manner as if the holder were a United States person as defined under the Code and, in addition, may be subject to the branch profits tax equal to 30% of its effectively connected earnings and profits or at such lower rate as may be specified by an applicable income tax treaty.

The Fund may be a United States real property holding corporation for United States federal income tax purposes. With respect to the third bullet point above, if the Fund is or becomes a United States real property holding corporation, so long as the Fund's Common Stock is regularly traded on an established securities market (such as the NYSE), only a non-U.S. Holder who holds or held (at any time during the shorter of the five year period preceding the date of disposition or the holder's holding period) more than 5% (directly or indirectly, as determined under applicable attribution rules of the Code) of the Fund's Common Stock will be subject to United States federal income tax on the disposition of such Common Stock.

Information Reporting and Backup Withholding

The Fund must report annually to the Internal Revenue Service and to each non-U.S. Holder the amount of distributions paid to such holder (whether treated as dividends or a return of capital) and the tax withheld with respect to such distributions. Copies of the information returns reporting such distributions and withholding may also be made available to the tax authorities in the country in which the non-U.S. Holder resides under the provisions of an applicable income tax treaty.

A non-U.S. Holder will be subject to backup withholding for dividends paid to such holder unless such holder certifies under penalty of perjury that it is a non-U.S. Holder (and the payor does not have actual knowledge or reason to know that such holder is a United States person as defined under the Code), or such holder otherwise establishes an exemption. Dividends subject to withholding of United States federal income tax as described under the caption "Taxation of Dividends" above will not be subject to backup withholding.

Information reporting and, depending on the circumstances, backup withholding will apply to the proceeds of a sale of Common Stock within the United States or conducted through certain United States-related financial intermediaries, unless the beneficial owner certifies under penalty of perjury that it is a non-U.S. Holder (and the payor does not have actual knowledge or reason to know that the beneficial owner is a United States person as defined under the Code), or such owner otherwise establishes an exemption.

Any amounts withheld under the backup withholding rules will be allowed as a refund or as a credit against a non-U.S. Holder's United States federal income tax liability provided the required information is timely furnished to the Internal Revenue Service.

Non-U.S. Holders should consult their tax advisor regarding the application of the information reporting and backup withholding rules to them.

Additional Withholding Requirements

Under legislation enacted in 2010 and administrative guidance, a 30% United States federal withholding tax may apply to any dividends paid after June 30, 2014, and the gross proceeds from a disposition of Common Stock occurring after December 31, 2016, in each case paid to (i) a foreign financial institution (as specifically defined in the legislation), whether such foreign financial institution is the beneficial owner or an intermediary,

unless such foreign financial institution agrees to verify, report and disclose its United States account holders (as specifically defined in the legislation) and meets certain other specified requirements or (ii) a non-financial foreign entity, whether such non-financial foreign entity is the beneficial owner or an intermediary, unless such entity provides a certification that the beneficial owner of the payment does not have any substantial United States owners or provides the name, address and taxpayer identification number of each such substantial United States owner and certain other specified requirements are met. In certain cases, the relevant foreign financial institution or non-financial foreign entity may qualify for an exemption from, or be deemed to be in compliance with, these rules. Non-U.S. Holders should consult their tax advisor regarding this legislation and whether it may be relevant to their ownership and disposition of the Fund's Common Stock.

Medicare Tax on Net Investment Income

Recently enacted legislation will generally impose a tax on the net investment income of certain individuals and on the undistributed net investment income of certain estates and trusts. For these purposes, net investment income will generally include interest, dividends (including dividends paid with respect to our Common Stock), annuities, royalties, rent, net gain attributable to the disposition of property not held in a trade or business (including net gain from the sale, exchange or other taxable disposition of shares of our Common Stock) and certain other income, but will be reduced by any deductions properly allocable to such income or net gain. Common Stockholders are advised to consult their own tax advisors regarding additional taxation of net investment income.

Investment by Tax-Exempt Investors

Employee benefit plans and most other organizations exempt from United States federal income tax, including individual retirement accounts and other retirement plans, are subject to United States federal income tax on UBTI. Because the Fund is a corporation for United States federal income tax purposes, an owner of Common Stock will not report on its federal income tax return any of the Fund's items of income, gain, loss and deduction. Therefore, a tax-exempt investor generally will not have UBTI attributable to its ownership or sale of Common Stock unless its ownership of Common Stock is debt-financed. In general, Common Stock would be debt-financed if the tax-exempt owner of Common Stock incurs debt to acquire Common Stock or otherwise incurs or maintains a debt that would not have been incurred or maintained if that Common Stock had not been acquired.

Other Taxation

The Fund's Common Stockholders may be subject to alternative minimum tax, state, local and foreign taxes on distributions they receive. Common Stockholders are advised to consult their own tax advisors with respect to the particular tax consequences to them of an investment in the Fund.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

A control person is a person who beneficially owns more than 25% of the voting securities of a company. There is currently no control person of the Fund.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

KPMG LLP, an independent registered public accounting firm, provides auditing and limited tax services to the Fund. KPMG LLP is located at 345 Park Avenue, New York, NY 10154.

CUSTODIAN

The custodian of the assets of the Fund is State Street Bank and Trust Company LLC, located at Lafayette Corporate Center, 2 Avenue de Lafayette, Boston, Massachusetts 02111. The custodian performs custodial, fund accounting and portfolio accounting services.

ADDITIONAL INFORMATION

A Registration Statement on Form N-2, including amendments thereto, relating to the Common Stock offered hereby, has been filed by us with the SEC. The Prospectus and this SAI do not contain all of the information set forth in the Registration Statement, including any exhibits and schedules thereto. Please refer to the Registration Statement for further information with respect to us and the offering of our securities. Statements contained in the Prospectus, Prospectus Supplement and this SAI as to the contents of any contract or other document referred to are not necessarily complete and in each instance reference is made to the copy of such contract or other document filed as an exhibit to a Registration Statement, each such statement being qualified in all respects by such reference. Copies of the Registration Statement may be inspected without charge at the SEC's principal office in Washington, D.C., and copies of all or any part thereof may be obtained from the SEC upon the payment of certain fees prescribed by the SEC or on the SEC's website at <http://www.sec.gov>.

FINANCIAL STATEMENTS AND REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Report of independent registered public accounting firm

The Board of Directors and Shareholders

ClearBridge Energy MLP Total Return Fund Inc.:

We have audited the accompanying statement of assets and liabilities of ClearBridge Energy MLP Total Return Fund Inc. (the Fund), including the schedule of investments, as of November 30, 2013, and the related statements of operations and cash flows for the year then ended, the statements of changes in net assets and the financial highlights for the year then ended and for the period from June 27, 2012 (commencement of operations) to November 30, 2012. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of November 30, 2013, by correspondence with the custodian or by other appropriate auditing procedures. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of ClearBridge Energy MLP Total Return Fund Inc. as of November 30, 2013, the results of its operations and cash flows for the year then ended, the changes in its net assets and the financial highlights for the year then ended and for the period from June 27, 2012 (commencement of operations) to November 30, 2012, in conformity with U.S. generally accepted accounting principles.

New York, New York

Total income from operations	4.52	1.18
Less distributions from:		
Dividends	(0.27)	
Return of capital	(1.05)	(0.65)
Total distributions	(1.32)	(0.65)
Net asset value, end of year	\$ 22.79	\$ 19.59
Market price, end of year	\$ 21.90	\$ 19.82
Total return, based on NAV^{4,5}	23.39%	6.28%
Total return, based on Market Price⁶	17.34%	2.50%
Net assets, end of year (millions)	\$ 873	\$ 748
Ratios to average net assets:		
Management fees	1.30%	1.24% ⁷
Other expenses	0.89 ⁸	0.45 ^{7,9}
Subtotal	2.19	1.69
Income tax expense	12.02	8.55 ⁷
Total expenses	14.21⁸	10.24^{7,9,10}
Net investment loss, net of income taxes	(1.42)	(0.92) ⁷
Portfolio turnover rate	25%	4%
Supplemental data:		
Loan and Debt Issuance Outstanding, End of Year (000s)	\$ 260,000	\$ 240,000
Asset Coverage for Loan and Debt Issuance Outstanding	436%	412%
Weighted Average Loan and Debt Issuance (000s)	\$ 250,082	\$ 175,796
Weighted Average Interest Rate on Loans and Debt Issuance	2.42%	1.04%

¹ Per share amounts have been calculated using the average shares method.

Edgar Filing: TORONTO DOMINION BANK - Form 424B2

- ² For the period June 27, 2012 (commencement of operations) to November 30, 2012.
- ³ Initial public offering price of \$20.00 per share less offering costs and sales load totaling \$0.94 per share.
- ⁴ Performance figures may reflect compensating balance arrangements, fee waivers and/or expense reimbursements. In the absence of compensating balance arrangements, fee waivers and/or expense reimbursements, the total return would have been lower. Past performance is no guarantee of future results. Total returns for periods of less than one year are not annualized.
- ⁵ The total return calculation assumes that distributions are reinvested at NAV. Past performance is no guarantee of future results. Total returns for periods of less than one year are not annualized.
- ⁶ The total return calculation assumes that distributions are reinvested in accordance with the Fund's dividend reinvestment plan. Past performance is no guarantee of future results. Total returns for periods of less than one year are not annualized.
- ⁷ Annualized.
- ⁸ The impact of compensating balance arrangements, if any, was less than 0.01%.
- ⁹ The impact of compensating balance arrangements was 0.02%.
- ¹⁰ Excludes the impact of reimbursement for organization fees in the amount of 0.02%. Inclusive of the reimbursement the ratio is 10.22%. The investment manager has agreed to reimburse all organization expenses.

See Notes to Financial Statements.

Notes to Financial Statements**1. Organization and significant accounting policies**

ClearBridge Energy MLP Total Return Fund Inc. (the Fund) was incorporated in Maryland on April 10, 2012 and is registered as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the 1940 Act). The Board of Directors authorized 100 million shares of \$0.001 par value common stock. The Fund's investment objective is to provide a high level of total return, consisting of cash distributions and capital appreciation. The Fund seeks to achieve its objective by investing primarily in master limited partnerships (MLPs) in the energy sector. There can be no assurance that the Fund will achieve its investment objective.

Under normal market conditions, the Fund will invest at least 80% of its Managed Assets in energy MLPs (the 80% policy). For purposes of the 80% policy, the Fund considers investments in MLPs to include investments that offer economic exposure to public and private MLPs in the form of equity securities of MLPs, securities of entities holding primarily general partner or managing member interests in MLPs, securities that are derivatives of interests in MLPs, including I-Shares, and debt securities of MLPs. Energy entities are engaged in the business of exploring, developing, producing, gathering, transporting, processing, storing, refining, distributing, mining or marketing of natural gas, natural gas liquids (including propane), crude oil, refined petroleum products or coal. Managed Assets means net assets plus the amount of any borrowings and assets attributable to any preferred stock of the Fund that may be outstanding.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP). Estimates and assumptions are required to be made regarding assets, liabilities and changes in net assets resulting from operations when financial statements are prepared. Changes in the economic environment, financial markets and any other parameters used in determining these estimates could cause actual results to differ. Subsequent events have been evaluated through the date the financial statements were issued.

(a) Investment valuation. Equity securities for which market quotations are available are valued at the last reported sales price or official closing price on the primary market or exchange on which they trade. The valuations for fixed income securities (which may include, but are not limited to, corporate, government, municipal, mortgage-backed, collateralized mortgage obligations and asset-backed securities) and certain derivative instruments are typically the prices supplied by independent third party pricing services, which may use market prices or broker/dealer quotations or a variety of valuation techniques and methodologies. The independent third party pricing services use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar securities. Short-term fixed income securities that will mature in 60 days or less are valued at amortized cost, unless it is determined that using this method would not reflect an investment's fair value. If independent third party pricing services are unable to supply prices for a portfolio investment, or if the prices supplied are deemed by the manager to be unreliable, the market price may be determined by the manager using quotations from one or more broker/dealers or at the transaction price if the security has recently been purchased and no value has yet been obtained from a pricing service or pricing broker. When reliable prices are not readily available, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund values these securities as determined in accordance with procedures approved by the Fund's Board of Directors.

The Board of Directors is responsible for the valuation process and has delegated the supervision of the daily valuation process to the Legg Mason North American Fund Valuation Committee (the Valuation Committee). The Valuation Committee, pursuant to the policies adopted by the Board of Directors, is responsible for making fair value determinations, evaluating the effectiveness of the Fund's pricing policies, and reporting to the Board of Directors. When determining the reliability of third party pricing information for investments owned by the

Fund, the Valuation Committee, among other things, conducts due diligence reviews of pricing vendors, monitors the daily change in prices and reviews transactions among market participants.

The Valuation Committee will consider pricing methodologies it deems relevant and appropriate when making fair value determinations. Examples of possible methodologies include, but are not limited to, multiple of earnings; discount from market of a similar freely traded security; discounted cash-flow analysis; book value or a multiple thereof; risk premium/yield analysis; yield to maturity; and/or fundamental investment analysis. The Valuation Committee will also consider factors it deems relevant and appropriate in light of the facts and circumstances. Examples of possible factors include, but are not limited to, the type of security; the issuer's financial statements; the purchase price of the security; the discount from market value of unrestricted securities of the same class at the time of purchase; analysts' research and observations from financial institutions; information regarding any transactions or offers with respect to the security; the existence of merger proposals or tender offers affecting the security; the price and extent of public trading in similar securities of the issuer or comparable companies; and the existence of a shelf registration for restricted securities.

For each portfolio security that has been fair valued pursuant to the policies adopted by the Board of Directors, the fair value price is compared against the last available and next available market quotations. The Valuation Committee reviews the results of such back testing monthly and fair valuation occurrences are reported to the Board of Directors quarterly.

The Fund uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of security and the particular circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to discount estimated future cash flows to present value.

GAAP establishes a disclosure hierarchy that categorizes the inputs to valuation techniques used to value assets and liabilities at measurement date. These inputs are summarized in the three broad levels listed below:

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)
The inputs or methodologies used to value securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund's assets carried at fair value:

Description	ASSETS			Total
	Quoted Prices (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Master limited partnerships				
Gathering/processing		\$ 14,000,959		\$ 14,000,959
Other master limited partnerships	\$ 1,234,717,272			1,234,717,272
Total investments	\$ 1,234,717,272	\$ 14,000,959		\$ 1,248,718,231

See Schedule of Investments for additional detailed categorizations.

(b) Repurchase agreements. The Fund may enter into repurchase agreements with institutions that its investment adviser has determined are creditworthy. Each repurchase agreement is recorded at cost. Under the terms of a typical repurchase agreement, the Fund acquires a debt security subject to an obligation of the seller to repurchase, and of the Fund to resell, the security at an agreed-upon price and time, thereby determining the yield during the Fund's holding period. When entering into repurchase agreements, it is the Fund's policy that its custodian or a third party custodian, acting on the Fund's behalf, take possession of the underlying collateral securities, the market value of which, at all times, at least equals the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction maturity exceeds one business day, the value of the collateral is marked-to-market and measured against the value of the agreement in an effort to ensure the adequacy of the collateral. If the counterparty defaults, the Fund generally has the right to use the collateral to satisfy the terms of the repurchase transaction. However, if the market value of the collateral declines during the period in which the Fund seeks to assert its rights or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

(c) Net asset value. The Fund determines the net asset value of its common stock on each day the NYSE is open for business, as of the close of the customary trading session (normally 4:00 p.m. Eastern Time), or any earlier closing time that day. The Fund determines the net asset value per share of common stock by dividing the value of the Fund's securities, cash and other assets (including interest accrued but not collected) less all its liabilities (including accrued expenses, borrowings and interest payables), net of income taxes, by the total number of shares of common stock outstanding.

(d) Master limited partnerships. Entities commonly referred to as MLPs are generally organized under state law as limited partnerships or limited liability companies. The Fund intends to primarily invest in MLPs receiving partnership taxation treatment under the Internal Revenue Code of 1986 (the Code), and whose interests or units are traded on securities exchanges like shares of corporate stock. To be treated as a partnership for U.S. federal income tax purposes, an MLP whose units are traded on a securities exchange must receive at least 90% of its income from qualifying sources such as interest, dividends, real estate rents, gain from the sale or disposition of real property, income and gain from mineral or natural resources activities, income and gain from the transportation or storage of certain fuels, and, in certain circumstances, income and gain from commodities or futures, forwards and options with respect to commodities. Mineral or natural resources activities include exploration, development, production, processing, mining, refining, marketing and transportation (including pipelines) of oil and gas, minerals, geothermal energy, fertilizer, timber or industrial source carbon dioxide. An MLP consists of a general partner and limited partners (or in the case of MLPs organized as limited liability companies, a managing member and members). The general partner or managing member typically controls the operations and management of the MLP and has an ownership stake in the partnership. The limited partners or members, through their ownership of limited partner or member interests, provide capital to the entity, are intended to have no role in the operation and management of the entity and receive cash distributions. The MLPs themselves generally do not pay U.S. federal income taxes. Thus, unlike investors in corporate securities, direct MLP investors are generally not subject to double taxation (i.e., corporate level tax and tax on corporate dividends). Currently, most MLPs operate in the energy and/or natural resources sector.

(e) Concentration risk. Concentration in the energy sector may present more risks than if the Fund were broadly diversified over numerous sectors of the economy. A downturn in the energy sector of the economy could have a larger impact on the Fund than on an investment company that does not concentrate in the sector. At times, the performance of securities of companies in the sector may lag the performance of other sectors or the broader market as a whole.

(f) Return of capital estimates. Distributions received from the Fund's investments in MLPs generally are comprised of income and return of capital. The Fund records investment income and return of capital based on estimates made at the time such distributions are received. Such estimates are based on historical information available from each MLP and other industry sources. These estimates may subsequently be revised based on information received from MLPs after their tax reporting periods are concluded.

For the year ended November 30, 2013, the Fund estimated that approximately 98.65% of the MLP distributions received would be treated as a return of capital. The Fund recorded as return of capital the amount of \$60,781,772 of dividends and distributions received from its investments.

Additionally, the Fund recorded revisions to the return of capital estimates from the year ended November 30, 2012 in the amount of a \$237,439 decrease in dividends received from investments.

(g) Security transactions and investment income. Security transactions are accounted for on a trade date basis. Interest income, adjusted for amortization of premium and accretion of discount, is recorded on the accrual basis. Dividends and distributions are recorded on ex-date. The cost of investments sold is determined by use of the specific identification method. To the extent any issuer defaults or a credit event occurs that impacts the issuer, the Fund may halt any additional interest income accruals and consider the realizability of interest accrued up to the date of default or credit event.

(h) Distributions to shareholders. Distributions to common stockholders are declared and paid on a quarterly basis and are recorded on the ex-dividend date. The estimated characterization of the distributions paid to common stockholders will be either a dividend (ordinary income) or distribution (return of capital). This estimate is based on the Fund's operating results during the period. The Fund anticipates 80% of its current year distributions will be comprised of return of capital as a result of the tax character of cash distributions made by the MLPs. The Fund has generated sufficient current year earnings and profits for tax purposes from gains realized on the sale of its MLP investments such that approximately 20% of the distributions paid during the current year will be treated as dividend income. Because the Fund is taxed as a C Corporation, the distributions paid by the Fund are considered to be dividend income to the extent that the distributions are paid out of the Fund's current net income and realized capital gains.

(i) Compensating balance arrangements. The Fund has an arrangement with its custodian bank whereby a portion of the custodian's fees is paid indirectly by credits earned on the Fund's cash on deposit with the bank.

(j) Partnership accounting policy. The Fund records its pro rata share of the income (loss) and capital gains (losses), to the extent of distributions it has received, allocated from the underlying partnerships and accordingly adjusts the cost basis of the underlying partnerships for return of capital. These amounts are included in the Fund's Statement of Operations.

(k) Federal and other taxes. The Fund, as a corporation, is obligated to pay federal and state income tax on its taxable income. The Fund invests its assets primarily in MLPs, which generally are treated as partnerships for federal income tax purposes. As a limited partner in the MLPs, the Fund includes its allocable share of the MLP's taxable income in computing its own taxable income. Deferred income taxes reflect (i) taxes on unrealized gains (losses), which are attributable to the temporary difference between fair market value and tax basis, (ii) the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes and (iii) the net tax benefit of accumulated net operating losses and tax credit carryforwards. To the extent the Fund has a deferred tax asset, consideration is given as to whether or not a valuation allowance is required. The need to establish a valuation allowance for deferred tax assets is assessed periodically by the Fund based on the Income Tax Topic of the Financial Accounting Standards Board (FASB) Accounting Standards Codification that it is more likely than not that some portion or all of the deferred tax asset will not be realized. In the assessment for a valuation allowance, consideration is given to all positive and negative evidence related to the realization of the deferred tax asset. This assessment considers, among other matters, the nature, frequency and severity of current and cumulative losses, forecasts of future profitability (which are highly dependent on future cash distributions from the Fund's MLP holdings), the duration of statutory carryforward periods and the associated risk that net operating loss and tax credit carryforwards may expire unused.

For all open tax years and for all major jurisdictions, management of the Fund has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Furthermore,

management of the Fund is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

The Fund may rely to some extent on information provided by the MLPs, which may not necessarily be timely, to estimate taxable income allocable to the MLP units held in the portfolio and to estimate the associated deferred tax liability. Such estimates are made in good faith. From time to time, as new information becomes available, the Fund modifies its estimates or assumptions regarding the deferred tax liability.

The Fund's policy is to classify interest and penalties associated with underpayment of federal and state income taxes, if any, as income tax expense on its Statement of Operations. The current and prior tax years remain open and subject to examination by tax jurisdictions.

(I) Reclassification. GAAP requires that certain components of net assets be reclassified to reflect permanent differences between financial and tax reporting. These reclassifications have no effect on net assets or net asset values per share. During the current year, the following reclassifications have been made:

Accumulated Net Investment Loss (net of income taxes)	Accumulated Net Realized Gain on Investments (net of income taxes)
\$ 10,495,369	\$ (10,495,369)

Reclassifications are due to distributions paid by the Fund in the current year which for tax purposes have been treated as dividend income. Because the Fund is taxed as a C Corporation, the distributions paid by the Fund are considered to be dividend income to the extent that the distributions are paid out of the Fund's current net income and realized capital gains. Because the primary source of the Fund's taxable income is realized gains, the cumulative taxable distributions are being reclassified against accumulated net realized gains for book purposes.

2. Investment management agreement and other transactions with affiliates

Legg Mason Partners Fund Advisor, LLC (LMPFA) is the Fund's investment manager and ClearBridge Investments, LLC (formerly ClearBridge Advisors, LLC) (ClearBridge) is the Fund's subadviser. LMPFA and ClearBridge are wholly-owned subsidiaries of Legg Mason, Inc. (Legg Mason).

Under the investment management agreement, the Fund pays an annual fee, paid monthly, in an amount equal to 1.00% of the Fund's average daily Managed Assets.

LMPFA provides administrative and certain oversight services to the Fund. LMPFA delegates to the subadviser the day-to-day portfolio management of the Fund, except for the management of cash and short-term instruments, which is provided by Western Asset. For its services, LMPFA pays ClearBridge 70% of the net management fee it receives from the Fund.

All officers and one Director of the Fund are employees of Legg Mason or its affiliates and do not receive compensation from the Fund.

3. Investments

During the year ended November 30, 2013, the aggregate cost of purchases and proceeds from sales of investments (excluding short-term investments) were as follows:

Purchases	\$ 298,966,561
Sales	287,408,453

4. Derivative instruments and hedging activities

GAAP requires enhanced disclosure about an entity's derivative and hedging activities.

During the year ended November 30, 2013, the Fund did not invest in any derivative instruments.

5. Transactions with affiliated companies

An Affiliated Company, as defined in the 1940 Act, includes a company in which the Fund owns 5% or more of the company's outstanding voting securities at any time during the period. The following transactions were effected in shares of such companies for the year ended November 30, 2013:

Company	Affiliate Value at 11/30/12	Purchased Cost	Purchased Shares/Par	Sold Cost	Sold Shares/Par	Return of Capital	Affiliate Value at 11/30/13	Realized Gain/Loss
EQT Midstream Partners LP*	\$ 33,476,506							
Knot Offshore Partners LP		\$ 12,160,136	549,590			\$ 413,457	\$ 15,415,999	
	\$ 33,476,506	\$ 12,160,136	549,590			\$ 413,457	\$ 15,415,999	

* This security is no longer an affiliated company.

6. Loan

During the year the Fund had a 364-day revolving credit agreement with a financial institution, which allowed the Fund to borrow up to an aggregate amount of \$300,000,000 (the previous agreement). On March 28, 2013, the Fund entered into a new \$125,000,000 secured revolving credit agreement (the new agreement) and terminated the previous agreement. Unless renewed, the new agreement will terminate on March 27, 2014. The Fund pays a commitment fee up to an annual rate of 0.15% on the unutilized portion of the loan commitment amount. The interest on the loan is calculated at variable rates based on the LIBOR, plus any applicable margin. Securities held by the Fund are subject to a lien, granted to the lender, to the extent of the borrowing outstanding and any additional expenses. The lender has equal access to the lien as the senior secured notes holder (See Note 7). At November 30, 2013, the Fund had \$80,000,000 of borrowings outstanding per the current credit agreement.

Interest expense related to the loans for the year ended November 30, 2013 was \$1,294,428. For the year ended November 30, 2013, the Fund incurred \$82,496 in commitment fees. For the year ended November 30, 2013, the average daily loan balance was \$127,780,822 and the weighted average interest rate was 1.01%.

7. Senior secured notes

On March 28, 2013, the Fund completed a private placement of \$180,000,000 of fixed-rate senior secured notes (the Senior Notes). Net proceeds from such offering and borrowings under the new credit facility were used to repay outstanding borrowings, make new portfolio investments, and for general corporate purposes. At November 30, 2013, the Fund had \$180,000,000 aggregate principal amount of Senior Notes outstanding. Interest expense related to the Senior Notes for the year ended November 30, 2013 was \$4,765,680. Costs incurred by the Fund in connection with the Senior secured notes are recorded as a deferred charge which are amortized over the life of the notes. Securities held by the Fund are subject to a lien, granted to the Senior Notes holder, to the extent of the borrowings outstanding and any additional expenses. The Senior Notes holder has equal access to the lien as the lender (See Note 6).

The table below summarizes the key terms of the offering.

Security	Amount	Rate	Maturity
Senior secured notes:			
Series A	\$ 30,000,000	3.33%	March 28, 2020
Series B	\$ 70,000,000	3.93%	March 28, 2023
Series C	\$ 80,000,000	4.08%	March 28, 2025

8. Distributions

On October 21, 2013 the Fund's Board of Directors (the Board) declared a quarterly distribution in the amount of \$0.33 per share payable on November 29, 2013 to shareholders of record on November 22, 2013.

On January 22, 2014, the Board declared a quarterly distribution in the amount of \$0.3300 per share, payable on February 21, 2014, to shareholders of record on February 28, 2014.

9. Capital shares

During the year ended November 30, 2013, the Fund filed a registration statement with the Securities and Exchange Commission authorizing the Fund to issue an additional 3,000,000 shares of common stock through an equity shelf offering. Under the equity shelf program, the Fund, subject to market conditions, may raise additional equity capital from time to time in varying amounts and offering methods at a net price at or above the Fund's then-current net asset value per common share. Costs incurred by the Fund in connection with the shelf offering are recorded as a deferred charge which are amortized over the period such additional common shares are sold, not to exceed one year. For the year ended November 30, 2013, there were no shares sold.

10. Income taxes

The current and deferred components of the tax benefit or expense are as follows:

	Current tax (benefit) expense	Deferred tax (benefit) expense	Total tax (benefit) expense
Net investment loss	\$ (19,101,850)	\$ 13,136,132	\$ (5,965,718)
Net realized gain	20,432,962	(469,569)	19,963,393
Change in net unrealized appreciation/(depreciation)		86,702,129	86,702,129
Total	\$ 1,331,112	\$ 99,368,692	\$ 100,699,804

The Federal and State components of the tax expense are as follows:

	Current tax (benefit) expense	Deferred tax (benefit) expense	Total tax (benefit) expense
Federal tax expense (benefit)	\$ 1,319,714	\$ 91,385,486	\$ 92,705,200
State tax expense (benefit)	11,398	7,983,206	7,994,604
Total tax expense (benefit)	\$ 1,331,112	\$ 99,368,692	\$ 100,699,804

Total income taxes have been computed by applying the federal statutory income tax rate of 35% plus a blended state income tax rate of 1.9%. The Fund applied this rate to net investment income (loss) and realized and unrealized gains (losses) on investments before income taxes in computing its total income tax expense (benefit).

During the year, the Fund's combined federal and state income tax rate decreased from 37.20% to 36.90% due to changes in certain state tax jurisdictions. This decrease resulted in the additional income tax benefit and corresponding decrease in the Fund's effective tax rate outlined below.

The provision for income taxes differs from the amount derived from applying the statutory income tax rate to net investment income (loss) and realized and unrealized gains (losses) before income taxes as follows:

Provision at statutory rates	\$ 95,719,410	35.00%
State taxes, net of federal tax benefit	5,196,197	1.90%
Change in blended state tax rate from 2.2% to 1.9%	(215,803)	(0.08)%
	\$ 100,699,804	36.82%

Deferred income taxes reflect (i) taxes on unrealized gains (losses), which are attributable to the difference between fair market value and tax basis, (ii) the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes, and (iii) the net tax benefit of net operating losses and tax credit carryforwards.

Components of the Fund's net deferred tax asset (liability) as of November 30, 2013 are as follows:

Deferred Tax Assets		
Net Operating Loss Carryforward	\$	56,736
Minimum Tax Credit Carryforward		1,184,721
Deferred Tax Liabilities		
Unrealized gains on investment securities	\$	(116,148,158)
Basis reduction resulting from differences in the book vs. taxable income received from MLPs		(11,221,497)
Total net deferred tax asset (liability)		\$ (126,128,198)

At November 30, 2013 the Fund had state net operating loss carryforwards of \$1,403,827 (deferred tax asset of \$56,736). Realization of the deferred tax asset related to the net operating loss carryforwards is dependent, in part, on generating sufficient taxable income in each respective state prior to expiration of the loss carryforwards. If not utilized, the state net operating loss carryforwards expire in tax years between 2023 and 2031.

At November 30, 2013, the Fund also had a minimum tax credit carryforward of \$1,184,721, which is available to offset against future regular federal tax liabilities. The minimum tax credit does not carry an expiration.

Additionally, the Fund utilized its entire federal net operating loss carryforward of \$4,636,558 and capital loss carryforward of \$2,516,586 during the year ended November 30, 2013. These amounts differed from the amounts disclosed in the prior year financial statements due to differences between the estimated and actual amounts of taxable income received from the MLPs for the prior year.

Although the Fund currently has a net deferred tax liability, it periodically reviews the recoverability of its deferred tax assets based on the weight of available evidence. When assessing the recoverability of its deferred tax assets, significant weight is given to the effects of potential future realized and unrealized gains on investments and the period over which these deferred tax assets can be realized. Based on the Fund's assessment, it has determined that it is more likely than not that its deferred tax assets will be realized through future taxable income of the appropriate character. Accordingly, no valuation allowance has been established on the Fund's deferred tax assets. The Fund will continue to assess the need for a valuation allowance in the future. Significant declines in the fair value of its portfolio of investments may change the Fund's assessment regarding the

recoverability of its deferred tax assets and may result in a valuation allowance. If a valuation allowance is required to reduce any deferred tax asset in the future, it could have a material impact on the Fund's net asset value and results of operations in the period it is recorded.

At November 30, 2013, the cost basis of investments for Federal income tax purposes was \$903,629,692. At November 30, 2013, gross unrealized appreciation and depreciation of investments for Federal income tax purposes were as follows:

Gross unrealized appreciation	\$ 346,569,801
Gross unrealized (depreciation)	(1,481,262)
Net unrealized appreciation (depreciation) before tax	\$ 345,088,539
Net unrealized appreciation (depreciation) after tax	\$ 217,750,868

11. Recent accounting pronouncement

The Fund has adopted the disclosure provisions of Financial Accounting Standards Board (FASB) Accounting Standards Update 2011-11 (ASU 2011-11), *Balance Sheet (Topic 210) Disclosures about Offsetting Assets and Liabilities* along with the related scope clarification provisions of FASB Accounting Standards Update 2013-01 (ASU 2013-01) entitled *Balance Sheet (Topic 210) Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities*. ASU 2011-11 is intended to enhance disclosures on the offsetting of financial assets and liabilities by requiring entities to disclose both gross and net information about financial instruments and transactions that are either offset in the statement of assets and liabilities or subject to a master netting agreement or similar arrangement. ASU 2013-01 limits the scope of ASU 2011-11's disclosure requirements on offsetting to financial assets and financial liabilities related to derivatives, repurchase and reverse repurchase agreements, and securities lending and securities borrowing transactions.

APPENDIX A

DESCRIPTION OF S&P, MOODY'S AND FITCH RATINGS

The definitions of the applicable rating symbols are set forth below:

Standard & Poor's Ratings Service (Standard & Poor's) Ratings from AA to CCC may be modified by the addition of a plus (+) or minus (-) sign to show relative standings within the major rating categories.

- AAA Bonds rated AAA have the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.
- AA Bonds rated AA differ from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.
- A Bonds rated A are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.
- BBB Bonds rated BBB exhibit adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.
- BB Bonds rated BB are less vulnerable to nonpayment than other speculative issues. However, they face major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.
- B Bonds rated B are more vulnerable to nonpayment than obligations rated BB, but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.
- CCC Bonds rated CCC are currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.
- CC Bonds rated CC are currently highly vulnerable to nonpayment.
- C A C rating is assigned to bonds that are currently highly vulnerable to nonpayment, bonds that have payment arrearages allowed by the terms of the documents, or bonds of an issuer that is the subject of a bankruptcy petition or similar action which have not experienced a payment default. Among others, the C rating may be assigned to subordinated debt, preferred stock or other obligations on which cash payments have been suspended in accordance with the instrument's terms or when preferred stock is the subject of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.
- D Bonds rated D are in payment default. The D rating category is used when payments on an obligation, including a regulatory capital instrument, are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The D rating also will be used upon the filing of a bankruptcy petition or the taking of similar action if payments on an obligation are jeopardized. An obligation's rating is lowered to D upon completion of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

¹ The ratings indicated herein are believed to be the most recent ratings available at the date of this SAI for the securities listed. Ratings are generally given to securities at the time of issuance. While the rating agencies may from time to time revise such ratings, they undertake no obligation to do so, and the ratings indicated do not necessarily represent ratings which would be given to these securities on the date of the Fund's fiscal year end.

L Ratings qualified with L apply only to amounts invested up to federal deposit insurance limits.

NR indicates no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular type of obligation as a matter of policy.

Moody's Investors Service (Moody's) Numerical modifiers 1, 2 and 3 may be applied to each generic rating from Aaa to Caa, where 1 is the highest and 3 the lowest ranking within its generic category.

Aaa Bonds rated Aaa are judged to be of the highest quality, with minimal credit risk.

Aa Bonds rated Aa are judged to be of high quality and are subject to very low credit risk.

A Bonds rated A are considered upper-medium grade and are subject to low credit risk.

Baa Bonds rated Baa are subject to moderate credit risk. They are considered medium grade and as such may possess certain speculative characteristics.

Ba Bonds rated Ba are judged to have speculative elements and are subject to substantial credit risk.

B Bonds rated B are considered speculative and are subject to high credit risk.

Caa Bonds rated Caa are judged to be of poor standing and are subject to very high credit risk.

Ca Bonds rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C Bonds rated C are the lowest rated class and are typically in default, with little prospect for recovery of principal or interest.

Absence of Rating: Where no rating has been assigned or where a rating has been suspended or withdrawn, it may be for reasons unrelated to the quality of the issue.

Should no rating be assigned, the reason may be one of the following:

1. An application for rating was not received or accepted.
2. The issue or issuer belongs to a group of securities or companies that are not rated as a matter of policy.
3. There is a lack of essential data pertaining to the issue or issuer.
4. The issue was privately placed, in which case the rating is not published in Moody's publications.

Suspension or withdrawal may occur if new and material circumstances arise, the effects of which preclude satisfactory analysis; if there is no longer available reasonable up-to-date data to permit a judgment to be formed; if a bond is called for redemption; or for other reasons.

Short-Term Debt Security Ratings:

Moody's short-term debt ratings are opinions of the ability of issuers to repay punctually senior debt obligations. These obligations have an original maturity not exceeding one year, unless explicitly noted.

Moody's employs the following three designations, all judged to be investment grade, to indicate the relative repayment ability of rated issuers:

P-1: Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2: Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3: Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

Edgar Filing: TORONTO DOMINION BANK - Form 424B2

NP: Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

A-2

Fitch Ratings, Inc. A brief description of the applicable Fitch Ratings, Inc. (Fitch) ratings symbols and meanings (as published by Fitch) follows (+ or may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the AAA Long-term rating category, to categories below CCC , or to Short-term ratings other than F1):

Investment Grade Long-Term Credit Ratings:

- AAA Highest credit quality. AAA ratings denote the lowest expectation of credit risk. They are assigned only in case of exceptionally strong capacity for timely payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.
- AA Very high credit quality. AA ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
- A High credit quality. A ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.
- BBB Good credit quality. BBB ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

Speculative Grade Long-Term Credit Ratings:

- BB Speculative. BB ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time.
- B Highly speculative. B ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.
- CCC Substantial credit risk. Default is a real possibility.
- CC Very high levels of credit risk. Default of some kind appears probable.
- C Exceptionally high levels of credit risk. Default appears imminent or inevitable.
- D Default. D ratings indicate a default. Default generally is defined as one of the following:

failure to make payment of principal and/or interest under the contractual terms of the rated obligation;

the bankruptcy filings, administration, receivership, liquidation or other winding-up or cessation of the business of an issuer/obligor; or

the distressed exchange of an obligation, where creditors were offered securities with diminished structural or economic terms compared with the existing obligation to avoid a probable payment default.

Short-Term Credit Ratings:

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity or security stream and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as short term based on market convention. Typically, this means up to 13 months for corporate, sovereign, and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

- F1 Highest short-term credit quality. Indicates the strongest capacity for timely payment of financial commitments; may have an added + to denote any exceptionally strong credit feature.
- F2 Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.
- F3 Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.
- B Speculative Minimal capacity for timely payment of financial commitments, plus vulnerability to near-term adverse changes in financial and economic conditions.
- C High short-term default risk. Default is a real possibility.
- D Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.
- RD Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Applicable to entity ratings only.

Notes to Long-term and Short-term ratings for Fitch:

A designation of Not Rated or NR is used to denote securities not rated by Fitch where Fitch has rated some, but not all, securities comprising an issuance capital structure.

Withdrawn : The rating has been withdrawn and the issue or issuer is no longer rated by Fitch Ratings. Indicated in rating databases with the symbol WD .

Rating Watch: Ratings are placed on Rating Watch to notify investors that there is a heightened probability of a rating change and the likely direction of such change. These are designated as Positive , indicating a potential upgrade, Negative , for a potential downgrade, or Evolving , if ratings may be raised, lowered or maintained. Rating Watch is typically resolved over a relatively short period.

Rating Outlook: Rating Outlooks indicate the direction a rating is likely to move over a one- to two-year period. They reflect financial or other trends that have not yet reached the level that would trigger a rating action, but which may do so if such trends continue. The majority of Outlooks are generally Stable, which is consistent with the historical migration experience of ratings over a one- to two-year period. Positive or Negative rating Outlooks do not imply that a rating change is inevitable and, similarly, ratings with Stable Outlooks can be raised or lowered without a prior revision to the Outlook, if circumstances warrant such an action. Occasionally, where the fundamental trend has strong, conflicting elements of both positive and negative, the Rating Outlook may be described as Evolving.

APPENDIX B

LEGG MASON PARTNERS FUND ADVISOR, LLC

Proxy Voting Policy

LMPFA delegates to each sub-adviser the responsibility for voting proxies for its funds, as applicable, through its contracts with each sub-adviser. Each sub-adviser may use its own proxy voting policies and procedures to vote proxies of the funds if the funds' Board reviews and approves the use of those policies and procedures. Accordingly, LMPFA does not expect to have proxy-voting responsibility for any of the funds.

Should LMPFA become responsible for voting proxies for any reason, such as the inability of a sub-adviser to provide investment advisory services, LMPFA shall utilize the proxy voting guidelines established by the most recent sub-adviser to vote proxies until a new sub-adviser is retained and the use of its proxy voting policies and procedures is authorized by the Board. In the case of a material conflict between the interests of LMPFA (or its affiliates if such conflict is known to persons responsible for voting at LMPFA) and any fund, the Board of Directors of LMPFA shall consider how to address the conflict and/or how to vote the proxies. LMPFA shall maintain records of all proxy votes in accordance with applicable securities laws and regulations.

LMPFA shall be responsible for gathering relevant documents and records related to proxy voting from each sub-adviser and providing them to the funds as required for the funds to comply with applicable rules under the Investment Company Act of 1940. LMPFA shall also be responsible for coordinating the provision of information to the Board with regard to the proxy voting policies and procedures of each sub-adviser, including the actual proxy voting policies and procedures of each sub-adviser, changes to such policies and procedures, and reports on the administration of such policies and procedures.

APPENDIX C

CLEARBRIDGE INVESTMENTS, LLC

Proxy Voting Policies and Procedures

I. TYPES OF ACCOUNTS FOR WHICH CLEARBRIDGE VOTES PROXIES

ClearBridge votes proxies for each client that has specifically authorized us to vote them in the investment management contract or otherwise and votes proxies for each ERISA account unless the plan document or investment advisory agreement specifically reserves the responsibility to vote proxies to the plan trustees or other named fiduciary. These policies and procedures are intended to fulfill applicable requirements imposed on ClearBridge by the Investment Advisers Act of 1940, as amended, the Investment Company Act of 1940, as amended, and the Employee Retirement Income Security Act of 1974, as amended, and the rules and regulations adopted under these laws.

II. GENERAL GUIDELINES

In voting proxies, we are guided by general fiduciary principles. Our goal is to act prudently, solely in the best interest of the beneficial owners of the accounts we manage and, in the case of ERISA accounts, for the exclusive purpose of providing economic benefits to such persons. We attempt to provide for the consideration of all factors that could affect the value of the investment and will vote proxies in the manner that we believe will be consistent with efforts to maximize shareholder values.

III. HOW CLEARBRIDGE VOTES

Section V of these policies and procedures sets forth certain stated positions. In the case of a proxy issue for which there is a stated position, we generally vote in accordance with the stated position. In the case of a proxy issue for which there is a list of factors set forth in Section V that we consider in voting on such issue, we consider those factors and vote on a case-by-case basis in accordance with the general principles set forth above. In the case of a proxy issue for which there is no stated position or list of factors that we consider in voting on such issue, we vote on a case-by-case basis in accordance with the general principles set forth above. We may utilize an external service provider to provide us with information and/or a recommendation with regard to proxy votes but we are not required to follow any such recommendations. The use of an external service provider does not relieve us of our responsibility for the proxy vote.

For routine matters, we usually vote according to our policy or the external service provider's recommendation, although we are not obligated to do so and an individual portfolio manager may vote contrary to our policy or the recommendation of the external service provider. If a matter is non-routine, *e.g.*, management's recommendation is different than that of the external service provider and ClearBridge is a significant holder or it is a significant holding for ClearBridge, the issues will be highlighted to the appropriate investment teams and their views solicited by members of the Proxy Committee. Different investment teams may vote differently on the same issue, depending upon their assessment of clients' best interests.

ClearBridge's proxy voting process is overseen and coordinated by its Proxy Committee.

IV. CONFLICTS OF INTEREST

In furtherance of ClearBridge's goal to vote proxies in the best interests of clients, ClearBridge follows procedures designed to identify and address material conflicts that may arise between ClearBridge's interests and those of its clients before voting proxies on behalf of such clients.

A. Procedures for Identifying Conflicts of Interest

ClearBridge relies on the following to seek to identify conflicts of interest with respect to proxy voting:

- 1.

Edgar Filing: TORONTO DOMINION BANK - Form 424B2

ClearBridge's employees are periodically reminded of their obligation (i) to be aware of the potential for conflicts of interest on the part of ClearBridge with respect to voting proxies on behalf of client accounts both as a result of their personal relationships or personal or business relationships relating to

AP-C-1

another Legg Mason business unit, and (ii) to bring conflicts of interest of which they become aware to the attention of ClearBridge's General Counsel/Chief Compliance Officer.

2. ClearBridge's finance area maintains and provides to ClearBridge Compliance and proxy voting personnel an up-to-date list of all client relationships that have historically accounted for or are projected to account for greater than 1% of ClearBridge's net revenues.
3. As a general matter, ClearBridge takes the position that relationships between a non-ClearBridge Legg Mason unit and an issuer (*e.g.*, investment management relationship between an issuer and a non-ClearBridge Legg Mason affiliate) do not present a conflict of interest for ClearBridge in voting proxies with respect to such issuer because ClearBridge operates as an independent business unit from other Legg Mason business units and because of the existence of informational barriers between ClearBridge and certain other Legg Mason business units. As noted above, ClearBridge employees are under an obligation to bring such conflicts of interest, including conflicts of interest which may arise because of an attempt by another Legg Mason business unit or non-ClearBridge Legg Mason officer or employee to influence proxy voting by ClearBridge to the attention of ClearBridge Compliance.
4. A list of issuers with respect to which ClearBridge has a potential conflict of interest in voting proxies on behalf of client accounts will be maintained by ClearBridge proxy voting personnel. ClearBridge will not vote proxies relating to such issuers until it has been determined that the conflict of interest is not material or a method for resolving the conflict of interest has been agreed upon and implemented, as described in Section IV below.

B. Procedures for Assessing Materiality of Conflicts of Interest and for Addressing Material Conflicts of Interest

1. ClearBridge maintains a Proxy Committee which, among other things, reviews and addresses conflicts of interest brought to its attention. The Proxy Committee is comprised of such ClearBridge personnel (and others, at ClearBridge's request), as are designated from time to time. The current members of the Proxy Committee are set forth in the Proxy Committee's Terms of Reference.
2. All conflicts of interest identified pursuant to the procedures outlined in Section IV. A. must be brought to the attention of the Proxy Committee for resolution. A proxy issue that will be voted in accordance with a stated ClearBridge position on such issue or in accordance with the recommendation of an independent third party generally is not brought to the attention of the Proxy Committee for a conflict of interest review because ClearBridge's position is that any conflict of interest issues are resolved by voting in accordance with a pre-determined policy or in accordance with the recommendation of an independent third party.
3. The Proxy Committee will determine whether a conflict of interest is material. A conflict of interest will be considered material to the extent that it is determined that such conflict is likely to influence, or appear to influence, ClearBridge's decision-making in voting the proxy. All materiality determinations will be based on an assessment of the particular facts and circumstances. A written record of all materiality determinations made by the Proxy Committee will be maintained.
4. If it is determined by the Proxy Committee that a conflict of interest is not material, ClearBridge may vote proxies notwithstanding the existence of the conflict.
5. If it is determined by the Proxy Committee that a conflict of interest is material, the Proxy Committee will determine an appropriate method to resolve such conflict of interest before the proxy affected by the conflict of interest is voted. Such determination shall be based on the particular facts and circumstances, including the importance of the proxy issue, the nature of the conflict of interest, etc.

Such methods may include:

disclosing the conflict to clients and obtaining their consent before voting;

suggesting to clients that they engage another party to vote the proxy on their behalf;

AP-C-2

in the case of a conflict of interest resulting from a particular employee's personal relationships, removing such employee from the decision-making process with respect to such proxy vote; or

such other method as is deemed appropriate given the particular facts and circumstances, including the importance of the proxy issue, the nature of the conflict of interest, etc.*

A written record of the method used to resolve a material conflict of interest shall be maintained.

C. Third Party Proxy Voting Firm Conflicts of Interest

With respect to a third party proxy voting firm described herein, the Proxy Committee will periodically review and assess such firm's policies, procedures and practices with respect to the disclosure and handling of conflicts of interest.

V. VOTING POLICY

These are policy guidelines that can always be superseded, subject to the duty to act solely in the best interest of the beneficial owners of accounts, by the investment management professionals responsible for the account holding the shares being voted. There may be occasions when different investment teams vote differently on the same issue. A ClearBridge investment team (e.g., ClearBridge's Social Awareness Investment team) may adopt proxy voting policies that supplement these policies and procedures. In addition, in the case of Taft-Hartley clients, ClearBridge will comply with a client direction to vote proxies in accordance with Institutional Shareholder Services (ISS) PVS Proxy Voting Guidelines, which ISS represents to be fully consistent with AFL-CIO guidelines.

A. Election of Directors

1. Voting on Director Nominees in Uncontested Elections.

a. We withhold our vote from a director nominee who:

attended less than 75 percent of the company's board and committee meetings without a valid excuse (illness, service to the nation/local government, work on behalf of the company);

were members of the company's board when such board failed to act on a shareholder proposal that received approval of a majority of shares cast for the previous two consecutive years;

received more than 50 percent withheld votes of the shares cast at the previous board election, and the company has failed to address the issue as to why;

is an insider where: (1) such person serves on any of the audit, compensation or nominating committees of the company's board, (2) the company's board performs the functions typically performed by a company's audit, compensation and nominating committees, or (3) the full board is less than a majority independent (unless the director nominee is also the company CEO, in which case we will vote FOR);

is a member of the company's audit committee, when excessive non-audit fees were paid to the auditor, or there are chronic control issues and an absence of established effective control mechanisms.

b. We vote for all other director nominees.

* Especially in the case of an apparent, as opposed to actual, conflict of interest, the Proxy Committee may resolve such conflict of interest by satisfying itself that ClearBridge's proposed vote on a proxy issue is in the best interest of client accounts and is not being influenced by the conflict of interest.

AP-C-3

2. Chairman and CEO is the Same Person.

We vote on a case-by-case basis on shareholder proposals that would require the positions of the Chairman and CEO to be held by different persons. We would generally vote FOR such a proposal unless there are compelling reasons to vote against the proposal, including:

Designation of a lead director

Majority of independent directors (supermajority)

All independent key committees

Size of the company (based on market capitalization)

Established governance guidelines

Company performance

3. Majority of Independent Directors

- a. We vote for shareholder proposals that request that the board be comprised of a majority of independent directors. Generally that would require that the director have no connection to the company other than the board seat. In determining whether an independent director is truly independent (e.g. when voting on a slate of director candidates), we consider certain factors including, but not necessarily limited to, the following: whether the director or his/her company provided professional services to the company or its affiliates either currently or in the past year; whether the director has any transactional relationship with the company; whether the director is a significant customer or supplier of the company; whether the director is employed by a foundation or university that received significant grants or endowments from the company or its affiliates; and whether there are interlocking directorships.
- b. We vote for shareholder proposals that request that the board audit, compensation and/or nominating committees include independent directors exclusively.

4. Stock Ownership Requirements

We vote against shareholder proposals requiring directors to own a minimum amount of company stock in order to qualify as a director, or to remain on the board.

5. Term of Office

We vote against shareholder proposals to limit the tenure of independent directors.

6. Director and Officer Indemnification and Liability Protection

Edgar Filing: TORONTO DOMINION BANK - Form 424B2

- a. Subject to subparagraphs 2, 3, and 4 below, we vote for proposals concerning director and officer indemnification and liability protection.
- b. We vote for proposals to limit and against proposals to eliminate entirely director and officer liability for monetary damages for violating the duty of care.
- c. We vote against indemnification proposals that would expand coverage beyond just legal expenses to acts, such as negligence, that are more serious violations of fiduciary obligations than mere carelessness.
- d. We vote for only those proposals that provide such expanded coverage noted in subparagraph 3 above in cases when a director's or officer's legal defense was unsuccessful if: (1) the director was found to have acted in good faith and in a manner that he reasonably believed was in the best interests of the company, *and* (2) if only the director's legal expenses would be covered.

AP-C-4

7. Director Qualifications

- a. We vote case-by-case on proposals that establish or amend director qualifications. Considerations include how reasonable the criteria are and to what degree they may preclude dissident nominees from joining the board.
- b. We vote against shareholder proposals requiring two candidates per board seat.

B. Proxy Contests

1. Voting for Director Nominees in Contested Elections

We vote on a case-by-case basis in contested elections of directors. Considerations include: chronology of events leading up to the proxy contest; qualifications of director nominees (incumbents and dissidents); for incumbents, whether the board is comprised of a majority of outside directors; whether key committees (i.e.: nominating, audit, compensation) comprise solely of independent outsiders; discussion with the respective portfolio manager(s).

2. Reimburse Proxy Solicitation Expenses

We vote on a case-by-case basis on proposals to provide full reimbursement for dissidents waging a proxy contest. Considerations include: identity of persons who will pay solicitation expenses; cost of solicitation; percentage that will be paid to proxy solicitation firms.

C. Auditors

1. Ratifying Auditors

We vote for proposals to ratify auditors, unless an auditor has a financial interest in or association with the company, and is therefore not independent; or there is reason to believe that the independent auditor has rendered an opinion that is neither accurate nor indicative of the company's financial position or there is reason to believe the independent auditor has not followed the highest level of ethical conduct. Specifically, we will vote to ratify auditors if the auditors only provide the company audit services and such other audit-related and non-audit services the provision of which will not cause such auditors to lose their independence under applicable laws, rules and regulations.

2. Financial Statements and Director and Auditor Reports

We generally vote for management proposals seeking approval of financial accounts and reports and the discharge of management and supervisory board members, unless there is concern about the past actions of the company's auditors or directors.

3. Remuneration of Auditors

We vote for proposals to authorize the board or an audit committee of the board to determine the remuneration of auditors, unless there is evidence of excessive compensation relative to the size and nature of the company.

4. Indemnification of Auditors

We vote against proposals to indemnify auditors.

D. Proxy Contest Defenses

1. Board Structure: Staggered vs. Annual Elections
 - a. We vote against proposals to classify the board.
 - b. We vote for proposals to repeal classified boards and to elect all directors annually.
2. Shareholder Ability to Remove Directors
 - a. We vote against proposals that provide that directors may be removed *only* for cause.

AP-C-5

- b. We vote for proposals to restore shareholder ability to remove directors with or without cause.
- c. We vote against proposals that provide that only continuing directors may elect replacements to fill board vacancies.
- d. We vote for proposals that permit shareholders to elect directors to fill board vacancies.

3. Cumulative Voting

- a. If plurality voting is in place for uncontested director elections, we vote for proposals to permit or restore cumulative voting.
- b. If majority voting is in place for uncontested director elections, we vote against cumulative voting.
- c. If plurality voting is in place for uncontested director elections, and proposals to adopt both cumulative voting and majority voting are on the same slate, we vote for majority voting and against cumulative voting.

4. Majority Voting

We vote for non-binding and/or binding resolutions requesting that the board amend a company's by-laws to stipulate that directors need to be elected with an affirmative majority of the votes cast, provided that it does not conflict with the state law where the company is incorporated. In addition, all resolutions need to provide for a carve-out for a plurality vote standard when there are more nominees than board seats (i.e. contested election). In addition, ClearBridge strongly encourages companies to adopt a post-election director resignation policy setting guidelines for the company to follow to promptly address situations involving holdover directors.

5. Shareholder Ability to Call Special Meetings

- a. We vote against proposals to restrict or prohibit shareholder ability to call special meetings.
- b. We vote for proposals that provide shareholders with the ability to call special meetings, taking into account a minimum ownership threshold of 10 percent (and investor ownership structure, depending on bylaws).

6. Shareholder Ability to Act by Written Consent

- a. We vote against proposals to restrict or prohibit shareholder ability to take action by written consent.
- b. We vote for proposals to allow or make easier shareholder action by written consent.

7. Shareholder Ability to Alter the Size of the Board

- a. We vote for proposals that seek to fix the size of the board.

- b. We vote against proposals that give management the ability to alter the size of the board without shareholder approval.

8. Advance Notice Proposals

We vote on advance notice proposals on a case-by-case basis, giving support to those proposals which allow shareholders to submit proposals as close to the meeting date as reasonably possible and within the broadest window possible.

9. Amendment of By-Laws

- a. We vote against proposals giving the board exclusive authority to amend the by-laws.
- b. We vote for proposals giving the board the ability to amend the by-laws in addition to shareholders.

AP-C-6

10. Article Amendments (not otherwise covered by ClearBridge Proxy Voting Policies and Procedures). We review on a case-by-case basis all proposals seeking amendments to the articles of association.

We vote for article amendments if:

shareholder rights are protected;

there is negligible or positive impact on shareholder value;

management provides adequate reasons for the amendments; and

the company is required to do so by law (if applicable).

E. Tender Offer Defenses

1. Poison Pills

- a. We vote for shareholder proposals that ask a company to submit its poison pill for shareholder ratification.
- b. We vote on a case-by-case basis on shareholder proposals to redeem a company's poison pill. Considerations include: when the plan was originally adopted; financial condition of the company; terms of the poison pill.
- c. We vote on a case-by-case basis on management proposals to ratify a poison pill. Considerations include: sunset provision poison pill is submitted to shareholders for ratification or rejection every 2 to 3 years; shareholder redemption feature 10% of the shares may call a special meeting or seek a written consent to vote on rescinding the rights plan.

2. Fair Price Provisions

- a. We vote for fair price proposals, as long as the shareholder vote requirement embedded in the provision is no more than a majority of disinterested shares.
- b. We vote for shareholder proposals to lower the shareholder vote requirement in existing fair price provisions.

3. Greenmail

- a. We vote for proposals to adopt anti-greenmail charter or bylaw amendments or otherwise restrict a company's ability to make greenmail payments.
- b. We vote on a case-by-case basis on anti-greenmail proposals when they are bundled with other charter or bylaw amendments.

4. Unequal Voting Rights

- a. We vote against dual class exchange offers.
- b. We vote against dual class re-capitalization.

5. Supermajority Shareholder Vote Requirement to Amend the Charter or Bylaws

- a. We vote against management proposals to require a supermajority shareholder vote to approve charter and bylaw amendments.
- b. We vote for shareholder proposals to lower supermajority shareholder vote requirements for charter and bylaw amendments.

6. Supermajority Shareholder Vote Requirement to Approve Mergers

- a. We vote against management proposals to require a supermajority shareholder vote to approve mergers and other significant business combinations.

AP-C-7

- b. We vote for shareholder proposals to lower supermajority shareholder vote requirements for mergers and other significant business combinations.

7. White Squire Placements

We vote for shareholder proposals to require approval of blank check preferred stock issues.

F. Miscellaneous Governance Provisions

1. Confidential Voting

- a. We vote for shareholder proposals that request corporations to adopt confidential voting, use independent tabulators and use independent inspectors of election as long as the proposals include clauses for proxy contests as follows: in the case of a contested election, management is permitted to request that the dissident group honor its confidential voting policy. If the dissidents agree, the policy remains in place. If the dissidents do not agree, the confidential voting policy is waived.
- b. We vote for management proposals to adopt confidential voting subject to the proviso for contested elections set forth in sub-paragraph A.1 above.

2. Equal Access

We vote for shareholder proposals that would allow significant company shareholders equal access to management's proxy material in order to evaluate and propose voting recommendations on proxy proposals and director nominees, and in order to nominate their own candidates to the board.

3. Bundled Proposals

We vote on a case-by-case basis on bundled or conditioned proxy proposals. In the case of items that are conditioned upon each other, we examine the benefits and costs of the packaged items. In instances when the joint effect of the conditioned items is not in shareholders' best interests and therefore not in the best interests of the beneficial owners of accounts, we vote against the proposals. If the combined effect is positive, we support such proposals.

4. Shareholder Advisory Committees

We vote on a case-by-case basis on proposals to establish a shareholder advisory committee. Considerations include: rationale and cost to the firm to form such a committee. We generally vote against such proposals if the board and key nominating committees are comprised solely of independent/outside directors.

5. Other Business

We vote for proposals that seek to bring forth other business matters.

6. Adjourn Meeting

We vote on a case-by-case basis on proposals that seek to adjourn a shareholder meeting in order to solicit additional votes.

7. Lack of Information

We vote against proposals if a company fails to provide shareholders with adequate information upon which to base their voting decision.

G. Capital Structure

1. Common Stock Authorization

- a. We vote on a case-by-case basis on proposals to increase the number of shares of common stock authorized for issue, except as described in paragraph 2 below.

AP-C-8

- b. Subject to paragraph 3, below we vote for the approval requesting increases in authorized shares if the company meets certain criteria:

Company has already issued a certain percentage (i.e. greater than 50%) of the company's allotment.

The proposed increase is reasonable (i.e. less than 150% of current inventory) based on an analysis of the company's historical stock management or future growth outlook of the company.

- c. We vote on a case-by-case basis, based on the input of affected portfolio managers, if holding is greater than 1% of an account.

2. Stock Distributions: Splits and Dividends

We vote on a case-by-case basis on management proposals to increase common share authorization for a stock split, provided that the split does not result in an increase of authorized but unissued shares of more than 100% after giving effect to the shares needed for the split.

3. Reverse Stock Splits

We vote for management proposals to implement a reverse stock split, provided that the reverse split does not result in an increase of authorized but unissued shares of more than 100% after giving effect to the shares needed for the reverse split.

4. Blank Check Preferred Stock

- a. We vote against proposals to create, authorize or increase the number of shares with regard to blank check preferred stock with unspecified voting, conversion, dividend distribution and other rights.
- b. We vote for proposals to create ~~declawed~~ blank check preferred stock (stock that cannot be used as a takeover defense).
- c. We vote for proposals to authorize preferred stock in cases where the company specifies the voting, dividend, conversion, and other rights of such stock and the terms of the preferred stock appear reasonable.
- d. We vote for proposals requiring a shareholder vote for blank check preferred stock issues.

5. Adjust Par Value of Common Stock

We vote for management proposals to reduce the par value of common stock.

6. Preemptive Rights

- a. We vote on a case-by-case basis for shareholder proposals seeking to establish them and consider the following factors:

Edgar Filing: TORONTO DOMINION BANK - Form 424B2

Size of the Company.

Characteristics of the size of the holding (holder owning more than 1% of the outstanding shares).

Percentage of the rights offering (rule of thumb less than 5%).

- b. We vote on a case-by-case basis for shareholder proposals seeking the elimination of pre-emptive rights.

7. Debt Restructuring

We vote on a case-by-case basis for proposals to increase common and/or preferred shares and to issue shares as part of a debt-restructuring plan. Generally, we approve proposals that facilitate debt restructuring.

AP-C-9

8. Share Repurchase Programs

We vote for management proposals to institute open-market share repurchase plans in which all shareholders may participate on equal terms.

9. Dual-Class Stock

We vote for proposals to create a new class of nonvoting or sub voting common stock if:

It is intended for financing purposes with minimal or no dilution to current shareholders

It is not designed to preserve the voting power of an insider or significant shareholder

10. Issue Stock for Use with Rights Plan

We vote against proposals that increase authorized common stock for the explicit purpose of implementing a shareholder rights plan (poison pill).

11. Debt Issuance Requests

When evaluating a debt issuance request, the issuing company's present financial situation is examined. The main factor for analysis is the company's current debt-to-equity ratio, or gearing level.

A high gearing level may incline markets and financial analysts to downgrade the company's bond rating, increasing its investment risk factor in the process. A gearing level up to 100 percent is considered acceptable.

We vote for debt issuances for companies when the gearing level is between zero and 100 percent.

We view on a case-by-case basis proposals where the issuance of debt will result in the gearing level being greater than 100 percent. Any proposed debt issuance is compared to industry and market standards.

12. Financing Plans

We generally vote for the adopting of financing plans if we believe they are in the best economic interests of shareholders.

H. Executive and Director Compensation

In general, we vote for executive and director compensation plans, with the view that viable compensation programs reward the creation of stockholder wealth by having high payout sensitivity to increases in shareholder value. Certain factors, however, such as repricing underwater stock options without shareholder approval, would cause us to vote against a plan. Additionally, in some cases we would vote against a plan deemed unnecessary.

1. OBRA-Related Compensation Proposals

a. Amendments that Place a Cap on Annual Grant or Amend Administrative Features

We vote for plans that simply amend shareholder-approved plans to include administrative features or place a cap on the annual grants any one participant may receive to comply with the provisions of Section 162(m) of the Internal Revenue Code.

b. Amendments to Added Performance-Based Goals

We vote for amendments to add performance goals to existing compensation plans to comply with the provisions of Section 162(m) of the Internal Revenue Code.

c. Amendments to Increase Shares and Retain Tax Deductions Under OBRA

We vote for amendments to existing plans to increase shares reserved and to qualify the plan for favorable tax treatment under the provisions of Section 162(m) the Internal Revenue Code.

AP-C-10

d. Approval of Cash or Cash-and-Stock Bonus Plans

We vote for cash or cash-and-stock bonus plans to exempt the compensation from taxes under the provisions of Section 162(m) of the Internal Revenue Code.

2. Expensing of Options

We vote for proposals to expense stock options on financial statements.

3. Index Stock Options

We vote on a case by case basis with respect to proposals seeking to index stock options.

Considerations include whether the issuer expenses stock options on its financial statements and whether the issuer's compensation committee is comprised solely of independent directors.

4. Shareholder Proposals to Limit Executive and Director Pay

a. We vote on a case-by-case basis on all shareholder proposals that seek additional disclosure of executive and director pay information. Considerations include: cost and form of disclosure. We vote for such proposals if additional disclosure is relevant to shareholder's needs and would not put the company at a competitive disadvantage relative to its industry.

b. We vote on a case-by-case basis on all other shareholder proposals that seek to limit executive and director pay. We have a policy of voting to reasonably limit the level of options and other equity-based compensation arrangements available to management to reasonably limit shareholder dilution and management compensation. For options and equity-based compensation arrangements, we vote FOR proposals or amendments that would result in the available awards being less than 10% of fully diluted outstanding shares (i.e. if the combined total of shares, common share equivalents and options available to be awarded under all current and proposed compensation plans is less than 10% of fully diluted shares). In the event the available awards exceed the 10% threshold, we would also consider the % relative to the common practice of its specific industry (e.g. technology firms). Other considerations would include, without limitation, the following:

Compensation committee comprised of independent outside directors

Maximum award limits

Repricing without shareholder approval prohibited

3-year average burn rate for company

Plan administrator has authority to accelerate the vesting of awards

Shares under the plan subject to performance criteria

Edgar Filing: TORONTO DOMINION BANK - Form 424B2

5. Golden Parachutes

- a. We vote for shareholder proposals to have golden parachutes submitted for shareholder ratification.
- b. We vote on a case-by-case basis on all proposals to ratify or cancel golden parachutes. Considerations include: the amount should not exceed 3 times average base salary plus guaranteed benefits; golden parachute should be less attractive than an ongoing employment opportunity with the firm.

6. Golden Coffins

- a. We vote for shareholder proposals that request a company not to make any death benefit payments to senior executives estates or beneficiaries, or pay premiums in respect to any life insurance

AP-C-11

policy covering a senior executive's life (golden coffin). We carve out benefits provided under a plan, policy or arrangement applicable to a broader group of employees, such as offering group universal life insurance.

- b. We vote for shareholder proposals that request shareholder approval of survivor benefits for future agreements that, following the death of a senior executive, would obligate the company to make payments or awards not earned.

7. Anti Tax Gross-up Policy

- a. We vote for proposals that ask a company to adopt a policy whereby it will not make, or promise to make, any tax gross-up payment to its senior executives, except for tax gross-ups provided pursuant to a plan, policy, or arrangement applicable to management employees of the company generally, such as relocation or expatriate tax equalization policy; we also vote for proposals that ask management to put gross-up payments to a shareholder vote.
- b. We vote against proposals where a company will make, or promise to make, any tax gross-up payment to its senior executives without a shareholder vote, except for tax gross-ups provided pursuant to a plan, policy, or arrangement applicable to management employees of the company generally, such as relocation or expatriate tax equalization policy.

8. Employee Stock Ownership Plans (ESOPs)

We vote for proposals that request shareholder approval in order to implement an ESOP or to increase authorized shares for existing ESOPs, except in cases when the number of shares allocated to the ESOP is excessive (i.e., generally greater than five percent of outstanding shares).

9. 401(k) Employee Benefit Plans

We vote for proposals to implement a 401(k) savings plan for employees.

10. Stock Compensation Plans

- a. We vote for stock compensation plans which provide a dollar-for-dollar cash for stock exchange.
- b. We vote on a case-by-case basis for stock compensation plans which do not provide a dollar-for-dollar cash for stock exchange using a quantitative model.

11. Directors Retirement Plans

- a. We vote against retirement plans for non-employee directors.
- b. We vote for shareholder proposals to eliminate retirement plans for non-employee directors.

12. Management Proposals to Reprice Options

We vote on a case-by-case basis on management proposals seeking approval to reprice options. Considerations include the following:

Historic trading patterns

Rationale for the repricing

Value-for-value exchange

Option vesting

Term of the option

Exercise price

Participation

AP-C-12

13. Shareholder Proposals Recording Executive and Director Pay

- a. We vote against shareholder proposals seeking to set absolute levels on compensation or otherwise dictate the amount or form of compensation.
- b. We vote against shareholder proposals requiring director fees be paid in stock only.
- c. We vote for shareholder proposals to put option repricing to a shareholder vote.
- d. We vote for shareholder proposals that call for a non-binding advisory vote on executive pay (say-on-pay). Company boards would adopt a policy giving shareholders the opportunity at each annual meeting to vote on an advisory resolution to ratify the compensation of the named executive officers set forth in the proxy statement s summary compensation table.
- e. We vote annual for the frequency of say-on-pay proposals rather than once every two or three years.
- f. We vote on a case-by-case basis for all other shareholder proposals regarding executive and director pay, taking into account company performance, pay level versus peers, pay level versus industry, and long term corporate outlook.

14. Management Proposals On Executive Compensation

- a. For non-binding advisory votes on executive officer compensation, when management and the external service provider agree, we vote for the proposal. When management and the external service provider disagree, the proposal becomes a refer item.
- b. We vote annual for the frequency of say-on-pay proposals rather than once every two or three years.

I. State/Country of Incorporation

1. Voting on State Takeover Statutes

- a. We vote for proposals to opt out of state freeze-out provisions.
- b. We vote for proposals to opt out of state disgorgement provisions.

2. Voting on Re-incorporation Proposals

We vote on a case-by-case basis on proposals to change a company s state or country of incorporation. Considerations include: reasons for re-incorporation (i.e. financial, restructuring, etc); advantages/ benefits for change (i.e. lower taxes); compare the differences in state/country laws governing the corporation.

3. Control Share Acquisition Provisions

- a. We vote against proposals to amend the charter to include control share acquisition provisions.
- b. We vote for proposals to opt out of control share acquisition statutes unless doing so would enable the completion of a takeover that would be detrimental to shareholders.
- c. We vote for proposals to restore voting rights to the control shares.
- d. We vote for proposals to opt out of control share cashout statutes.

J. Mergers and Corporate Restructuring

1. Mergers and Acquisitions

We vote on a case-by-case basis on mergers and acquisitions. Considerations include: benefits/ advantages of the combined companies (i.e. economies of scale, operating synergies, increase in market power/share, etc); offer price (premium or discount); change in the capital structure; impact on shareholder rights.

AP-C-13

2. Corporate Restructuring

We vote on a case-by-case basis on corporate restructuring proposals involving minority squeeze outs and leveraged buyouts. Considerations include: offer price, other alternatives/offers considered and review of fairness opinions.

3. Spin-offs

We vote on a case-by-case basis on spin-offs. Considerations include the tax and regulatory advantages, planned use of sale proceeds, market focus, and managerial incentives.

4. Asset Sales

We vote on a case-by-case basis on asset sales. Considerations include the impact on the balance sheet/ working capital, value received for the asset, and potential elimination of diseconomies.

5. Liquidations

We vote on a case-by-case basis on liquidations after reviewing management's efforts to pursue other alternatives, appraisal value of assets, and the compensation plan for executives managing the liquidation.

6. Appraisal Rights

We vote for proposals to restore, or provide shareholders with, rights of appraisal.

7. Changing Corporate Name

We vote for proposals to change the corporate name, unless the proposed name change bears a negative connotation.

8. Conversion of Securities

We vote on a case-by-case basis on proposals regarding conversion of securities. Considerations include the dilution to existing shareholders, the conversion price relative to market value, financial issues, control issues, termination penalties, and conflicts of interest.

9. Stakeholder Provisions

We vote against proposals that ask the board to consider non-shareholder constituencies or other non-financial effects when evaluating a merger or business combination.

K. Social and Environmental Issues

1. In general we vote on a case-by-case basis on shareholder social and environmental proposals, on the basis that their impact on share value may be difficult to quantify. In most cases, however, we vote for disclosure reports that seek additional information, particularly when it appears the company has not adequately addressed shareholders' social and environmental concerns. In determining our vote on shareholder social and environmental proposals, we also analyze the following factors:

Edgar Filing: TORONTO DOMINION BANK - Form 424B2

- a. whether adoption of the proposal would have either a positive or negative impact on the company's short-term or long-term share value;
- b. the percentage of sales, assets and earnings affected;
- c. the degree to which the company's stated position on the issues could affect its reputation or sales, or leave it vulnerable to boycott or selective purchasing;
- d. whether the issues presented should be dealt with through government or company-specific action;
- e. whether the company has already responded in some appropriate manner to the request embodied in a proposal;
- f. whether the company's analysis and voting recommendation to shareholders is persuasive;

AP-C-14

- g. what other companies have done in response to the issue;
- h. whether the proposal itself is well framed and reasonable;
- i. whether implementation of the proposal would achieve the objectives sought in the proposal; and
- j. whether the subject of the proposal is best left to the discretion of the board.

2. Among the social and environmental issues to which we apply this analysis are the following:

- a. Energy Efficiency and Resource Utilization
- b. Environmental Impact and Climate Change
- c. Human Rights and Impact on Communities of Corporate Activities
- d. Equal Employment Opportunity and Non Discrimination
- e. ILO Standards and Child/Slave Labor
- f. Product Integrity and Marketing
- g. Sustainability Reporting
- h. Board Representation
- i. Animal Welfare

L. Miscellaneous

1. Charitable Contributions

We vote against proposals to eliminate, direct or otherwise restrict charitable contributions.

2. Political Contributions

In general, we vote on a case-by-case basis on shareholder proposals pertaining to political contributions. In determining our vote on political contribution proposals we consider, among other things, the following:

Does the company have a political contributions policy publicly available

How extensive is the disclosure on these documents

What oversight mechanisms the company has in place for approving/reviewing political contributions and expenditures

Does the company provide information on its trade association expenditures

Total amount of political expenditure by the company in recent history

3. Operational Items

- a. We vote against proposals to provide management with the authority to adjourn an annual or special meeting absent compelling reasons to support the proposal.
- b. We vote against proposals to reduce quorum requirements for shareholder meetings below a majority of the shares outstanding unless there are compelling reasons to support the proposal.
- c. We vote for by-law or charter changes that are of a housekeeping nature (updates or corrections).
- d. We vote for management proposals to change the date/time/location of the annual meeting unless the proposed change is unreasonable.
- e. We vote against shareholder proposals to change the date/time/location of the annual meeting unless the current scheduling or location is unreasonable.
- f. We vote against proposals to approve other business when it appears as voting item.

AP-C-15

4. Routine Agenda Items

In some markets, shareholders are routinely asked to approve:

the opening of the shareholder meeting

that the meeting has been convened under local regulatory requirements

the presence of a quorum

the agenda for the shareholder meeting

the election of the chair of the meeting

regulatory filings

the allowance of questions

the publication of minutes

the closing of the shareholder meeting

We generally vote for these and similar routine management proposals.

5. Allocation of Income and Dividends

We generally vote for management proposals concerning allocation of income and the distribution of dividends, unless the amount of the distribution is consistently and unusually small or large.

6. Stock (Scrip) Dividend Alternatives

a. We vote for most stock (scrip) dividend proposals.

b. We vote against proposals that do not allow for a cash option unless management demonstrates that the cash option is harmful to shareholder value.

ClearBridge has determined that registered investment companies, particularly closed end investment companies, raise special policy issues making specific voting guidelines frequently inapplicable. To the extent that ClearBridge has proxy voting authority with respect to shares of registered investment companies, ClearBridge shall vote such shares in the best interest of client accounts and subject to the general fiduciary principles set forth herein without regard to the specific voting guidelines set forth in Section V. A. through L.

The voting policy guidelines set forth in Section V may be changed from time to time by ClearBridge in its sole discretion.

VI. OTHER CONSIDERATIONS

In certain situations, ClearBridge may determine not to vote proxies on behalf of a client because ClearBridge believes that the expected benefit to the client of voting shares is outweighed by countervailing considerations. Examples of situations in which ClearBridge may determine not to vote proxies on behalf of a client include:

A. Share Blocking

Proxy voting in certain countries requires share blocking. This means that shareholders wishing to vote their proxies must deposit their shares shortly before the date of the meeting (e.g. one week) with a designated depository. During the blocking period, shares that will be voted at the meeting cannot be sold until the meeting has taken place and the shares have been returned to client accounts by the designated depository. In deciding whether to vote shares subject to share blocking, ClearBridge will consider and weigh, based on the particular facts and circumstances, the expected benefit to clients of voting in relation to the detriment to clients of not being able to sell such shares during the applicable period.

AP-C-16

B. Securities on Loan

Certain clients of ClearBridge, such as an institutional client or a mutual fund for which ClearBridge acts as a sub-adviser, may engage in securities lending with respect to the securities in their accounts. ClearBridge typically does not direct or oversee such securities lending activities. To the extent feasible and practical under the circumstances, ClearBridge will request that the client recall shares that are on loan so that such shares can be voted if ClearBridge believes that the expected benefit to the client of voting such shares outweighs the detriment to the client of recalling such shares (*e.g.*, foregone income). The ability to timely recall shares for proxy voting purposes typically is not entirely within the control of ClearBridge and requires the cooperation of the client and its other service providers. Under certain circumstances, the recall of shares in time for such shares to be voted may not be possible due to applicable proxy voting record dates and administrative considerations.

VII. DISCLOSURE OF PROXY VOTING

ClearBridge employees may not disclose to others outside of ClearBridge (including employees of other Legg Mason business units) how ClearBridge intends to vote a proxy absent prior approval from ClearBridge's General Counsel/Chief Compliance Officer, except that a ClearBridge investment professional may disclose to a third party (other than an employee of another Legg Mason business unit) how s/he intends to vote without obtaining prior approval from ClearBridge's General Counsel/Chief Compliance Officer if (1) the disclosure is intended to facilitate a discussion of publicly available information by ClearBridge personnel with a representative of a company whose securities are the subject of the proxy, (2) the company's market capitalization exceeds \$1 billion and (3) ClearBridge has voting power with respect to less than 5% of the outstanding common stock of the company.

If a ClearBridge employee receives a request to disclose ClearBridge's proxy voting intentions to, or is otherwise contacted by, another person outside of ClearBridge (including an employee of another Legg Mason business unit) in connection with an upcoming proxy voting matter, he/she should immediately notify ClearBridge's General Counsel/Chief Compliance Officer.

If a portfolio manager wants to take a public stance with regards to a proxy, s/he must consult with ClearBridge's General Counsel/Chief Compliance Officer before making or issuing a public statement.

VIII. RECORDKEEPING AND OVERSIGHT

ClearBridge shall maintain the following records relating to proxy voting:

a copy of these policies and procedures;

a copy of each proxy form (as voted);

a copy of each proxy solicitation (including proxy statements) and related materials with regard to each vote;

documentation relating to the identification and resolution of conflicts of interest;

any documents created by ClearBridge that were material to a proxy voting decision or that memorialized the basis for that decision;
and

a copy of each written client request for information on how ClearBridge voted proxies on behalf of the client, and a copy of any written response by ClearBridge to any (written or oral) client request for information on how ClearBridge voted proxies on behalf of the requesting client.

Such records shall be maintained and preserved in an easily accessible place for a period of not less than six years from the end of the fiscal year during which the last entry was made on such record, the first two years in an appropriate office of the ClearBridge adviser.

Edgar Filing: TORONTO DOMINION BANK - Form 424B2

To the extent that ClearBridge is authorized to vote proxies for a United States Registered Investment Company, ClearBridge shall maintain such records as are necessary to allow such fund to comply with its recordkeeping, reporting and disclosure obligations under applicable laws, rules and regulations.

In lieu of keeping copies of proxy statements, ClearBridge may rely on proxy statements filed on the EDGAR system as well as on third party records of proxy statements and votes cast if the third party provides an undertaking to provide the documents promptly upon request.

Item 26. Marketing Arrangements

Reference is made to the sales agreement for the Registrant's common stock filed herewith or the form of underwriting agreement to be filed as an exhibit in a post-effective amendment to the Registrant's Registration Statement and the section entitled "Plan of Distribution" contained in Registrant's Prospectus incorporated by reference herein.

Item 27. Other Expenses of Issuance and Distribution

The following table sets forth the estimated expenses to be incurred in connection with the offering described in this Registration Statement:

SEC registration fees	\$ 40,920
Listing fees	35,000
Financial Industry Regulatory Authority fees	45,500
Printing and engraving expenses	14,500
Accounting fees and expenses	20,000
Legal fees and expenses	200,000
Total	\$ 355,920

Item 28. Persons Controlled by or Under Common Control with Registrant

None.

Item 29. Number of Holders of Securities

At November 30, 2013

Title of Class	Number of Record Holders
Common Stock, par value \$0.001 per share	6

Item 30. Indemnification

Sections 1-3 of Article VII of the Registrant's Articles of Incorporation, incorporated by reference as Exhibit (a) to this Registration Statement, provide that:

To the maximum extent permitted by Maryland statutory or decisional law, as amended or interpreted, no current or former director or officer of the Registrant shall have any liability to the Registrant or its stockholders for money damages. This limitation on liability applies to events occurring at the time a person serves as a director or officer of the Registrant whether or not such person is a director or officer at the time of any proceeding in which liability is asserted.

Edgar Filing: TORONTO DOMINION BANK - Form 424B2

The Registrant shall indemnify and advance expenses to its currently acting and its former directors to the fullest extent that indemnification of directors is permitted by Maryland statutory or decisional law. The Registrant shall indemnify and advance expenses to its officers to the same extent as its directors and may do so to such further extent as is consistent with law. The Board of Directors may by By-Law, resolution or agreement make further provision for indemnification of directors, officers, employees and agents to the fullest extent permitted by the Maryland statutory or decisional law. The foregoing rights of indemnification shall not be exclusive of any other rights to which those seeking indemnification may be entitled. The Board of Directors

C-2

may take such action as is necessary to carry out these indemnification provisions and is expressly empowered to adopt, approve and amend from time to time such By-Laws, resolutions or contracts implementing such provisions or such further indemnification arrangements as may be permitted by law. This indemnification applies to events occurring at the time a person serves as a director or officer of the Registrant whether or not such person is a director or officer at the time of any proceeding in which liability is asserted.

No provision of the Registrant's Articles of Incorporation shall be effective to protect or purport to protect any director or officer of the Registrant against any liability to the Registrant or its security holders to which he would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his office.

Insofar as indemnification for liability arising under the Securities Act of 1933, as amended (the Securities Act), may be permitted to trustees, officers and controlling persons of the Registrant pursuant to the foregoing provisions, or otherwise, the Registrant has been advised that, in the opinion of the SEC, such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a trustee, officer or controlling person of the Registrant in the successful defense of any action, suit or proceeding) is asserted by such trustee, officer or controlling person in connection with the securities being registered, the Registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

Item 31. Business and Other Connections of Adviser

The descriptions of LMPFA and ClearBridge under the caption Management of the Fund in the Prospectus and Statement of Additional Information of this registration statement are incorporated by reference herein. Information as to the directors and officers of LMPFA and ClearBridge, together with information as to any other business, profession, vocation or employment of a substantial nature engaged in by the directors and officers of LMPFA and ClearBridge in the last two years, is included in their respective applications for registration as an investment adviser on Form ADV (File Nos. 801-66785, 801-64710, respectively) filed under the Investment Advisers Act of 1940, as amended, and is incorporated herein by reference.

Item 32. Location of Accounts and Records

The accounts and records of the Registrant are maintained at the office of the Registrant at 620 Eighth Avenue, New York, New York 10018.

Item 33. Management Services

Not applicable.

Item 34. Undertakings

(1) Registrant undertakes to suspend the offering of shares until the prospectus is amended, if subsequent to the effective date of this registration statement, its net asset value declines more than ten percent from its net asset value as of the effective date of the registration statement or its net asset value increases to an amount greater than its net proceeds as stated in the prospectus.

(2) Not applicable.

(3) Not applicable.

(4) (a) to file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

(1) to include any prospectus required by Section 10(a)(3) of the Securities Act;

(2) to reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement; and

(3) to include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement.

(b) that, for the purpose of determining any liability under the Securities Act, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of those securities at that time shall be deemed to be the initial bona fide offering thereof;

(c) to remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering;

(d) that, for the purpose of determining liability under the Securities Act to any purchaser, if the Registrant is subject to Rule 430C: each prospectus filed pursuant to Rule 497(b), (c), (d) or (e) under the Securities Act as part of this registration statement relating to an offering, other than prospectuses filed in reliance on Rule 430A under the Securities Act, shall be deemed to be part of and included in this registration statement as of the date it is first used after effectiveness. *Provided, however*, that no statement made in this registration statement or prospectus that is part of this registration statement or made in a document incorporated or deemed incorporated by reference into this registration or prospectus that is part of this registration statement will, as to a purchaser with a time of contract of sale prior to such first use, supersede or modify any statement that was made in this registration statement or prospectus that was part of this registration statement or made in any such document immediately prior to such date of first use.

(e) that for the purpose of determining liability of the Registrant under the Securities Act to any purchaser in the initial distribution of securities:

The undersigned Registrant undertakes that in a primary offering of securities of the undersigned Registrant pursuant to this registration statement, regardless of the underwriting method used to sell the securities to the purchaser, if the securities are offered or sold to such purchaser by means of any of the following communications, the undersigned Registrant will be a seller to the purchaser and will be considered to offer or sell such securities to the purchaser:

(1) any preliminary prospectus or prospectus of the undersigned Registrant relating to the offering required to be filed pursuant to Rule 497 under the Securities Act;

(2) the portion of any advertisement pursuant to Rule 482 under the Securities Act relating to the offering containing material information about the undersigned Registrant or its securities provided by or on behalf of the undersigned Registrant; and

(3) any other communication that is an offer in the offering made by the undersigned Registrant to the purchaser.

(5) Registrant undertakes that, for the purpose of determining any liability under the Securities Act, the information omitted from the form of prospectus filed as part of the Registration Statement in reliance upon Rule 430A and contained in the form of prospectus filed by the Registrant pursuant to Rule 497(h) under the Securities Act shall be deemed to be a part of the Registration Statement as of the time it was declared effective.

Registrant undertakes that, for the purpose of determining any liability under the Securities Act, each post-effective amendment that contains a form of prospectus will be deemed to be a new registration statement relating to the securities offered therein, and the offering of the securities at that time shall be deemed to be the initial bona fide offering thereof.

(6) Registrant undertakes to send by first class mail or other means designed to ensure equally prompt delivery within two business days of receipt of a written or oral request, any Statement of Additional Information.

(7) Upon each issuance of securities pursuant to this Registration Statement, the Registrant undertakes to file a form of prospectus and/or form of prospectus supplement pursuant to Rule 497 and a post-effective amendment to the extent required by the Securities Act and the rules and regulations thereunder, including, but not limited to a post-effective amendment pursuant to Rule 462(c) or Rule 462(d) under the Securities Act.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, as amended (the 1933 Act) and the Investment Company Act of 1940, as amended, the Registrant has duly caused this Amendment to the Registration Statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of New York, State of New York on the 21st day of February, 2014.
