VENTURE METALS, LLC

NOTES TO FINANCIAL STATEMENTS

YEARS ENDED DECEMBER 31, 2008 AND 2007

NOTE 1 -- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

NATURE OF OPERATIONS -- The Limited Liability Company is engaged in recycling metals, primarily stainless steel and its component elements, through the purchase and resale of scrap metal. The Company's primary facility is located in Louisville, Kentucky with a satellite location in Mobile, Alabama.

BASIS OF ACCOUNTING -- The operating agreement of the Limited Liability Company specifies that each member's capital account shall be determined and maintained using the tax basis of accounting in accordance with Treasury Regulations adopted under Section 704(b) of the Internal Revenue Code. This requires that items of income, gain, loss, deduction, or credit be allocated to the members in accordance with the operating agreement. These financial statements, however, have been prepared using the accrual basis of accounting in accordance with generally accepted accounting principles used in the United States of America.

As a Limited Liability Company, each member's liability is limited to amounts reflected in their respective member accounts plus any debt for which a personal guarantee has been given.

BANK SWEEP ACCOUNT -- The Company has a sweep arrangement with its bank that is tied to its line of credit. Under this arrangement, available cash balances are applied against the Company's line of credit, and then invested in money market funds when there is no outstanding balance on the line of credit. The resulting liabilities for items outstanding on the bank account are shown as current liabilities on the balance sheet.

USE OF ESTIMATES -- Financial statements prepared in conformity with generally accepted accounting principles used in the United States of America require management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

INVENTORIES -- Inventories are recorded at the lower of cost or market using the average cost method which approximates first-in, first-out (FIFO) method. The established reserve for inventory valuation adjustments was \$3,791,087 and \$122,650 at December 31, 2008 and 2007, respectively.

ACCOUNTS RECEIVABLE -- The Company grants trade credit to its customers. Receivables are valued at management's estimate of the amount that will be ultimately collected. No allowance was considered necessary at December 31, 2008 and 2007.

PROPERTY AND EQUIPMENT -- Property and equipment are recorded at cost and are depreciated over their estimated useful lives. Depreciation is computed using the straight-line method.

INCOME TAXES -- The Members have elected to be taxed as a corporation under sub-chapter S of the Internal Revenue Code of 1986, as amended. As a result, the members will be treated substantially as partners, reporting federal corporate taxable income on their individual income tax returns and state corporate taxable income in accordance with respective state laws.

ADVERTISING COSTS -- Advertising costs are charged to operations as incurred. Advertising expense was \$24,645 and \$1,349 for the years ending December 31, 2008 and 2007, respectively.

RECLASSIFICATIONS -- Certain reclassifications have been made in the 2007 financial statements to conform to the classifications used in 2008.

NOTE 12 -- Derivatives and Hedging (CONTINUED)

The Company uses derivatives to mitigate certain market risks related to commodity pricing fluctuations. The Company uses futures contracts to hedge certain types of inventory purchases. (Venture Metals) as if the acquisition of certain assets had been completed on January 1, 2008.

The unaudited pro forma consolidated balance sheet as of December 31, 2008, gives effect to the acquisition as if the transaction had occurred on December 31, 2008.

The unaudited pro forma consolidated financial information may not necessarily reflect the financial position or results of operations which would have been obtained if these transactions had been consummated on the dates indicated in the unaudited pro forma consolidated financial information.

The unaudited pro forma consolidated financial data are based on preliminary estimates and assumptions set forth in the notes to such information that we believe are reasonable. Pro forma adjustments are necessary to reflect the estimated purchase price and changes in our capital structure and to adjust amounts related to Venture Metals assets and liabilities to a preliminary estimate of their fair values. Pro forma adjustments are also necessary to reflect the income tax effects related to the pro forma adjustments.

The pro forma adjustments and allocation of purchase price are preliminary and are based on management's estimates of the fair value of the assets acquired. The final purchase price allocation will be completed after asset valuations are finalized. This final valuation will be based on the actual assets of Venture Metals that exist as of the date of the completion of the transaction. Any final adjustments may change the allocation of purchase price which could affect the fair value assigned to the assets and liabilities and could result in a change to the unaudited pro forma consolidated financial data. In addition, the impact of integration activities could cause material differences in the information presented.

The unaudited pro forma financial information is presented for informational purposes only and is based on certain assumptions that we believe are reasonable and does not purport to represent our financial condition or our results of operations had the business combination occurred on or as of the dates noted above nor is the financial information necessarily indicative of future consolidated financial position or results of operations.
