Registrant's telephone number, including area code

Securities registered pursuant to Section 12(b) of the Act:

Title of Class

Name of Each Exchange on Which Registered

Common Stock, \$.01 par value

The Nasdaq Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes o No þ

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes o No þ

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was

required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Non-accelerated filer

Accelerated filer

Smaller reporting
company

(Do not check if a smaller reporting
company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of June 30, 2007, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was \$380,689,713 based on the closing sale price as reported on the Nasdaq Global Select Market.

Table of Contents

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at February 26, 2008
Common Stock, \$.01 par value per share	50,623,172 shares

DOCUMENTS INCORPORATED BY REFERENCE

The information required by Part III (Items 10, 11, 12, 13 and 14) is incorporated by reference from the registrant's definitive proxy statement for its 2008 Annual Meeting of Stockholders, to be filed with the Commission pursuant to Regulation 14A.

PART I

ITEM 1. BUSINESS

General

eResearchTechnology, Inc. (eRT), a Delaware corporation, was founded in 1977 to provide Cardiac Safety services to evaluate the safety of new drugs. eRT and its consolidated subsidiaries collectively are referred to as the Company or we. We provide technology and services that enable the pharmaceutical, biotechnology and medical device industries to collect, interpret and distribute cardiac safety and clinical data more efficiently. We are a market leader in providing centralized electrocardiographic services (Cardiac Safety services or EXPeRT® ECG services) and a leading provider of technology and services that streamline the clinical trials process by enabling our clients to evolve from traditional, paper-based methods to electronic processing using our EXPeRT® eClinical and EXPeRT® ePRO products and services.

Our solutions improve the accuracy, timeliness and efficiency of trial set-up, data collection from sites worldwide, data interpretation, and new drug, biologic and device application submissions. We offer Cardiac Safety services, which are utilized by pharmaceutical companies, biotechnology companies, medical device companies, clinical trial sponsors and clinical research organizations (CROs) during the conduct of clinical trials. The Cardiac Safety services are performed during all phases of a clinical trial cycle and include the collection, interpretation and distribution of electrocardiographic (ECG) data and images. The ECG provides an electronic map of the heart's rhythm and structure, and typically is performed in most clinical trials. Cardiac Safety services permit assessments of the safety of therapies by documenting the occurrence of cardiac electrical change. Thorough QTc studies are comprehensive studies that typically are of large volume and of short duration, with ECGs performed over a two- to six-month period. We also offer site support, which includes the rental and sale of cardiac safety equipment along with related supplies and freight. Additionally, we offer the licensing and, at the client's option, hosting of our proprietary EXPeRT® eClinical software products and the provision of maintenance and consulting services in support of our proprietary EXPeRT® eClinical software products. We offer electronic patient reported outcomes (ePRO) services along with 57 proprietary clinical assessments.

We conduct our operations through offices in the United States (U.S.) and the United Kingdom (UK). Our international net revenues represented approximately 20%, 21% and 23% of total net revenues for the years ended December 31, 2005, 2006 and 2007, respectively. The majority of our revenues are allocated based upon the profit split transfer pricing methodology, and revenues are generally allocated to the geographic segment where the work is performed.

Recent Transactions

On November 28, 2007, we acquired Covance Cardiac Safety Services, Inc. (CCSS), the centralized ECG business of Covance Inc. (Covance). CCSS is engaged primarily in the business of processing electrocardiograms in a digital environment as part of clinical trials of pharmaceutical candidates to permit assessments of the safety of therapies by documenting the occurrence of cardiac electrical change. Under the terms of the Purchase Agreement, we purchased all of the outstanding shares of capital stock of CCSS in consideration of an upfront cash payment of \$35.2 million plus additional cash payments of up to approximately \$14 million, based upon our potential realization of revenue from the backlog transferred and from new contracts secured through Covance's marketing activities. During 2007, Covance earned \$3.0 million of this contingent amount, which we paid in January 2008. The final net proceeds to Covance are further subject to certain post-closing working capital adjustments. As previously reported, the

acquisition included a marketing agreement under which Covance is obligated to use us as its provider of centralized cardiac safety services, and to offer these services to Covance's clients, on an exclusive basis, for a 10-year period, subject to certain exceptions. We will pay Covance a portion of the revenues we receive during each calendar year of the 10-year term that are based primarily on referrals made by Covance under the agreement. The agreement does not restrict our continuing collaboration with our other key CRO, Phase I units, Academic Research Centers and other strategic partners. We believe that the CCSS acquisition will enhance our revenues and, when fully integrated, our profitability because it will permit us to better leverage our personnel and technology.

Table of Contents

In the second quarter of 2007, we announced that we were launching a new line of business focused on electronic patient reported outcomes (EXPeRT® ePRO™) and entered into a long-term strategic relationship with Healthcare Technology Systems, Inc. (HTS), a leading authority in the research, development and validation of computer administered clinical rating instruments. The strategic relationship includes the exclusive licensing (subject to one pre-existing license agreement) of 57 IVR clinical assessments offered by HTS along with HTS' s interactive voice response, or IVR system. We placed the system into production in December 2007. As of December 31, 2007, we paid HTS \$1.5 million for the license and a \$0.25 million advanced payment against future royalties. We will pay royalties to HTS based on the level of revenues we receive from the assessments and the IVR system. An additional \$0.75 million of royalty payments are guaranteed, and will be made in two equal payments in November 2008 and May 2009. Any royalties earned by HTS will be applied against these payments. After these two payments are made, all future payments we make to HTS will be royalty payments based solely on revenues we receive from EXPeRT® ePRO™ sales.

Product and Service Offerings

Our revenues as a percentage of total revenues is as follows:

	Year Ended December 31,		
	2005	2006	2007
Net revenues:			
Licenses	7.0%	3.5%	2.7%
Services	68.8	64.0	70.5
Site support	24.2	32.5	26.8
Total net revenues	100.0	100.0	100.0

Our license revenues consist of license fees for perpetual license sales and monthly and annual term license sales for our EXPeRT® eClinical and EXPeRT® ePRO™ products. Our services revenues consist of EXPeRT® Cardiac Safety services, technology consulting and training services and software maintenance services. The technology consulting and training services and software maintenance services are related to our EXPeRT® eClinical and EXPeRT® ePRO™ products. Our site support revenue consists of cardiac safety equipment rentals and sales along with related supplies and freight.

Product/Services**Description**

EXPeRT® Cardiac Safety	<p>Diagnostic tests are employed in clinical trials to measure the effect of the product on certain body organs and systems in order to determine the product' s safety. Cardiac safety testing is a critical component of diagnostic testing. eRT provides a highly scalable set of Cardiac Safety products and services centered on our regulatory compliant (Title 21 CFR, Part 11) EXPeRT®</p> <p>Cardiac Safety Intelligent Data Management System. EXPeRT®</p> <p>provides for workflow enabled cardiac safety data collection, interpretation and distribution of ECG data and images. EXPeRT®</p>
------------------------	---

also enables analysis and cardiologist interpretation of ECGs performed on research subjects in connection with our clients' clinical trials.

EXPeRT[®] is designed specifically to address global regulatory guidance and technical standards for digital ECG processing to include digital collection, waveform measurements and annotations, review and output to the regulatory standard file format. EXPeRT[®]

includes the ability for ECGs to be viewed as side-by-side ECG images for comparison, supplemented by the ability to review prior patient ECG tracings.

EXPeRT[®] further enhances our ECG services by permitting cardiologists, with training in our ECG interpretation guidelines and proper security access, to perform telecardiology, which is the ability to access and evaluate ECGs electronically in remote locations. We also establish rules for standardized,

Table of Contents

semi-automated and automated workflow management, allowing audit trail accounting and generating safety and operational metrics reports for sponsors and investigators.

We provide the following centralized ECG testing services as part of our EXPeRT®

Cardiac Safety services:

Digital ECG Services. Allows the investigator to transmit, via modem, 12-lead ECG data directly to us for interpretation and rapid return of results to the investigator and the sponsor. ECGs are measured by our cardiac safety specialists utilizing an on screen, high-resolution caliper placement system, and are then interpreted by a cardiologist. We also offer cardiac safety specialist and cardiologist adjudication of software algorithm placed measurements where appropriate and as desired by our clients.

Continuous Digital 12-lead ECG Recording. The 12-lead ECG signals are recorded onto compact flash memory cards and submitted to us. From these recordings, 12-lead ECGs can be evaluated at specific time points. These ECGs are measured by a cardiac safety specialist and then interpreted by a cardiologist. Continuous digital 12-lead ECG recordings can also be used for studies assessing the incidence of arrhythmias, cardiac ischemia and/or heart rate variability findings.

Holter Recording. This is a continuous ECG recording of the heart's rhythm on a flash card that is reviewed by a cardiac safety specialist and then by a cardiologist. Holter data reported by us is provided for studies assessing the incidence of arrhythmias, cardiac ischemia and/or heart rate variability.

Paper ECG Services. Paper ECGs are measured by our cardiac safety specialists utilizing a high-resolution digitizing system, and are then interpreted by a cardiologist. Alternatively, paper ECGs may be scanned to a digital format, where appropriate.

FDA XML ECG Service. This service provides our clients with electronic versions of each ECG processed by EXPeRT®. The ECGs processed by EXPeRT®

are rendered in a format compliant with the United States Food and Drug Administration's (FDA) XML standard for digital ECGs.

The EXPeRT®

Direct. This is a hosted solution, which delivers near real time cardiac safety feedback at the program, trial, center and patient level, along with related metrics, such as trial enrollment, as well as the ability to organize and publish a variety of study-specific information and the ability to link data points in reports direct to digital ECG waveforms.

Cardiac Safety Equipment. We provide ECG equipment to clients to perform the ECG and Holter recordings and give them the means to send such recordings to eRT. The service comprises equipment rental and sales, along with related supplies and freight.

Cardiac Safety Consulting

The centralization of electrocardiograms in clinical research has become increasingly important to organizations involved in the development of new drugs. Global regulators each apply their own slightly different interpretation of the International Conference on Harmonization E14 guidelines and as a result sponsors look to their vendors to provide key scientific input into the overall process. Our cardiac safety consulting service aids sponsors in the development of protocol synopses, the creation and analysis of statistical plans as well as the provision of an expert medical report with regard to the cardiac findings. We are

Table of Contents

involved in all phases of clinical development from a consultancy point of view. We offer this service both as a stand-alone service and integrated with our full suite of Cardiac Safety services.

EXPeRT® eClinical

The process of designing, implementing and managing a clinical trial requires a well defined process and set of supporting products to effectively handle the variety of tasks and information comprising a clinical trial. We provide a suite of products to address the capture, management and dissemination of clinical trial data. Our integrated suite is comprised of the following:

EXPeR™

Portal is an easy to use portal application enabling clinical trial researchers and staff to gain real-time access to study dashboards, progress reports, folders and forums enabling efficient management and communication of study progress. EXPeRT®

Portal also includes a web-based training environment, eHealth Education™, which enables clinical research professionals to learn about technology developments, new products, clinical protocols, and other educational matters.

EXPeR™

EDC Now! uses the latest technology to provide a comprehensive electronic data capture (EDC) system which provides sponsors with the ability to roll out electronic studies in short time frames. This rapid time to start combined with a fixed price and scope approach helps sponsors realize the benefits of EDC without the risks normally associated with the typical EDC process.

EXPeR™

Data Management is a clinical data management application for collecting, cleaning and managing clinical trial data.

EXPeR™

Adverse Event Reporting is an adverse event management system enabling the generation of key regulatory reports, including CIOMS and Medwatch.

EXPeR™

Trial Management is a clinical trial management technology that can be used to set up clinical trials, establish standards, track study activities, plan resources, distribute supplies, manage the financial aspects of a trial and electronically view clinical trial data.

Our EXPeRT® eClinical solution is available for license over a renewable term (subscription license) in addition to a traditional perpetual license with annual maintenance. Our EXPeRT®

eClinical offerings may be hosted by us or one of our third- party hosting partners, or they may be installed on our client s computing infrastructure.

EXPeRT® ePRO

Data is collected during clinical trials allowing sponsors to gauge the efficacy of the compounds they are testing. Collecting data directly from the patient can be performed in a number of different methods, including electronically. We provide an electronic patient reported outcome (ePRO) service that performs this function for sponsors. Our solution consists of the following tools and services:

Data Collection Our EXPeRT®

ePRO

solution is an IVR system that allows subjects in a clinical trial to call into the system via a telephone and enter their reported data directly into the system.

Data Management Once the data has been entered into the EXPeRT®

ePRO

system there are a number of data management functions that can be performed depending on the requirements of the sponsor. This includes sending call reports to the sites, sending call reports to the sponsor, alerting the sites if data is outside

Table of Contents

specifically set boundaries, web access to the data by the sponsor, and cleaning of data per the specs provided by the sponsor.

Data Delivery At the conclusion of the study, the data is compiled and then delivered according to the sponsor requirements. This can include SAS exports, ASCII exports, electronic file transfers and data delivery on digital media.

Project Assurance/
Implementation Assurance

We provide a full spectrum of consulting services for all of our products that augment the study management and implementation efforts of clients in support of their clinical research requirements. The methodologies (Project Assurance for Cardiac Safety and Implementation Assurance for EXPeRT®

eClinical and EXPeRT®

ePRO Applications) provide a consistent framework through which we can effectively manage the delivery of all products and services. Such methodologies provide the standards, guidelines and services that allow us to effectively anticipate our clients' needs and assure proactive communication and implementation in order to meet and exceed our clients' goals. The services include study initiation, project management, education, site qualification, configuration, technology and regulatory review, research dashboards and electronic reporting, data management, uniform standards and standard operating procedures, and migration services. In addition, we provide on-site research and technology advisory services, support services including online and help desk support, and software maintenance.

Research and Development

Overview

As of December 31, 2007, we had 41 employees engaged in research and development across all our product areas. The central approach of our research and development team is to foster a close relationship with our customers and internal users to ensure we continue to deliver industry leading capabilities across all product lines. Our proprietary and patented technology is designed to materially enhance the abilities of our customers and internal users to efficiently and securely capture and process clinical data, to ensure regulatory compliance and to offer scalability to support the largest of clinical studies in a timely manner.

Technology

Our product applications use underlying industry standard technologies including Java for application layer development and Oracle 10g for database services. Our system development lifecycle process features best practices in the areas of requirements capture, software design and development. Our philosophy of using industry-standard tools allows us to focus our attention on the features and functions delivered through the client interface and the application layer in order to meet our clients' strategic business requirements.

2007 Product Initiatives

During 2007, we delivered and launched major product initiatives across each product line as follows:

We launched EXPeRT® 2 in January 2007 to drive our global cardiac safety operations. The system experienced no software outages during the year, attesting to the quality of the development process. The system is configured to enable scalability to meet our current and future capacity needs and performance levels to ensure we meet contracted turn-around-times. A backup data center is also configured for quick start-up should any issue arise with the primary data center facility. EXPeRT® 2 provides a patented and comprehensive set of enhancements that extend our flexibility to meet customer-unique demands, enhance our operational efficiencies and increase our global scalability. To further embrace customer requests, EXPeRT® 2 provides such features as on-demand reporting, protocol-unique clinical alerts and auto-assignment of cardiologists to subjects. Operational efficiency is enhanced by the use of standardized protocol templates, protocol versioning, new management and workflow features, and enhanced query automation.

Table of Contents

EXPeRT® Direct is our latest generation of portal technology providing our cardiac safety customers with an easy to use portal for dashboards, reports and viewing of individual ECG waveforms and annotations. The portal also features functionalities for self-service administration.

EXPeRT® eClinical features a set of fully-integrated products spanning portal, eDC, data management, safety reporting and trial management functionalities and services. This suite of products was designed for installation at customer sites or hosting by eRT at our secure data center. During 2007, development was completed on a set of usability enhancements, CDISC compliance, a new safety reporting product and a new eClinical portal.

We launched EXPeRT® ePRO during 2007, featuring an IVR product and a set of electronic assessments. We also developed and configured reporting and portal enhancements in preparation for the fourth quarter 2007 product launch.

Our Clients

We serve pharmaceutical, biotechnology and medical device companies as well as CROs. We have agreements that establish the overall contractual relationship between us and our clients with approximately 275 customers for active or upcoming projects. We provide our solutions to 41 of the 50 largest pharmaceutical companies globally and 10 of the top 10 largest pharmaceutical companies globally. In 2007, Novartis AG, at 24%, was the only client that accounted for 10% or more of our consolidated net revenues. Novartis accounted for 16% and 13% of our consolidated net revenues in 2006 and 2005, respectively.

Sales and Marketing

We market and sell products and services primarily through our global direct sales, sales support and professional services organizations. As of December 31, 2007, our business development team consisted of 48 sales, marketing and consulting professionals worldwide, which included a direct sales force of 26 sales professionals located globally and excluded employees of CCSS.

We focus our marketing efforts on educating our target market, generating new sales opportunities and increasing awareness of our solutions. We conduct a variety of marketing programs globally, including vendor days at clients offices, business seminars, trade shows, public relations, industry analyst programs and advisory councils.

Our sales cycle generally begins with proactive business development within our active customer base as well as outreach to new customers identified through prospecting and marketing efforts. The sales process may include our response to a request from a sponsor or CRO for a proposal to address a client-specific research requirement. We then engage at our expense in a series of meetings, consultations, workshops, implementation reviews, final proposals and contract negotiations prior to the time when the prospective client has any obligation to purchase our products or services. During this process, we involve our sales, professional services and senior management personnel in a collaborative approach. Our sales cycle can vary from a few weeks to greater than one year, depending upon the scope of the clinical trial or program, the sponsor's budgeting process, which of our products or services are being sold, and the final agreed-upon solution required to support the clinical trial or program.

Partnerships

We have formalized agreements with clinical pharmacology units (CPUs), CROs, imaging core laboratories and other third-party service providers around the globe, including geographic and cultural specialization in Asia. We structure our integrated partnership offering to provide meaningful service enhancements for partners and sponsors. Enhanced communications and experienced collaboration with numerous partners promote speed, accuracy and reliability of

data collection and reporting and quality study conduct.

Competition

While there has been some consolidation in our industry, the market for our products and services remains extremely fragmented, with hundreds of companies providing niche solutions to satisfy small parts of the clinical

Table of Contents

research process. We were the first company to utilize specifically developed technology to address the digital regulatory initiative in providing ECG services.

The market for our solutions is intensely competitive, continuously evolving and subject to rapid technological change. The intensity of competition has increased and is expected to further increase in the future. This increased competition could result in price reductions, reduced gross margins and loss of market share, any one of which could seriously harm our business. Competitors, including centralized cardiac safety laboratories and CROs, vary in size and in the scope and breadth of the products and services offered.

We believe that the principal competitive factors affecting our market include:

client service;

a significant base of reference clients;

breadth and depth of solution, including the ability to accommodate both electronic forms and manual, paper-based research methods of data collection, management and analysis;

product quality and performance;

scientific expertise;

core technology and product features;

ability to implement solutions;

capacity;

price;

financial and organizational stability; and

ability to adapt to changing regulatory guidance.

We believe that our solutions currently compete favorably with respect to these factors, and we will continue to strive to maintain our competitive edge in the marketplace.

Government Regulation

Human pharmaceutical products, biological products and medical devices are subject to rigorous government regulation. In the United States, the principal federal regulatory agency is the FDA and there are some similar state agencies. Foreign governments also regulate these products when they are tested or marketed abroad. In the United States, the FDA has established standards for conducting clinical trials leading to the approval for new products.

Because our products and services assist the sponsor or CRO in conducting the trial and preparing the new drug, biologic or device application, we must comply with these requirements. We also must comply with similar regulatory requirements in foreign countries. These foreign regulations vary somewhat from country to country, but generally establish requirements similar to those of the FDA.

In March 1997, the FDA promulgated regulations related to requirements for computer systems that support electronic records and electronic signatures. These regulations define requirements for system control, security, authentication, validation and retention of electronic records. The FDA issued a guidance document, Part 11 Electronic Records; Electronic Signatures Scope and Applicability (August 2003), which defines the FDA's current thinking on the implementation of the 1997 regulation 21 CFR Part 11, and also noted there would be enforcement discretion of specific requirements.

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) established certain requirements relating to the privacy and security of personal health information. HIPAA directly covers how health plans, health care clearinghouses and most health care providers transmit, store, use and disclose individually identifiable health information. Covered uses and disclosures include uses and disclosures for purposes of clinical trials or other activities regulated by the FDA.

Table of Contents

In November 2001, the FDA held a public meeting at which it proposed requiring sponsors of new drugs to submit ECG raw data in digital format and annotated digital ECG waveforms. Annotated waveforms include definition of measurement points that are used to create ECG analysis data. A subsequent meeting held in January 2003, which was supported by a preliminary concept paper issued in November 2002, further discussed the trial design, ECG acquisition, analysis and reporting for digital ECGs. Following a meeting in June 2004, the International Conference on Harmonization (ICH) released to the public in September 2004 the following guidelines at Step 3, S7B: Safety Pharmacology Studies for Assessing the Potential for Delayed Ventricular Repolarization (QT Interval Prolongation) by Human Pharmaceuticals and E14: The Clinical Evaluation of QT/QTc Interval Prolongation and Proarrhythmic Potential for Non-Antiarrhythmic Drugs (ICH E14). The objective of these guidelines is to recommend the design and timing of studies in the clinical development process and provide general recommendations on available non-clinical methodologies to assess the potential risk of QT interval prolongation of a pharmaceutical product. On May 12, 2005, the ICH ratified and recommended for implementation the cardiac safety monitoring guidance provided in ICH E14 (step 4). The guidance was implemented by the FDA in October 2005 and adopted by the European Union in November 2005. As of December 31, 2007, ICH E14 is pending ratification in Japan. The guidance confirms previous guidance reinforcing the need for routine cardiac safety testing as well as Thorough QTc testing for all compounds entering the blood stream commencing early in clinical development to provide maximum guidance for later trials, as well as testing for all compounds in Phase III prior to submission for approval.

We believe that we have designed our products and services to be consistent with the recommendations of the relevant regulatory bodies as referred to above and to comply with applicable regulatory requirements.

Potential Liability and Insurance

We attempt to manage our risk of liability for personal injury or death to study subjects from administration of products under study through contractual indemnification provisions with clients and through insurance maintained by our clients and us. Contractual indemnification generally does not protect us against certain of our own actions, such as negligence. The terms and scope of such indemnification vary from client to client and from trial to trial. Although most of our clients are large, well-capitalized companies, the financial viability of these indemnification provisions cannot be assured. Therefore, we bear the risk that the indemnifying party may not have the financial ability to fulfill its indemnification obligations to us. We maintain errors and omissions liability insurance in the amount of \$10 million per claim and professional liability insurance in the amount of \$1 million per claim. Our operating results could be materially and adversely affected if we were required to pay damages or incur defense costs in connection with a claim that is beyond the scope of an indemnity provision or beyond the scope or level of insurance coverage maintained by us or the client or where the indemnifying party does not fulfill its indemnification obligations to us.

Intellectual Property

Our services have been enhanced by significant investment in information technology. Our research and development organization is committed to achieving operating efficiencies through technological advances. We have developed certain computer software and technologically derived procedures, as well as created internal operational processes, which we seek to protect through a combination of contract law and trade secrets, including seeking patent protection in several jurisdictions. We believe that our technological capabilities and operational processes provide significant benefits to our clients.

On March 16, 2004, we were issued United States Patent No. 6,708,057 (the 057 Patent) for various methods and systems for processing electrocardiograms. The methods and systems have particular utility in the collection and interpretation of electrocardiograms developed during clinical trials. The 057 Patent includes more than 50 claims directed to various features of our EXPERT® workflow enabled data handling technology.

We have also filed patent applications in Canada, India and the European Patent Office. We also have filed various continuation applications pursuing alternative claim coverage as well as claims directed to various enhancements made to the EXPeRT[®] technology. We continue to pursue patent protection of new technology advances and production.

Table of Contents

Employees

At December 31, 2007, we had a total of 356 employees excluding the CCSS employees who hold the positions we intend to eliminate, with 280 employees (265 full-time, 15 part-time) at our locations in the United States and 76 employees (74 full-time, 2 part-time) at our location in the United Kingdom. We had 215 employees performing services directly for our clients, 41 employees in research and development, 48 employees in sales and marketing and 52 employees in general and administrative functions.

On February 21, 2007, we announced efficiency improvements in our Cardiac Safety operations and general and administrative cost structure. As a result of these changes, we reduced our headcount by approximately 25 employees.

We are integrating the operations of CCSS with our operations and we plan to close CCSS operations currently conducted in Reno, Nevada and affiliated operations in Crawley, West Sussex, United Kingdom. As a result of these closures, we plan to eliminate certain full-time, part-time and contract personnel at those facilities. We have not determined the precise timing of these position eliminations, but they will occur during 2008. At December 31, 2007, there were 108 CCSS-affiliated employees. We anticipate hiring 40-50 employees in our facilities for the additional workload from CCSS.

We are not a party to any collective bargaining agreements covering any of our employees, nor have we ever experienced any material labor disruption. We are not aware of any current efforts or plans to unionize our employees. We consider our relationship with our employees to be good.

Available Information

Our website address is www.ert.com. We make available on our website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission. You may access and print these forms free of charge from our website.

ITEM 1A. RISK FACTORS

The risk factors identified in the cautionary statements below could cause our actual results to differ materially from those suggested in the forward-looking statements appearing elsewhere in this Form 10-K. However, these risk factors are not exhaustive, as new risks emerge from time to time, and it is not possible for management to predict all such risk factors or to assess the impact of all such risk factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. Accordingly, forward-looking statements should not be relied upon as a predictor of actual results.

Our future operating results are uncertain and may fluctuate. If we fail to meet the expectations of securities analysts and investors, our stock price would likely decline.

If our operating results in any future period fluctuate significantly, we may not meet the expectations of securities analysts and investors, which would likely cause the market price of our common stock to decline. It is difficult to predict the timing or amount of our revenues because:

we generate a significant percentage of our revenues from a limited number of clients;

our sales cycles can be lengthy and variable;

Thorough QTc studies are typically of large volume and of short duration; and

sponsors and CROs may unexpectedly cancel, postpone or reduce the size of clinical trials.

We make decisions on operating expenses based on anticipated revenue trends and available resources. We also incur expenses educating and providing information to our client base, via consultations, without any obligation by our client to purchase our products and services. Because many of our expenses are fixed and we are committed to making a significant investment in our organization and in marketing our products and services, delays in recognizing revenues could cause our operating results to fluctuate from period to period. If we

Table of Contents

fail to generate the contract signings that we expect or the anticipated revenues from such signings, we may fail to meet financial guidance that we have provided, or may provide in the future, to the public. Failure to meet financial guidance could cause the market price of our common stock to decline and affect our ability to raise capital which could reduce our cash reserves and limit our capital spending.

We depend entirely on the clinical trial market and a downturn in this market could cause our revenues and profitability to decrease.

Our business depends entirely on the clinical trials that pharmaceutical, biotechnology and medical device companies conduct. Our revenues and profitability will decline if there is less competition in the pharmaceutical, biotechnology or medical device industries, which could result in fewer products under development and decreased pressure to accelerate a product approval. Our revenues and profitability will also decline if the FDA or similar agencies in foreign countries modify their requirements, thereby decreasing the need for our services. Any other developments that adversely affect the pharmaceutical, biotechnology or medical device industries generally, including product liability claims, new technologies or products or general business conditions, could also decrease the volume of our business. From time to time studies for which we contracted to provide Cardiac Safety services are delayed or postponed resulting in lower than expected revenues.

Extensive governmental regulation of the clinical trial process could require costly modifications to our products, adversely affect prospective clients' willingness to use our products and services and increase competition and reduce our market share.

We may incur increased expenses or suffer a reduction in revenues if our products and services do not comply with applicable government regulations or if regulations allow more competition in the marketplace. Conforming our products and services to these guidelines or to future changes in regulation could substantially increase our expenses. In the United States and in foreign countries, regulatory authorities have also established other standards for conducting clinical trials leading to the approval of new products with which we must comply. We are subject to these regulations because our products and services assist sponsors and CROs in conducting trials and preparing new drug or device applications. If a regulatory authority concludes that trials were not conducted in accordance with established requirements, it may take a variety of enforcement actions depending upon the nature of the violation and the applicable country. In the United States, these measures may range from issuing a warning letter or seeking injunctive relief or civil penalties to recommending criminal prosecution, which could result in a prohibition of our continued participation in future clinical trials.

Our clients and prospective clients will be less likely to use our products and services if the products and services do not comply with regulatory requirements in all countries where clinical trials are expected to take place or if we are precluded from participating in clinical trials in countries where trials will be conducted. In addition, changing regulatory requirements could provide an advantage to our competitors if our competitors are able to meet the requirements more rapidly or at lower cost. For example, in the May 12, 2005 ICH release, it was suggested that semi-automated processing of electrocardiograms may be found acceptable in certain instances. Semi-automated processing uses software algorithm-placed measurements that are later adjudicated by a cardiac specialist or physician. In addition, fully-automated processing of electrocardiograms has been used in certain studies. Fully-automated processing uses only software algorithm-placed measurements. Our manual processing includes manually derived measurements, using our on screen, high resolution caliper placement system, which are later interpreted by a cardiologist. Drug sponsors have shifted towards semi-automated processing and, in some cases, to fully-automated processing, allowing more competitors to compete with us in offering this service and, as a result, we have been forced to reduce pricing to maintain our market share. The effect of such actions has reduced our revenue and gross profit per transaction. In addition, the shift from manual processing adversely affected our results of operations in 2006 and 2007 and may continue to adversely affect our results of operations in the future. If drug

sponsors shift towards fully-automated processing, our future results of operations may be adversely affected. Our failure to maintain revenue and gross profit per transaction may affect our ability to achieve growth in cardiac safety revenues and overall profitability from year to year. Our failure to show growth may also prevent us from meeting the expectations of securities analysts and investors, which would likely cause the market price of our common stock to decline.

Table of Contents

The FDA may recommend a different approach to measure drug effects on the QT interval of an ECG which could make our systems and processes obsolete and adversely affect revenue and profitability.

The FDA has provided guidance reinforcing the need for routine cardiac safety testing as well as Thorough QTc testing for all compounds entering the blood stream. This testing is accomplished by measuring the QT/QTc interval prolongation on an ECG. We function as an ECG core lab and have developed our EXPeRT[®] system and processes to receive the ECGs and obtain and report these measurements. It is possible that, in the future, the FDA may recommend different approaches to measuring drug effects on the QT interval which may diminish the need for an ECG core lab. This would considerably reduce the value of our existing systems and processes and would substantially decrease our revenues and profitability.

We have several large clients from whom we derive substantial revenue and therefore the loss of even a few of our clients could significantly reduce our revenues and profitability.

We have one client that represented approximately 24% of our total revenues for 2007, an increase from 16% of our total revenues for 2006. While no other client represented more than 10% of our 2007 revenues, our next five largest clients in the aggregate represented approximately 24% of our total revenues for 2007. If we lose all or a material amount of our revenues from any significant clients and do not replace them with revenues from new clients, our revenues will decrease and they may not be sufficient to cover our costs. We currently derive and expect to continue to derive a significant portion of our revenues and profitability from a limited number of clients.

Consolidation among our clients could cause us to lose clients, decrease the market for our products and result in a reduction of our revenues and profitability.

Our client base could decline because of consolidation, and we may not be able to expand sales of our products and services to new clients. Consolidation in the pharmaceutical, biotechnology and medical device industries and among CROs has accelerated in recent years, and we expect this trend to continue. In addition, our profitability will suffer if we reduce our prices in response to competitive pressures without achieving corresponding reductions in our expenses.

New companies or organizations that result from such consolidation may decide that our products and services are no longer needed because of their own internal processes or the use of alternative systems. As these industries consolidate, competition to provide products and services to industry participants will become more intense and the importance of establishing relationships with large industry participants will become greater. These industry participants may try to use their market power to negotiate price reductions for our products and services. Also, if consolidation of larger clients occurs, the combined organization may represent a larger percentage of business for us and, as a result, we are likely to rely more significantly on the combined organization's revenues to achieve expected future growth.

Our failure to continue to expand our business or manage growth successfully could disrupt our business operations, increase our costs and delay implementation of our business strategies.

Difficulties in managing our expected future growth could disrupt our business operations, increase our costs and delay achievement of our business goals, making it more difficult for us to maintain profitability. Our growth strategy depends on our ability to expand and improve our field sales, marketing and services organization and our operations organization, both in the United States and throughout the world. In order to grow, we will need to hire additional personnel. There are a limited number of experienced personnel with an adequate knowledge of our industry, and competition for their services is intense. In addition, we may not be able to project the rate or timing of increases, if any, in the use of our products and services accurately or to expand and upgrade our systems and infrastructure to

accommodate the increases. The expansion of our foreign operations also will require us to assimilate differences in foreign business practices, overcome language barriers and hire and retain qualified personnel abroad.

Table of Contents

We may not be successful in competing against others providing similar products and services, which could reduce our revenues, profitability and market share.

If our products and services do not achieve widespread acceptance by our clients, our revenues, profitability and market share will likely decline. Our competitors include other centralized cardiac safety laboratories, CROs, software vendors, and clinical trial data service companies. Our targeted clients may decide to choose other technology-based products and services generated internally by them or from another source. Many of our competitors have substantially greater financial and other resources, greater name recognition and more extensive client bases than we do. In addition, many competitors focus their efforts on providing software or services for discrete aspects of the clinical trial process and may compare favorably to us on those discrete aspects. Further, certain drug development organizations may decide not to outsource all or a significant portion of the cardiac safety activities associated with their clinical research programs, which could reduce our revenues, profitability and market share.

Our failure to establish and maintain partnerships and other strategic alliances may delay the development of our products and services, cause us to lose clients and prevent us from growing our business, any of which could also cause our stock price to decline.

We have relationships with providers of clinical pharmacology services, hardware and software systems, telecommunications, web-hosting and development services, systems integration and website content that support our sales and marketing efforts by satisfying other needs of our existing clients that our solutions do not address and by providing us access to their clients as potential sources of new business. We do not generally have long-term contracts with our strategic partners, so they may cease doing business with us on relatively short notice.

We may incur liability as a result of providing consulting and Cardiac Safety analysis and interpretation services.

We provide consulting and centralized analysis and interpretation of ECGs in connection with our clients' clinical trials. It is possible that liability may be asserted against us and the physicians who interpret the ECGs for us for failing to accurately diagnose a medical problem indicated by the ECG or for failing to disclose a medical problem to the investigator responsible for the subject being tested. If we are found liable, we may be forced to pay fines and damages and to discontinue a portion of our operations. The contractual protections included in our client contracts and our insurance coverage may not be sufficient to protect us against such liability. If the protections are not adequate, our profitability would be negatively impacted and also our stock price would likely fall.

The cardiac safety equipment that we own and lease could become obsolete due to technological advances or we may not be able to provide the quantity of equipment needed to service our clients.

We own and lease equipment, which we provide to our clients to perform cardiac safety procedures. This equipment may become obsolete due to advances in technology and the introduction of newer equipment models prior to the time that we have fully depreciated the asset or fulfilled our lease obligations. This could result in us recording additional expense to write-off the book value or the remaining lease value of the equipment. We are also dependent on a limited number of suppliers to provide the equipment necessary to service our clients. We may lose clinical clients if adequate equipment is not available, resulting in reduced revenues and profitability.

Capacity constraint or system failures could result in the loss of or liability to clients, which could reduce our revenues, increase our expenses and reduce profitability.

In the past, we have been able to staff for increasing workload demands in an expeditious manner. However, there may not be a sufficient and suitable group of potential employees available if rapid growth occurs in a short period of time. If we are unable to hire suitable employees to adequately meet market demand for our services, it could affect

our ability to bid on this business or to meet existing contractual turnaround times.

Table of Contents

If our clients experience any significant level of problems with our technology, we may become liable to those clients, we may be unable to persuade our clients to change from a manual, paper-based process and we may lose clients. The success of our products and services depends on the ability to protect against:

- software or hardware malfunctions that interrupt operation of our applications or cause loss of data integrity;
- power loss or telecommunications failures;
- overloaded systems;
- human error; and
- natural disasters.

In addition, when we offer our software products as an application service provider, our network infrastructure may be vulnerable to computer viruses, break-ins and similar disruptive problems caused by our clients or other Internet users. This could also lead to delays, loss of data, interruptions or cessation of service to our clients for which we may be liable. There is no current technology that provides absolute protection against these events. In addition, we may find that the cost to develop or incorporate technology into our products that provides the maximum protection against these problems outweighs the incremental benefits of providing such enhanced protection.

Our software products are complex and may contain undetected software errors, which could lead to an increase in our costs or a reduction in our revenues and profitability.

The occurrence of hardware and software errors, whether caused by our solutions or another vendor's products, could:

- cause sales of our solutions to decrease and our revenues and profitability to decline;
- cause us to incur significant warranty and repair costs;
- divert the attention of our technical personnel away from product development efforts; and
- cause significant client relations problems.

Complex software products such as those included in our technology solutions frequently contain undetected errors when first introduced or as new versions are released. In addition, we combine our solutions with software and hardware products from other vendors. As a result, we may experience difficulty in identifying the source of an error.

Rapidly changing technology may impair our ability to develop and market our solutions and cause us to become less competitive.

The marketplace for our software products is increasingly driven by demands for ease of use and effective performance for end-users of the system. We depend on continued focus on product improvements in this area in order to remain competitive.

Our failure to continuously offer competitive products and services could cause us to lose clients and prevent us from successfully marketing our solutions to prospective clients. As a result, our revenues and profitability would likely decline. Because our business relies on technology, we are susceptible to:

rapid technological change;

changing client needs;

frequent new product introductions; and

evolving industry standards.

As the Internet, computer and software industries continue to experience rapid technological change, we must quickly modify our solutions to adapt to such changes. We must develop and introduce new or enhanced products

Table of Contents

and services that continually meet changing market demands and that keep pace with evolving industry standards. We have experienced development delays in the past and may experience similar or more significant delays in the future. In addition, competitors may develop products superior to our solutions, which could make our products obsolete.

If clinical trial sponsors and CROs do not shift from their existing paper-based methods of collecting and managing clinical trial data at investigator sites to an electronic system with centralization, we may not achieve the market penetration necessary to grow the business at expected levels.

If participants conducting clinical trials are unwilling to adopt our technology solutions and new ways of conducting business, our revenues may not be sufficient to achieve our expected growth rate. Our efforts to establish a standardized, electronic process to collect, manage and analyze clinical trial and cardiac safety data are a significant departure from the traditional clinical research process. We estimate that the majority of clinical trials today use manual, paper-based data entry, management and analysis tools. Each clinical trial can involve a multitude of participants, including the sponsor, a CRO, regional site managers, investigators and patients. With so many participants involved in a clinical trial, it may be difficult to convince a sponsor or CRO to accept new methods of conducting a clinical trial. We may not be successful in persuading these participants to change the manner in which they have traditionally operated and to use our products and services.

If general economic conditions worsen, potential clients may be unwilling to make large capital software purchases or commitments, which could affect our ability to maintain and/or increase license revenues and overall profitability.

We have seen some resistance by potential clients in making the necessary large capital expenditure to license our software through our traditional perpetual license offering. Despite our efforts to market an annual or otherwise recurring term license, our failure to continue selling perpetual software licenses in the near term may affect our ability to achieve growth in license revenues and overall profitability from year to year. If we fail to show growth in license revenues and overall profitability, we may not meet the expectations of securities analysts and investors, which would likely cause the market price of our common stock to decline. In addition, if we are not successful in selling recurring term licenses, we will not generate the volume of recurring revenues in the future that we are expecting.

We depend on certain key executives. If we lose the services of any of these executives, our operations could be disrupted, we could incur additional expenses and our ability to expand our operations could be impeded, particularly if we are not able to recruit a suitable replacement in a timely manner.

The loss of the services of one or more of our key executives could negatively affect our ability to achieve our business goals. Our future performance will depend significantly on the continued service and performance of all of our executives, particularly Dr. Joel Morganroth, our Chairman of the Board of Directors and Chief Scientific Officer, and Dr. Michael McKelvey, our President and Chief Executive Officer. We also depend on our key technical, client support, sales and other managerial employees. We believe that it would be costly and time consuming to find suitable replacements for our key employees.

If we are unable to protect our proprietary technology or maintain our technological advantages, we may lose our intellectual property rights and become less competitive.

If we fail to protect our intellectual property from infringement, other companies may use our intellectual property to offer competitive products at lower prices. If we fail to compete effectively against these companies, we could lose clients and experience a decline in sales of our solutions. To protect our intellectual property rights, we rely on a combination of copyright and trade secret laws and restrictions on disclosure. In addition, in 2004 we were issued a U.S. Patent on over 50 claims directed to various features of our EXPeRT® workflow enabled data handling technology. We also have filed continuation-in-part applications in the United States Patent and Trademark Office

pursuing alternative claim coverage and pursuing claim coverage specific to enhancements in our EXPeRT[®] workflow enabled handling technology that is imbedded in EXPeRT[®] 2. Despite our efforts to protect our proprietary rights, unauthorized parties may copy or otherwise obtain and use our products and technology. In

Table of Contents

addition, our U.S. Patent could be successfully challenged as invalid. Monitoring unauthorized use of our solutions is difficult and the steps we have taken may not prevent unauthorized use of our technology, particularly in foreign countries where the laws may not protect our proprietary rights as fully as in the United States.

If we are not able to effectively integrate our recent transactions with our historic operations, we will not achieve the improvements in revenues and profitability that we anticipate.

Acquisitions involve numerous risks, including:

inability to achieve anticipated synergies;

unwillingness of the market to use newly-licensed technology;

difficulties in the integration of the operations, technologies, products and personnel of the acquired company;

failure of a party to perform ancillary contractual obligations related to the acquisition;

diversion of management's attention from other business concerns;

potential untimely loss of key employees of the acquired company or of us; and

risk of assuming unforeseen liabilities or becoming subject to litigation.

If we are not able to integrate the operations of CCSS successfully or on a timely basis, or if the market does not embrace the IVR clinical assessments and system we licensed from HTS, we will not be able to achieve the higher revenues and profitability that we had anticipated that these transactions would allow us to generate.

We cannot assure you that CCSS' customers will remain as our customers in the future. Additionally, we expect to achieve a certain level of revenue from the marketing agreement with Covance. If we lose any material portion of CCSS' customers or if Covance does not perform to our expectations under the marketing agreement, our revenues could be significantly reduced and we could suffer an adverse affect on our business, financial condition and results of operations.

Goodwill is subject to impairment which could result in a significant expense.

As a result of the CCSS acquisition, we carry a significant amount of goodwill. Goodwill is not amortized but is subject to an impairment test at least annually. We perform the impairment test annually as of December 31 or more frequently if events or circumstances indicate that the value of goodwill might be impaired. If we determine that the carrying value of goodwill may not be recoverable, we will base the measurement of any impairment on a projected discounted cash flow method using a discount rate commensurate with the risk inherent in our current business model. An impairment could result in a write-off of goodwill which would reduce our profitability in the period of the write-off.

Third parties may claim that we infringe upon their intellectual property rights, which could result in the loss of our rights, subject us to liability and divert management attention.

Although we are not currently involved in any intellectual property litigation, we may be a party to litigation in the future either to protect our intellectual property or as a result of an alleged infringement by us of the intellectual property of others. These claims and any resulting litigation could subject us to significant liability or invalidate our

ownership rights in the technology used in our solutions. As a result, we may have to stop selling our solutions. Litigation, regardless of the merits of the claim or outcome, could consume a great deal of our time and money and would divert management time and attention away from our core business.

Any potential intellectual property litigation also could force us to do one or more of the following:

stop using the challenged intellectual property or selling our products or services that incorporate it;

obtain a license to use the challenged intellectual property or to sell products or services that incorporate it, which could be costly or unavailable; and

Table of Contents

redesign those products or services that are based on or incorporate the challenged intellectual property, which could be costly and time consuming or could adversely affect the functionality and market acceptance of our products.

If we must take any of the foregoing actions, we may be unable to sell our solutions, which would substantially reduce our revenues and profitability.

Third parties have made claims for damages against the Company and may continue to do so, which could result in an unfavorable settlement or judgment against us.

Litigation, regardless of the merits of the claim or outcome, consumes a great deal of our time and money and often diverts management time and attention away from our core business. In addition, litigation against us could result in economic harm which could reduce our cash reserves and cause the market price of our common stock to decline.

Our international operations expose us to additional risks.

A key element of our business strategy is to expand our international operations. We face a number of risks and expenses that are inherent in operating in foreign countries and, accordingly, our international operations may not achieve profitability consistently each year. The risks to us from our international operations include:

government regulations;

trade restrictions;

burdensome foreign taxes;

exchange rate controls and currency exchange rate fluctuations;

political and economic instability;

varying technology standards; and

difficulties in staffing and managing foreign operations.

We are subject to a variety of government regulations in the countries where we market our products and services. We currently operate in the United Kingdom through a foreign subsidiary and may operate in the future in other countries through additional foreign subsidiaries. If we form foreign subsidiaries outside of the United Kingdom, we may need to withhold taxes on earnings or other payments they distribute to us. Generally, we can claim a foreign tax credit against our federal income tax expense for these taxes. However, the United States tax laws have a number of limitations on our ability to claim that credit or to use any foreign tax losses, which could result in higher payment by us of taxes in the United States. We may also need to include our share of our foreign subsidiaries' earnings in our income even if the subsidiaries do not distribute money to us. As a result, less cash would be available to us in the United States.

Our global operations may involve transactions in a variety of currencies. Fluctuations in currency exchange rates could reduce our reported revenues or increase our reported expenses. We currently do not utilize hedging instruments.

The agreements that we sign with clients outside the United States may be governed by the laws of the countries where we provide our products and services. We may also need to resolve any disputes under these agreements in the courts or other dispute resolution forums in those countries. This could be expensive or could distract management's attention away from our core business.

In the event we are unable to satisfy regulatory requirements relating to internal control over financial reporting, or if these internal controls are not effective, our business and financial results may suffer.

Effective internal controls are necessary for us to provide reasonable assurance with respect to our financial reports and to effectively prevent fraud. If we cannot provide reasonable assurance with respect to our financial reports and effectively prevent fraud, our brand and operating results could be harmed. Pursuant to the Sarbanes-Oxley Act of 2002, we are required to furnish a report by management on internal control over financial reporting,

Table of Contents

including management's assessment of the effectiveness of such control. Internal control over financial reporting may not prevent or detect misstatements because of its inherent limitations, including the possibility of human error, the circumvention or overriding of controls, or fraud. Therefore, even effective internal controls can provide only reasonable assurance with respect to the preparation and fair presentation of financial statements. In addition, projections of any evaluation of the effectiveness of internal control over financial reporting to future periods are subject to the risk that the control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. If we fail to maintain the adequacy of our internal controls, including any failure to implement required new or improved controls, or if we experience difficulties in their implementation, our business and operating results could be harmed, we could fail to meet our reporting obligations, and there could also be a material adverse effect on our stock price.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our corporate headquarters are located at 30 South 17th Street, Philadelphia, Pennsylvania, where we lease approximately 39,000 square feet. Our lease expires in August 2008. Upon expiration of this lease, we expect to be able to obtain an adequate facility due to the availability of commercial space in the area. We also lease approximately 31,000 square feet of office space in Bridgewater, New Jersey, which expires in January 2011 and we lease approximately 18,000 square feet of office space in Peterborough, United Kingdom, which expires in June 2013. We also lease approximately 51,000 square feet in Reno, Nevada, which expires in November 2013. We plan to vacate the Reno location within approximately one year and seek a lessee or sublessee for the property, and both we and Covance are obligated to use our commercially reasonable efforts to locate an appropriate tenant. We are responsible for all payment obligations on the Reno lease until November 28, 2008. From November 28, 2008 through November 28, 2012, we will split the payment obligations on the Reno lease with Covance, to the extent such obligations are not covered by a new tenant.

ITEM 3. LEGAL PROCEEDINGS

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

SPECIAL ITEM. EXECUTIVE OFFICERS OF REGISTRANT

Officers are elected by the Board of Directors and serve at the pleasure of the Board. Our executive officers are as follows:

Name	Age	Position
Michael J. McKelvey, Ph.D.	55	President, Chief Executive Officer and Director
Joel Morganroth, MD	62	Chairman of the Board of Directors and Chief Scientific Officer
Richard A. Baron	52	Executive Vice President, Chief Financial Officer and Secretary
Thomas P. Devine	55	Executive Vice President and Chief Development Officer

Amy Furlong	35	Executive Vice President, Cardiac Safety
Jeffrey S. Litwin, MD	50	Executive Vice President and Chief Medical Officer
John M. Blakeley	40	Executive Vice President, Global Sales and Marketing
Robert S. Brown	52	Senior Vice President, Strategic Marketing, Planning & Partnerships
David Laky	43	Senior Vice President, eClinical
Gregory Sadowski	35	Senior Vice President, ePRO
George Tiger	48	Senior Vice President, Americas Sales

Table of Contents

Dr. McKelvey has served as our President and Chief Executive Officer since June 2006 and has served on our Board of Directors since July 2006. Prior to joining us, Dr. McKelvey was employed for five years by PAREXEL International, one of the largest biopharmaceutical outsourcing organizations in the world, where he served as Corporate Senior Vice President, Clinical Research Services.

Dr. Morganroth has served as the Chairman of our Board of Directors since 1999 and a member of our Board of Directors since 1997. He has served as our Chief Scientific Officer since April 2006. Prior to that, he served as our Chief Scientist from March 2001 to December 2005 and our Chief Executive Officer from 1993 to March 2001. In addition, Dr. Morganroth has consulted for us since 1977. Dr. Morganroth is a globally recognized cardiologist and clinical researcher. Dr. Morganroth served for over ten years as a Medical Review Officer/Expert for the U.S. Food and Drug Administration.

Mr. Baron has been our Executive Vice President and Chief Financial Officer since May 2006 and our Secretary since March 2007. Prior to joining us, Mr. Baron served as Vice President Finance and Chief Financial Officer for Animas Corporation, a manufacturer and distributor of insulin infusion pumps, since 2000. Mr. Baron is a certified public accountant.

Mr. Devine has been our Executive Vice President and Chief Development Officer since December 2005. Previously, he served as our Senior Vice President and Chief Development Officer from April 2003 until December 2005. From August 2002 to April 2003, Mr. Devine was our Vice President of Research and Development. Prior to joining us, Mr. Devine was Chief Technology Officer for ecHUB, Inc., an electronic commerce company, from January 2000 to July 2002.

Ms. Furlong has been our Executive Vice President, Cardiac Safety since December 2005. She served as our Senior Vice President, Regulatory Compliance from January 2004 until December 2005. From February 2001 to January 2004, Ms. Furlong served as our Vice President, Regulatory Compliance.

Dr. Litwin is a cardiologist and has been our Executive Vice President and Chief Medical Officer since December 2005. He served as our Senior Vice President and Chief Medical Officer from July 2000 until December 2005.

Mr. Blakeley has been our Executive Vice President, Global Sales and Marketing since February 2008. He served as our Senior Vice President, International Operations and Sales from September 2006 to February 2008. He served as our Group Vice President, International Business Development from January 2005 to August 2006 and as our Director of Business Development from May 2002 to December 2004. Prior to joining eRT, Mr. Blakeley was Managing Director of MediServe Medical UK Limited, a medical devices specialist.

Mr. Brown has been our Senior Vice President, Strategic Marketing, Planning & Partnerships since September 2006. He served as our Senior Vice President, Outsourcing Partnerships from July 2002 to August 2006. From January 2000 to June 2002, Mr. Brown was our Senior Vice President, Cardiac Safety.

Mr. Laky has been our Senior Vice President, eClinical since February 2008. He served as our Vice President, Professional Services from October 1999 until February 2008.

Mr. Sadowski has been our Senior Vice President, ePRO since February 2008. He is also the director of our Information Technology and Customer Care groups. He served as our Vice President and General Manager, ePRO since the group's inception in June 2007. He previously served as our Vice President, Information Technology, Customer Care and Logistics from December 2005 to May 2007 and our Vice President, Information Technology and Customer Care from April 2002 to November 2005.

Mr. Tiger has been our Senior Vice President, Americas Sales since October 2006. He served as our Senior Vice President, International Sales and Operations from October 2005 to September 2006, Senior Vice President, International Operations from July 2004 to October 2005, Vice President, International Business Development from August 2002 to July 2004 and as Director of Business Development from January 2001 to August 2002.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock is traded on the Nasdaq Global Select Market under the symbol ERES. Below is the range of high and low sales prices for the common stock for the following quarters as quoted on the Nasdaq Global Select Market or its predecessor, the Nasdaq National Market.

Calendar Period	High	Low
2006		
First Quarter	\$ 18.54	\$ 13.59
Second Quarter	14.99	8.11
Third Quarter	9.46	6.83
Fourth Quarter	8.67	5.88
2007		
First Quarter	\$ 8.21	\$ 6.12
Second Quarter	9.72	7.66
Third Quarter	12.00	9.36
Fourth Quarter	12.34	8.53

We have never declared or paid any cash dividend on our common stock. We do not anticipate paying any cash dividends in the foreseeable future because we intend to retain our current cash and future earnings for the development and expansion of our business and for the repurchase of common stock under our stock buy-back program.

As of February 26, 2008, there were 53 record holders of our common stock.

Table of Contents

Stockholder Return Performance Graph

The following graph compares the cumulative total stockholder return on our common stock against the cumulative total return on the Nasdaq Composite Index and the Nasdaq Health Services Index for the period commencing December 31, 2002 and ending December 31, 2007. The graph assumes that at the beginning of the period indicated, \$100 was invested in our common stock and the stock of the companies comprising the Nasdaq Composite Index and the Nasdaq Health Services Index, and that all dividends, if any, were reinvested.

This stockholder return performance graph shall not be deemed filed with the Securities and Exchange Commission (SEC) as part of this Form 10-K or incorporated by reference into any filing by us under the Securities Act of 1933 or the Securities Exchange Act of 1934, except to the extent we specifically incorporate the performance graph by reference therein.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

The following selected consolidated financial data is qualified by reference to, and should be read in conjunction with, the consolidated financial statements, including the notes thereto, and Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this Form 10-K. We have included CCSS's operating results in our Consolidated Statements of Operations from the date of the acquisition, November 28, 2007.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cautionary Statement for Forward-Looking Information

The following discussion and analysis should be read in conjunction with our consolidated financial statements and the related notes to the consolidated financial statements appearing elsewhere in this Form 10-K. The following discussion includes a number of forward-looking statements made pursuant to the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995 that reflect our current views with respect to future events and financial performance. We use words such as anticipate, believe, expect, intend and similar expressions to identify forward-looking statements. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this report. These forward-looking statements are subject to risks and uncertainties such as competitive factors, integration of acquisitions, technology development, market demand and our ability to obtain new contracts and accurately estimate net revenues due to uncertain regulatory guidance, variability in size, scope and duration of projects, and internal issues of the sponsoring client. Such risks and uncertainties could cause actual results to differ materially from historical results or future predictions. Further information on potential factors that could affect our financial results can be found in Item 1A Risk Factors in this Form 10-K.

Overview

We were founded in 1977 to provide Cardiac Safety services to evaluate the safety of new drugs. We provide technology and services that enable the pharmaceutical, biotechnology and medical device industries to collect, interpret and distribute cardiac safety and clinical data more efficiently. We are a market leader in providing centralized electrocardiographic services (Cardiac Safety services or EXPeRT® ECG services) and a leading provider of technology and services that streamline the clinical trials process by enabling our clients to evolve from traditional, paper-based methods to electronic processing using our EXPeRT® eClinical and EXPeRT® ePRO products and services.

Our solutions improve the accuracy, timeliness and efficiency of trial set-up, data collection from sites worldwide, data interpretation, and new drug, biologic and device application submissions. We offer Cardiac Safety services, which are utilized by pharmaceutical companies, biotechnology companies, medical device companies, clinical trial sponsors and clinical research organizations (CROs) during the conduct of clinical trials. The Cardiac Safety services are performed during all phases of a clinical trial cycle and include the collection, interpretation and distribution of electrocardiographic (ECG) data and images. The ECG provides an electronic map of the heart's rhythm and structure, and typically is performed in most clinical trials. Cardiac Safety services permits assessments of the safety of therapies by documenting the occurrence of cardiac electrical change. Thorough QTc studies are comprehensive studies that typically are of large volume and of short duration, with ECGs performed over a two- to six-month period. We also offer site support, which includes the rental and sale of cardiac safety equipment along with related supplies and freight. Additionally, we offer the licensing and, at the client's option, hosting of our proprietary EXPeRT® eClinical software products and the provision of maintenance and consulting services in support of our proprietary EXPeRT® eClinical software products. We offer electronic patient reported outcomes (ePRO) services along with 57 proprietary clinical assessments.

Our license revenues consist of license fees for perpetual license sales and monthly and annual term license sales. Our services revenues consist of Cardiac Safety services and consulting, technology consulting and training services and software maintenance services. Our site support revenue consists of cardiac safety equipment rentals and sales along with related supplies and freight.

We enter into contracts to sell our products and services and, while the majority of our sales agreements contain standard terms and conditions, there are agreements that contain multiple elements or non-standard terms and conditions. As a result, significant contract interpretation is sometimes required to determine the appropriate accounting, including whether the deliverables specified in a multiple element arrangement should be treated as separate units of accounting for revenue recognition purposes and, if so, how the contract value should be allocated among the deliverable elements and when to recognize revenue for each element. We recognize revenue for delivered elements only when the fair values of undelivered elements are known, uncertainties regarding client

Table of Contents

acceptance are resolved and there are no client-negotiated refund or return rights affecting the revenue recognized for delivered elements.

Cost of licenses consists primarily of application service provider (ASP) fees for those clients that choose hosting, the cost of producing compact disks and related documentation and royalties paid to third parties in connection with their contributions to our product development. Cost of services includes the cost of Cardiac Safety services and the cost of technology consulting, training and maintenance services. Cost of Cardiac Safety services consists primarily of direct costs related to our centralized Cardiac Safety services and includes wages, depreciation, amortization, fees paid to outside consultants and other direct operating costs. Cost of technology consulting, training and maintenance services consists primarily of wages, fees paid to consultants and other direct operating costs related to our consulting and client support functions. Cost of site support consists primarily of wages, cardiac safety equipment rent and depreciation, related supplies, cost of equipment sold, shipping expenses and other direct operating costs. Selling and marketing expenses consist primarily of wages and commissions paid to sales personnel, travel expenses and advertising and promotional expenditures. General and administrative expenses consist primarily of wages and direct costs for our finance, administrative, corporate information technology, legal and executive management functions, in addition to professional service fees and corporate insurance. Research and development expenses consist primarily of wages paid to our product development staff, costs paid to outside consultants and direct costs associated with the development of our technology products.

We conduct our operations through offices in the United States (U.S.) and the United Kingdom (UK). Our international net revenues represented approximately 20%, 21% and 23% of total net revenues for the years ended December 31, 2005, 2006 and 2007, respectively. The majority of our revenues are allocated among our geographic segments based upon the profit split transfer pricing methodology, and revenues are generally allocated to the geographic segment where the work is performed. The international net revenues as a percentage of total net revenues reflect the application of the change in transfer pricing methodology, which we implemented in the third quarter of 2005, as if the changes were in effect as of January 1, 2005.

Results of Operations

Executive Overview

2007 was a year of stabilization and return to growth for eRT. We witnessed increased cost pressures on pharmaceutical and biotechnology companies as well as an increasingly competitive environment. We responded to these challenges by several proactive enhancements to our organization that will serve as a solid foundation for future growth. At the beginning of the year we released a new version of our key workflow management system **EXPeR[®]** which significantly enhanced our productivity and ability to deliver high quality work. We also enhanced our business by undertaking an efficiency program in February to rationalize some elements of our cost structure, specifically in the core cardiac safety operations and in selling, general and administrative areas.

After approximately two years of adapting to the ICH E14 guidance from governmental regulators, the industry began to incorporate the regulatory guidance into its drug development and budgetary processes resulting in an increased use of ECGs in some routine trials and the conducting of Thorough ECG trials for most new drugs. We had an excellent year in cardiac safety operations. We set records for the number of ECG transactions processed, the amount of new sales bookings recorded and quarterly revenue levels, achieved in the fourth quarter.

We completed two transactions during the year. On November 28, 2007, we acquired Covance Cardiac Safety Services, Inc. (CCSS), the Covance Inc ECG core lab, for \$35.2 million plus additional cash payments of up to approximately \$14 million, based upon the potential realization of revenue from the backlog transferred and from new contracts secured through Covance's marketing activities. During 2007, Covance earned \$3.0 million of this contingent

amount, which we paid in January 2008. The final proceeds to Covance are further subject to certain post-closing working capital adjustments. The acquisition included a marketing agreement under which Covance is obligated to use us as its provider of centralized cardiac safety services, and to offer these services to Covance's clients, on an exclusive basis, for a 10-year period, subject to certain exceptions. The agreement does not restrict our continuing collaboration with our other key CRO, Phase I units, Academic Research Centers and other strategic partners. We plan to fully integrate the operations of CCSS into our existing operations. We will do so by merging

Table of Contents

CCSS's Reno, Nevada based operations into our existing operations in Philadelphia, Pennsylvania or Peterborough, United Kingdom. In so doing, we will close the operations in Reno in late 2008.

In June 2007, we licensed the key assets of Healthcare Technology Systems (HTS), including its interactive voice response system and 57 clinical assessments, some of which are proprietary. This agreement launched our ePRO (electronic patient reported outcomes) line of business that we believe, over time, will turn into an attractive source of revenue growth for the company. As of December 31, 2007, we paid HTS \$1.5 million for the license and a \$0.25 million advanced payment against future royalties. We will pay royalties to HTS based on the level of revenues we receive from the assessments and the IVR system. An additional \$0.75 million of royalty payments are guaranteed, and will be made in two equal payments in November 2008 and May 2009. Any royalties earned by HTS will be applied against these payments. After these two payments are made, all future payments we make to HTS will be royalty payments based solely on revenues we receive from EXPeRT® ePRO sales.

In addition to the cardiac safety area, we have invested in our eClinical suite of software, both in technology and sales, as well as in our emerging ePRO line of business. Across all of our product lines, we continued our excellent track record of performance, customer service, quality and on-time/on-budget delivery.

Our net revenues for 2007 were \$98.7 million as compared to \$86.4 million for 2006, which was the result of growth in our service revenues (which are predominately cardiac safety related). Gross margins for 2007 were \$50.1 million as compared to \$41.8 million for 2006. The improvement in gross margins was due to the improvement in the operating leverage associated with the services element of our business. Our 2007 net income was \$15.3 million or \$0.29 per diluted share as compared to \$8.3 million or \$0.16 per diluted share for 2006.

The following table presents certain financial data as a percentage of total net revenues:

	Year Ended December 31,		
	2005	2006	2007
Net revenues:			
Licenses	7.0%	3.5%	2.7%
Services	68.8	64.0	70.5

General and administrative	17.0%	12.4%	(4.6%)
Research and development	4.8%	4.4%	(0.4%)

License revenues decreased due to the sale of one significant license in 2006 with no comparable sale in 2007.

The increase in Cardiac Safety service revenues was primarily due to additional transactions performed in 2007 as compared to 2006 partially offset by a decrease in average revenues per transaction. The decrease in average revenue per transaction was largely due to the impact of increased activity in semi-automated processing, which generally includes lower fees per transaction than other studies, as well as competitive pricing pressure. This decrease in average revenue per transaction primarily occurred in the first two quarters of 2007. The average revenue per transaction rose slightly in the third and fourth quarters of 2007. Additionally, Cardiac Safety service revenue in the year ended December 31, 2007 included \$1.7 million of cardiac safety consulting services revenue, which was a new revenue source to eRT beginning in 2007. There was also a \$1.1 million increase in project management fees and a \$0.4 million increase in miscellaneous revenue, commensurate with the increase in ECG transaction revenue. The acquisition of CCSS added approximately \$1.2 million in revenue in 2007, which effectively offset the impact of the \$1.2 million of revenue we recognized in 2006 upon the termination of a Digital ECG Franchise at the end of August 2006 for which there was no corresponding revenue recognized in 2007.

The decrease in technology consulting and training revenues was primarily related to a decrease in consulting revenue from EXPeRT® eClinical clients related to protocol set-up work.

Software maintenance revenues decreased due to the cancellation and non-renewals of maintenance agreements and a reduction in the number of users. These declines were partially offset by maintenance on several software licenses sold during 2006 and 2007. Our current sales focus is on monthly and annual term license sales rather than perpetual license sales, which will lead to the erosion of maintenance revenue over time. Monthly and annual term license sales do not generate maintenance revenue as the license fee includes product upgrades and customer support.

Site support revenues decreased primarily due to a \$4.5 million decrease in the sale of cardiac safety equipment for the year ended December 31, 2007 as compared to the year ended December 31, 2006. While average monthly equipment rental revenue per unit has fallen by over 10% from 2006 to 2007, an increase in units rented more than compensated for the revenue impact. Additionally offsetting this decrease was an increase in freight revenues of \$1.2 million and

supplies revenue of \$0.2 million, both of which were related to the additional units rented. The acquisition of CCSS added approximately \$0.3 million in revenue in 2007.

The increase in the cost of Cardiac Safety services was primarily due to a \$1.7 million increase in depreciation expense related to our EXPeRT® 2 which was placed into production in January 2007, \$1.3 million in consulting costs related to cardiac safety consulting revenue discussed above, \$0.8 million increase in bonus expense as certain bonus targets were met in 2007 while there was no bonus in 2006, \$0.9 million increase in labor, and \$0.2 million

Table of Contents

increase in software license and maintenance. Additionally, there were \$1.2 million in costs relating to the CCSS operation in 2007, primarily related to labor costs. Partially offsetting the increase were reductions of \$0.1 million each in telecommunications, depreciation expense excluding EXPeRT® 2, stock option compensation expense, pass-through costs and allocated expenses. The decrease in the cost of Cardiac Safety services as a percentage of Cardiac Safety service revenues reflects the fact that some of the costs do not necessarily change in direct relation with changes in revenue.

The decrease in the cost of technology consulting and training revenues was the result of a number of small decreases in expenses such as consultants and travel expenses. The increase in the cost of technology consulting and training revenues as a percentage of technology consulting and training revenues reflects the fact that some of the costs do not necessarily change in direct relation with changes in revenue.

The decrease in the cost of software maintenance revenues, both in absolute terms and as a percentage of software maintenance revenues, was the result of lower labor costs due to reduced headcount.

The decrease in the cost of site support was primarily due to a \$2.6 million decrease in the cost of equipment sales commensurate with the decrease in revenue from equipment sales. Partially offsetting this decrease was a \$1.1 million increase in freight and \$0.2 million increase in supplies due to an increase in the number of units of equipment utilized by our clients. An increase in depreciation expense of \$2.4 million was largely offset by a reduction in equipment rental expense. The shift of expense between these categories resulted from our agreement to purchase our leased cardiac safety equipment. The increase in the cost of site support as a percentage of site support revenues reflects the fact that some of the costs do not necessarily change in direct relation with changes in revenue.

The decrease in general and administrative expenses, both in absolute terms and as a percentage of total net revenues, was due primarily to \$1.8 million of costs associated with management changes in the second quarter of 2006 and \$0.6 million of costs in 2006 associated with the settlement of a contract dispute, for which there were no corresponding expenses in 2007. Additionally, there were decreases of \$0.5 million in stock option compensation expense, \$0.6 million in professional fees related to project and legal matters, \$0.2 million in charitable contributions made in 2006 and not repeated in 2007 and \$0.2 million each in depreciation and consulting costs. Partially offsetting the decrease was \$0.7 million in severance-related costs for employees terminated in February 2007, an increase of \$0.3 million each in bonus expense and non-income taxes and \$0.2 million in software license and maintenance expense. Additionally, we accrued \$0.2 million for retention bonuses for employees of CCSS to remain until their termination date.

The increase in research and development expenses, both in absolute terms and as a percentage of total net revenues, was primarily due to a \$0.9 million reduction in the capitalization of salaries for internal-use software projects and a \$0.2 million increase in bonus expense. Partially offsetting the increase was a \$0.3 million decrease in expense for third-party consultants and a \$0.3 million decrease in software license and maintenance expense. Smaller decreases occurred in expenses such as depreciation and labor.

Other income, net, consisted primarily of interest income realized from our cash, cash equivalents and investments, interest expense related to capital lease obligations and foreign exchange losses. Other income, net, increased primarily due to higher interest income in 2007 as a result of higher average interest rates and cash balances.

Our effective tax rate was 37.1% and 37.6% for the year ended December 31, 2006 and 2007, respectively.

Table of Contents

The following table presents costs of revenues as a percentage of related net revenues and operating expenses as a percentage of total net revenues:

	Year Ended		
	December 31,	2006	Increase
	2005		(Decrease)
Cost of licenses	7.2%	9.5%	2.3%
Cost of services:			
Cardiac Safety	40.8%	46.7%	5.9%
Technology consulting and training	77.2%	60.9%	(16.3%)
Software maintenance	22.0%	25.4%	3.4%
Total cost of services	40.8%	46.0%	5.2%
Cost of site support	66.3%	67.1%	0.8%
Total costs of revenues	44.6%	51.6%	7.0%
Operating expenses:			
Selling and marketing	10.5%	12.7%	2.2%
General and administrative	13.2%	17.0%	3.8%
Research and development	4.7%	4.8%	0.1%

License revenues decreased primarily due to a decline in the number of licenses sold, which resulted in a decrease in revenue of \$2.4 million, conversions of subscription licenses to perpetual licenses in 2005 and terminations of subscription licenses in 2006.

The decrease in Cardiac Safety service revenues was primarily due to a decrease in average revenue per transaction that was largely due to the impact of increased activity in semi-automated processing, which generally includes lower fees per transaction than other studies, as well as competitive pricing pressure. These decreases were partially offset by the recognition of \$1.2 million of deferred revenues that remained upon the termination of a Digital ECG Franchise agreement at the end of August 2006.

The increase in technology consulting and training revenues was primarily related to \$0.4 million of professional services performed in connection with 2006 license sales as well as a \$0.3 million increase in consulting revenue from EXPeRT® eClinical clients related to protocol set-up work. Many of the license sales in 2005 required limited consulting services due to the nature of the licenses sold.

Software maintenance revenues decreased due to the cancellation of maintenance agreements and the settlement of a contract dispute which resulted in our providing software maintenance to one customer at no charge for a four-year period beginning August 30, 2005, which resulted in a decrease in software maintenance revenue of \$0.2 million in 2006 as compared to 2005. These declines were partially offset by maintenance on several new software licenses sold during 2005 and 2006.

Site support revenue increased primarily due to a \$5.1 million increase in the sale of cardiac safety equipment in 2006 as compared to 2005. Our clients use cardiac safety equipment to perform cardiac safety procedures. The increase was also due to a \$1.7 million increase in the rental of cardiac safety equipment in 2006 as compared to 2005, as well as an increase in freight revenue due to additional shipments.

The decrease in cost of licenses was primarily due to a reduction in third party ASP hosting fees and software license and maintenance costs. The increase in cost of licenses as a percentage of license revenues was due to the decrease in

perpetual license revenues which have very little incremental cost of sales, such that revenue reductions lead to minimal cost savings.

The increase in the cost of Cardiac Safety services, both in absolute terms and as a percentage of Cardiac Safety revenues, was primarily due to unanticipated charges for services previously provided of \$0.6 million, \$0.6 million of stock option compensation expense in 2006 related to the adoption of SFAS No. 123R, increased labor costs of \$0.6 million including payroll taxes related to option exercises and increased facilities costs of \$0.2 million due to a rent increase associated with a lease extension. Additional increases occurred for utilities,

Table of Contents

costs associated with an offsite computer hosting facility and increased software license and maintenance costs. These increases were partially offset by the initial costs of \$0.3 million associated with a move to a new facility in the UK in 2005, a decrease of \$0.6 million in bonuses as no bonus expense was recognized in 2006 while bonus expense was recognized under a six-month bonus plan in the second half of 2005, lower depreciation expense of \$0.4 million related to a one-time adjustment in 2005 for leasehold improvements and certain components of our data and communications management services software product (EXPeRT®), which became fully depreciated in the third quarter of 2006. The increase in the cost of Cardiac Safety services as a percentage of Cardiac Safety service revenues was also due to the fact that some of the costs do not necessarily change in direct relation with changes in revenue.

The increase in the cost of technology consulting and training services was primarily due to higher third-party consulting costs required to accommodate the increased workload associated with the increase in revenue. This increase was partially offset by a decrease in bonuses as no bonus expense was recognized in 2006 while bonus expense was recognized under a six-month bonus plan in the second half of 2005. The decrease in the cost of technology consulting and training services as a percentage of technology consulting and training service revenues was due to the fact that some of the costs do not necessarily increase or decrease in direct relation with changes in revenue.

The increase in the cost of site support, both in absolute terms and as a percentage of site support revenues, was due primarily to an increase in the cost of sales of equipment of \$2.7 million and \$0.9 million of depreciation costs associated with cardiac safety rental equipment as well as increased freight costs of \$0.7 million.

The increase in selling and marketing expenses, both in absolute terms and as a percentage of total net revenues, was primarily due to \$0.8 million of stock option compensation expense recognized in 2006 related to the adoption of SFAS No. 123R, increases in compensation expense of \$0.7 million predominately related to salaries of new personnel and \$0.3 million of higher bonus expense due to better bookings compared to targets. The increase was also due to increased software licenses and maintenance costs and higher tradeshow costs.

The increase in general and administrative expenses, both in absolute terms and as a percentage of total net revenues, was due primarily to \$3.9 million of costs associated with the settlement of a contract dispute, stock option compensation expense and costs associated with management changes. Excluding these costs, cost increases of \$0.8 million for compensation and other costs were more than offset by decreases due to a reduction in the cost of consultants related to internal control work required by the Sarbanes-Oxley Act, legal fees and certain non-income taxes.

Other income, net, consisted primarily of interest income realized from our cash, cash equivalents and investments, net of impairment charges in 2005 and 2006 related to a cost basis investment, interest expense related to capital lease obligations and foreign exchange losses. Other income, net increased primarily due to a reduction in foreign exchange losses and increased interest income due to higher interest rates in 2006.

Our effective tax rate was 37.0% and 37.1% for the year ended December 31, 2005 and 2006, respectively. The primary cause of the increase in the effective tax rate was stock option compensation expense in 2006, which is not fully deductible for tax purposes. Partially offsetting this increase to the effective tax rate was an increase in tax-free interest income in 2006. Additionally, the effective tax rate for the year ended December 31, 2005 included a net income tax benefit of approximately \$0.3 million related to the recovery of prior year state taxes due to a change in our transfer pricing methodology.

Liquidity and Capital Resources

At December 31, 2007, we had \$38.1 million of cash and cash equivalents and \$8.8 million invested in short-term investments. We generally place our investments in municipal securities, bonds of government sponsored agencies, certificates of deposit with fixed rates and maturities of less than one year, and A1P1 rated commercial bonds and paper.

For the year ended December 31, 2007, our operations provided cash of \$36.0 million compared to \$16.3 million during the year ended December 31, 2006. The change was primarily the result of an increase of \$7.0 million in net income and a \$3.9 million increase in depreciation expense including \$2.4 million for cardiac

Table of Contents

safety rental equipment and \$1.7 million related to our EXPeRT[®] 2 which was placed into production in January 2007. The increase in cardiac safety rental equipment depreciation was largely due to our agreement in 2007 to purchase our leased cardiac safety equipment. Other factors contributing to the increase in cash provided by operations include a \$2.5 million increase in deferred revenue in 2007 as compared to a \$4.9 million decrease in 2006 and a \$3.1 million increase in net income taxes payable in 2007 as compared to a \$2.1 million increase in net prepaid income taxes in 2006 due to the size and timing of estimated payments. A large Digital ECG Franchise customer contract ended in 2006, which resulted in the decrease in deferred revenues in 2006 as the franchise advanced payments were recognized as revenue as services were performed.

For the year ended December 31, 2007, our investing activities used cash of \$13.3 million compared to \$20.9 million during the year ended December 31, 2006. In 2007, we used \$35.8 million to acquire CCSS. The impact of this on cash used by investing activities was largely offset by the net sales of investments of \$33.5 million that were used to help fund the acquisition. By comparison, net purchases of investments used \$5.8 million of cash for the year ended December 31, 2006.

During the years ended December 31, 2007 and 2006, we purchased \$11.1 million and \$15.2 million, respectively, of property and equipment. Included in property and equipment is internal use software associated with the development of a data and communications management services software product (EXPeRT[®]) used in connection with our centralized core cardiac safety ECG services. We capitalize certain internal use software costs in accordance with Statement of Position (SOP) 98-1, Accounting for Costs of Computer Software for Internal Use. The amortization is charged to the cost of Cardiac Safety services beginning at the time the software is ready for its intended use. The initial development costs of EXPeRT[®] were for the basic functionality required for this product. Additional development costs of EXPeRT[®] were incurred to develop new functionalities and enhancements. We began capitalizing costs associated with an upgrade to EXPeRT[®] (EXPeRT[®] 2) beginning in the fourth quarter of 2003. In April 2005, we began developing enhancements to EXPeRT[®] which were necessary while EXPeRT[®] 2 was being developed.

At the beginning of April 2005, we extended the remaining life of the existing EXPeRT[®] product to co-exist with EXPeRT[®] 2 and extended the depreciation period through August 2006. This resulted in a decrease in monthly amortization expense of \$32,000 beginning in April 2005. EXPeRT[®] 2 was placed into production in January 2007.

In the first quarter of 2006, we began development of a data warehouse that enables centralized capture of cardiac safety data and the ability to integrate with the Food and Drug Administration's ECG data warehouse. The data warehouse was placed into production in January 2007.

In the second quarter of 2007, we announced that we were launching a new line of business focused on electronic patient reported outcomes (EXPeRT[®] ePRO) and entered into a long-term strategic relationship with Healthcare Technology Systems, Inc. (HTS), a leading authority in the research, development and validation of computer administered clinical rating instruments. The strategic relationship includes the exclusive licensing (subject to one pre-existing license agreement) of 57 IVR clinical assessments offered by HTS along with HTS's IVR system. We placed the system into production in December 2007. As of December 31, 2007, we paid HTS \$1.5 million for the license and a \$0.25 million advanced payment against future royalties. We will pay royalties to HTS based on the level of revenues we receive from the assessments and the IVR system. An additional \$0.75 million of royalty payments are guaranteed, and will be made in two equal payments in November 2008 and May 2009. Any royalties earned by HTS will be applied against these payments. After these two payments are made, all future payments we make to HTS will be royalty payments based solely on revenues we receive from EXPeRT[®] ePRO sales.

Table of Contents

The following table presents the internal use software costs and related amortization as of December 31, 2007 (in thousands):

	Amortization Period	Labor and Consulting	Related Direct Costs of Materials	Total Capitalized Costs	Monthly Amortization	Accumulated Amortization
EXPeRT® enhancements Semi-automated ECG processing software	October 2005-September 2007	\$ 463	\$	\$ 463	\$ 20	\$ 463
Initial costs	February 2004-January 2008	449	361	810	17	793
Enhancements	October 2004-September 2008	380		380	8	309
Additional enhancements EXPeRT® 2	April 2005-March 2009	376		376	8	259
Initial costs	January 2007-December 2011	9,412	1,139	10,551	176	2,109
Enhancements	To be determined	1,724		1,724		
Data warehouse	January 2007-December 2011	722		722	12	145
ePRO™	December 2007-November 2012	163	1,658	1,821	29	29
Total		\$ 13,689	\$ 3,158	\$ 16,847	\$ 270	\$ 4,107

For the year ended December 31, 2007, our financing activities used cash of \$0.1 million compared to providing \$1.3 million for the year ended December 31, 2006. The change was primarily the result of a reduction in the tax benefits related to stock option exercises of \$2.6 million, a \$2.2 million decrease in proceeds from the exercise of stock options and \$2.4 million of repayments of capital lease obligations related to the agreement to purchase our leased cardiac safety equipment as discussed below. Partially offsetting the reduction in cash provided by financing activities was the purchase of \$5.8 million of common stock under our stock buy-back program in the first quarter of 2006. There was no purchase under the stock buy-back program in the year ended December 31, 2007.

We allowed our line of credit arrangement with Wachovia Bank, National Association totaling \$3.0 million, to lapse at June 30, 2007. We expect to reinstate this line of credit at similar terms in the first quarter of 2008. At the time the line of credit lapsed, we had not borrowed any amounts under the line of credit. As of December 31, 2007, we had outstanding letters of credit of \$0.5 million.

We have commitments to purchase approximately \$4.2 million of private label cardiac safety equipment from a manufacturer with \$2.3 million committed over a twelve-month period ending in November 2008 and \$1.9 million committed over a twelve-month period ending in December 2008. This cardiac safety equipment is expected to be purchased in the normal course of business and thus does not represent a significant commitment above our expected purchases of ECG equipment during that period. As of December 31, 2007, approximately \$0.6 million of equipment was purchased under the commitments; accordingly, the balance of such commitments as of December 31, 2007 was \$3.6 million.

As of December 31, 2007, \$6.0 million of our short-term investments were invested in variable rate demand notes or VRDN, and \$2.8 million in auction rate securities or ARS, issued by municipalities and government-sponsored agencies. Through February 6, 2008, we had reduced our total investments in ARS to \$2.5 million, principally by

investing in other short-term investments as individual ARS reset periods came due and the securities were once again subject to the auction process. The \$2.5 million we have invested in ARS and \$6.0 million in VRDN at February 27, 2008 all were rated AAA by a major credit rating agency, with the exception of one \$600,000 ARS instrument which is rated A+. Our auction rate securities are guaranteed by commercial insurance carriers. Through February 27, 2008, auctions for \$1.2 million of these ARS were not successful, resulting in our continuing to hold these securities and the issuers paying interest at the maximum contractual rate. Based on current market conditions, it is likely that auctions related to more of the ARS will be unsuccessful in the near term. Unsuccessful auctions will result in our holding ARS beyond their next scheduled auction reset dates and limiting the short-term liquidity of these investments. While these failures in the auction process have affected our ability to access these funds in the near term, we do not believe that the underlying securities or collateral have been affected. We believe that the higher reset interest rates on failed auctions provide sufficient incentive for the security issuers to address

Table of Contents

this lack of liquidity. If the credit rating of the security issuers deteriorates, we may be required to adjust the carrying value of these investments through an impairment charge and/or reclassify these investments from short-term to long-term investments.

We expect that existing cash and cash equivalents, short-term investments and cash flows from operations will be sufficient to meet our foreseeable cash needs for at least the next year. However, there may be acquisition and other growth opportunities that require additional external financing and we may from time to time seek to obtain additional funds from the public or private issuances of equity or debt securities. There can be no assurance that any such acquisitions will occur or that such financings will be available or available on terms acceptable to us.

Our board of directors authorized a stock buy-back program of 12.5 million shares, of which 8.3 million shares remain to be purchased as of December 31, 2007. The stock buy-back authorization allows us, but does not require us, to purchase the authorized shares. The purchase of the remaining shares authorized could require us to use a significant portion of our cash, cash equivalents and short-term and long-term investments and could also require us to seek additional external financing. During the year ended December 31, 2006, we purchased 400,000 shares of our common stock at a cost of \$5.8 million. No shares were purchased during the year ended December 31, 2007.

On November 28, 2007, we completed the acquisition of CCSS. Under the terms of our agreement to purchase CCSS, the total initial purchase consideration was \$35.2 million. We have additionally incurred approximately \$0.6 million in transaction costs. We may also pay contingent consideration of up to approximately \$14 million based upon our potential realization of revenue from the backlog transferred and from new contracts secured through Covance's marketing activities. The period for contingent payments runs through 2010. As of December 31, 2007, we recorded an accrual and increased goodwill by \$3.0 million for contingent payments which we paid in February 2008. Under the terms of the marketing agreement, Covance agreed to exclusively use us as its provider of centralized cardiac safety services for a ten-year period, subject to certain exceptions. We plan to fully integrate the operations of CCSS into our existing operations. We will do so by merging CCSS's Reno, Nevada based operations into our existing operations in Philadelphia, Pennsylvania or Peterborough, United Kingdom. In so doing, we will close the operations in Reno in late 2008. Costs identified at the date of the acquisition as part of this closing were estimated to be \$1.2 million for severance and \$0.9 million for lease costs. In accordance with Emerging Issues Task Force (EITF) No. 95-3, Recognition of Liabilities in Connection with a Purchase Business Combination, these amounts have been recognized as a liability as of the date of the acquisition and included in the cost of the acquisition. Other costs such as stay pay incentive arrangements and other related period costs associated with the closing of the Reno location will be expensed in the period when such costs are incurred. The stay pay incentive arrangements costs, which we estimate will be \$1.8 million, will be recognized as expense over the required service period of the employee.

The following table presents contractual obligations information as of December 31, 2007 (in thousands):

Contractual Obligations	Total	Payments due by period			
		Less than 1 year	1-3 years	3-5 years	More than 5 years
Capital lease obligations	\$ 1,178	\$ 1,129	\$ 49	\$	\$
Operating leases*	10,582	2,862	4,438	2,368	914
Purchase obligations	3,642	3,642			
Total	\$ 15,402	\$ 7,633	\$ 4,487	\$ 2,368	\$ 914

* Includes the estimated lease costs for the Reno location for the period where it will not be used for operations.

The long-term portion of other liabilities is comprised of the present value of estimated lease costs for the Reno location for the period where it will not be used for operations and deferred rent for the Reno location. The gross amount of the payments associated with these liabilities are included in operating leases in the contractual obligations table above.

Table of Contents

Inflation

We believe the effects of inflation and changing prices generally do not have a material adverse effect on our results of operations or financial condition.

Recent Accounting Pronouncements

In June 2006, the FASB ratified the EITF consensus on EITF Issue No. 06-3, *How Taxes Collected From Customers and Remitted to Governmental Authorities Should be Presented in the Income Statement (That is, Gross versus Net Presentation)* (EITF 06-3). The scope of EITF 06-3 includes any tax assessed by a governmental authority that is directly imposed on a revenue-producing transaction between a seller and a customer, and allows for the adoption of an accounting policy of presenting taxes either on a gross basis within revenue or on a net basis. We collect various taxes which have been and continue to be accounted for on a net basis. We adopted EITF 06-3 on January 1, 2007, the required effective date. The adoption of EITF 06-3 did not have an effect on our financial condition or results of operations.

In September 2006, the FASB issued FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*. This interpretation was issued to clarify the accounting for uncertainty in income taxes recognized in financial statements and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. We adopted FIN 48 effective January 1, 2007. We did not recognize any adjustment in the liability for unrecognized income tax benefits as a result of the implementation of FIN 48.

In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 157, *Fair Value Measurements*, which establishes a framework for reporting fair value and expands disclosures about fair value measurements. SFAS No. 157 becomes effective beginning with our first quarter 2008 fiscal period. In January 2008, FASB issued FASB Staff Position No. 157-2, *Effective Date of FASB Statement No. 157* which delays the effective date of SFAS No. 157 to fiscal years beginning after November 15, 2008 for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The delay is intended to allow additional time for FASB to consider the effect of various implementation issues that have arisen, or that may arise, from the application of SFAS No. 157. We are currently evaluating the potential impact of SFAS No. 157.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS No. 159 allows companies to elect to measure certain assets and liabilities at fair value and is effective for fiscal years beginning after November 15, 2007. This standard is not expected to have any impact on our financial condition or results of operations.

In December of 2007, the FASB issued SFAS No. 141R, *Business Combinations*. SFAS 141R requires the acquiring entity in a business combination to recognize all the assets acquired and liabilities assumed in the transaction at fair value as of the acquisition date. SFAS 141R is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. We are required to adopt SFAS No. 141R in the first quarter of 2009 and will be applied prospectively. The impact of adopting SFAS 141R will depend on the nature and terms of future acquisitions.

Critical Accounting Policies

In December 2001 and December 2003, the SEC issued disclosure guidance for critical accounting policies. The SEC defines critical accounting policies as those that require application of management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in subsequent periods.

Our significant accounting policies are described in Note 1 in the Notes to Consolidated Financial Statements. Not all of these significant accounting policies require management to make difficult, subjective or complex judgments or estimates. However, the following are our critical accounting policies.

Table of Contents

Revenue Recognition

We recognize revenues primarily from three sources: license fees, services and site support. Our license revenues consist of license fees for perpetual license sales and monthly and annual term license sales. Our services revenues consist of Cardiac Safety services, technology consulting and training services and software maintenance services. Our site support revenues consist of cardiac safety equipment rentals and sales along with related supplies and freight.

We recognize software revenues in accordance with SOP 97-2, Software Revenue Recognition, as amended by SOP 98-9, Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions. Accordingly, we recognize up-front license fee revenues under the residual method when a formal agreement exists, delivery of the software and related documentation has occurred, collectability is probable and the license fee is fixed or determinable. We recognize monthly and annual term license fee revenues over the term of the arrangement. Hosting service fees are recognized evenly over the term of the service. Cardiac Safety services revenues consist of services that we provide on a fee for services basis and are recognized as the services are performed. Site support revenues are recognized at the time of sale or over the rental period. We recognize revenues from software maintenance contracts on a straight-line basis over the term of the maintenance contract, which is typically twelve months. We provide consulting and training services on a time and materials basis and recognize revenues as we perform the services.

At the time of the transaction, management assesses whether the fee associated with our revenue transactions is fixed or determinable and whether or not collection is reasonably assured. The assessment of whether the fee is fixed or determinable is based upon the payment terms of the transaction. If a significant portion of a fee is due after our normal payment terms or upon implementation or client acceptance, the fee is accounted for as not being fixed or determinable. In these cases, revenue is recognized as the fees become due or after implementation or client acceptance has occurred.

Collectability is assessed based on a number of factors, including past transaction history with the client and the creditworthiness of the client. If it is determined that collection of a fee is not reasonably assured, the fee is deferred and revenue is recognized at the time collection becomes reasonably assured, which is generally upon receipt of cash. Under a typical contract for Cardiac Safety services, clients pay us a portion of our fee for these services upon contract execution as an upfront deposit, some of which is typically nonrefundable upon contract termination. Revenues are then recognized under Cardiac Safety service contracts as the services are performed.

For arrangements with multiple deliverables where the fair value of each element is known, the revenue is allocated to each component based on the relative fair values of each element. For arrangements with multiple deliverables where the fair value of one or more delivered elements is not known, revenue is allocated to each component of the arrangement using the residual method provided that the fair value of all undelivered elements is known. Fair values for undelivered elements are based primarily upon stated renewal rates for future products or services.

Business Combinations

In November 2007, we completed the acquisition of CCSS, and we may pursue additional acquisitions in the future. We are required to allocate the purchase price of acquired companies to the tangible and intangible assets we acquired and liabilities we assumed based on their estimated fair values. This valuation requires management to make significant estimates and assumptions, especially with respect to long-lived and intangible assets.

Critical estimates in valuing certain of the intangible assets include but are not limited to: future expected cash flows from customer contracts, backlog, customer relationships, proprietary technology and discount rates. Our estimates of fair value are based upon assumptions we believe to be reasonable, but which are inherently uncertain and

unpredictable. Assumptions may be incomplete or inaccurate, and unanticipated events and circumstances may occur.

Other estimates associated with the accounting for acquisitions may change as additional information becomes available regarding the assets we acquired and liabilities we assumed.

Table of Contents

For a discussion of how we allocated the purchase price of CCSS, see Note 2 to our consolidated financial statements included elsewhere herein.

Goodwill

As a result of the CCSS acquisition, we carry a significant amount of goodwill. In accordance with the provisions of SFAS No. 142, Goodwill and Other Intangible Assets, goodwill is not amortized but is subject to an impairment test at least annually. We perform the impairment test annually as of December 31 or more frequently if events or circumstances indicate that the value of goodwill might be impaired. No provisions for goodwill impairment were recorded during 2005, 2006 or 2007.

If we determine that the carrying value of goodwill may not be recoverable, we will base the measurement of any impairment on a projected discounted cash flow method using a discount rate commensurate with the risk inherent in our current business model.

Accounting for Income Taxes

As part of the process of preparing our consolidated financial statements, we are required to estimate our income taxes in each of the jurisdictions in which we operate. This process involves management having to estimate our current tax exposure together with assessing temporary differences resulting from the differing treatment of certain items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included in our consolidated balance sheets. Management must then assess the likelihood that our net deferred tax assets will be recovered from future taxable income, and, to the extent that management believes that recovery is not likely, a valuation allowance must be established. To the extent management establishes or increases a valuation allowance in a period, the consolidated statement of operations will reflect additional income tax expense.

Significant management judgment is required in determining our provision for income taxes, deferred taxes and any valuation allowance recorded against deferred tax assets. As of December 31, 2007, we had a valuation allowance of \$1.0 million related to the uncertain realization of certain deferred tax assets. See Note 7 to our consolidated financial statements for more information.

Depreciation and Amortization of Long-lived Assets

We compute depreciation on our property, plant and equipment on a straight-line basis over their estimated useful lives, which generally range from two to five years. Leasehold improvements are amortized using the straight-line method over the shorter of the estimated useful life of the asset or the remaining lease term. System development costs are amortized on a straight-line basis over four or five years or, in the case of enhancements which have no stand-alone use, the remaining life of the initial project.

We compute amortization on our intangible assets, other than goodwill, over their estimated useful lives, which generally range from one to ten years. Amortization of backlog from the CCSS acquisition is recognized on an accelerated basis while other intangibles are amortized using the straight-line method.

Changes in the estimated useful lives of long-lived assets could have a material effect on our results of operations.

Stock-Based Compensation

We follow the fair value method of accounting for stock-based compensation. We estimate the fair value of options using the Black-Scholes option-pricing model with assumptions based primarily on historical data. The assumptions

used in the Black-Scholes option-pricing model require estimates of the expected term the stock-based awards are held until exercised, the estimated volatility of our stock price over the expected term and the number of options that will be forfeited prior to the completion of their vesting requirements. Changes in our assumptions may impact the expenses related to our stock options.

The above listing is not intended to be a comprehensive list of all of our accounting policies. In many cases, the accounting treatment of a particular transaction is specifically dictated by generally accepted accounting principles.

Table of Contents

There are also areas in which management's judgment in selecting any available alternatives would not produce a materially different result. See our audited Consolidated Financial Statements and Notes thereto, which begin on page F-1 of this Form 10-K, for a description of our accounting policies and other disclosures required by generally accepted accounting principles.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our primary financial market risks include fluctuations in interest rates and currency exchange rates.

Interest Rate Risk

We generally place our investments in money market funds, municipal securities, bonds of government sponsored agencies, certificates of deposit with fixed rates with maturities of less than one year, and A1P1 rated commercial bonds and paper. We actively manage our portfolio of cash equivalents, short-term investments and long-term investments, but in order to ensure liquidity, we will only invest in instruments with high credit quality where a secondary market exists. We have not held and do not hold any derivatives related to our interest rate exposure. Due to the average maturity and conservative nature of our investment portfolio, a sudden change in interest rates would not have a material effect on the value of the portfolio. Management estimates that had the average yield of our investments decreased by 100 basis points, our interest income for the year ended December 31, 2007 would have decreased by approximately \$0.5 million. This estimate assumes that the decrease occurred on the first day of 2007 and reduced the yield of each investment by 100 basis points. The impact on our future interest income of future changes in investment yields will depend largely on the gross amount of our cash, cash equivalents, short-term investments and long-term investments. See "Liquidity and Capital Resources" as part of "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Foreign Currency Risk

We operate on a global basis from locations in the United States and the United Kingdom. All international net revenues and expenses are billed or incurred in either U.S. dollars or pounds sterling. As such, we face exposure to adverse movements in the exchange rate of the pound sterling. As the currency rate changes, translation of the statement of operations of our UK subsidiary from the local currency to U.S. dollars affects year-to-year comparability of operating results. We do not currently hedge translation risks.

Management estimates that a 10% change in the exchange rate of the pound sterling would have impacted the reported consolidated operating income for the year ended December 31, 2007 by less than \$0.4 million.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The information called for by this Item is set forth on Pages F-1 through F-32.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Conclusions regarding disclosure controls and procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of the end of the period covered by this report were designed and functioning effectively to provide reasonable assurance that information required to be disclosed by the Company (including our consolidated subsidiaries) in the reports we file with or submit to the SEC is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and

Table of Contents

(ii) accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Our evaluation of and conclusion on the effectiveness of internal control over financial reporting excludes CCSS, which we acquired on November 28, 2007. The period of time between completion of the acquisition and management's evaluation was not sufficient to permit an assessment of CCSS's internal controls. We recorded total assets of \$41.7 million related to the acquisition, representing approximately 28% of our total consolidated assets, and \$1.5 million in revenues, representing less than 2% of our fiscal 2007 total consolidated revenues.

Management's annual report on internal control over financial reporting

See Management's Report on Internal Control Over Financial Reporting on page F-2.

Report of the independent registered public accounting firm

See Report of Independent Registered Public Accounting Firm on page F-3.

Changes in internal control over financial reporting

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rule 13a-15 that occurred during our fourth fiscal quarter of 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Report of Management

Management's Report on Financial Statements

Our management is responsible for the preparation, integrity and fair presentation of information in our consolidated financial statements, including estimates and judgments. The consolidated financial statements presented in this report have been prepared in accordance with accounting principles generally accepted in the United States of America. Our management believes the consolidated financial statements and other financial information included in this report fairly present, in all material respects, our financial condition, results of operations and cash flows as of and for the periods presented in this report. The consolidated financial statements have been audited by KPMG LLP, an independent registered public accounting firm, as stated in their report, which is included herein.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining an adequate system of internal control over financial reporting. Our system of internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Our internal control over financial reporting includes those policies and procedures that:

pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect our transactions and dispositions of our assets;

provide reasonable assurance that our transactions are recorded as necessary to permit preparation of our consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and that our receipts and expenditures are being made only in accordance with authorizations of our management and our directors; and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, a system of internal control over financial reporting can provide only reasonable assurance and may not prevent or detect misstatements. Further, because of changes in conditions, effectiveness of internal control over financial reporting may vary over time. Our system contains self monitoring mechanisms, and actions are taken to correct deficiencies as they are identified.

Our management conducted an evaluation of the effectiveness of the system of internal control over financial reporting based on the framework in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, our management concluded that our system of internal control over financial reporting was effective as of December 31, 2007.

Our evaluation of and conclusion on the effectiveness of internal control over financial reporting excludes Covance Cardiac Safety Services, Inc. (CCSS), which we acquired on November 28, 2007. The period of time between completion of the acquisition and management's evaluation was not sufficient to permit an assessment of CCSS's internal controls. We recorded total assets of \$41.7 million related to the acquisition, representing approximately 28% of our total consolidated assets, and \$1.5 million in revenues, representing less than 2% of our fiscal 2007 total

consolidated revenues.

Audit Committee Oversight

The Audit Committee of the Board of Directors, which is comprised solely of independent directors, has oversight responsibility for our financial reporting process and the audits of our consolidated financial statements and internal control over financial reporting. The Audit Committee meets regularly with management and with our independent registered public accounting firm (auditors) to review matters related to the quality and integrity of our financial reporting, internal control over financial reporting (including compliance matters related to our Code of Ethics and Business Conduct), and the nature, extent, and results of the auditors' audit of our consolidated financial statements. Our auditors have full and free access and report directly to the Audit Committee. The Audit Committee recommended, and the Board of Directors approved, that the audited consolidated financial statements be included in this Form 10-K.

F-2

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
eResearchTechnology, Inc.:

We have audited eResearchTechnology, Inc.'s (the Company) internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, eResearchTechnology, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control – Integrated Framework* issued by COSO.

The Company acquired Covance Cardiac Safety Services, Inc. (CCSS) during 2007, and management excluded from its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2007, CCSS's internal control over financial reporting associated with total assets of \$41.7 million and total revenues of \$1.5 million included in the consolidated financial statements of the eResearchTechnology, Inc. and subsidiaries as of and for the year ended December 31, 2007. Our audit of internal control over financial reporting of the Company also excluded an evaluation of the internal control over financial reporting of CCSS.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of eResearchTechnology, Inc. as of December 31, 2007 and 2006, and the related consolidated statements of operations, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2007, and our report dated March 7, 2008 expressed an unqualified opinion on those consolidated financial statements.

/s/ KPMG LLP

Philadelphia, Pennsylvania

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
eResearchTechnology, Inc.:

We have audited the accompanying consolidated balance sheets of eResearchTechnology, Inc. and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of operations, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2007. In connection with our audits of the consolidated financial statements, we also have audited the financial statement schedule. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of eResearchTechnology, Inc. and subsidiaries as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2007, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

As discussed in Notes 1 and 7 to the consolidated financial statements, effective January 1, 2007, the Company adopted the provisions of Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109. As discussed in Notes 1 and 11 to the consolidated financial statements, effective January 1, 2006, the Company adopted the fair value method of accounting for stock-based compensation as required by Statement of Financial Accounting Standards No. 123(R), Share-Based Payment.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), eResearchTechnology Inc. and subsidiaries' internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 7, 2008 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Notes To Consolidated Financial Statements**

1. Background and Summary of Significant Accounting Policies:

Background

eResearchTechnology, Inc. (eRT), a Delaware corporation, was founded in 1977 to provide Cardiac Safety services to evaluate the safety of new drugs. eRT and its consolidated subsidiaries collectively are referred to as the Company or we. We provide technology and services that enable the pharmaceutical, biotechnology and medical device industries to collect, interpret and distribute cardiac safety and clinical data more efficiently. We are a market leader in providing centralized electrocardiographic services (Cardiac Safety services or EXPeRT® ECG services) and a leading provider of technology and services that streamline the clinical trials process by enabling our clients to evolve from traditional, paper-based methods to electronic processing using our EXPeRT® eClinical products and services.

Our solutions improve the accuracy, timeliness and efficiency of trial set-up, data collection from sites worldwide, data interpretation, and new drug, biologic and device application submissions. We offer Cardiac Safety services, which are utilized by pharmaceutical companies, biotechnology companies, medical device companies, clinical trial sponsors and clinical research organizations (CROs) during the conduct of clinical trials. The Cardiac Safety services are performed during all phases of a clinical trial cycle and include the collection, interpretation and distribution of electrocardiographic (ECG) data and images. The ECG provides an electronic map of the heart's rhythm and structure, and typically is performed in most clinical trials. Cardiac Safety services permits assessments of the safety of therapies by documenting the occurrence of cardiac electrical change. Thorough QTc studies are comprehensive studies that typically are of large volume and of short duration, with ECGs performed over a two- to six-month period. We also offer site support, which includes the rental and sale of cardiac safety equipment along with related supplies and freight. Additionally, we offer the licensing and, at the client's option, hosting of our proprietary EXPeRT® eClinical software products and the provision of maintenance and consulting services in support of our proprietary EXPeRT® eClinical software products.

On November 28, 2007, we acquired Covance Cardiac Safety Services, Inc. (CCSS), the centralized ECG business of Covance Inc. (Covance). See Note 2 for additional disclosure. CCSS is engaged primarily in the business of processing electrocardiograms in a digital environment as part of clinical trials of pharmaceutical candidates to permit assessments of the safety of therapies by documenting the occurrence of cardiac electrical change. Under the terms of the Purchase Agreement, we purchased all of the outstanding shares of capital stock of CCSS in consideration of an upfront cash payment of \$35.2 million plus additional cash payments of up to approximately \$14 million, based upon our potential realization of revenue from the backlog transferred and from new contracts secured through Covance's marketing activities. During 2007, Covance earned \$3.0 million of this contingent amount, which we paid in January 2008. The final net proceeds to Covance are further subject to certain post-closing working capital adjustments. As previously reported, the acquisition included a marketing agreement under which Covance is obligated to use us as its provider of centralized cardiac safety services, and to offer these services to Covance's clients, on an exclusive basis, for a 10-year period, subject to certain exceptions. We will pay Covance a portion of the revenues we receive during each calendar year of the 10-year term that are based primarily on referrals made by Covance under the agreement. The agreement does not restrict our continuing collaboration with our other key CRO, Phase I units, Academic Research Centers and other strategic partners.

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of eRT and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated. We consider our business to consist of one segment as this represents management's view of our operations.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets

Table of Contents

**eResearchTechnology, Inc. and Subsidiaries
Notes To Consolidated Financial Statements (Continued)**

and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported revenues and expenses during the reporting period. Actual results could differ from those estimates.

Revenues

Our license revenues consist of license fees for perpetual licenses and monthly and annual term licenses. Our services revenues consist of Cardiac Safety services and consulting, technology consulting and training services and software maintenance services. Our site support revenues consist of cardiac safety equipment rentals and sales along with related supplies and freight.

We recognize software revenues in accordance with Statement of Position (SOP) 97-2, Software Revenue Recognition, as amended by SOP 98-9, Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions. Accordingly, we recognize up-front license fee revenues under the residual method when a formal agreement exists, delivery of the software and related documentation has occurred, collectability is probable and the license fee is fixed or determinable. We recognize monthly and annual term license fee revenues over the term of the arrangement. Hosting service fees are recognized evenly over the term of the service. Cardiac Safety services revenues consist of services that we provide on a fee for services basis and are recognized as the services are performed. We recognize revenues from software maintenance contracts on a straight-line basis over the term of the maintenance contract, which is typically twelve months. We provide consulting and training services on a time and materials basis and recognize revenues as we perform the services. Site support revenues are recognized at the time of sale or over the rental period.

For arrangements with multiple deliverables where the fair value of each element is known, the revenue is allocated to each component based on the relative fair values of each element in accordance with Emerging Issues Task Force (EITF) Issue No. 00-21, Revenue Arrangements with Multiple Deliverables. For arrangements with multiple deliverables where the fair value of one or more delivered elements is not known, revenue is allocated to each component of the arrangement using the residual method provided that the fair value of all undelivered elements is known. Fair values for undelivered elements are based primarily upon stated renewal rates for future products or services.

We have recorded reimbursements received for out-of-pocket expenses incurred as revenue in the accompanying consolidated financial statements in accordance with EITF Issue No. 01-14, Income Statement Characterization of Reimbursements Received for Out-of-Pocket Expenses.

Revenue is recognized on unbilled services and relates to amounts that are currently unbillable to the customer pursuant to contractual terms. In general, such amounts become billable in accordance with predetermined payment schedules, but recognized as revenue as services are performed. Amounts included in unbilled revenue are expected to be collected within one year and are included within current assets. See Note 4 for further detail regarding our accounts receivable.

Business Combinations

In November 2007, we completed the acquisition of CCSS, and we may pursue additional acquisitions in the future. We are required to allocate the purchase price of acquired companies to the tangible and intangible assets we acquired and liabilities we assumed based on their estimated fair values. This valuation requires management to make

significant estimates and assumptions, especially with respect to long-lived and intangible assets.

Critical estimates in valuing certain of the intangible assets include but are not limited to: future expected cash flows from customer contracts, customer relationships, proprietary technology and discount rates. Our estimates of fair value are based upon assumptions we believe to be reasonable, but which are inherently uncertain and unpredictable. Assumptions may be incomplete or inaccurate, and unanticipated events and circumstances may occur.

F-10

Table of Contents

**eResearchTechnology, Inc. and Subsidiaries
Notes To Consolidated Financial Statements (Continued)**

Other estimates associated with the accounting for these acquisitions may change as additional information becomes available regarding the assets we acquired and liabilities we assumed.

For a discussion of how we allocated the purchase price of CCSS, see Note 2.

Cash and Cash Equivalents

We consider cash on deposit and in overnight investments and investments in money market funds with financial institutions to be cash equivalents. At the balance sheet dates, cash equivalents consisted primarily of investments in money market funds.

Short-term and Long-term Investments

At December 31, 2007, short-term investments consisted of variable rate demand notes and auction rate securities issued by municipalities and government-sponsored agencies. The variable rate demand notes and auction rate securities owned by the Company are rated AAA by a major credit rating agency, with the exception of one \$600,000 auction rate security instrument which is rated A+, and are commercially insured. The underlying securities have contractual maturities which are generally greater than ten years with auction and interest rate reset periods less than 12 months. The variable rate demand notes and auction rate securities are classified as available for sale and are recorded at fair value. Typically, the carrying value of variable rate demand notes and auction rate securities approximates fair value due to the frequent resetting of the interest rates. See Note 16 for additional disclosure regarding our investment in auction rate securities.

Pursuant to Statement of Financial Accounting Standards (SFAS) No. 115, Accounting for Certain Investments in Debt and Equity Securities, available-for-sale securities are carried at fair value, based on quoted market prices, with unrealized gains and losses reported as a separate component of stockholders' equity. We classified all of our short-term investments at December 31, 2007 as available-for-sale. At December 31, 2006 and 2007, unrealized gains and losses were immaterial. Realized gains and losses during 2005, 2006 and 2007 were immaterial. For purposes of determining realized gains and losses, the cost of the securities sold is based upon specific identification.

Property and Equipment

Property and equipment are stated at cost. Depreciation is provided using the straight-line method over the estimated useful lives of the assets ranging from two to five years. Leasehold improvements are amortized using the straight-line method over the shorter of the estimated useful life of the asset or the remaining lease term. Repair and maintenance costs are expensed as incurred. Improvements and betterments are capitalized. Pursuant to SOP 98-1, Accounting for the Costs of Computer Software Developed or Obtained for Internal Use, we capitalize costs associated with internally developed and/or purchased software systems for new products and enhancements to existing products that have reached the application development stage and meet recoverability tests. These costs are included in property and equipment. Capitalized costs include external direct costs of materials and services utilized in developing or obtaining internal-use software, and payroll and payroll-related expenses for employees who are directly associated with and devote time to the internal-use software project. During the years ended December 31, 2005, 2006 and 2007, \$4.0 million, \$4.6 million and \$3.5 million, respectively, of these costs have been capitalized. As of December 31, 2007, \$1.7 million of capitalized costs have not yet been placed in service and are therefore not being amortized. We accelerated the amortization of certain internal-use software costs due to an upgrade replacement that took place in

January 2007. Amortization of capitalized software development costs was \$1.3 million, \$1.1 million and \$2.8 million for the years ended December 31, 2005, 2006 and 2007, respectively, and was charged to cost of Cardiac Safety services. Gains or losses on the disposition of property and equipment are included in operations. Depreciation expense was \$9.4 million, \$10.1 million and \$12.1 million for the years ended December 31, 2005, 2006 and 2007, respectively.

F-11

Table of Contents

**eResearchTechnology, Inc. and Subsidiaries
Notes To Consolidated Financial Statements (Continued)**

The largest component of property and equipment is cardiac safety equipment. Our clients use the cardiac safety equipment to perform the ECG and Holter recordings, and it also provides the means to send such recordings to eRT. We provide this equipment to clients primarily through rentals via cancellable agreements and, in some cases, through non-recourse equipment sales. The equipment rentals and sales are included in, or associated with, our Cardiac Safety services agreements with our clients and the decision to rent or buy equipment is made by our clients prior to the start of the cardiac safety study. The decision to buy rather than rent is usually predicated upon the economics to the client based upon the length of the study and the number of ECGs to be performed each month. The longer the study and the fewer the number of ECGs performed, the more likely it is that the client may request to purchase cardiac safety equipment rather than rent. Regardless of whether the client rents or buys the cardiac safety equipment, we consider the resulting cash flow to be part of our operations and reflect it as such in our consolidated statements of cash flows.

Our Cardiac Safety services agreements contain multiple elements. As a result, significant contract interpretation is sometimes required to determine the appropriate accounting. In doing so, we consider factors, such as whether the deliverables specified in a multiple element arrangement should be treated as separate units of accounting for revenue recognition purposes and, if so, how the contract value should be allocated among the deliverable elements and when to recognize revenue for each element. We recognize revenue for delivered elements only when the fair values of undelivered elements are known, uncertainties regarding client acceptance are resolved and there are no client-negotiated refund or return rights affecting the revenue recognized for delivered elements.

The gross cost for cardiac safety equipment was \$29.2 million and \$36.8 million at December 31, 2006 and 2007, respectively. The accumulated depreciation for cardiac safety equipment was \$15.2 million and \$20.0 million at December 31, 2006 and 2007, respectively.

Prior to 2007, a portion of our cardiac safety equipment was obtained under operating leases. During the first quarter of 2007, we entered into an agreement to purchase all of our leased cardiac safety equipment at an established price at the end of each lease schedule's term, rather than return the equipment at that time. As a result, in accordance with SFAS No. 13, Accounting for Leases, we re-evaluated the classification of the leases and determined that the classification should be converted from operating leases to capital leases. As a result, we recorded a non-cash addition to property and equipment of \$3.6 million and \$3.6 million of capital lease obligations.

Goodwill

As a result of the CCSS acquisition, we carry a significant amount of goodwill. In accordance with the provisions of SFAS No. 142, Goodwill and Other Intangible Assets, goodwill is not amortized but is subject to an impairment test at least annually. We perform the impairment test annually as of December 31 or more frequently if events or circumstances indicate that the value of goodwill might be impaired. No provisions for goodwill impairment were recorded during 2005, 2006 or 2007.

When it is determined that the carrying value of goodwill may not be recoverable, measurement of any impairment will be based on a projected discounted cash flow method using a discount rate commensurate with the risk inherent in the current business model.

The carrying value of goodwill was \$1.2 million and \$30.9 million as of December 31, 2006 and 2007, respectively. During fiscal 2007, goodwill increased approximately \$29.7 million due to the acquisition of the centralized ECG business of Covance Inc. See Note 2 for additional disclosure regarding the CCSS acquisition.

Business Combinations and Valuation of Intangible Assets

We account for business combinations in accordance with SFAS No. 141, Business Combinations (SFAS 141). SFAS 141 requires business combinations to be accounted for using the purchase method of accounting and includes specific criteria for recording intangible assets separate from goodwill. Results of

F-12

Table of Contents

**eResearchTechnology, Inc. and Subsidiaries
Notes To Consolidated Financial Statements (Continued)**

operations of acquired businesses are included in the financial statements of the acquiring company from the date of acquisition. Net assets of the acquired company are recorded at their fair value at the date of acquisition and we expense amounts allocated to in-process research and development in the period of acquisition. Identifiable intangibles, such as the acquired customer base, are amortized over their expected economic lives in proportion to their expected future cash flows.

Long-lived Assets

In accordance with the provisions of SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, when events or circumstances so indicate, we assess the potential impairment of our long-lived assets based on anticipated undiscounted cash flows from the assets. Such events and circumstances include a sale of all or a significant part of the operations associated with the long-lived asset, or a significant decline in the operating performance of the asset. If an impairment is indicated, the amount of the impairment charge would be calculated by comparing the anticipated discounted future cash flows to the carrying value of the long-lived asset. No impairment was indicated during 2005, 2006 or 2007.

Software Development Costs

Research and development expenditures are charged to operations as incurred. SFAS No. 86, Accounting for the Costs of Computer Software to be Sold, Leased or Otherwise Marketed, requires the capitalization of certain software development costs subsequent to the establishment of technological feasibility. Since software development costs have not been significant after the establishment of technological feasibility, all such costs have been charged to expense as incurred.

Advertising Costs

We expense advertising costs as incurred. Advertising expense for the years ended December 31, 2005, 2006 and 2007 was \$0.8 million, \$0.7 million and \$0.8 million, respectively.

Stock-Based Compensation

Accounting for Stock-Based Compensation

Prior to January 1, 2006, we accounted for stock-based compensation under the recognition and measurement principles of Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees (APB 25), and related interpretations. No compensation expense related to stock option plans was reflected in our Consolidated Statements of Operations as all options had an exercise price equal to the market value of the underlying common stock on the date of grant. SFAS No. 123, Accounting For Stock-Based Compensation, established accounting and disclosure requirements using a fair-value-based method of accounting for stock-based employee compensation plans. As permitted by SFAS No. 123, we elected to continue to apply the intrinsic-value-based method of APB 25, described above, and adopted only the disclosure requirements of SFAS No. 123, as amended by SFAS No. 148, Accounting For Stock-Based Compensation Transition and Disclosure.

On January 1, 2006, we adopted the provisions of SFAS No. 123 (revised 2004), Share-Based Payment (SFAS No. 123R), which requires that the costs resulting from all share-based payment transactions be recognized in

the financial statements at their fair values. We adopted SFAS No. 123R using the modified prospective application method under which the provisions of SFAS No. 123R apply to new awards and to awards modified, repurchased or cancelled after the adoption date. Additionally, compensation cost for the portion of the awards for which the requisite service had not been rendered that were outstanding as of January 1, 2006 is recognized in the Consolidated Statements of Operations over the remaining service period after such date based on the award's original estimate of fair value. The aggregate share-based compensation expense recorded in the Consolidated Statements of Operations for the years ended December 31, 2006 and 2007 under SFAS No. 123R was \$2.8 million and \$2.0 million, respectively. For the year ended December 31, 2006, this additional share-based compensation

Table of Contents

eResearchTechnology, Inc. and Subsidiaries
Notes To Consolidated Financial Statements (Continued)

lowered pre-tax earnings by \$2.8 million, lowered net income by \$2.3 million and lowered basic and diluted earnings per share by \$0.05. We capitalized \$0.1 million of share-based compensation as system development costs in accordance with SFAS No. 123R.

Fair Value Disclosures Prior to SFAS No. 123R Adoption

Had we adopted SFAS No. 123 at the beginning of fiscal 2005, the impact on the financial results for the year ended December 31, 2005 would have been as follows (in thousands, except per share amounts):

	Year Ended December 31, 2005
Net income, as reported	\$ 15,365
Deduct:	
Net stock-based employee compensation expense determined under fair value based method, net of related tax effects	(2,817)
Net stock-based employee compensation expense related to acceleration of certain unvested stock options, net of related tax effects	(876)
Pro forma net income	\$ 11,672
Earnings per share:	
Basic as reported	\$ 0.31
Basic pro forma	\$ 0.23
Diluted as reported	\$ 0.29
Diluted pro forma	\$ 0.22

The fair value of the Company's stock-based awards to employees during the year ended December 31, 2005 was estimated at the date of grant using the Black-Scholes closed form option-pricing model (Black-Scholes), assuming no dividends and using the weighted-average valuation assumptions noted in the following table. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant. The expected life (estimated period of time outstanding) of the stock options granted was estimated using the historical exercise behavior of employees. Expected volatility was based on historical volatility for a period equal to the stock option's expected life, calculated on a daily basis.

	2005
Risk-free interest rate	3.55%
Expected dividend yield	0.00%
Expected life	3.5 years
Expected volatility	62.92%

The above assumptions were used to determine the weighted-average per share fair value of \$7.16 for stock options granted during the year ended December 31, 2005.

Valuation Assumptions for Options Granted during Fiscal 2006 and 2007

The fair value of each stock option granted during the years ended December 31, 2006 and 2007 was estimated at the date of grant using Black-Scholes, assuming no dividends and using the weighted-average valuation assumptions noted in the following table. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant. The expected life (estimated period of time outstanding) of the stock options granted was estimated

F-14

Table of Contents

eResearchTechnology, Inc. and Subsidiaries
Notes To Consolidated Financial Statements (Continued)

using the historical exercise behavior of employees. Expected volatility was based on historical volatility for a period equal to the stock option's expected life, calculated on a daily basis.

	2006	2007
Risk-free interest rate	4.82%	4.68%
Expected dividend yield	0.00%	0.00%
Expected life	3.5 years	3.5 years
Expected volatility	59.68%	55.89%

The above assumptions were used to determine the weighted-average per share fair value of \$6.15 and \$3.38 for stock options granted during the years ended December 31, 2006 and 2007, respectively.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences and carryforwards are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. We adopted Financial Accounting Standards Board (FASB) Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes, effective January 1, 2007. See Note 7 for further discussion.

Other Income, Net

Other income, net consists primarily of earnings on cash, cash equivalents, short-term investments and long-term investments as well as foreign exchange gains, net of interest expense related to capital lease obligations, foreign exchange losses and, in 2005 and 2006, impairment charges related to a cost basis investment.

Supplemental Cash Flow Information

We paid \$7.1 million, \$3.8 million and \$5.7 million for income taxes in the years ended December 31, 2005, 2006 and 2007, respectively.

During the year ended December 31, 2006, we acquired \$1.0 million of property and equipment which was financed through accounts payable at December 31, 2006. During the year ended December 31, 2007, we acquired \$3.6 million of property and equipment through the conversion of operating leases into capital leases due to an agreement to purchase all of our leased cardiac safety equipment at an established price at the end of each lease schedule's term, rather than return the equipment at that time.

Concentration of Credit Risk and Significant Clients

Financial instruments that potentially subject us to concentration of credit risk consist primarily of trade accounts receivable from companies operating in the pharmaceutical, biotechnology and medical device industries. For the years ended December 31, 2005, 2006 and 2007, one client accounted for approximately 13%, 16% and 24% of net revenues, respectively. The loss of this client could have a material adverse effect on our operations. We maintain reserves for potential credit losses and such losses, in the aggregate, have not historically exceeded management's expectations.

Notes To Consolidated Financial Statements (Continued)

Translation of Foreign Financial Statements

Assets and liabilities of our UK subsidiary, whose functional currency is the British pound, are translated into U.S. dollars at the exchange rate as of the end of each reporting period. The consolidated statement of operations is translated at the average exchange rate for the period. Net exchange gains or losses resulting from the translation of foreign financial statements are accumulated and credited or charged directly to a separate component of other comprehensive income. Foreign currency transaction gains or losses are recorded in the consolidated statement of operations as incurred.

Net Income per Common Share

Basic net income per share is computed by dividing net income by the weighted average number of shares of common stock outstanding during the year. Diluted net income per share is computed by dividing net income by the weighted average number of shares of common stock outstanding during the year, adjusted for the dilutive effect of common stock equivalents, which consist of stock options. The dilutive effect of stock options is computed using the treasury stock method.

The table below sets forth the reconciliation of the numerators and denominators of the basic and diluted net income per share computations (in thousands, except per share amounts):

Year Ended December 31,	Net Income	Shares	Per Share Amount
2005			
Basic net income	\$ 15,365	50,114	\$ 0.31
Effect of dilutive shares		2,791	(0.02)
Diluted net income	\$ 15,365	52,905	\$ 0.29
2006			
Basic net income	\$ 8,310	49,474	\$ 0.17
Effect of dilutive shares		2,011	(0.01)
Diluted net income	\$ 8,310	51,485	\$ 0.16
2007			
Basic net income	\$ 15,252	50,476	\$ 0.30
Effect of dilutive shares		1,267	(0.01)
Diluted net income	\$ 15,252	51,743	\$ 0.29

In computing diluted net income per share, 1,173,000, 1,523,000 and 1,497,000 options to purchase shares of common stock were excluded from the computations for the years ended December 31, 2005, 2006 and 2007, respectively.

These options were excluded from the computations because the exercise prices of such options were greater than the average market price of our common stock during the respective periods.

Comprehensive Income

SFAS No. 130, Reporting Comprehensive Income, requires companies to classify items of other comprehensive income by their nature in the financial statements and display the accumulated balance of other comprehensive income separately from retained earnings and additional paid-in-capital in the stockholders' equity section of the balance sheet. Our comprehensive income includes net income and unrealized gains and losses from foreign currency translation.

Notes To Consolidated Financial Statements (Continued)**

Recent Accounting Pronouncements

In June 2006, the FASB ratified the EITF consensus on EITF Issue No. 06-3, How Taxes Collected From Customers and Remitted to Governmental Authorities Should be Presented in the Income Statement (That is, Gross versus Net Presentation) (EITF 06-3). The scope of EITF 06-3 includes any tax assessed by a governmental authority that is directly imposed on a revenue-producing transaction between a seller and a customer, and allows for the adoption of an accounting policy of presenting taxes either on a gross basis within revenue or on a net basis. We collect various taxes which have been and continue to be accounted for on a net basis. We adopted EITF 06-3 on January 1, 2007, the required effective date. The adoption of EITF 06-3 did not have an effect on our financial condition or results of operations.

In September 2006, the FASB issued FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes. This interpretation was issued to clarify the accounting for uncertainty in income taxes recognized in financial statements and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. We adopted FIN 48 effective January 1, 2007. We did not recognize any adjustment in the liability for unrecognized income tax benefits as a result of the implementation of FIN 48.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, which establishes a framework for reporting fair value and expands disclosures about fair value measurements. SFAS No. 157 becomes effective beginning with our first quarter 2008 fiscal period. In January 2008, FASB issued FASB Staff Position No. 157-2, Effective Date of FASB Statement No. 157 which delays the effective date of SFAS No. 157 to fiscal years beginning after November 15, 2008 for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The delay is intended to allow additional time for FASB to consider the effect of various implementation issues that have arisen, or that may arise, from the application of SFAS No. 157. We are currently evaluating the potential impact of SFAS No. 157.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities. SFAS No. 159 allows companies to elect to measure certain assets and liabilities at fair value and is effective for fiscal years beginning after November 15, 2007. This standard is not expected to have any impact on our financial condition or results of operations.

In December of 2007, the FASB issued SFAS No. 141R, Business Combinations. SFAS 141R requires the acquiring entity in a business combination to recognize all the assets acquired and liabilities assumed in the transaction at fair value as of the acquisition date. SFAS 141R is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. We are required to adopt SFAS No. 141R in the first quarter of 2009 and will be applied prospectively. The impact of adopting SFAS 141R will depend on the nature and terms of future acquisitions.

2. Business Combination

On November 28, 2007, we acquired CCSS. See Note 1 for a summary of the terms of this acquisition. We have included CCSS's operating results in our Consolidated Statements of Operations from the date of the acquisition. We present pro forma results of operations for CCSS because the effect of this acquisition was material to eRT on a standalone basis. Under the terms of the agreement, the total initial purchase consideration was \$35.2 million. We

have additionally incurred approximately \$0.6 million in transaction costs. We may also pay contingent consideration of approximately \$14 million based upon our potential realization of revenue from the backlog transferred and from new contracts secured through Covance's marketing activities. As of December 31, 2007, we recorded an accrual of \$3.0 million of contingent payments, which we paid in January 2008. This contingent payment increased goodwill by \$3.0 million. The acquisition of CCSS was a nontaxable transaction. Under the terms of the marketing agreement, Covance agreed to exclusively use eRT as its provider of centralized cardiac safety services for a ten-

Table of Contents

eResearchTechnology, Inc. and Subsidiaries
Notes To Consolidated Financial Statements (Continued)

year period. We believe that the CCSS acquisition may enhance our revenues and, when fully integrated, our profitability because it will permit us to better leverage our personnel and technology.

The acquisition costs of CCSS have been allocated to assets acquired and liabilities assumed based on estimated fair values at the date of acquisition as follows (in thousands):

Property and equipment	\$ 2,447
Backlog	1,900
Customer relationships	1,700
Technology	400
Deferred tax assets	2,126
Goodwill, including workforce	26,686
Accrued liabilities relating to severance and lease costs)	(2,065)
Other net assets acquired	2,606
 Purchase price	 \$ 35,800

Backlog will be amortized over three years on an accelerated basis. Customer relationships will be amortized over ten years using the straight-line method and technology will be amortized over one year using the straight-line method.

The allocation of the purchase price is based upon estimates which may be revised within one year of the date of acquisition as additional information becomes available particularly with regard to the working capital adjustment as provided for in the purchase agreement and acquisition-related professional fees.

Pro Forma Results

The unaudited financial information in the table below summarizes the combined results of operations for eRT and CCSS on a pro forma basis as though the companies had been combined as of the beginning of each of the periods presented after giving effect to certain adjustments including the amortization of intangible assets. eRT's historical results of operations for the year ended December 31, 2007, included the results of CCSS since November 28, 2007, the date of acquisition. The unaudited pro forma financial information for the years ended December 31, 2006 and 2007, combines eRT's historical results for these years with the historical results for the comparable reporting periods for CCSS. The unaudited pro forma financial information below is for informational purposes only and is not indicative of the results of operations or financial condition that would have been achieved if the acquisition would have taken place at the beginning of each of the periods presented and should not be taken as indicative of our future consolidated results of operations or financial condition. Pro forma adjustments are tax-effected at our effective tax rate.

Year Ended

Notes To Consolidated Financial Statements (Continued)

3. Intangible Assets

Amortization of intangible assets represents the amortization of the intangible assets from the CCSS acquisition. There were no intangible assets as of December 31, 2006. The gross and net carrying amounts of the acquired intangible assets as of December 31, 2007 were as follows (in thousands):

Description	Estimated		Net Book Value	Estimated Useful Life (In Years)
	Fair Value	Accumulated Amortization		
Backlog	\$ 1,900	\$ 104	\$ 1,796*	3
Customer Relationships	1,700	14	1,686	10
Technology	400	33	367	1
Total	\$ 4,000	\$ 151	\$ 3,849	

* The backlog will be amortized over three years on an accelerated basis.

The related amortization expense reflected in our consolidated statements of operations for 2007 was \$151.

Estimated amortization expense for the remaining estimated useful life of the acquired intangible assets is as follows for the years ending December 31:

Years Ending December 31,	Amortization of Intangible Assets
2008	\$ 1,700
2009	542
2010	431
2011	170
2012	170
Thereafter	836
Total	\$ 3,849

4. Accounts Receivable, Net

The components of accounts receivable, net were as follows (in thousands):

	December 31,	
	2006	2007
Billed	\$ 17,710	\$ 24,996
Unbilled	709	2,275
Allowance for doubtful accounts	(553)	(553)
	\$ 17,866	\$ 26,718

F-19

Table of Contents

Notes To Consolidated Financial Statements (Continued)

5. Property and Equipment, Net

The components of property and equipment, net were as follows (in thousands):

	December 31,	
	2006	2007
Computer and other equipment	\$ 10,708	\$ 13,380
Cardiac safety rental equipment	29,214	36,797
Furniture and fixtures	3,121	3,171
Leasehold improvements	4,007	4,052
System development costs	18,386	21,931
	65,436	79,331
Less-Accumulated depreciation	(34,307)	(45,984)
	\$ 31,129	\$ 33,347

6. Line of Credit

We had a line of credit with a bank through June 30, 2007 that provided for borrowings up to \$3.0 million at an interest rate equal to the one-month LIBOR plus 1.25% that we allowed to lapse. We expect to reinstate this line of credit at similar terms in the first quarter of 2008. At the time the line of credit lapsed, we had not borrowed any amounts under the line of credit. As of December 31, 2007, we had outstanding letters of credit of \$0.5 million.

7. Income Taxes

The income tax provision consisted of the following (in thousands):

	Year Ended December 31,		
	2005	2006	2007
Current provision:			
Federal	\$ 5,934	\$ 3,023	\$ 7,038
State and local	607	102	1,212
Foreign	1,060	835	1,473
	7,601	3,960	9,723
Deferred provision (benefit):			
Federal	909	847	(403)
State and local	428	500	378

Foreign	69	(402)	(493)
	1,406	945	(518)
	\$ 9,007	\$ 4,905	\$ 9,205

Foreign income before income taxes was \$3.0 million, \$1.4 million and \$4.1 million for the years ended December 31, 2005, 2006 and 2007, respectively.

Table of Contents

eResearchTechnology, Inc. and Subsidiaries
Notes To Consolidated Financial Statements (Continued)

The reconciliation between income taxes at the federal statutory rate and the amount recorded in the accompanying consolidated financial statements was as follows (in thousands):

	Year Ended December 31,		
	2005	2006	2007
Tax at federal statutory rate	\$ 8,530	\$ 4,625	\$ 8,560
Increase in valuation allowance	122	47	
State and local taxes, net of federal	672	391	1,033
Federal tax credits	(200)	(115)	(175)
Tax-free interest income	(77)	(425)	(551)
Share-based compensation expense		483	361
Other	(40)	(101)	(23)
	\$ 9,007	\$ 4,905	\$ 9,205

Tax benefits of \$2.1 million, \$3.4 million and \$0.8 million associated with the exercise of employee stock options were allocated to equity and recorded in additional paid-in capital in the years ended December 31, 2005, 2006 and 2007, respectively.

The components of our net deferred tax assets (liabilities) were as follows (in thousands):

	December 31,	
	2006	2007
Goodwill amortization	\$ 1,197	\$ 902
Capitalized R&D expenses	1,799	1,522
Tax credit carryforwards	290	147
Net operating loss carryforwards	429	311
Investment impairment	2,431	1,029
Reserves and accruals	883	1,941
Share-based compensation expense	411	698
Gross deferred tax assets	7,440	6,550
Repatriation of UK earnings	(1,433)	(1,301)
Depreciation	(4,155)	(761)
Amortization of intangibles		(1,547)
Gross deferred tax liabilities	(5,588)	(3,609)
Deferred tax assets valuation allowance	(2,431)	(1,029)

Net deferred tax assets (liabilities)	\$ (579)	\$ 1,912
---------------------------------------	----------	----------

In the third quarter of 2005, we changed our transfer pricing methodology for the majority of our revenue categories to the profit split methodology as a result of a shift to a more global approach to the management of operations. The new methodology was also used for purposes of preparing our 2004 tax returns which were filed in the third quarter of 2005. Beginning in 2004, we shifted to a more flexible global operation where work on a study is shared among offices. While we had a transfer pricing methodology in place in 2004, we undertook a study in 2005 to determine the best available transfer pricing methodology. The profit split methodology equalizes gross margins for each legal entity based upon its respective direct costs. While we believe that the profit split methodology is the best available methodology currently, we will continue to assess the available options. In addition, we determined that all license revenue should be recognized by our operations based in the United States. As a result of the change

F-21

Table of Contents

eResearchTechnology, Inc. and Subsidiaries
Notes To Consolidated Financial Statements (Continued)

in the transfer pricing methodology, we recorded a net income tax benefit in the third quarter of 2005 of \$0.3 million related to the recovery of prior year state taxes.

At December 31, 2007, we had net operating loss carryforwards for state tax purposes of approximately \$4.8 million, which will begin to expire in 2018. At December 31, 2005, 2006 and 2007, we had a valuation allowance of \$2.4 million, \$2.4 million and \$1.0 million, respectively, related to the capital loss on the investment impairment. During the year ended December 31, 2007, the gross deferred tax asset and valuation allowance were each reduced by \$1.4 million due to the expiration of the capital loss carryforward period.

Based on our current and future estimates of pretax earnings, management believes the amount of gross deferred tax assets will more likely than not be realized through future taxable income, after consideration of the valuation allowance.

We adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes (FIN 48)*, on January 1, 2007. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS No. 109, *Accounting for Income Taxes*. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. We did not recognize any adjustment in the liability for unrecognized income tax benefits as a result of the implementation of FIN 48.

On January 1, 2007, we had \$0.8 million of unrecognized tax benefits, all of which would affect our effective tax rate if recognized. At December 31, 2007, we had \$0.9 million of unrecognized tax benefits under the provisions. We recognize interest and penalties related to unrecognized tax benefits as a component of income tax expense. The interest and penalties were insignificant during the year ended December 31, 2007. Accrued interest and penalties were \$0.1 million as of December 31, 2007.

The following is a rollforward of the total gross unrecognized tax benefit liabilities for the year ended December 31, 2007 (in thousands):

	December 31, 2007
Unrecognized tax benefits at January 1, 2007	\$ 781
Increase in unrecognized tax benefits for tax positions taken in a prior year	54
Increase in unrecognized tax benefits for tax positions taken in the current year	156
Settlements	
Expiration of statutes of limitations	
Unrecognized tax benefits at December 31, 2007	\$ 991

The tax years 2004 through 2007 remain open to examination by the major taxing jurisdictions to which we are subject. Due to potential lapses of the statutes of limitations in various jurisdictions in which we operate, it is reasonably possible that the unrecognized tax benefits may decrease by up to \$0.5 million during the next twelve

months.

F-22

Table of Contents

Notes To Consolidated Financial Statements (Continued)

8. Accrued Expenses

Accrued expenses consisted of the following (in thousands):

	2006	2007
Accrued compensation	\$ 1,425	\$ 5,886
Accrued CCSS contingent purchase price payment		3,010
Accrued outside services	750	688
Deferred rent	710	591
Other accrued liabilities	560	1,928
Total accrued expenses	\$ 3,445	\$ 12,103

9. Employee Retirement Plan

We sponsor a 401(k) savings plan for all of our eligible employees. Generally, participants in this plan may contribute a portion of their compensation on either a before-tax basis, or on both a before-tax and after-tax basis. The plan also provides for mandatory and discretionary employer matching contributions at various rates. The cost of benefits under the savings plan totaled \$0.4 million in 2005, \$0.5 million in 2006 and \$0.5 million in 2007.

10. Related Party Transactions

Our Chairman, who is a stockholder, is a cardiologist who provided medical professional services to the Company as an independent contractor through his wholly-owned professional corporation during 2005, 2006 and 2007 (see Note 12). Fees incurred under this consulting arrangement approximated \$0.3 million, \$0.3 million and \$1.5 million in the years ended December 31, 2005, 2006 and 2007, respectively. At December 31, 2006 and 2007, \$0.1 million and \$0.3 million, respectively, was owed to the professional corporation in connection with the consulting agreement. We amended our consulting agreement with the professional corporation effective in January 2006 and entered into new consulting agreements in January 2007 and January 2008 (see Note 12).

One of our directors is of counsel to the law firm of Duane Morris LLP, which performs legal services for us. We paid fees for such services in the amount of \$0.5 million, \$0.4 million and \$0.9 million for the years ended December 31, 2005, 2006 and 2007, respectively.

11. Stock Option Plans

In 1996, we adopted a stock option plan (the 1996 Plan) that authorized the grant of both incentive and non-qualified options to acquire up to 3,375,000 shares of the Company's common stock. Our Board of Directors determined the exercise price of the options under the 1996 Plan. The exercise price of incentive stock options was not below the fair value of the common stock on the grant date. Incentive stock options under the 1996 Plan expire ten years from the grant date and are exercisable in accordance with vesting provisions set by the Board, which generally are over three to five years. In May 1999, the stockholders approved an amendment to the 1996 Plan that increased the number of

shares which could be acquired through option grants under the 1996 Plan by 4,050,000 to 7,425,000 and provided for an annual option grant of 5,000 shares to each outside director. In April 2001, the stockholders approved an amendment to the 1996 Plan that increased the number of shares which could be acquired through option grants under the 1996 Plan by 2,025,000 to 9,450,000. No additional options have been granted under this plan, as amended, since December 31, 2003 and no additional options may be granted thereunder in accordance with the terms of the 1996 Plan.

In May 2003, the stockholders approved a new stock option plan (the 2003 Plan) that authorized the grant of both incentive and non-qualified options to acquire shares of our common stock and provided for an annual option grant of 10,000 shares to each outside director. The Compensation Committee of our Board of Directors determines or makes recommendations to our Board of Directors regarding the recipients of option grants, the exercise price

Table of Contents

eResearchTechnology, Inc. and Subsidiaries
Notes To Consolidated Financial Statements (Continued)

and other terms of the options under the 2003 Plan. The exercise price of incentive stock options may not be set below the fair value of the common stock on the grant date. Incentive stock options under the 2003 Plan expire ten years from the grant date, or at the end of such shorter period as may be designated by the Compensation Committee, and are exercisable in accordance with vesting provisions set by the Compensation Committee, which generally are over four years. In April 2006, the stockholders approved an amendment to the 2003 Plan that increased the number of shares which could be acquired through option grants under the 2003 Plan by 3,500,000. In accordance with the terms of the 2003 Plan, there are a total of 7,318,625 shares reserved for issuance under the 2003 Plan. The Company normally issues new shares to satisfy option exercises under these plans. On February 15, 2007, the Board of Directors of the Company, based on the recommendation of the Compensation Committee, adopted, subject to stockholder approval at the Annual Meeting, the Company's Amended and Restated 2003 Equity Incentive Plan (the "2003 Equity Plan"). On April 26, 2007, the stockholders approved the adoption of the Plan. The 2003 Equity Plan amended the Company's existing 2003 Plan in two material respects. First, it prohibits repricing of any stock options granted under the Plan unless the stockholders approve such repricing. Second, it permits awards of stock appreciation rights, restricted stock, long term performance awards and performance shares in addition to grants of stock options.

In December 2005, we accelerated the vesting of unvested stock options to acquire 490,000 shares of common stock with exercise prices greater than \$19.00 per share. As a result, these options became immediately exercisable. The decision to accelerate vesting of these stock options was made primarily to avoid recognizing compensation cost in future years upon our adoption of SFAS No. 123R on January 1, 2006. In addition, management believed that the incentive and retentive value of these options was significantly lower than their valuation using Black-Scholes.

On February 7, 2006, we entered into a new employment agreement with our former President and Chief Executive Officer in connection with the announcement of his retirement from his position as President and Chief Executive Officer and Director of the Company. His employment terminated on September 11, 2006 and any options not then exercisable became exercisable in full. As a result of this modification to his option terms, we revalued his options as of February 7, 2006 and amortized the resulting expense through September 11, 2006. This change resulted in additional pre-tax compensation expense of \$0.3 million in the year ended December 31, 2006.

Information with respect to outstanding options under our plans is as follows:

	Shares	Weighted Average Exercise Price	Remaining Contractual Term	Intrinsic Value (In thousands)
Outstanding as of January 1, 2007	4,387,033	\$ 8.56		
Granted	599,900	7.54		
Exercised	(513,745)	3.22		
Cancelled/forfeited	(363,577)	16.22		
Outstanding as of December 31, 2007	4,109,611	8.44	4.8	\$ 21,057

Options exercisable or expected to vest at December 31, 2007	3,942,050	8.35	4.8	\$	20,640
Options exercisable at December 31, 2007	2,992,536	7.66	4.5	\$	18,277

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between the closing price of our common stock on the last trading day of 2007 and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on December 31, 2007. This amount changes based on the fair market value of our common stock. The total intrinsic value of options exercised for the years ended December 31, 2005, 2006 and 2007 was \$5.1 million, \$11.9 million and \$2.5 million, respectively.

Table of Contents

**eResearchTechnology, Inc. and Subsidiaries
Notes To Consolidated Financial Statements (Continued)**

As of December 31, 2007, 2,992,536 options with a weighted average exercise price of \$7.66 per share were exercisable under the 1996 Plan and the 2003 Plan and 3,928,453 shares were available for future awards under the 2003 Plan.

As of December 31, 2007, there was \$3.4 million of total unrecognized compensation cost related to non-vested stock options granted under the plans. That cost is expected to be recognized over a weighted-average period of 2.1 years.

Tax Effect Related to Share-Based Compensation Expense

SFAS No. 123R provides that income tax effects of share-based payments are recognized in the financial statements for those awards that will normally result in tax deductions under existing tax law. Under current U.S. federal tax law, we receive a compensation expense deduction related to non-qualified stock options only when those options are exercised. Accordingly, the consolidated financial statement recognition of compensation cost for non-qualified stock options creates a deductible temporary difference which results in a deferred tax asset and a corresponding deferred tax benefit in the statement of operations. We do not recognize a tax benefit for compensation expense related to incentive stock options (ISOs) unless the underlying shares are disposed of in a disqualifying disposition. Accordingly, compensation expense related to ISOs is treated as a permanent difference for income tax purposes. The tax benefit recognized in our Consolidated Statement of Operations for the years ended December 31, 2006 and 2007 related to share-based compensation expense was approximately \$0.5 million and \$0.8 million, respectively.

12. Commitments and Contingencies

Leases

We lease office space and certain equipment. While the majority of the leases are operating leases, certain Cardiac Safety equipment is leased under capital leases. Rent expense, net of sublease rentals, for all operating leases for the years ended December 31, 2005, 2006 and 2007 was \$5.0 million, \$5.5 million and \$3.4 million, respectively.

We lease approximately 39,000 square feet of office space in Philadelphia, Pennsylvania, which expires in August 2008. We also lease approximately 31,000 square feet of office space in Bridgewater, New Jersey, which expires in January 2011 and we lease approximately 18,000 square feet of office space in Peterborough, United Kingdom, which expires in June 2013. We also lease approximately 51,000 square feet in Reno, Nevada, which expires in November 2013. We plan to vacate the Reno location within approximately one year and seek a lessee or sublessee for the property, and both we and Covance are obligated to use our commercially reasonable efforts to locate an appropriate tenant. We are responsible for all payment obligations on the Reno lease until November 28, 2008. From November 28, 2008 through November 28, 2012, we will split the payment obligations on the Reno lease with Covance, to the extent such obligations are not covered by a new tenant.

Notes To Consolidated Financial Statements (Continued)

Future minimum lease payments as of December 31, 2007 are as follows (in thousands):

	Capital Leases	Gross Operating Leases	Sublease Income
2008	\$ 1,129	\$ 2,862	\$ 26
2009	49	2,257	308
2010		2,181	323
2011		1,226	323
2012		1,142	295
2013 and thereafter		914	
	\$ 1,178	\$ 10,582	\$ 1,275
Less imputed interest	(33)		
Net present value of capital lease obligations	1,145		
Less current installments	(1,097)		
Long-term capital lease obligations, excluding current installments	\$ 48		

In the second quarter of 2007, we entered into a long-term strategic relationship with Healthcare Technology Systems, Inc. (HTS), a leading authority in the research, development and validation of computer administered clinical rating instruments. The strategic relationship includes the exclusive licensing (subject to one pre-existing license agreement) of 57 IVR clinical assessments offered by HTS along with HTS's IVR system. We placed the system into production in December 2007. As of December 31, 2007, we paid HTS \$1.5 million for the license and a \$0.25 million advanced payment against future royalties. Royalty payments will be made to HTS based on the level of revenues received from the assessments and the IVR system. An additional \$0.75 million of royalty payments are guaranteed, and will be made in two payments in November 2008 and May 2009. Any royalties earned by HTS will be applied against these payments. After these two payments are made, all future payments to HTS will be solely based on royalty payments based on revenues received from EXPeRT® ePRO™ sales.

On November 28, 2007, we completed the acquisition of CCSS. Under the terms of our agreement to purchase CCSS, the total initial purchase consideration was \$35.2 million. We have additionally incurred approximately \$0.6 million in transaction costs. We may also pay contingent consideration of up to approximately \$14 million based upon our potential realization of revenue from the backlog transferred and from new contracts secured through Covance's marketing activities. The period for contingent payments runs through 2010. As of December 31, 2007, we recorded an accrual of \$3.0 million of contingent payments, which we paid in January 2008. Under the terms of the marketing agreement, Covance agreed to exclusively use us as its provider of centralized cardiac safety services for a ten-year period, subject to certain exceptions. We plan to fully integrate the operations of CCSS into our existing operations. We will do so by merging CCSS's Reno, Nevada based operations into our existing operations in Philadelphia, Pennsylvania or Peterborough, United Kingdom. In so doing, we will close the operations in Reno in late 2008. Costs

identified at the date of the acquisition as part of this closing were estimated to be \$1.2 million for severance and \$0.9 million for lease costs. In accordance with EITF No. 95-3, *Recognition of Liabilities in Connection with a Purchase Business Combination*, these amounts have been recognized as a liability as of the date of the acquisition and included in the cost of the acquisition. Other costs such as stay pay incentive arrangements and other related period costs associated with the closing of the Reno location will be expensed in the period when such costs are incurred. The stay pay incentive arrangements costs estimated to be \$1.8 million will be recognized as expense over the required service period of the employee.

Indemnification

We license software to our customers under written agreements. Each agreement contains the relevant terms of the contractual arrangement with the customer, and generally includes provisions for indemnifying the customer against losses, expenses, and liabilities from damages that may be awarded against the customer in the event the software is found to infringe upon certain intellectual property rights of a third party. The agreement generally limits the scope of remedies for such indemnification obligations in a variety of industry-standard respects. We have not identified any losses that are probable under these provisions and, accordingly, no liability related to these indemnification provisions has been recorded.

Agreements with the Company's Management

In addition to an employment agreement with the Company's Chairman, we entered into a consulting agreement with his wholly-owned professional corporation commencing May 21, 2001. Either party may terminate the agreement at any time, with or without cause. The consulting agreement relates to the Chairman's capacity as a medical doctor and cardiologist and, among other things, requires him to advise the Company on matters related to the successful operation, marketing and business development of its Cardiac Safety services operations. The consulting agreement was amended effective January 1, 2005 to provide for compensation of \$264,000 per year plus discretionary bonuses to be determined by the Compensation Committee. A discretionary bonus of \$55,500 was awarded under the consulting agreement for the year ended December 31, 2005. The consulting agreement was further amended effective January 1, 2006 to provide for compensation of \$282,000 per year plus discretionary bonuses to be determined by the Compensation Committee. No bonuses were awarded under the consulting agreement for the year ended December 31, 2006. We entered into a new consulting agreement with Dr. Morganroth's professional corporation effective January 1, 2007. The consulting agreement provided for compensation of \$294,000 per year plus discretionary bonuses to be determined by the Board of Directors. A discretionary bonus of \$70,256 was awarded under the consulting agreement for the year ended December 31, 2007. Additionally, as part of the January 2007 agreement, we contracted with Dr. Morganroth to create a consulting product line for the Company. During 2007, Dr. Morganroth received between 80% and 90% of the fees he generated as a result of this arrangement. Dr. Morganroth was compensated \$1,115,000 for fees generated in the consulting product line for 2007. We amended the consulting agreement by entering into a new agreement with Dr. Morganroth's professional corporation effective January 1, 2008. The agreement provides for compensation of \$300,000 per year plus discretionary bonuses to be determined by the Board of Directors. Additionally, the fees associated with the consulting product line that Dr. Morganroth created have been adjusted to a constant 80% of the fees he generates as a result of this arrangement.

We entered into an employment agreement with Dr. McKelvey, our President and Chief Executive Officer, on June 19, 2006. Under the agreement, we may terminate Dr. McKelvey's employment with or without cause (as defined therein) at any time. In the event that we terminate Dr. McKelvey's employment other than for cause, death or disability, we are obligated to pay Dr. McKelvey, in lump sum, one year in salary and prorated bonus and to continue his benefits (as defined therein) for one year or until such time he receives benefits that are substantially comparable from another employer, whichever is sooner, subject to benefit plan restrictions; and, in the event of a change in control (as defined therein) of the Company, we are further obligated to accelerate the vesting of all of Dr. McKelvey's stock options, not otherwise vested, to purchase our common stock and continue his benefits for an additional year. The agreement further provides that, upon such change of control, Dr. McKelvey shall be entitled to receive the benefits described in the foregoing sentence only if (i) he is terminated other than for cause, or (ii) he resigns his employment within 60 days after the change of control because neither the Company nor the other party to the change

of control (the Buyer) offers him a position with comparable responsibilities, authority, location and compensation, provided, however, that upon a change in control, one-third of the options that Dr. McKelvey was granted on the date of this agreement shall automatically vest, to the extent not already vested, regardless of whether the foregoing conditions are satisfied. Pursuant to the agreement, Dr. McKelvey has agreed, for a period of no less

than one year after termination of employment, to refrain from (i) working with a company that directly competes with us and (ii) interfering with our business by soliciting customers or employees.

We entered into an employment agreement with Mr. Baron, our Executive Vice President and Chief Financial Officer, on May 2, 2006. Under the agreement, we may terminate Mr. Baron's employment with or without cause (as defined therein) at any time. In the event that we terminate Mr. Baron's employment other than for cause, death or disability, we are obligated to pay Mr. Baron, in lump sum, one year in salary and prorated bonus and to continue his benefits (as defined therein) for one year, subject to benefit plan restrictions; and, in the event of a change in control (as defined therein) of the Company, we are further obligated to accelerate the vesting of all of Mr. Baron's stock options, not otherwise vested, to purchase our common stock. The agreement further provides that, upon such change of control, Mr. Baron shall be entitled to receive the benefits described in the foregoing sentence only if (i) he is terminated other than for cause, (ii) he resigns his employment within 60 days after the change of control because neither the Company nor the Buyer offers him a position with comparable responsibilities, authority, location and compensation or (iii) he is employed by the Company or the Buyer, or a division or subsidiary thereof, for one year after the date of the change in control. In addition, Mr. Baron shall be entitled to his base salary paid in equal installments per our payroll policy, if his responsibilities, location or reporting relationships are significantly mitigated and diminished and Mr. Baron leaves his employment with our Company. Mr. Baron is entitled to the payments described in the foregoing sentence for one year or until such time he secures full time employment, whichever is sooner. Pursuant to the agreement, Mr. Baron has agreed, for a period of no less than one year after termination of employment, to refrain from (i) working with a company that directly competes with us and (ii) interfering with our business by soliciting customers or employees.

We entered into employment agreements with each of our other executive officers. Under these agreements, we may terminate their employment with or without cause (as defined therein) at any time. In the event that we terminate an officer's employment other than for cause, death or disability, we are obligated to pay the officer, in lump sum, six months in salary and prorated bonus and to continue the officer's benefits (as defined therein) for six months, subject to benefit plan restrictions; and, in the event of a change in control (as defined therein) of the Company, we are further obligated to accelerate the vesting of all of the officer's stock options, not otherwise vested, to purchase our common stock. The agreement further provides that, upon such change of control, the officer shall be entitled to receive the benefits described in the foregoing sentence only if (i) the officer is terminated other than for cause, (ii) the officer resigns his/her employment within 60 days after the change of control because neither the Company nor the Buyer offers the officer a position with comparable responsibilities, authority, location and compensation or (iii) the officer is employed by the Company or the Buyer, or a division or subsidiary thereof, for one year after the date of the change in control. Pursuant to the agreement, each officer has agreed, for a period of no less than one year after termination of employment, to refrain from (i) working with a company that directly competes with us and (ii) interfering with our business by soliciting customers or employees.

During 2006, we made payments to our former President and Chief Executive Officer, Joseph Esposito, in the amount of \$1,296,000 and recorded a payable to our former Executive Vice President and Chief Financial Officer, Bruce Johnson, in the amount of \$200,000, in accordance with the terms of their employment agreements with the Company. In addition, we will continue to provide Mr. Esposito with benefits until September 2008. We are not obligated to make any additional payments under these employment agreements. Pursuant to these agreements, Mr. Esposito and Mr. Johnson agreed, for a period of no less than one year after termination of employment, to refrain from (i) working with a company that directly competes with us; and (ii) interfering with our business by soliciting customers or employees.

Contingencies

We are involved in legal proceedings from time to time in the ordinary course of our business. We believe that none of these legal proceedings will have a material adverse effect on our financial condition or results of our operations.

F-28

Table of Contents

Notes To Consolidated Financial Statements (Continued)

Potential Liability and Insurance

We attempt to manage our risk of liability for personal injury or death to study subjects from administration of products under study through contractual indemnification provisions with clients and through insurance maintained by our clients and us. Contractual indemnification generally does not protect us against certain of our own actions, such as negligence. The terms and scope of such indemnification vary from client to client and from trial to trial. Although most of our clients are large, well-capitalized companies, the financial viability of these indemnification provisions cannot be assured. Therefore, we bear the risk that the indemnifying party may not have the financial ability to fulfill its indemnification obligations to us. We maintain errors and omissions liability insurance in the amount of \$10.0 million per claim and professional liability insurance in the amount of \$1.0 million per claim. Our operating results could be materially and adversely affected if we were required to pay damages or incur defense costs in connection with a claim that is beyond the scope of an indemnity provision or beyond the scope or level of insurance coverage maintained by us or the client or where the indemnifying party does not fulfill its indemnification obligations to us.

13. Fair Value of Financial Instruments

Many of our financial instruments, including cash and cash equivalents, accounts receivable, accounts payable and capital leases, are carried at cost, which approximates fair value due to the relatively short maturity of those instruments. Short-term investments and long-term investments are carried at fair value.

14. Operating Segments and Geographic Information

We consider our business to consist of one segment as this represents management's view of our operations. We operate on a worldwide basis with two locations in the United States and one location in the United Kingdom, which are categorized below as North America and Europe, respectively. The majority of our revenues are allocated among our geographic segments based upon the profit split methodology as discussed in Note 7, and revenues are generally allocated to the geographic segment where the work is performed. The 2005 and 2006 information presented in the tables below has been adjusted to reflect the impact of the changes in transfer pricing as if the changes were in effect as of January 1, 2005.

Geographic information is as follows (in thousands):

	Year Ended December 31, 2005		
	North America	Europe	Total
License revenues	\$ 6,063	\$	\$ 6,063

eResearchTechnology, Inc. and Subsidiaries
Notes To Consolidated Financial Statements (Continued)

Basic and diluted net income per share are computed independently for each quarter presented. Accordingly, the sum of the quarterly net income per share may not agree with the calculated full year net income per share.

16. Subsequent Event

During the first quarter of fiscal 2008, we continued to hold auction rate securities (ARS) in our short-term investment portfolio, as described in Note 1 to these consolidated financial statements. As of December 31, 2007, the \$2.8 million carrying value of these investments was equal to the fair value based on successful auctions preceding and, for certain ARS auctions, subsequent to year end. Through February 6, 2008, we had reduced our total investments in ARS to \$2.5 million, principally by investing in other short-term investments as individual ARS reset periods came due and the securities were once again subject to the auction process. The \$2.5 million we have invested in ARS at February 27, 2008 were rated AAA by a major credit rating agency, with the exception of one \$600,000 instrument which is rated A+. Our auction rate securities are guaranteed by commercial insurance carriers. Through February 27, 2008, auctions for \$1.2 million of these securities were not successful, resulting in our continuing to hold these securities and the issuers paying interest at the maximum contractual rate. Based on current market conditions, it is likely that auctions related to more of these securities will be unsuccessful in the near term. Unsuccessful auctions will result in our holding securities beyond their next scheduled auction reset dates and limiting the short-term liquidity of these investments. While these failures in the auction process have affected our ability to access these funds in the near term, we do not believe that the underlying securities or collateral have been affected. We believe that the higher reset rates on failed auctions provide sufficient incentive for the security issuers to address this lack of liquidity. If the credit rating of the security issuers deteriorates, we may be required to adjust the carrying value of these investments through an impairment charge. Based on our expected operating cash flows, and our other sources of cash, we do not expect the potential lack of liquidity in these investments to affect our ability to execute our current business plan.
